1971

1. To enable us to fill these positions we are looking for:
2. Applications are invited for the position of Dean of the Faculty of engineering Science,
3. Enquiries are invited from persons interested in this position
4. The position is regarded generally as equivalent in status to a senior academic appointment.
5. Applicants for the Scientific Officer/Senior Scientific Officer position should have a 1st
6. A pass degree in the above subjects is required for the Assistant Experimental/Experimental Officer position.
7. These positions will be concerned with the extraction and purification of nucleic acids, enzymes and other compounds from natural sources,
8. This position offers a good salary, annual bonus, 3 weeks' holiday, free life assurance, pension scheme and subsidised canteen.
9. Information concerning position available from Professor J. M. Bennett,
10. The Executive of the Commonwealth Scientific and Industrial Research Organization invites applications from scientists wishing to be considered for the position
11. The position carries with it superannuation privileges.
12. Scientists interested in this position should write confidentially in the first instance to:
13. one of the responsibilities of the position will be to scale up new processes
14. The position will suit a man 25 to 35 years old,
15. Applications are invited for the position of Research Assistant
16. Applications are invited for the position of Technical Officer to work on Analysis of Bacteria.
17. The position will be vacant from April 1st 1971
18. Since the original advertisement for the post of Vice-principal, the College Governors have decided to create two positions and readvertise, as follows:
19. Normally, candidates will be expected to have held a senior position in further education,
20. These vacancies provide an opportunity to join a stimulating project with early progression to key positions in the team.
21. This position is in the first instance for one year only, from 1st september 1971.
22. BIOLOGICAL SCIENCE graduate, requires permanent position.
23. Applications for appointment to two positions of LECTURER OR SENIOR LECTURER in the Department of Agronomy
24. Experience in a similar position would ensure priority consideration
25. The position includes responsibility for both research
26. for the following positions:
27. Applicants are invited for appointment to the following research position.
28. SCIENTISTS, ENGINEERS, ECONOMISTS are invited to apply for the position of Principal Scientific Officer
29. Applications are invited for the following positions:
30. Further information about the position and the School,
31. The positions are for men of proven initiative and ability in the application and innovation of chemical techniques
32. The salary will be negotiated appropriate to the seniority of the position
33. The position would involve ad hoc investigations with regard to the process.
34. Apply in writing, stating age, qualifications and present position to Chief Technician,
35. requires senior position with small company,
36. This position involves participation in the development of mathematical and statistical packages
37. The Australian Museum-Sydney Curator of Minerals Applications are invited for the above position.
38. Applications are invited for the above-mentioned position.
39. The salary attached to the position is in the range
40. together with the names of at least two professional referees) or enquiries concerning the above positions,
41. Applications are invited for the position of Von Haast Curator of Geology, Canterbury Museum.
42. FACULTY POSITIONS
43. Applications are invited for positions at the rank of Assistant professor
44. Now is the time to train for a responsible managerial position in a modern, expanding industry!
45. Applications are invited for the positions of Senior Teaching fellow in the Department of Materials Engineering.
46. FACULTY POSITIONS
47. Applications are invited for positions at the rank of Assistant professor or upwards.
48. The applications sought are for scientific staff positions.
49. FACULTY POSITIONS
50. Applications are invited for positions at the rank of Assistant professor or upwards.

1995
1. Above average oral and written communication skills are necessary for this position.
2. A two year Department of health-funded position to assist with molecular genetic research on
3. Whatever your level of qualification or experience we have a wide range of both temporary and
permanent positions throughout the UK.
4. funded position, of one year duration in the first instance,
5. The position is for one years’ duration with an expected extension for a second year.
6. Applications are invited for a three year research assistant position available immediately
7. quoting the position reference number on the envelope) to arrive no later than 16th January 1995, to:
8. If you are interested in this position,
9. As part of our continued commitment to the improvement of customer service we have two new
positions
10. This responsible position will carry an attractive remuneration package
11. Applicants should clearly indicate which position they are applying for.
12. The position is for two years
13. Applications are invited for a position as Lecturer/Computing Officer commencing
14. The position will entail joint responsibilities for teaching
15. The position is tenable for five years in the first instance.
16. POSTDOCTORAL POSITION Funded by the Wellcome Trust,
17. All positions call for excellent communication skills, initiative and ability to function in a
multidisciplinary setting.
18. preferably with working experience, for all positions.
19. Applications are invited for the above postdoctoral position,
20. A postdoctoral position funded by a BBSRC-linked Research grant is available
21. The successful candidate will have the opportunity to expand the position by increasing demand for
short courses.
22. Applications are invited for a post doctoral position with Prof.
23. Apart from a truly rewarding professional career, both positions offer a competitive salary together
with a wide range of benefits which include flexible working hours, a generous relocation package and
private healthcare.
24. Salaries and benefits for both positions are highly competitive.
25. This position attracts a starting salary of £19, 215 pa,
26. This position carries a starting salary in the range of £13, 025-£15, 220 pa, according to age and
experience,
27. Both these positions are for a three year period in the first instance
28. has an important position to fill in its UK Timber Preserving Division.
29. Postdoctoral position (Salary range £13, 941-£20, 953) A postdoctoral research post is available for a
three-year project designed to produce numerical models
30. Whatever your level of qualification or experience we have a wide range of both temporary and
permanent positions throughout the UK.
31. Applications are invited for a postdoctoral position in Accelerator Mass Spectrometry (AMS) in the
Department of Nuclear physics of the Research School of Physical sciences and Engineering.
32. For further information about the position, please contact Dr Keith Fifield
33. The position is available immediately for two years in the first instance with a possible extension to
three years.
34. Applications are invited for a position of Postdoctoral Research Officer to work in a multi-disciplinary group.
35. Applications are invited for the position of Implant Design Engineer in the Department of Biomedical Engineering, UCL, based.
36. The position is funded for two years by a project grant from the Medical Research Council.
37. Informal enquiries about the position may be made to Dr Beer.
38. A postdoctoral position is available to carry out research on the application of fluorescence in situ hybridisation (FISH) and comparative genomic hybridisation.
39. The position is funded by the Kay Kendall Leukaemia Fund for three years.
40. The position is available immediately.
41. We specialise in permanent positions within the pharmaceutical, chemical and related industries.
42. A position is available at the postdoctoral level to work on human autoantibody cloning in autoimmune disease of the peripheral nervous system.
43. The position is funded through a grant from The Scottish Hospital Endowments Research Trust (SHERT) for two years on the RA1A/B scale.
44. The position will demand some travel.
45. This position offers excellent salary benefits.
46. and to strengthen our existing team we wish to appoint the following positions.
47. and currently be in a management or supervisory position within the pharmaceutical industry.
48. The successful applicant will already be working in a management or supervisory position with an industrial background in pharmaceutical research and development.
49. The Department of Life science is seeking to appoint a suitably qualified postdoctoral scientist to a newly created position of Research Fellow.
50. The position will be on a rolling contract basis.
51. For all positions we offer excellent rewards.
52. please write with full CV stating position of interest to:
53. The remuneration for the position is set by the Remuneration Tribunal.
54. Due to continuing investment and expansion at our West Malling and Maidstone sites, we have vacancies for the following positions.
55. 2810 This position would suit a new graduate in Biochemistry or a similar discipline.
56. KELLY SERVICES All the above positions carry competitive salaries and benefits which include holiday equivalent to 25 days, pension scheme,
57. Kelly services are coordinating these positions on behalf of Genzyme Biochemicals.
58. A two year postdoctoral position, funded by Unilever Research.
59. ICRAF is seeking to fill an internationally-recruited senior position of Germplasm Specialist for Multipurpose Tree Germplasm Resource Unit (MPT-GRU).
60. The position will be based at ICRAF headquarters, Nairobi, Kenya.
61. Whatever your level of qualification or experience we have a wide range of both temporary and permanent positions throughout the UK.
62. All positions are funded permanently by Eisai Company Ltd, a major Japanese pharmaceutical company.
63. Interested candidates are invited to discuss the position informally by telephoning the Head of Department.
64. This position is a three year period appointment and,
65. For both positions, further details and an application form may be obtained from the Director of Personnel University.
66. A new position has been created in the Clinical Data Management Department (CDMD) for a Data Co-ordinator.
67. The position will be available from 1st June 1995, with a maximum duration of 5 years.
68. This position is the ideal answer for a new graduate considering a career in management.
69. In addition to the tasks outlined for the position above,
70. Salary for these positions will be dependent upon qualifications and relevant experience.
71. In addition, enquiry work and involvement in the marketing of the Pira database will form part of this varied and interesting position.
72. Due to reorganisation and expansion we invite applications for three new positions for the following:
Applications are invited for the following positions at the MRC Toxicology Unit at the Centre for Mechanisms of Human Toxicity at Leicester University.

This position is tenable for three years with a starting salary in the range of £16,191-£19,326 according to experience, plus superannuation scheme.

This position is a permanent position.

This position is tenable for two years with a starting salary in the range of £11,138-£12,707 according to experience, plus superannuation scheme.

Applications are invited for two research positions in vascular cell and molecular biology.

Both positions are for three years.

The position involves the assay of bacterial endotoxin.

The position will involve heading our R&d operation as well as overseeing our new production facility located on Warwick Science Park.

Postdoctoral Research Position

The position offers a comprehensive benefits package.

These positions provide a unique opportunity to work with various aspects of drug registration.

This position is offered on a contract basis for a period of 3 years.

Applicants for this position must be registered state.

Application packages for both positions are available from the Human Resources Department.

This position is initially being offered as a one-year fixed-term contract.

Join us as a Statistician in one of two new positions.

Both positions require self-starters with a breadth of experience in applying statistical techniques in a medical environment and good programming skills (preferably in SAS).

If you are interested in either position,

POSTDOCTORAL RESEARCH POSITIONS

To apply for the Worthing position please telephone 01903 217572 for an application form.

If you want to be considered for both positions then contact our Worthing Office making this clear.

The closing date for both positions is 13 April 1995.

as the position will be supporting a 24 hour 7 day shift operation from July,

The position would suit a young graduate (consideration would be given to those expecting to graduate in 1995) seeking a challenging role in the field of water.

The above position offers a competitive salary with an excellent benefits package.

Further information, including position documentation,

Due to internal promotion we require an energetic graduate biologist to fulfil the position of Biology Product Specialist within the busy Marketing and Technical department.

A position is available for a Scientific Officer to assist in work on the Molecular Genetics.

A Postdoctoral position is available immediately, for 15 months.

The position is open to EU nationals other than those from Ireland and the newly joined member states.

RESEARCH POSITIONS in Nonlinear Dynamics in Electronic Systems

Applications are invited for the position of Postdoctoral Research Fellow.

The position deals with the modelling of nonlinear effects.

A position is available for a graduate research assistant to work in the Eukaryotic Transcription Laboratory.

Two Postdoctoral Positions in Molecular Oncology Salaries within the range £13,941-£18,486 pa

Two Senior Research Assistant/Research Associate positions are available in the lung cancer research group.

Applications are invited for a position as Full professor of Natural resource Management.

The position is located in the Department of Systems Ecology.

UEA Norwich wishes to raise further the profile of ecology at the University by appointing an outstanding ecologist to a professorial position to be held jointly in the Schools of Biological sciences and Environmental sciences.

The University invites applications for the above position in the Department of Electrical and Electronic Engineering.

This is a senior position;

Applications, quoting Position No.
115. **Position**  
116. This **position** is available immediately to study Apolipoprotein B mRNA editing in the Molecular Medicine Group.  
117. The **position** is funded for two years with the possibility of further extension.  
118. Both **positions** require technical knowledge of formulation development.  
119. For this **position** we are seeking a Pharmacist,  
120. Proven communication and interpersonal skills are essential for this challenging and exciting **position**.  
121. To apply for any of these **positions**,  
122. Experience in products for skincare would be an advantage for one of these **positions**.  
123. This **position** will be responsible for the management and operation of the Research centre's archives,  
124. Candidates for the **position** should be qualified to degree level in a science related subject.  
125. We offer a competitive salary for the **positions** as well as a contributory Company Pension scheme, an annual bonus, Stock Purchase scheme, 25 days' holiday and an on-site subsidised restaurant.  
126. If you are interested in the **positions**,  
127. We currently have vacancies for the following **positions**:  
128. The **position** will be one of Graduate Synthetic Organic Chemist.  
129. If you are interested in any of the above **positions** please send a full CV to:  
130. The **position** will report to the Head of Clinical Research.  
131. As part of our expanding activities, we are seeking candidates from an international field with relevant experience for the following two **positions**:  
132. This **position** offers an excellent opportunity for a young chemistry graduate with industrial experience, not necessarily in textiles,  
133. There are not likely to be many suitable applicants for this specialist **position** as it requires:  
134. Salary for this **position** will be dependent upon qualifications and relevant experience.  
135. and personal qualities required for the above **position**.  
136. The **position** would suit a recently qualified graduate with practical skills  
137. which we anticipate the new team member to occupy a key **position**.  
138. Applications are invited for Faculty **positions/appointments** under the Materials Science programme from candidates  
139. The **position** Is condensed for a Matter/Applied Physicist with experience in either theory or experiment in the areas of compound semiconductors, electroactive polymers, superconductivity, nonlinear optics, device modelling, X-ray scattering and fast  
140. Whatever your level of qualification or experience we have a wide range of both temporary and permanent **positions** throughout the UK.  
141. Applicants wishing to discuss the **position** should contact Jenny Bellamy  
142. and duty statement for the **position** is available from Kathy Mitchell  
143. The **position** would suit an enthusiastic person with drive and commitment, good communication and organisational skills,  
144. Applications are invited for a **position** as Full professor of Natural resource Management,  
145. The **position** is located in the Department of Systems Eclogy.  
146. This **position** is not suitable for job share.  
147. Applicants for this **position** should possess a good first degree in metallurgy/materials science/chemistry.  
148. The **position** will report to the QA Manager.  
149. Relevant previous experience is an advantage for all **positions**.  
150. Both **positions** are graded internally at the Scientific Officer level.  
151. The first **position** requires a good honours degree in chemistry with a minimum of two years industrial experience  
152. The second **position** requires a good honours degree in chemistry with a minimum of two years industrial experience.  
153. All the above **positions** are based at our well equipped modern laboratories on the Cambridge Science Park,  
154. As part of its commitment to research in environmental geosciences, the University offers a further post for a period of up to four years, in the hope of converting it to a permanent **position** after that time.  
155. The **position** will be available from 1 August 1995, with a maximum duration of three years.
A description of the duties and qualifications required for the different positions. The position will involve laboratory work. The positions call for enthusiastic self starters with innovative enquiring minds who are good communicators. Positions in synthetic chemistry are available immediately. The positions are fixed for a term of employment, initially up until the end of March 1997, with the potential for extension. A description of the duties and qualifications required for the announced position.

POSTDOCTORAL POSITIONS IN CONDENSED MATTER THEORY

Applications are invited for two EPSRC funded postdoctoral positions. The position is one that should be viewed as having good career prospects. A position is available for a Technician to support laboratory research in the above department. Whatever your level of qualification or experience we have a wide range of both temporary and permanent positions throughout the UK. For the full-time position, include bonus, pension and medical plans, share-matching scheme and profit-related pay. The position will be attractive to anyone who wants to be involved in the challenge of moving diagnostic testing out of the laboratory environment. Applications are invited for the highly prestigious position of Lien Ying Chow. These positions have arisen in part from the recent appointment of Professor George Pickett to an EPSRC Senior Fellowship.

Vacancy exists for the following position:

The position offers a comprehensive benefits package. All positions require individuals with a nursing background. IACR-Long Ashton Research Station Applications are invited for two postdoctoral positions. The first position comprises a Research Assistantship with Dr M R Davey, The University of Nottingham. The second position involves a Brand 6 (Research Scientist) post with Dr P Hedden, IACR-Long Ashton. Applicants should have experience in molecular biology and in the case of the Nottingham position. Applications, together with a detailed CV and the names of three referees, for the first position, should be sent to Dr M R Davey. Applications for the second position to Ms F Goddard, Personnel Officer, IACR-Long Ashton Research Station.

This is a responsible position requiring the appointee to combine practical research with the administrative business of the laboratory. and applications are invited now for this new position. The position will suit those whose flexibility will enable them to cope with the interesting and varied challenges that they will face in this unique role. If you are interested in applying for this position, whatever your level of qualification or experience we have a wide range of both temporary and permanent positions throughout the UK.

Applications are invited for this new position in our programme of research into individualising treatment. Neuroscience and related subjects or those with two/three years' experience for a position within the molecular neuropathology group. The starting salary for this position will be on the Civil service Scientific Officer scale up to a maximum of £18,630 per annum inclusive of London Weighting and Pension Supplement. Interested candidates are invited to discuss the position informally by telephoning the Head of Department. All positions are available for 3 years in the first instance. The position is based at York. The position will involve developing strategies for the molecular detection of a broad range of viral agents.
An excellent opportunity for a newly qualified graduate chemist to take up this research and development-teaching company associate position.

A two year postdoctoral position in the Manchester Materials Science Centre is immediately available. This position can lead to further advancement for an ambitious person. All positions will involve learning new skills quickly, while the position is focussed on sugarcane.

Dr Phillip Jackson ... can provide more details of the position. Both positions require individuals who can work at the level of the production system.

The position will be located within the DPI/CSIRO Agricultural Production Systems Research Unit (APSRU), and selection criteria for these two positions please contact Roslyn Gaydon on phone 617 3377 0209, and technicians who are keen to obtain top positions in the pharmaceutical, chemical, and communications and have a proven track record in a technical leadership position.

All the positions offer a competitive salary supported by a comprehensive benefits package including a non-contributory pension scheme, free life assurance, membership of BUPA, 25 days’ holiday entitlement and relocation assistance.

The positions will involve analysis,

**Position No:**

**THE POSITION:**

supervise staff directly responsible to the position

Applications quoting position number P0010560 to be forwarded to:

Written applications quoting the position number with details of qualifications,

Applications are invited for a three-year postdoctoral position to investigate Rubisco gene expression. Previous relevant experience is required for the supervisory position.

The Freshwater Biological Association is offering the above positions, for a three year duration.

The positions will be awarded in open competition with maintenance grants analogous to those of the Natural Environment Research Council and a statement on the special qualifications of the candidate for this position.

The position involves laboratory work and possibly travel within Europe.

A 3 year EPSRC funded position for development of a system

Applications are invited from suitably qualified persons for these positions in the Department of agriculture:

The Center requires highly competent and motivated individuals to fill the following positions:

All the above positions will be based at ICLARM Headquarters in Manila, Philippines.

The position will suit a recently qualified graduate who will be given full training.

Interested candidates may discuss the position informally by telephoning Dr A Smith

The Center requires highly competent and motivated individuals to fill the following positions and expected vacancies for its Bangladesh Office:

The position ideally combines laboratory work with clinical commitments.

In order to improve our technical capabilities we are seeking chemists with experience in either an academic or industrial environment for the following positions:

Both positions are based in our laboratory facility in Aberdeen.
A minimum of two years' Waste Regulation, Waste Management or other relevant experience is required for these senior positions.

The position of Head of Biochemistry has arisen recently with the company. Further details about this position can be obtained from Peter Nixon.

Positions throughout the UK for Clinical Research Associates Statisticians are available immediately. They are looking for candidates with a strong background in synthetic organic chemistry for the above position funded by the EPSRC to work with Dr J S Clark. This is a varied and challenging position in a stimulating research environment.

A number of positions are available to train in Biotechnology. An Executive Position in Research is offering a remuneration package appropriate to the status of this position. Further details about this position can be obtained from Peter Nixon, who will initially be based in our Gosport office.

Both positions will commence at our existing location at Holton Heath before relocating to two new purpose-built facilities.

Both positions require a Phd degree, postdoctoral experience preferably, and benefits package for both these positions and welcome applications from suitably qualified, enclosing a comprehensive career résumé and stating which position is of interest, to: The position is available immediately.

The position will involve working a total of approximately 60 days p. a.

These positions are for a period of three years in the first instance but renewable on review.

With a degree in statistics and preferably an MSC in medical statistics or biometry you should bring to this position at least three years experience gained in contract research or a similar pharmaceutical environment. and benefits package for both these positions and welcome applications from suitably qualified, enclosing a comprehensive career résumé and stating which position is of interest, to:

Applications are invited for the position of Head of Centre.

Tel 0141 330 5736 or email gvma09@udcf.gla.ac.uk

Department of physics and Astronomy

RESEARCH ASSISTANT POSITION IN MEDICAL PHYSICS

Applications are invited from postdoctoral or similarly experienced physicists or electrical engineers for a Research Assistant position to develop microwave computational models of human body regions coupled to radiometric antennas.

Department of chemistry POSTDOCTORAL POSITION:

The position is available for one year with the possibility of an extension.

This position has tenure until 31 dec 1997 in the first instance and a salary within the Whitley Council Medical Laboratory Scientific Officer 1 scale (£10,405-£13,280).

Closing date 26 october 1995.

An equal opportunities employer

IACR-Rothamsted Integrated Approach to Crop Research

Central Research

CLINICAL SUPPLIES COORDINATOR TEMPORARY PHONE POSITION

Both positions will offer the opportunity to make significant contributions to our expanding brand portfolio in a worldwide market place.

If you are interested in applying for either position.

UNIVERSITY OF OXFORD UNIVERSITY OF OXFORD Department of Engineering science Research Assistant A New Technology for Coriolis Mass Flow Metering

Applications are invited for the position of research assistant.

The position will involve carrying out a substantial experimental programme to model the response of the flow meter to a range of operating conditions and fault modes.

The appointment will be tenured a position.

This position is offered initially on a three year, Fixed term contract.

Due to the expansion of its library and information services in Edinburgh, the following position has arisen now:

Information Scientist This challenging position provides a unique opportunity to design,

If you have the qualifications and experience for this position,

A knowledge of LC-MS and experience in assay method development and validation in a GLP environment are essential qualifications for this position.

and experience you would bring to the position to:

position funded by the Department of Trade and Industry in conjunction with Unilever, ICI, Schlumberger and Zeneca,

The position offers an exciting development opportunity

These positions would suit people who seek challenge, 

Ref 3807b) Salary for these important positions will be dependent upon qualifications and relevant experience.

The position is a strategic one,

postdoctoral research position has become vacant in the Department of physics

Whatever your level of qualification or experience we have a wide range of both temporary and permanent positions throughout the UK.

Thames Region requires three experienced hydrologists to fill positions in the Regional Water Resources Section.

EXPERIMENTAL PHYSICIST TO WORK ON PLASMA POLYMERISATION

Applications are invited for the above position, tenable for 18 months,

Salary for this position will be on the Civil service Assistant Scientific Officer scale up to a maximum of £16,640 per annum inclusive of London Weighting and pension supplement.

and an Assistant Scientific Editor The first position are for candidates with a Phd degree in organic chemistry

and a strong background in organic synthesis. The second position is for a candidate with a first degree in chemistry who has displayed particular interest in organic synthesis. Excellent language skills are required in English.

The successful candidates would be expected to be able to take up the position by 1 january 1996.

If you would like to apply for this position,

For both positions, candidates with good A level passes will be considered.
307. For both positions it is essential that you are educated to Degree level in Engineering or a Physical science.
308. A position is available in a group
309. The salary for this position will be on the Civil service Scientific Officer scale (with an initial salary of up to £)
310. Outstanding individuals are invited to apply for postdoctoral positions in the research group of Dr David Leigh
311. Research Positions
312. Postdoctoral positions available in the group of Prof P Goodfellow
313. One position is available from 1st February 1996
314. This position will be offered for a fixed term of 12 months
315. Position We are seeking an Assay Support Manager,
316. This is a senior position reporting to Director level,
317. Both positions will report to the Director of Scientific Affairs.
318. or suitably experienced CRA's. The position is based in an attractive part of southern England.
319. and benefits package reflecting the senior nature of this position.
320. In this position, you will be required to conduct a programme of audits
321. Position Description Manage clinical, technical,
322. To apply for this position,
323. This EPSRC-funded postdoctoral position is available from April 1996 for a fixed period of one year in the Civil engineering Materials Unit to work in transport
324. Research Fellow This EPSRC (ROPA)- funded postdoctoral position is available immediately for a fixed period of two years.
325. The position will be based at our European headquarters at Sandwich, on the attractive Kent coast,
326. This high profile position will report directly to the General manager
327. To be successful in this position you may have come from a clinical trials
328. This key position will carry a highly competitive salary and benefits package.
329. This position is a three year fixed term appointment which,
330. Lunds University invites applications for the following position:
331. The position is located in Lund.
332. The advertised position carries responsibilities for research and education, on undergraduate as well as postgraduate level, in solid state physics.
333. The qualifications required for the position of professor are set out in the Higher education Ordinance of 1993
334. The position is awarded by the Vice-chancellor of the University.
335. The applicant should state which scientific work he/she considers to be of most importance regarding the application for the position.
336. and women are encouraged to apply for the position,
337. Information on the nature of the position can be obtained from the Faculty Dean, Prof Klas Malmqvist,
338. Applications are invited for a position in the Development Department
339. Whatever your level of qualification or experience we have a wide range of both temporary and permanent positions throughout the UK.
340. Applications are invited for the position of CHIEF TECHNICIAN in the department of BIOCHEMISTRY
341. and biochemical analysis. These are based laboratory positions,
342. Appointment to these positions will be fixed on a term contract.
343. VSO Charity no 313757 FULL PROFESSORSHIP IN ORGANIC CHEMISTRY Due to an advertising delay in Chemical and Engineering News, the closing date for applications for the above mentioned position has been extended to noon, 2 January 1996.
344. The position was advertised in New Scientist on 22 and 29 July 1995.
345. Recent science graduates who wish to join the industry in a quality role will also be considered for entry positions within the Group.
346. a new position has been created within European Clinical Management for a Clinical Data Manager Enthusiastic,
347. If you are interested in these positions,
348. Applicants for this wide-ranging position must have a doctorate in pharmacy and experience of the industrial development of dermatological agents.
349. the position also involves servicing undergraduate teaching in pharmaceutics. Candidates should have a chemical/biological or a chemical/physical background and at least an ONC or equivalent.
350. Applications are invited for the following positions:
351. Good communication and team working skills are essential as the position will involve customer contact and the supervision of technical staff.
352. Closing date for all positions:

Essex Smithkline Beecham retains its position as one of the leading research-based pharmaceutical companies in the world today, with a broad range of innovative products under development.

353. We require an energetic graduate to fulfil the position of Technology Product Specialist within the busy Marketing and Technical department.
354. Applications are invited from suitably qualified persons for positions in the following Departments:
355. The present positions prefer people specialising in one or more of the areas:
356. The successful applicants for these positions would be required to teach the following subjects:
357. All the positions are funded by external research grants
358. Lectureship (Non-Medical) in Nutrition (Limited Term-5 Years) Section of Nutrition Department of Medicine School of Medicine Vacancy UAC 672 The position is a full-time appointment.
359. This position will be associated with these developments
360. Informal enquiries for either position may be made to Dr. Brian Tomsett on 0151-794 3616 or Dr. Mark Caddick on 0151-794 3632.
361. Applications are invited for the above position to work on overexpression
362. This position is available for three years from February 1996.
363. Whatever your level of qualification or experience we have a wide range of both temporary and permanent positions throughout the UK.
364. The position is available for a fixed term of 3 years commencing early 1996, with possibility of renewal dependent upon continued external funding.
365. neurology and infectious diseases group, people with proven experience in relevant publishing position.
366. Cookson C Cookson Group plc THE SCHOOL OF PHARMACY (University of London) POSTDOCTORAL RESEARCH ASSISTANT Centre for Materials Science Applications are invited to join a highly active multidisciplinary research group for a two-year position, The position offers a salary in the region of £16,451 and £18
367. For an informal discussion concerning this position,
368. This challenging position, arising from expansion of our activities, offers a high level of involvement and real product responsibility for a committed and enthusiastic individual.
369. In addition, two of these positions require a speciality either in metabolism or inhalation.
370. These positions will evolve to include studies in other disciplines of toxicology after appropriate training.
371. Interested candidates may discuss the position informally by telephoning Mr D Eastham on 0171-928-9292 exit 2338/2424 or Dr A Smith on ext 2314/2424.
372. The position will involve:
373. The position will involve a significant amount of travelling.
374. This position would suit a recently qualified Chemistry Honours Graduate.
375. The position in Physical Organic chemistry is concerned with the physical and chemical characterisation of drug substances
376. Newly qualified graduates and scientists with up five years relevant pharmaceutical experience will be considered for this position.
377. This position is offered on a temporary contract basis,
This **position** will be offered on a 1 year contract initially.

Assistant Health and Safety Adviser Applications are invited for this **position**

ROYAL FREE HOSPITAL SCHOOL OF MEDICINE and Institute of Child Health (University of London) Postdoctoral Research Fellow Applications are invited for this postdoctoral research fellow **position**.

2005

1. To apply for this **position** please email your CV (including 2 referees)
2. For further information on the **position**, please contact Janine Salter
3. a Research programme at Monterotondo (Italy) invites applications for the following **position** in Heidelberg,
4. For further details on this **position**
5. This **position**
6. The expansion in both our existing and new product business means that we have the following **position** to fill:
7. This is a permanent **position** the hours of work being 37.5 per week.
8. The appointment is for a full time permanent **position**.
9. New Scientist Jobs features over 17,000 **positions** a year.
10. As a result of this expansion, seven **positions** have been created.
11. Two permanent **positions**
12. and two fixed-term **positions** have been created to address developments in a number of these areas.
13. some of the **positions** offered in the Radioactive Substances Policy Unit may have responsibility for the supervision of others in the Unit.
14. Applicants wishing to apply for more than one **position** should cite reasons
15. for applying for each **position** in Section 4 of the SEPA application form
16. and reference all **positions** being applied for on the front page of the form.
17. For detailed further information and to apply for any of these **positions** please visit
18. we have exciting **positions** available associated with the development,
19. Date for receipt of applications for the above **positions** is 10th january 2005
20. To apply for one of the above **positions** please telephone our recruitment hotline for an application form
21. The **position** is available immediately.
22. This **position**
23. The post is a new **position** on a Cancer Research UK funded project grant on the "Development of oligosaccharides as anti-angiogenic agents".
24. The **position** is funded by the Wellcome Trust
25. we are inviting applications for Group Leader **positions** from outstanding scientists with an interest in cancer research, a commitment to excellence,
26. Postdoctoral **positions** are available in Professor Frame's lab studying new regulators of tyrosine kinase-induced oncogenesis.
27. Students from the UK/EU who are interested in the above **positions** should respond by e-mail
28. Applications will shortly be invited from outstanding physicists for permanent academic **positions**
29. and new postdoctoral **positions** with Professors Hardie
30. For further details about these **positions** and how to apply,
31. Besides the personal and professional rewards, both **positions** offer an attractive package,
32. These **positions** offer a competitive salary
33. In applying for the above **positions**,
34. The **position** will
35. The **position** offers an attractive tax free salary,
36. This **position** is within the Import Health Standards Team in Biosecurity New Zealand
37. A full **position** description and an application form are available on the MAF Web site
38. A new **position** has arisen for a development scientist based at our Merseyside Laboratory.
39. To coincide with this move several new **positions** have been made available.
40. It is unlikely that anyone with less than 7 years postdoctoral industrial experience in pharmaceutical research will be suitable for this **position**.
41. Basic protein purification skills are required also for this position.
42. Suitable for a school leaver these positions require an eager person to be involved in all aspects of laboratory function.
43. A new position has been created within Biovail's Dublin Research & development facility for a Senior Pre-Formulation Scientist
44. Applicants for both positions should be enthusiastic and competent researchers with excellent communication skills.
45. RESEARCH ASSISTANT POSITIONS
46. as these positions are based in Saudi arabia,
47. For all these positions we seek individuals capable of working within multi-disciplinary project teams
48. An MSC with at least 3 years experience in clinical pathology, preferably in a toxicology or pharmaceutical setting is a prerequisite for these positions.
49. stating the position for which you are applying,
50. Candidates for this position should:
51. RESEARCH ASSISTANT POSITIONS
52. Research assistant positions are available immediately to work in the new Drug Discovery Group (DDG)
53. and a covering letter explaining why they are interested in the position
54. The position involves a wide range of editorial tasks,
55. Both positions to be based in Gland, Switzerland.
56. The position requires a high level of customer interaction
57. An EPSRC-funded postdoctoral position is available for two years
58. This position requires previous experience of biomolecular modelling
59. This position is in the group of Dr Jonathan Goodman.
60. This position is in the group of Dr Peter Murray-Rust.
61. Applicants for postdoctoral positions should have a Ph d. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline.
62. This position requires previous experience of polymer experimentation/modelling
63. This position requires previous experience of polymer experimentation/modelling
64. Applicants for postdoctoral positions should have a Ph d. in a relevant area of Polymer Science
65. Wageningen University invites applicants for the position of professor of Agricultural Engineering.
66. A full professor position for 5 days a week.
67. Those who are interested in this position are asked to respond before January 31,
68. The starting salary for this position will be within the range £24,820
69. On satisfactory completion of the Fellowship, the post-holder will be offered a permanent academic position.
70. Applications are invited for Phd positions commencing in October 2005 in plant
71. In applying for the above position,
72. Due to the location of the site this position would be more suitable to a person with their own transport.
73. In applying for the above position
74. In applying for the above position,
75. The ACP positions will become available in January 2006.
76. This position is also responsible for assisting in the development and validation of analytical methods and techniques.
77. The position is based in Crawley
78. This is a position funded by the NERC Rapid Climate change thematic programme,
79. Positions are available to expand our dynamic genetic diagnostic team.
80. Positions are available for state registered clinical cytogeneticists with excellent karyotyping skills.
81. These positions would suit a grade B10
82. Successful applicants will be offered the position subject to an Enhanced Criminal records Bureau disclosure.
83. and challenging positions incorporating project management/co-ordination responsibility
84. For both positions, we are looking for self-motivated, flexible, enthusiastic people, with good problem-solving and English communication skills.
or animal science specialist with experience in project management for the position of project technical manager of the EU project QualitylowInputfood (see project website www.qlif.org).

This position offers an ideal opportunity to learn about the work of a multi-disciplinary scientific and clinical research group,

For further details about these positions and how to apply,

One Post-doc and Two Phd Positions

Within the programme a number of positions for researchers are available, or until positions are filled.

Candidates to the post-doc position should include copies of selected publications.

A position is available for a postdoctoral researcher to join an established research

Further information on the position from Professor Brown:

This position is graded on the University's 1a scale

Applications are invited from qualified candidates for Phd positions starting in October 2005.

A position is available for a Senior Editor in our Chemistry Team,

and position applied for.

All positions require you to be organised and flexible

Interest in the pharmaceutical industry is a distinct advantage for most positions.

Please also state the position for which you are applying.

This position has the benefit of a company car.

Applications are invited from State Registered Clinical Cytogeneticists for a challenging position in the Leukaemia Cytogenetic Laboratory.

The position is based in Maidenhead

These exciting, key positions offer excellent career opportunities as part of a rapidly growing drug discovery team at our state-of-the-art facilities in Mechelen

For all positions we are looking for individuals with an aptitude to learn

The position is available immediately.

The ideal candidate will be a recent graduate with a degree in Biochemistry looking for a first position.

If you are interested in applying for this position please send your current CV

Competitive salaries are available for the above positions.

This position requires regular international travel

If this position interests you please apply to Melanie Merriden

Leader-Track Position in Neurobiology

Scientists interested in developing an independent programme of basic research are invited to apply for a programme leader-track position in the Division of Neurobiology.

Programme leader-track positions are equivalent to tenure-track

This is a permanent position.

For an informal discussion in relation to the Leeds based position, please contact Anatole Lubenko,

Stem cell Manager on 0776 428 0221 and in relation to the Birmingham based position, please contact Dorothy Mcdonald, Stem cell Manager

Interviews for the Leeds based position:

For the Birmingham based position:

To apply for this position please email your CV (including 2 referees) and current salary details

Applicants should hold a Phd in an area of chemistry relevant to the position

Position information, selection criteria and application details can be viewed on our website at

Applications are invited also for a postdoctoral Research Associate position in the PEACE Operations Team

Applications are invited for a postdoctoral position of up to

five years' experience working in a senior position in a regulated environment and knowledge of GMP, GCP and GLP.

Applicants are invited also for a postdoctoral Research Associate position in the PEACE Operations Team

As part of the EPSRC Supergen Fuel cell Consortium we are seeking to fill the above positions.

All positions are available from 1 april 2005,
131. Chemistry, materials, physics and chemical engineering backgrounds will be suitable for these positions.
132. The position is offered initially on a one year fixed-term basis.
133. This is an exciting position.
134. The position requires an innovative individual who is able to fit into a small friendly team.
135. These positions are likely to appeal to candidates looking for a rewarding challenge in an innovative and stimulating research environment.
136. All positions.
137. Further information on specific positions can be obtained by contacting Bii directly.
138. This is a permanent position with a minimum starting salary of £18,859 per annum.
139. Together with normal phase/chiral chromatographic separations are also components of the remit for this varied position.
140. Experience of establishing screening assays would be particularly desirable for one of these positions.
141. And a covering letter indicating why you are interested in the position.
142. The position is considered by internal and external technical and commercial contacts as the key information source for EC, EW and SL herbicide formulations.

We hold a leading global position in markets for labels and security films.

143. Senior Scientific Positions.
144. You will have a PhD in Chemistry or related subject and preferably 3-5 years experience in postdoctoral or industrial research positions.
145. To apply for one of the above positions please send your CV together with a covering letter.
146. Closing Date for receipt of applications for the above positions is 23rd May 2005.
147. Applications are invited now for the position of Validations Manager.
148. Closing Date for each position is 20.05.2005.
149. In applying for the above position,
150. For the Research department in Naarden, we are offering the positions of:
151. For further inquiries about the position of Group leader Bio-processing R&D-Senior scientist fermentation
152. For further inquiries about the position of Application expert for Fermentation and Diagnostics you can contact Mr. A. Kunst.
153. This position is fixed-term for a period of three years.
154. Postdoctoral Positions and PhD Studentships.
155. Following the award of a major £2.7 million grant from EPSRC, we are seeking outstanding candidates for five postdoctoral positions and four PhD studentships.
156. Either a crop or animal science specialist with experience in project management for the position of project technical manager of the EU project.
157. This position is for a Molecular Biologist.
158. For the position of Professor/Associate professor in Microsystems Technology within the Faculty of science & Health at Dublin City University (DCU).
159. The holder of the position will be expected to provide leadership in research.
160. Closing date for receipt of applications for the above position:
161. Electrical engineering and related disciplines for ten Postdoctoral positions.
162. The following positions are available.
163. Two positions are available, starting on July 1.
164. A position is available at Glasgow from July 1.
165. A further two positions are available at Manchester University.
166. A fourth position.
167. A position is available in this area at Sheffield from October 1.
168. A position is available from October 1 to work on the development of fluidic devices for integration with near-field lithography systems to facilitate reactive nanolithography.
169. For further information about how to apply for these positions.
170. These five new positions are an exciting opportunity aimed at strengthening the research of the Department in materials, structures,
More than 2,000 graduates since 1977 have become environmental leaders worldwide, through our alumni network, with key positions in industry, major international, regional, national government bodies, NGOs,

applications are being invited for the position of Senior Editor.

The position gives the job holder the opportunity to make a real difference in an exciting new business area.

The position will be based in a modern manufacturing unit with excellent pilot plant facilities in West Yorkshire.

Please note that the full salary range for this position is £27,528-£40,807.

To drive our portfolio forward two new positions are being created:

The position gives the job holder the opportunity to make a real difference in an exciting new business area.

The position will be based in a modern manufacturing unit with excellent pilot plant facilities in West Yorkshire.

Please note that the full salary range for this position is £27,528-£40,807.

To apply for this newly created position you will be able to take a lead role in optimising cgmp systems that include,

To be considered for all positions you will need to be motivated a self person with the ability to identify the key issues within a complex environment

For an informal discussion in relation to this position, please contact Dr Rebecca Cardigan

This position is available for 2 years.

The following postdoctoral research fellow positions are available immediately

All positions are for up to four years dependent upon starting salary,

The start date for both positions is September 2005.

Further particulars and application procedures for these positions are available at

Under the direction of Dr Mark Ashe and Dr Graham Pavitt, the position will be within active,

The position is available from 1 August 2005

Applications are invited for these positions.

Please note that the full salary range for this position is:

The position will involve extensive work at category 3 level

The positions require highly self-motivated

Please note that the full salary range for this position is

This position would particularly suit a new or recent graduate.

Cell Biologist (two positions)

Each of these demanding positions offers the competitive salary

indicating which position you are interested in, by email to Nicky Harmes

These are key positions in Agropharm

This position requires a person with experience of developing pesticide formulations

This position will be based at our manufacturing plant in Telford, Shropshire.

This position requires a person with experience of registration processes in the UK/Europe, Africa and the Middle east.

This position will be based at the Head Office in the village of Penn, Buckinghamshire.

Both positions will involve experimental work in a laboratory and factory environment.

The positions are available immediately.

This position would suit someone who is both flexible and adaptable.

and current salary details, stating the position for which you are applying, to Nadia Zarin,

To apply for this position,

The position would suit a recent graduate;
The position is funded through the Rapid Change thematic programme of NERC, with a covering letter stating why you feel that you are the right person for one of these positions to Prof Derek Eastham.

These Cancer Research UK funded positions are required to drive the development of clinically relevant human tumour models for the evaluation of the clinical drug development team. This Cancer Research-UK funded position has been created to provide technical laboratory support for the increased activity of the clinical drug development team. This Wellcome Trust-funded position is available from 1 september 2005 for a period of one year in the first instance.

To apply for this position, a position is available on two new projects. Applications are invited for the above position funded by British aerospace plc. Applications are invited from suitably qualified candidates for the above position.

This is a challenging opportunity and the position entails: This is a full-time (36 hours per week) permanent position. These positions are available in each discipline to be filled, mainly for blue chip pharmaceutical companies in London and the Home Counties.

This position is vital for the continued development of assessment capabilities of squid and fish stocks within the Department.

These positions have been created following significant expansion to our current facilities and increases in the volume and complexity of the work. The position requires excellent organisational skills. The position would suit a highly motivated individual with excellent written and verbal communication skills. This position, supported by the Leverhulme Trust, is available from 1 november 2005 for up to 23 months.

We have an exciting position for a full-time Biochemistry or Histology Technician. Applications are invited for a Postdoctoral Researcher position from individuals with appropriate research background. A Leverhulme Trust-funded postdoctoral position is available within the Department of Gene Therapy at the National Heart and Lung Institute.

All positions attract great benefits including contributory final salary pension scheme (with life cover), flexible working hours, family friendly provisions and at least 25 days' holiday. Applications are invited for a research technician position within the Department of Gene Therapy at the National Heart and Lung Institute. Applications are invited for a research technician position within the Department of Gene Therapy at the National Heart and Lung Institute. All positions offer a competitive salary, pension and benefits.
with a car for the home-based positions.

The position will involve the preparation of safety reports to be submitted to regulatory agencies and ethics committees within regulatory timeframes.

The primary purpose of these positions is to coordinate the shift team’s day-to-day production activities.

The main responsibilities for this position are to:

The above position requires you to work within a Monday to Friday time period on a rotating 3-shift of 12.25 hour shifts.

If you are interested in applying for the above position, each of these exciting positions offers the competitive salary.

Each position is predominantly practical and laboratory based.

The positions open are for two laboratory based scientists to develop

The positions available are for four laboratory based synthetic organic chemists with at least two years' relevant practical experience.

The positions available offer the opportunity to work on varied chemistries across multiple therapeutic targets.

A position has arisen for an Applications Chemist within the Polymer Characterisation Technical support Group at Polymer Laboratories.

The position involves sample analysis by chromatography, data interpretation and reporting, and full training will be given in all aspects of the position.

Please note that this role is not a writing position.

This position is an ideal opportunity to use your scientific expertise in a dynamic publishing environment.

If you wish to be considered for more than one position you should make this clear in your letter of application.

The first position will be associated with the atomic scale characterisation of the coatings in the as-deposited state and after high temperature exposure.

Positions in the School of Chemistry.

We invite applications for the following position:

The position is supported available immediately

Position 2 Postgraduate (or equivalent) We seek someone with a taxonomic background to research,

The three-year appointments will be on the Imperial College scale R&e B (£22,870-£33,330) and (Position 2) Kew Band D (from £20,276).

Position 1) Sarah Snellin, CPB, Imperial College London

(Position 2)

This position is for one year in the first instance, funded by the Natural Environment Research Council.

Applications are invited for a position based in the Division of Pathology

The position is funded by Children with Leukaemia for three years

We seek a dynamic team of individuals to fill the following positions.

as these positions are based in Saudi arabia,

TWO SENIOR POSITIONS IN NEUROBIOLOGY:

Salary for this position would be negotiable together with company pension and life insurance, private health insurance and access to sports facilities.

Applications for this position will not be acknowledged.

The position would suit a recent graduate as full training will be given.

Closing date for all positions:

This position is for a term of 5 years.

To apply for one of these positions,

Positions exist both for analytical chemists

The positions offer a great opportunity for applicants to extend their experience

To apply for the above position,

This position involves editing short pieces in all of Biology for online publication

For the more senior position at least four years'relevant experience gained in an industrial sector;

for the other position relevant postgraduate experience would be an advantage.
Applicants with suitable qualifications and experience in biotechnology, microbiology, molecular biology, biochemistry or a closely related subject are invited to apply for the following positions to join the CAMBIO research team.

We wish to appoint a Research Technician to a permanent position to join a research team studying the development of the nervous system.

These are hands-on positions requiring someone who can simply get things done in a structured and timely manner.

The salary range for this MRC Band 3 position is from £35,972 to £43,715 inclusive of Location Allowance.

In this position you will manage a group of approx. 35 academic.

The position entails all phases from new molecules/formulations through field testing, product development to support for range products.

This challenging position requires a university degree in natural sciences such as a Phd in biology, zoology, agronomy or similar.

Senior Scientists-
To apply for the position, Lubrizol Ltd are seeking individuals for the following positions at our Hazelwood, Derby Technology centre. We have a number of positions for chemists to be located in well equipped laboratories in Sutton. For the Medical Writer position you should have 2 years medical writing experience in a clinical trials environment as well as the ability to assimilate the energy and the qualifications for this position, please apply with full CV (including current salary). The Relativity Group in the Department of Applied mathematics and Theoretical physics of the University of Cambridge is looking for a graduate to fill a research assistant position. This position presents an opportunity for a scientist to enter the rapidly developing field of research management and administration.

Postdoctoral positions. Position B is in glass synthesis and photonic crystal fibre fabrication; Applications are invited for 3 positions within the new Cancer Research UK funded Clinical Trials Unit (CTU). The position would suit a recent graduate. Just as in the UK and US, there is a dearth of permanent positions. To apply for these full-time/contract positions, Applications are invited for the following research position at ITT Dublin funded. All of the positions will be based in the research centre in Dublin, and will provide technical leadership. This important position will provide technical leadership and consequently the CLF is currently recruiting to five positions as detailed below. Three positions are fixed available 2 term (2 years duration) laser/experimental scientist positions are available to work directly on Phase 1 of this project.

Good communication skills are essential for all positions as well as the ability to work effectively in teams. Four YEAR FIXED TERM POSITION Ref:

We are now looking to recruit for the following positions within the Biologics Manufacturing Support and Technology (BMST) Team:

Positions are available at both our Milton Keynes and King's Lynn facilities. A position is available within our assay biology group to support a range of projects, principally in the oncology area. Positions are available immediately for experienced medicinal chemists to join our dynamic chemistry department. A new position of Bioprocess Technologist exists within our Projects/Production Support Team. System Engineering invites applications for the full-time position of Technology Translator. This is a newly-created position. Please note that all positions in the Agency require a minimum standard of IT literacy and consequently the CLF is currently recruiting to five positions as detailed below.

Three positions are fixed available 2 term (2 years duration) laser/experimental scientist positions are available to work directly on Phase 1 of this project. The following position exists to work directly on this project. The following position exists:

Potential candidates can informally discuss these positions with Dr. John Collier by email at j.collier@rl.ac.uk.

Good communication skills are essential for all positions as well as the ability to work effectively in teams.

The positions require graduates in pharmaceutical sciences, pharmacy or chemistry/biology. To apply for this position please email your CV and to provide a permanent academic position at the end of the initial five year contract. The position requires a broad-based knowledge.

Applications are invited for a postdoctoral position, under the supervision of Dr Vitaliy Khutoryanskiy. This unique position, funded by the Leverhulme Trust.

For exceptional individuals, appointment to a more senior position may be considered.
The School of Earth sciences and Geography is seeking a GIS specialist to fill a position of Senior.

Closing date for both positions:

3. We retrieve and store other tissues, like skin and bone, ready for use in life-saving and life-improving situations, as well as manufacture and provide plasma products such as clotting factors.
4. manage complex stakeholder situations and possess a creative approach to problem solving.
Annexe 4-12-1 Occurrences de SITUATION dans BNC
Here is a random selection of 50 solutions from the 15708 found.

A06 2090 And even more difficult in an audition situation where they are looking at your height, weight and how much stage you can fill by your very presence.

AAT 291 The situation is stable,’ Mr Mihai Chitac said on television.

ADF 1028 When people meet in a social situation, they assess each other visually.

AJU 1422 Blame becomes indiscriminate when it cannot be focused and seen in context, and it is black people who are the ones to suffer most in this situation.

AL6 612 It must be someone, said an analyst, ‘who can get a grip on the situation’.

AN3 1014 In many cases, the traits of resignation and the low inspirations that Lewis describes are merely responses to the situation in which the poor find themselves and will therefore change

ART 2099 Later, in City Life magazine, Morrissey would speak of the backstage situation.

CGX 217 In this situation I knit the joining rows by hand, making sure on the final row to knit using large stitches.

CKC 1596 I just came to make myself au fait with the situation and to garner some information in return for some I give you.’

CLH 187 Positive answers to most of these questions (which is what would be typical) indicate a poor language learning situation according to the model of social distance.

CLN 136 Granting evils in the slave trade and colonial slavery it was none the less argued that government could more easily influence planters and traders through better regulation than they could control the situation on the West African coast.

CMH 197 The deepening understanding of how brain cells work, that developed during the late nineteenth and early twentieth centuries, changed the situation dramatically.

CML 162 Duncan laughed at the absurdity of the situation.

CN6 535 When research goes further and links ends and means, it can help us gauge the significance of factors that seem relevant to a situation.

EA3 141 The test situation itself was often authoritarian and unfamiliar, discouraging response, and leading to bright children being labelled unresponsive and subnormal.

ECY 1640 To Freud it was, therefore, a surprising fact that these patients did not dream of being cured of their neurosis, but returned to the original painful situation.

EF8 1099 Then they encounter an odd situation.

EVX 891 The situation is not that we always have confirmed hypotheses, and sometimes or often lack an enumeration of the elements of a causal circumstance.

EW8 619 Hence the well-known Oedipal situation.
I suggest that voices should not be entirely dissociated from the social context in which they function and that therefore all texts in modern spoken languages should be regarded as having ‘the implication of utterance’, and be referred to typical participants in some generalised context of situation.

Thus in the health field, as on the politico-military level, there is a situation of ‘dual power’, with different systems and conceptions of health confronting, interacting and affecting each other in complex ways.

Further 800,000 reported moving north to Austria from Yugoslavia…should this number materialize food and guard situation will become critical.

It depicts the present situation, the desired situation, all ways of obtaining all possible situations, and the possible steps between them.

In the three years from 1983/4 to 1986/7, this situation changed and the Conservative government began to make the RAWP targets ‘bite’.

Having said that, the question of to whom the resource should be provided must be addressed, and here I propose to generalise to a large extent, though initially to make reference to the local situation.

Do people obviously there are virtually everyone at the flats, was in a is in a poor situation

The situation temporarily stabilised, but in further unrest in November at least thirty deaths were reported and tens of thousands of refugees were reported to have joined fellow nationals in the other republic (eventually about 130,000 Azeris left Armenia and 200,000 Armenians made the journey in the reverse direction).

The family situation will have specific marketing implications, as in the purchase of housing, washing machines or children's clothes.

This created an awkward situation, since Waismann was expounding some of Wittgenstein's earlier ideas while Wittgenstein himself was developing later ideas in his own classes.

The individual is motivated to change the situation back to an equitable one.

Equally unlikely but certainly possible is a situation in which the defendant has sexual intercourse with a woman without her consent, mistakenly believing that woman to be his wife.

Have we really learnt to be content, in any, and every situation?

While Eva was at Usher the political situation did not give them too much pause for thought.

With the end of that accumulatory episode we arrive at the second resultant stratigraphical situation as suggested in "7".

‘You don't understand the situation here at all, do they, Corbett?’

Within the material constraints of the situation they did what they could for the kids.

The problem can arise acutely in a situation where Y takes goods from X on ‘sale or return’ terms.

‘There is no room for complacency and these trends will need to be maintained and indeed accelerated if the unacceptable difference between Protestant and Catholic unemployment rates is to be
eliminated and if the Commission is to achieve its target of bringing about a situation where there is equal representation of both communities in all areas and sectors of employed.’

HJ8 42 Although clearly this matter concerns only those doctors working full time in the NHS and not in general practice, I strongly recommend that you ensure your medical officer or advisor is aware of the situation and has taken appropriate steps to obtain adequate medical defence cover.

HL0 2866 He added: "Creating political parties hastily will inevitably result in the problems of regionalism or tribalism at a time when the head of state is trying to unite families and households which were torn apart by the situation created in the past."

HLM 118 On July 30 James Kunder, director of the US Office of Disaster Assistance, criticized the two warring leaders and described the situation in Somalia as "the single worst humanitarian crisis in the world".

HP2 256 Even in December 1940 — well after the Dunkirk turning-point identified by Titmuss — the Ministry of Food was uncertain whether expansion was possible because of the continuing ‘precarious’ supply situation.

HWD 1256 Such statistics aid our understanding of population movements but they mask the bewildering complexity that was the reality of the situation.

HXS 156 It is a case of dramatic irony when we as readers recognize and share with the fabliau author a knowledge of the "realities" of the fictitious situation denied to the merchant of Orléans and may laugh at the merchant's misguided belief as a result.

J3C 30 Over 50 consumer and public-health organizations from across the European Community, working together as the Food Irradiation Network, have drawn attention to the confused situation concerning food irradiation since the introduction of the EC-wide single market.

JA6 180 if, if, that is the situation that you are saying now, from what you know now,

JT7 413 This authority is taking a somewhat different view to that public inquiry than the erm the highways authority er after shire hill er erm so I I think if we were to take a decision tonight it could affect our position at the public inquiry adversely er and I would not want us to get into that situation so I think to some extent er councillor timing on this motions is wrong and we shouldn't be be er discussing it now.

K8W 1292 This situation would occur in circumstances as in the late 1960s, when due to a credit squeeze, interest rates rose.

KD0 10848 If you're in an all play situation you can move on straight away.

KLY 594 This must be an ongoing and er, this must be an ongoing commitment by the G M B and we would ask that the executive report back on the situation in Eastern European regularly and at least at every annual congress.

A0K 489 In effect, the insider who reveals the structural formations of a system of power inverts that power and the revelation creates a situation where elements of ‘anti-structure’ (Turner 1969, 1974) now present a version of how things might be constituted; and what has been seen as solid reality begins to be identified as only one social possibility.

A2V 487 ‘It looks like a short-term reaction to a short-term situation, partially sparked off by the ridiculous reaction to the August trade figures,’ Sir Trevor added.
A64 1713 Mere words could do little in the short term to reverse the chaotic situation.

ADF 1223 There are a number of ways around such a situation.

ARY 378 The accumulation of data over a long period of time is a situation that lends itself well to the use of a microcomputer.

AYJ 1069 The process is much the same in each negotiating situation; actual bargaining is seldom the same from one issue to another.

AYR 264 Based on the relationship of spending and payment you establish with us, you will be able to spend more — or less — depending on the situation you find yourself in.

B1X 3402 ‘What do you mean, ‘forced into a situation’?”

B2J 235 However, it is felt that the adoption of a theoretical uniform gradient of 50° C/km for the whole of Phanerozoic time represents an extreme situation yielding maturity values unlikely to have been exceeded in practice.

B77 1361 To what extent these isolated scenes of rural India add up to a true picture of the situation across the country is difficult to say.

C9K 1361 Or is the situation down to other factors?

C9L 2871 Technical mastery means feeling at ease in both types of situation.

C9N 1552 At M.I. London you are in an environment conducive to progress, with the emphasis very much on performing with new-found skills in an active hands-on situation, rather than remaining a bedroom virtuoso.

CEY 2878 Nora's realism and level-headed assessment of the situation made Louise ashamed of her own emotional reaction to the news.

CLH 862 In all interpreting it is not only the technical skill of the interpreter which is important but also his attitude to the job and to the particular situation in which it has to be carried out (R.W. Anderson, 1978); also important is his awareness of the different expression of the same meaning in different cultures (‘the sense’ of the message; see Seleskovitch, 1978).

CLP 1189 The distinction from apprehension is necessary to incorporate the phenomenon that it is possible to understand a situation in one sense without knowing what to do about it.

CMN 439 He has pointed out that both our own experience and Marx's writings suggest that changes result from a disparate collection of circumstances which cannot be reduced to a single contradiction, but are jointly sufficient for a situation to become volatile.

CMU 1630 The case for setting out financial implications is obvious in a situation in which the school budget is controlled by the governors.

CRS 1814 Whereas she had seen the assessment as a way of addressing Tom's unsettled home situation, establishing an objective base line from which she and her ex-husband could identify how their differences were affecting Tom, the EP refused to become involved in this area.

EDA 982 The situation began to look ugly but Superintendent Bristow and all the available men on duty — some in plain clothes kept things in hand.
An application for a warrant of further detention can be made up to 42 hours from the commencement of the detention clock, in a situation where the 36 hour period runs out at a time when it is not possible for a magistrate's court to sit.

Other Unionists, including Law himself, were less sure, even though they shared their colleagues' concern about the political and economic situation; nevertheless it was agreed to go ahead, but that Lloyd George should make the first move.

Thus, a condition or situation which is highly deprivatory in this respect for one man or woman under certain circumstances may seem of minor consequence for another person or against a different circumstantial background.

There was no great enthusiasm for Gloucester, but equally there was no great opposition to him, and Buckingham engineered the situation in such a way that on 25th June Edmond as Mayor and other leading citizens offered the crown to Gloucester, who eventually accepted.

Chives will grow in such a situation, and their narrow, tall shape does not take up much room even if it is vertical.

If we are successful in identifying these the opportunities may exist to prevent a situation that is desperately difficult to cure.

In this kind of situation neither can say what their real feelings are.

He would enjoy taking charge of the situation, compelling Underwood to marry Clare, showing her that he could still be charitable in spite of the past.

She had achieved much, and given them all an injection of hope with her sparkling personality, keen interest in their concerns and positive reactions to even the most difficult situation.

And surprising people show surprising acts of kindness to those in my situation.

To ask the Secretary of State for Scotland if he will make a statement on the economic situation in the Western Isles.

The legal situation in Scotland differs from that in England and Wales.

Security sources have revealed the final decision on how to approach a potentially volatile situation would hinge on a number of key factors.

In addition, the engagement letter should include acknowledgement and acceptance of the situation from both parties and confirmation of the firm's independence.

Although Tanjug reported on July 6 that the situation in Kosovo was quiet, repeated protests were reported in the following days, notably in the Kosovo capital, Pristina; thousands of workers responded to calls by ethnic Albanian leaders for a one-hour daily strike, despite public threats of dismissal by the Serbian authorities.

[The situation in the UK will be covered in the November News Digest with details of the Nov. 4 House of Commons debate and voting.]

This situation is considerably eased by the structure and information content of the new product matrix approach.

The relationship between structure and process represents the climate of the situation.

More than one Gaullist found himself in the difficult situation of having to give de Gaulle a lecture in Gaullism.

Erm I, I er much of the compliment that you paid t to me and the department in terms of the efficiency that we've, which we're dealing with the correspondence, I, I am conscious of the fact that in something of this nature those er members that you mentioned, some of them are, are here this morning erm are, are not er s receiving er a regular erm series of er erm letters or, or pieces of information from the department and it's very much an ad hoc situation erm and at the moment as far as is concerned, we are waiting for the the completion of some of the reporting before we erm er submerge them with er a, a, a, a lot of paper, but if there are any particular issues that erm any of those members or indeed any other members erm particularly wants to pursue, er th th the position is as it is on, on any matter, please do get in touch.

My Lord it will be helped in that situation in my submission by evidence from which is dealing with what is the accepted and standard practice in that solicitors in handling these forms of transactions and what advice is given my Lord undoubtedly that must be of benefit to the courts.

She had created the situation in which the pupils had learned, had acted as mediator and had controlled their learning process.

‘We are expecting doctors to review the situation at some stage today.’
Jane, who has three children, says the situation has become intolerable and there is not enough room for both families.

The real solution lies in cooperation to eliminate the causes of illegal migration, in easing the situation of countries from where migrants flow through economic assistance, training and other means,’ Boross said.

Also included were copies of the search and arrest warrants, a religious tape and three magazines with articles on the situation.

Faced with those kind of possible reductions in service, if there is a penny one penny more than necessary spent on administration and bureaucracy wherever it is in the youth and community programme that is gonna be less money for front line vision and the Labour group can have to think very, very carefully about that and the issue is gonna be that if we're spending too much money or if they're coming back to supplementary estimates which won't be available or given the financial situation next year if we're having two heads of centres or whatever when we could have one that is gonna mean less money for front line services to the people of Highfields and there'll only be one group that will be responsible for that, if that does come about and I think that's something that we all need to bear in mind because what we were told as members of that committee is that the youth and community budget is gonna be in for some very serious times in the future and it's mainly the government's fault because of the way they've decided to re-organise the situation it's going out of our hands into the control of an unelected body and like most members of this council I think we would oppose that but that's the reality of the situation and I could not support any increase of funds or for any community centres if I knew it was simply gonna be spent on administration.

No the situation was getting worse and the only way that they were that it was gonna be made better was by violence and, cos the violence is the only way

Well, the studies that I've been involved in, the computer has performed certainly as well as a consultant, and at times much better than a junior doctor in the particular situation that I'm talking about.

Now if you get a situation like that I mean the key question is do people actually want to change in this kind of way, or would they at least like to sort of experiment a little bit in the way they handle a group of children?
Annexe 5-1 Occurrences de ROLE dans CAEMS

**Role = job / position**
**Role = mission, rôle**

### 1971

The successful applicant will be expected to assume an active **role** within the group [733-072 (1971) : 47]

Graduate Microbiologist Technician required for research on **role** of trachoma/inclusion conjunctivitis agent [733-081 (1971) : 47]

Candidates for the post should have specialist interests in the field of the structure / property relationship in materials and of its industrial applications, and broad interests in the **role** of technology in the man-made world. [745-001 (1971) : 57]

Co-ordination of other donor support for relevant services; involvement in the establishment of KARI’s role as the national information focal point; [1963-006 (1995) : 51]

4. The role demands either a Chartered Librarian or full membership of the Institute of Information Scientists. Preferably with a Science degree to Masters level, you must be experienced in managing networks of libraries and in working with biological or agricultural literature. [1963-006 (1995) : 51]

5. Quality Assurance is a major aspect of our business and this key role will carry responsibility for ensuring that raw materials received and products manufactured on site meet our stringent quality standards. [1963-007 (1995) : 52]

Working for the IT Manager, Transnational Regulatory Affairs and Compliance, your role will be to manage and support the provision of electronic regulatory submissions, develop the future strategy of electronic based dossiers, and negotiate recommendations to both internal and external customers. [1963-008 (1995) : 52]

6. With 5 years’ relevant experience, preferably in a regulatory role, you will have an understanding and appreciation of Information Technology backed up by strong project management, planning and organisation skills. Both innovative and self reliant, at ease negotiating and communicating. [1963-008 (1995) : 52]

7. you will be eager to develop both yourself and your role in a forward looking environment. [1963-008 (1995) : 52]

8. For the right person a comprehensive range of competitive benefits is available - as appropriate for a challenging role in a blue chip company. [1963-008 (1995) : 52]

9. Working as a Principal Research Scientist within our pre-clinical Research Department you’ll have a challenging role which will require skills of leadership and responsibility and the ability to interact effectively and successfully with colleagues and research professionals world-wide to achieve our goals. [1963-012 (1995) : 53]

10. In this challenging and demanding role, you’ll be working as a Senior Research Scientist, leading a small team and applying the latest technology to develop disease models and identify new medicines. [1963-012 (1995) : 53]

A research assistant is required for a project studying the role of T cells in human ocular inflammation disease. The project will involve cellular assays, flow cytometry and molecular techniques including PCR. [1963-019 (1995) : 54]

11. This is a role which gives scope for creativity plus the opportunity of working directly with clients and opinion leaders on publications, marketing and educational materials. [1963-020 (1995) : 55]

The Institute’s primary role is to provide a central co-ordinating function for UK Government Departments on research and information relating to links between environmental quality and health. [1963-023 (1995) : 56]

12. The successful applicant will probably be a recently graduated Chemical Engineer seeking a varied role that will encompass both commercial field work with development and maintenance of customer treatment facilities, and responsibility for the engineering development of the division’s manufacturing site in Liverpool. [1963-025 (1995) : 56]
13. The **role** will appeal to someone who is able to demonstrate the ability to lead a team of qualified service engineers, to communicate effectively with customers and enjoys also the challenge of working closely with a small management team. [1963-025 (1995) : 56]

Under the day to day supervision of the principal scientist, you will be expected to play a lead **role** in researching links between poverty and tuberculosis as well as contributing to other studies within the research team. [1963-026 (1995) : 56]

Course Co-ordinator play a central **role** in the production and presentation of Open University Multi-media courses. [1963-056 (1995) : 63]

The principal **role** will be to co-ordinate and develop clinical research projects in the field of gastrointestinal disease and to perform physiological measurements. [1963-060 (1995) : 64]

15. We have an opportunity for a dynamic consultant who is prepared to work hard for high rewards. Previous experience in a scientific and/or recruitment **role** is essential, ideally in consultancy. [1963-067 (1995) : 65]

17. a **role** for a progressive professional, probably 5 years-plus experience in international clinical development [1963-073 (1995) : 67]

Molecular biology of saponin-detoxifying enzymes & their **role** in fungal pathogenicity to plants (A Osbourn & M J Daniels) [1963-092 (1995) : 72]

**Role** of mannitol dehydrogenase in plant disease (R P Oliver) [1963-092 (1995) : 72]

Dr B C Rooney Exploring the **role** of pregnancy-specific β1 glycoproteins in cancer. [1963-100 (1995) : 74]

18. A key **role** in product development, leading improvements in the process formulation of existing and new lithographic plate coating solutions (organic and aqueous), emulsions and aqueous based developing solutions. [1967-003 (1995) : 61]

The Executive Director undertakes a lead **role** in negotiating and liaising at all levels of executive government. [1967-005 (1995) : 62]

A willingness to take a leading **role** in the recruitment of human subjects is essential. [1967-007 (1995) : 64]

Your **role** will be to support the chromatography Technician in Chromatographic Separation from 10 Lt to 300 Lt scale with some involvement in secondary downstream processing tasks. [1967-008 (1995) : 65]

Our Study Directors have a key **role** with responsibility for the initiation, conduct and reporting of studies, leading teams of graduate scientists and technical personnel. [1967-011 (1995) : 66]

20. This is an exceptionally challenging new **role**, combining practical forensic science with a commitment to business development at the Laboratory of the Government Chemist. [1967-020 (1995) : 69]
As Manager of this Fire Investigation Group, your role will be to establish, train and lead a team of Fire Investigators. [1967-020 (1995) : 69]

Applications are invited for a Nuffield Foundation (Oliver Bird Fund) funded post, tenable from 1 April 1995 for two years, to work on the construction and expression of site directed mutants of the Tissue Inhibitor of Metalloproteinases-3 (TIMP-3) and to study its role as a potential growth factor. [1967-023 (1995) : 69]

The effects of gestation and hypoxia on the Ca\(^{2+}\) -force relationship will also be examined, along with role of any changes in Ca\(^{2+}\) -sensitivity, (see Wray, S.1993, Am.J.Physiol. 264, C1-C18, for further details). [1967-025 (1995) : 70]

You will contribute to the analysis of existing products and play a full role in ensuring the laboratory practice complies with all health, safety and quality requirements. [1967-029 (1995) : 71]

The Building Research Establishment is an executive agency of the Department of the Environment. Leading UK research into building and construction and the prevention and control of fire, it has a key role in advising government. [1967-031 (1995) : 72]

As an experienced bench scientist, you will play a key role in the process of compound progression, through the physico-chemical and biopharmaceutical assessment of new chemical entities, where attention to detail and a highly organised approach is desirable. [1967-043 (1995) : 75]

The successful applicant will join an active research group studying the structure and function of muscle receptors and the role of sensory feedback in the control of movement. [1967-047 (1995) : 76]

The data manager's role is facilitated by the use of an award winning Database Management System developed in-house. [1967-049 (1995) : 77]

Current work includes observational, theoretical and modelling of ocean mixing, air sea interaction and gas exchange, and ocean circulation, role of the oceans in climate, and the global carbon cycle. [1967-055 (1995) : 78]

21. As we are talking of a market currently worth £1.3 billion, with tremendous scope for expansion, you'll understand that this is a major role. [1967-058 (1995) : 79]

Just as important, you must have the confidence, experience and stature to conduct high level technical discussions, and the all round communications skills to play a major role in helping Royal Mail realise its technological vision. [1967-058 (1995) : 79]

22. Reporting to the Company Chemist, your role will encompass the provision of a range of expert chemistry and shelf life services to all aspects of our business, from Manufacturing to Customer Service, to ensure HJ Heinz remains at the forefront of technological advancement in the highly competitive food industry. [1967-061 (1995) : 80]

It offers the opportunity to supervise and develop a team of people whose role is to provide a comprehensive pharmaceutical packaging service. [1967-064 (1995) : 80]

23. An experienced individual is required to undertake this interesting dual role. [1967-074 (1995) : 83]
24. This role will be based at our new office in Camberley, Surrey, and the post holder will be expected to live within commuting distance of this office. [1967-074 (1995) : 83]

Technician (Ref: 27/95) required to work on projects examining the role of bile acids in liver disease, colorectal cancer and gallstones. [1967-077 (1995) : 83]

25. The EPSRC has recently launched a managed programme in Combustion Research. Tenders are now invited for the role of Co-ordinator within this Programme. [1967-085 (1995) : 85]

To work within the Department of Experimental Dermatology on the identification and biology of keratinocyte stem-cells and their role in skin disease. [1967-088 (1995) : 86]

26. The EPSRC Clean Technology and Built Environment Groups wish to invite tenders for the role of coordinator within this programme. [1967-091 (1995) : 87]

Applications are invited for a 3 year studentship available immediately to work on the role of cortical cytoskeleton in the growth and differentiation of oral keratinocytes. [1967-092 (1995) : 87]

The role of agricultural intensification in the decline of the Corn Bunting [1967-094 (1995) : 87]

Funded by the Migraine Trust, the project is part of a programme to study the cerebral innervation, and will focus on the role of Nerve Growth Factor in vascular head pain. [1967-101 (1995) : 89]

The post will build on previous work on the characterisation of biomarker compounds, and on the role of lipids in the carbon budget of Krill, [1971-008 (1995) : 58]

combining aspects of both previous studies to develop our understanding of the role of Krill in the South Ocean Ecosystem. [1971-008 (1995) : 58]

Research experience in the role of fauna in soil processes would be a particular advantage. [1971-008 (1995) : 58]

27. The role involves communication across all business interfaces ensuring that customer needs are translated into successful products efficiently and effectively. [1971-012 (1995) : 59]

29. For this challenging role, your desire and determination to implement projects with discernible success will demand communication and interpersonal skills of the highest order. [1971-013 (1995) : 59]

30. If you are a truly professional regulatory specialist looking to join an experienced team in a pivotal role, send your cv to Ann Judge, Eames • Jones • Judge • Hawkings. [1971-013 (1995) : 59]

31. You will have migrated into a systems and application support role, perhaps with a supplier.

32. Later migrating into a systems and application support role. [1971-014 (1995) : 60-61]

33. More recently you will have been in a support role either with a manufacturer or software supplier. [1971-014 (1995) : 60-61]

34. It’s a role which is critical to the sales cycle, so a genuine and total commitment to customer requirements is essential, as is your ability to present proposals up to and including Board level. [1971-014 (1995) : 60-61]
The biochemical role of the ras switch in cell signalling pathways Dr M. Webb [1971-017 (1995) : 61]

The role of isoforms of 14-3-3 Protein in signal transduction Dr A. Aitken [1971-017 (1995) : 61]

The role of the CD86 polypeptide during T cell differentiation and mature T cell function Dr R. Zamoyska [1971-017 (1995) : 61]

35. Apart from a rewarding and challenging role which will enable you to expand your knowledge, there is considerable potential for career development and you will enjoy an excellent salary and benefits package. [1971-024 (1995) : 63]

Biochemical and molecular analysis of the role of melatonin in ageing in the nematode Caenorhabditis elegans (Drs R E Isaac and D Coates) [1971-030 (1995) : 65]

36. This role will interact extensively with a team of pharmacokinetic scientists in the USA and will provide pharmacokinetics expertise primarily for European projects. [1971-036 (1995) : 67]

This will require working closely with a creative and motivated R&D team and playing a key role in the company's development. [1971-041 (1995) : 68]

37. Enthusiastic, willing to learn and keen to develop your role, we offer a competitive salary and benefits package including performance related-pay, private medical insurance and life cover. [1971-042 (1995) : 69]

Your key role will be to liaise with colleagues on the design and analysis of clinical studies for the international development of a product. [1971-049 (1995) : 71]

Working directly to the Chief Executive, with full Corporate support, you will play a vital role in advising the Council on the development of a Local Agenda 21 strategy, including the formation and promotion of effective partnerships within the community. [1971-053 (1995) : 72]

The role of the research assistant will be to support the Specialty Working Groups and liaise between collaborating parties as required. [1971-056 (1995) : 73]

38. The position would suit a young graduate (consideration would be given to those expecting to graduate in 1995) seeking a challenging role in the field of water and environmental analysis. [1971-069 (1995) : 77]

39. Your role will be to identify and develop new products in response to school and college requirements, write instructional and catalogue copy, liaise with educationalists and suppliers and provide advice and support to teachers and technicians. [1971-078 (1995) : 78]

The successful applicant will undertake a research project related to our current interests and in addition will be expected to play a key role in organising and maintaining core facilities essential to the smooth running of the laboratory. [1971-090 (1995) : 80]

40. With a degree in an agriculturally related subject, you will have a minimum 4/5 years' trials development experience, of which at least 2 years must have been spent in a coordination role. [1971-094 (1995) : 81]

41. If you believe you can bring the necessary technical skills and personal attributes to these demanding and rewarding technology development roles, please write with full CV and current salary details [1976-001 (1995) : 59]
In addition to outstanding strength in research and scholarship, the successful candidate should provide leadership and inspiration for fundamental research, encourage the integration of his/her own research with that of others, and play an active role in teaching and departmental administration. [1976-003 (1995) : 60]

42. The main purpose of the role is to co-ordinate and develop the medical information services, with the aim of meeting business objectives. [1976-007 (1995) : 61]

43. The co-ordination of pharmacovigilance activities for the UK and Ireland will be another facet of the role. [1976-007 (1995) : 61]

44. If you are proactive, have a desire to succeed and are looking for a management role, please send/fax your CV to Sharon Carter-Jones, [1976-007 (1995) : 61]

46. The successful candidate will have had several years experience of applying the principles of GMP, preferably in a clinical trial supplies unit and have the skills to thrive on the challenges of a leadership role within a quality function. [1976-012 (1995) : 63]

47. A good science degree with up to 4 years' experience, developing a range of pharmaceutical product presentations from concept to full manufacture, should mean you're ready for one of these roles. [1976-013 (1995) : 64-65]

48. At least 3 years' postgraduate experience in modern methods of instrumental analysis, both chromatographic and spectroscopic, is essential for this 'hands on' role producing globally successful new products. [1976-013 (1995) : 64-65]

49. This is a new role, leading the team responsible for ensuring that our gastrointestinal therapeutic products meet worldwide regulatory requirements and are registered effectively and efficiently. [1976-013 (1995) : 64-65]

50. A life sciences graduate with a postgraduate qualification in Information Science, you will have at least 3 years' experience recommending and implementing change in a similar role. [1976-013 (1995) : 64-65]

51. Naturally, the salary will fully reflect the experience and expertise you bring to the role and will include a comprehensive package of competitive benefits. [1976-013 (1995) : 64-65]

The University of Auckland has recently established a Centre for Science, Mathematics and Technology Education and the successful applicant would be expected to play a leadership role in the activities of the Centre [1976-014 (1995) : 66]

52. We are seeking a Physicist with enterprise and enthusiasm who can combine a major role in managing the training of Clinical Scientists with making an important pro-active contribution to research and development in imaging. [1976-025 (1995) : 69]

The successful candidate, who must be a non-UK citizen, will play a vital role in the research programme of several of the UK and EU users on our Synchrotron Radiation Source for reflection-absorption infrared spectroscopy and other experiments, necessitating regular visits to other Laboratories in the HCM network (in particular Italy and France). [1976-037 (1995) : 72]
The detailed analysis of the role of T cells in the model is of particular interest. [1976-039 (1995) : 72]

53. SENIOR CHIEF LABORATORY SCIENTIFIC OFFICER (GRADE 4) required for an administrative and senior technical role associated with the research and teaching activities within the Division. [1976-049 (1995) : 74]

54. Modelling and simulation of dynamic systems will form a key role in the programme. [1976-054 (1995) : 76]

Applicants must be prepared to take an active role in CSMA's business development activities. [1976-093 (1995) : 85]

55. All roles offer the chance to develop and implement innovative teaching and assessment strategies and to carry out research. [1976-094 (1995) : 85]

The successful candidate will be a numerate research scientist with skills in modelling hydrological / ecological systems and the potential to take a leading role in the habitat modelling carried out by the group. [1976-095 (1995) : 85]

All studies are conducted in accordance with the principles of GLP (full accreditation achieved in January 1995) and the appointee will also assume the role of Senior Study Director. [1976-096 (1995) : 86]

The Project Manager will be expected to play an appropriate role in developing this part of the Detection Centre's future business. [1980-002 (1995) : 51]

57. The role demands a BSc/MSc in Forestry, with at least 15 years' experience in forestry. [1980-003 (1995) : 52]

The successful applicant will take the lead role in translating the Audit into practical projects and formal planning policies. [1980-012 (1995) : 58]

Reporting to the Laboratory Manager you will play a key role in a dynamic laboratory handling a wide range of research and development projects. [1980-030 (1995) : 63]

The role of microbial processes in metal transport and immobilisation in soil polluted with toxic metals. [1980-033 (1995) : 64]

The School of Applied Sciences wishes to appoint an enthusiastic environmental scientist to play a major role in the research and teaching in this area. [1980-041 (1995) : 66]

Committed to excellence, the European household development laboratory plays a key role in the development of products for the UK, European and International Markets. [1980-056 (1995) : 70]

The gliding motility of Eimeria sporozoites and its role in target cell invasion is the subject of this investigation. [1980-057 (1995) : 70]

Applications are invited for the following posts to study the role of endothelium in diabetic syndromes. [1980-074 (1995) : 74]

A three year project which will involve leading a project on the role of endothelium and endothelial mediators in insulin resistance. [1980-074 (1995) : 74]
58. We require an Analyst to join our team in the Centre to analyse samples as part of its role in the control of drug abuse in sport. [1980-076 (1995) : 74]

59. The role of the successful candidate will be structured to take into account the degree of relevant past experience in ELISA, other immunoassays and managerial/supervisory duties. The position is one that should be viewed as having good career prospects. [1980-083 (1995) : 76]

One of their principal roles will concentrate on developing and consolidating links with other organisations and individuals, and creating a balance between nature conservation goals and a viable agricultural system. [1980-087 (1995) : 76]

A two year study examining the role of chemical and physical stimuli on tendon repair. [1980-091 (1995) : 77]

The successful candidate, who should have a background in physics and/or electronics and with a knowledge of computing, will be expected to take an active role in the development and supervision of new experiments as well as the day to day running of the laboratories and their associated staff. [1980-106 (1995) : 80]

60. CHALLENGING ROLES IN STATISTICAL COMPUTING [1980-118 (1995) : 84]

61. To succeed in this role, you will have: [1980-118 (1995) : 84]

62. Both roles require a strong customer focus with the ability to translate requirements into finished applications which meet their needs. [1980-118 (1995) : 84]

The role of the specific micro-fauna (including any interactions between them) in the degradation of organic matter would then be studied with a particular emphasis on establishing any radionuclide specific mechanisms that might be important in binding and root uptake. [1980-120 (1995) : 85]

63. Experience of the testing of immunological products is essential for this role, along with a degree or postgraduate qualification in microbiology or veterinary microbiology. [1984-002 (1995) : 51]

64. In this role, you will develop, implement, improve and apply computer programs to simulate heat and mass transfer processes, and airflows, in the drying and storage of biological materials. [1984-015 (1995) : 57]

65. Input to pilot-scale and off-site experiments will also be a key part of the role. [1984-015 (1995) : 57]

All three posts will have a role in: [1984-016 (1995) : 58]

To play key roles in this continuous quest, we're now seeking some highly talented and ambitious technical graduates. [1984-022 (1995) : 60]

66. Based at our 3M Neotechnic site in Clitheroe, your role will be to manage the valve assembly quality control and engineering function, providing an effective service to manufacturing and developing projects to support the Company's business objectives. [1984-026 (1995) : 61]
You will also have a key role to play in deputising for the Quality Manager when required, as well as liaising with customers to ensure complete product and service satisfaction. [1984-026 (1995) : 61]

67. A graduate in Chemistry, Chemical Engineering or Pharmacy, you will have at least five years experience in a senior Quality role within the pharmaceutical industry. [1984-026 (1995) : 61]

68. HELIX RECRUITMENT specialises in placing technically skilled people with commercial aspirations in exciting sales oriented roles. [1984-038 (1995) : 64]

With an interest in Biochemistry or Physiology for a project funded by the National Kidney Research Fund on the role of glucocorticoid hormones in the kidney. [1984-039 (1995) : 64]

69. They will be expected to deputise for the Laboratory Manager in all roles including staff management, purchasing and safety. [1984-042 (1995) : 65]

If you want to play a leading role in preparing information, maintaining and developing computer programmes and converting existing systems to our new format then we'd like to hear from you. [1984-044 (1995) : 65]

70. A research role in one of the fastest developing fields in Europe. [1984-049 (1995) : 67]

71. This research role is no exception! [1984-049 (1995) : 67]

The project, which is funded by the MRC for 2 years, is specifically to evaluate the role of lymphotoxin β, (a recently recognised member of the TNF family) in sepsis. [1984-053 (1995) : 69]

72. The position will suit those whose flexibility will enable them to cope with the interesting and varied challenges that they will face in this unique role. [1984-055 (1995) : 69]

Transmitter modulation and the role of phosphorylation - dephosphorylation events will be studied using both single channel and whole cell recording in cultured cells. [1984-067 (1995) : 72]

An up-to-date understanding of the role of soil organic matter, spatial and temperate variations in the distributions of available nutrient pools and the effects of changes in soil conditions and architecture in relation to microbial activities and nitrogen transformations will be required. [1984-100 (1995) : 78]

73. If you want to be part of "our team" and are up to a demanding role in a progressive organisation, send your CV with a brief letter, including your current salary details, to Mrs Nemone North. [1984-102 (1995) : 78]

Industry in the 1990s is under increased pressure from both legislators and the general public to monitor and control the environmental impact of their activities. This had resulted in a demand for trained graduates to fulfil the roles of environmental protection officers, advisors and consultants within both the commercial and the public sectors. [1984-125 (1995) : 83]

Reporting to the Laboratory Manager you will play a key role in a dynamic laboratory handling a wide range of research & development projects. [1989-013 (1995) : 61]

75. With our unique decentralised management style and flat organisational structure, this role offers a real opportunity to make a significant impact to the business. [1989-022 (1995) : 63]
At our superb facilities in Harlow we now need an experienced, talented Information Scientist to become an integral team member, taking a leading role in major projects to provide information to the Anti-infectives Therapeutic team and to Clinical R&D. [1989-024 (1995) : 64]

76. Your success in this role will also depend on your comprehensive understanding of clinical issues, a good knowledge of the anti-infectives (including antivirals) area, and an ability to interact effectively with senior clinical staff. [1989-024 (1995) : 64]

77. Creativity, initiative and an entrepreneurial style are essential to success in this role. [1989-028 (1995) : 65]

78. In addition to development work on new and existing products, this role requires strong communication and technical leadership skills, mentoring technical personnel in manufacturing and development. [1989-028 (1995) : 65]

79. You will be strong team players with good communication skills and sound commercial acumen. Extensive UK and overseas travel is involved in these roles. [1989-041 (1995) : 69]

You will need a working knowledge of both preclinical and clinical development of pharmaceuticals, and an understanding of the roles of bioanalytical chemistry, clinical chemistry, statistics and data management and regulatory affairs in the pharmaceutical registration process. [1989-041 (1995) : 69]

80. If you could benefit from and fully contribute to this challenging role, please forward your CV to our retained consultant Trevor Dunne, at JED Consultants [1989-044 (1995) : 70]

81. The role will be based at our factory site in Purfleet, Essex. [1989-059 (1995) : 73]

There will be particular responsibility for maintaining BASC's role in mainstream conservation programmes at regional and local level, working on topical conservation issues and communicating these to members, other organisations, politicians and the press. [1989-076 (1995) : 76]

82. This is a challenging, influential role for a highly motivated and resourceful environmental scientist with a genuine interest in pollution arising from airport activity. [1989-087 (1995) : 80]

83. You must be able to demonstrate an understanding of environmental issues, particularly those relating to Part 2 of the Environmental Protection Act 1990, and will have a commitment to regulation, along with the necessary self-confidence to carry out a regulatory role. [1989-093 (1995) : 81]

84. You'll need to be familiar with the use of Windows packages, and the customer contact aspects of the role make sound communication skills a must. [1989-112 (1995) : 85]

85. To be successful in this role will require a comprehensive knowledge of micro engineering coupled with financial, commercial and project management skills. [1993-014 (1995) : 55]

86. You should be a life science graduate who can demonstrate at least 2 years experience in a broad based data management role preferably gained from within the pharmaceutical or related industries. [1993-020 (1995) : 57]

87. Your role will be to identify, promote and organise research activity throughout the Trust and with external agencies. [1993-026 (1995) : 58]

88. In this challenging role, you will conduct plant metabolism and environmental fate studies to support the registration of AgrEvo products worldwide. [1993-027 (1995) : 59]
89. The nature of the role means that familiarity with Microsoft Office software would also be an advantage. [1993-027 (1995) : 59]

90. 2-3 years experience in a process development role or as a production support Chemist; [1993-030 (1995) : 60]

91. This is a senior role in a novel research project to assess the feasibility of life support systems based on the removal of carbon dioxide and production of oxygen by photosynthetic algae, and is centred on a laboratory scale determination of power and size requirements for such a system. [1993-034 (1995) : 61]

92. This role will support a project utilising advanced gas chromatograph techniques aimed at developing a prototype system. [1993-034 (1995) : 61]

93. Self motivation, flexibility and a desire to help customers get the very best from MDL products are vital qualities for this active and varied role, which involves a mix of office-based customer support and frequent travel to customers' sites to deliver training. [1993-038 (1995) : 62]

94. This key role has direct influence on our schemes and requires a technical understanding of our functions and their constraints, and an ability to develop solutions to complex operational problems. [1993-040 (1995) : 63]

With a degree in ecology or a related subject, you should have considerable experience of environmental management, a detailed knowledge of statutory and voluntary conservation and recreation organisations and the legislative and political context within which the NRA fulfils its role. [1993-040 (1995) : 63]

The role of an aspartic protease in the metabolism and processing potential of stored potato tubers [1993-043 (1995) : 65]

95. Working closely with our clients, your role will involve the planning and analysis of statistical data from Phase I-IV clinical trials. [1993-045 (1995) : 65]

96. Highly motivated and well organised with sound commercial acumen, you should be an effective communicator at all levels as this role offers the opportunity for full project responsibility and liaison with our international clients. [1993-045 (1995) : 65]

97. The growth of the clinical research project has created this exciting new role for an experienced Clinical Research Associate to join the business team. [1993-052 (1995) : 67]

98. In your new role you'll advise, support and assist your own clients in developing and implementing solutions to their human resourcing problems. [1993-061 (1995) : 69]

99. To be successful in this high profile client liaison role, you'll have: [1993-061 (1995) : 69]

Active cooperation will play a pivotal role in this program and its related activities. [1993-069 (1995) : 71]

The candidate will have the opportunity to take an active role in the histopathology work of the department, with appropriate training. [1993-070 (1995) : 71]

The appointee will investigate, by molecular and biochemical approaches, (a) the role of the enzyme in the infection process of plants: potential anti-fungal targets may be identified, (b) the use of the enzyme (or engineered variants) for novel biomass modification. [1993-072 (1995) : 72]
100. HELIX RECRUITMENT specialises in placing technically skilled people with commercial aspirations in exciting sales oriented roles [1993-073 (1995) : 72]

101. These roles are ideally suited to trainees with Ph.D.s in molecular biology or BScs with lots of practical experience. [1993-073 (1995) : 72]

102. Excellent start up role in sequencing based on South Coast. [1993-073 (1995) : 72]

103. Initially, you will actively participate in a training programme for your role as a Study Director. [1993-077 (1995) : 73]

A post-doctoral worker is required to join a team interested in the role of food structure and composition on the availability of nutrients for absorption by the gut. [1993-078 (1995) : 73]

104. Previous experience in a similar role would be advantageous. [1993-083 (1995) : 74]

105. A Drug Information role, with the emphasis on customer service, backed by the resources of a market leader in pharmaceuticals and healthcare products. [1993-085 (1995) : 75]

106. The special qualities needed for this role are: [1993-085 (1995) : 75]

107. But, equally important, it is an opportunity to develop your career in a role offering variety and genuine responsibility. [1993-085 (1995) : 75]

The successful applicant will play a key role in the development of new security print products, passports, ID cards and plastic cards. [1993-093 (1995) : 77]

Research Assistant (Grade 1B) required for a 3 year project to work on aspects of pathogenesis of Neisseria gonorrhoeae, using bacterial genetics and cell biology to study the role of putative virulence factors. [1993-098 (1995) : 78]

108. The role involves planning, coordination and liaison in the interface between the people who make and assemble trials supplies (including external contractors), and our customers who include Pfizer Clinical Groups, CRO's and overseas affiliates. [1998-004 (1995) : 73]

The International Development Centre (IDC, located at Queenborough in Kent plays an important role in the formulation development of new products and provides clinical supplies world-wide. [1998-005 (1995) : 73]

We wish to recruit a graduate scientist or qualified Pharmacist to play a key role in our Quality Assurance group which has responsibility for assuring that clinical trial materials and pharmaceutical development data meet European and United States GMP/GLP and Regulatory standards. [1998-005 (1995) : 73]

Your role will be to plan and undertake both routine and investigative biological surveys in marine, estuarine and freshwater environments. [1998-006 (1995) : 74]

109. This high profile role carries full responsibility for co-ordinating the development of laboratory and consultancy services, as well as marketing this key area of the business. [1998-010 (1995) : 75]

110. This new role will provide "in-depth" scientific knowledge and will be expected to advise the business on all aspects of marketed skin care products. [1998-011 (1995) : 76]
This post (ref. 95/02), funded by the Arthritis and Rheumatism Council, is available from January 1996 for three years, to investigate the role of anaerobic bacteria in bone and joint disease. [1998-016 (1995) : 78]

111. In this role, you will be contributing to research on the development of a decontamination system for animal wastes, with specific emphasis on Swine Vesicular Disease and African Swine Fever. [1998-020 (1995) : 79]

We have a great opportunity available to lead a team whose role is portfolio planning of our clinical supplies for Phase I, II and III candidates, budgeting, forecasting, finding and managing contractors and our relationship with them, keeping colleagues right up to date and representing the team and your department at project management meetings. [1998-021 (1995) : 79]

112. You'll need at least five years' experience following a degree or Ph.D. in order to have the maturity, insight, knowledge and skills for this role. [1998-021 (1995) : 79]

114. This is very much a solo hands-on role requiring control of the database, processing of adverse event notifications and reporting. [1998-032 (1995) : 83]

115. Qualified to degree level in a life science, you will have at least three years' pharmacovigilance experience that could have been gained in a specialist role or as part of broader responsibilities. [1998-032 (1995) : 83]

The proposed project will investigate the role of chylomicron remnants in the pathogenesis of atherosclerosis. [1998-042 (1995) : 86]

He or she will play an important role in defining and contributing to the new Environmental Geoscience BSc honours degree course. [1998-043 (1995) : 86]

This new post is to join a team based in the Medical School studying the role of protein modification in the regulation of gene expression in higher organisms. [1998-046 (1995) : 87]

The specific area of research will be concerned with a recently discovered RNA polymerase sigma factor and its role in pathogenesis of Xanthomonas to plants. [1998-049 (1995) : 88]

116. The roles are concerned with various stages in the collection and processing of field data and provision of a hydrological service to customers. [1998-052 (1995) : 89]

117. Self motivation, flexibility and a desire to help customers get the very best from MDL products are vital qualities for this varied role. [1998-053 (1995) : 89]

The appointee will be expected to play a full role in the development of the research programme. [1998-068 (1995) : 92]

118. This demanding role requires a self motivated person who has a sound knowledge and experience in modelling food sterilisation and dehydration processes. [1998-079 (1995) : 95]
119. This high-profile regulatory project leader role offers a golden opportunity for an ambitious professional to join an international therapeutic team, take responsibility in Europe for specific projects, and make an impact in a rapidly changing organisation. [1998-083 (1995) : 96]

120. If you're looking for an influential role in making things happen with a global leader, send your cv to Ann Judge, Eames - Jones - Judge – Hawkings [1998-083 (1995) : 96]

121. You can look forward to all the support and development you need to succeed in your role. [1998-095 (1995) : 100]

If you can play a key role in the world of electronic imaging, please send full CV to Barkers Response & Assessment [1998-095 (1995) : 100]

122. This Project Leader's role involves working 3 days per week in West London and 2 days abroad, predominantly in Europe. [1998-100 (1995) : 102]

123. If you would like to take the first step not just towards any of these roles but to a career with Innovex, send or fax (on 01628 491555) your CV to Louise Woolfenden in the Clinical Resourcing Department, Innovex (UK) Limited, Innovex House, Marlow Park, Marlow, Buckinghamshire SL7 1TB. [1998-100 (1995) : 102]

   The project will involve modelling sediment transport in estuaries and will consider the role played by sediments in pollutant transport. [1998-104 (1995) : 103]

124. The role is to manage the staff, the unit and the clinical trials that are undertaken. [2002-004 (1995) : 55]

125. This is a challenging management role and requires drive, enthusiasm and leadership qualities. [2002-004 (1995) : 55]

   We are recruiting a health economist to play the key role in developing health economic elements within our international clinical trial and disease management functions. [2002-017 (1995) : 59]

126. To be successful in this position you may have come from a clinical trials or economics role and will have: [2002-017 (1995) : 59]

   The Fire Research Station at BRE is playing a leading role in the evolution of an integrated, engineering approach to fire safety design. [2002-018 (1995) : 60]

127. This demanding role requires a self motivated person who has a sound knowledge and experience in modelling food sterilisation and dehydration processes. [2002-020 (1995) : 60]

128. The roles will involve providing support to the sales team in terms of producing application reports, preparing and running demonstrations and in user training, both on- and offsite. [2002-031 (1995) : 64]

129. The role will be to publish and promote the findings, and to develop, market and lead their own research. [2002-043 (1995) : 68]

130. The role calls for close liaison with administrative and professional colleagues within the Directorate and MAFF. [2002-047 (1995) : 69]

131. For an informal discussion about the role please contact Kevin Woodward on 01932 336911 ext. 3009. [2002-047 (1995) : 69]
132. This experience may have been achieved either by working directly within a manufacturing/packaging environment or technical support or from within a production based non-laboratory quality control role. [2002-048 (1995) : 69]

133. Recent science graduates who wish to join the industry in a quality role will also be considered for entry positions within the Group. [2002-048 (1995) : 69]

135. These roles are ideal for PostGrad’s / PostDoc’s with lots of practical experience. [2002-051 (1995) : 70]

136. Two excellent starting roles for new graduates with final year project or work experience in molecular biology/ immunology. [2002-051 (1995) : 70]

137. The role will provide you with the opportunity to make a significant contribution to the CSG's work, specifically in the fields of LINK programmes and technology transfer. [2002-054 (1995) : 71]

Dedicated to safeguarding and improving the environment in England and Wales, we will shortly play a key role in the operations of the Environment Agency. [2002-057 (1995) : 72]

The industry trend towards performance-based specifications has now created this opportunity within the Unit for an individual capable of managing and co-ordinating research on asphalt performance and the role played by bitumen in asphalt behaviour. [2002-059 (1995) : 73]

An ecologist with particular interest in plants is required to complete ongoing research on the ecology and dynamics of different field boundary types, and their role in agricultural landscapes. [2002-069 (1995) : 75]

138. The role offers excellent opportunities for career development for those who can show motivation and initiative, and will be located initially at Chorleywood, Hertfordshire, with relocation to Chipping Campden in Spring, 1996. [2002-078 (1995) : 77]

Based in Liverpool, you will play a vital role in maximising the technological, scientific and education outputs of the project. [2002-082 (1995) : 78]

As Assistant Director, Clinical Research, you will fulfil a crucial role in this process, joining our central cardiopulmonary therapeutic team with responsibility for the successful planning and implementation of pivotal clinical studies in Europe, leading to the effective registration of new products in this expanding therapeutic area. [2006-002 (1995) : 59]

139. This role provides an exceptional opportunity in which to establish yourself within our world-class clinical research team, with good prospects of further career development within this or another therapeutic area. [2006-002 (1995) : 59]

The new MRU will also fulfil the role of the Regional Tuberculosis Centre. [2006-005 (1995) : 60]

Your role will be to assist in the process of identifying and developing new products in response to school and college requirements, write instructional and catalogue copy, liaise with educationalists and suppliers and provide advice and support to teachers. [2006-009 (1995) : 62]

The Department has two new (non-medical) positions available which recognize the role of Physiology in the expansion of advanced research-led teaching at the School of Medicine. [2006-016 (1995) : 65]
The successful candidate will play a leading **role** in the development of nutrition teaching in the Faculty of Medicine and Health Science. [2006-016 (1995) : 65]

The successful applicant will be expected to do active research and play a leadership **role** in the research group in conjunction with the project management team. [2006-033 (1995) : 70]

140. The **role** is based in the applications engineering group, whose current projects include sensor instrumentation for the power and steel industries, metal atomisation machines and characterisation of complex high frequency materials. [2006-041 (1995) : 73]

141. As a science graduate, with 1-3 years experience in a quality assurance **role**, [2006-058 (1995) : 77]

142. you will rise to the challenges this key **role** has to offer. [2006-058 (1995) : 77]

143. In this **role** you will be required to develop new software and to maintain existing programmes for the processing and analysis of geophysical potential field data. [2006-059 (1995) : 77]

144. Following training at the research centre, the successful candidate will be expected to transfer to a similar **role** in the business a year later. [2006-061 (1995) : 78]

The **role** of the LHY gene in regulating flowering time and photomorphogenic responses of *Arabidopsis thaliana* Dr G. Coupland, John Innes Centre, Norwich Research Park, Colney, Norwich NR4 7UH. [2006-066 (1995) : 79]

These are key posts for innovative scientists to help advance our understanding of the dynamics of natural populations and to play a central **role** in providing quantitative advice to Government on the status and prospect of populations in relation to the effects of fishing and other environmental impacts. [2006-068 (1995) : 80]

The aim of this project is to investigate the efficacy of pre and probiotic foods in reducing blood lipid concentrations in human subjects and to study the **role** of altered gut microflora in mediating these effects. [2006-069 (1995) : 80]

145. In this varied **role**, you will initiate and monitor clinical trials throughout the UK involving lead compounds in hormone replacement therapy. [2006-073 (1995) : 81]

146. Your **role** as Analytical Manager will be to establish risk analysed testing programmes, to interpret the results of investigations, draw conclusions and provide expert advice on any issues or trends. [2006-079 (1995) : 83]

147. Possibly, you will come from a similar **role** with another retailer. [2006-079 (1995) : 83]

148. This new **role** will also present the opportunity to organise our collections of resolving agents and catalysts and liaise effectively within dynamic multidisciplinary project teams to solve pharmaceutical synthetic problems. [2006-082 (1995) : 84]

The post, which is for a period of three years, will be based at the IFE River Laboratory and will address the **Role** of Bankside Habitat in River Ecology with special reference to chalk streams. [2006-093 (1995) : 86]

The innovation required demands an integration of data from a number of sources to develop a full and basic understanding of the **role** of the riverbank in the functioning of the river and its interactions with stream management and riparian land-use. [2006-093 (1995) : 86]
The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems.

2. Go out and get the kind of role you deserve.

3. General knowledge of the higher education or health care sectors of the UK together with 3-5 years experience in a related role is desirable.

4. The job will give you managerial experience, business development experience and the opportunity to act in representational roles.

5. The role will include developing our quality systems, overseeing projects and planning of staff and resources deployment.

The successful applicant will work within the QA Development Team and will play a key role in the development, validation and manufacture of therapeutics for the treatment of allergy.

6. If you would like to be considered for this role, please write to the address below requesting an application form.

7. Senior writers also undertake co-ordination and planning of submission documentation, and other senior medical communication roles.

The Group is seeking to appoint a Research Development Coordinator to take a key role in advising and actively supporting the Group in rapidly developing a portfolio of clinical studies.

8. The role includes liaising with internal client groups to manage the life cycle of a range of GMP, GLP and GCP documents, providing an effective archiving service and contributing to the development of our quality systems.

9. Within this role you will:

10. These roles offer an exceptional opportunity to expand your skills and gain exposure to diverse techniques from early discovery through to pre-clinical development.

The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur.

11. This is a key role within the organisation which involves managing the process of evaluating and funding grant proposals, from initial contacts with the scientific community, through the peer review process and decision making at funding committees, to the implementation of the funding decisions.

Play a role at the heart of product innovation.
12. This role requires a high level of self-motivation and analytical thinking combined with excellent communication and ICT skills. [2481-047 (2005) : 68]

13. These exciting roles give you the chance to use your scientific expertise to influence policy development. You will also be offered on-the-job, specialist, and professional training, encouraged to publish scientific papers and attend scientific conferences, and supported to seek professional accreditation. [2481-051 (2005) : 69]

14. Your role will vary from reviewing epidemiological and toxicological studies, and contributing to committee reports, to responding to requests for health and policy advice from other Departments, Ministers and the public. [2481-051 (2005) : 69]

15. This is a busy and challenging role in a complex area, therefore you must be prepared to work to tight timescales and under pressure from conflicting priorities. [2481-055 (2005) : 70]

16. The role [2481-060 (2005) : 71]

17. The roles are likely to expand to include further programme management opportunities, offering candidates the opportunity to develop broad, technology based project management skills within an actively growing environment at the cutting edge of science. [2481-060 (2005) : 71]

Establishing liaison with and between award holders in the Programme you will assist in building a programme community and play a major role in promoting awareness of the Programmes aims and achievements. [2481-065 (2005) : 73]

18. More details about the programme and the role of the FREE Leader can be found on the NERC web page [2481-065 (2005) : 73]

This is an opportunity to become part of a unique department within the University and to take an active role in shaping the future of the diagnostic and research support services. [2481-069 (2005) : 74]

19. For an informal discussion about the role please contact s.bloom@imperial.ac.uk [2481-072 (2005) : 75]

The role of oxidative stress signalling in chloroplast to nucleus communication in Arabidopsis [2481-076 (2005) : 77]

THE ROLE OF BACTERIA IN FOOD AND HEALTH [2481-084 (2005) : 79]

Presented annually, the travel awards are open to those whose research focuses on the dynamic and often complex role of pathogenic and/or health promoting bacteria in food and its implication on health within the human gut. [2481-084 (2005) : 79]

Thanks to its role since the 1970s as a base for oil and gas exploration and production in the North Sea, the UK's most northerly city is also one of the most prosperous. [2485-001 (2005) : 54-55]

You will provide leadership and support on process and product issues, your role will be to develop new and/or improve existing products and processes. [2485-002 (2005) : 56-57]

Working as part of a focused facilities management team, your role would be to project manage these new developments and improvement programmes. [2485-002 (2005) : 56-57]

20. In this role you will lead aspects of highly integrated and complex projects focused on delivering new processes and equipment platforms for our newest and most advanced products. [2485-002 (2005) : 56-57]

Your *role* will be to provide statistical support across the company - including R&D, Operations and quality. [2485-002 (2005) : 56-57]

22. With at least 3 years experience gained in a similar *role*, you will have a degree in Statistics or a related subject, and experience of SPSS or similar. [2485-002 (2005) : 56-57]

23. The key purpose of this *role* is to lead the development of equipment platforms and strategies to support new products. Included in your responsibilities will be defining process equipment requirements, determining budgets, negotiating with equipment suppliers and evaluating existing capital efficiencies. [2485-002 (2005) : 56-57]

A combination of technologies, including proteomics to identify novel molecular complexes downstream of peripherally acting tyrosine kinases, and molecular intervention strategies (for example RNAi), will be used to dissect their *roles* in appropriate cancer cell models. [2485-003 (2005) : 58]

24. Synthetic Organic Chemist, contract, up to 2 years experience in related *role* [2485-004 (2005) : 58]

**Role** of Dectin-1 in dendritic cell function (Dr Simon Wong) [2485-008 (2005) : 59]

A novel *role* for HLA-827 in the inflammatory disorder Ankylosing Spondylitis (Dr Simon Pawis) [2485-008 (2005) : 59]

Functional genomics of alpha-catenin function: understanding the *role* of an important tumour suppressor (Dr Jonathan Pettitt) [2485-008 (2005) : 59]

25. A superb opportunity for a skilled and motivated C++ programmer with 5+ years of commercial experience in a software development *role*. [2485-009 (2005) : 59]

26. For both *roles*, you'll be involved in medical image processing and analysis projects using IDL and/or MatLab. [2485-022 (2005) : 63]

27. In this senior mathematical modeling *role*, you'll evaluate scientific opportunities, develop strategies, provide leadership to multidisciplinary teams, and act as a group leader for a mathematical modeling team. [2485-024 (2005) : 64]

28. Reconstructing the biology, developing the mathematical models, validating them, and applying your results to our development efforts will be the focus of this *role*. [2485-024 (2005) : 64]

29. A full description of this *role* can be found under job ID 20594. [2485-024 (2005) : 64]

30. In these vital and growing areas of our work, two new leading *roles* have been created. Both call for a high degree of intellect and expertise. [2485-026 (2005) : 66]

Trading schemes and other economic instruments undoubtedly have a key *role* to play in future environmental outcomes. [2485-026 (2005) : 66]

31. There are opportunities for fresh graduates in Physical Science, Chemical Engineering or Food Science (Ref: 105961); for those who have recently completed a PhD (Ref: 106101); and more senior *roles* for people with a strong record in research (Ref: 106101). [2485-029 (2005) : 67]
This is an excellent opportunity for an experienced and enthusiastic individual to take a key role in the molecular diagnosis of haemophilia A & B disorders for the Oxford Haemophilia Centre, in a new collaborative working relationship with the Oxford Molecular Genetics Laboratory. [2485-030 (2005) : 68]

32. The role is focussed on the development and transfer of new materials and/or processing techniques into a manufacturing environment. [2485-032 (2005) : 68]

33. We employ around 2,600 people in a wide range of scientific, engineering and support roles who are all highly motivated by the importance of our work and appreciate the many family friendly benefits we offer our people. [2485-033 (2005) : 69]

34. Reporting to the Science and Innovation Manager responsible for e-Science, the primary focus of this role is to ensure that investment is targeted most effectively to meet the computing needs of NERC science and it will also make a significant contribution to the development of new computing technologies for the wider science base and industrial/commercial application over the next decade. [2485-033 (2005) : 69]

35. For this role you will require: [2485-034 (2005) : 70]

36. Some international travel will be required and the role requires close working with the US laboratory based in Chicago. [2485-037 (2005) : 70]

37. ‘Firm but fair’ sums up this role. [2485-038 (2005) : 71]

You will contribute to the identification of new roles for the biosensor technology and the extension to non cardiac systems. [2485-039 (2005) : 71]

38. This role will offer an excellent Package and opportunity. [2485-040 (2005) : 72]

39. This role will also involve supporting engineering with line trials, assist in the operational plan of new product introduction. [2485-040 (2005) : 72]

40. The role will be largely technical in its content and therefore a formal electrical engineering qualification with some recent relevant experience would be preferred. [2485-040 (2005) : 72]

41. The role is to initially build relationships with a range of stakeholders in the supply chain who are seeking to develop new plant-derived products. [2485-042 (2005) : 72]

The successful candidate will play a key role in a programme of research directed to providing solutions to disease problems in the UK horticultural industry. [2485-042 (2005) : 72]

42. For a senior role, you'll need to be an established research professional with an international reputation in aerodynamics, control systems, computational fluid dynamics, combustion science, or another relevant discipline. Familiarity with testing techniques and facilities would also be valuable. [2485-051 (2005) : 75]

43. For other roles, you'll need a relevant first degree and at least two years' relevant postgraduate experience in industry or academia. [2485-051 (2005) : 75]

44. Ref: junior role 012623 [2485-051 (2005) : 75]

45. senior role 012787 [2485-051 (2005) : 75]
46. We are looking for a scientist or engineer with 5 or more years' experience to perform a senior role within the group. [2485-051 (2005) : 75]

47. Whichever role you're interested in, we'll offer you a generous salary and benefits package combined with an extremely stimulating working environment. [2485-051 (2005) : 75]

48. If you would like to apply for either of these roles please visit www.QinetiQ.com/careers in the 'Jobs at QinetiQ' section, [2485-051 (2005) : 75]

49. Pharma, Biotech, Chemical, Environmental and Clinical specialists, latest roles: [2485-069 (2005) : 80]

50. BIOLOGISTS: Immunology exp for lab and sales roles (£14-£20k) - Oxon/Kent [2485-069 (2005) : 80]

51. FOOD SCIENTIST: Non-lab role (££25k) – South [2485-069 (2005) : 80]

Our combined expertise, natural synergies and commitment to R&D have created a new company - one where Process Chemistry plays a pivotal role in drug discovery and development. [2485-070 (2005) : 81]

52. Your role will involve devising and developing novel routes of synthesis for our new drug molecules, which can be scaled-up to provide material for safety and efficacy studies. [2485-070 (2005) : 81]

For a newly or recently qualified PhD chemist with a keen interest in synthetic organic chemistry this is an ideal chance to gain a valuable understanding of drug development and the role of chemical process R&D. [2485-070 (2005) : 81]

53. The role would suit a new graduate with a good degree in Chemistry or someone with a couple of years' post-graduation experience in a chemistry lab (not necessarily process chemistry). [2485-077 (2005) : 83]

Statistics is a key skill and the post holder will have the opportunity to play a crucial role in projects that often have significant impact in public affairs. [2485-075 (2005) : 82]

54. An exciting opportunity has arisen for an experienced biomedical research administrator / manager to take up a new and challenging role in the Research Management & Planning Directorate of Cancer Research UK. [2485-077 (2005) : 83]

You will also play an important role in working with the Head of Programmes in managing cross-committee peer review issues. [2485-077 (2005) : 83]

55. In this role you will be expected to work closely with other research managers within the Directorate in order to deliver your set objectives. [2485-077 (2005) : 83]

56. The role demands the ability to work both independently and as part of a team. [2485-077 (2005) : 83]

57. If you have a PhD in a biomedical subject with at least two years' writing experience in a medical communications agency and are keen to assume a high profile role interacting directly with clients and international medical thought leaders, we'd be delighted to hear from you. [2485-078 (2005) : 83]

58. A distinct opportunity exists in the Macclesfield office for a senior writer (at least 4 years' experience) to assume a key leadership role. [2485-078 (2005) : 83]
59. In this key role you will manage and co-ordinate the team of scientists and students working in the area of Polymer Informatics. [2485-083 (2005) : 85]

At the Department of Manufacturing Engineering and Management (IPL), Technical University of Denmark we are looking for a professor in operations management to play a key role in research and education within the field including development of production systems, planning and control covering physical products as well as knowledge and service. [2485-102 (2005) : 90]

The role of tobacco control policy in the denormalisation of smoking [2485-104 (2005) : 91]

Putative proteases of C jejuni and their biological roles Andrey Karlyshev [2485-105 (2005) : 91]

Role of stromules in starch granule formation (CASE award) [2485-109 (2005) : 92]

Role of stroma in leukocyte survival - Chris Buckley/Janet Lord [2485-110 (2005) : 92]

The role of the ERK5 signalling axis in angiogenesis (CASE) - Dr M. Cross [2485-112 (2005) : 93]

Role of growth factors in colorectal cancer- Dr J.A.Wakeman [2485-112 (2005) : 93]

Starting early 2005, there is an opportunity for a 3-year EPSRC funded Ph.D. studentship developing and using computer models to examine the fate and movement of heavy metal contaminated sediments in river systems, focussing on the relative roles of physical and chemical movement. [2485-113 (2005) : 93]

60. Please send your CV and covering letter explaining your suitability for the role, to the Human Resources Department, Amgen Ltd, [2485-001 (2005) : 58]

61. The role has full responsibility for organising site QA Operations resource to meet the requirements of the Manufacturing, New Product Development and Regulatory teams to assure compliance of materials, suppliers and product to company specifications and standards. [2489-006 (2005) : 60]

62. Please send a CV and covering letter stating how you meet the role requirements, also detailing the names and addresses of two professional referees who can be contacted prior to interview. [2489-008 (2005) : 62]

As a senior member of the group, you will play a pivotal role in managing and developing existing services and techniques. [2489-010 (2005) : 62]

63. In this new role, you will lead respiratory technical services within our Respiratory Centre. [2489-010 (2005) : 62]

64. It's a clinical, managerial, educational, research and training role, where you will develop specialty services and be involved in the investigation and treatment of airways diseases. [2489-010 (2005) : 62]

65. Come and see us at www.unilver-colworth.co.uk for more information on these roles and how to apply. [2489-012 (2005) : 63]
In this role, you’ll be working as part of a team aiming to understand the impact of plant based ingredients on skin function. [2489-013 (2005) : 64-65]

Play a pivotal role in a diverse technical programme [2489-014 (2005) : 66]

A key member of the management team, you will have a vital role to play in the delivery of a diverse technical programme. [2489-014 (2005) : 66]

On the resourcing side, your role will involve optimising the talents of some 300 people, as well as co-ordinating corporate HR requirements. [2489-014 (2005) : 66]

In addition, as you develop within the role you will have the prospect of representing the department in liaison with International Project Teams. [2489-019 (2005) : 68]

Strong organisational skills, verbal and written communication skills and an aptitude for analytical thinking will help you to succeed in this role. [2489-019 (2005) : 68]

The roles also involve liaising extensively with other parts of the group in various locations worldwide including international travel, both within Europe and to the US. [2489-022 (2005) : 69]

To be successful in these roles, you will have a minimum of an honours degree in Chemistry or a related subject, although a MSc/PhD would be a definite advantage, as would experience in the analysis of APIs and/or drug products within the healthcare industry. [2489-022 (2005) : 69]

If you feel you have the correct attributes to tackle this role, please apply with full CV quoting reference number MS&T9001/05 and including current salary details, to Moyra Hills, Senior HR Advisor, [2489-022 (2005) : 69]

The second role involves developing and implementing the NC3Rs' communications strategy. [2489-028 (2005) : 71]

The role also includes basic upkeep of a Cytogenetics Tissue Bank Database and involvement in translational research projects. [2489-031 (2005) : 72]

The key purpose of this role is to lead project development programmes ranging from preclinical investigation through clinical trials. [2489-035 (2005) : 72]

Working as part of a focused team, your role would be to provide support to project management. [2489-035 (2005) : 72]

Radiolabelled compounds have made possible a revolution within the biomedical sciences and have underpinned our understanding of behaviour of modern drugs, playing a vital role in the safety assessment programs for the majority of new drugs entering the market. [2489-036 (2005) : 73]

Strong synthetic execution skills are key in this role. [2489-036 (2005) : 73]

You will elucidate the role of this SUMO protease in triggering cellular signalling during salt stress. [2489-039 (2005) : 74]

A Research fellowship is available for a period of up to 3 years to work within the Centre for Global Atmospheric Modelling (LGAM) on a project to examine the role of the stratosphere in climate change. [2489-055 (2005) : 78]

The successful applicant will play a key role in establishing research in the Centre's Auditory Function laboratory - becoming an integral part of this lively research community. [2489-059 (2005) : 78]

5790
The post is a joint initiative of SOP and University College London Hospitals and has been created to support Professor Kevin Taylor in his joint role as Professor of Clinical Pharmaceutics. [2489-060 (2005) : 79]

The role involves extracting and indexing key information from patents, to provide accurate, value-added data to customers of our DOLPHIN database, which is used for research and strategic planning purposes. [2493-001 (2005) : 54]

Successful candidates will play a critical role in the next stage of the Company's evolution while expanding their field of scientific expertise. [2493-008 (2005) : 57]

The Bioinformatics role at Roslin combines strategic definition of the tools required for the application of genomics to host-pathogen interactions, as well as the development of urgently required tools. [2493-009 (2005) : 58]

This role will focus on: [2493-011 (2005) : 58]

A full driving licence is essential for this role. [2493-011 (2005) : 58]

We are seeking an ambitious energy consultant, keen to take a leading role in our sustainability and renewable energy team. [2493-012 (2005) : 58]

Suitable candidates will have a Science or Engineering degree, and should be able to demonstrate at least 3 years experience in a relevant role with knowledge of patents and associated processes. [2493-015 (2005) : 59]

This is a new role and will be crucial to developing the paediatric sleep service. [2493-020 (2005) : 60]

The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2493-021 (2005) : 61]

Petrochemical Specialist (Development role), Oxon. £30k [2493-027 (2005) : 63]

This is a key role providing compound identification support for animal and plant metabolism studies as well as technical expertise to other departments such as Protein Chemistry and Pharmaceutical Analysis. [2493-029 (2005) : 64]

With a pivotal role in the drug discovery and development process a sound knowledge of drug metabolism would be welcome, however it is less important than the ability to work in a multidisciplinary team, where dedication, self-motivation and effective communication are prerequisites. [2493-029 (2005) : 64]

As senior roles in our Human Health Science Team, they will be crucial in delivering our environmental goals. [2493-030 (2005) : 65]

The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems. [2493-031 (2005) : 65]

The role will involve undertaking a wide range of small, rapid-development projects, with the emphasis on delivering fast-track solutions. [2493-031 (2005) : 65]
You will also play a key role in the transfer of these new products and methodologies to production facilities. [2493-032 (2005) : 66]

89. The purpose of this role is the development of new products and the improvement of existing products. [2493-032 (2005) : 66]

We're looking for two experienced individuals to play important and influential roles within our Waste and Nuclear Materials Strategy Unit. [2493-033 (2005) : 66]

90. For both roles, we are looking for specialist expertise gained through considerable experience in technical or strategic posts within the nuclear industry. [2493-033 (2005) : 66]

The new Chairs will play a leading role in the continuing development of the School's expansion and will be expected to form new research groups. [2493-040 (2005) : 68]

An excellent opportunity for an enthusiastic and highly able student to conduct an integrated laboratory and clinical-based project focusing on the role of CD25+ T regulatory cells in HIV infection. [2493-057 (2005) : 72]

The role of the MHC in immune responsiveness traits in cattle. Identifying genes controlling susceptibility/resistance to infections disease opens up opportunities to breed for healthier livestock. [2493-058 (2005) : 72]

This project will focus on the candidate gene locus, the MHC and its role in determining variability in response to pathogens in a cattle cross herd. For further information contact liz.glass@bbsrc.ac.uk [2493-058 (2005) : 72]

91. Reach candidates in all industry sectors and job roles [2498-002 (2005) : 22]

The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2498-004 (2005) : 50]

92. They will take a major role in developing a programme of work on human papilloma virus and herpes simplex virus infections, in the context of other infections, including HIV. [2498-004 (2005) : 50]

You’ll play an active role in multidisciplinary teams, applying advanced techniques and pushing scientific boundaries, all in the cause of protecting UK Armed Forces from the effects of toxic agents. [2498-005 (2005) : 51]

93. For full details of all the roles and how to apply, please visit www.dstl.gov.uk/careers and select ‘Other Vacancies’. [2498-005 (2005) : 51]

94. The role [2498-006 (2005) : 52]

95. To fulfil this role, you must have: [2498-010 (2005) : 53]

96. In addition to generating high quality data for presentations and publications, your role will also involve liaison with external collaborators in leading-edge centres both in the UK and USA. [2498-010 (2005) : 53]

97. To fulfil this role, you must have: [2498-010 (2005) : 53]
The first two **roles** will require travel to the USA and ongoing liaison and collaborations with colleagues in America. [2498-010 (2005) : 53]

The compound logistics team plays an essential **role** in the Discovery Products Division of BioFocus, managing and delivering our highly successful compound libraries to customers worldwide. [2498-011 (2005) : 54]

99. **We guarantee an open, challenging working environment in which your role and responsibilities can develop as the company expands.** [2498-012 (2005) : 54]

The Food Hygiene Department has a key **role** in helping the food and drink industry prevent contamination during food processing. [2498-013 (2005) : 54]

A key **role** will be industrial liaison and helping secure external funding for the Institute’s research programmes. [2498-015 (2005) : 55]

100. **This role encompasses the use of extensive Food Legislation knowledge in delivering membership services across the food industry.** [2498-017 (2005) : 56]

101. **The internal role involves training and developing staff in the team in specific regulatory areas and assisting the Business Unit Head in spotting commercial opportunities and efficient delivery of the services.** [2498-017 (2005) : 56]

102. **A suitable candidate for this role will have minimum of 7 years regulatory experience, preferably a detailed knowledge of EC legislation, and ability to work as part of a team, as well as leading the team when required.** [2498-017 (2005) : 56]

103. **In this trouble shooting role, you will use modern quadrupole, ion trap and accurate mass TOF instruments working with team members and medicinal chemists to resolve complex structural problems and assure the integrity of compounds entering primary screens.** [2498-019 (2005) : 57]

104. **Working within a scientific development team, your role will be to contribute to the formulation development of R&D programmes — liaising with marketing and regulatory functions in affiliates worldwide, as well as industrial and academic partners.** [2498-020 (2005) : 57]

105. **Adherence to planned timescales is essential and candidates must enjoy thriving on the pressure and challenge this role brings.** [2498-021 (2005) : 58]

106. **Pharma, Biotech, Chemical, Environmental and Clinical specialists, latest roles:** [2498-022 (2005) : 58]

107. **Reporting to the Technical Manager you will undertake a project management role and related tasks to invent, develop and characterise performance of herbicide formulation.** [2498-025 (2005) : 59]

108. **An integral function and focus of this laboratory based role will be your practical involvement in providing customer solutions.** [2498-025 (2005) : 59]

109. **The role will include:** [2498-026 (2005) : 59]

110. **The role will include:** [2498-026 (2005) : 59]

111. **In both roles, the Project Leaders will coordinate or Lead a number of projects, with the aim of developing or refining products and processes, in order to support the growth of our business.** [2498-027 (2005) : 59]
Planning, problem solving and working under pressure in a busy department are vital factors for success in this role. [2498-027 (2005) : 59]

Process roles – Bristol, Cardiff or Tewkesbury [2498-028 (2005) : 60]

As a geographer or biologist interested in water systems management, you could play a key role in improving the nation’s water quality, as part of our Water Framework Directive team. [2498-028 (2005) : 60]

Finally, we have Process Advisor, Process Technical Officer and Policy Support Officer roles in our Asset Management team, for geography, biology or engineering graduates with a keen interest in this field. [2498-028 (2005) : 60]

A high level of technical ability, a record of successful project management, experience of gathering and interpreting data on the fate and effects of chemicals to ecosystem or human health, a good understanding of European and UK legislation, experience of winning new business and excellent networking skills are also essential requirements for this demanding role. [2498-032 (2005) : 61]

Your main role will include assisting with the day-to-day management of the Project, including field work, and producing orchid DNA barcodes for species identification. [2498-036 (2005) : 63]

The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2498-037 (2005) : 64]

The main responsibility of the postholder is to provide an expert resource in genotoxicology and develop a research programme on the role of interactions between the environment and genes in human toxicity and the health implications of interindividual variability in susceptibility to toxic effects. [2498-037 (2005) : 64]

You will be expected to play a leading role in the development of neurotoxicology expertise in the Unit and become the expert resource in neurotoxicology for the HPA. Neurotoxicology has been identified as a major subject area for the Unit and it is intended that a Centre of Excellence is developed in Newcastle. [2498-037 (2005) : 64]

The Validations Manager must possess a degree in chemistry, biological science or pharmacy, previous experience in the pharmaceutical, QA or validation role would be advantageous. [2498-038 (2005) : 64]

It’s a fascinating, rewarding role, and the scale of our task is reflected in our 2005/06 budget of over £550m. [2498-042 (2005) : 65]

Depending on your specific role, you could find yourself developing relationships with leading scientists and engineers in universities and industry, managing the peer review process or representing our interests on high profile external bodies. [2498-042 (2005) : 65]

Your biggest reward will be helping us achieve our goals, but you can expect wide-ranging career prospects and a comprehensive range of benefits. Travel in the UK is an important part of the role. [2498-042 (2005) : 65]
You will also play a key role leading investigations aimed at delivering tangible process improvements. [2498-043 (2005) : 66]

The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2498-044 (2005) : 66]

122. Roles throughout the UK [2498-045 (2005) : 66]

123. You will have 1-2 years’ medical writing experience for the Documentation Specialist role, with a demonstrably clear, concise scientific writing style. [2498-047 (2005) : 67]

124. Both roles require a PhD, MSc or equivalent in a biomedical discipline, a flexible approach, and the ability to work on a variety of projects within schedule across different therapeutic areas. [2498-047 (2005) : 67]

125. These are globally focused, highly challenging roles, where you will take responsibility for your own project within a supportive, close-knit team. [2498-047 (2005) : 67]

126. The group leader position will also involve the role of senior scientist fermentation R&D, consulting and advising other R&D functions. [2498-048 (2005) : 67]

The postholder will play a crucial role in recruiting cases and controls, both at St George’s and in other centres throughout the South London region. [2498-052 (2005) : 69]

The role of the Climatic Research Unit is to provide climate data, construct climate change scenarios for use by other project members, and analyse data from climate models with respect to predicted changes in drought conditions. [2498-056 (2005) : 70]

You will work with Dr Marian Ludgate, on a project funded by the Wellcome Trust to investigate the role of cell signalling in determining differentiation outcome of adult precursor cells. [2498-057 (2005) : 70]

The project concerns the role of inflammation, mineral alteration and endocrinology in the process of vascular disease, in particular arteriosclerosis and vascular calcification. [2498-060 (2005) : 71]

127. To help us continue to achieve our aims, we have two crucial roles that are as challenging and stimulating as they are rewarding. [2502-002 (2005) : 54]

Working closely with internal and external stakeholders, your role will be to provide input into the proposals for the development of the water resource at a stage where we can have a positive influence on the way it is approached - keeping the good of the environment at the forefront of your mind. [2502-002 (2005) : 54]

128. Performing scientific investigations that will impact on our projects and the commercial market will also be part of your role. [2502-002 (2005) : 54]

129. For both roles, a high degree of motivation, initiative, teamworking and problem-solving skills will be essential.

130. For a full information pack and to apply for either role, please visit www.environment-agency.gov.uk/jobs [2502-002 (2005) : 54]

131. If you don’t have internet access, please call Becky Rayner on 0118 953 5669 (24-hour answerphone) for the Project Manager role, quoting reference TWEMTO9/NS. [2502-002 (2005) : 54]
For the Environmental Projects Scientist role, please call Jason Curtis [2502-002 (2005) : 54]

As an operator your primary role will be the aseptic preparation of injections using isolator technology. [2502-003 (2005) : 55]

Salaries are according to experience and the role. [2502-003 (2005) : 55]

This is your chance to play a key role in our Statistics and Data Management team, which provides support to a broad range of research and commercial projects within our successful Wound Management business. [2502-005 (2005) : 56]

Both of these newly created roles sit within Global Clinical Planning, part of our Development Business Operations and Strategy department. [2502-008 (2005) : 57]

As such, you will have the chance to play an important and visible role in our strategic decision-making. [2502-008 (2005) : 57]

You will play a key advisory role to our trial managers, ensuring that their preferred protocols comply with regulatory requirements and contributing to the design of the Investigational Medicinal Product. [2502-008 (2005) : 57]

If you feel you have the right attributes to tackle this role please apply with a full CV, including current salary details and quoting reference number MS&T9002/05, to Moyra Hills, Senior HR Advisor, [2502-013 (2005) : 59]

A CULTURE OF VISIBILITY... A ROLE OF REAL INFLUENCE [2502-020 (2005) : 61]

In this role, you will be planning your own workload to tangibly shape our toxicological strategies and making presentations to senior management, while interacting with a larger team based in the UK and Belgium. [2502-020 (2005) : 61]

In addition to a role of real scientific influence, you can expect an attractive remuneration package that will fully reflect the substantial contribution you will make to our business. [2502-020 (2005) : 61]

You will provide a direct contribution to the scientific output of the group, participating in the design and execution of experiments investigating transcriptional regulation and the role of DNA repair in the pathogenesis of M. tuberculosis. [2502-024 (2005) : 62]

To apply for this newly created position you will be able to take a lead role in optimising cGMP systems that include, but are not limited to, change control, incident investigations, corrective actions, recall, complaints in alignment with MHRA, FDA and other applicable international regulations and guidelines while fostering consistency of quality systems within the Ipsen Group. [2502-034 (2005) : 66]

Your role will be to ensure that the laboratory continues to deliver work of the highest quality to fulfil our national objectives of improving the quality and safety of blood components for transfusion. [2502-035 (2005) : 67]

Summarising, interpreting, reporting and presenting data will be a major part of your role. [2502-035 (2005) : 67]

This is a very broad-based and challenging role within a unique interdisciplinary environment, requiring a breadth of experience and expertise. [2502-047 (2005) : 71]
The principal **role** of the postholder will be to conduct high-throughput genotyping of SNPs based on separation of primer extension products in a mass spectrometer (Sequenom MassArray). [2502-050 (2005) : 72]

141. This **role** is vital to our success and we are looking for someone very special to fill it: a person with the energy and interpersonal skills to create a collegiate research environment and to provide outstanding leadership to our support team. [2506-004 (2005) : 55]

142. In this challenging **role**, we will look to you to be the focus of technical expertise in your product areas and to act as team leader. [2506-005 (2005) : 55]

143. Within these exciting and forward thinking projects, we require bright and enthusiastic individuals to fulfil the following **roles** across our Pirbright and Compton sites. [2506-006 (2005) : 56]

This project combines the application of techniques, with studies into the **roles** of both bovine T cells and antigen presenting cells in mycobacterial infection. [2506-006 (2005) : 56]

You will support the Principal Scientific Officer on an applied research project with the key **role** of developing and validating tests to facilitate use of vaccines in control of foot-and-mouth disease (FMD) outbreaks. [2506-006 (2005) : 56]

With the benefit of BPL's established track record, you will play an important **role** in the development cycle for new biopharmaceutical products. [2506-009 (2005) : 57]

144. These **roles** are a chance for newly qualified graduates or individuals with some relevant experience to gain new skills in a sophisticated technical environment. [2506-009 (2005) : 57]

In addition, you'll play a vital **role** in improvement initiatives. [2506-009 (2005) : 57]

145. Take this **role** on and you'll be involved with the management oversight of AWE's Science and Technology Physics Research Programmes, making sure they are properly equipped to support the UK's nuclear weapon. [2506-010 (2005) : 58]

146. The **Role**: [2506-013 (2005) : 59]

Our **role** in achieving this vision is stimulating a strong Scottish economy. [2506-015 (2005) : 60]

147. This is a key **role** for a scientist with the ability to innovate in a group translating research findings into new diagnostic tests and developing prototype reference materials within the National Genetics Reference Laboratory programme. [2506-017 (2005) : 60]

148. The ongoing **role** is open to further discussion with post holders [2506-018 (2005) : 61]

149. but is likely to be in a technical or customer service **role**. [2506-018 (2005) : 61]

Their prime **role** is to identify, evaluate technically and financially, and help install and commission new manufacturing processes, technologies and/or equipment, usually at the cutting edge of nonwovens technology. [2506-019 (2005) : 61]

150. We now seek two team players for key support **roles** in Cell and Molecular Biology, which offer the opportunity to make an impact in an exciting and fast-paced new venture. [2506-020 (2005) : 62]

151. Your **role** will be pivotal to the selection and screening teams within the Antibody Technology group; [2506-020 (2005) : 62]
Making sure that all medicines and medical equipment are entirely safe is an essential part of the function we serve, and this role is of the utmost importance in supporting that aim. [2506-021 (2005) : 62]

Being both self-motivated and used to working on your own initiative, your eye for detail and excellent communication skills will stand you in good stead in this exacting and challenging role. [2506-021 (2005) : 62]

The roles will be predominantly laboratory based and will include testing and synthesis of fuel additives and formulations. [2506-023 (2005) : 64]

This is a hands-on role and your main tasks will be to plan, implement and document technical service work and to present your recommendations to the sales team and to customers. [2506-023 (2005) : 64]

The roles will be laboratory based and may involve some travel. [2506-023 (2005) : 64]

ONLY FIVE PEOPLE HAVE THE BACKGROUND FOR THESE ROLES [2506-026 (2005) : 65]

In the Life Science Industry, quality is a life or death issue and your role is improving every aspect of our quality systems by planning, developing and managing strategic quality and compliance evaluations. [2506-026 (2005) : 65]

Your role is managing our Technical Services across multiple business units including recruitment, performance evaluation and monitoring and ensuring the availability and effective use of resources. [2506-026 (2005) : 65]

Your role involves the continued development of our program and services including tools, training and project mentoring. [2506-026 (2005) : 65]

This is a senior role in which you’ll manage distributors in markets we serve directly and those we serve indirectly via distributors. [2506-026 (2005) : 65]

As you’ll be joining a $billion company, the rewards package, in each role, reflects this. [2506-026 (2005) : 65]

To find out more about the roles, and to apply visit www.careersindna.com [2506-026 (2005) : 65]

Your role will be working in a team with Editors where you will enjoy day to day challenges and responsibilities. [2506-028 (2005) : 66]

This role calls for a BSc/MSc, not a PhD, and three or more years’ practical research experience - ideally including expertise in cell culture and molecular techniques. [2506-030 (2005) : 67]

The role requires an ability to communicate effectively, both with international opinion leaders in science and with members of the in-house publishing team. [2506-032 (2005) : 68]

The role will involve author liaison, recruitment of high-level external medical researchers and editing. [2506-035 (2005) : 68]

The post holder will support a BBSRC funded study on the role of riboflavin in determining cell fate. [2506-039 (2005) : 69]
165. Or do you have the skills, drive and ability to rapidly learn in order to undertake the Contract Manager role as training will be given? [2506-040 (2005) : 69]

166. You will join the Centre in the role of a Research Fellow/Research Technologist. [2506-043 (2005) : 70]

You will be expected to take an active role in an ongoing project investigating the morphology and metabolism of human embryos up to the blastocyst stage. [2506-044 (2005) : 70]

Successful candidates will be encouraged to take a leading role in the advancement of non-invasive methodology for preclinical pharmacology studies. [2506-048 (2005) : 72]

167. Please send a CV and covering letter stating how you meet the role requirements, also detailing the names and addresses of two professional referees who can be contacted prior to interview. [2506-050 (2005) : 72]

You should possess a degree in a biological science and will play an important role in a project investigating the mechanisms underlying the genetic causes of disorders of tooth development. [2506-053 (2005) : 73]

168. We are currently seeking to recruit a resourceful and motivated individual to an exciting role as a Business Development Manager at King’s. [2506-055 (2005) : 74]

As part of the Business Development Team, the postholder will play a pivotal role in fulfilling King’s mission to transfer knowledge to business and the wider community, by creating new partnerships and strengthening existing relationships with industry. [2506-055 (2005) : 74]

169. The role requires an ability to communicate effectively, both with international opinion leaders in science and with members of the in-house publishing team. [2506-057 (2005) : 74]

The role of scaffolding proteins in membrane organization and dynamics (Gerke) [2506-066 (2005) : 76]

170. Based in the Herbarium, your role will include carrying out species conservation assessments in line with the priorities of Kew’s science strategy and particular projects such as the Sampled Red List Index. [2511-002 (2005) : 52]

171. Your role will include the curation of herbarium collections, i.e. preparing and filing away mounted specimens, rearranging and recurating material according to newly published revisions and digitising collections. [2511-002 (2005) : 52]

172. Role includes technical research, marketing support and product development. [2511-004 (2005) : 52]

This is an excellent opportunity to play a lead role in the development of this world-class computing environment. [2511-006 (2005) : 53]

173. This vital role will see you provide high-quality software support for the presentation of data and results of international clinical trials. [2511-006 (2005) : 53]

174. If one of the above profiles fits your background and experience and you are interested in a challenging new role, please send your applications to: http://careers.roche.com/uk [2511-006 (2005) : 53]
Working together with the Fertility Services Manager and the Medical Director, the Senior Clinical Embryologist will take an active role in maintaining and improving standards of service. [2511-008 (2005) : 54]

175. If so, visiongain is offering you the chance to use your scientific background in a more commercial role. [2511-009 (2005) : 54]

176. Working within a team to grow and develop the business, the purpose of this role is to identify and analyse business relevant information. [2511-022 (2005) : 58]

177. There's no doubt about it - this role has challenge, excitement and the chance to make a real difference. [2511-022 (2005) : 58]

178. This high-profile, stimulating role requires a high level of technical expertise coupled with strong communication skills. [2511-023 (2005) : 59]

179. You will also provide high-level technical support to colleagues in Medical Information and also to those in commercial roles. [2511-023 (2005) : 59]

180. In this role you will contribute to the other activities of the Botany Department, having an active interest in horticultural taxonomy, and will be expected to represent the Herbarium and the RHS in national and international meetings and organisations. [2511-032 (2005) : 62]

As part of our rapidly growing Preformulation team within the Pharmaceutical Sciences Department, you'll play a key role in preformulation in support of NCE Discovery, Research and Development programmes. [2511-035 (2005) : 63]

181. This will call for a high level of competency in non-clinical formulation development and a working knowledge of HPLC, but the scope of this role means you'll have plenty of opportunities to support physicochemical characterisation, as well as advancing your career within an expanding team. [2511-035 (2005) : 63]

182. Candidates should be capable of working as part of a small, dedicated team and be prepared to fill a flexible role, including participation in research cruises. [2511-036 (2005) : 63]

183. The role involves setting up new journals in liaison with external editors. [2511-039 (2005) : 65]

184. In this key role, you will design, develop and conduct trials to evaluate the efficacy, safety and close response of new animal health products for pigs, poultry or cattle to enable registration to EMEA requirements. [2511-040 (2005) : 65]

SEPA has a key role in soil protection through a number of legislative controls [2511-041 (2005) : 65] this role is expected to increase in the future. [2511-041 (2005) : 65]

185. For specific details on these roles, to download an application form or to find further information about SEPA, please visit http://sepa.org.uk/vacancies [2511-041 (2005) : 65]

186. As part of your role, you will get involved in information management projects that include database content development, information analysis and technology profiling. Initiative, team spirit and excellent written and verbal communication skills are essential, as is a good level of IT literacy. [2511-042 (2005) : 66]
The Agency plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2511-043 (2005) : 67]

You will take on the role of programme manager for the Sexual Health programme. [2511-043 (2005) : 67]

The School has considerable involvement on Health and Safety issues, and whilst you have the support of a dedicated full-time Safety Advisor, you will be expected to play a leading role in this area. [2511-056 (2005) : 72]

187. “While some period of adjustment may be required, this could easily be shorter than the amount of time many roles remain unfilled today,” Lockyer says. [2515-002 (2005) : 52-53]

188. The role will provide considerable potential to work with a range of both marine and terrestrial issues and to liaise with public regulators and other interest groups. [2515-003 (2005) : 54]

189. Given the nature of this role would expect the following credentials; [2515-003 (2005) : 54]

190. If you feel that this highly challenging and rewarding role is for you then please forward a detailed CV and salary expectations to londongateway@allen-york.com or contact our managing consultant, Andy Seddon, on 0870 870 8986 for more details. [2515-003 (2005) : 54]

191. In this varied role, you’ll be part of a team ensuring good practice is applied consistently within the Region and will be our internal expert on specialist IT systems and other areas of hydrometry. [2515-005 (2005) : 55]

The UK produces 400 million tonnes of waste each year, which makes our role in waste regulation so important. To help us prevent environmental pollution you’ll technically assess waste applications, develop licence conditions and produce concise reports to support your decisions. [2515-005 (2005) : 55]

192. Ideally you’lI have a degree or equivalent in an Environmental Science subject and relevant experience - but if you don’t, and have strong skills in a related area, we might consider training you for this role. [2515-005 (2005) : 55]

193. For this role you will need a full driving licence. Ref: 9610 [2515-005 (2005) : 55]

194. Your responsibilities in this role will involve process development and scale out of a cell based wound care treatment that is about to enter phase III clinical studies. [2515-012 (2005) : 58]

195. You will have a minimum of 4 years’ industrial experience in a biomedical process engineering role; [2515-012 (2005) : 58]

196. Key to the role is experimental, software control and acquisition skills. [2515-014 (2005) : 59]

197. Key to the role is experimental, software control and acquisition skills. [2515-014 (2005) : 59]

198. Join a vibrant team researching new techniques for the measurement of functional materials, in a scientific role but with strong industry links. [2515-014 (2005) : 59]

199. Key to the role is experimental, software control and acquisition skills for practical application in a laboratory environment. [2515-014 (2005) : 59]

This is a new post and the post holder will play a key role in developing Academy policy on academic medical research and the many public policy issues that involve the biomedical sciences, and will also
enable the Academy to be more proactive in its relations with government and other national bodies. [2515-016 (2005) : 60]

200. General knowledge of higher education or health care sectors in the UK, together with 1-3 years experience in a similar role, is desirable. [2515-016 (2005) : 60]

This is your chance to join us - and play a key role in accelerating the pace of innovation in a number of important areas of medical need. [2515-018 (2005) : 61]

This is an exciting opportunity for an experienced pharmaceutical scientist to play a leading role in projects which will ensure we continue to deliver high-quality, robust and innovative dosage forms. [2515-018 (2005) : 61]

201. And as you progress into a senior role, you could find yourself briefing Ministers on high-profile projects that hit the headlines. [2515-023 (2005) : 63]

The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems. [2515-025 (2005) : 64]

202. This is a varied role that allows you to undertake your own project work (with the supervision of the lab head), to run experiments from start to finish, and to interpret the results. [2515-025 (2005) : 64]

203. Your first 2-3 months will be spent training on the continent to help provide you with the range and depth of specialist knowledge required to perform this role effectively. [2515-026 (2005) : 65]

204. Once settled in the role, you will be responsible for the daily activity of the cyclotron including all routine maintenance. [2515-026 (2005) : 65]

205. Both roles will enjoy a competitive salary, benefits package and ongoing training. [2515-026 (2005) : 65]

206. Please state clearly which role you are applying for. [2515-026 (2005) : 65]

207. Both roles are located in Gosport, Hampshire. [2515-027 (2005) : 65]

208. Ideally for all roles you’ll have some brewing, food or beverage experience, but it’s essential that you have a relevant degree. [2515-028 (2005) : 66]

209. For Senior Chemist/Biochemist roles, we are looking for specialist expertise such as chromatographic and spectroscopic techniques including HPLC, GC or GC-MS. [2515-028 (2005) : 66]

210. The Senior Microbiologist role will be responsible for managing the microbiology team at the central laboratory and provide expert microbiological, water hygiene and yeast service for the Group. [2515-028 (2005) : 66]

211. Whichever role you join us in you’ll bring excellent organisation and team skills, and a strong customer focus too. [2515-028 (2005) : 66]

212. Please email your CV and covering letter stating the position you’re applying for, your current salary details and explaining why you are suitable for the role, to Sheron Barker [2515-028 (2005) : 66]

213. UK Laboratory Roles and the relevant job title in the subject heading. [2515-028 (2005) : 66]
Please note that the full salary range for these roles is £31,534 to £54,950. [2515-034 (2005) : 68]

The skills required for this role are broad ranging. [2515-036 (2005) : 68]

To fill these roles we are looking for self-motivated, independent and innovative problem solvers to support a wide variety of technological activities. [2515-037 (2005) : 69]

As part of this role you will be required to present to senior managers and conferences. [2515-040 (2005) : 70]

What a creative and challenging role! [2515-041 (2005) : 70]

Bring your specialist expertise in textile materials, or for applying physical technologies to textile materials, to this exciting role. [2515-041 (2005) : 70]

NIAB is seeking an outstanding candidate for a new role as Associate Leader for its Plant Pathology Group in Cambridge. [2515-042 (2005) : 70]

The role provides an opportunity to lead, develop and promote a new research programme at NIAB and to contribute to NIAB's future strategic development. [2515-042 (2005) : 70]

It is expected that a portfolio of work reflecting NIAB's strategic interests will be developed; this will include wheat diseases as a major focus, but the role will also be required to develop similar work with other species. [2515-042 (2005) : 70]

This post-doctoral position provides an exciting opportunity to investigate the role of trophic interactions in driving the unstable population dynamics of mountain hares in the Scottish uplands. [2515-044 (2005) : 71]

Whilst familiarity with the European medical devices approvals would be an advantage for these roles, full regulatory and auditing training will be provided. [2515-045 (2005) : 71]

The roles offered are either within our Research or Technical Service Departments and will be predominantly laboratory based. [2515-053 (2005) : 73]

The Research roles will include synthesis and testing of fuel additives and formulations [2515-053 (2005) : 73]

and the Technical Service roles will involve undertaking testing to support customers, involving close contacts with sales. [2515-053 (2005) : 73]

Please indicate whether you are applying for the Research or Technical roles. [2515-053 (2005) : 73]

The role involves responsibility for dealing with patent applications, liaising with patent attorneys and relevant authorities, maintenance of literature/competitor intelligence and budget monitoring. [2515-054 (2005) : 74]

Familiarity with biotechnology based patent process is essential, as is at least 3 years experience in a similar role. [2515-054 (2005) : 74]
The Blood Transfusion Department requires a Biomedical Scientist who will take a leading role in the daily running of the department and be committed to the introduction and implementation of new techniques. [2515-055 (2005) : 74]

Your primary role will be the synthesis of novel, biologically targeted compounds as part of a multidisciplinary team. [2515-057 (2005) : 74]

230. Please note that this role is not a writing position. [2515-059 (2005) : 75]

The successful candidate will play a key role in developing the PET radiochemistry facilities as part of a major initiative to develop molecular imaging within the School of Medicine. [2515-064 (2005) : 77]

This is an exciting development and the appointee will have a key role in coordinating and facilitating the clinical and basic research team as well as responsibility for research governance issues. [2515-065 (2005) : 77]

You will play a major role in characterising the magnetic and structural properties of thin films using transmission electron microscopy. [2515-076 (2005) : 80]

The successful candidate will play a key role in developing the PET radiochemistry facilities as part of a major initiative to develop molecular imaging within the School of Medicine. [2515-079 (2005) : 81]

The successful applicant will be required to use specialized cell culture techniques together with a variety of immunocytochemical and immunoassays to investigate inter-cellular signalling between haemopoietic stem/progenitor cells and their stromal microenvironment including the specific role of macrophages in such responses. [2515-080 (2005) : 81]

Your role would be to support the AMS Manager in running a 5 million volt accelerator mass spectrometer (AMS) based at the DEFRA Laboratories Sand Hutton, York. [2519-012 (2005) : 58]

231. The role will involve record editing, database administration and customer liaison. [2519-015 (2005) : 58]

232. Selection criteria for the role can be found on our homepage at www.ansto.gov.au or by contacting Ms Deanne Wood [2519-017 (2005) : 60]

The successful person will be required to conceive, plan, and implement biogeochemistry research that emphasises the role of biogeochemical processes in irrigated landscapes, and factors controlling biogeochemical processes in the landscape. [2519-018 (2005) : 60]

233. An exciting opportunity has arisen within Process Catalysts & Technologies (Billingham) to fulfil the role of Catalyst Forming Development Scientist as part of a multi-disciplinary Manufacturing Science Team. [2519-020 (2005) : 61]

234. The diverse nature of the role also requires a range of raw material, intermediate and product characterisation techniques to be employed. [2519-020 (2005) : 61]

235. This new role is ideal for an existing team leader looking to broaden their exposure and as part of a career path [2519-021 (2005) : 61]

236. into more senior management roles. [2519-021 (2005) : 61]

237. If Prova is the kind of organisation which is offering the sort of role you are looking for, please send your CV to: [2519-026 (2005) : 63]
You will play a key **role** in introducing robotics and automation for high-throughput genetic analysis to the laboratory. [2519-028 (2005) : 64]

**238.** For this highly visible **role**, you'll need in-depth knowledge of UK water quality regulations, public health issues and environmental impacts on the water industry. [2519-031 (2005) : 65]

**239.** The ideal candidate will have graduated with at least a 2:1 and have some experience of working in a pharmaceutical environment preferably within a medicinal chemistry **role**. [2519-033 (2005) : 65]

**240.** The key focus of this **role** is efficiently managing the process of producing client reports from receipt of initial data, to overseeing quality control and ensuring thorough and accurate technical content and ultimately production of the reports. [2519-034 (2005) : 66]

**241.** To achieve this, you will have a group of 6 technical staff for whom you will have line management responsibility. In addition, the **role** involves responsibility for the efficient use, and ongoing development, of our suite of in-house data processing software. [2519-034 (2005) : 66]

**242.** Pharma, Biotech, Chemical, Environmental and Clinical specialists, latest **roles**: [2519-037 (2005) : 66]

**243.** Initially, the **role** will involve characterising the structure and function of proteins involved in the packaging of herpes simplex virus DNA. [2519-042 (2005) : 68]

The workgroup has UKAS accreditation and you would have a major **role** in ensuring this accreditation is maintained. Applicants must have a Science degree, experience of managing a laboratory team and knowledge of serological tests. [2519-043 (2005) : 69]

**244.** This is a challenging and rewarding **role** and in return we offer a competitive package including company car and pension. [2519-046 (2005) : 69]

**245.** The **role** will also involve drafting briefings for Scottish ministers, preparing policy papers and advising members of the public. [2519-047 (2005) : 70]

**246.** Initially, the **role** will involve characterising the structure and function of proteins involved in the packaging of herpes simplex virus DNA. [2519-048 (2005) : 70]

**247.** Please send a hand-written letter, stating which **role** you are interested in, your CV and a sample of your scientific writing to: [2519-056 (2005) : 71]

This post is available immediately for a fixed term until 1 October 2010 to join an interdisciplinary and multi-centre team of scientists on a project, funded by the Wellcome Trust, to study the **role** of protein matrices in the control of biomineralisation. [2519-060 (2005) : 73]

**248.** Progression beyond the gateway will be available dependent on the **role** holder meeting the requirements [2519-060 (2005) : 73]

**249.** and developing within the **role** [2519-060 (2005) : 73]

To support an ongoing project investigating the **role** that Shigatoxin-encoding bacteriophages play in the spread of zoonotic disease. [2519-067 (2005) : 75]

Your primary **role** will be to set up, run and manage our analytical facility to support our inhouse drug discovery programs. [2524-004 (2005) : 52]
You will also have an interest in animal models of disease, and a desire to deepen your understanding of their role within the drug discovery process. [2524-005 (2005) : 53]

251. Shift based role. [2524-006 (2005) : 54]

252. Salaries/rates for all of these roles are dependent upon skills and experience. [2524-006 (2005) : 54]

253. In this newly created role, you will contribute to the overall business as a member of the central management team and take responsibility for initiating and co-ordinating product and solution development across the European operations. [2524-009 (2005) : 54]

254. You will have first-hand experience of negotiating and implementing licensing transactions, ideally gained over a number of years within a university technology-transfer office environment or within a corporate licensing role. [2524-012 (2005) : 56]

255. In 2004 Papworth Hospital introduced an innovative role within the Cardiothoracic Transplant Team. [2524-013 (2005) : 56]

256. This Donor Care Physiologist (DCP) role has substituted the Anaesthetic SpR on the Donor Retrieval Team. [2524-013 (2005) : 56]

The DCP now plays a key role in the care and management of organ donors during donor retrieval operations, under the supervision of a Surgical Fellow. [2524-013 (2005) : 56]

257. You should have excellent communication and team building skills, along with the enthusiasm to continue to develop this role. [2524-013 (2005) : 56]

258. Application form and role profile available by contacting the Employee Services Department direct Recruitment Line on 01480 364251, Papworth Hospital NHS Foundation Trust, [2524-013 (2005) : 56]

We are looking for a highly motivated and independent scientist, who will play a key role in our world-leading scientific, instrument design and instrument-operation programme within the ISIS Crystallography/Engineering group in the field of Engineering and Materials Science. [2524-021 (2005) : 60]

259. In this challenging role, you will assist the Head of Unit appraise, commission, monitor and evaluate projects and provide independent scientific advice. [2524-022 (2005) : 60]

You will undertake a secretariat role for Research and Development customers and science groups and maintain project and programme details. [2524-022 (2005) : 60]

260. This role will involve some UK and European travel. [2524-022 (2005) : 60]

261. The purpose of the role is to head the laboratory, formulate the strategy and deliver the additional sales for the analytical business by increasing the customer base and to technically support the range of services offered by SembCorp. [2524-026 (2005) : 61]

262. The role holder will be expected to: [2524-026 (2005) : 61]
263. In this challenging **role**, you will liaise with international opinion leaders to develop a strong programme of reviews and supplements for the clinical community. [2524-029 (2005) : 62]

264. To find out more about the **roles**, and to apply, please visit [www.snhjobs.co.uk](http://www.snhjobs.co.uk) [2524-034 (2005) : 63]

265. The **role** demands a good eye for detail and an ability to work to deadlines. [2524-038 (2005) : 64]

266. The **role** requires a good eye for detail and a team-oriented approach to work. [2524-040 (2005) : 65]

267. We are looking for a commercially focused Research Scientist with potential to progress into a senior management **role** [2524-041 (2005) : 65]

269. We have a unique and exciting opportunity for a high pedigree scientist to develop the **role** of Senior Director, Research Alliances at our research facility in the UK. [2524-047 (2005) : 68]

270. High level negotiation skills are essential for this **role**, as is the ability to influence and energise people at all levels, regardless of position and status. [2524-047 (2005) : 68]

The Tyndall Centre for Climate Change Research in the School of Environmental Sciences at the University of East Anglia is seeking up to six experienced and outstanding individuals to take leading **roles** in the ADAM Project (2006-2009), newly funded by the European Commission. [2524-054 (2005) : 72]

Your **role** will be working in the development of methods for the registration of quantitative medical imaging data using model-driven registration in the Division of Imaging Science and Biomedical Engineering (ISBE) at the University of Manchester. [2524-071 (2005) : 77]

**role** of networks and bioinformatics [2524-078 (2005) : 79]

The postholder will take a lead **role** in the development of a new neuroimaging analysis laboratory and in the support and supervision of junior research staff. [2528-008 (2005) : 62]

The company plays a leading **role** in marine environmental research in the UK and has established a reputation for high-quality scientific research and technical consultancy. [2528-013 (2005) : 64]

271. A new position has been created for the **role** of a TSR. The TSR is responsible for the sale of peptides (Catalogue/Custom) by direct sales activities, the aim being to grow and develop the sales in the UK & Ireland. [2528-015 (2005) : 64]

272. To be successful in this **role** you must: [2528-015 (2005) : 64]

273. UK, France, Denmark, Egypt and South Africa based **roles** [2528-016 (2005) : 65]

Your primary **role** will be the synthesis of novel, biologically targeted compound libraries as part of a multidisciplinary team of synthetic, analytical and computational chemists. [2528-017 (2005) : 66]

274. As the **role** involves multidisciplinary teams and interaction with client companies, [2528-017 (2005) : 66]
275. the role would be suited to candidates with several years' relevant industrial experience. Experience of project management is preferred but is not essential. [2528-017 (2005) : 66]

276. The roles, which include both permanent and fixed-term posts, involve program design and coding work to develop software that uses chemical structure and logic based reasoning to report outcomes to the user. [2528-020 (2005) : 67]

277. An extremely varied role, you will be involved with all aspects of water supply quality and treatment. [2528-021 (2005) : 68]

278. In these key roles, you’ll play your part in supporting the science of the future over a vast range of exciting areas. [2528-026 (2005) : 70]

279. Both roles are available either permanently or on a temporary, maternity contract. BBSRC benefits include final salary pension, very generous annual leave and flexible hours as well as a first-class working environment. [2528-026 (2005) : 70]

280. For reasons of national security only exclusively British nationals can be considered for this role. [2528-027 (2005) : 70]

282. A competitive salary will be offered and there is scope to broaden the role into new areas in the future. [2528-030 (2005) : 71]

283. To find out more about this role, visit www.awe.co.uk. [2528-036 (2005) : 73]

284. We also have a variety of other technical team leadership roles available, details of which are available on our website. [2528-036 (2005) : 73]

The primary role of the Centre Director is to develop CoEBIO3, into a successful commercial operation, providing training, contract R&D and, in the longer term, intellectual property. [2528-039 (2005) : 75]

285. Your role will be working in a team with Editors where you will enjoy day to day challenges and responsibilities. [2528-041 (2005) : 75]

And our R&D teams at Sandwich play a vital role in our global success, supporting and developing one of the healthiest product pipelines in the industry. [2528-042 (2005) : 76]

286. To be successful in this role, you will need a BSc (ideally with an MSc or PhD) in a Biomedical discipline. [2528-045 (2005) : 77]

287. The role requires a self motivated individual with a systematic and logical approach to problem solving and strong attention to detail, without losing sight of the big picture. [2528-045 (2005) : 77]

288. Whilst familiarity with the European medical devices approvals would be an advantage for this role, full regulatory and auditing training will be provided. [2528-047 (2005) : 79]

289. Senior writers also undertake co-ordination and planning of submission documentation, and other senior medical communication roles. [2528-048 (2005) : 79]

290. Key aspects of this role will include the production of API batches for preclinical development projects using the in-house kilo-lab facility, and to liaise with outsourcing API partners on technology transfers and process development to full-scale manufacturing of API's. [2528-052 (2005) : 81]
Reporting to the Editorial Production Systems Manager, you will play a key **role** in investigating, developing and implementing delivery of RSC Publishing content by exploiting relevant technologies such as XML, CML, INChl, web services, directories and ontologies. [2528-054 (2005) : 81]

291. The key developmental **role** will be in the assessment of aspergillus antibody testing capabilities. [2528-059 (2005) : 84]

2006

1. The **role** will also involve the provision of technical support to end-users, licensees, the sales team and the multidisciplinary R&D team. [2533-002 (2006) : 44]

2. A key aspect of the **role** will be to develop and expand the scope of tests offered by the laboratory, oversee research and to develop a high calibre team. [2533-009 (2006) : 48]

   Your **role** will be to characterise dAb products to support our drug discovery programmes. Experience of functional cell assays, tissue culture, flow cytometry and ELISAs would be an advantage. [2533-013 (2006) : 49]

3. As you would expect, the non-destructive assay of radioactive materials is crucial to AWE and this **role** will help to ensure the highest possible standards. [2533-018 (2006) : 51]

4. To find out more about this **role**, visit [www.awe.co.uk](http://www.awe.co.uk). [2533-018 (2006) : 51]

5. This is a cross functional **role** which will involve close liaison with R&D, the business and external patent agents and thereby management of the IP strategy. [2533-021 (2006) : 52]

6. This senior **role** involves working on preclinical and clinical studies, as well as representing the department in multi-disciplinary, international project teams. [2533-026 (2006) : 54]

7. In the Project Team **role**, you will contribute to the drug development process and present data at the project team level, as well as to senior management. [2533-026 (2006) : 54]

8. In this demanding **role**, you will need to have the ability to work well in a team and to plan in a rapidly changing environment. [2533-026 (2006) : 54]

9. The **role** involves hands-on testing, installation and maintenance of new equipment, together with existing equipment and routine inhalation testing using non-automated techniques. [2533-029 (2006) : 55]

10. To succeed in any of these **roles**, it is essential that you have a strong analytical background with a good honours degree in a relevant discipline and experience in a GMP regulated industry. [2533-029 (2006) : 55]

11. These **roles** attract a competitive salary and benefits package. [2533-029 (2006) : 55]

12. Research for both **roles** is undertaken using internet searches, information databases, telephone conversations, and consultations with field experts. [2533-031 (2006) : 55]

13. Alternatively you may search and apply directly to any **roles** of interest. [2533-033 (2006) : 56]

Which means that our new safety pharmacology team will play a hugely influential role in our continuing success in developing new drugs. [2533-036 (2006) : 57]

In this key position, you will play an important role in the development of experimental vaccines and associated test procedures. [2533-037 (2006) : 57]

Presented annually, the travel awards are open to those whose research focuses on the dynamic and often complex role of pathogenic and/or health promoting bacteria in food and its implication on health within the human gut. [2533-038 (2006) : 57]

Responsibility for the scientific day-to-day running of the project while fulfilling a role of liaison between outside parties (academic, industrial, funding agencies etc.) and the academic members of the project's management team. [2533-045 (2006) : 59]

Experimentation and modelling (e.g. simulation) play a central role in the systems approach. [2533-053 (2006) : 61]

Tissue remodelling during gonadogenesis and the role of DMRT 1 in sex determination in the chick embryo. [2533-062 (2006) : 63]

The successful candidate will play a significant role in providing novel and innovative solutions in electrical measurement for industry and other centres of excellence around the world. [2537-002 (2006) : 57]

16. All roles require a good degree in the relevant subject. [2537-002 (2006) : 57]

17. Excellent interpersonal skills, strong customer focus and an ability to work to challenging deadlines are important aspects of the roles. [2537-002 (2006) : 57]

18. For all our R&D roles we're looking for a real passion for scientific research and drive for implementing findings, plus the ability to communicate effectively. [2537-007 (2006) : 59]

19. While you'll be based in Reading, all roles will involve fieldwork and travel throughout the River Thames catchment area, plus occasional overseas work. [2537-007 (2006) : 59]

20. To apply (excluding Engineering Doctorate role above), please send your CV, quoting the appropriate reference number to HR Service Centre, Thames Water Recruitment Team, [2537-007 (2006) : 59]

We aim to win, and this post is key to our success. As Deputy Director of OIE/FAO/EU International Reference Laboratory for Avian Influenza and Newcastle Disease, based at VLA Weybridge, you will be responsible for the research that underpins our international role in this high profile area, as well as providing support to the Director in the international forum. [2537-008 (2006) : 60]

21. It is an exciting and challenging role in which you will be able to influence many innovation projects, so besides strong leadership and experience of working with multi-discipline teams, your academic and professional record will need to be top-class. [2537-011 (2006) : 61]

22. A role with real influence, you'll get a deep satisfaction from mixing the scientific and business world, as well as chemistry and consumer research. [2537-011 (2006) : 61]
23. The position will be based in Nature Publishing Group's modern London offices, and the terms and conditions are highly competitive, reflecting the importance and responsibilities of the role. [2537-012 (2006) : 62]

24. Working closely with Quality Assurance, Clinical Supplies Programme Managers, Despatch and Supply Planning, this vital role pulls together the documentation required to complete an order and ensures that the process is conducted to rigorous GMP/GCP standards and in accordance with various international requirements. [2537-017 (2006) : 64]

Your role will include the enhancement of an existing analytical Access database and assistance in HE modelling. [2537-011 (2006) : 61]

25. A relevant first degree is required, although a PhD is desirable for the HE roles. [2537-011 (2006) : 61]

26. To find out more about the roles, please contact Deborah Beale on +44 (0) 1462 476543.

27. Alternatively, to apply please send your CV to vacancies@herongroup.co.uk stating which role you are applying for. [2537-011 (2006) : 61]

28. In this role you will be leading the European clinical area of a global programme for assigned development candidates. [2537-020 (2006) : 65]

29. A second language would be advantageous, as considerable European travel is involved in the role. [2537-020 (2006) : 65]

30. The role comes with many different challenges to stimulate and inspire you. [2537-021 (2006) : 65]

31. In this broad role, you will take lead responsibility of developing new and existing products using your technical organic skills ultimately increasing our global profile. [2537-021 (2006) : 65]

You will also play a key role in mentoring and advising other chemists thus strengthening the knowledge of our laboratory teams. [2537-021 (2006) : 65]

32. If this role appeals to you and you have the determination to succeed within Sigma-Aldrich, please send your current CV and a covering letter to Human Resources Department at Sigma-Aldrich Company Ltd [2537-021 (2006) : 65]

33. You must be flexible as due to the continued growth of the Unipath/IMI product range the responsibilities within the role may change. [2537-023 (2006) : 66]

34. You can apply for this role and learn about how we do things at the BBC, by visiting bbc.co.uk/jobs [2537-024 (2006) : 66]

The position on offer will allow you to play a major role in the development of Council research policies within the remit of its portfolio, and exists in the following key area: [2537-025 (2006) : 67]

35. In this high-profile role as part of the Regulatory Response team, you'll keep an eye on events that affect our customers' drinking water supply, notifying the Drinking Water Inspectorate (DWI) of any important changes. [2537-033 (2006) : 69]

36. In both roles, you'll be an enthusiastic, motivated, degree-calibre professional, with at least one year's relevant experience, preferably scientific or operational. [2537-033 (2006) : 69]

37. It's a highly visible role that will broaden your existing knowledge of coastal flood risk management and provide scope to make a real and significant impact for future generations. [2537-039 (2006) : 71]
38. This role is for an analytical chemist with a minimum of five years' postgraduate experience of food and agricultural analysis. [2537-040 (2006) : 71]

39. This role is for an analytical chemist with a minimum of three years' postgraduate experience of food and, where possible, agricultural analysis using a variety of techniques. [2537-040 (2006) : 71]

40. The role requires a good eye for detail and a team-oriented approach to work. [2537-045 (2006) : 72]

41. This key role, within Roche's Drug Safety team will see you develop a process and strategy to maximise the effective use of contract personnel and CRO resources in the context of the department's overall incoming workload and resources. [2537-046 (2006) : 73]

42. A proven team leader with a commercially-focused approach, you will bring at least five years' experience in the pharmaceutical or CRO industries in a Drug Safety/Pharmacovigilance role. [2537-046 (2006) : 73]

Your role will focus on designing and interpreting multidisciplinary toxicology studies to evaluate the safety of chemicals and proteins. [2537-048 (2006) : 73]

43. You should have a degree and 3-5 years' postgraduate experience working with collections and/or collections digitisation, be familiar with institutional collection data and have experience of managerial roles implementing projects; [2537-050 (2006) : 74]

44. The role also includes responsibility for managing the digitisation facilities and support for digitisation projects, including training, procedural guidance and management of staff/volunteers. [2537-050 (2006) : 74]

45. In these key roles, you will be part of a multi-disciplined team working on a number of diverse projects from technical transfer of products from R&D through to process optimisation for existing products. [2537-051 (2006) : 75]

This post is to run jointly with a project at the London School of Hygiene and Tropical Medicine, and will investigate the role of predicted host specific sequences in colonisation and persistence of Campylobacter jejuni in poultry. [2537-055 (2006) : 76]

Role of macrophages in bovine tuberculosis [2537-055 (2006) : 76]

The project will consider the roles of toll-like receptors in the responses of bovine antigen presenting cells. [2537-055 (2006) : 76]

46. The role requires a good eye for detail and a team-oriented approach to work. [2537-056 (2006) : 76]

In the first research domain, the roles of mAbs as both vectors in delivering irradiation to tumours and also in direct cancer cell killing are further explored. [2537-062 (2006) : 79]

This post offers an enthusiastic motivated individual an opportunity to join a friendly team and play a lead role in co-ordinating patient recruitment to a number of studies looking at ways to improve both acute and long-term care of stroke patients. [2537-068 (2006) : 82]

47. The role will involve extensive contact with both students and staff, so an understanding of the needs of students and a good customer service approach are essential. [2537-069 (2006) : 82]
The project will investigate the mechanism of retroviral entry into human cells, with emphasis on the role that the envelope glycoprotein of human T-cell leukemia virus (HTLV-1) plays in this process. [2537-070 (2006) : 82]

The successful applicant will be required to use specialized cell culture techniques together with a variety of immunochemical and immunoassays to investigate inter-cellular signalling between haemopoietic stem/progenitor cells and their stromal microenvironment including the specific role of macrophages in such responses. [2537-071 (2006) : 83]

The work will focus on the role of the blood-brain barrier and pathological changes in the barrier in Sanfilippo Syndrome. [2537-073 (2006) : 83]

The successful candidates will have an outstanding record of research, or have demonstrated outstanding research potential, in the subject area and will be expected to take leading roles in a vibrant research programme at the energy and symmetry frontiers, in particular in the exploitation of data from the LHC. [2537-075 (2006) : 84]

NIBSC is a multi-disciplinary scientific establishment with the crucial role of protecting public health through standardizing and controlling biological substances found in medicine. [2537-085 (2006) : 87]

48. To find out more about Unilever and SEAC, view details on the individual roles available, and read some profiles of people working in these areas, please visit www.unilever.co.uk/seac [2541-004 (2006) : 57]

   We like to get them as widely involved with the business as we can – and it makes sense: after all, our modellers play an absolutely key role in shaping where we're going as a business. [2541-005 (2006) : 58]

49. To find out more about Unilever and SEAC, view details on the individual roles available, and read some profiles of people working in these areas, please visit www.unilever.co.uk/seac [2541-007 (2006) : 59]

50. As a forensic expert, you will already understand that this is the biggest role of its kind in Scotland and one of the biggest in the UK, therefore it is a significant opportunity, with considerable influence and accountability. [2541-008 (2006) : 60]

51. To find out more about Unilever and SEAC, view details on the individual roles available, and read some profiles of people working in these areas, please visit www.unilever.co.uk/seac [2541-011 (2006) : 61]

52. but it's your sensitivity to the political issues at stake that will show you're perfect for the role. [2541-012 (2006) : 62]

   You'll have a key role liaising with our partners, rolling out our new measures and co-ordinating incident response training. [2541-012 (2006) : 62]

53. A driving licence is essential for all roles. [2541-012 (2006) : 62]

54. A degree in Engineering and ideally, three years spent in a chemical processing or pharmaceutical manufacturing development environment - at least a year of which was in a support role - will have given you a keenness and aptitude to learn and apply new technologies. [2541-013 (2006) : 63]

55. Many graduates see their first role as the start of a chain reaction. [2541-014 (2006) : 64] → métaphore du domaine de la chimie
56. For the publishing and conference roles we’re looking for people who’ve studied chemical science or a related subject. [2541-014 (2006) : 64]

57. For the science communication role we need a graduate who appreciates the important role science plays in society. [2541-014 (2006) : 64]

58. The role will support a range of Pre-clinical and Clinical stage projects in the oncology area. [2541-015 (2006) : 64]

59. With a consultative and flexible approach, candidates will be graduates from a technical or scientific discipline, with a strong product/process development background and at least 5 years experience in a senior Technical/Project Management role, ideally in a highly regulated environment, e.g. medical, cosmetic, food, FMCG. [2541-019 (2006) : 66]

60. Key to your success within this role will be excellent interpersonal skills and the ability to work effectively alongside site based client personnel. [2541-019 (2006) : 66]

62. The role involves talking to researchers over the telephone as well as corresponding via e-mail so it is essential for you to have excellent oral and written communication skills. [2541-021 (2006) : 66]

63. Please send a CV and cover letter highlighting the experience and skills you can bring to this role to Sarah Brutnell [2541-021 (2006) : 66]

64. Whilst familiarity with the European medical devices approvals would be an advantage for these roles, full regulatory and auditing training will be provided. [2541-026 (2006) : 68]

65. Internal promotion has created these two senior roles, where research is focused in the CNS and oncology therapeutic areas. [2541-029 (2006) : 69]

66. Working in multi-disciplinary teams with structural scientists, biologists, molecular modellers and DMPK/pre clinical development scientists the Winnersh role is likely to be more laboratory based whilst at Cambridge the bias will be towards projects. [2541-029 (2006) : 69]

67. For either role you will need to create and initiate with commitment whilst developing your team. [2541-029 (2006) : 69]

68. The role will involve extensive customer collaboration and internal liaison with possibility of international travel. [2541-031 (2006) : 70]

You will play a key role in driving multiple product development projects for our Hip and Knee businesses from concept to delivery. [2541-031 (2006) : 70]

69. You will be responsible for the development and performance of a team of 9 - 11 staff (depending on role). [2541-032 (2006) : 71]

70. In this role you will be responsible for all secretariat and administration activities of a group of Expert Committees and manage a small team of administrators. [2541-036 (2006) : 73]

71. This latest purchase is just part of an ongoing commitment to stay leading edge, and in what is a high-profile and influential role, you’ll be responsible for determining our Supercomputer procurement plans and strategy. [2541-037 (2006) : 74]
To find out more about this role and apply online visit www.awe.co.uk. [2541-037 (2006) : 74]

Formed in 1986 and comprising 19 European Member States, EUMETSAT's role is to establish, operate and exploit European meteorological satellite systems. [2541-039 (2006) : 75]

The role involves a wide variety of marketing activities including Market Research, New Product Development, Pricing and Promotion. [2541-041 (2006) : 75]

CCLRC's Rutherford Appleton Laboratory plays a key role in UK science through its design and delivery of world class science facilities and programmes. [2541-042 (2006) : 76]

Such a role furthers the Government's intention that every aspect of the pesticides approvals system is open and transparent. Put simply, your function would be to reflect the everyday concerns of the consumer or the general public at Committee meetings. [2541-047 (2006) : 77]

If you would like to play a key role in our future success, please send your CV and covering letter, to The Recruitment Officer, WWF-UK, Panda House [2541-052 (2006) : 79]

In this key role, you'll ensure that financial targets are met, generate an appropriate forward load and determine future areas of activity. [2541-054 (2006) : 80]

This entry level marketing role is for a fixed term of 12 months, and is based in London. [2541-058 (2006) : 80]

The role embraces market research, events and promotional activities and will suit a new (post) graduate who is a team player, has an excellent attitude and an interest in contributing towards promoting the healthcare benefits of biopharmaceuticals. [2541-058 (2006) : 80]

This Centre's role is to perform particle accelerator research and development and the team you would join are experts in the design, construction and development of advanced high-energy particle accelerators. [2541-062 (2006) : 81]

For this position applicants should hold a suitable science degree and have experience working in a scientific environment in either a technical support or research role. [2541-064 (2006) : 82]

Based in the internationally-recognised Animal Behaviour and Welfare Research Group within the School of Clinical Veterinary Science at Langford, this role will involve developing an active research programme in one of the following broad areas: [2541-068 (2006) : 83]

The goal of the research is to establish the role of the Major Histocompatibility Complex (MHC) in sexual selection in birds, using the red junglefowl, Gallus gallus, and its domestic subspecies, G. g. domesticus, as model systems. [2541-083 (2006) : 87]

The successful applicants will be working on the role of tumour suppressor genes, transmembrane receptors for growth factors and hormone receptor genes and the alternative splicing of these genes in hormonally regulated cancers (breast/ovary and prostate). [2541-084 (2006) : 87]

Additional interest/expertise in stromal cell interactions and analysis of the role of leukaemic stem cells in disease progression will be an advantage. [2541-085 (2006) : 88]

The main role will be to establish cell separation of bone marrows from myeloma patients and the subsequent use of FISH with a view to enhancing diagnostic capabilities. [2541-085 (2006) : 88]
79. For this new role we would welcome applications in any area of Biomedical research, but wish particularly to encourage applicants whose experience and expertise would strengthen and complement the existing research profile of the school. [2541-088 (2006) : 89]

Developing lentiviral vectors to study the role of connexins in neuronal signalling and cognition. [2541-097 (2006) : 92-93]

80. This challenging role will see you lead and develop a team to provide histological services to support the CR-UK scientific community. [2545-010 (2006) : 62]

You will join the medicinal chemistry group and play a full role in designing and synthesising new chemical entities for biological and pharmacological evaluation within the ICT. [2545-012 (2006) : 62]

81. The main responsibilities of this role will be as follows: [2545-014 (2006) : 64]

82. If you feel you could fulfill this demanding role please send us your CV for consideration. [2545-015 (2006) : 64]

The purpose of this job is to take a lead role in the development and implementation of the Cancer Research UK Training and Career Development Board's (TCDB) strategy, to be responsible for managing all aspects of Cancer Research UK's Personal Awards schemes, to provide the secretariat for the TCDB and to develop systems for monitoring the success of schemes. [2545-019 (2006) : 65]

83. This will be a challenging role as Cancer Research UK has recently undertaken a major review of its fellowship schemes. [2545-019 (2006) : 65]

The charity is currently expanding and developing its portfolio to meet the needs of the whole cancer research community, and the Senior Research Manager will have a key role in implementing the recommendations of the review. [2545-019 (2006) : 65]

The purpose of this job is to take a lead role in the implementation of Cancer Research UK's strategy with respect to institutes, particularly the development of the funding relationships with the institutes, and to manage, in partnership with another Senior Research Manager, the organisation of Institute Reviews to the core-funded Institutes. [2545-019 (2006) : 65]

84. In both these roles you will be expected to work closely with other research managers within the Directorate in order to deliver your set objectives. [2545-019 (2006) : 65]

85. These roles demand the ability to work both independently and as part of a team. [2545-019 (2006) : 65]

The Fingerprint Bureau holds a key role in delivering interpretation of fingermarks and development on latent marks from items collected as part of the investigative process. [2545-020 (2006) : 66]

86. In this role you will be required to undertake forensic examinations of a variety of items either as an individual or as part of a team. [2545-020 (2006) : 66]
The role will be to identify and recover forensic evidence from a wide range of potential exhibits using chemical treatments and light source examinations, together with specialist photography for which you will be expected to attend residential courses. [2545-020 (2006) : 66]

87. To be eligible for this role you must hold a qualification in Forensic Science to BSc level. You will be part of the centre of excellence and best practice in this field within the organisation. [2545-020 (2006) : 66]

88. To succeed in this role you are likely to have an engineering or scientific degree with at least five years' relevant experience in pharmaceutical inhaler or medical device development. [2545-024 (2006) : 68]

89. This role attracts a competitive salary and benefits package including relocation assistance where appropriate. [2545-024 (2006) : 68]

90. To apply for this role, please forward your CV as an attached Word document to SAMDD@uib.srg.co.uk or contact Deborah Hale [2545-024 (2006) : 68]

91. These are exciting roles within a dynamic and newly established global team. If you are ready to influence the future of drug discovery and development, we can promise you a competitive remuneration package, strong professional growth and the freedom to use a wide range of skills in pursuit of ambitious research objectives. [2545-027 (2006) : 69]

   Initial training will be on site but further advanced training will be at IBA in Belgium to help provide you with the range and depth of specialist knowledge required to perform this role effectively. [2545-028 (2006) : 70]

92. Once settled in the role, you will be responsible for the daily activity of the cyclotron including all routine maintenance. [2545-028 (2006) : 70]

93. The role will also include supporting operational demands and maintenance of key pieces of equipment. [2545-028 (2006) : 70]

94. Both roles will enjoy a competitive salary, benefits package and ongoing training. [2545-028 (2006) : 70]

95. If you are looking for a stimulating environment, working at the forefront of medical imaging, then apply by sending your CV and covering letter to HR Executive, SCHERING, The Brow, Burgess Hill, West Sussex RH15 9NE or email hr@schering.co.uk Please state clearly which role you are applying for. [2545-028 (2006) : 70]

96. Opportunities in Material Science £18.5 - £27.5k depending on knowledge, skills, experience & level of role [2545-031 (2006) : 71]

97. Key to the role is an aptitude in experimental design and lab based work, and Labview/Labwindows software control and acquisition. [2545-031 (2006) : 71]

98. Please complete your online application with particular focus on how your skills match the roles of this position. [2545-031 (2006) : 71]

99. The role covers a wide variety of tasks from monitoring, servicing, validating and calibrating equipment as well as sample collection, stock control, preparing and ordering reagents, provision of sterile equipment to Microbiology, sterilisation of contaminated waste, cleaning and preparing equipment. [2545-032 (2006) : 72]
100. Full training will be provided in all roles although proven practical laboratory skills will be considered an advantage, together with an understanding of Good Laboratory Practice and Good Manufacturing Practice. [2545-032 (2006) : 72]

101. For an application form for any of the above roles, please apply in writing to the Personnel Department, Bio Products Laboratory, Dagger Lane, Elstree, Hertfordshire WD6 3BX or email us at vacancies@bpl.co.uk quoting the relevant reference number. [2545-032 (2006) : 72]

We also need your expertise to play a key role in the development of new standards, policies and procedures that will maintain our global leadership in statistical methodology. [2545-036 (2006) : 73]

103. Senior writers also undertake co-ordination and planning of submission documentation, and other senior medical communication roles. [2545-038 (2006) : 74]

104. These are absolutely essential roles and you can expect to assist in the operation of information systems such as DDIT and Technical Library. [2545-040 (2006) : 75]

105. Whichever role attracts you, you'll find yourself in a world that's evolving as fast as it is growing. [2545-040 (2006) : 75]

106. The full salary range for this role is £19,489 to £28,112. [2545-043 (2006) : 77]

107. The role is based in our modern London offices, near King's Cross Station. [2545-046 (2006) : 78]

108. The successful candidate will be expected to contribute initially to some of the following roles and possibly take responsibility for all areas on the retirement of the chief chemist in 2007. [2545-047 (2006) : 78]

109. This newly created role will provide technical leadership of product stewardship systems particularly with regard to hazard evaluation and communication and will act as a source of expertise in occupational and environmental toxicology. [2545-049 (2006) : 79]

110. The prime purpose of the role will be to produce an implementation plan for the REACH directive, and to manage that plan for Johnson Matthey business with a view to the expected April 2007 timetable. [2545-049 (2006) : 79]

111. To view a full job description and apply for this role, please visit www.ResourceBank.co.uk/jobs/7188mcp.html [2545-049 (2006) : 79]

112. For a confidential discussion about the role, please call Richard Pearson on the number below. [2545-049 (2006) : 79]

113. The role will suit a new or recently qualified PhD Scientist specialising in physical chemistry, with colloid and/or polymer experience. [2545-055 (2006) : 81]

Join us and you will have a key role to play, ensuring that we are supported by effective data management at all times. [2545-061 (2006) : 83]

114. To apply for these roles you must have relevant experience and a recognised qualification. [2545-064 (2006) : 84]
115. Required to manage a series of international clinical trials, the role will involve trial design and protocol preparation, CRO selection and management, leadership of a multi-disciplinary team, trial timeline, budget management and interaction with key opinion leaders. \[2545-064 (2006) : 84\]

116. Senior CRA & CRA Roles \[2545-064 (2006) : 84\]

117. Applicants must have at least six months' trial monitoring experience (two years for the senior role), be familiar with ICH GCP and have proven personal organisation and communication skills. \[2545-064 (2006) : 84\]

You will be responsible for implementing a global clinical communications and research strategy for the IPC product line and will play an active role in the New Product Development Process. \[2545-065 (2006) : 84\]

You will be expected to take a proactive role in the development of a world class programme of research linking particle physics, cosmology and astrophysics. \[2545-072 (2006) : 87\]

The project seeks to investigate the role of p38MAPK signalling in a very dramatic premature ageing disease, Werner's Syndrome (Kipling et al. Science 305: 1426-31). \[2545-075 (2006) : 88\]

The approach taken in the research will be experimental and involve characterisation of the rheology and microstructure of selected coil coating formulations with a view to establishing the influence of these attributes on performance - particularly with respect to their role in the formation of defects in the coating. \[2545-091 (2006) : 93\]

Role of amino-acid transport System A in mammalian physiology and disease. \[2545-092 (2006) : 93\]

Phosphoinositide signalling during autophagy: the role of DFCP1 a novel FYVE domain protein. \[2545-092 (2006) : 93\]

High on the wish list will be the Higgs Boson, thought to play a key role in endowing other particles with mass. \[2550-006 (2006) : 56-57\]

Around half the institutes are in the former East Germany and the association plays a key role in the economic revitalisation of the cities in which they are located. \[2550-007 (2006) : 58-59\]

118. Key responsibility for this role will be development of inhalation dosage forms internally, as well as in collaboration with external partners. \[2550-011 (2006) : 61\]

119. 2-5 years experience in a product development role within the pharmaceutical industry, ideally in the area of inhalation dosage forms \[2550-011 (2006) : 61\]

120. In this role, you will be responsible for the analytical development of inhaled products at all stages (i.e. pre-formulation to commercialization). \[2550-011 (2006) : 61\]

121. 2-5 years experience in a product development role within the pharmaceutical industry \[2550-011 (2006) : 61\]

122. In one of these pivotal roles, you could realise the full spectrum of Office and Strategic Services (OSS) deliverables, including New Target Entity evaluation, patient analysis and competitive assessment, whilst taking ownership of global strategic and genomic/proteomic technology assessment projects. \[2550-012 (2006) : 62\]

Due to the EMBL turnover system, the Unit composition is highly dynamic, and the Coordinator will play a critical role in the choice of new Group Leaders and thus in the research direction of the entire Unit. \[2550-014 (2006) : 63\]
As a major division within the NHS National Services Scotland, the Scottish National Blood Transfusion Service (SNBTS) plays a vital role not only in the health of the people of Scotland but also on an international scale - through our leading position in manufacturing, product development, biomedical research and donor services. Our goal is to maintain the highest standards to patient care whilst remaining Internationally competitive. [2550-016 (2006) : 64]

The Quality organisation plays a critical role in delivering safe, effective products in fine with this mission and we are currently looking to further strengthen the senior team within this key function. [2550-017 (2006) : 65]

123. The role also calls for a CMAS 2* diving qualification or equivalent. [2550-018 (2006) : 66]

124. We are looking to fill the senior role of Environment & Hazards Director within the Executive Committee and to serve on the BGS Board. [2550-026 (2006) : 69]

125. Experience of working in stringent Health & Safety environments, understanding the responsibilities and promoting the ethos are also essential for this role. [2550-026 (2006) : 69]

126. In this largely laboratory-based, experimental role, you'll design novel formulation options, before carrying out experiments at various levels from a laboratory to manufacturing scale, then interpreting and reporting your findings and conclusions. [2550-027 (2006) : 70]

Excellent communication skills, both written and verbal, are essential, as extensive liaison (to include report writing and presentations) with internal and external partners is a crucial part of your role. [2550-028 (2006) : 70]

127. The purpose of this role is to provide administrative and technical support to the head of the Non-native species Secretariat at CSL. [2550-031 (2006) : 71]

128. Candidates without this level of qualification will need at least six years relevant experience in a Research Ecologist role. [2550-031 (2006) : 71]

129. The purpose of this role is to assist the Export Advice and Import Licensing Section in the promotion of UK Plant Health interests by providing technical advice on the licensing requirements and quarantine containment of non-indigenous plants and plant pathogens, and overseas countries' requirements for freedom from pests and diseases on plants and plant products. [2550-031 (2006) : 71]

130. The purpose of this role is to undertake R&D projects on behalf of Pesticides Safety Directorate and other clients. [2550-031 (2006) : 71]

131. PhD analytical scientists are required for the following roles: [2550-032 (2006) : 72]

132. For all these roles, we're looking for innovative thinkers with good problem-solving skills. The ability to work well in a team and liaise effectively with diverse teams across Chemical Development and other areas of Research & Development and Manufacturing will also be very important. [2550-032 (2006) : 72]

Two opportunities exist to take a leading role in managing implementation programmes, for governments and major brand owners in order to prevent tax evasion and brand abuse. [2550-032 (2006) : 72]

133. One role will focus on National programmes in the petroleum industry while the other will focus on Brand Protection programmes for blue chip organisations. [2550-032 (2006) : 72]

An opportunity exists to take on the role of QC Leader ensuring that all of the products leaving our York Facility meet our quality standards. [2550-032 (2006) : 72]
In this key role, you should have a minimum of science A level and HPLC experience would be an advantage. [2550-032 (2006) : 72]

We are looking for a scientist to join the in vitro ADME group, to help to develop the role of in vitro ADME for BioFocus clients. [2550-034 (2006) : 73]

The role involves working in multidisciplinary teams with close interaction with client companies. [2550-034 (2006) : 73]

you will have a vital role to play in influencing the success of future projects. [2550-035 (2006) : 74]

Your work will be diverse and technically challenging and the role will involve some travel both in the UK and overseas. [2550-036 (2006) : 74]

In return, you can look forward to a worthwhile and challenging role with a successful, multinational company that genuinely values and rewards the commitment of its people. [2550-039 (2006) : 75]

Key to these roles is your desire and enthusiasm to further the fundamental understanding of ligand-receptor interactions. [2550-040 (2006) : 75]

An opportunity exists to undertake work aimed at improving diagnosis and epidemiological tools for the detection and typing of Brucella, specifically playing a leading role in the ongoing development of novel sequence-based approaches to diagnosis and typing. [2550-042 (2006) : 76]

The role [2550-043 (2006) : 76]

Take a lead role in ensuring smooth engineering operations of the FESF in areas covering safety management, maintenance, procurement, planning & facility enhancement. [2550-043 (2006) : 76]

The role is likely to expand, offering candidates the opportunity to develop broad, technology based project management skills within a growing environment at the cutting edge of science. [2550-043 (2006) : 76]

This role will become very important to Rhodia in Europe with the introduction of REACH in 2007. [2550-045 (2006) : 77]

Excellent project management, organisational and influencing skills are essential for success in this role, as is your attention to detail. [2550-045 (2006) : 77]

The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems. [2550-046 (2006) : 78]

Taking a train, attending a concert, undergoing a medical examination, watching a sports game on TV, buying clothes or visiting a museum are just a few examples taken from our daily lives where Barco's know-how can play a significant role. [2550-050 (2006) : 79]

In these roles you will be aiding in the acquisition and delivery of projects in the area of energy efficiency and renewable energy in buildings and in low energy building design or zero carbon strategies. [2550-051 (2006) : 79]

Such is the importance of this role that you will also play a part in the development of environmental regulation at EU level. [2550-052 (2006) : 80]
The extensive experience you've already gained in a regulated industry or regulatory body will stand you in good stead for the challenges that this role delivers. [2550-052 (2006) : 80]

A PhD position is available in characterising and predicting the metabolic response to nutritional intervention, and will investigate the role of gene-environment interactions. [2550-062 (2006) : 83]

We are seeking a talented individual to carry out fundamental and process-related fermentation research and have a supervisory role of fermentation research within the IMRC. [2550-066 (2006) : 84]

Turley was not the first scientist to realise the enormity of this issue, but she has played a key role in bringing it to the fore and convincing policy-makers. [2554-001 (2006) : 58-59]

Along with his advisory role in the regulatory sector, Wilby makes time to continue his own research on how to manage water as the climate changes. [2554-001 (2006) : 58-59]

you can play a new and vital role in maximising the relevancy and benefits of our activities to potential users. [2554-005 (2006) : 61]

A self-starter who can operate with a high degree of autonomy and deliver to agreed goals, you will have experience in a senior knowledge management role. [2554-005 (2006) : 61]

The successful candidate will be expected to bring a dynamic approach to the role and a successful track record of innovation.

They will play a key role in the development of the ARK team and in furthering commercial and academic partnerships.

You will also provide a supporting role in the coordination of groundwater sampling efforts by other staff and the review of sampling site suitability and health & safety issues. [2554-015 (2006) : 64]

You must have excellent communication skills, both written and oral, as liaison with both internal and external stakeholders will play a crucial part of your role, and an awareness of current and relevant legislation. [2554-015 (2006) : 64]

Because this is a "hands-on" and an advisory role, you'll have excellent organisational and interpersonal skills, will be self-sufficient in IT and have a current clean driving licence. [2554-021 (2006) : 65]

You will lead our oncology translational biology effort, shaping your own role as you help define and put in place our overall strategy. [2554-025 (2006) : 67]

It's a high-profile role that will see you both coordinate the growth of the discipline internally and lead external collaborations - accessing samples, developing and applying analytical methods to tumours and assessing the impact of pre-clinical compounds. [2554-025 (2006) : 67]

It will be your role to offer far-reaching practical support to the Group Leader in areas such as cell biology, molecular biology and immunohistochemistry. [2554-025 (2006) : 67]

In this varied, creative role, you must have a PhD in cell/molecular immunology, plus up to a couple of years related experience. [2554-025 (2006) : 67]

Contributing project, scientific and operational expertise, you will play a crucial role at every stage of our different clinical study programmes. [2554-029 (2006) : 69]
Working with global counterparts, you'll identify and initiate new research opportunities - and play a pivotal role in the development and delivery of our Food Safety Strategy. [2554-033 (2006) : 71]

155. It's a role that will impact on business growth, and will require you to liaise with R&D, and our Global Quality Team. [2554-033 (2006) : 71]
The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems. [2554-034 (2006) : 72]

156. This key role involves: [2554-038 (2006) : 74]

Specifically the role is to co-ordinate and monitor technical product and process performance such that volume and cost targets are achieved. [2554-040 (2006) : 74]

The Micronutrient Status Research Section (MSRS), at the MRC Collaborative Centre for Human Nutrition Research, Cambridge, focuses on dietary minerals and vitamins and their role in public health. [2554-044 (2006) : 76]

158. Extensive experience in a senior leadership role, in a project driven research environment, and a demonstrated capacity for managing R&D teams. [2554-048 (2006) : 77]

159. A further aspect of the role will involve working with the wider BASF innovation pipeline in the area of crop production. [2554-050 (2006) : 79]

160. Role requirements include the preparation of technical literature and product labels to support market introduction and sales, staffing our technical hotline, and the provision of support for our activities in the development of novel crop varieties. [2554-050 (2006) : 79]

161. Applicants for this role will hold a degree in either Agriculture or Biological Sciences, the BASIS Certificate in Crop Protection or similar, coupled with several years experience in the industry and excellent interpersonal and organisational skills. [2554-050 (2006) : 79]

162. In this role you will act as the first point of contact between the Agency and industry stakeholders, answering enquiries received by phone, letter and email from licence holders and their representatives across Europe. [2554-051 (2006) : 79]

163. The full salary range for this role is £19,208 - £23,740. [2554-051 (2006) : 79]

To join a team studying the roles of axon pathology in Alzheimer's disease and mechanisms of axon degeneration. [2554-052 (2006) : 80]

164. We are seeking outstanding applicants for an ongoing role in our severe-wind risk activity. [2554-058 (2006) : 81]

166. The role will include generating, organising and interpreting data in support of technical projects and reporting out as appropriate. [2554-059 (2006) : 81]

167. To succeed in this role, in addition to your technical problem-solving abilities it is essential that you have a proven track record in building and developing long-term relationships with customers and internal stakeholders. [2554-059 (2006) : 81]
168. Qualified to BSc level, or equivalent, in a chemistry related discipline, you will also have a minimum of five years' experience in a chemistry, engineering or customer facing role. [2554-059 (2006) : 81]

169. This role requires planned but regular travel within the UK and Europe. [2554-059 (2006) : 81]

The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems. [2554-060 (2006) : 82]

This exciting new post will play a leading role in the GIS group of the Department of Epidemiology and Public Health and contribute to the EU-funded INTARESE project. [2554-070 (2006) : 85]

You will have expertise in developing novel approaches to tracing biogeochemical pathways to develop understanding of the role of soil microbes in the carbon cycle. [2558-005 (2006) : 60-61]

RNAi to Determine the Role of Specific Hepatic Transporters in Drug Disposition Prof G M Hawksworth / Dr R Weaver (Servier) [2558-007 (2006) : 62]

170. In this demanding role, you will need the ability to work well in a team and to plan in a rapidly changing environment. [2558-022 (2006) : 66]

172. SEE OUR WEBSITE FOR A WIDE VARIETY OF ROLES IN SCIENCE, UK WIDE! [2558-023 (2006) : 66]

173. In this stimulating role, you will ensure that the site's current, new and upgraded computer systems comply with cGMP. [2558-024 (2006) : 67]

174. Your work in this role will help sustain new product introduction and ongoing manufacturing support. [2558-024 (2006) : 67]

175. In this key role, you will implement the packaging strategy for Crawley focusing on delivering new solutions and technology. [2558-024 (2006) : 67]

176. For more details or to apply for these exciting roles, please email your CV, with a covering letter, to gsk@uib.srg.co.uk [2558-024 (2006) : 67]

177. Evaluating discovery candidates from a development perspective and conducting risk analysis, analytical and formulation development and preparing regulatory submissions for clinical trials, form the main framework of activities for these challenging - and highly rewarding - roles. [2558-025 (2006) : 68-71]

Analytical Development within PAR&D plays a major role in the development of new pharmaceuticals, combining the expertise of analytical chemists, organic chemists and spectroscopists in multi-disciplinary teams. [2558-025 (2006) : 68-71]

178. For all roles within this group, a PhD/BSc anti a minimum of five years’ relevant pharmaceutical experience will be essential. [2558-025 (2006) : 68-71]

Above all, you’ll be looking for a role with more autonomy and more scope to deliver far-reaching results. [2558-025 (2006) : 68-71]

The Product Development team occupies a core scientific role within our Pharmaceutical and Analytical Research and Development (PAR&D) function. [2558-025 (2006) : 68-71]

179. Solid Dosage Forms (two roles) [2558-025 (2006) : 68-71]
180. For the Senior Scientist **roles**, either a degree with at least four years’ relevant experience or a PhD with at least two years’ industrial experience will be essential. [2558-025 (2006) : 68-71]

181. For the Scientist **roles** a degree with some post-graduate experience would be desirable. [2558-025 (2006) : 68-71]

As part of our Laboratory Services Support team, you will play a pivotal role in supporting scientific staff at a time of significant re-engineering and change at the site. [2558-026 (2006) : 72]

183. If you are a recent graduate in chemistry or a related subject, ideally with some experience from an industrial placement, are enthusiastic, innovative and looking to work in a busy and challenging environment, then this might be the role for you. [2558-029 (2006) : 73]

184. This role, as part of the Labelling and Planning team within our Clinical Supplies department, will give you the opportunity to attend and have input to protocol development meetings for Phase I to IV clinical studies, ensuring a clear understanding of the supplies requirement. [2558-029 (2006) : 73]

185. Whilst your technical skills will be very much in demand, your ability and willingness to get involved in the packaging and despatch of clinical studies will also be a requirement of the role. [2558-029 (2006) : 73]

186. previous experience in the Pharmaceutical Technical, QA or Validation role would be advantageous. [2558-032 (2006) : 74]

Ideally with experience in in vivo models of disease, you will play an essential role in our drug discovery efforts establishing animal models of visceral disorders, including colitis, hypersensitivity and motility. [2558-034 (2006) : 75]

187. This role is key in facilitating successful, fast, flexible innovation and finding creative ways of ensuring a swift, smooth transition through the development process. [2558-039 (2006) : 77]

188. You should have a successful track record within a quality role, preferably within an FMCG environment, and possess a strong drive for results. [2558-039 (2006) : 77]

189. All roles offer attractive salaries and benefits. [2558-040 (2006) : 77]

190. For further details on these roles and to apply, please visit [2558-040 (2006) : 77]

You will have a major role in researching and writing parts of reports on key environmental issues. [2558-041 (2006) : 78]

191. You will primarily be involved in a technical role supporting the evaluation and implementation of new technologies for the group, software systems for scientific applications, data generation and validation activities for the stability studies conducted in the group. [2558-042 (2006) : 78]

192. To find out more about this role, visit www.awe.co.uk. [2558-045 (2006) : 79]

193. We're offering challenging technical roles in the assessment of the potential performance and safety implications of changes in the design of nuclear fuel assemblies and related components, or in the production technologies and materials used in their manufacture. [2558-046 (2006) : 79]

All of the roles will be broad, though there will be particular focus on the continued development of novel materials and processes, the build and testing of prototype systems and product planning. [2558-049 (2006) : 80]

We're looking to build our team with two key roles: [2558-051 (2006) : 81]

To find out more about Unilever and SEAC and view details on these and other roles, please visit www.unilever.co.uk/seac [2558-051 (2006) : 81]

In this new role, you’ll ensure regulatory compliance and best scientific practice, including specification, methodology, validation, testing strategies, investigations and practical work at vendors. [2558-052 (2006) : 81]

This is a key scientific role requiring you to make a significant contribution to the development of future products. [2558-058 (2006) : 83]

With a minimum of 2 years experience in a biological safety role, you will have strong IT and communication skills, the ability to work under pressure, adaptability, a strong team ethic and flexible approach. [2558-059 (2006) : 84]

For more information on these roles please call Seona Ramsay on 0161 868 2200 and forward a CV in word document format to gerard@uib.srg.co.uk [2558-062 (2006) : 85]

With a first degree in chemistry and post graduate studies in heterogeneous catalysis, you will already have two to three years successful experience in an industrial role. [2558-066 (2006) : 87]

An English mother tongue speaker is required for this role within the technology marketing department of a leading catalyst manufacturer based in Germany. [2558-066 (2006) : 87]

An exciting and challenging role within an expanding and vibrant organisation, you will play a key role in developing strong technical relationships with customers across Europe, Middle East, Africa and the FSU. [2558-066 (2006) : 87]

The role will involve the provision of technical support and report dispatch to clients. [2558-068 (2006) : 87]

Flexibility, good communication and organisational qualities as well as team leadership skills are essential for this key role within DanioLabs. [2558-069 (2006) : 87]

Meticulous attention to detail and excellent organisational skills are vital for this role. [2558-076 (2006) : 90]

This office based role would suit a biology graduate keen to pursue a career in clinical trials. [2558-076 (2006) : 90]

You will have a leading role in co-ordinating and monitoring the project and are required to have excellent communication and presentation skills and a strong ability to motivate and lead others. [2558-078 (2006) : 91]

To apply for this role please visit www.warwick.ac.uk/jobs [2558-083 (2006) : 93]

The programme "Chromosomal translocations, cancer therapy targets and chemical cancer biology" combines a multifaceted approach to understanding the role of chromosomal translocations in cancer
initiating cells and the development of novel therapeutics designed to affect the interactome of the cancer cell. [2558-084 (2006) : 93]

You will take a lead role in the parts of the programme involving genetic manipulation of cancer genes and DNA cloning to generate recombinant DNA vectors for protein expression in mammalian cells. [2558-084 (2006) : 93]

You will take a lead role in the parts of the programme involving chromosome engineering mainly in mouse embryonic stem (ES) cells. [2558-084 (2006) : 93]

You will take a lead role in the parts of the programmes involving transgenic models. [2558-084 (2006) : 93]

We are seeking a highly motivated individual to play an important role in the delivery of our Exercise, Nutrition and Health Courses. [2558-085 (2006) : 94]

'The role of mRNA processing in the determination of MODY phenotype' Messenger RNA processing can produce divergent phenotypes even for genes that are very similar at the sequence level. [2558-095 (2006) : 97]

It will employ molecular, cell biology and immunological techniques to explore the role of the pro and anti-inflammatory function of leucocytes, while under various pressure conditions and in contact with endothelial cells. [2558-095 (2006) : 97]

The aim of this project is to determine (a) What role do podocyte associated molecules play in the pathogenesis of diabetic kidney disease in man; [2558-095 (2006) : 97]

(b) Is this different to their role in non-diabetic proteinuric diseases? [2558-095 (2006) : 97]

'Characterisation of the role of SMN in microtubule transportation of B-Actin in mRNA' [2558-095 (2006) : 97]

Using an insect model, Notonecta glauca, to examine the role of SMN in B-actin mRNA transport, the student will isolate SMN-associated transport granules, and identify component proteins using molecular biology, protein biochemistry and immunohistochemistry. [2558-095 (2006) : 97]

You will join an expanding team of neuroscientists to concentrate on the role of cannabinoid influence cell death/cell survival decisions in the central nervous system. [2558-095 (2006) : 97]

'Defining the Role of Information Visualisation in Health Technology Assessment’ [2558-095 (2006) : 97]

This project examines the roles of fluorescent photo-sensitisers and intracellular oxygen concentrations in the effectiveness of this treatment. [2558-095 (2006) : 97]

You will employ a range of pharmacological and molecular biological approaches to identify and define the roles of the molecular components involved in a cGMP-dependent pathway that regulates pancreatic beta-cell viability. [2558-095 (2006) : 97]

Your role within our UK R&D team will principally involve development of both existing and new chemical processes which underpin new product and technology innovations within our business. [2563-002 (2006) : 50]

210. Previous experience within a laboratory-based, or chemical manufacturing role with the speciality chemicals sector would also be an advantage: [2563-002 (2006) : 50]
Playing an important role in the continual development of an exceptional service for healthcare and professionals [2563-003 (2006) : 51]

211. then this role could be for you! [2563-003 (2006) : 51]

212. If you are interested in this role, please apply online to job requisition number 055956, [2563-003 (2006) : 51]

213. attaching your CV and covering letter detailing your current role and remuneration package. [2563-003 (2006) : 51]

The MIE role is to provide a Medical Information enquiry service of value to Pfizer’s customers, aiding their decision making and ensuring safe, ethical and effective use of Pfizer’s prescription only products (POMs). [2563-003 (2006) : 51]

214. What's more important is that you have proven ability in a technical management role and the interpersonal skills to inspire your team. [2563-004 (2006) : 51]

215. Candidates should be able of working as part of a small, dedicated team and be prepared to fill a flexible role, including participation in research cruises. [2563-007 (2006) : 52]

216. Leading projects incorporating both in-house and external research, this is a dynamic and challenging strategic role. [2563-008 (2006) : 52]

217. For all roles you will need to be educated to at least degree level in a relevant discipline. In addition, you will be highly motivated, a good team player, a strong communicator and self-organised. [2563-011 (2006) : 54]

They are exciting and challenging opportunities to play important role in our new Chemical and Analytical Development (CHAD) Center located in Changshu. [2563-012 (2006) : 55]

218. A seagoing Deck Engineer Officer is required to fill a key role in a new Science Department being created aboard our research vessels James Cook and Discovery. [2563-014 (2006) : 56]

219. Knowledge of livestock agriculture and an understanding of commercial issues within the animal health or animal breeding industries would be an advantage for the Trainee position and essential for the full Technology Translator role. [2563-015 (2006) : 56]

220. The role is full time and will be based in Bramley, Guildford. [2563-016 (2006) : 56]

221. Relocation assistance may be available for the Hydrogeologist roles. [2563-021 (2006) : 58]

222. An important part of the role will also be to develop interactions with other members of the EARNEST consortium and with partners in the NuGO Network of Excellence (www.nugo.org). [2563-024 (2006) : 59]

223. Key communications support role with emphasis on technical delivery of communications products and messages: £25,777 p.a. [2563-025 (2006) : 59]

A Post-Doctoral Molecular Biologist is required for a 3 year BBSRC-funded research grant to investigate the role of gibberellins in wheat grain development. [2563-029 (2006) : 60]

And all of our staff have a key role to play. [2563-032 (2006) : 61]

224. For an informal discussion about this role, you may wish to contact Dr Raquel Duarte-Davidson on 01235 822895. [2563-032 (2006) : 61]
For informal discussions about this role, you may wish to contact Dr Brett Jeffrey.

Familiarity with the role of the statistician in QA and ethical review would be beneficial.

The purpose of this role is to assist in research into animal welfare and wildlife management with particular emphasis on the use of non-invasive measures.

For further information on this and other roles at the L&D, and to apply online please log onto www.ldh.nhs.uk/workatld.

Looking at the radiological safety of the food chain, you will combine technical expertise with policy responsibility-the role will involve dealing with research co-ordination and liaising with a wide range of stakeholders.

For more details about this role and other opportunities, please visit www.novartis.com quoting job reference 17737BR.

Driving the design and development of Phase I clinical trials, you will take a key role both in the leadership of your Biometrics team and in the delivery of vital input to support our clients' objectives.

You will have a role in the development of methodologies, protocols and, most importantly, people.

As such, your management skills are as vital to the role as your scientific abilities.

You should bring good communication skills to the role, helping you build effective working relationships with colleagues and external stakeholders alike, and it's vital that you share our ambition.

That means your project management and client interaction skills are just as vital to the role as a degree in pharmacy, medicine or chemistry and substantial experience in clinical research in international fields.

The main role will be to assist in the design of clinical studies and the analysis and presentation of subsequent data.

Applicants with a higher degree in a relevant discipline are sought to support research into Endocannabinoids in Reproduction and locally Progestogens in Endometriosis by investigating the cellular and molecular mechanism by which levonorgestrel acts on endometrial cells and endocannabinoids influence reproduction, and the role endocannabinoids in predicting adverse pregnancy outcome.

An interest in exotic species would be highly advantageous in this role.

Working with University partners and external collaborators, the co-ordinator will play a key role in the development of a large-scale energy research programme designed to address national and global needs.
Our research aims to utilise contemporary molecular biology and standard microbiology techniques, to understand the role of dental plaque microorganisms in clinical problems associated with orthodontic treatment. [2563-075 (2006) : 76]

Characterisation of the molecular and pharmacological roles of the novel human endokinin Drs Nigel Page and Tony Walker [2563-078 (2006) : 77]

Our research aims to utilise contemporary molecular biology and standard microbiology techniques, to understand the role of dental plaque microorganisms in clinical problems associated with orthodontic treatment. [2563-079 (2006) : 77]

236. His enthusiasm for his role, which includes running the trust and engaging in high-profile public debates, is obvious. [2567-002 (2006) : 50-51]

He also thinks that the trust has a vital role to play in the public arena. [2567-002 (2006) : 50-51]

The Chair of the ACMSF has a vital role in guiding and communicating the Committee's discussion and his or her independence must be beyond question. [2567-003 (2006) : 52]

Leading the research team and reporting to the Executive Director of Research and Policy, you will take an active role in the ongoing development, implementation and evaluation of the charity's research strategy. [2567-007 (2006) : 56]

An understanding of the role of science in the formulation of advice to government; [2567-008 (2006) : 53]

237. If either role appeals to you please send your current CV and a covering letter to: Manchester Recruitment at Sigma-Aldrich Co. Ltd, [2567-011 (2006) : 54]

238. We now have two exciting roles for people with drive and initiative to help us move forward in this competitive marketplace. [2567-013 (2006) : 56]

239. These roles may include some international travel. [2567-013 (2006) : 56]

You'll play a strategic role in tracking products, providing regulatory input and advice. [2567-013 (2006) : 56]

The National Institute for Biological Standards and Control has a key role in safeguarding and enhancing public health by standardizing and controlling biological substances used in medicine. [2567-016 (2006) : 58]

NIBSC has a leading international role in preparing, evaluating and distributing International Biological Standards and other biological reference materials. [2567-016 (2006) : 58]

240. They should have good attention to detail, good communication skills and be well motivated in a bench science role. [2567-016 (2006) : 58]

241. This is an exciting role with overall responsibility for the journal's content and coverage of the field. [2567-018 (2006) : 58]

242. This key role involves: [2567-018 (2006) : 58]

243. Working within a small team, this is a varied role with the main emphasis being on the management and maintenance of marketing authorizations within the UK and Ireland, and providing regulatory and technical advice/support to other departments. [2567-020 (2006) : 59]
You will provide a direct contribution to the scientific output of the group, participating in the design and execution of experiments investigating transcriptional regulation and the role of DNA repair in the pathogenesis of M. tuberculosis. [2567-022 (2006) : 59]

244. Please quote the above job role when requesting your application pack. [2567-024 (2006) : 60]

As one of the world’s leading pharmaceutical companies, we know the crucial role Discovery Medicine plays in bringing our innovative therapies to important areas of need. [2567-027 (2006) : 61]

245. For the more senior role, you will also need evidence of sustained productivity in epidemiological research. [2567-027 (2006) : 61]

246. For both roles we’re looking for an MSc or PhD in an imaging field or extensive experience of using imaging in clinical trials. [2567-027 (2006) : 61]

247. Reporting directly to the managing director and involving international travel, this role will give the right candidate an opportunity to get in on the ground floor of a fast-growing and successful company and to develop their project management skills in an exciting commercial environment. [2567-029 (2006) : 62]

248. In this pivotal role, you will divide your time between radiation protection and general site safety responsibilities, giving you considerable impact on everything we do. [2567-032 (2006) : 64]

Research Manager (Informatics) - the purpose of this job is to support Cancer Research UK's role as the lead funder in the National Cancer Research Institute (NCRI) Informatics initiative (see www.cancerinformatics.org.uk). [2567-034 (2006) : 64]

For this post you will have obtained a PhD in a bio-medically-related area or other appropriate field and will have completed a period of postdodoral research of at least one year Technical expertise in informatics is not required although an understanding of the role of informatics in bio-medical research will be important. [2567-034 (2006) : 64]

249. In this role you will be expected to work closely with other research managers within Cancer Research UK and NCRI in order to deliver your set objectives [2567-034 (2006) : 64]

250. and the role will demand the ability to work both independently and as part of a team. [2567-034 (2006) : 64]

251. Working as part of the Research Team, the role will involve management, delivery and communication of Research projects. [2567-035 (2006) : 65]

Additionally the associate will play a vital role in ensuring laboratory facilities at Penhow will fulfil the demands of the current project and provide enough flexibility for future expansion. [2567-037 (2006) : 66]

NIBSC has a leading international role in preparing, evaluating and distributing International Biological Standards and other biological reference materials. [2567-039 (2006) : 67]

252. Join us in this wide-ranging and influential role, and we'll look to you to assist our Scientific Advisor to provide the very latest information on technical legislation and scientific matters which will affect our business. [2567-041 (2006) : 67]

You'll be an important source of advice on scientific and technical legislation matters, and it will also be your role to assess the likelihood of hazards occurring in any of our products due to contamination or pollution. [2567-041 (2006) : 67]
253. To find out more about the role, please download the job description (Health Outcomes Analyst) from www.herongroup.co.uk [2567-045 (2006) : 68]

254. Good knowledge of LC-MS is essential to this role. [2567-049 (2006) : 69]

255. In this role, you will be the scientific leader of the project team (including Data Managers, Programmers and Statisticians) for the reporting of Phase I and II studies. [2567-055 (2006) : 72]

256. Your role will involve detailed scientific review of data and close liaison with other members of the Pharmacometrics project team. [2567-055 (2006) : 72]

257. This is a varied role within the Medical Writing Department [2567-055 (2006) : 72]

258. For both roles you will have a degree in Life Sciences and it is essential that you are well organised, competent in the use of Microsoft Word, have a high standard of written English and the ability to produce high quality work to tight deadlines. [2567-055 (2006) : 72]

259. An eye for detail and the ability to adhere to tight deadlines are essential requirements for these roles. [2567-055 (2006) : 72]

260. These are exciting and forward thinking roles, requiring candidates who are self-motivated, equipped with multi-disciplinary team working skills and committed to success: [2567-056 (2006) : 73]

261. The role will involve the optimisation of applications and assist in scale-up and engineering. [2567-057 (2006) : 74]

262. Well developed IT skills are essential in this challenging and important role. [2567-058 (2006) : 74]

263. Please note that the full salary range for these roles is £22,664 - £32,499. [2567-058 (2006) : 74]

264. The GSK manufacturing site at Dartford is seeking technical experts and leaders who care passionately about what they achieve, but also about how they deliver it, to join us in a number of challenging roles across engineering and scientific disciplines. [2567-059 (2006) : 75]

265. Reducing variability and developing right first time processes will be a key aspect of the role. [2567-059 (2006) : 75]

The opportunity to take a lead role in the introduction of new chemical entities exists for the right candidate. [2567-059 (2006) : 75]

266. To find out more about our opportunities and apply, visit our website www.gsk.com/careers quoting the appropriate Req ID for the role(s) of interest to you. [2567-059 (2006) : 75]

The Facilitator will play an active role in raising funds for projects in the physical climate sciences, including:

- seeking out funding from all relevant sources;
- matching funding opportunities to expertise available within the departments; and
- administering the submission of major grant applications. [2567-066 (2006) : 78]

IBIS-II is an international multi-centre trial examining the role of anastrozole in the prevention of breast cancer in high-risk, post-menopausal women. [2567-070 (2006) : 79]

267. The role will work with colleagues in the Research Development and Collaborations team comprising of three Research and Innovation Managers responsible for marketing and supporting the knowledge transfer strategies in three University defined areas: [2567-077 (2006) : 81]
268. The **role** will provide proactive leadership and project management of strategic projects relating to the Environmental Technologies Sector as defined by the South West Regional Development Agency (SWRDA). [2567-077 (2006) : 81]

269. Previous experience in a medical writing **role** is essential, along with an ability to work to tight deadlines and to the highest quality objectives. [2572-008 (2006) : 62]

270. This **role** involves: [2572-008 (2006) : 62]

271. You may have performed this **role** in print or on-line. [2572-008 (2006) : 62]

These strategic posts will also be supportive of Ireland's **role** and position within the healthcare, medical device, biotechnology industries, to which the candidates would be expected to develop strong links. [2572-011 (2006) : 64]

Responsibility for the scientific day-to-day running of the project while fulfilling a **role** of liaison between outside parties (academic, industrial, funding agencies etc.) and the academic members of the project's management team. [2572-013 (2006) : 64]

We now wish to recruit a senior professional to take on the **role** of Environment and Risk Assessment Manager to help us meet this latest challenge. [2572-014 (2006) : 65]

273. This is a significant **role** in the new chemicals division. [2572-014 (2006) : 65]

274. a proven track record in a management **role**, [2572-014 (2006) : 65]

275. Due to increased business demand and significant new product development activity, we are now seeking to recruit high calibre candidates into the following **roles** within Research and Development. [2572-018 (2006) : 67]

276. The **Role** [2572-021 (2006) : 68]

277. Immediate **roles** with flexible terms exist for Pharma & Biotech professionals in a number of areas. [2572-022 (2006) : 68]

278. This diverse and exciting **role** presents an excellent opportunity for an individual with commitment and drive to work with some of the world's leading researchers to develop a novel resource to support the needs of drug discovery scientists. [2572-024 (2006) : 70]

279. These **roles** will require enthusiastic, well-organised postgraduates (MSc, PhD or equivalent) in biochemistry, molecular biology or a related subject. [2572-024 (2006) : 70]

280. A working knowledge of the key protein databases such as Swiss-Prot would be a distinct advantage, as would some understanding of patents for one of the **roles**. [2572-024 (2006) : 70]

281. As editorial **roles**, programming knowledge is not required. [2572-024 (2006) : 70]

282. Informal enquiries for both **roles** may be made to the Editorial Director, Dr Rebecca Lawrence: Rebecca.Lawrence@currentbiodata.com [2572-024 (2006) : 70]

283. You could soon be among them in one of these four clinical development **roles**. [2572-027 (2006) : 71]
By identifying and initiating new research opportunities with global counterparts, you'll play a pivotal role in ensuring we give our consumers the high-quality products that they know, love and expect. [2572-031 (2006) : 73]

284. The successful applicant will be required to have pertinent qualifications and a minimum of three years' in a similar role. [2572-032 (2006) : 74]

285. An enthusiastic and innovative individual is required to fill this role working for the Technical Services Manager. [2572-032 (2006) : 74]

286. All of these roles come with many additional benefits including profit share, private health insurance, SAYE schemes, non-contributory pension, life assurance and 28 days paid holiday plus bank holidays. [2572-037 (2006) : 76]

287. To apply for any of these roles please send a CV and covering letter quoting reference NS-2909 to Emma Harrison, HR Advisor, Human Resources, Bespak plc [2572-037 (2006) : 76]

288. The role will involve the running of enzyme-based screening assays to support compound testing. [2572-038 (2006) : 76]

289. Potential candidates are likely to have at least two years industrial medicinal chemistry experience and will be ambitious to develop their careers in an exciting laboratory-based multidisciplinary role. [2572-038 (2006) : 76]

You'll develop the post-closure performance assessment models for high level waste and spent fuel and play a leading role in writing our safety cases. [2572-040 (2006) : 77]

290. You'll bring to this role a relevant degree preferably combined with a background in radioactive materials. [2572-040 (2006) : 77]

291. The purpose of this role is to complete work on a Defra funded project investigating the behaviour of ionic pesticides in soil. [2572-041 (2006) : 78]

292. These are roles for leaders and influencers who are able to manage people and oversee projects that can range in value from £500,000 to several million pounds. [2572-044 (2006) : 79]

293. To discover more about the specific roles on offer, simply visit www.ea-science.co.uk [2572-044 (2006) : 79]

294. In addition, the role involves database management, and liaison with internal production and marketing departments. [2572-045 (2006) : 80]

295. This role would suit a biomedical graduate looking to begin a career in publishing. Applicants must have excellent verbal and written communication skills, and good attention to detail. [2572-045 (2006) : 80]

296. The role will involve record editing, database administration and customer liaison. [2572-045 (2006) : 80]

297. The role demands good team working skills, computer literacy, a good eye for detail and an ability to work to tight deadlines. [2572-047 (2006) : 80]

298. Aspects of this role will include, the investigation of single electron transport and single photon generation in SAW driven nanostructures. [2572-051 (2006) : 81]
We play a key role in the UK's marine research programme and have an international reputation for managing data from large-scale field experiments and for developing innovative data products. [2572-052 (2006) : 81]

An in-depth knowledge of laboratory systems and pharmaceutical regulatory compliance requirements, coupled with a strong capability for investigative report writing is essential for this role. [2572-053 (2006) : 82]

300. CLINICAL RESEARCH ROLES: [2572-054 (2006) : 82]

301. SEE OUR WEBSITE FOR A WIDE VARIETY OF ROLES IN SCIENCE, UK WIDE! [2572-054 (2006) : 82]

302. The role will require you to work as part of a team promoting Tech Transfer's translation activities and be responsible for undertaking due diligence of proposals, evaluating their anticipated commercial exits and project managing the Trusts interests in key projects. [2572-055 (2006) : 82]

303. This is a demanding role, you need to be able to engage in critical analyses of applied research projects, manage complex stakeholder situations and possess a creative approach to problem solving. [2572-055 (2006) : 82]

304. This is a newly-created position, in which you will find the freedom not only to shape your role, but also the opportunity to influence TrusTECH's future success. [2572-058 (2006) : 84]

Your role here will be to ensure that ACTNoW provides a professional, responsive and commercially-focused service. [2572-058 (2006) : 84]

Your role will be to raise awareness and build capability among local NHS trusts to exploit innovative technologies and services. [2572-058 (2006) : 84]

305. This is a challenging role, requiring you to be persistent, driven and constantly seeking opportunities. [2572-058 (2006) : 84]

306. Whichever role you take, this is a very good time to be joining us: we are expanding very quickly, and we can offer outstanding career opportunities. [2572-058 (2006) : 84]

307. The full salary range for this role is £19,489 - £28,112. [2572-060 (2006) : 85]

308. The role would be to develop, commission and exploit these probes, working with our user community. [2572-061 (2006) : 86]

309. The successful candidate will be responsible for taking over the role of overall project management in Oxford for the on-going prospective study that is currently taking place in 10 regions in China, and for the co-ordination of planning and development of systems and documentation for the case-control study of MI and stroke that will be starting during late 2007. [2572-066 (2006) : 89]

310. The role will be mainly experimental but will also include technical management of the research group. [2572-071 (2006) : 90]

You will play a key role in the development and application of multibeam echo-sounding techniques for measuring sediment dynamics in aquatic environments. [2572-073 (2006) : 92]

311. Applicants should have a HNC (or equivalent) in a relevant area, and previous experience of working in a similar role. [2572-074 (2006) : 92]
The successful candidate will be responsible for taking over the role of overall project management in Oxford for the on-going prospective study that is currently taking place in 10 regions in China, and for the co-ordination of planning and development of systems and documentation for the case-control study of MI and stroke that will be starting during late 2007. [2572-075 (2006) : 92]

Over the past decade, the role of the scientist in drug development has become increasingly important. [2576-003 (2006) : 58-61]

This will be a technical marketing role for a fixed term of 12 months and will provide an excellent foundation for careers in this exciting sector. [2576-006 (2006) : 63]

The role will be laboratory based, and the successful applicant should have experience of mammalian tissue culture techniques such as proliferation assays and western blotting. [2576-007 (2006) : 63]

The role will involve the running of enzyme-based screening assays to support compound testing. [2576-007 (2006) : 63]

Experience in the determination of protein primary structure and the profiling of post translational modifications by mass spectrometry will be required for Senior Scientist roles. [2576-009 (2006) : 64]

Due to the expansion of our clinical program, we are now looking to strengthen our Clinical Development Group with a Clinical Research Associate to play a key role in delivering the medical potential of our research. [2576-010 (2006) : 64]

The post holder must be able to demonstrate real understanding of the role of a CRA in monitoring pivotal registration studies and have a practical understanding of the issues that can arise and how to prevent or correct them. [2576-010 (2006) : 64]

Experience in a team leadership role will be highly valued, along with a relevant degree. [2576-014 (2006) : 66]

So by joining our Simulation Physics Group (SPG), you will play a key role in combating these threats and protecting the lives of our Armed Forces. [2576-017 (2006) : 67]

We are seeking to recruit a number of individuals who have the vision and capability to deliver within a challenging and rewarding environment, where every individual plays a key role in the company's success. [2576-018 (2006) : 68]

This is an exciting new role engaged in the development of novel dry powder dosage forms for respiratory products. [2576-018 (2006) : 68]

You will have a degree and probably a PhD in pharmaceutical science or chemistry and a proven background in a product development role within the pharmaceutical industry. [2576-018 (2006) : 68]

Joining a talented team, you'll work cross-functionally in a project based role with a brief to plan, design, develop and validate methodologies for testing dry powder respiratory products. [2576-018 (2006) : 68]

We are seeking a minimum first degree in chemistry with experience from working within the pharmaceutical industry, preferably in a related product development role. [2576-018 (2006) : 68]

Whilst familiarity with the European medical devices approvals would be an advantage for these roles, full regulatory and auditing training will be provided. [2576-020 (2006) : 69]
323. Outside of the theatre environment, there is also a role performing electro-diagnostic nerve conduction studies and assisting in EMG clinics, delivered as part of the organisation outpatient services. [2576-024 (2006) : 70]

324. Relevant experience is desirable but training and supported development into the specific elements of the role will be provided. [2576-024 (2006) : 70]

325. Key to success in this role will be the ability to forge strong relationships with decision makers in blue chip pharmaceutical companies, biotechnology start-ups and drug manufacturing companies. [2576-026 (2006) : 71]

Within this fast moving and competitive sector, our scientists play a vital role in developing the products that we sell. [2576-030 (2006) : 72]

326. The role [2576-031 (2006) : 72]

327. Good team working and problem solving skills are essential for this role. [2576-031 (2006) : 72]

328. Experience in the determination of protein primary structure and the profiling of post translational modifications by mass spectrometry will be required for Senior Scientist roles. [2576-035 (2006) : 74]

331. This is a key role operating at Research & Development's interface with Marketing, reporting directly to the European Chocolate R&D Director. [2576-038 (2006) : 75]

332. A graduate with a degree in a scientific discipline, you will have intuitive business acumen and real entrepreneurial drive, with proven experience in delivering successful innovation in a dynamic, multinational FMCG environment, and a track record in a line management role with significant team development and coaching responsibilities. [2576-038 (2006) : 75]

333. In this role you'll play on an international stage, providing world-class Regulatory Affairs support to our European operations. [2576-039 (2006) : 75]

334. If this role is the challenge you're seeking, please contact Carol Berry, Human Resources Department for an Application Form [2576-040 (2006) : 76]

335. The role involves coordinating the content of a bi-monthly review journal, Current Opinion in Molecular Therapeutics, and editorial input into the Thomson Pharma database. [2576-043 (2006) : 76]

336. In this role, you’ll identify relevant meetings, commission reviews from industry experts, and process the submitted material for publication, while simultaneously updating all relevant drug and company records on our databases. [2576-043 (2006) : 76]

With a projected £150 million budget, we play an active role in transforming early-stage research into a package of intellectual assets, complete with clear commercial ambitions for onward exploitation. [2576-044 (2006) : 77]

337. Here you'll find more information on the roles and details of how to apply. [2576-044 (2006) : 77]

338. All roles are based in our Dundee office. [2576-044 (2006) : 77]
The **role** will also require method development, staff management and budget planning. [2576-047 (2006) : 78]

339. The **role** involves sourcing, compiling and analysing information for the PharmaDeals® range of business information management tools. [2576-048 (2006) : 78]

NIBSC has a leading international **role** in preparing, evaluating and distributing International Biological Standards and other biological reference materials. [2576-049 (2006) : 78]

You will also play an important **role** in ensuring that Health & Safety standards are met throughout the process. [2576-067 (2006) : 82]

340. For an application pack and further information on the **role** and benefits, please visit [www.hmgcc.gov.uk](http://www.hmgcc.gov.uk) or apply to: [2576-067 (2006) : 82]

341. You should be an effective team player as the **role** necessitates a close working relationship with other members of the team to improve and extend the high standard of services available. [2576-072 (2006) : 85]

Boundaries are blurring in the scientific hierarchy, and nowhere more so than for the **role** of the technician. [2576-074 (2006) : 85]

342. The Insider celebrates the technician's **role** in the modern laboratory. [2576-074 (2006) : 85]

343. To find out more about us and the **roles** we have on offer visit [www.jobs.soton.ac.uk](http://www.jobs.soton.ac.uk) and apply on-line. [2576-085 (2006) : 89]

344. This challenging and exciting **role** will involve co-ordinating the sequencing at WTSI of samples from the CIDC and other members of the consortium, [2576-089 (2006) : 90]

and playing a central **role** in the phylogenetic and bioinformatic analysis of the resulting data. [2576-089 (2006) : 90]

345. The **role** will be based between the CIDC, based at the Department of Veterinary Medicine, University of Cambridge and the WTSI, spending time in each location depending on the specific demands of the project. [2576-089 (2006) : 90]

346. You will be responsible for taking over the **role** of overall project management in Oxford for the ongoing prospective study that is currently taking place in 10 regions in China and for the co-ordination of the planning and development of systems and documentation for the casecontrol study of MI and stroke that will be starting during late 2007. [2576-091 (2006) : 91]

348. **Active role** in solving difficult analytical problems (e.g. development work, support to customers both internal and external and claims handling) [2580-006 (2006) : 56]

349. If you are interested in this **role** and meet most of the above criteria, please email your application / CV marked Researcher to [Norway.Jobs@borealisgroup.com](mailto:Norway.Jobs@borealisgroup.com) [2580-006 (2006) : 56]

Applications in all relevant areas of bone biology will be considered, but those which increase understanding of the **role** of RANK, RANKL or OPG in bone biology would be particularly welcome. [2580-008 (2006) : 57]
In this vital role, you will provide expert technical advice to all our business units, focusing on the interaction of thermal power plants with the aquatic environment. [2580-011 (2006) : 58]

This Team undertakes applied research on the role of wildlife in zoonotic diseases of concern to human and animal health. [2580-012 (2006) : 58]

In return, you’ll enjoy every opportunity to shape this all-new post, contribute to HMD service development and build your experience by playing a key role in what is a rapidly evolving specialist area of clinical diagnosis. [2580-016 (2006) : 60]

CRT’s role is to identify, protect, develop and commercialise intellectual property from both Cancer Research UK and institutions worldwide, to deliver patient benefit. [2580-017 (2006) : 60]

352. SEE OUR WEBSITE FOR A WIDE VARIETY OF ROLES IN SCIENCE, UK WIDE! [2580-018 (2006) : 60]

353. It's an influential role that will involve working closely with project teams. [2580-019 (2006) : 61]

354. For both roles, you're likely to be a science graduate or someone with a strong nursing background. [2580-019 (2006) : 61]

355. A graduate or equivalent in chemistry or chemical science, you'll have experience of working with toxic substances gained in a field trials or lab-based role. [2580-022 (2006) : 62]

You will: play a key role in the scientific assessment of papers submitted for publication, selecting reviewers, taking decisions at key stages of the peer-review process and assisting with the development of one of our most prestigious journals. [2580-023 (2006) : 62]

the purpose of this job is to take a lead role in the implementation of Cancer Research UK's strategy [2580-025 (2006) : 63]

356. In this role you will be expected to work closely with other research managers within the Directorate in order to deliver your set objectives. [2580-025 (2006) : 63]

357. These roles demand the ability to work both independently and as part of a team. [2580-025 (2006) : 63]

358. If you are interested in this role and wish to develop your career within a highly successful international group, please forward your CV together with a covering letter including your current salary details to: [2580-026 (2006) : 63]

359. We have a number of roles requiring differing levels of experience. [2580-028 (2006) : 64]

(Previous applicants may be considered for this role). [2580-028 (2006) : 64]

360. For more details including a role profile please see the CELS web site www.celsatlife.com or contact Andrea Thompson at andrea.thompson@celsatlife.com. [2580-029 (2006) : 64]

361. To apply please send your CV, outlining your suitability for this role and details of current salary [2580-032 (2006) : 64]
Producing a billion litres of drinking water daily is no small challenge and our teams of scientists in Huntingdon perform a vital role in ensuring we maintain the highest possible standards. [2580-033 (2006) : 65]

362. This is no ordinary role and you must have a high degree of numeracy and the ability to think conceptually. [2580-033 (2006) : 65]

363. The role is based in North London, conveniently located close to Finchley Central tube station. [2580-041 (2006) : 67]

364. Strong communication skills and a responsible attitude are essential for all these roles. [2580-044 (2006) : 68]

365. The role will involve the running of in vitro enzyme- and cellular-based screening assays to support compound testing. [2580-055 (2006) : 71]

You will play a key role in the discovery and development of novel therapeutics, liaising with cross-functional teams to drive multiple projects forward. [2580-056 (2006) : 72]

You will play a key role in the discovery and development of novel therapeutics, liaising with cross-functional teams to drive multiple projects forward. [2580-056 (2006) : 72]

366. To join this expanding team, you'll need good regulatory affairs knowledge and for more senior roles, a thorough understanding of EU licensing procedures. [2580-057 (2006) : 73]

367. In this key new role, you will be responsible for the processing and reporting of safety events in compliance with internal procedures and regulatory requirements. [2580-057 (2006) : 73]

You will be expected to undertake a key strategic role in planning environmental improvements with the major sectors involved in water resource management including Scottish Water and other major sectors. [2580-058 (2006) : 74]

The role of helpdesk manager involves triage and allocation of queries to the team member with the specific knowledge or skills required: this could be you! [2580-059 (2006) : 75]

The role of metals and oxidative damage in atherosclerosis and neurodegenerative diseases [2580-067 (2006) : 78]

The post holder will investigate the role of fires in the carbon cycle using remote sensing, in the European project CARBOAFRICA. [2580-073 (2006) : 80]

368. For more details including a role profile please see the CELS web site www.celsatlife.com or contact Andrea Thompson at andrea.thompson@celsatlife.com. [2580-076 (2006) : 80]

Role of metacaspases in the apoptotic cell death response of Candida albicans (Dr M Ramsdale) [2580-077 (2006) : 81]

Investigating the role of glutathione-S-transferase in cancer (Professor J A Littlechild) [2580-077 (2006) : 81]

The role of pyroglutamyl modification of peptides in Alzheimer's (Professor J A Littlechild) [2580-077 (2006) : 81]

369. The ideal solution for organisations with a variety of roles. [2580-080 (2006) : 81]
2009

1. This practical based role focuses on developing our Nanopore platform for identifying DNA bases at the single molecule level. [2689-005 (2009) : 47]

2. Requiring a high level of interaction between multi-disciplinary teams, this role interfaces the design of the instrumentation with the needs of the customer and our internal scientists and engineers. [2689-005 (2009) : 47]

3. With responsibility for the mechanical design of an exciting new instrumentation platform, this role provides important design and development resource from an overall system level, down to piece part design. [2689-005 (2009) : 47]

In line with an exciting period of Unit expansion, your primary role will be to provide improved clinical service delivery, by contributing to the day-to-day running of the Unit, and by undertaking a range of diagnostic GI physiological investigations. [2689-006 (2009) : 48]

Furthermore, you will be involved in providing research support by playing an integral role in running our specialised gamma camera facility. [2689-006 (2009) : 48]

We are seeking to recruit an enthusiastic and professional Business Support Officer to play an important role in the Institute's Commercial Department. [2689-007 (2009) : 48]

4. The role also covers marketing communications activities including the maintenance of customer databases and preparation of promotional materials. [2689-007 (2009) : 48]

5. The role provides an exciting opportunity to apply an interest in biological sciences within a business discipline. [2689-007 (2009) : 48]

6. This prestigious role offers you the chance to lead and inspire all scientific, technical and clerical staff at the SCI laboratory in Birmingham. [2689-009 (2009) : 49]

7. In this non-promotional role you will be focused on providing scientific and medical expertise to healthcare professionals and scientists, with emphasis on regional and national medical and scientific leaders. [2689-011 (2009) : 50]

8. The role of the press officer will be to promote and publicise awareness of the European Respiratory Society, its products (with a main focus on the European Respiratory journal and the ERS Annual Congress) and services to all target audiences whilst maintaining a positive working relationship with the media, through reporting, writing and copywriting. [2689-012 (2009) : 50]

9. Maintaining up-to-date awareness of topical issues and competitor activity will also be an important part of the role. [2689-012 (2009) : 50]

10. We guarantee an open and challenging working environment in which your role and responsibilities can develop as the company expands. [2689-019 (2009) : 52]

In this new, high-profile position, you will play a key role in defining and refining the top-level strategy focused on harnessing the immune system in order to identify novel cancer immunotherapies. [2689-021 (2009) : 54]

11. Educated to degree or Ph.D. level, you will bring to the role a broad understanding of human immunology, with a specific focus on T-cell systems. [2689-021 (2009) : 54]
12. In this senior-level role, you will demonstrate the ability to clearly define and lead strategy and utilising an open, collaborative working style, engage with key governance bodies within the organisation and external networks to bring this to fruition. [2689-021 (2009) : 54]

The Discovery ADMET group plays a critical role in drug discovery within J&J PR&D, with the goal of evaluating ADMET properties of compounds from a very early stage, through lead optimization to compound selection. [2689-025 (2009) : 56]

13. In addition, the role involves leading a small team to further develop and integrate the use of pharmacokinetic prediction models (both empirical and physiologically based (PBPK)) into the local Discovery process and in collaboration with our worldwide initiative. [2689-025 (2009) : 56]

A willingness to collaborate with other Schools within the University and to play a key role throughout the academic community at Nottingham is essential. [2689-026 (2009) : 57]

A global analysis of birdsong to test the role of signal evolution in speciation (Ref: DTG14). [2689-027 (2009) : 57]

you will embrace our ambitions and play a key role in realising our development targets. [2689-032 (2009) : 59]

Established in 1970, the main role of the Veterinary Products Committee (VPC) is to advise the Veterinary Medicines Directorate on applications for new and renewal Marketing Authorisations (MAs), provisional MAs and variations, and Animal Test Certificates. [2694-001 (2009) : 50]

14. Remuneration for all roles is £146 per meeting with £74 for preparation time. [2694-001 (2009) : 50]

15. You will also enjoy the challenge of broadening your role to include related aspects of metabolism in other biological systems whilst maintaining your ADME focus. [2694-003 (2009) : 52]

Our role is to help improve the efficiency and competitiveness of six agriculture and horticulture sectors in parts of the UK representing about 75% of total UK agricultural output. [2694-004 (2009) : 52]

16. Key aspects of the role are to provide a focal point for the horticulture sector, to drive change through the effective engagement with levy payers and key stakeholders and to ensure that the work being undertaken for the sector achieves maximum benefit to the horticulture levy payers in Great Britain. [2694-004 (2009) : 52]

17. In line with this strategy, a number of key roles have been created for forward-thinking DMPK Scientists, to be based within the CNS Research Hub in Brussels: [2694-005 (2009) : 53]

Using your extensive practical skills, you will play a key role in developing and implementing new assays and methodologies, mentoring junior staff in these areas. [2694-005 (2009) : 53]

18. Educated to degree or Ph.D. level, you will bring to the role several years' industrial experience, gained within a Research DMPK environment. [2694-005 (2009) : 53]

You will take a leading role in the provision of DMPK support to project teams, defining the strategy and providing input into study design and data interpretation, with a particular emphasis on PK and PK/PD. [2694-005 (2009) : 53]

19. Educated to degree or Ph.D. level, you will bring to the role several years' pharmaceutical or biotechnology industry experience, gained within a Research DMPK environment. [2694-005 (2009) : 53]
20. An industry-experienced Bioanalyst, you will bring to the role a detailed knowledge of HPLC and LC-MS techniques, gained within a Research DMPK environment. [2694-005 (2009) : 53]

21. All roles require pro-active and flexible team players with excellent organisational and communication skills who will welcome the challenges of this fast-paced entrepreneurial environment. [2694-005 (2009) : 53]

22. Post-graduate experience in a technical role. [2694-008 (2009) : 54]

As an enthusiastic chemist, you will play an important role in one of our teams which are responsible for the discovery and development of new chemistry leading to our drug candidates. [2694-009 (2009) : 55]

Joining our Innovation and Skills Group, you will bring drive and determination to increasing the economic and social impact of the research and training we support. In particular, you will play a vital role in engaging with partners and organisations to maximise the impact of our activities. [2694-010 (2009) : 56]

23. For both the above Business Interface roles, your understanding of biological sciences will be underpinned by a relevant academic qualification. [2694-010 (2009) : 56]

24. You will also play a specialist estuarine geomorphology role as part of our Severn Tidal Power Feasibility Study project team. [2694-012 (2009) : 56]

25. Candidates should be capable of working as part of a small, dedicated team and be prepared to fill a flexible role, including participation in research cruises. [2694-014 (2009) : 57]

The successful applicant will play a major role in the design and development of novel surgical robot devices. [2694-015 (2009) : 57]

26. This new role has been created with the purpose to further develop Renishaw’s Neurological Planning Software, with specific reference to Image Processing and MR (Magnetic Resonance) Imaging capabilities. [2694-015 (2009) : 57]

27. This role will be primarily involved in the design and development of new functionality within, and maintenance of, software for Renishaw’s NeuroMate surgical robot, with the majority of work centred on the embedded software. [2694-015 (2009) : 57]

28. Identifying appropriate modes of funding for research, opportunities for knowledge sharing and strategies for commissioning research will be part of your role. [2694-017 (2009) : 58]

29. Essential to this role is the ability to form effective partnerships and establish collaborative links with a range of contacts, using excellent interpersonal, influential and communication skills. [2694-017 (2009) : 58]

30. In this role you will provide expert DMPK support to the drug discovery efforts in our Respiratory and Gastrointestinal Disease Areas. [2694-024 (2009) : 61]

31. These roles attract a competitive salary and are based at our research centre in Horsham. [2694-024 (2009) : 61]

32. For more details about all these roles and to apply, please visit www.NIBRcareers.com or email NIBR.careers@novartis.com [2694-024 (2009) : 61]

33. Based at our central engineering support function, these roles present exciting opportunities to join an industry with a bright future. [2694-032 (2009) : 64]
34. The role is technically challenging and offers significant opportunity for personal and career development. [2694-032 (2009) : 64]

35. Working within our Fuel Route Systems branch, this role offers diverse challenges in mechanical design, fault studies, safety assessment and operational support as well as significant involvement in our major investment programme. [2694-032 (2009) : 64]

Your role is to ensure that Kew's expertise in restoration ecology is translated into practical outcomes, with the focus on developing initiatives for sustaining this work long-term and building on an established network of international collaborative partnerships and agreements. [2694-033 (2009) : 64]

36. To succeed in this demanding role, you will need a Ph.D. [2694-033 (2009) : 64]

37. and experience in a similar role in restoration ecology or a related field. [2694-033 (2009) : 64]

The Agency plays a critical role in protecting people from a wide range of potential threats, whether infectious diseases or preventing harm involving chemicals or radiation. [2694-034 (2009) : 65]

39. If you are a Scientist of international standing with a clear strategic vision, please contact Susan Lloyd, Corporate HR, NERC Swindon for further information on how to apply for these exciting roles [2694-036 (2009) : 66]

40. For these roles, excellent practical abilities, an eye for detail and good problem-solving skills are essential abilities. [2694-039 (2009) : 67]

You will play a key role supporting the Hamlyn Robotic Centre and research portfolio in moving the Department and Division forward to achieving their strategic objectives and in assuring continued excellence in research. [2694-040 (2009) : 68]

41. The role has both strategic and operational elements requiring close and productive working relations with staff at all levels. [2694-040 (2009) : 68]

42. This two year, full-time course prepares students to work as members of the professional health care team alongside experienced clinicians in the exciting new role of Physician Assistant. [2694-045 (2009) : 70]

43. For further information about the Physician Assistant role, full details of the course, applications forms and details for forthcoming open evenings, please see our website: www.sgul.ac.uk/physicianassistant [2694-045 (2009) : 70]

44. These challenging and innovative new roles offer an exciting opportunity to join a unique organisation, which combines ship operations with scientific research. [2694-047 (2009) : 71]

45. Leading the Scientific Engineering group is a key role that will demand an excellent track record and a strong background in management to enable the delivery and development of engineering services and support. [2694-047 (2009) : 71]

46. This role will ensure that the organisation meets its future economic and environmental responsibilities. [2694-047 (2009) : 71]

47. The role demands an excellent track record in your field. [2694-047 (2009) : 71]
48. Excellent communications at all levels and the ability to exercise effective judgement are key to the role. [2694-047 (2009) : 71]

49. The role will include periods of travel both within the UK and internationally. [2694-047 (2009) : 71]

The post will underpin the statistical data analysis and experimental design content of the Centre and contribute to the provision of industrial statistics and its role in process engineering to the School undergraduate and postgraduate taught programmes. [2694-049 (2009) : 72]

50. The programme will equip you to work effectively in a wide range of roles in environmental consultancy, government, NGOs, business or education. [2694-055 (2009) : 74]

51. It will appeal equally to recent graduates and those already working in public or private sector health care whether in clinical or managerial roles. [2694-056 (2009) : 74]

From supporting cleaner and more efficient manufacturing to developing biofuels and discovering new sustainable materials, biotech innovations play a major role in solving the world’s biggest energy challenges. [2698-001 (2009) : 4]

52. "The greatest skill I’ve learned is managing people," Graham says, a skill he hopes will land him a management role the civilian world later on. [2698-004 (2009) : 48-49]

53. Many are closely aligned to roles within the Forces - particularly those in the engineering field. [2698-010 (2009) : 52]

54. Academic staff appointees will be expected to pursue their own research interests, to contribute to the teaching and administration in one or both Departments and to be active and take on an academic leadership role in the activities of the QCCSRC. [2698-011 (2009) : 53]

55. The role requires you to work in a variety of geological projects, therefore you must be highly flexible. [2698-012 (2009) : 54]

56. This role will involve microbial susceptibility testing, mode of action studies and targetspecific assays. [2698-014 (2009) : 54]

57. The Cell Sciences function is currently recruiting for a Head of the Cell Line Development team as well as for other scientific roles. [2698-015 (2009) : 55]

58. For more details about these exciting roles, please visit our website at: www.medimmune.com [2698-015 (2009) : 55]

Formed in 1986 and comprising 22 European member states, EUMETSAT’s role is to establish, operate and exploit European meteorological satellite systems. [2698-016 (2009) : 56]

59. In this role, you will be responsible for the provision of an operational information service to the EUMETSAT user community, which comprises National Meteorological Services, academia, commercial and private users. [2698-016 (2009) : 56]

You will build and lead a team to operate the sequencing facility and play a key role in the overall management of the Genome Analysis Centre. [2698-019 (2009) : 57]

60. The ideal candidate would be a pharmacist or life science graduate with a Ph.D. in pharmaceutics or a BSc/MSc graduate in pharmacy or life sciences with 2-3 years experience in the pharmaceutical industry in a Formulation role. [2698-021 (2009) : 58]
The MHRA (Medicines and Healthcare products Regulatory Agency) is a Government Agency that plays a key role in safeguarding public health. [2698-024 (2009) : 59]

61. It's a role with real autonomy, so you'll need excellent organisational skills, enabling you to manage your time and caseload effectively. [2698-024 (2009) : 59]

62. It's also a role which requires flexibility, pragmatism and the ability to make decisions. An in-depth understanding of relevant legislation and regulations and auditing experience will also be important. [2698-024 (2009) : 59]

63. It's a role with real autonomy, so you'll need excellent organisational skills, enabling you to manage your time and caseload effectively. [2698-024 (2009) : 59]

64. It's also a role which requires flexibility, pragmatism and ability to make decisions. [2698-024 (2009) : 59]

65. With a minimum qualification of a degree in a biological science, you'll either have substantial experience in a similar role or the potential to develop into it. [2698-025 (2009) : 59]

66. Applications for this role should be made online at http://jobs.mrc.ac.uk [2698-026 (2009) : 60]

The Wellcome Trust Sanger Institute has an expanding scientific programme dedicated to using natural and experimental genetics to understand the role of genes in health and disease. [2698-028 (2009) : 60]

Formed in 1986 and comprising 22 European member states, EUMETSAT's role is to establish, operate and exploit European meteorological satellite systems. [2698-030 (2009) : 61]

As a member of the CIS team, your role will be to define, facilitate and coordinate EUMETSAT internal and external communications and outreach activities. [2698-030 (2009) : 61]

67. Moving from a support role [2698-031 (2009) : 61]

68. to a technical role [2698-031 (2009) : 61]

69. Returning to a professional / technical role after a break [2698-031 (2009) : 61]

70. The Role and Responsibilities [2698-032 (2009) : 61]

71. Reporting to the R&D Policy Manager, the role will be to support the STRM Team in pursuing ABPI objectives to enhance UK competitiveness on science, technology and R&D in particular providing Secretariat support for a number of "pay-to-play" groups. [2698-032 (2009) : 61]

72. You will be educated to degree level in either science, business, economics or finance, with demonstrable experience in an analyst role, including experience in a financial or business administration position. [2698-033 (2009) : 62]

We are seeking an enthusiastic and motivated individual to play a leading role in supporting Senior Scientists and maintaining the day-to-day smooth operation of the laboratory. [2698-037 (2009) : 63]

73. This role will require an ability to combine scientific experience with the organisational and communication skills necessary to engage primarily in routine administrative duties but also in some bench-based activity. [2698-037 (2009) : 63]
If you would like the chance to play a key role in this exciting new UK-based biotech venture please submit your CV with an accompanying cover letter by email to brian.mcguinness@dsl.pipex.com. [2698-037 (2009) : 63]

74. Outward facing role with significant customer contact [2698-038 (2009) : 63]

75. In line with this strategy, a number of key roles have been created for forward-thinking DMPK Scientists, to be based within the CNS Research Hub in Brussels: [2698-039 (2009) : 64]

Using your extensive practical skills, you will play a key role in developing and implementing new assays and methodologies, mentoring junior staff in these areas. [2698-039 (2009) : 64]

76. Educated to degree or Ph.D. level, you will bring to the role several years' industrial experience, gained within a Research DMPK environment. [2698-039 (2009) : 64]

You will take a leading role in the provision of DMPK support to project teams, defining the strategy and providing input into study design and data interpretation, with a particular emphasis on PK and PK/PD. [2698-039 (2009) : 64]

77. Educated to degree or Ph.D. level, you will bring to the role several years' pharmaceutical or biotechnology industry experience, gained within a Research DMPK environment. [2698-039 (2009) : 64]

78. An industry-experienced Bioanalyst, you will bring to the role a detailed knowledge of HPLC and LC-MS techniques, gained within a Research DMPK environment. [2698-039 (2009) : 64]

79. All roles require pro-active and flexible team players with excellent organisational and communication skills who will welcome the challenges of this fast-paced entrepreneurial environment. [2698-039 (2009) : 64]

We have a vital role to play in the success of the UK’s Research Councils and so will you. [2698-041 (2009) : 65]

80. For a Medical Writer role, you will need the right blend of writing flair and talent to produce high-quality medical communications, and the skills and confidence to liaise directly with clients and clinical experts. [2698-042 (2009) : 65]

81. For our more senior editorial roles you will have a background in medical/scientific writing within the pharmaceutical industry or an agency, a clear understanding of our business, plus the ability to mentor and motivate junior members of the team and co-ordinate the delivery of editorial projects. [2698-042 (2009) : 65]

This post is focused on the role of airway nerve sensitization in chronic cough and is ideal for someone who has just finished a Ph.D. with a strong publication record, or an experienced post-doctoral scientist with a strong publication record. [2698-047 (2009) : 68]

From supporting cleaner and more efficient manufacturing to developing biofuels and discovering new sustainable materials, biotech innovations play a major role in solving the world’s biggest energy challenges. [2702-001 (2009) : 2]

At the same time, a major share of our research and production takes place here. Germany thereby plays a central role for the overall company. [2702-010 (2009) : 50]

At the same time, a major share of our research and production takes place here. Germany thereby plays a central role for the overall company. [2702-011 (2009) : 51]

This is a varied and challenging role with an excellent opportunity to become involved in many aspects of science communication. [2702-016 (2009) : 53]

Further information on this role is available on our website www.cellmarkforensics.co.uk [2702-017 (2009) : 53]

The roles [2702-020 (2009) : 55]

This role calls for a degree (or equivalent) in a scientific discipline along with significant post-qualification experience. [2702-021 (2009) : 55]

In addition, implementation of existing ELL H&S policies and liaison with support staff at ELL’s laboratories based on the campus of University College London are key aspects of the role. [2702-022 (2009) : 56]

Reporting to the Research Operations Manager and working as part of a small team, you will provide day-to-day support for our laboratory based scientific/research staff in a multidisciplinary role. [2702-022 (2009) : 56]

Purchasing will form a part of your responsibilities, ordering and maintaining stocks of laboratory supplies being an important aspect of the role. [2702-022 (2009) : 56]

The ideal candidate should be able to demonstrate a flexible can-do attitude and should preferably have experience in a similar role. [2702-022 (2009) : 56]

The role: [2702-023 (2009) : 57]

Flexible, as the role will require UK and overseas travel. [2702-023 (2009) : 57]

You will play a lead role in portfolio evaluation at the Trust, ensuring high quality and timely analysis of specific areas of the Trust's work and funding schemes. [2702-024 (2009) : 57]

The Agency plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2702-025 (2009) : 58]

As this is a National role you must be willing to travel to other sites across the HPA Network. [2702-025 (2009) : 58]

You will liaise with all local partners in health protection both within and outside the HPA and have an active role in assisting and providing advice in all aspects of provision of FW&E services (including training) both within and outside of the FW&E Laboratories serving the Region. [2702-025 (2009) : 58]

All our roles require you to have or be expecting to attain BSc Hons II class. [2702-026 (2009) : 59]
95. This varied role will allow you to experience all aspects of the Editorial process, specifically: [2702-028 (2009) : 60]

You will play a leading role in the assessment of contaminated land, waste and water environments and contribute to the delivery of a national chemicals advisory service and information network. [2702-033 (2009) : 63]

96. Your role will see you encouraging users from new areas of science and planning future developments of the beamline to ensure it continues to meet scientific requirements. [2702-037 (2009) : 64]

97. The ability to train and mentor the current team, design ongoing training documentation and generate monthly progress reports are all necessary to the success of this role. [2702-038 (2009) : 64]

98. To be successful in this role, you should have a Ph.D., MD or equivalent in Epidemiology, Demography, Public Health or other numerate health-related discipline. [2702-047 (2009) : 67]

The growing role of stem cells. [2702-050 (2009) : 68]

The Senior Principal /Consultant will take the lead role and should hold a relevant Ph.D, have experience of cellular therapy in a clinical environment and specific knowledge of Good Manufacturing Practice, immunoselection technology, cell culture, flow cytometry and in vitro functional assays. [2702-050 (2009) : 68]

Ph.D. Studentship; Role of salivary films in assessing the quality of foods [2702-051 (2009) : 68]

99. To be successful in this role, you should be an enthusiastic specialist in Technical Cardiology, ready to make a valued and significant contribution to the organisation, teaching and assessment of the curriculum within the School of Medical Technology. [2702-053 (2009) : 69]

If so there could be an exciting opportunity to play a major role in the establishment of a new vocational curriculum area to be located in the College's new Science and Technology Campus in Chester. [2702-055 (2009) : 69]

100. If you feel you have what it takes to fulfil this demanding role and would like to join resolution please email your CV [2706-003 (2009) : 48]

101. To match up to this challenging role you should have: a good biological science degree an in-depth understanding of molecular biology an excellent grasp of English ... a keen eye for detail good IT skills the ability to liaise tactfully with authors and editors worldwide [2706-004 (2009) : 48]

102. This important role will demand considerable experience in the field of ecotoxicology, environmental biology or ecology. [2706-007 (2009) : 49]

103. In addition to these specific roles we are also actively seeking individuals with various levels of experience (graduates, assistants and experts) in a range of forensic disciplines: [2706-008 (2009) : 49]

This is a great opportunity to play a pivotal role in an organisation which is helping to shape the new forensic landscape and challenging conventional thinking. [2706-008 (2009) : 49]

104. If this sounds like an environment which would bring out the very best in you, where innovative thinking, a ‘can do’ attitude and your passion for forensic science will command respect and if you enjoy working directly with a variety of law enforcement customers then please email your CV and a covering letter indicating which role you are suitable for to: [2706-008 (2009) : 49]
A key role will be the conduct of research on the genesis of metallic mineral deposits. [2706-020 (2009) : 55]

105. The role requires you to develop links with outside stakeholders and, therefore, you must have good presentational and written skills. [2706-020 (2009) : 55]

106. The role requires you to develop links with outside stakeholders and, therefore, you must have good presentational and written skills. [2706-020 (2009) : 55]

The Wellcome Trust Sanger Institute has an expanding scientific programme dedicated to using natural and experimental genetics to understand the role of genes in health and disease. [2706-021 (2009) : 55]

107. The role involves the identification and documentation of new pharmaceutical, medical device, diagnostic or healthcare IT innovations as well as building awareness in London hospitals of our best practice Xpedite Innovations Management capability. [2706-023 (2009) : 56]

108. The role requires creativity in the development of novel marketing, communications and customer relationship activities in the Trusts. [2706-023 (2009) : 56]

They would be expected to play a role on the Broom's Barn management team and to take an interest in the station's developing links with schools and the public. [2706-025 (2009) : 57]

This is an exciting opportunity for a talented, dynamic individual to play a leading role in a key area, increasingly identified as a 'top 6' issue in public funding of research. [2706-035 (2009) : 60]

To take a leading role in reorientating the policies of DRA to create a strong customer focus. [2706-039 (2009) : 62]

Role of nitric oxide and carotid bodies in acute myocardial infarction (Drs Pat Cragg & Daryl Schwenke) [2706-041 (2009) : 62]

109. For all three roles we are seeking motivated individuals with a good understanding of the cereals/oilseeds industry and the ability to interpret scientific information and communicate this in the best format for our levy-payers' use on-farm, on time and within budget. [2711-003 (2009) : 50]

You will take a proactive role in developing research proposals (both within CEH and externally) and in the implementation of resulting programmes. [2711-004 (2009) : 51]

110. Your role will require knowledge of the fundamental principles of pharmaceutical sciences essential for the understanding of dosage form development and manufacturing; [2711-005 (2009) : 52]

The Policy Officer will play a key role in developing Academy positions on the many public policy issues that involve the biomedical sciences. [2711-006 (2009) : 52]

111. General knowledge of higher education or medical science sectors in the UK, together with 1-3 years experience in a similar role, is desirable. [2711-006 (2009) : 52]

112. In this interesting and involved role within the Infectious Diseases and Blood Policy branch, you will provide scientific input and general support to the development of policies and implementation strategies on infectious disease contingency planning, with particular emphasis on zoonotic, new and emerging diseases. [2711-008 (2009) : 53]

113. Your role will involve the collection of forest and ownership data for the NFI. [2711-013 (2009) : 55]
For further information on the role and details of how to apply please refer to the Company website: www.cobrabio.com/careers [2711-016 (2009) : 56]

We have a market leading proposition in a growing and fast moving market place and, following recent re-organisation, the role of Proposals Writer has been created. [2711-018 (2009) : 56]

Reporting to the Contracts and Proposals Director, the role fits within a critical function within Fulcrum and one which requires working closely with Operations, BD, Finance and the teams within the US and Japan. [2711-018 (2009) : 56]

The role requires experience in creating high quality, professional, accurate proposal documentation to present the services of Fulcrum Pharma in line with client needs and expectations. [2711-018 (2009) : 56]

The Laboratory Services Department's primary role is testing samples for the diagnosis of farm animal diseases, for surveys, in support of export certification and to demonstrate freedom from disease. [2711-023 (2009) : 59]

The British Antarctic Survey (BAS), part of the Natural Environment Research Council, aims to undertake a world-class programme of scientific research, and to sustain for the UK an active and influential regional presence and a leadership role in Antarctic affairs. [2711-026 (2009) : 60]

Active promotion of MRC's intellectual property policies will be an important aspect of this role, which the appointee will undertake alongside MRC Technology, MRC's IP management company. [2711-028 (2009) : 60]

Applications for this role must be made online at http://jobs.mrc.ac.uk [2711-028 (2009) : 60]

Managing 2-3 members of staff, the role combines lab-based work with client-facing activities and involves working in multidisciplinary teams with close interaction with client companies, dealing with a rapidly changing workload whilst working to tight deadlines. [2711-030 (2009) : 61]

For full details on this role and how you can help us grow go to www.cefas.jobs/openings [2711-031 (2009) : 61]

Applications for this role should be made online at http://jobs.mrc.ac.uk [2711-032 (2009) : 61]

The post holder will work as part of a small enterprise and applications team in a business facing role innovating, partnering, networking and brokering EO-led (GMES) remote sensing solutions to business requirements by building on the work of EO research teams in the University and partner organisations. [2711-036 (2009) : 63]

The successful applicant will play a major role in the future development and success of the University's research in nutrition and health. [2711-042 (2009) : 64]

The salary for the role will be within the range of £32,477 - £38,242 inclusive of London Allowance. [2711-045 (2009) : 65]

Planning of the Department budget to enhance financial performance will play a key part of the role. [2715-003 (2009) : 50]

In the team-leader role, you will also be accountable for running the non-sterile compounding unit, including: [2715-009 (2009) : 53]

Key requirements for both roles will be a degree in the pharmaceutical sciences coupled with the aptitude needed to work with small-scale pharmaceutical manufacturing equipment. [2715-009 (2009) : 53]
128. In this highly strategic role you will build our branded molecular biology consumables business within the South West UK - including some very high profile accounts. [2715-011 (2009) : 55]

129. This is a high profile role for the promotion and revenue growth of our Dharmacon and Open Biosystems products, in which you will interact with opinion leaders to formulate strategic business plans. [2715-011 (2009) : 55]

130. Both roles require a great communicator with a highly motivated approach, the drive to succeed in a very challenging environment and the ability to exceed sales targets. [2715-011 (2009) : 55]

The MHRA (Medicines and Healthcare products Regulatory Agency) is a Government Agency that plays a key role in safeguarding public health. [2715-013 (2009) : 56]

131. In this high profile role, you’re going to be leading a team of assessors and managing our Biotechnology regulatory activity – both in the UK and across Europe. [2715-013 (2009) : 56]

132. To be considered for the role of panel member, you must possess an impressive track record in one or more of the following areas four areas of expertise: [2715-016 (2009) : 57]

133. Essential criteria for this role include: [2715-016 (2009) : 57]

134. Further information, including detailed role descriptions [2715-016 (2009) : 57]

135. for both roles, remuneration details and application forms, are available from Ashley Smith, [2715-016 (2009) : 57]

You will play a role in helping to develop innovative models and solutions to address barriers to successful translation. [2715-017 (2009) : 58]

Clinical Scientists play a significant role in the provision and development of clinical laboratory services within the NHS. [2715-018 (2009) : 58]

The highly motivated individual will study the role of multifunctional T cells in the response to vaccination and infection with M bovis. [2715-023 (2009) : 59]

136. Physical Scientist or Polymer Chemist in an Analytical role [2715-024 (2009) : 59]

The group aims to lead polymer and inert characterisation, and you’ll play a lead role in developing specialist characterisation techniques, working across several teams to design and perform experimental studies. [2715-024 (2009) : 59]

137. You must have a minimum of a BSc or BA plus either a relevant postgraduate degree or equivalent level of directly relevant experience in a directly transferrable role. [2715-030 (2009) : 62]

138. You must also be a self motivated scientific communications professional with extensive experience of strategic communications and a track record of achievement in a communications role, excellent scientific writing and editing skills and experience of the development and delivery of innovative approaches to communications with a wide range of audiences and across the full range of channels. [2715-030 (2009) : 62]

You will also play a key role in the planning and preparation of LWEC meetings, workshops, conferences and other functions (e.g. in the Parliaments and Assemblies of all the countries and regions of the UK) and in helping to identify and map activities and gaps within the LWEC framework. [2715-030 (2009) : 62]

139. The successful applicant will be qualified to degree level or equivalent in a relevant discipline and have substantial experience in a technical support role. [2715-036 (2009) : 63]

5853
140. The post-holder will take a senior role in the Department, running a productive research group, supervising post graduate research workers and mentoring graduate students, and winning funds to support the group in the future. [2715-037 (2009) : 64]

The successful applicant will play a leading role in co-ordination of UK wide studies establishing DNA banks from stroke patients, which involves collecting detailed clinical information. [2715-039 (2009) : 64]

The UK has never been short of novel ideas, and the trusts role is to help develop them into products and bring them to market - and to do it quickly. [2719-002 (2009) : 16]

141. This is an exciting and diverse role where personal impact counts; the key to success will be your applicable scientific knowledge, flexible approach and excellent communication and presentation skills along with your ability to influence others. [2719-005 (2009) : 48]

142. A new role has been created to help expand our capabilities to support key breeding programmes. [2719-007 (2009) : 49]

You will also enjoy the opportunity of broadening your role to include related aspects of metabolism in other biological systems. [2719-007 (2009) : 49]

143. For each of these roles, ideally your experience would also include the design, scale-up and optimization processes and technologies supporting Drug Substance and Drug Product development and manufacture. [2719-009 (2009) : 51]

144. These roles can be based at either of our research sites in Stevenage in the UK or Research Triangle Park, North Carolina in the US. [2719-009 (2009) : 51]

The post is funded by a two year MRC GAP funding initiative and is to determine the functional role of a novel binding domain identified in the Amino Terminal Domain (ATD) of the AMPA receptors. [2719-010 (2009) : 52]

145. The role is broken down approximately as follows: up to 60% BMSU duties, 40% neuroscience research including immunohistochemical experiments, preparation of neuronal cultures, maintenance of tissue culture areas plus additional laboratory management. [2719-010 (2009) : 52]

146. Applications for these roles must be made online at http://jobs.mrc.ac.uk Please ensure you include a copy of your CV, covering letter and contact details for three professional referees within your application. [2719-010 (2009) : 52]

The Wellcome Trust Sanger Institute has an expanding scientific programme dedicated to using natural and experimental genetics to understand the role of genes in health and disease. [2719-011 (2009) : 52]

The Agency plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2719-019 (2009) : 57]

147. For further information about either role, and to apply, please visit our website www.hpa.org.uk/careers [2719-019 (2009) : 57]

The Food and Environment Research Agency's role is to support and develop a sustainable food chain, a healthy natural environment, and to protect the community from biological and chemical risks. [2719-023 (2009) : 58]
But the myctophid has a key **role** to play in the ecology of the Southern Ocean, which is why you’ll spend a part of each year carrying out vital field research on these and other Antarctic fish. [2719-032 (2009) : 60]

You will play a key **role** in leading Natural England's use of statistics nationally and developing our capacity to use statistical evidence effectively and appropriately as part of our drive to deliver environmental leadership. [2719-034 (2009) : 61]

The **role** of biodiversity in ecosystem functioning. [2719-035 (2009) : 62]

148. This **role** covers a comprehensive range of high level activities including reviewing and challenging the scientific programme to ensure that it is appropriate in direction, content and timing. [2724-004 (2009) : 52]

149. To undertake this **role** you will hold high level professional qualifications from respected institutions, which may include a Ph.D. [2724-004 (2009) : 52]

150. To learn more about this **role** and the work of the NDA and the RWMD in particular, visit [www.nda.gov.uk](http://www.nda.gov.uk) [2724-004 (2009) : 52]

151. This **role** involves: [2724-007 (2009) : 53]

152. The **role** is based in our North London offices, conveniently located close to Finchley Central tube station on the Northern Line. [2724-007 (2009) : 53]

153. The precise **role** and the commensurate salary will depend on the skills and experience that the successful individual can bring to the team. [2724-008 (2009) : 53]

154. To find out more about these **roles** please apply or contact warrington.scientific@reedglobal.com or call 01925 424202. [2724-010 (2009) : 54]

155. This **role** requires the delivery of world-class scientific understanding in the chocolate science and ingredient functionality in order to facilitate subsequent delivery of chocolate innovations and improvements to the Cadbury business. [2724-011 (2009) : 55]

156. If you have the qualifications, experience and drive for either of these **roles** then apply now to Lisa Patient, Operations Manager [2724-011 (2009) : 55]

157. The **role** involves developing enzyme-based screening assays and the characterisation of compounds from Astex's drug discovery programmes. [2724-012 (2009) : 55]

158. The **role** involves running enzyme-based screening assays. Candidates should be educated to degree level in a biology or chemistry-related subject and/or have equivalent industrial experience. [2724-012 (2009) : 55]

159. The **role** involves developing new scientific methodologies in the structural bioinformatics and chemoinformatics area and maintaining applications around our proprietary database platform. [2724-012 (2009) : 55]

160. The **role** requires experimental competency in LC-MS/MS based bioanalysis and *in vitro* methodologies, plus an understanding of ADME principles and PK interpretation. An appropriate degree is required. [2724-012 (2009) : 55]

161. These **roles** are for contractual (one year renewable for a second year) scientists required to join our structural biology department, representing a tremendous learning experience at the start of a career in drug discovery. [2724-012 (2009) : 55]
162. As part of a transformation of our R&D IS organisation we have created several new roles to support the evolution of R&D and the next generation of scientific breakthroughs. [2724-015 (2009) : 57]

163. In a new role that you can shape, your aim will be to ensure our R&D community knows how to use and, more importantly, derive maximum value from our information systems to support innovation. [2724-015 (2009) : 57]

164. This is a permanent role and will be based with WCMC 2000 at the UNEP-WCMC offices in Cambridge, UK. International travel is a requirement of this position. [2724-018 (2009) : 58]

165. For further information on this role, including the application form, please visit the jobs page on our website www.unep-wcmc.org. [2724-018 (2009) : 58]

166. The role will require you to work as part of a team promoting Tech Transfer's translation activities and be responsible for undertaking due diligence of proposals, evaluating their anticipated commercial exits and project managing the Trust's interests in key projects. [2724-019 (2009) : 59]

167. This is a demanding role; [2724-019 (2009) : 59]

168. Excellence will be rewarded by offer of permanent roles at completion of Internship. [2724-021 (2009) : 59]

169. The role will involve Freelite and Hevylite educational seminars for UK customers and Binding Site staff members, with the potential to participate in distributor lecture tours abroad. [2724-022 (2009) : 60]

170. In addition the role will involve managing Freelite/Hevylite clinical trials, data analysis and presenting work at national and international conferences. [2724-022 (2009) : 60]

171. For each of these roles we are looking for similar experience: [2724-024 (2009) : 61]

You will also play a key role in the identification and implementation of new technologies and process improvements for antibody isolation and protein engineering. [2724-024 (2009) : 61]

172. For more details about these exciting roles, please visit our website at www.medimmunecareers.com and apply directly to job numbers 63, 85 or 91. [2724-024 (2009) : 61]

173. This key role involves: [2724-026 (2009) : 61]

174. The role is based in our North London offices, conveniently located close to Finchley Central tube station on the Northern Line. [2724-026 (2009) : 61]

175. Two roles available - one permanent and one temporary until 31 March 2010. [2724-027 (2009) : 62]

176. This is a chance to take up one of the most challenging roles in the country. [2724-027 (2009) : 62]

The Wellcome Trust Sanger Institute has an expanding scientific programme dedicated to using natural and experimental genetics to understand the role of genes in health and disease. [2724-036 (2009) : 65]

177. For full details on these roles and how you can help us grow go to www.cefas.jobs/openings [2724-037 (2009) : 66]

This post is an exciting opportunity for an enthusiastic researcher to play a leading role in an ambitious project. [2724-040 (2009) : 67]
178. The WWARN Project Manager is a new role, which will be key to the successful establishment of the Worldwide Antimalarial Resistance Network. [2724-047 (2009) : 70]

179. Her present role often takes her to east Africa and south Asia where, she says, "you're much more aware of the help that you're giving" in improving medical treatment. [2728-004 (2009) : 52-53]

180. The roles [2728-005 (2009) : 54]

181. For specific characterisation and bioassay roles, experience in protein or carbohydrate mass spectrometry and cell based bioassays respectively would be required. [2728-006 (2009) : 55]

NIBSC has a leading international role in preparing, evaluating and distributing International Biological Standards and other biological reference materials. [2728-007 (2009) : 56]

The Food and Environment Research Agency's role is to support and develop a sustainable food chain, a healthy natural environment, and to protect the community from biological and chemical risks. [2728-009 (2009) : 56]

182. To cope with steeply increasing demand for our services, we are now recruiting for a number of roles. [2728-011 (2009) : 57]

183. This is a hands-on leadership role and requires a minimum of a Bachelor's degree in a life sciences or biochemical engineering discipline. [2728-011 (2009) : 57]

184. To explore a new beginning, please visit www.edenbiodesign.com where you will find more information on all of the above roles. [2728-011 (2009) : 57]

It is playing a major role in the planning and development for the next generation of Extremely Large Telescopes (ELT) and their instrumentation. [2728-012 (2009) : 58]

You will also take a leading role in AO related technology development activities across STFC. [2728-012 (2009) : 58]

The Wellcome Trust Sanger Institute has an expanding scientific programme dedicated to using natural and experimental genetics to understand the role of genes in health and disease. [2728-013 (2009) : 58]

185. The role is challenging and varied and you will be involved in all aspects of the dosage form development process from particle characterisation to product scale-up, using a wide range of techniques and equipment. [2728-016 (2009) : 59]

186. This role offers opportunities for personal development and career advancement. [2728-016 (2009) : 59]

187. This exciting role within the Trust’s Science Funding Division, involves keeping abreast of relevant scientific fields, liaising with internal and external stakeholders and developing and managing defined aspects of the Trust’s funding portfolio. [2728-017 (2009) : 60]

188. The role also involves working with Funding, Interview and Strategy Committees when required, organising the peer review of research proposals and documenting committee discussions. [2728-017 (2009) : 60]

The British Antarctic Survey (BAS), part of the Natural Environment Research Council, aims to undertake a world-class programme of scientific research, and to sustain for the UK an active and influential regional presence and a leadership role in Antarctic affairs. [2728-019 (2009) : 61]
189. Your role will include collaborating with other BAS researchers and publishing and presenting research. [2728-019 (2009) : 61]

190. The Role [2728-020 (2009) : 61]

191. For more detailed information about the roles and how to apply please visit www.scitech.ac.uk telephone 01925 603467 or e-mail recruit@dl.ac.uk quoting reference number VND429/09. [2728-021 (2009) : 61]

The successful candidate will play a key and challenging role in moving four ocular gene therapy programmes from the proof of concept stage through to clinical application in First in Man clinical studies, following a recently announced partnership with sanofi-aventis. [2728-022 (2009) : 62]

192. This role will suit a recent graduate as full training will be given. [2728-027 (2009) : 64]

193. The capability to design and execute synthetic routes and the confidence to work independently and efficiently are key requirements for the role. [2728-029 (2009) : 65]

194. In this role you will analyse data and use a variety of in silico methods including pharmacophore design, homology modelling and docking. [2728-029 (2009) : 65]

195. Additional experience of using LC/MS systems in purity assessment and purification roles would also be an advantage. [2728-029 (2009) : 65]

196. To deliver in the role, you will have significant research experience together with leadership skills. [2728-030 (2009) : 66]

197. The role requires an inventive scientist who can reflect and apply their knowledge of bacterial physiology and biochemistry in a practical way. [2728-030 (2009) : 66]

198. The role requires a resourceful scientist who can apply their knowledge of fundamental chemistry and analytical expertise in an innovative and practical way. [2728-030 (2009) : 66]

199. The major focus of the role will be to coordinate TMO's intellectual property portfolio including our patent, trademarks and know how. [2728-030 (2009) : 66]

200. This demanding role requires you to possess a broad portfolio of skills including an extensive genetics/genomics knowledge, programming, databasing and system administration. [2728-033 (2009) : 67]

We are looking for a highly-motivated postdoctoral fellow to join our research group studying the role of cardiac developmental genes in adult myocardial biology and homeostasis. [2728-038 (2009) : 69]

201. In this role you will prepare independent scientific opinions on all aspects of chemical and drug safety on behalf of regulatory authorities and other SCAHT clients. [2733-010 (2009) : 64]

202. A self-starter, you are a well-organised, IT-literate team player, with good networking and communication skills and are now looking for a role that will allow you to grow and develop as it does. [2733-017 (2009) : 66]

203. Suitable candidates for the role will have a life science degree and ideally some experience in medical education/communication; [2733-019 (2009) : 67]

204. The key analytical role in the daily control of our glass melting processes. [2733-021 (2009) : 67]
205. Ideally applicants will already have some work experience in a precision, analytical role and possess a strong foundation in ‘wet analytical’ chemical techniques. [2733-021 (2009) : 67]

206. The role will need flexibility of working hours and the ability to work under pressure to meet demanding deadlines, along with availability to work overtime to meet business needs. [2733-021 (2009) : 67]

The post will have a key role in extending awareness and understanding of the NIHR-funded clinical research infrastructure with stakeholders including the research community, other research funders including charities, the NHS and universities, global life sciences industries and their trade associations, and other Government Departments (especially UK Trade and Investment). [2733-022 (2009) : 68]

207. A proven track record in a communications management role in a complex multi-disciplinary public sector organisation, operating in a highly political environment, is essential. [2733-022 (2009) : 68]

208. Additionally, the post holder will provide scientific administrative support to Dr Hubbard in his role as BoM member; [2733-024 (2009) : 69]

209. With a degree in the biological sciences, you will either have held a similar position in the research/academic sector or you will be looking to use your scientific background in a research management role. [2733-024 (2009) : 69]

210. The role will provide high level support to Allan Bradley [2733-024 (2009) : 69]

211. in all aspects of his role as Director of the Wellcome Trust Sanger Institute (WTSI) and more broadly to the Board of Management (BoM) in its capacity as the primary decision-making body for the Institute. [2733-024 (2009) : 69]

212. As part of the above, the role holder will direct and co-ordinate the activities of the Director's office with particular emphasis on the management of communication both internally and with key external stakeholders including the Wellcome Trust. [2733-024 (2009) : 69]

213. The role holder will work independently and through others to help manage a complex web of interactions and interfaces, both inward and outward facing, and to ensure appropriate focus on key strategic and policy issues affecting the Institute. [2733-024 (2009) : 69]

214. The role will involve working across the Institute to co-ordinate input on many fronts, developing briefing material, positioning issues for consideration by the BoM, ensuring dialogue between relevant parties and generally supporting the decision-making framework. [2733-024 (2009) : 69]

215. These exciting roles, within the Trust’s Science Funding Division, involve keeping abreast of relevant scientific fields, liaising with internal and external stakeholders and developing and managing defined aspects of the Trust’s funding portfolio. [2733-025 (2009) : 70]

216. The roles also include interacting with grant holders, scientific advisory committees, and managing the peer review of strategic research proposals and documenting committee discussions. [2733-025 (2009) : 70]

Playing an essential role during the life-cycle from route-scouring, process development and validation to commercial manufacture of API's, principal responsibilities will involve the management of outsourced production of API's at contract manufacturing organisations for use in both pre- and post-approved products, as well as the development and implementation of cost-effective API manufacturing processes. [2733-026 (2009) : 70]

217. A Ph.D. with a substantial mathematical modelling component is essential for this role. [2733-028 (2009) : 70]
218. Your role will be working in a team with editors where you will enjoy day to day challenges and responsibilities. [2733-029 (2009) : 71]

219. We are looking to further strengthen our technical team with graduate calibre high-achiever, ideally with experience in similar roles in a food/pharmaceutical environment. [2733-031 (2009) : 72]

220. To succeed in this role you will be highly motivated, with the drive and adaptability to ensure that challenging targets are met, you will be a creative thinker with a strong understanding of the key technical measures and influences that drive effective performance. [2733-031 (2009) : 72]

221. If this sounds like you and the role excites you, please send your CV with details of your current remuneration to the HR Department Ernest Jackson & Co Ltd. [2733-031 (2009) : 72]

222. The Role [2733-033 (2009) : 72]

223. The role will also require the ability to analyse scientific literature and input into general research programmes. [2733-033 (2009) : 72]

224. Good communication skills are essential, as the role will demand effective working relationships with a range of stakeholders. [2733-034 (2009) : 72]

We are looking for a highly motivated graduate research assistant to join our multidisciplinary research group studying the role of myocardial high-energy phosphate metabolism in the development of cardiac hypertrophy and heart failure (for background see Neubauer N Engl J Med 2007;356:1140). [2733-040 (2009) : 74]

You are expected to have an established international reputation for research in the area of homogeneous catalysis and will play a leadership role in building the CCI to become one of the leading centres for catalysis research in the world. [2733-047 (2009) : 76]

Applications are invited for a Ph.D. position to study the epidemiology of Crimean-Congo haemorrhagic fever virus (CCHFV) and identify risk factors for disease, plus the risk of pathogen spread, with emphasis on the role of livestock and application of spatial approaches. [2733-049 (2009) : 77]

225. This varied role will allow you to experience all aspects of the Editorial process, specifically: [2737-007 (2009) : 56]

226. Three key roles in our expanding Test division located in North Staffs. Excellent pay and benefits. [2737-012 (2009) : 57]

227. We seek an experienced chemist to fill this new role, key to our development plans. [2737-012 (2009) : 57]

You will also play a central role in ensuring our technology is fit for the future. [2737-012 (2009) : 57]

228. A parallel role to Head of Chemistry in physical testing. [2737-012 (2009) : 57]

229. With over 40 technologists and technicians, a broad range of chemical and physical test methods and equipment, from bench chemistry to highly automated instrumentation, the role presents an interesting and exciting challenge. [2737-012 (2009) : 57]
230. Part of a multisite team providing solutions to scientists working in genomic research, this laboratory based role supports new product development, product application notes and custom research, focused on PCR and qPCR reagents and consumables. [2737-013 (2009) : 57]

231. The role entails running routine assays (UV spec, pH, conductivity and electrophoresis), preparation of reagents and buffers, shipments to external parties, sample preparation for formulation, characterisation and stability studies and maintenance of records. [2737-015 (2009) : 59]

Leading a new Innovation Platform in Sustainable Agriculture and Food, you will play a key role in helping the UK develop and promote the use of new technologies and new ways of working, enabling Britain’s agri-food industry to meet this challenge head on. [2737-017 (2009) : 61]

232. The role [2737-021 (2009) : 63]

233. Flexible, as the role will require some UK and overseas travel. [2737-021 (2009) : 63]

234. This role will be responsible for achieving the aims of preclinical PET imaging research projects through the development and scientific management of the preclinical oncology imaging research programme to develop/apply PET-based imaging biomarkers. [2737-022 (2009) : 64]

235. Out of hours work will be a requirement of the role. [2737-022 (2009) : 64]

As well as leading a research programme in PET radiochemistry complementary to current radiochemistry research in the Division, you will play a leading role in the design and project management of a planned major expansion and refurbishment of the PET Imaging Centre, including new expanded GMP radiochemistry facilities and their unification with the nuclear medicine radiopharmacy. [2737-028 (2009) : 66]

Here is a random selection of 50 solutions from the 18006 found.

A3L 239 Toshack has wasted no time in putting his stamp on the side, moving the West German midfielder Bernd Schuster to libero, Michel from the right flank to central midfield, and giving the striker Emilio Butragueno a slightly withdrawn role.

A6C 1712 One night I was there, before the start of the film, a young man leaped onto the stage and announced that he was an unemployed actor looking for a role in a movie.

A7H 880 Diana's first visit in her new role was to open a new research centre at King's College Hospital, which dealt with the problems of high-risk babies; this had been funded by Birthright.

A9F 869 The existing complaints department would have a new role directly investigating complaints by telephone, correspondence and, if necessary, face-to-face interviews.

AAP 169 In an organisation with such talented people as Heaton Lee, Jock Haston and Ted Grant, however, he occupied inevitably a secondary role in the leadership — not to his taste.

AJ3 794 Ronnie Moran, who resumes the role of caretaker manager he relinquished just over a year ago when Mr Souness arrived from Glasgow Rangers to fill the vacancy created by Kenny Dalglish's shock resignation, said: 'We must try to give Graeme something special to come back to in the form of the FA Cup itself.

AJN 293 Simon McBurney brings a fidgety, sweaty intensity to the role of the troubled king, and in one superb scene he is discovered standing on top of a wardrobe, gazing miserably down on the happy innocents beneath him as his heart is gnawed by destructive jealousy.

AL8 508 The Cambridge board clearly perceived the Circular’s exhortation as an opportunity to provide through its Rural Areas committee (RAC) both the forum and the mechanism called for and thus to develop its own role and expand its activities within a triumvirate of providers.

ALM 231 Through this device the first German republic sought to preserve the role of the so-called ‘free’ welfare associations, foremost the established churches, which had become the key providers of welfare services (Sachsse, 1988).

AM7 342 This level of autonomy will result in a changed role for the school from one of administration of policies to one of management of local resources.

ANM 486 I felt quite nervous undertaking this role in case I became ‘out of my depth’ and couldn't provide the new mother with the support that she needed, either emotionally or physically, but on balance decided that the only way to find out was to give it a whirl!

AS0 770 If you watch the treatment sessions, you may sometimes think that the patient is not taking any active role in initiating movements, whereas the physiotherapist seems to be doing the movements for him.

ASL 67 All have certain basic characters and in order to understand their role in development it is helpful to be aware of four cell activities, three cell structures, and two main kinds of molecule.

AYJ 2499 A statement of the basic role of communication.
Although the workers were given written instructions as to their role when they began their work with a client, this role always expanded so that they were eventually performing several functions for the client.

However, over recent years the possible role of platelets in the early stages of the atheromatous process has been emphasised (Ross & Glomset, 1976).

Pushing the system to the limit was Slim Jim's most significant role in life.

The second role of the informal interview can be in an enquiry where the researcher is engaged in exploratory work, often of an academic type.

In particular it is looking at cross-curricular issues, including areas such as the role of careers guidance, health education and other aspects of personal and social education, environmental education and economic awareness and it is considering how these may best be reflected in the curriculum.

The fox's role in shaping the ecology of the city's wasteland is limited by stray dogs, which appear to be the animal's main enemy in its urban surroundings.

These children may already have grandparents belonging to both their parents, so your role will be a delicate one.

On the matter of boat traffic, Mr. Holford seems unaware that the Basingstoke Canal has the dual role of a recreational amenity and a nationally important nature conservation site.

I indicated a possible line of enquiry that would have been much more fruitful had he pursued it more vigorously and had begun to examine the role of fixed capital in the cyclical process.

Genetic factors play a role

George Raft, originally set to take the non-speaking title role, turned down the offer before shooting, reportedly because of ill health, and was replaced by Cesar Romero, in what was barely a cameo.

The main difficulty was in finding the right actor to play the title role of the 21-year-old Benjamin Braddock.

While the role of small firms should not be discounted, recent work at the Science Policy Research Unit at Sussex has shown just how many significant innovations have come out of large companies.

development of the role; and with the A&E registrar to agree a system whereby my clinical work could be audited.

Plasma exchange (C. Glover, personal communication, 1991) and steroid therapy have been used, but their role in preventing the progress of the disease is doubtful and treatment is largely dependent on symptoms.

I also announced that Robert Lindsay would soon be appearing on the London stage in the title role of a classic story.

The APB also notes that ‘before the role and scope of audit can be widened…a solution must be found to the financial threat posed by risks to auditing firms arising from litigation in the current legal framework’, but does not ‘state a preference’ for any of the possible ways of dealing with the problem.
none Society. Role of Christianity

It did well enough, though might have done better if it had covered less ground; also, in the four years that had elapsed since gathering material for it, public interest in the world role that Americans had taken up in the Kennedy years had largely evaporated.

Mambo Leo, as the first major Swahili newspaper, played a particularly vital role in enabling many Africans to gain valuable professional newspaper experience.

Sam Gamgee hits on the same thought when he takes up the 'Blondin' role of faithful minstrel in Minas Morgul, and sings 'words of his own' fitted to another old Shire tune:

For Annabel, it was merely a means of filling in time before she starts rehearsals for her starring role in Cinderella in Norwich this month, when she appears with Gary Webster, of Minder, dancer Lionel Blair, and 'a lady from Teabag', whose name she couldn't remember.

He took on a starring role in the Plough Lane Crazy Gang production and gained more notoriety when he was sent off for elbowing a village postman in a pre-season friendly on the Isle of Wight.

This happens very quickly and the energy generated by the fusion can kick out the muon, releasing it to play its role as matchmaker again, acting as a 'catalyst': hence 'muon catalysed fusion' was born.

On the developmental road towards kingdom-states, alliance networks changed with events over time; the role of exchange in the making and breaking of such alliances cannot be ignored and we should be wary of hastening true commercialisation into Anglo-Saxon England too early, even though that was the inevitable result of this society's structure.

One explanation invokes the notion of sex or gender role.

Bingham's new-look outfit, with Mal Donaghy pushed into a holding midfield role, and Kingsley Black dropped after a run of 22 caps, finished well in control against the Albanians.

There are many who dislike the idea of a front-rower calling the shots because the role of their position demands their heads to be down more than up.

It seems, then, that, for the most part, black parents are not interested in sport and have no role to play in generating and sustaining their children's involvement which intensifies despite the lack of parental support.

An accompanying development was that, from the 1960s, employers' associations in some important industries changed the emphasis of their role.

It must also be said of Poland that its society has been most resistant to Communist influence and, that of all East European countries, the gap between the state and its society has been greatest. The LWP has not gone out of its way to act as the arbiter of events; rather, it has had this role thrust upon it by Party factionalism and weakness.

More generally in relation to external dealings, the advantages which the City of London possesses as a major international financial centre were listed by the Wilson Committee: its historical role as centre of the pax Britannica economica; its geographical position close to Europe and between America and Asia; the overlap of its working day with those of both Europe and Asia; political stability; a high degree of integrity; a flexible regulatory system; a concentration of ancillary and cognate services; and the universality of the English language.
These findings emphasize the role of photochemical processes in the lower atmosphere, and may suggest only a limited role for transport in other, more polluted regions.

Analysis of the atk protein product will shed light on the role it plays in B-cell pathways, particularly in view of the fact that src-related protein-tyrosine kinases such as blk, fyn, lyn and lck, and others have already been implicated in B-cell activation.

While supporting the practitioners' role as proxy for the patient in purchasing, there is a need to recognise the limitations of this, and wherever possible we should be seeking the opinion of the public.

The relation between decreased urinary albumin excretion and changes in filtration fraction is consistent with the hypotheses of a predominant role of glomerular haemodynamic alterations in producing microalbuminuria in insulin dependent diabetes and also of the decisive role of the reduction in intraglomerular capillary pressure mediated by angiotensin I converting inhibitors in the antialbuminuric effects of these compounds.

Culturally dominant and playing a pervasive role in the everyday life of élite and masses alike, it wielded enormous influence.

Italy, of course, plays a major role and already has plans for economic aid to the States across the sea, such as electrical power development.

And the dying welfare state brought its own newspeak as well: governments' failure to link child benefit, unemployment pay and so on to the cost of living was the fight against inflation; putting children on half-time schooling was referred to as giving parents a free hand; closing hospitals and dumping dying patients on the doorsteps of unwarned and distant relatives was community care; and a new political movement that saw remedies to the whole predicament, if only the nation's women would buckle down to traditional role and biological destiny, was known quite simply as FAMILY.

Similarly, if women's role as workers is emphasised to the detriment of consideration of their role as housewives and — more particularly — their role as mothers, then the ‘proletarianisation’ of women could confine them and their children to dependence on means-tested state benefits and/or low pay from part-time ‘women's work’.

The problem is that Reich only took half of Freud's theory, and ignored the role of the death instincts which were developed in the later theory of psychoanalysis.

The screen once played an essential role in the well-furnished, warm drawing room.

Such success led to hopes that the Six could play a greater political role in the world, but this raised questions about how exactly to create a common political outlook.

Kelly (1985) found instances of girls performing a service role in the laboratory — being expected to tidy up for boys, for example.

It is consistent with this that we should use the role of the fieldworker in speech-exchanges as a means of classifying different speech-styles.

Can the services help each other by the development of better liaison, sharing of concerns, mutual education, and when necessary transfer of clients, thus avoiding suspicions, excessive burden and displacement? vi What should be the proper role of specialist psychogeriatric services in relation to community care?
Most day care, work projects, respite care, befriending, counselling, advocacy and welfare benefits work, as well as some direct personal care services provided at home, could be done by ‘not-for-profit’ organizations, and focusing as they do on one client group's problems and having strong links with families, they are unlikely to lose their strong advocacy role.

This view was given even greater prominence in the Griffiths report which, as we have seen, also advocated an enhanced role for the commercial sector.

For this reason it will play a vital role in our later construction of a normal form.

If we assume that accountants play a passive role in this, namely that they provide only what is expressly requested, then we build our accounting theory on that.

A Turkish national living in Monaco on a Canadian passport, Haser had somehow attracted the attention of the Monte Carlo police and the CIA was nervous that if the arms operation had been blown, he might expose the agency's role in it.

Indonesia occupies a central role in this market, supplying approximately 50 per cent of Pacific LNG needs.

What accentuates the peculiar physiognomy of Hellenistic civilization is the special role two foreign groups — Jews and Romans — came to play in it.

In addition, the role of the words in Wagner's music drama would be open to damaging criticism on Schopenhauerian grounds, although this further problem only impinged fully on Nietzsche at a later date, when his interest in Wagner was of a different order altogether.

Where excavations have been carried out, or detailed research conducted, we can see this central role manifested in the type and size of buildings on the site.

IN THE summer of 1991 Southern Division were fortunate enough to visit the premises of ALCOR UK and this short article aims to explore the similarities between cryonic suspension technique and arterial embalmment and discuss the role of the embalmer in future applications of this technology.

John's role in the OSART was to examine Daya Bay's emergency preparedness.

Few schools perceived health board staff as having a role in staff development and yet, according to health board staff, that is one of their three main functions.

The Gracious Speech rightly emphasises Britain's constructive role in the two intergovernmental conferences on political union and on economic and monetary union.

The Government have an important role in improving vehicle security.

Of late, increasing attention has been paid to the role of women in pre-industrial society.

These studies will examine how management decision making processes with respect to technical change effect the experience of work, the role of management, and the organisation's performance.

In terms of the implementation of strategy, the project examines the nature of leadership and of top management, the role of information, the triggers for change, the role of external influences and the political, cognitive and social factors which impede or enable strategic change.
The new Prime Minister and Finance Minister, Juan Carlos Hurtado Miller, a former Agriculture Minister, resigned from the conservative Popular Action party (AP) in order to take up his new government role.

The Iraqi invasion of Kuwait in August renewed debate about NATO's defence role extending beyond alliance borders.

Type B jobs are where the responsibility is for maintaining a level of competence and efficiency in an on-going activity, a departmental management role.

Case studies consist of a description of an event concerning a real life or simulated situation, usually in the form of a paragraph of text, a video, a picture or a role play exercise which is then followed by a series of instructions which prompt the student into analysing the situation presented, drawing conclusions and making decisions or suggested courses of action.

Since the role of subjective risk is of particular importance in theories of driving, one part of this question is simply whether drivers are aware of subjective risk, either as a feeling which is occasionally present in immediately dangerous situations but otherwise non-existent (consistent with a zero-risk theory of driving) or as a continually fluctuating level which they can be aware of when questioned and which they attempt to match to some target level (consistent with RHT).

A statement of the role of budgeting and how budgets are to be assembled.

Most of the debate between the CNAA and the CDP concerned ‘self-validation’, the CNAA's role, progress towards autonomy or some particular aspect of the relationship between the CNAA and the polytechnics — and the discussions were on an ad hoc basis.

Biersteker, on Nigeria, argues that: ‘Indigenization thus encourages a comprador role for local business in a society already plagued by strong comprador tendencies’(1987b, p.272) and that ‘foreign capital has not been seriously threatened by the indigenization exercise’(p.275).

It is difficult to assess the role of dietary fibre in the development of colonic cancer but our results suggest that the increases in cellular proliferation associated with long term higher dietary fibre intake are modest, occur mainly in the proximal colon and are unlikely to present a significant risk for mucosal instability in the distal colon.

For de Gaulle himself, the experience taught valuable lessons, particularly about the dangers of being trapped in the role of party leader.

Our role in defeating Germany and Japan, and in saving Greece and Turkey from Soviet take-over, undoubtedly gave us an exaggerated view of our capacity to help other peoples with quite different backgrounds.

The teacher, in role as a Roman Centurion, arrives in Nazareth to give the decree that everybody has to return to "their own town"; the children as the citizens of Nazareth.

LABOUR has named David Gardner, 33, as its new local officer to head the party's drive to keep its leading role in the control of town and county halls.

Commenting on the review, the Scottish Office industry minister, Allan Stewart, said: ‘This bulletin demonstrates the significance of a competitive export sector for the Scottish economy and highlights the important role that exporters will play in contributing to a sustainable economic recovery when demand in overseas markets picks up.’
Annexe 5-2 Occurrences de Opportunity dans CAEMS

Souligné = ambivalent – peut signifier "job"
En rouge = RH
En jaune = formule figée

They provide an opportunity for able graduate students to undertake research of direct interest to industrial firms
as well as a worthwhile opportunity for him to spend part of the period of the award in industry.

1. Similar opportunities exist here too.
but there are opportunities for practical work.
Work will be mainly on a bench scale but with opportunities for pilot and full-scale investigations.
Opportunity is provided to proceed to a higher degree.
Opportunity to view laboratory available contact the Senior Lecturer, Mr. Elstein.
GKN is Britain's largest engineering group comprising many companies offering the opportunity to work in a wide variety of activities.
The North Western Gas Board offers boundless opportunity for graduates who enjoy fast learning as much as they enjoy fast living.
You'll have opportunity to do both in an area where a starting salary of
This post offers an opportunity to work on a project associated with a fundamental research group,
Excellent opportunities are available for advancement either within the Technical Centre or throughout the A c. I. Group of Companies.

THERE ARE AMPLE OPPORTUNITIES
will have opportunity to work in routine Haematology,
Opportunities for further training.
and have an opportunity to tackle a research project?
He will have the opportunity to develop his own research interests.

2. An opportunity exists for a Civil engineer,
The post offers a unique opportunity for a graduate in Agriculture
profitability conditions include the opportunity to share in profitability, pension scheme and relocation assistance.
Leads to a career in industry and offers opportunity for further study
There would be an opportunity to publish research,
Consideration will be given to applicants otherwise suitably qualified who would welcome the
opportunity of developing Production Engineering as a major personal interest.
Opportunity to learn all relevant techniques as diagnostic work is just starting.
the opportunity to work in an international atmosphere.

3. Expansion in our Research and development programme has created two attractive opportunities.
These vacancies provide an opportunity to join a stimulating project with early progression to key positions in the team.
but there will be opportunities for some outdoor work including the examination of scenes of crime
Opportunities are available for research leading to the degree of D. Phil. in the Science of Materials
Opportunities also exist for research leading to the Ph d. degree.
in addition to undergraduate teaching, will have the opportunity to participate in research and
postgraduate teaching within the Interuniversity Institute of Engineering Control
Ample opportunities will be given for research.
Opportunities will also exist for radioisotope investigations of the kinetics of iron metabolism during depletion and repletion.
In carrying out their duties in the Unit successful candidates will themselves have opportunities to participate in aspects of the neutron beam research programme.
Excellent opportunity to learn new techniques using modern equipment in first rate laboratories.
Encouragement is given to the publication of results of Investigations-Opportunity to present papers at overseas congresses-Attractive Salary based on qualifications
Excellent opportunities to engage in relevant research
There are ample opportunities and facilities for personal research work and for lecturing at postgraduate level.

4. Opportunities exist in the following fields:
and the post provides an opportunity for interesting work in a worthwhile field.
The post offers the experience and opportunities required for taking a higher qualification.
There will be an opportunity to work for a further degree.

OPPORTUNITIES FOR RESEARCH STUDENTS
Opportunities exist in lunar and planetary studies, the history of the Earth’s rotation
here is a quite outstanding opportunity:
Most opportunities are for teachers in the age band 22-27 with a Degree in Mathematics, Physics or engineering subjects;
Opportunity exists for visiting mineral deposits, mines or associated plant both at home and overseas.
Post offers opportunity to gain wide experience
Opportunity to register for a higher degree.
and the other with radiotherapy physics but there will be opportunities for gaining experience in all aspects of radiation physics work.
The successful applicant will have the opportunity to register for a higher degree.
An opportunity has arisen for a person to join our Patents Section as an Assistant Patent Searcher
Ample opportunities for research.
Opportunities exist for study for a higher degree.
The Division offers opportunities for engineers
Good opportunity for energetic young person to use initiative
but in view of Museum's Antarctic Centre proposal special opportunities exist for the development of an interest in Antarctic Geology.
Joining the Electricity Supply Industry gives you the opportunity to follow up your 'A' level studies this school year with a degree course next Autumn.
or generating and transmitting electricity with the CEGB-challenging opportunities exist.
For suitable candidates there may be opportunity for working for a higher qualification.
This will provide an opportunity for a new look at methods of treating helminth infections through fundamental research
For full details of these courses and career opportunities in the Dairy Industry, please write to or telephone;
Opportunities for training in electronmicroscopy and day release for further studies.
Work will be varied with the opportunity to contribute to design.
Opportunities exist for research leading to the degree of PhD in a wide range of topics
Aston's Interdisciplinary Higher Degree scheme provides the opportunity to research into a genuine problem supplied by a collaborating industrial organisation and,
Good holidays and opportunities for further education up to HNC.

Annexe 5-2-2 Occurrences de OPPORTUNITY dans Renewable Energy

2. Under these circumstances, an input–output energy analysis provides planners and policy makers an opportunity to evaluate economic interactions of energy use [1].

3. This will decrease the charring opportunity and increase the bio-oil production.

5. Therefore, renewable energy entrepreneurs have greater opportunity to participate in these provinces’ electricity supply systems.

7. The recent commercial availability of small PEMFC units has created many new opportunities to design hybrid energy systems for remote applications with energy storage in hydrogen form.

8. There are poor opportunities for wind development in Hungary.

9. Furthermore, there are poor opportunities for solar development in Hungary based on photovoltaics.

10. There are fair-good opportunities for geothermal development in Poland especially for district heating purposes,

11. although it is believed that additional opportunities will occur after further research and preliminary studies are completed.

12. Nowadays, there are good opportunities for further hydrodevelopment in Slovakia.

13. Nowadays, there are additional opportunities for hydro, geothermal, biomass and wind energy in Slovenia.

14. The use of solar energy is therefore closely connected with energy storage and there are poor prospects or opportunities for solar development in Slovenia based on photovoltaics.

15. Largely due to this pressure, it is likely that for investors with sufficiently long time horizons there will be a number of opportunities in the energy sector.

16. The high-energy consumption in this sector presents an attractive challenge and significant opportunities for energy conservation.

17. Opportunities and limitations of the pre-design guidelines are also discussed.
Here is a random selection of 50 solutions from the 10096 found.

A6D 778 But their very strangeness also helps us see how transgression is produced by the measures taken to contain it: the more elaborate the classifications, the more opportunity there was to transgress, and, quite possibly, the greater the attraction of transgression.

A7C 815 Warnie had retired from the Army at the earliest possible opportunity, in December 1932, and moved in with Jack and Minto as a permanent fixture.

ACR 557 The visitors will also take the opportunity to visit retail outlets in Cologne, Amsterdam and Brussels as part of the FFB familiarisation programme.

ACR 557 The visitors will also take the opportunity to visit retail outlets in Cologne, Amsterdam and Brussels as part of the FFB familiarisation programme.

ALC 1175 The first was a relief service to allow farming families the opportunity to have a holiday away from the farm.

ALG 167 In many cases, nonetheless, it offers the best opportunity of optimising the use of hill land resources for the nation (25).

AMH 237 In an increasingly de-regulated European market, companies based in Continental Europe are likely to view the UK as a considerable opportunity and market their products here.

B14 101 Because they go into homes, health visitors have a unique opportunity to assess levels of safety and to offer appropriate guidance and help to parents.

B23 1474 The short time in school has not always provided the opportunity to become actively involved in the internal workings of the administration and, perhaps more importantly, the management of the school.

B3K 262 23 April 1992 is an important date in the operatic calendar giving you the opportunity to preview Opera North's 1992/92 season whilst helping to sponsor a new production of Verdi's enormously popular Don Carlos.

B79 395 This part of the story can be tested and recently I have had the opportunity with Dr Peter Wilkinson at the University of Glasgow to do so.

C96 1362 What started out as a potential disaster provided a great opportunity to create something really different.

CA8 574 On the one hand there was at last the opportunity of some concentrated action and, with 'Imshi' leading us, one could feel reasonably confident.

CEF 337 Regard this as your opportunity to play God, and do it fairly quickly.

CFN 13 Page & Moy offer you a unique opportunity to see the spectacular Bolshoi Ballet perform Tchaikovsky's Nutcracker at the Bolshoi Theatre on New Year's Eve, as well as take in the sights of one of the world's greatest capitals, Moscow.

CMG 1364 In his reply Dr. Yeats expressed his gratitude and assured Whitbread that he would take the earliest opportunity of using the oil; a month later however, the doctor sent his servant with an apology — he had not yet had a chance to use it.

EC7 2034 They welcome the opportunity to compete and are confident that they can prosper.
‘To this day I have not played much Chinese music, and certainly not a concerto, and so I thought that this would be a good opportunity to explore that — a least to give Hsiao the encouragement to write one.’

The HF&F Act, however, requires licensed fertility clinics to offer every client a proper counselling opportunity.

Make friends with your accounts department at the first opportunity.

Right, well I part of me says, the there are two aspects, the other side of the coin a little bit, if we talk about recording achievement and not recording failure, we here have an opportunity to point out to youngsters, encourage youngsters in that they are all capable of achieving in some way and to get them to write down that they have achieved, that's the other side of the coin.

As was mentioned earlier, they enjoyed filling out psychological tests and had requested the opportunity to fill out an IQ test.

‘You'd have thought your Brian could have found you somewhere a bit more comfortable,’ interposed Mrs Harper, seeing her opportunity of introducing Brian to his disadvantage, ‘he must know a few folk, it's not only money that counts.…’

Health might be seen as a public good, but illness is now a market opportunity.

Although it is fairly peaceful, take care in selecting companion fish as it will eat smaller fish, for example Neon Tetra, if the opportunity arises.

In planning its programme the Association emphasized its international objectives advertising, for example, from as early as 1924, annual holidays at two centres in the USSR: a ‘unique opportunity to experience the USSR’s great natural beauty, priceless and world famous works of art, gigantic collective farms and the thrill of seeing in progress the greatest social experiment in the world's history.’

Private members' bills offer a major opportunity for backbench initiative.

Service trades offer the opportunity to create jobs quicker because they fulfil a requirement that already exists, rather than attempting to create a market for a new product and often having to wait for factories to be built and machinery installed.

Even if we discount the fact that Rothmans was the British hope in the last Whitbread Round the World Race, it seemed to me that Yachting World took the opportunity to mention tobacco companies wherever possible.

In Moughal v. Motherwell District Licensing Board, 1083 S.L.T. (Sh.Ct.) 84 and Robertson v. Inverclyde Licensing Board, 1979 S.L.T. (Sh.Ct.) 16 it was held that the licensing board were not entitled to proceed on local knowledge of the members, where the parties were not given an opportunity to comment thereon.

He was essentially an adventurer, who owed his rise to his service to three kings, his military vigour, his fortunate marriage, and his ability to press home the advantages which opportunity offered him.

Royal Institution audiences included the eminent in various walks of life, and the lecturer had an opportunity for evangelism among the mighty.
CPRW hopes that the Secretary of State will grasp the **opportunity** now before him to alter the pattern of development which has characterised this site for several decades, by challenging once and for all the aspiration of the current and any future owner, to establish a large and permanent residence for their tourist operations on the cliffs above Amroth.

For the rest, when the **opportunity** presented itself, we questioned Sir John about the legends of Arthur, the Grail and the wonders of Glastonbury Abbey, but never once were the Templars mentioned, as if they were a forbidden subject, a treasonable offence even to refer to them.

In earlier Lectures we saw how taxation can change before and after-tax incomes of different factors, how the **opportunity** sets of individuals are affected, and how this influences the decisions they make.

‘Now that NDT Systems, Eagle and Vicorp are part of the John Wood Group and employing over 50 people, we are collectively ready to grasp the **opportunity** to contribute to the Group's goal of becoming a major international energy service company.’

That at least shows a certain **equality of opportunity**.

I know it is a word that can mean various things, but we must ask why some continental politicians refer to the word ‘federal’ at every **opportunity**.

They lost the **opportunity**.

For example, part of the evaluation is to monitor the ways in which these sectors have the **opportunity** to determine policy and the allocation of resources within the Urban Programme machinery.

‘I'm grateful to Omagh and Roy McCreadie for giving me an **opportunity** to get back into senior soccer.'

(New **Opportunity** Press Ltd) Organisation profiles, facts on graduate recruiters and some post-graduate study information

Let's go back to the terrorists just er just just briefly, Clare whatever you say, that's a potent picture and it was a deliberate photo **opportunity**.

The seminar also provided an **opportunity** to discuss the guidelines for the additional assessment outlined in the SCOTVEC document, Implementing general SVQs: the additional assessment.

The buyer is given an **opportunity** to inspect the goods by virtue of s15(2) (b).

As well as advising on the strategic focus of the bid in relation to the target's shareholders and the market, the **opportunity** might be taken to raise the public profile of the offeror generally.

And I recommend to anybody who goes on the school, I'm sure they do on the training course, that the first **opportunity** I would have to address erm the con er the staff meeting, you just say this is what I who I am this is why I'm here I've got a list of businesses which the school has provided with me already but I will I may erm if I bump into you in the corridor I may just say do you know anybody else.

Coun Richmond believes the authority squandered the **opportunity** to create a shops development in part of the town centre which could be hit by the new Cornmill shopping complex.
The Scots include six full caps against the visitors' four, and for four of the forwards, Martin Scott, Chris Gray, David McIvor, playing at No8, and Ian Smith, the match, sponsored by Total Oil Marine International, provides them with the opportunity to get back into the selectors' good books.

This gives the buyer the opportunity to query anything that is not entirely clear.

I was struck too by the way in which we started the programme by considering the dangers of the situation and there's no doubt that that's correct, but it is important to say, perhaps the most important thing is that the end of isn't in the Soviet Union and the break up of the Soviet Empire is an enormously positive event for all of us, for the citizens of the Soviet Union and for us in the West it gives the opportunity for much greater stability, real stability, peace and prosperity then ever existed under the old regime.

Here is a random selection of 50 solutions from the 5763 found.

In the same way, an economy's laws record a history of solutions to problems of monopoly and theft and then of solutions to the loopholes and opportunities those first laws opened.

In the absence of appropriate provision by other bodies, the WEA had grown as a social movement which sought to provide those opportunities for people, denied access to further and higher education, either through its own efforts or cooperatively, but without patronage, in partnership with the universities, LEAs, and other agencies.

Kielder offers a wide range of recreational opportunities.

There are no statutory safeguards against ageist practices, no equivalent of the Race Relations Act or Equal Opportunities legislation.

While some people believe discrimination can be outlawed and the Boards for Race Relations and Equal Opportunities have had some limited success, many would argue that the malaise is more likely to respond to public education because much of it is implicit in what people say and do.

Richard Macrory, Universities & the environment: environmental regulation — opportunities and obligations, is available price £5.00 from CVCP, 29 Tavistock Square, London WC1H 9EZ.

Apart from differences in educational opportunities, a combination of economic and social factors over the past few years has sharpened stratification within the black population.

Deliberately seek out learning opportunities

As well as providing a worthwhile focus for study, business can enliven the process of education by offering hands-on opportunities, team work, enterprise and leadership situations.

For more details of educational opportunities in retirement see the chapter ‘Feeling good, looking good’.

‘A lover of nature, he was no lover of solitude, and like many whose occupations condemn them to long silences he seized eagerly on all opportunities of conversation.’

The basic professional stand against censorship is sound but it is weakened by inaction when opportunities arise to be decisive and it is further weakened by elements of the profession which seek to censor, while often interpreting this as positive discrimination.
In the past I have had to search far and wide for opportunities to fly this wonderful big radial-engined workhorse, and my quest had taken me to Australia, Canada and various parts of the USA; but now, at last, 45 years after its first flight, we have a floatplane Beaver here in the UK.

London run the ball so I should have lots of opportunities.

If pupils do not have access to Standard English then many important opportunities are closed to them, in cultural activities, in further and higher education, and in industry, commerce and the professions.

The supplementary guidance to our terms of reference notes that ‘the curriculum should provide equal opportunities for boys and girls.’

It means grasping opportunities and being in the right place at the right time.

Too little support when the child is having difficulty, or too much intrusion when the child is succeeding, will have the same effect of reducing the child's opportunities for developmental change.

An Equal Opportunities Employer.

Indeed, with the rapidity of change in modern Britain, the need for continuing educational opportunities is on the increase for all adults.

It is the schools, and their teachers, who have had to shoulder this burden, increasingly so in a climate where opportunities are diminished and our pupils rightly feel let down, frustrated and alienated from a society that appears insensitive to their plight.

The idea that people operate ‘strategies’ in which they assess a range of options, and act to maximize their opportunities, has become an increasingly important insight in historical work on the family, and one which accords an active role to human beings in constructing their own lives, rather than seeing individuals at the mercy of large scale social forces (Morgan, 1985, p. 175).

Better education opportunities: There was a general sense of dissatisfaction with education provision which seemed to relate more to whether it met people's needs than the actual range of classes provided.

It was quickly recognised that effective learning could most easily take place when opportunities were created frequently throughout each day, in a relaxed familiar setting and with a trusted companion.

Yet as was noted, inventions, like choices, are always constrained by social experiential factors such as available opportunities and knowledge of alternatives; even the most ardent indeterminist would acknowledge such things (while still holding out for an irreducible residue of free choice).

Touting France as the foremost software preserve in Europe, a bunch of French companies and research and development institutes under the aegis of the French Scientific Mission will be in Silicon Valley June 23–24 trolling for partnership opportunities including joint research and development agreements, joint patent development, licensing and strategic alliance.

Opportunities and Limitations in Religious Broadcasting, edited by Peter Elvy, (paperback, 176 pages) costs £5.95 and is available from the Centre for Theology and Public Issues, The University of Edinburgh, New College, The Mound, Edinburgh EH1 2LU, UK.

There are few opportunities for youth to train in media skills.
The efficiency of the Magistrates' courts, the tensions between the Probation Service and the Crown Court over social inquiry reports, and the need to widen opportunities for members of ethnic minorities, were examples of the kind of item which exercised officials in recent times.

Your Careers Teacher will make sure you know all the Compact opportunities.

They have a particular and unique role to play in sessions designed to introduce young people to issues of health and safety, rights and equal opportunities at work.

Nothing would, in our belief, conduce more to the unity and harmony of the nation than a public policy directed to the provision of equal intellectual opportunities for all, and service to this end would be doubly effective if it came voluntarily as from those who have already received their inheritance, and desire to share with the rest of their countrymen that in which their life and freedom most truly consist.

Aware that society has been constructed by able-bodied people in ways which serve and perpetuate their own interests, these people have used our consequential marginalisation and dependence not as a starting-point for developing with us a struggle for social change and equal opportunities, but as a handy and convenient fact to justify the development of all the inappropriate disability services with which we are now so familiar.

This system suits level 2 and 3 intermediates perfectly; many will become proficient with harnesses, and there are good opportunities to try a wide range of boards.

These reports, published in June 1986, suggested that a barrage would not only be technically feasible but would be likely to create significant new development opportunities in the Cardiff waterfront area and beyond.

It is important, because, as the hon. Member said, there have been earlier opportunities for such legislation — the Government could have chosen to include a measure in their order of business, and a private Member once introduced a Bill, but unfortunately did not have enough time to secure its progress.

Because the flow of companies coming to the market is outside of MAS's control, we cannot give the acquiror any assurances as to how many opportunities will be identified within a certain timescale.

Indeed, where an acquiror has particularly precise and specialist criteria, we should consider whether any relevant opportunities will ever be found using the reactive approach.

— links among different agencies which provide opportunities to take part in sport and physical recreation

Established researchers in the Community will benefit from increased opportunities to consult the collections and to discuss their research with internationally recognised scientists on RBGE staff on an individual basis, and through workshops, seminars and conferences.

We are confident that the health sector will remain an important market for WCUK in 1993 and are optimistic that, in the light of the latest Autumn Statement, increased opportunities will exist with the wider involvement of the private sector in the delivery of healthcare.

These activities provide new channels of communication, opportunities for decision-making and for contributing ideas and space to develop new skills and self-confidence.
Practical classes and laboratory work are part of this training, with opportunities to use all the tools of the social scientist as well as a variety of equipment in surveying and photogrammetry, computing and Geographical Information Systems (GIS), and physical geography.

One of the advantages of our business is that the opportunities to progress are remarkably many and varied — there is no one set path which you have to adhere to.

The Countryside Commission is to receive £7.3 million for footpath clearing and hedgerow restoration work; the Rural Development Commission £4.3 million to help create rural employment opportunities, while English Nature will receive additional funding for incentive schemes to protect the wider countryside.

Annual Report on Equal Opportunities.

The estimate was given yesterday by Allan Stewart, the Scottish industry minister, when he urged companies to give increasing priority to markets in the Commonwealth of Independent States to win work which could help to offset the gradual decline in North Sea oil opportunities.

He said that the new ‘learning for work scheme’— intended to provide opportunities for the unemployed to pursue vocationally relevant full-time courses of education, with fees paid and an allowance equivalent to their benefit entitlement for up to a year — gave another opportunity for the longer-term unemployed to take up training opportunities and thus to increase their chances of finding employment.

THE Equal Opportunities Commission yesterday failed in its Court of Appeal bid to stop what it views as unlawful discrimination against part-time workers.
Annexe 5-3 Occurrences de OPENING dans CAEMS

1971
If you expect to graduate in one of the following disciplines: ENGINEERING (Chemical, Gas, Civil or Mechanical) or MATHEMATICS, STATISTICS and ECONOMICS, or MANAGEMENT ACCOUNTING the North Western Gas Board have openings in ENGINEERING, ACCOUNTING COMPUTERS OR ECONOMIC RESEARCH. [733-075 (1971) : 47]

1995
1. Now you can join one of our international and local project teams with openings in both Bracknell and Edinburgh. [1980-008 (1995) : 56]

2. The present openings are for experimental and theoretical work in the following areas: [1980-081 (1995) : 75]

Annexe 5-3-2 Occurrences de OPENING dans BNC

Here is a random selection of 50 solutions from the 7575 found.

**AB5** 580 I remember on opening night, a group of musicians arrived led by Roger Wooton, calling themselves Comus.

**ABW** 1959 The unknown is always the most fearsome, opening out into wide areas of conjecture.

**ACN** 2037 His new venture, The Champion, opening in early June, will close at the traditional time of 3.30am.

**AJ9** 207 This is mainly as an alternative to shopping on Friday evening or Saturday, although seven-day opening had brought a ‘small increment’ in sales.

**AK9** 1246 Such a strategy would also help blunt the impact of the next move which Labour seems almost certain to take: endorsement of electoral reform, opening the way to a pre-election pact with the Liberal Democrats.

**AM5** 140 Avon Manufacturing Ltd includes automatic door opening

**B03** 73 And the service have increased their opening hours.

**B0K** 964 In 1926 breeders had managed to set some standards and formed a society, opening a herdbook for the Irish Moiled in that year, and by 1929 they had decided that the preferred colouring should be red or roan with a white dorsal line, white tail and underline and white udder.

**B0N** 775 More volunteers might make way for evening opening, Saturday morning opening, outreach work or specialist work, but some of the West Midlands workers expressed a fear of working unsupervised.

**B22** 767 Tommy Sparks was a man having a remarkable thirst and woe betide anyone unfortunate enough to be having a haircut around opening time.

**B2S** 1258 BELOW: The Royal Train leaving Milton Keynes on the official opening of the station by Prince Charles.

**B75** 1714 ‘But we have computer graphics in the opening sequence.’

**BMK** 2018 An introduction and overview of antibodies as analytical tools to study environmental compounds, makes both a comprehensive and readable opening to the subject.

**BMM** 1651 On the evening of 26 August, a short while after the women marathon runners had left the Neckar Stadium, twenty-seven sprinters prepared for the opening round of the 100 metres.

**CBF** 13973 Thousands flocked to take advantage of Sunday opening, all thoughts of recession apparently banished.

**CCN** 1108 It can be so — certain women have a perpetual ‘devouring’ quality — but it is a natural process, echoed in the menstrual cycle, and in the moon’s waxing and waning, and it can be used to positive effect, regulating the ebb and flow of relationships and opening up pathways of communication.

**CDM** 1041 Then Dad shot home the bolt, though this didn't stop us opening the window to see the end of the rumpus.
If you are single and ambitious, then your career pattern and development will be important to you, and any prospects for promotion in the longer term are a significant factor when looking for the right opening.

IBM also has an opening for a president, but it is not certain whether Gerstner wants a president.

From the haunting opening sequence of the party landing on a stormy sea-shore strewn with luggage (plus the piano), Miss Campion maintains a tense, hallucinatory atmosphere.

In his opening address on 29 September the pope rejected the notion, common since Vatican I, that the authority of the pontiff alone was sufficient to govern the Church, and listed the four aims of the Council: that the Church should have a clearer idea of its own nature; that there was need for renewal;

Irvine has argued that the opening of this entry channel may also require InsP 4 and that such an action would explain those instances where both inositol phosphates are required.

Fine start: Joanne Hockley happy with an opening

Noel Coward said after the opening night of the musical version of Gone With The Wind at Drury Lane, during which a horse misbehaved heavily on stage: ‘There's nothing wrong with the show that shoving the child (Bonny Langford) up the horse's backside won't cure.’

In Dering Street, Anthony d'Offay shows the four large abstract pictures which Elsworth Kelly exhibited at this year's Documenta (to 20 November), with an exhibition of an important new group of works by Gilbert & George opening at the end of the month (26 November-29 January 1993).

In the E flat Sonata I enjoyed his cajoling lyrical charm in the opening movement and the Menuetto as much as his pin-point clarity in the Scherzo and his mounting flames in the finale.

Blinking groups with all unconscious rapid closing and opening of eyelids in humans and animals; it can be described physiologically and there are causal laws to account for its occurrence.

If the fire drill procedure is being altered, or the opening times of the staff canteen are being extended, then a factual style is appropriate.

The male then extrudes a packet of sperm from the genital opening beneath his thorax and deposits it on the ground.

A monarch's speech at a state opening of parliament, though spoken, is far from the reciprocal end of the scale, but a scribbled memo from one teacher to another, though written, may trigger off a series of replies and counter replies, and is thus highly reciprocal.

His father died when he was three years old, leaving his mother to support and bring up seven children, providing for her family by opening a greengrocer's shop and later a modest boarding house.

Many plants are so reliable that floral clocks have been designed with flowers arranged round the clock face in the order of their opening and closing times.

There's talk of him opening two new salons in New York and Milan.

Linda brings along her box of tricks to every session — it holds a tool for most jobs, from opening oysters to piping cream.
But the model he constructs (and whose principles he expounds so clearly in his opening pages) is not based on such rigorously maintained categories.

This is clear from the opening words of section 18:

If the hon. Gentleman is to be consistent with his opening sentence in which he quoted AMMA's report, he must proceed to argue — rightly — that the Bill is confused and inadequate for its purposes and he must tell us what revisions he will seek.

Opening Files 8.4.5.2

‘My one and only!’ she giggled, opening the front door.

She turned to express some of her thanks to him, but he was already out of the car and round by the passenger door opening it for her.

While high level opening windows are fine to air the room, an opening roof vent is even more efficient.

FERRY companies' efforts to boost passenger levels before the official opening of the Channel Tunnel next May appear to be paying off, according to new figures.

Everything went to plan in the opening stages with the Republic piling forward and causing all sorts of anxiety in the Lithuanian defence.

Highlights of the last 12 months include the launch of the Government's Investors in People initiative in September, the opening of the Business Growth Centre in February and the spectacular inaugural Trainee and Business Awards ceremony in March.

After a brief opening spot by local musician Jim Malcolm, which suggested that his is a talent to watch, Guillory came on.

Squash courts, the sports hall, activities room, weights room and synthetic pitches will all have shorter opening hours and the wooden annexe will be demolished.

Morrissey, who scored the opening goal, said: ‘They have got to support us and get behind us.

We have been constantly reminded of our 25th anniversary by the Official Opening Ceremony on Saturday 29th August, the Service of Thanksgiving in the Church of the Holy Rude, the Logie Kirk Commemoration of the University Mace, a prestigious series of public lectures, concerts, exhibitions, parties of all kinds and, yet to come, the Silver Jubilee Graduation Ball in early July.

The Local Authority must CONTROL leisure management despite privatisation and determine the pricing and opening hours.

Well we might consider frenzied and suspect — ‘Oh sovereign virtuous, precious of all trees’, though we must be careful of course because in the formal style of Paradise Lost such opening addresses are common.

Here is a random selection of 50 solutions from the 393 found.

After lectures, theatre openings, at private parties, I would infiltrate his circle, usually posing as a reporter or a photographer, and while he tried to snub me, I pretended to ignore his ignoring me.
Scrutinising this familiar object revealed some untidy details in the first movement: the performers have not quite solved the problem of what must be one of the cruellest openings for an orchestra ever devised.

In shape, such apertures were roughly square, although circular openings began to appear in the early nineteenth century and are often a conspicuous feature of the brick-built Victorian estate barns of Cheshire.

To obtain additional internal volume and a satisfactory relationship between new floor levels and existing or modified window openings, the original ground floor, which consisted of two panels of suspended timber construction under the areas formerly accommodating pews, separated and flanked by strips of tiled floor on a solid base where the gangways ran, was removed to give a further 400mm (16in) of height.

Apart from the deepening and modification of the existing central window openings of each main gable to create garden access doors, the only other alterations to the external appearance were modifications to the existing very high classroom windows of the east and south elevations to reconcile them with the newly inserted upper floor and gallery.

Arsenal's breaks were few but always threatening and Oldham, after a first flurry, found openings increasingly elusive.

Downriver, two insignificant openings on the north bank admit to half a mile of underground passages: these are subject to flooding and should not be entered by other than experienced cavers.

Most were still bewildered by the way Northampton opened out the game to create openings for surprise attacks, and after a 4–1 win at Swindon, the Railwaymen's international winger Fleming told Chapman: ‘You have something more than a team: you have a machine.’

In general its powers included giving information, advice, and assistance to adolescents and their parents on choice of employment and related matters; filtering available young workers into openings on the basis of a detailed knowledge of each applicant and each vacancy; acting as a centre for enquiries from other youth agencies, such as clubs, Scouts and apprenticeship committees; and organizing propaganda for the creation of ‘responsible’ opinion among parents, juveniles, employers, and the public as to the ‘evil’ effects of the disorganized methods of recruitment into the youth labour-market.

In addition, the gill openings on either side of the head have fused together to form a single opening across the throat.

They are classified according to the number of openings in the skull.

However, you must realise that you'll have less stop and control; play for the openings between greenside bunkers, and hit for the fat part of the green.

They are the openings to the hair follicles.

Slight irritation can swell the skin and so make the pore openings look less obvious temporarily.

Openings covered with wire netting revealed a shadowy abyss.

Now we have two openings for economist/statisticians to join a small dedicated team.
These opportunities provide excellent career openings into the pharmaceutical industry and extensive training will be given on all aspects of GCP.

So far London had taken Peter over thirteen years, and all he had to show for it was six box files bulging with notes, newspaper cuttings and botched openings.

This is undoubtedly a specialization which developed from the condition where there are many separate branchial openings as seen, for instance, in lampreys, anaspids, cephalaspids, galeaspids and thelodonts as well as in cephalochordates (one likely sister group of craniates).

The southern colonies, in the islands or on the American mainland, offered tobacco and other products that could be exchanged for English exports or help the London re-export trade, but the agricultural products of New England were similar enough to those of England to mean that there were not many openings for trade, and this meant that the differences caused by religion were not healed by close commercial relations.

A career in congress had now become more meaningful with openings for committee or sub-committee chairmanships widespread.

So instead they have two openings on the upper surface of the head that take in water and lead it straight to the gills.

He knew it had been a failure with a contemporary audience, however, and he looked very sallow and melancholy a few days after its openings.

Changes in company policy, new products and services, financial results, staff appointments, sponsorship news, factory openings — in fact almost any "happening" or change within your company or organisation will probably merit a release to at least a few papers or radio stations.

The acquisition of Templar estates and of alien priories likewise enlarged the openings for royal clerks.

Keeping wives in work will therefore maximize the chances of their husbands hearing about possible job openings.

And the authorities build more prisons, like the new Twin Towers Correctional Facility, huge windowless towers of forbidding grey concrete with openings like arrow slits.

Moreover, some of the best qualified people in South Africa, Australia and elsewhere have sought openings for training in Europe or America because of lack of opportunities or resources at home.

Its ancient architect had cut large openings in the outer walls to allow light to filter through, but the planet's night, moonless and starless, offered no illumination.

Creating openings that are biologically no less important than those of the Arctic (Figures 5.6, 5.7).

‘It is tiny, only about two inches, and very narrow, and it parasitises larger fish by entering through their gill openings, or through their cloacas.

SHOP OPENINGS COULD BE TRAUMATIC OCCASIONS BUT LAURA ALWAYS PLAYED DOWN HER OWN ROLE AND MADE SURE THE PRESS KNEW HOW MUCH HER HUSBAND HAD CONTRIBUTED TO THE BUSINESS.
If her dedication to the Salvation Army had faltered there would have been an abundance of other openings.

The coarsest sieve required is placed at the top of a nest of sieves in which the screen openings become progressively smaller downwards.

Students continued to experience severe difficulties in finding practical training opportunities in the UK and increasingly looked abroad for openings.

You could consider making internal windows or openings in a dividing wall to get more light and airiness.

Inset downlights into the top of the openings to light anything that you might care to place in these openings — a plant perhaps, flowers, an interesting object — and you will instantly dramatize the space.

In Antwerp, the castle in the port area, called the Steen, dates from the tenth century onwards and still has Romanesque doorway and window openings inside (340), while in Ghent the Gravensteen Castle, which belonged to the Counts of Flanders, has interesting remains.

But it is still basically Romanesque, with its four terminal towers, polygonal ends, lateral entrance and round-headed window and doorway openings.

There are openings for geophysicists in oil and mineral exploration companies, geological engineering companies, in the various geophysical units within the British Geological Survey and in university teaching and research.

Many chambers have characteristic semi-circular headed windows and either semi-circular or square headed door openings with sloping sides (78 and 81).

Below the arches are fat, circular columns instead of the usual piers, and there are openings between these and the apses.

The walls are thick, pierced by splayed window and door openings.

In Priene some houses survive in part from the fourth to the second century B.C., in Delos and Pompeii the structures date mainly from the second century B.C. Houses were inward-looking, few window and door openings breaking the blank exterior walls.

With the distal four openings spaced 1 cm apart at 90 degrees, lower oesophageal sphincter pressure was recorded once by station pull through (0.5 cm increments/30 seconds) and twice by rapid (1 cm/1 second) pull through.

I always wanted to have gallery openings on the same day but Annely Juda didn't.

She thought we had the riff raff at our openings but she attracted just a much riff raff.

For example, if I normally doff my cap only to my superiors, but on an occasion doff my cap to an equal, then I can effectively communicate an ironic regard, with either a joking or a hostile intent (the non-linguistic example is intended to draw attention to the great generality of the phenomenon; for a study of a particular linguistic practice and the jokes thus made available, see the study of the openings of telephone calls by Schegloff (1979a)).

With the camping, yes, where do we go, who else is involved, again the openings for referrals.
K1G 2859 He says they need to fit the man to the parish and at the moment they're are just no suitable openings.

121. As a result, the UK’s environmental sector has grown from virtually nothing 30 years ago into an employer of more than 170,000 people, with an annual turnover of £16 billion-plus. [2515-002 (2005) : 52-53]

122. The skills shortage affects both public and private-sector employers, but environmental consultancies are generally reckoned to be hardest hit. [2515-002 (2005) : 52-53]

123. It should give the student excellent training and the employer the chance to find out what they can do. [2515-002 (2005) : 52-53]

124. Another factor is the attitude of employers towards degrees that provide a broad but relatively shallow education. [2515-002 (2005) : 52-53]

125. “Employers like candidates with a good grounding in the basic sciences or in engineering”, says Seeley. [2515-002 (2005) : 52-53]

126. However, employers will have to cast a wider net if they want to fill their vacancies. [2515-002 (2005) : 52-53]

127. So it is up to the employers in the field to make their jobs much more attractive, “argues Reeves. [2515-002 (2005) : 52-53]

128. Lester Lockyer of Dorset-based recruitment company Allen & York, which specialises in jobs for environmental scientists, believes that both employers and job-hunters have to be flexible. [2515-002 (2005) : 52-53]

129. Equally, employers must maximise the career opportunities and salaries of their junior employees, so graduates are persuaded to pursue the environmental science career they are trained in rather than drift to other fields with stronger incentives like teaching or computing. [2515-002 (2005) : 52-53]

130. By establishing a clear career path for graduates, employers will soon gain the experienced professionals it needs further down the line. [2515-002 (2005) : 52-53]

131. In the meantime, employers must accept that it is not always possible to find the perfect candidate. [2515-002 (2005) : 52-53]

132. “Employers will have to cast a wider net if they want to fill vacancies” [2515-002 (2005) : 52-53]

133. Our modular courses are kept relevant by industrial panels, so you can be sure that your Cranfield Masters course will meet the needs of environmental sector employers. [2515-006 (2005) : 56]

22. Sanofi Pasteur MSD is a European company dedicated to supplying the most comprehensive range of vaccines to meet the health needs of all the population. With solid foundations, our future success can only be with the continued support of our employees. [2567-031 (2006) : 64]

23. The pension scheme is analogous to the Civil Service scheme, with a nominal contribution from employees. [2567-032 (2006) : 64]

24. Abbott is one of the world's largest and most successful companies with a presence in 130 countries, employing in excess of 60,000 employees worldwide. [2572-036 (2006) : 75]

25. Excellent employee benefits are also available. [2572-046 (2006) : 80]

26. Merck Sharp & Dohme Limited (MSD) is a wholly owned subsidiary of Merck & Co., Inc, one of the world's leading pharmaceutical manufacturers with a global presence and over 60,000 employees worldwide. The Cramlington plant in the North East of England is looking to recruit Laboratory Analysts for its European Stability Unit. [2572-053 (2006) : 82]

27. Our employees are the driving force behind instantly recognisable brands such as Finish, Dettol, Vanish, Harpic, Clearasil, Nurofen & Strepsils. [2572-057 (2006) : 83]

28. The post-holder will be resident in the Isle of Man, but will be an employee of the University of Wales, Bangor. [2572-067 (2006) : 89]

29. Existing employees with relevant industrial work experience may also be considered. [2572-086 (2006) : 97]

30. See how, they grow: company size over time Number of employees Number of research personnel [2576-003 (2006) : 58-61]

31. GlaxoSmithKline, for example, limits the number of employees in some of its labs to foster a collaborative and autonomous culture. [2576-003 (2006) : 58-61]

32. Lonza, a chemical and biotechnology company driven by the life sciences, generated sales of CHF 2.52 billion in 2005. Headquartered in Switzerland, Lonza operates 23 production and R&D sites around the world. Its 6400 employees are passionately committed to delivering sustainable value to their customers. [2576-009 (2006) : 64]

33. With over 1,600 employees and state-of-the-art facilities, Charles River Laboratories' scientific excellence and innovation is renowned within the drug development industry. [2576-015 (2006) : 66]

34. Lonza, a chemical and biotechnology company driven by the life sciences, generated sales of CHF 2.52 billion in 2005. Headquartered in Switzerland, Lonza operates 23 production and R&D sites around the world. Its 6400 employees are passionately committed to delivering sustainable value to their customers. [2576-035 (2006) : 74]

35. With EUR 4 billion revenue in sales and 4,500 employees, Borealis has more than 40 years of experience as a reliable supplier of polyethylene (PE) and polypropylene (PP) products. [2580-006 (2006) : 56]

36. BPB is the world leading manufacturer of gypsum-based products, and a member of the Saint-Gobain group. Saint-Gobain is the world's largest building materials company, with 200,000 employees worldwide and annual sales of €35 billion. Present in 52 countries, Saint-Gobain designs and manufactures a wide range of products including glass, insulation, plasterboard and high performance
plastics, as well as distributing building materials through over 3300 outlets across Europe. In the UK alone, Saint-Gobain employs 20,000 people in over one thousand locations, with annual sales in excess of £3.3 billion. [2580-026 (2006) : 63]

37. Starting salary within the range £23,022 - £26,541 per annum (pay award pending) with excellent employee benefits. [2580-027 (2006) : 63]

38. In addition to a competitive salary, Arch offers an excellent benefits package and a genuine commitment to growing and developing the careers of its employees. [2580-032 (2006) : 64]

39. With a turnover of over $1 billion, 3000 employees and market leader positions in many segments, Arch Chemicals is one of the world’s most successful speciality chemicals companies, renowned for its innovative approach to R&D and for the quality of its products. [2580-032 (2006) : 64]

40. The company operates on a team basis and all employees are given every encouragement to participate in the management and future of the company. [2580-045 (2006) : 68]

41. This is a collaborative project with Dr Neil Millar's laboratory at University College London, and although an employee of Rothamsted Research, the post-holder will be expected to conduct experiments at both sites. [2580-048 (2006) : 69]

42. We may not have big brands yet, but when it comes to generics, no-one does it bigger or better. Teva is a truly global pharmaceutical business with a presence in the field of generics, respiratory and innovative medicines. Teva has operations in 60 countries and has approximately 25,000 employees worldwide. Over 100 years we've built a market leading profile within the healthcare industry based on innovation, quality and professionalism. Our continued growth in the UK has now created a number of exciting new opportunities. [2580-057 (2006) : 73]

2009

1. With a strong and diverse R&D pipeline and an impressive portfolio of marketed products, the organisation has approximately 3,000 employees across the US, UK and the Netherlands. [2689-021 (2009) : 54]

2. Existing employees with relevant industrial work experience may also be considered. [2689-041 (2009) : 62]

3. Existing employees with relevant industrial work experience may also be considered. [2689-047 (2009) : 63]

4. Syngenta is one of the world's leading companies with 22,000 employees in over 90 countries dedicated to one purpose: bringing plant potential to life. We contribute to addressing some of the planet's most critical issues such as the rising demand for food from a growing population. [2694-003 (2009) : 52]

5. Syngenta employees have a major impact on the health and well-being of communities all around the world. They work in a focused, highly collaborative culture and benefit from the training, development and inspirational colleagues that you'd expect to find in a fast growing, international company. There's never been a better time to join Syngenta. [2694-003 (2009) : 52]

6. Syngenta is one of the world's leading companies with 22,000 employees in over 90 countries dedicated to one purpose: bringing plant potential to life. We contribute to addressing some of the planet's most critical issues such as the rising demand for food from a growing population. [2694-018 (2009) : 59]
7. Syngenta employees have a major impact on the health and well-being of communities all around the world. They work in a focused, highly collaborative culture and benefit from the training, development and inspirational colleagues that you'd expect to find in a fast growing, international company. There's never been a better time to join Syngenta. [2694-018 (2009) : 59]

8. And successful patents can mean bonuses for employees through a share in the profits. [2698-004 (2009) : 48-49]

9. As this opportunity is funded through the EU Framework 7 project, this is a Limited Term position of 3 years duration. Starting salary within the range £26,088 - £28,986 per annum with excellent employee benefits. [2698-013 (2009) : 54]

10. Syngenta is one of the world's leading companies with 24,000 employees in over 90 countries dedicated to one purpose: bringing plant potential to life. We contribute to addressing some of the planet's most critical issues such as the rising demand for food from a growing population. [2698-025 (2009) : 59]

11. Syngenta employees have a major impact on the health and wellbeing of communities all around the world. They work in a focused, highly collaborative culture and benefit from the training, development and inspirational colleagues that you'd expect to find in a fast growing, international company. There's never been a better time to join Syngenta. [2698-025 (2009) : 59]

12. Experience in managing small teams and excellent interpersonal skills with an ability to interact with senior management and employees at all levels are essential. [2698-030 (2009) : 61]

13. The University of Cambridge has a responsibility to ensure that all employees are eligible to live and work in the U.K. [2698-044 (2009) : 67]

14. The University of Cambridge has a responsibility to ensure that all employees are eligible to live and work in the U.K. [2698-050 (2009) : 68]

15. Flat hierarchical structures and streamlined decision-making channels open up outstanding development opportunities for motivated and successful employees. [2702-010 (2009) : 50]

16. Flat hierarchical structures and streamlined decision-making channels open up outstanding development opportunities for motivated and successful employees. [2702-011 (2009) : 51]

17. As well as developing your career in a fast growing customer focussed environment we offer market leading employee benefits including competitive salaries, private healthcare and an attractive pension scheme. [2702-017 (2009) : 53]

18. The university has around 38,000 students and 5,300 employees. [2706-034 (2009) : 60]

19. DRA presently has 14 employees and in 2008 administered over 500 grants. [2706-039 (2009) : 62]

20. Starting salary within the range £26,088 - £28,986 per annum with excellent employee benefits. [2711-020 (2009) : 57]

21. Our state-of-the-art Cambridge site (formerly Cambridge Antibody Technology) is home to around 400 employees, and serves the company's European hub for research and development. [2715-007 (2009) : 51]

22. With more than 30,000 employees around the globe, we are the world's largest provider of analytical instruments, equipment, reagents and consumables, software and services for research, analysis discovery and diagnostics. [2715-011 (2009) : 55]
23. Benefits include 25 days holiday per annum, training and development opportunities, pension and Thermo Fisher employee recognition awards. [2715-011 (2009) : 55]

24. As global demand for food and fuel continues to rise, we are dedicated to our purpose: bringing plant potential to life. Syngenta is one of the world's leading companies with more than 24,000 employees in over 90 countries. [2715-024 (2009) : 59]

25. As global demand for food and fuel continues to rise, we are dedicated to our purpose: Bringing plant potential to life. Syngenta is one of the world's leading companies with more than 24,000 employees in over 90 countries. [2719-007 (2009) : 49]

26. Innospec is an international specialty chemicals company with almost 1,000 employees in 23 countries and a turnover of $600 million. [2724-010 (2009) : 54]

27. As global demand for food and fuel continues to rise, we are dedicated to our purpose: Bringing plant potential to life. Syngenta is one of the world's leading companies with more than 24,000 employees in over 90 countries. [2724-015 (2009) : 57]

28. MedImmune's state-of-the-art Cambridge site (formerly Cambridge Antibody Technology) is home to around 390 employees, and serves the company's European hub for research and development. [2724-024 (2009) : 61]

29. Covance is one of the world's largest and most comprehensive drug development services companies with revenues in excess of $1.5 billion, global operations in over 22 countries, and over 9,500 employees working from 33 offices. [2733-014 (2009) : 65]

30. The maximum period of maternity leave available to our employees is 12 months. [2733-024 (2009) : 69]

31. Share our mission to enable customers to make the world healthier, cleaner and safer. With more than 30,000 employees around the globe, we are the world's largest provider of analytical instruments, equipment, reagents and consumables, software and services for research, analysis discovery and diagnostics. [2737-013 (2009) : 57]

32. Benefits include 25 days holiday, training and development opportunities, pension and ThermoFisher employee recognition awards. [2737-013 (2009) : 57]

33. Covance is one of the world's largest and most comprehensive drug development services companies with revenues in excess of $1.5 billion, global operations in over 22 countries, and over 9,500 employees working from 33 offices. [2737-019 (2009) : 62]

34. As global demand for food and fuel continues to rise, we are dedicated to our purpose: Bringing plant potential to life. Syngenta is one of the world's leading companies with more than 24,000 employees in over 90 countries. [2737-020 (2009) : 63]
Annexe 6-4 Occurrences de APPOINTEE dans CAEMS

1971

1. **Appointee** will be expected to teach mainly analytical chemistry (but initially some teaching in other fields of chemistry, preferably organic chemistry will be necessary) and to undertake research in a field of interest to the Department. [733-036 (1971) : 42]

2. **Appointee** will be expected to be responsible for teaching mainly physical/analytical chemistry and to undertake research in a field of interest of the Department. [733-036 (1971) : 42]

3. The **appointee** will be expected to participate in the Department’s teaching programme, and to engage in research of his own choosing. [741-005 (1971) : 520]

4. The **appointee** will be responsible for the direction of the research activities of the Laboratory, under the general direction of the Chief of the Division of Food Research. [741-008 (1971) : 520]

5. The **appointee** will be required to maintain close contact with the Australian dairy industry and to encourage co-operation with general food science studies in other parts of the Division. [741-008 (1971) : 520]

6. The salary of the **appointee** will be the subject of negotiation, depending on the experience and achievements of the successful applicant, but will be not less than $A15,370 p.a. [741-008 (1971) : 520]

7. Special facilities would be made available to such an **appointee**. [745-032 (1971) : 60]

8. Salary range £1,491 - £2,040 p.a. for post-doctoral **appointee** and in accordance with S.R.C. Studentship rates for other graduates. [745-057 (1971) : 62]

9. The **appointee** will be expected to assume duty by January 1972 and to develop their teaching and research activities within the existing framework of the department, on which further information should be obtained from the Head, Professor W.R. Stern. [750-008 (1971) : 354]

10. Benefits include superannuation similar to FSSU, fares to Perth for **appointee** and dependent families, removal allowance, study leave, subsidised temporary accommodation and housing loan scheme. [750-008 (1971) : 354]

11. Secondary education is available, and housing will be provided at a nominal rental in the case of married male **appointee**. [754-061 (1971) : 603]

12. The **appointee** will also be required to study the contribution of rotation crops to tobacco nutrition. [754-061 (1971) : 603]

13. The **appointee** will investigate the effects of iron deficiency upon cardiac functions and energy exchange. [754-063 (1971) : 603]

14. In addition to salary, a reasonable rental subsidy on furnished accommodation may be paid to a married male **appointee**. [754-081 (1971) : Ciii]

15. Superannuation is on the FSSU pattern with supplementary benefits. Reasonable travel expenses are paid and assistance with housing is provided for **appointee** from outside Canberra. [767-026 (1971) : 544]

16. Reasonable family travel expenses are paid and assistance with housing is provided for an **appointee** from outside Canberra. [772-014 (1971) : 53]
17. Assistance with housing is provided for an appointee from outside Canberra. [772-033 (1971) : 55]

18. An appointee may be offered any one of the following basic salaries per mensem: [772-050 (1971) : 58]

19. The appointee will be expected to undertake research on the mechanisms of ion uptake by plants, in association with Dr. J. F. Loneragan. [774-004 (1971) : 188]

20. Travelling expenses for appointee and family, removal allowance, repatriation after three years’ appointment if desired; temporary housing for an initial period. [774-010 (1971) : 188]

21. Reasonable family travel expenses are paid and assistance with housing is provided for an appointee outside Canberra. [774-037 (1971) : 191]

22. Travelling expenses for appointee and family; removal allowance, repatriation after three years’ appointment if desired; temporary housing for an initial period. Study leave entitlement accumulates at the rate of one month’s leave for each six months’ service up to six years, with provision for financial assistance. [774-041 (1971) : 191]

1995

1. The appointee will have a higher degree in an appropriate biological discipline. [1959-072 (1995) : 62]

2. Experience in tissue culture, gene transfection and molecular biology will be an advantage. Training in embryonic stem cell technology will be available in Edinburgh if required and the appointee should be prepared to spend some time there if required. [1959-072 (1995) : 62]

3. The appointee will be expected to conduct research in areas of their choice. [1959-077 (1995) : 64]

4. The appointee will join a small team undertaking a programme of high temperature & pressure experimental research related to an environmental problem. [1959-080 (1995) : 64]

5. The appointee may also be required to undertake a small amount of teaching within the Department's undergraduate degree courses. [1959-080 (1995) : 64]

6. The appointee will be assisted by a fulltime technician also funded by the grant. [1959-081 (1995) : 64]

7. It is recognised that substantial resources, both financial and human, may be required by the appointee. [1963-002 (1995) : 50]

8. The appointee will participate in a project aiming to physically map and clone a gene responsible for x-linked cleft palate. Knowledge of molecular biology would be an advantage. [1963-053 (1995) : 62]

9. The appointee will also be required to act as chaperone for female patients. [1963-060 (1995) : 64]

10. The appointee to this newly established post will provide advice and assistance to Research Centre staff including literature searches and data management in research. [1963-080 (1995) : 68]
11. It is anticipated that the **appointee** will have the opportunity to spend three months at the Environmental Safety Laboratory at Unilever Research near Bedford. [1967-009 (1995) : 65]

12. The **appointees** will join strong research groups in these areas. [1967-051 (1995) : 77]

13. The **appointee** will be required to contribute to undergraduate and postgraduate courses in the Faculties of Agriculture and Science and to teach the fundamental principles and processes of nutrient uptake, utilisation and response as well as the application of these principles within agricultural, horticultural and natural ecosystems. [1971-047 (1995) : 70]

14. A Ph.D. or substantial research experience in some aspects of the mineral nutrition of agricultural and/or horticultural plants is required and the **appointee** will be expected to develop an active research programme and supervise postgraduate students. [1971-047 (1995) : 70]

15. Benefits include superannuation, fares to Perth (if applicable) for **appointee** and dependent family, removal allowance (if applicable), study leave and long service leave. [1971-047 (1995) : 70]

16. The **appointee** will analyse the patterns of over-expression of peroxidase at tissue and cellular levels, and assess their impact on developmental and stress responses thought to be influenced by peroxidases. [1971-081 (1995) : 79]

17. The **appointee** will be committed to excellence in teaching and should have an outstanding and continuing research record in one or more areas related to Computer Engineering and/or Information Systems Engineering. [1976-005 (1995) : 60]

18. The **appointee** will also assist with the supervision of LSO, Research Assistant and secretarial staff, process incoming invoices and monitor departmental budgets. [1976-049 (1995) : 74]

19. The **appointee** will be expected to develop and expand his/her group into a substantial commercially viable unit and will also represent Inveresk Research at international scientific meetings. [1976-074 (1995) : 81]

20. The successful **appointee** will have experience with land evaluation and environmental and social impact assessment techniques for regional resource planning. [1976-087 (1995) : 84]

21. The **appointee** will join a team investigating arbuscular mycorrhizal fungi and will be expected to lead the application of molecular biology techniques to these studies. [1976-089 (1995) : 84]

22. All studies are conducted in accordance with the principles of GLP (full accreditation achieved in January 1995) and the **appointee** will also assume the role of Senior Study Director. [1976-096 (1995) : 86]

23. He/she will be able to collaborate with equally dedicated researchers in a number of associated fields (among others: noble-gas and stable isotope geochemistry, physical hydrogeology, those of the two new **appointees**). [1980-039 (1995) : 66]

24. The **appointee** will assume day-to-day responsibility for the School's European teaching programme. [1980-046 (1995) : 67]

25. The **appointees** will establish a strong research programme and teach at both undergraduate and postgraduate levels. [1980-046 (1995) : 67]
26. The appointee will work as part of a team under the direction of Professor D. A. Ledward and Dr. R. W. A. Park. [1980-089 (1995) : 77]

27. Appointees will be expected to register for a MPhil/Ph.D. degree. [1980-114 (1995) : 82]

28. Depending upon the length of appointment, other benefits generally include provident fund benefits or an end-of-contract gratuity, leave and medical benefits, passages for appointee and family, settling-in allowance, subsidised accommodation, children's education and an allowance for transportation of personal effects to Singapore. [1984-003 (1995) : 51]

29. The appointee will be expected to assist in all aspects of the day to day work of a large and modern research/coagulation laboratory. [1984-042 (1995) : 65]

30. This is a responsible position requiring the appointee to combine practical research with the administrative business of the laboratory. [1984-042 (1995) : 65]

31. The appointee will have duties in teaching, administration and research and will be expected to become expert in the field of human performance, thus opening up the possibility for consultancy work in this rapidly developing area. [1984-052 (1995) : 68]

32. There is much scope for developing into other areas and the appointee will be expected to contribute fully to the expansion of the Institute's teaching portfolio. [1984-052 (1995) : 68]

33. The appointee will make significant contributions to the teaching of Materials generally at both undergraduate and postgraduate levels. [1984-056 (1995) : 69]

34. The appointee will join a small research team under the direction of Dr Paul Hiscott (Senior Lecturer in Ophthalmic Pathology) investigating the interaction of ocular cells with their extracellular matrix. [1984-063 (1995) : 70]

35. LOCATION: South Perth, however appointee may be required to serve for extended periods in country/regional locations. [1989-042 (1995) : 69]

36. SALARY PACKAGE: A salary package in the range of A$51,622 - A$73,937 per annum including superannuation, annual leave loading and a salary component of A$45,543 - A$65,467 per annum will be negotiated dependent on the appointee's qualifications and experience. [1989-042 (1995) : 69]

37. Appointee is entitled to four weeks annual leave. [1989-042 (1995) : 69]

38. The appointee will be active in expanding and strengthening research activities within the Genetic Resources Division, in expanding the scope of collaboration with NARS, and in representing the Institute within the CGIAR's system-wide Genetic Resources Program and other regional and global fora for genetic resources and biodiversity issues. [1989-060 (1995) : 73]

39. Ideally, the appointee will be a specialist in nutrition, health science or psychology but will have an appreciation of the wider social and ethical issues which influence food choice and intake. [1989-095 (1995) : 82]

40. The appointee must be an active researcher with a record of high quality published output and proven success in the attraction of external funding. [1989-095 (1995) : 82]

41. The appointee will, in carrying out the functions of chief research director, be responsible for the selection and evaluation of major scientific projects undertaken by ANSTO; [1993-008 (1995) : 54]
42. As the Deputy to the Chief Executive, the appointee must have achieved the scientific status to enable him / her to exert a major influence on the success of the scientific work carried out at Australia's national nuclear science organisation. [1993-008 (1995) : 54]

43. The appointee will be responsible to the Junior Scientist for implementation of a major program on the artificial propagation and mass-rearing of tropical sea cucumbers. [1993-064 (1995) : 70]

44. The appointee will be supported by a graduate dedicated to the production of live algae, and by several other technical staff. [1993-064 (1995) : 70]

45. The appointee must also have extensive, first-hand experience in rearing of marine larvae, and demonstrated ability in writing scientific papers and reports, designing experiments, analyzing data and maintaining data bases. [1993-064 (1995) : 70]

46. The appointee will interact with Conveners of the member countries to ensure that research results are effectively synthesised and reported, will review the research, report to the Steering Committee and assist them in their work. [1993-069 (1995) : 71]

47. The appointee will identify and clone further genes encoding proteins that disrupt life processes of nematode parasites. [1993-072 (1995) : 72]

48. The appointee will investigate, by molecular and biochemical approaches, (a) the role of the enzyme in the infection process of plants: potential anti-fungal targets may be identified, (b) the use of the enzyme (or engineered variants) for novel biomass modification. [1993-072 (1995) : 72]

49. The appointee will assist in carrying out research on the interaction between agriculture and game/wildlife conservation. [1993-079 (1995) : 73]

50. The appointee will be active in expanding and strengthening research activities within the Genetic Resources Division, in expanding the scope of collaboration with NARS, and in representing the Institute within the CGIAR's system-wide Genetic Resources Program and other regional and global fora for genetic resources and biodiversity issues. [1993-084 (1995) : 74]

51. The appointee is expected to take up the post in October 1996. [1993-087 (1995) : 76]

52. The appointee should have a DM or DVM degree and several years of postgraduate education and experience within pathology. [1998-015 (1995) : 77]

53. The duties of the post will include teaching of human genetics to medical students and the appointee will supervise the molecular genetic diagnostic service. [1998-030 (1995) : 82]

54. The appointee will be expected to play a full role in the development of the research programme. [1998-068 (1995) : 92]

55. The appointee will have a doctorate degree and appropriate research experience. [1998-102 (1995) : 103]

56. Research in wood chemistry will be carried out in association with Dr Richard Ede, another joint University-NZFRI appointee, but independent research in other areas of organic chemistry will be possible. [1998-102 (1995) : 103]
The appointee will work in the Civil Engineering Materials Unit on a project entitled 'The Influence of Pozzolans on the Composition and Structure of C-S-H in Hardened Cement Pastes'. [2002-013 (1995) : 58]

The appointees will work in the newly-formed Computational PDE's Software Unit which will undertake industrial and academic research over the next five years. [2002-029 (1995) : 64]

The appointee will be responsible for the day-to-day running of the Unit which undertakes a variety of contract research in the development and application of software for the solution of partial differential equations. [2002-029 (1995) : 64]

The appointee will be expected to work on a variety of industrial research contracts such as those with Shell Research and EPSRC requiring Computational methods for PDE's. [2002-029 (1995) : 64]

As senior microbiologist on site, the appointee will act as a local consultant, will maintain contacts with European and US counterparts, and will be involved in issues of international company harmonisation. [2002-040 (1995) : 67]

Reporting to the Chemistry Administrator, the appointee will interact closely with academic staff and students, contributing to time tabling, examinations, implementation of health and safety practises, minuting of meetings and database development. [2002-063 (1995) : 74]

The appointee will, with the Head of the MRU, lead a research programme into novel diagnostic and identification methods, molecular epidemiology, drug susceptibility testing and other topics relevant to the study of mycobacteria. [2006-005 (1995) : 60]

It is hoped that the Academic status of the appointee would merit an Honorary Lectureship with King's College School of Medicine and Dentistry. [2006-005 (1995) : 60]

The appointee will contribute to existing projects, design and implement new experiments and communicate results through written and oral reports. [2006-038 (1995) : 71]

The appointee will be on secondment to Professor C. Pillinger at the Open University. [2006-056 (1995) : 76]

2005

1. The appointee will be expected to develop an internationally competitive research profile and contribute to the teaching and training of undergraduates and postgraduates in both the disciplines of Chemistry and Environmental Science. [2481-071 (2005) : 75]

2. The appointee will have a PhD in a Physical / Environmental Chemistry area and a strong background in basic and applied research. [2481-071 (2005) : 75]

3. Appointees will join a community of some 500 academics, research staff and graduate students dedicated to raising further Scotland’s international standing as a leading centre for physics research. [2485-017 (2005) : 61]

4. The appointee will join an established horticultural plant pathology team. [2485-042 (2005) : 72]

5. The appointee will be part of an interdisciplinary team, and will have an excellent opportunity to broaden his/her scientific horizons. [2485-100 (2005) : 90]
6. The appointee will be required to engage in research which will contribute to the Department’s research reputation; [2498-049 (2005) : 68]

7. The appointee to the Chair will be an outstanding scholar who will undertake world-class research and provide research leadership, working closely with the Lecturers. [2498-066 (2005) : 73]

8. A suitable appointee may be allowed to work towards a higher degree. [2502-058 (2005) : 74]

9. The appointee will undertake a study investigating how malnutrition may affect lymphocyte proliferation and function. [2502-058 (2005) : 74]

10. The appointee will be a member of the Institute of Cancer and the Cancer Research UK Centre at Barts and the London’s School of Medicine and Dentistry, and will be based at St Bartholomew’s Hospital, West Smithfield in the City of London. [2506-062 (2005) : 75]

11. The appointee will be responsible for organising and assisting with all the in vivo biodistribution studies undertaken by the group. [2506-062 (2005) : 75]

12. The appointees will join a progressive research team in beef production and will initiate and undertake research and prepare scientific and technology transfer outputs on all aspects of beef production to include: applied nutrition, all aspects of economically sustainable beef production systems (including suckler cow systems and cow fertility), genotype comparisons, grassland management, forage production and utilisation, over wintering accommodation of beef cattle and factors affecting meat eating quality. [2511-013 (2005) : 56]

13. This is an exciting development and the appointee will have a key role in coordinating and facilitating the clinical and basic research team as well as responsibility for research governance issues. [2515-065 (2005) : 77]

14. The appointee will work closely with the Director of the Institute and the Research Governance Lead. [2515-065 (2005) : 77]

15. If the appointee is a man he will be elected a Fellow of Wadham; [2519-076 (2005) : 78]

16. The appointee of the Chair will advise on the appointment of the Lecturer. It is hoped that the two appointments will be in place by July 2006. [2524-055 (2005) : 72]

17. The appointee will be required to engage in research which will contribute to the Department's reputation; [2524-063 (2005) : 74]

18. The appointee will be seconded for a period of five years, in the first instance, to drive the continued development of the NCSR. [2528-009 (2005) : 63]

2006

1. The appointee will be expected to be part of the VLA's Risk Analysis team based at Weybridge, but will be based at Leahurst where they will develop an externally-funded research programme. [2533-040 (2006) : 58]

2. Appointees will be expected to contribute to teaching at both undergraduate and postgraduate level in the Physics Department. [2537-075 (2006) : 84]

3. The appointee will join a team of microbial ecologists, molecular microbiologists, soil scientists and spatial ecologists. [2550-015 (2006) : 64]
4. The **appointee** will continue developing their own high quality research, at the same time as shaping the research direction of an interdisciplinary team of soil physicists, biologists and geochemists, as well as spatial statistics and GIS experts. [2550-015 (2006) : 64]

5. The **appointee** will be responsible for the continuous management of all aspects of the analytical studies performed by out contractors and consultants. [2550-020 (2006) : 66]

6. The **appointee** will be expected to manage the day to day operation of the Eden Centre for Agronomy, Research and Knowledge and will be an experienced agronomist or applied plant scientist with experience of a wide range of plants for industry together with enthusiasm for product research and knowledge based commercialisation. [2554-012 (2006) : 63]

7. The **appointee** should have qualifications within the following areas: [2554-064 (2006) : 84]

8. The **appointee** will be given the opportunity to lead a team of academic researchers, and work closely with Clinicians, Radiation Physicists, and Biomedical Scientists. [2554-065 (2006) : 84]

9. It is hoped that the **appointee** will register for a part-time research degree on a topic related to the project's work, and pursue this in their other time. [2554-077 (2006) : 87]

10. The **appointee** should have qualifications within the following areas: [2558-072 (2006) : 89]

11. The **appointee** will be required to undertake a broad range of tasks, including plasmid construction, transcript analysis, reverse genetics through TILLING in wheat and light microscopy including laser capture microdissection. [2563-029 (2006) : 60]

12. The first **appointee** will work with our state registered molecular geneticist, where they will be expected to develop extensive specialist skills, eventually operating with minimal or no supervision. [2563-047 (2006) : 64]

13. A second **appointee** will work with our state registered microbiologist and virologist. Daily duties will include nucleic acid extraction, PCR, documentation and reporting of assay results. [2563-047 (2006) : 64]

14. All new **appointees** will get significant start-up support including direct funding, a PhD studentship, full access to shared instrumentation and facilities and a light initial teaching load. [2563-065 (2006) : 72]

15. In addition to the core functions described above, all **appointee**s will be encouraged to pursue their own personal research interests for some agreed fraction of their time. [2572-061 (2006) : 86]

16. The **appointee** will join a team that is working to investigate the therapeutic potential of compounds directed against newly defined therapeutic targets. [2576-081 (2006) : 88]

17. The **appointee** will work primarily with remote sensing observations of stratospheric ozone, methane and water vapour, using additional sources to provide ground truth. [2580-059 (2006) : 75]

18. The **appointee** will also exploit and develop the trajectory code as a tool for analysing atmospheric observations. [2580-059 (2006) : 75]

19. The **appointee** will also be responsible for coordination of the undergraduate degree programme in Biomedical Sciences in collaboration with the School of Health Sciences and Nelson R Mandela School of Medicine. [2580-062 (2006) : 77]
20. The successful appointee will be passionate about communicating science and its promotion and popularisation in the community.

21. It is expected that links with other academic units throughout the University will be initiated and fostered, and that strong associations with the appointee's primary research area will be maintained to promote continued scholarship there as well as publications directed at science communication. [2580-064 (2006) : 77]

2009

1. Academic staff appointees will be expected to pursue their own research interests, to contribute to the teaching and administration in one or both Departments and to be active and take on an academic leadership role in the activities of the QCCSRC. [2698-011 (2009) : 53]

2. Appointees will also have the opportunity to contribute to the multidisciplinary Energy Futures Lab and the Grantham Institute for Climate Change and to work closely with scientists and engineers in Shell and Qatar Petroleum. [2698-011 (2009) : 53]

3. Overall the appointee will support the ABPI objective to sustain and enhance the UK biomedical and clinical research base through a number of activities, [2698-032 (2009) : 61]

4. It is envisaged that the appointee's research will focus on understanding microbially-mediated fluxes of carbon and mineral elements through the rhizosphere, and their consequences for microbes, soils and plants. [2698-054 (2009) : 70]

5. The project will involve microbiological, molecular, and immunological approaches in vivo and in vitro and will provide the appointee the opportunity to collaborate across the scientific groups within the Institute. [2698-068 (2009) : 75]

6. The appointees will be required to take up their positions within the respective faculties and become members of the appropriate department. [2698-069 (2009) : 75]

7. The MRC places great importance on the protection and exploitation of its intellectual property and the appointee will play a key part in ensuring MRC's aims are met.

8. The MRC places great importance on the protection and exploitation of its intellectual property and the appointee will play a key part in ensuring MRC's aims are met. [2711-028 (2009) : 60]

9. Active promotion of MRC's intellectual property policies will be an important aspect of this role, which the appointee will undertake alongside MRC Technology, MRC's IP management company. [2711-028 (2009) : 60]

10. The appointee will work with Professor Stuart Robson to build upon an international reputation for excellence in basic and applied research in the non-contact measurement technologies at scales from the micron to planet level. [2711-033 (2009) : 62]

11. The appointee will work with Professor Nick Tyler (who heads the ARG) and will be able to make use of the ARG's facilities such as the world's only multisensory pedestrian environment laboratory and its national, international and multidisciplinary connections. [2711-034 (2009) : 62]

12. The appointee will be a highly motivated individual with practical experience in Mass Spectrometry. [2724-044 (2009) : 68]

13. Upon expiry of the professorship, the appointee is ensured employment and remuneration as an associate professor. [2728-037 (2009) : 69]
Annexe 6-5
Occurrences de POST HOLDER dans CAEMS

1971
Ø

1995

1. The postholder will be responsible for developing and promoting English Nature's policies on forestry and woodland, and providing an advice service to the organisation on forestry policy issues. [1959-019 (1995) : 49]

2. The post holder will also be responsible for the Ancient Woodland Inventory and will be expected to work closely with other staff on scientific aspects of woodland conservation. [1959-019 (1995) : 49]

3. The postholder will also be required to assist with the running of the DNA synthesis core facility. [1959-041 (1995) : 55]

4. The post holder is responsible for the environmental monitoring of all pharmaceutical clean rooms, the quality control of packaging materials and clerical duties pertaining to Quality Control Documents. [1959-049 (1995) : 57]

5. The postholder will have a lively interest in public affairs, experience of managing projects and people, strong personal motivation and the ability to elicit motivation in others, awareness of customers, and the ability to think analytically and communicate easily both in writing and orally. [1959-057 (1995) : 59]

6. One of two posts at this level, the postholder will be assigned to individual projects or activities as required and, under the relevant Manager, will play a substantive and creative role in carrying through the project/activity. [1959-057 (1995) : 59]

7. The postholder will conduct research into mathematical models and decision analysis techniques to underpin improvement in decision making under the complex interactions occurring in agricultural systems. [1959-087 (1995) : 66]

8. The project will be fully integrated within the laboratory under supervision of the senior scientific staff and, once the assays and infrastructure required for the project have been established satisfactorily, the post holder will be able to rotate throughout all the service assays. [1963-018 (1995) : 54]

9. The post holder will also be required to prepare contract tender documents and progress reports; [1963-023 (1995) : 56]

10. The post holder will undertake toxicological assessment work, including the production of critical literature reviews and other reports. [1963-023 (1995) : 56]

11. The postholder will be responsible for providing administrative and academic support for up to two chemistry courses. [1963-056 (1995) : 63]

12. The objective of the work is to control and improve the thermal environment for animals in transit and the postholder will be expected to develop novel ventilation systems to meet this objective. [1963-072 (1995) : 66]

13. The work will involve measurements in animal transport systems so the postholder must be prepared to work with the full range of agricultural livestock. [1963-072 (1995) : 66]
14. The title of Reader may be available to the **holder** of this post, if suitably qualified. [1963-087 (1995) : 70]

15. The **postholder** will also assist in developing improved diagnostic techniques and in training overseas visitors. [1967-034 (1995) : 72]

16. This is a new post and the **holder** will concentrate on the core IT provision and development of a particular Unix service, namely the NOMIS (National Online Manpower Information System) service run by the University for the Department of Employment. [1967-036 (1995) : 73]

17. The **postholders** will have research facilities in the University of East Anglia and in the nearby Norwich Laboratory of the Institute of Food Research, and will interact with teams studying the molecular regulation of epithelial transport of micronutrients, and the influence of the human diet on intestinal mucosal cell proliferation. [1967-048 (1995) : 76]

18. The **postholders** will teach in the School of Biological Sciences at UEA. [1967-048 (1995) : 76]

19. This role will be based at our new office in Camberley, Surrey, and the **post holder** will be expected to live within commuting distance of this office. [1967-074 (1995) : 83]

20. Due to the nature of this work, the **post holder** will need to have high motivation, be a self starter and innovative. [1971-029 (1995) : 65]

21. The **post holder** will be responsible for developing and performing molecular techniques for the rapid diagnosis of Mycobacterial diseases including M. tuberculosis and M. avium infections. [1971-040 (1995) : 68]

23. The **postholder** will provide support for a research project investigating the effect of hormone therapies on various morphological and biochemical aspects of the endometrium. [1976-023 (1995) : 68]

24. The **postholder** must have experience in modern approaches to molecular biology, protein chemistry and immunological procedures. [1976-033 (1995) : 70]

25. In addition, the **post holder** will also be expected to participate in the nuclear medicine service. [1976-038 (1995) : 72]

26. The **postholder** is expected to advise and oversee matters related to laboratory management and the provision, operation and maintenance of equipment for immunological and molecular biology research. [1976-049 (1995) : 74]

27. The **post holder** will be required to supervise staff and liaise effectively with scientists from other disciplines. [1976-051 (1995) : 75]

28. The **holder** of this new post, who will report to the Clinical Medicine Board through the Clinical School's Director of Planning and Development, will be responsible for advising on health and safety matters and monitoring and assisting in the implementation of the individual departments' safety policies which, in turn, reflect the policies of the University. [1976-052 (1995) : 75]

29. **Postholder** will be involved in the production and use of cDNA libraries and the identification of agronomically significant genes in this economically important crop species. [1976-057 (1995) : 76]
30. The **postholder** will be expected to carry out a wide range of histological procedures on clinical and research material. [1976-076 (1995) : 81]

31. The **postholder**'s task will be to investigate the application of MRI to radiotherapy computer treatment planning in Bristol Oncology Centre. [1980-042 (1995) : 66]

32. The **post holder** will be expected to tackle the problems in such a task, with regard, for example, to registering MRI and CT images and to removing scanner-induced and patient-induced distortion on the MRI images. [1980-042 (1995) : 66]

33. The **postholder** will have a good background in medical image processing and will be familiar with UNIX. [1980-042 (1995) : 66]

34. Applications are invited for the above post, the **holder** of which will join an established research team working in a fast-moving, clinically relevant field investigating immunoglobulin gene rearrangements in multiple myeloma, in collaboration with the Royal Postgraduate Medical School. [1980-049 (1995) : 68]

35. In addition the **post-holder** will support the design and development of the IH geographically based environmental information system (WIS). [1980-082 (1995) : 76]

36. The **postholder** will be required to assist the Conservation Officer for Avon with the full range of scientific and other duties including planning related matters and Estuarine issues, needed to implement English Nature's work in the county. [1980-087 (1995) : 76]

37. The **postholder** will assist the Conservation Officer for the Levels and Moors. [1980-087 (1995) : 76]

38. The **post holder** will be expected to contribute the full range of procedures carried out in a busy diagnostic laboratory, although training may be given where necessary. [1980-107 (1995) : 81]

39. The **post holder** will be responsible for all laboratory aspects of the DNA diagnostic services including the statistical analysis of results and the issuing of reports. [1980-125 (1995) : 86]

40. The **postholder** will work in a research group investigating immune mechanisms in human renal disease. [1984-018 (1995) : 58]

41. The **postholder** will work in a research group on the identification of histone as marker of cell proliferation in human and experimental renal disease. [1984-018 (1995) : 58]

42. The **post holder** will investigate the influence of organics and bubbles on the control of underwater sound and the influence of ultrasonics on a variety of physical and chemical processes. [1984-041 (1995) : 64]

43. The **postholder** will be required to work on a range of surveillance projects: duties will include sample acquisition, preparation and analysis for trace elements using inductively coupled plasma mass spectrometry and atomic absorption spectrometry. [1984-045 (1995) : 66]

44. The **post holder** will have the opportunity to learn new skills, including the latest methods for expression and purification of recombinant forms of proteins, in this large and dynamic department. [1984-046 (1995) : 66]

45. Detailed understanding and experience of project management in engineering/astronomical instrumentation will enable the **postholder** to identify potential project problems and take effective action when appropriate. [1984-075 (1995) : 73]
46. **Postholder** will undertake research into the application of new ultraviolet and VUV lamps in microelectronics, specifically for low temperature processing of Si, SiGe, and metallic layers. [1984-082 (1995) : 74]

47. The **post holder** will be responsible for the management of the Institute's accreditation schemes for specialist laboratory-based training programmes and awards. [1984-089 (1995) : 76]

48. The **postholder** will be expected to register for a Ph.D. at Heriot Watt University. [1984-098 (1995) : 78]

49. The **postholder** will be based at North Wyke Research Station near Okehampton, Devon. [1984-100 (1995) : 78]

50. The **post holder** will have responsibility for the work of committees awarding research grants and studentships in the field of Freshwater Sciences and their subsequent administration. [1989-005 (1995) : 57]

51. The **postholder** will manage a small team and will personally conduct a MAFF-funded project on temporal relationships between changes in bird numbers and farming practices. [1989-031 (1995) : 66]

52. The successful **post holder** will have the potential to progress to Team Leader, demonstrating initiative, influence, tenacity and judgement as well as the necessary technical skills. [1989-035 (1995) : 68]

53. The **post holder** will work closely with a Senior Product Research Chemist to develop new innovative products for the Mr Muscle range. [1989-062 (1995) : 74]

54. The **postholder** will also have the opportunity to participate in an ongoing research project in spectroscopy of proteins. [1989-067 (1995) : 74]

55. The **postholder** will assist in the development and application of toxicity test and bioassay procedures for use in the biological assessment of effluents and receiving waters and sediments. [1989-069 (1995) : 75]

56. Due to the promotion of the current **holder** of this post, a vacancy has occurred for a Research Fellow in the area of Microwave Properties and Applications of High Temperature Superconductors. [1989-102 (1995) : 83]

57. The **post holder** will be involved in work to test and ensure the safety of blood products, particularly freedom from contamination by HIV or other retroviruses using antibody assays and gene amplification techniques. [1993-017 (1995) : 56]

58. The **Postholder** [1993-032 (1995) : 60]

59. The **holder** of this new post, who will report to the Clinical Medicine Board through the Clinical School's Director of Planning and Development, will be responsible for advising on health and safety matters and monitoring and assisting in the implementation of the individual departments' safety policies which, in turn, reflect the policies of the University. [1993-033 (1995) : 60]

60. The **post-holder** should have a degree in biochemistry or chemistry, plus at least five years relevant postgraduate experience. [1993-036 (1995) : 62]

61. The **post-holder** will interact with and advise researchers from a variety of backgrounds, ranging from genetics and physiology, to molecular biology and chemistry and the appropriate communication skills will be important. [1993-036 (1995) : 62]
62. The postholder will also be trained in all procedures relating to the microbiological diagnosis of diphtheria within the PHLS/WHO Streptococcus and Diphtheria Reference Unit. [1993-046 (1995) : 66]

63. Although the post-holder will be a physical scientist, the emphasis of the post will be on working with a range of disciplines such as nutrition, microscopy, mathematical modelling and biochemistry. [1993-078 (1995) : 73]

64. The nature and quantity of work is such that the post-holder may frequently be expected to work unsupervised on a day-to-day basis. [1993-082 (1995) : 74]

65. The post-holder should have an Honours Degree in Occupational Hygiene, or alternatively, a Degree or equivalent in a Science or Engineering discipline together with either a British Examining Board in Occupational Hygiene (BEBOH) or postgraduate qualification in Occupational Hygiene. [1993-082 (1995) : 74]

66. The post holder will work 50% of the time assisting in the School's Electron Microscope Laboratory and 50% with the Sussex Centre for Neuroscience undertaking Molecular Histology. [1998-017 (1995) : 78]

67. The postholder will develop independent research, working at the interface of diagnostic service provision for medical molecular genetics. [1998-030 (1995) : 82]

68. The postholder will assist with research on the molecular biology of potassium channels from human vascular tissue with Dr Brenda Leckie. [1998-030 (1995) : 82]

69. The post holder will also be active in developing policies, procedures and best practices to ensure the development of the standard and consistency of the hydrometric service across the Region. [1998-052 (1995) : 89]

70. The post holder will be involved in the use and development of soil moisture and river flow models, hydrological procedures and techniques in order to provide a hydrological service to other departments. [1998-052 (1995) : 89]

71. The post holder will be a key member of a team of Clinicians and Scientists and will oversee all technical aspects of the project. [1998-062 (1995) : 91]

72. Aberdeen Royal Hospitals Trust is a major teaching hospital and the postholder will be expected to, be involved in the scientific development / research activities of the department as well as taking part in teaching. [1998-085 (1995) : 97]

73. The post-holder is required to have 10 years relevant experience in radiation protection and allied subjects. [1998-085 (1995) : 97]

74. The postholder will have the opportunity to develop his/her specialist interest in this area and will be responsible for researching and introducing new clinical procedures and developing advanced techniques. [2006-012 (1995) : 63]

75. The postholder will have day to day management and development responsibilities for the Unit under the direction of the Professor of Orthopaedic Surgery. [2006-027 (1995) : 68]

76. The post holder could be full or part-time. [2006-091 (1995) : 86]
1. The **post holder** will play a key role in expanding the membership, initiating and drawing up policy documents, developing a comprehensive communications strategy and raising the profile of the Forum. [2481-008 (2005) : 56]

2. working closely with the Laboratory staff and the Facility’s LIMS developer, the **post-holder** will be responsible for implementing high-quality annotation against these clones. [2481-052 (2005) : 69]

3. The **holder** will be expected to develop procedures within R software environment for release to the scientific community. [2485-054 (2005) : 76]

4. In addition, the **postholder** is also expected to undertake applied techniques of plant breeding, such as harvesting, cleaning and sowing seed, cross-pollinating and self-pollinating plants and screening plants for DNA profiles. [2485-068 (2005) : 80]

5. Statistics is a key skill and the **post holder** will have the opportunity to play a crucial role in projects that often have significant impact in public affairs. [2485-075 (2005) : 82]

6. The new **postholder** will work to conduct and supervise ongoing research projects in these fields. [2485-092 (2005) : 88]

7. The **postholder** will be encouraged to initiate his/her own research line in these or related disciplines. [2485-092 (2005) : 88]

8. On satisfactory completion of the Fellowship, the **post-holder** will be offered a permanent academic position. [2485-099 (2005) : 89]

9. The **post holder** will support the development of the School’s Clinical Research Facility (CRF), by assisting the stimulation, and securing of clinical research projects and trials to be undertaken within the new facility with the public and corporate sectors. [2489-043 (2005) : 75]

10. The **post holder** will work closely with researchers in the School, across key interfaces and will engage with business and industry to identify and promote potential collaborations, partnerships and funding opportunities. [2489-043 (2005) : 75]

11. The **post holder** will join a project studying membrane protein structure. [2489-043 (2005) : 75]

12. The **post holder** will provide support to researchers and also have the opportunity to participate in the research. [2489-059 (2005) : 78]

13. The **postholder**s will be mainly responsible for running immunology assays. [2493-043 (2005) : 69]

14. In addition, the **postholder** will be required to contribute to ongoing clinical and scientific research programmes. [2493-044 (2005) : 69]

15. The **post holder** will actively be involved in placing and monitoring the progress of clinical pharmacology studies, reporting their outcome. [2498-021 (2005) : 58]

16. The main responsibility of the **postholder** is to provide an expert resource in genotoxicology and develop a research programme on the role of interactions between the environment and genes in human toxicity and the health implications of interindividual variability in susceptibility to toxic effects. [2498-037 (2005) : 64]

17. The **postholder** will play a crucial role in recruiting cases and controls, both at St George’s and in other centres throughout the South London region. [2498-052 (2005) : 69]
The postholder will work on the DESURVEY project, funded by the European Commission, to develop systems for monitoring desertification in the Mediterranean region and beyond with Professor Phil Jones, Professor Jean Palutikof and Dr Tom Holt. [2498-056 (2005) : 70]

The postholder will be employed by Imperial College, St Mary’s campus. [2498-059 (2005) : 71]

The postholder will join a team of researchers lead by Professor Jack Price investigating the mechanisms whereby neural stem cells are able to bring about functional recovery in animal models of neurodegenerative disease. [2502-043 (2005) : 70]

The principal role of the postholder will be to conduct high-throughput genotyping of SNPs based on separation of primer extension products in a mass spectrometer (Sequenom MassArray). [2502-050 (2005) : 72]

The postholder will identify novel SNPs in human innate immune genes and design a microarray for rapid screening of these SNPs from human DNA samples. [2502-051 (2005) : 72]

The two post holders will be responsible for the routine HPLC analysis of amino acid levels in spent embryo culture medium as part of a clinical trial of this new analytical method for selecting embryos in IVF clinics. [2506-018 (2005) : 61]

In addition, post holders will assist the clinical embryologists with the maintenance of adequate stocks of all materials required for the trial. [2506-018 (2005) : 61]

Novocellus will offer the post holders permanent full time employment on normal private sector/commercial terms on successful completion of the clinical study. [2506-018 (2005) : 61]

The ongoing role is open to further discussion with post holders but is likely to be in a technical or customer service role. [2506-018 (2005) : 61]

The post holders will need to be flexible to meet the needs of the service and the research projects. [2506-018 (2005) : 61]

The post holder will support a BBSRC funded study on the role of riboflavin in determining cell fate. [2506-039 (2005) : 69]

The post holder will support the work of a research associate by helping to set up and maintain experiments. [2506-039 (2005) : 69]

The post holder should have BTEC Certificate, or equivalent qualification, and have experience of cell culture or histopathology. [2506-039 (2005) : 69]

As part of the Business Development Team, the postholder will play a pivotal role in fulfilling King’s mission to transfer knowledge to business and the wider community, by creating new partnerships and strengthening existing relationships with industry. [2506-055 (2005) : 74]

A post has been funded as part of the Millennium Cohort Study and the post holder will join a multi-disciplinary research team involved in determining the acquisition of common childhood infections in early life. [2511-043 (2005) : 67]

Informal enquiries may be made to Chris Leech, the outgoing post-holder, tel: 01273 678053, [2511-056 (2005) : 72]
34. The **post holder** will investigate the environmental stimuli for pre-maturity alpha-amylase (PMA) formation in wheat grain and develop a plant breeder's screen for PMA as part of a collaborative LINK project funded by DEFRA, HGCA and the agri-food industry. [2511-058 (2005) : 72]

35. This is a new post and the **post holder** will play a key role in developing Academy policy on academic medical research and the many public policy issues that involve the biomedical sciences, and will also enable the Academy to be more proactive in its relations with government and other national bodies. [2515-016 (2005) : 60]

36. Working within a small team in central London, the **post holder** will gather information on specific issues, produce reports, make recommendations, and provide administrative support for Academy study groups. [2515-016 (2005) : 60]

37. The **postholder** will be responsible for the processing of adverse events from our clinical studies. [2515-046 (2005) : 71]

38. The **postholder** will undertake research, teaching and administration in relation to pharmacology. [2515-069 (2005) : 78]

39. The **postholder** will work in a team of technicians but should have particular skills and knowledge in the area of Microbiology. [2515-072 (2005) : 79]

40. Contribution to the subcommittees of the Institute's Ethical Review Process and knowledge of the statutory framework within which the Division operates are an important part of the **post holder**'s tasks. [2519-057 (2005) : 72]

41. The **post holder** will be familiar with Magnetic Resonance Imaging (MRI) hardware and software including imaging sequence design. [2519-061 (2005) : 74]

42. The **post holder** will work with Prof Roger Butlin to investigate the evolution of smell and taste genes during speciation in Drosophila flies. [2519-061 (2005) : 74]

43. The **post holder** will perform genotyping and Real Time PCR reactions utilizing various technologies including TaqMan. [2519-061 (2005) : 74]

44. The **postholder** will work closely with the relevant units in St George’s Healthcare NHS Trust and surrounding Primary Care Trusts. [2519-065 (2005) : 75]

45. Due to the impending retirement of the current **postholder**, we are seeking to appoint a Head of the School of Pharmacy and Chemistry (previously Chemical and Pharmaceutical Science). [2519-072 (2005) : 77]

46. Although the post will be based at the MRC Clinical Trials Centre, London, the **postholder** would be expected to occasionally travel to Africa. [2524-011 (2005) : 56]

47. excellent interpersonal, management and influencing skills as the **postholder** will be working across several teams and line managing staff, as well as liaising directly with trial managers, administrative and finance staff at a number of other institutions. [2524-011 (2005) : 56]

48. The **postholder** will take a lead role in the development of a new neuroimaging analysis laboratory and in the support and supervision of junior research staff. [2528-008 (2005) : 62]

49. Ideally, the **post holder** will have some specialist capability in coastal/estuarine processes or geomorphology. [2528-013 (2005) : 64]
50. The **post holder** will assist in the development of effective solutions within a range of conservation projects. [2528-040 (2005) : 75]

51. The **post holder** has overall responsibility for the management of the research infrastructure (buildings and major equipment) of the CSC, together with responsibility for the provision of a range of technical services essential to underpin the Institute's research programmes. [2528-044 (2005) : 77]

52. The **post holder** will be expected to maintain and develop these relationships in his or her areas of responsibility. [2528-044 (2005) : 77]

53. The **post holders** will work closely together and in collaboration with colleagues at Rothamsted Research, Scottish Crop Research Institute and Syngenta to explore the interactions between the plant and invertebrate model components and, with the assistance of two technical staff to be appointed in the second year of the project, conduct joint field experiments to test model predictions. [2528-051 (2005) : 81]

54. The **post holders** will have a PhD in an ecological or related discipline and experience in modelling. [2528-051 (2005) : 81]

55. The **post holder** will concentrate on the fluxes and partitioning of energy and carbon through crops and arable plants, based on arable seedbank dynamics and the growth and interactions of emerged plants [2528-051 (2005) : 81]

56. The **postholder** will contribute to the teaching and development of programmes at undergraduate and postgraduate levels in human nutrition and dietetics. [2528-057 (2005) : 84]

57. The **post holder** will undertake research on the derivation, characterisation and use of human cytotrophoblast stem cells to model implantation events in vitro. [2528-065 (2005) : 86]

58. **Postholders** will be required to provide research support for long-term projects investigating the molecular pathology of prion diseases. [2528-069 (2005) : 87]

2006

1. The **postholder** will both co-ordinate and deliver, if appropriate, agreed training and assessment. [2533-005 (2006) : 46]

2. The data consist of details of adverse reactions reported to the MAH during the period under review, and the **postholder** will maintain the associated section of an in house database in which the information is recorded. [2537-027 (2006) : 67]

3. The **postholder** will retrieve product-related information from the database for analysis, and will provide reports in different formats depending on the recipient. [2537-027 (2006) : 67]

4. In addition, the **postholder** will monitor the progress of product and batch recalls, under the direction of the Senior Research Officer (SRO). [2537-027 (2006) : 67]

5. **Post-holders** need to be able to deliver high-quality project work from remote locations, client premises (with occasional foreign travel), and Quo-Tec offices with minimal supervision. [2537-028 (2006) : 68]

6. The **post-holder** will work jointly with the School of Veterinary Sciences Cambridge to investigate the immunology of Salmonella based heterologous vaccines in poultry. [2537-055 (2006) : 76]
7. The post-holder will make a significant contribution to the discovery of new drug development candidates at Ferring. [2541-009 (2006) : 60]

8. The post holder will work in a team and liaise with colleagues in the UK and France to help to construct software for a landscape simulator. [2541-017 (2006) : 64]

9. The post holder will assist with design specifications, particularly regarding the user interface. [2541-017 (2006) : 64]

10. The post holder will write code and implement the software. [2541-017 (2006) : 64]

11. The post holder will need to make several short journeys to France to make presentations and to liaise with colleagues. [2541-017 (2006) : 64]

12. Based in Chippenham, Wiltshire, the holder of this post will be: (i) striving to improve UK/EU policy and legislation; and (ii) helping to coordinate WDCS's field research programme. [2541-061 (2006) : 81]

13. The post holder will join the translational neuroscience group headed by Professor Mimoun Azzouz, and will use molecular and cellular techniques to generate viral vectors for gene therapy treatments for neurodegenerative diseases such motor neuron disease. [2541-073 (2006) : 84]

14. The postholder will be responsible for monitoring clinical trials to GCP/FDA standards in various regional study sites around the UK and overseas. [2541-079 (2006) : 86]

15. It is also imperative that the postholder has an excellent command of written and spoken English. [2541-079 (2006) : 86]

16. The post holder will report to the Centre Manager and work in a team to provide a comprehensive metabolite fingerprinting service to the UK plant and microbial research community. [2545-033 (2006) : 72]

17. Primarily the post holder will be required to develop protocols and carry out analyses of biological extracts by GC-MS methodology, using a new Leco Pegasus TOF MS system, that is dedicated to the Metabolomics Centre. [2545-033 (2006) : 72]

18. In addition, the post holder will be involved in some preliminary aspects of crystallography work and laboratory maintenance. [2545-067 (2006) : 85]

19. The postholder will develop algorithms to enable processing and interpretation of experimental data from acoustic measurements. [2545-082 (2006) : 90]

20. The postholder will design experiments to make acoustic measurements on fluids and geological materials. [2545-082 (2006) : 90]

21. The post holder will work on a collaborative DTI-funded project with the University and Morgan Advanced Ceramics, focussing on the R & D of new Metal Injection Moulding (MIM) compounds (specifically biologically compatible implantable grades of titanium). [2545-083 (2006) : 90]

22. The post holder will assist in the day-to-day running of the experiments and data collection. [2550-041 (2006) : 76]

23. The postholder will support work on a project examining Urotensin II receptor desensitisation. [2550-059 (2006) : 82]
24. Due to the promotion of the current **postholder** we are seeking to appoint a Head of the Department of Pharmacy. [2550-060 (2006) : 83]

25. The **post holder** will be expected to follow a defined programme of work, but to also develop his/her own research agenda within the Unit's disease focus. [2554-041 (2006) : 75]

26. The **post holder** will be expected to follow a defined programme of work, but to also develop his/her own research agenda within the Unit's disease focus. [2554-041 (2006) : 75]

27. The successful **postholder** should possess a PhD or an equivalent qualification in any area of chemistry, materials, biological science, engineering or dentistry. [2554-062 (2006) : 83]

28. The **postholder** will conduct and publish research relevant to operational processing of MIPAS data and the effects of observed sub-visible and polar stratospheric clouds. [2554-080 (2006) : 88]

29. This **postholder** will examine a critical aspect, namely the influence of tropospheric aerosol on the accuracy of derived sea surface temperatures, and will develop a tropospheric aerosol correction. [2554-080 (2006) : 88]

30. The **post holder** will act as the link between NuGO (The European Nutrigenomics Organisation) and the EARNEST networks, and as such will be expected to develop collaborations with members of the latter group. [2558-009 (2006) : 62]

31. The **post holder** will work within the Evolutionary Dynamics group led by Dr Jo Dicks [2558-036 (2006) : 76]

32. The **postholder** will also assist with the maintenance and development of the Trust's scientific databases (Oracle) both internally and on the web. [2558-048 (2006) : 80]

33. The **post holders** will be involved in all aspects of processing (including immunoselection protocols), cryopreservation, flow cytometry and other quality testing. [2558-071 (2006) : 88]

34. **Post holders** will additionally be involved in service developments such as validation, introduction of new techniques into the laboratory, quality system development, training, data management and assisting in translational research bringing new cytotherapies into clinical practice. [2558-071 (2006) : 88]

35. In order to meet the needs of a high quality clinical service the **post holder** will be expected to be flexible in their working arrangements and be able to demonstrate the ability to work consistently to the highest standards. [2558-071 (2006) : 88]

36. The **postholder** will join Prof. Alex Thomson and Dr. Afia Ali and perform double immunofluorescence labelling and recovery of biocytin filled neurones in hippocampus and cortex and full anatomical reconstruction of labelled cells using a drawing tube and 3D-graphics, Neurolucida. [2563-059 (2006) : 70]

38. In addition, the **postholder** will have shared responsibility for the maintenance of Category 3 containment facilities. [2567-022 (2006) : 59]
39. This is an exciting time for the journal as it will be holding its first international conference in Spring 2007 and the new post holder will be involved in this and other new initiatives to help shape the future development of the journal. [2567-042 (2006) : 67]

40. The post holders should preferably have a good understanding of cell biology or cell culture and some knowledge of immunology. [2567-068 (2006) : 78]

41. The postholder will work to market the Environmental Technologies capabilities within the University of Bath, engaging with companies across the South West of England to develop collaborative projects and ventures. [2567-077 (2006) : 81]

42. The post holder will be required to work closely with scientists in food science, chemistry & ecology and with other modellers, statisticians and computing staff. [2572-041 (2006) : 78]

43. The post holder will also contribute to meetings with internal and external customers and produce scientific papers, reports and presentations. [2572-041 (2006) : 78]

44. Working in a team of analysts, the post holder will have responsibility for finished product testing to pre-determined quality standards to meet customer requirements, whilst maintaining the highest level of compliance. [2572-053 (2006) : 82]

45. The post-holder will be resident in the Isle of Man, but will be an employee of the University of Wales, Bangor. [2572-067 (2006) : 89]

46. The postholder will be required to set up and maintain equipment and materials required in Sport Science and Physiology. [2572-068 (2006) : 89]

47. The postholder will support the research project by measuring renal function, cyclin activity, renal fibrosis, proliferation and inflammation in research samples. [2572-074 (2006) : 92]

48. The post holder must be able to demonstrate real understanding of the role of a CRA in monitoring pivotal registration studies and have a practical understanding of the issues that can arise and how to prevent or correct them. [2576-010 (2006) : 64]

49. The post holder will be required to work on supporting the NVEC programme for the pre-clinical evaluation of new vaccines against health-care associated infections and on group B Streptococcus vaccines. [2576-049 (2006) : 78]

50. The post holder will also be required to prepare standards and working reagents necessary for the laboratory evaluation of these vaccines. [2576-049 (2006) : 78]

51. The postholder will explore the mechanism of modulation of antibiotic resistance in methicillin-resistant Staphylococcus aureus (MRSA) by naturally occurring polyphenols. [2576-080 (2006) : 88]

52. This is a collaborative project with Dr Neil Millar's laboratory at University College London, and although an employee of Rothamsted Research, the post-holder will be expected to conduct experiments at both sites. [2580-048 (2006) : 69]

53. The post holder will be required to have an honours degree in a relevant science subject (e.g. physics or engineering) or a subject related to environmental sciences and meteorology. [2580-071 (2006) : 79]

54. In addition, the post holder will ideally have more than 1 year's post graduate experience of air pollution related topics, within a university, private company or environmental consultancy. [2580-071 (2006) : 79]
55. The **postholder** will work in a team of technicians but should have particular skills and knowledge in the area of Microbiology with knowledge or prior experience of CL3 facilities. [2580-072 (2006) : 79]

56. The **post holder** will investigate the role of fires in the carbon cycle using remote sensing, in the European project CARBOAFRICA. [2580-073 (2006) : 80]

2009

1. In particular the **post holder** will be expected to input technical advice into the horticulture section of the AHDB Corporate Plan. [2694-004 (2009) : 52]

2. In addition the **post holder** will also be required to work independently and collaborate on related research projects. [2694-029 (2009) : 63]

3. The **post holder** will help Professor Darzi develop and implement the strategies of his research portfolio and that of the Department and Division. [2694-040 (2009) : 68]

4. Each of the **post-holders** will be responsible for supporting research activities in defined parts of the research portfolio - two posts with a particular focus on UCLH/UCL or Royal Free research activities, another on the Royal Free and Whittington Hospitals, whilst a fourth post will focus mainly on the research portfolio for the RNOH and North Middlesex Hospitals. [2694-043 (2009) : 70]

5. The **post holder** is expected to contribute generally to research on resource utilisation by plants and to develop an independent research programme through innovation and collaboration with scientists both within and outside SCRI funded by external grant income. [2698-054 (2009) : 70]

6. The **post holder** is expected to contribute generally to research on rhizosphere processes, and to develop an independent research programme through innovation and collaboration with scientists both within and outside SCRI funded by external grant income. [2698-054 (2009) : 70]

7. The post is partly funded by the UK sugar beet industry and a knowledge of the crop is desirable but not essential, as the current **post-holder** will be working part time to provide training as required. [2706-025 (2009) : 57]

8. The **postholder** will contribute to a NERC funded project to investigate human impacts on the oceanic nitrous oxide cycle, including the development and evaluation of a representation of the oceanic N2O cycle in a 3-D global ocean biogeochemistry model, and the subsequent development of numerical simulations to quantify anthropogenic impacts on oceanic N2O. [2706-040 (2009) : 62]

9. Working within a small team in central London, the **post holder** will work closely with Academy Fellows to gather information on topical issues, draft papers and position statements, and provide support for Academy study groups. [2711-006 (2009) : 52]

10. The **post holder** will work as part of a small enterprise and applications team in a business facing role innovating, partnering, networking and brokering EO-led (GMES) remote sensing solutions to business requirements by building on the work of EO research teams in the University and partner organisations. [2711-036 (2009) : 63]

11. The **post holder** will work alongside Professors Marek Ziebart and Paul Cross, joining an established and well funded research group. The group currently specialises in GPS/GNSS data modelling, as well as research into the science underpinning the development of such systems (orbital dynamics, clock behaviour, signal modelling, time and space reference frames). [2711-038 (2009) : 63]

6010
12. In parallel, the postholder will also work closely with the Head of Genomics Research on technology development. [2711-040 (2009) : 64]

13. The postholder will work closely with the LWEC Director to support and implement the research programme and to establish, manage and be responsible for the LWEC Directorate's operation. [2715-030 (2009) : 62]

14. The postholder will implement the communications strategy relating to public engagement, knowledge exchange and general communications. [2715-030 (2009) : 62]

15. The post-holder will take a senior role in the Department, running a productive research group, supervising post graduate research workers and mentoring graduate students, and winning funds to support the group in the future. [2715-037 (2009) : 64]

16. The post holder will contribute to the overarching activities of the Major Overseas Programme including training and capacity building. [2715-037 (2009) : 64]

17. The postholder will work within the International Project Office (IPO) of SOLAS to implement the project [...][2715-038 (2009) : 64]

18. The postholder will represent the project at international meetings and interact with SOLAS national committees and groups, completing the SOLAS Implementation Plan document. [2715-038 (2009) : 64]

19. Working within the Populations and Public Health stream, the post-holder will be responsible for developing the Trust’s portfolio of public health research into communicable and non-communicable diseases. [2728-017 (2009) : 60]

20. This will be for an initial period of nine months or until the return of the substantive post holder, whichever is the sooner. [2728-036 (2009) : 68]

21. The postholder will provide expert advice to the NOCRI team on all aspects of communication, including media handling issues, liaising closely with press colleagues from the Department of Health/NIHR. [2733-022 (2009) : 68]

22. The postholder will also need to demonstrate experience of media handling, preparing and delivering communications plans, and tailoring and targeting messages to a range of different audiences, including the life sciences industries. [2733-022 (2009) : 68]

23. Additionally, the post holder will provide scientific administrative support to Dr Hubbard in his role as BoM member; [2733-024 (2009) : 69]

24. As part of the above, the role holder will direct and co-ordinate the activities of the Director's office with particular emphasis on the management of communication both internally and with key external stakeholders including the Wellcome Trust. [2733-024 (2009) : 69]

25. The role holder will work independently and through others to help manage a complex web of interactions and interfaces, both inward and outward facing, and to ensure appropriate focus on key strategic and policy issues affecting the Institute. [2733-024 (2009) : 69]

26. This is a fixed-term maternity cover position and will continue until the post holder returns to work after her period of maternity leave. [2733-024 (2009) : 69]

27. The postholder(s) will investigate high level behavioural or functional software modelling of relevant brain component areas. Expertise in computational modelling of biological signals at various levels of abstraction and information processing in humans is essential. [2733-039 (2009) : 74]
28. The **post holder** will use an existing cell-based assay to screen a chemical library of drug-like compounds for specific pharmacological activity. [2733-040 (2009): 74]
Annexe 6-6 Occurrences de JOB HOLDER dans CAEMS

**BNC**

Here is a random selection of 50 solutions from the 662 found.

1. **A69 283** The amount of the pension is not related actuarial to the sums which each **recipient** has actually paid in contribution; but the right to receive it is treated as flowing from the possession of a contribution record, and indeed the pension rates are represented as related to the contribution rates, assuming contribution over a full working life.

2. **A6M 854** Once the loan agreement is signed the donor may have a much more precise view of these conditions than the **recipient**, especially at the level of the line staff who are actually supposed to manage the project.

3. **A6M 885** Donors frequently finance projects, or chunks of government expenditure such as part of the health service, to which **recipient** countries would in any case have to give a high priority, and this relieves government of that particular commitment.

4. **A6M 982** There are no easy answers to African development, and an appropriate degree of humility on the part of donors is a necessary condition for developing a serious dialogue with **recipient** governments.
5. **ACL 846** She was not miserable; she certainly was not coerced into her life style (quite the contrary, her family made considerable effort to dissuade her, and even the Church authorities of her time were not encouraging); she was not psychopathic, in the sense that she did not inflict sufferings on other people; she was the recipient of quite remarkable consolations, including that highest of all delights, the conviction of the ‘mystical marriage’, in which Christ takes the soul directly as his spouse, and a loving one at that.

6. **ADB 710** In his retirement in Lambourn he was the daily recipient of two bottles of Mackeson stout, delivered from the local pub courtesy of Colonel Bill Whitbread, whose company sponsors the Whitbread Gold Cup in which Mandarin was twice runner-up.

7. **ADB 21** As each name is recited by the Lord Chancellor, the recipient steps forward, bows slightly, and kneels or inclines his head to receive the award.

8. **ADB 27** This last recipient had obviously not used London Transport to get to the Palace or he’d have missed the ceremony ‘due to mechanical failure on the Circle Line’.

9. **AJU 1216** Nevertheless, it has been the recipient of a great deal of hostility that is nothing to do with Snow White moving in on Babar or Tintin's patch.

10. **AMG 1494** Packer remarks that the greater willingness to join in collaboration against a consorting male may be related to the greater benefits that the altruism bestows on the recipient in these cases.

11. **AMH 442** For manufacturing companies employing more than fifty people, the Category A winner and recipient of the Industrial Development Board Award was Thermomax Limited.

12. **APX 707** Charles Barry Junior, who chaired the lecture, spoke warmly of ‘his great, his exceeding kindness to all those younger than himself’, having been the recipient of many instances of it in his own career.

13. **ASL 641** Instructions imply providing new information to the recipient.

14. **B14 1157** Basically communication is said to occur when a person (the sender) has a message which he sends in a particular medium, so that it is received by a recipient in whom it produces a response, followed by feedback to the sender (Fig. 7.1).

15. **B22 564** At the end of each row was the monitor who marked the attendance which, if regular, entitled you to a Prize at the end of the year, a book chosen from a list by the recipient and presented at the Annual Service on Low Sunday.

16. **BNP 706** In other words, a female office worker, unwilling recipient of seka hara.

17. **BPS 929** However, both the Commission and national authorities are bound not to disclose any business secrets and therefore the recipient of any such document could not pass it on to any other national authority or use it otherwise than for the investigation in hand.

18. **CBY 274** Even love itself is better for being carefully ‘gift-wrapped’ sometimes, when the recipient is elderly, and fearful of the slightest hint of patronage or pity.

19. **CBR 400** Long points out that in native speaker/non-native speaker (NS/NNS) interactions, both participants collaborate in recipient design by employing strategies for negotiating meaning.

20. **CBT 1436** Each should be designed for its recipient, but remember that other eyes may see it.

21. **CBU 3920** Where the publications are a supply for acquisition, the recipient subscriber will account for VAT in its member state although such publications are zero-rated in the UK, in other member states they are taxed at a reduced rate, and in Denmark they are taxed at 25%!

22. **CCU 631 6.5** Each Party shall be entitled at the completion of the Project to require delivery up of all copies of any information originating from it except information which the recipient in each case has a right to retain or use for the purposes of clause [Exploitation of Results].

23. **CDU 1433** Should the message be unfamiliar and its manner of delivery unappealing or otherwise distant from the recipient, its relevance or value are unlikely to be accepted.

24. **CE4 521** If you are making the set of pictures as a gift, you should consider the favourite colours of the recipient or perhaps choose shades that blend with a colour scheme in their home.

25. **CE4 963** It is always wise to first check with the recipient the colour scheme of the room in which the picture will be displayed, as it is possible to vary the emphasis placed upon the colours within the picture accordingly.

26. **CE8 967** (‘Means-tested’ benefits are benefits which are not automatically given, but which are dependent on the recipient's income or wealth, ie his ‘means’.)
27. **CFX 819** One balade, addressed to ‘Maister Carpenter’, has come down in his own hand, with a marginal list showing that the poem, which is a begging letter, could be recycled, and addressed to a new recipient on each occasion.

28. **CHV 1071** He is also superbly crafty in the book in inserting, so gently that the recipient wouldn't even notice, the odd barb.

29. **CKV 373** In 1973 the the Midlands town of Walsall was the recipient of an outstandingly generous donation.

30. **CLH 757** Critical is the view that the event is stored and that the particular realisation of it in linguistic form is variable and does not depend on stored information of agent, recipient and so on.

31. **CMK 1525** Income support (in some circumstances, e.g. when the recipient is also getting unemployment benefit, income support benefit would be taxable)

32. **CRV 416** These are clearly more formal models than those which the modern letter-writer is used to, yet Shakespeare's range stretches from the intimate and occasional to just such formal rhetorical structures as Day's category of the ‘Epistle Deliberative’, which uses a mixture of praise and criticism in its ‘Hortatory’ or ‘Dehortatory’ intent, and may legitimately subject the recipient to moral pressure: Yet, while acknowledging the relevance of Day's treatise on letter-writing and its tactics of persuasion, we may note that in Shakespeare one of Day's categories is absent, namely the ‘Responsory Epistle’, which ‘dependeth of the partes of a former letter’and must refer back to it.

33. **E9Y 1218** I shall certainly be supporting what I suppose we'll have to call Knicker Aid by riffling through my scanties drawer, though I trust the recipient of these exquisite items will have the initials WB.

34. **EBX 592** Lois Forer, a judge and former assistant Pennsylvania attorney general, expects that the decision on the Barnes tour will encourage donors to include ‘gift over’ provisions in their bequests, allowing gifts to pass to a second institution if the first recipient of a donation violates the restrictions placed on gifts.

35. **ECD 1592** I would regard the recipient as carrying a heavy burden if he seeks to repel a contention that he was bound by an obligation of confidence.

36. **EEB 802** This is to make it clear to whom the letter is intended, to ensure that the recipient has an address for further correspondence and to provide the address for window envelopes if they are being used.

37. **EEB 918** A standard paragraph may not always reflect the tone required to deal with a particular enquiry; it may not be quite appropriate to particular circumstances and it may not feel right to the recipient.

38. **EEN 473** Nevertheless, during the nineteenth century the working class was the recipient of various phases of evangelism and attempted colonisation.

39. **EFU 26** You add the wine, and mix it with the eggs and cheese, pour the mixture into a flameproof casserole and put it to cook immediately, but you do not leave it for an instant: you stir ceaselessly until you have a homogenous cream, and you serve it sizzling in the recipient in which it has cooked."

40. **EX6 556** Lead times, even for writers on national dailies, are longer in this area and there is more room for lengthier explanations provided they are relevant to the recipient's speciality.

41. **EX7 210** The recipient had an obligation to use these talents to help others; and since I was a heretic, my duties in this respect were all the more pressing.

42. **F9V 210** It is noteworthy, then, that the recipient often writes down the details that he is told.

43. **F9V 25** It is important that the recipient gets the informative detail correct.

44. **F9V 27** There will be unfortunate (even disastrous) consequences in the real world if the message is not properly understood by the recipient.

45. **F9V 632** The addressee is the hearer or reader who is the recipient of the utterance.

46. **FBC 335** It is true that in some cases it happens that the recipient does not find the punishment painful, or even welcomes it — for example, some offenders might find prison a refuge against the intolerable pressures of the outside world.

47. **FBP 643** One puzzling aspect of this notion was that a variety of tyrosine kinases (receptors and non-receptors) and possibly other activators, such as certain G-protein-coupled receptors, could all funnel signals into the same, highly conserved recipient, Ras.

48. **FBW 121** Annexed to the notice was a document entitled ‘Guidance for persons being interviewed at Elm House under section 2 of the Criminal Justice Act 1987’ This was largely concerned with the
physical circumstances in which the interview would be conducted, but it did also inform the recipient of the notice that:

49. **FD8 285** But the remedies given by the sections include personal remedies, such as an order that the recipient of property transfer it back to the company, or an order that the other party to a transaction pay a sum of money to the trustee of the bankrupt's estate.

50. **FEU 431** Further notes should be made during reviewing, so that you are not merely a passive recipient of information.

51. **FEW 440** Almost any job which a benefit recipient takes will have some effect upon his current entitlement to unemployment compensation.

52. **FRE 3415** But it was also a wish that the recipient have sons.

53. **FSA 1504** The key assumption of his model is that the information is received by one trader at a time, and each recipient trades on the basis of this information before it becomes known to anyone else.

54. **FSA 345** Even if they do, the timing of the tax payments by the recipient of dividends may differ from that of the tax payments to those making dividend payments.

55. **FSS 722** If the sender is traceable, probably the most sensible thing to do is to notify him that the goods are at his risk and to request him to fetch them; and if (as is likely with perishables) the goods become a nuisance, the recipient would surely be justified in abating the nuisance by destroying them, even without notice to the sender, if the emergency were so pressing as to leave him no time to give it.

56. **FSV 328** I am a recipient of Public Lending Right and I have come to the House tonight to say thank you to honourable members who were here in 1979, when the legislation was passed.

57. **FTB 1155** It is not possible at present to decide whether the Cys 177 sulphydryl group is itself the ultimate recipient of the methyl group or whether it is required for catalysis of automethylation of the enzyme at some other site.

58. **G09 202** bee-keeper may give away a hive, and later the recipient will find a way of unobtrusively repaying the kindness either with an appropriate gift or with some worthwhile service.

59. **G0D 822** But the dialogue purists envisaged between women of different classes was still the traditional bond of philanthropy, which linked the middle-class ‘donor’ to her working-class recipient through notions of moral and material charity.

60. **G14 436** This behaviour would be measured in Ungar's test as an increased reluctance, or even a refusal, to enter the dark compartment within the minute of the trial, simply because the recipient mice were relatively inactive.

61. **G1C 1475** To vary the charges with the income of the recipient and, if the recipient is poor enough, to waive the charge.

62. **GVA 1311** They predicted that when a subject's attention was on the actor a situation would be described using an active, whereas when attention was on the acted-upon (the recipient of action), greater use would be made of the passive.

63. **GXJ 995** Once meals are being delivered regularly, the WRVS helper will be very concerned if she cannot get an answer when she calls and every effort will be made to ensure that the recipient is safe.

64. **GXJ 996** It is therefore very important that the WRVS helper, driver or the local Home Care Organiser at the Social Work Office, is informed when a recipient is going on holiday or attending hospital.

65. **H09 1164** The use of these names became accepted by the recipient for most were not used derisively but became natural names.

66. **HAS 2681** These included Mr Miller, a farmer, the proud recipient of some pears and roses and advice from Mr Dickens, the advice being to stick to farming, not be an author or a poet.

67. **HCV 149** The harassment occurs as a result of the effect various suggestions, jokes, touching or showing of pictures has on the recipient.

68. **HCX 380** Tony Wildy was the surprised recipient of a special prize.

69. **HJS 3063** The payment may constitute taxable income or capital of the recipient in which case it will not be sufficient to meet the full liability in respect of which it was paid.

70. **HJS 6654** This Document may not be copied or distributed by the recipient to third parties (other than in confidence to the recipient’s professional advisers).

71. **HJS 6658** Each recipient doing business in or organised under the laws of the United States of America or in areas subject to its jurisdiction represents that it is an institutional investor, expressing an interest for its own account and agrees not to purchase, distribute or sell any of the Company's securities or any interest therein except in compliance with the above laws.]
72. **HJS 870** i.e. the **recipient** has to acknowledge its status prior to receiving the item.
73. **HLA 1556** He said that he had outlined to the Chinese leadership Japan's four-point overseas development aid policy, which linked aid to the **recipient's** military spending, its arms imports and exports and its human rights situation.
74. **HPL 14** Take precise details i.e. name of caller, telephone number, exact message, if they would like the **recipient** to return the call, etc.
75. **HRM 506** Whenever one organism promotes the fitness of another at its own expense and without reciprocal benefit to itself or benefit to its own genes present in the **recipient** it has perforce performed an act of induced altruism.
76. **HWF 14274** This is done using option 3.8.0, Force User to Accept SPR, and may be used as often as required, for example, to re-assign responsibility if the **recipient** of a previously forced SPR does not wish to take responsibility for it, or a user has accepted responsibility and then wishes to pass it to someone else.
77. **HWU 1592** Even as an interim solution, the problems of rewarded gifting are formidable: does the State set a standard price for a donated kidney, tailor the price to compatibility, or the means of the **recipient**?
78. **HWU 2096** A Carrel patch of donor aorta was anastomomosed to an anterior incision in the infrarenal **recipient** aorta, and the portal vein draining the superior mesenteric vein of the graft was anastomosed end-to-side to the anterior wall of the **recipient** inferior vena cava.
79. **HXA 466** recognition that the **recipient** is the best person to decide what information is appropriate to himself.
80. **HXD 413** The fundamental rationale underlying the law of confidence is that it can prevent a person divulging information which has been given to him in confidence, on an express or implicit understanding that the information should not be disclosed to others or otherwise used by the **recipient** of the information.
81. **HY6 1057** Furthermore, not only does Hilton imply that he is implementing his treatment of the subject in Scale 1 at the beginning of Scale 2, there are also points in Scale 1 where he anticipates a development of his subject beyond that relevant for his immediate **recipient**.
82. **J2K 18** Distinguishing between what he calls natural meaning (as in Those black clouds mean rain), and non-natural meaning or meaning.nn (equivalent to the notion of intentional communication), Grice gives the following characterization of meaning.nn (10) S meant nn z by uttering U if and only if;i) S intended U to cause some effect z in **recipient** H (ii) S intended (i) to be achieved simply by H recognizing that intention (i) Here, S stands for speaker (in the case of spoken communication; for sender or communicator in other cases); H for hearer, or more accurately, the intended **recipient**; "uttering U" for utterance of a linguistic token, i.e. a sentence part, sentence, or string of sentences or sentence parts (or the production of non-linguistic communicative acts); and z for (roughly) some belief or volition invoked in H.
83. **J2K 595** Such a framework would note that the speaker or spokesman can be distinct from the source of an utterance, the **recipient** distinct from the target, and hearers or bystanders distinct from addressees or targets, and that sometimes such distinctions are grammaticalized in non-obvious ways (see Levinson, in prep.).
84. **J6S 823** Royalties paid by Newco for patent user are subject to deduction of basic rate income tax at source whoever the **recipient** may be (see s349(1) TA 1988).
85. **J7A 1309** The first limb provides that if the **recipient** is domiciled outside the United Kingdom and the benefit is not received in the United Kingdom then the **recipient** shall not be chargeable to tax by reference to relevant income which is such that if he had received it he would not by reason of his being so domiciled have been chargeable to tax in respect of it.
86. **J7B 590** What is being said is that the **recipient** of confidential information cannot use the information as a shortcut to side-step the work which other members of the public would have to do.
87. **J7B 591** Thus if the confidential information was published in full detail then the initial **recipient** would not have a head start.
88. **J7B 685 2.1** Express indications of confidentiality Where the person disclosing information expressly states to the **recipient** that it is being disclosed in confidence this will usually suffice to impose an obligation of confidence (assuming the information has the necessary quality of confidence).
89. **J7D 144** The relevant circumstances are set out in s1(2) of that Act which states:(2) The circumstances referred to in the preceding subsection [the extinguishment of any right of the sender to the goods] are
that the goods were sent to the recipient with a view to his acquiring them, that the recipient has no reasonable cause to believe that they were sent with a view to their being acquired for the purposes of a trade or business and has neither agreed to acquire nor agreed to return them, and either (a) that during the period of six months beginning with the day on which the recipient received the goods the sender did not take possession of them and the recipient did not unreasonably refuse to permit the sender to do so; or (b) that not less than thirty days before the expiration of the period aforesaid the recipient gave notice to the sender in accordance with the following sub-section, and that during the period of thirty days beginning with the day on which the notice was given the sender did not take possession of the goods and the recipient did not unreasonably refuse to permit the sender to do so.

90. **K1F 2341** The most recent recipient was the Sultan of Brunei who was presented with his by the Chancellor Lord Jenkins.
Annexe 6-10 Occurrences de INCUMBENT dans CAEMS

1971

The incumbent will select problems and assume the major responsibility for completing the assignments, either as independent projects or as significant elements of a group program. [754-050 (1971) : 602]

1995

The incumbent should also develop effective collaborative networks with NARS National Gene Banks, especially in exploration and collection of germplasm with appropriate training and prepare appropriate protocols for all collection expeditions. [1967-012 (1995) : 66]

2005

It is expected that the incumbent will participate in the development of inter-disciplinary health research and clinical training in the McGill University Hospital Centre. [2515-067 (2005) : 78]

2006

The successful incumbent will account fully for all ALC activities. The Director will report to a Board of Directors, appointed by the ALC membership. [2563-006 (2006) : 52]

The incumbent will be expected to contribute towards developing the ALC into a successful entity, with special reference to: […] [2563-006 (2006) : 52]

The incumbents will be required to perform the following duties: (a) to undertake front-line research in Earth System Physics of which the following are examples: seasonal and interannual climate fluctuations including El Nino and monsoons, and their predictability; [2563-019 (2006) : 57]

Back in 1992, when New Scientist interviewed a previous incumbent, Bridget Ogilvie, in the old building, it was like being sent to the headmistress. [2567-002 (2006) : 50-51]

2009

The individual chosen for the post of Executive Secretary must be available starting 15 February 2010 for a two-week period of transition with the incumbent Executive Secretary and will assume the post on 01 March 2010. [2689-022 (2009) : 54]

| A                      | Candidates must be born between 2nd October 1950 and 1st October 1954. [767-074 (1971) : 548] |
| A Di                   | Candidates should not be more than 28 years of age on taking up their Fellowship, and must hold the Ph.D. degree or have equivalent research experience. [733-010 (1971) : 38] |
| A Ex                   | For Senior Scientific Officer posts you must be 26 or over and have a minimum of three years’ post-graduate research experience. [733-031 (1971) : 41] |
| Ca                     | Application forms may be obtained from the Deputy Secretary, Birkbeck College, Malet Street, W.C.1. and must be returned not later than 19th April 1971. [745-040 (1971) : 60] |
| Ca                     | Completed forms must be returned by 15 April 1971. [745-059 (1971) : 62] |
| Ca                     | Applications (10 copies) must be received not later than 1 June 1971 by the Academic Registrar, University of London, Senate House, WC1E 7HU from whom further particulars may be obtained. [750-042 (1971) : 358] |
| Ca                     | Applications, on the prescribed form, must be lodged not later than 16 August 1971. [758-033 (1971) : 52] |
| Ca                     | Forms of application may be obtained from the Registrar/Secretary of the university at which the candidate wishes to pursue his research, and must be returned duly completed by 8th February, 1972 (except in the case of London University, where inquiries should be directed to the Academic Registrar, and the closing date is 31st January, 1972). [772-095 (1971) : Ciii] |
| Ca                     | In the case of multiple applications, separate forms must be completed in respect of each university. [772-095 (1971) : Ciii] |
| Ca                     | Applicants, who must also be applicants for the University Lecturership should write to the Principal of Brasenose College, before 31 January, 1972. [774-054 (1971) : 192] |
| Co                     | Candidates must be willing to undertake occasional travel within the UK to visit factories and other premises with a senior officer and also to participate in field experiments. [733-084 (1971) : 48] |
| Co                     | The person appointed must be capable of working on his own initiative as much of the work will involve periods away from base dealing with senior engineers and scientists. [750-024 (1971) : 356] |
| Co                     | Candidates must be interested in the applied aspects of their subjects and will be expected to undertake research work. [758-030 (1971) : 52] |
| Co                     | Honours graduates in Biological Science will be preferred, and applicants must register for a Ph.D. [758-068 (1971) : 55] |</p>

Sales experience **a must**, combined with radiation monitoring or similar skills for sophisticated instruments to major industrial accounts; hygiene / microbiology expertise for monitoring equipment to consumer production sites [1984-038 (1995) : 64].

You’ll need to be familiar with the use of Windows packages, and the customer contact aspects of the role make sound communication skills a **must**. [1989-112 (1995) : 85].

A | Candidates **must** have been born after 14/10/1957. [1980-015 (1995) : 58]  
A | Candidates **must** have been born after 29/8/1953. [1980-024 (1995) : 61]  
A | Candidates **must** have been born after 29/6/1953. [1980-052 (1995) : 69]  
A | Candidates **must** have been born after 29/6/1943. [1980-073 (1995) : 73]  
A Ca | Applicants, who **must** not normally be over thirty-one years of age at that date, **should** write to the Rector at Exeter College, Oxford, OX1 3OP, for further particulars. [1963-015 (1995) : 54]
| **Ca** | In addition you must be aged 20-70, without dependent children, willing to work for a modest living allowance, and have unrestricted right of re-entry into the UK. [2002-044 (1995) : 68] |
| **Ca** | Completed application forms must be returned no later than 24 February 1995. [1959-043 (1995) : 56] |
| **Ca** | Applications must be received by Tuesday 31 January 1995 [1959-048 (1995) : 57] |
| **Ca** | These must arrive no later than 27 January 1995. [1959-052 (1995) : 58] |
| **Ca** | Applications must quote the reference number above, and should be submitted in duplicate to the Secretary, Australian National University, Canberra ACT 0200 Australia, including curriculum vitae, list of publications and names of at least three referees. [1963-032 (1995) : 57] |
| **Ca** | Further details and application forms, which must be returned by not later than 31 March 1995, may be obtained from the Registrar (Fellowships), University of Newcastle, 6 Kensington Terrace, Newcastle upon Tyne NE 1 7RU. [1967-056 (1995) : 78] |
| **Ca** | Applications must be received by 21st April 1995. [1971-003 (1995) : 55] |
| **Ca** | Applications (three copies from UK applicants, one copy from overseas applicants) must be sent to this address by 21 April, 1995. [1971-057 (1995) : 74] |
| **Ca** | Each application must be accompanied by a curriculum vitae, list of publications, and names and addresses of three referees. [1971-057 (1995) : 74] |
| **Ca** | Further information, including position documentation, must be obtained from Dr S Tyerman, phone (618) 201 2893/2450 or fax (618) 2013015. [1971-072 (1995) : 77] |
| **Ca** | Applications, quoting Position No. EE46, must be addressed to: Mr A W Hayward, Registrar, University of Canterbury, Private Bag 4800, Christchurch, New Zealand. [1976-005 (1995) : 60] |
| **Ca** | This is an answer phone service for which you must quote the reference No and clearly state your name and address. [1976-051 (1995) : 75] |
| **Ca** | Entries must be typed, or legibly written, in English, using only one side of the paper. [1980-001 (1995) : 47] |
| **Ca** | These application forms, duly completed and signed, must be returned to the above address postmarked not later than 13/7/1995. [1980-015 (1995) : 58] |
| **Ca** | These application forms, duly completed and signed, must be returned to the above address postmarked not later than 13/7/1995. [1980-024 (1995) : 61] |
| **Ca** | A description of the duties and qualifications required for the different positions and compulsory application form must be requested in writing (making reference to the number of the area considered) before 30/6/1995 from: E.C., Secretariat for Selection Committees Research (COM/R/A/137), SDME R2/51, rue Montoyer 75, B-1049 Brussels, Belgium (fax: + 32 2 296.22.39). [1980-052 (1995) : 69] |
| **Ca** | These application forms, duly completed and signed, must be returned to the above address postmarked not later than 13/7/1995. [1980-052 (1995) : 69] |
| **Ca** | All applications must be received by Friday 23 June 1995. [1980-053 (1995) : 69] |
| **Ca** | These application forms, duly completed and signed, must be returned to the above address postmarked not later than 13/7/1995. [1980-073 (1995) : 73] |
| **Ca** | This is an answerphone service for which you must quote the appropriate reference number and clearly state your name and address. [1984-013 (1995) : 56] |
| Ca | Completed applications **must be returned** to Christine Utting at the address above by 13 July 1995. [1984-045 (1995) : 66] |
| Ca | Applications to this initiative **must be submitted** by 1 September 1995. [1984-066 (1995) : 71] |
| Ca | Applications, which **must** include a full CV and publication list and the names of two referees who may be contacted immediately, **should** be sent to Jessica Amrouni, Dept Electronic & Electrical Engineering, UCL, Torrington Place, London WC1E 7JE and **should** arrive before 20 July 1995. [1984-082 (1995) : 74] |
| Ca | Such requests **must be received** by 23rd October 1995. [1989-029 (1995) : 66] |
| Ca | Completed application forms **must be received** by Monday, 14th August 1995. [1989-036 (1995) : 68] |
| Ca | Applications **must be received** by 15 September 1995. [1993-018 (1995) : 56] |
| Ca | Candidates **should** apply to Mr. G. M. Hurst in the Dyson Perrins Laboratory within fifteen days of the appearance of this advertisement and **must** arrange for two referees to send letters of support at the time of making their application. [1993-057 (1995) : 68] |
| Ca | Please note application forms will not be sent out after 13th September 1995 and completed forms **must be returned** by 27th September 1995. [1993-082 (1995) : 74] |
| Ca | All nominations **must be received** by 16 February 1996. [2002-001 (1995) : 2] |
| Ca | The application is to be submitted in English, and **must be structured** according to instructions which can be obtained from LTH's kansli, Eva Persson, tel +46 46-222 97 80, fax 46 46-222 37 21. [2002-022 (1995) : 61] |
| Ca | The application, stating the reference number, **should** be addressed to the Vice-chancellor of Lund University, and **must be received** by the registrar, PO Box 117, S-221 00 LUND, no later than Wednesday 6th December 1995. [2002-022 (1995) : 61] |
| Ca | All nominations **must be received** by 16 February 1996. [2006-001 (1995) : 13] |
| Ca | Application forms and further particulars may be obtained from: The Secretary, Ref: N81, The Lister Institute of Preventive Medicine, The White House, 70 High Road, Bushey Heath, Hertfordshire WD2 3JG to whom completed forms **must be returned** not later than 19 January, 1996. [2006-074 (1995) : 81] |
| Co | You **must** have good organisation and planning skills, be highly motivated self-starters and be able to work in a team environment. [1998-084 (1995) : 97] |
| Co | Nationality: Candidates **must** be a national of one of the European Union's Member States. [1959-003 (1995) : 51] |
| Co | Fellowships **must be held** in a university in the United Kingdom. [1959-029 (1995) : 51] |
| Co | Candidates **must be comfortable in a team based working environment.** [1959-033 (1995) : 53] |
| Co | Applications **should be made jointly with the supervisors whose laboratories or departments must be in the UK or Republic of Ireland.** [1959-043 (1995) : 56] |
| Co | Liaising with colleagues throughout the organisation, you **must be committed** to providing a first class support service. [1963-007 (1995) : 52] |
| Co | You **must** also demonstrate a meticulous approach to laboratory work and an ability to operate within demanding project deadlines. [1963-022 (1995) : 55] |
| Co | All candidates **must be committed, self motivated, and be able to liaise confidently with clients at all levels.** [1963-027 (1995) : 56] |
| Co | You **must** be physically fit as the post could involve participating in research cruises. [1963-039 (1995) : 59] |
| Co | You **must** be physically fit as the post will involve Antarctic field work in remote locations. [1963-039 (1995) : 59] |
| Co | Applicants **must** have current cash support from UK industry or commerce, or support agreed to start in 1995, usually of at least £25,000 per year. [1963-047 (1995) : 61] |
| Co | You **must** be willing to carry out research on one of the following group of organisms: terrestrial or aquatic invertebrates, fish, birds, plants or microorganisms. [1963-052 (1995) : 62] |
| Co | You **must** have the maturity and personal qualities to operate at all levels with clients, creating lasting relationships with key people and handling them intelligently, with tact and skill. [1963-067 (1995) : 65] |
There is no internal funding for this course and all applicants **must** be self-financing or supported by international or national government agencies. [1963-105 (1995) : 75]

Enthusiastic, highly motivated and a strong team player, **you must** also demonstrate the maturity and interpersonal skills to represent the team on international project work - requiring some international travel. [1967-043 (1995) : 75]

Just as important, **you must** have the confidence, experience and stature to conduct high level technical discussions, and the all round communications skills to play a major role in helping Royal Mail realise its technological vision. [1967-058 (1995) : 79]

Practical ability to identify organisms **must be demonstrated.** [1967-059 (1995) : 79]

**You must** be able to demonstrate a practical and pragmatic approach, be numerate and literate and be able to follow defined procedures. [1967-065 (1995) : 81]

Therefore candidates **must** be prepared to spend a considerable amount of time travelling away from the office. [1967-090 (1995) : 86]

**You must** be of German mother tongue and possess a thorough knowledge of English. [1967-106 (1995) : 91]

**You must** be of German mother tongue and possess a thorough knowledge of English. [1967-106 (1995) : 91]

**You must** be of English mother tongue and possess a thorough knowledge of German and/or French. [1967-106 (1995) : 91]

The BBSRC studentships are open to competition but at least two **must be** CASE awards, possible topics are: Professor G. M. Gadd (fungal metabolism), Professor R. A. Herbert (microbiology of extremophiles), Dr S. F Hubbard (insect populations genetics), Dr C. J. Hutchison (control of cell division), Dr R. Parsons (plant nitrogen nutrition), Dr P. Rowell (cyanobacterial differentiation), Professor J. I. Sprent (nitrogen fixing legumes), Dr J. D. B. Weyers (stomatal physiology), Dr W. G. F. Whitfield (insect developmental biology). [1971-006 (1995) : 56]

The successful candidate **must** be able to demonstrate: an understanding of and commitment to the aims and objectives of Local Agenda 21; a high level of technical understanding of current environmental issues; proven managerial and leadership skills, and the ability to work across disciplines; the desire and ability to turn complex concepts into practical solutions. [1971-053 (1995) : 72]

**You must** be able to establish relationships with important research contractors and identify specialist skills and experience. [1971-054 (1995) : 73]

The applicant **must** be able to work as a member of a team and be able to communicate effectively at all levels. [1971-059 (1995) : 74]

The candidate **must** have English as mother tongue and a sound working knowledge of German. [1971-063 (1995) : 75]

A lateral thinker, with a creative approach to problem solving, **you must** have excellent project and people management skills, with the tenacity to take projects from conception to completion. [1971-094 (1995) : 81]

Holidays **must be arranged** to take into account the care of the long term cell lines and the availability of patients who are only suitable for study during the months of May to October. [1976-022 (1995) : 68]

The successful candidate, who **must** be a non-UK citizen, **will** play a vital role in the research programme of several of the UK and EU users on our Synchrotron Radiation Source for reflection-absorption infrared spectroscopy and other experiments, necessitating regular visits to other Laboratories in the HCM network (in particular Italy and France). [1976-037 (1995) : 72]

**and must** provide evidence of ability to conduct a high quality, independent experimental research programme in an area of analytical chemistry. [1976-056 (1995) : 76]

Candidates **should** be UK or EC citizens, **must** be prepared to spend extended periods in Kenya conducting fieldwork and **should** have a good honours degree (2:1 or better) in soil, plant, environmental or agricultural science. [1976-069 (1995) : 79]
You must also have good communication skills as forging relationships with suppliers is essential. [1976-079 (1995) : 82]

Applicants must be prepared to take an active role in CSMA's business development activities. [1976-093 (1995) : 85]

Entrants must be currently registered for a Ph.D. at an internationally recognised university. [1980-001 (1995) : 47]

Another task involves seeing a drug through the biological screening processes which it must pass during development. [1980-006 (1995) : 54]

You must also be prepared to travel. [1980-008 (1995) : 56]

You must have a full driving licence. [1980-012 (1995) : 58]

Candidates must be a national of one of the European Union Member States. [1980-015 (1995) : 58]

Commission staff must be available to work in any of the Commissions places of activity and in many cases outside their country of origin. [1980-015 (1995) : 58]

Candidates must have a thorough knowledge of one official European Union language (Danish, Dutch, English, Finnish, French, German, Greek, Italian, Portuguese, Spanish or Swedish) and a satisfactory knowledge of a second European Union language. [1980-015 (1995) : 58]

The successful applicant for one of the posts must be available to take up post before launch. [1980-017 (1995) : 59]

Candidates must be a national of one of the European Union Member States. [1980-024 (1995) : 61]

Commission staff must be available to work in any of the Commission's places of activity and in many cases outside their country of origin. [1980-024 (1995) : 61]

Candidates must have a thorough knowledge of one official European Union language (Danish, Dutch, English, Finnish, French, German, Greek, Italian, Portuguese, Spanish or Swedish) and a satisfactory knowledge of a second European Union language. [1980-024 (1995) : 61]

Candidates must be committed, self motivated, and be able to liaise confidently with clients at all levels. [1980-029 (1995) : 62]

Candidates must be a national of one of the European Union Member States. [1980-052 (1995) : 69]

Commission staff must be available to work in any of the Commission's places of activity and in many cases outside their country of origin. [1980-052 (1995) : 69]

Candidates must have a thorough knowledge of one official European Union language (Danish, Dutch, English, Finnish, French, German, Greek, Italian, Portuguese, Spanish or Swedish) and a satisfactory knowledge of a second European Union language. [1980-052 (1995) : 69]

Candidates must be a national of one of the European Union Member States. [1980-073 (1995) : 73]

Commission staff must be available to work in any of the Commission's places of activity and in many cases outside their country of origin. [1980-073 (1995) : 73]

Candidates must have a thorough knowledge of one official European Union language (Danish, Dutch, English, Finnish, French, German, Greek, Italian, Portuguese, Spanish or Swedish) and a satisfactory knowledge of a second European Union language. [1980-073 (1995) : 73]

Applicants must be well motivated, flexible and have the ability to work on their own initiative and in a team. [1980-094 (1995) : 78]

Results must be reconciled with current models of atmospheric chemistry and existing environmental assessment procedures revised, if appropriate. [1980-120 (1995) : 85]

The candidate must be able to demonstrate good management skills and technical awareness of the DNA profiling and PCR operations. [1980-125 (1995) : 86]

For others, the emphasis is on the structuring of the problem and the identification of the main issues to which judgement must be applied. [1984-012 (1995) : 55]
You must be an innovative scientist with a good publication record in the field of animal welfare and have the skills to manage the staff and resources of our animal care services. [1984-013 (1995) : 56]

Applicants must hold a full driving licence, and the successful applicant will be required to pass a high altitude medical examination as some duties may be carried out at an altitude of 14,000 ft. [1984-075 (1995) : 73]

Applicants must be physically fit. [1989-005 (1995) : 57]

You must have well developed interpersonal and team skills, be able to form collaborative alliances with scientists in your own and other organisations, and be able to communicate effectively with the scientific community and industry. [1989-006 (1995) : 58]

You must be a high achiever, and have excellent communication and interpersonal skills, with the ability to work in a team. [1989-022 (1995) : 63]

You also must be able to demonstrate initiative, leadership and the ability to work well within a team. [1989-028 (1995) : 65]

Candidates must make their own arrangements with the departments in which they propose to work [1989-029 (1995) : 66]

Candidates must have their own arrangements with the departments in which they propose to work [1989-050 (1995) : 71]

Candidates have a hands on, positive attitude and be capable of working within a team. [1989-059 (1995) : 73]

She/he must be able to demonstrate the ability to work in collaboration with other researchers [1989-079 (1995) : 77]

She/he also must possess high-level research management skills. [1989-082 (1995) : 78]

She/he must be able to manage project resources (financial, human and capital) with minimal supervision [1989-083 (1995) : 78]

Candidates must be available to start work at the latest in October 1995. [1989-091 (1995) : 81]

Educated to degree level in a relevant discipline and possessing a postgraduate qualification in the field of plant biochemistry and/or physiology, you should have relevant research experience in a plant biology laboratory and must be a flexible, cooperative team player with good communication skills. [1989-100 (1995) : 83]
| Co | The applicant **must** have a working computer knowledge, be able to deal with those who have not, and be prepared to travel extensively. [1989-116 (1995) : 86] |
| Co | In addition, **you must** have excellent record keeping skills and meticulous attention to detail, as you **will** have, or **will** develop on the job, the ability to design, direct and report studies within a GLP environment. [1993-027 (1995) : 59] |
| Co | **You must** have good interpersonal and reporting skills and a lively enquiring mind. [1993-041 (1995) : 64] |
| Co | Applicants **must** possess excellent all-round communication skills, a well-organised approach and a good eye for detail. [1993-083 (1995) : 74] |
| Co | **You must** have excellent record keeping skills and meticulous attention to detail, as you will have, or will develop on the job, the ability to design, direct and report studies within a GLP environment. [1993-027 (1995) : 59] |
| Co | **You must** demonstrate the ability to present scientific data, either in written or oral form. [1998-016 (1995) : 78] |
| Co | **You must** be able to offer: Good written and oral communication skills. A practical approach, balancing firmness with tact. The confidence to deal with difficult situations. An ability to interpret and implement legislation. [1998-050 (1995) : 88] |
| Co | The Technicians are required to undertake general production duties which involves working with products of high value and applicants **must** be able to demonstrate a mature and responsible attitude to work. [1998-065 (1995) : 92] |
| Co | Applicants **must** be flexible, motivated, have good organisation abilities, attention to detail, excellent communication skills, experience with Windows-based software and be willing to travel both within the UK and overseas. [1998-069 (1995) : 93] |
| Co | The candidate **must** be able to develop new ideas and carry through projects from proposal stage to completion. [1998-079 (1995) : 95] |
| Co | Candidates **must** be able to show familiarity with GLP and GMP requirements, and at least a good understanding of ISO9001 standards, with considerable statistical data analysis practice. [1998-096 (1995) : 101] |
| Co | To succeed you **must** have good communication and interpersonal skills with the ability to work under pressure. [1998-101 (1995) : 102] |
| Co | **You must** be self-motivated, able to organise and plan, have excellent interpersonal skills and be able to operate successfully in a dynamic environment. [2002-020 (1995) : 60] |
| Co | The vacancy is for five years on a fixed-term contract; there may be a field work requirement either from a ship, or at a HAS research station during the summer, therefore applicants **must** be physically fit. [2002-014 (1995) : 58] |
| Co | The candidate **must** be able to develop new ideas and carry through projects from proposal stage to completion. [2002-020 (1995) : 60] |
| Co | The candidates **must** have a significant and proven experience in food process research and equipment development. [2002-020 (1995) : 60] |
| Co | **You must** also combine proven analytical and problem-solving skills with a practical can-do approach, and be capable of working both independently and as part of a highly motivated team. [2002-028 (1995) : 63] |
| Co | **You will** be working closely with Professor Megson in one of the following areas: Regular Algorithm Design, High Level Array Design tools, Algorithm Engineering and Hardware Compilation and **must** be able to link effectively with other members of the Parallel, Emergent and Distributed Architectures Laboratory (PEDAL) at Reading. [2002-032 (1995) : 64] |
| Co | They **must** have good data interpretation and communication skills and be particularly attracted to working under the constraints of a commercial research operation. [2002-043 (1995) : 68] |
| Co | Applicants **must** be British. [2002-050 (1995) : 70] |
| Co | The introduction of mass higher education has inevitably meant that today's students can expect less individual attention than their predecessors and therefore they **must** be more autonomous. [2006-007 (1995) : 61] |
| Co  | Good communication skills are required and an ability to take the initiative and work independently must be demonstrated. [2006-025 (1995) : 68] |
| Co  | The successful candidate must also have proven management ability, a high level of interpersonal skills, the ability to communicate effectively both verbally and in writing, and will be expected to contribute significantly to the growth and direction of the Metabolism Department. [2006-049 (1995) : 75] |
| Co  | The successful candidate must also have strong interpersonal skills and the ability to co-ordinate the work of Technicians. [2006-049 (1995) : 75] |
| Co  | The person must be self-motivated and be able to work well as part of a team. [2006-064 (1995) : 78] |
| Co  | Personal details supporting the claim of such a candidate must be provided in writing as soon as possible. [2006-074 (1995) : 81] |
| Co  | Not only do these have to satisfy the most stringent health, safety and quality standards, they must also comply totally with any claims made on the packaging. [2006-079 (1995) : 83] |
| Co  | Highly knowledgeable of your field, but still an avid information seeker, you must also be able to communicate effectively with people at all levels. [2006-079 (1995) : 83] |
| Co Di| Candidates must be UK/EC nationals and have a 1 or 2i degree in chemistry. [1993-067 (1995) : 70] |
| Co Ex| Ideally with laboratory experience, you must be a proven team worker willing to learn new techniques and adapt to work on different projects, both in vivo and with cells in vitro. [1980-047 (1995) : 68] |
| Co Ex| You must have supervisory experience and be able to lead and motivate a team to meet tight deadlines. [1989-013 (1995) : 61] |
| Co Ex| She/he must have demonstrated the ability to work with a diverse range of organisations and individuals in developing and developed world institutions as seen from her/his previous experiences. [1989-079 (1995) : 77] |
| Co Ex| The appointee must be an active researcher with a record of high quality published output and proven success in the attraction of external funding. [1989-095 (1995) : 82] |
| Co Ex| In addition, you must be computer literate with experience in common database, spreadsheet and graphic packages (preferably MS Windows). [2002-080 (1995) : 78] |
| Di  | Applicants must have a Ph.D. or equivalent research experience. [1959-029 (1995) : 51] |
| Di  | Applicants must have a degree or equivalent in Biological Sciences. [1959-089 (1995) : 66] |
| Di  | To qualify you must have a good first degree in an area of earth science, including a significant computing element. [1963-039 (1995) : 59] |
| Di  | A typical candidate must have a mathematics degree including optimisation/optimal control theory and a postgraduate qualification. [1967-024 (1995) : 70] |
| Di  | Applicants must have a HNC/D in medical laboratory science or BSc in microbiology or related subject (or equivalent). [1967-073 (1995) : 82] |
| Di  | Candidates must have (or expect to attain) a good honours degree in a suitable subject area. [1971-030 (1995) : 65] |
| Di  | Candidates must hold a relevant first or upper second class honours degree, a postgraduate qualification would be an advantage. [1971-040 (1995) : 68] |
| Di  | Applicants must have a BSc in a Microbiological subject or Plant Pathology. [1971-048 (1995) : 70] |
| Di  | Applicants must be qualified to at least degree level in chemistry. [1971-059 (1995) : 74] |
| Di  | Applicants must have a Ph.D. in organic synthesis. [1971-096 (1995) : 82] |
| Di  | Applicants must have an honours degree or equivalent in a chemistry-related subject, a Ph.D. or equivalent with a significant chemical content, research publications [1976-056 (1995) : 76] |
| Di  | Applicants must hold State Registration in Histology and be an Associate or Fellow of the Institute of Biomedical Sciences. [1976-076 (1995) : 81] |
Applicants **must** be suitably qualified chemists or chemical engineers for an ICI-funded lectureship in heterogeneous catalysis within the Department of Chemistry. [1980-031 (1995) : 64]

Applicants **must** have, or expect to obtain, a first or upper second class honours degree in microbiology, genetics, biochemistry or a related subject. [1980-105 (1995) : 80]

Candidates **must** have or expect to gain a 1st Class or Upper 2nd Class degree in a relevant subject. [1984-067 (1995) : 72]

Applicants **must** have a degree (or equivalent) in a relevant subject. [1984-075 (1995) : 73]

You **must** have a degree or equivalent in a relevant scientific subject. [1984-084 (1995) : 75]

Applicants **must** have a minimum of an HND or equivalent in biological or environmental science. [1989-069 (1995) : 75]

You **must** have a degree or equivalent in a relevant scientific subject. [1989-079 (1995) : 77]

The person we require **must** hold a Ph.D. with proven track record in research obtained from a range of developing countries. [1989-083 (1995) : 78]

The person we are looking for **must** hold a Ph.D. in economics, sociology, anthropology or other appropriate social science discipline. [1993-007 (1995) : 74]

Applicants **must** have a First or Second Class Honours Degree in a scientific subject with a sound knowledge of British Quaternary Geologic (Stratigraphy)/Geomorphology. [1998-007 (1995) : 74]

Applicants **must** be educated to degree level in a Science [1998-011 (1995) : 76]

Applicants **must** have at least a lower second class honours degree, or equivalent primary qualification in a relevant discipline, and hold, or expect to obtain shortly, a Ph.D in biochemistry, microbiology, pharmacy or related discipline. [1998-016 (1995) : 78]

Candidates **must** have a degree (or equivalent) in computing or computer applications. [1998-016 (1995) : 78]

You **must** be completed or have completed within the last three years, a Ph.D degree. [1998-016 (1995) : 78]

Candidates **must** have at least degree level Chemistry plus a minimum of three publications. [1998-050 (1995) : 68]

Candidates **must** be State Registered and **will** be expected to hold relevant postgraduate qualifications. [1998-060 (1995) : 90]

You **must** have a basic degree in a biological or quantitative science. [2002-033 (1995) : 65]

You **must** have a good honours degree in a biological or quantitative science. [2002-080 (1995) : 78]

The Trainee **must** have a BSc in Biomedical Science accredited for State Registration training by the CPSM. [2006-088 (1995) : 85]

Candidates **must** be post-doctoral in the bio-medical field and aged under 34 years, with evidence of independent research, including at least two years' post-doctoral research, and with an interest in a scientific aspect of preventive medicine. [2006-074 (1995) : 81]

Candidates **must** have at least degree level Chemistry plus a minimum of three publications. [2006-088 (1995) : 85]

Candidates **must** have a Ph.D. with postdoctoral experience and demonstrated ability to work independently. [2006-088 (1995) : 85]

Candidates **must** have at least an upper second class honours degree in chemical/process/mechanical engineering or physics and have a working knowledge of FORTRAN. [1984-015 (1995) : 57]
Applicants must have a minimum of a 2i BSc degree in Chemistry with a strong interest in synthetic chemistry. [1984-047 (1995) : 66]

Applicants must possess strong scientific leadership and management skills. [1989-079 (1995) : 77]

Analytical, methodical and with an exceptional eye for detail, you must be able to interpret and manage large amounts of technical/medical information. [1993-020 (1995) : 57]

To apply you must be qualified to degree level in chemistry or related subject preferably with a knowledge of electrochemistry or applied catalysis, and a broad appreciation of chemical and physical techniques, plus the ability to lead projects. [1993-023 (1995) : 58]

He/she must be able to demonstrate an understanding of the application of skin physiology to commercial cosmetic NPD and be conversant with the latest trends in the Cosmetics/Toiletries industry. [1998-011 (1995) : 76]

You must be educated to honours degree standard, and a knowledge of physics, Fortran and computer software would be an advantage. [1998-028 (1995) : 81]

Applicants for all the posts, must be highly motivated and hold a degree in environmental science, civil engineering or geography. [1998-052 (1995) : 89]

Applicants must have a degree in appropriate subject, and must ordinarily be resident in the UK. [2006-081 (1995) : 83]

To qualify you MUST have ALL the following: Strong personality; good imaginative communication skills; first class specialist knowledge of Natural History (with ability to handle a wide range of animals on camera); creativity, borne out of substantial proven track record in Performing Arts, Stand-up Comedy or similar; and within the twenties age group. [1971-002 (1995) : 55]

You must have a working knowledge of EPA 1990 and COPA 1974; have a minimum of one year’s Waste Management or other relevant environmental work experience; Possess good communication and computer skills including use of word processors/databases/spreadsheets; be able to work on own initiative; possess an HNC or recognised equivalent in Chemistry, Environmental Science, Chemical Engineering or other relevant subject. [1980-065 (1995) : 72]

Applicants who will probably hold a higher degree must demonstrate: 1. Excellent communication and interpersonal skills and the ability to bring together and motivate multi-disciplinary teams. 2. Experience in planning and conducting research projects from their inception to their peer reviewed publication. 3. Training and skills in areas of research methods, experimental design or statistics. 4. An understanding of the reformed NHS and the need to more effectively manage, promote and fund research and development within the new service. [2006-077 (1995) : 82]

You will have a sound knowledge of HPLC, GC and AA and must be able to work in a GLP/GMP environment. [1959-035 (1995) : 53]

Candidates must be widely experienced and should have a post graduate qualification. [1959-051 (1995) : 57]

Working initially on chemistry based instrumentation, you must have experience of modern analytical techniques including Atomic Absorption, Gamma Spectrometry, Liquid Scintillation counting, Ion Exchange Chromatography and classical analytical techniques. [1959-052 (1995) : 58]

The scientific manager must have good management skills, extensive experience in most aspects of the work of a biomedical services unit, particularly with respect to breeding and transgenic technology. [1959-076 (1995) : 63]

Preferably with a Science degree to Masters level, you must be experienced in managing networks of libraries and in working with biological or agricultural literature. [1963-006 (1995) : 51]

Applicants must be State Registered with the FIBMS or equivalent and relevant experience. [1963-018 (1995) : 54]

</table>
Candidates must hold an UNIVERSITY DEGREE in a relevant subject with post-graduate qualification and at least 15 years relevant post-graduate experience. [1980-073 (1995) : 73]

Candidates must have experience in the following: Vacuum techniques, Machining, Optical Engineering and Thin Films Growth and to provide administrative support when required. [1980-094 (1995) : 78]

In addition to the qualifications required for entry, applicants must also have undertaken postgraduate research work, or had other relevant experience since qualifying, the minimum periods being as follows: [1984-008 (1995) : 53]

You must be an experienced clinical scientist with international project management experience. [1984-020 (1995) : 59]

Must have at least five years' pharmaceutical industry experience and be familiar with project management techniques. [1984-032 (1995) : 62]

Candidates must have experience in chemical analysis, and experience in instrumental analysis is desirable. [1984-045 (1995) : 66]

Applicants must have relevant qualifications and experience in optoelectronics or optical fibre technology. [1984-047 (1995) : 66]

Applicants must have an honours degree or equivalent in pharmacology, biochemistry, physiology or other related scientific subject; a Ph.D. or equivalent, with specialisation in cardiovascular pharmacology; evidence of research ability, particularly a good publication record commensurate with age/experience and a record of significant academic achievement, and cell isolation and culture experience. [1984-050 (1995) : 68]

Applicants must have at least 5 years experience in a scientific, research or engineering environment in a design or development capacity. [1984-075 (1995) : 73]

Being a graduate in either a physical science or in chemical engineering and possessing at least five years' postgraduate experience in the FMCG R&D sector, applicants must also have expertise of hard surface cleaners and a broad knowledge of one of the following technologies: emulsions, polymers, aerosols or surfactants. [1989-035 (1995) : 68]

The person we require must hold a Ph.D. in economics, sociology, or anthropology and have at least ten (10) years research experience with an established track record. [1989-079 (1995) : 77]

The person we are looking for must hold a Ph.D. in the social or biological sciences or in farming systems with significant field experience in managing relevant research projects in a developing country setting. [1989-083 (1995) : 78]

You must have a first or second class honours degree in an appropriate science and experience in clinical cytogenetics. [1989-090 (1995) : 80]

Applicants must have a first degree in a related scientific discipline and be familiar with basic laboratory practice gained in a molecular biology environment. [1989-109 (1995) : 84]

As the Deputy to the Chief Executive, the appointee must have achieved the scientific status to enable him / her to exert a major influence on the success of the scientific work carried out at Australia's national nuclear science organisation. [1993-008 (1995) : 54]

You must have a Ph.D. in a biological science and a strong record in relevant research, ideally in evolutionary biology and systematics. [1993-035 (1995) : 62]

As a minimum, you must have a degree in pharmacy, chemistry or the biological sciences and at least five years' experience in a responsible position in pharmaceutical production or pharmaceutical quality control. [1993-041 (1995) : 64]

Applicants must hold a primary degree in biological sciences, biochemistry, molecular biology, pharmacology or other relevant scientific subject, hold a Ph.D. and have two years postdoctoral experience and a good publication record commensurate with experience. [1993-049 (1995) : 66]

Applicants must hold the Certificate of Competence in Cervical Cytology Screening or be state registered and have proven experience of gynaecological cytology. [1993-070 (1995) : 71]
Candidates must have qualifications and experience in environmental chemistry and a good honours degree is essential. [1993-099 (1995) : 78]

With a first degree in Chemistry, Environmental Science or other relevant discipline, you must have at least 10 years experience in contaminated land investigation, evaluation and reporting, preferably in a consultancy environment. [1998-010 (1995) : 75]

And must have at least five years' experience in Toiletries and/or Cosmetics in an FMCG environment. [1998-011 (1995) : 76]

Applicants must have a minimum of five years' experience of skin physiology in a scientific environment, either in the cosmetics or toiletries industry or in consultancy or an academic organisation. [1998-011 (1995) : 76]

Applicants must have experience in one or more of bacteriology, immunodetection methods, monoclonal antibody technology or biomedical device technology, [1998-016 (1995) : 78]

You must be a graduate or equivalent, with either a postgraduate qualification in Information Sciences and/or several years relevant experience in the provision of information services. [1998-022 (1995) : 80]

Applicants must possess ONC, BTEC or equivalent and have at least three years' relevant experience (including any period of training). [1998-030 (1995) : 82]

You must preferably have a relevant higher degree and at least three years' experience relevant to hydrology or hydrometry. [1998-052 (1995) : 89]

Applicants must have expertise in general statistical methods and knowledge of epidemiological / genetic epidemiological methodology would be an advantage. [1998-068 (1995) : 92]

The candidates must have a significant and proven experience in food process research and equipment development. [1998-079 (1995) : 95]

Applicants must have an honours degree in a relevant subject, a post-graduate qualification i.e an MSC or fellowship of the I.B.M.S and minimum of 3 years' experience in diagnostic virology. [1998-098 (1995) : 101]

Volunteers must have experience and a degree in Zoology or Wildlife Management. [2002-044 (1995) : 68]

A graduate in chemistry, ideally with a relevant post graduate qualification, you must have experience of the animal health and livestock industries, preferably supported by a good knowledge of regulatory affairs, safety issues and key authorisation systems. [2002-047 (1995) : 69]

Applicants for this wide-ranging position must have a doctorate in pharmacy and experience of the industrial development of dermatological agents. [2002-070 (1995) : 75]

Applicants must have experience of Raman spectroscopy, preferably coupled with an interest in synthetic organic chemistry. [2002-077 (1995) : 77]

Candidates must have at least four years experience in appropriate research or clinical practice, this post is therefore not suitable as a CAC training post. [2006-012 (1995) : 63]

Applicants must have a life science degree, at least two years' editing or writing experience and a firm grasp of the principles of biomedical research. [2006-053 (1995) : 76]

To qualify, you must be a Chemistry, Microbiology or Food Science graduate with at least five years' food analysis experience and knowledge of laboratory accreditation schemes. [2006-079 (1995) : 83]

In addition you must have at least 3 years' experience of Health and Safety practice in a large organisation, ideally NHS/higher education with a knowledge of and the ability to interpret Health and Safety legislation. [2006-086 (1995) : 84]

Applicants must have an honours degree or equivalent in archaeology or related area, evidence of relevant postgraduate research experience/field archaeology experience and have relevant publications/reports. [2006-096 (1995) : 87]

In addition to possessing a life science degree and substantial regulatory experience, you must be able to coordinate numerous projects - with the meticulous attention to detail demanded by...

</table>
Ca | Overseas students who intend to apply for scholarships administered by the University **must** submit all of their application materials in time for consideration at the first, second or third gathered fields. [2528-085 (2005) : 91]

Co | A Biologist with three years' practical experience, ideally in *in vivo* studies in a similar business, **you must** also be technically versatile, influential and able to gain a personal Home Office licence. [2481-006 (2005) : 55]

Co | Applicants **must** be native English speakers and have the ability to express medical data accurately and concisely. [2481-022 (2005) : 59]

Co | In addition to possessing good IT skills, **you must** be able to influence representatives of industry and have excellent communication skills with both internal and external partners. [2481-033 (2005) : 63]

Co | Projects **must** be undertaken at a UK or RoI university. [2481-035 (2005) : 64]

Co | Applications **must** be submitted on behalf of the student, by the project supervisor. [2481-035 (2005) : 64]

Co | Eligible candidates **must** have spent 4 of the last 5 years outside of Ireland. [2481-054 (2005) : 70]

Co | This is a busy and challenging role in a complex area, therefore **you must** be prepared to work to tight timescales and under pressure from conflicting priorities. [2481-055 (2005) : 70]

Co | Furthermore, **you must** be a team player with excellent communication and organisational skills. [2481-058 (2005) : 71]

Co | You **should** have some knowledge of general aspects of cellular biology (training can be provided) and **you must** have high levels of personal initiative and conscientiousness and overall enthusiasm to interact with others. [2481-074 (2005) : 76]

Co | You **must** demonstrate flexibility and in the future, you **should** expect to work on new scientific areas depending on the success and direction of the project. [2481-074 (2005) : 76]

Co | **You must** be familiar with a range of modern genetic manipulation techniques **and** must demonstrate some aptitude towards managing group facilities and be a team player with a keen interest in supporting scientific research. [2481-074 (2005) : 76]

Co | Applicants for both the Fellowship and the Studentship **must** identify a preferred research centre, an indication of why that centre is particularly appropriate for the research, and confirmation from the relevant head of department that they **will** administer and supervise the Research Fellowship/Studentship. [2481-083 (2005) : 79]

Co | Innovative and flexible, your technical expertise **must** be complemented by the ability to communicate at all levels, both verbally and in writing. [2485-025 (2005) : 65]

Co | Applicants **must** be willing to undergo and satisfy the current Government/MOD Security Vetting procedures prior to a formal offer of employment being made. [2485-025 (2005) : 65]

Co | The candidate **must** be computer-literate and conversant with the use of laboratory information management systems as well as being able to communicate effectively at all levels. [2485-031 (2005) : 68]

Co | Applicants **must** hold (or be willing to obtain) a current New Zealand work permit or be a New Zealand resident. [2485-034 (2005) : 70]

Co | **You must** have the ability to work as a team member providing support to your Line Manager in achieving the department aims and targets, be able to plan and organise your work in an effective manner, be proactive in achieving results by seeing tasks through to completion and possessing tactful influencing and negotiating skills and be a concise and clear communicator both orally and in writing. [2485-060 (2005) : 78]

Co | **Must** be computer-literate. [2485-068 (2005) : 80]

Co | **Must** be able to travel outside normal working hours. [2485-068 (2005) : 80]

Co | Successful candidates **must** pursue their research work at qualifying research bodies in Ireland. [2485-084 (2005) : 86]

Co | Candidates for the post **must** have either an established or a growing reputation for research excellence and a commitment to engineering education. [2485-090 (2005) : 87]
| Co | A natural team player with the personal qualities to relate well with people at all levels, you must be analytical and inquisitive with the logic skills to research for answers efficiently and effectively. [2489-001 (2005) : 58] |
| Co | Applicants must be willing to undergo and satisfy the current Government/MOD Security Vetting procedures prior to a formal offer of employment being made. [2489-014 (2005) : 66] |
| Co | You will be expected to travel to several hospitals and must have a current full driving licence and access to a car. [2489-027 (2005) : 70] |
| Co | This project is collaborative with UK and European partners and the successful candidate must have good collaborative skills. [2489-051 (2005) : 77] |
| Co | You must be physically capable and medically fit to work in Antarctic conditions. [2493-004 (2005) : 55] |
| Co | The ideal candidates must be able to demonstrate a high level of deliverability backed up with strong technical skills. [2493-014 (2005) : 58] |
| Co | You must have a proven track record of developing new business by actively seeking out and following through on new prospects from relevant sources, in chairing meetings and in setting up and managing effective sales presentations. [2493-016 (2005) : 59] |
| Co | They must be able to work independently, as well as fitting readily into a team. [2493-024 (2005) : 62] |
| Co | All students must satisfy BBSRC criteria. [2493-058 (2005) : 72] |
| Co | Adherence to planned timescales is essential and candidates must enjoy thrivng on the pressure and challenge this role brings. [2498-021 (2005) : 58] |
| Co | Candidates must be excellent communicators and be able to combine a practical ‘hands on’ approach with the generation of innovative solutions. [2498-027 (2005) : 59] |
| Co | The candidate must have good project management skills, preferably in an industry environment. [2498-048 (2005) : 67] |
| Co | Candidates will have skills in statistical analysis, and must have experience in Matlab or similar programming environments. [2498-056 (2005) : 70] |
| Co | A highly analytical thinker, preferably with a Masters degree, you must have strong computer literacy and be comfortable working under pressure. [2502-008 (2005) : 57] |
| Co | Applicants must undergo a pre-employment physical to ensure adequate fitness level to wear respirators and Fully Encapsulated Protective Ensemble. [2502-027 (2005) : 63] |
| Co | You must have the ability to analyse and present data both verbally and in written form and be able to organise and manage your own time and experimental protocols. [2502-047 (2005) : 71] |
| Co | You must have good knowledge of the policies and laws relating to chemical policy in Scotland, UK and Europe and of relevant policy developments within the EU, UK and Scotland. [2506-002 (2005) : 54] |
| Co | You must also develop and maintain good communications networks with individuals and organisations relevant to the work, and maintain a high level of knowledge of medical products/technologies, including their manufacture, development and use. [2506-005 (2005) : 55] |
| Co | They must be technically competent, diligent and possess excellent communication skills. [2506-018 (2005) : 61] |
| Co | They must also be adaptable to change and be able to work independently as well as within a team. [2506-018 (2005) : 61] |
| Co | You must be organised and able to work under pressure, handling high workloads whilst maintaining best standards. [2506-028 (2005) : 66] |
| Co | Applicants must be computer-literate, strongly self-motivated, and have good verbal and written communication skills with the confidence to liaise effectively with all levels of management. [2506-063 (2005) : 75] |
| Co | The candidate must meet the eligibility criteria for a BBSRC studentship. [2506-068 (2005) : 77] |
### Co

You must be proficient in the use of standard desktop packages such as MS Word, Lotus Notes and PowerPoint, and have the organisational skills to work on a number of projects simultaneously. [2511-011 (2005) : 55]

You must have good communication skills, good manual dexterity, and an ability to work well with a wide range of patients and staff. [2511-024 (2005) : 59]

You must also be highly organised, an excellent communicator and able to work well with other departments in the UK and Belgium. [2511-035 (2005) : 63]

In all cases, they must enjoy responsibility, have the ability to prioritise and have significant interpersonal skills. [2511-037 (2005) : 63]

Applicants must be willing to undergo and satisfy the current Government/MOD Security Vetting procedures prior to a formal offer of employment being made. [2511-042 (2005) : 66]

In any event the candidate must not have completed more than four years' graduate study by 1st October 2005. [2511-053 (2005) : 71]

Candidates must also demonstrate commitment and enthusiasm for conducting quality research in a stimulating environment, with modern laboratories and equipment. [2511-068 (2005) : 75]

Fully conversant in MS Office applications, you must also be familiar with interpretation of remote sensing imagery and the use of GIS. [2515-009 (2005) : 57]

Candidates must show a practical hands-on approach combined with an aptitude for problem solving and the ability to work within regulatory guidelines and project timescales. [2515-036 (2005) : 68]

You must be familiar with HPLC analytical techniques and their application in analysing biological samples. [2515-039 (2005) : 69]

You must also possess good problem solving skills, be highly motivational, able to communicate effectively and possess a strong customer appreciation, for both internal and external customers. [2515-052 (2005) : 73]

Applicants must be newly appointed to full-time university lectureships in Departments of Science, Engineering and Mathematics. [2515-088 (2005) : 83]

Must have excellent communication and presentation skills [2519-046 (2005) : 69]

Must be based in South east and be willing to travel in UK and Europe [2519-046 (2005) : 69]

In addition, the applicant must have experience in the planning and performing of experiments and the recording and interpretation of data. [2519-048 (2005) : 70]

You must bring a proven record of method development using proteomics techniques, spanning 2-D chromatographic, 2D-PAGE, data acquisition and database searching. [2524-008 (2005) : 54]

You must be able to demonstrate excellent communication, negotiating and influencing skills. [2524-027 (2005) : 62]

Applicants must be willing to undergo and satisfy the current Government/MOD Security Vetting procedures prior to a formal offer of employment being made. [2524-045 (2005) : 66-67]

Candidates must have the right to work in the UK. [2528-017 (2005) : 66]

You must demonstrate the ability to rapidly understand the key features, benefits and limitations of a wide range of technologies and have strong analytical skills and the ability to communicate complex technical ideas to a range of audiences. [2528-030 (2005) : 71]

You must be organised and able to work under pressure, handling high workloads whilst maintaining best standards. [2528-041 (2005) : 75]

The applicant must be able to demonstrate a mature, high standard of personal presentation and interpersonal skills, be computer literate with excellent written and verbal presentation skills. [2528-047 (2005) : 79]

Applicants must be native English speakers and have the ability to express medical data accurately and concisely. [2528-048 (2005) : 79]

If the position involves Antarctic service, you must be physically capable and medically fit to work in Antarctic conditions. [2528-050 (2005) : 80]

You must be self motivated, have good communication skills and possess a strong background in semiconductor research and/or power electronics. [2528-062 (2005) : 85]

All candidates must expressly state on the front of their application their preferred location. [2580-058 (2006) : 74]

All applications must be returned by 2 January 2007. [2580-059 (2006) : 75]

All applications must be returned by 2 January 2007. [2580-059 (2006) : 75]

With each application you must include an application form, an EEO Information Statement, a covering letter, contact details for three referees and one copy of your full curriculum vitae. [2580-064 (2006) : 77]

With a minimum of seven years recent, relevant, laboratory-based experience, together with a good first degree and PhD in a relevant subject, you must be a proven strong team player with experience of supervising junior staff and the ability to develop research ideas to meet customer needs. [2533-008 (2006) : 47]

You must also have excellent presentation skills, the ability to explain scientific ideas and concepts to non-scientific staff, an organised and methodical approach and a commitment to the highest standards of health and safety. [2533-008 (2006) : 47]

With a minimum of four years, recent, relevant, laboratory-based experience, a good degree or equivalent in Chemistry, Physical Sciences or other related subject, you must be a strong team player with a proven ability to develop research ideas to meet customer needs, have sound presentation skills, together with an organised and methodical approach. [2533-008 (2006) : 47]

Applicants must be willing to satisfy Government/MOD Security Vetting procedures prior to a formal offer of employment being made. [2533-008 (2006) : 47]

Candidates must be strong team players with common sense, good analytical skills, and impartiality. [2533-014 (2006) : 50]

You must have excellent team working and communication skills (both verbal and written) as you will be required to support team members in responding to technical enquiries regarding our products and communicate with external customers. [2537-023 (2006) : 66]

You must be flexible as due to the continued growth of the Unipath/IMI product range the responsibilities within the role may change. [2537-023 (2006) : 66]

Applicants must be eligible to work in the UK. [2537-023 (2006) : 66]

A good team worker, you must be able to work flexible hours and occasional overseas travel may be involved. [2537-036 (2006) : 70]

You must also be able to travel both domestically and internationally on occasion. [2537-046 (2006) : 73]

Applicants must be of high intellectual calibre, ambitious, willing to work in an interdisciplinary and transnational environment and to experience academic as well as industrial approaches. [2537-047 (2006) : 73]
<p>| Co | <strong>You must</strong> be familiar with a range of modern genetic manipulation techniques and microscopy and be able to demonstrate some aptitude towards managing group facilities and operating as part of a team. [2537-062 (2006) : 79] |
| Co | <strong>He or she must also have good interpersonal and team working ability.</strong> [2541-002 (2006) : 56] |
| Co | <strong>You must</strong> bring the vision and energy to negotiate this successfully. [2541-008 (2006) : 60] |
| Co | <strong>You must</strong> be able to multi-task and offer a flexible approach to problem solving to satisfy our customers' needs. [2541-010 (2006) : 60] |
| Co | <strong>All applicants must be eligible to work in the UK.</strong> [2541-025 (2006) : 67] |
| Co | <strong>You must</strong> stay informed of both National and European regulatory procedures surrounding the licensing of medicinal products. [2541-032 (2006) : 71] |
| Co | <strong>You must</strong> also be able to demonstrate effective customer service, management, organisation, problem solving and delegation skills and have the ability to build relationships at senior levels within and outside the MHRA. [2541-036 (2006) : 73] |
| Co | <strong>They must</strong> also be able to demonstrate the leadership and vision required to maintain the Applied Science Division, as a key component of CCLRC’s future technology needs. [2541-042 (2006) : 76] |
| Co | <strong>You must</strong> demonstrate an ability to prioritise your own workload, have excellent communication skills and be able to work as part of a multidisciplinary team. [2541-043 (2006) : 76] |
| Co | A graduate, preferably in science, with 3 years' experience in a clinical laboratory and 2 years' experience of QM in a CPA/ISO9000 environment, <strong>you must</strong> have exceptional organisational, administrative and interpersonal skills. [2541-049 (2006) : 78] |
| Co | <strong>You must</strong> also be able to demonstrate effective customer service, management, organisation, problem solving and delegation skills and have the ability to build relationships at senior levels within and outside the MHRA. [2541-036 (2006) : 73] |
| Co | <strong>PC literate and an excellent communicator verbally and in writing. you must</strong> be able to work both independently and as part of a tight-knit team. [2541-049 (2006) : 78] |
| Co | We are looking for highly motivated scientists with an independent outlook, but who <strong>must be able to work in a team.</strong> [2541-062 (2006) : 81] |
| Co | <strong>As an Application Scientist for ADInstruments you will be expected to sell and advise customers in a highly technical market, and must have the ability to develop a good understanding of the ADInstruments product range and its practical application areas.</strong> [2541-064 (2006) : 82] |
| Co | <strong>You must</strong> be willing to work flexible hours and be able to travel within the UK and, on a regular basis, for periods of up to a month in India. [2541-074 (2006) : 84] |
| Co | Applicants <strong>must</strong> satisfy BBSRC criteria. [2541-098 (2006) : 94] |
| Co | <strong>On the personal front, you must be able to think creatively, innovate and actively build networks with diverse scientific communities.</strong> [2545-011 (2006) : 62] |
| Co | <strong>In order to comply with Marie Curie programme rules, you must not be a UK national or have resided or carried out your main activity in the UK for more than 12 months in the three years immediately prior to commencement.</strong> [2545-011 (2006) : 62] |
| Co | Applicants <strong>must</strong> have solid database development experience (Oracle) as well as Java and XML experience. [2545-013 (2006) : 63] |
| Co | <strong>Applicants must</strong> have solid database development experience (Oracle) as well as Java and XML experience. [2545-019 (2006) : 65] |
| Co | <strong>You must</strong> have excellent written and oral communication skills, and an organised and adaptable approach is essential. [2545-019 (2006) : 65] |
| Co | <strong>You must</strong> be able to demonstrate commitment, self-motivation, good communication skills, determination, and a good standard of IT skills. [2545-020 (2006) : 66] |
| Co | <strong>You must</strong> have an in-depth understanding of all aspects of DMPK, with particular emphasis on the application of pharmacokinetics in drug discovery. [2545-027 (2006) : 69] |
| Co | <strong>You must</strong> be a very organised team worker, a good record keeper with excellent computing skills. [2545-033 (2006) : 72] |
| Co | As well as a commitment to success through multi-disciplinary teamwork, <strong>you must</strong> be self-motivated and exhibit excellent communication skills. [2545-035 (2006) : 73] |
| Co | Applicants <strong>must</strong> be native English speakers and have the ability to express medical data accurately and concisely. [2545-038 (2006) : 74] |</p>

<td>The sustainable exploitation and management of these fish stocks <strong>must be underpinned</strong> by sound fishery science. [2541-048 (2006) : 78]</td>
</tr>
<tr>
<td>Di</td>
<td><strong>You must</strong> have or expect to receive a first or upper second class honours degree in a Biological Science subject. [2541-098 (2006) : 94]</td>
</tr>
<tr>
<td>Di</td>
<td>To be eligible for this role <strong>you must</strong> hold a qualification in Forensic Science to BSc level. [2545-020 (2006) : 66]</td>
</tr>
</tbody>
</table>
Applicants must hold or be expecting to gain a good Bachelors Degree (2:1) in a relevant subject and be from the UK or EU. [2545-093 (2006) : 94]

You must have a degree in a quantitative subject or a degree which includes a substantial quantitative element. [2550-029 (2006) : 70]

Applicants must be graduates, with qualifications reflecting a substantial element of molecular microbiology/epidemiology and possess a wide range of laboratory skills, but with a focus on molecular techniques. [2550-042 (2006) : 76]

You must hold a degree in a relevant Science discipline while a postgraduate degree in hydrogeology would be desirable. [2554-015 (2006) : 64]

You must hold a minimum of an HNC or vocational equivalent in a relevant civil engineering, geology or related earth sciences discipline. [2554-015 (2006) : 64]

Applicants must have a BSc, or equivalent, in biology or related discipline. [2554-052 (2006) : 80]

Applicants must hold a relevant PhD. [2554-065 (2006) : 84]

Applicants must have as a minimum a first degree in Mechanical, Automotive or General Engineering or other relevant subject. [2554-071 (2006) : 85]

Applicants must have, or expect to obtain a 2.1 honours degree (or its equivalent). [2554-092 (2006) : 91]

Prospective applicants must possess a degree in chemistry, biological science or pharmacy; [2558-032 (2006) : 74]

Applicants must hold HPC Registration and an appropriate MSc and/or FIBMS. [2558-071 (2006) : 88]

You must be educated to at least ONC level (or equivalent) in any biological science discipline. [2558-078 (2006) : 91]

Specifically award recipients must have a PhD or be of postdoctoral standing. [2572-069 (2006) : 90]

Candidates must have a PhD in a chemical, physical or food-related discipline. [2576-053 (2006) : 79]

You must be educated to at least HNC (or equivalent) in any biological science discipline. [2576-078 (2006) : 87]

Applicants must hold an honours degree in the biological sciences. [2576-081 (2006) : 88]

The candidate must be qualified to undertake a PhD [2576-094 (2006) : 91]

Candidates must have a PhD or equivalent in chemistry or a related subject. [2580-024 (2006) : 62]

Applicants must have, or be about to obtain, a PhD in a relevant discipline such as evolutionary or molecular ecology and have a keen interest in sexual selection and sperm competition. [2580-083 (2006) : 87]

You must be a proactive graduate chemist with a good honours degree as a minimum requirement. [2563-002 (2006) : 50]

You must • be educated to higher degree level in any numerate scientific discipline, requiring high-volume automated data analysis • have demonstrable, suitable industrial or academic experience in scientific software development on UNIX, LINUX, MacOS or similar platforms • be highly numerate with programming skills encompassing at least C/C++ and Perl/Python • ideally have working knowledge of relational database systems and/or common bioinformatics analysis toolkits • be able to demonstrate a track record of project delivery within an objectives-oriented environment. [2576-012 (2006) : 65]

Applicants must have post-graduate qualifications and/or experience relevant to epidemiology, public health or risk analysis. [2533-040 (2006) : 58]

Applicants must have a degree (or equivalent experience), be proficient computer users and have at least two years' relevant experience, preferably in a medical research environment. [2533-048 (2006) : 60]

The successful applicant must have an honours degree in a relevant biological science, and a minimum of three years' postgraduate research experience. [2533-049 (2006) : 60]

</tbody>
</table>
Di Ex Co  You must have a PhD in a relevant area, experience in experimental magnetic resonance in solid materials and a willingness to work across the whole MR group portfolio. [2572-082 (2006) : 95]

E  We must make sure it is recognised as the foundation of public policy. [2545-004 (2006) : 56-59]

E  Decisions that affect us all must be made with the best research evidence available. [2545-004 (2006) : 56-59]

E  As we continue to translate scientific findings into new treatments for patients, we must also translate science into information that creates responsible public policy and helps people reduce their risk of disease. [2545-004 (2006) : 56-59]

E  Gaps in the research portfolio are another thing we must address. [2545-004 (2006) : 56-59]

E  With 7.8 million customers we must be doing everything right [2567-013 (2006) : 56]

E  To thrive, big pharma and biotech must draw on a wealth of expertise. [2576-003 (2006) : 58-61]

E  Once a drug is ready for large-scale manufacture, scientists and engineers must monitor the whole process most carefully. [2576-003 (2006) : 58-61]

E  First stop should be the company's annual report, where public businesses must include detailed information about their drugs pipeline. [2576-003 (2006) : 58-61]

Ex  The applicant must have at least five years post-doctoral experience in areas such as nanocomposites, bionanotechnology or nanostructured materials. [2537-038 (2006) : 70]

Ex  The applicant must have at least five years post-doctoral experience in areas such as solid state light sources, fibre optic sensors, electro-optic materials or laser design (especially femtosecond lasers). [2537-038 (2006) : 70]

Ex  Candidates must possess previous supervisory experience. [2558-032 (2006) : 74]

Ex  You must have a minimum of two years’ experience in laboratory quality assurance and knowledge of the principles of formal management systems, particularly ISO17025. [2567-028 (2006) : 62]

Ex  You must be able to demonstrate broad medical writing experience across a range of projects and an ability to assimilate medical and marketing information and present it in a learning context. [2572-008 (2006) : 62]

Ex  As well as a relevant degree or equivalent, you must also have some experience of innovation and IP management, preferably in a healthcare technology-related field. [2572-058 (2006) : 84]

Ex  They must be experienced in the design, planning and organization of QWBA (quantitative whole body autoradiography)/DME studies. [2576-015 (2006) : 66]

Ex  You must be able to demonstrate experience of working in the field of Protein expression. [2576-078 (2006) : 87]

Ex  You must be experienced in a laboratory environment. [2580-056 (2006) : 72]

Ex Co  Applicants must have previous supervisory/management experience combined with good organisational, communication and interpersonal skills. [2545-029 (2006) : 70]

Ex Co  You must have proven experience of managing staff and a thorough understanding of GCP regulations and clinical trial monitoring. [2567-070 (2006) : 79]

Ex Co  Candidates must have a minimum of seven years’ experience in Clinical Cytogenetics and will be expected to provide evidence of relevant laboratory training in the form of certification and/or appropriate post-graduate qualification. [2580-040 (2006) : 67]
All this plus top employer profiles specialising in science and engineering disciplines to help you choose the right employer for you, it’s a must! [2689-015 (2009) : 51]

Photoshop experience is a must; working knowledge of Final Cut or Flash would be a bonus. [2694-027 (2009) : 63]

Understanding the science involved is critical, so a 1st degree in a hard science subject is a must. [2715-010 (2009) : 54]

We are looking for an enthusiastic, creative individual with excellent written and verbal communication skills are a must. [2737-005 (2009) : 56]

Applications must be sent before January 14th, 2009 [2689-033 (2009) : 59]

Shortlisted applicants will be contacted within three weeks of the closing date, after which you must assume that on this occasion your application has been unsuccessful. [2694-011 (2009) : 56]

Please note all applications must be accompanied by a Forestry Commission application form. [2694-022 (2009) : 60]

Potential applicants must contact directly the University where they would like to work to discuss their interests and arrange a visit. [2694-046 (2009) : 71]

Applications must consist of a current CV, contact details of at least two academic referees, evidence of degree performance, and a completed application form [2694-057 (2009) : 75]

Applications must be returned by 20 March 2009. [2698-012 (2009) : 54]

Completed application form must be returned by 20 March 2009. [2698-013 (2009) : 54]

Applications for this post must be made online at http://jobs.mrc.ac.uk inputting the reference number DUNN09/077. [2698-034 (2009) : 62]

Candidates must provide a covering letter detailing precisely their research experience to date in the area of crystal engineering and organic solid state chemistry. [2702-052 (2009) : 68]

Applications must be returned by 29 May 2009. [2706-020 (2009) : 55]

Applications letters with a two page cv and details of two academic referees must be emailed to lil.shortland@ukscf.org no later than 11th May 2009. [2706-043 (2009) : 63]

Please note all applications must be accompanied by a Forestry Commission application form. [2711-013 (2009) : 55]

Applications for this post must be made online at http://jobs.mrc.ac.uk inputting the reference number MBU09/254. [2711-015 (2009) : 56]

Completed application forms must be returned by 12 June 2009 [2711-020 (2009) : 57]
<p>| Ca | Applications for this role <strong>must be made</strong> online at <a href="http://jobs.mrc.ac.uk">http://jobs.mrc.ac.uk</a> inputting reference CEN09/230. [2711-029 (2009) : 60] |
| Ca | Applicants <strong>must</strong> apply online by visiting our website at: <a href="http://www.wmin.ac.uk/vacancies">www.wmin.ac.uk/vacancies</a> [2715-028 (2009) : 61] |
| Ca | Applications for these roles <strong>must be made</strong> online at <a href="http://jobs.mrc.ac.uk">http://jobs.mrc.ac.uk</a> [2719-010 (2009) : 52] |
| Ca | Applications <strong>must be returned</strong> by 7 August 2009. [2719-020 (2009) : 58] |
| Ca | Please note all applications <strong>must be accompanied</strong> by a Forestry Commission application form. [2728-010 (2009) : 56] |
| Ca | Applications <strong>must be returned</strong> by 16 October 2009. [2728-018 (2009) : 58] |
| Co | Extensive travel within the UK and Europe <strong>will</strong> be required, therefore you <strong>must</strong> have a valid driving licence, or be able to call upon suitable alternate means of transport. [2689-014 (2009) : 51] |
| Co | <strong>You</strong> <strong>must</strong> have a valid driving licence, or be able to call upon suitable alternate means of transport as some travel to visit customers <strong>will</strong> be required. [2689-014 (2009) : 51] |
| Co | Applicants <strong>must be well organised, demonstrate investigative flair and a gift for networking.</strong> [2689-018 (2009) : 52] |
| Co | Applicants <strong>must be citizens/nationals of a Member of the Commission:</strong> (Argentina, Australia, Belgium, Brazil, Chile, People's Republic of China, European Community, France, Germany, India, Italy, Japan, Republic of Korea, Namibia, New Zealand, Norway, Poland, Russian Federation, South Africa, Spain, Sweden, Ukraine, United Kingdom of Great Britain and Northern Ireland, United States of America, Uruguay). [2689-022 (2009) : 54] |
| Co | The individual chosen for the post of Executive Secretary <strong>must</strong> be available starting 15 February 2010 for a two-week period of transition with the incumbent Executive Secretary and <strong>will</strong> assume the post on 01 March 2010. [2689-022 (2009) : 54] |
| Co | Gresham Professors <strong>must offer</strong> six lectures each year. [2689-030 (2009) : 58] |
| Co | <strong>You</strong> <strong>must</strong> be able to work collaboratively and make sound decisions in the delivery of quality and timely results. [2694-038 (2009) : 66] |
| Co | <strong>You</strong> <strong>must</strong> be able to demonstrate your commitment to excel in research, including the ability to publish at an international standard and ability to work collaboratively. [2694-049 (2009) : 72] |
| Co | Candidates also <strong>must be eligible by residence for a UK research council studentship.</strong> [2694-057 (2009) : 75] |
| Co | <strong>You</strong> <strong>must</strong> have the technical knowledge to realise what judgements you need to make, and the courage to actually make those judgements in the field.&quot; [2698-004 (2009) : 48-49] |
| Co | Being an engineer in a foreign country, you <strong>must</strong> be ready to adapt to your surroundings, says Graham. [2698-004 (2009) : 48-49] |
| Co | The role requires you to work in a variety of geological projects, therefore you <strong>must</strong> be highly flexible. [2698-012 (2009) : 54] |
| Co | In addition you <strong>must</strong> be proficient in MS Office and have good presentational and writing skills. [2698-012 (2009) : 54] |
| Co | The working language for the post is English and therefore candidates <strong>must</strong> be able to work effectively in this language and have knowledge of the other. [2698-016 (2009) : 56] |
| Co | Applicants <strong>must live</strong> in the Manchester / Sheffield / Leeds area. [2698-020 (2009) : 58] |
| Co | Candidates <strong>must be able to work effectively</strong> in one of these languages and also have a working knowledge of the other. [2698-030 (2009) : 61] |
| Co | Applicants <strong>must already be eligible to work in the UK</strong> [2698-037 (2009) : 63] |
| Co | <strong>You</strong> <strong>must</strong> have excellent communication and interpersonal skills with the ability to interact with persons at all levels within the academic and business communities. [2698-051 (2009) : 69] |
| Co | Successful applicants <strong>must be able to commit to a two year term or research effort in ISB and three year in Luxembourg.</strong> [2698-056 (2009) : 71] |</p>

<td>You must have a BSc in a relevant discipline, and appropriate postgraduate experience, with excellent communication, interpersonal and presentation skills. [2715-038 (2009) : 64]</td>
</tr>
<tr>
<td>E</td>
<td>To deliver effectively, our policies must be underpinned by the best quality evidence - and we need excellent scientists and engineers to help us do this. [2702-035 (2009) : 63]</td>
</tr>
</tbody>
</table>
The world is on the cusp of a low-carbon revolution: the threat of global warming means we **must** dramatically reduce our emissions of greenhouse gases, especially carbon dioxide. [2719-002 (2009) : 16]

To be considered, **you must** be a renowned expert in your particular specialism with a proven track record of applying your knowledge to develop strategy and policy. [2694-001 (2009) : 50]

**Must** be experienced in developing relational databases & data quality; knowledge of Business Objects and XML helpful. [2694-002 (2009) : 51]

**You must** be an experienced user of word processing, spreadsheet and presentation software. [2694-022 (2009) : 60]

Applicants **must** have experience in modelling social and economic processes, and in integrated analysis of socioeconomic and biophysical information. [2698-013 (2009) : 54]

**You must** have experience of cloning and manipulating genes preferably in microbial systems. [2719-013 (2009) : 53]

**You will** specialise in stream flow measurement, prediction, modelling or management. Ideally qualified with a relevant degree, **you must** demonstrate proven professional hydrology experience, including field operations. [2719-028 (2009) : 59]

Candidates **must** have extensive experience in leading significant academic research units, with experience in building and maturing new units, have an outstanding record of scientific achievement and have a focus on an innovative systems approach to biological research. [2689-033 (2009) : 59]

In addition, **you must** have substantial experience in the design and conduct of epidemiological research relevant to maternal or reproductive health in developing or transitional countries. [2702-047 (2009) : 67]

**You must** also have experience of working in multi and interdisciplinary scientific partnerships and excellent communication, administrative and management skills. [2715-030 (2009) : 62]

Ideally from a life sciences background, **you must** have proven experience of managing complex IS projects and international stakeholder relationships within R&D. [2724-015 (2009) : 57]

**You must** have experience in both field and laboratory work and a demonstrable knowledge and interest in plants, trees and the environment. [2728-010 (2009) : 56]

| A | and the person appointed **will** not be more than 28 years of age on October 1st 1971. [750-049 (1971) : 358] |
| A | Ideally applicants **will be** in their early/middle twenties [733-038 (1971) : 42] |
| A | It is envisaged that the successful candidate **will be** under 30 years of age [733-088 (1971) : 49] |
| A Ex Co | The position **will** suit a man 25 to 35 years old, who has experience of operating pilot scale fermenters and who is keen to translate this into worthwhile production achievements. [741-027 (1971) : 522] |
| Ca | Among other information, candidates **will be required** to submit a brief curriculum vitae, a clear summary of the research programme proposed, and the names of two referees. [772-095 (1971) : Ciii] |
| Ca | Letters **will be handled** in confidence by the consultant: [767-062 (1971) : 547] |
| Ca | Neither curriculum vitae nor names of referees need **to supplied** to the Principal, since documents received in connection with the University appointment **will be made** available to the College. [774-054 (1971) : 192] |
| Co | These are the minimum qualifications required and the successful candidate **will have** to be capable of a high standard of professional work. [772-001 (1971) : 52] |
| Co | **Will be expected** to study for a higher degree. [754-014 (1971) : 599] |
| Co | A knowledge of mass transport and / or electrochemical processes is required for the first of these whilst the second **will be** of particular interest to candidates with some knowledge of ceramic materials. [772-071 (1971) : 60] |
| Co | A knowledge of steroid chemistry, while helpful is not essential but the successful candidate **will be expected** to use the work for a Ph.D., M.Sc., thesis. [750-006 (1971) : 354] |
| Co | A knowledge or interest in the field of mineralogy and microscopy **will be** an advantage in this post. [767-041 (1971) : 545] |
| Co | Although based at Aberdeen, the duties **will occasionally** require periods of duty at sea on research or commercial fishing vessels. [767-012 (1971) : 542] |
| Co | An added advantage **will be** a reading knowledge of a major European language. [772-004 (1971) : 52] |
| Co | An interest in one or more of spectroscopy, chemical kinetics, chemical thermodynamics and computational techniques **will be** an advantage. [750-068 (1971) : 360] |
| Co | and periods **will be spent** away from home. [750-001 (1971) : 354] |
| Co | the person **will also** have the ability to methodically read considerable amounts of technical literature and extract relevant details from it. [772-004 (1971) : 52] |
| Co | and the recipient **will be expected** to spend a short period of time in the laboratories of the Industrial sponsor. [750-065 (1971) : 360] |
| Co | and the successful applicant **will be expected** to work for the degree of Ph. D. and **must** have an upper second class Honours Degree, or better, in Metallurgy or a related subject. [745-074 (1971) : 63] |
| Co | and the successful applicant **will be required** to take up the post as soon as possible. [745-040 (1971) : 60] |
| Co | and the successful candidate **will be expected** to register and submit for a higher degree. [776-001 (1971) : 286] |
| Co | and these **will also** involve contacts with Universities, research institutes, farmers and other sections of the dairy industry. [737-016 (1971) : 278] |
| Co | and **will also** advise course teams as to the advantageous use of these media. [745-027 (1971) : 59] |
and **will be concerned** with the discovery of chemical compound or material which beneficially affect the healing process. [737-030 (1971) : 279]

and **will be aimed** at determining their fate when exposed to sunlight in the environment. [767-059 (1971) : 547]

and **will be based** at the Royal South Hants Hospital, Fanshawe Street, Southampton in the Regional Physics Department. [772-040 (1971) : 56]

and **will be concerned** with the scientific administration of the Council’s scheme, or Project Grants. [741-033 (1971) : 523]

and **will be expected** to maintain close contact with a team working on experimental aspects of this project in the Department of Applied Physics, UWIST. [745-022 (1971) : 59]

and **will be expected** to supervise the work of postgraduate research students. [733-055 (1971) : 44]

and **will be required** to assist in undergraduate laboratory and field classes. [767-004 (1971) : 541]

and **will be responsible** through the Laboratory Steward to the Head of the Chemistry Department for the operation of the laboratory as a service to the Academic Departments of the School. [745-029 (1971) : 59]

and **will involve collaboration with biologists concerned with the visual capacity of fish.** [767-017 (1971) : 278]

and **will involve many varied biochemical techniques.** [737-017 (1971) : 278]

and **will involve the initial evaluation and development of drugs for the treatment of these diseases in animals and man.** [772-060 (1971) : 59]

and **will liaise with clinical pathology and with the sections responsible for quality control and pharmaceutical problems.** [774-032 (1971) : 190]

Applicants should have a special interest in the Taxonomy of either algae or insects, though Taxonomists with interests in other groups **will be considered.** [733-039 (1971) : 42]

Applicants should have an interest in the design and analysis of experiments using statistical methods, but **will also be expected** to become generally involved in evaluation. [774-025 (1971) : 190]

Applicants **will be required** to teach Field Courses, supervise post-graduate students, and to undertake research in marine biology. [754-031 (1971) : 600]

Applicants are invited for the post of a Careers Adviser who **will have special responsibility for students of mathematics and all branches of engineering.** [772-058 (1971) : 59]

Applications are invited from candidates who **will be available on or before 1st April 1971, for a 2-year engagement in the A.E.O / E.O. grade to take part in a survey of grassland on farms in England and Wales.** [741-021 (1971) : 521]

Applications invited for this post in which the person appointed **will assist in maintenance and repair of a 100 KV transmission microscope** [733-043 (1971) : 42]

Applications invited for this post in which the person appointed **will assist in maintenance and repair of a 100kV transmission electron microscope and an electron probe microanalyser, and if suitably qualified, can also participate in research and development associated with these instruments.** [745-066 (1971) : 62]

Appointee **will be expected** to be responsible for teaching mainly physical/analytical chemistry [733-038 (1971) : 42]

Appointee **will be expected** to teach mainly analytical chemistry [733-036 (1971) : 42]

Areas of work **will include the development of undergraduate and postgraduate courses and of an extensive research programme.** [758-039 (1971) : 53]

Assistant **will carry out research towards a higher degree.** [767-024 (1971) : 543]

at least two thirds of this time **will be spent** at the Institution. [733-011 (1971) : 38]

Besides being responsible for the input in the computer data base, from which all our services are generated, you **will write computer-search profiles for SDI – Selective Dissemination of Information.** [763-023 (1971) : 345]
| Duties of the Research Officer | will include advisory, research and educational work in relation to the ecology and conservation of natural resources with special reference to the problems of local planning authorities. [750-046 (1971) : 358] |
| Duties will include demonstrating and supervision of practical classes [767-043 (1971) : 546] |
| Duties will include lecturing to undergraduate and postgraduate public health engineering students. [733-055 (1971) : 44] |
| Duties will include lecturing, etc. to students in Horticulture and cognate subjects. [763-017 (1971) : 345] |
| Duties will include non-routine mineral and silicate analysis; [767-041 (1971) : 545] |
| Duties will include participation in research on fine structure and function of fungi and other organisms, and collaboration in the design and the interpretation of the results of research undertaken in the Department. [763-029 (1971) : 346] |
| Duties will include routine diagnostic work and investigation. [763-017 (1971) : 345] |
| Duties will include servicing of Physical Chemistry equipment. [758-019 (1971) : 51] |
| Duties will include some systems programming and providing a service to users within the College. [750-048 (1971) : 358] |
| Duties will include technical supervision of postgraduate research workers and B.Sc. students. [763-039 (1971) : 346] |
| Duties will include the continuing development of a retrieval system and the production of a monthly current titles bulletin. [745-039 (1971) : 54] |
| Duties will include: [776-015 (1971) : 287] |
| Duties will involve synthesis of organic compounds of potential medical interest. [767-032 (1971) : 544] |
| Each student will be expected to work under the general direction of a senior scientist in the country to which he goes, whose consent must be obtained. [772-070 (1971) : 60] |
| Each student will undertake a research project appropriate to his interests. [776-027 (1971) : 288] |
| Emphasis will be on the degradation of organic materials in relation to water and soil quality, with particular regard to pesticides and/or wood (lignin). [772-044 (1971) : 57] |
| Familiarity with machine language programming will be essential and experience in the design of digital logic desirable. [767-037 (1971) : 545] |
| Fellows will be generally expected to work on some aspect or other of existing and planned Scientific Centre projects. [754-009 (1971) : 598] |
| Fellows will be required to render an annual report on their work not exceeding 1,500 words. [772-090 (1971) : 64] |
| He or she will assume responsibility for supervising and running experiments, troubleshooting, and analysing results. [741-018 (1971) : 521] |
| He or she will be interested in fundamental aspects of cell behaviour which underlie the reactions of tissue to physical injury, such as cell movement and cell division. [737-030 (1971) : 279] |
| he will also be expected to involve himself in the development and promotion of the Association’s work. [772-012 (1971) : 53] |
| Co | He will be expected to survey and assess current work, to initiate technical economic studies of proposed future research and to attempt technological forecasts of requirement. [754-070 (1971) : 604] |
| Co | He will be responsible for the design and writing of the system software [776-018 (1971) : 287] |
| Co | He will be working in close co-operation with the Medical Director. [758-053 (1971) : 54] |
| Co | He will carry out studies and development work in the following fields: beam loss, shielding for radiation protection, material damage dosimetry, methods of evaluating the lifetime of materials around accelerators. [745-035 (1971) : 60] |
| Co | He will have developed new products in production stage and have successfully project control and pilot plant development. [741-020 (1971) : 521] |
| Co | He will take charge of a research and product development team, the main emphasis [741-020 (1971) : 521] |
| Co | His duties will include the operation and maintenance of sophisticated physical and electronic equipment and he should have a sound knowledge of photography, projection, and the operation and maintenance of audio visual aids. [745-029 (1971) : 59] |
| Co | His or her main task will be to study drug-induced effects on this mechanism. [772-013 (1971) : 53] |
| Co | However, in appropriate circumstances full size production vessels are used and one of the responsibilities of the position will be to scale up new processes from the pilot to production stage. [741-027 (1971) : 522] |
| Co | However, the Polytechnic is in the process of organising a new Interdisciplinary degree under the aegis of the CNAA and the Reader will be expected to play a significant part in the design of new courses to meet the changing needs of students and of the modern technological development in the biological sciences. [772-027 (1971) : 55] |
| Co | In addition to routine testing of new compounds he or she will be helping to develop laboratory tests to simulate field conditions and then to follow up this work elsewhere in the United Kingdom and occasionally overseas. [741-039 (1971) : 523] |
| Co | In addition, the personnel officer will be assigned certain projects, for instance review of selection and salary review procedures, job evaluation techniques, and involved in the appraisal and training scheme implemented for the site. [763-012 (1971) : 344] |
| Co | In carrying out their duties in the Unit successful candidates will themselves have opportunities to participate in aspects of the neutron beam research programme. [754-071 (1971) : 604] |
| Co | In some cases students will be required to provide their own finance until April. [774-050 (1971) : 192] |
| Co | Initial projects will be concerned with the introduction of new and improved processes [733-017 (1971) : 39] |
| Co | Initially he will be handling new investment propositions, rationalisations and expansions, and planning for organic growth throughout the group. [767-062 (1971) : 547] |
| Co | Initially the job will be to take full charge of an anthelmintic research programme. [772-060 (1971) : 59] |
| Co | Inorganic and semi-inorganic macromolecules will be studied in the context of inorganic and polymer chemistry. [754-011 (1971) : 599] |
| Co | Inorganic and semi-inorganic macromolecules will be studied in the context of inorganic and polymer chemistry. [758-077 (1971) : 55] |
| Co | It is hoped that the person appointed will be able to materially assist with the developments of a photoelectron spectrometer. [745-055 (1971) : 62] |
| Co | MAIN WORK INVOLVED will be the responsibility for directing the routine and research bacteriological studies and assays for the Pharmaceutical and Food industries. [733-083 (1971) : 48] |
| Co | MAIN WORK INVOLVED will be the supervision of the evaluation of irritancy of atmospheric contaminants. [733-083 (1971) : 48] |
| Co | Materials will include sugars, steroids, fatty acids and amino acids [750-058 (1971) : 359] |
| Co | Much of the work will involve close collaboration with scientists [733-040 (1971) : 42] |
| Co | Much of this work will be done at various places in the Highlands [750-001 (1971) : 354] |
Normally applicants for Ph.D. will be expected to have an M.Sc. degree or appropriate industrial experience. [745-084 (1971) : 64]

of whose work will be on the development of new products, utilising the company’s technical experience in the fields of silicates, glass, resin cement and the like. [741-020 (1971) : 521]

One of these responsibilities, dependent upon the applicant’s qualifications, will be to assist the co-ordination of the full-time courses in design and photography. [745-024 (1971) : 59]

Opportunities will also exist for radio-isotope investigations of the kinetics of iron metabolism during depletion and repletion. [754-063 (1971) : 603]

Normally applicants for Ph.D. experience in the fields of silicates, glass, resin cement and the like. [741-020 (1971) : 521]

and [741-020 (1971) : 58]

278

Successful applicants will be expected to contribute to the expanding teaching programme associate with a new degree course in materials engineering that was introduced in 1971, and to service courses to engineering students. [745-019 (1971) : 58]

Successful applicants will be required to participate in software development projects related to the needs of the Centre. [758-031 (1971) : 52]

Successful applicants will be required with a minimum amount of supervision, to undertake research and development projects concerned with the analysis of minerals and mineral products. [758-001 (1971) : 50]

Successful candidates will contribute to the expanding teaching programme associate with a new degree course in materials engineering that was introduced in 1971, and to service courses to engineering students. [745-010 (1971) : 188]

Successful candidates will be expected to assume duty as soon as possible after these dates. [774-022 (1971) : 189]

Successful candidates will be expected to commence their Fellowships on 1st October, 1972. [772-095 (1971) : Ciii]

Successful candidates will be expected to start their work in October 1972. [772-090 (1971) : 64]

The ability to think quickly, act decisively will be vital. [774-002 (1971) : 187]

The applicant must hold a First or Upper Second Class Honours Degree in Physics or related subject and will register for a higher degree. [758-078 (1971) : 65]

The appointed Lecturer will be expected to play a central part in investigating the role and effectiveness of radio and television as used by the University; [745-027 (1971) : 59]
| Co | The appointed persons **will** work under Dr. S. Lewin in fields concerned with the effects of heavy water on the reactions of nucleic acids, of histones and of protein biosynthesis, or on problems concerned with insulin-antibody reaction in relation in diabetes. [763-041 (1971) : 347] |
| Co | The appointee **will also be required** to study the contribution of rotation crops to tobacco nutrition. [754-061 (1971) : 603] |
| Co | The appointee **will be expected** to assume duty by January 1972 and to develop their teaching and research activities within the existing framework of the department, on which further information **should** be obtained from the Head, Professor W.R. Stern. [750-008 (1971) : 354] |
| Co | The appointee **will be expected** to participate in the Department’s teaching programme, and to engage in research of his own choosing. [741-005 (1971) : 520] |
| Co | The appointee **will be expected** to undertake research on the mechanisms of ion uptake by plants, in association with Dr. J. F. Loneragan. [774-004 (1971) : 188] |
| Co | The appointee **will be expected** to maintain close contact with the Australian dairy industry and to encourage co-operation with general food science studies in other parts of the Division. [741-008 (1971) : 520] |
| Co | The appointee **will be responsible for the direction of the research activities of the Laboratory, under the general direction of the Chief of the Division of Food Research.** [741-008 (1971) : 520] |
| Co | The appointee **will investigate the effects of iron deficiency upon iron deficiency upon cardiac functions and energy exchange.** [754-063 (1971) : 603] |
| Co | The appointment **will be conditional upon passing a medical examination and an initial probationary period of twelve months may be specified.** [754-061 (1971) : 603] |
| Co | The appointment **will be conditional upon passing a medical examination.** [754-081 (1971) : Ciii] |
| Co | The **Assistant Director will have a particular role in ensuring the effective use of resources;** [772-012 (1971) : 53] |
| Co | The **duties of the Information Assistant will be primarily to act as a link between users and the computer data bank, and also to abstract and index metallurgical literature.** [754-049 (1971) : 602] |
| Co | The **duties will also include control of nursing staff. Encouragement is given for carrying out investigations into problems of Occupational Health.** [772-051 (1971) : 58] |
| Co | The **duties will be to advise on occupational health hazards which include Toxic chemicals and explosives.** [772-051 (1971) : 58] |
| Co | The **duties will be to assist with a Research Project involving Mechanical Testing and Vacuum Technology.** [745-026 (1971) : 59] |
| Co | THE DUTIES **WILL CONSIST OF LECTURING, LABORATORY AND TUTORIAL WORK AND THE SUPERVISION OF RESEARCH PROJECTS.** [737-008 (1971) : 277] |
| Co | The **duties will consist of Lecturing, laboratory and tutorial work and the supervision of research projects.** [758-046 (1971) : 53] |
| Co | The Fellow **will be concerned with the theory of elastic and inelastic scattering of electrons** [733-044 (1971) : 43] |
| Co | The Fellow **will participate in the research activities of the School in areas of automatic control, noise and vibration or fatigue, for which excellent facilities are available.** [758-064 (1971) : 54] |
| Co | The field of study **will depend primarily on the interests of the person appointed.** [754-037 (1971) : 601] |
| Co | The head of the Division **will be responsible for its administration and direction.** [774-029 (1971) : 190] |
| Co | The Head Technician **will under the Head of Science, be responsible for all technical service, including supervision and training of the three assistant technicians servicing and construction of apparatus, technical instructions for pupils, performing project work.** [750-018 (1971) : 355] |
| Co | The incumbent **will select problems and assume the major responsibility for completing the assignments, either as independent projects or as significant elements of a group program.** [754-050 (1971) : 602] |
| Co | The individual selected **will be requested to work largely on his own** [745-029 (1971) : 59] |
| Co | The Information Specialist **will chiefly search the scientific and technical literature surveys, prepare bibliographies and literature surveys, procure and provide technical information and index and classify technical reports and trade literature.** [772-001 (1971) : 52] |
| Co | The job **will** involve working with a number of people, helping in the evaluation of results, organising the work load and providing a technical service of EM work to the Research Department. [745-016 (1971) : 58] |
| Co | The man appointed **will be concerned** with the design and construction of new apparatus and the maintenance and repair of existing apparatus. [754-015 (1971) : 599] |
| Co | The person appointed **will be responsible** for three regional teams (46 staff) for 38 National Nature Reserves (over 185,000 acres) and 1600 Sites of Special Scientific Interest and for a wide range of planning and liaison activities with Universities, Government and voluntary bodies. [750-035 (1971) : 357] |
| Co | The officer appointed **will** assist with field studies on the effect of water stress on the growth of animal and perennial forage crops with small scale irrigation experiments, and with the development of techniques for the measurement of the water potential in plants and soil in relation to current evaporative conditions. [758-023 (1971) : 52] |
| Co | The officer appointed **will be** responsible for three regional teams (46 staff) for 38 National Nature Reserves (over 185,000 acres) and 1600 Sites of Special Scientific Interest and for a wide range of planning and liaison activities with Universities, Government and voluntary bodies. [750-035 (1971) : 357] |
| Co | The person appointed **will also be expected** to develop an interest in supporting instrumental techniques (such as X-ray diffraction). [767-042 (1971) : 545] |
| Co | The officer **will be involved** in livestock testing programmes, including the development and use of selection indices. [745-049 (1971) : 61] |
| Co | The Palynologist **will** initiate and build up a world wide reference collection of pollen and spores, and develop methods of preparing reference specimens. [758-036 (1971) : 601] |
| Co | The person appointed **must** be capable of working on his own initiative as much of the work **will** involve periods away from base dealing with senior engineers and scientists. [750-024 (1971) : 356] |
| Co | The person appointed **will assume responsibility** for the various departments concerned with analytical and synthetic chemistry, biochemistry and metabolic studies, [774-032 (1971) : 190] |
| Co | The person appointed **will be encouraged** to undertake research and consultancy. [772-057 (1971) : 59] |
| Co | The person appointed **will be expected** to assist in the Radioisotope, Radiotherapy and Ultrasonic work of the department as well as develop Electronic services. [774-016 (1971) : 189] |
| Co | The person appointed **will be expected** to assist in the teaching of the C.N.A.A. degrees in Applied Biology offered by the Department. [758-030 (1971) : 52] |
| Co | The person appointed **will be expected** to take up his duties from 1 October, 1972. [774-045 (1971) : 191] |
| Co | The person appointed **will be expected** to teach and undertake research in the biochemical and kinetic aspects of drug metabolism and distribution, and to teach some of the physical aspects of Pharmacy. [750-038 (1971) : 357] |
| Co | The person appointed **will be expected** to undertake a contractual arrangement which **would** be reviewed after a minimum of 12 months. [750-039 (1971) : 357] |
| Co | The person appointed **will be required** to help in developing undergraduate courses (which are on novel lines) and establishing postgraduate activities. [754-053 (1971) : 602] |
| Co | The person appointed **will be required** to organise and run a practical class on Quantitative and Population Genetics. [745-056 (1971) : 62] |
| Co | The person appointed **will be required** to participate in the planning and production of courses in the developing Open University system of education, and to conduct and supervise research activities. [745-001 (1971) : 57] |
| Co | The person appointed **will be required** to participate in the teaching of statistics at an undergraduate level and general and specialist mathematical topics at undergraduate and post graduate levels to students in this other Faculties. [737-025 (1971) : 279] |
| Co | The person appointed **will be required** to participate in the teaching of statistics at an undergraduate level and general and specialist mathematical topics at undergraduate and postgraduate level, to students in this and other Faculties. [745-060 (1971) : 62] |
| Co | The person appointed **will be required** to use a range of Immunological Techniques, applicable to bacteria and the host, e.g. serological techniques, column separation, preparation and separation of various cell types. [750-032 (1971) : 357] |
The person appointed will be required to use a range of Immunological Techniques, applicable to bacteria and the host, e.g. serological techniques, column separation, preparation and separation of various cell types. [754-048 (1971) : 602]

The person appointed will be required to use a range of Immunological Techniques, applicable to bacteria and the host, e.g. serological techniques, column separation, preparation and separation of various cell types. [758-041 (1971) : 53]

The person appointed will be responsible for a team of graduates and assistants involved in the development and application of methods for the analysis of pharmacological compounds in biochemical systems. [763-011 (1971) : 344]

The person appointed will be responsible for developing suitable analytical techniques of high sensitivity and for supervising the routine analysis of samples. [750-024 (1971) : 356]

The person appointed will be wholly responsible for the development and maintenance of Noise and Vibration Instrumentation, and previous experience with such instrumentation would be an advantage. [750-009 (1971) : 354]

The person appointed will cover all aspects of information work. [733-088 (1971) : 49]

The person appointed will spend about half of his/her time assisting in developing non-numerical and general data-processing applications of the machine [733-061 (1971) : 45]

The post will be for two years in the first instance, [763-029 (1971) : 346]

The post will be orientated towards servo-mechanisms and mechanical and electro-mechanical problems. [772-054 (1971) : 58]

The post will be to assist the Reader in Physiology, [733-046 (1971)  : 43]

The recipient will be expected to spend a period of time in the industrial sponsor’s laboratories. [754-002 (1971) : 598]

The Research Assistant will undertake and develop research projects on the transplantation of muscle in normal and dystrophic animals, in association with Dr Victor Dubowitz, Reader in Child Health and Developmental Neurology. [772-055 (1971) : 58]

the research worker selected will have responsibility for several on-going lines of study, including selection and testing of dwarfing rootstocks in plums and cherries, methods of controlling size and quality of crops, including fruit thinning, and orchard trials of new combinations of varieties of rootstocks. [772-043 (1971) : 57]

The senior lecturer and the lecturer will be expected to take part in research as well as in teaching. [774-022 (1971) : 189]

The senior research associate will be expected to share in supervisory and administrative duties. [750-020 (1971) : 356]

The successful applicant will assist in presenting the course in chemical and extractive metallurgy [763-028 (1971) : 346]

The successful applicant will assist with the preparatory work in a group of laboratories and may be required to take responsibility for a preparation form, providing standard solutions to other laboratories. [767-014 (1971) : 543]

The successful applicant will be expected to assume an active role within the group assisting on the preparation and bombardment of GaAs specimens and in the physical and electrical assessment of the implanted material. [733-072 (1971) : 47]

The successful applicant will be expected to initiate and supervise research and conduct classes in the general area of his speciality as well as assisting in the general teaching programme of the Department. [774-041 (1971) : 191]

The successful applicant will be expected to register for a higher degree [758-024 (1971) : 52]
The successful candidate will be expected to register for a higher degree (C.N.A.A.) [767-038 (1971) : 545]

The successful candidate will be expected to teach courses in computing as well as a Control Theory Course, Control Theory is an integral part of the Diploma of Electronics programme and also part of the advanced Mathematics offerings. [750-030 (1971) : 357]

The successful applicant will be involved in the chemical preparations and radiometric assay of C-14 in samples of geological and archaeological interest. [758-012 (1971) : 51]

The successful applicant will be required to register for a higher degree. [750-023 (1971) : 356]

The successful applicant will be required to work in one of the following fields: [767-038 (1971) : 545]

The successful applicant will be responsible for the bacteriological aspects of these activities [737-016 (1971) : 278]

The successful applicant will be responsible for the recruitment and personnel services of staff up to and including postgraduate degree level. [763-012 (1971) : 344]

The successful candidate will assist in the planning and organisation of an extended sampling system [733-018 (1971) : 39]

The successful candidate will be expected to develop the work of the department and to enlarge the studies undertaken. [733-083 (1971) : 48]

The successful candidate will be expected to initiate and develop lines of research in Cell Physiology with particular reference to the sciences applied to health and the environment. [772-027 (1971) : 55]

The successful candidate will be expected to initiate and supervise research in collaboration with the senior Applications Specialist and other members of the Project staff. [776-009 (1971) : 287]

The successful candidate will be expected to register for a higher degree of the C.N.A.A. [745-042 (1971) : 60]

The successful candidate will be expected to register for a higher degree [750-068 (1971) : 360]

The successful candidate will be expected to register for a Higher Degree [767-004 (1971) : 541]

The successful candidate will be expected to register for a higher degree. Studentship value £550 p.a. plus approved fees. [767-005 (1971) : 541]

The successful candidate will be expected to supervise and progress studies already in hand and to initiate a line of research. [754-041 (1971) : 601]

The successful candidate will be expected to undertake research within the broad field of interest of the Company under the direction of the head of the department. [737-035 (1971) : 279]

The successful candidate will be expected to undertake some undergraduate teaching responsibilities in the School of Physics, [741-034 (1971) : 523]

The successful candidate will be required to conduct research on nematodes of farm livestock. [767-028 (1971) : 544]

The successful candidate will be required to live in or near Almondbank. [754-042 (1971) : 601]

The successful candidate will be required to participate in a study of the non-linear interaction of laser radiation with gases. [758-051 (1971) : 54]

The successful candidate will be required to work on the development of optical delay lines. [750-016 (1971) : 355]

The successful candidate will initially develop improved water repellent and fire retardant coatings, [754-022 (1971) : 600]

The successful candidate, in addition to undergraduate teaching, will have the opportunity to participate in research and postgraduate teaching within the Inter-University Institute of Engineering Control which comprises the School of Engineering of Bangor, Sussex University and Warwick University. [754-045 (1971) : 602]

The successful candidate, who should have previous experience of electron microscopy, will be responsible for the day-to-day running of a new electron microscope laboratory, [763-013 (1971) : 344]

The successful candidates will assist in the organisation and administration of large scale tests [733-022 (1971) : 40]

The successful candidates will be concerned with giving advice and preparing memoranda on geological aspects of planning; [767-011 (1971) : 542]
The successful candidates will be expected to take part in undergraduate and postgraduate teaching and to help to establish research with emphasis on long-term relevance to social and industrial problems, particularly in their environmental aspects. [758-008 (1971) : 50]

The successful candidates will need the willingness to tackle tough problems in realistic time scales, and undertake relevant testing and site visits with good presentation of results. [741-037 (1971) : 523]

The survey is already in progress, and after a short period of training the officer will be expected to work independently, with an assistant. [741-021 (1971) : 521]

The technician will assist staff and students in projects and research. [767-021 (1971) : 543]

The work will be concerned with a study of acoustic emissions from polymer matrix composites with the aim of correlating the observed emissions with well defined deformation and fracture processes within the composite. [774-005 (1971) : 192]

The work will be concerned with the photoreactions of pesticides [767-059 (1971) : 547]

The work will entail searching Patent and Technical literature on a wide variety of subject matter connected with the Steel Industry, and preparing reports of results of searches. [772-004 (1971) : 52]

The work will include liaison with members of the Council’s scientific staff and others active in the relevant research field, participation in scientific committee and conference activities, and provision of general assistance and advice within the Council’s administrative organisation. [763-033 (1971) : 346]

The work will involve correlation of the results of several physico-chemical tools such as spectrophotometry, spectropolarimetry, potentiometry, radiochemistry, chromatography, electrophoresis, electro-focussing and analytical and, zonal ultracentrifugation. [763-041 (1971) : 347]

The work will involve flight trials, full scale component testing and wind tunnel investigations [774-018 (1971) : 189]

The work will involve giving direct technical support to individual TI companies in the development of new or improved products using plastic materials [750-003 (1971) : 354]

The work will involve Research in gas engineering [750-063 (1971) : 360]

The work will involve testing equipment, writing reports and assisting in the development and improvement of test procedures for use in future international standards. [754-035 (1971) : 601]

The work will involve the estimation of steroid hormones in various biological systems. [750-006 (1971) : 354]

The work will involve the use of far infra-red spectroscopy and optical modulation techniques. [767-064 (1971) : 547]

The work will involve undertaking basic laboratory studies of methods of abating pollution [733-031 (1971) : 41]

The work will relate to such areas as aviation, man-computer interaction, and the design and organisation of automation systems. [772-023 (1971) : 54]

The work will involve periods of work at the Patent Office Library. [772-004 (1971) : 52]

This work will be concerned with the evaluation of complete new routes or improvements, which requires a complex analysis involving all three of these disciplines; [750-010 (1971) : 355]

This work will involve the use of animal models [733-047 (1971) : 43]
### Co
- **Within the broad framework set out above, the Principal will delegate additional specific administrative and academic responsibilities relating to the work of the college as a whole to each of the persons appointed.** [745-024 (1971) : 59]
- **Work will include either studies of the physical properties of proteins and membranes or of the mechanism of photosynthesis.** [767-061 (1971) : 547]
- **Work will initially be on pollen analysis of post-glacial deposits and archaeological sites, and preparation of samples for C-14 dating.** [754-052 (1971) : 602]
- **Work will involve bio-chemical methods in addition to tissue culture techniques.** [754-075 (1971) : 604]
- **Work will involve routine biochemical methods in addition to tissue culture techniques.** [763-001 (1971) : 343]
- **Whilst you lead a normal student life during term-time (studying for virtually any degree you want) you'll go to sea during vacations.** [733-002 (1971) : 35]
- **For you'll have to face up to early responsibility; from the complex techniques of sea warfare; cope with the ever-present problem of man management.** [774-002 (1971) : 187]
- **All applicants (preferably under 30 years of age) will be expected to have obtained a high class of honours in their first degree.** [750-025 (1971) : 356]
- **Applicants for the higher grade will be expected to have appropriate postgraduate experience.** [763-010 (1971) : 344]
- **Applicants will require a good degree (or equivalent) and industrial experience is an advantage.** [737-038 (1971) : 280]
- **Honours graduates in Biological Science will be preferred, and applicants must register for a Ph.D.** [758-068 (1971) : 55]
- **It is likely that the successful candidate will also have a post-graduate qualification in the field of ecology or conservation.** [750-046 (1971) : 358]
- **Persons with qualifications in zoology or physiology will be preferred.** [767-045 (1971) : 546]
- **The successful candidate, who will preferably be a Physicist,** [758-048 (1971) : 53]
- **The ideal candidate, aged about 35, will be technically qualified, probably a graduate chemist, metallurgist, glass technologist or engineer who understands the needs of the building or contracting industries.** [741-020 (1971) : 521]
- **Possession of the Diploma of Industrial Health or previous experience of occupational medicine will be an advantage.** [772-051 (1971) : 58]
- **The ideal candidate will be a graduate or equivalent, with at least two years’ experience of pharmaceutical microbiology.** [741-028 (1971) : 522]
- **The successful candidate will probably be someone with an honours degree or equivalent and have had some entomological experience.** [741-039 (1971) : 523]
- **Applications from overseas candidates will be accepted up to 26th August, 1971.** [758-008 (1971) : 50]
- **(Following national wage case, 6% increase under consideration). Salary range $A6,318 - $A8,760 p.a. fares to Australia will be paid.** [741-005 (1971) : 520]
- **(LATE APPLICATIONS WILL BE CONSIDERED AS FAR AS POSSIBLE).** [737-008 (1971) : 277]
- **(later applications from abroad will be considered)** [733-085 (1971) : 48].
- **(preference will be given to citizens of Trinidad and Tobago)** [772-001 (1971) : 52]
- **(those awaiting election will also be considered).** [745-009 (1971) : 57]
- **(training will be given).** [733-064 (1971) : 46]
- **A CDC 6400 will be installed in the College shortly.** [745-019 (1971) : 58]
- **A degree is the first qualification but progress will depend on the ability of the individual to make the change from learning to applying knowledge to achieve results.** [733-059 (1971) : 45]
- **A detailed list of these projects will be sent to you on request;** [754-009 (1971) : 598]
A generous salary will be offered, together with attractive fringe benefits. [763-011 (1971) : 344]

A generous starting salary will be paid in line with qualifications and experience. [763-012 (1971) : 344]

A high standard will be required. [776-028 (1971) : 288]

A Junior Technician vacancy will occur in August. [754-064 (1971) : 603]

A limited number of Studentships will be available in the above Department for research in the fields of microbiology, applied biochemistry, water pollution and animal physiology. [754-007 (1971) : 598]

A major aspect of the work will be concerned with the development, specification and implementation of computer based systems for handling scientific and other data associated with research and development and with specification of systems such as that used in farm census work. [763-010 (1971) : 344]

A new science block of over 19,000 sq ft will be opened in the Autumn of 1971. [750-018 (1971) : 355]

A non-contributory superannuation scheme and contributory widows’ and orphans’ scheme will operate. [750-046 (1971) : 358]

A number or S.R.C. grants will be available. [758-084 (1971) : 56]

A one year full-time course of advanced study leading to the above degree will be offered in the session beginning October, 1972. [772-075 (1971) : 61]

A one-day multi-disciplinary symposium, sponsored by Inveresk Research International, will be held at the Royal Society of Medicine, London on Monday 24th 1971. [745-093 (1971) : 64]

A one-day Symposium will be held in the Lecture Theatre at the Rutherford High Energy Laboratory, Chilton, Didcot, Berks on Friday 30 July, 1971. [750-055 (1971) : 359]

A part-time course in Digital Electronics will commence on 5 January, 1972. [772-084 (1971) : 63]

A scholarship is awarded initially for two years, subject to satisfactory progress, but normally will be extended for the whole period of the course, usually three years. [772-085 (1971) : 63]

A new science block of over 19,000 sq ft will be opened in the Autumn of 1971. [750-018 (1971) : 355]

A non-contributory superannuation scheme and contributory widows’ and orphans’ scheme will operate. [750-046 (1971) : 358]

A one year full-time course of advanced study leading to the above degree will be offered in the session beginning October, 1972. [772-075 (1971) : 61]

A one-day multi-disciplinary symposium, sponsored by Inveresk Research International, will be held at the Royal Society of Medicine, London on Monday 24th 1971. [745-093 (1971) : 64]

A one-day Symposium will be held in the Lecture Theatre at the Rutherford High Energy Laboratory, Chilton, Didcot, Berks on Friday 30 July, 1971. [750-055 (1971) : 359]

A part-time course in Digital Electronics will commence on 5 January, 1972. [772-084 (1971) : 63]

A scholarship is awarded initially for two years, subject to satisfactory progress, but normally will be extended for the whole period of the course, usually three years. [772-085 (1971) : 63]

A secondment arrangement will be considered. [754-070 (1971) : 604]

A Senior Technician is required for a small E.M. Unit. Duties will include initial responsibility for the operation and maintenance of an AB Corinth 275 Electron Microscope: development of specimen preparation techniques and preparation of specimens for photography. [758-055 (1971) : 54]

A SHORT COURSE on APPLYING COMPUTER GRAPHICS IN ENGINEERING will be held from 29 March to 2 April 1971. [741-044 (1971) : 524]

A small number of EMBO fellowships will be available for applicants who could not otherwise attend the course. [772-073 (1971) : 61]

A substantial salary, which could be £3,000 pa. upwards, depending upon experience, will be paid, plus bonuses on profitability. [772-031 (1971) : 55]

A two week course, including practical experience, will be given to the Polytechnic on all aspects of radiological protection. [772-079 (1971) : 61]

A two-year course of postgraduate and post-experience lectures will be given by Dr. M. D. Carabine and Guests in the Department of Chemical Engineering and Chemical Technology. [745-090 (1971) : 64]

A vacancy exists for an experienced person (A.I.S.T. or H.N.C. standard) who will be required to cover a wide range of general preparative work for under-graduate and post-graduate students. [750-040 (1971) : 358]

A vacancy has arisen in our laboratories in Welwyn Garden City for a young Scientific Officer who will be required to synthesise compounds for biological evaluation as potential new drugs. [767-048 (1971) : 546]

A visiting Lecturer from S.I.R.A. will assist on each course [772-078 (1971) : 61]

A well qualified micro-biologist or bio-chemist will find that this appointment in our fermentation development department offers a wide scope. [741-027 (1971) : 522]

A wide range of interesting topics are being investigated in the fields of Powder Technology, Materials Engineering and Materials Protection and vacancies will exist in all research groups. [745-072 (1971) : 63]

Additional allowances will be granted for travel, university fees, etc. [772-094 (1971) : 64]
E Additionally, certain miscellaneous expenses (e.g. cost of analyses, report typing, attendances at meetings) will be reimbursed up to a total of £200 p.a. [772-090 (1971) : 64]

E after which, if mutually desired, either an extension of tenure or appointment for an indefinite period will be considered. [750-061 (1971) : 603]

E although new graduates will also be considered. [733-038 (1971) : 42]

E and the subjects dealt with will include basic principles, programming, standards and manufacturing and management aspects, including problems in introducing NC into the factory. [750-061 (1971) : 360]

E and since technical appreciation will be more important than a background of information work we will be looking for evidence of scientific knowledge, initiative and ingenuity. [741-018 (1971) : 60]

E and the initial salary will be in the range £1,491 - £3,417. [741-015 (1971) : 521]

E and technical appreciation will be considered. [741-068 (1971) : 360]

E and the subjects dealt with will be chief executives of industrial companies within three years

E and the initial salary will be in the range £1,491 - £3,417. [741-015 (1971) : 521]

E and the appointment will be for a period of up to three years. [741-017 (1971) : 521]

E and the exact topic will be selected after discussion of preference with the successful candidate. [750-063 (1971) : 360]

E and the appointment will be for a period of five years. [733-044 (1971) : 43]

E and thus the person appointed will be working with a variety of people in several fields. [763-016 (1971) : 345]

E and we will be in accordance with qualifications and experience. [733-062 (1971) : 46]

E and will be in the range £1,095 - £1,545 plus £90 London Weighting. [772-021 (1971) : 54]

E and will be for a period of five years in the first instance. [745-028 (1971) : 59]

E An appointment will be given for research. [754-058 (1971) : 603]

E An EMBO study course in Experimental Animal Virology will be held in the Institute of Virology, University of Glasgow, from March 20th to April 7th 1972. [772-073 (1971) : 61]

E An important feature of this work will be the infectivity for farm livestock of pathogens on pastures which have received slurry. [758-017 (1971) : 51]

E An important feature of this work will be the infectivity for farm livestock of pathogens on pastures which have received slurry. [758-017 (1971) : 51]

E and in addition an allowance will be made for running expenses. [772-070 (1971) : 60]

E and since technical appreciation will be more important than a background of information work we will be looking for evidence of scientific knowledge, initiative and ingenuity. [741-018 (1971) : 60]

E and the long experience of an active Research Group at Aston will be available. [772-078 (1971) : 61]

E and the salary in the range £780 - £1,248 per annum will be commensurate with age and qualifications. [754-052 (1971) : 602]

E and the appointment will be for a period of five years. [745-028 (1971) : 59]

E and since technical appreciation will be more important than a background of information work we will be looking for evidence of scientific knowledge, initiative and ingenuity. [741-018 (1971) : 60]

E and the long experience of an active Research Group at Aston will be available. [772-078 (1971) : 61]

E and the salary will be £1,440 per annum with F.S.S.U. benefits and with increments of £105 per annum. [763-029 (1971) : 346]

E and the salary in the range £780 - £1,248 per annum will be in the range £1,491 - £3,417. [741-015 (1971) : 521]

E and the long experience of an active Research Group at Aston will be available. [772-078 (1971) : 61]

E and the salary will be based upon the Scientific Officer scale £1,262 - £1,982 p.a. with placing according to experience. [750-063 (1971) : 603]

E and the subjects dealt with will include basic principles, programming, standards and manufacturing and management aspects, including problems in introducing NC into the factory. [745-076 (1971) : 63]

E and there will be sessions on Fire Research and Flammability of Polymers on 21st September and a session on Turbulent Flames on 22nd September. [758-083 (1971) : 56]

E and thus the person appointed will be working with a variety of people in several fields. [763-016 (1971) : 345]

E And which of them will be qualified to be chief executives of industrial companies within three years or so? [767-037 (1971) : 545]

E An appointment will be made for a two-year period of a Physicist or Electrical Engineer to work on digital processing of data from clinical radioisotope and ultrasound detecting equipment. [767-037 (1971) : 545]

E An appointment will be made for a two-year period of a Physicist or Electrical Engineer to work on digital processing of data from clinical radioisotope and ultrasound detecting equipment. [767-037 (1971) : 545]

E and the exact topic will be selected after discussion of preference with the successful candidate. [750-063 (1971) : 360]

E and the salary in the range £780 - £1,248 per annum will be in the range £1,491 - £3,417. [741-015 (1971) : 521]

E and the long experience of an active Research Group at Aston will be available. [772-078 (1971) : 61]

E and the salary will be based upon the Scientific Officer scale £1,262 - £1,982 p.a. with placing according to experience. [750-063 (1971) : 603]

E and the subjects dealt with will include basic principles, programming, standards and manufacturing and management aspects, including problems in introducing NC into the factory. [745-076 (1971) : 63]

E and there will be sessions on Fire Research and Flammability of Polymers on 21st September and a session on Turbulent Flames on 22nd September. [758-083 (1971) : 56]

E and thus the person appointed will be working with a variety of people in several fields. [763-016 (1971) : 345]

E and we will be looking for evidence of scientific knowledge, initiative and ingenuity. [741-018 (1971) : 521]

E And which of them will be qualified to be chief executives of industrial companies within three years or so? [767-062 (1971) : 547]

E and will be encouraged to participate in the research activities of the Department. [763-028 (1971) : 346]

E and will be financed through grant-aid by the Department of Agriculture and Fisheries for Scotland. [772-078 (1971) : 61]

E and will be for a period of five years in the first instance. [745-028 (1971) : 59]

E and will be given background training in gasdynamics and other related topics. [750-068 (1971) : 360]

E and will be in the range £1,095 - £1,545 plus £90 London Weighting. [772-021 (1971) : 54]

E and will be subject to regular review. [758-043 (1971) : 52]
Applications are invited for the post of Livesey Professor and Head of the Department of Fuel Science Laboratory Certificate (or equivalent) for which an additional salary allowance will be made. [772-028 (1971) : 55]

Applications are invited for the above post, which will run for 3 years from the date of appointment. [733-072 (1971) : 47]

Applications are invited for the post of Lecturer (salary scale £1,491 - £3,417) a vacancy for which will occur on 1st October 1971 in the above Department. [758-006 (1971) : 50]

Applications are invited for the post of Lecturer in the above Department, where it is intended that the vacancy will be filled at the latest by 1 October 1972. [772-005 (1971) : 52]

Applications are invited for the post of Livesey Professor and Head of the Department of Fuel and Combustion Science that will become vacant on the retirement of Professor A. L. Roberts on 30th September, 1971. [767-031 (1971) : 544]

Applications for candidates overseas which have been delayed because of the postal strike will be given special consideration taking into account postal delays. [737-042 (1971) : 280]

Applicants for the post of Lecturer will be considered from any branch of experimental pathology which is taken to include cell biology, immunology and virology. [774-013 (1971) : 189]

Applications with research experience and those newly qualified will both be considered. [737-012 (1971) : 278]

Applications for appointment at the Chair of Inorganic Chemistry, which will become vacant on the resignation of Professor R. I. Martin in the middle of 1972 to accept the Foundation Chair of Inorganic Chemistry at the Australian National University. [776-008 (1971) : 287]

Applications for the awards which will be announced in DECEMBER 1971, close on 16 SEPTEMBER 1971. [763-046 (1971) : 347]

Applications for the awards, which will be announced in DECEMBER 1971, close on 16 SEPTEMBER 1971. [763-049 (1971) : 348]

Applications from candidates with interests in the field of engineering plasticity (including dynamic loading, fracture mechanics and metal forming) will be especially welcome. [772-035 (1971) : 56]

Applications giving curriculum vitae and the name of two referees should be sent as soon as possible to Professor Paul A. Samet, University College London Computer Centre, 19 Gordon Street, WC1H 0AH, who will be pleased to give further details, or telephone 01-387 0858/9. [737-001 (1971) : 277]

Applications may also be made at any time during the year but such late applications will only receive consideration if there are vacancies. [776-028 (1971) : 55]

Applications should preferably be made in January, April or September, but those at other times will be considered. [772-085 (1971) : 63]
<table>

</tbody>
</table>
E Car allowances, 100% removal expenses, mortgage facilities and/or Council accommodation will be available in approved cases. [733-062 (1971) : 46]

E Career prospects, conditions of service and assistance given to married men moving house will be discussed at interview. [741-018 (1971) : 521]

E Career prospects, conditions of service, and assistance given to married men moving house will be discussed at interview. [741-039 (1971) : 523]

E Certain of the Lectureships appointments may be subject to a period of probation up to three years in duration and will be made on one of the first three points of the lectureship scale. [733-052 (1971) : 44]

E Certain other expenses will be paid. [772-087 (1971) : 63]

E Chemists required in the Industrial Hygiene Section which is located in West London but will be moving to North West London later this year. [733-084 (1971) : 48]

E Closing date for applications will be 30 September 1971. [763-003 (1971) : 343]

E Conditions of service, prospects and assistance given to married men in moving home will be discussed at interview. [737-030 (1971) : 279]

E Consideration will be given to applicants otherwise suitably qualified who would welcome the opportunity of developing Production Engineering as a major personal interest. [745-032 (1971) : 60]

E Consideration will be given to late applications from overseas. [750-016 (1971) : 355]

E Day release facilities will be given up to the age of 25 for those wishing to continue their studies. [767-032 (1971) : 544]

E Day release for further study is given where appropriate and full relocation and removal expenses will be paid in certain circumstances. [767-048 (1971) : 546]

E Depending upon qualification and experience, the appointment will be made within the salary range of Research Scientist, $A7,484 - $A9,494 p.a. or Senior Research Scientist, $A9,880 - $A11,517 p.a. [754-081 (1971) : Cii]

E Depending upon qualifications and experience, the appointment will be made within the salary range of Research Scientist (male) $A7,484 - $A9,494 p.a. (female) $A7,110 - $A9,066 p.a., or Senior Research Scientist (male) $A9,880 - $A11,517 p.a. (female) $A9,452 - $A11,089 p.a. [754-061 (1971) : 603]

E Details will be sent [733-002 (1971) : 35]

E Entry point on scale will depend upon qualifications and experience. [750-046 (1971) : 358]

E Excellent facilities will be available in newly built accommodation for those who wish to begin studying the subject as a career. [741-014 (1971) : 521]

E Expertise on theoretical and experimental stress analysis, economic evaluations etc. is currently available in the Laboratories and the candidate will be able to draw on the support of these and other specialist functions. [750-003 (1971) : 354]

E Fellowships will be tenable for one year from 1 September, 1972 [776-028 (1971) : 288]

E Fellowships, up to 12 of which may be awarded, will be tenable for a period of two years with the possibility of an extension for a third year. [774-040 (1971) : 191]

E Financial support will be available for successful candidates. [758-075 (1971) : 55]

E For some posts several years relevant experience is required but for others new graduates will be suitable. [767-010 (1971) : 542]

E For the latter, enquiries will be welcomed from candidates who wish to return from North America and other overseas locations as well as those based in the United Kingdom. [772-071 (1971) : 60]

E For the senior lectureship preference will be given to a candidate [774-022 (1971) : 189]

E For your degree and naval experience will be enough to earn you £1,719 a year on becoming a naval officer full time. [774-002 (1971) : 187]

E Forms returnable by June 1st, but effort will be made to consider late applications from candidates who have had to await degree results. [745-073 (1971) : 63]

E Full details and application forms will be sent to enquirers at the conclusion of the postal strike. Telephone: 01-992 6661 extension 71. [741-046 (1971) : 524]

E Further information and application forms will be sent only to those applicants who seem suitable for serious consideration and meet the needs of the Organization. [745-004 (1971) : 57]
Further studentships will be available [772-071 (1971) : 60]

Grading and entry point will be related to qualifications and experience. [763-010 (1971) : 344]

Grades in Botany, Agricultural Botany or Material Science / Physics will be considered. [745-061 (1971) : 62]

Grades wishing to suggest new projects will also receive consideration. [774-050 (1971) : 192]

Grades with a first or upper second class degree or equivalents in engineering, mathematics, physics or also in biological subjects for the hearing studies, will be considered. [745-031 (1971) : 60]

He will be an Assistant Chief of the Division of Food Research. [741-008 (1971) : 520]

He will have the opportunity to develop his own research interests. [741-008 (1971) : 520]

Hence preference will be given to applicants who have a special interest in that field. [758-001 (1971) : 50]

If necessary, relocation costs will be paid. [745-015 (1971) : 58]

If the proposed work necessitates the use of a motor vehicle, the Royal Society will conduct negotiations with the proposed overseas supervisor for such a vehicle to be provided, if necessary providing the supervisor with an advance to purchase one, [772-070 (1971) : 60]

If you are a science graduate with a first or good second class honours degree, age 32 or over, and would like to make a career in the administration of research, a post of Scientific Administrative Officer in the MRC Headquarters Office in London will be of interest to you. [763-033 (1971) : 346]

In addition to assisting with teaching duties, the successful applicant will be encouraged to undertake research. [741-014 (1971) : 521]

In addition, it is hoped that the Department’s first M.Sc. degree course, in Neurophysiology, will be introduced in September 1972. [772-027 (1971) : 55]

In addition, it is hoped that the installation will be connected to a regional computing centre in the near future. [741-005 (1971) : 520]

In appropriate cases full removal expenses will be paid including legal costs. [733-089 (1971) : 49]

In determining the amount of the award, account will be taken of the applicant’s existing remuneration. [772-087 (1971) : 63]

In such cases a grant will be made towards travel expenses. [772-095 (1971) : Cii]

In this course tested techniques to enable the engineering fortran programmer to apply computer graphics will be presented, supported by case studies. [741-044 (1971) : 524]

In this the effect of irrigation on soil micro-organism activity will play an important part. [754-061 (1971) : 603]

Included in the course will be lectures on the thermodynamics of cells, electrode kinetics, the theory of electrocatalysis, electroanalysis, corrosion, batteries and fuel cells, deposition, machining, processing and synthesizing. [737-039 (1971) : 280]

INFORMAL INTERVIEWS WILL BE HELD AT SELECTED CENTRES THROUGHOUT THE COUNTRY [733-075 (1971) : 47]

Initial appointment will be non-pensionable but the successful candidate can be considered for pensionable status after a period of service. [750-001 (1971) : 354]

Initial placing on the lectureship scale will depend on qualifications and experience. [733-052 (1971) : 44]

Initial placing, which will depend on experience and qualifications, [745-025 (1971) : 59]

Initial salary will be within the range £1,200 - £1,518 per annum, according to qualifications and experience. [754-037 (1971) : 601]

It will be given in conjunction with the Scientific Staff of the Royal Botanic Garden [774-049 (1971) : 192]

It will be held on 20 April. [745-076 (1971) : 63]

It will be normally awarded to a graduate who has already held a senior research award. [772-094 (1971) : 64]

It will be possible to specialise in three main branches of study: [745-084 (1971) : 64]

It will collaborate closely with university scientists and the existing support teams of the UKAEA. [754-071 (1971) : 604]
It will enable citizens of the British Commonwealth to undertake original work leading to advancement in aeronautics, with special reference to safety and reliability in air transportation. [745-092 (1971) : 64]

It will include lectures and discussion on fundamental aspects of virology with particular emphasis on the genetics and molecular biology of viruses. [772-073 (1971) : 61]

It will provide background to modern electronics based on switching devices logic and computing circuits. [772-084 (1971) : 63]

Its offices will be in or near Edinburgh. [763-003 (1971) : 343]

Knowledge of all the techniques involved is not essential qualification – training within the unit will be given. [754-028 (1971) : 600]

Knowledge of COBOL is desirable, although applicants with FORTRAN or ASSEMBLER will be considered provided they have disk or tape experience. [733-048 (1971) : 43]

Laboratory instruction in virological techniques and in genetic and biochemical techniques as applied to animal viruses will complement the lecture course. [772-073 (1971) : 61]

Last, but by no means least, there is the security of being a trained engineer with an expertise that will stand you in good stead throughout your career. [772-046 (1971) : 57]

Lectures will begin each Wednesday at 2.30 p.m. [772-084 (1971) : 63]

Lectures will cover the analysis of numerical methods, differential equation theory and a choice of application areas. [772-082 (1971) : 62]

Liquid scintillation counting will be a special feature of the course. [745-083 (1971) : 64]

Maintenance grants of £501 in 1972/73 and £521 thereafter will be paid, supplemented, where appropriate, by a dependant’s allowance. No tuition, registration or examination fees are payable. [767-074 (1971) : 548]

Non-contributory pension and life assurance will apply. [733-089 (1971) : 49]

One of these posts is primarily concerned with the clinical applications of radioactive isotopes and will be opportunities for gaining experience in all aspects of radiation physics work. [767-057 (1971) : 547]

Only those who have recently graduated in natural science, or expect to graduate this summer, will be considered. [772-070 (1971) : 60]

Other things being equal, preference will be given to candidates proposing to carry out their research at institutions other than that from which they make application. [772-095 (1971) : Ciii]

our Analytical Research Department, whose prime responsibility will be to ensure the efficient operation of NMR, IR and UV services. [733-038 (1971) : 42]

Practical sessions will be organised. [741-044 (1971) : 524]

Preference will be given to candidates with experience in one of the following fields - Cytogenetics, Developmental Genetics, Molecular Cytology or Population Genetics. [733-030 (1971) : 41]

PREFERENCE WILL BE GIVEN TO A CANDIDATE WHOSE CHIEF INTERESTS ARE IN THE FIELD OF EITHER MATERIALS OR MACHINES. [737-008 (1971) : 277]

Preference will be given to a candidate whose chief interests are in the field of either materials or machines. [758-046 (1971) : 53]

Preference will be given to a person whose main interests are in Biometeorology and/or Agricultural Meteorology. [733-039 (1971) : 42]

Preference will be given to a post-doctoral plant physiologist with experience or interest in hormones. [745-046 (1971) : 61]

Preference will be given to an applicant interested in the experimental evolution of the genes and enzymes. [772-033 (1971) : 55]

Preference will be given to applicants with industrial analytical experience. [767-063 (1971) : 547]

Preference will be given to applicants with interests primarily in fundamentals. [733-085 (1971) : 48]

Preference will be given to candidates familiar with virus work tissue culture and aseptic techniques. [741-041 (1971) : 523]

Preference will be given to candidates having experience [750-026 (1971) : 356]
| Preference | will be given to candidates in the fields of Polymer Science and Technology and Chemical Science and Technology, Chemical Science and Technology and Materials Science and Technology. [772-050 (1971) : 58] |
| Preference | will be given to candidates who are experienced in preparative organometallic chemistry and who are prepared to move into catalytic work. [774-026 (1971) : 190] |
| Preference | will be given to candidates with a special interest in oceanography or marine biology. [750-043 (1971) : 358] |
| Preference | will be given to candidates with clear ability in teaching, and capable of developing active research interests related to industrial inorganic chemistry in areas other than transition metal chemistry. [758-011 (1971) : 51] |
| Preference | will be given to candidates with experience in surface physics, band theory of solids, the theory of soft X-ray spectroscopy or related topics. [733-044 (1971) : 43] |
| Preference | will be given to candidates with experience in the application of high power lasers. [758-051 (1971) : 54] |
| Preference | will be given to candidates with experience of UHV technology, or experimental surface physics. [733-044 (1971) : 43] |
| Preference | preference will be given to candidates with good knowledge in Biology. [754-073 (1971) : 604] |
| Preference | will be given to candidates with interests in developmental anatomy. [754-016 (1971) : 599] |
| Preference | will be given to candidates with interests in either Root Studies or Ecosystem Modelling. [754-016 (1971) : 599] |
| Preference | will be given to candidates with previous experience in analytical chemistry, biochemistry or the physico chemical aspect of the toxicology of vapours and aerosols. [758-014 (1971) : 51] |
| Preference | will be given to candidates with qualifications in physics and interests in micrometeorology or the application of physics to plant systems. [754-016 (1971) : 599] |
| Preference | preference will be given to experimental physics. [772-094 (1971) : 64] |
| Preference | will be given to recent graduates who have carried out a research project whilst at University. [763-044 (1971) : 347] |
| Preference | will be given to those applicants who have previous teaching laboratory experience. [750-004 (1971) : 354] |
| Preference | will be given to those with an engineering background and some degree of specialisation in the mechanisms of materials, materials production, design and reliability, or materials finishing. [758-039 (1971) : 53] |
| Preference | will be given to those with experience in human cytogenetics. [733-077 (1971) : 47] |
| Preference | Previous editorial experience, though desirable, is not essential, as training will be given. [774-006 (1971) : 188] |
| Preference | Research studentships and post-doctoral posts will be available for researchers in the new and expanding Department of Materials Technology. [745-072 (1971) : 63] |
| Preference | routine servicing (maintenance will be done by AEI); [758-055 (1971) : 54] |
| Preference | This will be awarded for experimental research in any branch of the natural sciences, but if there are candidates of similar merit, [772-094 (1971) : 64] |
| Preference | S.R.C. support for these Studentships is available and the Student will be registered for a Cranfield Ph.D. [763-050 (1971) : 348] |
| Preference | Salaries / grants will be in line with current S.R.C. rates. [758-066 (1971) : 55] |
| preference | will depend on age and experience, [754-071 (1971) : 604] |
| preference | will be in line with current S.R.C. rates. [758-066 (1971) : 55] |
| preference | will depend on age and experience, [754-071 (1971) : 604] |
| preference | will be in line with current S.R.C. rates. [758-066 (1971) : 55] |
| preference | normally be in the range £1,500 - £2,500 according to qualifications and experience. [774-020 (1971) : 189] |
| preference | will be on one or other of the following Grades: - Grade IV - £1,128 (Honours £1,162) rising to £1,612 [763-017 (1971) : 345] |
| preference | Salary according to age, qualifications and experience will be on the scale £1,123 - £2,639. [745-049 (1971) : 61] |
| preference | Salary range in the Scientific Officer class is £1,162 - £2,703 p.a. and the point of entry will depend on postgraduate qualifications and approved experience. [737-012 (1971) : 278] |
Salary rates for women are currently less than those for men, but this differential will be eliminated by January 1972. [754-081 (1971) : Ciii]

Salary will be according to qualifications and experience. [772-021 (1971) : 54]

Salary will be at a suitable point on the scale: [754-020 (1971) : 600]

Salary will be at an appropriate point on the scale £1,491 - £3,417 according to age, qualification and experience. [737-025 (1971) : 279]

Salary will be at an appropriate point on the scale £1,491 to £3,417 according to age, qualifications and experience. [745-060 (1971) : 62]

Salary will be attractive and Company benefits and working conditions are excellent. [745-016 (1971) : 58]

Salary will be attractive and negotiable. [737-004 (1971) : 277]

Salary will be dependent on age, qualifications and experience, and there are the usual fringe benefits such as contributory pension scheme, free life assurance scheme and subsidised staff cafeteria. [737-016 (1971) : 278]

Salary will be in accordance with the Scale Technician Grade £1,366 - £1,677 per annum if approved qualifications held. [754-046 (1971) : 602]

Salary will be in the Basic Scale Grade £1,095 to £2,103. [774-027 (1971) : 190]

Salary will be in the range £1,398 - £2,062 per annum. [745-028 (1971) : 59]

Salary will be in the range £1,398 - £2,103. [774-027 (1971) : 190]

Salary will be in the range £1,095 to £2,103. [774-027 (1971) : 190]

Salary will reflect the importance of the appointment, profitability conditions include the opportunity to share in profitability, pension scheme and relocation assistance. [741-027 (1971) : 522]

Salary, with F.S.S.U. benefits, will be at an appropriate point on the scale £3,186 - £4,401 according to age, qualifications and experience. [745-001 (1971) : 57]

Scholarships tenable at the Royal Military College of Science, will be awarded on the result of interviews to be held in December, 1971. [767-074 (1971) : 548]

Secondary education is available, and housing will be provided at a nominal rental in the case of married male appointee. Applicants are invited for appointment to the following research position. [754-061 (1971) : 603]

Separate interviews will be conducted by the appointments consultant named and by a specialist in the industry, profession or function concerned. [741-020 (1971) : 521]

Short-listed candidates will be asked to complete an application form. [767-048 (1971) : 546]

Starting salaries, which will be dependent upon experience and age, are within the range £1,152 - £2,703 for the Scientific Officer class (£2,193 - £2,703 at Senior Officer level). [750-011 (1971) : 355]

Starting salaries, which will be dependent upon experience and age, are within the range £1,162 - £2,703 for the Scientific Officer class, and £1,020 - £2,177 for the Scientific Officer class, £2,193 - £2,703 at Senior Officer level, and £1,020 - £2,177 for the Experimental Officer class. [754-042 (1971) : 601]
Starting salaries, which will be dependent upon experience and age, are within the range £1,162 - £2,703 for the Scientific Officer class (£2,193 - £2,703 at Senior Scientific Officer level, and £1,020 - £2,177 for the Experimental Officer class). [767-013 (1971) : 543]

Starting salary will be £1,000 - £1,400 depending on age, experience and ability. [733-070 (1971) : 46]

Starting salary will be £1,250 p.a. and there is free company transport to and from West London. [774-030 (1971) : 190]

Starting salary will be determined within the scale shown [733-083 (1971) : 48]

Starting salary will be based upon age, qualifications and experience. [767-032 (1971) : 544]

STARTING SALARY will be attractive. [733-083 (1971) : 48]

STARTING SALARY will be attractive. [733-083 (1971) : 48]

Starting salary will be in the region of £4,500 according to age, experience and qualifications. [774-032 (1971) : 190]

Starting salary will reflect age and experience [733-089 (1971) : 49]

Subject to certain conditions the successful applicant will be eligible for: [767-030 (1971) : 544]

Successful applicants will be notified of any requirements [772-085 (1971) : 63]

Successful applicants will qualify for Beecham Group’s generous profit sharing and non-contributory pension schemes. [733-047 (1971) : 43]

Successful applicants will work in small teams [733-047 (1971) : 43]

Successful applicants will work under the supervision of Professor R. M. Barrer, F.R.S., and may proceed to higher degrees. [758-009 (1971) : 50]

Successful candidates will be appointed as either Scientific Officer or Senior Scientific Officer according to age and experience. [767-010 (1971) : 542]

Suitable candidates for the studentship will be encouraged to submit for a higher degree. [745-057 (1971) : 62]

Suitable candidates will be encouraged to work for a higher degree. [763-041 (1971) : 347]

Successful financial assistance will be arranged to enable the successful applicants to take up appointments in either Sydney or Perth. [758-043 (1971) : 53]

Teaching in Biochemistry to the second year of the B.Sc. course commenced in 1971 and will be extended to the third year in 1972. [767-053 (1971) : 546]

The analytical chemistry of the noble metals has been under investigation for three years and will continue to be the main project in the future. [758-001 (1971) : 50]

The annual meeting of the British Section of the Combustion Institute will be held at the University College of Swansea on 21st and 22nd September, 1971. [758-083 (1971) : 56]

The applicant must hold a First or Upper Second Class Honours degree in Botany and will be eligible to register for a higher degree. [754-005 (1971) : 598]

The appointment initially will be until 31st March 1972. [741-029 (1971) : 522]

The appointment is initially for a period of three years, and will entail travelling and periods of work at sea. [754-041 (1971) : 601]

The appointment will be either permanent or short-term with prospects of becoming permanent as may be mutually agreed; [754-070 (1971) : 604]

The appointment will be for a maximum of three years. [750-063 (1971) : 360]

The appointment will be for a period of 3 years, commencing not later than October 1971. [745-005 (1971) : 57]

The appointment will be for a three year period. [745-055 (1971) : 62]

The appointment will be for one year from 1 October, 1971, but may be renewed, [754-052 (1971) : 602]

The appointment will be for one year in the first instance with a salary on a scale having a maximum of £1,550. In addition there are F.S.S.U. benefits. [750-016 (1971) : 355]

The appointment will be for one year in the first instance with a salary on a scale having a maximum of £1,900 together with F.S.S.U. benefits. [758-051 (1971) : 54]

The appointment will be for one year in the first instance, with the possibility of renewal for a further year or more. [745-063 (1971) : 62]
The appointment will be for the period 1 June 1971, or as soon as possible thereafter to 31 March 1974 with possibility of extension to provide for three-year tenure of appointment. [745-033 (1971) : 60]

The appointment will be for three years (terminable) in the first instance, but with a view to permanency. [754-063 (1971) : 603]

The appointment will be for three years in the first instance but is renewable. [758-045 (1971) : 53]

The appointment will be for three years on the scale £1,491 (age 24) to £3,441 (age 38). [745-046 (1971) : 61]

The appointment will be for three years (terminable) in the first instance, but with a view to permanency. [754-063 (1971) : 603]

The appointment will be for twelve months in the first instance. [772-040 (1971) : 56]

The appointment will be for two years at a salary according to experience in scale £1,162 - £1,982. [758-056 (1971) : 54]

The appointment will be from 1st May or a mutually agreed date. [741-034 (1971) : 523]

The appointment will be in the grade of Principal Scientific Officer [733-042 (1971) : 42]

The appointment will be in the grade of Principal Scientific Officer (£2,995 - £4,007 inclusive of Inner London Weighting) or Senior Principal Scientific Officer (£4,565 - £5,190, also inclusive) according to age, qualifications and experience. [758-028 (1971) : 52]

The appointment will be in the S.O/S.S.O. scale: [767-028 (1971) : 544]

The appointment will be in the Senior Scientific Officer or Principal Scientific Officer grade (salary scales £2,303/£3,255 & £3,100/ £4,100 respectively, plus 4 ¼ % non-pensionable superannuation allowance to offset contributions under FSSU). [772-016 (1971) : 54]

The appointment will be made at the lower end of the scale £1,491 x 135/138 - £2,454 per annum, plus £100 London Allowance and FSSU [772-017 (1971) : 54]

The appointment will be made by the President and Council of the Royal Society. [772-094 (1971) : 64]

The appointment will be made either in the grade of Experimental Officer or Research Assistant according to qualification and experience. [745-020 (1971) : 59]

The appointment will be made in grades carrying salaries in the range £1,154 - £1,827 or £1,268 - £2,368 according to age and experience. [763-016 (1971) : 345]

The appointment will be made under an SRC research grant [745-028 (1971) : 59]

The appointment will be subject to the satisfactory period of two years [741-033 (1971) : 523]

The appointment will be to the Council’s established staff, subject to satisfactory completion of a probationary period of two years. [763-033 (1971) : 346]

The appointment will be to the scientific staff, probably in the salary range £3,065-£3,690 p.a. and superannuable under F.S.S.U. [733-040 (1971) : 42]

The appointment will date from 1 October 1972, or such other date as may be arranged. [772-094 (1971) : 64]

The appointment will date from 1st August, 1971, or soon as possible after that date, [741-015 (1971) : 521]

The appointment will date from 1st October 1971. [745-017 (1971) : 58]

The appointment will normally be for three years [750-049 (1971) : 358]

The appointment will take effect as soon as is practicable, preferably not later than 1st October 1971. [758-046 (1971) : 53]
The appointment, which is supported by an S.R.C. grant, will be for a period of up to 3 years starting on 1st April 1971, or as soon as possible thereafter. [741-031 (1971) : 522]

The appointments will be 3 year contracts as Research Associates or as permanent posts in the Scientific Officer class. [754-071 (1971) : 604]

The awards will be announced before the end of April. [772-090 (1971) : 64]

The awards will be tenable for two years at any University, College of Technology or other recognised centre of research in the United Kingdom or the Republic of Ireland. [772-090 (1971) : 64]

THE BASIC PRINCIPLES OF COLOUR REPRODUCTION will be given in the Applied Optics Section [733-007 (1971) : 38]

The British Council will pay the return tourist class air fare. [733-011 (1971) : 38]

The closing date for receipt of applications for the above posts will now be one week after resumption of normal postal services. [741-040 (1971) : 523]

The closing date will be the 17th May 1971 [750-012 (1971) : 355]

The closing dates for the acceptance of applications for the following posts will be extended to a date 10 clear days after the formal settlement of the postal workers strike and the resumption of postal deliveries. [741-019 (1971) : 521]

The commencing salary and grading will be according to qualifications and experience. [733-071 (1971) : 47]

The commencing salary will be at an appropriate point on the scale £1,355 - £3,105 [733-035 (1971) : 42]

The commencing salary will be in the incremental range £1,510 - £1,867, according to qualifications and experience. [774-006 (1971) : 188]

The Company is committed to considerable expansion of new product development in much enlarged and attractive premises with excellent facilities and the successful applicant will fill a key part in strengthening the Development team. [772-031 (1971) : 55]

The Company will also consider payment of removal expenses to married men, and there are generous fringe benefits. [763-012 (1971) : 344]

The Company will make a further grant equivalent to the employer’s share of F.S.S.U. contributions if the Fellow is a member of the Scheme. [772-090 (1971) : 64]

The Council will be drawn from the Colleges, agricultural research institutes in Scotland and the farming community [763-003 (1971) : 343]

The course has been approved by the Science Research Council for tenure of its advanced course studentships which will be available to the successful applicants. [737-040 (1971) : 280]

The course leading to the degree of M.Sc. by examination, will provide instruction in the branches of chemistry or particular concern to those whose interests lie in the field of colour. [745-080 (1971) : 63]

The course will attract a limited number of Science Research Council quota awards, principally for new graduates, [772-083 (1971) : 63]

The course will be of particular interest to teachers of “A” level Biology. [745-075 (1971) : 63]

The course will consist of lectures [733-007 (1971) : 38]

The course will consist partly of lectures on the chemistry of colour matters, the physical chemistry of absorption, photochemistry, colour physics and the chemistry of natural and synthetic polymers. [745-080 (1971) : 63]

The course, which will be of twelve months duration, starting in October, is designed to meet the needs of industry and research establishments for graduates in the modern theory in current experimental methods of Electrochemical Technology. [737-039 (1971) : 280]

The course, which will include demonstrations and lectures by industrial experts, is designed to assist scientists, industrial managers and technical representatives in keeping abreast with modern developments in plastics provision and use. [750-061 (1971) : 360]

The duration of the appointment will be for a fixed term of three years, [754-081 (1971) : Ciii]
The experimental programme will be carried out in collaboration with the A.R.C. Poultry Research Centre, Edinburgh. [750-023 (1971) : 356]

The Fellowship will be tenable for one year initially and may be renewed for up to two further years. [774-004 (1971) : 188]

The Fellowships will be worth £1,750 per annum. [772-090 (1971) : 188]

The final choice of candidates will be made by a National Selection Committee, comprising representatives of the universities and of ICI. [774-004 (1971) : 188]

The first post will be filled by an applicant with interests in ecology, soil science or biogeography. [774-004 (1971) : 188]

The following seminars on various aspects of cryogenics will be held on Fridays [733-012 (1971) : 39]

The following will be covered: [750-058 (1971) : 359]

The grant will be £550 per annum, plus fees and other allowances. [745-074 (1971) : 63]

The incremental computer will be linked to the two digital machines to form a unique computing system. [776-018 (1971) : 287]

The Indian UGC will arrange a suitable programme in India [733-011 (1971) : 38]

The initial appointments will be made within the salary range of £2,454 to £2,727. [489-030 (1971) : 600]

The initial salary will be £1,355 or £1,480, depending on previous experience, with FSSU. [733-044 (1971) : 43]

The initial salary will be £1,491 p.a. [745-033 (1971) : 60]

The initial salary will be in the range £2,105 - £2,605 per annum, depending upon age and experience, [733-044 (1971) : 43]

The initial salary will be within the range £1,491 - £1,767 per annum [733-028 (1971) : 41]

The initial salary will depend on qualifications and experience. [737-031 (1971) : 279]

The initial salary will depend upon qualifications and experience. [745-003 (1971) : 57]

The initial salary will be within the range £1,491 - £1,767 per annum [733-028 (1971) : 41]

The initial salary will depend on qualifications and experience. [733-030 (1971) : 41]

The initial salary will depend on qualifications and experience. [758-062 (1971) : 54]

The initial salary, which will depend upon qualifications and experience, [774-040 (1971) : 191]

The laboratories are situated in central London and the starting salary will be about £1,850 per annum. [733-060 (1971) : 45]

The laboratory – formerly designated the Division of Dairy Research – will in future form part of the Organization’s Division of Food Research, and thus ensure close association with other food research being conducted by CSIRO as well as with the dairy manufacturing industry. [741-008 (1971) : 520]

The latest date for receiving Applications will be: 18th February, 1971. [733-015 (1971) : 39]

The lecturer will be encouraged to pursue research [733-055 (1971) : 44]

The maximum basic award will be at the rate of £5,000 per annum [772-087 (1971) : 63]

The normal entry is in October, but a small number of projects covering a variety of disciplines will become available from January 1972 onwards. [774-050 (1971) : 192]

The person appointed will join a research team concerned with material flow in the solid state due to the modification of diffusion processes by temperature gradients and electric fields. [774-051 (1971) : 192]

The person appointed will work under the supervision of Dr. C. Brown, Reader in Physical Metallurgy on an aspect of the relationship between structure and crystallinity of polymers, and must be eligible to register for a higher degree. [774-044 (1971) : 191]

The position will be vacant from April 1st 1971 but the appointment should begin after the end of the current academic year. [745-018 (1971) : 58]

The post will be Grade V Physics Technician. [763-037 (1971) : 346]

The post will be initially for one year but there is a possibility of it becoming a permanent post: salary up to £1,500 plus London Allowance. [750-048 (1971) : 358]

The post will be tenable as soon as possible until 30 September, 1974. [772-068 (1971) : 60]

The post will be tenable for a fixed period of 3 years [754-063 (1971) : 603]

6095
The post will initially be in the University’s Grants and Training Awards Division, [741-033 (1971) : 523]

The post will normally be of 3 years’ duration, [776-001 (1971) : 286]

The post will normally be tenable for a period of three years. [767-038 (1971) : 545]

The postgraduate course leading to a Diploma in Plant Taxonomy, will be run from October 1, 1972, to the end of June 1973. [774-049 (1971) : 192]

The Principal Officer will be the executive head of the Council’s staff [763-003 (1971) : 343]

The programme will include lectures by Computer Graphics Specialists, Educationalists and Professional Animators on the possibilities afforded by Computer Generated Films. [750-055 (1971) : 359]

The project is financed by the S.R.C. and will consist of research under the joint direction of Professor C. Kemball and Professor E. A. V. Ebsworth on the catalytic properties of some organometallic compounds of transition metals. [774-026 (1971) : 190]

The project will involve fast scan infra-red spectroscopy of turbulent flames. [772-068 (1971) : 60]

The salary scale for both posts will be advertised later. [767-036 (1971) : 545]

The remuneration will be commensurate with qualifications and experience. [745-015 (1971) : 58]

The research associate/ senior research associate in the Department of Civil Engineering is to investigate primarily the nature of farm wastes and biological treatment systems and will be assisted by a technician. [733-035 (1971) : 42]

The research will be in association with Metals Research Ltd., Cambridge and the candidate must expect to register for an M.Phil / Ph.D. [767-073 (1971) : 548]

The Research will involve the gas chromatography of amino acids. [758-076 (1971) : 55]

The research work will be concerned with an investigation of astronomical sources of polarised infra-red radiation. [754-002 (1971) : 598]

The research work will be concerned with property modifications induced by electrolysis in silica-alkali-aluminium glasses at intermediate temperature. [758-078 (1971) : 55]

The research work will be concerned with various aspects of streptomycin biosynthesis [750-065 (1971) : 360]

The research workers in the three Departments will work as a team [733-035 (1971) : 42]

The salary for a Senior Lecturer will be within the range $A9,667 with 5 annual increments to $A11,130 per annum and for a Lecturer $A6,697 with 7 annual increments to $A0,286 per annum. [750-030 (1971) : 357]

The salary of the appointee will be the subject of negotiation, depending on the experience and achievements of the successful applicant, [741-008 (1971) : 520]

The salary offered will be competitive depending on previous background and experience. [758-014 (1971) : 51]

The salary scale for both posts will be in accordance with Burnham F.E. Report for a Vice-Principal of a college in group 9, plus London allowance £85. [745-024 (1971) : 59]

The salary will be £1,050 p.a. rising by annual increments of £30 to £1,110 p.a. [774-044 (1971) : 191]

The salary will be appropriate to age and experience [750-049 (1971) : 358]

The salary will be at an appropriate point on the Lecturers’ scale [733-055 (1971) : 44]

The salary will be at an appropriate point on the scale £1,140 to £1,902 per annum. [733-035 (1971) : 42]

The salary will be at an appropriate point on the scale £1,491 x £138 - £1,767 (extendable to £2,178). [741-034 (1971) : 523]

The salary will be determined at an appropriate point between £2,400 and £3,003 p.a. which is part of the Lecturer scale according to age and experience. [745-013 (1971) : 58]

The salary will be in the range £1,491 to £2,454. [750-063 (1971) : 62]

The salary will be negotiated appropriate to the seniority of the position [758-043 (1971) : 53]

The salary will be not less than £4,533 a year. [767-031 (1971) : 544]

The salary will be on a scale from £4,695 to £5,240. [763-003 (1971) : 343]
| E | The salary **will be** on the scale £1,212 - £1,278 per annum, together with F.S.S.U. benefits. [767-043 (1971) : 546] |
| E | The salary **will be** on the scale £1,491 to £3,417 [733-058 (1971) : 44] |
| E | The salary **will be** within the range £1,150 to £1,400 per annum OR £1,400 to £2,160 per annum, depending on qualifications and experience. FSSU. [772-056 (1971) : 59] |
| E | The salary **will be** within the range £1,200 to £1,400 or higher in the case of an exceptionally well qualified applicant. [754-026 (1971) : 600] |
| E | The salary **will depend** on qualifications and experience. [758-034 (1971) : 52] |
| E | The salary **will normally be** between £1,490 and £2,700 p.a. according to experience, qualifications and age, but higher salaries can be paid to particularly well qualified and experienced associates. [745-047 (1971) : 61] |
| E | The scholarship **will be** tenable for three years in some part of the British Commonwealth other than that in which the applicant graduated. [772-094 (1971) : 64] |
| E | The School is well-equipped for such studies and the successful candidate **will be** joining a strong research group working on both communication theory, and components and devices for advanced communication systems. [745-051 (1971) : 61] |
| E | The School of Cultural and Community Studies is proposing to appoint a Lecturer in Community Studies who **will be** particularly connected with its contextual or common courses. [745-010 (1971) : 57] |
| E | The second post **will be** filled by an applicant with interests in social geography and population. [745-064 (1971) : 62] |
| E | The second Professor Moore Memorial Lecture on “Elastomers” **will be given** at the University of Bradford on Thursday, 21st October 1971 at 6.30 p.m. by Sir Harry Melville, KCB, FRS. [750-057 (1971) : 359] |
| E | The Section is concerned with developing methods of management and irrigation of forage crops which **will make** the most efficient use of both water applied as irrigation and soil water. [758-023 (1971) : 52] |
| E | The senior lectureship **will be** vacant from the 1st January, 1972, [774-022 (1971) : 189] |
| E | The starting salary **will be** between £1,491 and £2,040 according to qualifications and experience, with annual increments and FSSU. [774-014 (1971) : 189] |
| E | The stipend **will be** £1,350 for the first year [733-010 (1971) : 38] |
| E | The stipend **will be** according to age on the scale £1,491 (at age 24 and under) to £3,741 (at 41 and over). [772-055 (1971) : 56] |
| E | The stipend **will depend** upon age, qualifications and experience, [772-095 (1971) : Ciii] |
| E | The studentship **will be** available from 1st April, [745-074 (1971) : 63] |
| E | The studentships **will cover** the cost of travel to and from the country of choice, as well as local travel within the country, and a maintenance allowance at a rate based on the local cost of living. [772-070 (1971) : 60] |
| E | The studies **will involve** labelled compounds [733-031 (1971) : 41] |
| E | The subject of the meeting **will be** “Flames, Flammability and Fires” [758-083 (1971) : 56] |
| E | The successful applicant **will be encouraged** to conduct research and if necessary register for a higher degree. [754-067 (1971) : 604] |
| E | The successful applicant **will be** the leader of this section and therefore must have experience in separation techniques, such as liquid-liquid extraction, ion exchange and chromatography and have the ability to direct research projects in those fields. [758-001 (1971) : 50] |
| E | The successful applicant **will be trained** to take charge of operation and maintenance of a 3MV accelerator to be installed at the University in 1972. [745-028 (1971) : 59] |
| E | The successful applicant **will enjoy** excellent conditions of employment associated with a large organisation. [733-088 (1971) : 49] |
| E | The successful applicant **will have** the opportunity to register for a higher degree. [767-059 (1971) : 547] |
| E | The successful applicant **will join** a group working on the theory of the semiconductor injection laser [745-022 (1971) : 59] |
The successful applicant will join a team involved in the development of new pharmaceutical formulations working mainly on his own initiative but with the assistance of laboratory assistants. [741-028 (1971) : 522]

The successful applicant will qualify for the Group’s generous profit sharing and non-contributory pension and life assurance scheme. [763-040 (1971) : 347]

The successful applicant will qualify for the Group’s generous profit sharing and non-contributory pension and life assurance schemes. [767-017 (1971) : 543]

The successful applicant will work in a small team testing products for the prevention of dental decay and developing methods of biologically testing other oral hygiene products. [776-010 (1971) : 287]

The successful applicants will be encouraged to continue studying for further qualifications. [737-017 (1971) : 278]

The successful candidate will be appointed as a Principal Scientific Officer, £2,820 - £3,902. [754-041 (1971) : 601]

The successful candidate will be appointed as an Assistant Experimental Officer. [754-035 (1971) : 601]

The successful candidate will be appointed as either Experimental Officer or Assistant Experimental Officer. [754-042 (1971) : 601]

The successful candidate will be appointed as Experimental Officer [733-018 (1971) : 39]

The successful candidate will be appointed as Experimental Officer or Assistant Experimental Officer. [733-031 (1971) : 41]

The successful candidate will be appointed as Scientific Officer or Senior Scientific Officer. [733-031 (1971) : 41]

The successful candidate will be appointed as Scientific Officer or Senior Scientific Officer. [733-031 (1971) : 41]

The successful candidate will be appointed to the staff of the Public Health Laboratory Service [772-021 (1971) : 54]

The successful candidate will be appointed within the Scientific Officer class. [750-010 (1971) : 355]

The successful candidate will be appointed within the Scientific Officer class. [754-036 (1971) : 601]

The successful candidate will be based in Edinburgh for at least one year after which he may be transferred elsewhere in Scotland. [750-035 (1971) : 357]

The successful candidate will be encouraged to undertake research into new methods for the statistical treatment of biological data and to devise mathematical models for the treatment of biological systems, such as the epidemic spread of infectious disease in terms of climate and ecology, in human and other host populations. [750-011 (1971) : 355]

The successful candidate will be offered a Research Associateship tenable for a period of up to three years. [745-047 (1971) : 61]

The successful candidate will join a multidisciplinary research project team engaged in work on various aspects of parasitology. [772-060 (1971) : 59]

The successful candidate will join an interdisciplinary team of Scientists, Psychologists, Statisticians and Natural Scientists carrying out research into aspects of the Open University’s operation. [745-027 (1971) : 59]

The successful candidates will be appointed as Experimental Officer or Assistant Experimental Officer. [733-031 (1971) : 41]

The successful candidates will be appointed with salary in the scale £1,145 (at 22) - £1,436 (at 26 or over) - £1,703. [733-084 (1971) : 48]

The system will provide both engineering and management information on electricity distribution networks. [733-048 (1971) : 43]

The tenure of a Fellowship will be from three months up to one year in the first instance and may be renewable. [754-009 (1971) : 598]

The Unit will be particularly concerned in the longer term development of instruments and research techniques, and with the study of new neutron sources. [754-071 (1971) : 604]
The University of Aston, Birmingham B4 7ET will be pleased to send further particulars and application forms. [772-078 (1971) : 61]

The vacant post will be concerned primarily with part of the Council’s nonclinical activities which include such subjects as physiology, psychology, genetics, immunology, microbiology and molecular biology. [763-033 (1971) : 346]

The value of the awards will be determined on an ad hoc basis [737-041 (1971) : 280]

but will cover fares, subsistence allowances, research and other running expenses. [737-041 (1971) : 280]

The value of the Fellowship will vary [754-009 (1971) : 598]

The value of the scholarship will be adjusted to meet the circumstances of the appointment [772-094 (1971) : 64]

The work is mainly in the laboratories but there will be opportunities for some outdoor work including the examination of scenes of crime and persons appointed as Experimental Officers may be required to give evidence in courts. [745-059 (1971) : 62]

The work will vary [754-036 (1971) : 601]

The work will be associated with a programme in human cancer research. [754-037 (1971) : 601]

The work will be carried out in association with the Institute of Laryngology and Otology (University of London). [758-053 (1971) : 54]

The work will be principally of an experimental nature utilising the model jet noise facility at the Institute of Sound and Vibration Research. [745-020 (1971) : 59]

There will be an opportunity to work for a further degree. [767-001 (1971) : 541]

There will be considerable scope for personal initiative, with special responsibility for the bio-engineering aspects of a project scheduled to last five years initially. [758-053 (1971) : 54]

There will be further scope for studying the subject in depth for devising new experiments in association with the team leader. [741-018 (1971) : 521]

These responsibilities will be reviewed in the near future and may also embrace the direction of research in terrestrial and freshwater ecology. [750-035 (1971) : 357]

They will also be encouraged to pursue their research interests and to assist in the M.Sc. Computer Science course. [754-036 (1971) : 601]

They will also develop professional skills in teaching and consultancy. [737-045 (1971) : 281]

They will be tenable for a period of between 6 and 12 months. [772-070 (1971) : 60]

They will join an expanding data-processing team responsible for the system. [733-048 (1971) : 43]

They will join teams investigating various outlets for borates [723-017 (1971) : 39]

This appointment will be for a maximum period of three years [733-044 (1971) : 43]

This appointment will be of interest to Polymer Physicists, particularly those with experience in X-ray studies of polymer structure. [772-017 (1971) : 54]

This is intended to allow a student to carry out research leading to a Ph.D. and will involve close contact with the Dyestuffs Division of Imperial Chemical Industries Ltd., including specified periods spent in their laboratories. [754-003 (1971) : 598]

This will be of particular interest to the teacher who is contemplating a later - possibly civilian - appointment at senior level. [767-040 (1971) : 545]

This will provide an opportunity for a new look at methods of treating helminth infections through fundamental research [772-060 (1971) : 59]

This work will complement experimental work done in the same laboratories. [741-036 (1971) : 523]

Those appointed will work in modern well equipped laboratories located at Sandwich on the Kent coast. [733-038 (1971) : 42]

Three appointments to the senior staff are to be made in the next six months and the Group will receive adequate technical support. [767-036 (1971) : 545]
| E | Topics discussed will include Penicillins, Cephalosporins, Tetracyclines and Polypeptide-Antibiotics, Antibiotics-Sugars and Mode of Action of Antibiotics, Affecting Cell-wall Structure. [772-072 (1971) : 60] |
| E | **Training will be given** [733-073 (1971) : 47] |
| E | **Training will be given** during employment with day release for appropriate qualification. [745-014 (1971) : 58] |
| E | **Training will be given** if required. [763-016 (1971) : 345] |
| E | **Training will be given** with day release for appropriate qualification. [733-067 (1971) : 46] |
| E | **Training will be given.** [776-003 (1971) : 286] |
| E | Vacancies will shortly occur in the following grades: [750-025 (1971) : 356] |
| E | Visiting specialists will participate in this course [750-058 (1971) : 359] |
| E | We are seeking someone with a first degree or equivalent in biochemistry to work with a senior biochemist on aspects of membrane biochemistry, and preference **will be given** to applicants with relevant laboratory experience. [772-030 (1971) : 55] |
| E | which will be equipped in the first instance with a high resolution transmission electron microscope. [763-013 (1971) : 344] |
| E | which will include a Secretary and a small number of agricultural specialists [763-003 (1971) : 343] |
| E | While a practical training **will be given**, experience of high vacuum systems, low level counting, or glassblowing **would be advantageous.** [758-012 (1971) : 51] |
| E | While it **will be** an advantage if applicants have already had some postgraduate experience in virology. [741-014 (1971) : 521] |
| E | who **will be** in England during the months of July and August and addressed to: [758-043 (1971) : 53] |
| E | will be made at one of the first three points on the Lecturers’ scale. £1,491 x £138 (2) £1,767 rising to £3,417 with F.S.S.U. [745-025 (1971) : 59] |
| E | will normally be within the range of £1,400 to £1,640 per annum, [774-040 (1971) : 191] |
| E | will work under the supervision of Dr. B. R. Jennings, Reader in Physics. [758-048 (1971) : 53] |
| E | You won’t be committing yourself. [772-046 (1971) : 191] |
| E | promotion prospects excellent – you’ll be in the middle of the information explosion. Location: new, extensive, purpose-built offices in Hitchin, Harts. [763-023 (1971) : 345] |
| E | Wherever you live in England or Wales you’ll follow a sandwich course locally, lasting at least 4 ½ years, combining study for an HND or a degree with practical training. [772-046 (1971) : 57] |
| E | It’s a go-ahead industry and you’ll have the chance to go ahead with it. [772-046 (1971) : 57] |
Which means that if you’re fortunate enough to gain one, you’ll be one of an exclusive band of students. [774-002 (1971) : 187]

For, apart from earning £1,132 a year, tuition fees paid, as a college student, you’ll also be a naval officer starting your career. [774-002 (1971) : 187]

What we’ll look for. [774-002 (1971) : 187]

Applicants should possess a good Honours Degree or equivalent qualification in physical science or engineering and experience in any of the following fields will be of value: [774-052 (1971) : 192]

Experience in sterile handling techniques and methods of protein purification will be essential [737-004 (1971) : 277]

Experience in the design of small electromechanical devices and/or instrumentation will be an asset. [733-040 (1971) : 42]

Experience in these fields will be advantageous. [745-026 (1971) : 59]

Experience with Drosophila will be essential. [745-056 (1971) : 62]

It is expected that candidates will have experience in academic or commercial research, probably in one or more of the following areas: advertising or communications research, programmed learning, sociology, psychology or statistics. [745-027 (1971) : 59]

Normally, candidates will be expected to have held a senior position in further education, [745-024 (1971) : 59]

Other things being equal, preference will be given to applicants with experience in Numerical Analysis, Operating system Design, Operations Research Computations, Simulation, Computer Graphics, or the use of computers for control. [741-005 (1971) : 520]

Some, but not too much, consulting experience will be an asset. [767-062 (1971) : 547]

The person appointed will ideally combine a sound background of research [733-019 (1971) : 40]

The successful candidates will probably have about three years’ experience [733-048 (1971) : 43]

We expect that the successful candidate will have had a minimum of three years’ laboratory experience in mammalian physiology, preferably cardiovascular work, [741-018 (1971) : 521]

Other experience and / or qualifications will be considered. [741-010 (1971) : 520]

Further information on the Combustion Research Programme will also be available from: [1967-085 (1995) : 85]

Informal enquiries can be made on 071 351 8337, shortlisted candidates will be invited to visit the Unit prior to formal interview. [1959-021 (1995) : 50]

Informal enquiries will be welcomed by telephone. [1989-057 (1995) : 72]

Initial contacts will be treated in strict confidence and should be made in the first instance to: [1963-076 (1995) : 67]

Interested candidates should contact Professor R Camp immediately on (0116 252 3061), and will be supplied with detailed written information including the names of available supervisors and their specific areas of study. [1980-129 (1995) : 87]

A first degree Chemistry graduate with 3-5 years’ experience of organic synthesis within the pharmaceutical industry, you will join a team of chemists applying intellectual and synthetic skills to the discovery of novel pharmaceuticals. [1998-069 (1995) : 93]

A three year project which will involve leading a project on the role of endothelium and endothelial mediators in insulin resistance. [1980-074 (1995) : 74]

Additional duties will include the development of in vitro assays for growth factors using predominantly cell-based bioassays and immunoassays. [1971-009 (1995) : 58]
All of which means that as the Medical Information Scientist (Cardiovascular) for our Pharma Division, you’ll certainly have plenty of challenges and opportunities ahead of you. [1971-024 (1995) : 63]

All positions will involve learning new skills quickly, cross-functional project team working and importantly creativity and a logical approach to problem-solving. [1989-002 (1995) : 56]

All three posts will involve tissue culture and molecular biology techniques. [1967-035 (1995) : 73]

and case studies will relate monitoring needs to legislative needs. [1963-101 (1995) : 75]

and will be both in the laboratory and in the field. [2002-041 (1995) : 67]

and will be involved in a number of genome mapping and micro satellite analysis projects. [1959-041 (1995) : 55]

and will be involved in either: [1971-074 (1995) : 78]

and will carry out research. [1980-037 (1995) : 65]

and will interact extensively with our production, QA and sales and marketing functions. [1980-099 (1995) : 79]

and will interact with teams studying the molecular regulation of epithelial transport of micronutrients, and the influence of the human diet on intestinal mucosal cell proliferation. [1967-048 (1995) : 76]

and will involve extensive client liaison. [2006-022 (1995) : 67]

and will involve scheduling and supervising analysis work. [1959-075 (1995) : 63]

and will oversee all technical aspects of the project. [1998-062 (1995) : 91]

and will plan and manage the overall direction for research, operations, financial and human resource management and communications. [1967-005 (1995) : 62]

and will register for a D.Phil at the University of Oxford. [1984-069 (1995) : 72]

and will register for a Ph.D. under the supervision of Professor Billington. [1976-042 (1995) : 73]

and will take an active part in the laboratory diagnosis of Chlamydial infection. [1971-095 (1995) : 82]

and will teach at undergraduate, Masters and Ph.D. levels. [1984-060 (1995) : 70]

and will undertake a three year research programme. [1976-064 (1995) : 78]

and will use tissue culture techniques to study the effects of cryoprotective agents upon endothelial cells and fibroblasts, concentrating upon effects on cell adhesion mechanisms. [1963-057 (1995) : 63]

and will work on novel adhesion molecules that promote the binding of red blood cells to endothelium in sickle cell disease. [1959-013 (1995) : 48]

and will work on the measurement of extracellular matrix mRNA levels in single human renal glomeruli. [1963-097 (1995) : 73]

and, under the relevant Manager, will play a substantive and creative role in carrying through the project/activity. [1959-057 (1995) : 59]

Applications are invited for a position in the Development Department, where the successful candidate will participate in research programmes aimed at developing and improving processes for the isolation and preparation of blood plasma proteins used in a variety of clinical indications. [2002-034 (1995) : 65]

Approaches will include fusion reactions of smaller clusters, together with aufbau and other reactions on preformed macropolyhedral substrates. [1993-072 (1995) : 72]

Areas of responsibility will include method development (drugs, products, plasma. etc). using HPLC, GC, stability studies and product development support. [1963-083 (1995) : 69]

As a Formulaion Scientist you will be working within the early development phase of new chemical entities. [1976-012 (1995) : 63]

As a member of the group, you will work closely with the manufacturing and packaging teams - reviewing and approving batch documentation, troubleshooting on quality matters, auditing production areas and advising many departments on GMP. [2002-048 (1995) : 69]

As a research and development Physicist you will work in the area of computerised conformal radiotherapy in a post sponsored by the EC BIOMED-2 programme as part of the multinational INFOCUS project. INFOCUS aims to bring together innovative opto-electronic hardware developed
| Co | As assistant Microbiologist you will be involved in routine quality control and development projects. [1998-008 (1995) : 74] |
| Co | As number two to the Company Microbiologist, you will be involved in ensuring the microbial quality of a wide variety of sandwiches and raw materials. [2006-083 (1995) : 84] |
| Co | As part of a small, highly skilled multi-disciplinary team, you will be involved in all aspects of biosensor development, from project inception right through to product launch. [1976-028 (1995) : 69] |
| Co | Based at Liverpool Public Health Laboratory you will be part of a team consisting of clinical scientists and medical consultants in epidemiology, tropical medicine, chest medicine and infectious disease. Under the day to day supervision of the principal scientist, [1963-026 (1995) : 56] |
| Co | Breeding of improved varieties of white clover for subsequent development by a commercial partner will be a major focus of the post. [1959-058 (1995) : 59] |
| Co | Close liaison with the ODA/KARI Coordinator on administrative, general management and financial issues will be a major feature of the role. [1963-006 (1995) : 51] |
| Co | Close monitoring and periodic programme evaluation will help you make funding recommendations and develop a balanced portfolio of projects. [2002-054 (1995) : 71] |
| Co | Complementing your technical expertise will be first-class communication and organisational skills, with some knowledge of computers also being a distinct advantage. [1967-061 (1995) : 80] |
| Co | Close monitoring and periodic programme evaluation will help you make funding recommendations and develop a balanced portfolio of projects. [2002-054 (1995) : 71] |
| Co | Experiments will be carried out to verify predictions [1963-030 (1995) : 57] |
| Co | Fe(III) reduction by cellobiose dehydrogenase and Fe(II) autoxidation will be studied as a source of Fenton's reagent (Fe(II)/H$_2$O$_2$). [1971-070 (1995) : 77] |
| Co | Immunological and molecular techniques will be used and the ultra structure of fungi studied using the scanning electron microscope. [1984-013 (1995) : 56] |
| Co | In addition, enquiry work and involvement in the marketing of the Pira database will form part of this varied and interesting position. [1967-083 (1995) : 85] |
| Co | Initially at least, panel work will take priority. [1963-075 (1995) : 67] |
| Co | It will also involve some associated clerical work such as the production of reports, filing etc. [1967-038 (1995) : 74] |
| Co | It will involve an assessment of the available water resource, water quality and the risks associated with the management of the catchment both in respect of the sensitivity of the catchment to change and the place of the catchment in the integrated river and water supply system. [1993-072 (1995) : 72] |
| Co | It will involve biochemical analysis of particulate matter, using modern analytical techniques, and physiological work on the zooplankton. [1971-008 (1995) : 58] |
| Co | It will involve on-site visits in addition to undertaking laboratory tests. [1998-092 (1995) : 99] |
| Co | It will involve the analytical development and marine (shipboard) deployment of a flow injection based chemiluminescence detection system for the determination of dissolved iron species in seawater. [1959-005 (1995) : 46] |
| Co | It will provide comprehensive coverage of both diagnostic and experimental pathology including cellular and molecular pathology. [1971-099 (1995) : 83] |
| Co | It will provide comprehensive coverage of both diagnostic and experimental pathology including cellular and molecular pathology. [1989-117 (1995) : 86] |
| Co | It will utilise classical force-field methods and molecular dynamics, [1998-064 (1995) : 91] |
| Co | Join us as an Information Scientist and you'll be part of a small team providing all the scientific, patent and industry information required to support the activities of our business. [1959-040 (1995) : 55] |
| Co | Joining a small team at the Survey's office in Edinburgh, you will serve the hydrocarbons exploration industry, in addition to public information needs. [2006-059 (1995) : 77] |
| Co | Managing and developing the interface between the company and a portfolio of existing and prospective clients across the entire spectrum of services, you'll foster relationships of mutual respect both inside and outside the organisation as you: [2002-058 (1995) : 72] |
| Co | Methods will be developed in order to give a useful technique for measuring Krypton-85 at environmental levels over a variety of timescales. [1980-120 (1995) : 85] |
| Co | Mutual recognition procedures will involve significant contact with the EMEA, as well as American colleagues and European affiliates, [1998-083 (1995) : 96] |
| Co | One postdoctoral post, based in the Department of Biochemistry, Charing Cross and Westminster Medical School, will be concerned with molecular aspects of viral persistence and analysis of cardiovirulence: [1959-067 (1995) : 61] |
| Co | Ray-based methods are currently used, and channel and system models will be developed for use in communications simulation packages. [1971-003 (1995) : 55] |
| Co | The successful candidate will work well within teams [1989-028 (1995) : 65] |
| Co | To this aim, you will work in close collaboration with our researchers in the design and analysis of experiments, ranging from bench top formulations to large scale consumer studies. [1980-009 (1995) : 57] |
| Co | The work will be undertaken on material accumulated during an eight year prospective study of cervical epithelial neoplasia. [1984-088 (1995) : 76] |
| Co | Working as a Principal Research Scientist within our pre-clinical Research Department you’ll have a challenging role which will require skills of leadership and responsibility and the ability to interact effectively and successfully with colleagues and research professionals world-wide to achieve our goals. [1963-012 (1995) : 53] |
| Co | You will lead a team of 20 scientists, laboratory and operations personnel in the development of new and existing products. [1989-028 (1995) : 65] |
| Co | You will register with the appropriate university [1980-007 (1995) : 55] |
| Co | You will work closely with nursing and medical staff and assist with the use and understanding of highly complex medical technology associated with modern adult / paediatric intensive care and operating theatres. [2006-089 (1995) : 85] |
| Co | You will work closely with our information service both locally and internationally, together with our Scientific and Commercial Departments in the UK. [2006-021 (1995) : 67] |
| Co | Your key role will be to liaise with colleagues on the design and analysis of clinical studies for the international development of a product. [1971-049 (1995) : 71] |
| E | (appointment as Director of the Scottish Institute will be for five years in the first instance). [2002-073 (1995) : 76] |
| E | (appropriate training and support will be given). [1967-069 (1995) : 82] |
| E | (this project is sponsored by the Defence Evaluation and Research Agency (DERA) and will attract an additional annual stipend of £2,200). [2006-067 (1995) : 79] |
| E | (This project will be jointly funded with The BOC Foundation). [1980-117 (1995) : 83] |
| E | A car will also be provided. [1967-074 (1995) : 83] |
| E | A competitive salary will be paid dependent on experience. [2006-078 (1995) : 82] |
| E | A competitive salary will be supported by attractive large-company benefits and excellent conditions of employment. [1980-099 (1995) : 79] |
| E | A course leading to the degree of Master of Science will commence in October 1995. [1963-105 (1995) : 75] |
| E | A current clean driving licence is essential, and an essential car user allowance will be paid. [1989-068 (1995) : 75] |
E A distinguished panel will select the recipient(s) based on their contributions to improvements in the welfare of animals in laboratory procedures, or recommendations or techniques which reduce the number of animals required for laboratory procedures. [2002-001 (1995) : 2]

E A distinguished panel will select the recipient(s) based on their contributions to improvements in the welfare of animals in laboratory procedures, or recommendations or techniques which reduce the number of animals required for laboratory procedures. [2006-001 (1995) : 13]

E A graduate may be preferred but experienced candidates qualified to BTEC Higher level or equivalent with five to seven years' experience will be considered. [1971-009 (1995) : 82]

E A lectureship will also be made available in association with this post. [1959-012 (1995) : 48]

E A limited number of merit increments will be awarded each year to reward outstanding performance. [1959-029 (1995) : 51]

E A major field experiment off the Holderness coast will provide a comprehensive data set of waves, currents, turbulence and sediment concentrations and this post offers a unique opportunity for model development linked to these observations. [1963-039 (1995) : 59]

E A major part of the programme will be concerned with the characterisation of the frequency-dependent capacitive properties of polymeric immobilising matrices and active enzyme electrodes over a wide spectrum of frequencies. [1967-096 (1995) : 88]

E A minimum of 2 years' experience in the immunodiagnostic industry is required and preference will be given to candidates with a knowledge of antigen preparation suitable for antibody production. [2006-032 (1995) : 70]

E A monthly stipend will be paid, in addition to the availability of subsidised accommodation at the UNU/IAS and a return ticket between Tokyo and the applicant's home country. [2006-075 (1995) : 82]

E A non-taxable stipend of £6,391 (subject to increase) will be paid. [1971-030 (1995) : 65]

E A non-taxable stipend of £8970 per annum will be paid. [1980-064 (1995) : 71]

E A novel oxygen source will be used to minimise surface contamination of the metal base layer. [1971-021 (1995) : 62]

E A novel, open-access MRI scanner will be acquired shortly by Bristol Oncology Centre. [1980-042 (1995) : 66]

E A particular interest is protein crystallisation, and training will be given in this area. [2006-094 (1995) : 86]

E A Ph.D. or a similar background in genetics is highly desirable, although applicants with other relevant experience and skills (BMSU management, transgenic and SPF work) will be considered. [1959-076 (1995) : 63]

E A range of molecular techniques will be employed in this study including 'bandshifts' to assay for specific DNA: protein interactions and transient transfection assays to monitor promoter activity. [1976-064 (1995) : 78]

E A recruitment event will be held at the above address on 28th June. [1980-009 (1995) : 57]

E A salary package in the range of A$51,622 - A$73,937 per annum including superannuation, annual leave loading and a salary component of A$45,543 - A$65,467 per annum will be negotiated dependent on the appointee's qualifications and experience. [1989-042 (1995) : 69]

E A stipend will be paid of £8,000 in the first year, rising to £9,000. [1993-090 (1995) : 76]

E A stipend will be paid of £8,000 in the first year, rising to £9,000. [1993-090 (1995) : 76]

E A Studentship will be available from 1st October, 1995 with Dr Stuart Kellie, to study the molecular basis for intracellular signalling in inflammatory cells. [1971-061 (1995) : 75]

E A tax free stipend of £6520 to £7020 will be provided. [1998-042 (1995) : 86]

E A three year Ph.D. studentship will be available from October 1995 in the Institute's Molecular Carcinogenesis Section at Sutton, Surrey. [1989-021 (1995) : 63]

E A total of eight studentships (four NERC and four BBSRC) will be available in the academic year 1995/96. [1971-006 (1995) : 56]

E Active cooperation will play a pivotal role in this program and its related activities. [1993-069 (1995) : 71]
Additional benefits will normally include variable tax-free overseas allowances, children's education allowances, free accommodation and passages. [1963-006 (1995) : 51]

Additional benefits will normally include variable tax-free overseas allowances, children's education allowances and free accommodation. [1980-003 (1995) : 52]

Additional experience in stable isotope techniques would also be a benefit but not essential as training will be provided in mass spectrometry and combined LC-MS procedures. [1967-007 (1995) : 64]

All academic staff will be given a networked personal computer (Pentium or Macintosh Power PC) with access to a Cray supercomputer, UNIX hosts, departmental laser printers, a wide spectrum of software, on-line library catalogue, CD-ROM databases, Teleview, INtv and Internet. [1976-084 (1995) : 83]

All academic staff will be given a networked personal computer (Pentium or Macintosh Power PC) with access to a Cray supercomputer, UNIX hosts, departmental laser printers, a wide spectrum of software, on-line library catalogue, CD-ROM databases, Teleview, INtv and Internet. [1984-003 (1995) : 51]

All applicants will be considered on the basis of suitability regardless of sex, race, marital status or disability. [1989-068 (1995) : 75]

All applicants will be contacted after 2nd October 1995. [1993-027 (1995) : 59]

All applications will be considered on merit. [1976-068 (1995) : 79]

All approved university and college fees will be met by the Trust at the home rate only. [1959-043 (1995) : 56]

All cash benefits will be paid in US dollars. [1989-079 (1995) : 77]

All cash benefits will be paid in US dollars. [1989-083 (1995) : 78]

All courses will also be available as MSc by research. [1993-101 (1995) : 79]

All fees will be paid [2002-025 (1995) : 62]

All grants will have to be administered by a university. [1971-015 (1995) : 60]

All successful candidates will be appointed to York [1984-013 (1995) : 56]

All the above positions will be based at ICLARM Headquarters in Manila, Philippines. [1989-079 (1995) : 77]

All the above positions will be based at the Coastal Aquaculture Center located in the Solomon Islands. [1993-064 (1995) : 70]

All three posts will have a role in: [1984-016 (1995) : 58]

All winners and the 10 best essays will receive a year's subscription to New Scientist. [1980-001 (1995) : 47]

Although a good honours degree and relevant experience will also be considered. [1963-039 (1995) : 59]

Although based in the haematology section you will have the opportunity to rotate to the haemostasis and blood transfusion sections. [2002-033 (1995) : 65]

Although the field of research is open, especial consideration will be given to established research workers in 'basin and sediment studies' or 'fluid rock interaction and fluid processes' or 'geo-microbiology'. [1984-006 (1995) : 52]

Although the potential for significant wealth creation will be a key criterion for selection. [1976-058 (1995) : 77]

Although the student will be based at The University of Edinburgh and under the direction of Dr J R Underhill, the Project is collaborative with Dr R L Gawthorpe at The University of Manchester. [1989-016 (1995) : 62]

Although those with a suitable industrial background will also be considered. [1959-091 (1995) : 66]

An attractive package of salary and other benefits will be offered to the successful candidate. [1980-127 (1995) : 87]

An Industrial Collaborative Studentship, supported by the Medical Research Council and Cruachem Ltd, is available from 1 October 1995 in the laboratory of Professor Barklie Clements FRSE. Dr Vaman Rao, Cruachem Ltd, will be the industrial supervisor. [1980-097 (1995) : 79]

An interest in metabolic studies and/or NMR spectroscopy is preferable, and the appointed person will be encouraged to develop independent ideas alongside others in the group working on clinical and experimental hepatic transplantation. [2006-097 (1995) : 87]

An internationally competitive salary and benefits package will be provided. [1967-012 (1995) : 66]

An internationally competitive salary and benefits package will be provided. [1989-060 (1995) : 73]

An internationally competitive salary and benefits package will be provided. [1993-084 (1995) : 74]

An internationally competitive salary and benefits package will be provided. [1995-043 (1995) : 78]

An internationally competitive salary and benefits package will be provided. [2006-097 (1995) : 87]

An interest in metabolic studies and/or NMR spectroscopy is preferable, and the appointed person will be encouraged to develop independent ideas alongside others in the group working on clinical and experimental hepatic transplantation. [2006-097 (1995) : 87]

An internationally competitive salary and benefits package will be provided. [1967-012 (1995) : 66]

An internationally competitive salary and benefits package will be provided. [1989-060 (1995) : 73]

An internationally competitive salary and benefits package will be provided. [1993-084 (1995) : 74]

An internationally competitive salary and benefits package will be provided. [2006-097 (1995) : 87]

An interest in metabolic studies and/or NMR spectroscopy is preferable, and the appointed person will be encouraged to develop independent ideas alongside others in the group working on clinical and experimental hepatic transplantation. [2006-097 (1995) : 87]

An internationally competitive salary and benefits package will be provided. [1967-012 (1995) : 66]

An internationally competitive salary and benefits package will be provided. [1989-060 (1995) : 73]

An internationally competitive salary and benefits package will be provided. [1993-084 (1995) : 74]

An internationally competitive salary and benefits package will be provided. [2006-097 (1995) : 87]
Applications are invited for a fully-funded Research Assistantship within the Laboratory of Experimental Oceanography, at the Institute of Terrestrial Ecology, in conjunction with Dow Corning UK Ltd.

Applicants with experience in one or more of the following techniques: X-ray/neutron scattering, laser spectroscopy, NMR, electrochemistry, computer simulation, are particularly welcome. [1980-046 (1995) : 78]

The Research Assistantship will be available shortly from the usual sources for grant application forms at eligible institutions and universities. [1963-047 (1995) : 61]

<tr>
<td>E</td>
<td>As well as close interaction with clinical pharmacologists there will be strong links to drug metabolism and bioanalytical scientists. [1971-036 (1995) : 67]</td>
</tr>
</tbody>
</table>
As well as increasing our understanding of the normal physiology of gastric function and smooth muscle, the project will also determine if there are factors which predispose to gastric dilation-volvulus. [1984-029 (1995) : 61]

As well as receiving the usual range of large company benefits, successful candidates will be eligible for inclusion in our Graduate Development Programme and may have the opportunity to undertake courses leading to further qualifications. [2006-032 (1995) : 70]

As well as the salaries quoted, both appointments will attract a package of benefits commensurate with CABI's status as an international organisation. [1976-054 (1995) : 76]

As with the Project Scientist, you will be appointed for a fixed term of five years in the first instance, be based in Liverpool [2002-082 (1995) : 78]

As you would expect, our future success will depend very much on their continued ability to discover and develop outstanding new drugs. [1998-038 (1995) : 85]

Assistance with relocation expenses will be available where appropriate. [2002-049 (1995) : 70]

At our purpose built facility in Clydebank, Scotland, we are developing Pulsincap™, a capsule product for the pharmaceutical industry that will offer unique advantages in improving the therapeutic effectiveness of a wide range of drugs. [1993-092 (1995) : 77]

At the end of the initial five-year contract, it is envisaged that, subject to satisfactory performance, you will become Observatory Scientist for the Liverpool Telescope: [2002-082 (1995) : 78]

Attendance at training courses and conferences will also be supported. [1963-068 (1995) : 65]

Available from one year from 1 September 1995, this post will coincide with the imminent arrival of Professor Y. A. Sergeev to take up the Chair in Engineering Mathematics following the retirement of Professor Alan Jeffrey. [1984-079 (1995) : 74]

Awards will be tenable from October 1995 for the following graduate programmes: [1967-042 (1995) : 74]

Awards will cover the cost of replacement teaching (up to the sixth point on the new university lecturer scale £15,566 at 1 March 1994) and a negotiable allowance of £5,000 for research expenses. [1967-060 (1995) : 79]

Awards will provide for travelling and living costs of the Fellow during the period abroad. [1980-036 (1995) : 65]

Based at our head office in Chester, the successful applicant will receive a competitive remuneration package based on experience and qualifications, including relocation allowance. [1959-042 (1995) : 65]

Based at the Kenya Agricultural Research Institute (KARI), Nairobi, you and your team will play a key role in helping to strengthen the capacity of KARI scientists and policy makers for research planning and the implementation of proposals, by increasing the effectiveness of their organisation’s library and information services. [1963-006 (1995) : 51]

Based in the Foundation's Milton Keynes offices, the centre will encourage the development of renewable energy in the region. [1993-096 (1995) : 78]

Based within the Faculty of Applied Sciences you will join a team involved in the development of a range of disposable amperometric electrochemical biosensors fabricated by screen-printing technology. [1976-068 (1995) : 79]

Besides appointments on normal three-year contracts, visiting appointments for one or two years will also be considered. [1976-084 (1995) : 83]

Biological interactions of these materials will be investigated in collaboration with researchers in the University of Nottingham Medical School. [1967-045 (1995) : 76]

Both appointments will be based in Nottingham. [1959-042 (1995) : 55]

Both appointments will be for two years in the first instance, with salaries on the RA1A scale in the range £14,317 to £19,848. [2006-035 (1995) : 70]

Both positions will commence at our existing location at Holton Heath before relocating to two new purpose-built facilities. [1993-034 (1995) : 61]
Both positions will offer the opportunity to make significant contributions to our expanding brand portfolio in a world-wide market place and offer opportunities for overseas travel. [1998-011 (1995) : 76]

Both posts will be for two years in the first instance. [1967-077 (1995) : 83]

Both posts will be initially for three years. [1971-062 (1995) : 75]

Both these positions are for a three year period in the first instance and will cover 37 hours per week. [1963-023 (1995) : 56]

Bring us your expertise, flexibility and a record of success and Innovex will provide the environment in which your CRA career can flourish. [1998-100 (1995) : 102]

but candidates with other relevant experience will also be considered. [1980-127 (1995) : 87]

but candidates working in the fields of laser-plasma physics, semiconductors, or solid state and surface spectroscopy will also be considered. [1976-044 (1995) : 73]

but for each of these key positions a complete benefits package, including relocation expenses where appropriate, will be provided. [1963-003 (1995) : 50]

but independent research in other areas of organic chemistry will be possible. [1998-102 (1995) : 103]

but will also be available in combination with a wide range of other subjects. [2006-045 (1995) : 74]

but will be competitive and supported by a generous benefits package. [1971-041 (1995) : 68]

but will be in the Scientific Officer range £11,138 to £14,900. [1980-087 (1995) : 76]

but will initially work at Wormley, Surrey. [1959-075 (1995) : 63]

but will take into account your qualifications and quality of relevant experience. [2002-047 (1995) : 69]

but will work at the sites indicated until relocation. [1984-013 (1995) : 56]

Candidates can anticipate a competitive salary and benefits package which will include pension, disability insurance, employee share option scheme, relocation assistance and genuine career potential. [1963-083 (1995) : 69]

Candidates should have a good honours degree (or equivalent) in mathematics, physics or engineering and preference will be shown to those candidates with experience in numerical techniques, especially in the field of computational fluid dynamics as applied to combustion and/or building aerodynamics. [2002-018 (1995) : 60]

Candidates should therefore have recent relevant experience and we will consider applications from professionals who can be released from their present employer to undertake this work on a part time basis. [1993-054 (1995) : 67]

Candidates will be encouraged to publish their work in the open literature, and register for a Ph.D. at an external university, if appropriate. [1980-120 (1995) : 85]

Candidates with an interest in any aspect of environmental chemistry will be considered. [1980-022 (1995) : 60]

Clinically qualified candidates will have preference. [1984-064 (1995) : 70]

Close collaboration with the Department of Chemistry, University of York, will enable an EPR spectrometer to be used for Fenton reaction kinetics and for probing radical production by growing fungi. [1971-070 (1995) : 77]

Closing date for all applications will be 19 May 1995. [1976-051 (1995) : 75]

Closing date for applications will be 9 May 1995. [1967-044 (1995) : 75]

Closing date for applications will be Friday 31st March 1995. [1967-030 (1995) : 71]

Commencing salary (per annum) will be established within the ranges, NZ$71,000 - NZ$77,000 (Associate-Professors); NZ$53,000 - NZ$61,000 (Senior Lecturers); NZ$39,500 - NZ$50,000 (Lecturers). [1976-014 (1995) : 66]

Commencing salary per annum will be established within the following ranges: Lecturer NZ$42,500 - NZ$51,500; Senior Lecturer NZ$45,750 - NZ$56,500. [2006-016 (1995) : 65]

Commencing salary per annum will be established within the range NZ$41,000 - NZ$55,000 (Director) or NZ$39,500 - NZ$50,000 (Lecturer). [1980-022 (1995) : 60]

Complete training will be given in noninvasive vascular investigations used in the diagnosis of venous and arterial disease. [1989-094 (1995) : 81]

<td>Experimental zoologists with an ability to teach a wide range of subjects at the undergraduate levels will be given preference. [1967-063 (1995) : 80]</td>
</tr>
</tbody>
</table>
Grants will normally be for three or four years. [1984-066 (1995) : 71]

Gross annual emoluments will be in the range of $133,480 - $180,140. [1984-003 (1995) : 51]

Gross salary will be in the range £10k to £15k, subject to experience, for a three day week plus an office allowance and an agreed travel budget. [2006-054 (1995) : 76]

For the right applicant age will not be an issue. [1993-063 (1995) : 69]

For both positions, candidates with good “A” level passes will be considered but a degree or equivalent in a relevant discipline would be preferred. [1993-042 (1995) : 64]

For the right applicant age will not be an issue. [1993-063 (1995) : 69]

For this post preference will be given to candidates with some knowledge of structural biology and/or experience of editing. [1967-040 (1995) : 74]

For two of the appointments, preference will be given to applicants who can demonstrate expertise in at least one of these areas. [1971-057 (1995) : 74]

For all posts at Grade C or Graduate Trainee level appropriate training will be given. [1993-042 (1995) : 64]

Financial support at a rate above standard EPSRC studentships will be available. [2006-057 (1995) : 76]

Full funding is available for fieldwork which will be undertaken in Ireland, Yorkshire and the Peak District. [1980-032 (1995) : 64]

Full funding is available for fieldwork which will be undertaken in Ireland, Yorkshire and the Peak District. [1980-032 (1995) : 64]

Full training in the techniques required will be given, and the post offers excellent career prospects. [1980-116 (1995) : 82]

Full training will be provided. [1998-056 (1995) : 90]

Funds will be allocated through open competition. [1963-055 (1995) : 63]

Funding will be above the level of a basic EPSRC grant. [1984-093 (1995) : 77]

Funds will be available for 2 years in the first instance. [1989-025 (1995) : 64]

Funds will be allocated through open competition between BBSRC institutes, universities, UK GRE and agencies. [1984-066 (1995) : 71]

Funds will be allocated through open competition. [1963-055 (1995) : 63]

Funds will be allocated through open competition. [1976-058 (1995) : 77]

Funds will be allocated through open competition. [2006-065 (1995) : 79]

Further movement up the salary scale to a possible £29,117 will be dependent on performance. [1984-075 (1995) : 73]

Future applications of Krypton as a general tracer for environmental processes will be considered. [1980-120 (1995) : 85]

Good computer skills are important (training on specific software packages will be provided). [1959-033 (1995) : 53]

Grants will normally be for three or four years. [1984-066 (1995) : 71]

Gross annual emoluments will be in the range of $133,480 - $180,140. [1984-003 (1995) : 51]

Gross salary will be in the range £10k to £15k, subject to experience, for a three day week plus an office allowance and an agreed travel budget. [2006-054 (1995) : 76]

From 1 July 1995 the Department of Agriculture, the Rural Adjustment and Finance Corporation and the Agriculture Protection Board will operate as a single organisation responsible for the Government's involvement in agriculture in Western Australia. [1989-017 (1995) : 62]

Following the recent acquisitions of Oxford Chemicals Limited we are to relocate the company head office and laboratories from Harlow, Essex to the Teesside site which will be used for future business expansion. [1989-017 (1995) : 62]

Full training in the techniques required will be given, and the post offers excellent career prospects. [1980-032 (1995) : 64]

For both positions, candidates with good “A” level passes will be considered but a degree or equivalent in a relevant discipline would be preferred. [1993-042 (1995) : 64]

For all posts at Grade C or Graduate Trainee level appropriate training will be given. [1993-042 (1995) : 64]
He / she **will also be encouraged** to pursue their own research interest, working with scientists from Surrey Medical Imaging Systems Limited (Guildford). [1963-094 (1995) : 73]

He or she **will** play an important role in defining and contributing to the new Environmental Geoscience BSc honours degree course. [1998-043 (1995) : 86]

However good interpersonal skills and initiative are of prime importance as necessary techniques **will be taught.** [1959-092 (1995) : 67]

However, a suitable individual without such expertise can be appointed and **will** receive appropriate training. [1959-025 (1995) : 50]

ICSI experience is desirable but not essential as training **will be provided.** [1993-058 (1995) : 68]

If the applicants are strong enough, consideration **will be given** to increasing the number and length of these appointments. [1971-057 (1995) : 74]

If you **would** like to be involved in a series of projects related to the use of timber for high value wood products that **will** optimise your training and skills; [1998-091 (1995) : 99]

In 1995-96 the Department **will** launch a new MSc course in Advanced Information Systems, covering databases, information retrieval, and multimedia. [1971-057 (1995) : 74]

In 1996 we **will** be relocating to a new purpose built complex near York. [1984-013 (1995) : 56]

In 1996 we **will** be relocating to a purpose built complex near York. [1976-051 (1995) : 75]

In accordance with the conclusions of the Government's Nuclear Review, which were published in May 1995, it is proposed that the existing Nuclear Electric plc **will** evolve into two separate companies. [2006-011 (1995) : 63]

In accordance with the conclusions of the Government's Nuclear Review, which were published in May 1995, it is proposed that the existing Nuclear Electric plc **will** evolve into two separate companies. [2006-087 (1995) : 85]

In both areas, the persons appointed **will be** joining a small, flexible team [1998-065 (1995) : 92]

In each case, a short list of selected candidates **will be invited** to submit full project proposals for appraisal. [1967-093 (1995) : 87]

In return we’**ll** offer you a competitive salary and benefits package, including a company car, lots of challenging projects and healthy career prospects. [1980-008 (1995) : 56]

In the absence of state registration, applicants with appropriate experience in diagnostic virology **will be considered** for appointment at trainee level. [1989-010 (1995) : 60]

In this challenging and demanding role, you’**ll** be working as a Senior Research Scientist, leading a small team and applying the latest technology to develop disease models and identify new medicines. [1963-012 (1995) : 53]

Increments thereafter **will be** performance related. [1980-087 (1995) : 76]

Initial salary **will be** in the range £13,941 - £15,566 pa on the RA1A Scale. [1980-075 (1995) : 74]

Initial salary **will be** in the range £13,941 - £20,953 per annum, and superannuation under USS or continuation of FSSU. [1971-082 (1995) : 79]

Initial salary **will be** on the Non-Clinical Lecturers scale Grade A (£15,154 - £19,848 pa), or Grade B (£20,677 - £26,430 pa), according to qualifications and experience. [2002-052 (1995) : 70]

Initial salary, dependent on qualifications and experience, **will be** on the lecturer Grade A scale £15,154 to £19,848 or the Lecturer Grade B scale £20,677 to £26,430 pa. [1989-011 (1995) : 60]

Initially the contract **will be** for one year, but with an option to renew for up to three years. [1967-091 (1995) : 87]

Initially the job is for a 2 year contract and in addition to the salary, which **will be** dependent upon experience, [1959-028 (1995) : 51]

Initially, the appointment **will be** for three days per week for a period of six months from 1 February 1995 or as soon as possible thereafter. [1959-092 (1995) : 67]

In-service training **will be given.** [1984-007 (1995) : 53]

Interactions with Microbiologists currently in the Department **will be encouraged.** [1963-084 (1995) : 70]

Interested candidates **will be encouraged** to study part-time for a higher degree. [1984-035 (1995) : 62]

Interview date **will be** 20th December. [2006-053 (1995) : 76]
Interviews will be held 7 June 1995. [1976-095 (1995) : 85]

Interviews will be held during week commencing 9th October 1995. [1993-048 (1995) : 66]

Interviews will be held in Cambridge during the week commencing 30 October 1995. [1998-039 (1995) : 85]

Interviews will be held in Cambridge. [1976-031 (1995) : 70]

Interviews will be held in late November. [2002-057 (1995) : 72]

Interviews will be held in Llandrindod Wells during the week commencing 21 August 1955. [1984-084 (1995) : 75]

Interviews will be held in the week commencing 20 November 1995. [1998-007 (1995) : 74]

Interviews will be held on 11th & 12th October 1995. [1993-055 (1995) : 68]

Interviews will be held on 11th May 1995. [1971-053 (1995) : 72]

Interviews will be held on 26 July 1995. [1984-015 (1995) : 57]

Interviews will be held on 29 June. [1980-111 (1995) : 81]

Interviews will be held on 6 December 1995. [2002-033 (1995) : 65]

Interviews will be held on 5th December 1995. [2002-080 (1995) : 78]

Interviews will be in Taunton in the week commencing 10 July 1995. [1980-087 (1995) : 76]

Interviews will begin on December 7th and 8th 1995. [2006-049 (1995) : 75]

Interviews will take place on Monday 26th June 1995. [1976-003 (1995) : 60]

It is anticipated that decisions will be made by the end of May 1995. [1959-043 (1995) : 56]

It is anticipated that interviews will be held during weeks commencing 10th July and 17th July 1995. [1980-007 (1995) : 55]

It is anticipated that proposals will incorporate the development of new techniques and applications for exploiting existing data sources as well as preparing for the exploitation of data from future missions. [1993-022 (1995) : 57]

It is anticipated that the appointee will have the opportunity to spend three months at the Environmental Safety Laboratory at Unilever Research near Bedford. [1967-009 (1995) : 65]

It is anticipated that the project will be of eighteen months duration. [1963-029 (1995) : 57]

It is envisaged that a course will commence in October each year. [1963-105 (1995) : 75]

It is expected that fellows will continue to be paid by their permanent employers during the placement. [1959-001 (1995) : 39]

It is expected that the appointment will be for up to 12 weeks on a part time basis, commencing in September 1995. [1989-014 (1995) : 61]

It is expected that the appointments will be taken up in July 1995. [1976-024 (1995) : 68]

It is felt that this post will offer an excellent grounding in all issues related to the conduct of successful medical research. [1963-080 (1995) : 68]

It is therefore envisaged that on completion of the course candidates will pursue careers in the industrial or academic research area. [1993-100 (1995) : 78]

It will be available from 1 October 1995, [1989-077 (1995) : 77]

It will be carried out in collaboration with the Department of Earth Sciences of the University of Leeds and Lancaster University. [2002-013 (1995) : 58]

Join us as a Statistician in one of two new positions and you will be recognised for the valuable contribution you make to the process. [1971-049 (1995) : 71]

Lack of such a nomination will not prejudice the appraisal of an application. [1989-029 (1995) : 66]

Last month, the AGR published the results of new research which asked the question: what skills will employers be looking for after the millennium? [2006-007 (1995) : 61]

Late applications will not be considered. [1989-029 (1995) : 66]

Later this year, Unipath's Personal Contraceptive System, hailed by family planning experts as "the most significant breakthrough of the last decade" will be launched. [1989-002 (1995) : 56]

Leave and medical benefits will be provided. [1976-084 (1995) : 83]
Led by an academic scientist on sabbatical at Glaxo, the team will be made up of talented individuals with a commitment to both solving the practical problem and understanding the basic mechanisms. [1971-005 (1995) : 56]

Location is flexible and will be discussed with the successful candidate. [2006-054 (1995) : 76]

Minimum qualifications required are HNC, MLSO or equivalent. Experience in molecular biology, protein chemistry, cell culture and the use of radioactive isotopes would be an advantage, but training will be provided. [1984-035 (1995) : 62]

Modern video techniques for size analysis and bubble coalescence studies and equipment for the characterisation of the rheology and interfacial properties of the solutions will be available. [1980-062 (1995) : 71]

Moray will become a unitary authority at Local Government Reorganisation. [1967-076 (1995) : 83]

Most of the posts will be based in central Manchester and the Authority operates a career grade structure within its Scientific Support and Operations Division which offers a good opportunity for career development. [1989-093 (1995) : 81]

MSc training will also include a research project. [1984-118 (1995) : 82]

Naturally, the salary will fully reflect the experience and expertise you bring to the role [1976-013 (1995) : 64-65]

Nuclear Engineering: preference will be given to a person with an active research record in the general field of thermodynamics and fluid mechanics and who is able to offer specialist lectures on engineering topics relevant to the nuclear industry. [1976-029 (1995) : 70]

Offers will be made within the next two months. [1971-030 (1995) : 65]

Once you have firmly established pharmacovigilance, there will be scope for you to extend your span of influence and responsibility into the management of clinical quality assurance processes. [1998-032 (1995) : 83]

One bedroom self-contained accommodation will be provided at the Coastal Aquaculture Center at a rental of SBDS105 per week. [1993-064 (1995) : 70]

One studentship will be available to work in any of the following projects: enteroviral infectivity (Prof. J.W. Almond); [1967-084 (1995) : 85]

One studentship will be available to work in any of the following projects: enteroviral infectivity (Prof. J.W. Almond); [1967-099 (1995) : 88]

One temporary appointment will be tenable for three years in the first instance, the other for one year in the first instance. [1971-057 (1995) : 74]

Only complete applications will be considered and replied. [2006-075 (1995) : 82]

Only completed application forms will be accepted and these should be returned by 20 October 1995 to the Recruitment Coordinator, Personnel Office, Queen Mary and Westfield College, [1998-066 (1995) : 92]

Only completed application forms will be accepted and these should be returned by 22 December 1995 to the Recruitment Coordinator, [2006-071 (1995) : 80]

Only official application forms will be accepted and these along with further details can be obtained by telephoning our 24 hour Recruitment Line on 0171-975-5171 quoting Reference 95068. [1980-017 (1995) : 59]

Only shortlisted candidates will be contacted. [1967-059 (1995) : 79]

Organisations who express an interest in delivering any of these categories will be sent more detailed information about HSE and the training required. [1967-105 (1995) : 90]
<p>| E | Our core chiral expertise will continue to drive our business into the next century, ensuring the continual advancement of our product pipeline and sustaining our dynamic progress. [1998-069 (1995) : 93] |
| E | Our core chiral expertise will continue to drive our business into the next century, ensuring the continual advancement of our product pipeline and sustaining our dynamic progress. [2006-082 (1995) : 84] |
| E | Our leading-edge organisation believes that valuing individuals with different backgrounds and experience will lead to improved business performance. [2002-042 (1995) : 68] |
| E | Our leading-edge organisation believes that valuing individuals with different backgrounds and experience will lead to improved business performance. [2006-080 (1995) : 83] |
| E | Our mission is to deliver new products, processes and technologies which will benefit our customers in the intensely competitive food processing industry. [1984-022 (1995) : 60] |
| E | Our training programme will develop the potential for success in this new and exciting direction. [1959-037 (1995) : 54] |
| E | Overseas candidates should also note that the College will not be responsible for payment of airfares should they be shortlisted for interview. [1989-054 (1995) : 72] |
| E | Part-time candidates will be considered. [1993-070 (1995) : 71] |
| E | Pay on appointment will normally be between the Band minimum and Intermediate Pay Point £18,378. [1963-072 (1995) : 66] |
| E | Payment will be via non-taxable stipend starting at £6,800. [1967-001 (1995) : 60] |
| E | Please NO tapes or showreels as original material will NOT be returned. [1971-002 (1995) : 55] |
| E | Please note: CVs will only be accepted when submitted with a fully completed application form. [2002-053 (1995) : 70] |
| E | Preference will be given to candidates with experience in immunochemistry, PCR, and of working to candidates with expertise in one of the following fields: automation and computer integrated manufacture, production processes, manufacturing systems. [1976-029 (1995) : 70] |
| E | Preference will be given to candidates with experience in one of the following fields: automation and computer integrated manufacture, production processes, manufacturing systems. [1976-029 (1995) : 70] |
| E | Preference will be given to candidates who have general expertise in computing, and specialist skills in one of the following areas: Computer vision, speech processing, robotics, neural networks, software engineering and computer communications. [1976-029 (1995) : 70] |
| E | Preference will be given to applicants who hold a Ph.D. which involved neural networks. [1980-046 (1995) : 67] |
| E | Preference will be given to applicants who have an interest in electrochemistry. [1980-046 (1995) : 67] |
| E | Preference will be given to applicants with research experience in the use of molecular and/or biophysical techniques. [2006-016 (1995) : 65] |
| E | Preference will be given to applicants with strengths in GIS applications in at least one sub area of Geography. [2006-016 (1995) : 65] |
| E | Preference will be given to candidates who have general expertise in computing, and specialist skills in one of the following areas: Computer vision, speech processing, robotics, neural networks, software engineering and computer communications. [1976-029 (1995) : 70] |
| E | Preference will be given to candidates with a background in marine ecology, in the fields of education, research or commerce, and to those who have demonstrated their ability to manage people, resources and market services. [1967-030 (1995) : 71] |
| E | Preference will be given to candidates with experience in electromagnetic simulation of semiconductor optoelectronic devices. [2006-039 (1995) : 72] |
| E | Preference will be given to candidates with experience in immunochemistry, PCR, and of working with category 3 pathogens. [1993-017 (1995) : 56] |</p>

</tbody>
</table>
Reporting to our Technical Support Manager, the chosen candidate will join our enthusiastic and friendly team in Camberley. [1998-053 (1995) : 89]

Reporting to the Laboratory Manager you will play a key role in a dynamic laboratory handling a wide range of research and development projects. [1980-030 (1995) : 63]

Reporting to the Laboratory Manager you will play a key role in a dynamic laboratory handling a wide range of research & development projects. [1989-013 (1995) : 61]

Reporting to the Manager - Nutrition Affairs, you will be based at our UK headquarters in Manchester. [2006-008 (1995) : 62]

Reporting to the Technical Manager, you will be the focal point for managing the team working on trials at three strategic UK locations. [1971-094 (1995) : 81]

Research and Development activities will be encouraged. [2002-005 (1995) : 55]

Research on all classes of such products will be considered [1976-058 (1995) : 77]

Salaries are competitive and will reflect ability and experience. [1998-005 (1995) : 73]

Salaries for these permanent career opportunities are payable in Deutschmarks and will be competitive. [1984-014 (1995) : 57]

Salaries will be backed by a valuable package of non-contributory benefits including, if appropriate, assistance with relocation to the Thames Valley area. [2002-028 (1995) : 63]

Salaries will be in the range £14,317 to £21,519 p.a. depending on experience. [2002-035 (1995) : 65]

Salaries will be in the range C/D for University Technicians £11,163 - £14,902 inclusive of London Allowance and according to experience and qualifications. [1967-077 (1995) : 83]

Salaries will be on the usual University research scales. [1980-039 (1995) : 66]

Salaries will be within Lecturer Grade A (£14,756 - £19,326 pa) or Lecturer Grade B (£20,133 - £25,735 pa). [1967-104 (1995) : 89]

Salaries will depend on demonstrated skills and capabilities and rapid advancement is possible for high achievers Pensions are non-contributory, and relocation costs may be offered [1998-087 (1995) : 98]

Salaries, commensurate with experience and qualifications, will be on a scale rising to £17,650. [1998-056 (1995) : 90]

Salaries, depending on qualifications and experience will be: [2002-023 (1995) : 62]

Salary available will be on the RA1A scale in the range £13,941 - £16,191 p.a. [1993-071 (1995) : 71]

Salary available will be on the RA1A scale in the range £14,317 - £21,519 p.a. [2002-030 (1995) : 64]

Salary for all the above posts will be on the scale for Lecturer Grade A (£14,756 - £19,326) or Grade B (£20,133 - £25,735) (pay award pending) according to qualifications and relevant experience. [1980-046 (1995) : 67]

Salary for both posts will be in the range £13,651 - £19,669. [1967-016 (1995) : 68]

Salary for both posts will be within the range £14,000 - £18,000 pa, depending on qualifications and experience. [2006-039 (1995) : 72]

Salary for the above posts will be on the Lecturer A Scale £14,756 to £19,326 per annum or the Lecturer B Scale £20,133 to £25,735 per annum, according to experience. [1967-048 (1995) : 76]

Salary for these important positions will be dependent upon qualifications and relevant experience. [1998-041 (1995) : 86]

Salary for these positions will be dependent upon qualifications and relevant experience. [1967-074 (1995) : 83]

Salary for this position will be on the Civil Service Assistant Scientific Officer scale (up to a maximum of £16,640 per annum inclusive of London Weighting and pension supplement). [1998-056 (1995) : 90]

Salary scale will be in the range B8-10 - £16,019 - £17,326 [1989-050 (1995) : 71]

Starting salary will be up to £13,977 per annum according to qualifications and experience. [1967-007 (1995) : 64]

Starting salary will be up to £35,000 p.a. [1967-020 (1995) : 69]

Starting salary will be within the range of £11,584 - £18,782, depending on qualifications and experience. [2006-059 (1995) : 77]

Starting salary will depend on qualifications and experience, from £11,000 - £15,000 with performance increments within a band up to £20,500. [2006-060 (1995) : 77]

Starting salary will depend on qualifications and experience. [1984-084 (1995) : 75]

E Starting salary, depending on experience, will be in the range £14,500 - £16,500. [1963-095 (1995) : 73]
Stipend and research expenses will be at an advantageous level and similar to Wellcome Prize Studentships. [2006-052 (1995) : 76]

Students who successfully complete the MRes programme will be given priority when we award our numerous Quota studentships. [1995-076 (1995) : 87]

Students will receive a stipend of £6,551 pa. [1980-129 (1995) : 87]

Studentships will carry a stipend starting at £10,328 per annum (£11,710 per annum in London) and £4,000 per annum research expenses. [1959-043 (1995) : 56]

Successful applicants will be given a stipend of £6,551 pa. [1980-129 (1995) : 87]

Studentships will carry a stipend starting at £10,328 per annum (£11,710 per annum in London) and £4,000 per annum research expenses. [1959-043 (1995) : 56]

Successful applicants will be registered for a DPhil with the University of Oxford. [1959-039 (1995) : 54]

Successful applicants will receive an attractive benefits package and salary commensurate with capability. [1967-058 (1995) : 79]

Successful candidates will work in Baxter Nivelles, Belgium and report to the Director, Clinical Affairs in the USA, based in Chicago. [2002-010 (1995) : 57]

Successful candidates will be deployed in small teams on projects such as advanced graphics systems, mathematical modelling or data analysis. [1959-083 (1995) : 65]

Successful candidates will follow an approved training scheme over three years in a Scottish tertiary care teaching hospital [1963-068 (1995) : 65]

Successful candidates will work in a modern office building within easy reach of Waterloo station. [2006-036 (1995) : 71]

Successful overseas applicants will be encouraged to apply for an Overseas Research Student (ORS) Award. [1971-037 (1995) : 67]

Suitably qualified applicants with disabilities will be shortlisted. [1967-058 (1995) : 79]

Support will be available for a course lasting up to four years. [1959-043 (1995) : 56]

Support will be available from IFE and CAPM staff and especially recruited student assistance, [2006-093 (1995) : 86]

Support will be given for suitable vocational postgraduate courses. [2002-033 (1995) : 65]

Teaching and administrative duties will be very light. [1984-005 (1995) : 52]

The applicant will join an expanding research team engaged in the development and application of CFD models. [1959-087 (1995) : 66]

The applicant will work under the supervision of an MTO3 and should have relevant laboratory experience, expertise in cell culture is a specific requirement. [1971-043 (1995) : 69]

The appointed physicist will work under the Department Manager (a Consultant Physicist) and the Clinical Director. [1998-070 (1995) : 93]

The appointee will be assisted by a full-time technician also funded by the grant. [1959-081 (1995) : 64]

The appointee will be supported by a graduate dedicated to the production of live algae, and by several other technical staff. [1993-064 (1995) : 70]

The appointee will join a small research team under the direction of Dr Paul Hiscott (Senior Lecturer in Ophthalmic Pathology) investigating the interaction of ocular cells with their extracellular matrix. [1984-063 (1995) : 70]

The appointee will join a team investigating arbuscular mycorrhizal fungi [1976-089 (1995) : 84]

The appointee will work as part of a team under the direction of Professor D. A. Ledward and Dr. R. W. A. Park. [1980-089 (1995) : 77]

The appointee will work in the Civil Engineering Materials Unit on a project entitled 'The Influence of Pozzolans on the Composition and Structure of C-S-H in Hardened Cement Pastes'. [2002-013 (1995) : 58]

The appointees will join strong research groups in these areas. [1967-051 (1995) : 77]

The appointees will work in the newly-formed Computational PDE's Software Unit [2002-029 (1995) : 64]

The appointment will be made at an appropriate point on the Academic Related staff scale Grade 1 £13,941 - £15,566 per annum depending on qualifications and experience. [1963-056 (1995) : 63]

The appointment will be made for an initial period of one year. [1971-080 (1995) : 79]

The appointment will be made in Grades C or D according to experience. [1963-057 (1995) : 63]

The appointment will be made in the first instance on a fixed term basis for a period of two years. [1980-037 (1995) : 65]

The appointment will be made initially for two years, with a salary up to £19,431 per annum. [1980-111 (1995) : 81]

The appointment will be made on a three point scale within the above range depending upon experience. [1989-008 (1995) : 58]

The appointment will be made on the lecturer grade A scale with a commencing salary in the range of £14,756 - £17,007. [1980-031 (1995) : 64]

The appointment will be offered on a five year fixed-term basis with good prospects for re-appointment. [1971-047 (1995) : 70]

The appointment will be offered on an initial fixed term (of up to three years) basis. [1963-087 (1995) : 70]

The appointment will be on a starting salary between £13,651 and £23,932 depending on qualifications and experience. [1984-075 (1995) : 73]

The appointment will be on the Academic Related Grade 1 scale, at a level commensurate with age and experience. [1984-051 (1995) : 68]

The appointment will be to the R&A1A grade within the salary range £14,317 to £21,519 per annum. [1998-049 (1995) : 88]

The appointment will be to the R&AIA grade [1963-058 (1995) : 64]

The appointment will commence from 1st March 1996. [1998-043 (1995) : 57]

The appointment will commence on 1 August 1995 and is for two years in the first instance. [1976-089 (1995) : 84]

The appointments will be for three years. [1971-039 (1995) : 68]

The appointments will be in the following areas: [1984-004 (1995) : 52]

The appointments will be made initially for a period of 12 months, but this may be extended or made permanent dependent on workload and performance in the job. [2002-012 (1995) : 57]

The appointment would be for a period of three years in the first instance and will be fixed at the grade of Higher Scientific Officer. [1959-061 (1995) : 60]

The appointment would start from a mutually agreeable date [1971-082 (1995) : 79]

The appointments will be for 12 months in the first instance. [1989-004 (1995) : 56]

The appointments will be for three years [1971-039 (1995) : 68]

The appointments will be in the following areas: [1984-004 (1995) : 52]

The appointment will commence from 1 October 1995 [1963-084 (1995) : 70]

The appointment will commence in March 1996. [1989-005 (1995) : 57]

The appointment will commence in the summer 1995 for 18 months. [1967-026 (1995) : 70]

The appointment will commence on 1 August 1995 and is for two years in the first instance. [1976-089 (1995) : 84]

The Biomedical Services Unit (BMSU) at the Oxford Radcliffe Hospital will provide a service for the Clinical School of the University. [1959-076 (1995) : 63]
The Cancer Research Unit has an active post-graduate programme and, in addition, the student will spend time at Zeneca Pharmaceuticals, Alderly Park, Cheshire. [1976-080 (1995) : 82]

The candidate will have the opportunity to take an active role in the histopathology work of the department, with appropriate training. [1993-070 (1995) : 71]

The candidate will play a key role in the development of PCR assays and DNA probes for enteropathogenic species and genotypes of Campylobacter. [1959-007 (1995) : 46]

The certainty that a career will not be spent with one single employer or even a single area of work makes it essential for employees to adapt continuously to change throughout their careers. [2006-007 (1995) : 61]

The candidate will have the opportunity to take an active role in the histopathology work of the department, with appropriate training. [1993-070 (1995) : 71]

The candidate will play a key role in the development of PCR assays and DNA probes for enteropathogenic species and genotypes of Campylobacter. [1959-007 (1995) : 46]

The closing date for completed applications will be 18 September 1995. [1993-036 (1995) : 62]

The closing date for completed applications will be 31 October 1995. [1998-049 (1995) : 88]

The commencing salary will depend on the candidate's qualifications, experience and the level of appointment offered. [1976-084 (1995) : 83]

The Company will offer an attractive remuneration package commensurate with age and experience, including life insurance, private medical cover, share options and 23 (rising to 25) days paid holiday. [1980-026 (1995) : 62]

The Company will offer an attractive remuneration package commensurate with age and experience, including life insurance, private medical cover, share options and 23 (rising to 25) days paid holiday. [1980-026 (1995) : 62]

The Company will shortly enter an exciting phase in its development as it relocates to purpose built facilities at Pentlands Science Park, a short distance from the present site. [1976-096 (1995) : 86]

The competitive salary will reflect your experience and background. [2002-016 (1995) : 59]

The contract will be for three years, to start as soon as possible. [1976-041 (1995) : 72]

The Coordinator and the Coordinating Unit will be administered by ICRISAT, [1993-069 (1995) : 71]

The Coordinator will be internationally recruited [1993-069 (1995) : 71]

The course will be suitable for students with a background in medicine, dentistry, veterinary science or basic science, but previous experience in histopathology would be an advantage. [1971-099 (1995) : 83]

The course will be suitable for students with a background in medicine, dentistry, veterinary science or basic science, but previous experience in histopathology would be an advantage. [1989-117 (1995) : 86]

The course will provide a firm foundation in research skills [1980-129 (1995) : 87]

The deadline for applications will be Friday 8th December 1995. [2006-069 (1995) : 80]

The Department of Electronics will be offering over 15 studentships and scholarships to enable well-qualified students to read for a higher degree in Electronics. [1971-020 (1995) : 62]

The Department of Molecular Pathology, UCL, offers a new two-year part-time day-release course leading to the degree of MSc in Molecular Endocrinology commencing in September 1995 which will be taught by Faculty members of the Department of Molecular Pathology and the UCL/Royal Free Hospital Medical School joint Department of Medicine, all of whom are distinguished teachers and researchers. [1976-100 (1995) : 87]

The Department of Molecular Pathology, UCL, offers a new two-year part-time day-release course leading to the degree of MSc in Molecular Endocrinology commencing in September 1995 which will be taught by Faculty members of the Department of Molecular Pathology and the UCL/Royal Free Hospital Medical School joint Department of Medicine, all of whom are distinguished teachers and researchers. [1976-100 (1995) : 87]

The department will encourage appropriate further professional development. [1963-018 (1995) : 54]

The duration of the post is for 20 months, but is anticipated that further funding will become available. [1976-067 (1995) : 79]

The environment in which the successful candidate will work is described as follows. [2002-022 (1995) : 61]

The equipment you will work on includes two linear accelerators (one fitted with an integral multi-leaf collimator), a cobalt unit, superficial and orthovoltage x-ray units and a simulator. [2006-062 (1995) : 78]

The Fellowship, available from 1 January 1996, will be for up to three years. [1998-075 (1995) : 94]
The Fellowship, which is open to men and women equally, will be tenable for two years in the first instance, from 1 October 1995. [1963-015 (1995) : 54]

The Fellowships will be for three years, subject to confirmation at the end of the first and second years. [1967-056 (1995) : 78]

The first year stipend will be £8,000 in 1995. [1989-021 (1995) : 63]

The following areas will be available on three year leases from 2 February 1995, by tender. [1959-063 (1995) : 61]

The following MRC-funded Ph.D. studentships will be available in October 1995. [1971-017 (1995) : 61]

The Germplasm Scientist will be located at the ICRISAT Asia Center, near Hyderabad, India, [1989-060 (1995) : 73]

The Germplasm Scientist will be located at the ICRISAT Asia Center, near Hyderabad, India, [1993-084 (1995) : 74]

The grade and salary will be dependent on qualifications and experience. [1976-075 (1995) : 81]

The group is part of The Centre for Plant Membrane Biology in Adelaide and there will be considerable scope for collaboration with other researchers in this area. [1971-072 (1995) : 77]

The hours of work will be 6.00am - 2.00pm (3 weeks in 4) and 11.30am - 7.30pm (1 week in 4). [1980-067 (1995) : 72]

The hours of work will be 8.30 am - 4.30 pm. [1980-067 (1995) : 72]

The hours of work will be 9.00am to 5.00pm initially, but moving to shift working (6.00am to 2.00pm and 2.00pm to 10.00pm on alternating weeks). [1993-084 (1995) : 72]

The ideal applicant will be a Chartered Chemist who has a working knowledge of QC procedures with reference to drinking water and the requirements of NAMAS. [1959-009 (1995) : 47]

The individual appointed must be committed to teaching at undergraduate and post graduate level and will be encouraged to maintain appropriate professional and industrial contacts. [1989-058 (1995) : 72]

The initial appointment is for 2 years and the salary will be on the MLSO 1 scale £10,405 - £13,693 pa. [1984-081 (1995) : 74]

The initial salary will be at an appropriate point, according to qualifications and experience, on the Non-Clinical Lecturer Grade A Scale £15,154 to £19,848 pa or the Non-Clinical Lecturer Grade B Scale £20,677 to £26,430 pa. [1998-030 (1995) : 82]

The initiative aims at a coordinated research program in Sub-Saharan Africa that will initially involve six National Agricultural Research Systems: Botswana, Burkina Faso, Kenya, Mali, Namibia and Niger; [1993-069 (1995) : 71]

The Institute invites applications for Lister Institute Research Fellowships, of which up to five will be available from October 1996. [2006-074 (1995) : 81]

The Institute will be equipped with a 150 channel MEG system as well as a 3 Tesla MRI system. [1998-103 (1995) : 103]

The Institute will take delivery of a 3 T/1 m Bruker Medspec system in late 1995. [1967-062 (1995) : 80]

The Institute will take delivery of a 3 T/1m Bruker Medspec system in late 1995. [1980-044 (1995) : 67]

The Institute will then give a decision as to whether or not the candidate may proceed to submit a full application for a Fellowship. [2006-074 (1995) : 81]

The job will include the following techniques: [1993-032 (1995) : 60]

The judges' decision is final and no correspondence will be entered into the nature of assessment or the final results. [1980-001 (1995) : 47]

The Long-Wavelength Spectrometer (LWS) is one of four scientific instruments comprising the Infrared Space Observatory (ISO), which will be launched by the European Space Agency (ESA) in September 1995 and whose operational life is expected to be more than 18 months. [1980-017 (1995) : 59]

The Manager post now advertised will be concerned in the first instance with substantive policy studies and submissions of evidence, with nurturing the Society's links with other Academies and with information management. [1959-057 (1995) : 59]
| E | The National Rivers Authority is the strongest and most effective environmental regulator in Europe and **will** form a key part of the Environmental Protection Agency. [1998-006 (1995) : 74] |
| E | The new entity **will** be in the top three learned journal companies in the UK. [2006-036 (1995) : 71] |
| E | The new Lecturer, who **should** be excellent in teaching, **will** join an active and well-equipped department with established lines of research in organic synthesis, natural products and bio-organic chemistry. [1980-055 (1995) : 69] |
| E | The normal hours of work **will** be 38 per week [1971-059 (1995) : 74] |
| E | The normal stipend **will** be enhanced by £2,200pa and the successful applicant **would** join an active group of 11 working on atherosclerosis and coronary heart disease. [1967-084 (1995) : 85] |
| E | The permanent lecturer **will be appointed** on the Lecturer A or B scale (£14,756 - £25,735 pa), at a point determined by age, experience, and ability. [1971-057 (1995) : 74] |
| E | The position is available immediately and salary **will** be according to age and experience. [1963-065 (1995) : 64] |
| E | The position **will** appeal to applicants who enjoy contact with patients and working in a team environment. [1993-058 (1995) : 68] |
| E | The position **will** be attractive to anyone who wants to be involved in the challenge of moving diagnostic testing out of the laboratory environment. [1980-127 (1995) : 87] |
| E | The position **will** be available from 1 August 1995, with a maximum duration of three years. [1980-044 (1995) : 67] |
| E | The position **will** be available from 1st June 1995, with a maximum duration of 5 years. [1967-062 (1995) : 80] |
| E | The position **will be based** at ICRAF headquarters, Nairobi, Kenya. [1967-012 (1995) : 66] |
| E | The position **will be based** at our European headquarters at Sandwich, on the attractive Kent coast, an area known for its reasonable living costs. [2002-016 (1995) : 59] |
| E | The position **will be located** within the DPI/CSIRO Agricultural Production Systems Research Unit (APSRU), based at DPI's regional office in Toowoomba in south-east Queensland. [1989-053 (1995) : 72] |
| E | The position **will suit** a recently qualified graduate [1989-080 (1995) : 78] |
| E | The position **will suit** those [1984-055 (1995) : 69] |
| E | The positions are subject to final budgetary approval and, in accordance with Canadian immigration requirements, priority **will be given** to Canadian citizens and permanent residents. [1993-062 (1995) : 69] |
| E | The positions **will be awarded** in open competition with maintenance grants analogous to those of the [1989-053 (1995) : 72] |
| E | The post holder **will** be a key member of a team of Clinicians and Scientists [1998-062 (1995) : 91] |
| E | The post holder **will** be able to rotate throughout all the service assays. [1963-018 (1995) : 54] |
| E | The post holder **will have** the opportunity to learn new skills, including the latest methods for expression and purification of recombinant forms of proteins, in this large and dynamic department. [1984-046 (1995) : 66] |
| E | The post holder **will work closely** with a Senior Product Research Chemist to develop new innovative products for the Mr Muscle range. [1989-062 (1995) : 74] |
| E | The post is available for three years to start before 1 September 1995 and the starting salary **will be** £16,075 including London Allowance. [1976-088 (1995) : 84] |
| E | The post is available for two years and salary **will be** on the Research Grade 1A scale: £13,941 – 20,953 pa. [1963-089 (1995) : 71] |
| E | The post is available immediately, and **will be** for at least four months and up to eight. [1967-037 (1995) : 73] |
| E | The post is based at South Cleveland Hospital, Middlesbrough and **will be** of one year's duration. [1989-050 (1995) : 71] |
| E | The post is fixed term for one year and salary **will be** in the range £9,900 - £11,300. [1959-031 (1995) : 52] |
The post is for 18 months from January 1995 and the salary will be in the range £13,941 - £15,566 per annum on the Research Grade 1B scale, according to age and experience. [1959-068 (1995) : 61]

The post is full-time and the contract will be issued on an annually renewable basis. [1980-093 (1995) : 78]

The post is funded by Wellbeing, and will be based in the Departments of Obstetrics and Gynaecology and Molecular Pathology. [1984-024 (1995) : 60]

The post is initially for a period of 3 years and salary will be in the range £11,138 to £19,669 or £13,025 to £23,009 depending on qualifications and experience. [1980-082 (1995) : 76]

The post is tenable for five years and the starting salary will be in the range £20 - £30,000 per annum. [1993-009 (1995) : 54]

The post is tenable for three years and starting salary will be at an appropriate point on the Grade 1A scale: £13,941 to £20,953 per annum, according to qualifications and experience. [1963-035 (1995) : 58]

The post is to cover a period of maternity leave and will be to 24 December 1995 in the first instance. [1963-086 (1995) : 70]

The post will also be at laboratory manager level [1959-075 (1995) : 63]

The post will be at HSO level, Salary from £13,025 to £18,165. [1984-025 (1995) : 60]

The post will be available for one year in the first instance [1984-092 (1995) : 77]

The post will be based at the MAFF Central Science Laboratory in Norwich. [1967-007 (1995) : 64]

The post will be based at the Royal Hallamshire Hospital. [2002-052 (1995) : 70]

The post will be based at the School of Postgraduate Medicine at the North Staffordshire Hospital Centre. [1963-080 (1995) : 68]

The post will be in Bristol. [1993-025 (1995) : 58]

The post will be in our European office which is located in Guildford. [1959-032 (1995) : 52]

The post will be in the Centre for Environmental Strategy, a cross-disciplinary group providing a focus for environmental research and postgraduate education and training at Surrey. [1989-115 (1995) : 86]

The post will be for a period of up to three years. [2006-025 (1995) : 68]

The post will be for a period of up to two years in the first instance. [2002-081 (1995) : 78]

The post will be for an initial contract of three years. [1993-096 (1995) : 78]

The post will be for an initial three year period with the possibility of extension. [1998-039 (1995) : 85]

The post will be for three years, with a probationary period, [1989-116 (1995) : 86]

The post will be for two years with salary on the RA1A scale £13,941 - £20,953. [1959-091 (1995) : 66]

The post will be funded within the Research Assistant 1A scale (£14,317 - £18,294) and is available now for a period of three years. [1998-001 (1995) : 72]

The post will be held within the ICRF Cancer Medicine Research Unit on the St James's University Hospital campus of the University of Leeds School of Medicine. [1984-005 (1995) : 52]

The post will be initially for one year, with a possible extension of one further year subject to satisfactory performance. [1967-076 (1995) : 83]

The post will be located at NERC's Swindon Office and is likely to involve some travelling to NERC sites throughout the UK. [1976-011 (1995) : 62]

The post will be paid on the University Research and Analogous Scale 1A in the range £14,317 - £21,519 per annum [1998-068 (1995) : 92]

The post will be part-time at approximately 100 days per annum, with renewable contract periods of 12 months. [1967-085 (1995) : 85]

The post will be tenable from as soon as possible for a term of 5 years. [1998-030 (1995) : 82]

The post will last for approximately 3 years. [1976-015 (1995) : 66]

The post will offer a salary and benefits package to reflect the experience and capabilities of the successful candidate. [1993-029 (1995) : 59]

The post will suit a molecular biologist or biochemist with experience of plants and/or fungi. Informal enquiries may be made to Dr Mike McPherson. [1993-072 (1995) : 72]
<p>| E | The post will suit a molecular biologist with experience in gene cloning and/or protein engineering. [1993-072 (1995) : 72] |
| E | The post, which is for a period of three years, will be based at the IFE River Laboratory [2006-093 (1995) : 86] |
| E | The post, which is full-time and for one year, may suit a recently qualified graduate, but training will be given. [1989-074 (1995) : 76] |
| E | The postdoctoral post will be on the Research and Analogous 1A scale (£13,941 - £20,953 plus £2,134 London Allowance) [1959-067 (1995) : 61] |
| E | The postholder will also be trained in all procedures relating to the microbiological diagnosis of diphtheria within the PHLS/WHO Streptococcus and Diphtheria Reference Unit. [1993-046 (1995) : 66] |
| E | The postholder will also have the opportunity to participate in an ongoing research project in spectroscopy of proteins. [1989-067 (1995) : 74] |
| E | The postholder will have the opportunity to develop his/her specialist interest in this area [2006-012 (1995) : 63] |
| E | The postholder will work in a research group investigating immune mechanisms in human renal disease. [1984-018 (1995) : 58] |
| E | The postholders will have research facilities in the University of East Anglia and in the nearby Norwich Laboratory of the Institute of Food Research, [1967-048 (1995) : 76] |
| E | The posts will be based in the COIN Project Office, in the Clinical Oncology Centre at North Middlesex Hospital, [1971-056 (1995) : 73] |
| E | The Programme Director will have the dedicated support of an experienced secretary. [1989-115 (1995) : 86] |
| E | The programme of lectures, tutorials and practical classes will place particular emphasis on the technical skills needed for scientific and medical investigations at the molecular level [1976-100 (1995) : 87] |
| E | The project is for a period of two years and the salary will be in the range of £15,000 - £20,000 per annum. [1984-047 (1995) : 66] |
| E | The project is funded by a grant from the BBSRC and will be conducted in collaboration with Dr M. R. Clark of the Immunology Division, Cambridge University Department of Pathology. [1959-042 (1995) : 55] |
| E | The project is funded by the Realising Our Potential Award (ROPA) scheme, and will be of two years duration. [1998-012 (1995) : 76] |
| E | The project is funded for three years by Zeneca Agrochemicals and will be based in the Department of Genetics and Microbiology in Liverpool, [2006-017 (1995) : 66] |
| E | The project is linked with a program of experimental work on surface structure of crystals grown by molecular-beam epitaxy, and the Fellow will be encouraged to interact closely with the IRC in Semiconductor Materials at Imperial College, London. [1980-031 (1995) : 64] |
| E | The project is supported by a grant from the Wellcome Trust held jointly by Drs Malcolm Kennedy (IBLS) and Alan Cooper (Chemistry) and will be based in new laboratories in the Chemistry/Life Sciences Building of the University. [1980-031 (1995) : 64] |
| E | The project will be based at Nottingham, [1989-091 (1995) : 81] |
| E | The project will be based in a large active laboratory studying various aspects of nematode molecular biology and immunology. [1998-001 (1995) : 72] |
| E | The project will be for a three year period. [1959-004 (1995) : 45] |
| E | The project <strong>will</strong> be in collaboration with Professor Barry Halliwell (King's) and Dr Peter Bruni (Royal Holloway). [1993-059 (1995) : 68] |
| E | The project <strong>will</strong> be jointly <strong>supervised</strong> by Dr C R Black (Nottingham) and Professor C K Ong (International Centre for Research in Agroforestry, Kenya). [1976-069 (1995) : 79] |
| E | The project <strong>will</strong> be <strong>supervised</strong> at Reading by Dr N H Battey and at Zeneca by Dr A J Greenland. [1980-011 (1995) : 57] |
| E | The project <strong>will</strong> be <strong>supervised</strong> by Dr C R Black (Nottingham) and Professor C K Ong (International Centre for Research in Agroforestry, Kenya). [1976-069 (1995) : 79] |
| E | The project <strong>will</strong> be <strong>supervised</strong> by Dr Steve Hill and Dr Phil Jones (University of Plymouth) and Dr Ian Shuttler (Perkin Elmer). [1959-005 (1995) : 46] |
| E | The project <strong>will</strong> be supervised by Dr N H Battey and at Zeneca by Dr A J Greenland. [1980-011 (1995) : 57] |
| E | The project <strong>will</strong> be supervised by Professor J. Yarwood (SHU) and Dr P. Holmes (Pilkington). [1984-116 (1995) : 81] |
| E | The project <strong>will</strong> be supervised by Professor Paul Worsfold and Fauzi Mantoura and Dr Eric Achterberg as part of their wider Marine Analytical Technology research programme. [1959-005 (1995) : 46] |
| E | The project <strong>will</strong> be supported by the Plymouth Marine Laboratory (PML) via a NERC CASE equivalent studentship as part of their involvement in the Plymouth Marine Network (a research and teaching partnership between the PML and five universities to catalyse collaboration in Marine Science). |
| E | The project <strong>will</strong> start on 1 October 1995 or possibly at a later date to be mutually agreed. [1984-035 (1995) : 62] |
| E | The research assistant <strong>will</strong> work initially with a team in the Department of Medical Oncology investigating the function of fibroblast growth factors and FGF-receptor 4 in the control of growth and differentiation of mammary epithelial cells. [1959-072 (1995) : 62] |
| E | The Research School of Biosciences has been selected as one of the institutes which <strong>will</strong> pilot this new and prestigious route for postgraduate training. [1963-100 (1995) : 74] |
| E | The research <strong>will</strong> be based in a multi-disciplinary School which is currently active in the following areas: [1984-008 (1995) : 53] |
| E | The research <strong>will</strong> be <strong>supervised</strong> by Dr M D Steven (Geography) and Dr J A Clark (Environmental Science). [1993-016 (1995) : 56] |
| E | The research <strong>will</strong> start in October and run for two years with the objective of understanding the benefits of AFM in the ceramic field. [1984-096 (1995) : 77] |
| E | The Reuter Foundation <strong>will</strong> initially offer one fully-funded Fellowship for one term (three months), starting in January, April or October 1996. [1993-015 (1995) : 55] |
| E | The role offers excellent opportunities for career development for those who can show motivation and initiative, and <strong>will</strong> be located initially at Chorleywood, Hertfordshire, with relocation to Chipping Campden in Spring, 1996. [2002-078 (1995) : 77] |
| E | The role <strong>will</strong> appeal to someone who is able to demonstrate the ability to lead a team of qualified service engineers, to communicate effectively with customers and enjoys also the challenge of working closely with a small management team. [1963-025 (1995) : 56] |
| E | The role <strong>will</strong> be based at our factory site in Purfleet, Essex. [1989-059 (1995) : 73] |
| E | The salary for the position <strong>will</strong> be paid in Solomon Islands dollars (tax free) [1993-064 (1995) : 70] |
| E | The salary for the position <strong>will</strong> be paid in Solomon Islands dollars (tax free) [1993-064 (1995) : 70] |
| E | The salary for these appointments, which <strong>will</strong> be <strong>limited</strong> in term for two years initially, [1998-023 (1995) : 80] |
| E | The salary for this position <strong>will</strong> be on the Civil Service Scientific Officer scale (with an initial salary of up to £18,630 per annum inclusive of London Weighting and pension scheme). [1998-071 (1995) : 93] |
| E | The salary is £13,806, and provided your performance meets our expectations, you <strong>will</strong> be promoted to Higher Scientific Officer at a salary of £17,485 after completing the 2 years training. [2002-060 (1995) : 73] |
| E | The salary will be £12,133 (including London Allowance). [1993-091 (1995) : 77] |
| E | The salary <strong>will</strong> be £6,551 per annum rising to £7,324 per annum in the third year. [1984-069 (1995) : 72] |</p>

</tbody>
</table>
The starting salary will be up to £16,191 per annum on the 1A salary scale (£13,941 - £20,953 per annum) depending upon qualifications and experience. [1963-043 (1995) : 60]

The starting salary will depend on experience. [1980-128 (1995) : 87]

The statistician will join a senior statistician and epidemiologist on the National Study of Health and Growth team. [1967-079 (1995) : 84]

The stipend for these fellowships will be on the Trust's own fellowship scales, which are linked to University Lecturer scales. [1959-043 (1995) : 56]

The stipend will be £6,550 in the first year, rising to £7,324 in the third year. [1980-105 (1995) : 80]

The stipend will be £7510. [1989-037 (1995) : 68]

The stipend will be £9,000 net in the first year. [1971-061 (1995) : 75]

The student stipend will be £6,500 per annum. [2006-069 (1995) : 80]

The student will be part of the large research group working on mixing problems under the leadership of Professor A W Nienow, F.Eng, from whom further particulars can be obtained. [1980-062 (1995) : 71]

The student will join an established group in the newly refurbished Howell immunology laboratory. [1976-039 (1995) : 72]

The student will work under the supervision of Dr. K. A. Fleming, Clinical Reader in Pathology. [1984-069 (1995) : 72]

The studentship is funded by the British Small Animal Veterinary Association and is suitable for a good veterinary or science graduate (1st or 2.1), and will be £10,000 p.a. [1984-029 (1995) : 61]

The studentship will be for three years. [1998-042 (1995) : 86]

The studentships (£5,750 p.a.) will be for three years and candidates are expected to register for a Ph.D. [1980-028 (1995) : 62]

The studentships will be available from 1 October 1995 and applicants are now invited from recent graduates or final year undergraduates. [1980-019 (1995) : 60]

The studentships will normally be of three years' duration and attract an annual stipend of £7,600. [2006-069 (1995) : 79]

The successful applicant will be a member of an interdisciplinary team investigating the problems of establishing new woodlands under the Farm Woodland Premium Scheme. [1976-051 (1995) : 75]

The successful applicant will be based in our attractive modern office on the outskirts of Brussels. [1998-059 (1995) : 90]

The successful applicant will be part of a technician team providing a service to the Science section, with Biology as a specialist area of work. [1993-024 (1995) : 58]

The successful applicant will be registered for a DPhil degree [1976-064 (1995) : 78]

The successful applicant will be working as part of a highly skilled team undertaking post irradiation examinations of core graphite and associated tasks, including preliminary analysis of data and development of measurement techniques. [2006-087 (1995) : 85]

The successful applicant will be working in collaboration with Dr C Camacho-Hubner and Dr A Cotterill on aspects of the IGF-1 system in insulin resistance. [1980-074 (1995) : 74]

The successful applicant will have the opportunity to do research and could register for a part-time higher degree. [1963-079 (1995) : 68]

The successful applicant will have the opportunity to work in all sections of the department thereby gaining more specialist knowledge. [1971-095 (1995) : 82]

The successful applicant will join a collaborative group in the two institutes working on aspects of liver metabolism in ischaemia and storage as it relates to transplantation. [2006-097 (1995) : 87]

The successful applicant will join a group analysing the genetics of proteins of the complement system, and of rheumatic disease especially systemic lupus erythematosus. [1993-053 (1995) : 67]

The successful applicant will join a research project involved in the phenotyping and structural characterisation of CD34 cells. [1971-028 (1995) : 64]

The successful applicant will join a research team working in the Department of Medical Microbiology, University of Edinburgh. [1980-110 (1995) : 81]

The successful applicant will join a team developing a new type of coriolis mass flow meter using advanced digital technology. [1998-012 (1995) : 76]
The successful applicant will join a team of scientists, epidemiologists and clinicians actively involved in developing the program. [1984-073 (1995) : 73]

The successful applicant will join a team working on the release and actions of hormones involved in controlling growth. [1998-056 (1995) : 90]

The successful applicant will join a thriving multi-disciplinary research department (rated 5a in the last UFC selectivity exercise) with a research income from the research councils, charities, government agencies, European Union and industry in excess of £2m per annum. [2002-037 (1995) : 66]

The successful applicant will join an active multidisciplinary team, an interest in computing and bioelectronics would be an advantage. [1963-040 (1995) : 60]

The successful applicant will join an active research group studying the structure and function of muscle receptors and the role of sensory feedback in the control of movement. [1967-047 (1995) : 76]

The successful applicant will join the Endothelial Cell Research Laboratory in the Rayne Institute at St Thomas' [1959-013 (1995) : 48]

The successful applicant will join the laboratory team [1971-095 (1995) : 82]

The successful applicant will join the Mathematics & Decision System Group which conducts research into mathematical models and decision analysis techniques for decision making under the complex interactions occurring in agricultural systems. [1967-024 (1995) : 70]

The successful applicant will join the Molecular Pathology Research Group at Leicester University [1963-097 (1995) : 73]

The successful applicant will play a key role in the development of new security print products, passports, ID cards and plastic cards. [1993-093 (1995) : 77]

The successful applicant will receive a competitive salary, annual profit-sharing, subsidised private medical and dental care, non-contributory pension and life-assurance. [1989-035 (1995) : 68]

The successful applicant will receive a competitive salary, annual profit-sharing, subsidised private medical and dental care, non-contributory pension and life-assurance. [1989-062 (1995) : 74]

The successful applicant will take the lead role in translating the Audit into practical projects and formal planning policies. [1980-012 (1995) : 58]

The successful applicant will work at Reading and at Zeneca's research centre at Jealott's Hill located about 12 miles from the University. [1980-011 (1995) : 57]

The successful applicant will work in a highly interactive research environment. [1980-050 (1995) : 68]

The successful applicant will work in a research group that offers wide experience in molecular cell biology in newly refurbished laboratories. [1984-035 (1995) : 62]

The successful applicant will work in Professor M. Owen's laboratory in the Department of Medical Genetics. [1976-092 (1995) : 84]

The successful applicant will work in Tokyo under the supervision of a UNU/IAS faculty member and/or affiliated UNU/IAS network scholars. [2006-075 (1995) : 82]

The successful applicant will work on the development of innovative print designs and products, designed to enhance security. [1993-093 (1995) : 77]

The successful applicant will work on the structures and interactions of key cell recognition molecules of the immune system. [1984-046 (1995) : 66]

The successful applicant, working with Dr Andrew Bosanquet and using in vitro chemosensitivity assays and molecular biology techniques, will spearhead the work in cancer using fresh tumour cells. [1984-059 (1995) : 70]

The successful applicants will join dynamic, internationally recognised research groups. [2002-037 (1995) : 66]

The successful applicants will join research groups led by their supervisor and receive research training in disciplines appropriate to the subject. [1963-092 (1995) : 72]

The successful applicants will lead part of a team which provides the HSE Approved Dosimetry Service for the AWE. [1984-036 (1995) : 63]
The successful applicants will work within tightly integrated teams, responsible for taking new products from marketing concept through to customer ready solutions. [1989-033 (1995) : 66]

The successful candidate may work in any section of the laboratory, and will be eligible to join the voluntary on call service [1971-040 (1995) : 68]

The successful candidate will also have an opportunity to work with a variety of methods developed to localise molecules at the cellular level, including quantitative immunocytochemistry and in situ hybridisation. [1984-053 (1995) : 69]

The successful candidate will be a full member of the Institute of Ecology and Environmental Management [1963-076 (1995) : 67]

The successful candidate will be appointed at the appropriate grade on the University Technician scales, depending on experience and qualifications. [1980-093 (1995) : 78]

The successful candidate will be appointed to the Medical Technical Officer Grade 2 on the salary scale of £10,821 - £13,693, depending upon qualifications and experience. [1971-043 (1995) : 69]

The successful candidate will be appointed to the Medical Technical Officer 2 grade. [1980-101 (1995) : 80]

The successful candidate will be located at Leicester University. [1980-064 (1995) : 71]
The successful candidate **will** work on host cell signalling in response to interaction with the above pathogens and/or their products (e.g. toxins). [1980-121 (1995) : 86]

The successful candidate **will** work on projects related to extrusion cooking and biscuit production. [2002-078 (1995) : 77]

The successful candidate **will** work with Drs D. Grundy and P. Hardcastle using a range of techniques to study intestinal motor and secretory function [1980-098 (1995) : 79]

The successful candidate, who **must** be a non-UK citizen, **will** play a vital role in the research programme of several of the UK and EU users on our Synchrotron Radiation Source for reflection-absorption infrared spectroscopy and other experiments, necessitating regular visits to other Laboratories in the HCM network (in particular Italy and France). [1976-037 (1995) : 72]

The successful candidates **will be awarded**, in addition to their fees, bursaries worth between £7,500 and £10,000 per annum. [1984-109 (1995) : 80]

The successful candidates **will** become part of a multi-disciplinary collaborative team focusing on molecular and cellular aspects of staphylococcal infections and housed in the Institute of Infections and Immunity. [2002-037 (1995) : 66]

The temporary lecturers **will be appointed** on the Lecturer A scale (£14,756 - £19,326 pa). [1971-057 (1995) : 74]

The Unit is currently in Cambridge but **will** be moving to new facilities at the Gatty Marine Laboratory, University of St. Andrews, around October 1996. [1989-005 (1995) : 57]

The unit, which has the active support of a number of NHS providers, industrial partners and academic institutions, **will be sited** within the Academic Centre of Frenchay Hospital. [2006-077 (1995) : 82]

The University Board has decided that no special description of the subject **will be given**. [2002-022 (1995) : 61]

The University **will** adopt a flexible approach to such candidates. [2002-073 (1995) : 76]

The University **will** send further particulars for this post to all applicants. [1959-077 (1995) : 64]

The winner **will be a member of the Reuter Foundation Fellowship Programme for international Journalists at Green College, Oxford.** [1993-015 (1995) : 55]

The work is in collaboration with the Department of Obstetrics and Gynaecology, University of Cambridge, and **will be based** at our Hawkshead Campus near Potters Bar. [1980-035 (1995) : 64]

The work **will be of interest to people who wish to study the way in which neural networks learn and their subsequent behaviour.** [1989-101 (1995) : 83]

There is a possibility of further employment with the participating companies at the end of the programme and the initial salary **will be between £13,941 and £17,813 depending upon qualifications and experience.** [1976-054 (1995) : 76]

There **will also be a second prize of £500 and two third prizes of £250.** [1980-001 (1995) : 47]

There **will also be an element of general materials/metallurgical support and "consultancy" to the laboratory programme, as well as to our product divisions within the UK.** [1984-049 (1995) : 67]

There **will also be opportunities to contribute to multi-disciplinary research projects involved in the characterisation of mechanisms of toxicity and international project teams responsible for drug development.** [1993-077 (1995) : 73]

There **will also be opportunities to contribute to the research and development activities of the division, which also includes MRI physics, image analysis and radiation protection.** [1976-038 (1995) : 72]

There **will also be the opportunity to work on other ongoing projects within the Department.** [1980-108 (1995) : 81]

There **will be a 22 week formal taught course, [1971-099 (1995) : 83]**

There **will be a 22 week formal taught course, [1989-117 (1995) : 86]**

There **will be a generous start-up allowance for new equipment. [1963-014 (1995) : 54]**

There **will be an opportunity for career advancement. [1959-051 (1995) : 57]**

There **will be an opportunity for some related synthesis and structural studies. [1963-091 (1995) : 71]
E There will be excellent opportunities for collaboration with research groups within the Department as well as other institutions, therefore good interpersonal and presentation skills are required. [1993-035 (1995) : 62]

E There will be opportunities for collaboration with clinicians in the Norwich Hospitals. [1967-048 (1995) : 76]

E There will be opportunities for non-routine field work involving novel problems in the occupational environment, mostly concerning hazardous substances and noise. [1993-082 (1995) : 74]

E There will be opportunities for the successful candidate to undertake research DNA and peptide technology. [1959-071 (1995) : 62]

E There will be opportunities to prepare and present papers at conferences and for publication. [2002-059 (1995) : 73]

E These appointments are EPSRC funded and will be on fixed term contracts. [1984-082 (1995) : 74]

E These appointments will be for an initial period of two years with a possible extension to a third. [1967-036 (1995) : 73]

E These are open to graduates of any University with no age limit, but are intended to support those at a very early stage in their academic careers, and will normally be awarded to candidates who have recently completed their Ph.D. or are close to completion. [1989-054 (1995) : 72]

E These posts are fixed term for two years and starting salary will be in the range £13,400 - £17,700 depending on qualifications and experience. [1959-031 (1995) : 52]

E These posts will be available in the group from 1 October 1995. [1989-075 (1995) : 76]

E These vacancies will be based at SOC [1959-075 (1995) : 63]

E These will be based in the Departments of Pure and Applied Chemistry and Pharmaceutical Sciences, tenable until 31 August 1996, under the supervision of Professors C. J. Suckling and R. D. Waigh. [1980-059 (1995) : 70]

E These will be based on Genetic Algorithm techniques which seek to apply survival of the fittest criteria to the problem of aerospace structural design. [2002-030 (1995) : 64]

E These will be rotated periodically among the Managers so that each can gain the widest possible experience. [1959-057 (1995) : 59]

E This appointment is EPSRC funded and will be for approximately two years in the first instance. [1984-082 (1995) : 74]

E This appointment will be made at the level of Research Assistant and candidates should have previous experience with FISH. [1989-086 (1995) : 79]

E This BBSRC co-ordinated initiative will be open to scientists from Government Research Establishments and Agencies, and Institutes and Units of other Research Councils on the same basis as scientists in universities and BBSRC Institutes. [1976-058 (1995) : 77]

E This CASE award will be supported by AH Marks Ltd. [1984-087 (1995) : 76]

E This important role will involve developing validation procedures for programs. [1959-075 (1995) : 63]

E This is an industrial case award and the student will have access to the wide range of facilities within the School of Biological Sciences and Westlakes Research Institute. [1980-068 (1995) : 72]

E This key position will carry a highly competitive salary and benefits package. [2002-017 (1995) : 59]

E This means you’ll enjoy an unusually high level of personal accountability. [2002-028 (1995) : 63]

E This new role will also present the opportunity to organise our collections of resolving agents and catalysts and liaise effectively within dynamic multidisciplinary project teams to solve pharmaceutical synthetic problems. [2006-082 (1995) : 84]

E This new role will provide "in-depth" scientific knowledge [1998-011 (1995) : 76]

E This opportunity will suit a statistics graduate with over 2 years' experience in clinical research, including the design and analysis of clinical studies and a good knowledge of SAS. [1976-013 (1995) : 64-65]

E This permanent, full-time post will be based in Weinheim, a pleasant small town near Heidelberg in the southwest of Germany. [1971-063 (1995) : 75]

E This position is offered on a temporary contract basis, and will last for approximately 12-18 months. [2006-073 (1995) : 81]
This position **will be offered** for a fixed term of 12 months which may be renewable [1998-090 (1995) : 99]

This position **will be offered** on a 1 year contract initially. [2006-082 (1995) : 84]

This position **will initially be based** in our Gosport office, with a possible opportunity to relocate to the Slough area in the future. [1993-020 (1995) : 57]

This post is available immediately and **will be held** within the Division of Ceramics. [1984-056 (1995) : 69]

This post is available immediately to applicants with a proven track record in research who **will join** a successful research group headed by Prof. R.MeN. Alexander, FRS. [1971-050 (1995) : 72]

This post is initially to be based in our Gosport office, with a possible opportunity to relocate to the Slough area in the future. [1993-020 (1995) : 57]

This post **will be held** within the Division of Ceramics. [1984-056 (1995) : 69]

This post is available immediately to applicants with a proven track record in research who **will join** a successful research group headed by Prof. R.MeN. Alexander, FRS. [1971-050 (1995) : 72]

This post is initially to be based in our Gosport office, with a possible opportunity to relocate to the Slough area in the future. [1993-020 (1995) : 57]

This post **will be held** within the Division of Ceramics. [1984-056 (1995) : 69]

This post is available immediately to workers with proven track records in research who **will join** a successful research group headed by Prof. R.MeN. Alexander, FRS. [1971-050 (1995) : 72]

This post is initially to be based in our Gosport office, with a possible opportunity to relocate to the Slough area in the future. [1993-020 (1995) : 57]

This post **will be held** within the Division of Ceramics. [1984-056 (1995) : 69]

This post is available immediately to workers with proven track records in research who **will join** a successful research group headed by Prof. R.MeN. Alexander, FRS. [1971-050 (1995) : 72]
| E | Training will be given for state registration. [1963-046 (1995) : 61] |
| E | Training will be given in a wide variety of techniques. [2006-088 (1995) : 85] |
| E | Training will be given, however previous experience of semen analyses would be an advantage. [1963-079 (1995) : 68] |
| E | Training will be provided for these and other areas of physical characterisation, as necessary. [2006-072 (1995) : 81] |
| E | UCL UNIVERSITY COLLEGE LONDON Will again offer the following one-year courses: [1963-103 (1995) : 75] |
| E | Ultimately the work will be centralised in the London area. [1980-127 (1995) : 87] |
| E | Unfortunately, due to costs, only short-listed candidates will be notified further and so if you do not hear from us within four weeks; [1993-046 (1995) : 66] |
| E | Up to £2.5m will be available from BNSC over five years to be matched by funds from industrial participants. [1993-022 (1995) : 57] |
| E | Up to 10 fellowships will be offered to professional scientists and engineers - in any discipline - to allow them to spend between 4 and 8 weeks working with a media organisation. [1959-001 (1995) : 39] |
| E | We operate in a matrix organisational environment where you will be working closely with our European offices and the R&D Project Team. [2006-002 (1995) : 59] |
| E | We regret only short listed candidates will be acknowledged. [1963-029 (1995) : 57] |
| E | We will be able to offer you: [2006-021 (1995) : 67] |
| E | We will seek to appoint the most suitably qualified and experienced person for the job without regard to gender, disability or ethnic group. [1998-050 (1995) : 88] |
| E | We will soon have a vacancy in our small but busy Environmental Health Division. [1998-049 (1995) : 88] |
| E | We will train and develop you. [1976-019 (1995) : 67] |
| E | When possible, opportunity will be given for work on longer research projects to be carried out. [2002-072 (1995) : 76] |
| E | Where necessary, relocation expenses will be negotiated. [1984-103 (1995) : 79] |
| E | Where necessary, relocation packages will be negotiated. [1998-081 (1995) : 95] |
| E | Which ever clinical phase you support, you will be joining a Biometrics Department with over 90 professional staff supported by excellent computing facilities. [1971-049 (1995) : 71] |
While preference may be given to candidates with previous experience in the development of skin care formulations, consideration will also be given to new graduates with an outstanding academic record. [1989-022 (1995) : 63]

...will be given full training. [1989-080 (1995) : 78]

...will be for 2 years, initially, on the RA1A scale (£14,427 - £21,683, depending on qualifications and experience). [1984-104 (1995) : 79]

...will be within the range £14,427 to £21,683 per annum. [1998-023 (1995) : 80]

Women, members of ethnic minorities and disabled people are under-represented in the University in posts at this level and the University would therefore welcome applicants from members of such groups whilst, however, affirming that the appointment will be made entirely on merit. [1984-005 (1995) : 52]

Working directly to the Chief Executive, with full Corporate support, you will play a vital role in advising the Council on the development of a Local Agenda 21 strategy, including the formation and promotion of effective partnerships within the community. [1971-053 (1995) : 72]

You should have a good degree in biology; some experience of tissue culture an advantage but training will be given. [1971-073 (1995) : 77]

You should have an honours degree in an appropriate subject together with some experience in cell biology, biochemistry or immunology and you will be encouraged to register for a Ph.D. [1998-057 (1995) : 90]

You will also be offered the opportunity to register for MPhil. [1959-031 (1995) : 52]

You will also have a key role to play in deputising for the Quality Manager when required, as well as liaising with customers to ensure complete product and service satisfaction. [1984-026 (1995) : 61]

You will also have the opportunity to develop your statistical knowledge in this interesting area of clinical research. [1971-049 (1995) : 71]

You will be a member of a global team providing statistical support and expertise within one of our numerous phase II or III clinical projects. [1971-049 (1995) : 71]

You will be a member of a small integrated research group concerned with the molecular structure and function of p53 protein [1984-054 (1995) : 69]

You will be a member of a small team of well qualified experienced professionals reporting to the Director of Quality Assurance. [2002-007 (1995) : 56]

You will be encouraged to register for a higher degree. [1980-031 (1995) : 64]

You will be encouraged to register for a Ph.D., if appropriate, and some part-time teaching may be available. [1989-085 (1995) : 79]

You will be entitled to receive a monthly product allowance and paid holidays. [1959-028 (1995) : 51]

You will be joining this expert team to enhance the current surveillance programme with particular emphasis on Tuberculosis and multi-drug resistant organisms. [2002-080 (1995) : 78]

You will be key in relating our technology lead into demonstrable benefits to our customers. [1971-015 (1995) : 60]

You will be on contract to the British Government for 18 months, in service to the Government of Guyana. [1980-003 (1995) : 52]

You will be on contract to the British Government for 2 years, in service to the Government of Kenya.

You will be part of a small specialist project team, developing trace analysis methods, providing a general analysis service and maintaining specialised equipment including GC with Mass-Spectrometer detection. [1998-090 (1995) : 99]

You will be part of a team working on non-flowering plants [1989-113 (1995) : 86]

You have the opportunity to gain experience in all sections of the department, and, if suitably qualified, would be invited to participate in the voluntary single-discipline out of hours service. [1967-078 (1995) : 84]

You will have the opportunity to join a team of experts studying the dynamic changes in gene expression in brain and other tissues in response to novel drugs, injury and disease. [1984-065 (1995) : 71]
| E | You will have the opportunity to participate in research vessel voyages and to be involved in national and international collaborative studies. [2006-068 (1995) : 80] |
| E | You will initially work on the design of input/output scanners for image processing equipment, later becoming involved in the specification of optical, mechanical, electronic and software aspects of imaging systems. [1998-095 (1995) : 100] |
| E | You will join a group studying molecular phylogeny and diagnosis of cyathostomes, the most common and pathogenic nematodes found in horses. [1998-001 (1995) : 72] |
| E | You will join a multi-disciplinary environment, using an extensive range of radiation facilities and assisting in the development and application of a novel charged-particle microbeam that uses state-of-the-art micropositioning and imaging techniques to probe sub-cellular targets. [1980-047 (1995) : 68] |
| E | You will join a small team of researchers investigating the ecology and management of field boundaries. [2002-069 (1995) : 75] |
| E | You will join a team of researchers investigating the ecology of semi-natural habitats in agricultural systems. [2002-069 (1995) : 75] |
| E | You will join a well funded multidisciplinary cell adhesion group. [1989-037 (1995) : 68] |
| E | You will join a well-funded team studying the pathogenesis of autoimmune neuropathy using a variety of immunological, cell culture and electrophysiological techniques. [1963-069 (1995) : 66] |
| E | You will join our Mycology Diagnosis Sub-Team and undertake research to develop new and rapid procedures for the identification of fungi of statutory significance. [1984-013 (1995) : 56] |
| E | You will join the Molecular Genetics and Oncology Research Group within the Department of Clinical Dental Sciences. [1971-097 (1995) : 82] |
| E | You will join the Rheumatology Unit, which is part of the Department of Medicine of the University of Bristol. [1993-048 (1995) : 66] |
| E | you will play a vital role in maximising the technological, scientific and education outputs of the project. [2002-082 (1995) : 78] |
| E | You will receive a good grounding in all aspects of the work carried out in a routine department of a large District General Hospital. [1989-039 (1995) : 68] |
| E | You will receive on and off-site training and be involved in the training of other staff, including the preparation of training documents. [1959-052 (1995) : 58] |
| E | You won’t be restricted to a particular specialism, but encouraged to broaden your technical base. [2002-028 (1995) : 63] |
| E | You’ll be encouraged to attend training courses and conferences enabling you to maintain an awareness of new developments in scientific information systems. [1959-040 (1995) : 55] |
| E | You’ll be joining a young company with an open culture, which couples hard work with a strong belief in offering every encouragement in fulfilling career-potential. [1971-014 (1995) : 60-61] |
| E | You’ll be working with molecular biologists and biochemists to devise novel cell-based assays and expression systems for a wide variety of gene products. [2006-080 (1995) : 83] |
| E | You’ll join a small specialist team, within our Engineering Group, which is investigating new interconnection technologies, for LC Displays, and providing support for development and production in the Netherlands. [1984-049 (1995) : 67] |
| E | You’ll join them as: [2002-058 (1995) : 72] |
| E | Your starting salary will normally be at the lower end of the range, [2002-047 (1995) : 69] |
| E | Your starting salary will reflect depth of relevant experience [1976-059 (1995) : 77] |
| E | Your work will be as part of a team including other technicians, scientists and clinicians. [2002-026 (1995) : 62] |
| E | Zeneca will also provide a wider business related training and a generous enhancement of the basic student stipend. [1980-011 (1995) : 57] |
| Ex Co and will be an experienced scientist with international standing. [1993-069 (1995) : 71] |

29 occurrences should
16 occurrences must
Application procedures, and the duties and benefits attached to both the University and College appointments, are at www.eng.ox.ac.uk where other information about the Department of Engineering Science will also be found. [2519-076 (2005) : 78]

For an application and job description you should contact Sabrina Senior in HR via e-mail sabrina.senior@hpa.org.uk quoting the reference and details will be returned via e-mail. [2498-037 (2005) : 64]

For an application form and job description e-mail: sabrina.senior@hpa.org.uk quoting reference 9915004 as details will be returned via e-mail. [2481-041 (2005) : 66]

For an application form and job description please contact Sabrina Senior in HR via e-mail: sabrina.senior@hpa.org.uk quoting reference number 998T003 as details will be returned via e-mail. [2481-041 (2005) : 66]

If you would like to apply for either of these roles please visit www.QinetiQ.com/careers in the 'Jobs at QinetiQ' section, register your details and search by the appropriate reference, where you will be able to apply. [2485-051 (2005) : 75]

You don’t need to fill in an application form but we will need an up-to-date CV, the names and addresses of two referees and full details of all your field research, survey and other experience (e.g. ringing, insect sampling). [2528-022 (2005) : 68]

A biomedical science/pharmacy graduate or healthcare professional, experienced in clinical medicine, you will be able to review and summarise scientific literature as well as document your findings clearly and concisely. [2489-001 (2005) : 58]

A confident team player, you will provide scientific advice on food safety and food-borne illness, with particular emphasis on microbiology and natural toxins. [2519-047 (2005) : 70]

A Criminal Record Bureau check will be required for the successful candidate. [2524-058 (2005) : 73]

A dynamic and effective communicator, you will be highly organised and self-motivated, with excellent presentation and interpersonal skills. [2519-023 (2005) : 62]

A fluent communicator in both written and oral form, you will be able to influence others through reasoned argument. [2489-035 (2005) : 72]

A good team player, you will also be confident to take the initiative, problem solve and promote your own ideas. [2489-035 (2005) : 72]

A graduate in chemistry biochemistry molecular biology or a related science subject, your minimum of five years in the QC of pharmaceutical products, ideally in finished dosage form analysis, will include working to cGMP and managing a team. [2519-025 (2005) : 71]

A graduate or PhD scientist, you will enable us to identify novel antibody leads and to help us develop the assay platforms of the future. [2481-037 (2005) : 65]

A graduate with experience in delivering training or teaching at some level, you will have outstanding interpersonal skills to form effective partnerships within and outside the department. [2506-046 (2005) : 71]

A key attribute will be excellent man management skills [2485-039 (2005) : 71]

A key element of the job will be the promotion of CEA and its business both nationally and internationally. [2524-007 (2005) : 54]

A key responsibility will be the management of the stability programme. [2502-034 (2005) : 66]

A knowledge of UK legislation regarding Health and Safety and Freedom of Information will be important. [2493-004 (2005) : 55]

A major component of the job will involve creating effective interrelationships with new and existing clients. [2485-039 (2005) : 71]

A number of thin film systems will be studied for materials in which interesting phase and structural transformations have been identified. [2515-076 (2005) : 80]

A particular focus will be studying the impact of antiviral and vaccine interventions, and monitoring the impact of these at a virological and population level. [2498-004 (2005) : 50]
A PhD-qualified scientist or engineer, you will bring expertise in pharmaceutical solids processing or process modelling plus knowledge of modelling particulate systems. [2515-018 (2005) : 61]

A proactive thinker with a demonstrable talent for solving problems, you will also be highly motivated with excellent team working skills. [2485-045 (2005) : 73]

A recent PhD or a BSc with experience, preferably in drug discovery, you will have good electrophysiology skills. [2485-066 (2005) : 80]

A sound knowledge of regulations affecting in vitro diagnostic and medical device clinical investigations will also be required. [2524-018 (2005) : 59]

Ability to communicate with other scientists and farmers is important as will be the potential to initiate research programmes. [2485-006 (2005) : 80]

A proactive thinker with a demonstrable talent for solving problems, you will also be highly motivated with excellent team working skills. [2485-006 (2005) : 80]

A recent PhD or a BSc with experience, preferably in drug discovery, you will have good electrophysiology skills. [2485-066 (2005) : 80]

A sound knowledge of regulations affecting in vitro diagnostic and medical device clinical investigations will also be required. [2524-018 (2005) : 59]

Ability to communicate with other scientists and farmers is important as will be the potential to initiate research programmes. [2485-006 (2005) : 80]

A proactive thinker with a demonstrable talent for solving problems, you will also be highly motivated with excellent team working skills. [2485-006 (2005) : 80]

A recent PhD or a BSc with experience, preferably in drug discovery, you will have good electrophysiology skills. [2485-066 (2005) : 80]

A sound knowledge of regulations affecting in vitro diagnostic and medical device clinical investigations will also be required. [2524-018 (2005) : 59]

Ability to communicate with other scientists and farmers is important as will be the potential to initiate research programmes. [2485-006 (2005) : 80]

A proactive thinker with a demonstrable talent for solving problems, you will also be highly motivated with excellent team working skills. [2485-006 (2005) : 80]

A recent PhD or a BSc with experience, preferably in drug discovery, you will have good electrophysiology skills. [2485-066 (2005) : 80]

A sound knowledge of regulations affecting in vitro diagnostic and medical device clinical investigations will also be required. [2524-018 (2005) : 59]
| Co | Analytical and decisive, you’ll have a strong track record of leading a research group or organisation. [2493-004 (2005) : 55] |
| Co | Analytical and organised in your approach, you will have the ability to manage numerous projects simultaneously and summarise complex information concisely and accurately. [2519-047 (2005) : 70] |
| Co | and confirmation of this will be required before the post may be taken up. [2489-031 (2005) : 72] |
| Co | and it will include assessments of the practical consequences of resistance genes. [2493-058 (2005) : 72] |
| Co | and the commercial market will also be part of your role. [2502-002 (2005) : 54] |
| Co | and the Technical Service roles will involve undertaking testing to support customers, involving close contacts with sales. [2515-053 (2005) : 73] |
| Co | And they’re also your goal as part of a team co-ordinating projects to deliver biodiversity improvements, joining our Anglian Region, you’ll focus on an area with incredible environmental diversity, but equally diverse challenges from agriculture, development, water demands and changing coastlines. [2515-005 (2005) : 55] |
| Co | and will also be expected to contribute to the day-to-day running of the laboratories as required. [2528-073 (2005) : 88] |
| Co | and will also have a base at St Thomas’ Hospital in London. [2493-057 (2005) : 72] |
| Co | and will apply standard phenotyping tests for locomotor defects. [2528-025 (2005) : 70] |
| Co | and will apply these skills to real-world chemical problems using state-of-the-art commercial software. [2489-069 (2005) : 81] |
| Co | and will assist in the optimisation, validation and application of new and existing in-vitro methods for use across the biological sciences group. [2493-024 (2005) : 62] |
| Co | and will be charged with the development and implementation of business-led strategies, structures and systems within the organisation. [2498-015 (2005) : 55] |
| Co | and will be conversant with ongoing debates on chemical, nanotechnology and environmental issues. [2519-027 (2005) : 63] |
| Co | and will be expected to deliver results within defined timescales to support a variety of analytical customers. [2498-027 (2005) : 59] |
| Co | and will be expected to form new research groups. [2493-040 (2005) : 68] |
| Co | and will be expected to represent the Herbarium and the RHS in national and international meetings and organisations. [2511-032 (2005) : 62] |
| Co | and will be familiar with site safety regulations and validation processes. [2485-002 (2005) : 56-57] |
| Co | and will be familiar with site safety regulations, risk assessment, and radiation protection regulations. [2489-035 (2005) : 72] |
| Co | and will be fully conversant with preparation and maintenance of analytical methods, SOPs and expert reports for internal and external use. [2515-039 (2005) : 69] |
| Co | and will be fully versed in the scale-up of chemical reactions and API process development. [2528-052 (2005) : 81] |
| Co | and will be involved in a broad range of projects involving both industrial and academic groups. [2515-081 (2005) : 82] |
| Co | and will be involved in general research and section support when required, liaising with research visitors and students. [2511-002 (2005) : 52] |
| Co | and will be involved in the design and building of drug discovery programs focused on ion channels. [2524-002 (2005) : 52] |
| Co | and will be involved in the evaluation of the detectors in diverse applications including space science instrumentation, life science optical fluorescence and medical X-ray systems. [2506-052 (2005) : 73] |
| Co | and will be our internal expert on specialist IT systems and other areas of hydrometry. [2515-005 (2005) : 55] |
| Co | and will be required to teach physical chemistry at all levels, to attract external research funding, and to supervise graduate students. [2515-068 (2005) : 78] |
| Co | and will be required to undertake in vitro and in vivo measurements, and assist in data analysis. [2498-050 (2005) : 68] |
Co and will be responsible for day-to-day management of two of the Centre's four spectrometers. [2502-024 (2005) : 62]

Co and will be responsible for organizing and maintaining laboratory facilities. [2485-043 (2005) : 72]

Co and will be responsible for the management and co-ordination of a core team. [2481-065 (2005) : 73]

Co and will bring broad knowledge of the forensic genotyping process. [2511-017 (2005) : 57]

Co and will contribute to the delivery of corporate targets for land including informing SEPA policy and providing scientific advice to regulatory staff. [2511-041 (2005) : 65]

Co and will develop a network of contacts with career information sources and training providers to identify the best means of meeting those needs. [2506-046 (2005) : 71]

Co and will develop a system to computationally model the interaction of charged organic compounds with crystal surfaces. [2485-083 (2005) : 85]

Co and will engage with business and industry to identify and promote potential collaborations, partnerships and funding opportunities. [2489-043 (2005) : 75]

Co and will facilitate the achievement of the Institute’s objectives by the effective management of its resources and operations, including financial and administrative issues. [2524-053 (2005) : 71]

Co and will focus on modelling functional dynamics of arable invertebrate communities. [2528-051 (2005) : 81]

Co and will have a good media presence. [2519-079 (2005) : 78]

Co and will have a thorough grounding in one of our core technology areas. [2528-030 (2005) : 71]

Co and will have completed a period of postdoctoral research of at least one year. [2485-077 (2005) : 83]

Co and will have responsibility for the delivery of projects and the development of new business. [2498-032 (2005) : 61]

Co and will help design and build drug discovery programs based on ion channels. [2485-066 (2005) : 80]

Co and will help to set the direction of future research. [2489-025 (2005) : 70]

Co and will include some evening work, and possibly weekends. [2511-045 (2005) : 69]

Co and will include testing and synthesis of fuel additives and formulations. [2506-023 (2005) : 64]

Co and will include the receipt, handling and safe storage of biological specimens as well as the preparation, collation, interpretation and reporting of results. [2498-044 (2005) : 66]

Co and will incorporate the functions of DARD’s Science Service and an existing DARD NDPB, the Agricultural Research Institute of Northern Ireland (ARINI). [2511-013 (2005) : 56]

Co and will initiate and undertake research and prepare scientific and technology transfer outputs on all aspects of beef production to include: applied nutrition, all aspects of economically sustainable beef production systems (including suckler cow systems and cow fertility), genotype comparisons, grassland management, forage production and utilisation, over wintering accommodation of beef cattle and factors affecting meat eating quality. [2511-013 (2005) : 56]

Co and will interact with other key staff at Roslin involved in research relevant to EADGENE, as well as external partners. [2493-009 (2005) : 58]

Co and will involve European research cruises. [2511-070 (2005) : 75]

Co and will join an out-of-hours on-call rota (for which training is available). [2498-037 (2005) : 64]

Co and will join an out-of-hours on-call rota (for which training is available). [2498-037 (2005) : 64]

Co and will liaise with government departments, other agencies and stakeholder groups as SEPA’s lead for chemicals policy. [2506-002 (2005) : 54]

Co and will liaise with your UK and USA colleagues across a wide range of scientific disciplines, including software, hardware, molecular biology and chemistry. [2498-010 (2005) : 53]

Co and will manage a small team of Experimental Officers. [2515-081 (2005) : 82]

Co and will need to be a good communicator to ensure good relations are maintained. [2528-022 (2005) : 68]

Co and will need to be self motivated, resourceful and autonomous in their approach. [2498-021 (2005) : 58]

Co and will require direct contact with other research groups, sales representatives, and importantly with our customers. [2515-037 (2005) : 69]

Co and will require knowledge of, and adherence to, specialised procedures. [2528-069 (2005) : 87]
and will require technical transfer of all QC activities. [2502-034 (2005) : 66]

and will support research in the Department of Surgery. [2489-027 (2005) : 70]

and will take on responsibility for the financial management of the Initiative. [2528-067 (2005) : 87]

and will take special responsibility for driving and inspiring delivery of the Science Programme and the BAS vision. [2493-004 (2005) : 55]

and will take time to have an effect. [2519-004 (2005) : 50-53]

and will then participate in any one of our projects. [2528-038 (2005) : 74]

and will use a range of state-of-the-art techniques including genetic analysis of human DNA samples, expression profiling and biochemical analysis; experience in molecular biology would therefore be an advantage. [2506-053 (2005) : 73]

and will work alongside a total of some 80 employees from diverse backgrounds engaged in a range of issues in demography. [2493-052 (2005) : 71]

and will work closely with other groups around the UK. [2506-052 (2005) : 73]

and will work closely with the Genome Institute of Singapore [2524-049 (2005) : 69]

and you will assist with the collection of samples from experimental cattle, sheep and pigs and the maintenance of laboratory records. [2506-006 (2005) : 56]

and you will be a strong team player. [2524-066 (2005) : 75]

and you will be able to work within a team and on your own initiative. [2481-055 (2005) : 70]

and you will be advised when this happens. [2519-028 (2005) : 64]

and you will be expected to apply your knowledge to the design and implementation of novel assay systems. [2485-045 (2005) : 73]

and you will have a well-structured approach to work. [2524-041 (2005) : 65]

and you will have the ability to work well within a team and independently; [2493-032 (2005) : 66]

and you will work closely with teams at Jodrell Bank Observatory and the Gravitational Astronomy group at the University of Cardiff. [2502-060 (2005) : 74]

Antisoma operates a project management system, and you will be required to work extensively across all appropriate disciplines in house to help the team achieve the required project objectives. [2481-025 (2005) : 60]

Applicants should have a science degree (preferably in the equine or veterinary science fields), and excellent communication skills, since the project will involve work with veterinarians and racehorse trainers. [2498-050 (2005) : 68]

Applicants should have an established track record in research and will be expected to develop innovative projects and collaborate in existing studies. [2481-067 (2005) : 74]

Applicants will also be responsible for the management of the CSC's health and safety team and must hold as a minimum the NEBOSH certificate.

Applicants will be expected to assist with specimen preparation, operation of the microscopes and data processing. [2511-061 (2005) : 73]

Applicants will be expected to have a knowledge and understanding of assays for biological targets of importance to the pharmaceutical industry. [2515-057 (2005) : 74]

Applicants will be expected to have excellent project management and communication skills that can be applied to both the scientific and business setting. [2489-043 (2005) : 75]

Applicants will be expected to possess an advanced knowledge of chemical nomenclature, stereochemistry conventions, and organic synthesis processes. [2493-001 (2005) : 54]

Applicants will be expected work additional hours as required. [2489-027 (2005) : 70]

Applicants will be registered for a PhD in physics at one of the participating Universities namely Edinburgh, Heriot Watt, Glasgow, Paisley, St Andrews and Strathclyde. [2485-017 (2005) : 61]

Applications are invited for the post of NTRAC GCP Compliance Officer who will assist the Quality Assurance Manager and work with the clinical trial staff on all three sites of the UCL NTRAC Centre to maintain GCP standards. [2519-075 (2005) : 77]

As a BSc or PhD qualified Chemist, you will make a positive contribution to the group and have a background of at least three years' practical pharmaceutical analysis. [2515-027 (2005) : 65]

As a global enterprise, you will lead and manage research biology programs jointly with research, development and marketing. [2519-059 (2005) : 72]
<p>| Co | As a key member of an international project team, you <strong>will</strong> work closely with global scientific and medical associates to drive product development and to ensure that all aspects of clinical NDA/MAA documentation are adequately planned and executed. [2498-047 (2005) : 67] |
| Co | As a key part of our scientific community, you <strong>will be involved</strong> in a wide range of activities including the design, conduct and interpretation of pharmacology studies. [2524-005 (2005) : 53] |
| Co | As a member of a professional team you <strong>will</strong>; [2515-003 (2005) : 54] |
| Co | As a member of HFEA you <strong>will</strong> deal with issues of great sensitivity that often have a high public profile. [2511-015 (2005) : 56] |
| Co | As a member of our Process team, you <strong>will</strong> provide the vital link between policy and operational staff. [2498-028 (2005) : 60] |
| Co | As a part of the Department for Transports Transport Security and Contingencies Directorate (TRANSEC), you <strong>will</strong> influence not only UK transport security policy, but also international security considerations. [2502-004 (2005) : 55] |
| Co | As a Programme Manager, you <strong>will</strong> manage the peer review of grant applications, evaluating their relevance and administering the process thereafter. [2528-026 (2005) : 70] |
| Co | As a regulatory, scientific and technical expert, you <strong>will</strong> be our representative on external forums and a key adviser on projects such as our proposed new desalination plant. [2519-031 (2005) : 65] |
| Co | As a Research Assistant in our R&amp;D Department, you <strong>will</strong> be part of a team involved in product development, from inception to market launch and beyond. [2506-009 (2005) : 57] |
| Co | As a result the candidate <strong>will</strong> need to show excellent organisation and good communication skills. [2498-011 (2005) : 54] |
| Co | As a Study Director, you <strong>will</strong> be responsible for the design, conduct and reporting of <em>in vitro</em> and <em>in vivo</em> drug metabolism and protein binding studies supporting all phases of drug development. [2489-019 (2005) : 68] |
| Co | As a successful candidate you <strong>will</strong> also need to be commercially aware and have excellent communication, presentation and interpersonal skills. [2485-059 (2005) : 77] |
| Co | As an adviser to all parts of the business and working with the Drinking Water Inspectorate and other key stakeholders, including the media and our customers, you <strong>will</strong> also need excellent communication skills. [2519-031 (2005) : 65] |
| Co | As an experienced pharmacologist you <strong>will</strong> be a key member of the drug discovery project team, designing, undertaking and interpreting studies using drug candidates within established <em>in vivo</em> and <em>in vitro</em> models. [2528-043 (2005) : 77] |
| Co | As an integral part of this process, you <strong>will</strong> generate and manage experimental data on the uptake, movement and metabolism of our new active ingredients and formulations for weed control using 14C-labelled and unlabelled techniques. [2515-010 (2005) : 58] |
| Co | As an operator your primary role <strong>will</strong> be the aseptic preparation of injections using isolator technology. [2502-003 (2005) : 55] |
| Co | As Assistant Professor, you <strong>will</strong> be responsible for carrying out research, theoretical and experimental, in the field of controlled kites and their application. [2506-060 (2005) : 75] |
| Co | As Chief Scientific Adviser you <strong>will be required</strong> to maintain active links with the research community in Scotland. [2506-013 (2005) : 59] |
| Co | As Manager of a small research and development team, you <strong>will</strong> have good project management skills and be able to demonstrate excellent skills in experimental design. [2502-035 (2005) : 67] |
| Co | As members of the Microbiology Department, you <strong>will</strong> be part of a team involved in generating new biologically active compounds for Biotica's drug discovery pipeline. [2481-038 (2005) : 65] |
| Co | As one of a team of three Contract Managers you <strong>will</strong> be responsible for reviewing and negotiating contracts for research and consultancy to ensure we obtain the best possible terms for the University and our academics, whilst maintaining the RSO’s reputation for delivering an efficient and professional service. [2506-040 (2005) : 69] |
| Co | As part of a highly skilled team, you <strong>will</strong> create, implement, automate and maintain day-to-day electrophysiology assays as well as develop and optimise new active molecules for our ion channel targets. [2485-066 (2005) : 80] |
| Co | As part of a successful team, you <strong>will</strong> take responsibility for the day-to-day organisation of a range of toxicology studies as well as for keeping the relevant Study Director and members of the project team fully informed of all progress. [2481-045 (2005) : 67] |
| Co | As part of our Regulatory Water Resources team, you <strong>will</strong> be responsible for the project management and production of catchment Abstraction Management Strategies (CAMS) in the central area of our Anglian Region. [2515-005 (2005) : 55] |
| Co | As part of our Veterinary Medicine Discovery Chemistry Group, you <strong>will</strong> work closely with the Medicinal Chemists at all stages of the discovery process - from developing new methods for purifying novel compounds for initial screening through to the purification of larger scale batches of drug candidates. [2481-061 (2005) : 72] |
| Co | As part of the overall client management responsibilities you <strong>will</strong> be responsible for the review of data (including sterilization validations) and the preparation of recommendations for EC certifications. [2528-047 (2005) : 79] |
| Co | As part of the overall client management responsibilities, successful candidates <strong>will</strong> be competent to review critical design data (including risk analyses, biocompatibility, clinical investigation data, and post-market surveillance information), to prepare recommendations for EC certifications. [2515-045 (2005) : 71] |
| Co | As part of the overall client management responsibilities, successful candidates <strong>will</strong> be competent to review critical design data (including risk analyses, biocompatibility, clinical investigation data, and post-market surveillance information), to prepare recommendations for EC certifications. [2528-047 (2005) : 79] |
| Co | As part of this role you <strong>will</strong> be required to present to senior managers and conferences. [2515-040 (2005) : 70] |
| Co | As part of this small but highly influential group, you <strong>will</strong> review and interpret the legislative framework surrounding water quality and work to influence the development of regulations and guidelines. [2519-031 (2005) : 65] |
| Co | As part of this team you <strong>will</strong> be leading a group of scientists carrying out a large portfolio of serological tests from a range of animal species. [2519-043 (2005) : 69] |
| Co | As part of your role, you <strong>will</strong> get involved in information management projects that include database content development, information analysis and technology profiling. [2511-042 (2005) : 66] |
| Co | As section head, you <strong>will</strong> have responsibility for the co-ordination and delivery of core service work for a specified subset of diseases and provide training programmes in those areas. [2489-030 (2005) : 71] |
| Co | As senior roles in our Human Health Science Team, they <strong>will</strong> be crucial in delivering our environmental goals. [2493-030 (2005) : 65] |
| Co | As such, you <strong>will</strong> have the skills to engineer antibodies and proteins, express in mammalian systems, purify, characterise and use bioinformatics tools. [2493-018 (2005) : 60] |
| Co | As such, your input into labelling, packaging design and instructions for use <strong>will</strong> help guarantee that Investigational Medicinal Products are patient- and investigator-friendly. [2502-008 (2005) : 57] |
| Co | As the Animal Facility Manager the successful candidate <strong>will</strong> be responsible for managing the day-to-day operations of the facility to ensure the provision of a fully effective, efficient and cost-effective laboratory animal science resource. [2519-057 (2005) : 72] |
| Co | As the Assistant Editor of Trends in Immunology, you <strong>will</strong> copyedit and enhance the text and figures of manuscripts commissioned by the journal Editor and written by some of the world's leading scientific researchers. [2515-059 (2005) : 75] |
| Co | as the job-holder <strong>will</strong> be required to interpret and communicate findings and produce reports to support the presentation of their work. [2493-024 (2005) : 62] |
| Co | As the main point of contact for companies, you <strong>will</strong> build relationships with senior management, identify barriers to growth, and oversee the delivery of solutions to customers. [2506-015 (2005) : 60] |</p>

</tr>
<tr>
<td>Co</td>
<td>Both posts will involve working closely with laboratory staff and collaboration with other bioinformaticians so you are expected to have good communication skills. [2519-036 (2005) : 66]</td>
</tr>
<tr>
<td>Co</td>
<td>Both students will undertake field research in experimental river reaches and riparian zones in predominantly rural catchments. [2485-115 (2005) : 93]</td>
</tr>
<tr>
<td>Co</td>
<td>Building on three or more years' post-doctoral experience, you’ll contribute to the direction of all aspects of our in vitro research. [2481-006 (2005) : 55]</td>
</tr>
<tr>
<td>Co</td>
<td>But at the same time, we’ll expect you to keep up to speed with the latest industry developments, explore the potential of new methodologies and continually improve the way we work. [2528-036 (2005) : 73]</td>
</tr>
<tr>
<td>Co</td>
<td>But equally important will be the ability to negotiate effectively with external partners, to influence their decisions and outcomes. [2502-002 (2005) : 54]</td>
</tr>
<tr>
<td>Co</td>
<td>But the role will also be required to develop similar work with other species. [2515-042 (2005) : 70]</td>
</tr>
<tr>
<td>Co</td>
<td>But the successful candidate will be primarily responsible for laboratory-based analysis of bacteriophage epidemiology. [2519-067 (2005) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>But there will be a requirement to undertake some work at our Hawkshead Campus near Potters Bar in Hertfordshire, in the latter stages of the second project. [2519-062 (2005) : 74]</td>
</tr>
<tr>
<td>Co</td>
<td>But will also work closely with the new Head of School (Prof. John N Hay) in co-supervising his researchers. [2528-060 (2005) : 85]</td>
</tr>
<tr>
<td>Co</td>
<td>But will regularly visit the Antarctic. [2493-004 (2005) : 55]</td>
</tr>
<tr>
<td>Co</td>
<td>But will spend substantial periods in the partner laboratories, thereby benefiting from a wide range of expertise in the invention, development and application of proteomics methods. [2515-083 (2005) : 82]</td>
</tr>
<tr>
<td>Co</td>
<td>But will work in the IMR at Salford University. [2506-042 (2005) : 70]</td>
</tr>
<tr>
<td>Co</td>
<td>Candidates should note that the appointment will be subject to a satisfactory Enhanced Disclosure Scotland Application. [2493-053 (2005) : 71]</td>
</tr>
</tbody>
</table>
Candidates should note that the selection procedures will be carried out in English, French and German only. [2502-032 (2005) : 65]

Candidates will have skills in statistical analysis, and must have experience in Matlab or similar programming environments. [2498-056 (2005) : 70]

Candidates will possess excellent communication and reporting skills and should be keen to acquire new techniques and develop their scientific expertise. [2481-038 (2005) : 65]

Clinical activities will involve oocyte recoveries, semen preparation, intra-cytoplasmic sperm injection (ICSI), embryo culture, embryo transfer and cryopreservation of embryos. [2506-044 (2005) : 70]

Comfortable working independently and co-ordinating with a multidisciplinary team, you will have excellent scientific ability and communication skills. Experience with automation of electrophysiology would be useful. [2524-002 (2005) : 52]

Comfortable working independently or in a multidisciplinary team, you will have good communication skills and natural scientific creativity. [2485-038 (2005) : 71]

Comprehensive knowledge of cGMP and Quality-related guidelines will be essential. [2528-052 (2005) : 81]

Computer literate, you’ll also have excellent organisational, analytical and people skills. [2485-038 (2005) : 71]

Computer literate, you’ll know your way around. [2485-038 (2005) : 71]

Confident and pro-active in approach you will have the vision and ability to lead multiple projects, and an appreciation of high-quality customer service. [2493-003 (2005) : 54]

Confident and well-motivated, you will have excellent communication skills and experience of scientific or museum orientated work, in particular curation and/or data gathering. [2511-002 (2005) : 52]

Contributing to subsequent regulatory documents (such as IND, IMPD) and Clinical Investigator's Brochures, and possibly taking part in Regulatory Agency meetings, will complete your remit. [2502-020 (2005) : 61]

Contributing to teaching, you will also be responsible for the organisation and development administration of our very popular BSc and MSc Biomedical Sciences courses. [2528-075 (2005) : 89]

Cranfield University gains a high proportion of its income from contract research and you will need to demonstrate a talent for work with commercial companies. [2528-056 (2005) : 83]

Customer and supplier partnering to lead project opportunity definition and project selection, you’ll develop and define success criteria and metrics. [2506-026 (2005) : 65]

Data entry and GIS tasks will be a responsibility. [2481-058 (2005) : 71]

Day-to-day, this will involve routine sample testing and analysis. [2528-036 (2005) : 73]

Day-to-day, you’ll use a whole range of stringent techniques, including defined substrate technologies, pour and spread plate, membrane filtration and media and biochemical analysis, ensuring everything is up to the high standards of our regulatory bodies. [2511-045 (2005) : 69]

Dealing with clinicians and patients they will require good communication skills. [2489-027 (2005) : 70]

Depending on your own background, you’ll either inspect clinical trials activities or Marketing Authorisation Holders to ensure their full compliance with their obligations, travelling frequently and working on your own initiative for extended periods. [2515-034 (2005) : 68]

Determining the genetic profiles of plants as well as analyzing the genetic data, you’ll identify the genes that cause quality traits. [2489-013 (2005) : 64-65]

Developing and promoting our position externally, while liaising with our own specialists, you’ll act as an ‘ambassador’ for us, as well as managing our overall work on this subject. [2502-002 (2005) : 54]

Development data will be acquired using a high field, small bore MRI system, and TauRx intend to recruit a physicist to carry out the work. [2485-018 (2005) : 61]

Dividing your time between three sites in the South of England, you will be the focal point for business planning, process improvement, business continuity, risk management and assets control. [2489-014 (2005) : 66]

</tr>
<tr>
<td>Co</td>
<td>He/she <strong>will</strong> ensure consistency within projects and between projects and also that the local site (Welwyn) is consistent with the other sites working on a global scale liaising with other site Heads of Programming. [2511-006 (2005) : 53]</td>
</tr>
</tbody>
</table>
He/she will lead and manage the NCSR’s Administrative Team and oversee research, development and support activities related to NCSR's resources and technologies. [2528-009 (2005) : 63]

Helping to establish common project manufacturing systems, you will manage the distribution of information, including cashflows and budgets, be involved in inventory management, arrange the shipping and tracking of products and samples as well as proactively identify and highlight manufacturing issues. [2481-025 (2005) : 60]

Helping us deliver sustainable inshore fisheries management, you’ll prepare and deliver technical guidance, review survey data from recent management schemes, manage research contracts and represent SNH’s interests on relevant partnership projects. [2524-034 (2005) : 63]

Highly motivated and a good team player, your broad-ranging knowledge will allow you to assume responsibility for the design, timely development and smooth implementation of efficient synthetic processes towards structurally diverse pipeline candidate molecules coming from medicinal chemistry. [2528-052 (2005) : 81]

Highly motivated, with first class communication and interpersonal skills you possess an innovative, flexible and enthusiastic approach to solving complex problems and tackling issues [2493-025 (2005) : 62]

Ideally the applicant will have a good understanding of the main issues associated with business-university interactions. [2489-043 (2005) : 75]

Ideally this will have given you knowledge of modern proteomics techniques, such as 2-dimensional chromatographic, 2D-PAGE, data acquisition and database searching, plus proven ability to work without supervision and disseminate results. [2524-008 (2005) : 54]

Ideally you would also have a biological background in a relevant discipline and will have knowledge of immunoassay development, IVDD regulations and compliance expectations. [2498-043 (2005) : 66]

Ideally you would also have a good understanding of the main issues associated with business-university interactions. [2489-043 (2005) : 75]

If interesting mutants arise you will also undertake heritability testing and then positional cloning projects. [2528-025 (2005) : 70]

If Veterinary Medicine Regulatory Affairs is the crossroads of taking product development into product reality, you’ll provide the roadmap. [2485-050 (2005) : 75]

If you are interested in applying your knowledge to new and challenging situations, then this will appeal to you. [2502-012 (2005) : 58]

If you can see the possibilities, you will realise the potential. [2485-050 (2005) : 75]

In addition the job holder will have some specialist capability in coastal/estuarine processes or geomorphology. [2528-013 (2005) : 64]

In addition to expertise in cell-based assays (including proliferation, reporter gene and receptor-ligand binding) you will be computer literate, display meticulous attention to detail and have excellent communication and organisational skills. [2506-020 (2005) : 62]

In addition to generating high quality data for presentations and publications, your role will also involve liaison with external collaborators in leading-edge centres both in the UK and USA. [2498-010 (2005) : 53]

In addition to providing first class references, successful candidates will be required to obtain an enhanced disclosure from the Criminal Records Bureau. [2524-068 (2005) : 76]

In addition to representing the MHRA at external meetings/conferences and on government advisory groups, you will handle government correspondence and Parliamentary questions. [2506-005 (2005) : 55]

In addition to research, you will also contribute to our teaching programme. A PhD or equivalent and experience in magnetic confinement fusion plasma physics are both essential. [2489-062 (2005) : 79]

In addition to sound IT knowledge (Excel, Access, databases), you will have the interpersonal skills to train and support colleagues at all levels and be an effective problem solver. [2502-008 (2005) : 57]

In addition to the laboratory testing, the successful candidate will contribute to field work in a wide range of projects throughout the UK and overseas. [2528-034 (2005) : 72]
In addition to this, they will also oversee all critical aspects of clinical trials conduct, such as: adherence to protocol, programme timelines, GCP requirements and the timely reporting of critical safety/efficiency parameters.

In addition to undertaking research, you will support the MSc programmes in Geographical Information Management, Natural Resource Management and Water Management through the supervision of practical work and support during the thesis period.

In addition to your analytical ability, integrity and experience of working in a multi-disciplinary environment, you will also be able to demonstrate your expertise in one of the following fields:

In addition you will assist in providing intelligent customer advice on the work of contractors and undertaking non-intrusive and intrusive site investigations.

In addition you will have a flexible and adaptable attitude to working in a constantly evolving environment, a proactive and innovative approach to problem solving.

In addition you will maintain our low temperature storage facilities and provide support to our media production service and Containment Level 3 facility.

In addition you will manage and implement statistical software to be used by the epidemiology group and provide epidemiological advice to a wide range of research projects and applied disease control.

In addition you will need to have strong computer literacy skills - as well as holding a full UK driving licence.

In addition you will possess:

In addition, a contribution to the teaching and supervision of students on a variety of postgraduate routes, e.g. MSc, MPhil, PhD and Professional Doctorate will be expected.

In addition, post holders will assist the clinical embryologists with the maintenance of adequate stocks of all materials required for the trial.

In addition, the ability to apply and establish these and other fungal inoculants on seeds through coating and during priming will also be explored.

In addition, the Institute Manager will be responsible for all aspects of the Institute’s business relations and commercialisation.

In addition, the postholder will be required to contribute to ongoing clinical and scientific research programmes.

In addition, the postholder will have shared responsibility for the maintenance of Category 3 containment facilities.

In addition, you will also need excellent interpersonal skills while familiarity with Agilent Chemstation, Bruker Hystar or Waters-Micromass Masslynx software would be an advantage.

In addition, you will assist in the provision of advice and guidance on matters relating to the regulatory process and specific scientific discipline.

In addition, you will be jointly responsible for the maintenance of a Category 3 containment laboratory.

In addition, you will be tasked with supervising PhD students in the relevant research areas and giving lectures in the field of sustainable development based on ASSET projects.

In both roles, the Project Leaders will coordinate or Lead a number of projects, with the aim of developing or refining products and processes, in order to support the growth of our business.

In liaison with other R&D staff, you will optimise product characteristics and be involved in the design and management of clinical trials.

In particular you will develop SAS programs for the data management and statistical reporting of clinical studies.

In particular, you will assist the Head of Biosecurity in active risk management, control the movement of biological materials across the containment barrier and develop and maintain the

</tbody>
</table>
Included in your responsibilities will be defining process equipment requirements, determining budgets, negotiating with equipment suppliers and evaluating existing capital efficiencies. [2485-002 (2005) : 56-57]

Initially you will work on the European Commission project AQUAFIRST, on combined genetic and functional genomic approaches for stress and disease resistance in fish and shellfish. [2481-031 (2005) : 62]

Initially, the role will involve characterising the structure and function of proteins involved in the packaging of herpes simplex virus DNA. [2519-042 (2005) : 68]

Initially, the role will involve characterising the structure and function of proteins involved in the packaging of herpes simplex virus DNA. [2519-048 (2005) : 70]

Invertebrates will be modelled using behaviourally explicit individual-based models of trophic relations between primary and secondary consumers, and their relationships to plants. [2528-051 (2005) : 81]

It is expected that a portfolio of work reflecting NIAB's strategic interests will be developed. [2515-042 (2005) : 70]

It is expected that successful applicants will commence their research positions by October 2005. [2481-083 (2005) : 79]

It is expected that the incumbent will participate in the development of inter-disciplinary health research and clinical training in the McGill University Hospital Centre. [2515-067 (2005) : 78]

It is expected that the successful candidate will work with existing experimental programmes in the department. [2506-038 (2005) : 69]

It is expected that you will contribute to further growth of the group, through external grant income. [2498-004 (2005) : 50]

It is expected that you will develop novel assay systems and engage in molecular epidemiological studies, and actively collaborate with others within and outside of the Centre for Infections. [2498-004 (2005) : 50]

It is likely that successful candidates will be required to live within a certain radius of Oxford during the period of their appointment. [2511-053 (2005) : 71]

It will be his/her’s responsibility that the team of programmers verifies adherence to Biostatistics coding and validation standards and SOPs. [2511-006 (2005) : 53]

It will be necessary for you to work well with clients and colleagues and excellent written and communication skills are essential. [2515-048 (2005) : 72]

It will be necessary to work to defined time, cost and quality deadlines. [2481-040 (2005) : 66]

It will be your responsibility to produce the reports [2506-034 (2005) : 68]

It will involve working closely with a similar research team at IGER. [2489-024 (2005) : 58]

It will utilise established techniques which measure interferon gamma synthesis by lymphocyte subpopulations, cytotoxic T lymphocyte activity and serological haplotyping. [2511-029 (2005) : 61]

It's a clinical, managerial, educational, research and training role, where you will develop specialty services and be involved in the investigation and treatment of airways diseases. [2489-010 (2005) : 62]

It's also important that you share our passion and enthusiasm, while you'll need strong communication and project management skills. [2524-034 (2005) : 63]

It's the perfect environment to learn in, where you'll test samples alongside some of the most talented scientists in the business. [2511-045 (2005) : 69]

Joining our Medical Physics Service within the Radiological Sciences Group, you'll be both conscientious and technically capable. [2481-034 (2005) : 64]

Joining our Nuclear Medicine Physics Group, you will provide scientific and technical support to the Nuclear Medicine Imaging service, radionuclide therapy and non-imaging studies. [2489-010 (2005) : 62]

Joining our Pathogenesis of Vesicular Disease Group, you will study the persistence of foot and mouth disease virus (FMDV) in cattle. [2506-006 (2005) : 56]

Joining our Portsmouth Medical Physics Service, you'll provide scientific and technical support in the field of MRI, and secondly in Bone Densitometry. [2485-022 (2005) : 63]
| Co | Joining our Wound Management Research Programme, you **will** contribute your practical skills in biochemical-based analysis of cells and their products. [2506-022 (2005) : 63] |
| Co | Joining the Molecular Genetics Team in Bristol, you **will** help the lab deliver a quality diagnostic service as a member of the SCOBEC consortium (population 14 million). [2489-030 (2005) : 71] |
| Co | Keeping abreast of relevant changes and challenges to the delivery of sexual health services in England, you **will** identify opportunities for HIV surveillance and prevention activities. [2511-043 (2005) : 67] |
| Co | Key aspects of this role **will** include the production of API batches for preclinical development projects using the in-house kilo-lab facility, and to liaise with outsourcing API partners on technology transfers and process development to full-scale manufacturing of API's. [2528-052 (2005) : 81] |
| Co | Key responsibilities **will** be to: [2489-038 (2005) : 73] |
| Co | Key responsibilities **will** include immunology assay design, the management of pre-clinical and clinical immunology-assays at contract research organisations and document generation to support regulatory submissions. [2511-014 (2005) : 56] |
| Co | Key to success **will** be your technical knowledge, flexible approach and excellent communication and presentation skills. [2511-023 (2005) : 59] |
| Co | Knowledge of magnetic materials **will** be advantageous. [2506-025 (2005) : 64] |
| Co | Laboratory research **will be required** to identify effective solutions, as well as the investigation and resolution of customers’ problems in the field. [2515-037 (2005) : 69] |
| Co | Leading, developing and motivating this team, you’ll ensure that every programme they’re involved in is delivered on time to the highest possible standards. [2528-036 (2005) : 73] |
| Co | Liaising closely with our Manufacturing Managers, you **will** help to co ordinate the outsourcing of production of new products for clinical trials. [2481-025 (2005) : 60] |
| Co | Liaising closely with R&D and the Johnson & Johnson legal teams, your remit **will be to identify** and capture ideas and convert this to written form. [2493-015 (2005) : 59] |
| Co | Main responsibilities **will** include supervision and training of microbiology staff, setting objectives, sample production and QC, product development and technical input into reports. [2481-050 (2005) : 68] |
| Co | Maintaining the highest levels of customer satisfaction and directing the flow of information to worldwide Technical Services **will** be your goal. [2506-026 (2005) : 65] |
| Co | Managing a team of between 4-5 scientists in the disciplines of medicinal, analytical and synthetic chemistry, you **will** be responsible for deriving and delivering medicinal chemistry strategy on Galapagos’ programmes. [2493-008 (2005) : 57] |
| Co | Managing an experienced and highly-effective group of SAS programmers, as part of a global team you’ll ensure the delivery of exceptional software support for global clinical trials and regulatory submissions. [2511-006 (2005) : 53] |
| Co | Managing the programme in accordance with the principles of smart procurement, you’ll undertake strategic and technical assessments of the programme, providing reports and briefings to stakeholders on the physics research programme. [2506-010 (2005) : 58] |
| Co | Manuals, tutorials and guidelines for user input and retrieval options **will also be required.** [2489-064 (2005) : 79] |
| Co | Most importantly, you **will** have the ability to identify and extract key information from complex scientific reports. [2511-042 (2005) : 66] |
| Co | Most of the posts **will** involve field-based activities and you may be required to work overseas and/or offshore. [2489-003 (2005) : 59] |
| Co | Motivated and with strong technical skills you **will** be able to coordinate all aspects of clinical trials from gathering medical input, protocol development, ethics submissions, monitoring the study and writing the final report. [2502-016 (2005) : 60] |
| Co | Naturally, you **will** be an effective and persuasive communicator, skilled in team working with good organisational abilities. [2498-042 (2005) : 65] |
| Co | Of particular value **will** be the development of in-situ procedures enabling the application of vibrational spectroscopy to reveal both surface activity and bulk properties of catalytic materials. [2515-015 (2005) : 60] |
On a personal level, you will have a very practical approach and be target focused. [2524-041 (2005) : 65]

On the resourcing side, your role will involve optimising the talents of some 300 people, as well as co-ordinating corporate HR requirements. [2489-014 (2005) : 66]

Once settled in the role, you will be responsible for the daily activity of the cyclotron including all routine maintenance. [2515-026 (2005) : 65]

Once these ideas have been selected for patenting, you will then go on to assist with detailing these 'inventions' ready for submission. [2493-015 (2005) : 59]

One post will be primarily responsible for metabolic studies using high-field NMR and LC-MS (Imperial). [2506-064 (2005) : 76]

Options for manufacturing routes and formulations will be assessed and developed. [2519-020 (2005) : 61]

or will be prepared to develop, a solid understanding of complementary therapies towards identifying gaps and opportunities for research in the field. [2498-003 (2005) : 50]

Outside the lab, you will need to be highly articulate and confident to present your findings at senior level. [2493-018 (2005) : 60]

Outstanding organisational skills will be required as well as the ability to work both in a European team and with the analytical team in the GlycoImmunology group led by Dr Pauline Rudd. [2489-064 (2005) : 79]

Over 75% of your time will be spent in the laboratory. [2485-056 (2005) : 77]

Overseas travel to workshops and short periods at sea will be required. [2481-031 (2005) : 62]

Overseas travel will account for about 25% of their time, although this is variable. [2506-019 (2005) : 61]

Overseeing the effective management of the Research and Development Department, you will be responsible for managing a dedicated team of scientists to ensure the successful completion of cutting edge projects. [2493-002 (2005) : 54]

Overseeing the work of contractors and site licensees, we will ensure the optimum results for taxpayers, for local communities and for the environment. [2493-033 (2005) : 66]

Part of a team involved in the identification and development of both antibody and small molecule therapeutics, you’ll perform high-quality molecular and cell biology techniques, including the cloning of genes, generation and maintenance of cell lines, and the development and running of a wide range of cellular assays, including ELISAs and flow cytometry. [2498-019 (2005) : 57]

Particularly we are seeking an individual who can demonstrate good lab skills, innovation and who possesses good verbal and written communication skills (they will be in direct contact with customers). [2485-037 (2005) : 70]

Performing scientific investigations that will impact on our projects [2502-002 (2005) : 54]

Planning and compiling technical dossiers for submission to European and other Regional Regulatory agencies, you’ll maintain existing product licences, provide regulatory advice to our Veterinary Medicine Research and Development teams, coordinate responses to regulatory queries - and facilitate the approval of new products in EMEA, driving the design of development programmes for some of the most innovative candidate veterinary medicines in the world. [2485-050 (2005) : 75]

Plant material will be extracted and active natural products isolated by a variety of chromatographic techniques (column, TLC, HPLC). [2511-074 (2005) : 77]

Plus, as the primary contact on all drug supply matters, you will liaise with other parts of the business on a global basis to forecast and achieve the timely, high-quality, cost-effective supply of products for trials. [2502-008 (2005) : 57]

Positive and enthusiastic, you will join our Environmental, Science & Sustainability department. [2528-021 (2005) : 68]

Postholders will be required to provide research support for long-term projects investigating the molecular pathology of prion diseases. [2528-069 (2005) : 87]

Potential applicants will need to be able to demonstrate their ability to contribute to detailed technical discussions. [2489-018 (2005) : 67]
| Co | Probably you **will** also be up to date with technical, OEM and engineering trends and be able to interact with other internal and external professionals in these areas. [2485-058 (2005) : 77] |
| Co | Providing a mixture of technical and strategic input, you **will** also manage collaborations with external partner organisations. [2515-018 (2005) : 61] |
| Co | Providing advice, support and information to the University on all aspects of biological safety, you **will** ensure the implementation of biological/GM safety codes and good practice. [2524-071 (2005) : 77] |
| Co | Providing clear evidence of research leadership, including success in the supervision of research students, publications and research grant applications, you **will** make a contribution to academic leadership within the School. [2498-067 (2005) : 73] |
| Co | Providing comprehensive facilities management, you **will** ensure upkeep of mass spectrometric, HPLC and 2-D gel equipment, allocate instrument time and assist with project planning and user training. [2524-008 (2005) : 54] |
| Co | Publishing in scientific journals and seeking external funding for research, either alone or as part of an internal or external collaboration, you **will** make a significant contribution to the Interdepartmental Institute of Biomedical and Biomolecular Science that received a 5 rating in the last Research Assessment Exercise. [2498-067 (2005) : 73] |
| Co | Reconstructing the biology, developing the mathematical models, validating them, and applying your results to our development efforts **will** be the focus of this role. [2485-024 (2005) : 64] |
| Co | Reporting directly to the E&O Leader, the E&O Manager **will** have responsibility for the development and implementation of the Institute’s E&O programme. [2524-053 (2005) : 71] |
| Co | Reporting directly to the Quality, Compliance & Regulatory Affairs’ Director, you **will** lead and coordinate parallel import licence applications and maintain our current licence portfolio. [2498-038 (2005) : 64] |
| Co | Reporting to the Medical Information Manager, you **will** respond promptly and accurately to internal and external requests for information about marketed and development products as well as research and prepare written responses. [2489-001 (2005) : 58] |
| Co | Reporting to the Director of Environmental and Regulatory Compliance, the validations manager **will** be responsible for the implementation and the Company Validation programme for production and related laboratory facilities and maintenance of these facilities in a state of regulatory compliance. [2498-038 (2005) : 64] |
| Co | Reporting to the Editorial Director, you **will** undertake general editorial support and administration duties. [2511-039 (2005) : 65] |
| Co | Reporting to the Editorial Production Systems Manager, you **will** play a key role in investigating, developing and implementing delivery of RSC Publishing content by exploiting relevant technologies such as XML, CML, INChl, web services, directories and ontologies. [2528-054 (2005) : 81] |
| Co | Reporting to the Emerging Issues Unit Manager, you **will** address the policy issues arising from current and future European and UK policy/strategy and legislation where the understanding of chemicals, their use, their environmental impacts and their control are key. [2506-002 (2005) : 54] |
| Co | Reporting to the Process Development Manager, the Senior Development Chemist **will** develop processes and products using skills in polymer chemistry and materials science. [2524-016 (2005) : 57] |
| Co | Reporting to the Head of Medical Science (Oncology), you **will** provide scientific expertise and support for key company products, principally in oncology, to both external and internal 'customers'. [2511-023 (2005) : 59] |
| Co | Reporting to the Project co-ordinator, Professor Carlo Leifert, you **will** be responsible for managing the collection of WP and subproject-specific technical reports, the preparation and timely submission of consolidated technical reports to the European Commission and the co-ordination of exchanges or project deliverables between partners. [2489-040 (2005) : 74] |
Reporting to the Project Co-ordinator, Professor Carlo Leifert, you will be responsible for managing the collection of WP and subproject-specific technical reports, the preparations and timely submission of consolidated technical reports to the European Commission and the co-ordination of exchanges or project deliverables between partners. [2498-058 (2005) : 70]

Reporting to the Science and Innovation Manager responsible for e-Science, the primary focus of this role is to ensure that investment is targeted most effectively to meet the computing needs of NERC science and it will also make a significant contribution to the development of new computing technologies for the wider science base and industrial/commercial application over the next decade. [2485-033 (2005) : 69]

Reporting to the Senior Editor, you will liaise with international opinion leaders and be involved in the editorial process from content acquisition through to publication, both in print and online formats. [2524-040 (2005) : 65]

Reporting to the Sustainable Development Unit Manager initially, and thereafter to the Environmental Chemistry Unit Manager, you will lead the development and delivery of human health science in supporting environmental assessment, regulation and policy. [2506-002 (2005) : 54]

Reporting to the Technical and Environmental Executives, the ideal candidate will be a new graduate in Food Science or similar subject. [2502-033 (2005) : 65]

Reporting to the Technical Manager you will undertake a project management role and related tasks to invent, develop and characterise performance of herbicide formulation. [2498-025 (2005) : 59]

Representing BBSRC externally, you’ll also advise the scientific community and users of research about the Council and its programmes by running workshops and building relationships with the scientific community. [2528-026 (2005) : 70]

Research will focus on high-resolution reconstructions of changes in surface and deep hydrography deduced through analysis of deep sea sediment cores. [2506-041 (2005) : 70]

Research will involve detailed biomechanical and biomaterials investigation of 3D culture systems, developing new controlling hardware and computer models where necessary. [2489-051 (2005) : 77]

Researching the effect of plant based ingredients on skin health & appearance, you’ll conduct cell & molecular based research to explore the regulation of key processes associated with skin function. [2489-013 (2005) : 64-65]

Responding to a technology leader in this discipline, you will provide a reliable service in support of new product introduction, catalyst applications and process development, utilising a range of spectroscopic techniques available within the department. [2515-015 (2005) : 60]

Responsibilities will include arranging peer review, commissioning, writing, editing and other responsibilities of producing a print and web journal. [2502-009 (2005) : 57]

Responsibilities will include assisting with: MTAs, CDAs, consultancies and revenue sharing, the development of collaborations and sponsored research agreements. [2485-003 (2005) : 58]

Responsibilities will include development, management and delivery of research contracts relating to these issues, as well as providing training in this area. [2506-012 (2005) : 58]

Responsibilities will include ensuring the product is supplied in accordance to customer demand while adhering to company, GMP and safety legislation. [2515-026 (2005) : 65]

Responsibilities will include liaison with monitoring CRO's and clinical investigators. [2515-046 (2005) : 71]

Responsibilities will include management and fieldwork aspects of marine survey work in conjunction with specialist external contractors. [2506-012 (2005) : 58]

Responsible for writing high-quality, medically accurate documents in print or electronic format, for a wide range of medical communication programmes, addressing different target audiences, you will have: [2485-057 (2005) : 77]

Responsible to the Quality Assurance Manager, you will be an integral part of the team, working closely with production staff. [2502-003 (2005) : 55]

Responsible to the School Administrative Manager, and the Dean, you will lead in the management of technical support within the School (there are currently the full-time equivalent of close to 70 technical staff in the School), on local premises issues, and on space planning. [2511-056 (2005) : 72]

</tbody>
</table>
The ability to carry out independent research, and an innovative outlook towards instruments and techniques development, will be counted as strong assets. [2524-021 (2005) : 60]

The ability to critically review technical papers published in relevant scientific journals will be essential. [2481-051 (2005) : 69]

The ability to meet deadlines while maintaining the highest technical standards will be key. [2489-014 (2005) : 66]

The above post will, therefore, be subject to review under Agenda for Change and any amendments back dated to the date of commencement. [2511-008 (2005) : 54]

The age limit for candidates is 55. All candidates aged between 50-55 will be required to undergo a special fitness test when recruited. [2502-027 (2005) : 63]

The applicant, preferably from a software and hardware programming background, will work within a multi-disciplinary team to develop an advanced real time imaging system for 3-dimensional manipulation of single molecules using optical traps (optical tweezers). [2515-029 (2005) : 66]

The appointee to the Chair will be an outstanding scholar. [2498-066 (2005) : 73]

The appointee will be expected to develop an internationally competitive research profile and contribute to the teaching and training of undergraduates and postgraduates in both the disciplines of Chemistry and Environmental Science. [2481-071 (2005) : 75]

The appointee will be required to engage in research. [2498-049 (2005) : 68]

The appointee will be required to engage in research. [2524-063 (2005) : 74]

The appointee will be responsible for organising and assisting with all the in vivo biodistribution studies undertaken by the group. [2506-062 (2005) : 75]

The appointee will undertake a study investigating how malnutrition may affect lymphocyte proliferation and function. [2502-058 (2005) : 74]

The Blood Transfusion Department requires a Biomedical Scientist who will take a leading role in the daily running of the department and be committed to the introduction and implementation of new techniques. [2515-055 (2005) : 74]

The Blood Transfusion Department requires a Biomedical Scientist who will take a leading role in the daily running of the department and be committed to the introduction and implementation of new techniques. [2515-055 (2005) : 74]

The appointee will work closely with the Director of the Institute and the Research Governance Lead. [2515-065 (2005) : 77]

The appointee will contribute to instrument in-flight calibration, preparation and validation of electron moments data, and other activities in support of the CAA. [2493-041 (2005) : 68]

The CD4 Project Manager will be responsible for the effective and efficient management of the Initiative, developing and managing requests for funding proposals and decision-making processes for the granting of awards, preparation of award letters and contractual arrangements, negotiation of IP arrangements in line with the Initiative and close liaison between PIs (Principal Investigators) of each project, the Core Team Director and external experts. [2528-067 (2005) : 87]

The Clinical Project Manager will provide scientific and managerial input into our clinical teams, and liaise with pharmaceutical companies, other research laboratories and hospital departments. [2519-056 (2005) : 71]

The COO will be responsible for effective coordination of teams of software developers, Quality Assurance, and rigorous development scheduling with respect to budgets and timelines. [2498-015 (2005) : 55]

The COO will report directly to the CEO. [2498-015 (2005) : 55]

The Co-ordinator will procure advice to identify new research needs and contribute to project formulation and development to ensure that Agency research addresses policy needs. [2481-007 (2005) : 56]

The CSO will report directly to the CEO and be responsible for strategic and technical planning with particular importance being given to task prioritisation for on-going product roll-out. [2498-015 (2005) : 55]

The expectation is that the successful candidates will become international research leaders in their fields. [2481-070 (2005) : 75]
| Co | The Experimental Analyst **will** be maintaining and developing a family of analytical technologies to support existing film grades and processes, and the development of new products and processes. [2498-027 (2005) : 59] |
| Co | The Fellow **will be expected** to establish research in the area of Bioterrorism, and to contribute to teaching in appropriate areas in the biological sciences. [2485-099 (2005) : 89] |
| Co | The Fellowship **will** specifically build on research at the interface between cellular and in vivo neuroscience. [2481-066 (2005) : 74] |
| Co | The first of these is Flood Risk & Planning, where you’ll work with developers and local authorities to help determine our future approach to water management. [2498-028 (2005) : 60] |
| Co | The first position **will be associated** with the atomic scale characterisation of the coatings in the as-deposited state and after high temperature exposure. [2515-066 (2005) : 77] |
| Co | The first post **will** focus on the 3Rs and the use of animals in the pharmaceutical industry. [2489-028 (2005) : 71] |
| Co | The first two roles **will** require travel to the USA and ongoing liaison and collaborations with colleagues in America. [2498-010 (2005) : 53] |
| Co | The group leader position **will** also involve the role of senior scientist fermentation R&D, consulting and advising other R&D functions. [2498-049 (2005) : 68] |
| Co | The holder of the position **will be expected** to provide leadership in research and contribute to the education mission of the Faculty and its constituent Schools [2498-061 (2005) : 71] |
| Co | The holder **will be expected** to develop procedures within R software environment for release to the scientific community. [2485-054 (2005) : 76] |
| Co | The HSB **will** be responsible for managing all internal research and industry support contracts in Systems Biology, evaluation of scientific opportunities, strategy development and provision of leadership to multidisciplinary teams. [2498-015 (2005) : 55] |
| Co | The ideal candidate **will** also have a good understanding of oligosaccharide structures. [2489-064 (2005) : 79] |
| Co | The ideal candidate **will** be a conceptual thinker, with the ability to successfully deliver multiple R&D projects to challenging deadlines. [2498-027 (2005) : 59] |
| Co | The ideal candidate **will** be innovative, technically excellent and have highly developed communication skills together with knowledge of heterogeneous / homogeneous catalysis. [2498-035 (2005) : 63] |
| Co | The ideal candidate **will** be mobile within the EU, with a good track record for independent scientific writing. [2489-051 (2005) : 77] |
| Co | The ideal candidate **will** have a broad scientific base [2498-021 (2005) : 58] |
| Co | The ideal candidate **will** have a good knowledge of the core concepts of analytical chemistry [2498-027 (2005) : 59] |
| Co | The ideal candidate **will** have a successful track-record of developing desktop applications in a scientific field e.g. geology / geophysics or the oil industry [2485-009 (2005) : 59] |
| Co | The ideal candidate **will** have evidence of effective leadership and has led projects to success. [2519-059 (2005) : 72] |
| Co | The ideal candidates **will** be computer literate, well-organised with a good eye for detail, and be able to work to tight deadlines. [2506-059 (2005) : 74] |
| Co | The ideal candidates **will** be computer literate, well-organised with a good eye for detail, and be able to work to tight deadlines. [2511-003 (2005) : 52] |
| Co | The individual **will** be able to interact with world opinion-formers, [2519-079 (2005) : 78] |
| Co | The individual will be expected to provide informed opinion on multiple aspects of protein science and help formulate technical research priorities, undertake research, apply for government R&D funding and help establish industrial collaborations as biotherapeutics become increasingly important to the pharmaceutical industry. [2498-015 (2005) : 55] |
| Co | The job holder **will be expected** to work closely with R&D project teams to determine the most appropriate method of calibration for new analytes and to develop and implement the systems required to manufacture standards for device testing. [2515-036 (2005) : 68] |
| Co | The jobholder **will also be required** to provide an appropriate level of support for the ISIS User Programme, particularly but not exclusively on the engineering instrument Engin-X, [2524-021 (2005) : 60] |
| Co | The job-holder **will have sole responsibility for one in vitro test** [2493-024 (2005) : 60] |
| Co | The jobholder **will** be required to provide an appropriate level of support for the ISIS User Programme, particularly but not exclusively on the engineering instrument Engin-X, [2524-021 (2005) : 60] |
| Co | The key developmental role **will be** in the assessment of aspergillus antibody testing capabilities. [2528-059 (2005) : 84] |
| Co | The main duties in the first instance **will include** general maintenance of tissue culture stocks and medium, generation and maintenance of cell lines, transient transfection protocol. [2481-074 (2005) : 76] |
| Co | The main functions of these Research Fellowships **will be** to: [2481-054 (2005) : 70] |
| Co | The main thrust of the work **will be to** use the Salford state-of-the-art FIB (focused ion beam miller to manufacture structures, such as electron lenses, at the nanoscale. [2506-042 (2005) : 70] |
| Co | The majority of your work **will be** carrying out legionella risk assessments and the monitoring for legionella control. [2506-034 (2005) : 68] |
| Co | The Manager **will lead** a two-three year Global WWF Initiative focused on reducing the bycatch of fish, cetaceans, marine turtles and other species and in seeking innovative solutions to reducing the ecological impacts of fisheries. [2524-019 (2005) : 59] |
| Co | The Manager **will support** the Director in the establishment and ongoing development of the Institute. [2524-053 (2005) : 71] |
| Co | The Medical Writer **will prepare** reports and other study documents to match the best medical and scientific journals in terms of clarity and standard of presentation. [2519-056 (2005) : 71] |
| Co | The new postholder **will work** to conduct and supervise ongoing research projects in these fields. [2485-092 (2005) : 88] |
| Co | The other major focus **will be** on the development of novel histopathological screening systems in programmes run jointly with the Agency for Cancer Research. [2485-039 (2005) : 71] |
| Co | The output **will be tested** against processes run at pilot-scale at UCL and full-scale data from an industrial partner. [2489-041 (2005) : 74] |
| Co | The person appointed **will be responsible for** assisting the teaching staff with the day-to-day running of four laboratories and for assisting the other science technicians as required. [2485-011 (2005) : 60] |
| Co | The person appointed **will be responsible for** the day-to-day administration of research activities. [2489-035 (2005) : 72] |
| Co | The position **will involve a moderate amount of domestic and international travel** [2515-037 (2005) : 69] |
| Co | The position **will involve** extensive work at category 3 level. [2506-006 (2005) : 56] |
| Co | The position **will involve** the preparation of safety reports to be submitted to regulatory agencies and ethics committees within regulatory timeframes. [2515-046 (2005) : 71] |
| Co | The post holder **will actively be involved in** placing and monitoring the progress of clinical pharmacology studies, reporting their outcome. [2498-021 (2005) : 58] |
| Co | The post holder **will assist in** the development of effective solutions within a range of conservation projects. [2528-040 (2005) : 75] |
| Co | The post holder **will be expected to** maintain and develop these relationships in his or her areas of responsibility. [2528-044 (2005) : 77] |
| Co | The post holder **will be familiar with** Magnetic Resonance Imaging (MRI) hardware and software including imaging sequence design. [2519-061 (2005) : 74] |
| Co | The post holder **will carry out** the calibration and repair of a wide range of test, measurement and diagnostic equipment at one of several Royal Saudi Air Force Calibration Laboratories within Saudi Arabia. [2485-044 (2005) : 73] |
| Co | The post holder **will concentrate on** the fluxes and partitioning of energy and carbon through crops and arable plants, based on arable seedbank dynamics and the growth and interactions of emerged plants [2528-051 (2005) : 81] |
| Co | The post holder will investigate the environmental stimuli for pre-maturity alpha-amylase (PMA) formation in wheat grain and develop a plant breeder's screen for PMA as part of a collaborative LINK project funded by DEFRA, HGCA and the agri-food industry. [2511-058 (2005) : 72] |
| Co | The post holder will perform genotyping and Real Time PCR reactions utilizing various technologies including TaqMan. [2519-061 (2005) : 74] |
| Co | The post holder will provide support to researchers and also have the opportunity to participate in the research. [2489-059 (2005) : 78] |
| Co | The post holder will support a BBSRC funded study on the role of riboflavin in determining cell fate. [2506-039 (2005) : 69] |
| Co | The post holder will support the development of the School's Clinical Research Facility (CRF), by assisting the stimulation, and securing of clinical research projects and trials to be undertaken within the new facility with the public and corporate sectors. [2489-043 (2005) : 75] |
| Co | The post holder will support the work of a research associate by helping to set up and maintain experiments. [2506-039 (2005) : 69] |
| Co | The post holder will undertake research on the derivation, characterisation and use of human cytotrophoblast stem cells to model implantation events in vitro. [2528-065 (2005) : 86] |
| Co | The post holder will work closely with researchers in the School, across key interfaces [2489-043 (2005) : 75] |
| Co | The post holder will need to be flexible to meet the needs of the service and the research projects. [2506-018 (2005) : 61] |
| Co | The post holders will work closely together and in collaboration with colleagues at Rothamsted Research, Scottish Crop Research Institute and Syngenta to explore the interactions between the plant and invertebrate model components and, with the assistance of two technical staff to be appointed in the second year of the project, conduct joint field experiments to test model predictions. [2528-051 (2005) : 81] |
| Co | The post is a full time position and will involve the use of biomedical techniques. [2502-056 (2005) : 73] |
| Co | The post will also be responsible for reviewing regulatory/ pharmacovigilance publications and information sources, to keep updated on current regulations, practices, procedures and proposals. [2515-046 (2005) : 71] |
| Co | The post will be responsible for writing reports and papers from the project and presenting the work at scientific meetings. [2519-014 (2005) : 58] |
| Co | The post will include line managerial and supervisory responsibilities and could be an exciting opportunity for an experienced molecular geneticist. [2519-028 (2005) : 64] |
| Co | The post will involve travel (both domestic and international) in support of our global oil and gas customer base. [2485-079 (2005) : 83] |
| Co | The post will involve: software and hardware support for computing equipment relating to the five groups; [2528-014 (2005) : 64] |
| Co | The Postdoctoral Research Associate/Fellow will investigate molecular control of vascular maturation in tumours, utilizing intravitral imaging of genetically modified tumour lines, relevant to tumour vascular targeting agents under development. [2524-050 (2005) : 69] |
| Co | The postholder will be responsible for the processing of adverse events from our clinical studies. [2515-046 (2005) : 71] |
| Co | The postholder will contribute to the teaching and development of programmes at undergraduate and postgraduate levels in human nutrition and dietetics. [2528-057 (2005) : 84] |
| Co | The postholder will identify novel SNPs in human innate immune genes and design a microarray for rapid screening of these SNPs from human DNA samples. [2502-051 (2005) : 72] |
| Co | The postholder will join a team of researchers lead by Professor Jack Price investigating the mechanisms whereby neural stem cells are able to bring about functional recovery in animal models of neurodegenerative disease. [2502-043 (2005) : 70] |
| Co | The postholder will play a crucial role in recruiting cases and controls, both at St George’s and in other centres throughout the South London region. [2498-052 (2005) : 69] |
| Co | The postholder **will** take a lead role in the development of a new neuroimaging analysis laboratory and in the support and supervision of junior research staff. [2528-008 (2005) : 62] |
| Co | The postholder **will** undertake research, teaching and administration in relation to pharmacology. [2515-069 (2005) : 78] |
| Co | The postholder **will** work closely with the relevant units in St George’s Healthcare NHS Trust and surrounding Primary Care Trusts. [2519-065 (2005) : 75] |
| Co | The postholder **will** work in a team of technicians but **should** have particular skills and knowledge in the area of Microbiology. [2515-072 (2005) : 79] |
| Co | The postholder **will** undertake research, teaching and administration in relation to pharmacology. [2515-069 (2005) : 78] |
| Co | The postholder **will** work closely with the relevant units in St George's Healthcare NHS Trust and surrounding Primary Care Trusts. [2519-065 (2005) : 75] |
| Co | The postholder **will** work closely with the relevant units in St George's Healthcare NHS Trust and surrounding Primary Care Trusts. [2519-065 (2005) : 75] |
| Co | The postholder **will** work in a team of technicians but **should** have particular skills and knowledge in the area of Microbiology. [2515-072 (2005) : 79] |
| Co | The postholder **will** work on the DESURVEY project, funded by the European Commission, to develop systems for monitoring desertification in the Mediterranean region and beyond with Professor Phil Jones, Professor Jean Palutikof and Dr Tom Holt. [2498-056 (2005) : 70] |
| Co | The postholder **will** be mainly responsible for running immunology assays. [2493-043 (2005) : 69] |
| Co | The posts **will** also be responsible for general laboratory organisation. [2528-069 (2005) : 87] |
| Co | The posts **will** be available to work in the laboratories of Professor Jon Cooper for three years in the first instance. [2515-063 (2005) : 76] |
| Co | The primary responsibilities **will** be to finalise study materials, gather information by visiting Infection Control Teams and other clinical staff in hospitals across England and drafting anonymised reports. [2493-021 (2005) : 61] |
| Co | The principal responsibility **will** be to perform expert analysis of microarray data and other high-throughput genomic data, using a wide range of biological and bioinformatic methods and resources. [2519-036 (2005) : 66] |
| Co | The principal role of the postholder **will** be to conduct high-throughput genotyping of SNPs based on separation of primer extension products in a mass spectrometer (Sequenom MassArray). [2502-050 (2005) : 72] |
| Co | The professor **will** have teaching assignments in the BSc Agrotechnology and in the MSc Agricultural and Bioresource Engineering. [2485-095 (2005) : 88] |
| Co | The professor **will** lead the Farm Technology Group of Wageningen University. [2485-095 (2005) : 88] |
| Co | The programme **will** include assessment of food consumption and nutrient intake, physical measurements, physical activity assessment and the collection and analysis of blood and urine samples. [2524-077 (2005) : 78] |
| Co | The project (in collaboration with scientists in Brazil) **will** investigate the process of pathogenesis in host plants infected by the basidio-mycete fungus Crinipellis perniciosa. [2528-079 (2005) : 90] |
| Co | The Project Leader - Structures, **will be involved** in the development of new polypropylene and cellulose film structures. [2498-027 (2005) : 59] |
| Co | The Project Leader - Surface Engineering, **will be involved** in the development of both aqueous and solvent based coatings for polypropylene and cellulose films. [2498-027 (2005) : 59] |
| Co | The Project Manager **will** also manage the Administrative Co-ordinator on a day-to-day basis [2528-067 (2005) : 87] |
| Co | The project manager **will** be responsible for establishing a common clinical and laboratory database linking the four different national genetic collections, [2524-049 (2005) : 69] |
| Co | The project **will** involve analysis of data that describes epidemic effects and data from a genome scan for resistance genes, [2493-058 (2005) : 72] |
| Co | The project **will** involve the analysis of data involving over ¼ million genetic markers. [2498-009 (2005) : 52] |
| Co | The project **will** involve using a variety of techniques [2506-068 (2005) : 77] |
| Co | The projects **will** interface with a larger programme on microbial-mammalian interactions in both Institutions. [2506-064 (2005) : 76] |
| Co | The Public Relations/Fund Raising Officer **will** be responsible to the CE for promotion of the charities and for developing fund-raising activities. [2489-020 (2005) : 68] |
| Co | The Research Assistant **will** undertake an experimental study, and associated numerical modelling of the biaxial stretching of solid polymers, under conditions relevant to industrial processes for the manufacture of polymer packaging. [2498-051 (2005) : 68] |
| Co | The Research Assistant/Associate **will** support *in vivo* research into the therapeutic targeting of tumour vasculature. [2524-050 (2005) : 69] |
| Co | The research facility **will** focus on developing products for the additives market throughout the world. [2506-023 (2005) : 64] |
| Co | The Research roles **will** include synthesis and testing of fuel additives and formulations [2515-053 (2005) : 73] |
| Co | The research **will** aim at improved strategies and levels of performance in object recognition, tracking, visual search, and scene interpretation, in a selection of applied problem areas. [2485-100 (2005) : 90] |
| Co | The researcher **will** undertake a two-year project focusing on molecular aspects of the biology of an apoptosis effect or of importance for the most common eye tumour, uveal melanoma. [2511-052 (2005) : 71] |
| Co | The role holder **will be expected** to: [2524-026 (2005) : 61] |
| Co | The role **will** also involve drafting briefings for Scottish ministers, preparing policy papers and advising members of the public. [2519-047 (2005) : 70] |
| Co | The role **will** be largely technical in its content and therefore a formal electrical engineering qualification with some recent relevant experience **would** be preferred. [2485-040 (2005) : 72] |
| Co | The role **will** include developing our quality systems, overseeing projects and planning of staff and resources deployment. [2481-018 (2005) : 58] |
| Co | The role **will** include identifying funding opportunities and managing the submission of research and ethics proposals. [2481-072 (2005) : 75] |
| Co | The role **will** include: [2498-026 (2005) : 59] |
| Co | The role **will** include: [2498-026 (2005) : 59] |
| Co | The role **will** involve author liaison, recruitment of high-level external medical researchers and editing. [2506-035 (2005) : 68] |
| Co | The role **will** involve close collaboration with systems and DBA as well as direct interaction with laboratory scientists and managers. [2481-005 (2005) : 54] |
| Co | The role **will** involve record editing, database administration and customer liaison. [2519-015 (2005) : 58] |
| Co | The role **will** involve undertaking a wide range of small, rapid-development projects, with the emphasis on delivering fast-track solutions. [2493-031 (2005) : 65] |
| Co | The roles **will be laboratory based** and may involve some travel. [2506-023 (2005) : 64] |
| Co | The School has considerable involvement on Health and Safety issues, and whilst you have the support of a dedicated full-time Safety Advisor, you **will be expected** to play a leading role in this area. [2511-056 (2005) : 72] |
| Co | The Science Communicator **will** direct the communication efforts of IGBP, including internal communications among IGBP projects and project scientists, and outward communications with the wider science community, the education sector, policy makers, the media and the public. [2524-036 (2005) : 64] |
| Co | The second permanent post **will** focus on development of SEPA’s policy for radioactively contaminated land and nuclear emergency planning. [2481-033 (2005) : 63] |
| Co | The Senior Adviser **will be involved** in technical quarantine discussions with appropriate authorities in overseas countries and the audit of programmes in New Zealand for the importation and clearance of nursery stock. [2485-034 (2005) : 70] |
| Co | The Senior Microbiologist role **will** be responsible for managing the microbiology team at the central laboratory and provide expert microbiological, water hygiene and yeast service for the Group. [2515-028 (2005) : 66] |
| Co | The Senior Programmer **will** need to have the ability to plan programming systems across study and project environments. [2511-006 (2005) : 53] |
| Co | The specific duties of the post **will** include assisting the development of a new neuroimaging analysis laboratory within the Department of Psychiatry, supervising junior research colleagues with the application of both region of interest and computational morphometry techniques to structural MRI |
| Co | The study **will** involve cell culture and immunological techniques such as FACS plus measurements using a GCMS stable-isotope approach to monitor proliferation and metabolic activity of cells *in vitro*. [2502-058 (2005) : 74] |
| Co | the substantial contribution you **will** make to our business. [2502-020 (2005) : 61] |
| Co | The successful applicant **will** also **be expected** to contribute to the teaching programme of the Department and Faculty. [2489-045 (2005) : 76] |
| Co | The successful applicant **will** also contribute to ongoing research into the pulmonary delivery of liposomes. [2489-060 (2005) : 79] |
| Co | The successful applicant **will** also need good interpersonal skills and be a good team worker. [2515-008 (2005) : 56] |
| Co | The successful applicant **will** be a self-motivated, creative professional with the ability to work in partnership with all levels of the fishing industry, governments and communities. [2524-019 (2005) : 59] |
| Co | The successful applicant **will** be expected to assist the new Clinical Scientist with the DNA sequencing analysis of Haemophilia A and B genes using an automated DNA sequencer located in the laboratory. [2485-030 (2005) : 68] |
| Co | The successful applicant **will** be expected to contribute to the development of fishery management policy on the basis of the assessments. [2511-036 (2005) : 63] |
| Co | The successful applicant **will** be required to undergo security vetting before taking up the post. [2502-004 (2005) : 55] |
| Co | The successful applicant **will** be expected to use specialized cell culture techniques together with a variety of immunocytochemical and immunoassays to investigate inter-cellular signalling between haemopoietic stem/progenitor cells and their stromal microenvironment including the specific role of macrophages in such responses. [2515-080 (2005) : 81] |
| Co | The successful applicant **will** be required to: [2493-009 (2005) : 58] |
| Co | The successful applicant **will** be responsible for designing and developing a dedicated user interface and control packages to track and control several laser traps via a 10 kHz laser feedback system built around a unique fast readout 2D imaging array sensor. [2515-029 (2005) : 66] |
| Co | The successful applicant **will** be responsible for research into the detection and control of urban insect pests such as cockroaches, ants, flies and pests of stored foodstuffs. [2506-063 (2005) : 75] |
| Co | The successful applicant **will** be responsible for rural and maintenance of MoFlo FACS machine. [2493-034 (2005) : 67] |
| Co | The successful applicant **will** carry out research within Dan Davis's laboratory specialising in imaging molecular immunology. [2528-077 (2005) : 89] |
| Co | The successful applicant **will** coordinate the study of four unique cohorts of affected patients and their families from the UK, Holland, Austria, and The Gambia. [2524-049 (2005) : 69] |
| Co | The successful applicant **will** develop dynamic models of complex biological systems, including metabolic pathways and gene regulation networks. [2498-015 (2005) : 55] |
| Co | The successful applicant **will** develop large scale kinetic models of complex biological systems, including metabolic pathways and gene regulation networks, applying the models to solve practical problems in pharmaceutical research. [2498-015 (2005) : 55] |
| Co | The successful applicant **will** have a strong interest in experimental research [2515-081 (2005) : 82] |
| Co | The successful applicant **will** join a team that is investigating the electrical and structural properties of membrane proteins and receptors, by applying techniques including protein synthesis and mutagenesis, AFM and nanogap electrodes. [2485-097 (2005) : 89] |
| Co | The successful applicant **will** organise the day-to-day running and experimental facilities in the new Centre [2515-081 (2005) : 82] |
| Co | The successful applicant **will** play a key role in establishing research in the Centre's Auditory Function laboratory - becoming an integral part of this lively research community. [2489-059 (2005) : 78] |
| Co | The successful applicant **will** provide day-to-day technical imaging support for a wide range of scientific projects. [2485-027 (2005) : 66] |
| Co | The successful applicant will then be expected to undertake focused sales activity with these new clients, culminating in winning and delivering new R&D projects. [2485-042 (2005) : 72] |
| Co | The successful applicant will undertake their own research project [2485-043 (2005) : 72] |
| Co | The successful applicant will work permanently at Tamworth but may be required to work at Oxford on a regular basis. [2524-024 (2005) : 61] |
| Co | The successful applicant will work to develop of kinetic models and reconstruct biology and possess the ability to work with wide variety of computational & numerical analysis approaches, but especially differential equations, optimisation techniques and dynamic modelling. [2498-015 (2005) : 55] |
| Co | The successful applicant will undertake their own research project [2485-043 (2005) : 72] |
| Co | The successful applicant will work within the QA Development Team [2481-020 (2005) : 59] |
| Co | The successful applicants will be either fully accredited members of The Society for Vascular Technology [2489-027 (2005) : 70] |
| Co | The successful applicants will join an established research group investigating human mucosal immunity and mucosal vaccines, both at the clinical and cellular-molecular levels. [2493-043 (2005) : 69] |
| Co | The successful applicants will work in close proximity to industrial partners during all phases of software development. [2498-015 (2005) : 55] |
| Co | The successful candidate will be a well-organised and literate graduate in the life sciences who enjoys interacting with people. [2519-035 (2005) : 66] |
| Co | The successful candidate will be a well-organised and literate graduate in the life sciences who enjoys interacting with people. [2524-044 (2005) : 65] |
| Co | The successful candidate will be an enthusiastic self-starter and strong team player. [2485-093 (2005) : 88] |
| Co | The successful candidate will be enthusiastic, highly motivated and hold a PhD. [2528-065 (2005) : 86] |
| Co | The successful candidate will be expected to be strongly committed to the production of work of the highest quality with excellent communication and organisational skills. [2502-050 (2005) : 72] |
| Co | The successful candidate will be expected to deputise for the Head of Haematological Cytogenetics section and to aid in the development of the new service. [2519-028 (2005) : 64] |
| Co | The successful candidate will be expected to establish an independent, externally funded research program, and to develop and teach innovative courses in chemistry at the undergraduate and graduate levels. [2519-068 (2005) : 76] |
| Co | The successful candidate will be expected to establish national and international collaborations, and manage research projects and teams. [2515-042 (2005) : 70] |
| Co | The successful candidate will be expected to initiate and conduct a research programme in the area and form collaborative links with researchers at the newly established Conway Institute for Biomolecular & Biomedical Research at UCD. [2489-045 (2005) : 76] |
| Co | The successful candidate will be expected to initiate and conduct a research programme in the area of food toxicology and form collaborative links with national and international research teams. [2528-006 (2005) : 61] |
| Co | The successful candidate will be experienced in downstream process and/or fermentation development for the isolation of novel polyketide compounds from micro-organisms. [2481-038 (2005) : 65] |
| Co | The successful candidate will be highly organised and methodical [2481-052 (2005) : 69] |
| Co | The successful candidate will be involved in the identification and evaluation of enzyme inhibitors [2498-059 (2005) : 71] |
| Co | The successful candidate will be involved in the introduction of new technologies into the laboratory. [2519-028 (2005) : 64] |
| Co | The successful candidate will be pivotal in ensuring regulatory compliance for our cosmetic and toiletry products. [2493-007 (2005) : 56] |
| Co | The successful candidate will be required to assist in the routine analysis of raw materials and finished goods. [2524-003 (2005) : 52] |
| Co | The successful candidate will be required to assist in the running of the Company's instrumental/chromatography laboratory and routine analysis of samples. [2524-003 (2005) : 52] |
The successful candidate **will** be responsible for testing and characterisation of new imaging sensors to both X-ray and optical stimulation. [2506-052 (2005) : 73]

The successful candidate **will** be responsible for the achievement of the Centre's strategic objectives by the effective management of its resources and operations. [2528-009 (2005) : 63]

The successful candidate **will** be well organised and a literate biomedical graduate who enjoys working with scientific data. [2519-015 (2005) : 58]

The successful candidate **will** contribute to a project aimed at developing stem cells for therapeutic use in eye disease. [2502-044 (2005) : 70]

The successful candidate **will** direct research programmes primarily within the National Centre for Sensor Research (http://www.ncsr.ie) at DCU. [2498-061 (2005) : 71]

The successful candidate **will** form part of a team at Brunel investigating the uses of new detector technology for a range of applications. [2506-052 (2005) : 73]

The successful candidate **will** have a good knowledge of chemistry and crystallography [2485-083 (2005) : 85]

The successful candidate **will** have a proven track record in neutron or x-ray methods, preferably, but not limited to, Engineering and/or Materials Science. [2524-021 (2005) : 60]

The successful candidate **will** have a strong track record of achievement in genetics of host plant resistance and resistance mechanisms, and proven abilities in project management. [2515-042 (2005) : 70]

The successful candidate **will** have demonstrable skills in the following areas: [2528-009 (2005) : 63]

The successful candidate **will** have good collaborative skills, a track record for independent scientific writing. [2489-051 (2005) : 77]

The successful candidate **will** join a team responsible for all aspects of PEACE operations, from routine commanding through data handling activities and in-flight instrument calibration, to providing accurate electron moments data (density, velocity, temperature). [2493-041 (2005) : 68]

The successful candidate **will** join an active research program centred on the development of new instrumentation for a range of analytical challenges. [2519-064 (2005) : 74]

The successful candidate **will** lead the development and implementation of the radionuclide therapy, Imaging and non-imaging programmes for Nuclear Medicine. [2481-034 (2005) : 64]

The successful candidate **will** play a key role in a programme of research directed to providing solutions to disease problems in the UK horticultural industry. [2485-042 (2005) : 72]

The successful candidate **will** play a key role in developing the PET radiochemistry facilities as part of a major initiative to develop molecular imaging within the School of Medicine. [2515-064 (2005) : 77]

The successful candidate **will** play a key role in developing the PET radiochemistry facilities as part of a major initiative to develop molecular imaging within the School of Medicine. [2515-079 (2005) : 81]

The successful candidate **will** principally be required to identify benthic samples collected from coastal and offshore sites around the UK and further afield and contribute to survey work and development of new business opportunities. [2481-010 (2005) : 56]

The successful candidate **will** provide the technical support necessary to maintain various research activities and acquire a wide range of skills in protein biochemistry and electron microscopy. [2489-043 (2005) : 75]

The successful candidate **will** take responsibility for applied ecological and agronomy elements and help to run an interdisciplinary research programme on organic farming systems. [2506-047 (2005) : 71]

The successful candidate **will** work on the development of a low-cost wind tunnel as the basis of a "hardware-in-the-loop" demonstrator for unmanned air vehicles. [2502-038 (2005) : 68]

The successful candidate **will** work with Professor P Anand at Imperial College London, Hammersmith Hospital campus, to investigate novel molecular and physiological pain mechanisms. [2506-068 (2005) : 77]

The successful candidate **will** work within the Institute's Bioinformatics group. [2493-009 (2005) : 58]
| Co | The successful candidate will, together with other members of the editorial team, identify research articles suitable for Genome Biology’s scope and interest level and make decisions on publication on the basis of referees’ advice. [2511-039 (2005) : 65] |
| Co | The successful candidate, reporting to the Quality Assurance Manager will be responsible for the maintenance of the quality standards and the investigation of technical production issues and customer complaints. [2524-003 (2005) : 52] |
| Co | The successful candidates for both posts will be registered with Health Professions Council as a Clinical Scientist in cytogenetics, and have MRCPath Part 1. [2519-028 (2005) : 64] |
| Co | The successful candidates will be competent with automated clinical pathology analysers [2485-056 (2005) : 77] |
| Co | The successful candidates will be enthusiastic, flexible and fully conversant with modern histological techniques. [2481-001 (2005) : 52] |
| Co | The successful candidates will be expected to manage projects, develop research proposals and deliver technology transfer. [2485-042 (2005) : 72] |
| Co | The successful candidates will be responsible for setting technical strategy and leading a team of research scientists to deliver the required business goals. [2498-035 (2005) : 63] |
| Co | The successful candidates will be competent with automated clinical pathology analysers [2485-056 (2005) : 77] |
| Co | The successful candidates will be well organised and literate biomedical graduates who enjoy interacting with people. [2506-035 (2005) : 68] |
| Co | The successful candidates will complement an existing research team of 19 staff, including a number of recently recruited evolutionary ecologists. [2493-052 (2005) : 71] |
| Co | The successful candidates will have strong communication and administrative capabilities. [2524-058 (2005) : 73] |
| Co | The successful candidates will work in multi-disciplinary teams, to offer support to a variety of projects. [2485-062 (2005) : 78] |
| Co | The successful candidates will work with a small group of developers to create the next generation of market-leading and internationally respected software products. [2528-020 (2005) : 67] |
| Co | The two post holders will be responsible for the routine HPLC analysis of amino acid levels in spent embryo culture medium as part of a clinical trial of this new analytical method for selecting embryos in IVF clinics. [2506-018 (2005) : 61] |
| Co | The successful students will have the opportunity to liaise with industry and other academic research institutions through the energy network the Integration of New and Renewable Energies info Buildings (INREB), in which the School is a pro-active member. [2502-013 (2005) : 59] |
| Co | The successful students will have the opportunity to liaise with industry and other academic research institutions through the energy network the Integration of New and Renewable Energies info Buildings (INREB), in which the School is a pro-active member. [2502-013 (2005) : 59] |
| Co | The work will encompass early phase work at the laboratory and pilot plant scale through to full-scale technology transfers and worldwide Affiliate support. [2502-013 (2005) : 59] |
| Co | The two post holders will be responsible for the routine HPLC analysis of amino acid levels in spent embryo culture medium as part of a clinical trial of this new analytical method for selecting embryos in IVF clinics. [2506-018 (2005) : 61] |
| Co | The use of fault-finding techniques and diagnostic checks will be required to determine faults and minimise down-time. [2485-082 (2005) : 84] |
| Co | The work will encompass early phase work at the laboratory and pilot plant scale through to full-scale technology transfers and worldwide Affiliate support. [2502-013 (2005) : 59] |
| Co | The successful students will have the opportunity to liaise with industry and other academic research institutions through the energy network the Integration of New and Renewable Energies info Buildings (INREB), in which the School is a pro-active member. [2502-013 (2005) : 59] |
| Co | The work will focus mainly on support in preclinical and clinical pharmacokinetic and pharmacodynamic areas. [2506-048 (2005) : 72] |
| Co | The work will include assessment of the diet and nutritional status of the volunteers, laboratory analysis of colorectal mucosal biomarkers, liaison with collaborators and day-to-day management of the project. [2485-103 (2005) : 90] |
| Co | The work **will** include critical reviews and re-analyses of existing databases and contribution to the design of exposure assessment aspects in planned epidemiological studies. [2528-064 (2005) : 86] |
| Co | The work **will** include investigations of the biology and epidemiology of causal organisms and the development of integrated management strategies, including studies on efficacy of fungicide treatments and alternatives to conventional fungicides. [2485-042 (2005) : 72] |
| Co | The work **will** involve a range of molecular, genetic and imaging techniques to analyse the mechanisms underlying axon guidance and neuron-glial interactions. [2519-052 (2005) : 70] |
| Co | The work **will** involve detailed analysis of different forms of safety information, including clinical studies and post-marketing surveillance, liaison with experts across the company and the preparation of suitable documentation for internal and regulatory purposes. [2528-045 (2005) : 77] |
| Co | The work **will** involve identifying the factors influencing the level of active ingredients or other quality parameters in crops, for non-food applications including medicinal and personal care products. [2485-042 (2005) : 72] |
| Co | The work **will** involve liaising closely with researchers and Agency staff to ensure the smooth running of research projects, as well as critically reviewing projects and project proposals. [2481-007 (2005) : 56] |
| Co | The work **will** involve molecular and cell biological techniques. [2511-067 (2005) : 74] |
| Co | The work **will** involve the study of the use of combinations of two fungi, Coniothyrium mimitans and Trichoderma sp., for the control of Sclerotinia sclerotiorum in lettuce in glasshouse trials. [2485-091 (2005) : 87] |
| Co | There is no specific requirement regarding field of research but you **will** be expected to make a contribution to the teaching activities of the Department across a wide range of materials topics. [2489-048 (2005) : 76] |
| Co | There is no specific requirement regarding field of research but you **will** be expected to make a contribution to the teaching activities of the Department across a wide range of materials topics. [2489-063 (2005) : 79] |
| Co | There **will** also be a need to liaise with external contractors across Europe and the US. [2481-025 (2005) : 60] |
| Co | These are globally focused, highly challenging roles, where you **will** take responsibility for your own project within a supportive, close-knit team. [2498-047 (2005) : 67] |
| Co | These **will** include characterising signalling pathways, identifying signalling proteins as targets, subjecting them to molecular and functional analysis and profiling new chemical entities. [2506-030 (2005) : 67] |
| Co | They also involve working unsociable hours and **will** require a degree of flexibility. [2515-026 (2005) : 65] |
| Co | They **should** also have a clear vision of the future direction of their research, sources of future funding, and how the research **will** fit within the context of ongoing research at LSHTM. [2481-070 (2005) : 75] |
| Co | They **will** already have demonstrated outstanding promise in their chosen field. [2511-053 (2005) : 71] |
| Co | They **will** also be expected to contribute to teaching within the School largely through the Food Science programme. [2528-006 (2005) : 61] |
| Co | They **will** also be responsible for the maintenance of records, HPLC and related equipment and the analytical laboratory to quasi-GLP standards. [2506-018 (2005) : 61] |
| Co | They **will** be active participants and organisers of the educational activities of the department. [2519-028 (2005) : 64] |
| Co | They **will** be an enthusiastic well-motivated scientists with excellent communication skills who want to be part of our thriving team who provide essential support to our medical colleagues in their treatment of patients. [2502-022 (2005) : 62] |
| Co | They **will** be familiar with sequence searching algorithms and the retrieval and interpretation of data from ENSEMBL and other genome resources, including Gene Ontology terminology. |
| Co | They **will** be responsible for planning projects, and managing activities, timelines and costs to a successful conclusion. [2506-019 (2005) : 61] |
| Co | They **will** have strong communication skills [2519-027 (2005) : 63] |
| Co | They will perform a range of administrative tasks [2489-027 (2005) : 70] |
| Co | This challenging work will involve the operation of specialised equipment at both laboratory and pilot plant scale. [2519-020 (2005) : 61] |
| Co | This could be at any time, so you’ll join an emergency 24-hour call-out roster. [2485-038 (2005) : 71] |
| Co | This group works closely with several other departments within the company and you will need to liaise often with the logistics teams of our customers. [2498-011 (2005) : 54] |
| Co | This is a hands-on role and your main tasks will be to plan, implement and document technical service work and to present your recommendations to the sales team and to customers. [2506-023 (2005) : 64] |
| Co | This is a senior role in which you’ll manage distributors in markets we serve directly and those we serve indirectly via distributors. [2506-026 (2005) : 65] |
| Co | This person will provide technical support to the QC Analytical function for the introduction of novel or updated assays used in process of final product testing. [2502-034 (2005) : 66] |
| Co | This person will undertake research on one of the above projects with support from the research technician and serve as overall Project Manager responsible for the other two research projects. [2519-044 (2005) : 69] |
| Co | This position requires previous experience of biomolecular modelling and the holder will be expected to co-ordinate the activities of the Interfacial Properties group. [2485-083 (2005) : 85] |
| Co | This post will be subject to criminal records bureau checks at enhanced level. [2481-002 (2005) : 52] |
| Co | This post will involve leading a demanding portfolio of work, directing the work of others, designing research methodology, presenting outcomes and developing proposals for new work. [2481-015 (2005) : 58] |
| Co | This post will involve providing advice to clients and colleagues on European regulatory requirements for biocides, project management (ensuring that projects are completed to time, budget and regulatory/client requirements) and working with senior scientists in study summarisation and the preparation of environmental and human health risk assessments. [2515-048 (2005) : 72] |
| Co | This post will support work in the Food Structure group to develop research and teaching underpinning the creation of food structure and its characterisation using physical and chemical methods. [2528-076 (2005) : 89] |
| Co | This role will focus on: [2493-011 (2005) : 58] |
| Co | This role will involve some UK and European travel. [2524-022 (2005) : 60] |
| Co | This will also include the operation, maintenance and calibration of complex and sophisticated analytical equipment, eg. HPLC, GC, AA etc. [2498-044 (2005) : 66] |
| Co | This will be complemented by an ability to interpret and translate scientific evidence into practical dietary and lifestyle advice. [2489-012 (2005) : 63] |
| Co | This will call for a high level of competency in non-clinical formulation development and a working knowledge of HPLC, [2511-035 (2005) : 63] |
| Co | This will entail managing all aspects of outsourced non-clinical studies including placement, monitoring and report review. [2502-020 (2005) : 61] |
| Co | This will involve travel around the region. [2506-023 (2005) : 64] |
| Co | This will involve: [2515-022 (2005) : 63] |
| Co | though will work closely with the Museum and Kew. [2515-075 (2005) : 80] |
| Co | Through contact with relevant user groups, you will facilitate collaboration, develop opportunities for co-funding and partnership and promote knowledge transfer for the exploitation of the Programme results. [2481-065 (2005) : 73] |
| Co | Through your field experience in practical conservation and biodiversity, along with your sound understanding of the natural environment, you’ll develop strategies and plans to promote biodiversity. [2515-005 (2005) : 55] |
| Co | To apply for this newly created position you will be able to take a lead role in optimising cGMP systems that include, but are not limited to, change control, incident investigations, corrective actions, recall, complaints in alignment with MHRA, FDA and other applicable international regulations and guidelines while fostering consistency of quality systems within the Ipsen Group. [2502-034 (2005) : 66] |
| Co | To be considered for all positions you **will** need to be a self-motivated person with the ability to identify the key issues within a complex environment and provide clear solutions to them. [2502-034 (2005) : 66] |
| Co | To be eligible for engagement, applicants **will** require a medical and security assessment. [2519-017 (2005) : 60] |
| Co | To be successful you **will** need to be a hard working and enthusiastic individual, with a commitment to continuing professional development. [2502-003 (2005) : 55] |
| Co | To help us prevent environmental pollution you **will** technically assess waste applications, develop licence conditions and produce concise reports to support your decisions. [2519-017 (2005) : 60] |
| Co | Training and operation of routine microscopy services **will** also fall within your remit along with the development of collaborative projects with the line manager. [2485-027 (2005) : 66] |
| Co | Travel between Aberdeen and Liverpool **will** be required. [2485-010 (2005) : 60] |
| Co | Ultimately you **will** be helping patients and prescribers by helping to define the safety profile of Gilead products. [2528-045 (2005) : 77] |
| Co | Undertaking a variety of laboratory procedures, you **will** ensure our compliance with current GMP and Health & Safety policies at all times. [2485-028 (2005) : 66] |
| Co | Undertaking extensive national travel, you**’ll** spend much of your time engaged in the field - deploying/maintaining trial and prototype systems. [2502-002 (2005) : 54] |
| Co | Undertaking water supply projects aimed at improving quality standards, you **will** generate, analyse and interpret data and prepare technical reports. [2528-021 (2005) : 68] |
| Co | Using your hands-on experience of Separation Science and automation, you ’ll be expected to purify compounds on microgram to multigram scales, to agreed deadlines. [2481-061 (2005) : 72] |
| Co | We also need a Field Officer, who **will** be responsible for contact with peatland owners and managers, developing best practice in conservation and management, organising training events and helping to deliver and monitor new restoration projects. [2524-027 (2005) : 62] |
| Co | We are looking for an energetic, highly-motivated person who **will** be responsible for launching a new European journal for high school science teachers. [2481-017 (2005) : 58] |
| Co | We are looking to recruit a Senior Programme Manager, who **will** project manage a number of different trials for the Africa Group in addition to representing the group to internal and external stakeholders such as Pharmaceutical Companies and other academic institutions. [2524-011 (2005) : 56] |
| Co | **We’**ll also be looking for you to be proactive in making continuous improvements to the laboratory's processes and functions, within agreed frameworks. [2502-035 (2005) : 67] |
| Co | where you **will** need a sound knowledge of good laboratory practise, quality control, quality assurance and method development and evaluation. [2485-056 (2005) : 77] |
| Co | where you **will** work with computational and other medicinal chemists to design and synthesise novel, biologically targeted compounds as part of dynamic discovery and optimisation programmes. [2502-015 (2005) : 60] |
| Co | Whether providing complete assessment reports for Outgoing Mutual Recognition Procedures or updating existing reports in the light of new information, you **will** work within tight timeframes, liaising with the European Licensing Support Unit and supporting the professional assessors as necessary. [2502-014 (2005) : 59] |
| Co | Whether working on your own or with others, you **will** need to be self-motivated and enjoy working long hours in the field as and when weather permits. [2528-022 (2005) : 68] |
| Co | Whether you have a degree and four years' relevant product development experience or a PhD plus two years’ industrial experience, you **will** certainly have expertise in formulation design and manufacturing process development of either oral or parenteral dosage forms [2515-018 (2005) : 61] |
| Co | which **will** have been at supervisory level. [2485-031 (2005) : 68] |
| Co | which **will** require liaising closely with our R&D and production facilities. [2515-049 (2005) : 72] |
| Co | Whichever role you join us in you’ ll bring excellent organisation and team skills, and a strong customer focus too. [2515-028 (2005) : 66] |
| Co | While providing advice to colleagues throughout southern Scotland on activities and developments affecting the marine environment, you’ ll also coordinate the maritime input to the Scottish Biodiversity Strategy and UK Biodiversity Action Plan. [2524-034 (2005) : 63] |
Co whilst the other will develop and apply genomic approaches for gut microflora diversity studies (Reading). [2506-064 (2005) : 76]

Co who will then compete at interview, with Sainsbury Undergraduate students, for one of up to four Sainsbury PhD Studentships. [2481-076 (2005) : 77]

Co who will undertake research into: [2511-065 (2005) : 73]

Co who will undertake world-class research and provide research leadership, working closely with the Lecturers. [2498-066 (2005) : 73]

Co will be a clear communicator both in writing and in person, and keen to work as part of a team. [2511-039 (2005) : 65]

Co will be a confident, strategic thinker with excellent analytical skills, and proven communication skills. [2481-008 (2005) : 56]

Co will enjoy research, and demonstrate commitment and enthusiasm. [2502-023 (2005) : 57]

Co will have a track record of successful leadership, [2519-079 (2005) : 78]

Co will have an ability to raise further substantial funds, [2519-079 (2005) : 78]

Co will have an ability to raise further substantial funds, [2511-039 (2005) : 65]

Co will have an ability to produce concise scientific reports and manuals. [2493-008 (2005) : 57]

Co will have advanced ability with statistical or modelling software. [2515-047 (2005) : 72]

Co will have an understanding of diabetes and its treatment, you will need well-honed analytical skills to clearly interpret and report your findings. [2524-071 (2005) : 77]

Co With a proactive approach to work, you will also have advanced ability with statistical or modelling software. [2515-047 (2005) : 72]

Co With a relevant degree and, preferably, post-graduate experience, you’ll have a good analytical mind together with excellent communication, planning and IT skills. [2528-026 (2005) : 70]

Co With a broad competence in a range of technical disciplines, including monitoring techniques, computing and electronics, you’ll be able to produce concise scientific reports and manuals. [2502-002 (2005) : 54]

Co With a desire to productively apply in silico techniques in a dynamic industry setting, you will be responsible for optimising the use of structural information and managing the computational input into the drug discovery project teams. [2493-008 (2005) : 57]

Co With a proactive approach to work, you will also have advanced ability with statistical or modelling software. [2515-047 (2005) : 72]

Co With advice from a steering committee comprised of senior representatives from the NERC community and industry, you will provide the strategic leadership and co-ordination of the programme. [2485-033 (2005) : 69]

Co With ambitions targets to develop this new event internationally, you will source new exhibitors and sponsors tram around the world by quickly developing an understanding of the market and the events industry. [2493-016 (2005) : 59]

Co With an understanding of the role of GM safety and support the provision of the training. [2524-071 (2005) : 77]

Co With responsibility for the management of embryology and andrology services in this state of the art facility, you will have a proven track record in facilitating education and training for trainees and be a HFEA licensed ICSI practitioner. [2511-008 (2005) : 54]

Co With sound computer skills you will be able to summarise technical information in a clear, concise written style. [2485-073 (2005) : 82]

Co With the ability to influence and negotiate with Government, you’ll shape strategy and policy for the use of instruments across various industry-sectors, in particular energy. [2485-026 (2005) : 66]

Co With the benefit of BPL's established track record, you will play an important role in the development cycle for new biopharmaceutical products. [2506-009 (2005) : 57]

Co With the introduction of schemes for greenhouse gases, biodegradable waste, water abstraction and acid gases, you will be strengthening our reputation as Europe's leading environmental innovator. [2485-026 (2005) : 66]

Co with whom any subsequent contract will be placed. [2481-065 (2005) : 73]

Co With your systematic approach to problem solving, you will be able to identify key issues and make reasoned assessments at all times. [2485-049 (2005) : 74]
<p>| Co | Within this role you <strong>will</strong>: [2481-033 (2005) : 63]. |
| Co | Working as a Formulation Technologist you <strong>will</strong> use knowledge of formulation together with enthusiasm for factory operations, to implement and support commercial manufacture of new products to satisfy customer requirements. [2511-012 (2005) : 55] |
| Co | Working as a member of a busy team, you’ll prepare detailed scientific business proposals, provide a program management service and host client visits. [2515-056 (2005) : 74] |
| Co | Working as a Packaging Technologist you <strong>will</strong> use knowledge of factory operations to guide the development team on LEAN product design and factory capability. [2511-012 (2005) : 55] |
| Co | Working as a Risk Assessment Modeller you <strong>will</strong> provide technical support to HSE in the use of computerised models for describing the consequences and risks from a major hazard chemical plant. [2515-022 (2005) : 63] |
| Co | Working as a Risk Assessment Programmer/Modeller you <strong>will</strong> provide technical support to HSE in the use of computerised models for describing the consequences and risks from major hazard chemical plant. [2498-016 (2005) : 56] |
| Co | Working as a Scientific Officer within the Land Quality Assessment Team you <strong>will</strong> act as a team member/leader in undertaking assessment and investigation of contaminated RAF sites. [2485-060 (2005) : 78] |
| Co | Working as part of a laboratory based team you <strong>will</strong> specialise in carrying out varied and challenging studies to measure the trace levels of our products and their metabolites in soil and water. [2481-012 (2005) : 57] |
| Co | Working as part of a strong, focused team, you <strong>will be involved</strong> at the start of new projects, providing the teams with experimental design, trend analysis, data analysis and reporting. [2485-002 (2005) : 56-57] |
| Co | Working as part of a team to carry out platelet function measurements during human trials, you <strong>will</strong> also work independently researching the modulation of platelet function by natural plant extracts. [2485-010 (2005) : 60] |
| Co | Working as part of SEPA’s Groundwater Task Team, you <strong>will</strong> prepare the hydrogeology service for the implementation of the Water Framework Directive, liaising with relevant internal and external parties as required. [2481-058 (2005) : 71] |
| Co | Working closely with colleagues in technical operations at CPI and the COEBIO3, the person appointed <strong>will</strong> also lead business development for commercial efficiency and market growth. [2528-039 (2005) : 75] |
| Co | Working closely with internal and external stakeholders, your role <strong>will</strong> be to provide input into the proposals for the development of the water resource at a stage where we can have a positive influence on the way it is approached - keeping the good of the environment at the forefront of your mind. [2502-002 (2005) : 54] |
| Co | Working closely with the Chairman of Department you <strong>will</strong> have excellent written skills and the ability to draft complex documentation from a minimal brief. [2481-072 (2005) : 75] |
| Co | Working closely with the Editorial Director, the Senior Editor <strong>will be involved</strong> in the commissioning process, content evaluation and presentation, and new product development. [2506-032 (2005) : 68] |
| Co | Working closely with the Editorial Director, the Senior Editor <strong>will be involved</strong> in the commissioning process, content evaluation and presentation, and new product development. [2506-057 (2005) : 74] |
| Co | working closely with the Laboratory staff and the Facility’s LIMS developer, the post-holder <strong>will</strong> be responsible for implementing high-quality annotation against these clones. [2481-052 (2005) : 69] |
| Co | Working closely with the research project leaders, you <strong>will</strong> formulate bioactive extracts to maximise biological efficacy. [2485-010 (2005) : 60] |
| Co | Working in a community of approximately 20 remote sensing scientists, modellers, bio-optical oceanographers and computer programmers, you <strong>will</strong> have access to extensive high performance computer processing, storage and communications resources. [2511-027 (2005) : 61] |
| Co | Working in a multi-disciplinary team, you <strong>will be involved</strong> in formulation and processing studies in support of the development and improvement of new and existing pharmaceutical products. [2502-013 (2005) : 59] |</p>
<table>
<thead>
<tr>
<th>Co</th>
<th>Working in a unique information-based environment, your key tasks <strong>will</strong> include abstracting and indexing scientific and technical reports and conducting literature searches of both 'defence controlled' and 'open literature' sources across a wide range of subject areas. [2511-042 (2005) : 66]</th>
</tr>
</thead>
<tbody>
<tr>
<td>Co</td>
<td>Working in our Cell Based Therapies team, you <strong>will</strong> contribute innovative ideas and practical skills in cell biology and biochemistry to research aimed at regenerating orthopaedic tissues. [2506-022 (2005) : 63]</td>
</tr>
<tr>
<td>Co</td>
<td>Working in our Materials and Environmental Laboratory, you <strong>will</strong> be a key part of a small team in providing a comprehensive analytical support facility to both company operations and external customers. [2528-027 (2005) : 70]</td>
</tr>
<tr>
<td>Co</td>
<td>Working in our Monitoring Techniques Team Science Group, you’ll work with the Senior Environmental Projects Scientist to develop innovative monitoring/surveillance systems, including remote monitoring technology, and demonstrate their practical potential. [2502-002 (2005) : 54]</td>
</tr>
<tr>
<td>Co</td>
<td>Working in the Herbarium with the Geographic Information Systems (GIS) Unit, you <strong>will</strong> assist with attaining and recording habitat conservation assessments, and help to meet the present demand for short-term projects in different parts of the world by providing remote sensing and vegetation mapping. [2511-002 (2005) : 52]</td>
</tr>
<tr>
<td>Co</td>
<td>Working in two laboratories, South Manchester University Hospital Trust (in the academic respiratory medicine department) and the Centre for Molecular Medicine (on the main University of Manchester campus), you <strong>will be expected</strong> to drive the research programme forward within a large, well-funded and collaborative research group. [2489-042 (2005) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>Working together with the Fertility Services Manager and the Medical Director, the Senior Clinical Embryologist <strong>will</strong> take an active role in maintaining and improving standards of service. [2511-008 (2005) : 54]</td>
</tr>
<tr>
<td>Co</td>
<td>Working together with the MIB technical staff, you <strong>will</strong> be responsible for the management and development of existing systems and for a pro-active programme to develop new types of experimental facilities [2502-047 (2005) : 71]</td>
</tr>
<tr>
<td>Co</td>
<td>Working under your own initiative and as part of a team, you <strong>will</strong> have the ability to communicate confidently and diplomatically. [2506-005 (2005) : 55]</td>
</tr>
<tr>
<td>Co</td>
<td>Working with a dedicated team of in vitro and/or LC/MS specialists you <strong>will</strong> oversee the day to day execution of the laboratory phase of studies to determine the disposition and metabolic fate of NCE's and biotechnology products as part of the drug development process. [2493-029 (2005) : 64]</td>
</tr>
<tr>
<td>Co</td>
<td>Working with a lab team, you’ll build an enzyme science base here to help us identify natural ingredients that can deliver amazing benefits for our consumers. [2498-041 (2005) : 65]</td>
</tr>
<tr>
<td>Co</td>
<td>Working with a multidisciplinary research team, you <strong>will</strong> perform a variety of molecular biology techniques and provide technical support and assistance investigating the genetic and environmental factors involved in modulating thrombosis risk in patients with diabetes mellitus. [2493-055 (2005) : 71]</td>
</tr>
<tr>
<td>Co</td>
<td>Working with our Clinical Trial Management System, you <strong>will</strong> ensure that for each phase 1-IV trial conducted on a global basis, a robust project plan is managed and maintained. [2502-008 (2005) : 57]</td>
</tr>
<tr>
<td>Co</td>
<td>Working within a challenging environment you <strong>will</strong> need to be open to change and innovation. [2511-056 (2005) : 72]</td>
</tr>
<tr>
<td>Co</td>
<td>Working within a scientific development team, your role <strong>will</strong> be to contribute to the formulation development of R&amp;D programmes — liaising with marketing and regulatory functions in affiliates worldwide, as well as industrial and academic partners. [2498-020 (2005) : 57]</td>
</tr>
<tr>
<td>Co</td>
<td>Working within a small team in central London, the post holder <strong>will</strong> gather information on specific issues, produce reports, make recommendations, and provide administrative support for Academy study groups. [2515-016 (2005) : 60]</td>
</tr>
<tr>
<td>Co</td>
<td>Working within the European Wildlife Division, you <strong>will</strong> lead on the development of local and regional implementation of England Biodiversity Strategy, supporting the work of local and regional workstreams, Regional Biodiversity Chairs Group and related working groups. [2485-049 (2005) : 74]</td>
</tr>
</tbody>
</table>
Co Working within the Regulatory Water Resources team in Frimley, you will be responsible for the determination of water resources permits and authorisations throughout the South East Area of the Thames Region. [2515-005 (2005) : 55]

Co You are likely to have a research track record in condensed matter physics or materials science and will be wanting to continue to develop a personal research programme involving the muon method. [2515-029 (2005) : 66]

Co You must have enthusiasm and aptitude, and you will be expected to enrol for the Certificate in Clinical Embryology [2528-058 (2005) : 84]

Co You should have a degree or further qualifications in an appropriate scientific discipline and will have postgraduate experience in biological NMR. [2502-024 (2005) : 62]

Co You will act as a recognised scientific expert in the field of human health and the environment, providing support to staff throughout SEPA and representing SEPA in an official capacity externally. [2506-002 (2005) : 54]

Co You will act as the non-clinical specialist on project teams for development candidates from our existing portfolio of novel chemical and biological entities - your work may also involve defending mature products. [2502-020 (2005) : 61]

Co You will actively promote change and manage uncertainty whilst ensuring productive discussions at meetings. [2485-049 (2005) : 74]

Co You will also assist in maintaining and troubleshooting instruments, as well as developing new analytical techniques and reporting on environmental data. [2524-033 (2005) : 63]

Co You will also assist in the processing and analysis of the raw experimental data. [2524-045 (2005) : 66-67]

Co You will also assist the Team Leader in translation of customer requirements into detailed programmes of work, including placement of external research contracts and international research collaboration arrangements. [2524-045 (2005) : 66-67]

Co You will also be a team player with excellent communication skills at all levels. [2519-040 (2005) : 68]

Co You will also be a team player with excellent verbal and written communication skills at all levels. [2519-040 (2005) : 68]

Co You will also be able to demonstrate a keen interest in immunology. [2515-059 (2005) : 75]

Co You will also be able to demonstrate good policy development skills, and understand the wider issues surrounding the management of environmental risk. [2481-055 (2005) : 70]

Co You will also be expected to contribute to basic laboratory duties and work flexibly as part of a team. [2502-057 (2005) : 73]

Co You will also be expected to develop, implement and evaluate novel methods of data acquisition and quantitative analysis. [2524-066 (2005) : 75]

Co You will also be expected to manage your own projects, from product conception to scale up, whilst working closely with sales and marketing, customers and production. [2524-041 (2005) : 65]

Co You will also be expected to support the work and preparation of scientific publications and/or technology transfer/training activities under either the crop agronomy (WP2.1 and 3.3.2) or the dairy research programme (WPs2.2.1 and 2.2.2) contracted to the University of Newcastle upon Tyne under the Integrated Project. [2489-040 (2005) : 74]

Co You will also be expected to support the work and preparation of scientific publications and/or technology transfer/training activities under either the crop agronomy (WP2.1 and 3.3.2) or the dairy research programme (WP52.2.1 and 2.2.2) contracted to the University of Newcastle upon Tyne under the Integrated Project. [2498-058 (2005) : 70]

Co You will also be expected to take the lead on complex issues. [2485-072 (2005) : 81]

Co You will also be highly motivated and able to organise your own work to meet agreed targets and deadlines, and have good communication and teamwork skills. [2506-048 (2005) : 72]

Co You will also be independent, with initiative as well as the personal and communication skills to work well with chemists and biologists in a multidisciplinary team. [2485-066 (2005) : 80]

Co You will also be involved in assay development [2506-020 (2005) : 62]

Co You will also be involved in isolate identification, raw materials testing and site project activities requiring microbiology input. [2502-034 (2005) : 66]
You will also be involved in preparation of prosections. [2502-048 (2005) : 71]

You will also be involved in teaching on the postgraduate course in Organic Farming. [2506-047 (2005) : 71]

You will also be involved in the physical and chemical testing of liquid and semi-solid formulations for controlled release, targeted delivery and enhanced solubility. [2519-054 (2005) : 71]

You will also be partly responsible for producing and updating GIS website project pages and developing GIS web mapping. [2511-002 (2005) : 52]

You will also be required to contribute to the development of marine aquaculture policy and guidance, and to represent SNH on a range of working groups relating to this subject. [2506-012 (2005) : 58]

You will also be required to supervise student practicals without assistance. [2528-056 (2005) : 83]

You will also be required to contribute to the development of marine aquaculture policy and guidance, and to represent SNH on a range of working groups relating to this subject. [2506-012 (2005) : 58]

You will also be responsible for ensuring the maintenance of laboratory stocks and equipment, microscopic tissue examinations, assistance with a range of computer software packages including image analysis software, spreadsheets, word-processing and general data processing systems. [2481-074 (2005) : 76]

You will also be responsible for identifying where additional specialist skills are required and for the subsequent management of contractors to provide these services. [2506-012 (2005) : 58]

You will also be responsible for managing staff and a team of keen volunteers. [2511-032 (2005) : 62]

You will also be responsible for planning, reporting and performing of audits of clients' management systems ensuring compliance with regulatory and voluntary requirements. [2528-047 (2005) : 79]

You will also be responsible for providing a technical support function to the commercial organisation. [2524-018 (2005) : 59]

You will also be responsible for routine instrument use within the facility. [2524-008 (2005) : 54]

You will also be responsible for service development in a specialist area. [2489-030 (2005) : 71]

You will also be responsible for the quality of experimental work and reports, working in compliance with Quality Standards. [2498-020 (2005) : 57]

You will also be responsible for the technical management of assigned projects providing significant contribution to their delivery whilst working closely with the Capability Adviser, Group Leader and management. [2524-045 (2005) : 66-67]

You will also bring strong relationship-building and drafting skills. [2519-047 (2005) : 70]

You will also carry out all administrative and pastoral duties normally associated with a Lectureship. [2511-054 (2005) : 71]

You will also collect and trend key process data, implement GMP compliance procedures and organise and control key documents. [2481-025 (2005) : 60]

You will also contribute to reports on biodiversity research needs and formulate responses to consultation exercises. [2485-073 (2005) : 82]

You will also contribute to the scientific publication output of the Department by writing scientific papers and producing a PhD thesis. [2519-023 (2005) : 62]

You will also develop mechanisms that provide generic information to customers and be involved in developing and maintaining partnerships with research and conservation organisations in Scotland and the UK taking the lead on issues concerning the conservation of lower plants and fungi. [2515-013 (2005) : 58]

You will also ensure that materials and wastes are properly inventoried across various sites, and liaise with external bodies to share ideas, raise awareness and improve programme efficiency. [2493-033 (2005) : 66]

You will also evaluate substances on the basis of their health or environmental effects. [2506-003 (2005) : 54]

You will also facilitate the production of species conservation assessments from Herbarium data by training other members of staff. [2511-002 (2005) : 52]
| Co | You will also have a keen interest in improving the value and quality of building facades. [2528-063 (2005) : 86] |
| Co | You will also have an in-depth understanding of Quality Management Systems and a sound understanding of cGMP and current regulatory FDA/MHRA requirements gained preferably in a sterile manufacturing environment. [2502-034 (2005) : 66] |
| Co | You will also have an interest in animal models of disease, and a desire to deepen your understanding of their role within the drug discovery process. [2524-005 (2005) : 53] |
| Co | You will also have excellent communication and interpersonal skills, with the ability to communicate with scientific and non-scientific people. [2524-022 (2005) : 60] |
| Co | You will also have excellent communication skills and be keen to develop research, consultancy and/or collaborative projects. [2506-054 (2005) : 73] |
| Co | You will also have good attention to detail and enjoy working in a team. [2489-023 (2005) : 69] |
| Co | You will also have good technical knowledge of common chemical analytical techniques, including HPLC and UV spectrometry project management experience and a good understanding of microbiology. [2519-025 (2005) : 63] |
| Co | You will also have partial responsibility for ensuring that the lab and its resources are well managed. [2515-025 (2005) : 64] |
| Co | You will also have responsibility, nationally, for casework arising from aquaculture activities and developments. [2506-012 (2005) : 58] |
| Co | You will also have the ability to design and execute experiments together with demonstrable written and verbal communication skills. [2485-096 (2005) : 89] |
| Co | You will also have the ability to successfully lead, motivate and influence a team to delivery objectives. [2506-005 (2005) : 55] |
| Co | You will also help to provide the Government with advice and information on issues arising from developments in assisted conception and embryology. [2511-015 (2005) : 56] |
| Co | You will also help with the herbarium digitalisation of Meso-American orchid types and the running of the MolSys laboratory. [2498-036 (2005) : 63] |
| Co | You will also implement new national list arrangements and plant breeders' rights arrangements for ornamental species, and manage contracts and relationships with delivery partners. [2485-072 (2005) : 81] |
| Co | You will also join a team providing advice on chemical hazards to various UK agencies such as local Health Protection Units and the National Poisons Information Service, [2498-037 (2005) : 64] |
| Co | You will also lead technological and scientific developments in this key area, and drive your own mix of internal and external research programmes. [2515-018 (2005) : 61] |
| Co | You will also lead the drafting of Medical Device Alerts and other guidance documents and advise the Department of Health, users and manufacturers on medical device safety and regulation. [2506-005 (2005) : 55] |
| Co | You will also maintain and manage the pool of marine survey equipment. [2485-073 (2005) : 82] |
| Co | You will also maintain and review QC performance indicators, evaluate and improve procedures as well as motivate, develop and train your team. [2519-025 (2005) : 63] |
| Co | You will also make a contribution to research and consultancy. [2498-055 (2005) : 70] |
| Co | You will also make recommendations on the use of statistical and other epidemiological methods in research to progress understanding of fish diseases and their control. [2515-047 (2005) : 72] |
| Co | You will also manage and oversee the work of junior staff. [2485-060 (2005) : 78] |
| Co | You will also need to co-ordinate, support and minute meetings. [2485-073 (2005) : 82] |
| Co | You will also need to have a strong familiarity with optimisation techniques especially those commonly used for tasks in computer vision. [2506-070 (2005) : 77] |
| Co | You will also oversee laboratory vaccine characterisation studies and evaluation of novel CBPP vaccines derived by targeted mutagenesis. [2498-031 (2005) : 60] |
| Co | You will also participate in a range of research projects in this area, often collaborating with other laboratories in Europe and commercial organisations such as oil companies. [2519-040 (2005) : 68] |
Co You will also play a key role in the transfer of these new products and methodologies to production facilities. [2493-032 (2005) : 66]

Co You will also play a key role leading investigations aimed at delivering tangible process improvements. [2498-043 (2005) : 66]

Co You will also play an important role in working with the Head of Programmes in managing cross-committee peer review issues. [2485-077 (2005) : 83]

Co You will also possess demonstrable people management skills. [2502-034 (2005) : 66]

Co You will also possess the ability to develop relationships with key customers and suppliers and manage stakeholders' expectations. [2515-024 (2005) : 64]

Co You will also provide GIS support to frontline inspectors and senior policy makers. [2498-016 (2005) : 66]

Co You will also provide high-level technical support to colleagues in Medical Information and also to those in commercial roles. [2511-023 (2005) : 59]

Co You will also provide support to SEPA staff in relation to chemicals policy and regulation [2506-002 (2005) : 54]

Co You will also provide training and advice to colleagues within the team. [2502-005 (2005) : 56]

Co You will also support the Head of Unit who is the Co-ordinator for a Commission funded project (ERA-NET) 'Co-ordination of European Marine Fisheries Research' which involves 17 European Partners. [2524-022 (2005) : 60]

Co You will appreciate the commercial world and how the application of your experience makes a valuable contribution. [2502-034 (2005) : 66]

Co You will assist on a project directed at identification of genes and polypeptides underpinning DMS oxidation in marine bacteria. [2493-035 (2005) : 67]

Co You will assist with the coordination and implementation of monitoring work undertaken by SNH Maritime Group for the suite of marine SACs (Special Areas of Conservation) and intertidal SSSIs (Sites of Special Scientific Interest) in Scotland. [2506-012 (2005) : 58]

Co You will assist with the full range of QA Audits and support functions particularly for the GLP teams who work on beneficial species and pesticide residues, organise and prepare documentation for QA systems and assist with QA based training courses run at CSL. [2485-075 (2005) : 82]

Co You will assist with the further characterisation of groundwater bodies and the development of monitoring and classification schemes. [2481-058 (2005) : 71]

Co You will be a bright, motivated individual with a degree in a biological discipline. [2515-025 (2005) : 64]

Co You will be a catalyst in the wider team, find creative solutions for continuous improvement of existing products, and to solve production problems. [2511-012 (2005) : 55]

Co You will be a confident communicator, with good organisational and IT skills. [2511-002 (2005) : 52]

Co You will be a highly committed scientist determined to make a positive contribution to cancer research. [2481-074 (2005) : 76]

Co You will be a highly motivated graduate from a numerate discipline, with experience in remote sensing, image processing, GIS or spatial analysis. [2511-027 (2005) : 61]

Co You will be a highly organised and disciplined individual with a minimum of 3 years supervisory experience in a chemical manufacturing environment. [2515-052 (2005) : 73]

Co You will be a key player in the long-term development plans for establishing links with University partners in Europe. [2524-030 (2005) : 62]

Co You will be a key team player with the ability to work within tight deadlines and deliver results. [2489-036 (2005) : 73]

Co You will be a self-starter, keen to react, with the ability to lead and motivate others. [2524-026 (2005) : 61]

Co You will be a senior member of a small multi-disciplinary research team working within the Manufacturing Science Group, which aims to provide support across the business. [2519-020 (2005) : 61]

Co You will be a strong team player with proven project management skills. [2506-010 (2005) : 58]
| Co | You **will** be a Team player, have excellent interpersonal skills, attention to detail, the ability to grasp disparate subjects and be familiar with Microsoft Project. [2502-016 (2005) : 60] |
| Co | You **will** be able to demonstrate common sense, clear communication skills and maturity. [2485-080 (2005) : 83] |
| Co | You **will** be able to demonstrate strong team building, leadership and communication skills and be confident dealing with senior representatives of external organisations. [2485-072 (2005) : 81] |
| Co | You **will** be able to demonstrate understanding of the application context for research and represent NPL at conferences and industrial consortia. [2515-014 (2005) : 59] |
| Co | You **will** be able to effectively analyse and report experimental results. [2519-020 (2005) : 61] |
| Co | You **will** be able to express written and illustrated scientific concepts clearly and concisely, have a keen eye for detail, display excellent time-management skills and be capable of working on-screen. [2515-059 (2005) : 75] |
| Co | You **will** be able to function well as a member of a team but also lead projects (biocides post only). [2515-048 (2005) : 72] |
| Co | You **will** be actively encouraged to engage in the research activities of the BPSRG. [2515-077 (2005) : 80] [2515-078 (2005) : 81] |
| Co | You **will** be actively involved in collaborations with early users of Solexa’s technology to develop key customer relationships and demonstrate the utility of our integrated sequencing platform in different genomic applications. [2498-010 (2005) : 53] |
| Co | You **will** be actively involved in commissioning of new gamma cameras, PET system for the Nuclear medicine service at the new site. [2481-034 (2005) : 64] |
| Co | You **will** be actively involved in experimental cutting-edge research of ubiquitin-proteasome system and stress signalling proteins, and assist in the efficient running and management of a group of research scientists. [2489-039 (2005) : 74] |
| Co | You **will** be an effective and concise communicator, with excellent report writing skills and the ability to summarise complex scientific information clearly and succinctly. [2515-061 (2005) : 76] |
| Co | You **will** be an effective communicator with experience in all aspects of research project management from initiation to final report production. A current driving licence is essential. [2506-012 (2005) : 58] |
| Co | You **will** be an enthusiastic and practical person, who is comfortable working with instrumentation and able to trouble shoot. [2489-023 (2005) : 69] |
| Co | You **will** be an enthusiastic and self-motivated person who meets the academic requirements for enrolment for the PhD degree at Imperial College. [2515-082 (2005) : 82] |
| Co | You **will** be an enthusiastic bioinformatician who takes on responsibility for the management of drug target information from scientific and patent literature as well as biological databases to assist in target selection and prioritisation. [2493-008 (2005) : 57] |
| Co | You **will** be an excellent communicator, both written and oral, with the ability to present and communicate often complex data to external parties. [2481-033 (2005) : 63] |
| Co | You **will** be an expert in the generation, expression and characterisation of human monoclonal and single chain antibodies. [2481-024 (2005) : 60] |
| Co | You **will** be an innovative, enthusiastic and inspirational academic leader with a proven track record in teaching and research. [2519-072 (2005) : 77] |
| Co | You **will** be assertive and self-motivated, [2524-041 (2005) : 65] |
| Co | You **will** be assisting with the research and development of improved diagnostics; application of novel approaches to improve microbial typing; research into host microbial interactions; [2524-030 (2005) : 62] |
| Co | You **will** be available on a flexible basis to assist with the collection of EEG data ensuring that the Phase I clinical trial runs smoothly and equipment performs to specification. [2506-029 (2005) : 66] |
| Co | You **will** be by nature a synthesiser and systems thinker as well as being adept at using the quantitative tools required for simulation. [2498-032 (2005) : 61] |
| Co | You **will** be capable of providing high quality research and organisational support for the groups working in areas that include yeast cell culture, molecular biology and biochemical analysis of proteins. [2502-047 (2005) : 71] |
You will be capable of working effectively within project teams as well as independently. [2515-047 (2005) : 72]

You will be capable of working under pressure and handling competing demands. [2524-041 (2005) : 65]

You will be comfortable working across a broad range of scientific disciplines. [2485-093 (2005) : 88]

You will be expected to assess the scientific validity, accuracy and adequacy of reports submitted by manufacturers and other regulatory bodies. [2506-003 (2005) : 54]

You will be expected to contribute both to the experimental and desk based work of the section and provide advice to customers on all aspects of gas and dust explosions. [2519-040 (2005) : 68]

You will be expected to contribute to both the experimental and desk-based work of the section and to provide advice to customers on all aspects of fire safety. [2519-040 (2005) : 68]

You will be expected to contribute to teaching and to the development of research in your particular area of expertise. [2515-062 (2005) : 76]

You will be expected to contribute to teaching and to the development of research in your particular area of expertise. [2528-055 (2005) : 82]

You will be expected to contribute to teaching of Equine and Animal Sciences and to further develop the research profile of the Institute in relation to the physiological, biochemical, nutritional or behavioural study of Animal Health and Welfare. [2528-061 (2005) : 85]

You will be expected to contribute to teaching of Equine and Animal Sciences and to further develop the research profile of the Institute in relation to Equine and Animal Sciences. [2502-039 (2005) : 68]

You will be expected to demonstrate a high degree of research independence in building your own research group. [2528-060 (2005) : 85]

You will be expected to demonstrate a track record in the development of PET data analysis methodology and an understanding of the biological models that underlie the analytical models. [2524-066 (2005) : 75]

You will be expected to demonstrate good communication and organisational skills in this cross disciplinary project. [2511-055 (2005) : 71]

You will be expected to deputise for the Section Head in representation at internal and external meetings and in management of the Section. [2485-077 (2005) : 83]

You will be expected to develop and produce antigens suitable for incorporation in our product lines. [2515-049 (2005) : 72]

You will be expected to develop partnerships with external bodies and contribute to the identification, prioritisation and management of research and development in relation to human health and the environment. [2506-002 (2005) : 54]

You will be expected to have the opportunity to input significantly into programmes within the CMD Team and across the Group. [2524-045 (2005) : 66-67]

You will be expected to initiate new research programmes as well as to contribute to the ongoing development of our clinical products, ProSavin and MoNuDin, that are expected to enter phase I/II clinical trials in 2006 and 2007. [2519-011 (2005) : 58]

You will be expected to interact closely with other members of the group and with other groups with whom we collaborate. [2528-025 (2005) : 70]

You will be expected to join an existing group of staff with wide experience in the teaching of analytical chemistry. [2511-060 (2005) : 73]

You will be expected to lead a subsection in the postnatal or prenatal section on a rotational basis with other staff. [2519-028 (2005) : 64]

You will be expected to liaise with collaborators at the Centre and local Universities to develop existing programs and new lines of research. [2485-053 (2005) : 76]

You will be expected to participate in research projects carried out at the Centre and to contribute to the general operation of the Centre. [2502-024 (2005) : 62]

<tr>
<td>Co</td>
<td>You <strong>will be expected</strong> to underpin and lead further developments in the Field which <strong>would</strong> allow the courses to diversify, particularly through the creation of more specialised Level 2 and 3 modules within the candidates own research areas and through the supervision of student projects and dissertations. [2515-062 (2005) : 76]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be expected</strong> to undertake response, training and help to develop the non infectious and environmental hazards aspects of health protection. [2481-041 (2005) : 66]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be highly motivated</strong> and a good team player. [2528-023 (2005) : 68]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be highly motivated</strong> and able to organise your own work to meet agreed targets and deadlines. [2506-048 (2005) : 72]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be highly motivated, adept and independent, with excellent time-management and interpersonal skills. [2493-036 (2005) : 67]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be involved</strong> in a range of research projects in the fields of molecular biology, epidemiology and bacterial biofilm biology [2528-073 (2005) : 88]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be involved</strong> in all aspects of product development to take products from concept to launch in an IVDD compliant environment. [2481-049 (2005) : 68]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be involved</strong> in all aspects of the editorial procedures, such as the reviewing process, the development of journal content, editing and proof reading manuscripts, coordination of freelance work, and contact with authors from all over the world. [2528-037 (2005) : 73]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be involved</strong> in all aspects of the provision of this service. [2489-031 (2005) : 72]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be involved</strong> in developing and implementing a research strategy to underpin new product development in the area of Inflammatory Bowel Disease (IBD). [2485-010 (2005) : 60]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be involved</strong> in identifying process improvements and troubleshooting technical issues with the products themselves, and with the key raw materials used in their manufacture. [2481-049 (2005) : 68]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be involved</strong> in local and regional biodiversity policy advocacy, promoting biodiversity programmes across Government, and pursuing opportunities for integration into developing national policy. [2485-049 (2005) : 74]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be involved</strong> in POL's ocean climate monitoring projects in Drake Passage (Antarctica) and the North Atlantic Deep Western Boundary Current. [2489-025 (2005) : 70]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be involved</strong> in researching and developing new products independently and supporting the expansion at intellectual property. [2498-026 (2005) : 59]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be involved</strong> in the developmental work on SEPA's policy on: environmental carrying capacity, the regulation of chemical substances (REACH), the control of chemicals under the Water Framework Directive, the control of biocides/pesticides, eco-design and environmental aspects of product standards including integrated product policy. [2506-002 (2005) : 54]</td>
</tr>
</tbody>
</table>
Co You **will be involved** in the implementation of improvement projects that improve compliance and efficiencies. [2485-002 (2005) : 56-57]

Co You **will be involved** in the LC/MS/MS analysis of samples from a number of study types, providing interpretation and reporting of data for inclusion in GLP reports. [2493-029 (2005) : 64]

Co You **will be involved** in the provision of training, teaching and casework consultancy. [2506-056 (2005) : 74]

Co You **will be involved** in the writing of regulatory documents for submission to marketing authorities. [2511-025 (2005) : 59]

Co You **will be involved** in the writing of regulatory documents for submission to marketing authorities. [2524-025 (2005) : 61]

Co You **will be involved** with the chemical analysis and maintenance of analytical equipment and methodologies. [2498-044 (2005) : 66]

Co You **will be involved** with the development and delivery of training packages and research projects towards competency and evidence based practice. [2502-003 (2005) : 55]

Co You **will be involved** with a new collaborative research grant to explore the linkage via intelligent agents of predictive models with process descriptions driven by manufacturing data. [2489-041 (2005) : 74]

Co You **will be involved** with a team helping to develop the School's research and knowledge transfer agenda. [2519-069 (2005) : 76]

Co You **will be involved** with a team undertaking novel and exciting research connected with the effect of hormones and ageing on wound healing. [2481-074 (2005) : 76]

Co You **will be involved** with providing advice on marine casework and strategic level advice to government, work with other nature conservation agencies to co-ordinate UK level advice and develop projects to review the impact on nature conservation of UK energy production. [2489-029 (2005) : 71]

Co You **will be required** to assist in the development of new techniques and protocols necessary to fully exploit the capabilities of the new facility. [2485-027 (2005) : 66]

Co You **will be required** to carry out a wide range of duties in a multi-disciplinary group. [2481-074 (2005) : 76]

Co You **will be required** to deliver a high volume workload and meet the stringent deadlines imposed by this project. [2481-058 (2005) : 71]

Co You **will be required** to develop and grow all the various cognate disciplines within the School. [2519-072 (2005) : 77]

Co You **will be required** to guide, mentor, line manage and technically lead a team of approximately eight scientists and engineers. [2524-045 (2005) : 66-67]

Co You **will be required** to maintain a watching brief on related international research activity. [2481-007 (2005) : 56]

Co You **will be required** to maintain and operate the instruments in order to obtain reliable analytical data. [2485-082 (2005) : 84]

Co You **will be required** to participate in a 1 in 4 duty scientist/signer rota with full result authorising and clinical liaison responsibilities. [2489-030 (2005) : 71]

Co You **will be required** to proactively seek and edit the latest information relating to drug development from a variety of sources, for daily online publication. [2493-001 (2005) : 54]

Co You **will be required** to run the project on a day-to-day basis and to supervise a research assistant. [2528-025 (2005) : 70]

Co You **will be required** to undertake all project management for CMD, working to the Team Leader, Capability Adviser and Group Leader as appropriate within the EOD Group. [2524-045 (2005) : 66-67]

Co You **will be required** to visit participating centres on a regular basis and therefore a current, valid driving licence is essential. [2519-060 (2005) : 73]

Co You **will be required** to work within a team, in a busy laboratory offering a broad range of environmental analysis of soil and water samples for DRO/PRO/PAH/SVOC/PCB/Phenols and VOC. [2524-046 (2005) : 68]
You will be responsible for a comprehensive epidemiological analysis of endemic CBPP in Maasai pastoral cattle herds in Kenya and Tanzania, before, during and after a three year vaccination campaign. [2498-031 (2005) : 60]

You will be responsible for analysing drug substances and various products as part of the drug development programme, operating within a small team. [2489-019 (2005) : 68]

You will be responsible for assisting in the development of methodologies for analysis of pharmacokinetic and pharmacodynamic endpoints in both clinical trials and preclinical systems. [2506-048 (2005) : 72]

You will be responsible for interactions between chmateprediction.net and the Berkeley Open Infrastructure for Network Computing (BOINC) developer and participant community, including the SETI@home project. [2515-078 (2005) : 81]

You will be responsible for leading a small team whose prime responsibilities are the management of our compound collection and the processing of customer orders to exacting standards and strict delivery schedules. [2498-011 (2005) : 54]

You will be responsible for leading a team of seven staff, contributing to the development and implementation of Trust policy and strategy, and developing and maintaining links with the scientific and academic community. [2481-043 (2005) : 67]

You will be responsible for managing the programme of molecular biology to implement robust methods for creating complex libraries of genomic DNA fragments, the production of our proprietary enzymes for commercial launch, and managing the pipeline of samples through to sequencing on our new generation of sequencing instruments. [2498-010 (2005) : 53]

You will be responsible for operating a highly programmable, automated chemical analyser, as well as processing the associated samples and maintenance and operation of the analyser. [2485-056 (2005) : 77]

You will be responsible for overseeing the successful operation of state-of-the-art analytical equipment, which underpins the biopharmaceutical and biotechnology area. [2524-073 (2005) : 77]

You will be responsible for planning and delivering the agreed research programme for the technology platform. [2506-023 (2005) : 64]

You will be responsible for providing technical advice to all business units within RWE npower, with a focus on the assessment and management of environmental risk of a range of power plant and related energy business issues. [2493-025 (2005) : 62]

You will be responsible for the management of the MIB building (including maintenance and security of the building), in liaison with the University’s Estates Directorate. [2502-047 (2005) : 71]

You will be responsible for the overall management and delivery of the ADAM Project, including interacting with the key European policy stakeholders in Brussels and beyond. [2524-054 (2005) : 72]

You will be responsible for the production of technical evaluations of data submitted in support of applications for approval, and for the reviews of existing approvals in accordance with both the Control of Pesticides Regulations 1986 and the Plant Protection Products Regulations 1995. [2515-061 (2005) : 76]

You will be responsible for the provision of first class engineering support for all control systems associated with our manufacturing process. [2485-002 (2005) : 56-57]

You will be responsible for undertaking testing to support our customers in a timely fashion. [2506-023 (2005) : 64]

You will be responsible, under the Chief Technician, for the operation and maintenance of analytical instruments within the Laboratory for Global Marine and Atmospheric Chemistry (LGMAC). LGMAC is a recent development within the department providing new laboratories and equipment from the government's joint Infrastructure Fund. [2485-082 (2005) : 84]

You will be safety aware and have an understanding of the key significance of nuclear safety. [2515-024 (2005) : 64]
| Co | You **will** be self-motivated and capable of working with minimal supervision, yet also able to work closely with others in the team. [2485-025 (2005) : 65] |
| Co | You **will** be self-motivated and possess excellent communication skills and be a team player. [2511-034 (2005) : 62] |
| Co | You **will** be self-motivated and possess excellent communication skills and be a team player. [2515-020 (2005) : 62] |
| Co | You **will** be self-motivated with good practical skills and an honours degree in materials science, chemical engineering or chemistry. [2519-020 (2005) : 61] |
| Co | You **will** be updating a commercial database of drugs in R & D so the ability to maintain high consistency and standards is important. [2528-023 (2005) : 68] |
| Co | You **will** be willing to travel and work under demanding physical conditions in the UK and overseas. Therefore a current driving licence is essential. [2515-009 (2005) : 57] |
| Co | You **will** be working in close collaboration with the Hadley Centre running their carbon cycle GCMs and combining them with data assimilation techniques. [2524-051 (2005) : 70] |
| Co | You **will** be working on other peoples land [2528-022 (2005) : 68] |
| Co | You **will** be working on process design, development, or scale-up, using techniques for protein purification and analysis within the regulatory environment of a pharmaceutical facility. [2506-009 (2005) : 57] |
| Co | You **will** be working to develop novel tissue culture models for the propagation and characterisation of TSE's. [2524-030 (2005) : 62] |
| Co | You **will** be working with a small technical team in the UK supported by Acta Group experts in the US. [2524-009 (2005) : 54] |
| Co | You **will** be working with BIS and other JNCC units to prepare papers and minutes in support of the Global Biodiversity sub-committee of the Global Environmental Change Committee (GECC) and maintain a relationship with Defra. [2485-073 (2005) : 82] |
| Co | You **will** become fully conversant with the company's technical goals. [2493-015 (2005) : 59] |
| Co | You **will** bring strong attention to detail, sound project management skills and, as a natural team player, the ability to liaise easily and smoothly on technical, legal and commercial issues with internal and external colleagues. [2524-012 (2005) : 56] |
| Co | You **will** build up a rapport with the EMEA and become involved in discussions relating to submissions. [2511-034 (2005) : 62] |
| Co | You **will** carry a normal teaching load of undergraduate and postgraduate teaching. [2511-054 (2005) : 71] |
| Co | You **will** carry out automated chemical analysis for trace metals, pH, BOD, nutrients etc. in water and other environmental samples. [2524-033 (2005) : 63] |
| Co | You **will** carry out geological field surveys overseas and in the UK, principally of 'basement’ Precambrian and Lower Palaeozoic successions, metamorphic / igneous rocks, and Quaternary deposits through field mapping, interpretation of remote sensing imagery, core logging and other data collection, to produce geoscientific interpretations and 3D models in support of science budget or commissioned research. [2515-009 (2005) : 57] |
| Co | You **will** carry research into forming catalyst particles for use in reactors, where particles need to meet specific size and shape requirements and to be both porous and strong. [2519-020 (2005) : 61] |
| Co | You **will** carry out research, training, and teaching in the Centre and you **should** have a strong publication record in a relevant area of materials chemistry such as synthesis/materials characterisation. [2519-067 (2005) : 75] |
| Co | You **will** concentrate on explosions and hydrogen/alternative fuel related work whilst working alongside some of the most respected and experienced scientists in their field. [2519-040 (2005) : 68] |
| Co | You **will** contribute ideas to the research program and be involved in developing proposals for additional diagnostics. [2485-039 (2005) : 71] |
| Co | You **will** contribute to on-going research projects within the group and **should** have, or shortly expect to be awarded a PhD. [2506-051 (2005) : 73] |
You will contribute to on-going research projects within the unit (and the HPA as a whole), particularly with respect to the structural and functional consequences of exposure to known and novel neurotoxins, and the development of testable mechanistic hypotheses. [2498-037 (2005) : 64]

You will contribute to other aspects of the work, and there may be an opportunity for fieldwork in the future. [2485-073 (2005) : 82]

You will contribute to postgraduate teaching in land management, including MSc programmes in Land Reclamation and Restoration, Natural Resource Management and Soil Management. [2528-056 (2005) : 83]

You will contribute to research in ocean dynamics based on sea level and related geodetic techniques, including ocean bottom pressure measurement. [2489-025 (2005) : 70]

You will contribute to the development, delivery and promotion of courses in the area of forensic science, together with research and consultancy. [2485-101 (2005) : 90]

You will contribute to the identification of new roles for the biosensor technology and the extension to non cardiac systems. [2485-039 (2005) : 71]

You will contribute to the ongoing assessment of health impact of industrial facilities and be part of the day time on call chemical incident response rota. [2481-041 (2005) : 66]

You will contribute to the teaching of our popular degree programme in Chemistry with Forensic Investigation and also to analytical chemistry and/or physical chemistry modules. [2528-060 (2005) : 85]

You will contribute towards teaching at all levels of the Masters degree in Pharmacy (accredited by the Royal Pharmaceutical Society of Great Britain) and the BSc courses in Pharmacology and Biomedical Sciences, along with the new BSc in Pharmaceutical Sciences. [2498-067 (2005) : 73]

You will create and identify opportunities to launch new products into existing and new markets and enable the transfer of this technology to full scale production. [2493-002 (2005) : 54]

You will deal with the selection and processing of loans from other institutions [2511-002 (2005) : 52]

You will demonstrate skills in either the conduct of in vitro metabolism studies utilising microsomes, human hepatocytes and cell culture technologies or bioanalytical techniques such as HPLC, LC/MS, and fluorescence/UV spectroscopy for the analysis of novel compounds in biological matrices. [2493-029 (2005) : 64]

You will design and synthesize small molecule ion channel ligands, working in a multidisciplinary environment interacting with scientists from other disciplines. [2524-002 (2005) : 52]

You will develop and control manufacturing processes, implement GMP procedures and control key process data and documents. [2485-010 (2005) : 60]

You will develop methods for the synthesis of natural products and intermediates in their biosynthesis. You must have a PhD and a published track record in organic synthesis. [2502-059 (2005) : 74]

You will develop new Lab-on-a-chip based methods to Inter Mass Spectroscopy [2519-077 (2005) : 78]

You will develop semiconductor devices patterned on the sub-micron and nano-scale, which incorporate embedded electrodes and underlying circuitry for subsequent chemical and biological functionalization. [2502-042 (2005) : 69]

You will develop separation techniques for protein analysis from murine neural tissue, and analyse differentially expressed proteins via mass spectrometry, disseminating your results through presentations at scientific forums and the preparation of academic papers. [2524-008 (2005) : 54]

You will develop techniques to functionalize surfaces with biological molecules, develop assessment tools to analyse the functionalized surfaces, and tools to transduce chemical and biochemical events occurring on the surface to the underlying electronics, and vice versa. [2502-042 (2005) : 69]

You will develop technologies to fabricate lipid bilayers on various substrates, and tools to manipulate and separate membrane proteins. [2502-042 (2005) : 69]
| Co | You will develop the synthesis of photo-cleavable and electrochemically-cleavable tethers, as well as other novel tethering technologies, novel fluorescent probes and new transition state model systems. [2502-042 (2005) : 69] |
| Co | You will devise and manage a programme of R&D to support related policy development and improvements to efficiency of service delivery. [2485-072 (2005) : 81] |
| Co | You will draft our policy for the exploitation and protection of Intellectual Property. [2481-004 (2005) : 54] |
| Co | You will edit learning materials from our Faculty of Technology, which teaches a wide range of courses from engineering through environmental studies to Third World development. [2485-086 (2005) : 86] |
| Co | You will edit submitted material and ensure that the associated drug records on relevant products, such as the IDdb, are as accurate and up to date as possible. [2493-001 (2005) : 54] |
| Co | You will elucidate the role of this SUMO protease in triggering cellular signalling during salt stress. [2489-039 (2005) : 74] |
| Co | You will engage with world-class scientists across a range of divisions in the Health Schools at King’s to facilitate relationship-building with external partners in the pharmaceutical and biotechnology sectors to generate new business. [2506-055 (2005) : 74] |
| Co | You will enjoy solving technical problems as well as interpreting data and communicating your results. [2481-012 (2005) : 57] |
| Co | You will ensure efficient service delivery and ensure that staff comply with Health & Safety regulations, in particular, COSHH. [2502-003 (2005) : 55] |
| Co | You will ensure that monitoring, auditing and reporting is carried out on such activities. [2524-071 (2005) : 77] |
| Co | You will ensure that our work is underpinned by the necessary infrastructure and logistic support, also taking special responsibility for Health and Safety and strategic development of our information Management. [2493-004 (2005) : 55] |
| Co | You will ensure the provision of an efficient and cost effective trial monitoring service to international quality standards, assuring standardisation across all CTRU trial portfolios. [2519-060 (2005) : 73] |
| Co | You will focus on applying your knowledge and experience of cell biology procedures to conduct experiments which solve problems posed by project objectives. [2506-022 (2005) : 63] |
| Co | You will focus on the design and manufacture of 3-D miniaturised integrated products with the opportunity to additionally contribute to research into fabrication of diamond micro-tools. [2511-065 (2005) : 74] |
| Co | You will focus on the laboratory evaluation and development of synthetic routes to our new drug molecules. [2485-070 (2005) : 81] |
| Co | You will generate data from a range of analytical instruments and assess its quality against predetermined limits. [2489-019 (2005) : 68] |
| Co | You will have a major interest in general haematology and coagulation but should also be competent in transfusion. [2506-014 (2005) : 59] |
| Co | You will have a proven ability to research, analyse and interpret ecological and environmental information and to present your analysis and advice clearly and effectively to customers. [2485-012 (2005) : 60] |
| Co | You will have a track record of achievement in the application of modern analytical techniques in biological systems relevant to food and with expertise in statistical analysis of data. [2511-064 (2005) : 73] |
| Co | You will have an in depth knowledge of a range of analytical and environmental techniques [2524-026 (2005) : 61] |
| Co | You will have an understanding of pharmacology, pharmacological techniques and their utilisation in the drug discovery and candidate selection process. [2489-035 (2005) : 72] |
| Co | You will have an understanding of the drug discovery and development process with experience in some of the following techniques; [2489-035 (2005) : 72] |
| Co | You will have excellent organisational skills, the ability to work independently and as part of a team, be able to communicate and develop effective working relationships with a wide range of staff at all |
| Co | You **will** have excellent proven skills in C++ and the ability to write real-time code, work as part of a team and to plan and execute data collection experiments. [2493-049 (2005) : 70] |
| Co | You **will** have excellent verbal and written communication skills and the ability to work as part of a team committed to sustainable design for the benefits of building occupants and society, at economic whole life cost. [2528-063 (2005) : 86] |
| Co | You **will** have expertise in sensor data processing. [2506-070 (2005) : 77] |
| Co | You **will** have general responsibility for maintaining technical aspects of demanding research laboratories and assist in research activities as directed. [2524-066 (2005) : 75] |
| Co | You **will** have good communication and teamwork skills and **should** also be able to communicate scientific information to technical and non-technical groups. [2506-048 (2005) : 72] |
| Co | You **will** have hands-on editing experience in educational, academic or related publishing, and be familiar with production processes. [2485-086 (2005) : 86] |
| Co | You **will** have knowledge of project management best practice with a track record of achievement driven through personal motivation. [2515-024 (2005) : 64] |
| Co | You **will** have overall management responsibility for investment strategy and how NERC’s programme can be aligned most effectively with other national and international programmes. [2485-033 (2005) : 69] |
| Co | You **will** have responsibility for product quality, process improvements and raw material evaluation activities. Experience of Statistical Process Control is desirable. [2524-016 (2005) : 57] |
| Co | You **will** have responsibility for the recruitment and follow-up of the volunteers, for the dietary plan, monitoring and assessment of dietary intake of the subjects, as well as sample collection during the study. [2489-052 (2005) : 77] |
| Co | You **will** have state registration, experience in Nuclear Medicine and a higher degree in medical physics or related field. [2489-010 (2005) : 62] |
| Co | You **will** have strong experience working in a diverse facility, be able to demonstrate leadership and problem solving skills [2489-035 (2005) : 72] |
| Co | You **will** have strong experience working in a large diverse facility, be able to demonstrate leadership and problem solving skills [2485-002 (2005) : 56-57] |
| Co | You **will** have the ability to communicate effectively in business and scientific English, both written and spoken and be familiar with MS Office applications. [2528-049 (2005) : 79] |
| Co | You **will** have the ability to do novel research and write and publish research papers, work alone and as part of a team. [2485-096 (2005) : 89] |
| Co | You **will** have the ability to lead a multidisciplined team, manage budgets and deliver against challenging timelines. [2485-002 (2005) : 56-57] |
| Co | You **will** have the ability to motivate, inspire and engage your colleagues and to understand and respect differing styles and opinions. [2485-049 (2005) : 74] |
| Co | You **will** have the ability to plan and organise work schedules and have some proven project management experience. [2498-036 (2005) : 63] |
| Co | You **will** have the ability to prioritise conflicting demands with a challenging attitude but with a flexible and proactive approach to achieve results. [2515-024 (2005) : 64] |
| Co | You **will** have the ability to work efficiently under pressure to tight timescales with good team working skills. [2524-022 (2005) : 60] |
| Co | You **will** have the communication skills to be able to work effectively with customers and people at all levels within our organisation. [2524-041 (2005) : 65] |
| Co | You **will** have the interpersonal skills required to work with people from a wide range of disciplines and seniority across the site. [2511-011 (2005) : 55] |
| Co | You **will** have the personality to get on with people at all levels as well as the flexibility to travel, which may involve visits abroad. [2481-025 (2005) : 60] |
| Co | You **will** have, or will be prepared to develop, a solid understanding of complementary therapies towards identifying gaps and opportunities for research in the field. [2498-003 (2005) : 50] |
Co You will help us to develop our commercial offerings to the pharmaceutical industry and implement in-vitro biological screening in-house thus increasing the scope of the research services that we offer. [2502-015 (2005) : 60]

Co You will hold S301/P902 and be able to demonstrate full competence in carrying out asbestos surveying and associated project management works. [2485-080 (2005) : 83]

Co You will ideally be a state registered scientist, with an established career in all aspects of clinical embryology, excellent communication and interpersonal skills and demonstrable ability to manage the IVF laboratories and associated embryology/andrology staff. [2511-008 (2005) : 54]

Co You will ideally be particularly familiar with the chemistry of Marine, PCEO, Driveline or HD Diesel lubricants, and have some background in the formulation and development of these products. [2485-058 (2005) : 77]

Co You will interact with and strengthen the research capability in one or more of the Department's established groups in plant science, crop and weed biology, plant-microbe interactions, fungal biocontrol or pest insect biology. [2524-067 (2005) : 76]

Co You will interact with and strengthen the research capability in one or more of these areas. [2524-067 (2005) : 76]

Co You will join a project investigating the use of human oocytes for derivation of embryonic stem (ES) cells. [2485-098 (2005) : 89]

Co You will lead a technical team in the development of combination drug-device products in the cardiovascular field, applying your technical, academic and leadership skills to identify opportunities and pursue them through to development. [2502-028 (2005) : 64]

Co You will lead the development and production of novel flexible electronic components for the flexible displays market, working in collaboration with leading UK companies and universities. [2498-006 (2005) : 52]

Co You will lead the development of environmental risk assessment [2498-032 (2005) : 61]

Co You will lead the Plant Variety Rights Office and Seeds Divisions Operations Unit, a team of 20 staff who deliver the three services of Plant Breeders' Rights, National Listing and Seed Certification to the plant breeding and seeds industry. [2485-072 (2005) : 81]

Co You will lead the Quality Assurance activities in the Centre where the main focus of the job is to maintain the Centre's legal and regulatory status for a range of activities including the production of Investigational Medicinal Products for research related to Positron Emission Tomography (PET) technology. [2493-049 (2005) : 70]

Co You will maintain an awareness of worldwide industry trends and contribute to project objectives and outcomes as part of a multi-disciplinary team. [2515-041 (2005) : 70]

Co You will maintain the Marine Recorder national benthic marine database, contribute to management and processing of marine mapping datasets (mostly in ArcGIS), maintain the image library and a Reference Manager database. [2485-073 (2005) : 82]

Co You will manage a number of both internal and external work programmes, make a substantial contribution to the preparation of environmental case making, represent the business at national fora and manage external interfaces. [2493-025 (2005) : 62]

Co You will manage an interdisciplinary team of post doctoral level scientists [2498-010 (2005) : 53]

Co You will manage and carry out research on the DTI/Industry funded project (INTRINSIC). [2528-062 (2005) : 85]

Co You will manage and co-ordinate a small group of electrophysiologists to build an effective assay group [2524-002 (2005) : 52]

Co You will manage and co-ordinate the work of a small team of electrophysiologists to build an effective assay group [2485-066 (2005) : 80]

Co You will manage policy on development of technical protocols in international forums and ensure that UK testing services comply with them. [2485-072 (2005) : 81]

Co You will manage product development from laboratory and field trials through to production and sales support, including liaison with design and commercial staff. [2493-003 (2005) : 54]

Co You will manage risk and balance the demands of implementing multi-product launches to challenging timescales, liaising with key stakeholders across the business. [2511-012 (2005) : 55]
<p>| Co | You will manage Statisticians and Statistical Programmers so as to deliver all statistical aspects of clinical development from protocol design and statistical analysis plans. [2519-039 (2005) : 67] |
| Co | You will manage the day-to-day activities of our protein therapeutics QC and microbiology groups, providing a testing service that meets the needs of our European market. [2519-025 (2005) : 63] |
| Co | You will manage three or four staff with the objective of developing basic structure activity relationships versus classical and novel targets. [2485-039 (2005) : 71] |
| Co | You will naturally be familiar with dealing with public sector and/or police customers and working with strategic partners. [2511-017 (2005) : 57] |
| Co | You will need a sound knowledge of UK nature conservation and emerging biodiversity issues. [2485-073 (2005) : 82] |
| Co | You will need a strong knowledge of Clinical Biostatistics, knowledge and experience of FDA/ICH guidelines, a team orientated approach and strong interpersonal skills to communicate at all levels and with colleagues across multiple functions. [2519-039 (2005) : 67] |
| Co | You will need excellent problem-solving skills to translate laboratory findings into commercialised products for chronic wound treatment. [2506-022 (2005) : 63] |
| Co | You will need excellent writing and organisational skills and preferably an MSc or PhD in Life Sciences. [2524-025 (2005) : 61] |
| Co | You will need good skills in method development and application as well as an enthusiasm for increasing your knowledge of state-of-the-art technology. [2485-056 (2005) : 77] |
| Co | You will need the ability to often work with minimal supervision and enjoy international travel. [2528-049 (2005) : 79] |
| Co | You will need the vision and confidence to drive for results and develop innovative approaches. [2485-049 (2005) : 74] |
| Co | You will need to be a flexible and versatile team worker. [2502-003 (2005) : 55] |
| Co | You will need to be an established professional working for either a research company or university department. [2485-051 (2005) : 75] |
| Co | You will need to be both conscientious and enthusiastic, as well as happy to work as part of a highly professional team. [2506-021 (2005) : 62] |
| Co | You will need to be computer literate and have an interest in developing on-line and Internet searching techniques. [2528-023 (2005) : 68] |
| Co | You will need to be confident with a range of experimental and analytical methods as well as being familiar with the demands of process modelling. [2489-041 (2005) : 74] |
| Co | You will need to be conscientious, have excellent communication skills and be able to organise your time effectively. [2515-038 (2005) : 69] |
| Co | You will need to be positive, organised and enthusiastic with the desire to drive the science of formulation forward to develop challenging compounds into dosage forms. [2519-054 (2005) : 71] |
| Co | You will need to demonstrate good technical and communication skills, and have the potential to design and carry out novel research projects capable of attracting external funding. [2485-053 (2005) : 76] |
| Co | You will need to demonstrate that you have the ability to: [2489-038 (2005) : 73] |
| Co | You will need to have strong enthusiasm for the management and administration of science. [2498-042 (2005) : 65] |
| Co | You will need to have the ability to design and execute experiments and have demonstrable oral and written communication skills. [2485-096 (2005) : 89] |
| Co | You will need to have well-developed leadership, oral presentation and written communication skills, and possess personal attributes to work cooperatively with colleagues in CSIRO, universities, governments and private agencies. [2519-018 (2005) : 60] |
| Co | You will need to work well both independently and as part of a team and have the initiative to be able to solve problems when they arise. [2515-004 (2005) : 54] |
| Co | You will organise the laboratory activities and clean room environmental monitoring plus equipment maintenance and validation. [2502-003 (2005) : 55] |
| Co | You will oversee three main surveillance activities: New diagnoses reporting for HIV, AIDS and deaths in HIV infected individuals, the annual surveys of prevalent diagnosed infection and surveillance of incident HIV infection. [2511-043 (2005) : 67] |</p>
<table>
<thead>

<td>You will provide technical leadership for a team of professional experimental officers and technicians providing support to core services and facilities within the MIB. [2502-047 (2005) : 71]</td>
</tr>
<tr>
<td>Co</td>
<td>You will report directly to the company’s chief scientific officer. [2485-039 (2005) : 71]</td>
</tr>
<tr>
<td>Co</td>
<td>You will represent the Biostatistics department in interactions with clients for both business development support as well as project work discussions. [2519-039 (2005) : 67]</td>
</tr>
</tbody>
</table>
You will rotate through all areas of the laboratory and work closely in conjunction with the Lead Consultant Haematologist, Blood Bank Manager, Transfusion Nurse and the Hospital Transfusion Team. [2515-055 (2005) : 74]

You will specialise in and lead on marine and aquatic issues and be a contact point for ecological and environmental advice and information on these issues. [2485-012 (2005) : 60]

You will support and help drive research activities relating to one or more of our specialised equipment suites which include: i) Biomolecular characterisations (Nuclear magnetic resonance spectrometers, Mass spectrometers (LC-MS, ICP-MS, small molecule MS)), and ii) Cell and tissues analyses (confocal and electron microscopes). [2528-070 (2005) : 88]

You will support both the EOD Group project teams in their explosives trials and experimental programmes, and the FEL with its investigation of incidents involving criminal mis-use of explosives. [2524-045 (2005) : 66-67]

You will support EOD project teams with explosives trials and experimental programmes. [2524-045 (2005) : 66-67]

You will support the Principal Scientific Officer on an applied research project with the key role of developing and validating tests to facilitate use of vaccines in control of foot-and-mouth disease (FMD) outbreaks. [2506-006 (2005) : 56]

You will sustain and develop good working relationships with the main regulatory bodies, our leaflet and carton producers and with relevant colleagues to ensure that licences are granted swiftly and artwork meets regulatory requirements. [2485-052 (2005) : 76]

You will take charge of the routine work in this busy laboratory, which provides a service for a selection of hospitals in the north London area on a provider-to-provider basis. [2493-005 (2005) : 56]

You will take on the role of programme manager for the Sexual Health programme. [2511-043 (2005) : 67]

You will take part in a medium-scale ENU mutagenesis programme [2528-025 (2005) : 70]

You will take responsibility for forensic explosives cases, from submission of items at the laboratory, to giving expert testimony, at sometimes high profile cases in Court and attending crime scenes. [2524-045 (2005) : 66-67]

You will take the lead in investigating adverse incident reports from healthcare professionals, manufacturers and patients, or to carry out biological safety assessments for medical devices. [2506-005 (2005) : 55]

You will take the scientific lead and be the deputy head for the HIV and AIDS reporting section working closely with the consultant epidemiologist section lead. [2511-043 (2005) : 67]

You will teach physics or physics/astrophysics at undergraduate, and to a lesser extent postgraduate, level and carry out academic service and teaching support activities. [2498-065 (2005) : 73]

you will then transfer to the JAC for a minimum of 3 years to participate in installation and commissioning and to be responsible for scientific and technical support of the instrument. [2506-021 (2005) : 62]

You will understand the application context for research, and liaise with industrial consortia representing NPL. [2515-014 (2005) : 59]

You will undertake a secretariat role for Research and Development customers and science groups and maintain project and programme details. [2524-022 (2005) : 60]

You will undertake all aspects of study monitoring and some elements of data management for multi-centre randomised trials in oncology and cardiovascular disease. [2519-060 (2005) : 73]

You will undertake clinical and research work within the embryology laboratory of the Assisted Reproduction Unit. [2506-044 (2005) : 70]

You will undertake modelling of the epidemiology of bluetongue, aimed at reducing the risk to UK livestock now and in the future. [2519-032 (2005) : 65]

You will undertake research and data processing, develop the group website and participate in the NERC DataGrid project with the aim of making Earth Observation data available via an e-Science portal in near-real time. [2511-027 (2005) : 61]

You will undertake research into dehydrogenation and hydrogenation of organic species over metal and oxidic catalysts as part of an international research effort. [2511-049 (2005) : 70]
<p>| Co | You will undertake the regulation of and enforce the legislation controlling the use of radioactive substances and the accumulation and disposal of radioactive waste. [2481-033 (2005) : 63] |
| Co | You will use your knowledge to develop innovative technologies that enhance the functional and aesthetic properties of textile products and to champion projects with major external customers and internally funded CSIRO projects. [2515-041 (2005) : 70] |
| Co | You will work as part of a multi-functional team and apply a range of formulation skills across varied new product development projects. [2481-040 (2005) : 66] |
| Co | You will work as part of the Development Chemistry team whose responsibilities include providing analytical development expertise and practical assistance for projects from preclinical and clinical development, through to the compilation of regulatory dossiers/ registration support. [2493-032 (2005) : 66] |
| Co | You will work closely with scientists and engineers in both areas and with forensic case officers, you may be required to present evidence in Court. [2524-045 (2005) : 66-67] |
| Co | You will work closely with scientists and engineers, installing and operating specialist equipment at both UK and overseas trials. [2524-045 (2005) : 66-67] |
| Co | You will work closely with the Director and other members of the BAS Board, [2493-004 (2005) : 55] |
| Co | You will work closely with the journal Editor and Editorial Coordinator to meet publication deadlines and to maintain the excellent standards of this high-impact journal. [2515-059 (2005) : 75] |
| Co | You will work closely with the Quality Assurance and Production Managers in a full range of Quality Assurance activities including product release, process validation and documentation approval. [2502-003 (2005) : 55] |
| Co | You will work closely with the Steering Committee to develop and execute the Programme Science, Implementation, Data Management and Knowledge Transfer Plans, and monitor progress against programme objectives. [2481-065 (2005) : 73] |
| Co | You will work closely with the transport industries, research organisations and equipment manufacturers to guide research and development initiatives and to conduct operational evaluations of the latest equipment and techniques. [2502-004 (2005) : 55] |
| Co | You will work closely with trial co-ordinators, collaborators, including pharmaceutical companies where applicable and be required to travel within UK and Ireland (some overnight stays may be required). [2519-060 (2005) : 73] |
| Co | You will work collaboratively between the four Departments, augmenting the existing departmental research groups and drawing upon the outstanding infrastructure and facilities available. [2502-042 (2005) : 69] |
| Co | You will work from home and travel to our customer sites. Some travel and occasional overnight stays may be expected. [2506-034 (2005) : 68] |
| Co | You will work in our Cell Based Therapies Programme, applying your technical expertise to research activities. [2506-022 (2005) : 63] |
| Co | You will work in our Wound Management Research Programme contributing new ideas within the area of tissue engineering/regenerative medicine. [2506-022 (2005) : 63] |
| Co | You will work on a project supported by the European Commission under its Framework VI (Integrated Project) Initiative to develop novel, spray formed, Intermetallic Materials for use as advanced catalysts in hydrogen fuel cells and in industrial processes. [2485-088 (2005) : 87] |
| Co | You will work on discovery and delivery of structurally optimised antibodies developed through use of state-of-the-art bioinformatic, molecular modelling, molecular genetic and biochemical techniques. [2493-018 (2005) : 60] |
| Co | You will work on exposure assessment in quantitative risk assessment and epidemiology of human health risks from environmental exposure to chemicals. [2528-064 (2005) : 86] |
| Co | You will work on RNA and peptide aptamers selected robotically against a number of molecular targets that form the basis of the hybrid devices being constructed by the larger consortium. [2502-042 (2005) : 69] |</p>

</tbody>
</table>
You’ll support colleagues across northeast Scotland on issues affecting the marine environment, as well as providing advice across the organisation on Marine Renewables and implementing the Water Framework Directive within coastal and transitional bodies of water across the country. [2524-034 (2005) : 63]

You’ll then identify and provide options to deliver the desired attributes. Certainly with a PhD in materials science, mechanical engineering, biomimetics or a related field, [2489-013 (2005) : 64-65]

You’ll work within regulations and with our partners, operating collaboratively and using your influencing skills to ensure environmental improvements. [2515-005 (2005) : 55]

Your ability and desire to learn new techniques in a dynamic team environment will be particularly welcome. [2481-059 (2005) : 71]

Your ability and desire to learn new techniques in a dynamic team environment will be particularly welcome. [2481-019 (2005) : 58]

Your ability to work alone and solve problems under pressure will be essential, [2515-026 (2005) : 65]

Your broad interest in science and technology will be complemented by the ability to communicate clearly and enthusiastically at all levels. [2502-004 (2005) : 55]

Your broad knowledge of physical and mechanical systems, instrumentation and computing will assist you to initiate and conduct research within a dynamic R&D environment and to interact with project staff, customers and senior management. [2515-041 (2005) : 70]

Your communication and decision making skills will be first class [2481-055 (2005) : 70]

Your development of new in vivo models relevant to cystic fibrosis lung disease will also be key. [2528-043 (2005) : 77]

Your duties will be broad reaching, ranging from the biochemical analysis of clinical samples through to formulation and analysis of new products for skin care. [2489-013 (2005) : 64-65]

Your duties will include assisting senior scientific staff in the evaluation and summarisation of studies relating to pesticides/contaminants in food and the preparation of human health exposure assessments. [2515-048 (2005) : 72]

Your duties will include educational and demonstrating in dissecting room anatomy classes for medical and science students, surface anatomy and other tutorials and lectures. [2502-048 (2005) : 71]

Your duties will include producing promotional material (e.g. annual report, newsletters) and ensuring that the NC3Rs website is up-to-date and continually evolving. [2511-018 (2005) : 57]

Your duties will include supervision and demonstrating in dissecting room anatomy classes for medical and science students, surface anatomy and other tutorials and lectures. [2489-031 (2005) : 72]

Your excellent organisational skills will enable you to take responsibility for laboratory management, problem solve and provide expert advice and training. [2498-018 (2005) : 56]

Your focus will be on our 35,000 km of flood defences and how we can maximise their benefits. [2498-028 (2005) : 60]

Your job will involve working with HSE’s state-of-the-art population database tool, to examine the consequences of industrial activity on surrounding communities. [2498-016 (2005) : 56]

Your key qualities will be reliability and the ability to operate as part of a team. [2489-009 (2005) : 62]

Your key responsibilities will be the processing and analysis of samples for electron, confocal and light microscopy including cellular, bacterial, and viral samples along with the coordination of the external quality assurance programme for EM viral diagnostics. [2485-027 (2005) : 66]

Your main focus will be to establish Health Criteria Values through the - commission and generation of toxicological reviews. [2493-030 (2005) : 65]

Your main focus will be to further develop the CLEA model in relation to exposure modelling advances and derive Soil Guideline Values. [2493-030 (2005) : 65]

Your main responsibilities will include primary cytogenetic analysis, the processing and culturing of samples submitted to the unit for analysis, and provision of support for the general day-to-day running of the laboratory. [2489-031 (2005) : 72]

<td>You <em>will</em> have proven field mapping skills and some project leadership experience gained in developing and developed countries especially in ‘basement’ terrains. [2515-009 (2005) : 57]</td>
</tr>
<tr>
<td>Co Ex</td>
<td>You <em>will</em> have skills in molecular biology and in particular experience of gene cloning and sequencing techniques. [2511-029 (2005) : 61]</td>
</tr>
<tr>
<td>Co Ex</td>
<td>You <em>will</em> need a fascination with technology as well as excellent interpersonal skills and either experience in, or have a desire to move into the challenging area of regulatory affairs in a sales environment. [2489-005 (2005) : 60]</td>
</tr>
<tr>
<td>Co Ex</td>
<td>You <em>will</em> need a sound scientific / technical background including significant knowledge and experience in drug product formulation development, pharmaceutical technology, process development and relevant GMPs/GLPs. [2502-013 (2005) : 59]</td>
</tr>
<tr>
<td>Co Ex</td>
<td>You <em>will</em> possess excellent organisational skills and ideally have post-graduate laboratory experience. [2502-057 (2005) : 73]</td>
</tr>
<tr>
<td>Co Ex Co</td>
<td>An energetic self-starter, you <em>will</em> have at least 5 years’ experience in pharmaceutical research and development including preformulation, formulation development and clinical supply manufacture. [2481-063 (2005) : 72]</td>
</tr>
<tr>
<td>Co Ex Di</td>
<td>An enthusiastic scientist with 5-10 years' post-doc in vivo drug discovery experience with a PhD in Pharmacology, Physiology or a related discipline, you <em>will</em> be scientifically credible with significant experience of drug discovery in a biotech or pharmaceutical environment and a track record of delivery on NCE projects as part of a multidisciplinary team. [2519-021 (2005) : 61]</td>
</tr>
</tbody>
</table>
Familiar with the principles of GMP and GLP you will ideally be able to offer us at least two years' experience within an analytical sciences department, together with a BSc (or equivalent) in Chemistry and excellent organisational and interpersonal skills. A PhD will be required for appointment as Research Associate.

and essentially you will hold a degree level qualification in a relevant science. Applicants will have a good degree in a relevant subject and a keen interest in reproductive biology. Applicants will usually be graduates of an EU university or currently working in a UK or Republic of Ireland hospital or institution. As an experienced hydrometric officer, you’ll probably be a graduate or equivalent in an appropriate discipline.

As the successful candidate you will have a strong scientific background in immunology or molecular biology, ideally to postgraduate degree level. Candidates will have obtained a PhD degree and should ideally have some postdoctoral research experience in the area. Candidates will need to possess a degree in Life Sciences and ideally have an MSc/PhD.

Essentially you will have gained a B.Pharm (Hons) or BSc (Hons) in Life or Physical Science. He/she will have a BSc or equivalent in genetics, biochemistry or a relevant discipline. Ideally you will have a relevant post graduate qualification in Chemistry, or related discipline. It’s likely that you will be a recent graduate.

Candidates will have a degree/MSc/PhD or equivalent in the area of life sciences or organic/medicinal chemistry. Successful candidates will have obtained a BSc in chemistry or a closely related field and must be enthusiastic with a desire to learn. Suitable candidates will have a Science or Engineering degree, and should be able to demonstrate at least 3 years experience in a relevant role with knowledge of patents and associated processes.

Successful candidates will have a degree of BSc or equivalent in a closely related subject. As the successful candidate you will have a strong understanding of Scotland's maritime natural heritage and a commitment to its conservation. For any of these posts, you’ll need a first or second-class honours degree in a relevant subject coupled with two years relevant postgraduate experience, giving you a good understanding of Scotland's maritime natural heritage and a commitment to its conservation. For each post the successful candidate will have a degree and must be able to demonstrate substantial relevant experience.

Interested Applicants will be educated to degree level or equivalent ideally with a science related discipline. Microbiologist experience and qualifications are essential.

The ideal candidate will have a relevant post graduate qualification in Chemistry, or related discipline.
| Di | The successful applicant for this post **will** have a good first degree plus doctorate (or be close to submission) in Engineering, Computer Science or related discipline. [2485-096 (2005) : 89] |
| Di | The successful applicant **will** be educated to postgraduate degree level in the life sciences, [2481-008 (2005) : 56] |
| Di | The successful applicant **will** hold a PhD in a relevant subject, [2489-049 (2005) : 60] |
| Di | The successful applicant **will** hold at least a Higher National Certificate in a related field. [2485-011 (2005) : 60] |
| Di | The successful applicant will be educated to postgraduate degree level in the life sciences, [2485-008 (2005) : 60] |
| Di | The successful applicant **will** hold a PhD in a relevant subject, [2489-049 (2005) : 77] |
| Di | The successful applicant **will** hold a degree in a relevant subject, [2502-022 (2005) : 62] |
| Di | The successful applicant **will** have completed a BSc course in Biomedical Sciences or a related subject recognised by the Health Professions Council (HPC). [2502-022 (2005) : 62] |
| Di | The successful candidate **will** have a degree in molecular biology, biochemistry, bioconjugate chemistry or a similar field. [2481-019 (2005) : 58] |
| Di | The successful candidate **will** have a degree in molecular biology, biochemistry, bioconjugate chemistry or a similar field. [2481-059 (2005) : 71] |
| Di | The successful candidate **will** have a good first degree in engineering or physics. [2502-038 (2005) : 68] |
| Di | The successful candidate **will** have a higher degree, preferably a doctorate in a relevant subject such as computing science, engineering science, physics, mathematics or a suitable aspect of biology. [2519-073 (2005) : 77] |
| Di | The successful candidate **will** have recently graduated with a degree in a relevant subject, [2502-038 (2005) : 68] |
| Di | The successful candidate **will** ideally possess either a PhD or a good 1st/2nd degree in physics, maths or similar discipline. [2489-021 (2005) : 68] |
| Di | To be successful in these roles, you **will** have a minimum of an honours degree in Chemistry or a related subject, although a MSc/PhD would be a definite advantage, as would experience in the analysis of APIs and/or drug products within the healthcare industry. [2489-022 (2005) : 69] |
| Di | To be successful in this role, you **will** need a BSc (ideally with an MSc or PhD) in a Biomedical discipline. [2528-045 (2005) : 77] |
| Di | With a good First Degree in Chemistry, Physics, Biology or other relevant subject and significant practical work experience in a related discipline, you **will** be able to contribute to curriculum design and development and be able to teach at a range of levels, i.e. undergraduate / postgraduate. [2485-101 (2005) : 90] |
| Di | With a relevant first degree, you’ll also ideally be qualified to MSc or PhD level. [2498-043 (2005) : 66] |
| Di | You **will** be educated in an engineering or scientific discipline at good degree/ further degree level. [2489-005 (2005) : 60] |
| Di | You **will** have a biological sciences or veterinary degree possibly with further qualifications in an appropriate scientific discipline [2502-024 (2005) : 62] |
| Di | You **will** have a degree in a life science subject [2506-048 (2005) : 72] |
| Di | You **will** have a first degree in a biological science, which **should** include a substantial cell biology component. [2506-022 (2005) : 63] |
| Di | You **will** have a good honours degree and preferably a higher degree in an appropriate subject area. [2506-054 (2005) : 73] |
| Di | You **will** have a good honours degree in a life science subject, preferably biochemical or pharmacology related and ideally a higher degree such as a PhD. [2502-041 (2005) : 68] |
| Di | You **will** have a PhD in molecular biology, cell biology, biochemistry, pharmacology or a similar discipline. [2506-048 (2005) : 72] |
| Di | You **will** have a PhD in molecular biology, genetics, pharmacology or a similar discipline. [2506-048 (2005) : 72] |
| Di | You **will** have an excellent first degree in chemistry, with strength in organic chemistry and possibly a postgraduate qualification in medicinal chemistry or biochemistry. [2528-023 (2005) : 68] |
| Di | You **will** have obtained a PhD in a biomedically related area [2485-077 (2005) : 83] |
| Di | You **will** have some knowledge of composites and their various applications. [2524-041 (2005) : 65] |
You will hold a BSc degree in a relevant subject and should have experience of molecular genetic technology and ideally experience with automation, robotic systems and electronic data management. [2519-028 (2005) : 64]

You will hold a degree or equivalent in an appropriate Biological Science. [2493-035 (2005) : 67]

You will hold a university degree in an appropriate technical subject. [2519-010 (2005) : 57]

You will ideally have a PhD in Immunology/Haematology or a closely related subject. [2489-047 (2005) : 76]

You will need a degree in marine biology or a relevant subject. [2485-073 (2005) : 82]

You will need a relevant degree or its equivalent. [2489-029 (2005) : 71]

You will preferably hold a PhD in mass spectrometry and/or proteomic research, but this is not essential if you possess a strong research background. [2524-008 (2005) : 54]

You’ll need a minimum of BTEC/A level in a Physical Science, or BSc or equivalent qualifications. [2481-034 (2005) : 64]

A PhD and BSc/Masters in Physics or Materials Science are required or a mechanical engineering MSc with proven skills in electromechanical stress analysis will also be considered. [2515-014 (2005) : 59]

A successful molecular or cell biologist with basic skills in bioinformatics, the candidates will also be skilled in quantitative gene expression analysis at the RNA and protein level. [2485-039 (2005) : 71]

As well as a PhD in nutritional epidemiology or human nutrition, you’ll have an understanding of the drivers which form the basis of the relationship between diet, lifestyle and health. [2489-012 (2005) : 63]

As well as being a graduate in a Biological, Toxicological, Environmental or health-based discipline, or in Chemistry, you will have the ability to evaluate technical data, and compile in-depth reports. [2506-003 (2005) : 54]

Educated to a minimum of degree level in physics, chemistry or related discipline plus two years' relevant experience, or a minimum of eight years' relevant experience, you will be marked out by your strong analytical, prioritisation and project management skills. [2502-004 (2005) : 55]

Educated to at least BSc level, you will have excellent programming ability including advanced SAS BASE skills and ideally knowledge of SAS Macro. [2502-005 (2005) : 56]

Educated to degree level in a relevant biological science, you’ll be able to demonstrate creativity and excellent problem-solving skills. [2506-022 (2005) : 63]

Educated to degree level in Pharmacology or a related discipline, you will be a self-motivated individual with a creative approach and good practical laboratory skills. [2524-005 (2005) : 53]

Educated to degree level with some experience of client interactions, you’ll be an effective communicator, have good organisational skills and enjoy working to tight deadlines. [2515-056 (2005) : 74]

Educated to degree level, or equivalent, in an engineering or physics discipline, you will be a chartered engineer or have relevant experience that could lead to chartered status. [2515-024 (2005) : 64]

For this role you will require: [2485-034 (2005) : 70]

Going back a bit, you’ll need a PhD or equivalent scientific qualification and a reputation for delivering in scientific or technical areas. [2489-007 (2005) : 61]

Ideally a graduate in Economics or a closely relevant technical field, you’ll certainly have an in-depth understanding of industrial business economics and trading dynamics. [2485-026 (2005) : 66]

Ideally, you will have a degree in a physical science or engineering subject and be able to demonstrate a methodical approach to problem solving. [2502-036 (2005) : 67]

Qualified to a minimum of BSc with 2+ years' experience in this area, you will have good interpersonal skills and basic IT knowledge. [2524-046 (2005) : 68]

Qualified to degree level in a scientific discipline, you will have a technical understanding of water supply and treatment processes. [2528-021 (2005) : 68]

Qualified to degree level in microbiology, biotechnology, biochemistry or a related discipline, you will be able to illustrate a proven track record working on infectious diseases. [2528-019 (2005) : 66]
<p>| <strong>Di Co</strong> | Qualified to degree level or equivalent in a biological discipline you <strong>will</strong> need good communication skills, be able to think innovatively and work well as part of a team. [2515-010 (2005) : 58] |
| <strong>Di Co</strong> | Qualified to HNC standard, or ideally degree level, in Chemistry or a related subject, you <strong>will</strong> be a team player with a flexible attitude and first class communication skills. [2524-033 (2005) : 63] |
| <strong>Di Co</strong> | Qualified to PhD level in an area related to pharmaceutical and/or biomedical microbiology, you <strong>will</strong> teach general microbiology, disinfection, sterilisation, antimicrobial chemotherapy and undertake other teaching duties. [2498-067 (2005) : 73] |
| <strong>Di Co</strong> | The appropriate candidate <strong>will</strong> have relevant academic achievement (BSc., MSc., PhD, or equivalent) supported by a substantial peer-reviewed publication record in the field of clinical microbiology/molecular biology, and demonstrable familiarity with state-of-the-art, computer-based data analysis techniques. [2528-032 (2005) : 72] |
| <strong>Di Co</strong> | The successful applicant <strong>will</strong> hold a science degree, have excellent analytical and communication skills, a clear writing style, and time management and IT skills. [2515-016 (2005) : 60] |
| <strong>Di Co</strong> | The successful candidate <strong>will</strong> have relevant academic achievement (BSc., MSc., PhD, or equivalent) supported by a substantial peer-reviewed publication record in the field of clinical microbiology/molecular biology, and demonstrable familiarity with state-of-the-art, computer-based data analysis techniques. [2528-032 (2005) : 72] |
| <strong>Di Co</strong> | The successful candidate <strong>will</strong> have a Honours degree in a relevant area, proven skills in detailed optical measurements and computational simulation techniques. [2511-031 (2005) : 60] |
| <strong>Di Co</strong> | With GCSEs at Grade C or above in Biology/Botany, Mathematics and English, you <strong>will</strong> be an excellent communicator with good general IT skills. [2511-002 (2005) : 52] |
| <strong>Di Co</strong> | You <strong>will</strong> also be degree qualified in science, engineering or a related discipline, and ideally have membership of a professional institution. [2493-033 (2005) : 66] |
| <strong>Di Co</strong> | With a Ph.D. or equivalent experience, you <strong>will</strong> have an excellent understanding of microbial metabolism and be familiar with classical and/or molecular approaches to strain development. [2481-038 (2005) : 65] |
| <strong>Di Co</strong> | With a strong background in veterinary epidemiology and mathematical modelling, you <strong>will</strong> be responsible for the advancement of the programme and report to the Principal Investigator. [2498-031 (2005) : 60] |
| <strong>Di Co</strong> | You <strong>will</strong> be a material scientist or a physical chemist responsible for management oversight of AWE's Science and Technology Materials Research Programmes, ensuring that the MOD's interests are looked after as cost effectively and efficiently as possible. [2506-010 (2005) : 58] |
| <strong>Di Co</strong> | You <strong>will</strong> be an Honours Graduate with good written and spoken English. [2502-017 (2005) : 60] |
| <strong>Di Co</strong> | You <strong>will</strong> be educated to degree level, or equivalent, and be skilled in working as part of a team, with a range of media developers and authors. [2485-086 (2005) : 86] |
| <strong>Di Co</strong> | You <strong>will</strong> have a background in Chemistry, Chemical Engineering, Mechanical Engineering or a related field and an enquiring and rigorous approach to research together with a strong intellect and disciplined work habits. [2515-082 (2005) : 82] |
| Di Co | You <strong>will</strong> have a BSc in Biomedical or Biochemical Engineering as a minimum and possess strong verbal and written communication skills with the ability to interact well with laboratory scientists and clinical production personnel. [2515-012 (2005) : 58] |
| Di Co | You <strong>will</strong> have a degree and PhD in physics or chemistry, and a strong research background relevant to the measurement of nanoparticles. [2481-062 (2005) : 72] |
| Di Co | You <strong>will</strong> have a degree in a relevant subject and have extensive knowledge of mechanical engineering and the properties of materials. [2506-008 (2005) : 56] |
| Di Co | You <strong>will</strong> have a Ph.D. in the physical or mathematical sciences and good IT skills, especially Unix and programming in Fortran, IDL or similar. [2524-051 (2005) : 70] |
| Di Co | You <strong>will</strong> have a PhD in an appropriate subject, preferably with an interest and proven expertise in mitochondrial bioenergetics and enzymology. [2506-050 (2005) : 72] |
| Di Co | You <strong>will</strong> have a PhD in an appropriate subject, preferably with interest and proven expertise with membrane proteins required to study the structure and function of the rotary engine in ATP Synthase from mitochondria. [2489-008 (2005) : 62] |
| Di Co | You <strong>will</strong> have a PhD in microbiology, immunology or a similar field and enjoy the challenge of participating with the PI's on a series of projects focussing on breakthrough research with direct clinical relevance as well as ensuring communication within the consortium. [2502-055 (2005) : 73] |
| Di Co | You <strong>will</strong> have a PhD with skills in practical plant pathology and handling fungi. Experience with glasshouse trials or seed microbiology <strong>would</strong> be an advantage. [2485-091 (2005) : 87] |
| Di Co | You <strong>will</strong> have a strong background in experimentation and theory of complex fluids. [2511-055 (2005) : 71] |
| Di Co | You <strong>will</strong> have a strong background in soil biological processes and an ability to translate this understanding into soil quality assessment procedures. [2511-041 (2005) : 65] |
| Di Co | You <strong>will</strong> have, or be about to obtain, a PhD in analytical chemistry, analytical biochemistry or biophysical chemistry and an interest in instrument development. [2493-050 (2005) : 70] |
| Di Co | You <strong>will</strong> need an advanced scientific degree (MSc or PhD) in the Life Sciences, excellent writing and organisational skills. [2511-025 (2005) : 59] |
| Di Co | You’ll ideally have a degree or equivalent, preferably in Environmental Science or Geography, and a working knowledge of water resources, as well as GIS. [2515-005 (2005) : 55] |
| Di Co | Your honours degree in microbiology or a related biological science <strong>will be complemented</strong> by an up-to-date understanding of food safety issues. [2519-047 (2005) : 70] |
| Di Co Ex | The Fellow appointed <strong>will</strong> hold a medical degree or higher degree in science (PhD) and have evidence of research aptitude or clinical experience in hypertension. [2481-083 (2005) : 79] |
| Di Co Ex | You <strong>will</strong> have a PhD and an interest and relevant experience in sensor technology and its application in buildings. [2528-063 (2005) : 86] |
| Di E | Holding a good life science honours degree, and with training, the post <strong>will</strong> lead in full accreditation by the SVT. [2489-027 (2005) : 70] |
| Di Ex | A relevant BTEC or BSc or equivalent experience <strong>will be required</strong> for appointment as Research Assistant [2524-050 (2005) : 69] |
| Di Ex | Applicants <strong>will</strong> require a good first degree in a physical or biological science, possibly a second degree, together with proven experience in one or more of the following: water resources, water quality, aquatic ecosystems, air quality and meteorology. [2493-025 (2005) : 62] |
| Di Ex | Candidates <strong>will</strong> either have a BSc plus 2-4 years’ relevant experience or a lower qualification plus 4-6 years’ relevant experience. [2506-020 (2005) : 62] |
| Di Ex | For both posts you <strong>will</strong> be degree qualified, with at least two years' relevant postgraduate experience. [2506-012 (2005) : 58] |
| Di Ex | For other roles, you’ll need a relevant first degree and at least two years' relevant postgraduate experience in industry or academia. [2485-051 (2005) : 75] |
| Di Ex | For this pivotal post you <strong>will</strong> have: [2511-034 (2005) : 62] |
| Di Ex | For this pivotal post you <strong>will</strong> have: [2515-020 (2005) : 62] |
| Di Ex | Ideally at PhD level, you <strong>will</strong> have at least five years’ post-doctoral pharmaceutical and/or biotech experience gained in computational chemistry. [2493-008 (2005) : 57] |
| Di Ex | Ideally degree qualified in a scientific, environmental or engineering discipline, you’ll need at least three years’ relevant industry experience, ideally within a regulated industry. [2485-038 (2005) : 71] |
| Di Ex | Ideally the successful candidates <strong>will</strong> be graduates with laboratory experience of molecular biology, protein biochemical methods, cell culture and data handling. [2485-062 (2005) : 78] |
| Di Ex | Ideally you <strong>will</strong> be a Chemistry graduate with at least 6 months laboratory experience. [2489-009 (2005) : 62] |
| Di Ex | Ideally you <strong>will</strong> be a recent graduate/post graduate probably in a chemistry/chemical engineering/biotechnology discipline, preferably with two or more years' industrial experience. [2528-030 (2005) : 71] |
| Di Ex | Ideally you <strong>will</strong> have a background in an analytical laboratory and experience of QA systems. [2524-033 (2005) : 63] |
| Di Ex | Ideally you'll have a relevant scientific degree and experience, while other useful skills - such as mountaineering, building or maintenance - <strong>would</strong> be an advantage. [2528-050 (2005) : 80] |
| Di Ex | Ideally, candidates <strong>will</strong> have a research degree with 5-10 years experience in a regulatory environment. [2524-007 (2005) : 54] |
| Di Ex | Ideally you <strong>will</strong> be a graduate in organic chemistry with at least 2-3 years industrial experience. [2489-036 (2005) : 73] |
| Di Ex | Ideally, you will have an honours degree in one of the physical sciences, Chemistry, Physics and variants thereof, or the Biological Sciences where analytical chemistry formed a major subject, or hold an HNC accompanied by at least three years' industrial experience in the application of spectroscopy. [2515-015 (2005) : 60] |
| Di Ex | In addition to a BSc in Biochemistry, Biomedical or Analytical Science, you <strong>will</strong> have at least two years' relevant experience, ideally in a GLP environment. [2489-019 (2005) : 68] |
| Di Ex | In addition, you <strong>will</strong> need a degree in toxicology, epidemiology, or a related biological science, and four years' post-graduate experience, ideally in air pollution, noise, or epidemiological analysis. [2481-051 (2005) : 69] |
| Di Ex | Probably qualified to degree level in biosciences or forensics, you <strong>will</strong> bring significant experience of selling into the forensic DNA sector, including the management of field sales and key account teams. [2511-017 (2005) : 57] |
| Di Ex | Qualified to degree or equivalent in Microbiology and trained and experienced in the routine control and validation of sterilization and microbiological testing you <strong>will</strong> have a minimum of three years' experience in the medical device or pharmaceutical field. [2528-047 (2005) : 79] |
| Di Ex | Qualified with a good degree in Chemistry or related, you <strong>will</strong> have relevant experience ideally in classical wet chemistry and instrumental techniques such as ICP, AAS, FTIR, XRF, IC and GC. [2528-027 (2005) : 70] |
| Di Ex | Senior Researchers <strong>will</strong> have at least a Master's qualification or preferably a PhD in a relevant subject, plus at least three years of academic research which may include experience of policy development. [2524-054 (2005) : 72] |
| Di Ex | Suitable candidates <strong>will</strong> be science graduates with relevant experience. [2524-068 (2005) : 76] |
| Di Ex | The appointee <strong>will</strong> have a PhD in a Physical / Environmental Chemistry area and a strong background in basic and applied research. [2481-071 (2005) : 75] |
| Di Ex | The candidate <strong>will</strong> be qualified to degree level in zoology or relevant marine science and preferably have experience of working to contract deadlines and quality assured standards. [2481-010 (2005) : 56] |
| Di Ex | The ideal candidate <strong>will</strong> be a Chemistry Graduate with at least ten years experience in a modern petroleum testing laboratory operating a certified quality system, at least five years of [2485-031 (2005) : 68] |
| Di Ex | The ideal candidate <strong>will</strong> have graduated with at least a 2:1 and have some experience of working in a pharmaceutical environment preferably within a medicinal chemistry role. [2519-033 (2005) : 65] |
| Di Ex | The ideal candidate <strong>will</strong> possess a degree in Chemistry or related science along with a minimum of 3 years experience in product and process characterisation; [2481-047 (2005) : 68] |
| Di Ex | The ideal team leaders <strong>will</strong> have a BSc and PhD in life sciences with at least five years postdoctoral employment. [2485-039 (2005) : 71] |
| Di Ex | The post holders <strong>will</strong> have a PhD in an ecological or related discipline and experience in modelling. [2528-051 (2005) : 81] |</p>

<tr>
<td>You will hold a PhD in an appropriate physical science, preferably with experience of applying magnetic resonance methods to chemical spectroscopy.</td>
<td>[2515-029 (2005) : 66]</td>
</tr>
<tr>
<td>You will ideally have a PhD in Pharmacology/Physiology or a closely related subject and additional professional experience within these subject areas would be welcomed.</td>
<td>[2528-055 (2005) : 82]</td>
</tr>
<tr>
<td>You will possess a degree in Microbiology/Molecular Biology, with several years experience in the application of a range of relevant molecular techniques to the study of bacterial systems.</td>
<td>[2502-024 (2005) : 62]</td>
</tr>
<tr>
<td>You will probably be qualified to MSc/PhD level and have a background in virology, immunology or protein chemistry and experience of assay development.</td>
<td>[2481-049 (2005) : 68]</td>
</tr>
<tr>
<td>You will probably have a degree in a relevant discipline and/or experience in relevant areas.</td>
<td>[2481-049 (2005) : 68]</td>
</tr>
<tr>
<td>You’ll be a Biological Science graduate with practical experience of PCR and ideally 2-3 years’ relevant experience.</td>
<td>[2489-013 (2005) : 64-65]</td>
</tr>
<tr>
<td>You’ll have a PhD in a biological subject, with extensive experience of molecular biology and mammalian cell culture, knowledge of skin biology, although not essential, would be highly desirable.</td>
<td>[2489-013 (2005) : 64-65]</td>
</tr>
<tr>
<td>You’ll need a PhD in a relevant discipline and 3-5 years’ post doctoral experience.</td>
<td>[2498-037 (2005) : 64]</td>
</tr>
<tr>
<td>You’ll need a PhD in relevant discipline and 3-5 years’ post doctoral experience.</td>
<td>[2498-037 (2005) : 64]</td>
</tr>
<tr>
<td>Your degree in toxicology or a related biological science will be complemented by at least four years' post-graduate experience, ideally in toxicology or epidemiology.</td>
<td>[2481-051 (2005) : 69]</td>
</tr>
<tr>
<td>Your first degree will be complemented by research experience in cell biology and bioengineering, preferably including the development of medical products or processes.</td>
<td>[2506-022 (2005) : 63]</td>
</tr>
</tbody>
</table>
Ideally you’ll have a degree or equivalent in an Environmental Science subject and relevant experience - but if you don’t, and have strong skills in a related area, we might consider training you for this role. [2515-005 (2005) : 55]

A PhD with good electrophysiology skills, your several years’ postdoctoral experience, preferably in industry will probably include a cardiovascular, endocrine or CNS area. [2485-066 (2005) : 80]

Along with a relevant PhD, you will need at least two years’ post-doctoral experience as well as excellent knowledge of experimental design and have a genuine interest in respiratory diseases. [2528-043 (2005) : 77]

An Applied Biology with Microbiology (or similar) graduate with a minimum of 3 years’ relevant experience in the pharmaceutical or allied industries, you will have experience in either microbiological assays, LAL testing and water testing or environmental control and diagnostics. [2485-028 (2005) : 66]

Applicants will have a minimum of a science degree or equivalent in either physics or chemistry and preferably two years commercial experience in mass spectrometry as either an engineer or running a mass spectrometer. [2519-012 (2005) : 58]

Degree qualified or equivalent, you’ll have flood warning experience and strong organisational, analytical and communication skills. [2485-038 (2005) : 71]

Degree qualified or equivalent, you’ll need a good understanding of hydrology and hydraulics and some mathematical modelling experience. [2485-038 (2005) : 71]

Educated to degree level, with around three years’ relevant experience, you will need a wide knowledge of integrated systems for monitoring land, air and water environments. [2502-002 (2005) : 54]

For this key strategic post you will need: [2481-015 (2005) : 58]

Holding a personal HO licence, you will have at least 3 years hands on experience, (ideally in a GLP environment), in the pre-clinical in vivo antitumour and pharmacological evaluation of cancer agents. [2481-027 (2005) : 61]

Ideally with a PhD in a farm science/health topic and at least five year’s experience, you will have a proven ability to meet deadlines and work on your own initiative. [2511-040 (2005) : 65]

Degree qualified or equivalent, you will have at least three years’ experience in, and a good knowledge of, the Biodiversity Action Plan process and of the way in which local and regional government works and relates to national Government. [2485-049 (2005) : 74]

Medically qualified with expertise in clinical pharmacology/toxicology, you will have experience of a range of regulatory mammalian toxicity study types and their interpretation, and knowledge of risk assessment and risk management procedures relevant to human exposures to chemicals. [2489-018 (2005) : 67]

Qualified to PhD level, you will be experienced in a range of molecular biology techniques, particularly the use of microarrays, and ideally familiar with the handling of micro-organisms. [2506-006 (2005) : 56]

Successful candidates will have been trained to MSc or PhD level and have at least 5 years’ practical experience in toxicology or ecotoxicology as a study director or in a comparable position. [2515-008 (2005) : 56]

The ideal candidate will demonstrate the following attributes: [2519-034 (2005) : 66]

The ideal candidate will possess a degree in Chemistry with inorganic analytical skills, ideally with manufacturing plant experience, Catalysts knowledge and experience and also to have had chemical industrial work experience. [2481-047 (2005) : 68]

To be considered you’ll need a relevant PhD and at least five years' post-graduate experience in a similar laboratory environment, including acting in a supervisory capacity. [2502-035 (2005) : 67]
| **Di Ex Co** | Together with a good Biology degree, you **will** bring experience of cell culture, ELISA, RT-PCR and molecular cloning techniques, plus a careful and methodical approach to record keeping. [2506-006 (2005) : 56] |
| **Di Ex Co** | Together with a relevant degree and considerable industry experience, you’ll need a broad understanding of chemical analysis and the techniques involved. [2528-036 (2005) : 73] |
| **Di Ex Co** | With a BSc or MSc in Analytical Chemistry, combined with one to six years' post-graduate industry experience in drug discovery, you will be responsible for the continuous management of all aspects of the running of the analytical service for the chemistry group with responsibility for managing any outsourced activities. [2493-008 (2005) : 57] |
| **Di Ex Co** | With a degree in Environmental Sciences, Geography or a numerate discipline and experience of water resources issues including permitting, you’ll have strong project management and organisational skills and an analytical approach to problem-solving. [2515-005 (2005) : 55] |
| **Di Ex Co** | With a degree or equivalent in Botany or a related subject, you will have experience in handling collections together with data and a broad understanding of plant conservation issues. [2511-002 (2005) : 52] |
| **Di Ex Co** | You must have a proven track record in biological research and will have a minimum of 10 years' post doctoral experience, at least half of which gained in a commercial setting where you have also been a successful line manager. [2481-024 (2005) : 60] |
| **Di Ex Co** | You will be a newly qualified or experienced clinical embryologist looking for short-term locum work or research experience, or a postdoctoral research associate. [2485-098 (2005) : 89] |
| **Di Ex Co** | You will be a scientist with proven experience either in the use of multi-factorial experimental design for the structured development and validation of key processes or in the application of investigational tools, such as FMEA, fault tree analysis to structured problem solving. [2498-043 (2005) : 66] |
| **Di Ex Co** | You will be a synthetic organic chemist with at least two years' post-doctoral experience in either an academic or industrial environment, with a strong background in medicinal chemistry and drug discovery. [2502-015 (2005) : 60] |
| **Di Ex Co** | You will be degree qualified in a science discipline, and possess 5-10 years' QA experience in the Pharmaceutical industry in positions of increasing breadth and responsibility. [2502-034 (2005) : 66] |
| **Di Ex Co** | You will have a life science degree or equivalent, five years' experience working in a senior position in a regulated environment and knowledge of GMP, GCP and GLP. [2493-049 (2005) : 70] |
| **Di Ex Co** | You will have a relevant degree and practical lab experience, or equivalent, and be keen to develop your skills in new directions. [2481-037 (2005) : 65] |
| **Di Ex Co** | You will have either a relevant postgraduate degree and a degree in ecology or similar discipline and at least two years' experience in a professional ecological field or a degree in ecology or similar discipline plus three years professional ecological experience. [2485-012 (2005) : 60] |
| **Di Ex Co** | You will have formal academic training, ideally to PhD level, in an appropriate environmental or social science, or in policy analysis, together with substantial experience in either research, research management, preferably with policy development in academic, government or policy institutions. [2524-054 (2005) : 72] |
| **Di Ex Co** | You will ideally have a degree in engineering or (physical) science and experience with, and management of leading-edge high-technology experimental facilities. [2502-047 (2005) : 71] |
| **Di Ex Co** | You will possess a degree in Biochemistry/Pharmacology or equivalent, 10 years' experience of Pharmaceutical or GLP regulated industry, six years' experience in bio assay testing/development, knowledge of aseptic processing with expertise in the aspects of QC analytical control. [2502-034 (2005) : 66] |
| **Di Ex Co** | You will require a scientific degree, backed by experience of standard molecular biology or cell culture and proven ability to record data accurately. [2506-006 (2005) : 56] |

E "Changing the public's perception of engineers and engineering will take a major economic change in manufacturing in the UK to bring it in line with countries such as Germany. [2519-004 (2005) : 50-53]"

E "From the physical setting to the intellectual stimulation, everything about the two-month fellowship was so extraordinary that it will inspire a decade of writing and broadcasting.” [2524-010 (2005) : 55]"

E (It is envisaged that the interviews will be held in April 2005). [2485-089 (2005) : 87]"
*BPL in common with other NHS organisations is implementing the NHS Agenda for Change - a programme which will introduce new terms and conditions of employment. [2506-009 (2005) : 57]

Employers will have to cast a wider net if they want to fill vacancies” [2515-002 (2005) : 52-53]

“Over the next five years,” says Jacob Tompkins, policy development adviser to industry association Water UK, “our members will have to implement the requirements of the European water framework directive on integrating river basin management. [2515-002 (2005) : 52-53]

£26,626 - £38,563 pa (a starting salary of £34k will be available for exceptional candidates). [2506-010 (2005) : 58]

A €26 million building at Trinity College Dublin will house four floors of purpose-built nanoscience labs. [2528-002 (2005) : 58-59]

A background in protein purification would be advantageous but is not essential as training will be provided for the right candidate. [2511-010 (2005) : 54]

A combination of technologies, including proteomics to identify novel molecular complexes downstream of peripherally acting tyrosine kinases, and molecular intervention strategies (for example RNAi), will be used to dissect their roles in appropriate cancer cell models. [2485-003 (2005) : 58]

A competitive salary will be offered and there is scope to broaden the role into new areas in the future. [2528-030 (2005) : 71]

A fourth position, based at Nottingham under the direction of Prof C J Roberts (Clive.Roberts@nottingham.ac.uk) and starting an July 1, will be focussed on the development of novel, functionalised probes. [2498-062 (2005) : 72]

A further two positions are available at Manchester University, under the supervision of Prof P O’Brien (paul.obrien@man.ac.uk), starting October 1, and at Sheffield, under the direction of Dr D G Lidzey (d.g.lidzey@sheffield.ac.uk), from July 1, which will be focussed on the development of novel light sources. [2498-062 (2005) : 72]

A higher starting salary will be considered for those candidates with greater experience. [2485-003 (2005) : 58]

A key member of the management team, you will have a vital role to play in the delivery of a diverse technical programme. [2489-014 (2005) : 66]

A key role will be industrial liaison and helping secure external funding for the Institute’s research programmes. [2498-015 (2005) : 55]

A leading international scientist in Optoelectronics and Laser Science, you will be keen to join a world leading photonics research centre, supported by one of the best laboratory and fabrication facilities in a European University. [2524-074 (2005) : 78]

A multidisciplinary panel will judge applications [2481-084 (2005) : 79]

A post has been funded as part of the Millennium Cohort Study and the post holder will join a multidisciplinary research team involved in determining the acquisition of common childhood infections in early life. [2511-043 (2005) : 67]

A postdoctoral researcher is required to work on a BBSRC-funded project which will investigate the ‘Effects of the pre-hatch environment on musculoskeletal development in the chicken, and the consequences for post-hatch growth and welfare’. [2519-062 (2005) : 74]

A significant number of Ph.D studentships will be available from October 2005 for postgraduate research and training in the following fields: [2485-117 (2005) : 94]

A STEM-CELL therapy for chronic osteoarthritis, the most commonly occurring form of the joint disease, will be tested first in Ireland. [2528-002 (2005) : 58-59]

A stipend of £12,000 pa and tuition fees at the home/EU rate will be paid. [2493-057 (2005) : 72]

A substantial amount of the work will be carried out at containment level III [2528-069 (2005) : 87]

A three-year fixed term contract for both vacancies will apply in the first instance. [2489-028 (2005) : 71]

A three-year fixed term contract will apply in the first instance. [2511-018 (2005) : 57]
A training and career development programme will be established to include: quantitative genetics and other relevant subjects. [2485-068 (2005) : 80]

Academic Fellows will: [2498-049 (2005) : 68]

Accordingly, applicants with a wide range of backgrounds will be considered, but a proven record of research and publication is expected. [2489-025 (2005) : 70]

Activities of metabolites will be assessed by minimum inhibitory concentration determination against a panel of sensitive and resistant strains. [2511-074 (2005) : 77]

AFBI will be a Non-Departmental Public Body (NDBP), sponsored by the Department of Agriculture and Rural Development (DARD). [2511-013 (2005) : 56]

All applicants who have a disability and meet the minimum criteria for the job will be interviewed. [2511-008 (2005) : 54]

All appointments will be for two years, although may be renewable for a further year, subject to funding. [2498-062 (2005) : 72]

All necessary training will be given. [2511-059 (2005) : 72]

All posts will be subject to ‘Agenda for Change’ terms and conditions. [2502-056 (2005) : 73]

All posts will be subject to Job Evaluation. [2506-002 (2005) : 54]

All qualified candidates are encouraged to apply, however Canadians and permanent residents will be given priority. [2515-067 (2005) : 78]

All reasonable travel expenses will be reimbursed. [2481-077 (2005) : 77]

All selected candidates will be required to undergo security clearance. [2511-044 (2005) : 68]

All selected candidates will be required to undergo security clearance. [2519-006 (2005) : 55]

All selected candidates will be required to undergo security clearance. [2528-036 (2005) : 73]

All staff will be subject to Agenda for Change terms and conditions. [2481-041 (2005) : 66]

All third party applications will be passed to Remtec [2489-005 (2005) : 60]

Also of interest will be the influence of soot on friction and thus on engine fuel economy. [2515-082 (2005) : 82]

Alternatively, as part of our graduate training scheme, you will receive 6 months’ intensive training across all of our research areas [2528-038 (2005) : 74]

Alternatively, you could join Flood Event Management, where your water/flood risk management experience will be invaluable. [2498-028 (2005) : 60]

Alternatively, you will be a graduate seeking to begin your career in industry. [2481-012 (2005) : 57]

although applicants with a directly relevant qualification will be considered. [2481-025 (2005) : 60]

although other disciplines will be considered. [2485-039 (2005) : 71]

although relevant experience in weapons technology, electronics or mechanical engineering will be considered. [2524-045 (2005) : 66-67]

Although the post will be based at the MRC Clinical Trials Centre, London, the postholder would be expected to occasionally travel to Africa. [2524-011 (2005) : 56]

An announcement on the successful applications will be made by the end of March 2005. [2485-021 (2005) : 62]

An attractive salary package will be offered depending on qualifications and experience. [2519-017 (2005) : 60]

An attractive salary, commensurate with experience, will be offered for this post. [2498-061 (2005) : 71]

An attractive salary, commensurate with experience, will be offered for this post. Candidates may discuss the position informally with Prof. Malcolm Smyth [2528-009 (2005) : 63]

An excellent training environment will be provided by the SUPA Graduate School, giving candidates access to a wide range of courses across Scotland. [2485-017 (2005) : 61]

An initial salary in the range £22,000 - £26,000 will be payable. [2506-042 (2005) : 70]

An International Search Committee will review applications. [2528-009 (2005) : 63]

An understanding of ceramic forming processes and strength development would be an advantage, but training will be provided for use of the more specialised equipment. [2519-020 (2005) : 61]

An understanding of pharmacology and radiobiology and practical experience in molecular biology techniques would be an advantage although training will be given. [2502-057 (2005) : 73]
and a buffet lunch will be served. [2485-117 (2005) : 94]

and being embedded in your sponsoring company means your career prospects in the water and environmental sector will be accelerated. [2506-072 (2005) : 78]

and if successful will be appointed on University Grade RS1(A) (starting salary £20,540 - £25,699 p.a.). [2519-066 (2005) : 75]

and it is anticipated that the candidate will hold a cross-appointment in the Department of Medicine of the M.U.H.C. [2515-067 (2005) : 78]

and on completion of your training you will be encouraged to participate in the departmental on-call rota. [2493-026 (2005) : 63]

and personal development will be encouraged. [2489-031 (2005) : 72]

and preference will be given to lecturers wishing to explore novel and original lines of research that may not yet be at a stage suitable for Research Council support. [2515-088 (2005) : 83]

and it is anticipated that the candidate will hold a cross-appointment in the Department of Medicine of the M.U.H.C. [2515-067 (2005) : 78]

and if successful will be appointed on University Grade RS1(A) (starting salary £20,540 - £25,699 p.a.). [2519-066 (2005) : 75]

and personal development will be encouraged. [2489-031 (2005) : 72]

and preference will be given to lecturers wishing to explore novel and original lines of research that may not yet be at a stage suitable for Research Council support. [2515-088 (2005) : 83]

and the results will be announced in March 2005. [2481-084 (2005) : 79]

and the student will gain experience in both academic and industrial research. [2506-068 (2005) : 77]

and the successful candidate will be appointed on the scale according to experience and qualifications. [2524-065 (2005) : 75]

and we will consider a range of expertise particularly in relation to crime scene investigation, biological and chemical forensic analysis or human identification. [2498-055 (2005) : 70]

and will also enable the Academy to be more proactive in its relations with government and other national bodies. [2515-016 (2005) : 60]

and will be a necessary requirement for appointment at the Senior Technician level. [2511-061 (2005) : 73]

and will be based at the Moreldun Research Institute, involving frequent travel to East Africa. [2498-031 (2005) : 60]

and will be based at St Bartholomew’s Hospital, West Smithfield in the City of London. [2506-062 (2005) : 75]

and will be paid a stipend of £10,000 p.a. (tax free). [2485-114 (2005) : 93]

and will be strongly encouraged to build collaborations with UK and foreign visiting scientists. [2524-021 (2005) : 60]

and will be tenable for a period of two years in the first instance. [2524-071 (2005) : 77]

and will begin on 1st October 2005 or as soon as possible thereafter. [2506-038 (2005) : 69]

and will cover PhD fees. [2481-083 (2005) : 79]

and will get detailed information about the recruitment process. [2524-078 (2005) : 79]

and will have an excellent opportunity to broaden his/her scientific horizons. [2485-100 (2005) : 90]

and will have regular contact with staff throughout the University and outside companies. [2485-082 (2005) : 84]

and will have the opportunity to do research within the Chemistry Department. [2511-054 (2005) : 71]

and will not be used for any other purpose [2485-025 (2005) : 65]

and will not be used for any other purpose. [2489-014 (2005) : 66]

and will not be used for any other purpose. [2511-042 (2005) : 66]

and will not be used for any other purpose. [2524-045 (2005) : 66-67]

and will play a key role in the development, validation and manufacture of therapeutics for the treatment of allergy. [2481-020 (2005) : 59]

and will range from £20,226 - £26,327 (NTEC 5) or £26,327 - £30,738 (NTEC 6) per annum including London Allowance of £2,456 per annum. [2511-061 (2005) : 73]

and will seek to achieve true equality of opportunity for all members of its community. [2524-066 (2005) : 75]

and will seek to achieve true equality of opportunity for all members of its community. [2485-098 (2005) : 89]

and will seek to achieve true equality of opportunity for all members of its community. [2489-042 (2005) : 75]
Applications are invited for four 5-year fellowships which will lead to a permanent academic post on the successful completion of a probationary period. [2498-049 (2005) : 68]

Applications for both the Fellowship and the Studentship must identify a preferred research centre, an indication of why that centre is particularly appropriate for the research, and confirmation from the relevant head of department that they will administer and supervise the Research Fellowship/Studentship. [2481-083 (2005) : 79]

Applicants should ideally hold a life sciences degree or equivalent MLSO qualification (although training will be given in immunoassay and liquid handling). [2515-038 (2005) : 69]

Applicants will have: [2481-020 (2005) : 59]

Applicants will only be contacted if invited for interview. [2515-080 (2005) : 81]

Applicants with less experience but strong future potential will be considered for a post at Band 6. [2489-025 (2005) : 70]

Application packs will be sent on 21st January 2005. [2481-051 (2005) : 69]

Applications are also invited for a part-time Genetic Technologist (MT02), who will be based at the Oxford Molecular Genetics Laboratory. [2485-030 (2005) : 68]

Applications are invited for four 5-year fellowships which will lead to a permanent academic post on the successful completion of a probationary period. [2498-049 (2005) : 68]

Applications by CV will not be accepted. [2515-055 (2005) : 74]

Applications for part-time (minimum 15 hours pw) will be considered. [2485-054 (2005) : 76]

Applications for this position will not be acknowledged. [2519-012 (2005) : 58]

Applications from candidates wishing to work part-time or on a job-share basis will be considered. [2485-012 (2005) : 60]

Applications from graduates in microbiology or a related discipline will be welcome. [2519-067 (2005) : 75]

Applications submitted by candidates with relevant formal qualifications considered to be of an equivalent or higher standard to those stated. [2511-013 (2005) : 56]

Applications will be considered from all interested candidates as the College operates an extensive staff development programme, with teaching qualifications available through the UWE Continuing Professional Development programme. [2524-058 (2005) : 73]

Applications will be reviewed by an International Search Committee. [2498-061 (2005) : 71]

Applications will shortly be invited from outstanding physicists for permanent academic positions and 4-5 year research posts within SUPA, an "Alliance for Excellence" formed to enhance Scottish physics research through co-operation and collaboration. [2485-017 (2005) : 61]
Appointees will join a community of some 500 academics, research staff and graduate students dedicated to raising further Scotland’s international standing as a leading centre for physics research. [2485-017 (2005) : 61]

Appointment salary will be dependent on experience and qualifications for appointment on the above scale. [2506-041 (2005) : 70]

Appointment will be for 3 or 4 days per week on a 4 year fixed term basis. [2506-017 (2005) : 61]

Appointment will be made on merit. [2506-062 (2005) : 75]

Appointment will be made on merit. [2506-013 (2005) : 59]

Appointment will be for 3 or 4 days per week on a 4 year fixed term basis. [2506-041 (2005) : 70]

Appointment will be made on merit. [2506-041 (2005) : 70]

Appointment will be at the Lecturer or Senior Lecturer level. [2528-056 (2005) : 83]

Appointment will be made on the Research Associate scale at a level dependent upon your background. [2524-071 (2005) : 77]

Appointments will be based on merit, with independent assessment, openness and transparency of process. [2489-018 (2005) : 67]

Appointments will be made at the Lecturer or Senior Lecturer level. [2528-056 (2005) : 83]

Appointments will be made on the Research Grade Scale, with a starting salary in the range of £21,594 - £27,833 per annum inclusive of London Allowance, depending on experience. [2506-062 (2005) : 75]

Appointments will be made on merit. [2506-041 (2005) : 70]

Appointments will be made on merit. [2506-013 (2005) : 59]

Appointments will normally be made below the gateway. [2519-060 (2005) : 73]

Aptitude is more important than experience as full training will be given. [2519-035 (2005) : 66]

Aptitude is more important than experience as full training will be given. [2524-044 (2005) : 65]

Aptitude is more important than experience as full training will be given. [2519-035 (2005) : 66]

Aptitude is more important than experience as full training will be given. [2524-044 (2005) : 65]

Around 250 awards will be made. [2481-085 (2005) : 79]

As a guide we will appoint at three levels: [2498-012 (2005) : 54]

As a result you'll find that working for Murex Biotech Limited is a blend of career progression and true personal satisfaction. [2498-043 (2005) : 66]

As a senior member of the group, you will play a pivotal role in managing and developing existing services and techniques. [2489-010 (2005) : 62]

As a Senior Patent Engineer, you will play a key part in the development, maintenance and assessment of the patent portfolio. [2493-004 (2005) : 55]

As a University of Southampton employee, you will enjoy the unique benefits of a traditional Russell-Group organisation combined with a modern and outward-looking ambitious University, one of the first to introduce new competitive pay structures. [2506-074 (2005) : 78]

As a Veritas geophysicist, you will have the opportunity to exercise your mind and achieve real results. [2528-046 (2005) : 78]

As Deputy Director, you'll be based in Cambridge, [2493-004 (2005) : 55]

as in-house training will be provided. [2489-019 (2005) : 68]

As one of our graduate trainees you'll receive a salary of £13,256* p.a. rising to £16,089* p.a. [2498-034 (2005) : 63]

As part of our aim to become the best European beer-led drinks company, our central analytical and microbiological laboratories will move into new, state-of-the-art premises. [2515-028 (2005) : 66]

As part of our rapidly growing Preformulation team within the Pharmaceutical Sciences Department, you'll play a key role in preformulation in support of NCE Discovery, Research and Development programmes. [2511-035 (2005) : 63]

As part of our team, you'll work in an environment that's like nothing else on earth, enabling us to perform world-class scientific research while sustaining an active and influential presence for the UK in Antarctic affairs. [2528-050 (2005) : 80]

As part of the Business Development Team, the postholder will play a pivotal role in fulfilling King's mission to transfer knowledge to business and the wider community, by creating new partnerships and strengthening existing relationships with industry. [2506-055 (2005) : 74]

As part of the Global Drug Development division of Roche, you'll also be working at the leading-edge of the pharmaceutical industry, helping to bring important new medicines to market to combat human disease. [2498-047 (2005) : 67]

As such, you will have the chance to play an important and visible role in our strategic decision-making. [2502-008 (2005) : 57]

As the appointment process is likely to be completed prior to the full operation of AFBI, the initial appointment will be to ARINI. [2511-013 (2005) : 56]
As training will be provided. [2506-062 (2005) : 75]

As well as broadening your knowledge of synthetic organic chemistry, you will gain expertise in an array of modern analytical and automated techniques. [2485-070 (2005) : 81]

As well as the opportunity to continually develop your abilities, you’ll enjoy a superb benefits package. [2528-036 (2005) : 73]

As you’ll be joining a $billion company, the rewards package, in each role, reflects this. As well as a competitive salary, you can expect an excellent benefits package. [2506-026 (2005) : 65]

As you’ll be primarily lab-based and part of a small dedicated team, practical and interpersonal skills are vital. [2481-006 (2005) : 55]

At Shell, we never stop looking to the future, or for the people that will make it happen. [2519-005 (2005) : 54]

At the very least, we’ll be looking for numerate graduates with a strong interest in Operational Research and public service, an inventive, creative approach to solving problems and an ability to provide convincing advice based on sound analysis. [2515-023 (2005) : 63]

Attendance at the Open Day will be by invitation only. [2481-077 (2005) : 77]

Attractive salary packages, including assistance with relocation, will be negotiated with successful applicants. [2515-041 (2005) : 70]

Awards will be given preferentially to UK or EC nationals working in the UK or the Republic of Ireland. [2481-083 (2005) : 79]

Awards will be given preferentially to UK or EC nationals working in the UK or the Republic of Ireland. [2481-083 (2005) : 79]

Awards will be made competitively [2515-088 (2005) : 83]

Awards will be offered to researchers for attendance at a National or International symposium where their work has been accepted for presentation. [2481-084 (2005) : 79]

Based in Central Scotland, you will form part of a global research alliances team whose aim is to promote Organon and form strategic alliances with third parties in academia, biotechnology and drug discovery across the globe. [2524-047 (2005) : 68]

Based in the vibrant city of Amsterdam, you will be a part of a dynamic organization, with well-educated and dedicated colleagues. [2485-057 (2005) : 77]

Between them, ScotCHEM and SUPA will receive more than £37 million over the next four years in government and university funding. [2485-001 (2005) : 54-55]

Beyond that, in our broad-ranging and committed environment you will be encouraged to think outside the box — contributing advice and ideas, taking the lead in project work and challenging established methods to achieve scientific advances. [2498-020 (2005) : 57]

Bi will focus on post-genomic data integration with a view to building better drugs through technical improvements in data handling of relevance to proteomics, systems biology, and the prediction and monitoring of protein-protein interactions. [2498-015 (2005) : 55]

Both of the appointments will start as soon as possible, initially for one year. [2493-041 (2005) : 68]

Both positions are research focussed although you will provide up to 20% of your time to the development and delivery of the Department's evolving teaching provision. [2524-067 (2005) : 76]

Both roles will enjoy a competitive salary, benefits package and ongoing training. [2515-026 (2005) : 65]

Bring us a year or two of post-graduate research experience, and we’ll give you new challenges, a fresh sense of purpose and a very rewarding future. [2498-005 (2005) : 51]

Bring us skills like these and you’ll find yourself working with a highly motivated and focused team of flexible and positive minded people on one of the most productive research sites in the industry: a site that is located on England’s scenic south coast where the quality of life lives up to the quality of the science. [2481-061 (2005) : 72]

Building on successful delivery of services over the last four years, we are now establishing a dedicated manufacturing unit which will double our capacity for providing affordable, cytotoxic, anti-infective and pain control ready-to-use products. [2502-003 (2005) : 55]

but candidates with backgrounds such as computer science (eg. computer vision), statistics, data mining and/or with extensive software development experience, will also be considered. [2498-015 (2005) : 55]
but full training will be given. [2493-034 (2005) : 67]

But more importantly, you’ll have the chance to take on a new challenge and make a bigger contribution. [2519-031 (2005) : 65]

But now a local authority is much more likely to ask for an ecological survey and that will need to look at everything.” [2515-002 (2005) : 52-53]

but the scope of this role means you’ll have plenty of opportunities to support physicochemical characterisation, as well as advancing your career within an expanding team. [2511-035 (2005) : 63]

but they will be equally challenging and stimulating. [2506-040 (2005) : 69]

but will be competitive. [2506-024 (2005) : 64]

By establishing a clear career path for graduates, employers will soon gain the experienced professionals it needs further down the line. [2515-002 (2005) : 52-53]

By hosting a number of Research Fellowships and Visiting Senior Researchers, we will bring world-class researchers to Athlone, Ireland. [2481-054 (2005) : 70]

By joining this thriving company you’ll work with progressive management, inventive technologies and alongside the talented scientists who have made us one of the world’s largest and most comprehensive, drug development services companies with net revenues around a billion from nationwide and global operations. [2493-029 (2005) : 64]

Candidates selected for interview will be informed by early January 2006. [2528-077 (2005) : 89]

Candidates who wish to job share will be considered. [2485-053 (2005) : 76]

Candidates will be evaluated on the basis of proven excellence in research and education, their international impact and their ability to compete for external funding. [2498-061 (2005) : 71]

Candidates will be selected on the basis of proven excellence in management, research and education, their international impact, their competencies in the criteria outlined above and their ability to compete for external funding. [2528-009 (2005) : 63]

Candidates with a strong background in general devices or implants will also be considered. [2515-045 (2005) : 71]

Candidates with a strong background in general devices or implants will also be considered. [2528-047 (2005) : 79]

Candidates with an excellent research background in computational or theoretical studies in any area of chemistry will be considered. [2519-068 (2005) : 76]

Candidates with an external source of funding will be eligible for a non-stipendiary award. [2524-075 (2005) : 78]

Candidates with interests in atmospheric chemistry (field/laboratory/modelling) will be particularly welcomed. [2481-071 (2005) : 75]

CASE studentships are collaborative projects with an industrial partner and as such the student will benefit from an increase in their stipend of £2,500 p.a. [2493-058 (2005) : 72]

Catalytically active RNAs based on aptamers will be at the heart of the new technology. [2502-042 (2005) : 69]

Certificated or experienced Radiation Protection Specialist (current RPA 2000 certificate of competence preferred but consideration and training support will be given to a suitable candidate who can evidence appropriate qualifications and experience). [2485-079 (2005) : 83]

Chemical degree essential, clean driving licence, experience not essential as training will be provided. [2498-046 (2005) : 66]

Chemistry, materials, physics and chemical engineering backgrounds will be suitable for these positions. [2493-054 (2005) : 71]

Cleasby accepts that making the changes needed to shift the public image of engineers will not be easy, [2519-004 (2005) : 50-53]

Closing date for applications is Friday 4th March 2005, and decisions on awards will be made in April 2005. [2485-105 (2005) : 91]

Closing date for both posts will be 24 February 2005. [2485-073 (2005) : 82]

Closing date for October 2005 interviews is 16 September 2005. 2006 interview rounds will be held in March, July and October; apply at any time for consideration at the next appropriate round. [2515-023 (2005) : 63]

Closing date is July 29/05 and interviews will be held shortly afterwards. [2506-042 (2005) : 70]

Experience with this technique would be an advantage but full training in this, and other techniques will be provided if required. [2511-019 (2005) : 58]

Fellows will be paid a stipend in addition to expenses, including travel, for Cambridge. [2524-010 (2005) : 55]

Fields considered this year will be: History since c. 1500, English Literature since c. 1500, Materials Science, Sociology and Social Anthropology. [2524-075 (2005) : 78]

Final date for all completed applications will be 21st February 2005. [2485-042 (2005) : 72]

First data from the WAVE array of 18 bottom pressure recorders and 15 moorings will be available from summer 2006. [2489-025 (2005) : 70]

Flexible working will be possible. [2481-072 (2005) : 75]

Following last year’s successful initial call for proposals we will be holding a one-day conference in December in Central London in order to inform on progress of the Government’s civilian CBRN science and technology programme and to outline possible future research directions. [2524-001 (2005) : 16]

For a start, you’ll be joining the largest R&D business in the world – with the largest animal health R&D investment and a strong pipeline. [2481-006 (2005) : 55]

For an appropriately qualified candidate the appointment will be made at lecturer level. [2515-064 (2005) : 77]

For an appropriately qualified candidate the appointment will be made at lecturer level. [2515-079 (2005) : 81]

Comprehensive training will be provided. [2506-006 (2005) : 56]

FREe will focus on the atmospheric, marine and geological forcing of floods. [2481-065 (2005) : 73]

From its outset, the Institute will undertake industry-facing R&D and the commercialisation of software tools through its trading arm, Turbinia Limited. [2498-015 (2005) : 55]

From this autumn onward Imperial College, as part of this programme, will be seeking to appoint PhD students in the linked computational, mathematical and engineering physics modelling of the safety performance of 'Generation IV' nuclear power plant. [2511-069 (2005) : 75]

Full training will be given. [2489-001 (2005) : 58]

Full training will be provided. [2481-034 (2005) : 64]

Funding will be for one year in the first instance. [2489-060 (2005) : 79]

Further details will be given at interview. [2506-009 (2005) : 57]

Further general information, including details of the selection criteria that will be used for shortlisting, can be obtained on tel. (01865) 275262, quoting the reference number below or from the Departmental website http://www.bioch.ox.ac.uk/jobs [2489-064 (2005) : 79]

Giving you the chance to meet the team, you’ll enjoy a tour of the pharmacy department and see firsthand what pharmacy technicians do. [2498-034 (2005) : 63]

Graduates with science degrees are also welcome to apply (a college day-release course for underpinning knowledge will be needed to be undertaken). [2515-050 (2005) : 72]

Help shape our Respiratory Disease Area for cystic fibrosis at our state of the art research facility in Horsham, Sussex and you’ll have the freedom to do just that. [2528-043 (2005) : 77]

However in early 2006 the unit will move to a new laboratory [2481-069 (2005) : 74]

However less experienced scientists will also be considered [2519-066 (2005) : 75]

however, Canadians and permanent residents will be given priority. [2519-068 (2005) : 76]

However, employers will have to cast a wider net if they want to fill their vacancies. [2515-002 (2005) : 52-53]

However, it has been observed that drying in the presence of disaccharides like trehalose or sucrose will lead to protein structures similar to the native structures. [2485-083 (2005) : 85]

However, novel techniques involving molecular methods of MHC class I typing are under development and these will be characterised and applied to this project. [2511-029 (2005) : 61]

If necessary, we will provide training in the use of computational molecular biology techniques, especially those in modern protein analysis and current modelling structure viewing software. [2485-023 (2005) : 64]

If the appointee is a man he will be elected a Fellow of Wadham; [2519-076 (2005) : 78]

Interviews **will be held** in central London on Wednesday 28 September 2005. [2515-016 (2005) : 60]

Interviews **will be held** in early August 2005 [2506-041 (2005) : 70]

Interviews **will be held** in January 2006. [2511-057 (2005) : 72]

Interviews **will be held** in London on Friday, 4 March 2005. [2481-076 (2005) : 77]

Interviews **will be held** in Stanhope on 22nd November (Project Manager) and 23rd (Field Officer). [2524-027 (2005) : 62]

Interviews **will be held** in the week beginning 25 April 2005. [2493-047 (2005) : 70]

Interviews **will be held** in the week commencing 28 February 2005 [2485-091 (2005) : 87]

Interviews **will be held** mid December 2005. [2524-021 (2005) : 60]

Interviews **will be held** mid October 2005. [2515-029 (2005) : 66]

Interviews **will be held** on 15 July 2005. [2506-008 (2005) : 56]

Interviews **will be held** on 18th & 19th August 2005. [2506-009 (2005) : 57]

Interviews **will be held** on 21 July 2005. [2506-052 (2005) : 73]

Interviews **will be held** on 27 and 28 July 2005. [2506-040 (2005) : 69]

Interviews **will be held** on 5 October 2005. [2515-029 (2005) : 66]

Interviews **will be held** on 6th January 2006. [2528-033 (2005) : 72]

Interviews **will be held** on Tuesday 16th August, in Edinburgh. [2506-012 (2005) : 58]

Interviews **will be held** week commencing 11th July 2005. [2502-049 (2005) : 71]

Interviews **will be held** in the week commencing 31 October 2005. [2519-041 (2005) : 68]

Interviews **will take place** approximately 2 weeks after the closing date. [2493-020 (2005) : 60]

Interviews **will take place** on 10 June 2005. [2498-003 (2005) : 50]

Interviews **will take place** on 21 December 2005. [2528-063 (2005) : 86]

Interviews **will take place** on 28 April 2005. [2493-043 (2005) : 69]

Interviews **will take place** on 4th February 2005. [2481-069 (2005) : 74]

Interviews **will take place** on 9th February 2005. [2481-029 (2005) : 61]

Ipsen have recently invested £4.5 million into a new "state of the art" QC laboratory facility at the Wrexham site, which will be occupied from the 2nd Quarter 2006. [2502-034 (2005) : 66]
<p>| E | Irish researchers now have access to 1000 IBM processors, and <strong>will</strong> be able to use the facility for everything from molecular modelling to astrophysics. [2528-002 (2005) : 58-59] |
| E | It is anticipated that first interviews <strong>will be conducted</strong> during the two weeks commencing 24th January 2005. [2481-061 (2005) : 72] |
| E | It is anticipated that funding <strong>will be extended</strong> until the end of September 2007. [2481-074 (2005) : 76] |
| E | It is anticipated that interviews <strong>will be held</strong> during the week commencing 17th October 2005 [2515-025 (2005) : 64] |
| E | It is anticipated that interviews <strong>will be held</strong> in the week 10-16 March 2005. [2485-100 (2005) : 90] |
| E | It is anticipated that interviews <strong>will be held</strong> during the week commencing 17th October 2005. [2519-004 (2005) : 57] |
| E | It is anticipated that funding will be extended until the end of September 2007. [2481-074 (2005) : 76] |
| E | It is anticipated that interviews <strong>will be held</strong> in the week 10-16 March 2005. [2485-100 (2005) : 90] |
| E | It is expected that training <strong>will be provided</strong> in some areas and there are good opportunities and funding available. [2485-022 (2005) : 63] |
| E | It is expected that interviews will be held in the week 10-16 March 2005. [2485-100 (2005) : 90] |
| E | It is expected that training will be provided in some areas and there are good opportunities and funding available. [2485-022 (2005) : 63] |
| E | It is expected that interviews <strong>will be held</strong> in the week 10-16 March 2005. [2485-100 (2005) : 90] |
| E | It is expected that interviews <strong>will be held</strong> during the week commencing 17th October 2005. [2515-025 (2005) : 64] |
| E | It is expected that interviews will be held during the week commencing 17th October 2005. [2515-025 (2005) : 64] |
| E | It is expected that training will be provided in some areas and there are good opportunities and funding available. [2485-022 (2005) : 63] |
| E | It is hoped that the two appointments will be in place by July 2006. [2524-055 (2005) : 72] |
| E | It is hoped that funding will be extended until the end of September 2007. [2481-074 (2005) : 76] |
| E | It is hoped that the use of this test <strong>will improve</strong> the live birth rates achieved via IVF. [2506-018 (2005) : 61] |
| E | It is expected that training will be provided in some areas and there are good opportunities and funding available. [2485-022 (2005) : 63] |
| E | It is likely that there will be a need for a Molecular Biologist, however since more than one appointment is planned, those with other degree disciplines are encouraged to apply. [2493-053 (2005) : 71] |
| E | It is likely that there will be a need for a Molecular Biologist, however since more than one appointment is planned, those with other degree disciplines are encouraged to apply. [2493-053 (2005) : 71] |
| E | It is rare for research from a PSRE to yield marketable products, let alone in such a brief time, but if the scanner makes it, a portion of any profits generated <strong>will go</strong> back to its public sector inventors. [2506-001 (2005) : 52-53] |
| E | It is rare for research from a PSRE to yield marketable products, let alone in such a brief time, but if the scanner makes it, a portion of any profits generated <strong>will go</strong> back to its public sector inventors. [2506-001 (2005) : 52-53] |
| E | It may be straightforward to compare individual salaries like for like, but factors such as cost of living, tax and social security <strong>will determine</strong> if an engineer really is better off in another country. [2519-004 (2005) : 50-53] |
| E | It may be straightforward to compare individual salaries like for like, but factors such as cost of living, tax and social security <strong>will determine</strong> if an engineer really is better off in another country. [2519-004 (2005) : 50-53] |
| E | It'll be a great start to your microbiology career; [2511-045 (2005) : 69] |
| E | Jim Wallace, Scotland's enterprise minister, says the collaboration establishes &quot;a critical mass of innovative and dynamic research expertise&quot; that <strong>will create</strong> 15,000 skilled jobs and <strong>contribute</strong> around £750 million to the Scottish economy. [2485-001 (2005) : 54-55] |
| E | Jim Wallace, Scotland's enterprise minister, says the collaboration establishes &quot;a critical mass of innovative and dynamic research expertise&quot; that <strong>will create</strong> 15,000 skilled jobs and <strong>contribute</strong> around £750 million to the Scottish economy. [2485-001 (2005) : 54-55] |
| E | Job-specific training <strong>will be given</strong>. [2524-042 (2005) : 65] |
| E | Join our European R&amp;D headquarters at Sandwich and you <strong>will soon</strong> realise that we can provide all the support, resources and development opportunities you need for a rewarding and fulfilling career. [2528-042 (2005) : 76] |
| E | Join our Policy team and you <strong>will be</strong> setting the Flood Risk Management (FRM) guidelines for the entire Agency — and beyond. [2498-028 (2005) : 60] |
| E | Join us and you <strong>will have</strong> access to resources that few can match, along with the scope to develop your career into a range of scientific areas. [2528-042 (2005) : 76] |
| E | Join us as an Investigator, and you <strong>will be</strong> part of a dedicated team that sets industry standards in discovering new and effective therapies for cystic fibrosis. [2528-043 (2005) : 77] |
| E | Join us at Syngenta and you <strong>will be</strong> working with leading-edge technology in excellent facilities, [2481-012 (2005) : 57] |
| E | Join us at this exciting time, and our size and small-team structure <strong>will give</strong> you significant visibility and the chance to influence and gain recognition for your efforts. [2485-070 (2005) : 81] |
| E | Join us in finding better medicines to enhance the lives of patients worldwide - and be sure that the results of your work <strong>will reach</strong> them quicker. [2519-016 (2005) : 59] |
| E | Joining a 450-strong team backed by a £multi-million budget, you and our dedicated teams <strong>will help</strong> take our studies forward and contribute significantly to the future. [2506-006 (2005) : 56] |
| E | Joining a 450-strong team backed by a budget of £30 million, you <strong>will take</strong> our studies forward and contribute significantly to the future of animal health in Britain. [2519-032 (2005) : 65] |
| E | Joining a global team of nine applications managers, you <strong>will deliver</strong> high-quality technical support to all Biostatistics Computing Environment users encompassing SAS, other third-party software and the in-house developed applications. [2511-006 (2005) : 53] |
| E | Joining a talented, multi-disciplinary team, you <strong>will be</strong> central to the discovery and characterisation of novel therapeutic antibodies [2481-037 (2005) : 65] |
| E | Knowledge of the EU requirements for plant protection products and the regulatory framework is not <strong>essential</strong> as on the job training <strong>will be provided</strong>. [2515-048 (2005) : 72] |</p>

</table>
E Our methods of close supervision and emphasis on training and opportunities for learning mean that you will quickly be dealing with a very wide variety of drug cases, often involving serious crime. In this challenging environment. [2511-007 (2005) : 54]

E Our modular courses are kept relevant by industrial panels, so you can be sure that your Cranfield Masters course will meet the needs of environmental sector employers. [2515-006 (2005) : 56]

E Our team provides scientific and technical services and your responsibilities will include safety and performance testing of medical X-ray equipment, measurement of radiation doses, technical support, record keeping and ensuring equipment is calibrated and fit for purpose.

E our website will be updated accordingly). [2498-071 (2005) : 74]

E Over the coming year, we will be recruiting Physicists, Engineers, Modellers, Geophysicists, Biologists, Sedimentologists, Meteorologists, Palaeontologists, Oceanographers, Chemists, Data Analysts, Glaciologists and Technicians-to name but a few. [2481-003 (2005) : 53]

E Owing to the anticipated high levels of interest, we regret that it will not be possible to contact all applicants. [2515-059 (2005) : 75]

E Persons recruited to fill these posts will be employed by Bii once it is established as an independent charity. [2498-015 (2005) : 55]

E Placing on the salary scale will be determined by qualifications and experience. [2511-007 (2005) : 54]

E Please note that all information received in connection with this advert will be treated in accordance with the Data Protection Act 1998. [2511-019 (2005) : 58]

E Please note that applications by email or fax will be rejected. [2528-003 (2005) : 60]

E Please note that applications by email or fax will be rejected. [2528-008 (2005) : 62]

E Please note that eligibility for full funding (tuition fees and stipend) is restricted to UK students only although EU citizens will be eligible for payment of fees. [2515-083 (2005) : 82]

E Please note that none of the work will be laboratory based. [2506-003 (2005) : 54]

E Please state clearly if you wish to be considered for both posts, for which a separate application form will be required. [2524-027 (2005) : 62]

E Preference will be given to applicants with experience and knowledge of quarantine principles, horticultural production systems, agrochemical treatments and biometrics. [2485-034 (2005) : 70]

E Preference will be given to applicants with experience and research vision in one of the highlighted areas. [2524-063 (2005) : 74]

E Preference will be given to candidates with experience of medical writing within the pharmaceutical industry. [2481-022 (2005) : 59]

E Preference will be given to candidates with experience of medical writing within the pharmaceutical industry. [2528-048 (2005) : 79]

E Preference will be given to candidates with recognised expertise in quantum optics and in light-matter interactions in the quantum regime, including applications in quantum technology, such as information processing. [2506-038 (2005) : 69]

E Preferred candidates will have experience in contributing to cross-functional drug development teams. [2524-004 (2005) : 52]

E Progression beyond the gateway will be available dependent on the role holder meeting the requirements and developing within the role [2519-060 (2005) : 73]

E prokaryotic ones will be of some interest as well. [2485-024 (2005) : 64]

E Proposals received before the end of March 2005 will receive preference. [2489-037 (2005) : 73]

E pSivida will offer you the opportunity to develop your skills and career potential in an open and progressive culture where your contribution can be recognised. [2519-054 (2005) : 71]

E Reasonable travel expenses will be reimbursed [2485-117 (2005) : 94]

E Recently qualified graduates will be considered. [2485-042 (2005) : 72]

E Relocation expenses will be available. [2489-010 (2005) : 62]

E Research is funded through a number of programmes and agencies but up to £6m of the overall funding will be subject to direct control by the Chief Scientific Adviser. [2506-013 (2005) : 59]

E Research will seek to identify experimental methods, theoretical and simulation approaches that result in more meaningful structure-property relationships. [2485-083 (2005) : 85]
| E | Research will take place in The Department of Reproductive Medicine, St Mary's Hospital, Manchester. [2485-098 (2005) : 89] |
| E | Resistance to pests and diseases will be a significant trait for inclusion in many species. [2515-042 (2005) : 70] |
| E | Results will be sent directly to the supervisor by 20 May 2005. [2481-035 (2005) : 64] |
| E | Review of applications will begin immediately. [2515-067 (2005) : 78] |
| E | Salaries for the two Postdoctoral Researcher posts will be £35,000 per annum and for the Research Technician post £26,500 per annum. [2519-044 (2005) : 69] |
| E | Salaries will be commensurate with experience and qualifications. [2528-013 (2005) : 64] |
| E | Salaries will be competitive and subject to experience. [2489-026 (2005) : 70] |
| E | Salaries will depend on experience and ability. [2506-024 (2005) : 64] |
| E | Salary (dependent on experience) will be negotiable up to £30,000 p.a. [2502-011 (2005) : 58] |
| E | Salary for both posts will start on the IA scale for research staff in the range of £21,640 - £24,820, depending on experience. [2481-035 (2005) : 56] |
| E | Salary for the above Senior/Principal Programmer posts will be in the range of £24,866 - £33,445 p.a. plus substantial benefits, depending on qualifications and relevant experience. [2528-020 (2005) : 67] |
| E | Salary for the Senior Postdoctoral Researcher will commence at £45,000 per annum rising to £53,000 per annum in year 3. [2519-044 (2005) : 69] |
| E | Salary is negotiable and will be commensurate with your experience and qualifications. [2515-048 (2005) : 72] |
| E | Salary will be £20,043 p.a. [2528-059 (2005) : 84] |
| E | Salary will be £20,044 p.a. [2528-059 (2005) : 84] |
| E | Salary will be £22,507 - £29,128 pa depending on qualifications and experience. [2481-010 (2005) : 56] |
| E | Salary will be £23,643 pa. [2481-067 (2005) : 74] |
| E | Salary will be £24,567 to £30,369 [2524-065 (2005) : 75] |
| E | Salary will be in the range £16,000-20,000 depending on your experience and qualifications. [2515-048 (2005) : 72] |
| E | Salary will be internationally competitive. [2519-079 (2005) : 78] |
| E | Salary will be negotiable. [2515-042 (2005) : 70] |
Salary will be offered on the RAIA scale £19,460 - £23,643 per annum plus £2,323 London Weighting Allowance. [2489-054 (2005) : 78]

Salary will be on a scale from £23,000 up to £27,000, dependent on experience. [2485-027 (2005) : 66]

Salary will be on the RAIA scale &23,970 pa including London Weighting. [2489-042 (2005) : 75]

Salary will be on the Technical Staff Grade D, £16,071 to £19,050 per annum. [2485-082 (2005) : 84]

Salary will be on the University Non-clinical Scale (A or B) plus London Weighting. [2489-059 (2005) : 78]

Salary will be pro rata for part-time. [2485-012 (2005) : 60]

Salary will be within the ALC Grade 5 salary scale, currently between £37,558 and £42,573 per annum plus £2,323 London Allowance, depending on experience. [2485-093 (2005) : 88]

Salary will be within the RA1A/B scale: £19,460 - £29,128 pa or the RFII scale: £27,116 - £35,883 pa plus £1,990 pa London Weighting according to qualifications and experience [2506-052 (2005) : 73]

Salary will be within the range £19,460 - £29,128 p.a. (reduced pro-rata). [2506-046 (2005) : 71]

Salary will be within the range £19,460 to £21,640 p.a. [2502-057 (2005) : 73]

Salary will be within the range £24,352 - £36,959 pa (Lecturer scale) or £38,685 - £43,850 pa (Senior Lecturer scale), depending on qualifications and experience. [2528-076 (2005) : 89]

Salary will be within the range £24,820 - £35,883 p.a. [2489-062 (2005) : 79]

Samples for analysis will be provided from various human studies on insulin resistance, diabetes, coronary heart disease, colorectal cancer and inflammatory bowel disorders with the aim of identifying diagnostic mammalian/microbial metabolite signatures. [2506-064 (2005) : 76]

Salary will be within the range £19,460 - £29,128 p.a. [2485-030 (2005) : 68]

Salary will be within the range £24,820 - £35,883 p.a. [2489-073 (2005) : 82]

Salary will be within the range £24,820 - £35,883 p.a. [2489-062 (2005) : 79]

Scale points for this post will depend on previous experience. [2485-030 (2005) : 68]

Scheduled for delivery in 2006, SCUBA-2 will use a number of technological and operational innovations. [2515-021 (2005) : 62]

Scholarships will be available on a competitive basis, with the optimum awards covering full fees and a stipend of £6,000. [2489-073 (2005) : 82]

Selected applicants will be called to send complete applications [2524-078 (2005) : 79]

Selection will be in accordance with the Government's equal opportunities policies. [2519-027 (2005) : 63]

SEPA aims to provide an efficient and integrated environmental protection system for Scotland, which will both improve the environment and contribute to the Government's goal of sustainable development. [2481-058 (2005) : 71]

SEPA aims to provide an efficient and integrated environmental protection system for Scotland, which will both improve the environment and contribute to the Government's goal of sustainable development. [2506-002 (2005) : 54]

SEPA's main aim is to provide an efficient and integrated environmental protection system for Scotland that will both improve the environment and contribute to the Scottish Ministers' goal of sustainable development. [2511-041 (2005) : 65]

Shortlisted applicants will be interviewed in May 2005 [2498-069 (2005) : 74]

Shortly after registration applicants will be sent a brochure containing information on postgraduate training and research in the Department and further details of the Open Days. [2485-117 (2005) : 94]

So if your skills and experience match one of our 910* fantastic job openings in Science, we'll do everything to ensure relevant recruiters see your CV. [2502-001 (2005) : 15]

So join our state of the art research facility in Horsham, Sussex and you won't just be at the frontier of medical science. [2515-033 (2005) : 67]

Some experience in project management database design, programming or GIS would be a distinct advantage although training will be provided where necessary. [2528-040 (2005) : 75]

Some will leave the field after graduation, but many are highly motivated students who want to do something positive for the environment. [2515-002 (2005) : 52-53]

Specialist training will be provided. [2524-045 (2005) : 66-67]

SRG will find the best job for you [2489-024 (2005) : 69]

SRG will find the best job for you [2493-027 (2005) : 63]
Starting salary for this Band 4 post will be £24,746 per annum.

Starting salary will be £18,979.

Starting salary will be £19,731.

Starting salary will be determined by the skills and experience evident to the Selection Board.

Starting salary will be in the range £19,460 to £24,820 per annum plus £2,323 London Allowance per annum.

Starting salary will be in the range £21,594 - £26,954 inclusive of London Allowance.

Starting salary will be in the range £21,783 - £24,830 per annum inclusive.

Starting salary will be in the range £21,783 to £31,451 per annum, including London Allowance, according to experience.

Starting salary will be on to University Technical pay scale grade D, spine point 15 (£18,401 per annum including London Allowance).

Starting salary will be within the range: £25-£28k (plus 8% pension contribution after completion of probationary period).

Statistics is a key skill and the post holder will have the opportunity to play a crucial role in projects that often have significant impact in public affairs.

Structures will be elucidated by a combination of high-field NMR spectroscopy and mass spectrometry.

Students will develop skills in computing and information management.

Students will join a 4 year Systems Pharmacology/Physiology programme.

Students will receive training from both institutes.

Students will receive training in bioinformatics, proteomics, mass spectrometry, gene expression, protein purification, crystallisation, structure determination and ligand screening from practitioners and experts in all of these techniques.

Studentships will be available from 1st October 2005.

Studentships will begin in early October.
Studies will involve a broad range of molecular and pharmacological based techniques including DNA manipulation, protein expression, proteomics, mammalian cell culture, in vivo tumour model development and molecular pharmacology. [2506-048 (2005) : 72]

Studies will involve a broad range of techniques including, enzyme biochemistry; [2502-041 (2005) : 68]

Studying at Cranfield University at Silsoe will bring you into more contact with colleagues from all over Europe and more beyond. [2498-041 (2005) : 68]

Subject to operational requirements, consideration will be given to fractional appointments, including job share and part time working, flexible working, home or off site working and we welcome applications from under represented groups. [2519-013 (2005) : 58]

Successful applicants will be appointed initially for a period of between 2 and 4 years and be expected to spend approximately 1.5 days per month on SNH work. [2481-036 (2005) : 64]

Successful applicants will be contacted before 31 January 2006. [2528-022 (2005) : 68]

Successful applicants will be offered the position subject to an Enhanced Criminal Records Bureau disclosure. [2489-027 (2005) : 70]

Successful applicants will have demonstrated the ability to perform excellent research. [2524-059 (2005) : 73]

Successful candidates will be encouraged to take a leading role in the advancement of non-invasive methodology for preclinical pharmacology studies. [2506-048 (2005) : 72]

Successful candidates will be selected solely on their ability to carry out the duties of the post. [2511-044 (2005) : 68]

Successful candidates will be selected solely on their ability to carry out the duties of the post. [2519-006 (2005) : 55]

Successful candidates will be selected solely on their ability to carry out the duties of the post. [2528-036 (2005) : 73]

Successful candidates will form a new research team within the Department of Neurodegenerative Disease (which incorporates the MRC Prion Unit) headed by Professor John Collinge which is a major centre for research into neurodegenerative disease [2528-069 (2005) : 87]

Successful candidates will handle a broad variety of technical subject matter in accordance with skills and experience. [2481-014 (2005) : 57]

Successful candidates will have the opportunity to earn additional income by working supervised sessions in the early evening and weekends. [2502-022 (2005) : 62]

Successful candidates will have, or expect to establish, internationally recognised reputations for research excellence, [2515-068 (2005) : 78]

Successful candidates will play a critical role in the next stage of the Company's evolution while expanding their field of scientific expertise. [2493-008 (2005) : 57]

Successful candidates will receive a tax-free fellowship of 1300 Euro per month for 2 years with the possibility of an extension for 1 additional year. [2506-066 (2005) : 76]

Successful candidates will receive an excellent training, with access to programmes in transferable skills including statistics, experimental design, computing and presentation skills, career planning and a thesis workshop. [2493-058 (2005) : 72]

SUPA is organised around five major theme areas of research excellence, linked together by a Graduate School which will offer studentships and a Distinguished Visitor Programme. [2485-017 (2005) : 61]

Supervision will be provided by Prof John Dawson, Dr David Marshall and Dr Steved Cummins (Queen Mary College, University of London). [2489-066 (2005) : 80]
<p>| E | Take this role on and you’ll be involved with the management oversight of AWE’s Science and Technology Physics Research Programmes, making sure they are properly equipped to support the UK's nuclear weapon. [2506-010 (2005) : 58] |
| E | That means you’ll be highly visible, able to make an impact and crucial to the drug discovery process. [2481-006 (2005) : 55] |
| E | That way when you go to the interview, you’ll be remembered because you’re the perfect applicant for the job - and not because you did something really outrageous to get noticed. [2502-001 (2005) : 15] |
| E | That will create a need for hydroecologists. [2515-002 (2005) : 52-53] |
| E | The ACP positions will become available in January 2006. [2489-018 (2005) : 67] |
| E | The actual starting salary offered will be based on qualifications and experience. [2489-064 (2005) : 79] |
| E | The Agri-Food and Biosciences Institute (AFBI) will be established on 1 April 2006, following a period of shadow operation from September 2005. [2511-013 (2005) : 56] |
| E | The aim of the project is to build teams of researchers who are able to design new analytical methods and equipment that will solve cutting edge proteomics research challenges, both within the University of Glasgow, and with our collaborators in the Universities of Edinburgh and Dundee. [2515-063 (2005) : 76] |
| E | The annual salary for the Senior Lecturer will be within the range £39,888 to £44,903 (under review incl. London Allowance) and for the Lecturers within the range £30,319 to £38,213 (under review incl. London Allowance). [2498-066 (2005) : 73] |
| E | The antigenic regions of the CTL target protein will also be studied by sub-fragment cloning. [2511-029 (2005) : 61] |
| E | The application deadline is 1300hrs on Monday 31st January 2005 and the interviews will be held in mid to late February 2005 for a start in April 2005. [2481-031 (2005) : 62] |
| E | The appointee of the Chair will advise on the appointment of the Lecturer. [2524-055 (2005) : 72] |
| E | The appointee will be a member of the Institute of Cancer and the Cancer Research UK Centre at Barts and the London’s School of Medicine and Dentistry, [2506-062 (2005) : 75] |
| E | The appointee will be part of an interdisciplinary team. [2485-100 (2005) : 90] |
| E | The appointee will be seconded for a period of five years, in the first instance, to drive the continued development of the NCSR. [2528-009 (2005) : 63] |
| E | The appointee will join an established horticultural plant pathology team. [2485-042 (2005) : 72] |
| E | The appointees will join a progressive research team in beef production [2511-013 (2005) : 56] |
| E | The appointment for Senior Research Coordinator will be made on the Research and Analogous Grade III scale (in the range £35,254 to £43,850 per annum), [2524-054 (2005) : 72] |
| E | The appointment is for a 5-year contract term in the first instance, which will commence in February 2006 and may be extended. [2528-008 (2005) : 62] |
| E | The appointment of a Chief Scientific Adviser will ensure leadership of those processes and comprehensive co-ordination of the Department's scientific interests. [2506-013 (2005) : 59] |
| E | The appointment will be for 2 years in the first instance. [2515-065 (2005) : 77] |
| E | The appointment will be made on the Lecturer A or B scale within the range £25,973 to £38,213 (incl. London Allowance). [2485-090 (2005) : 87] |
| E | The appointment will commence on 1 September 2005 or as soon as possible thereafter. [2502-039 (2005) : 68] |
| E | The appointments will be for a maximum of three years. [2511-015 (2005) : 56] |
| E | The appointments will be for one year in the first instance with possible extension of up to two years. [2519-071 (2005) : 76] |
| E | The appointments will be made strictly on merit in accordance with the Commissioner for Public Appointments' guidance on appointments to public bodies. [2519-027 (2005) : 63] |
| E | The article will also feature a profile of the Bionow Young Biotechnologist award winner. [2524-035 (2005) : 64] |
| E | The assessment centre will be on 5 January 2006. [2528-041 (2005) : 75] |
| E | The assessment centre will be on 6th September 2005. [2506-028 (2005) : 66] |</p>

The pay and terms and conditions will be subject to the new national pay framework for the NHS (Agenda for Change). [2485-030 (2005) : 68]

The PhD Studentships will be available from 1st October 2005. [2485-104 (2005) : 91]

The position is based at our Hemel Hempstead office however occasional UK and overseas travel will be required. [2515-045 (2005) : 71]

The PhD Studentships will be available from 1st October 2006. [2528-078 (2005) : 90]

The position is based at our Hemel Hempstead office however occasional UK and overseas travel will be required. [2528-047 (2005) : 79]

The PhD Studentships will be available from 1st October 2006. [2485-079 (2005) : 83]

The position will be based in a modern manufacturing unit with excellent pilot plant facilities in West Yorkshire. [2502-011 (2005) : 58]

The position will therefore be based in both of these locations. [2485-030 (2005) : 68]

The post at each site will be a fixed one year, full time contract in the first instance. [2506-018 (2005) : 61]

The position will be based at ESNW, in a newly-furbished environment bringing together projects in advanced computation, information management, Grid computing, visualisation and multi-media technology. [2502-060 (2005) : 74]

The post will be based at Strangeways Research Laboratory, close to the Addenbrookes Hospital site in Cambridge. [2498-009 (2005) : 52]

The post will be held in conjunction with a supernumerary Fellowship at St John’s College [2506-038 (2005) : 69]

The position will initially be for one year. [2481-009 (2005) : 56]
The post will initially entail a 12-18 month secondment to the Molecular Oncology group at St Barts and The London. \[2519-036 (2005) : 66\]

The post will suit someone with extensive experience in cytogenetics with an interest in leukaemia and related malignancies. \[2493-005 (2005) : 56\]

The post, which will become vacant on or about 5 January 2006, is based at the Council’s headquarters in Copenhagen, Denmark. \[2481-028 (2005) : 61\]

The postholder will be employed by Imperial College, St Mary’s campus. \[2498-059 (2005) : 71\]

The postholder will become vacant on or about 5 January 2006, is based at the Council’s headquarters in Copenhagen, Denmark. \[2481-028 (2005) : 61\]

The postholder will be employed by Imperial College, St Mary’s campus. \[2498-059 (2005) : 71\]

The postholder will be employed by Imperial College, St Mary’s campus. \[2498-059 (2005) : 71\]

The postholder will be employed by Imperial College, St Mary’s campus. \[2498-059 (2005) : 71\]

The postholder will be encouraged to initiate his/her own research line in these or related disciplines. \[2485-092 (2005) : 88\]

The primary appointment will be at the senior associate or full professor level in the Department of Psychology, Faculty of Science. \[2515-067 (2005) : 78\]

The programme will be based on a core sample of 1000 people per year, representative of the UK population aged 1.5 years upwards. \[2524-077 (2005) : 78\]

The project will draw upon interdisciplinary and complementary skills in any of the following methods: lab-on-a-chip, microfluidics, fluorescence microscopy, cell biology, proteomic measurement technologies, assay development and spectroscopy. \[2515-063 (2005) : 76\]

The project will employ computational vision techniques for multi-camera detection, tracking and behavioural analysis. \[2524-051 (2005) : 70\]

The project will employ computational vision techniques for multi-camera detection, tracking and behavioural analysis. \[2524-051 (2005) : 70\]

The project will examine the underlying mechanisms and solutions to anaerobic digestion foaming. This project is sponsored by a consortium of water companies. \[2502-071 (2005) : 78\]

The project will focus on GR protein phosphorylation, and GR recruitment to key regulatory gene elements using human lung tissue. \[2489-042 (2005) : 75\]

The project will integrate existing data, generate new experimental data where appropriate, define and parameterize new functional group models of arable biodiversity and run simulations to predict the likely impacts of changes in management practice on arable ecosystem dynamics. \[2528-051 (2005) : 81\]

The project will investigate poorly studied members of the Lamiaceae (mint) family for activity against drug-resistant bacteria. \[2511-074 (2005) : 77\]

The project will investigate the factors that govern the bio-degradability of polymers and seek to understand how polymers can stabilise calcium precipitation. \[2485-083 (2005) : 85\]

The project will investigate the influence of environmental parameters on the development of the musculoskeletal system in various fish species. It is part of a larger project within Europe, which is aimed at reducing malformations in farmed fish species. \[2519-062 (2005) : 74\]

</table>
E The starting salary will be in the RA1A scale £19,460 - £21,640 p.a. (national pay award pending).
[2519-073 (2005) : 77]

E The starting salary will be in the RA1A scale £19,480 - £23,643 p.a. [2506-070 (2005) : 77]

E The starting salary will be in the RA1A scale £19,460 - £23,643 p.a. [2506-070 (2005) : 77]

E The starting salary will be in the range £23,643 to £25,699 on the RA1A scale which rises to £29,128, plus £2,330 London Weighting. [2515-065 (2005) : 77]

E The starting salary will be in the range £24,830 - £25,966 pa inclusive. [2485-085 (2005) : 86]

E The starting salary will be in the range £24,501 - £25,500 per annum, depending on qualifications and experience. [2506-050 (2005) : 72]

E The starting salary will be in the range £24,746 - £30,945 per annum, depending on qualifications and experience. [2511-020 (2005) : 58]

E The starting salary will be on the RA1A scale £19,420 - £24,820 p.a. [2485-096 (2005) : 89]

E The starting salary will be on the RA1A scale £19,460 - £24,820 p.a. depending on age and experience. [2498-051 (2005) : 68]

E The starting salary will be up to £29,166 pa inc. depending on skills and experience. [2498-052 (2005) : 69]

E The stipend will be based on current MRC rates.

E The stipend will be based on UK Clinical/Academic Staff salaries in the range of £20,000 -£30,000 p.a. (+ NI, superannuation and London Allowance if appropriate). [2481-083 (2005) : 79]

E The stipend will be in line with BBSRC rates. [2493-056 (2005) : 72]

E The student will be part of a vibrant research community with fellow PhD students and researchers at all levels. [2493-057 (2005) : 72]

E The student will join a team at Roslin Institute and Sygen International investigating genetic variation of host resistance to this disease. [2493-058 (2005) : 72]

E The studentship will provide training in synthetic chemistry and collaboration with the Optoelectronics Group, University of Cambridge. [2515-086 (2005) : 82]

E The studentship will be tenable in the Applied Modelling and Computation Group of the Department of Earth Science and Engineering. [2511-069 (2005) : 75]

E The study will be co-ordinated by The University of Manchester Academic Department of Radiation Oncology (ADRO), based at Christie Hospital, Manchester. [2489-042 (2005) : 86]

E The successful applicant will be provided with formal training in the correct operation and maintenance of the HPLC instrument, the operation of the Novocellus test procedure and the working practises associated with conduct of HPLC analyses in an NHS Clinical Service IVF Laboratory, licensed by the HFEA. [2506-018 (2005) : 61]

E The successful applicant will join two active and successful research groups, at the Centre for Agri-Environmental Research (C7ER), and at the Allerton Project. [2489-070 (2005) : 81]

E The successful candidate should have a keen interest in research into teaching and learning physics in Higher Education and will join a small team developing online laboratory experiments and e-learning resources for use in distance and onsite learning of Physics and Mathematics. [2528-066 (2005) : 86]
The successful candidate will be a member of the Radiation Protection group run within the Department of Medical Physics. [2481-034 (2005) : 64]

The successful candidate will be employed by NFAB [2506-042 (2005) : 70]

The successful candidate will be offered a Fellowship at St Catherine’s College. [2498-049 (2005) : 68]

The successful candidate will be trained in the use of the scanner. [2498-050 (2005) : 68]

The successful candidate will have the opportunity to work in an eminent academic-industrial team. [2528-063 (2005) : 86]

The successful candidate will join a team responsible for all aspects of PEACE operations. [2493-041 (2005) : 68]

The successful candidate, if a tenured member of an institution will remain an employee of the host organisation, [2481-065 (2005) : 73]

The successful candidates will be anticipated to commence on 1 September 2005 (though this is negotiable) [2485-114 (2005) : 93]

The successful candidates will be based at the College's Camden Campus in London, [2519-062 (2005) : 74]

The successful candidates will be employed by SRG for a twelve month contract. [2485-056 (2005) : 77]

The successful candidates will be provided with a competitive salary and benefits package and an exciting work environment [2485-039 (2005) : 71]

The successful candidates will have the opportunity to train and work in all sections of this vibrant department. [2502-022 (2005) : 62]

The supervisors will be Dr Barry Peters, Senior Lecturer in HIV and Dr Anna Vyakarnum, Senior Lecturer in Immunology, within the world-class 5* research Division headed by Professor Adrian Hayday. [2493-057 (2005) : 72]

The Survey’s strategy will require you to develop your career in a forward-looking organization within an integrated geoscience programme. [2489-003 (2005) : 59]

The temporary post will end December 2005. [2485-038 (2005) : 71]

The three-year appointments will be on the Imperial College scale R&E B (£22,870–£33,330) and (Position 2) Kew Band D (from £20,688) depending on qualifications and experience (pay award pending). [2515-075 (2005) : 80]

The Trust will apply for Enhanced Disclosure with the successful candidate, [2489-031 (2005) : 72]

The TTM will focus on evaluating, protecting and commercialising opportunities developed at King's College London in the fields of physical sciences, engineering and IT, including bioinformatics and biomedical devices. [2485-093 (2005) : 88]

The two fixed-term posts will liaise with NIREX, the Health & Safety Executive and the Environment Agency in the development of improved regulatory arrangements for the management of intermediate level radioactive waste. [2481-033 (2005) : 63]

The UK work will be in close collaboration with several teams developing models for assessments of options for a more sustainable management of urban pollution. [2528-064 (2005) : 86]

The University is introducing a new reward framework which will facilitate the recruitment, retention and motivation of world class staff. [2502-042 (2005) : 69]

The University is introducing a new reward framework which will facilitate the recruitment, retention and motivation of world class staff [2511-055 (2005) : 71]

The University will actively foster a culture of inclusion and diversity [2511-048 (2005) : 70]

The University will actively foster a culture of inclusion and diversity [2524-066 (2005) : 75]
E The University will actively foster a culture of inclusion and diversity [2528-059 (2005) : 84]
E The University will actively foster a culture of inclusion and diversity [2528-073 (2005) : 88]
E The University will actively foster culture of inclusion and diversity [2506-053 (2005) : 73]
E The University will especially welcome applications from women and ethnic minorities meeting the selection criteria, who are under-represented among its academic staff (Section 38 of the Sex Discrimination Act 1975 and Section 48 of the Race Relations Act 1976 apply). [2481-066 (2005) : 74]
E The Wilton facility will become the leading centre in the UK, collaborating with industry and other national centres. [2481-060 (2005) : 71]
E The winners plus the top 10 runners-up get a free one-year subscription to New Scientist and all winners will be invited to give a short talk at an exciting event to be held in London later this year and to share their work with famous people from science and the media. [2493-065 (2005) : 74]
E The winners plus the top 10 runners-up get a free one-year subscription to New Scientist and all winners will be invited to give a short talk at an exciting event to be held in London later this year and to share their work with famous people from science and the media [2498-001 (2005) : 14]
E The winners plus the top 10 runners-up get a free one-year subscription to New Scientist and all winners will be invited to give a short talk at an exciting event to be held in London later this year and to share their work with famous people from science and the media [2498-014 (2005) : 54]
E The work we do has an enormous impact on the state of the environment, and what we do today will impact directly on-the environment of tomorrow. [2502-002 (2005) : 54]
E The work will be carried out within ISBE, which received a 5* rating in RAE 2001, and has departmental expertise in imaging physics, image analysis, computer science, and radiology. [2524-071 (2005) : 77]
E The work will be conducted in our multi-disciplinary, well-equipped research laboratory, which accommodates 15 technical, scientific and clinical staff involved in clinical research of the hormonal aspects of breast cancer. [2481-009 (2005) : 56]
E The work will take place in brand-new laboratories using the group’s state-of-the-art equipment and many opportunities exist for national and international collaboration. [2498-054 (2005) : 69]
E The work will take place in laboratories in the School of Biological Sciences and the new Clinical Sciences Centre at University Hospital, Aintree. [2515-070 (2005) : 78]
E Then, you’ll learn that one of our divisions, Syngenta biopharma, strives to maximise the potential of biopharmaceuticals. [2493-018 (2005) : 60]
E There are close links with academia and participation in research and development will be encouraged depending on your interests. [2485-022 (2005) : 63]
E There will also be the opportunity for media work and event co-ordination. [2511-018 (2005) : 57]
E There will be an opportunity to contribute to research and development projects. [2502-003 (2005) : 55]
E There will be opportunities for teaching, research and development. [2515-017 (2005) : 60]
E There will be plenty of opportunity to develop new skills and to pursue a career in our young and dynamic company. [2519-056 (2005) : 71]
E There will be strong emphasis on technology from the physical sciences and engineering. [2502-047 (2005) : 71]
E These emails will be screened electronically, so the email must include the text KNOO in the subject line and attachments must be in the form of pdf files, and named in the form YOURNAME_CV.pdf and YOURNAME_COVER.pdf. [2511-069 (2005) : 75]
E These posts will be based within SEPA's Environmental Science Directorate [2511-041 (2005) : 65]
E These posts will join all Trust posts in being evaluated across a national scheme [2519-028 (2005) : 64]
E These will be identified using 2D electrophoresis, liquid chromatography and mass spectroscopy in order to develop a diagnostic test for CFS/ME. [2515-073 (2005) : 79]
E These will include; vibrational methods (IR and RAMAN), electronic methods (UV-vis), molecular probing (NMR) and surface sensitive (XPS) methods. [2515-015 (2005) : 60]
E They will be based in the Centre for Sustainable Water Management, Lancaster Environment Centre, Lancaster University [2485-115 (2005) : 93]
They will be offered an Independent Junior Research Group Leader position (W2; equivalent to associate professor level without tenure) including a five-year grant (research positions, budget, investments) at a Max Planck Institute of their choice. [2524-059 (2005) : 73]

They will participate in ongoing projects relating to auditory system function and also develop an internationally competitive research programme of their own. [2489-059 (2005) : 78]

They will share facilities and make joint bids for funding. [2485-001 (2005) : 54-55]

They will start on 1 October 2005 or earlier if an appropriate candidate is found. [2485-115 (2005) : 93]

They will take a major role in developing a programme of work on human papilloma virus and herpes simplex virus infections, in the context of other infections, including HIV. [2498-004 (2005) : 50]

This Centre will focus on the use of automated techniques for the discovery of materials with novel properties for a broad range of applications. [2515-081 (2005) : 82]

This Centre will focus on the use of automated techniques for the discovery of materials with novel properties for a broad range of applications. [2519-067 (2005) : 75]

This exciting and developing field, supporting regenerative medicine, will provide a strong basis for future career development of suitable individuals. [2489-051 (2005) : 77]

This new post will provide leadership and direction to the development of the Forum and work with the Advisory Board to develop and implement a forward-thinking strategy. [2481-008 (2005) : 56]

This facility will include Category 3 microbiological suites and prior experience of co-ordinating the organisation [2515-072 (2005) : 79]

This funding will be known as the Jon and Pat Hume Scholarships in honour of a lifetime achievement of one of Maynooth’s graduates. [2489-072 (2005) : 81]

This IP will receive protection commensurate with its potential value to the Met Office and our stakeholders. [2481-004 (2005) : 54]

This is a fixed-term three-year contract in the first instance, and will be based in Central London. [2481-029 (2005) : 61]

This is a multidisciplinary study linked to wider NERC & EU projects and will study a range of environments (e.g. estuaries, mud volcanoes, seeps) [2511-070 (2005) : 75]

This is a new post and the post holder will play a key role in developing Academy policy on academic medical research and the many public policy issues that involve the biomedical sciences, [2515-016 (2005) : 60]

This is a new role and will be crucial to developing the paediatric sleep service. [2493-020 (2005) : 60]

This is a unique opportunity for the successful candidate to put his or her mark on a new publication that will serve as a bridge between the research and teaching communities. [2481-017 (2005) : 58]

This is an excellent opportunity to develop specialist skills in a rapidly developing and expanding area of cellular therapy and full training will be given. [2493-026 (2005) : 63]

This is an exciting development and the appointee will have a key role in coordinating and facilitating the clinical and basic research team as well as responsibility for research governance issues. [2515-065 (2005) : 77]

This is an exciting opportunity for an experienced pharmaceutical scientist to play a leading role in projects which will ensure we continue to deliver high-quality, robust and innovative dosage forms. [2515-018 (2005) : 61]

This job will provide opportunities for international travel and career development. [2485-072 (2005) : 81]

This joint project between Earth and BioSciences will combine molecular microbial ecological and biogeochemical methods to explore the impact of microbial diversity on biogeochemical processes in near surface sediments. [2511-070 (2005) : 75]

This legislation is at a pivotal point in negotiations and will provide you with a fascinating opportunity to be part of decision making in Whitehall and Brussels. [2481-055 (2005) : 70]

This MSc will appeal if you have a keen interest in programming and would like to learn about HPC and parallel programming. [2485-007 (2005) : 59]
<p>| E | This new post will support a project in collaboration with the National Cancer Institute of the United States, which is looking at chemotherapy and radiotherapy-induced second cancers. [2502-057 (2005) : 73] |
| E | This novel research will use molecular and cellular techniques to identify the molecular causes of rheumatic diseases, and to assist in the development of therapeutic interventions aimed at halting inflammation in autoimmune and inflammatory conditions. [2489-061 (2005) : 79] |
| E | This PhD project will explore the mechanisms by which soot promotes engine wear and investigate how additives present in engine lubricant can control this. [2515-082 (2005) : 82] |
| E | This position is fixed-term for a period of three years and a maximum starting salary of £27,116 will apply. [2498-053 (2005) : 69] |
| E | This position requires previous experience of polymer experimentation/modelling and will be in the group of Dr Peter Murray-Rust. [2485-083 (2005) : 85] |
| E | This position requires previous experience of polymer experimentation / modelling and will be in the group of Dr John Mitchell. [2485-083 (2005) : 85] |
| E | This position will be based at our manufacturing plant in Telford, Shropshire. [2506-024 (2005) : 64] |
| E | This position will be based at the Head Office in the village of Penn, Buckinghamshire. [2506-024 (2005) : 64] |
| E | This position within the Medicinal Chemistry team will provide core support to the Drug Discovery Group as a whole. [2524-060 (2005) : 74] |
| E | This post is available from July 2005 until January 2008, and will be based at Guy's Campus. [2493-048 (2005) : 70] |
| E | This post is funded by GlaxoSmithKline, with whom you will work closely. [2493-036 (2005) : 67] |
| E | This post will also attract an allowance of £2k pa for Nuclear Suitably Qualified and Experienced Personnel, paid on qualification. [2506-010 (2005) : 58] |
| E | This post will also attract an allowance of £2k pa for Nuclear Suitably qualified and Experienced Personnel, paid on qualification. [2506-010 (2005) : 58] |
| E | This post will be based at Rothamsted Research [2528-051 (2005) : 81] |
| E | This post will be based at Scottish Crop Research Institute, within an active group working on existing Defra and SEERAD-funded projects on plant communities and gene flow. [2528-051 (2005) : 81] |
| E | This post will be for a period of 3 years and represents an exciting opportunity to get involved with world-class research in a dynamic area of sensor development. [2506-052 (2005) : 73] |
| E | This programme will underpin the surface-bound aptamer and surface-bound biomembrane studies. [2502-042 (2005) : 69] |
| E | This project element will involve detailed biomechanical and biomaterials investigation of 3D cultures with further development of control systems using new hardware and computer models where necessary. [2489-051 (2005) : 77] |
| E | This project is funded by ApaTech Ltd. for 3 years and will be supervised by Professor Gordon Blunn and Dr Karin Hing. [2506-016 (2005) : 60] |
| E | This project is funded by ApaTech Ltd. for 3 years and will be supervised by Professor Gordon Blunn and Dr Karin Hing. [2506-071 (2005) : 77] |
| E | This project will develop parallel near-field light sources capable of delivering control of molecular structure with a precision of 10 nm over macroscopically extended areas. [2498-062 (2005) : 72] |
| E | This project will focus on the candidate gene locus, the MHC and its role in determining variability in response to pathogens in a cattle cross herd. [2493-058 (2005) : 72] |
| E | This project will use cDNA microarray screening to generate novel gene expression data, in collaboration with a similar MRC-funded project already started. [2528-059 (2005) : 84] |
| E | This project will use models and experiments in combination with analysis of long-term data sets to examine the population dynamics of the <em>Tragopogon pratensis-Puccinia hysterium</em> host-pathogen model system in a grassland mosaic created by variation in fertilizer input and representative of future dynamic agricultural landscapes. [2498-069 (2005) : 74] |
| E | This research will be linked with UK industry in the context of the international Gen IV programme. [2511-069 (2005) : 75] |
| E | This research <strong>will</strong> form part of an ongoing project to fuse model-based methods with model-free (such as ICA) approaches in order to better understand the ricin spatiotemporal signal and noise processes in FMRI data. [2519-066 (2005) : 75] |
| E | This role <strong>will</strong> also involve supporting engineering with line trials, assist in the operational plan of new product introduction. [2485-040 (2005) : 72] |
| E | This role <strong>will</strong> offer an excellent Package and opportunity. [2485-040 (2005) : 72] |
| E | This specialist paediatric sleep service, to be based at the new Evelina Children's Hospital (Autumn 2005), <strong>will</strong> enable us to provide a unique continuum of care in Sleep Disorders within one Trust. [2493-020 (2005) : 60] |
| E | This student <strong>should</strong> have experience of proteomics or molecular biology and with Dr Kirsten Harvey <strong>will</strong> study how Dardarin (PARK8) mutations lead to neurodegeneration. [2493-060 (2005) : 73] |
| E | This student <strong>will</strong> join Prof Thomson's group to develop computational models of cortical microcircuitry in collaboration with 2 large consortia. [2493-060 (2005) : 73] |
| E | This studentship forms part of the strong academic link between Reading and Rothamsted, and it is expected that the successful student <strong>will</strong> spend time working at both institutions on one of the three projects listed below. [2493-056 (2005) : 72] |
| E | This studentship <strong>will</strong> utilise the results of this scan and apply tools from molecular biology, bioinformatics and quantitative genetics in an attempt to identify genes-causing ascites. [2493-058 (2005) : 72] |
| E | This study <strong>will</strong> identify potential early diagnostic targets and validate PCR-based assays in bronchial lavage, sputum and plasma samples within the Liverpool Lung Project. [2528-074 (2005) : 88] |
| E | This vital role <strong>will</strong> see you provide high-quality software support for the presentation of data and results of international clinical trials. [2511-006 (2005) : 53] |
| E | This <strong>will</strong> affect the pay and terms and conditions of service in respect of all posts. [2493-005 (2005) : 56] |
| E | This <strong>will</strong> also involve contacting applicants on behalf of the assessors to discuss any discrepancies and conducting advisory meetings. [2502-014 (2005) : 59] |
| E | This <strong>will</strong> also involve medical image processing and analysis. [2485-022 (2005) : 63] |
| E | This <strong>will be achieved</strong> through the work of two newly established functions [2528-039 (2005) : 75] |
| E | This <strong>will</strong> be fundamental to securing improved linkage between science and policy. [2506-013 (2005) : 59] |
| E | This <strong>will be investigated</strong> using computational modelling. [2485-083 (2005) : 85] |
| E | This <strong>will</strong> be to support service developments in digital imaging, and the use of digital image data within the Medical Physics Department and imaging/clinical departments within the Trust. [2515-027 (2005) : 65] |
| E | This <strong>will</strong> help us to meet our ultimate goal of two NDA's year-on-year, many of which are best-in-class and first-in-class drugs. [2515-027 (2005) : 65] |
| E | This <strong>will</strong> include a strong desire to drive the science of formulation forward to develop challenging compounds into manufacturable dosage forms with good bioavailability. [2515-027 (2005) : 65] |
| E | This <strong>will</strong> include applied research, product development, product line maintenance and providing technical support to our sales force. [2515-037 (2005) : 69] |
| E | This <strong>will</strong> include designing, planning and executing detailed experimental studies and reporting back your conclusions. [2506-022 (2005) : 63] |
| E | This **will include overseeing and facilitating the success of the Department of Pharmacy which resides within the School and working closely with its Head. [2519-072 (2005) : 77] |
| E | This <strong>will</strong> include overseeing the portfolio of existing studies, considering new research questions, developing proposals and securing funding. [2481-029 (2005) : 61] |
| E | This <strong>will</strong> include producing SAS datasets in relevant formats, validating and documenting data tabulations, graphics and statistical evaluations, maintaining project documentation and liaising with members of the Biostatistics and Clinical Teams to assess programming requirements. [2511-006 (2005) : 53] |
| E | This <strong>will include wheat diseases as a major focus,</strong> [2515-042 (2005) : 70] |
| E | This <strong>will</strong> involve analyses of single nucleotide polymorphisms, including microarrays and quantitative PCR for gene expression profiles. [2481-031 (2005) : 62] |</p>
<table>

</tbody>
</table>
This will of course be dependent upon your research interests and academic and professional experience. [2498-055 (2005) : 70]

This work is a unique academic-industrial collaboration with GlaxoSmithKline and will bring a combination of necessary expertise, facilities and resources to develop and characterise small molecule therapeutics to combat variant CJD and other forms of prion infection of humans. [2528-069 (2005) : 87]

This work will require the ability to work with a wide variety of different computational and numerical analysis approaches, especially differential equations, optimisation, and dynamical systems. [2485-024 (2005) : 64]

Those who successfully reach the next stage of recruitment will be contacted within two weeks of the closing date. [2515-059 (2005) : 75]

Thus drying of proteins to a level where these water molecules are removed will inevitably lead to denaturation. [2485-083 (2005) : 85]

To achieve this, you will have a group of 6 technical staff. [2519-034 (2005) : 66]

To facilitate this, two new appointments will be made, one at Senior Lecturer level, the other a Lectureship. [2528-060 (2005) : 85]

Training and development is given the highest priority and as a civil servant you’ll enjoy a competitive benefits package. [2511-042 (2005) : 66]

Training in geophysics will be provided, leading to a career in geophysical research. [2489-021 (2005) : 68]

Training in the use of equipment will be provided, but good background knowledge of the scientific principles is essential. [2485-082 (2005) : 84]

Training is a priority to us. During your training period, you will receive the necessary tuition, experience and resources in order for you to obtain the HPC/IBMS Competency Certificate for a Biomedical Scientist. [2502-022 (2005) : 62]

Training will be available. [2493-055 (2005) : 71]

Training will be given in tribology and investigative techniques including optical interferometry and surface topography. [2515-082 (2005) : 82]

Training will include sponsorship for the Chartered Institute of Marketing postgraduate diploma, Salary £25- £30,000 depending on experience. [2519-009 (2005) : 56]

Travel and subsistence costs will also be met for those attending interviews for these posts. [2489-018 (2005) : 67]

Under the direction of Dr Mark Ashe and Dr Graham Pavitt, the position will be within active, well-funded research groups that are investigating mechanisms that regulate protein synthesis in yeast. [2502-047 (2005) : 71]

Under the Dstl rationalisation programme it is anticipated that this post will be relocated to Porton Down in the next 2 - 3 years. [2485-025 (2005) : 65]

Unilever HPC, home to leading brands such as Dove, Persil, Sunsilk and Axe and the Unilever Centre for Molecular Informatics at Cambridge are creating a dynamic new research group that will investigate the academic and commercial challenges in the exciting area of Polymer Informatics. [2485-083 (2005) : 85]

Upload your CV onto totaljobs.com and we’ll make sure you do. [2502-001 (2005) : 15]

Using experimental and calculated data a range of QSPRs will be deduced using statistical and pattern recognition methods based on the molecular structure and physical properties. [2485-083 (2005) : 85]

Using our novel patented piezofilm technology, we will develop a range of rapid, sensitive, whole blood immunoassay based products for the measurement of clinically critical markers in non-laboratory settings. [2498-012 (2005) : 54]

Using the unique research opportunities provided by this continent and surrounding seas, our new five-year science programme will represent a major step forward, building knowledge of fundamental environmental science issues and the functioning of the Earth as a whole. [2481-003 (2005) : 53]

</table>
We regret that owing to the high volume of applications received only successful candidates will be contacted. [2485-065 (2005) : 79]

We regret to advise that we will only be able to contact those candidates selected for interview. [2498-021 (2005) : 58]

We will be looking for evidence of enthusiasm; reliability as a team player and having excellent communication skills. [2493-011 (2005) : 58]

We will begin advertising in January. [2481-003 (2005) : 53]

We will create the next generation of network management systems based on Distributed computing (P2P Grid) and Knowledge engineering (data mining, machine learning, ontologies). [2481-054 (2005) : 70]

We will not normally accept applications after that date. [2506-013 (2005) : 59]

We will offer a competitive package including final salary pension scheme to the right candidates. [2511-038 (2005) : 64]

We will provide the successful graduates with training in Editorial/Production Publishing and insight into Marketing, Sales and other RSC activities. [2506-028 (2005) : 66]

Where will the threats to our peace and security come from in the future? [2528-029 (2005) : 71]

Where will the next generation of network management systems be based? [2481-054 (2005) : 70]

Where will the next generation of network management systems be based? [2481-054 (2005) : 70]

Where you will be an integral part of a dynamic research and development company. [2485-039 (2005) : 71]

Where you will enjoy day to day challenges and responsibilities. [2506-028 (2005) : 66]

While our total commitment to training means you will never stop learning. [2481-012 (2005) : 57]

While the five Senior Researcher positions will be made on the Research and Analogous Grade II scale (in the range £27,929 to £36,959 per annum). [2524-054 (2005) : 72]

While the work will focus mostly on eukaryotic systems, [2485-024 (2005) : 64]

Whilst familiarity with the European medical devices approvals would be an advantage for these roles, full regulatory and auditing training will be provided. [2515-045 (2005) : 71]

Whilst familiarity with the European medical devices approvals would be an advantage for these notes, full regulatory and auditing training will be provided. [2528-047 (2005) : 79]
Whilst familiarity with the European medical devices approvals would be an advantage for this role, full regulatory and auditing training will be provided. [2528-047 (2005) : 79]

Whilst the Project Managers will be based in the UK, their projects may be aimed at operations in other countries. [2506-019 (2005) : 61]

who will join a small laboratory team with a strong, internationally recognised research portfolio. [2528-059 (2005) : 84]

Will it have yours? [2485-051 (2005) : 75]

With a Biodiversity award from the Wildlife Trust already under our belts, you’ll be part of a team that’s already making a positive impact. [2515-005 (2005) : 55]

With your help we’ll add to it. [2481-061 (2005) : 72]

Working in flood forecasting and strategic planning, you’ll have the chance to do something worthwhile for future generations. [2519-007 (2005) : 56]

Working within a busy, independent and very successful unit, you will be part of an active team concerned with diagnosis, treatment and research into human infertility. [2528-058 (2005) : 84]

Working within a dynamic, supportive team and enjoy the benefits of worldwide travel. [2502-036 (2005) : 67]

Working in the Pedestrian Safety team your work will be varied and could encompass the following areas: assessment of the slip potential of footwear and flooring research into the prevention of slip and trip accidents; root causes of accidents and behavioural change; [2498-016 (2005) : 56]

Working in the Pedestrian Safety team your work will be varied and could encompass the following areas: assessment of the slip potential of footwear and flooring research into the prevention of slip and trip accidents; root causes of accidents and behavioural change; [2498-016 (2005) : 56]

You will also be encouraged to supervise undergraduate project students. [2511-054 (2005) : 71]
You will be joining a group that has a well established interest in embryo development and implantation, particularly in genes which regulate cell fate decisions. [2528-059 (2005) : 84]

You will be recognised and rewarded for the contributions you make and enjoy excellent opportunities for career development and to raise your professional profile. [2511-023 (2005) : 59]

You will be supervised by Professor Michael McDermott, Experimental Chair of Rheumatology, in the Academic Unit of Musculoskeletal Disease and Rehabilitation. [2489-061 (2005) : 79]

You will be supported in this work by colleagues in the AONB Partnership Staff Unit and an Advisory Group of organisations including the funding partners the Environment Agency, English Nature, Countryside Agency and Northumbrian Water. [2524-027 (2005) : 62]

You will be the first point of contact for all marine casework arising in these regions, excepting that relating to fisheries and marine renewables. [2506-012 (2005) : 58]

You will become a skilled communicator, comfortable in an international situation. [2515-082 (2005) : 82]

You will become an integral member of a team addressing the genetic basis of facial disorders [2506-053 (2005) : 73]

You will benefit from a progressive, team-oriented ideology where everyone is encouraged to attain their full potential. [2489-001 (2005) : 58]

You will commence the 15 month training programme on the 6 February 2006. [2524-013 (2005) : 56]

You will complete a 15 month supernumerary training programme leading to the qualification of Diploma in Donor Management. [2524-013 (2005) : 56]

You will enjoy being a part of this initiative to meet evolving industry needs in the processing of textile fibres. [2515-041 (2005) : 70]

You will gain: [2506-040 (2005) : 69]

You will have a company car and access to our pension scheme. [2506-034 (2005) : 68]

You will have the opportunity to attend scientific meetings and courses [2493-026 (2005) : 63]

You will have the opportunity to become involved with all areas within the laboratory [2489-031 (2005) : 72]

You will have the opportunity to train in pharmacovigilance and risk management involving products in the early stages of pharmaceutical development right through to post-marketing. [2528-045 (2005) : 77]

You will have the opportunity to undertake research on either of the following: [2511-054 (2005) : 71]

You will join a high profile project within the Veterinary Training Research Initiative, aimed at encouraging student and practising vets to become involved in groundbreaking research to combat bovine tuberculosis. [2506-006 (2005) : 56]

You will join an established international team and report into the Exhibition Director. [2493-016 (2005) : 59]

You will join an internationally recognised team that collaborates with other world leaders and receives considerable support from external agencies. [2519-011 (2005) : 58]

You will join one of our chemistry teams [2502-015 (2005) : 60]

You will join our multidisciplinary Product Development team that focuses on investigating new drug delivery technologies and demonstrating the technical feasibility of these new developments. [2515-018 (2005) : 61]

You will join the Centre at Lecturer, Senior Lecturer or Reader level depending on experience. [2506-043 (2005) : 70]

You will join the Centre in the role of a Research Fellow/Research Technologist. [2506-043 (2005) : 70]

You will join the CTRU to manage the Clinical Trial Associate team (monitoring team) across the Cancer and Cardiovascular/Older People/Stroke Groups. [2519-060 (2005) : 73]

You will join the Molecular Biomarkers Group, working on a project studying genetic and methylation changes in lung tumours. [2528-074 (2005) : 88]

E Your biggest reward will be helping us achieve our goals, but you can expect wide-ranging career prospects and a comprehensive range of benefits. [2498-042 (2005) : 65]

E Your job advert will be live within minutes. [2498-002 (2005) : 22]

E Your role will be pivotal to the selection and screening teams within the Antibody Technology group; [2506-020 (2005) : 62]

E Your hours will vary according to shift patterns. [2511-045 (2005) : 69]

E Your starting salary will be from £22,400. [2511-029 (2005) : 61]

E Co After a suitable period of training you will be involved in the diagnostic testing of the eyes and visual function of a wide range of patients using a variety of both electrophysiological and psychophysical techniques. [2511-024 (2005) : 59]

E Co An extremely varied role, you will be involved with all aspects of water supply quality and treatment. [2528-021 (2005) : 68]

E Co Enjoying considerable autonomy, you will focus on both the day-to-day management of biocontainment and conducting research into the biosecurity and viral diseases of animals. [2528-019 (2005) : 66]

E Co Your experimental results will be used to support our programme in next-generation tissue engineering for chronic wound repair. [2506-022 (2005) : 63]

E Co Your first 2-3 months will be spent training on the continent to help provide you with the range and depth of specialist knowledge required to perform this role effectively. [2515-026 (2005) : 65]

E Co Your first three months will be spent training on the continent at an FDG manufacturing site, preparing you for the effective management of the process and production site. [2515-026 (2005) : 65]
| Ex | A PhD-qualified scientist, you **will** bring experience that includes material science, pharmaceutical processing, compaction simulation and computer simulation systems. [2515-018 (2005) : 61] |
| Ex | A working knowledge of drug development practices and pharmaceutical or biotechnology industry experience **will** be an advantage. [2524-004 (2005) : 52] |
| Ex | and experience of seagoing oceanography, ocean dynamics, or geodesy, **will** be an advantage. [2489-025 (2005) : 70] |
| Ex | and **will** have considerable experience of handling sequence database. [2481-052 (2005) : 69] |
| Ex | and **will** preferably have related experience. [2515-037 (2005) : 69] |
| Ex | Any exposure to in vivo inflammatory models - particularly respiratory models - **would** be an advantage, although full training **will** be provided. [2515-033 (2005) : 67] |
| Ex | Experience in any of these areas **will** be required. [2524-066 (2005) : 75] |
| Ex | Experience in EM work especially ultrathin sectioning **will** be an advantage [2511-055 (2005) : 71] |
| Ex | Experience in flow cytometry, using MoFlo, and cell culture **will** be a distinct advantage [2493-034 (2005) : 67] |
| Ex | Experience in the techniques of variety performance trials or the identification, classification and description of varieties, seed certification and seed testing **will** be a significant advantage. [2485-072 (2005) : 81] |
| Ex | Experience of paediatric sleep studies **will** be a distinct advantage. [2493-020 (2005) : 60] |
| Ex | Experience of statistical quantity control techniques **will** be an advantage. [2485-031 (2005) : 68] |
| Ex | Extensive experience of laboratory work in a University or teaching environment with particular reference to Microbiology **will** be required. [2515-072 (2005) : 79] |
| Ex | He/she **will** have worked in diagnostic cytogenetics laboratory as a clinical scientist for a minimum of three years. [2519-028 (2005) : 64] |
| Ex | He/she **will** have worked in leukaemia cytogenetics for a minimum of three years. [2519-028 (2005) : 64] |
| Ex | Ideal candidates **will** have between 1 to 3 year's experience in UK Regulatory Affairs. [2485-076 (2005) : 82] |
| Ex | Ideally you **will** already have some years' experience in the formulation of medicines or consumer products, preferably in a regulated environment. [2481-040 (2005) : 66] |
| Ex | Ideally you **will** have experience with scattering and rheology techniques such as diffusing wave spectroscopy, drag flow rheometry or neutron scattering. [2511-055 (2005) : 71] |
| Ex | Ideally you **will** have industry experience of SAS systems development. [2502-005 (2005) : 56] |
| Ex | Ideally, you **will** have experience in the chemistry and/or biology of soil phosphorus. [2498-024 (2005) : 58] |
| Ex | Ideally, you **will** have worked in a GLP laboratory [2515-039 (2005) : 69] |
| Ex | Ideally, you'll also have small boat operation experience. [2502-002 (2005) : 54] |
| Ex | In addition, you **will** have experience of inspection, external audits and managing and controlling documentation. [2493-049 (2005) : 70] |
| Ex | Industrial experience **will** be an advantage. [2515-053 (2005) : 73] |
| Ex | It is anticipated that you **will** have a minimum of five years' post registration experience. [2511-008 (2005) : 54] |
| Ex | It is unlikely that anyone with less than 7 years postdoctoral industrial experience in pharmaceutical research **will** be suitable for this position. [2485-039 (2005) : 71] |
| Ex | It **will** be advantageous to have experience in mammalian preimplantation embryology or experience in gene expression profiling using cDNA microarrays. [2528-059 (2005) : 84] |
| Ex | It **will** be extremely advantageous if candidates have hands-on experience in oligonucleotide synthesis and/or peptide conjugation. [2481-019 (2005) : 58] |
| Ex | It **will** be extremely advantageous if candidates have hands-on experience in oligonucleotide synthesis and/or peptide conjugation. [2481-059 (2005) : 71] |
| Ex | Of graduate calibre, you **will** have at least one year's practical experience of functional cell assay development and implementation. [2481-037 (2005) : 65] |
| Ex | or **will** have relevant experience. [2515-005 (2005) : 55] |
Preferably, you’ll have industrial or postdoctoral experience. [2485-059 (2005) : 77]

Previous experience of laboratory automation and laboratory data management will be advantageous. [2515-057 (2005) : 74]

Relevant experience will include molecular modelling, simulation or protein structure prediction, [2498-015 (2005) : 55]

Relevant experience will include software development (using compiled languages) and scripting, [2498-015 (2005) : 55]

The candidate will have hands-on experience investigating treatments for neurodegenerative diseases. [2524-004 (2005) : 72]

The ideal candidate will have at least three years industrial experience as an electrophysiologist, [2485-039 (2005) : 71]

The ideal candidate will have post-doctoral experience, [2502-023 (2005) : 62]

The successful candidate will be able to demonstrate considerable experience in all of these areas. [2511-056 (2005) : 72]

The successful candidate will be experienced in strain and/or medium development for the fermentation and production of novel polyketide compounds from micro-organisms. [2481-038 (2005) : 65]

The successful candidate will have at least 10 years’ post-graduate experience and must be able to demonstrate a proven track record of having project managed studies for a range of public and private sector clients. [2528-013 (2005) : 64]

The successful candidate will have proven experience gained in chemical process R&D in the pharma industry [2528-052 (2005) : 81]

The successful candidate will ideally have experience in the field of catalysis and preferably industrial experience also. [2485-037 (2005) : 70]

The Successful candidate will ideally have experience of business development gained either in industry or in the HEI sector. [2506-055 (2005) : 74]

They will have experience of supervising and training of junior staff. [2519-028 (2005) : 64]

To take responsibility for operational planning, protocol construction and data management, you’ll need solid research experience with in vivo animal models. Rather than bench work, [2481-006 (2005) : 55]

We have a range of vacancies throughout the department. Ideally for all roles you’ll have some brewing, food or beverage experience, but it’s essential that you have a relevant degree. [2515-028 (2005) : 66]

will preferably have at least one year's relevant postdoctoral research experience, [2489-049 (2005) : 77]

With a background of 3-5 years in the industry you will be looking to move into project management. [2502-016 (2005) : 60]

You will also have a minimum of 3 years experience leading a QC function ideally within a similarly controlled industry. [2489-006 (2005) : 60]

You will also have practice in providing ecological and environmental advice. [2485-012 (2005) : 60]

You will have a minimum of 4 years’ industrial experience in a biomedical process engineering role; [2515-012 (2005) : 58]

You will have a minimum of five years’ post-graduate experience in organic chemistry or the polymer industry. [2524-016 (2005) : 57]

You will have a minimum of two years’ post-graduate or postdoctoral medicinal chemistry experience gained in an industrial or academic laboratory. [2524-002 (2005) : 52]

You will have at least 1-2 years' research or product development experience (preferably gained in the aerospace or automotive sectors). [2524-041 (2005) : 65]

You will have at least 2 years' full-time experience in at least one of the following areas: Process Control Equipment, Laboratory Equipment or Instrumentation. [2511-011 (2005) : 55]

You will have at least seven years' relevant experience, preferably in molecular biology techniques specifically PCR and pyrosequencing. [2528-074 (2005) : 88]
| Ex | You will have at least two years' excellent practical experience in molecular techniques, particularly RNA extraction. [2481-009 (2005) : 56] |
| Ex | You will have experience in microbiology and mycology experience would be desirable. [2528-059 (2005) : 84] |
| Ex | You will have experience in undertaking soil survey or monitoring programmes, including the design and implementation. [2511-041 (2005) : 65] |
| Ex | You will have experience in using isotope techniques to interpret high-resolution records (e.g. in groundwater, corals, ocean sediments, speleothems, tree rings, pollen). [2519-017 (2005) : 60] |
| Ex | You will have experience of operating MRI systems, MRI protocol design, data analysis and RF coil design. [2485-018 (2005) : 61] |
| Ex | You will have recent industrial and/or teaching experience. [2493-053 (2005) : 71] |
| Ex | You will need experience in explosives engineering and technology. [2524-045 (2005) : 66-67] |
| Ex | You will need to possess proven experience of communicating effectively and persuasively with a broad range of stakeholders, including scientists, the media and lay audiences. [2489-028 (2005) : 71] |
| Ex | You will not be expected to have had previous experience working with [14C]. [2489-019 (2005) : 68] |
| Ex | You will preferably have at least two years' working knowledge within a laboratory environment and should be qualified to a minimum ONC, NVO Level 2 or A-level standard in a Biological Science or related subject. [2524-066 (2005) : 75] |
| Ex Co | A graduate in an appropriate scientific discipline or with three years equivalent experience, you'll have at least two years' exposure to medical or scientific writing and editing and therefore be well used to working to deadlines. [2502-014 (2005) : 59] |
| Ex Co | A PhD, preferably with up to two years' post-doctoral experience, you will have expertise in mammalian cell culture and a strong background in oncology or immunology. [2485-045 (2005) : 73] |
| Ex Co | A qualified PhD Synthetic Chemist, you will have a proven track record in developing projects within a manufacturing environment. [2493-002 (2005) : 54] |
| Ex Co | A suitable candidate for this role will have minimum of 7 years regulatory experience, preferably a detailed knowledge of EC legislation, and ability to work as part of a team, as well as leading the team when required. [2498-017 (2005) : 56] |
| Ex Co | Along with a relevant BSc or MSc, you will need at least three years' experience in the use of current immunological assays - particularly ELISA, flow cytometry and cellular immunological techniques such as cell purification, proliferation and intra-cell cytokine studies. [2515-033 (2005) : 67] |
| Ex Co | and will have either strong assay development experience or an understanding of physiology of clinical pathology change. [2485-056 (2005) : 77] |
| Ex Co | and will have experience/ working knowledge in mouse handling and experimental procedures, mouse breeding and genetics, a strong working knowledge of Animal (Scientific Procedures) Act 1986 or equivalent. Some knowledge in molecular biology and immunology techniques is preferred. [2502-024 (2005) : 62] |
| Ex Co | and will have practical experience of molecular biology and/or immunohistochemistry and cell culture techniques. [2489-049 (2005) : 77] |
| Ex Co | and will have undertaken at least five years research, preferably including the use of in vivo models, into some mechanistic aspect of the function of the mammalian nervous system in health and/or disease. [2519-011 (2005) : 58] |
| Ex Co | and will preferably have postgraduate research experience in drug analysis, enzyme kinetics or other molecular biology techniques. [2506-048 (2005) : 72] |
| Ex Co | As a chemistry graduate, ideally with a PhD, you’ll have at least two years experience in the practical application of chromatography, gained in the chemical industry. [2481-061 (2005) : 72] |
| Ex Co | As a successful candidate you’ll need experience in the preparation of inorganic materials by electrodeposition or conventional methods. [2485-059 (2005) : 77] |
| Ex Co | As experts in your field you **will** have at least four years' experience and be able to work on your own initiative to meet challenging objectives. [2506-010 (2005) : 58] |
| Ex Co | He/she **will** be experienced in facility design, manufacturing, quality control/assurance and worldwide regulatory requirements for primary and secondary pharmaceutical product manufacture. [2498-038 (2005) : 64] |
| Ex Co | He/she **will** be experienced in facility design, manufacturing, quality control/assurance and worldwide regulatory requirements for active ingredient and finished pharmaceutical product manufacture. [2519-058 (2005) : 72] |
| Ex Co | He/She **will** have a minimum of 10 years experience in pesticide formulations and knowledge of EC, ME, EW, SC,WP and CS formulations. [2506-024 (2005) : 64] |
| Ex Co | Ideally they **will** have had a minimum of 2 years laboratory experience, be computer literate and have gained knowledge of running an archive of samples. [2524-076 (2005) : 78] |
| Ex Co | Ideally you **will** have experience in biochemistry, protein purification or a general knowledge of immunology with experience in GLP/OSR environment. [2498-026 (2005) : 59] |
| Ex Co | In addition you **will** have demonstrable experience of statistical consultancy, preferably in agricultural, ecological, food or applied biological research, an ability to communicate statistical ideas to non-statisticians and good computing skills including at least five years experience in statistics package such as GenStat, MINITAB, SPSS or R. [2485-075 (2005) : 82] |
| Ex Co | S/he **will** have at least four years' post-registration experience in a routine diagnostic/clinical laboratory, broad experience in a wide range of molecular biology techniques and microscopic and serological techniques and be able to comply with CPD requirements of HPC. [2524-065 (2005) : 75] |
| Ex Co | The ideal candidate **will** have 3+ years industrial experience in structure based drug design and database searching, and have a strong interest in virtual screening. [2519-053 (2005) : 71] |
| Ex Co | The ideal candidate **will** probably have been working in the pharmaceutical industry, or research based healthcare supplier, for about two or more years and looking for a position with a broader horizon and greater personal responsibility. [2528-049 (2005) : 79] |
| Ex Co | The Senior Documentation specialist **will** have 3+ years’ previous medical writing experience including the preparation of high level clinical summary documents and regulatory filings. [2498-047 (2005) : 67] |
| Ex Co | where your experience in cell-based techniques **will** aid you in innovating and optimising appropriate assays in response to a varied range of targets. [2506-020 (2005) : 62] |
| Ex Co | while previous exposure to Molecular Dynamics & Monte Carlo Simulation, the estimation of Binding Free Energy and the Linear interaction Energy method **will** be advantageous. [2498-015 (2005) : 55] |
| Ex Co | With a background of 5-10 years in the pharmaceutical industry you **will** have already managed multiple clinical studies to successful completion. [2502-016 (2005) : 60] |
| Ex Co | With a minimum of four years’ experience in the application of LC-MS, supporting research in the pharmaceutical industry, rather than a QC background, your expertise in mass spectrometry **will** encompass molecular fragmentation. [2498-019 (2005) : 57] |
| Ex Co | With a minimum of three years industrial experience, you **will** have an excellent understanding of scaling laboratory processes to pilot scale in preparation for industrial scale up. [2481-038 (2005) : 65] |
| Ex Co | With a thorough knowledge of the latest methods for the calculation and simulation of polymer properties, the candidate **will** provide polymer experience to the group, apply best practice to the calculation of polymer properties and, where required, develop and validate new methods to compute polymer properties. [2485-083 (2005) : 85] |
| Ex Co | With experience of intellectual property and commercialisation, you **will** be able to demonstrate deal completion. [2485-093 (2005) : 88] |
| Ex Co | With previous commercial experience gained in areas such as the diagnostic and/or pathology markets you **will be required** to provide strategic direction in the positioning of Invitrogen key technology platforms within these areas. [2506-026 (2005) : 65] |
| Ex Co | Working on a number of research projects, you **will** be experienced in establishing and maintaining effective working relationships with colleagues and customers. [2515-047 (2005) : 72] |
| Ex Co | You **will** already have experience of this industry sector and ideally, an understanding of molecular, cell and tissue biology as alternatives to animals in research. [2489-028 (2005) : 71] |
| Ex Co | You **will** also need three years experience working in a laboratory undertaking a high level of microscopy including Electron Microscopy, along with good administrative and personal organisational abilities. [2485-027 (2005) : 66] |
| Ex Co | You **will** be experienced in Unix/Linux systems administration together with object-orientated design and development, preferably in C++/Java, as well as PHP and web development. [2515-078 (2005) : 81] |
| Ex Co | You **will** have 1-2 years’ medical writing experience for the Documentation Specialist role, with a demonstrably clear, concise scientific writing style. [2498-047 (2005) : 67] |
| Ex Co | You **will** have 5 or more years’ experience (post-qualification) of the regulation relevant to radioactive substances preferably coupled with project management experience. [2481-033 (2005) : 63] |
| Ex Co | You **will** have at least five years experience working on environmental issues with an industrial or commercial focus and a proven track record of applying models to environmental issues. [2493-025 (2005) : 62] |
| Ex Co | You **will** have at least five years' practical experience with the Metrology and Calibration field, two years' being within a Type I (Primary Standards) Laboratory. [2519-010 (2005) : 57] |
| Ex Co | You **will** have at least five years’ practical experience within the Metrology and Calibration field including at least two years' in the performance of diagnostic and rectification work to component level. [2519-010 (2005) : 57] |
| Ex Co | You **will** have at least five years practical experience within the Metrology and Calibration field including at least two years in the performance of diagnostic and rectification work to component level. [2485-044 (2005) : 73] |
| Ex Co | You **will** have at least six years practical experience at an engineering level, two years being within the Metrology and Calibration field. [2485-044 (2005) : 73] |
| Ex Co | You **will** have at least two years' relevant experience and have worked within a GMP environment. [2502-003 (2005) : 55] |
| Ex Co | You **will** have experience in diffuse pollution, soil hydrological processes and contaminant fate and transport in soils and groundwaters. [2511-041 (2005) : 65] |
| Ex Co | You **will** have experience in the use of such equipment as well as demonstrating good managerial skills. [2524-073 (2005) : 77]. |
| Ex Co | You **will** have experience with programming in C/C++ and ideally in Linux, and be knowledgeable of techniques in image processing, and ideally, in behavioural understanding. [2524-051 (2005) : 70] |
| Ex Co | You **will** have practical laboratory experience in molecular biology or a related field and be skilled in keeping accurate records. [2515-025 (2005) : 64]. |
| Ex Co | You **will** have research experience in one or more of the following fields: data analysis and manipulation, programming preferably C/C++ under UNIX/Linux, the running or application of existing numerical models, collection and use of disease datasets. [2485-081 (2005) : 84] |
| Ex Co | You **will** have wide experience in molecular biology techniques, be a team player but also be able to work autonomously. [2528-018 (2005) : 66] |
| Ex Co | You **will** ideally have several years of post graduate experience of programming in a bioinformatics environment, together with some molecular or cell biological background. [2493-031 (2005) : 65] |
| Ex Co | You’ll need 3-5 years’ experience in the development of non-clinical formulations for discovery compounds, while some exposure to other preformulation and analytical techniques (e.g. thermal analysis, moisture sorption) **would** be advantageous. [2511-035 (2005) : 63]. |
| Ex Co Di | Senior Research Co-ordinator applicants **will** have substantial experience in managing large European research projects, with formal training in environmental or social sciences, or in policy studies. [2524-054 (2005) : 72] |
| Ex Di | As a lubricant professional you **will** have had practical R&D experience, and good science, engineering, or technology qualifications. [2485-058 (2005) : 77] |
| Ex Di | With at least 3 years experience gained in a similar role, you **will** have a degree in Statistics or a related subject, and experience of SPSS or similar. [2485-002 (2005) : 56-57] |
Ex Di You will need to have experience of surveying or studying birds in the field and may have got a degree in a biological subject. [2528-022 (2005) : 68]

Ex Di You'll have a proven track record of research delivery and materials science. [2489-013 (2005) : 64-65]

Ex Di Co With research experience, you will have a degree in a biological subject and an interest in studying behavioural responses of cattle and pigs to road transportation. [2502-052 (2005) : 72]

Ex Di Co With significant work experience and a relevant degree or equivalent, you'll need thorough knowledge of water resources, [2502-002 (2005) : 54]

Ex Di Co You will have at least three years research experience in human or animal epidemiology as well as an Honours degree or equivalent training, involving statistics as a main subject. [2515-047 (2005) : 72]

Ex E You will also need some experience in a GLP environment and be prepared to work for a modern, growing and active CRO in Switzerland. [2489-002 (2005) : 58]

Pub You'll find the right person. Fast [2485-048 (2005) : 74]

Pub You'll find the right person. Fast [2493-042 (2005) : 68]

Pub You'll find the right person. Fast [2502-019 (2005) : 60]

Pub You'll find the right person. Fast [2502-073 (2005) : 78]

Ca Attached files in pdf format are preferred and no posted or faxed applications will be accepted. [2537-038 (2006) : 70]

Ca Email applications will only be accepted to recruitment@marine.ie and are not valid until you have received acknowledgement from the Marine Institute. [2558-033 (2006) : 74]

Ca For an informal discussion about any of these positions please phone 0191 211 2626 and you will be put through to the appropriate manager. [2580-029 (2006) : 64]

Ca For an informal discussion about any of these positions please phone 0191 211 2626 and you will be put through to the appropriate manager. [2580-076 (2006) : 80]

Ca For further details on these projects please visit the webpages www.sgul.ac.uk/studentships or www.rhul.ac.uk/biosci/vacancies where you will also find details of the application procedure and application form. [2545-090 (2006) : 93]

Ca Here you’ll find more information on the roles and details of how to apply. [2576-044 (2006) : 77]

Ca Short listing criteria for the post will be included in applicant packs. [2554-065 (2006) : 84]

Ca These emails will be screened electronically, so the email must include the text KNOO in the subject line and attachments must be in the form of pdf files, and named in the form YOURNAME_CV.pdf and YOURNAME_COVER.pdf. [2563-082 (2006) : 78]

Ca To apply, please send your CV salary details and a document (one side maximum) entitled Applications will be assessed by a panel [2545-063 (2006) : 84]

Co A PhD with a well-established reputation in at least one area of biopharmaceutics - absorption pharmacokinetics, in vivo relevant dissolution, permeability or delivery route/system specific biopharmaceutics - you'll enjoy the scope to advance new thinking in this area. [2558-025 (2006) : 68-71]

Co Alongside providing expert advice and data on the evolution of high level waste and spent fuel under repository conditions, you'll define the future research needs and work with interested parties to develop a programme. [2572-040 (2006) : 77]
| Co  | Alternatively, you could find yourself initiating and supporting drug and biomarker discovery research via analysing, integrating and interpreting scientific literature that **will** help further our business objectives and strengthen our overall strategy and planning process. [2550-012 (2006) : 62] |
| Co  | although strong candidates with a background in organic chemistry **will be considered**. [2576-043 (2006) : 76] |
| Co  | Although the emphasis is on research, as the scheme progresses there **will** be an increasing amount of teaching, project management and outreach to schools to try and enthuse the future generation. [2576-087 (2006) : 90] |
| Co  | although time **will also be spent** on-site with RESON and in field deployments of the sonar. [2572-073 (2006) : 92] |
| Co  | An exciting and challenging role within an expanding and vibrant organisation, you **will** play a key role in developing strong technical relationships with customers across Europe, Middle East, Africa and the FSU. [2558-066 (2006) : 87] |
| Co  | An NMR Spectroscopist with expertise in Liquids NMR, here you'll **lead and support technological developments within this area as part of our Research and Technology strategy, contributing to both internal and external research programmes.** [2558-025 (2006) : 68-71] |
| Co  | Analyses **will include gene-environment interactions.** [2558-095 (2006) : 97] |
| Co  | and above all, **will enjoy the challenges and scope to innovate in a dynamic, constantly changing and high profile environment.** [2558-025 (2006) : 68-71] |
| Co  | and that strong associations with the appointee's primary research area **will be maintained** to promote continued scholarship there as well as publications directed at science communication. [2580-064 (2006) : 77] |
| Co  | and **will act as a source of expertise in occupational and environmental toxicology.** [2545-049 (2006) : 79] |
| Co  | and **will act as deputy to the centre's chief programmer.** [2567-070 (2006) : 79] |
| Co  | and **will advise us on the possible implications of developments in this field.** [2545-061 (2006) : 83] |
| Co  | and **will also act as project leader directing a multidisciplinary team of scientists.** [2550-049 (2006) : 79] |
| Co  | and **will be a member of a multi-disciplinary team teaching and researching zoological and ecological issues of national and international importance.** [2541-063 (2006) : 81] |
| Co  | and **will conduct research, training and supervision of technical staff** [2554-041 (2006) : 75] |
| Co  | and **will contribute to the development of the Research Governance and Regulatory team.** [2545-077 (2006) : 89] |
| Co  | and **will contribute to the external representation of the BGS;** [2550-026 (2006) : 69] |
| Co  | and **will contribute to the management of the Basic Science Programme.** [2554-041 (2006) : 75] |
| Co  | and **will contribute to the management of the Basic Science Programme.** [2554-041 (2006) : 75] |
| Co  | and **will enjoy acting as the focal point for all activities in this area.** [2558-025 (2006) : 68-71] |
| Co  | and **will ensure the maintenance of world class standards of research throughout the Unit.** [2550-014 (2006) : 63] |
| Co  | and **will help identify and establish new technologies and approaches for future projects.** [2558-025 (2006) : 68-71] |
| Co  | and **will involve a mixture of field- and lab-based studies.** [2558-073 (2006) : 89] |
| Co  | and **will make a major contribution to the teaching of first and second year undergraduates.** [2563-073 (2006) : 75] |
| Co  | and you **will work in the Cancer Research UK Targeted Therapy Group, based at the Paterson Institute for Cancer Research (PICR).** [2537-062 (2006) : 79] |
| Co  | Applicants **will undertake original independent research, and associated training, leading to the award of a PhD.** [2563-070 (2006) : 74] |
| Co  | Applicants **will work well in a team, and have a basic IT knowledge.** [2554-047 (2006) : 77] |
| Co  | Applying your expertise, you'll **work on a wide range of formulations and characterisation techniques, encompassing early phase research through to transfer to cGMP manufacturing facilities.** [2576-018 (2006) : 68] |
| Co  | Appointees **will be expected** to contribute to teaching at both undergraduate and postgraduate level in the Physics Department. [2537-075 (2006) : 84] |
Co As a member of the Tesco non-food team, you won’t be restricted or constrained. [2545-040 (2006) : 75]

Co As a pharmacy technician in a major hospital trust like ours you’ll have an extremely varied and interesting job, which can involve anything from aseptic manufacturing or preparing for new drug trials to direct contact with patients. [2563-013 (2006) : 55]

Co As a recognised expert in the geoscience or radioactive waste community, you’ll define and manage our investigations into the behaviour of radionuclides within the geosphere and the surface environment over timescales of hundreds of thousands of years. [2572-040 (2006) : 77]

Co As a Research Investigator - Inhaled Therapies, you will lead a team in performing in vitro and in vivo metabolism and pharmacokinetic studies for inhaled therapies, including the assessment of lung metabolism and the properties influencing lung retention. [2545-027 (2006) : 69]

Co As an experienced environmental chemist, skilled in assessing and interpreting data, you will join our field chemistry unit assisting in the operation of water quality monitoring stations and assessing the data collected during diffuse pollution studies. [2580-058 (2006) : 74]

Co As an experienced hydrogeologist, you’ll help to provide regional leadership and technical advice on hydrogeology, particularly with respect to strategic abstraction licensing, our Catchment Abstraction Management Strategies and Habitats Directive as well as the technical management of projects and numerical groundwater modelling. [2563-021 (2006) : 58]

Co As head of a key department within the WCRF global network, you will be instrumental in formulating and implementing strategy and liaising with government NGOs, academics and consultants in order to achieve the objectives of the organisation. [2545-008 (2006) : 60]

Co As Managing Director, you will function in an international context and in an international team. [2554-010 (2006) : 63]

Co As much of the work will be undertaken collaboratively, an ability to engage with stakeholders is an important quality. [2537-005 (2006) : 58]

Co As one of six post-doctoral workers in the Centre of Excellence your main activities will be to build spatial epidemiological models for tick borne diseases, in particular Louping-ill virus, and liver-fluke infection and gastro-intestinal nematode infection. [2580-027 (2006) : 63]

Co As part of a small team you will quickly be able to make a positive contribution, reviewing, updating and submitting applications. [2563-044 (2006) : 64]

Co As part of this team, you’ll work with chemists and microbiologists to provide top-quality advice to government departments such as the MOD, Foreign Office and Dti, as well as to policymakers and implementers. [2554-035 (2006) : 72]

Co As part of your remit of keeping us at the forefront of NMR spectroscopy, you will also represent AWE as part of domestic and international technical collaboration programmes. [2558-045 (2006) : 79]

Co As pivotal member of the Water Quality and Environmental Performance Team, you will have direct contact with our water quality regulator, the Drinking Water Inspectorate. [2580-033 (2006) : 65]

Co As such, you’ll make applications for the investigation and marketing of new drugs, prepare regulatory submissions for the USA, Canada and European Union, and provide representation at regulatory agencies and committees. [2563-055 (2006) : 69]

Co As the knowledge on fisheries in your region, everyone will come to you for advice, from fisheries officers to environmental management teams. [2554-002 (2006) : 60]

Co As the part-time non-executive chair of Distance Lab, you’ll act on behalf of its board, making sure we follow good practice in our corporate governance. [2567-005 (2006) : 52]

Co As the primary technology interface between global lubricants technology and our marketing network, you’ll liaise with supply chain on the optimization of cost of goods, and maintain strategic technical relationships with third party lubricants additive suppliers and OEMs. [2572-064 (2006) : 87]

Co As well as managing other team members, you’ll also advise us on odour, dust, deposition and air quality modelling. [2541-006 (2006) : 58]

Co as will reporting findings and liaising with customers. [2537-048 (2006) : 73]

Co as you’ll be liaising closely with clinical research organisations and working with a variety of project teams across all therapeutic areas at Sandwich. [2558-052 (2006) : 81]
<table>
<thead>
<tr>
<th>Position</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Co Assessment</td>
<td>will use cell culture and transfection techniques in conjunction with immunocytochemistry and high-resolution, fluorescent, live cell imaging of native and transfected cells. [2558-095 (2006) : 97]</td>
</tr>
<tr>
<td>Co At Hazelwood</td>
<td>you will collaborate with chemists and engineers on problems in formulation and systems development, performance testing, and process/product development. [2567-053 (2006) : 71]</td>
</tr>
<tr>
<td>Co At the NCRI</td>
<td>Regan says the upcoming review for non-clinical scientists will take a fundamental look at the structure of biomedical science. [2545-004 (2006) : 56-59]</td>
</tr>
<tr>
<td>Co Based at our internationally renowned Central Toxicology Laboratory, you’ll lead a team of scientists as they conduct studies required for the registration of chemicals, pharmaceuticals and proteins. [2537-048 (2006) : 73]</td>
<td></td>
</tr>
<tr>
<td>Co Based at the divisional HQ in Chilton</td>
<td>you will be part of a team providing a national environmental health public tracking service including preparing and responding to acute and chronic environmental and chemical incidents. [2563-032 (2006) : 61]</td>
</tr>
<tr>
<td>Co Based at the FRS Marine Laboratory in Aberdeen</td>
<td>you will join the Fisheries Management Programme, providing scientific advice on the status of fish and shellfish stocks important to Scotland. [2537-053 (2006) : 75]</td>
</tr>
<tr>
<td>Co Based in our Technology Centre at Pangbourne</td>
<td>you’ll lead and inspire a team of technologists in developing new differentiated heavy-duty engine oils. [2572-064 (2006) : 87]</td>
</tr>
<tr>
<td>Co Based in our UK hub site in Slough</td>
<td>you will play a crucial part in ensuring a regulatory environment that is supportive of our business strategies, particularly in the areas of food safety, and nutrition and health. [2576-039 (2006) : 75]</td>
</tr>
<tr>
<td>Co Based within the Reference &amp; Product Development Department at Ellen's Glen Road, Edinburgh</td>
<td>you will manage and co-ordinate the activities of the department to ensure that customer needs, strategic objectives and performance targets are met through innovative new product development, improvements in efficiency and the harnessing of new technology. [2550-016 (2006) : 64]</td>
</tr>
<tr>
<td>Co Besides people management, the position</td>
<td>will offer opportunities to work in multi-disciplinary and international teams, and to represent the department in external expert groups. [2550-011 (2006) : 61]</td>
</tr>
<tr>
<td>Co Besides people management, the position</td>
<td>will offer opportunities to work in multi-disciplinary and international teams, and to represent the department in external expert groups. [2550-011 (2006) : 61]</td>
</tr>
<tr>
<td>Co Both positions</td>
<td>will involve experimental work in a laboratory and factory environment. [2558-037 (2006) : 76]</td>
</tr>
<tr>
<td>Co Both technical and economic appraisal</td>
<td>will be required, underpinned by a comprehensive sampling and analytical programme to identify benefits, disbenefits, risks and constraints. [2558-091 (2006) : 96]</td>
</tr>
<tr>
<td>Co By identifying and initiating new research opportunities with global counterparts</td>
<td>you’ll play a pivotal role in ensuring we give our consumers the high-quality products that they know, love and expect. [2572-031 (2006) : 73]</td>
</tr>
<tr>
<td>Co Chemical analysis</td>
<td>will include a variety of instrumentation, including HPLC. [2580-044 (2006) : 68]</td>
</tr>
<tr>
<td>Co Contributing to the design, implementation and interpretation of formulation development investigations</td>
<td>you’ll use, and develop, a range of analytical methods including pH, SDS-PAGE, SEC-HPLC, IEX-HPLC and particulate investigation. [2558-025 (2006) : 68-71]</td>
</tr>
<tr>
<td>Co Determined and able to make a significant impact</td>
<td>you will ensure a robust approach to Knowledge Transfer is in place which involves users in the planning, implementation and review of the science and knowledge transfer activities supported by NERC. [2554-005 (2006) : 61]</td>
</tr>
<tr>
<td>Co Develop processes that</td>
<td>will secure our success [2580-033 (2006) : 65]</td>
</tr>
<tr>
<td>Co Developing API processes for technology transfer from research to manufacture</td>
<td>you’ll look at issues connected to scale up, whilst introducing innovative processes. [2541-013 (2006) : 63]</td>
</tr>
<tr>
<td>Co Developing specialist knowledge of our product portfolio</td>
<td>you’ll ensure that all our quality and safety standards are met and that buying decisions are fully supported. [2545-040 (2006) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>Driving the design and development of Phase I clinical trials, you will take a key role both in the leadership of your Biometrics team and in the delivery of vital input to support our clients' objectives. [2563-055 (2006) : 69]</td>
</tr>
<tr>
<td>Co</td>
<td>Drug Safety is becoming a more high profile department within the pharma industry and you will be instrumental in making key decisions to prioritise or escalate cases [2554-036 (2006) : 73]</td>
</tr>
<tr>
<td>Co</td>
<td>Due to the EMBL turnover system, the Unit composition is highly dynamic, and the Coordinator will play a critical role in the choice of new Group Leaders and thus in the research direction of the entire Unit. [2550-014 (2006) : 63]</td>
</tr>
<tr>
<td>Co</td>
<td>During the project, the successful candidate will work in collaboration with computational chemists from three companies – Astex, AstraZeneca (Alderley Park) and Syngenta - to evaluate whether new scoring functions are delivering better enrichments in high-throughput virtual screening. [2545-034 (2006) : 72]</td>
</tr>
<tr>
<td>Co</td>
<td>Educated to degree level with at least four years’ related experience - or with a PhD and at least two years experience - you’ll be looking to extend your influence in this exciting field. [2558-025 (2006) : 68-71]</td>
</tr>
<tr>
<td>Co</td>
<td>Entrepreneurial, visionary and creative, you’ll bring strong skills and significant intellectual capacity, possibly even a postgraduate qualification in business strategy, technology management or ICT. [2567-005 (2006) : 52]</td>
</tr>
<tr>
<td>Co</td>
<td>Evaluating compliance on corrosion matters, you’ll provide expert advice on the impact of corrosion on gas generation, the physical evolution of encapsulated waste and the integrity of the waste containers. [2572-040 (2006) : 77]</td>
</tr>
<tr>
<td>Co</td>
<td>Experienced in market research and strategy development in the healthcare industry, you will develop innovative and leading-edge strategic programmes that are commensurate with the CELS’ business plan and also lead the development of CELS' market and technology research resources to deliver CELS' regional and commercial goals. [2580-029 (2006) : 64]</td>
</tr>
<tr>
<td>Co</td>
<td>For either position you will work from home and travel to our customer sites in the South East. [2563-022 (2006) : 58]</td>
</tr>
<tr>
<td>Co</td>
<td>From generating samples for analysis to performing high quality assays, you’ll have the chance to use and develop a broad range of skills. [2554-025 (2006) : 67]</td>
</tr>
<tr>
<td>Co</td>
<td>From the start, you’ll determine areas for exploration and oversee a multi-disciplinary programme that encompasses both desk and laboratory research. [2572-040 (2006) : 77]</td>
</tr>
<tr>
<td>Co</td>
<td>Furthermore, you will expand the funding base for future EUMETSAT programmes by identifying and cultivating additional partners to develop technical Programmes. [2541-039 (2006) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>Getting involved primarily in the early phases of drug development, you’ll provide strategic and operational advice that helps our project teams optimise the use of imaging modalities such as MRI, CT and PET. [2567-027 (2006) : 61]</td>
</tr>
<tr>
<td>Co</td>
<td>He/she will conduct research, train and supervise technical staff [2554-041 (2006) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>He/she will help integrate the Unit’s research activities with those of the other Units in Heidelberg (Cell Biology and Biophysics, Developmental Biology, Gene Expression) and in EMBL’s Outstations, particularly with the Structural Biology research at the Grenoble and Hamburg Units and Bioinformatics research at the EBI. [2550-014 (2006) : 63]</td>
</tr>
<tr>
<td>Co</td>
<td>He/she will provide guidance and support to other scientific staff of the Programme [2554-041 (2006) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>Heading up our chemistry groups at Cambridge and Winnersh (near Reading), you will lead a team of chemists in the discovery, design, synthesis and optimisation of lead molecules. [2541-029 (2006) : 69]</td>
</tr>
<tr>
<td>Co</td>
<td>Helping to optimise the discovery, development and commercialisation of our emerging therapies, you’ll design, manage and evaluate epidemiological research projects and develop RA/TA and project-specific epidemiology strategies. [2567-027 (2006) : 61]</td>
</tr>
<tr>
<td>Co</td>
<td>Ideally with experience in in vivo models of disease, you will play an essential role in our drug discovery efforts establishing animal models of visceral disorders, including colitis, hypersensitivity and motility. [2558-034 (2006) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>In addition to your department staff you will also manage the embarked technical support team and the interface with the scientific party. [2563-014 (2006) : 56]</td>
</tr>
</tbody>
</table>
In addition, studies of gene expression in differentiating ES cell in culture will be required as well as comparing the effects of gene targeted mutations. [2558-084 (2006) : 93]

In addition, you will answer and resolve information processing queries and service issues and act as the key point of contact for queries from stakeholders both within and outside of the MHRA. [2541-032 (2006) : 71]

In addition, you will coordinate the administration of the Persons Appointed process, oversee the production of the Expert Committees annual report and incorporate all changes in legislation or procedure to the operating procedures of all Expert Committees. [2541-036 (2006) : 73]

In addition, you will lead and manage the immunohaematology reference services offered by Alba Bioscience to its customers throughout the world. [2550-016 (2006) : 64]

In addition, you will ensure that adequate stocks are maintained for increasing production and retrievals. [2545-044 (2006) : 78]

In order to strengthen an already talented team we are looking to recruit a Quality Assurance Manager who will be the champion and guardian of product quality across the KLIX® and FLAVIA® brands. [2558-039 (2006) : 77]

In our dealings with stakeholders, partners and customers, you’ll be a confident advocate and champion for our activities. [2567-005 (2006) : 52]

In particular the successful applicant will be keen to act as a manager of the interface between the academic staff, the industrial experts and the researchers and delegates benefiting from our bioprocess leadership initiatives. [2558-087 (2006) : 95]

In particular, she/he will build on existing research to lead the development of computational models of cyclonic winds that accurately reflect the spatial occurrence and magnitude of historical tropical cyclones and their impact on communities. [2554-058 (2006) : 81]

In particular, you will define and support the implementation of strategic plans for future satellite systems and establish and support the implementation of coordinated long-term plans for Earth observation. [2541-039 (2006) : 75]

In this broad role, you will take lead responsibility of developing new and existing products using your technical organic skills ultimately increasing our global profile. [2537-021 (2006) : 65]

In this key role, you’ll ensure that financial targets are met, generate an appropriate forward load and determine future areas of activity. [2541-054 (2006) : 80]

In this largely laboratory-based, experimental role, you’ll design novel formulation options, before carrying out experiments at various levels from a laboratory to manufacturing scale, then interpreting and reporting your findings and conclusions. [2550-027 (2006) : 70]

In this new role, you’ll ensure regulatory compliance and best scientific practice, including specification, methodology, validation, testing strategies, investigations and practical work at vendors. [2558-052 (2006) : 81]

In this position, you will lead on the development of UK Nature conservation advice on marine mammals to Government. [2563-051 (2006) : 67]

In this project, the effect of alternate mRNA processing of the related HNF1A and HNF1 beta genes on maturity-onset diabetes of the young (MODY) phenotype will be explored. [2558-095 (2006) : 97]

In this role you will act as the first point of contact between the Agency and industry stakeholders, answering enquiries received by phone, letter and email from licence holders and their representatives across Europe. [2554-051 (2006) : 79]

In this role you will be leading the European clinical area of a global programme for assigned development candidates. [2537-020 (2006) : 65]

In this role you’ll play on an international stage, providing world-class Regulatory Affairs support to our European operations. [2576-039 (2006) : 75]

In this role, you will be the scientific leader of the project team (including Data Managers, Programmers and Statisticians) for the reporting of Phase I and II studies. [2567-055 (2006) : 72]

In this vital role, you will provide expert technical advice to all our business units, focusing on the interaction of thermal power plants with the aquatic environment. [2580-011 (2006) : 58]

In this new role, you will be the scientific leader of the project team (including Data Managers, Programmers and Statisticians) for the reporting of Phase I and II studies. [2567-055 (2006) : 72]

In this vital role, you will provide expert technical advice to all our business units, focusing on the interaction of thermal power plants with the aquatic environment. [2580-011 (2006) : 58]

In this role you will act as the first point of contact between the Agency and industry stakeholders, answering enquiries received by phone, letter and email from licence holders and their representatives across Europe. [2554-051 (2006) : 79]
| Co | Leading a small team, you’ll provide specialist engineering support for software and hardware process control systems. [2541-013 (2006) : 63] |
| Co | Leading a team of scientists responsible for the validation, compliance and aseptic manufacturing processes for NCEs, biopharmaceuticals and line extensions manufactured within the Pharmaceutical Development Facility (PDF) aseptic processing areas, here you’ll develop parenteral formulations to support clinical trials and scale-up and development trials to establish commercial formulations for the global market. [2558-025 (2006) : 68-71] |
| Co | Leading and developing a small, talented team, you’ll ensure we meet regulatory, quality, environmental and health and safety issues for activities within the plant. [2541-013 (2006) : 63] |
| Co | Leading the biopharmaceutics input and strategy for assigned projects, your wide-ranging expertise in this area will be crucial, both in supporting specific projects and in coaching other scientists in this area. [2558-025 (2006) : 68-71] |
| Co | Leading the research team and reporting to the Executive Director of Research and Policy, you will take an active role in the ongoing development, implementation and evaluation of the charity’s research strategy. [2567-007 (2006) : 56] |
| Co | Lending your expertise primarily in the early phases of drug development, you’ll analyse the needs of the drug projects and propose informatics solutions that meet them. [2567-027 (2006) : 61] |
| Co | Looking carefully at our research needs, you’ll manage an interdisciplinary programme focused on wasteform evolution issues to support the viability of geological disposal of intermediate level wastes. [2572-040 (2006) : 77] |
| Co | Managing the Material Science team within our Process Engineering section, your main remit here will be to provide expert characterisation of pharmaceutical materials in support of new product developments. [2558-025 (2006) : 68-71] |
| Co | Not least, you will work with the Parliamentary Office and the British Retail Consortium to ensure our stance on legislative, technical and scientific issues is continually developed. [2567-041 (2006) : 67] |
| Co | Organising, maintaining, developing and implementing the relevant systems and software, you will enable us to deliver core scientific objectives. [2545-061 (2006) : 83] |
| Co | Qualified to degree level in a science related subject, and with relevant experience, your excellent communication skills will enable you to discuss regulatory issues at all levels. [2554-057 (2006) : 81] |
| Co | Reporting directly to the managing director and involving international travel, this role will give the right candidate an opportunity to get in on the ground floor of a fast-growing and successful company and to develop their project management skills in an exciting commercial environment. [2567-029 (2006) : 62] |
| Co | Reporting to the Assay Development and Screening Department Head, you will lead a team of scientists in the coordination and execution of compound screening and validation. [2550-049 (2006) : 79] |
| Co | Reporting to the Discovery Informatics Department Head, you will also act as project leader directing a multidisciplinary team of scientists. [2550-049 (2006) : 79] |
| Co | Reporting to the Engineering and Technical Manager, you will lead a team of Technical Product Managers in the delivery of the company's world leading product portfolio from conceptual design to point of sale, taking full project responsibility for the interpretation and establishment of protocols & practice and extending from new product development, material selection and approval, regulatory compliance, to internal and external quality. [2541-019 (2006) : 66] |
| Co | Reporting to the R&D Leader you will take ownership for development projects for Krypton & Xenon, Pulsed and CW operated flash lamps. [2580-051 (2006) : 71] |
| Co | Reporting to the Senior Editor, you will liaise with international opinion leaders and be involved in the editorial process from content acquisition through to publication, both in print and online formats. [2537-045 (2006) : 72] |
| Co | Reporting to the Senior Editor, you will liaise with international opinion leaders and be involved in the editorial process from content acquisition through to publication, both in print and online formats. [2537-056 (2006) : 76] |
| Co | Reporting to the SVP Drug Discovery, you **will** lead a team of pharmacologists within the R&D group [2550-049 (2006) : 79] |
| Co | Reporting to the Technical Group Manager, you **will** lead projects, teams of Scientists and Technicians to deliver projects from new product introductions to process improvements and technical investigations. [2541-019 (2006) : 66] |
| Co | Responsible for initiating appropriate statutory and remedial action with regard to radioactive contaminated land, you **will** be a key point of contact for SEPA staff and external stakeholders (including the public) in this sometimes delicate area. [2550-028 (2006) : 70] |
| Co | Responsible for the design and development of drug delivery devices, you’ll be an efficient and highly effective project engineer with a strong technical background and be capable of working in close collaboration with a wide range of both internal and external partners. [2558-025 (2006) : 68-71] |
| Co | Software packages such as FPC, Oracle based tracking tools and web interfaces **will be used** [2554-034 (2006) : 72] |
| Co | Specialising in parasitology, companion animal vaccines or swine medicine and husbandry production, you’ll manage clinical research and call on your extensive technical knowledge within your field to advise scientists and project teams. [2572-027 (2006) : 71] |
| Co | Tasks **will** be varied, ranging from data cleaning / coding, proof reading, and organising hospitality for visiting academics, through to developing research methods (for example the measurement of diet, physical activity and body composition in adults and children), training field staff in these techniques, and the analysis and writing up of research data. [2541-074 (2006) : 84] |
| Co | Techniques **will** include cell culture (of both cell lines and human cells), immunochemistry, molecular biology as well as light, confocal and electron microscopy. [2558-095 (2006) : 97] |
| Co | Working with project teams to gain a good understanding of Respiratory and Inflammation projects in our late Discovery portfolio, you’ll identify key translational issues that **will** be relevant to the early development process. [2567-027 (2006) : 61] |
| Co | The Associate **will** have the challenge of bridging the technical issues and method development associated with a research project and converting this into a commercial reality of robust procedures and new variety generation, [2567-037 (2006) : 66] |
| Co | The candidate **will** lead a research group. [2550-014 (2006) : 63] |
| Co | The Detector Group is also responsible for a detector development programme which **will** have significant benefits for beamline operation. [2580-053 (2006) : 71] |
| Co | The Director **will** lead the long-term development and vision for SAGES. [2558-005 (2006) : 60-61] |
| Co | The holder of the position **will** provide technical and scientific expertise within the virology section of the Unit's Basic Science Programme. [2554-041 (2006) : 75] |
| Co | The member of staff **will** work as part of a team to help prepare practical materials and to set up and clear away after classes. [2572-068 (2006) : 89] |
| Co | The person appointed **will** provide a focus for leadership in the subject of cardiovascular disease relating to the mechanisms of ischaemic injury with particular emphasis on directing basic science and the provision of translational research. [2567-009 (2006) : 53] |
| Co | The PhD student **will** work with mathematical modeling and simulation of integrated aquaculture systems. [2576-094 (2006) : 91] |
| Co | The Physiological Society is seeking a Chief Executive who **will**, together with the academic officers of the Society, develop the Society's strategy to achieve its aims, provide leadership to the staff [2537-037 (2006) : 70] |
| Co | The position **will** be field based involving regular travel throughout the required territory (north of England and Scotland). [2541-064 (2006) : 82] |
| Co | The post holder **will** act as the link between NuGO (The European Nutrigenomics Organisation) and the EARNEST networks, [2558-009 (2006) : 62] |
| Co | The post holder **will** join Prof. Alex Thomson and Dr. Afia Ali and perform double immunofluorescence labelling and recovery of biocytin filled neurones in hippocampus and cortex and full anatomical reconstruction of labelled cells using a drawing tube and 3D-graphics, Neurolucida. [2563-059 (2006) : 70] |
The post holder will work in a team and liaise with colleagues in the UK and France to help to construct software for a landscape simulator. [2541-017 (2006) : 64]

The post-holder will be resident in the Isle of Man. [2572-067 (2006) : 89]

The postholder will supervise colleagues in the Facility and interact with a wide range of researchers of the Institute interested in diverse areas of biology (immunology, infectious disease, developmental biology, neurobiology, structural biology). [2567-022 (2006) : 59]

The postholder will work in a team of technicians but **should** have particular skills and knowledge in the area of Microbiology with knowledge or prior experience of CL3 facilities. [2580-072 (2006) : 79]

The post-holder will work jointly with the School of Veterinary Sciences Cambridge to investigate the immunology of Salmonella based heterologous vaccines in poultry. [2537-055 (2006) : 76]

The professor will lead the chair Crop and Weed Ecology (academic staff, technicians and students) whose activities focus on the functioning of crops and cropping systems in relation to (a)biotic factors and on weed ecology, addressing (inter)national research issues. [2533-053 (2006) : 61]

The project will involve a range of molecular biology techniques, microscopy, flow cytometry, and viral infectivity assays. [2537-070 (2006) : 82]

The project will involve the synthesis of anthraquinones with masked heterocyclic alkylating functionalities as novel potential anticancer agents. [2545-012 (2006) : 62]

The Research Facilitator will be the point of contact for climate science within the Mathematical, Physical and Life Sciences Division, helping to foster links and collaboration between research groups. [2567-066 (2006) : 78]

The Research project will assess the utility of a range of survey methods (e.g. underwater video mosaics, acoustic surveys, grab sampling) [2558-073 (2006) : 89]

The research will investigate chemical mechanisms and kinetics of flavour formation in meat and meat-like model systems during thermal processing. [2554-089 (2006) : 90]

The researcher will work with Thames Water exploring their customers' attitudes and behaviour towards both water recycling and requests to conserve water using social science methodologies. [2537-007 (2006) : 59]

The role embraces market research, events and promotional activities and **will** suit a new (post) graduate who has an excellent attitude and an interest in contributing towards promoting the healthcare benefits of biopharmaceuticals. [2541-058 (2006) : 76]

The role will involve the optimisation of applications and assist in scale-up and engineering. [2567-057 (2006) : 74]

The Senior Research Associate will work with Doctors. Tim Osborn and Nathan Gillett, analysing observations and existing climate model simulations using extreme value theory and statistical techniques developed for the detection of anthropogenic influences on climate. [2576-093 (2006) : 91]

The signals from SERS and leaky waveguides arrays **will** need to be matched against spectral data previously collected and held in a database. [2558-078 (2006) : 91]

The successful candidate **will** advise the Head of CCLRC Technology on future requirements for infrastructure, assist in developing a quality management system that meets ISO9001 requirements, and ensuring the highest standards of health and safety practice within the division. [2541-042 (2006) : 76]

The successful candidate **will** initially concentrate on building a strong, independent research profile followed by a gradual introduction to teaching and transition to a permanent post subject to successful completion of probation. [2554-072 (2006) : 86]

The successful candidate **will** join the inorganic chemistry section of the Department, be expected to teach at all levels of the undergraduate programme and have the ability to complement current research activities in biological chemistry and/or green chemistry. [2554-080 (2006) : 88]

The successful candidate **will** lead the technical direction and co-ordinate the resource of projects. [2567-011 (2006) : 54]

The successful candidate **will** manage 3 members of staff. [2545-029 (2006) : 70]

The viability of the course **will** depend to a large extent on the fellow's initiative and performance. [2567-064 (2006) : 77]
<p>| Co | The work will include generation of transgenic constructs by genetic engineering, microinjection of pronuclei and blastocysts, genotype and phenotype analysis of transgenic lines and analyse gene expression in transgenic lines. [2558-084 (2006) : 93] |
| Co | The work will include seed sowing under sterile conditions, initiation of sterile cultures, media preparation, preparation of plantlets for weaning, assisting with potting up and monitoring of laboratory raised plants, contributing to research to improve propagation methods and helping to demonstrate micropropagation techniques to students. [2580-036 (2006) : 66] |
| Co | The work will include use of genetic manipulation of ES cells as well as growth, maintenance and generation of new ES cell lines. [2558-084 (2006) : 93] |
| Co | There will also be an opportunity to assist with the writing, production and editing of scientific literature for FRAME’s publications, educational and publicity material. [2576-036 (2006) : 66] |
| Co | This will include co-ordinating and representing the JNCC in relevant working groups and assisting with the development of work in other relevant areas. [2563-051 (2006) : 67] |
| Co | This will involve preparing Marketing Authorisation applications, variations and renewals for existing licences in the UK, Ireland and across Europe, as well as managing packaging and labelling for specified products whilst maintaining the regulatory database. [2567-031 (2006) : 64] |
| Co | This will involve undertaking environmental monitoring, assessment and reporting work relevant to an Environmental Science function. [2558-035 (2006) : 76] |
| Co | Throughout your work, you will act as a champion for innovation, creativity and performance so, in addition to at least five years’ experience of delivering clinical studies, [2554-029 (2006) : 69] |
| Co | To be considered for employment you must be eligible to reside and work in the UK and you should be aware that appointments to all vacancies will be subject to the granting of a UK Security Clearance. [2572-040 (2006) : 77] |
| Co | Uniquely, you’ll be working on multifunctional product teams. [2558-070 (2006) : 88] |
| Co | Using a range of gamma-ray and neutron-based measurement techniques, you will work in a wide variety of environments where fissile and other radioactive materials are both stored and worked. [2533-018 (2006) : 51] |
| Co | Using your knowledge, experience and strong negotiation skills, you’ll oversee microbiological methods and procedures and ensure products’ safety, quality and effectiveness. [2558-052 (2006) : 81] |
| Co | Utilising your knowledge of protein stability and its associated analytical techniques, you’ll work on a wide range of projects to ensure the delivery of high quality, robust and innovative dosage forms. [2558-025 (2006) : 68-71] |
| Co | Valuing and negotiating contracts for both in-licensed and out-licensed technologies, you’ll work with external partners to ensure that the IP generated from our programmes is commercialised successfully. [2576-044 (2006) : 77] |
| Co | We also need your expertise to play a key role in the development of new standards, policies and procedures that will maintain our global leadership in statistical methodology. [2545-036 (2006) : 73] |
| Co | We require consultants who will train to be multi-skilled in both of the fields below [2563-022 (2006) : 58] |
| Co | We will look to you to assist the scientific Committee Secretary in undertaking all secretariat activities for an Expert Committee. [2541-036 (2006) : 73] |
| Co | We will look to you to support assessment, transparency and communication activities within pharmacovigilance, including taking responsibility for producing and updating United Kingdom Public Assessment Reports within target timeframes. [2545-023 (2006) : 67] |
| Co | We’ll look to you to provide a strong, long-term link between government departments and industry, driving joint government and industry projects. [2550-052 (2006) : 80] |
| Co | where you will be able to provide expertise and advice within manufacturing processes. [2558-024 (2006) : 67] |
| Co | With a particular focus on inhalation delivery, you’ll provide technical input to the innovative development of experimental formulations for use in both pre-clinical and early clinical studies. [2558-025 (2006) : 68-71] |
| Co | With a proven track record in formulation design, manufacturing process development, technology transfer and regulatory documentation, you’ll ensure appropriate expertise is available to project teams, providing the appropriate utilisation of resource and co-ordinating the activities within the function in order to meet our time, quality and cost objectives. [2558-025 (2006) : 68-71] |
| Co | With a strong background in flood risk modelling, you will lead an interdisciplinary team focussing on the estimation of flood risk and its impacts as climate changes. [2558-005 (2006) : 60-61] |
| Co | With a strong background in inflammation and gastroenterology you will head a group establishing <em>in vivo</em> models of inflammatory bowel disease. [2563-053 (2006) : 68] |
| Co | With extensive travel to London, Cameroon, Ghana and elsewhere in Africa, you’ll provide technical and strategic advice on forest governance reforms and embedding these in wider reform processes and policy dialogues. [2554-017 (2006) : 65] |
| Co | With strong problem solving and interpersonal skills, your creative outlook and passion will inspire, influence and motivate others, both internally and externally. [2558-025 (2006) : 68-71] |
| Co | With wide ranging experience in this field, both technical and scientific, you’ll initiate and lead investigations in collaboration with PAR&amp;D colleagues and other AZ functions. [2558-025 (2006) : 68-71] |
| Co | With your experience of safety and risk assessments in an industrial or regulatory context, you’ll be perfectly placed to provide our business with specialist advice on toxicology and any risks related to ingredients, products or processes. [2558-051 (2006) : 81] |
| Co | With your science-based or Chemical Engineering degree, at least five years’ experience in the active pharmaceutical synthesis industry, knowledge of compliance and technical knowledge of plant and process equipment, you’ll make sure operational targets are met and corporate standards exceeded. [2541-013 (2006) : 63] |
| Co | Working as part of the Research Team, the role will involve management, delivery and communication of Research projects. [2567-035 (2006) : 65] |
| Co | Working closely with multi-disciplinary scientists from all areas of discovery and development, you will provide expert technical input to the selection of developable materials for candidate drugs used in pre-clinical and early clinical studies. [2558-025 (2006) : 68-71] |
| Co | Working closely with the buying team, you’ll implement action plans to resolve any issues connected to our products and services. [2545-040 (2006) : 75] |
| Co | Working closely with the Director of Client and Regulatory Services, our scientific departments and your team, you’ll construct, instigate and supervise a global sales and marketing plan [2541-054 (2006) : 80] |
| Co | Working closely with the Director of Clinical Science Services, you will provide leadership and strategic development to the Bioanalysis function of our European Clinical and Preclinical operations. [2541-054 (2006) : 80] |
| Co | Working collaboratively, you will have exciting opportunities to undertake innovative research, identify additional data/evidence for the model, and work with Modellers, Economists and Senior Policy Makers to help create a more &quot;user friendly&quot; model producing novel and influential analyses. [2537-082 (2006) : 85] |
| Co | Working hand-in-hand with manufacturing, you’ll develop and apply robust, yet efficient, quality systems within the drinks factory, assuring the safety, legality and consistent quality of our products at the optimum cost to the business. [2558-039 (2006) : 77] |
| Co | Working in a secondary manufacturing environment, you will be part of a unique team specifically recruited to drive new product introduction and process improvement. [2537-051 (2006) : 75] |
| Co | Working in partnership with other scientific organisations, customers and stakeholders you will also be the lead scientific advisor to the Scottish Executive and other resource management agencies. [2567-008 (2006) : 53] |
| Co | Working in partnership with our clients to support their products through the drug development process, you will provide advice and expertise from pre-IND through to NDA approval - and beyond. [2563-055 (2006) : 69] |
| Co | Working in the New Product Introduction department, you will organise, develop and lead the Process Technology team to ensure that NPI activities are appropriately resourced. [2558-024 (2006) : 67] |</p>
<table>
<thead>
<tr>
<th>Role</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Co</td>
<td>Working on a number of exciting projects, you <strong>will</strong> manage activities required to ensure robust processing methods are transferred into the site. [2558-024 (2006) : 67]</td>
</tr>
<tr>
<td>Co</td>
<td>Working with global counterparts, you’ll identify and initiate new research opportunities - and play a pivotal role in the development and delivery of our Food Safety Strategy. [2554-033 (2006) : 71]</td>
</tr>
<tr>
<td>Co</td>
<td>Working with project teams to gain a good understanding of Respiratory and Inflammation projects in our late Discovery portfolio, you’ll identify key translational issues [2567-027 (2006) : 61]</td>
</tr>
<tr>
<td>Co</td>
<td>Working within a pan-European Regulatory Affairs network, you <strong>will</strong> help us obtain and maintain Marketing Authorisations and ensure the timely availability of products to market. [2567-031 (2006) : 64]</td>
</tr>
<tr>
<td>Co</td>
<td>Working within the Groundwater (Hydrology) team, you <strong>will</strong> provide expert hydrogeological support to SEPA’s regulatory, groundwater monitoring, and River Basin Planning activities. [2554-015 (2006) : 64]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> act as both a Project Manager, managing and co-ordinating the whole project as well as a Research Fellow, designing and implementing specific aspects of the research programme. [2572-082 (2006) : 95]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> act as key liaison between other scientists to ensure our research is delivered in the best way and the physical and mental health of our animals is optimised. [2558-056 (2006) : 83]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> act as the key contact point between scientific secretaries and the central support function to ensure the needs of scientific Committee Secretaries are met in a professional and timely fashion, typically acting as the Assistant Secretary and second point of contact for Committee members. [2541-036 (2006) : 73]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> advise on the full suite of asbestos related services including testing, surveying, sampling and analysis to ISO17025 and Inspection Body standards. [2558-063 (2006) : 85]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> also act as the key liaison point with the not-for-profit organisation Aluka [2567-012 (2006) : 55]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> also be the key contact for the R&amp;D teams, working together to build quality into new products from concept to launch. [2558-039 (2006) : 77]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> also develop long-term plans for cooperation with other international satellite operators with a view to harmonising global Earth observation requirements and increasing the sharing of data and support capacity building in Earth observation in the African countries. [2541-039 (2006) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> also ensure that appropriate technology and infrastructure is in place to support the objectives of the service. [2545-010 (2006) : 62]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> also play a key role in mentoring and advising other chemists thus strengthening the knowledge of our laboratory teams. [2537-021 (2006) : 65]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> also play an important role in ensuring that Health &amp; Safety standards are met throughout the process. [2576-067 (2006) : 82]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> also provide expert technical and professional advice where appropriate. [2580-058 (2006) : 74]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> also provide technical &amp; professional advice to internal and external customers where appropriate. [2580-058 (2006) : 74]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be a central point for clinical information and advice in relation to IPC for internal and external customers. [2545-065 (2006) : 84]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be a key member of multiple project teams, coordinating and conducting investigative research, informing and advising international campaign projects, and developing and providing training in intelligence gathering and information analysis across the global organisation. [2576-028 (2006) : 71]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be a leader of science business and research, and have a good general knowledge of areas of geoscience in the present, and emerging core missions for the BGS. [2550-026 (2006) : 69]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be a vital part of a small and enthusiastic team supporting the Chairman and Members of the RCEP. [2558-041 (2006) : 78]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be employed</strong> to operate a 9.4T small bore MRI machine and maintain a service for Neuroscience and related research within the School of Biosciences. [2541-070 (2006) : 83]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be innovative, investigative and a first class communicator who is able to apply technical ability in a practical, hands-on way to deliver successful solutions. [2558-058 (2006) : 83]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will be integrated</strong> within the R&amp;D Department at NWLH in order to facilitate the research and development strategy of the Trust. [2567-048 (2006) : 69]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be part of a team carrying out the design, testing and evaluation of CBR protection systems. [2533-008 (2006) : 47]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be the primary source of information about the LAPI to interested parties, both internal and external to Kew. [2567-012 (2006) : 55]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be working hands on as part of a team responsible for the design, execution and development of scientific projects leading to the launch of cardiac diagnostic products. [2580-028 (2006) : 64]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be working with academic and research staff, and postgraduate students to lead and develop first-line instrumentation support. [2554-063 (2006) : 83]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> be working within a team on short-term projects to establish new techniques and advise management team of development of existing techniques, test portfolio and establish wider outside contacts in the sequencing sphere of activity. [2537-014 (2006) : 62]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will bring state of the art knowledge on adsorption and desorption, or the transportation of molecules across membrane structures.</strong> [2558-058 (2006) : 83]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will carry out vital asbestos surveys and air monitoring</strong> [2558-063 (2006) : 85]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> commission key opinion leaders to write comprehensive reviews on investigational drugs, identified and researched by you, for publication electronically and in print. [2576-043 (2006) : 76]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> design and analyse experiments, analyse historical data, and teach short courses on statistical methods. [2567-053 (2006) : 71]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> develop a range of tools that aid in quantifying and visualising dynamic relations in heterogeneous media. [2558-010 (2006) : 63]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> develop research in relation to physical and biological interactions in heterogeneous media, with particular emphasis on carbon dynamics. [2558-010 (2006) : 63]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> develop your own research programme in the area of high-resolution palaeoceanography/palaeoclimatology and/or novel ocean tracers of past environmental change. [2558-005 (2006) : 60-61]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> drive the development of new methods and ensure high quality of project compound in vitro DMPK data through assay validation, monitoring and problem solving. [2563-018 (2006) : 57]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> explore the relationship between pharmacokinetic and pharmacodynamic data with statistical models. [2563-055 (2006) : 69]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> facilitate high quality research at the North West London Hospitals NHS Trust, principally at St Mark's Institute of Intestinal and Colorectal Disorders within the Division of Surgery, Oncology, Reproductive Biology and Anaesthetics, Faculty of Medicine, Imperial College, while working in an NHS setting. [2567-048 (2006) : 69]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> have a leading role in co-ordinating and monitoring the project and are required to have excellent communication and presentation skills and a strong ability to motivate and lead others. [2558-078 (2006) : 91]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> have a role in the development of methodologies, protocols and, most importantly, people. [2563-055 (2006) : 69]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> have the opportunity to work on a wide range of projects appropriate to your skills, with an emphasis on marine and terrestrial ecology, from planning and carrying out fieldwork - often outside the UK - to communicating the results. [2537-042 (2006) : 72]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> head a team of 7 scientists and technicians and assume responsibility for the natural materials research programme, commercialisation strategies and income generation. [2558-074 (2006) : 90]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> interact with the network of statisticians based at our corporate headquarters in Wickliffe Ohio. [2567-053 (2006) : 71]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> join the medicinal chemistry group and play a full role in designing and synthesising new chemical entities for biological and pharmacological evaluation within the ICT. First class synthesis and analytical facilities are available within the ICT. [2545-012 (2006) : 62]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> lead a diverse and exciting range of projects to introduce new products or to improve current manufacturing processes, assuming responsibility for their timely management and delivery. [2541-019 (2006) : 66]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> lead a team of four or five digitisation officers, taking responsibility for quality control of digital information produced for the project by your team. [2567-012 (2006) : 55]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> lead and develop a multi-functional team with global responsibility for the introduction of new development projects and enhancement of existing products. [2572-057 (2006) : 83]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> lead our oncology translational biology effort, shaping your own role as you help define and put in place our overall strategy. [2554-025 (2006) : 67]</td>
</tr>
<tr>
<td>Co</td>
<td>You will lead the further development of process modelling in the Division, dealing with all aspects of ecosystem components determining the growth dynamics of managed trees and forests, in support of UK forestry and multi-purpose sustainable policies and objectives. [2554-018 (2006) : 65]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> manage a service based on quality, responsiveness and accountability so you <strong>must</strong> offer a significant commitment to leading, developing and championing these values across the service. [2567-028 (2006) : 62]</td>
</tr>
<tr>
<td>Co</td>
<td>You will manage a small team of scientists and administrators and work with a wider group of international scientific experts and consultants, who contribute to the work of WCRF International. [2545-008 (2006) : 60]</td>
</tr>
<tr>
<td>Co</td>
<td>You will manage a team within the Regulatory Affairs Department on a day to day basis and represent Avon on committees at CTPA, Colipa and Wastepack. [2567-013 (2006) : 56]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> manage digitisation projects led by the Herbarium, including management of the Digital Collections Officer; [2537-050 (2006) : 74]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> play a key role in driving multiple product development projects for our Hip and Knee businesses from concept to delivery. [2541-031 (2006) : 70]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> play a key role in the development and application of multibeam echo-sounding techniques for measuring sediment dynamics in aquatic environments. [2572-073 (2006) : 92]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> play a key role in the discovery and development of novel therapeutics, liaising with cross-functional teams to drive multiple projects forward. [2580-056 (2006) : 72]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> play a key role in the discovery and development of novel therapeutics, liaising with cross-functional teams to drive multiple projects forward. [2580-056 (2006) : 72]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> provide guidance, advice and support in Research Governance and Regulatory issues to a broad range of staff involved in clinical studies [2545-077 (2006) : 89]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> provide leadership to teams during the development and launch of products, while acting as a technical expert for all pharmaceutical scientist grade levels. [2572-036 (2006) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> provide specialist, technical and professional advice on the introduction and implementation of the Radioactive Contaminated Land (Scotland) Regulations and respond to all aspects of their provision either directly or through supporting other Environmental Protection and Improvement staff. [2550-028 (2006) : 70]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> provide the strategic leadership [2541-008 (2006) : 60]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> remain intimately involved in the progress of the chemistries you deal with throughout their physical and performance testing, pilot and full-scale production and ultimate commercialisation. [2554-059 (2006) : 81]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> steer the work of the two digitisation teams in order to ensure maximum productivity and be responsible for ensuring the successful achievement of overall project targets. [2567-012 (2006) : 55]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> supervise technical staff and assist supervisor in sustaining compliance with safety and bioanalytical practices regulations. [2572-072 (2006) : 91]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> supervise technical support staff. [2572-072 (2006) : 91]</td>
</tr>
<tr>
<td>Co</td>
<td>You <strong>will</strong> take a lead in ensuring that regulatory requirements are correctly translated and interpreted into appropriate water quality monitoring programmes. [2580-033 (2006) : 65]</td>
</tr>
<tr>
<td>Role</td>
<td>Details</td>
</tr>
<tr>
<td>------</td>
<td>---------</td>
</tr>
<tr>
<td>You will</td>
<td>take a lead role in the parts of the programme involving genetic manipulation of cancer genes and DNA cloning to generate recombinant DNA vectors for protein expression in mammalian cells. [2558-084 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>take a lead role in the parts of the programme involving chromosome engineering mainly in mouse embryonic stem (ES) cells. [2558-084 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>take a lead role in the parts of the programmes involving transgenic models. [2558-084 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>take the lead in the development and execution of new projects focusing on issues such as: scientific entrepreneurship; protection and exploitation of intellectual property; barriers and incentives relating to knowledge transfer from universities; and UK and EU funding schemes aimed at promoting innovation and knowledge transfer. [2576-019 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>use and extend your current international and environmental network actively with partner organizations like UNEP, UNDP, WRI, EEA... [2554-010 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>use your creativity and problem solving skills to work on the synthesis and process development of a wide variety of specialty chemicals used as engine oil additives. [2554-059 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>work as part of a small flexible team to provide scientific analysis and advice to a range of policy interests and have the ability to develop and communicate results to non-specialists. [2563-034 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>work closely with colleagues in biology, drug metabolism &amp; pharmacokinetics, toxicology and clinical, to identify new drug targets and understand the efficacy and safety of a potential new medicine in its progression from animals to humans. [2533-036 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>work closely with your counterparts to ensure that our service delivery is consistent across the group and able to respond dynamically to business needs. [2541-054 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>work on a collaborative project on the structures of protein folding catalysts and their interaction with partly-folded substrates. [2558-083 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>work together with Herbarium staff, under the direction of the Digital Collections Manager, in the curation of digital records and datasets, including manipulation and exchange of data between projects and responsibility for data quality issues. [2537-050 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>work under the direction of Drs Richard Kammerer and Edward McKenzie in state-of-the-art research facilities. [2576-078 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>work under the guidance of an experienced postdoctoral researcher, gaining valuable research skills in an exciting field of research. [2541-067 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>work with others in the group to study gene expression and cell differentiation in the presence or absence of macrodrugs to define pathways of gene control and assess therapeutic potential. [2558-084 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>work, under supervision, with patients of all ages and abilities and have the advantage of working within the field of Clinical Neurophysiology and studying for a science degree in Clinical Physiology (Neurophysiology). [2563-043 (2006) : 93]</td>
</tr>
<tr>
<td>You will</td>
<td>play a key role in the scientific assessment of papers submitted for publication, selecting reviewers, taking decisions at key stages of the peer-review process and assisting with the development of one of our most prestigious journals. [2580-023 (2006) : 93]</td>
</tr>
<tr>
<td>You’ll</td>
<td>also ensure our product portfolio meets all our customers' expectations in terms of quality, safety, legality and value. [2545-040 (2006) : 93]</td>
</tr>
<tr>
<td>You’ll</td>
<td>also have the opportunity to be involved in ongoing project work within the wider Water Quality team. [2537-033 (2006) : 93]</td>
</tr>
<tr>
<td>You’ll</td>
<td>also have the opportunity to input to pre and post-registration studies. [2572-027 (2006) : 93]</td>
</tr>
<tr>
<td>You’ll</td>
<td>also help to take forward our approach to incident recovery processes. [2541-012 (2006) : 93]</td>
</tr>
<tr>
<td>You’ll</td>
<td>also keep critical path trackers up to date, and follow up information and samples as required. Excellent administration skills are a must. [2545-040 (2006) : 93]</td>
</tr>
<tr>
<td>You’ll</td>
<td>also work closely with our Assessments Department to improve the treatment of wasteform properties in deep geological repositories. [2572-040 (2006) : 93]</td>
</tr>
<tr>
<td>You’ll</td>
<td>also work with stakeholders to offer guidance on long-term management issues concerning spent fuel and separated stocks of uranium and plutonium. [2572-040 (2006) : 93]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll be a key member of the research team developing alternative solutions to reduce the future pressure on drinking water supplies in London. [2537-007 (2006) : 59]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll be a key team member supporting regulatory activities under the Medical Devices Directives. [2576-014 (2006) : 66]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll be advising scientists working with extremely hazardous materials. [2580-022 (2006) : 62]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll be an important source of advice on scientific and technical legislation matters, [2567-041 (2006) : 67]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll be based in Amsterdam and travel extensively. [2537-029 (2006) : 68]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll be providing support for the coastal lead co-ordination network, accessing and facilitating the use of data and working with the lead co-ordination networks on Common Standards Monitoring. [2554-019 (2006) : 65]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll be supported throughout by leading health and life sciences professionals and you can complete your MBA in as little as two and a half years. [2572-088 (2006) : 97]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll benefit from our unique combination of great people, industry-leading products and innovation, and a high-performance, achievement-oriented culture, [2567-056 (2006) : 73]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll bring technical expertise in freshwater ecology issues along with proven experience and participation in macrophyte and fisheries surveys and strong freshwater macroinvertebrate and macrophyte identification skills. [2563-021 (2006) : 58]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll deliver specifications for purchasing suitable upgrades and design reviews, and work with internal and external technical colleagues on commissioning, validation and start-up. [2541-013 (2006) : 63]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll develop and deploy food safety risk management standards across the European Supply Chain. [2554-033 (2006) : 71]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll develop the post-closure performance assessment models for high level waste and spent fuel and play a leading role in writing our safety cases. [2572-040 (2006) : 77]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll drive crucial research on the corrosion of stainless steel and other metals used in our containers, and present in wastes. [2572-040 (2006) : 77]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll ensure that we remain at the leading edge of food safety management and product and process development. [2554-033 (2006) : 71]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll exchange ideas for novel approaches to risk assessment; [2541-004 (2006) : 57]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll have a key role liaising with our partners, rolling out our new measures and co-ordinating incident response training. [2541-012 (2006) : 62]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll help these industries move towards more sustainable development based strategies through their own initiatives as well as those of the Environment Agency and government. [2550-052 (2006) : 80]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll help us define it. [2533-019 (2006) : 51]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll influence the overall project direction by proposing scientific strategy and designing each study, [2572-023 (2006) : 69]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll join our biomarkers and translational biology group, using your in vivo experience to develop new therapies for treating human diseases. [2572-059 (2006) : 85]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll lead and assist in the commission, design and validation of a variety of plant development and improvement projects, from concept to hand-over. [2541-013 (2006) : 63]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll make a significant contribution to the delivery of our Regulatory Affairs strategy, ensuring that our business maximises its freedom to operate. [2576-039 (2006) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll operate in a dynamic and energetic retail environment, and while you’re contributing to the delivery of our ambitious goals, [2545-040 (2006) : 75]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll oversee and allocate workloads and co-ordinate resources to ensure that our targets and SLAs are met and exceeded. [2576-014 (2006) : 66]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll play a strategic role in tracking products, providing regulatory input and advice – [2567-013 (2006) : 56]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll provide expert advice on the immobilisation of wastes including the behaviour of cement-based and other encapsulation matrices and the evolution of the immobilised wastes. [2572-040 (2006) : 77]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll provide technical leadership of software projects within the SPG, ensuring software quality and project delivery by gathering information on model specifications from our mathematical modellers and transforming them into computer programs that support the UK Armed Forces. [2576-017 (2006) : 67]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll work closely with partner organisations to maximise the potential and value of our programmes. [2572-044 (2006) : 79]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll work on Credit Risk models from the initial modelling stage – including research – all the way through to analysing and rebuilding models, and assisting in developing strategies. [2541-005 (2006) : 58]</td>
</tr>
<tr>
<td>Co</td>
<td>You’ll work with external partners to maximise the potential and value of our programmes. [2572-044 (2006) : 79]</td>
</tr>
<tr>
<td>Co</td>
<td>Your department will be responsible for equipment ranging from basic to state of the art, including computing and networking, acoustic instrumentation, communications, navigational systems, ocean/atmosphere sampling/measurement and oceanographic cables, winches and handling systems. [2563-014 (2006) : 56]</td>
</tr>
<tr>
<td>Co</td>
<td>Your expertise will ensure that [2572-040 (2006) : 77]</td>
</tr>
<tr>
<td>Co</td>
<td>Your proven ability to network across the scientific community will drive the development and delivery of our Food Safety Strategy and can only add gravitas to your external recognition as an expert in your field. [2572-031 (2006) : 73]</td>
</tr>
<tr>
<td>Co</td>
<td>Your work will be theoretical and practical, so hands-on experience in a laboratory environment is a necessity. [2558-049 (2006) : 80]</td>
</tr>
<tr>
<td>Di</td>
<td>To join us, you will normally require a 2.1 degree [2576-070 (2006) : 83]</td>
</tr>
<tr>
<td>E</td>
<td>&quot;Avoid spin, and your opinion will be respected.” [2554-001 (2006) : 58-59]</td>

</tr>
<tr>
<td>E</td>
<td>All cases will be judged on an individual basis according to the nature of the post applied for. [2563-043 (2006) : 64]</td>
</tr>
<tr>
<td>E</td>
<td>All CVs sent directly to Innovata will be forwarded to Reed Scientific. [2576-018 (2006) : 68]</td>
</tr>
</tbody>
</table>
All new appointees will get significant start-up support including direct funding, a PhD studentship, full access to shared instrumentation and facilities and a light initial teaching load. [2563-065 (2006) : 72]

All new Board members will be given appropriate induction. [2541-018 (2006) : 65]

All of the positions will be based in the research centre in Dublin, Ireland and are funded under the Marie Curie Fellowship programme [2572-015 (2006) : 66]

All of the roles will be broad. [2558-049 (2006) : 80]

All of these appointments will be at Band 6-PD level, which has a salary range normally between £23,022 to £26,541 per annum (pay award pending) depending on the profile and experience of the candidate. [2580-048 (2006) : 69]

All positions will be based in Dublin City University, with the exception of the Biofunctional Surfaces post-doctoral researcher [2563-062 (2006) : 71]

All of the positions will be based in the research centre in Dublin, Ireland and are funded under the Marie Curie Fellowship programme [2572-015 (2006) : 66]

All qualified candidates are encouraged to apply; however Canadian and permanent residents will be given priority. [2576-025 (2006) : 70]

Alternatively candidates with four years' relevant pharmaceutical laboratory experience will also be considered. [2545-032 (2006) : 72]

Alternatively please contact our team on 01895 8289 40 who will organise for an information pack to be sent out to you. [2563-037 (2006) : 62]

Alternatively, individuals with a degree (or equivalent) and at least 10 years' relevant experience will be considered. [2533-026 (2006) : 54]

Alternatively candidates with four years' relevant pharmaceutical laboratory experience will also be considered. [2545-032 (2006) : 72]

Although candidates with an MSC and at least five years' research experience will also be considered. [2537-036 (2006) : 70]

Although current funding expires in September 2007, subject to a successful quinquennial review by CR-UK in 2006, it is anticipated that the post will continue beyond this. [2537-010 (2006) : 60]

Although full training will be provided. [2537-073 (2006) : 83]

Although registered through UK Universities as indicated above students will usually be based in Aberdeen. [2537-084 (2006) : 86]

An editorial budget and competitive salary will be available to the successful candidate. [2541-065 (2006) : 82]

An initial contract of 3 years will be offered to all successful candidates. [2545-013 (2006) : 63]

An internationally competitive income will be provided. [2558-090 (2006) : 95]

An ultra-low-vibration space in the basement will protect the experiments from the rumble of passing traffic and trains. [2572-006 (2006) : 58-61]

An editorial budget and competitive salary will be available to the successful candidate. [2541-065 (2006) : 82]

An editorial budget and competitive salary will be available to the successful candidate. [2541-065 (2006) : 82]

An initial contract of 3 years will be offered to all successful candidates. [2545-013 (2006) : 63]

An initially competitive income will be provided. [2558-090 (2006) : 95]

A new ocean-life prospecting centre hosted by the University of Tromso will screen marine organisms for compounds that could lead to new drugs. [2580-003 (2006) : 52-55]

And a reputation that will travel far. [2537-016 (2006) : 63]

An editorial budget and competitive salary will be available to the successful candidate. [2541-065 (2006) : 82]

An initial contract of 3 years will be offered to all successful candidates. [2545-013 (2006) : 63]

An editorial budget and competitive salary will be available to the successful candidate. [2541-065 (2006) : 82]

An initial contract of 3 years will be offered to all successful candidates. [2545-013 (2006) : 63]

An initially competitive income will be provided. [2558-090 (2006) : 95]
