| E | Aptitude is more important than experience as full training **will be given**. [2576-052 (2006) : 79]  
| E | As a result, scientists with both computing skills and biological training **will be needed**. [2545-004 (2006) : 56-59]  
| E | As a strategic investment in the research domain, the University **will consider** appointments across the academic range, from Lecturer to Full Chair, for outstanding scholars with a capacity to focus on research related to improved understanding of the interaction of biological systems with nano- to micro-scale structures. [2572-011 (2006) : 64]  
| E | As a Technical Executive, we’ll expect you to implement the technical plan across the relevant product portfolio. [2545-040 (2006) : 75]  
| E | As one of the first to join our Edinburgh operation, you’ll have the chance to shape our future - and yours. [2563-055 (2006) : 69]  
| E | As part of a global organization you **will enjoy** the benefits of working in a truly international environment where teamwork is paramount to the success of the company. [2558-066 (2006) : 87]  
| E | As part of a plan to strengthen its science base and to support new research fields, the CSIR **will be establishing** a number of Emerging Research Areas (ERAs) over the next three years. [2537-038 (2006) : 70]  
| E | As part of a team of electronics & technology experts, you **will work** within a collaborative framework of key universities in the UK as well as the Philips European Laboratory. [2541-016 (2006) : 64]  
| E | As part of our Laboratory Services Support team, you **will play** a pivotal role in supporting scientific staff at a time of significant re-engineering and change at the site. [2558-026 (2006) : 72]  |
| E | As part of our SHEF team, you’ll work at the cutting edge of chemical science, inputting to a range of research programmes and support services. [2580-022 (2006) : 62] |
| E | As part of our team, you’ll work in an environment that's like nothing else on earth, enabling us to perform world-class scientific research while sustaining an active and influential presence for the UK in Antarctic affairs. [2550-022 (2006) : 66] |
| E | As we continue to grow, we will continue to seek out the best talent for our Edinburgh office - so if your skills belong in an organisation like ours, please get in touch. [2563-055 (2006) : 69] |
| E | As well as the opportunity to continually develop your abilities within a challenging area, you’ll enjoy a good benefits package that includes 28 days' holiday in addition to statutory bank holidays and a generous final salary pension scheme. [2541-037 (2006) : 74] |
| E | As well as the opportunity to continually develop your abilities, you’ll enjoy a superb benefits package that includes 28 days' holiday in addition to statutory bank holidays and a generous final salary pension scheme. [2558-045 (2006) : 79] |
| E | As well as working with some of the most innovative products available today you will also enjoy the kind of outstanding benefits you’d expect from an exceptional organisation. [2537-020 (2006) : 65] |
| E | As well as the opportunity to continually develop your abilities, you’ll enjoy a superb benefits package. [2533-018 (2006) : 51] |
| E | As well as the opportunity to continually develop your abilities, you’ll enjoy a superb benefits package. [2563-004 (2006) : 51] |
| E | As well as the opportunity to continually develop your abilities, you’ll enjoy a superb benefits package. [2533-036 (2006) : 57] |
| E | As you would expect, the non-destructive assay of radioactive materials is crucial to AWE and this role will help to ensure the highest possible standards. [2533-018 (2006) : 51] |
| E | At Novartis, you’ll have the opportunity to work alongside an extraordinarily talented and diverse group of people from around the globe, all committed to making a difference for our patients and customers. [2567-056 (2006) : 73] |
| E | At Oxford the researcher will be based with Dr T Pizzari in the Edward Grey Institute of Ornithology, at the Department of Zoology of the University of Oxford. [2541-083 (2006) : 87] |
| E | At UEA, the researcher will be based with Dr D S Richardson in the School of Biological Sciences (RAE 5-rated), [2541-083 (2006) : 87] |
| E | Available from April 2006 for three years, with a stipend of £10,500 p.a. (tax free), it will be funded by the Association for International Cancer Research. [2533-058 (2006) : 62] |
| E | Awards will be offered preferentially to UK or EC nationals working in the UK or the Republic of Ireland. [2533-072 (2006) : 67] |
| E | Awards will be given to researchers for attendance at a National or International symposium where their work has been accepted for presentation. [2533-038 (2006) : 57] |
| E | Based in Milton Keynes you will receive a comprehensive benefits package including a basic salary of up to £40K, management bonus opportunity and a car cash allowance in addition to the benefits detailed at the bottom of this advertisement. [2572-037 (2006) : 76] |
| E | Basic research will remain just as important to the overall cancer effort, however. [2545-004 (2006) : 56-59] |
| E | because the process of creating new drugs, from basic genetics to clinical trials, will need research that overlaps many traditional disciplines. [2545-004 (2006) : 56-59] |
| E | before we will consider applications. [2545-092 (2006) : 93] |
| E | Bioinformatics training will be provided if required. [2537-083 (2006) : 86] |
| E | Biological studies will involve chemosensitivity testing, metabolism and stability studies. [2545-012 (2006) : 62] |
| E | Both roles will enjoy a competitive salary, benefits package and ongoing training. [2545-028 (2006) : 70] |
| E | Both studentships will commence in October 2006. [2567-023 (2006) : 60] |
| E | BP is introducing alternative energy – a new business that will use the power of the wind, as well as the sun, hydrogen and natural gas to create cleaner, low-carbon electricity. [2537-001 (2006) : 2] |
| E | Bring us your talents, and we’ll bring you a real commitment to your development - plus outstanding opportunities for career progression. [2537-046 (2006) : 73] |
Bring your microbiology expertise to our Analytical R&D Group and you'll enjoy the chance to influence our microbiological strategies for Active Pharmaceutical Ingredients (APIs), drug products and devices.  

but details will only be available on the Met Office website.  

but further advanced training will be at IBA in Belgium to help provide you with the range and depth of specialist knowledge required to perform this role effectively.  

but its relevance to the duties of the post will need to be assessed before the appointment is confirmed.  

But look at the money coming in, and you'll see that Switzerland's biotech industry is second only to that of the US, and accounts for a massive 40 per cent of European revenues in this area. Switzerland also employs more people in the sector than might be expected, with 1 in 3 of the biotechnology jobs in Europe.  

But more importantly, as the largest freshwater fisheries employer in the UK, we'll give you more influence and opportunities than anyone else.  

but much of the responsibility for reaching this target will fall to the private sector, which has traditionally funded the majority of R&D in Germany.  

but the skills that you get working for a good company in the biotech field will be very transferable.  

but training will be given where necessary.  

but will be an employee of the University of Wales, Bangor.  

but will be based at Leahurst  

but will have opportunity to work closely with manufacturing and technical personnel at Corus Colours', Shotton Plant (Deeside) and also prestigious coating manufacturers.  

but you'll also benefit from the resources at our state-of-the-art facilities, and enjoy easy access to London and continental Europe.  

but you'll also help to set your career in motion or in a new direction.  

by 2010, EBRC will be based in a purpose built £55m facility on the University of Edinburgh's veterinary campus.  

by creating a new breed of technologies, Distance Lab is a research centre that will help people deal with distance in different ways and break down the everyday barriers of space, time, society and culture.  

by joining a thriving US based pacesetter, you'll work with progressive management, inventive technologies and alongside the talented scientists who have made us one of the world’s largest and most comprehensive drug development services companies.  

by joining the Royal Society of Chemistry’s graduate training programme, you’ll not only help to shape the development of our science publishing activity, 

by joining the Royal Society of Chemistry's graduate training programme, you'll also help to set your own career in motion.  

by joining this thriving pacesetter you'll work with inventive technologies, progressive management and alongside the talented professionals who have helped make us a global leader in our field.  

Cancer Research (5* RAE 2001) is a major research theme in the Medical School and we will be seeking applications from scientists with an excellent record of research achievement able to secure substantial external funding to develop and maintain an independent internationally competitive research group.  

Candidates from countries outside the European Union will be liable for the difference between 'home student fees' and 'foreign student fees'.
Candidates should have a PhD and ideally experience in one or more of these techniques but relevant training, especially in virological methods, will be provided. [2537-070 (2006) : 82]

Candidates showing the aptitude to learn and apply these skills will also be considered. [2576-067 (2006) : 82]

Candidates who are not currently employed by an organisation capable of receiving funding from the EPSRC are encouraged to apply and will be helped to locate a suitable employing organisation if successful. [2545-063 (2006) : 84]

Candidates who complete the course and the final examination successfully within 3 years will be awarded the Diploma in Therapeutics by the University of Newcastle upon Tyne. [2554-039 (2006) : 74]

Candidates with a strong background in general devices or implants will also be considered. [2541-026 (2006) : 68]

Candidates with a strong background in general devices or implants will also be considered. [2576-020 (2006) : 69]

Candidates with disabilities who meet the minimum selection criteria will be guaranteed an interview. [2550-016 (2006) : 64]

Candidates with some form of research experience and who are well-experienced in writing and submitting successful grant applications to major funding agencies will be favoured. [2567-048 (2006) : 69]

Canvassing will disqualify. [2572-012 (2006) : 64]

Career and publishing opportunities will be excellent. [2533-036 (2006) : 57]

CF is characterized by hyperactive inflammation; this ground-breaking project will investigate the mechanism(s) by which mutations in CFTR (the protein which is defective in CF) lead to this debilitating inflammatory response. [2572-078 (2006) : 94]

Clinicians need the basic science to be done that will allow them to distinguish, for example, between a slow-growing, relatively benign tumour and aggressive cases where a treatment with harsher side effects is justified. [2545-004 (2006) : 56-59]

Closing date for applications will be 16 February 2006. [2537-058 (2006) : 78]

Closing date for applications will be Monday 21st August. [2563-013 (2006) : 55]

Closing date for applications: 26th July 2006, successful candidates will be contacted within 4 weeks. [2558-046 (2006) : 79]

Closing date will be 24 August 2006. [2563-030 (2006) : 60]

Competitive remuneration packages based on experience will be offered. [2537-040 (2006) : 71]

Competitive salaries offered based on experience. 37 hours per week (part time will be considered). [2554-047 (2006) : 77]

Contributing project, scientific and operational expertise, you will play a crucial role at every stage of our different clinical study programmes. [2554-029 (2006) : 69]

Coordinator Position at EMBL Structural and Computational Biology Unit for a Structural and Computational Biology Unit Coordinator, who will replace Luis Serrano to lead the Heidelberg Unit jointly with Peer Bork. [2550-014 (2006) : 63]

Cranfield, in partnership with 3M Health Care Limited, will be supporting highly qualified graduates to undertake the course. [2533-067 (2006) : 66]

CV’s will not be considered. [2558-035 (2006) : 76]

CV’s will not be accepted as part of the selection process. [2580-058 (2006) : 74]

CV’s will not be considered unless accompanied by a completed application form. [2576-099 (2006) : 93]

CV’s will not be considered. [2550-028 (2006) : 70]

CV’s will not be considered. [2554-015 (2006) : 64]

CV’s will only be accepted in support of a fully completed application form. [2563-060 (2006) : 71]

Disabled applicants who meet the minimum essential criteria will be guaranteed an interview. [2576-042 (2006) : 76]

Distance Lab has been set up and funded by Highlands and Islands Enterprise and these first two posts will ensure you are involved in this exciting new project from the start. [2567-005 (2006) : 52]
Draw a 50-kilometre circle around Cambridge and you **will** have marked out one of the biggest biotech clusters in Europe, with around 250 companies. [2576-003 (2006) : 58-61]

Drawing on knowledge of both scientific developments and of UK and EU legislation, you’ll identify any changes that might make an impact, and then communicate that information to the right person. [2567-041 (2006) : 67]

Each of the supervisors below **will** select a candidate [2533-059 (2006) : 63]

Eligibility for Funding: UK nationals and EU nationals with 3 years residency in the UK **will** have their academic fees paid [2545-092 (2006) : 93]

Eligibility for Funding: UK nationals and EU nationals with 3 years residency in the UK **will** have their academic fees paid [2576-095 (2006) : 92]

Emphasis **will be placed** on understanding the cellular and higher level responses to materials. [2572-011 (2006) : 64]

Employment and remuneration **will** be according to the Agreement between the Danish Ministry of Finance and the Danish Confederation of Professional Associations. [2554-064 (2006) : 84]

Employment and remuneration **will** be according to the Agreement between the Danish Ministry of Finance and the Danish Confederation of Professional Associations. [2558-072 (2006) : 89]

Enhanced postgraduate studentships, each for three years, starting in October 2006, **will** once again be awarded by the Gatsby Charitable Foundation, one of the Sainsbury Family Charitable Trusts. [2533-059 (2006) : 63]

Ensuring scientific robustness and GLP compliance **will** all be down to you. [2537-048 (2006) : 73]

EPS **will** provide the operational meteorological satellite service delivering earth observation data for extraction of meteorological and climate monitoring products starting late 2006. [2541-039 (2006) : 75]

Everything you do **will be devoted** to innovation. [2537-016 (2006) : 63]

Exceptionally, candidates with an excellent and relevant research and publication record who do not have a PhD degree **will be considered.** [2554-041 (2006) : 75]

Exceptionally, candidates with an excellent research and publication record in immunological research who do not have a relevant PhD **will be considered.** [2554-041 (2006) : 75]

Expansion to HMD **will** require development of molecular diagnostic techniques for lymphomas. [2580-016 (2006) : 60]

Experience in working in a high throughput environment **would be an advantage** although full training **will be given.** [2545-043 (2006) : 76]

Experience of cell culture and cell based assays **would be advantageous**, but full training **will be provided.** [2580-055 (2006) : 71]

Experience of pharmaceutical clean room procedures, working with radiation or knowledge of mechanical machine installations **would be an advantage**, but is not essential as training **will be given.** [2545-072 (2006) : 87]

Experience of techniques appropriate for each position is useful but full training **will be provided.** [2554-084 (2006) : 89]

Experience of transfusion practice and/or theatre work **would help**, although training **will be given.** [2541-043 (2006) : 76]

Experience working in a high throughput environment **would be an advantage** although full training **will be given.** [2545-051 (2006) : 80]

Expressions of interest **will close** on Thursday 13th April and the closing date for applications is Thursday 20th April 2006 at noon. [2545-020 (2006) : 66]

First interviews **will be 6th to 14th November** and short list interviews on 21st November. [2576-016 (2006) : 66]

Following on from its successful launch in 2006, the New Scientist Careers Guide 2007 **will be published** on 10 February. [2576-066 (2006) : 82]

Following on from its successful launch in 2006, the New Scientist Careers Guide 2007 **will be published** on 10 February. [2580-043 (2006) : 68]

For displaced staff the package **will also include** generous overseas allowances, furnished accommodation, flights and other benefits. [2554-041 (2006) : 75]
| E | For displaced staff the package will also include generous overseas allowances, furnished accommodation, flights and other benefits. [2554-041 (2006) : 75] |
| E | For example, Finland will continue to put money into the biotech sector in spite of weak international interest in investing in Finnish biotech. [2580-003 (2006) : 52-55] |
| E | For which payment or time off in lieu will be given. [2576-076 (2006) : 86] |
| E | For you, that could prove very exciting indeed: after all, it will give you the chance to use novel approaches to risk assessment on a variety of complex projects, for a number of global products. [2541-007 (2006) : 59] |
| E | For you, that could prove very exciting indeed: after all, it will give you the chance to use novel approaches to risk assessment on a variety of complex projects, for a number of global products. [2558-051 (2006) : 81] |
| E | Forfas will provide administrative support to the Chief Scientific Adviser and, in this context, Forfas is managing the administration of the recruitment process for this senior position. [2563-009 (2006) : 53] |
| E | Four ACP positions will become available in January 2007. [2541-047 (2006) : 77] |
| E | From 1 April 2006, Queen's Medical Centre will merge with Nottingham City Hospital and become part of the Nottingham University Hospitals NHS Trust. [2572-030 (2006) : 72] |
| E | From October 2006, GRID-Arendal will be re-located to the UN House in the center of Arendal. [2554-010 (2006) : 63] |
| E | From the summer of 2006 we will be known as the School of Applied Sciences. [2558-091 (2006) : 96] |
| E | From this autumn onward Imperial College, as part of this programme, will be seeking to appoint a PhD student in the linked computational, mathematical and engineering physics modelling of the safety performance of ‘Generation IV’ nuclear power plant. [2563-082 (2006) : 78] |
| E | Fuel Cells will in the future power cars, buses, homes, laptops and mobile phones. [2533-025 (2006) : 53] |
| E | Full support will be given for continuing high specialist training. [2533-005 (2006) : 46] |
| E | Full training will be given where necessary, but previous experience in protein chemistry or physiology would be a distinct advantage. [2563-024 (2006) : 59] |
| E | Full training will be provided. [2576-076 (2006) : 86] |
| E | Full training will be provided in all roles [2545-032 (2006) : 72] |
| E | Funded by US National Institute of Health this project will use epidemiological/ statistical skills to explore the effects of candidate genes on diseases of middle aged and older people. [2558-095 (2006) : 97] |
| E | Further training will then be provided to prepare you for state registration, after 4 years. [2572-030 (2006) : 72] |
| E | Further, he/she will participate in the collegial leadership of EMBL. [2550-014 (2006) : 63] |
| E | Given the right offer, I would certainly consider it, but it will be hard to beat the location and lifestyle we have at the moment. [2580-003 (2006) : 52-55] |
| E | GlaxoSmithKline is dedicated to workplace innovation and will support you with career-long opportunities and learning. [2550-017 (2006) : 65] |
| E | GlaxoSmithKline will be collaborating on over 80 PhD studentships this year. [2541-097 (2006) : 92-93] |
| E | Good manual dexterity is essential and preference will be given to those with previous practical experience in tissue culture and histology. [2550-055 (2006) : 81] |
| E | Grants will be for three years normally range from €500,000 to €1.5 million per year. [2572-010 (2006) : 63] |
| E | Growth we’ll support yours [2563-068 (2006) : 73] |
| E | GSK is dedicated to workplace innovation and will support you with career-long opportunities and learning. [2537-051 (2006) : 75] |
| E | Helping to protect our aquatic environment, you’ll be developing your own knowledge through field based studies. [2563-021 (2006) : 58] |
| E | Here you can take full ownership of your cases from start to finish by using your medical knowledge and therapeutic expertise to identify Suspected Unexpected Serious Adverse Reactions (“SUSARs”), |
evaluate adverse events, and provide the company's opinion of the case which will impact on safety issues at a global level. [2554-036 (2006) : 73]

Here you will find a support, training and development network created specifically for you, all in one of the UK's most attractive and dynamic cities. [2558-013 (2006) : 64]

Here you'll challenge conventional wisdoms and develop credible alternative future scenarios that could lead to more effective ways of providing healthcare support to patients. [2572-088 (2006) : 97]

High on the wish list will be the Higgs Boson, thought to play a key role in endowing other particles with mass. [2550-006 (2006) : 56-57]

Highly motivated and self-starting with excellent interpersonal, communication and organisational skills, you will be excited by the challenges of working at the interface of phenomenal growth in scientific knowledge, changing industrial need and evolving funding mechanisms on a wide variety of projects. [2563-015 (2006) : 56]

How will you react to a great future in the booming Irish science industry? [2572-022 (2006) : 68]

If you too share a passion for discovery and innovation we will give you the tools and opportunities to provide you with a challenging career. [2567-015 (2006) : 57]

If you want to display your skills in a fast-moving manufacturing environment, we'll ensure that your career goes from strength to strength. [2554-033 (2006) : 71]

If you're ready to join an industry leader that will reward your commitment with opportunities to progress, please apply online at www.work-together.co.uk [2580-033 (2006) : 65]

In a joint research project between the Hans Knoell Institute, the Friedrich-Schiller-University Jena and the Leibniz Institute for Age Research - Fritz Lipmann Institute - the research area Dermatophytic Fungi will be established. [2558-089 (2006) : 95]

In addition it will implement two new Programmes: Cell and Developmental Biology and Systems Biology. [2558-050 (2006) : 80]

In addition protein expression in bacteria will be undertaken to prepare material for structural studies. [2558-084 (2006) : 93]

In addition to a salary commensurate with your skills and experience, our offer to the successful candidate will include relocation assistance if required. [2537-021 (2006) : 65]

In addition to a stimulating and rewarding career with real development potential, as a civil servant you'll enjoy a competitive benefits package. [2580-022 (2006) : 62]

In addition to a stimulating and rewarding career, as a civil servant you’ll enjoy a competitive benefits package. [2533-008 (2006) : 47]

In addition to a stimulating and rewarding career, as a civil servant you’ll enjoy a competitive benefits package. [2554-035 (2006) : 72]

In addition to a stimulating and rewarding career, as a civil servant you’ll enjoy a competitive benefits package. [2576-017 (2006) : 67]

In addition to the core functions described above, all appointees will be encouraged to pursue their own personal research interests for some agreed fraction of their time. [2572-061 (2006) : 86]

Industrial experience of process development or large scale laboratory production to GMP standards is desirable, although full training will be given to newly qualified candidates. Initial appointment will be on the RA1A or RA2 scale dependent on qualifications and experience. Initial training will be on site. Initial training will include completion of the Association of Clinical Embryologists Postgraduate Certificate. Initially the post will be seconded to the environmental chemistry unit (ECU) to assist with implementation of WFD & Diffuse Pollution initiatives including the development of a water diffuse pollution monitoring strategy for chemistry. **Innovative, prepared to challenge existing practices with strong problem solving skills, you’ll be looking to extend your influence and demonstrate just what you can achieve.**

**Inspired by the research of many top scientists in Systems Biology, students with biological and medical backgrounds will be teamed up with students from a physical science/engineering/mathematics background to engage in extensive experimental and theoretical training in Systems Biology in the MIB and in partner groups all over the world.**

**Intensive specialist training will be given in a formal setting by leading experts.**

Internationally distinguished speakers will present the latest hypotheses together with experimental and epidemiological data on potential chemical induced effects on the development and subsequent function of the male reproductive system. Interviews and aptitude tests will be held during the week of 13th November 2006. Interviews for short-listed applicants will be held in Lancaster on 2nd or 3rd May 2006. Interviews to be held 7th September 2006 and the successful candidate will commence the training programme the following week.

Interviews will be conducted by an independent panel of national and international experts.

**Industrial experience of process development or large scale laboratory production to GMP standards is desirable, although full training will be given to newly qualified candidates.**
E  Interviews will be held on 8 January 2007. [2580-079 (2006) : 81]
E  Interviews will be held on 8 March at the VMD. [2537-027 (2006) : 67]
E  Interviews will be held on Friday 5th May 2006 [2545-089 (2006) : 92]
E  Interviews will be held throughout the UK. [2541-019 (2006) : 66]
E  Interviews will take place 12 January 2007. [2580-058 (2006) : 74]
E  Interviews will take place 18 January 2007. [2580-058 (2006) : 74]
E  Interviews will take place 9 and 10 January 2007. [2580-058 (2006) : 74]
E  Interviews will take place 18 October 2006. [2567-062 (2006) : 77]
E  Interviews will take place on 26 September. [2567-017 (2006) : 58]
E  Interviews will take place, week commencing 18th December. [2576-017 (2006) : 67]
E  It is a requirement of the Studentships that candidates from outside the UK and EU will pay the overseas student fees [2541-098 (2006) : 94]
E  It is an exciting and challenging role in which you will be able to influence many innovation projects, [2537-011 (2006) : 61]
E  It is an unfortunate truth about the biotechnology industry that while you will very probably be around in three years’ time, the company you work for may not. [2576-003 (2006) : 58-61]
E  It is anticipated that this post will be required from November 2006. [2563-051 (2006) : 67]
E  It is envisaged that appointments will initially be for a three year period commencing as soon as possible. [2541-018 (2006) : 65]
E  It is envisaged that the findings will advance new strategies for diagnosis, prognosis and therapy of these cancers, especially with regard to hormone refractory disease. [2541-084 (2006) : 87]
E  It is envisaged that you will join the Tenovus Gene Discovery team based in the Welsh School of Pharmacy in Cardiff but would liaise with the AstraZeneca bioinformatics group in Alderley Park. [2576-079 (2006) : 88]
E  It is expected that links with other academic units throughout the University will be initiated and fostered. [2580-064 (2006) : 77]
E  It is expected that successful applicants will commence their research positions by October 2006. [2533-072 (2006) : 67]
E  It is hoped that more universities will join to create a world-class European research hub to rival America's. [2550-006 (2006) : 56-57]
E  It is likely that one permanent full-time position will be made available at the end of the maternity leave cover period. [2558-061 (2006) : 84]
E  It shouldn't be too tough, especially as we'll help with in house tutoring and your degree studies could earn you exemptions. [2563-013 (2006) : 55]
E  It will accelerate beams of protons in a 27-kilometre ring, then smash them together in an effort to spot hitherto undetected particles. [2550-006 (2006) : 56-57]
E  It will allow trials of cancer immunotherapy in collaboration with 3 major Italian hospital centers: Istituto Regina Elena of Rome, Institute for Cancer Research and Treatment (Fondazione G. Pascale of Naples) and the National Cancer Institute of Milan. [2572-003 (2006) : 15]
E  It will allow trials of cancer immunotherapy in collaboration with 3 major Italian hospital centers: Istituto Regina Elena of Rome, Institute for Cancer Research and Treatment (Fondazione G. Pascale of Naples) and the National Cancer Institute of Milan. [2576-002 (2006) : 11]
E  It will also prove to potential employers that you are business-savvy, says Tony Bradshaw of the Bioindustry Association. [2576-003 (2006) : 58-61]
E  It will be a key resource for both UK and international scientists working in the field of magnetism in low dimensional systems. [2580-053 (2006) : 68]
E  It will be closely associated with the British Atmospheric Data Centre and the NERC Earth Observation Data Centre. [2580-059 (2006) : 75]
E  It will be distributed at all events attended by New Scientist Jobs in 2007. [2576-066 (2006) : 82]
E  It will be distributed at all events attended by New Scientist Jobs in 2007. [2580-043 (2006) : 68]
E  It will become the first such center in Europe focused on stem cell therapy for treating vision disorders caused by tissue/organ damage and genetic defects. [2572-003 (2006) : 15]
It will become the first such center in Europe focused on stem cell therapy for treating vision disorders caused by tissue/organ damage and genetic defects. [2576-002 (2006) : 11]

It will employ molecular, cell biology and immunological techniques to explore the role of the pro and anti-inflammatory function of leucocytes, while under various pressure conditions and in contact with endothelial cells. [2558-095 (2006) : 97]

It will utilise and build on existing parallel synthesis technologies already installed at Ferring. [2580-021 (2006) : 61]

It’ll be up to you to lead our busy, modern Andrology section and ensure the continued provision of service to the fertility clinic and general practice referrals. [2558-067 (2006) : 87]

It’s a highly visible role that will broaden your existing knowledge of coastal flood risk management and provide scope to make a real and significant impact for future generations. [2537-039 (2006) : 71]

It's a high-profile role that will see you both coordinate the growth of the discipline internally and lead external collaborations - accessing samples, developing and applying analytical methods to tumours and assessing the impact of pre-clinical compounds. [2554-025 (2006) : 67]

It's a role that will impact on business growth, [2554-033 (2006) : 71]

It's a world-class environment - one that will challenge, stimulate and develop you in equal measure. [2537-020 (2006) : 65]

It's about 'what and how we will do it!' [2580-028 (2006) : 64]

It's an influential role that will involve working closely with project teams. [2580-019 (2006) : 61]

Job share applications will be considered. [2541-081 (2006) : 86]

Johnson Matthey will offer the successful candidate a stimulating environment [2545-049 (2006) : 79]

Join this team and you’ll enjoy the chance to work with R&D scientists and clinicians alike, to shape new important drug developments from initial discovery through to launch, and benefit patients. [2533-036 (2006) : 57]

Join us and you will have a key role to play, ensuring that we are supported by effective data management at all times. [2545-061 (2006) : 83]

Join us and you’ll lead a range of technically challenging programmes and contribute to the development of fuels that have a reduced impact on the environment. [2541-051 (2006) : 79]

Join us as a Scientist – Histology at our state-of-the-art research facility in Horsham, West Sussex and you’ll have the freedom to do just that. [2545-037 (2006) : 74]

Join us as a Scientist at our state-of-the-art research facility in Horsham, West Sussex, and you’ll have the freedom to do just that. [2580-013 (2006) : 59]

Join us as a Technical Manager and you’ll be the force behind developing and implementing the category technical plan. [2545-040 (2006) : 75]

Join us as either a Health Protection Scientist or Environmental Scientist, and your commitment and support will have an enormous impact on our work. [2563-032 (2006) : 61]

Join us at our state-of-the-art research facility in Horsham, West Sussex and you’ll have the freedom to do just that. [2545-035 (2006) : 73]

Join us in this wide-ranging and influential role, and we’ll look to you to assist our Scientific Advisor to provide the very latest information on technical legislation and scientific matters [2567-041 (2006) : 67]

Join us now as a graduate trainee and we’ll fund a NVQ3 distance learning course, or weekly college day release [2563-013 (2006) : 55]

Join us, and you’ll collaborate across a variety of categories and functions in Unilever on multi-disciplinary projects; [2541-004 (2006) : 57]

Joining a talented team, you’ll work cross-functionally in a project based role with a brief to plan, design, develop and validate methodologies for testing dry powder respiratory products. [2576-018 (2006) : 68]

Joining our talented team, you’ll help to develop new drainage technologies for a range of projects affecting individual houses right through to whole cities. [2537-007 (2006) : 59]

Joining our team of healthcare scientists and clinicians, you’ll share our collaborative approach to providing haemato-oncology molecular diagnostic services. [2580-016 (2006) : 60]
Just as important, you’ll have the presence to influence people from a wide range of scientific backgrounds. [2558-052 (2006) : 81]

Knowledge of pharmacovigilence, the PAGB/ABPI codes of practice, legislation for cosmetics and medical devices would be advantageous but not essential as training will be provided. [2567-020 (2006) : 59]

Laboratory facilities at Penhow will fulfil the demands of the current project and provide enough flexibility for future expansion. [2567-037 (2006) : 59]

Leading figures in the NCRI feel that by breaking down the barriers between the different parts of the cancer research effort, the process of improving treatment will be speeded up. [2545-004 (2006) : 56-59]

Let’s start with the basics. Just what is it that will be going to market in 2007? [2576-003 (2006) : 58-61]

Located in the ISS (the Italian National Institute of Health) it will use the dendritic cells of individual patients for the production of anti-cancer drugs and vaccines. [2572-003 (2006) : 15]

Located in the ISS (the Italian National Institute of Health) it will use the dendritic cells of individual patients for the production of anti-cancer drugs and vaccines. [2576-002 (2006) : 11]

Look behind our culture of science and you’ll discover a team that challenges conventional thinking, pursues radical innovation and actively expands the boundaries of current scientific knowledge. [2545-027 (2006) : 69]

Many believe this trend will lead to the emergence of US-style comprehensive cancer centres, where cutting-edge research and treatment go hand in hand. [2545-004 (2006) : 56-59]

Many, indeed most, cancer researchers and clinicians in Britain will be supported at some point in their career by Cancer Research UK. [2545-004 (2006) : 56-59]

Members will receive £149 for each meeting attended. [2545-018 (2006) : 65]

Most of the research will be performed in the MRC Unit in Dundee, [2563-080 (2006) : 77]

Networks in the fields of cancer, dementias and neurodegenerative diseases, diabetes, medicines for children, mental health and stroke and, over time, will hopefully enable research to be conducted across the full spectrum of disease and clinical need. [2545-077 (2006) : 89]

New research opportunities will be advertised in the coming months, so remember to visit the site regularly for updated information. [2572-007 (2006) : 62]

New Scientist’s Studentships & Courses The Insider special report will tell you everything you need to know about postgraduate study. [2537-049 (2006) : 74]

Next summer, a new building shaped like the bow of a ship at TCD will take on board the Centre for Research on Adaptive Nanostructures and Nanodevices. [2572-006 (2006) : 58-61]

No agency applications will be considered at this stage. [2533-013 (2006) : 49]

No agency applications will be considered at this stage. [2541-024 (2006) : 67]

No agency applications will be considered at this stage. [2541-030 (2006) : 69]

No longer will they be forced to make decisions based on simple certain narratives that fit into a TV debate on global warming. [2563-083 (2006) : 78]

Not every technology will work. [2576-003 (2006) : 58-61]

Not just because your team of experienced Regulators will come to you for enforcement and mentoring advice; [2541-012 (2006) : 62]

Not only will you be making a difference to the quality of animals' lives around the world, [2572-027 (2006) : 71]

Note: Although current funding expires in September 2007, subject to a successful review by CR-UK, it is anticipated that the post will continue beyond this. [2567-014 (2006) : 56]

Note: Although current funding expires in September 2007, subject to a successful review by CR-UK, it is anticipated that the post will continue beyond this. [2576-045 (2006) : 77]

Now we must maintain our productivity and momentum, so that cancer patients and their families will benefit at the time they need it. [2545-004 (2006) : 56-59]

On the basis of these studies, various compounds will be tested for their ability to restore schwannomas to normal Schwann cells. [2558-095 (2006) : 97]

This will have an impact on the kinds of skills researchers will need. [2545-004 (2006) : 56-59]
Once you are qualified, you’ll find yourself in considerable demand, with excellent opportunities for further career development and promotion. [2563-013 (2006) : 55]

One fellow will be based in Edinburgh and one in Glasgow. [2541-090 (2006) : 89]

One that will also see you forge strong relations with an array of academic and industrial research institutions to further our understanding. [2563-004 (2006) : 51]

One-third of this will come directly from the government, with an extra €500 million per year, [2550-007 (2006) : 58-59]

Ongoing in-house and external training will be provided for successful applicants. [2567-045 (2006) : 68]

Only short-listed candidates will be notified. [2580-067 (2006) : 78]

Opportunities will be available to attend international meetings and courses relevant to Pharmacogenetics and Genomics. [2554-074 (2006) : 86]

Other EU nationals will have their academic fees paid [2545-092 (2006) : 93]

Other EU nationals will have their academic fees paid [2545-092 (2006) : 93]

Our Aldermaston site, near Reading, was home to the nation's first Supercomputer and later this year, we’ll be taking delivery of what is expected to be Europe's most powerful Supercomputer. [2541-037 (2006) : 74]

Our methods of close supervision and emphasis on training and opportunities for learning mean that you will quickly be dealing with a very wide variety of drug cases, often involving serious crime. [2533-010 (2006) : 48]

Our methods of close supervision and emphasis on training and opportunities for learning mean that you will be dealing with a very wide variety of cases. [2567-061 (2006) : 54]

Our mission is to promote a culture of safety that every citizen will embrace. [2572-014 (2006) : 65]

Our new building which will house 400 people, is on the Addenbrooke's campus and at the heart of a cluster of world-class science. [2567-041 (2006) : 76]

Our remit of research, education and commercialisation will create a knowledge base in the Highlands and Islands of Scotland that is a respected global leader in these fields. [2567-005 (2006) : 52]

Our team of biologists will welcome your ideas to help in our approach to identify novel tumour antigens and characterise tumour-targeted antibodies. [2554-025 (2006) : 67]

Over the course of the next six months bioProcessUK will run three career advice workshops in Scotland and the North and South of England. [2576-006 (2006) : 63]

Part-time and job share applications will be considered. [2576-024 (2006) : 70]

Pay will be competitive and commensurate with age/experience. [2563-047 (2006) : 64]

People with expertise in medicines' modes of action and chances of interaction will also be in demand. [2554-004 (2006) : 56-59]

Phones with “4G” capability will have significantly higher bandwidth, and be able to hop between any standard or band throughout the world. [2572-006 (2006) : 58-61]

Plants will be propagated for conservation initiatives and to enhance Kew's living collections, which are used for scientific research and education. [2580-036 (2006) : 66]

Please note CV's will not be accepted. [2558-038 (2006) : 76]

Please note that CV's will not be accepted as applications. [2537-027 (2006) : 67]

Please note that CVs will not be considered if submitted without a completed application form. [2541-079 (2006) : 86]

Please note that CVs will only be accepted in support of a fully completed application form. [2545-082 (2006) : 90]

Please note that CVs will only be accepted in support of a fully completed application form. [2550-059 (2006) : 82]

Please note that CVs will only be accepted in support of a fully completed application form. [2554-071 (2006) : 85]
| E | Please note that CVs **will** only **be accepted** in support of a fully completed application form. [2554-080 (2006) : 88] |
| E | Please note that CVs **will** only **be accepted** in support of a fully completed application form. [2563-057 (2006) : 70] |
| E | Please note that CVs **will** only **be accepted** in support of a fully completed application form. [2580-073 (2006) : 80] |
| E | Please note that no faxed or posted CVs **will be accepted**. [2563-006 (2006) : 52] |
| E | Please note that only applications from nationals of one of the EUMETSAT Member States can be considered and that applications **will not be returned**. [2541-039 (2006) : 75] |
| E | Please note that only exceptional candidates **will** receive upper salary levels. [2533-008 (2006) : 47] |
| E | Please note that these appointments **will** be subject to security screening clearance. [2537-030 (2006) : 68] |
| E | Please note that this appointment **will** be made by way as a Professorial Research Fellowship. [2545-063 (2006) : 84] |
| E | Please note, new vacancies **will be advertised** each month. [2576-070 (2006) : 83] |
| E | Please note, we **will only** review the first 25 completed application forms received. [2576-034 (2006) : 56-59] |
| E | Policy-makers and researchers are hoping this **will change** with a major shake-up of the field. [2545-004 (2006) : 73] |
| E | Position **will start from** 1st August 2006. [2554-074 (2006) : 86] |
| E | Positions **will be open until** vacancies are filled. [2563-077 (2006) : 76] |
| E | Possible therapeutic effects of macrodrugs **will also be studied**. [2558-084 (2006) : 93] |
| E | Posts **will link with** the new £22M SAGES (http://www.sages.ac.uk) initiative with Scottish universities in the area of Environmental Research. [2558-010 (2006) : 63] |
| E | Potentially involved with advertisement, recruitment, marking and exam-setting, you **will also be encouraged** to wholly undertake the co-ordination of one module with the content of your choice. [2567-064 (2006) : 77] |
| E | Practical experience in molecular biology **would be an advantage**, although full training **will be given**. [2541-067 (2006) : 83] |
| E | Preference **will be given** to applicants in possession of a Home Office Personal Licence. [2537-068 (2006) : 82] |
| E | Preference **will be given** to candidates with a background in Remote Sensing, Physical Geography or Environmental Sciences. [2580-073 (2006) : 80] |
| E | Preference **will be given** to candidates with experience in Cell Biology/Immunology, Animal Physiology, or Ecology. [2550-056 (2006) : 82] |
| E | Preference **will be given** to candidates with experience of medical writing within the pharmaceutical industry. [2545-038 (2006) : 74] |
| E | Preference **will be given** to researchers with a PhD in Sensor Technology or related area with experience in electrochemistry/biosensor development and micro-sensor fabrication techniques. [2533-045 (2006) : 58] |
| E | Previous COSHH experience is an advantage but not essential as full training **will be given**. [2576-056 (2006) : 80] |
| E | Previous COSHH experience is an advantage but not essential as full training **will be given** [2580-037 (2006) : 66] |
| E | Previous editorial experience is not a requirement, as appropriate training **will be provided**. [2580-024 (2006) : 70] |
| E | Previous experience of polymerisation reaction engineering methods **would be an advantage** but not essential. The initial appointment **will be** for 18 months with the possibility of an extension beyond that period. [2558-038 (2006) : 76] |
| E | Primarily providing high-quality haemato-oncology molecular diagnostic services, you **will work closely with** the Principal Clinical Scientist to establish assays for the isolation of genetic material from lymphoma tissues. [2580-016 (2006) : 60] |
| E | Primarily, you **will be based** in the Laboratory for Bioanalytical Spectroscopy of the School of Chemistry. [2558-078 (2006) : 91] |
Principally, you will act as one of the main channels of communication between those in hospitals, universities and research institutes, where research is supported by the MRC and its decision-making Boards. [2537-025 (2006) : 67]

Projects will investigate synthetic strategies to enable development of pharmacologically interesting templates. [2576-027 (2006) : 71]

Protecting and furthering members' interests through the development and delivery of policies, you will be the NFU’s principal policy adviser on pesticide and integrated crop management issues as they impact on farming practice, public health and environment. [2567-047 (2006) : 69]

Providing biopharmaceutics expertise to a number of projects at different stages of development - both oral and inhaled - you’ll make a significant contribution to our PAR&D biopharmaceutics network [2558-025 (2006) : 68-71]

Providing technical leadership to a team of eight, you’ll maintain and develop our ability to deliver innovative photonic diagnostics. [2563-004 (2006) : 51]

Publication of work results is encouraged, and applicants will be encouraged to register for a higher degree. [2580-075 (2006) : 80]

Qualified candidates will be invited to participate in the subsequent format application procedure. [2576-094 (2006) : 91]

Reasonable travelling expenses will be paid at Department of Health rates. [2545-018 (2006) : 65]

Recent major investments have been made in tissue culture facilities on the Harrogate site and the successful candidate will be part of our exciting and expanding future plans. [2533-033 (2006) : 56]

Reducing variability and developing right first time processes will be a key aspect of the role. [2567-059 (2006) : 75]

Register online before 10th December and you’ll be entered into our FREE prize draw to win a luxury food hamper. [2576-029 (2006) : 71]

Register online before 10th December and you’ll be entered into our FREE prize draw to win a luxury food hamper. [2580-035 (2006) : 65]

Relevant experience is desirable but training and supported development into the specific elements of the role will be provided. [2576-024 (2006) : 70]

Requests to attend the meeting, which will be held at the York Moat House Hotel, York, should be addressed to Ms Toni Gray at: Chemical Safety Division, Room 511 C, Food Standards Agency, Aviation House, 125 Kingsway, London WC2B 6NH. Tel: 020 7276 8588 Fax: 020 7276 8513 or e-mail at Toni.Gray@foodstandards.gsi.gov.uk [2533-071 (2006) : 67]

Research at the DCMMR will encompass all aspects of marine mammal biology with special emphasis on physiological, behavioural and biophysical aspects of sound production and hearing to foster the understanding of marine mammal sound communication and biosonar. [2537-079 (2006) : 84]

Research will focus on understanding the consequences of root senescence, root exudation and arbuscular mycorrhizal fungi (AMF) on the structure and function of soil microbial communities. [2563-071 (2006) : 74]

Research will initially concentrate on developing work in relation to the ecology and evolution of soil microbes. Experience in molecular techniques would be an advantage. [2558-010 (2006) : 63]

Roland Wolf, a cancer scientist and the director of the Biomedical Research Centre at the University of Dundee says that in addition to the obvious need for molecular biologists, geneticists and cell biologists in the next few years, there will be an increasing demand for scientists who have broad interests and training. [2545-004 (2006) : 56-59]

Salaries will be dependent on qualifications and experience. [2563-027 (2006) : 59]

Salaries will be in the RA1A skill range, although for appropriately experienced individuals higher rates may be negotiable. [2537-065 (2006) : 80]

Salaries will depend on applicability and experience. [2550-033 (2006) : 73]

Salary for both positions will be within the range of £23,022.00 to £26,541.00 depending on experience. [2563-024 (2006) : 59]

Salary for the Lectureships will be in the Lecturer Grade B range £28,829 - £36,959 and for the Readership in the Senior Lecturer Grade £38,685 - £43,850. [2537-075 (2006) : 84]

Salary will be within the range £31,015 - £40,938 per annum including London Weighting. [2576-087 (2006) : 90]

Salary will be within the range: [2537-059 (2006) : 78]

Salary will depend on the candidate's qualifications. [2576-025 (2006) : 70]

Salary will depend upon experience, within the range £25k - £35k. [2533-031 (2006) : 55]

Salary: Salary for each fellow will be at the standard rates for Marie Curie Fellowships, around 47,000 euros gross income per year, plus travel allowance of 1 [2572-183 (2006) : 99]

Salary will depend on the candidate's qualifications. [2537-059 (2006) : 78]

Salary will depend upon experience, within the range £25k - £35k. [2533-031 (2006) : 55]

Salary will depend on the candidate's qualifications. [2537-059 (2006) : 78]

Salary will depend upon experience, within the range £25k - £35k. [2533-031 (2006) : 55]

Salary: Salary for each fellow will be at the standard rates for Marie Curie Fellowships, around 47,000 euros gross income per year, plus travel allowance of 1 [2572-183 (2006) : 99]

Scientists looking for a job in biotech will find employers in most parts of the country. [2576-003 (2006) : 58-61]

Second, in an adventurous instrumental development with a UK company-Ionoptika Ltd, ToF-SIMS will be combined with ATR-IR spectroscopy, enabling the surface and sub-surface chemistry of complex biological, organic and inorganic materials to be studied at the same time. [2554-059 (2006) : 74]

Selected students will be invited to the Institute to discuss their research interests and to view the Institute's facilities as soon as possible after the closing date. [2545-092 (2006) : 93]

SEPA’s main aim is to provide an efficient and integrated environmental protection system for Scotland which will both improve the environment and contribute to the Scottish Ministers’ goal of sustainable development. [2580-058 (2006) : 74]

Sessions will include lectures, workshops, small group work, audit sessions and a small research project, as well as some distance learning packages. [2554-039 (2006) : 74]

Several months each year will be spent working at the Waltham Centre in Leicestershire. [2558-096 (2006) : 98]

Shortlisted candidates will be invited to a Selection Day in Dundee on 9 June 2006. [2550-070 (2006) : 85]

So by joining our Simulation Physics Group (SPG), you will play a key role in combating these threats and protecting the lives of our Armed Forces. [2576-017 (2006) : 67]

So join our state of the art research facility in Horsham, Sussex and you won’t just be at the frontier of medical science. [2533-019 (2006) : 51]

So while your specific package will depend on your level of experience, rest assured you’d be hard-pushed to match it elsewhere. [2545-040 (2006) : 75]

So, if you would like to work for - or be permanently placed by - a company that doesn't just fill vacancies but helps create fulfilling careers, a company that will coach you, counsel you and remain committed to you and your development, then why not talk to us about the diverse range of opportunities we have available? [2533-035 (2006) : 56]

So, it’s important that you’re a graduate member of a professional body, as credibility will be key. [2554-002 (2006) : 60]

Some day the oil will run out, though, and Norwegians are making a conscious effort to look beyond petroleum. [2580-003 (2006) : 52-55]

Some previous lab experience and knowledge of enzyme assays and screening formats would be an advantage, but full training will be provided. [2572-038 (2006) : 76]

Some previous lab experience and knowledge of enzyme assays and screening formats would be an advantage, but full training will be provided. [2576-007 (2006) : 63]

Some will nod towards the country’s nautical experience, with research on aquaculture technology for farming marine plants and seafood, [2580-003 (2006) : 52-55]

Soon 14 new Experimental Cancer Medicine Centres at universities and research institutions across the country will provide more opportunity and extra funding for biomedical scientists to work on translational cancer medicine. [2545-004 (2006) : 56-59]
Specialist training to support the development of skills will be given where necessary. [2567-022 (2006) : 59]

Sponsored by the Wellcome Foundation, for an initial period of one year commencing 1 March 2006, this post will be part of a team undertaking new and exciting cellular and molecular research connected with the effects of hormones and ageing on wound healing. [2537-062 (2006) : 79]

SRG will find the best job for you [2537-041 (2006) : 71]

Starting either immediately, or in January 2007, a further studentship (in addition to those already awarded via our Open Day in January 2006) will be available at Babraham leading to a University of Cambridge PhD degree. [2545-092 (2006) : 93]

Starting salary will be £24,161 pa (salary can progress to £34,448 pa, subject to performance). [2576-053 (2006) : 79]

Starting salary will be according to qualifications and experience. [2576-055 (2006) : 80]

Starting salary will be in the range of £18,142 - £20,538 per annum depending on qualifications and experience, plus a final salary pension scheme. [2554-055 (2006) : 80]

Starting salary will be in the range of £23,022 - £26,541 per annum depending on qualifications and experience, plus a final salary pension scheme. [2554-055 (2006) : 80]

Starting salary will be in the region of £14,700 dependent on qualifications and experience. [2541-056 (2006) : 80]

Starting salary will be up to £51,484 dependent on relevant skills and experience. [2541-042 (2006) : 76]

Starting salary will be within the range £20,842 - £24,886 pa, depending on qualifications and experience. [2545-076 (2006) : 88]

State of the art technology will then be used to study gene rearrangements which contribute to the cancer phenotype. [2580-016 (2006) : 60]

Stipends vary slightly (see website www.pms.ac.uk/pms/school/jobs.php) but will be at least the MRC current rates of £12,300 for 2006. [2558-095 (2006) : 97]

Strategic Research Clusters (SRCs) will create clusters of internationally-competitive researchers from academia and industry, particularly Irish-based industry. [2572-010 (2006) : 63]

Students will have access to a dedicated Bioinformatics computer suite and e-learning support with online and CD-Rom materials. [2554-091 (2006) : 91]

Students will join a thriving scientific community situated on an attractive parkland campus near Cambridge. [2545-092 (2006) : 93]

Students will join a thriving scientific community situated on an attractive parkland campus near Cambridge. [2576-095 (2006) : 92]

Studentships will be available in both the MRC HUMAN IMMUNOLOGY UNIT and the MRC MOLECULAR HAEMATOLOGY UNIT both located within the Weatherall Institute (www.imm.ox.ac.uk). [2533-064 (2006) : 64]

Studies will involve in vivo work, tissue culture, flow cytometry, immunohistochemistry, ELISA and cell proliferation/migration assays. [2537-068 (2006) : 82]

Substantial EPSRC funding will be used to advance the capability of Time-of-Flight Secondary Ion Mass Spectrometry for biological system analysis. [2554-088 (2006) : 90]

Success as a Fellow will give you the opportunity for promotion to Principal Investigator. [2576-046 (2006) : 77]

Successful applicants will be granted access to state-of-the art laboratory facilities along with comprehensive supporting expertise. [2572-017 (2006) : 66]

Successful applicants will join a major European research group in optics and photonics, based in extensive new laboratories, with many opportunities for national and international collaboration. [2567-069 (2006) : 78]

Successful candidates will be awarded a fellowship of 3 years duration with a value of €125,000, based at a higher educational institution within Europe. [2580-008 (2006) : 57]

E The appointment will be for an initial fixed term of two years. [2541-002 (2006) : 56]

E The appointment will be for two years in the first instance. [2533-048 (2006) : 60]

E The appointment will be for two years in the first instance. [2563-074 (2006) : 76]

E The appointment will be for up to two years on the Research Assistant / Associate grade. [2541-082 (2006) : 86]

E The appointment will be made on the University Other Related Scale (Grades I/2 - £20,842 - £31,525) depending on experience. [2576-076 (2006) : 86]

E The appointment will be offered for a fixed-term of two years. [2567-077 (2006) : 81]

E The appointment will start as soon as possible and last one year. [2576-092 (2006) : 91]

E The appointments are currently unpaid though necessary expenses will be reimbursed. [2541-018 (2006) : 65]

E The appointments will each be for 5 years in the first instance with the possibility of reappointment to the retiring age subject to satisfactory performance. [2576-077 (2006) : 87]

E The award will support a two-year period of research at an institute, university or other academic centre in the UK or Republic of Ireland. [2533-072 (2006) : 67]

E The beamline will operate in the soft X-ray region [2580-053 (2006) : 71]

E The biggest buzz will come from leading the management of such an important resource. [2541-012 (2006) : 62]

E The candidate will take part in the 3 year BBSRC-funded project within the "Innovation in crop science – exploitation of genetics for sustainability" initiative. [2580-048 (2006) : 69]

E The Careers Guide will also feature profiles and contact information for the key science employers. [2541-033 (2006) : 72]

E The Careers Guide will be sent to all UK & Ireland subscribers with 10 February issue of New Scientist - over 58,000 recipients. [2576-066 (2006) : 82]

E The Careers Guide will be sent to all UK & Ireland subscribers with 10 February issue of New Scientist - over 58,000 recipients. [2580-043 (2006) : 68]

E The Careers Guide will be supported by a tailored marketing campaign, to include extensive email and online activity, [2576-066 (2006) : 82]

E The Careers Guide will be supported by a tailored marketing campaign, to include extensive email and online activity, [2580-043 (2006) : 68]

E The Centre is administratively located in the Division of Sciences but will have strong links to the other three academic divisions. [2580-064 (2006) : 77]

E The Centre will bring together modellers and dynamicists from across SAGES' three research Themes, with a central hub based in the School of GeoSciences at the University of Edinburgh with dedicated computing hardware and support. [2558-005 (2006) : 60-61]

E The CEO will lead the delivery of the PGRO's broad ranging programmes as well as developing opportunities for additional services and revenue streams. [2580-020 (2006) : 61]
The Chair will be the senior academic leader and Director of the Centre, charged with its national and international development and with ensuring that the Centre is committed to excellence in all its activities. [2580-064 (2006) : 77]

The charity is currently expanding and developing its portfolio to meet the needs of the whole cancer research community, and the Senior Research Manager will have a key role in implementing the recommendations of the review. [2545-019 (2006) : 65]

The City of London Police welcomes applications from all sections of the community and will not discriminate on grounds of race, colour, ethnic or national origins, sex, disability, sexual orientation, age, religion or religious belief. [2545-020 (2006) : 66]

The closing date for completed application forms will be 14 July 2006. [2558-036 (2006) : 76]

The Company has an unwavering commitment to Research and Development that will allow you to concentrate on the science, knowing that you have the resources to make a difference. [2580-034 (2006) : 65]

The Company is expanding into its own technical centre in N. Wales and we are looking to establish a high class technical team which will interact closely with polymer chemists at Bristol University. [2558-028 (2006) : 72]

The consortium includes chemists, analytical scientists and informatics experts and will be primarily based in the Manchester Interdisciplinary Biocentre. [2558-078 (2006) : 91]

The contract will be for a period of 18 months. [2572-015 (2006) : 66]

The contract will be for a period of 24 months. [2572-015 (2006) : 66]

The contract will be for a period of 4 months initially. [2572-015 (2006) : 66]

The contract will be for a period of up to 24 months. [2558-017 (2006) : 65]

The contract will be for a period of up to 33 months. [2558-017 (2006) : 65]

The contract, under government terms and conditions, will be dependent on qualifications and experience. [2541-028 (2006) : 69]

The course consists of lectures, tutorials, seminars and practical classes followed by a full-time research project and will next begin in October 2006. [2567-082 (2006) : 83]

The course will be run in collaboration with the BBSRC Institute of Grassland and Environmental Research (Aberystwyth). [2567-079 (2006) : 82]

The course will provide "hands on" practical experience of high throughput techniques and is designed to enable technicians, research scientists and principle investigators to gain an insight into designing and performing high throughput experiments. [2550-073 (2006) : 86]

The CRG (www.crg.es) will move to new premises within the PRBB biomedical research complex (www.prbb.org) [2558-050 (2006) : 80]

The development of independent research projects within the HTS Facility will also be possible, with the opportunity for joint appointments with research labs in the LRL. [2576-047 (2006) : 78]

The Diamond synchrotron will produce extremely intense light beams, mainly as X rays, that can penetrate deep inside all kinds of matter from proteins to plastics to support world class research. [2558-059 (2006) : 84]

The Diamond synchrotron will produce extremely intense light beams, mainly as X rays, that can penetrate deep inside all kinds of matter from proteins to plastics to support world class research. [2580-053 (2006) : 71]

The EPSRC plans to make a considerable strategic investment of £14.5 million in this area in the form of an Interdisciplinary Research Collaboration (IRC) that will be funded for an initial period of six years. [2545-063 (2006) : 84]

The extensive experience you’ve already gained in a regulated industry or regulatory body will stand you in good stead for the challenges that this role delivers. [2550-052 (2006) : 80]

The Facilitator will play an active role in raising funds for projects in the physical climate sciences, including: seeking out funding from all relevant sources; matching funding opportunities to expertise available within the departments; and administering the submission of major grant applications. [2567-066 (2006) : 78]

The Fellowship(s) will normally be tenable in the United Kingdom for two years from 1st October 2007. [2567-073 (2006) : 80]
The fellowships are for five years and you will be transferred to permanent academic posts on completion of the awards. [2572-084 (2006) : 95]

The Fellowships will be shared between leading European institutions. [2537-047 (2006) : 73]

The FGHP is launching an open-access online service that will include news, reviews and peer-reviewed research about emerging health threats which professionals in the discipline can contribute to and use. [2567-019 (2006) : 58]

The first potential change, which has been well received, is the creation of a single health research fund of over £1 billion a year, which will bundle together funding now split between the Medical Research Council and National Health Service R&D. [2558-004 (2006) : 58-59]

The focus of the research will be to develop a coupled hydrodynamic and ecological model system that simulates ocean physics and biological processes in integrated aquacultures including interaction between fish, mussels and plankton. [2576-094 (2006) : 91]

The grant will start at SK 2,000,000 per year (-$27,000/year). [2580-009 (2006) : 57]

The group leader will be hosted at the Dept. of Molecular and Applied Microbiology (Head Prof. Brakhage) of the HKI. [2558-081 (2006) : 92]

The group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups. [2558-089 (2006) : 95]

The group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups. [2558-089 (2006) : 95]

The group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups. [2558-090 (2006) : 95]

The hope is that the centres will help advance technology to the point at which it is in demand overseas, and duplicate Nokia's global success. [2580-003 (2006) : 52-55]

The hours of work will be: [2554-042 (2006) : 76]

The ideal candidate should possess an honours degree in a biological science plus previous experience in a relevant discipline (although recent graduates will be considered). [2545-017 (2006) : 64]

The increase in government funding will be used to support five new alliances between research groups, called strategic centres of excellence. [2580-003 (2006) : 52-55]

The initial appointments will be for five years [2537-038 (2006) : 70]

The job holder will join a cross-disciplinary team [2576-064 (2006) : 81]

The Network has funding for this post for three years in the first instance although it is envisaged the funding will be longer term. [2580-060 (2006) : 76]

The new department will house 16 research groups and up to 170 scientists and clinicians in newly constructed, custom-built space on the Old Road Campus in Headington, Oxford, adjacent to the Wellcome Trust Centre for Human Genetics, the Richard Doll Centre for Epidemiology and Biostatistics and a new cancer hospital, currently under construction. [2545-006 (2006) : 60]

The other position will commence in early September 2006, for an initial period of up to 7 months. [2558-061 (2006) : 84]

The person recruited will be a key member of the management team and shall help determine the overall direction and strategy of the division. [2572-014 (2006) : 65]

The PhD project will use protein structural information from the peroxiredoxin-sulfiredoxin (antioxidant) complex, in combination with whole cell experiments. [2558-095 (2006) : 97]
The position includes a five-year grant (3 PhD student positions, 1 technician, generous supply budget, investments) and will be hosted at the Dept. of Molecular and Applied Microbiology (Head Prof. Axel A. Brakhage) of the Hans Knöll Institute. [2558-075 (2006) : 90]

The position includes a five-year grant (2 PhD student positions, 1 technician, generous supply budget, investments) and will be hosted at the Dept. of Cellular and Molecular Biology (Head Prof. Hans Peter Saluz). [2558-081 (2006) : 92]

The position is available immediately for a period of 3 years initially and will be hosted at the Department of Cellular and Molecular Biology (Head Prof. Hans Peter Saluz). [2576-080 (2006) : 88]

The position of Laboratory Manager/Chief Technician is available within the Institute of Cancer, Barts and The London School of Medicine and Dentistry, and will be based in the School's state-of-the-art Cancer Research UK-funded Centre for Molecular Oncology at Charterhouse Square. [2541-071 (2006) : 84]

The position on offer will allow you to play a major role in the development of Council research policies within the remit of its portfolio, and exists in the following key area: [2537-025 (2006) : 67]

The position will be associated with the newly formed Danish Centre for Marine Mammal Research (DCMMR); [2537-079 (2006) : 84]

The position of Laboratory Manager/Chief Technician is available within the Institute of Cancer, Barts and The London School of Medicine and Dentistry, and will be based in the School's state-of-the-art Cancer Research UK-funded Centre for Molecular Oncology at Charterhouse Square. [2541-071 (2006) : 84]

The position on offer will allow you to play a major role in the development of Council research policies within the remit of its portfolio, and exists in the following key area: [2537-025 (2006) : 67]

The position will be associated with the newly formed Danish Centre for Marine Mammal Research (DCMMR); [2537-079 (2006) : 84]

The position will be at our European head office, in Crawley, West Sussex. [2541-059 (2006) : 81]

The position will be at the Central Laser Facility at the CCLRC Rutherford Appleton Laboratory in Oxfordshire, UK. [2576-064 (2006) : 81]

The position will be based in Nature Publishing Group's modern London offices, and the terms and conditions are highly competitive, reflecting the importance and responsibilities of the role. [2537-012 (2006) : 62]

The position will be from 1 May 2006, or as soon as possible thereafter, until 30 January 2007. [2545-067 (2006) : 85]

The position will involve working with 45 clinicians and scientists on a large EU-funded project entitled "Molecular-oriented detection and treatment of minimal disease". [2545-017 (2006) : 64]

The position will be laboratory based and to support assay development of pharmacodynamic biomarkers applicable to a clinical setting. [2541-015 (2006) : 64]

The position will provide you with comprehensive training in all aspects of Drug Master Files and other regulatory documents. [2563-044 (2006) : 64]

The position will suit a PhD graduate in biological sciences, but may also appeal to a candidate wishing to branch out from chemistry or physics into functional genomics. [2563-024 (2006) : 59]

The positions will attract a competitive salary with additional benefits including 25 days holiday, flexible working and subsidized canteen facilities [2576-032 (2006) : 72]

The positions will be based in The Company of Biologists' offices in Cambridge, UK. [2558-061 (2006) : 84]

The post attracts an additional retention and recruitment allowance of £3,800 to £6,000 per annum depending on starting salary; this is currently in place until 31 Dec 2006 and will be negotiated after that date. [2558-036 (2006) : 76]

The post holder will join the translational neuroscience group headed by Professor Mimoun Azzouz, [2541-073 (2006) : 84]

The post holder will work on a collaborative DTI-funded project with the University and Morgan Advanced Ceramics, focussing on the R & D of new Metal Injection Moulding (MIM) compounds (specifically biologically compatible implantable grades of titanium). [2545-083 (2006) : 90]

The post holder will work within the Evolutionary Dynamics group led by Dr Jo Dicks (http://cbr.jic.ac.uk/dicks/). [2558-036 (2006) : 76]

The post is a 5-year research post, after which consideration will be given to offering a suitable permanent academic appointment. [2563-069 (2006) : 73]

The post is available for 2 years and the starting salary will be in the range £18,946 to £22,015 pa (incl) according to experience and qualifications. [2537-081 (2006) : 85]
The post is based in Bath and the successful applicant will join an enthusiastic team of scientists who are working to merge cutting-edge research with top quality consultancy services. [2550-030 (2006) : 70]

The post is full-time, (however part-time applicants will be considered) in Pay Band D £22,300 - £32,100 per annum. [2537-014 (2006) : 62]

The post is funded by Cancer Research UK and will be for three years subject to satisfactory review after 12 months and is available immediately. [2537-062 (2006) : 79]

The post is funded by the Association of International Cancer Research and will be available from the 1 April 2006 for two years in the first instance. [2533-042 (2006) : 58]

The post is funded by the Leukaemia Research Fund and will be available from the 1 April 2006 for two years in the first instance. [2533-050 (2006) : 60]

The post of Editor of the Transactions will become vacant in July 2006. [2541-065 (2006) : 82]

The post will attract a salary of at least £25,000 depending on experience. [2558-038 (2006) : 76]

The post will be based at our field station and long-term study site near Gloucester. [2580-012 (2006) : 58]

The post will be eligible for Car Allowance and the BUPA Health Scheme. [2576-036 (2006) : 74]

The post will be eligible for Car Allowance and the BUPA Health Scheme. [2576-037 (2006) : 74]

The post will be for initially 3 years extendable by mutual agreement. [2554-041 (2006) : 75]

The post will be funded for three years in the first instance. [2541-069 (2006) : 83]

The post will be held at Leeds. [2572-073 (2006) : 92]

The post will be held for a 4-year term, subject to satisfactory progress in the research project. [2537-058 (2006) : 78]

The post will be ideally suited to those wishing to develop their academic career within an enthusiastic team of active GIS researchers. [2572-085 (2006) : 96]

The post will be primarily based at the Veterinary Teaching Hospital, Leahurst, South Wirral. [2545-085 (2006) : 90]

The post will be recruited by Dr A J Jaworski [2533-051 (2006) : 61]

The post will be tenable from September 2006 at the latest. [2554-083 (2006) : 88]

The post will initially be for 2 years extendable by mutual agreement. [2554-041 (2006) : 75]

The post will suit talented candidates with an interest in genomic instability and tumourigenesis, and a desire to develop skills in the supervision of PhD students and clinical fellows within an established research group. [2545-081 (2006) : 89]

The post-holder will make a significant contribution to the discovery of new drug development candidates at Ferring. [2541-009 (2006) : 60]

The posts will be held for a 4-year term, subject to satisfactory progress in the research project. [2576-075 (2006) : 86]

The programme provides valuable experience which will prepare the Fellow to pursue future opportunities in academia or industry. [2576-027 (2006) : 71]

The programme will develop national proficiency in genomics in relation to basic biology, medical and marine research. [2580-003 (2006) : 52-55]

The programme will fund all access costs including travel and daily subsistence for visiting researchers. [2572-017 (2006) : 66]

The project is in partnership with The University of Northampton and you will have the opportunity to register for a research degree. [2545-073 (2006) : 88]

The project will be based at the Institute of Biology, University of Iceland in Reykjavik Iceland and the Vestmannaeyjar Research Center (in Vestmannaeyjar islands south of Iceland). [2580-009 (2006) : 57]

The project will be in collaboration with CPB-Twyford Ltd. ADAS and CIMMYT (Mexico). [2545-076 (2006) : 88]

The project will be undertaken jointly at UEA and Oxford. [2541-083 (2006) : 87]

The project will contribute to the development, in a more hardware independent manner; [2580-068 (2006) : 78]

The project will focus on a genome-wide association study for weight gain in large population-based cohorts. [2567-023 (2006) : 60]

</table>
The University will actively foster a culture of inclusion and diversity.

The vast amounts of genetic and pharmacologic information generated will need to be stored and analysed, according to Wolf. The whole process takes only minutes, so you’ll even have time for a cup of tea.

The winners plus the top 10 runners-up get a free one-year subscription to New Scientist and all winners will be invited to give a short talk at an exciting event to be held in London late this year and in share their work with famous people from science and the media. The University will actively foster a culture of inclusion and diversity.

The work of the Particle Physics and Astronomy Research Council (PPARC) is focused on research into big scientific questions, and you will have a vital role to play in influencing the success of future projects.

The work will be performed in the group of Professor Dario Alessi in Dundee and Dr Darren Cross in AstraZeneca.

There will also be an opportunity to train as a LabCred Auditor, Bodycote's Laboratory Compliance Scheme that involves the assessment of the competence of laboratories as defined in ISO/IEC 17025, an internationally recognised standard.

The work, based at Langford, will progress to examine whether farm animals are capable of empathic responses.

There will also be significant interactions with the staff and infrastructure of Imperial College.

There will also be opportunities for further training and for international travel.

These assays will be offered as a diagnostic tool in the identification and classification of the haematological malignancies.

These centres will capitalise on Finland's resources and cater for its needs, says Heurlin. For one, alternative energy sources that make use of the country's extensive forests and peatlands are a priority.

These in vitro studies will be carried out using scanning microradiography, a modern highly quantitative X-ray absorptiometry method.

These posts will become vacant from 1 April 2006.
<p>| E | These strategic posts will also be supportive of Ireland's role and position within the healthcare, medical device, biotechnology industries, to which the candidates would be expected to develop strong links. [2572-011 (2006) : 64] |
| E | These studentships will cover UK fees at Home/EU levels and provide a stipend at Research Council UK rates. [2545-090 (2006) : 93] |
| E | These systems will ensure that the superb capabilities of the beamlines can be fully exploited to deliver high quality data to users. [2580-053 (2006) : 71] |
| E | These will be of critical importance to the University as it continues to further build its vision as an internationally recognised centre of academic excellence and as a leader in the development of third and fourth level education in Ireland. [2572-019 (2006) : 67] |
| E | These will commence in September 2006. [2537-047 (2006) : 73] |
| E | These will cover UK fees at Home/EU levels and provide a stipend at Research Council UK rates. [2545-090 (2006) : 93] |

| E | These will commence in September 2006. [2537-047 (2006) : 73] |
| E | These will also enjoy the benefits of Faraday Associates. [2545-087 (2006) : 92] |
| E | These will be available for 9 months in the first instance with the expectation of extension over four years. [2563-076 (2006) : 76] |
| E | They will be offered an Independent Junior Research Group Leader position [2580-042 (2006) : 67] |
| E | They will focus on energy and environment, metal products and mechanical engineering, forestry, health, and information and communication. [2580-003 (2006) : 52-55] |
| E | They will play a key role in the development of the ARK team and in furthering commercial and academic partnerships. [2554-012 (2006) : 63] |
| E | They will practice until they are as good as a bookmaker at estimating uncertainty. [2563-083 (2006) : 78] |
| E | This £100,000 award will be presented to a European-based scientist with less than ten years of postdoctoral experience for the proposal of a novel interdisciplinary research project in the field of toxicology. [2533-016 (2006) : 50] |
| E | This 2 year AstraZeneca funded appointment will build on a well established collaboration between the Tenovus Centre for Cancer Research and this pharmaceutical company examining signalling mechanisms underlying response, failure and disease progression during therapy with AstraZeneca developed anticancer agents, where the goal is to identify new therapeutic targets and predictive biomarkers. [2576-079 (2006) : 88] |
| E | This appointment is on local terms and a competitive package will be offered plus full relocation to attract the right individual. [2563-012 (2006) : 55] |
| E | This Chair will be held in one of the UK's premier engineering schools, which comprises 150 salaried researchers, 150 PhD, 100 MSc and 1,000+ undergraduate students. [2580-070 (2006) : 79] |
| E | This challenging role will see you lead and develop a team to provide histological services to support the CR-UK scientific community. [2545-010 (2006) : 62] |
| E | This Core Facility will provide a range of different types of approaches to aid in the analysis of phenotypes. [2554-084 (2006) : 89] |
| E | This distance learning programme from Europe's largest business school will give you the analytical, strategic and investigative skills to make an immediate impact within your organisation. [2572-088 (2006) : 97] |
| E | This exciting new post will play a leading role in the GIS group of the Department of Epidemiology and Public Health and contribute to the EU-funded INTARESE project. [2554-070 (2006) : 85] |
| E | This growth will be driven by the identification of new technologies and market opportunities, driving inward investment projects and working closely with the five regional universities in identifying research work that has a strong potential for commercial and economic success. [2580-029 (2006) : 64] |
| E | This growth will be driven by the identification of new technologies and market opportunities, driving inward investment projects and working closely with the five regional universities in identifying research work that has a strong potential for commercial and economic success. </tbody>
</table>
This will be based on the interaction between Polymyxa betae and Hordeum and Beta species and is expected to lead to the identification of genes and promoters that can be exploited for crop improvement by conferring resistance to Polymyxa and its associated viruses. [2558-012 (2006) : 63]

This will be based upon the Optical Parametric Chirped Pulse Amplification (OPCPA) technique which the CLF has pioneered. [2572-061 (2006) : 86]

This will be facilitated by an excellent rail link (c. 25 minutes from Harpenden to Central London). [2580-048 (2006) : 69]

This will give the student an excellent opportunity to work with exciting problems at the intersection between biology and physics. [2576-094 (2006) : 91]

This will give you truly global impact, as you ensure the advancement of our drug discovery efforts in the genome era. [2550-012 (2006) : 62]

This will have an impact [2545-004 (2006) : 56-59]

This will mean distinguishing between tumours on a molecular or genetic level and generating a range of different treatments. [2558-081 (2006) : 92]

This won't be the last biotech drug to generate such heady profits. [2576-003 (2006) : 58-61]

This will be facilitated by an excellent rail link (c. 25 minutes from Harpenden to Central London). [2580-048 (2006) : 69]

This will give the student an excellent opportunity to work with exciting problems at the intersection between biology and physics. [2576-094 (2006) : 91]

This will give you truly global impact, as you ensure the advancement of our drug discovery efforts in the genome era. [2550-012 (2006) : 62]

This will have an impact [2545-004 (2006) : 56-59]

This will provide images of where and how proteins are expressed in healthy and cancerous tissue, to help biochemists understand how newly discovered proteins work. [2580-003 (2006) : 52-55]

This won't be the last biotech drug to generate such heady profits. [2576-003 (2006) : 58-61]

Training in relevant spectroscopic techniques will be provided. [2576-064 (2006) : 81]

Training other staff as required, you will maintain an in-depth knowledge of current and future technologies. [2545-061 (2006) : 83]

Tuition fees will be paid by the University. [2558-075 (2006) : 86]

Tuition fees will be paid at the home rate. [2558-095 (2006) : 97]

Tuition fees will be paid by the University. [2537-058 (2006) : 78]

Tuition fees will be paid by the University. [2576-075 (2006) : 86]

Two positions on the Board will become vacant in 2006. [2541-018 (2006) : 65]

Two, four year studentships funded under the above scheme will be available from October 2006 for the following research areas: [2533-061 (2006) : 63]

Travel and subsistence costs will also be met for those attending interviews for these posts. [2541-047 (2006) : 77]

Travel expenses will be paid to those invited to attend the Institute. [2545-092 (2006) : 93]

Travel expenses will be paid to those invited to attend the Institute. [2576-095 (2006) : 92]

Tuition fees will be paid at the home rate. [2558-095 (2006) : 97]

Tuition fees will be paid by the University. [2537-058 (2006) : 78]

Two positions on the Board will become vacant in 2006. [2541-018 (2006) : 65]

We anticipate that all of these positions will commence on 1 March 2006, or as soon as possible thereafter [2537-065 (2006) : 80]

We are looking for individuals who can bring new ideas and approaches that will complement our existing strengths in genetics and genomics, developmental biology and gene function and TSE research. [2576-046 (2006) : 77]

We are therefore seeking to appoint a Lecturer in Forensic Science who will complement our current teaching team and contribute to the teaching and administration of our courses. [2558-079 (2006) : 92]
We employ some of the most skilled and experienced professionals to be found anywhere in the industry, and offer a creative scientific and international environment that will allow you to develop your own skills. [2545-038 (2006) : 74]

We have opportunities for first-rate individuals who are passionate, enthusiastic and dedicated to making a difference, to supplement our existing team and share our vision that it's not about what we do. [2580-028 (2006) : 64]

We have recently undertaken a review of the management and funding of our institutes, and the review of one of the four core-funded institutes will take place later this year. [2545-019 (2006) : 65]

We offer you a career move that will give you every opportunity to grow with your company and receive the satisfaction and rewards that brings. [2537-052 (2006) : 75]

We support a comprehensive series of generic skills training courses designed to enhance your research training as well as your interpersonal, communication and managerial skills – skills that will help to make you highly sought after by employers. [2533-063 (2006) : 64]

We will also consider applications from newly qualified BMSs at Band 5 and from graduates, with CPSM approved degrees, to train for this Band 6 post in immunology. [2580-037 (2006) : 74]

We will carefully consider any request for flexible or part time working. [2541-043 (2006) : 76]

We will consider candidates with a degree or equivalent qualification in life sciences or pharmacy, a nursing qualification or relevant clinical research experience. [2580-057 (2006) : 73]

We will help you realise yours too. [2545-040 (2006) : 75]

We will not consider applications received after this date. [2545-018 (2006) : 65]

We will only handle applications received via our website. [2563-018 (2006) : 57]

We will provide development opportunities through a programme of training and developmental courses. [2576-037 (2006) : 74]

We would hope that the successful applicant will start no later than the beginning of December 2006. [2567-062 (2006) : 77]

We'll consider people at all levels. [2541-005 (2006) : 58]

We'll give you more space to make your mark. [2545-040 (2006) : 75]

We'll help her keep her word. [2545-009 (2006) : 61]

We'll invest both time and money in your personal development and give you all the skills you need for a successful future. [2541-014 (2006) : 64]

We'll invest both time and money in your personal development and give you all the skills you need for a successful publishing career. [2576-022 (2006) : 70]

We'll make a great team. [2567-059 (2006) : 75]

We'll value your achievements. [2537-046 (2006) : 73]

We’re defining the Future Rapid Effect System (FRES) - a family of vehicles that will be the backbone of the British Army after 2010. [2550-044 (2006) : 77]

What's more, the fast pace of the market means you’ll see the results of your work on the shelf quicker than in almost any other industry. [2541-007 (2006) : 59]

What's more, the fast pace of the market means you’ll see the result of your work on the shelf quicker than in almost any other industry. [2558-051 (2006) : 81]

What's more, work and residency restrictions have been relaxed for EU citizens in Switzerland, and from May 2007, there will be no limit on the number of EU workers allowed into the country. [2550-006 (2006) : 56-57]

What's more, you’ll gain an international overview of current research and publish your findings. [2572-040 (2006) : 77]

When you join us you will become part of a vibrant academic community of international standing. [2533-063 (2006) : 64]

Where appropriate the Manager will be given control of a wider range of activities as overall Director of Bioprocess Leadership Activities. [2558-087 (2006) : 95]

Where businesses and scientists will collaborate at the country's universities or research institutes. [2580-003 (2006) : 52-55]

Where technical excellence combined with customer orientation, strong project management skills and interpersonal awareness will be rewarded. [2545-049 (2006) : 79]

Where they will develop an externally-funded research programme. [2533-040 (2006) : 58]

</table>
You will work alongside a team in Southampton of doctors, statisticians and systems analysts, and with research teams in India. [2541-074 (2006) : 84]

You will work alongside a team of clinicians and basic scientists co-ordinating collection of clinical samples from across Europe and entering clinical, research and demographic information onto databases. [2567-072 (2006) : 80]

You will work at our custom built laboratories on the outskirts of Sheffield. [2567-072 (2006) : 80]

You will work at the interface of these two areas. [2576-087 (2006) : 90]

You will work in a multi-disciplinary team of postgraduate scientists and students, within a larger multi-user research lab. [2558-078 (2006) : 91]

You will work in a stimulating and challenging environment, leading the intellectual development and practical implementation of agreed in vitro and in vivo biology packages to enable essential project decisions. [2580-056 (2006) : 72]

You will work in a stimulating and challenging environment, leading the intellectual and practical development of in vivo tumour modelling from conception to implementation. [2580-056 (2006) : 72]

You will work in close collaboration with Professor David Briggs, the leader of the GIS group and co-ordinator of the INTARESE project, to help advance and lead the work of the GIS group. [2554-070 (2006) : 85]

You will work in state-of-the-art laboratories which were recently refurbished with support from a major JIF grant from the Wellcome Trust. Informal enquiries to Dr Mark Pritchard [2537-082 (2006) : 85]

You will work in the laboratory of Professor Andrew Loudon on the neuroendocrine control of energy metabolism, using mammalian models. [2580-061 (2006) : 76]

You will work within a Centre for Fusion, Space and Astrophysics in the Department of Physics as part of a major EPSRC initiative to strengthen plasma physics in UK Universities. [2545-066 (2006) : 85]

You will work within a Centre for Fusion, Space and Astrophysics in the Department of Physics as part of a major EPSRC initiative to strengthen plasma physics in UK universities. [2545-066 (2006) : 85]

You will work within a focused research team with members the Simulation and Visualization Research Group (Computer Science at Hull) and the Functional Morphology and Evolution Research Group (HYMS at York and Hull). [2545-011 (2006) : 62]

You won’t change the world. [2558-055 (2006) : 82]

You’ll also receive a salary of £19,731 plus pension, life assurance and private health insurance. [2541-014 (2006) : 64]

You’ll also receive a salary starting from £19,731 plus pension, life assurance and private health insurance. [2576-022 (2006) : 70]

Your CV will be cleared of all personal details before short listing. [2580-029 (2006) : 64]

Your CV will be cleared of all personal details before short listing. [2580-076 (2006) : 80]

Your details will be sent to Dstl only [2533-008 (2006) : 47]

Your details will be sent to Dstl only [2554-035 (2006) : 72]

Your details will be sent to Dstl only [2576-017 (2006) : 67]

Your details will be sent to Dstl only [2580-022 (2006) : 62]

Your team will include organic chemists, analytical chemists, engineers, PAT technologists and pharmacists. [2558-070 (2006) : 88]

Your work will be diverse and technically challenging [2550-036 (2006) : 74]

Your work will be varied [2576-057 (2006) : 80]

Pub You’ll find the right person. Fast [2533-017 (2006) : 50]

6 occurrences de would
1 occurrence de must
4 occurrences de should
189 voix passive

Ca Applications should include the names of two referees who will be asked to comment upon the candidate’s suitability for the post. [2689-020 (2009) : 53]

Co A confident communicator at all levels you will act as a representative in meetings and committees. [2715-003 (2009) : 50]

Co All roles require pro-active and flexible team players with excellent organisational and communication skills who will welcome the challenges of this fast-paced entrepreneurial environment. [2698-039 (2009) : 64]

Co and will be expected to participate in the preparation and delivery of the Departmental Commercial Interaction Plan in both strategic and tactical matters. [2728-021 (2009) : 61]

Co and will liaise with media to identify opportunities, handle media enquiries, organise press conferences, organise the ERS Annual Congress media centre and all press releases for the event, deal with requests for information about the society, attend press visits and carry out background research. [2689-012 (2009) : 50]

Co and will work closely with staff in the Cough Research Team. [2698-047 (2009) : 68]

Co and you’ll represent the Environment Agency on key national committees. [2724-027 (2009) : 62]

Co Applications are invited for a Chair in Geological Disposal who will, as Director of the Centre, lead to its strategic development as an international Centre of Excellence in fundamental and applied research and training. [2715-032 (2009) : 62]

Co As a member of the senior management team, you will deputise for the Head of NMF-SS as required. [2694-047 (2009) : 71]

Co As part of a small team you will quickly be able to make a positive contribution reviewing, updating and submitting regulatory applications. [2706-003 (2009) : 48]

Co As part of the above, the role holder will direct and co-ordinate the activities of the Director's office with particular emphasis on the management of communication both internally and with key external stakeholders including the Wellcome Trust. [2733-024 (2009) : 69]

Co As well as leading a research programme in PET radiochemistry complementary to current radiochemistry research in the Division, you will play a leading role in the design and project management of a planned major expansion and refurbishment of the PET Imaging Centre, including new expanded GMP radiochemistry facilities and their unification with the nuclear medicine radiopharmacy. [2737-028 (2009) : 66]

Co Candidates are sought who can further enhance DMSM's international research profile, and who will play an active part in curriculum development and teaching at Bachelor's, Master's and doctoral levels. [2698-050 (2009) : 68]

Co Data will be analyzed in close collaborations between computational and experimental groups. [2733-011 (2009) : 64]

Co Good communication skills are essential, as the role will demand effective working relationships with a range of stakeholders. [2733-034 (2009) : 72]

Co Here high surface area, controllable porosity, and possible functionalisation by ligands will be important parameters investigated. [2719-038 (2009) : 63]
In addition, the Associate will spend at least 10% of their time on personal and professional development; the award includes training leading to a Diploma in Management. [2737-015 (2009) : 59]

In close collaboration with regulatory authorities you will represent Swiss toxicology in national and international scientific expert groups (e.g. ECETOC, ILSI-HESI). [2733-010 (2009) : 64]

Initially, you’ll have huge input in completing our Contaminated Land Exposure Assessment (CLEA) model. [2724-027 (2009) : 62]

Involved in projects, networks, consultancy and support, you’ll deliver the strategy for one of the information domains, ensuring data is exploited to its full potential. [2724-015 (2009) : 57]

It is expected that the work will focus on genetic, physiological and environmental factors that improve light- and water-use efficiency in cropping systems in the context of environmental change, adopting appropriate molecular, physiological, laboratory, glasshouse and field based approaches as necessary. [2698-054 (2009) : 70]

It will involve compiling existing field data on forest function arc dynamics and then using these to parametrise and improve the UK community vegetation model, JULES. [2706-037 (2009) : 62]

Leading a new Innovation Platform in Sustainable Agriculture and Food, you will play a key role in helping the UK develop and promote the use of new technologies and new ways of working, enabling Britain's agri-food industry to meet this challenge head on. [2737-017 (2009) : 61]

Members will serve on the committee for a period of four years; [2694-020 (2009) : 60]

Predictive models will be tested by targeted genetics and genomics experiments. [2733-011 (2009) : 64]

Scope will also be given to perform investigative studies, including the development and implementation of new assays and to conduct research to improve understanding of the pharmacodynamic and pharmacokinetic properties of drug candidate molecules. [2706-029 (2009) : 58]

Scope will also be given to perform investigative studies, including the development and implementation of new models and to conduct research to improve understanding of the pharmacodynamic and pharmacokinetic properties of drug candidate molecules. [2733-016 (2009) : 66]

Specifically you will provide technical expertise and practical leadership in optimising the preparation of ligno-cellulosic waste, together with developing and optimising small scale fermentation conditions. [2728-030 (2009) : 66]

The artefacts will be stored and used under vacuum or in an inert atmosphere.

The Associate funded by this prestigious award will transfer novel technology developed at Cardiff to Immunocore, with the objective of designing mTCR reagents with increased specificity for cancer cells. [2737-015 (2009) : 59]

The group aims to lead polymer and inert characterisation, and you’ll play a lead role in developing specialist characterisation techniques, working across several teams to design and perform experimental studies. [2715-024 (2009) : 59]

The Job: The Agronomist will be a member of the multi-disciplinary research team of ICRISAT to develop and implement an integrated research program on cropping systems management under rainfed farming systems in collaboration with national and international partners under ICRISAT's Protracted Relief Program (PRP). [2706-017 (2009) : 53]

The new Director will lead in the establishment and growth of the CSBL that is expected to achieve prominence among European research institutions over the next decade, and contribute substantially to the application of research to understanding human disease. [2689-033 (2009) : 59]

The person appointed to this post will help create a unique partnership between Diamond and the University of Manchester [2689-003 (2009) : 46]

The post holder will contribute to the overarching activities of the Major Overseas Programme including training and capacity building. [2715-037 (2009) : 64]

The post is focussed on the development and application of a soil system model from a pedological perspective which will require the mathematical integration of physical, biological and chemical soil process models at a range of temporal scales. [2711-020 (2009) : 57]
| Co | The post will have a key role in extending awareness and understanding of the NIHR-funded clinical research infrastructure with stakeholders including the research community, other research funders including charities, the NHS and universities, global life sciences industries and their trade associations, and other Government Departments (especially UK Trade and Investment). [2733-022 (2009) : 68] |
| Co | The postholder will represent the project at international meetings and interact with SOLAS national committees and groups, completing the SOLAS Implementation Plan document. [2715-038 (2009) : 64] |
| Co | The post-holder will take a senior role in the Department, running a productive research group, supervising post graduate research workers and mentoring graduate students, and winning funds to support the group in the future. [2715-037 (2009) : 64] |
| Co | The Regulatory Oversight Committee (ROC) will provide assurance internally and externally that any potential conflicts of interest are managed properly, [2694-020 (2009) : 60] |
| Co | The role is challenging and varied and you will be involved in all aspects of the dosage form development process from particle characterisation to product scale-up, using a wide range of techniques and equipment. [2728-016 (2009) : 59] |
| Co | The Senior Principal /Consultant will take the lead role and should hold a relevant Ph.D, have experience of cellular therapy in a clinical environment and specific knowledge of Good Manufacturing Practice, immunoselection technology, cell culture, flow cytometry and in vitro functional assays. [2702-050 (2009) : 68] |
| Co | The successful applicant will play a leading role in co-ordination of UK wide studies establishing DNA banks from stroke patients, which involves collecting detailed clinical information. [2715-039 (2009) : 64] |
| Co | The successful candidate will lead a dynamic team of five Ph.D. level scientists undertaking research on population ecology and modelling. [2737-008 (2009) : 56] |
| Co | The successful candidate will play a key and challenging role in moving four ocular gene therapy programmes from the proof of concept stage through to clinical application in First in Man clinical studies, following a recently announced partnership with sanofi-aventis. [2728-022 (2009) : 62] |
| Co | The successful candidate will work as one of the Global Value Chain Specialists, supporting UK companies in accessing global value chain opportunities in China, working alongside current UKTI resources in delivery of a range of support activities. [2737-021 (2009) : 63] |
| Co | The successful candidates will form part of a team responsible for the quality control testing of the company's investigative medicinal products (IMPs), as well as analysis of samples from clinical and non-clinical studies. [2728-022 (2009) : 62] |
| Co | The successful candidates will join a dynamic team engaged in establishing and operating the new regulatory framework, managing the technical, scientific and administrative aspects of REACH, ensuring consistency at Community level in its application and providing the Member States and the EU institutions with the best possible scientific and technical advice on chemicals. [2698-022 (2009) : 58] |
| Co | The team will provide expert advice to government bodies such as the Department for Transport and DEFRA [2694-025 (2009) : 62] |
| Co | The work will involve product registration, hazard and risk assessments and generation of associated documentation such as product labels and Safety Data Sheets. [2715-021 (2009) : 58] |
| Co | The work will involve product registration, hazard and risk assessments and generation of associated documentation such as product labels and Safety Data Sheets. [2719-021 (2009) : 58] |
| Co | There will be close collaboration with national and international project partners making measurements of the oceanic nitrogen system. [2706-040 (2009) : 62] |
| Co | There will be emphasis on developing collaborative programmes with academic groups and with industry and stimulating new strategic initiatives involving both public and private sector organisations. [2698-019 (2009) : 57] |
| Co | This exciting multi-disciplinary project will involve working in laboratories in Johnson Matthey and the University of Cambridge Engineering Department, where advanced research on nanomaterials has a high international reputation. [2719-038 (2009) : 63] |
| Co | This is a collaborative project with the School of Clinical Sciences and the Department of Physics and will involve micro-plasma design and development, electrical characterisation, the plasma treatment and |
This role will be primarily involved in the design and development of new functionality within, and maintenance of, software for Renishaw’s NeuroMate surgical robot, with the majority of work centred on the embedded software. [2694-015 (2009) : 57]

This role will ensure that the organisation meets its future economic and environmental responsibilities. [2694-047 (2009) : 71]

This will include review and challenge of the safety assessment models to ensure they are recognised widely as being robust and balanced. [2719-027 (2009) : 52]

This will involve running the strategy with dynamic interfaces, maintaining and understanding requirements and co-ordinating strategic and operational delivery. [2719-027 (2009) : 59]

This will involve the development and application of methods for the quantitative analysis of novel low molecular weight drugs in biological samples [2694-024 (2009) : 61]

This will involve working with data from research projects inside and outside CEH. [2711-004 (2009) : 51]

This work will be validated by using precision mass comparators maintained at the BIPM and through collaboration with other research institutes. [2689-020 (2009) : 53]

With oversight of a budget of £135 million, you’ll lead a team which sets the strategic agenda for water quality policy, as well as shaping all our activities and actions in this area. [2715-012 (2009) : 55]

Working within a small team in central London, the post holder will work closely with Academy Fellows to gather information on topical issues, draft papers and position statements, and provide support for Academy study groups. [2711-006 (2009) : 52]

You will act as Project Leader, with responsibility for management and assistance involving research into influenza viruses affecting avian and mammalian hosts, classical virology, molecular biology, serology and disease pathogenesis, including extensive in vivo work with multiple species. [2706-010 (2009) : 51]

You will act as the official media contact [2689-012 (2009) : 50]

You will also contribute to some other aspects of the Forensic Science programme [2702-048 (2009) : 67]

You will also play a key role in the identification and implementation of new technologies and process improvements for antibody isolation and protein engineering. [2724-024 (2009) : 61]

You will also play a key role in the planning and preparation of LWEC meetings, workshops, conferences and other functions (e.g. in the Parliaments and Assemblies of all the countries and regions of the UK) and in helping to identify and map activities and gaps within the LWEC framework. [2715-030 (2009) : 62]

You will also represent the Agency to national and international partners and institutions on all relevant areas within the Centre's remit. [2694-034 (2009) : 65]

You will be part of the team responsible for the reference/confirmatory testing, working closely with other laboratory staff both in NTMRL and other parts of the organisation. [2706-031 (2009) : 59]

You will deputise for the Director of OIE, WHO, and FAO Reference Laboratory for Rabies and the workgroup leader increasing the international profile of the group whilst strategically re-focusing the group's activities to include other viral zoonoses, with a special focus on emerging viral infections, particularly tick and mosquito borne viruses. [2706-010 (2009) : 51]

You will direct the development of work methods to provide best outcomes for the constant flow of new challenges we receive as well as ensuring the accuracy and precision of data provided to clients. [2737-012 (2009) : 57]
| Co | You **will** enable supply and capture of data for curation within the data centre and have responsibility for contact with researchers to support effective management and availability of data. [2711-004 (2009) : 51] |
| Co | you **will** play a key role in developing and implementing new assays and methodologies, mentoring junior staff in these areas. [2694-005 (2009) : 53] |
| Co | You **will** play a key role in leading Natural England's use of statistics nationally and developing our capacity to use statistical evidence effectively and appropriately as part of our drive to deliver environmental leadership. [2719-034 (2009) : 61] |
| Co | You **will** take a national lead for the co-ordination and support of all staff within the Food, Water and Environmental Microbiology Network's 12 laboratory sites and achieve a consistent culture of continuous quality improvement for all aspects of the work, [2702-025 (2009) : 58] |
| Co | You **will** work closely with academics both in design and analysis of experiments utilizing these cutting-edge technologies. [2728-033 (2009) : 67] |
| Co | You'll be an in-house expert working closely with relevant government bodies such as the Health Protection Agency [2724-027 (2009) : 62] |
| Co | You’ll manage a team of 15 motivated scientists with a real blend of skills. [2706-007 (2009) : 49] |
| Co | Your ambition, leadership, excellent research profile, influencing skills and drive **will** be key to achieving success. [2689-032 (2009) : 59] |
| Co | Your background and proven ability on the scientific basis for radioactive waste management and your experience of geological disposal programmes **will** enable you to provide authoritative information on previous and present geological disposal programmes in the UK and overseas to regulators and Government officials [2724-004 (2009) : 52] |
| Co | Your expertise and expertise **will** ensure that the Scottish Environment Protection Agency (SEPA) continues to enhance and protect the environment. [2702-021 (2009) : 55] |
| Co | Your role **will** be working in a team with editors [2733-029 (2009) : 71] |
| E | "If we can help the public, we **will**." [2698-004 (2009) : 48-49] |
| E | "In very long flights, when the pilot is resting and maybe not fully concentrating, he **will** feel this information through vibrations," says Borschberg, and so be able to react quickly to any problems. [2733-006 (2009) : 60-61] |
| E | "Our engineers **will** sit with the technologists who come up with the ideas, then talk to materials scientists and specialists in industry about how to make those ideas a reality." [2698-004 (2009) : 48-49] |
| E | (It is likely that the appointment **will be made** at base of scale) [2702-049 (2009) : 67] |
| E | (Our preference is to appoint at the level of Professor, however, for posts J09/156 and 109/158 consideration **will be given** to appointing at the level of Reader or Senior Lecturer.) [2733-046 (2009) : 76] |
| E | (which **will** include a programming exercise) [2715-014 (2009) : 56] |
| E | £25,000 - £28,000 incl. pension ( **will be increased** for an exceptional candidate) [2737-015 (2009) : 59] |
| E | a company car **will be provided**. [2719-005 (2009) : 48] |
| E | A number of methodologies **will be employed** including time-lapse and confocal microscopy, 3D and ex-vivo cell and tissue culture. [2711-045 (2009) : 65] |
| E | A per diem allowance for Chair and members **will** be payable. [2715-016 (2009) : 57] |
| E | A Ph.D. in a related area is essential. Starting salary **will** depend on qualifications and experience [2711-033 (2009) : 62] |
| E | A relevant health and safety qualification **would** be an advantage although support and training in this area **will be provided**. [2694-035 (2009) : 65] |
| E | A short journey north-west of ETHZ **will** take you to PSI, the home of many top scientists. It's fitting that this year's chemistry prize has been awarded to Venkatraman Ramakrishnan, who used the institute's £95 million Swiss Light Source for his prize-winning studies on the structure of the ribosome. [2733-006 (2009) : 60-61] |
| E | Accordingly the successful candidate **will** spend a period of their Ph.D. studies working with industry scientists at the GSK R&D headquarters in Stevenage. [2724-053 (2009) : 71] |
| E | Activity within the first five years of this ten year programme **will** be in the order of £1 billion. [2715-030 (2009) : 62] |
Additionally, successful candidates will receive a generous support package affording a Ph.D. student, relocation, a leadership programme, mentorship, and more. [2737-024 (2009) : 65]

After an initial 2-year research assignment in ISB, the selected candidates will be located for a 3-year research period in Luxembourg within the new center for Systems Biology – Luxembourg. [2698-056 (2009) : 71]

AHDB headquarters will be located in Stoneleigh, Warwickshire from 2009. [2694-004 (2009) : 52]

All appointments will be for a maximum of 3 years. [2715-025 (2009) : 60]

All appointments will be for periods of three years. [2702-041 (2009) : 65]

All necessary training will be provided. [2719-004 (2009) : 48]

All positions offer competitive salary, O.T.E bonus scheme, benefits, and a company car. Recruitment will commence in March/April for appointment immediately. [2698-020 (2009) : 58]

All projects will have co-supervisors in Chemistry and Chemical Engineering [2698-008 (2009) : 51]

All appointments will be for a maximum of 3 years. [2715-025 (2009) : 60]

All vacancies will be posted online – that’s an opportunity to attract 10 applications per job [2724-038 (2009) : 66]

Already highly important for current very large telescopes, adaptive optics (AO) will be an indispensable element of an ELT. [2728-012 (2009) : 58]

Although recent graduates with strong portfolios will also be considered. [2694-027 (2009) : 63]

An experienced epidemiologist, you will join and help lead the Impact Research Group. [2702-047 (2009) : 67]

An initial £30 million of existing funds will be spent on new appointments, infrastructure, and studentships in five groundbreaking interdisciplinary research themes. [2694-042 (2009) : 69]

And because we operate in over 160 countries, your influence will be felt far and wide. [2694-019 (2009) : 59]

An initial £30 million of existing funds will be spent on new appointments, infrastructure, and studentships in five groundbreaking interdisciplinary research themes. [2694-042 (2009) : 69]

All positions offer competitive salary, O.T.E bonus scheme, benefits, and a company car. Recruitment will commence in March/April for appointment immediately. [2698-020 (2009) : 58]

All projects will have co-supervisors in Chemistry and Chemical Engineering [2698-008 (2009) : 51]

And because we operate in over 160 countries, your influence will be felt far and wide. [2694-019 (2009) : 59]

An initial £30 million of existing funds will be spent on new appointments, infrastructure, and studentships in five groundbreaking interdisciplinary research themes. [2694-042 (2009) : 69]
E and will seek to achieve true equality of opportunity for all members of its community. [2698-047 (2009) : 68]
E and will seek to achieve true equality of opportunity for all members of its community. [2702-054 (2009) : 69]
E and will seek to achieve true equality of opportunity for all members of its community. [2715-032 (2009) : 62]
E and will seek to achieve true equality of opportunity for all members of its community. [2724-043 (2009) : 68]
E and will seek to achieve true equality of opportunity for all members of its community. [2737-022 (2009) : 64]

E and you will have a great opportunity to further develop your scientific skills and contribute to protecting and nurturing Scotland's environment. [2724-016 (2009) : 58]

E Another call will be issued for applications as Ph.D. students in the framework of this UL-ISB collaboration. [2698-056 (2009) : 71]
E Applicants from closely related disciplines will also be considered. [2689-042 (2009) : 62]
E Applications from agencies will not be accepted. [2698-011 (2009) : 53]
E Applications from agencies will not be considered. [2728-012 (2009) : 58]
E Applications from agencies will not be selected. [2733-051 (2009) : 78]
E Applications are invited for three prestigious Norwich Research Park Studentships commencing in October 2010 (three of the six projects listed will be selected). [2733-051 (2009) : 78]
E Applications for Research Fellowships will be considered from both candidates with recent doctorates (or equivalent) and more experienced researchers having a Ph.D. (or equivalent). [2698-011 (2009) : 53]
E Applications from candidates with teaching, industrial or research experience will be particularly welcome. [2698-049 (2009) : 68]
E Applications from those with expertise in these or related areas will be most welcome. [2694-042 (2009) : 69]
E Applications received after this date will not be considered [2728-023 (2009) : 62]
E Applications are invited for three prestigious Norwich Research Park Studentships commencing in October 2010 (three of the six projects listed will be selected). [2733-051 (2009) : 78]
E Applications for Research Fellowships will be considered from both candidates with recent doctorates (or equivalent) and more experienced researchers having a Ph.D. (or equivalent). [2698-011 (2009) : 53]

E Applications from those with expertise in these or related areas will be most welcome. [2694-042 (2009) : 69]
E Applications received after this date will not be considered [2728-023 (2009) : 62]
E Applications to work on a consultancy basis will be considered from strong candidates. [2702-020 (2009) : 55]
E Applications will be handled in strictest confidence [2689-033 (2009) : 59]
E Applications will close when suitable candidates are found. [2698-062 (2009) : 73]
E Applications will close when suitable candidates are found. [2702-059 (2009) : 70]
E Appointees will also have the opportunity to contribute to the multidisciplinary Energy Futures Lab and the Grantham Institute for Climate Change and to work closely with scientists and engineers in Shell and Qatar Petroleum. [2698-011 (2009) : 53]
E Appointment will be made on merit. [2733-039 (2009) : 74]
E Appointment will be made on merit. [2733-046 (2009) : 76]
E Appointments will be made to the posts of Chair Engineering [2694-042 (2009) : 69]
E Appointments will be made to the posts of Lecturer/Research Fellow. [2694-042 (2009) : 69]
E Appointments will be made within the following salary range: [2694-042 (2009) : 69]
E Appointments will be renewable for not more than a further four years. [2694-020 (2009) : 60]
E As a member, you’ll benefit from professional career advice and support to help you fulfil your potential. [2702-003 (2009) : 11]
E As a member, you’ll benefit from professional career advice and support to help you fulfil your potential. [2711-001 (2009) : 13]
E as full training will be given. [2728-027 (2009) : 64]
E As part of the Council’s Equal Opportunities policy, consideration will be given to applicants returning to science following a career break. [2728-025 (2009) : 63]

E As part of TRANSEC’s Research, Analysis and Development team you will play a key part in delivering an innovative research programme aimed at protecting our transport networks from the most serious terrorist threats. [2724-020 (2009) : 59]
As people who contract malaria despite being vaccinated will experience milder symptoms and are much less able to spread the parasite to uninfected mosquitoes, so reducing transmission of the disease. [2728-004 (2009) : 52-53]

As this post is funded by the Natural Environment Research Council (NERC), it will be offered for a period of up to 30 months. [2724-040 (2009) : 67]

As well as a competitive salary, you will also have the chance to join our generous pension scheme, 27 days’ annual leave plus 10.5 days’ public and privilege holidays, flexible working hours, and excellent on-site facilities. [2715-017 (2009) : 58]

At the Institute of Physics, you’ll find all the stimulation you need to exercise your mind, captivate your imagination and satisfy your curiosity. [2724-002 (2009) : 15]

Based in Stevenage (Hertfordshire), as well as a competitive salary you’ll be eligible to participate in our discretionary bonus scheme, be eligible for medical insurance, contributory pension scheme, life assurance and 23+ days holiday. [2706-003 (2009) : 48]

Based on academic attainment the appointment will be in one of the following three bands: UCL Grade 7, £32,458 - £35,469 pa (lecturer A), UCL Grade 8, £36,532 - £43,622 pa (lecturer B) or UCL Grade 9, £47,666 - £52,086 pa (senior lecturer). [2711-038 (2009) : 62]

Candidates should ideally hold a degree in a related biological science, although less qualified candidates with appropriate experience will be considered. [2737-015 (2009) : 59]

Candidates with outstanding scientific track record in any related field will be considered, but preference may be given to applicants working on animal population biology and/or natural host-parasite systems. [2733-009 (2009) : 63]

Candidates with outstanding scientific track record in the general field of plant ecology will also be considered, but preference may be given to candidates working on plant population or community ecology. [2733-009 (2009) : 63]

Candidates with relevant experience, recent graduates/Ph.Ds or students who will be graduating in the summer of 2009 are all encouraged to apply. [2694-039 (2009) : 67]

Clearly, the tussle between multinationals and national regulators won’t go away any time soon. [2728-004 (2009) : 52-53]

Closing date for applications (CV plus covering letter) will be April 24th 2009. [2702-051 (2009) : 68]

Closing date for applications will be 30 September 2009. [2724-009 (2009) : 53]

Commencing in September 2009, the LRMI doctorates will be for a duration of four years. [2706-043 (2009) : 63]

</tbody>
</table>
For these posts, applications **will** be most welcome from those with research expertise related or complementary to existing materials research at Exeter. [2694-042 (2009) : 69]

Forensic Science knowledge and experience is an advantage but not essential as full training **will be given** to the right candidate [2715-033 (2009) : 63]

Full training **will be provided** in state-of-art technologies, including mass spectrometry (LC-MS) and bioinformatics. [2711-051 (2009) : 67]

Funded by the UK Stem Cell Foundation (UKSCF) in association with the London Regenerative Medicine Network (LRMN), the London Regenerative Medicine Initiative (LRMI) **will** fund a cohort of five doctoral training studentships under the EPSRC Industrial Doctoral Training Scheme leading to the award of a prestigious Engineering Doctorate (EngD) degree. [2706-043 (2009) : 63]

Generous relocation assistance **will be available** for all of these posts. [2694-042 (2009) : 69]

Hosted at the John Innes Centre on the Norwich Research Park, TGAC **will** establish a sequencing platform to deliver new reference genome resources and data for comparative and functional genomics studies and a bioinformatics platform for data analyses. [2698-019 (2009) : 57]

however if you are successful at this stage, we **will** contact you to arrange a first interview. [2694-009 (2009) : 55]

however if you are successful at this stage, we **will** contact you to arrange a first interview. [2694-039 (2009) : 67]

however, applicants with a laboratory Technician's Diploma and suitable experience **will be considered.** [2698-037 (2009) : 63]

however, this is not essential as full on-the-job training **will be provided.** [2733-019 (2009) : 67]

If this sounds like an environment which **would** bring out the very best in you, where innovative thinking, a ‘can do’ attitude and your passion for forensic science **will command** respect and if you enjoy working directly with a variety of law enforcement customers then please email your CV and a covering letter indicating which role you are suitable for to: [2706-008 (2009) : 49]

If you are a disabled applicant meeting the minimum criteria, we **will guarantee** you an interview. [2702-027 (2009) : 60]

If you are a disabled applicant meeting the minimum criteria, we **will guarantee** you an interview. [2715-012 (2009) : 55]

In 2009, Diamond **will** bring into operation a world leading facility for x-ray tomography. [2689-003 (2009) : 46]

In addition to a strong track record in synchrotron research and radiation science and an in depth knowledge of beamline design, we **'ll** be impressed by your ability to solve problems quickly, engage others and develop your team. [2702-037 (2009) : 64]

In return you **'ll** be able to enjoy working as part of a multi-disciplinary team in a stimulating environment, with a competitive salary package and a dedicated mentor to steer your career development. [2711-012 (2009) : 55]

In return, we **'ll** provide you with a generous package, including a significant relocation allowance, industry leading support and real scope for progression. [2694-019 (2009) : 59]

In the future, the University of Luxembourg **will** base the Faculty of Sciences, technology and Communication and the Faculty of Language and Literature, Humanities, Arts and Education at its new site in the Esch/ Belval science complex. [2698-056 (2009) : 71]

In this doctoral programme students **will** take an introductory Masters year before deciding on their substantive Ph.D. project to pursue in years 2-4. [2694-057 (2009) : 75]

In this new, high-profile position, you **will** play a key role in defining and refining the top-level strategy focused on harnessing the immune system in order to identify novel cancer immunotherapies. [2689-021 (2009) : 54]

Interest and/or experience in linear programming, optimisation, network simulation and web interface development are desirable, but not essential as tuition in the relevant skills **will be provided.** [2715-027 (2009) : 61]

Interviewing **will take place** on 11 and 13 May 2009. [2706-019 (2009) : 54]

Interviews for candidates shortlisted **will be held** in London in mid May. [2702-041 (2009) : 65]

Interviews **will be held** at NERC Headquarters in Swindon on Friday 20th March 2009. [2694-036 (2009) : 66]
It's rare that a commercial corporation can stand up and announce new science that will transform an industry. [2728-030 (2009) : 66]

It is also anticipated that core GSK technologies will be applied to the project where appropriate. [2724-053 (2009) : 71]

It is expected that the joint venture company will be in place and ready to move forward with the next stage of the development by May 2010. [2719-014 (2009) : 54]

It is funded by the Wellcome Trust, currently until 31 March 2011, but with the expectation that funding will continue to be renewed every five years. [2711-040 (2009) : 64]

It will appeal equally to recent graduates and those already working in public or private sector health care whether in clinical or managerial roles. [2694-056 (2009) : 74]

It will be founded in the study of complex non-linear systems while providing a basis for the interpretation of climate models as an input to a wide range of societal decisions. [2733-041 (2009) : 75]

It will be home to a University Technology Centre (UTC) on Steels established by the SKF Group (Sweden) and the University of Cambridge. [2698-044 (2009) : 67]

It will encompass areas of molecular biology, cell biology and biochemistry. [2737-013 (2009) : 57]

It will include contributing to the development of new initiatives and may involve working in partnership with other funders. [2728-017 (2009) : 60]

It will provide undulator radiation of both soft (200 - 2100 eV) and hard (2.1 - 20 keV) x-rays for a wide-range of experiments applying photoelectron spectroscopy, x-ray standing waves, photoelectron diffraction, near edge absorption spectroscopy, x-ray fluorescence spectroscopy and x-ray reflectivity. [2689-003 (2009) : 46]

It’s a prestigious opportunity where you’ll be a voice of authority right across the continent, influencing decision-making [2715-013 (2009) : 56]

Its infrared sensors and batteries will allow it to continue a search in darkness, when crewed flights would be brought to a halt. [2733-006 (2009) : 60-61]

It’s one of several big pharma labs and institutes operated in partnership with NGOs, where you will find opportunities to work on treatments for diseases such as malaria and sleeping sickness. [2728-004 (2009) : 52-53]

It is expected that the joint venture company will be in place and ready to move forward with the next stage of the development by May 2010. [2719-014 (2009) : 54]

It is funded by the Wellcome Trust, currently until 31 March 2011, but with the expectation that funding will continue to be renewed every five years. [2711-040 (2009) : 64]

[2689-003 (2009) : 46]
| E | Lesser experienced candidates with outstanding education and training will be considered [2719-017 (2009) : 55] |
| E | Many MRC CRTFs will eventually become research leaders in their own right. [2728-025 (2009) : 63] |
| E | MCZs together with existing protected area designations will form an ecologically coherent network of protected sites in the marine area [2715-016 (2009) : 57] |
| E | Meanwhile, those looking for a position in a commercial organisation may find that gaining industry-specific training will open many doors. [2702-005 (2009) : 46-47] |
| E | Meetings will be held not less than once a year and more frequently as circumstances dictate. [2694-020 (2009) : 60] |
| E | Members will receive £149 for each meeting attended. [2702-041 (2009) : 65] |
| E | More than 60 countries will be represented. [2698-001 (2009) : 4] |
| E | Natural England and the Joint Nature Conservation Committee are currently establishing the Regional Projects that will take this work forward. [2715-016 (2009) : 57] |
| E | NERC eligibility rules will apply. [2702-062 (2009) : 71] |
| E | Next spring, the team will be seeking out new talent to help design the next model, intended to circumnavigate the globe, powered by nothing but sunshine. [2733-006 (2009) : 60-61] |
| E | No previous editorial experience is necessary as full training will be provided, with objectives set to encourage career progression. [2702-028 (2009) : 60] |
| E | Non-executive members of the ROC will be paid at rate of £279 per day in-line with the current HPA daily rates for non-executive Board and sub committee members. [2694-020 (2009) : 60] |
| E | Novel protein constructs (`exopores'), which form the core of our technology, will be evaluated and optimized using in-house techniques. [2689-005 (2009) : 47] |
| E | Of course, candidates will have the opportunity to collaborate with the top scientists on cutting-edge research projects. [2698-056 (2009) : 71] |
| E | Often working on multiple projects, the positions will suit highly organised individuals with excellent skills in time management. [2728-029 (2009) : 65] |
| E | One of the biochemistry posts will be in Paediatric Clinical Biochemistry in Lothian and the second post based in Grampian or Tayside dependent upon the candidates preference. [2715-018 (2009) : 58] |
| E | Open evenings will be held on: [2694-045 (2009) : 70] |
| E | Others will pursue a predominantly clinical career, applying to clinical practice lasting insights that they have gained through their research training. [2728-025 (2009) : 63] |
| E | Our Police Science Strategy is crucial to the fight against crime and you’ll be right at the forefront of its development and implementation. [2719-027 (2009) : 59] |
| E | Particular conditions will be defined for making desirable types of carbon nanotubes, [2719-038 (2009) : 63] |
| E | Perfecting CCS won’t be easy, but we believe it is needed to tackle CO₂ emissions. [2737-002 (2009) : 15] |
| E | Ph.D. in Industrial Microbiology/Fermentation, Microbial Biochemistry, or Food Chemistry/Science is preferred. A MS degree with significant experience in relevant area(s) will be considered [2719-017 (2009) : 55] |
Please be aware that all 3rd party applications **will be forwarded** to Reed Scientific. [2724-010 (2009) : 54]

Please note CV's in isolation or incomplete application forms **will not be accepted.** [2715-028 (2009) : 61]

Previous COSHH experience an advantage but not essential as full training **will be given.** [2711-025 (2009) : 59]

Previous experience of ADInstruments hardware and software is an advantage but not essential as full training **will be provided.** [2719-005 (2009) : 48]

Prize lectures awarded in 2009 **will be delivered** in 2010. [2689-001 (2009) : 11]

Previous COSHH experience an advantage but not essential as full training **will be given.**

Projects will usually have international scope and financial responsibility up to USD 3-5 Mio. [2719-038 (2009) : 57]

Reasonable travelling expenses **will be paid** at Department of Health rates. [2702-041 (2009) : 65]

Recently qualified candidates, with the desire to develop in a fast moving commercially focussed environment, **will also be considered.** [2694-011 (2009) : 56]

Remuneration **will be attractive** at the EPSRC studentship rate with an additional industrial top-up. [2719-038 (2009) : 63]

Research **will focus on** the effects of various bacterial antigens (e.g. cholera toxin) on immune cells with a view to delineating their interactions with the human immune system. [2728-029 (2009) : 65]

Salary and social benefits **will conform to the provisions of the Collective Agreement for the German Civil Service (TVSD).** [2719-025 (2009) : 59]

Salary for for all positions **will be dependent on** relevant qualifications and experience, [2719-005 (2009) : 48]

Salary **will be £44,930 per annum.** [2698-059 (2009) : 72]

Salary **will be at the appropriate point on the Grade 6 scale (£29,704 - £32,458 per annum), with placement according to qualifications and experience.** [2724-040 (2009) : 67]

Salary **will be at the appropriate point on the Grade 8 salary scale (£44,930 - £52,086 per annum), with placement according to qualifications and experience.** [2728-036 (2009) : 68]

Salary **will be offered within the Grade 5 salary scale currently ranging from £27,946 - £32,027 per annum inclusive of £2,323 London Allowance, subject to skills, knowledge and experience.** [2728-036 (2009) : 68]

Salary **will be offered within the Grade 6 salary scale currently ranging from £32,917 - £38,855 per annum inclusive of £2,323 London Allowance, subject to skills, knowledge and experience.** [2728-017 (2009) : 60]

Salary **will be on a scale from £30,000 per annum depending on experience** [2728-017 (2009) : 60]

Salary **will be on the research scale and in the range £25,829 to £32,365 (plus LW).** [2689-008 (2009) : 48]

Salary, depending on qualifications and experience, **will be within the range:** [2689-026 (2009) : 57]

Selected candidates **will be paid** by the University of Luxembourg and have medical, dental and vision benefits provided for them and their families by ISB. [2698-056 (2009) : 71]

Shortlisted applicants **will be contacted** within three weeks of the closing date, after which you **must assume** that on this occasion your application has been unsuccessful. [2694-011 (2009) : 56]

Significant funding for research staff, studentships and equipment **will be available.** [2698-011 (2009) : 53]

Solutions and accurate predictions of climate change **will evolve** from a good understanding of both components. [2702-045 (2009) : 66]

Space School UK and Senior Space School UK **will be celebrating a 10th Anniversary** at the University of Leicester this summer. [2702-058 (2009) : 70]
St Paul's salary scale is substantially above the national scale and subsidised accommodation will be provided if required. [2733-048 (2009) : 76]

Starting salary will be £26,222 per annum inclusive. [2694-050 (2009) : 72]

Starting salary will be in the range £33,492 - £35,355 per annum inclusive of London Allowance. [2728-033 (2009) : 67]

Stipend will be £15,750 - £17,000 p.a. [2711-051 (2009) : 67]

Students will also have the opportunity to design and undertake a research project in a field of their own choice. [2694-056 (2009) : 74]

Starting salary will be £26,222 per annum inclusive. [2694-050 (2009) : 72]

Students will undergo a taught programme of research training in scientific, societal and business aspects of sustainability individually tailored to their Ph.D. research project. [2698-050 (2009) : 72]

Students will be registered through a School of Study at UEA. [2698-065 (2009) : 74]

Students will gain experience of several of the constituent disciplines of Pharmacy before embarking on their Ph.D. project and we hope to appoint high calibre students to these positions. [2689-034 (2009) : 60]

Students will learn about the cutting-edge research methods and techniques used to advance our understanding of this disease and design better treatment strategies. [2689-037 (2009) : 61]

Students will obtain a Home Office licence and carry out two in vivo laboratory based projects in Year 1 (MRes). [2694-057 (2009) : 75]

Subject to EPSRC eligibility, the EngD Research Engineer will receive a tax-free stipend in excess of £18,000. [2719-031 (2009) : 60]

Successful applicants will be contacted within 4 weeks. [2694-032 (2009) : 64]

Successful applicants will work in a highly stimulating research environment. [2733-011 (2009) : 64]

Successful candidates will be encouraged to maintain contact with the academic, industrial, hospital or community pharmacy sectors. [2728-035 (2009) : 68]

Successful candidates will be selected solely on their ability to carry out the duties of the post. [2698-010 (2009) : 52]

Technologies that will help to replace existing power supplies with low-carbon alternatives [2719-002 (2009) : 16]

Testing will take place on 7 and 8 May 2009. [2706-019 (2009) : 54]

TGAC will also foster collaborations with industry to promote practical applications of genomic science. [2698-019 (2009) : 57]

that will be extremely influential at national level and have a genuine impact on the environment. [2694-025 (2009) : 62]

that will complement ongoing research in the Environment Plant Interactions Programme at SCRI. [2698-054 (2009) : 70]

that will complement ongoing research in the Environment Plant Interactions Programme at SCRI. [2698-054 (2009) : 70]

that will contribute to achieving the Government's vision of, 'Clean, safe, healthy, productive and biologically diverse oceans and seas'. [2715-016 (2009) : 57]

that will help to keep 800 million people safe. [2715-013 (2009) : 56]

that will produce a state-of-the-art instrument for the users of synchrotron tomography. [2689-003 (2009) : 46]

The 4 year Studentship will cover Home/EU tuition fees and maintenance at an enhanced rate, in the region of £16,600 per annum. [2733-051 (2009) : 78]

The above positions will be based at our Fermentation Center of Excellence in Au, Germany (Bavaria). [2719-017 (2009) : 55]

The Account Executive will work within a small, friendly and entrepreneurial team. [2733-019 (2009) : 67]

The Advanced Space Concepts Laboratory will conduct a five year programme of frontier research on visionary space systems. [2698-052 (2009) : 70]

The application deadline is October 15, 2009; up to eight awards will be granted in 2010. [2715-043 (2009) : 65]

The appointee will work with Professor Nick Tyler (who heads the ARG) [2711-034 (2009) : 62]
The appointee will work with Professor Stuart Robson to build upon an international reputation for excellence in basic and applied research in the non-contact measurement technologies at scales from the micron to planet level. [2711-033 (2009) : 62]

The appointment will be as a Senior Research Fellow or a Senior Lecturer depending on your experience. [2702-047 (2009) : 67]

The appointment will be for a fixed-term of 5 years initially. [2737-025 (2009) : 66]

The appointment will be for a term of four years with the possibility of one additional four-year appointment. [2689-022 (2009) : 54]

The appointment will be from June 2009, or as soon as possible thereafter. [2698-044 (2009) : 67]

The BDM will be the prime mover behind the implementation of each of these plans. [2728-021 (2009) : 61]

The BDMs will be embedded within these operating Departments [2728-021 (2009) : 61]

The best design solution will be guided by results of surface studies as a function of storage environment for various candidate materials. [2689-020 (2009) : 53]

The BIO Business Forum will host more than 14,000 partnering meetings among 1,500 business development and financial professionals. [2698-001 (2009) : 4]

The BIO Business Forum will host more than 14,000 partnering meetings among 1,500 business development and financial professionals. [2702-001 (2009) : 2]

The candidate will gain on-the-job experience in many different aspects associated with the production of high-quality science journals, such as managing the scientific peer-review system of articles, editing and preparing manuscripts for content management, writing scientific news, development of journal content, coordination of freelance work as well as compiling marketing materials. [2733-029 (2009) : 71]

The chair will be appointed by the HPA Board Chairman from one of the two independent committee members. [2694-020 (2009) : 60]

The closing date for applications is Friday 13 November and interviews will be held on Wednesday 25 November 2009. [2733-040 (2009) : 74]

The closing date for completed applications is 28 February 2009 and it is proposed that interviews will take place during week commencing 9 March 2009. [2694-047 (2009) : 71]

The Collaborative Centre of Excellence in Understanding and Managing Natural and Environmental Risks is a newly-funded strategic partnership between the Research Councils and the Department for Environment, Food and Rural Affairs. Based at Cranfield University, and working collaboratively across the remit of its funders, the Centre will provide a world-leading evidence base for risk-informed policy development within Defra and other government departments. [2689-029 (2009) : 58]

The committee will comprise three non-executive members. [2694-020 (2009) : 60]

The contract is based on a 3-day per week fixed term, will primarily be home-based within the UK, with occasional client meetings in Cambridge and London. [2702-023 (2009) : 57]

The CSBL will be an autonomous, highly interdisciplinary unit within the University of Luxembourg [2689-033 (2009) : 59]

The decision to call additional meetings will be taken by the committee chair. [2694-020 (2009) : 60]

The delivery of carbon to growing nanotubes will be explored theoretically and with a variety of modern techniques including high resolution electron microscopy. [2719-038 (2009) : 63]

The first year of graduate study will be undertaken in at least two different laboratories in one of the research themes listed below. [2702-056 (2009) : 70]

The initial appointment will be permanent pending a successful probation period of 11 months. [2724-031 (2009) : 63]

The Knowledge Transfer Partnership is a shared venture with Cardiff University and will be jointly supervised by Professor Andy Sewell (www.tcells.org). [2737-015 (2009) : 59]

The laboratory is well equipped with automated high throughput sequence and real time technologies and automated extraction facilities and will be moving to a state of the art new pathology building Sept 2009. [2719-029 (2009) : 60]
| E | The length of the funding associated with this post will allow you to establish a reputation in the field. [2698-047 (2009) : 68] |
| E | The location of the post will be dependent on the successful applicant's home location. [2711-013 (2009) : 55] |
| E | The meeting will synthesise our understanding of the evolution of social behaviour and cooperation in microorganisms, invertebrates, vertebrates and man, providing a unified conceptual overview of the mechanisms involved in the evolution of societies, the causes of variation in their structure, the contrasts and similarities between the processes operating in animals and man and the principal questions still unresolved. [2689-002 (2009) : 15] |
| E | The members of the committee will act independently of the HPA and HPA Board. [2694-020 (2009) : 60] |
| E | The MRC places great importance on the protection and exploitation of its intellectual property and the appointee will play a key part in ensuring MRC's aims are met. [2711-028 (2009) : 60] |
| E | The next studentships will be starting in September 2009. [2694-052 (2009) : 73] |
| E | The panel will open discussion on these and similar questions. [2698-002 (2009) : 13] |
| E | The PDRAs will be based within leading research groups in the Universities of Hull, Leeds, Sheffield and York working across four multi-disciplinary/university projects. [2733-038 (2009) : 74] |
| E | The person appointed will spend up to 3 months per year in Sendai. [2698-062 (2009) : 73] |
| E | The Policy Officer will play a key role in developing Academy positions on the many public policy issues that involve the biomedical sciences. [2711-006 (2009) : 52] |
| E | The position is offered as a part time consultancy contract, will primarily be home based, with client meetings in Cambridge and London. [2737-021 (2009) : 63] |
| E | The position will be office based in north London [2733-033 (2009) : 72] |
| E | The position will provide you with comprehensive training in all aspects of Drug Master Files and other regulatory documents and is an ideal opportunity to develop a career in Regulatory Affairs. [2706-003 (2009) : 48] |
| E | The post is funded by the Medical Research Council and will be based within the Paterson Institute for Cancer Research. [2737-022 (2009) : 64] |
| E | The post of Secretary to the International Whaling Commission (IWC) will fall vacant in July/August 2010. [2728-031 (2009) : 66] |
| E | The post will be based at both NHS Blood and Transplant and the Health Protection Agency, both of which are within close proximity to Colindale tube station. [2702-030 (2009) : 61] |
| E | The post will be based within the MRC Cambridge Centre, which provides administrative and technical infrastructure support to the eight MRC research establishments in the Cambridge region covering a wide range of the MRC’s research activities, including those renowned for pioneering work in molecular biology and for the application of basic research to medicine and the commercial sector. [2711-028 (2009) : 60] |
| E | The post will be for a two year period with the possibility of a permanent position for the right candidate. [2689-008 (2009) : 48] |
| E | The post will be in the field of Homogeneous Catalysis. [2733-047 (2009) : 76] |
| E | The post will be located at our Harrogate or Derby UK offices [2706-005 (2009) : 48] |
| E | The post will focus on management of productive relationships between the University and external partners building on York's research strengths. [2698-059 (2009) : 72] |
| E | The post will provide an exceptional opportunity for a chemistry, pharmacy or similar academic with a proven research track record and teaching experience to further advance their career. [2728-035 (2009) : 68] |
| E | The post will provide an exceptional opportunity for a pharmacy-related academic with a proven research track record and teaching experience to further advance their career in our thriving pharmaceutics team. [2728-035 (2009) : 68] |
| E | The postholder will work within the International Project Office (IPO) of SOLAS to implement the project (see http://www.SOLAS-int.org). [2715-038 (2009) : 64] |
| E | The posts will be for three years in the first instance, with the possibility of extension; a secondment for a minimum of one year would be considered. [2733-022 (2009) : 68] |
The precise role and the commensurate salary will depend on the skills and experience that the successful individual can bring to the team. [2724-008 (2009) : 53]

The professorships will be equipped with a generous personnel and operational budget. [2733-009 (2009) : 63]

The programme will equip you to work effectively in a wide range of roles in environmental consultancy, government, NGOs, business or education. [2694-055 (2009) : 74]

The project will be based in the School of Biological Sciences at the University of Aberdeen and at the Macaulay Institute, Aberdeen. [2724-040 (2009) : 67]

The project will be based in the Smith Building within the University's South Campus in central Manchester. [2694-048 (2009) : 72]

The programme will equip you to work effectively in a wide range of roles in environmental consultancy, government, NGOs, business or education. [2694-055 (2009) : 74]

The project will involve microbiological, molecular, and immunological approaches in vivo and in vitro [2698-068 (2009) : 75]

The project will measure $^{13}$C natural abundances of soil- and root-derived CO$_2$ at forest sites in Italy, Germany and Finland and relate the resulting CO$_2$ fluxes to climatic variables. [2724-040 (2009) : 67]

The projects arise from collaborations between scientists from at least two NRP institutions and students will be registered with the University of East Anglia. [2733-051 (2009) : 78]

The quorum will be two members, at least one of which should be an independent HPA committee member. [2694-020 (2009) : 60]

The research activities will be focused on the studies of structural, chemical, electronic and magnetic properties of surfaces, interfaces and thin films. [2689-003 (2009) : 46]

The Research Council's Nanoscience programme is led by the Engineering and Physical Sciences Research Council (EPSRC) and will commit £39 million to the area over the period 2008/09 to 2010/11. [2702-039 (2009) : 65]

The research of the Centre will focus on three main areas: methods of producing graphene and nano-structured graphene systems; experimental and theoretical studies of graphene structures and devices; development of new graphene-based electronic devices and sensors. [2694-042 (2009) : 69]

The research project will use scanning probe microscopy techniques, such as high-resolution Scanning Kelvin Probe Microscopy, to investigate the charge transport and photoconductive properties of organic semiconductors on a molecular length scale. [2724-042 (2009) : 68]

The research will bridge between the characterization of plant root exudates, soil process studies and molecular biological approaches to determine microbial community structure and activity. [2698-054 (2009) : 70]

The salary for the role will be within the range of £32,477 - £38,242 inclusive of London Allowance. [2711-045 (2009) : 65]

The salary for this position will be up to £35,000. [2715-039 (2009) : 64]

The salary is negotiable and will be commensurate with your experience and qualifications. [2711-014 (2009) : 55]

The salary is negotiable and will be commensurate with your experience and qualifications. [2724-013 (2009) : 55]

The salary will include an incremental raise for each subsequent year. [2719-035 (2009) : 62]

The salary, depending on experience will be £35,000 - £50,000 per annum. [2698-045 (2009) : 67]

The scientific areas in which we will offer research projects cover a broad spectrum of chemical sciences relating to issues of sustainability including: [2698-008 (2009) : 51]

The Secretary of State for Business, Innovation and Skills will appoint members to the Councils on merit after considering advice from the Appointments Panels. [2733-030 (2009) : 71]

The selection process will be completed by the end of January 2010. [2733-051 (2009) : 78]

The starting salary for the post will be in the range £35,635 to £43,614 (pro rata) depending on qualifications and experience. [2711-028 (2009) : 60]

The stipend will be up to £15,290 per year and studentships are tenable for a maximum of four years, subject to annual progress review. [2694-057 (2009) : 75]

The student will join a large group of fibrosis researchers in Newcastle that span multiple organ systems. [2724-053 (2009) : 71]
<p>| E | The studentship <em>will be based</em> at the Veterinary Laboratories Agency (VLA) Weybridge with some time at the Health Protection Agency (Porton Down) and the University of Southampton (Prof. Peter Atkinson). [2733-049 (2009) : 77] |
| E | The successful applicant <em>will</em> be able to take advantage of the University's excellent staff training opportunities. [2724-041 (2009) : 68] |
| E | The successful applicant <em>will be awarded</em> a grant worth up to 1 million euros for a five year period, in order to set up a research group in a German research institution or university. [2706-038 (2009) : 61] |
| E | The successful applicant <em>will</em> play a major role in the design and development of novel surgical robot devices. [2694-015 (2009) : 57] |
| E | The successful applicant <em>will</em> play a major role in the future development and success of the University's research in nutrition and health. [2711-042 (2009) : 64] |
| E | The successful candidate <em>will be based</em> at Sony Computer Entertainment's European Headquarters in London, which is responsible for the sales, marketing and distribution of PlayStation products in 109 countries world-wide. [2719-031 (2009) : 60] |
| E | The successful candidate <em>will commence</em> their EngD in September. [2719-031 (2009) : 60] |
| E | The successful candidate <em>will</em> have access to resources from the University and from competitive third parties to accomplish the ambitious goals of the establishment and development of a visible centre of true excellence in research related to the systems biology of human disease. [2689-033 (2009) : 59] |
| E | The successful candidate <em>will join</em> a team of neuroscientists studying hearing and neurodegeneration located in the MRC Toxicology Unit. [2702-049 (2009) : 67] |
| E | The successful candidates for the newly established posts <em>will</em> spearhead research initiatives associated with the projects [2733-046 (2009) : 76] |
| E | The successful candidates <em>will be offered</em> a Max Planck Research Group Leader position for a period of five years (W2; equivalent to associate professor level) including a five-year grant (research positions, budget, investments) at a Max Planck Institute of their choice. [2728-026 (2009) : 64] |
| E | The successful student <em>will be based</em> at King’s College London [2702-051 (2009) : 68] |
| E | The third <em>will</em> be a non-executive member of the HPA Board. [2694-020 (2009) : 60] |
| E | The UK south position <em>will be based</em> out of our offices in Oxfordshire. [2719-005 (2009) : 48] |
| E | The UKSCF - LRMI awards <em>will</em> cover fees and student stipends at £19,363 (tax free) per annum with EPSRC providing full tuition and training support. [2706-043 (2009) : 63] |
| E | The University of Exeter is an equal opportunity employer and promotes diversity in its workforce and, whilst all applicants <em>will be judged</em> on merit alone, is particularly keen to consider applications from groups underrepresented in the workforce. [2694-042 (2009) : 69] |
| E | The University of Luxembourg is funding 12 research assignments at ISB to enhance collaboration, develop new techniques and methods and transfer knowledge between the institutions that <em>will</em> have an important effect on the future of health care. [2698-056 (2009) : 71] |
| E | The University <em>will actively foster</em> a culture of inclusion and diversity [2689-035 (2009) : 60] |
| E | The University <em>will actively foster</em> a culture of inclusion and diversity [2694-044 (2009) : 70] |
| E | The University <em>will actively foster</em> a culture of inclusion and diversity [2694-048 (2009) : 72] |
| E | The University <em>will actively foster</em> a culture of inclusion and diversity [2698-047 (2009) : 68] |
| E | The University <em>will actively foster</em> a culture of inclusion and diversity [2702-054 (2009) : 69] |
| E | The University <em>will actively foster</em> a culture of inclusion and diversity [2715-032 (2009) : 62] |
| E | The University <em>will actively foster</em> a culture of inclusion and diversity [2724-043 (2009) : 68] |
| E | The University <em>will actively foster</em> a culture of inclusion and diversity [2733-022 (2009) : 64] |
| E | The winner <em>will receive</em> $75,000 USD [2724-003 (2009) : 22] |
| E | The work of the Panel <em>will begin</em> in November 2009 and is expected to conclude, subject to review, in October 2011. [2715-016 (2009) : 57] |
| E | The Worldwide Antimalarial Resistance Network (WWARN), funded by the Bill &amp; Melinda Gates Foundation, <em>will</em> set up a global drug resistance information resource so that more of the right drugs can get to the right people at the right time. [2724-047 (2009) : 70] |
| E | The WWARN Project Manager is a new role, which <em>will</em> be key to the successful establishment of the Worldwide Antimalarial Resistance Network. [2724-047 (2009) : 70] |
| E | There <em>will</em> be a particular emphasis on nurturing business-oriented innovation. [2698-019 (2009) : 57] |</p>

<td>This new multi-disciplinary programme <strong>will</strong> provide high-level training in all aspects of carbon capture and storage, as well as an overview of global carbon management. [2724-005 (2009) : 52]</td>
</tr>
</tbody>
</table>
This post is for a fixed term period of 1 year and the successful applicant will be based in Liverpool but may be required to travel internationally as required by the needs of the CIDG. [2698-060 (2009) : 72]

This post will be based at Immunocore, [2737-015 (2009) : 59]

This post will be offered for a period of five years. [2702-047 (2009) : 67]

This post will be offered on a fixed-term contract for a period of 31 months. [2698-053 (2009) : 70]

This post will be based in Liverpool but may be required to travel internationally as required by the needs of the CIDG.

[2698-047 (2009) : 68]

This post will suit a highly talented researcher with postdoctoral experience. [2715-037 (2009) : 64]

This post will be offered for a period of five years. [2702-047 (2009) : 67]

This post will be offered on a fixed-term contract for a period of 31 months. [2698-053 (2009) : 70]

This post will be under the direct supervision of Professor Ashley Woodcock and Dr Jacky Smith. [2698-047 (2009) : 68]

This post will suit a highly talented researcher with postdoctoral experience. [2715-037 (2009) : 64]

This prestigious studentship will be based in the Organic Geochemistry Unit of the School of Chemistry. [2719-039 (2009) : 63]

This programme of research will study the cell and molecular biology of utero-placental cells from pregnancies at high risk of developing the pregnancy disorder pre-eclampsia. [2711-045 (2009) : 65]

This project in the group of Professor Henning Sirringhaus will aim to improve the charge carrier mobility of polymer semiconductors by making better use of the fast intrachain transport along the polymer backbone. [2724-039 (2009) : 67]

This project in the group of Professor Henning Sirringhaus will develop new optical spectroscopy techniques to study the molecular-scale processes that govern the charge transport physics of high-mobility organic semiconductors in transistor structures. [2724-039 (2009) : 67]

This project in the group of Professor Neil Greenham will investigate the properties of polymer semiconductor devices under high pressure, allowing the effect of intermolecular interactions on charge transport and optical properties to be studied. [2724-039 (2009) : 67]

This project will elucidate the mechanisms of carbon nanotube formation from gaseous hydrocarbons using metal catalysts. [2719-038 (2009) : 63]

This project will focus on the newly described PDLIM2 protein which acts at the cytoskeleton to regulate cell migration and in the nucleus to regulate transcription factor activity. [2698-058 (2009) : 72]

This role will suit a recent graduate. [2728-027 (2009) : 64]

This Studentship is only available to EU citizens, and full tuition fees and a standard Ph.D. stipend will be provided. [2698-068 (2009) : 75]

This summer we will appoint four new members. [2702-041 (2009) : 65]

This varied role will allow you to experience all aspects of the Editorial process, specifically: [2702-028 (2009) : 60]

This varied role will allow you to experience all aspects of the Editorial process, specifically: [2737-007 (2009) : 56]

This role will be a one year contract in the first instance. [2733-033 (2009) : 72]

This will be for an initial period of nine months or until the return of the substantive post holder, whichever is the sooner. [2728-036 (2009) : 68]

Those entering with an MSc will be encouraged to follow a programme which includes doctoral research. [2694-016 (2009) : 58]

Three of the appointments will be part of a new Centre for Graphene Science being established in a collaboration between the Universities of Exeter and Bath following the award of a £5 million grant from the EPSRC / HEFCE ‘Science and Innovation Awards’ scheme. [2694-042 (2009) : 69]

Three Research Fellows (JA/R14/2009) will be appointed to lead programmes of research. [2698-052 (2009) : 70]

To advance this programme, the BIPM will create a bank of new 1 kg artefacts whose physical properties and surface finish are optimised for mass stability at the part in 10^9 level. [2689-020 (2009) : 53]

To explore a new beginning, please visit www.edenbiodesign.com where you will find more information on all of the above roles. [2728-011 (2009) : 57]

To see how Roche will advance your career, visit our company today at http://careers.roche.com. [2702-006 (2009) : 48]

Trainees will work from a base hospital approved for training within Scotland to FRCPath standard and is not predetermined for Microbiology. [2715-018 (2009) : 58]

Training will be provided for candidates who do not hold a Home Office Licence. [2715-035 (2009) : 63]
| E | Training, as required, **will be provided** in the form of formal courses and on-the-job tuition. [2733-021 (2009) : 67] |
| E | Two day interviews **will be scheduled** between 26 November and 1 December 2009 [2728-023 (2009) : 62] |
| E | two of whom **will be completely independent** of the HPA. [2694-020 (2009) : 60] |
| E | Using functional genomics approaches we **will obtain** quantitative time courses of transcription and epigenetic states genome-wide in well-defined mouse differentiation systems. [2733-011 (2009) : 64] |
| E | We aim to provide a progressive, dynamic environment which **will deliver** an outstanding learning experience drawing upon leading-edge teaching methods and the latest research advances. [2689-026 (2009) : 57] |
| E | We are currently looking for three Research Scientists (two of the posts **will be** 12 month fixed-term contracts [2724-024 (2009) : 61] |
| E | We are looking to appoint eight members of the Panel and a Chair to take forward this important work. Collectively the panel **will combine** a range of relevant expertise. [2715-016 (2009) : 68] |
| E | We are looking to appoint three outstanding individuals to join the NOCRI team, which will **be based** within the NIHR Central Commissioning Facility located at the science-based company LGC in Teddington, Middlesex. [2733-022 (2009) : 68] |
| E | We are looking to recruit a high calibre international leader in the field and an attractive package **will be negotiated** with you including research support and facilities. [2737-028 (2009) : 66] |
| E | We have a vital role to play in the success of the UK’s Research Councils and so **will you**. [2698-041 (2009) : 65] |
| E | We invest in areas of scientific and technological development that **will place** the UK at the forefront of world innovation. [2737-017 (2009) : 61] |
| E | We offer a flexible and supportive working environment and with our Investors in People accreditation **will encourage** and support your continuing professional development. [2711-004 (People) : 51] |
| E | We welcome applications from candidates from a range of disciplines and experience and we **will be** recruiting into temporary and permanent positions. [2728-006 (2009) : 55] |
| E | We **will be holding** a Postgraduate Open Day on the 20th January 2010. [2733-052 (2009) : 78] |
| E | We **will consider** a range of candidates from new MSc or Ph.D. graduates to scientists with several years' postgraduate experience for this position. [2737-015 (2009) : 59] |
| E | We **will inform** you in detail of the related responsibilities, our contractual arrangements and attractive benefits (support in obtaining accommodation, reimbursement of removal costs, a competitive salary and a company pension scheme). [2702-010 (2009) : 50] |
| E | We **will inform** you in detail of the related responsibilities, our contractual arrangements and attractive benefits (support in obtaining accommodation, reimbursement of removal costs, a competitive salary and a company pension scheme). [2702-011 (2009) : 51] |
| E | We **will offer** the right candidate a competitive package with the opportunity for future career development. [2733-027 (2009) : 70] |
| E | We **will offer** you the opportunity to develop your skills in a dynamic and technically demanding environment. [2733-021 (2009) : 67] |
| E | We **particularly welcome** applications from researchers with experience in the area of nutrient-gene interactions in relation to obesity, CVD, metabolic disease, cancer or neurodegenerative disease. [2711-042 (2009) : 64] |
| E | We **will provide** line management supervision and developmental opportunities. [2706-026 (2009) : 57] |
| E | Whatever your aspirations, our programmes provide exceptional career-focused biological training that **will help** you stand out from the crowd. [2698-067 (2009) : 74] |
| E | Where appropriate, assistance with relocation expenses **will be available**. [2728-012 (2009) : 58] |
| E | Where they **will be employed** as Temporary Agents under article 2 a) of Conditions of Employment of Other Servants of the European Communities. [2698-022 (2009) : 58] |
| E | where you **will enjoy** day to day challenges and responsibilities. [2733-029 (2009) : 71] |
| E | whereupon you **will become** an independent Clinical Scientist working on both the routine and development aspects of radiotherapy physics. [2694-016 (2009) : 58] |
| E | With your commitment, drive and desire to influence people’s perception and understanding of science, you **will** relish the opportunity to join the Research Councils’ Science in Society team. [2698-041 (2009) : 65] |
| E | With your quality and long-term vision, we’ll tackle them. [2715-012 (2009) : 55] |
| E | Within the cooperation programme FOKUZ, ‘Fundamenteel Onderzoek Kust en Zee’ (Fundamental Research on Seas and Coasts), the two institutes **will** develop a joint research programme on the following topics: |
| E | Working alongside experts in related toxicology and metabolism disciplines, the successful candidates **will** have the opportunity to extend their own experience whilst making a critical contribution to the selection and development of new agrochemicals. [2694-003 (2009) : 52] |
| E | Working alongside experts in related toxicology and metabolism disciplines, the successful candidates **will** have the opportunity to develop their own expertise further whilst making a critical contribution to the selection and development of new agrochemicals. [2719-007 (2009) : 49] |
| E | Working as part of a team, you **will** play an integral part in providing theoretical and practical support in the formulation and process development of pharmaceutical products. [2728-016 (2009) : 59] |
| E | Working hours **will** be 37 per week excluding lunch breaks. [2698-012 (2009) : 54] |
| E | Working hours **will** be 37 per week excluding lunch breaks. [2719-020 (2009) : 58] |
| E | Working hours **will** be 37 per week excluding lunch breaks. [2728-018 (2009) : 60] |
| E | Working with Professor Richard Friend, this project is to develop a new ultrafast laser system that **will** be used to observe the transient optical absorption and photoluminescence of photoexcitations in organic semiconductor device structures. [2724-039 (2009) : 67] |
| E | Working with Professor Richard Friend, this project is to develop new heterojunction architectures for photovoltaic diodes that **will** optimise the long range separation of photogenerated charges. [2724-039 (2009) : 67] |
| E | You are expected to have an established international reputation for research in the area of homogeneous catalysis and **will** play a leadership role in building the CCI to become one of the leading centres for catalysis research in the world. [2733-047 (2009) : 76] |
| E | You **will** also enjoy the challenge of broadening your role to include related aspects of metabolism in other biological systems whilst maintaining your ADME focus. [2694-003 (2009) : 52] |
| E | You **will** also enjoy the opportunity of broadening your role to include related aspects of metabolism in other biological systems. Ideally, you have post-doctoral, or equivalent, experience in a field related to ADME or DMPK with a background in pharmacy, pharmacology, biological or medicinal chemistry. [2719-007 (2009) : 49] |
| E | You **will** also play a central role in ensuring our technology is fit for the future. [2737-012 (2009) : 57] |
| E | You **will** be appointed on the scale in accordance with NHS Blood and Transplant and NHS AfC policy. [2702-030 (2009) : 61] |
| E | You **will** be appointed on the scale in accordance with NHSBT and NHS AfC policy. [2706-031 (2009) : 59] |
| E | You **will** be based at Lancaster University and over the course of the internship gain hands-on experience and training as an Editorial Assistant involved in the publishing, promotion and development of a journal. [2724-048 (2009) : 70] |
| E | You **will** be based in the KCL Division of Imaging Sciences [2737-028 (2009) : 66] |
| E | You **will** be based in the Metabolism and Proteomics Group at the VLA-Weybridge site in Surrey. [2711-051 (2009) : 67] |
| E | You **will** be based predominantly in the Respiratory Research Group in the University Hospital South Manchester [2698-047 (2009) : 68] |
| E | You **will** be encouraged to contribute to research within the Faculty. [2698-049 (2009) : 68] |
| E | You **will** be initially based at the BGS Keyworth Office but may possibly be expected to move to the BGS Cardiff Office at some point in the future. [2698-012 (2009) : 54] |
| E | You **will** be part of the Oxford-based management team [2724-047 (2009) : 70] |
| E | You **will** be provided with extensive training [2689-017 (2009) : 52] |
| E | You **will** be working as part of an established team in Dermatological Sciences and have close affiliation to the Cancer Studies Research Group. [2702-054 (2009) : 69] |
You will contribute to the crucial Water Framework Directive (WFD) by providing data entry and technical support for the WFD measures database, in support of our objectives, measures and classification. [2724-016 (2009) : 58]

You will gain broad experience in the design, conduct and interpretation of xenobiotic metabolism studies in plants, animals and environmental systems. [2719-007 (2009) : 49]

You will have access to excellent benefits such as training through our Learning and Development programme and 6 weeks annual leave. [2706-019 (2009) : 54]

You will have opportunities to develop your professional as well as personal competencies via on-the-job and off-the-job training. [2702-010 (2009) : 50]

You will have opportunities to develop your professional as well as personal competencies via on-the-job and off-the-job training. [2702-011 (2009) : 51]

You will join a growing structural biology group, which has a particular focus on membrane protein structure determination. [2694-048 (2009) : 72]

You will join Professor Lesley Rhodes' team in the Photobiology Unit, Dermatological Sciences, based at Salford Royal Foundation (Hope) Hospital. [2698-047 (2009) : 68]

You will join the Technological Plasma Group, working on the development, operation and study of atmospheric pressure micro-plasma jet technology for applications in Life Science. [2698-007 (2009) : 51]

You will play a key role supporting the Hamlyn Robotic Centre and research portfolio in moving the Department and Division forward to achieving their strategic objectives and in assuring continued excellence in research. [2694-040 (2009) : 68]

You will play a lead role in portfolio evaluation at the Trust, ensuring high quality and timely analysis of specific areas of the Trust's work and funding schemes. [2702-024 (2009) : 57]

You will play a leading role in the assessment of contaminated land, waste and water environments and contribute to the delivery of a national chemicals advisory service and information network. [2702-033 (2009) : 63]

You will play a role in helping to develop innovative models and solutions to address barriers to successful translation. [2715-017 (2009) : 58]

You will receive focused, on-the-job editorial training from experienced staff [2733-029 (2009) : 71]

You will specialise in stream flow measurement, prediction, modelling or management. [2719-028 (2009) : 59]

You will take a leading role in the provision of DMPK support to project teams, defining the strategy and providing input into study design and data interpretation, with a particular emphasis on PK and PK/PD. [2694-005 (2009) : 53]

You will want to know about this opportunity with Chameleon, a leading global medical communications agency recruiting graduates for trainee positions in writing and project management. [2719-015 (2009) : 54]

You will join our Technical Projects team, which is responsible for project initiation, project management and supporting the uptake of project outputs - including the interpretation of model output. [2702-027 (2009) : 60]

Your research will improve our understanding of environmental pollutants and the risks they present to ecology, covering marine, freshwater and terrestrial environments. [2706-007 (2009) : 49]

Your salary will be determined by qualifications and experience, in addition MRCCT offers a final salary pension scheme, private health insurance and 28 days paid holiday per year. [2719-033 (2009) : 61]

Your salary will be determined by qualifications and experience, in addition MRCCT offers a final salary pension scheme, private health insurance and 28 days paid holiday per year. [2728-029 (2009) : 65]

YOUR SUPPORT WILL TACKLE CHALLENGES [2698-036 (2009) : 63]

Your vision will be a breath of fresh air [2694-025 (2009) : 62]

Your work will form a vital link between the SCAHT research projects and the regulatory community, helping to translate their findings into the risk assessment process. [2733-010 (2009) : 64]

Your work will influence everything from national policy to chemical discharge [2715-012 (2009) : 55]

### Annexe 7-4-1 Occurrences de PLAY A PART / ROLE dans CAEMS

#### 1971

1. Co However, the Polytechnic is in the process of organising a new Interdisciplinary degree under the aegis of the CNAA and the Reader will be expected to play a significant part in the design of new courses to meet the changing needs of students and of the modern technological development in the biological sciences. [772-027 (1971) : 55]
2. Co The appointed Lecturer will be expected to play a central part in investigating the role and effectiveness of radio and television as used by the University; [745-027 (1971) : 59]
3. E In this the effect of irrigation on soil micro-organism activity will play an important part. [754-061 (1971) : 603]
4. E The Company is committed to considerable expansion of new product development in much enlarged and attractive premises with excellent facilities and the successful applicant will fill a key part in strengthening the Development team. [772-031 (1971) : 55]

#### 1995

<p>| Co | and, under the relevant Manager, will play a substantive and creative role in carrying through the project/activity. [1959-057 (1995) : 59] |
| Co | Working as a Principal Research Scientist within our pre-clinical Research Department you’ll have a challenging role which will require skills of leadership and responsibility and the ability to interact effectively and successfully with colleagues and research professionals world-wide to achieve our goals. [1963-012 (1995) : 53] |
| E | All three posts will have a role in: [1984-016 (1995) : 58] |
| E | As an experienced bench scientist, you will play a key role in the process of compound progression, through the physico-chemical and biopharmaceutical assessment of new chemical entities, where attention to detail and a highly organised approach is desirable. [1967-043 (1995) : 75] |
| E | As Assistant Director, Clinical Research, you will fulfil a crucial role in this process, joining our central cardiopulmonary therapeutic team with responsibility for the successful planning and implementation of pivotal clinical studies in Europe, leading to the effective registration of new products in this expanding therapeutic area. [2006-002 (1995) : 59] |
| E | Based at the Kenya Agricultural Research Institute (KARI), Nairobi, you and your team will play a key role in helping to strengthen the capacity of KARI scientists and policy makers for research planning and the implementation of proposals, by increasing the effectiveness of their organisation’s library and information services. [1963-006 (1995) : 51] |
| E | Dedicated to safeguarding and improving the environment in England and Wales, we will shortly play a key role in the operations of the Environment Agency. [2002-057 (1995) : 72] |
| E | He or she will play an important role in defining and contributing to the new Environmental Geoscience BSc honours degree course. [1998-043 (1995) : 86] |
| E | Reporting to the Laboratory Manager you will play a key role in a dynamic laboratory handling a wide range of research and development projects. [1980-030 (1995) : 63] |
| E | Reporting to the Laboratory Manager you will play a key role in a dynamic laboratory handling a wide range of research &amp; development projects. [1989-013 (1995) : 61] |
| E | The candidate will have the opportunity to take an active role in the histopathology work of the department, with appropriate training. [1993-070 (1995) : 71] |
| E | The candidate will play a key role in the development of PCR assays and DNA probes for enteropathogenic species and genotypes of Campylobacter. [1959-007 (1995) : 46] |
| E | The successful applicant will play a key role in the development of new security print products, passports, ID cards and plastic cards. [1993-093 (1995) : 77] |
| E | The successful applicant will take the lead role in translating the Audit into practical projects and formal planning policies. [1980-012 (1995) : 58] |</p>

### 2005

<p>| Co | Being responsible for the development of a new biology facility within Tripos, you will require the knowledge to both develop this facility and take an active part in the day-to-day running of the screening capability, entailing interaction with medicinal chemists and using your practical hands-on experience of appropriate biochemical and cell based assay development, and screening of compounds using robust assays. [2502-015 (2005) : 60] |
| Co | Establishing liaison with and between award holders in the Programme you will assist in building a programme community and play a major role in promoting awareness of the Programmes aims and achievements. [2481-065 (2005) : 73] |
| Co | Reporting to the Editorial Production Systems Manager, you will play a key role in investigating, developing and implementing delivery of RSC Publishing content by exploiting relevant technologies such as XML, CML, INChl, web services, directories and ontologies. [2528-054 (2005) : 81] |
| Co | The Blood Transfusion Department requires a Biomedical Scientist who will take a leading role in the daily running of the department and be committed to the introduction and implementation of new techniques. [2515-055 (2005) : 74] |
| Co | The postholder will play a crucial role in recruiting cases and controls, both at St George’s and in other centres throughout the South London region. [2498-052 (2005) : 69] |
| Co | The postholder will take a lead role in the development of a new neuroimaging analysis laboratory and in the support and supervision of junior research staff. [2528-008 (2005) : 62] |
| Co | The School has considerable involvement on Health and Safety issues, and whilst you have the support of a dedicated full-time Safety Advisor, you will be expected to play a leading role in this area. [2511-056 (2005) : 72] |
| Co | The successful applicant will play a key role in establishing research in the Centre's Auditory Function laboratory - becoming an integral part of this lively research community. [2489-059 (2005) : 78] |
| Co | The successful candidate will play a key role in a programme of research directed to providing solutions to disease problems in the UK horticultural industry. [2485-042 (2005) : 72] |
| Co | The successful candidate will play a key role in developing the PET radiochemistry facilities as part of a major initiative to develop molecular imaging within the School of Medicine. [2515-064 (2005) : 77] |
| Co | The successful candidate will play a key role in developing the PET radiochemistry facilities as part of a major initiative to develop molecular imaging within the School of Medicine. [2515-079 (2005) : 81] |
| Co | To apply for this newly created position you will be able to take a lead role in optimising cGMP systems that include, but are not limited to, change control, incident investigations, corrective actions, recall, complaints in alignment with MHRA, FDA and other applicable international regulations and |</p>

</table>

**2006**

| Co | An exciting and challenging role within an expanding and vibrant organisation, you will play a key role in developing strong technical relationships with customers across Europe, Middle East, Africa and the FSU. [2558-066 (2006) : 87] |
| Co | Based in our UK hub site in Slough, you will play a crucial part in ensuring a regulatory environment that is supportive of our business strategies, particularly in the areas of food safety, and nutrition and health. [2576-039 (2006) : 75] |
| Co | By identifying and initiating new research opportunities with global counterparts, you’ll play a pivotal role in ensuring we give our consumers the high-quality products that they know, love and expect. [2572-031 (2006) : 73] |
| Co | Driving the design and development of Phase I clinical trials, you will take a key role both in the leadership of your Biometrics team and in the delivery of vital input to support our clients’ objectives. [2563-055 (2006) : 69] |
| Co | Due to the EMBL turnover system, the Unit composition is highly dynamic, and the Coordinator will play a critical role in the choice of new Group Leaders and thus in the research direction of the entire Unit. [2550-014 (2006) : 63] |
| Co | Ideally with experience in in vivo models of disease, you will play an essential role in our drug discovery efforts establishing animal models of visceral disorders, including colitis, hypersensitivity and motility. [2558-034 (2006) : 75] |
| Co | In this role you’ll play on an international stage, providing world-class Regulatory Affairs support to our European operations. [2576-039 (2006) : 75] |
| Co | Leading the research team and reporting to the Executive Director of Research and Policy, you will take an active role in the ongoing development, implementation and evaluation of the charity's research strategy. [2567-007 (2006) : 56] |
| Co | We also need your expertise to play a key role in the development of new standards, policies and procedures that will maintain our global leadership in statistical methodology. [2545-036 (2006) : 73] |
| Co | Working with global counterparts, you’ll identify and initiate new research opportunities - and play a pivotal role in the development and delivery of our Food Safety Strategy. [2554-033 (2006) : 71] |
| Co | You will also play a key role in mentoring and advising other chemists thus strengthening the knowledge of our laboratory teams. [2537-021 (2006) : 65] |
| Co | You will also play an important role in ensuring that Health & Safety standards are met throughout the process. [2576-067 (2006) : 82] |
| Co | You will be a vital part of a small and enthusiastic team supporting the Chairman and Members of the RCEP. [2558-041 (2006) : 78] |
| Co | You will have a leading role in co-ordinating and monitoring the project and are required to have excellent communication and presentation skills and a strong ability to motivate and lead others. [2558-078 (2006) : 91] |
| Co | You will have a role in the development of methodologies, protocols and, most importantly, people. [2563-055 (2006) : 69] |
| Co | You will join the medicinal chemistry group and play a full role in designing and synthesising new chemical entities for biological and pharmacological evaluation within the ICT. First class synthesis and analytical facilities are available within the ICT. [2545-012 (2006) : 62] |
| Co | You will play a key role in driving multiple product development projects for our Hip and Knee businesses from concept to delivery. [2541-031 (2006) : 70] |
| Co | You will play a key role in the development and application of multibeam echo-sounding techniques for measuring sediment dynamics in aquatic environments. [2572-073 (2006) : 92] |
| Co | You will play a key role in the discovery and development of novel therapeutics, liaising with cross-functional teams to drive multiple projects forward. [2580-056 (2006) : 72] |
| Co | You will play a key role in the discovery and development of novel therapeutics, liaising with cross-functional teams to drive multiple projects forward. [2580-056 (2006) : 72] |
| Co | You will take a lead role in the parts of the programme involving genetic manipulation of cancer genes and DNA cloning to generate recombinant DNA vectors for protein expression in mammalian cells. [2558-084 (2006) : 93] |
| Co | You will take a lead role in the parts of the programme involving chromosome engineering mainly in mouse embryonic stem (ES) cells. [2558-084 (2006) : 93] |
| Co | You will take a lead role in the parts of the programmes involving transgenic models. [2558-084 (2006) : 93] |
| Co | You will: play a key role in the scientific assessment of papers submitted for publication, selecting reviewers, taking decisions at key stages of the peer-review process and assisting with the development of one of our most prestigious journals. [2580-023 (2006) : 62] |
| Co | You’ll develop the post-closure performance assessment models for high level waste and spent fuel and play a leading role in writing our safety cases. [2572-040 (2006) : 77] |
| Co | You’ll have a key role liaising with our partners, rolling out our new measures and co-ordinating incident response training. [2541-012 (2006) : 62] |
| Co | You’ll play a strategic role in tracking products, providing regulatory input and advice – [2567-013 (2006) : 56] |
| E | Additionally the associate will play a vital role in ensuring [2567-037 (2006) : 66] |
| E | and will play an active role in the New Product Development Process. [2545-065 (2006) : 84] |
| E | but you’ll play a significant part in the future of medical treatments and technologies. [2576-014 (2006) : 66] |
| E | Contributing project, scientific and operational expertise, you will play a crucial role at every stage of our different clinical study programmes. [2554-029 (2006) : 69] |
| E | High on the wish list will be the Higgs Boson, thought to play a key role in endowing other particles with mass. [2550-006 (2006) : 56-57] |
In return, you’ll enjoy every opportunity to shape this all-new post, contribute to HMD service development and build your experience by playing a key role in what is a rapidly evolving specialist area of clinical diagnosis. [2580-016 (2006) : 60]

In this key position, you will play an important role in the development of experimental vaccines and associated test procedures. [2533-037 (2006) : 57]

Join us and you will have a key role to play, ensuring that we are supported by effective data management at all times. [2545-061 (2006) : 83]

So by joining our Simulation Physics Group (SPG), you will play a key role in combating these threats and protecting the lives of our Armed Forces. [2576-017 (2006) : 67]

Such is the importance of this role that you will also play a part in the development of environmental regulation at EU level. [2550-052 (2006) : 80]

The successful candidate will be responsible for taking over the role of overall project management in Oxford for the on-going prospective study that is currently taking place in 10 regions in China, and for the co-ordination of planning and development of systems and documentation for the case-control study of MI and stroke that will be starting during late 2007. [2572-075 (2006) : 92]

The charity is currently expanding and developing its portfolio to meet the needs of the whole cancer research community, and the Senior Research Manager will have a key role in implementing the recommendations of the review. [2545-019 (2006) : 65]

The Facilitator will play an active role in raising funds for projects in the physical climate sciences, including: seeking out funding from all relevant sources; matching funding opportunities to expertise available within the departments; and administering the submission of major grant applications. [2567-066 (2006) : 78]

The position on offer will allow you to play a major role in the development of Council research policies within the remit of its portfolio, and exists in the following key area: [2537-025 (2006) : 67]

The successful candidate will play a significant role in providing novel and innovative solutions in electrical measurement for industry and other centres of excellence around the world. [2537-002 (2006) : 57]

The work of the Particle Physics and Astronomy Research Council (PPARC) is focused on research into big scientific questions - and you will have a vital role to play in influencing the success of future projects. [2550-035 (2006) : 74]

They will play a key role in the development of the ARK team and in furthering commercial and academic partnerships. [2554-012 (2006) : 63]

This exciting new post will play a leading role in the GIS group of the Department of Epidemiology and Public Health and contribute to the EU-funded INTARESE project. [2554-070 (2006) : 85]

This will be a challenging role as Cancer Research UK has recently undertaken a major review of its fellowship schemes. [2545-019 (2006) : 65]

Which means that our new safety pharmacology team will play a hugely influential role in our continuing success in developing new drugs. [2533-036 (2006) : 57]

Working with University partners and external collaborators, the co-ordinator will play a key role in the development of a large-scale energy research programme designed to address national and global needs. [2563-067 (2006) : 73]

You must have excellent communication skills, both written and oral, as liaison with both internal and external stakeholders will play a crucial part of your role, and an awareness of current and relevant legislation. [2554-015 (2006) : 64]

You will have a major role in researching and writing parts of reports on key environmental issues. [2558-041 (2006) : 78]

2009

As well as leading a research programme in PET radiochemistry complementary to current radiochemistry research in the Division, you will play a leading role in the design and project management of a planned major expansion and refurbishment of the PET Imaging Centre, including new expanded GMP radiochemistry facilities and their unification with the nuclear medicine radiopharmacy. [2737-028 (2009) : 66]
<p>| Co | Candidates are sought who can further enhance DMSM's international research profile, and who <strong>will</strong> play an active <strong>part</strong> in curriculum development and teaching at Bachelor's, Master's and doctoral levels. [2698-050 (2009) : 68] |
| Co | Leading a new Innovation Platform in Sustainable Agriculture and Food, you <strong>will</strong> play a key <strong>role</strong> in helping the UK develop and promote the use of new technologies and new ways of working, enabling Britain's agri-food industry to meet this challenge head on. [2737-017 (2009) : 61] |
| Co | The group aims to lead polymer and inert characterisation, and you'll <strong>will</strong> play a lead <strong>role</strong> in developing specialist characterisation techniques, working across several teams to design and perform experimental studies. [2715-024 (2009) : 59] |
| Co | The post <strong>will</strong> have a key <strong>role</strong> in extending awareness and understanding of the NIHR-funded clinical research infrastructure with stakeholders including the research community, other research funders including charities, the NHS and universities, global life sciences industries and their trade associations, and other Government Departments (especially UK Trade and Investment). [2733-022 (2009) : 68] |
| Co | The post-holder <strong>will</strong> take a senior <strong>role</strong> in the Department, running a productive research group, supervising post graduate research workers and mentoring graduate students, and winning funds to support the group in the future. [2715-037 (2009) : 64] |
| Co | The Senior Principal /Consultant <strong>will</strong> take the lead <strong>role</strong> and <strong>should</strong> hold a relevant Ph.D, have experience of cellular therapy in a clinical environment and specific knowledge of Good Manufacturing Practice, immunoselection technology, cell culture, flow cytometry and in vitro functional assays. [2702-050 (2009) : 68] |
| Co | The successful applicant <strong>will</strong> play a leading <strong>role</strong> in co-ordination of UK wide studies establishing DNA banks from stroke patients, which involves collecting detailed clinical information. [2715-039 (2009) : 64] |
| Co | The successful candidate <strong>will</strong> play a key and challenging <strong>role</strong> in moving four ocular gene therapy programmes from the proof of concept stage through to clinical application in First in Man clinical studies, following a recently announced partnership with sanofi-aventis. [2728-022 (2009) : 62] |
| Co | You <strong>will</strong> also play a key <strong>role</strong> in the identification and implementation of new technologies and process improvements for antibody isolation and protein engineering. [2724-024 (2009) : 61] |
| Co | You <strong>will</strong> also play a key <strong>role</strong> in the planning and preparation of LWEC meetings, workshops, conferences and other functions (e.g. in the Parliaments and Assemblies of all the countries and regions of the UK) and in helping to identify and map activities and gaps within the LWEC framework. [2715-030 (2009) : 62] |
| Co | You <strong>will</strong> play a key <strong>role</strong> in developing and implementing new assays and methodologies, mentoring junior staff in these areas. [2694-005 (2009) : 53]. |
| Co | You <strong>will</strong> play a key <strong>role</strong> in leading Natural England's use of statistics nationally and developing our capacity to use statistical evidence effectively and appropriately as part of our drive to deliver environmental leadership. [2719-034 (2009) : 61] |
| E | As part of TRANSEC's Research, Analysis and Development team you <strong>will</strong> play a key <strong>part</strong> in delivering an innovative research programme aimed at protecting our transport networks from the most serious terrorist threats. [2724-020 (2009) : 59] |
| E | In this new, high-profile position, you <strong>will</strong> play a key <strong>role</strong> in defining and refining the top-level strategy focused on harnessing the immune system in order to identify novel cancer immunotherapies. [2689-021 (2009) : 54] |
| E | The MRC places great importance on the protection and exploitation of its intellectual property and the appointee <strong>will</strong> play a key <strong>part</strong> in ensuring MRC's aims are met. [2711-028 (2009) : 60] |
| E | The Policy Officer <strong>will</strong> play a key <strong>role</strong> in developing Academy positions on the many public policy issues that involve the biomedical sciences. [2711-006 (2009) : 52] |
| E | The successful applicant <strong>will</strong> play a major <strong>role</strong> in the design and development of novel surgical robot devices. [2694-015 (2009) : 57] |
| E | The successful applicant <strong>will</strong> play a major <strong>role</strong> in the future development and success of the University's research in nutrition and health. [2711-042 (2009) : 64] |
| E | The WWARN Project Manager is a new <strong>role</strong>, which <strong>will</strong> be key to the successful establishment of the Worldwide Antimalarial Resistance Network. [2724-047 (2009) : 70] |
| E | We have a vital <strong>role</strong> to play in the success of the UK’s Research Councils and so <strong>will</strong> you. [2698-041 (2009) : 65] |</p>

| Ca | BIOLOGIST, M.A., L.I. Biol., female, would-be ecologist with eight years teaching experience seeks post - involving field work, anywhere in U.K. Write Box D594, New Scientist. [750-054 (1971) : 359] |
| Ca | If you are interested, or would like further details, please ring: [741-028 (1971) : 522] |
| Co | Suitably qualified people who would like to find out more about these research opportunities should send (or telephone) a brief description of their qualifications, experience and research interests to Mr. G. I. James, ARU Administrative Office, The Culham Laboratory, Abingdon, Bercks. Tel: Oxford 41721 – Extension 480. [745-047 (1971) : 61] |
| Co | The School is just opening an Audio-Visual room, and any suitably qualified applicant would be expected to take charge of the technical work connected with this. [733-021 (1971) : 40] |
| Co | A knowledge of information retrieval systems would be useful. [733-024 (1971) : 40] |
| Co | After several months' preparatory work at Birmingham and the Rutherford High Energy Laboratory he would be expected to move to CERN, Geneva, for at least a year. [733-029 (1971) : 41] |
| Co | The person appointed would be required to teach the nature of systems analysis and its application to environmental problems. [733-039 (1971) : 42] |
| Co | APPLICATIONS are invited from a science graduate; an interest in tissue culture would be an advantage. [733-083 (1971) : 48] |
| Co | Tenure of the Fellowship would normally be two years. [737-035 (1971) : 279] |
| Co | A knowledge of Portuguese, French or Spanish would be an advantage. [741-024 (1971) : 522] |
| Co | This Lecturer would also be expected to teach his own discipline on graduate and / or undergraduate courses. [745-010 (1971) : 57] |
| Co | Work would involve supervision of drilling, and sampling programmes in the field, recording and processing basic geological and assessment data and preparing items for publication. [745-012 (1971) : 58] |
| Co | Consideration will be given to applicants otherwise suitably qualified who would welcome the opportunity of developing Production Engineering as a major personal interest. [745-032 (1971) : 60] |
| Co | Candidates should be graduates in an appropriate discipline and the completion of a course in genetics would normally be expected. [745-049 (1971) : 61] |
| Co | An interest in small craft and yachts would also be an advantage. [745-063 (1971) : 62] |
| Co | A capability for independent data acquisition work would also be desirable. [750-009 (1971) : 354] |
| Co | STUDENT OR JUNIOR TECHNICIAN required for this well-known London Teaching Hospital, a student awaiting University entrance in the Autumn, or wanting a post for a year would be considered. [750-013 (1971) : 355] |
| Co | Applications are invited from suitable qualified or experienced persons for the post of Laboratory Technician in which Science Department, the duties of which would include participation in the servicing of the laboratories, the construction and maintenance of equipment and the care of plants and animals. [750-037 (1971) : 357] |
| Co | The person appointed will be expected to undertake a contractual arrangement which would be reviewed after a minimum of 12 months. [750-039 (1971) : 357] |
| Co | A knowledge of Fortran would be useful. [750-048 (1971) : 358] |
| Co | Candidates should be graduates of UK, or Eire Universities and would be expected to seek a career in one of the Royal Dutch / Shell Group of Companies. [750-066 (1971) : 360] |
| Co | Although based in the United Kingdom, the successful applicant would be expected to make periodic visits to the Antarctic to supervise the work of young scientists in Field Stations. [754-025 (1971) : 600] |
| Co | The supervision would also extend to the work of the scientists when they return to the United Kingdom and are engaged in preparing the results of their work for publication. [754-025 (1971) : 600] |
| Co | The successful candidate would join a small team engaged in testing and evaluating the performance of automatic sprinklers, alarm valves, pumps, exhausters, accelerators, etc. [754-035 (1971) : 601] |
| Co | Knowledge of a European language would be an asset. [754-049 (1971) : 602] |
| Co | An interest in either the assessment of heat transfer from boundary layers at high speeds, or in thermal buckling would be required. [754-055 (1971) : 603] |
| Co | The Senior Lecturer would be expected to play the major role in the teaching and administration of the new M.Sc. Course in Hydrocarbon chemistry, [758-011 (1971) : 51] and would participate in other teaching in the Department; [758-011 (1971) : 51] |
| Co | The person appointed would assist a Medical Research Scientist in studies in animals and man. [758-015 (1971) : 51] |
| Co | Duties would include: [758-052 (1971) : 54] |
| Co | The appointment would be initially for one year (with possible renewal) at a salary of £1,491 per annum, F.S.S.U. [763-005 (1971) : 343] |
| Co | The chemistry of immobilisation is a large and rapidly growing field and the successful applicant would be called upon to assist in the preparation of immobilised derivatives and their use in reactor systems. [763-014 (1971) : 344] |
| Co | If you are a science graduate with a first or good second class honours degree, age 32 or over, and would like to make a career in the administration of research, a post of Scientific Administrative Officer in the MRC Headquarters Office in London will be of interest to you. [763-033 (1971) : 346] |
| Co | Some supervision of Junior staff would be involved. [767-017 (1971) : 543] |
| Co | Candidates may not necessarily possess a scientific qualification, and skill in methods of illustration for scientific papers would be an advantage. [767-027 (1971) : 544] |
| Co | A suitably qualified applicant would assume considerable responsibility for development of the LKB 9000 facility in the context of this project, which is presently funded up to the end of 1972. [767-052 (1971) : 546] |
| Co | This is a modern well-equipped Dept. and the successful applicant would be working mainly with an automatic amino acid analyser as well as other routine work. [767-056 (1971) : 546] |
| Co | The studentship is sponsored by the C.E.G.B. for a period of three years and the successful applicant would be required to register for a higher degree. [767-072 (1971) : 548] |
| Co | An interest in advanced composite structures would be required. [772-056 (1971) : 59] |
| Co | Previous experience in this area is desirable but not essential since we are seeking an experimentalist whose interests would not be limited to this field. [772-060 (1971) : 59] |
| Co | If you'd like the full facts, send the coupon. You won't be committing yourself. [774-002 (1971) : 187] |
| Co | The appointment would be from 3rd January, 1972, or as soon after as possible, until 31st March, 1974. [774-014 (1971) : 189] |
| Co | The appointed person would be expected also to help maintain contact with the pharmaceutical and chemical industries, Government departments and academic institutions and to organise research projects as well as routine procedures and developmental methodology. [774-032 (1971) : 190] |
| Co | The College wishes to create a fellowship in Cell Biology which would be held in conjunction with the University Lecturership in Experimental Pathology currently being advertised. [774-054 (1971) : 192] |
| Co | The Fellowship offered might be either an Official Fellowship or a Senior Research Fellowship, depending upon the amount of tutorial work the fellow-elect would wish to undertake. [774-054 (1971) : 192] |
| Co | Applications are invited from electronics engineers who would like to exploit the interactive computer techniques already developed by the Project, which makes use of a time-shared PDP-10 computer and satellite computer display system. [776-009 (1971) : 287] |
| Co Ex | A working knowledge of statistics and/or computer experience would be an asset. [741-029 (1971) : 522] |
| Co Ex | Applications are invited from electronics engineers who would like to exploit the interactive computer techniques already developed by the Project, which makes use of a time-shared PDP-10 computer and satellite computer display system. [776-009 (1971) : 287] |
| Di | Applicants should possess 2 G.C.E. 'A' levels of O.N.C. in relevant subjects (chemistry would be an advantage). [733-020 (1971) : 40] |
| Di | Appropriate qualifications for the posts would be Associateship of the Institute of Statisticians or a degree including statistics or mathematics and some relevant experience. [733-022 (1971) : 40] |
| Di | Suitable applicants with 'O' levels would be considered. [733-038 (1971) : 42] |
| Di | A good honours degree would normally be required. [733-040 (1971) : 42] |
| Di | We want to interview graduates, men or women, aged 30-35, with a minimum of an honours degree in physiology or physics; a further degree would be an advantage. [733-054 (1971) : 44] |
| Di | Applicants, male or female, should have a degree or equivalent qualification and a Librarianship qualification would be an additional advantage. [737-001 (1971) : 277] |
| Di | A Ph.D. degree would be an advantage. [741-023 (1971) : 522] |
| Di | For one post a background which includes earth sciences and for the other a background which includes chemistry would be preferred. [750-001 (1971) : 354] |
| Di | Joint or general honours degrees at the same level in these subjects would be acceptable [750-064 (1971) : 360] and students with qualifications in microbiology or biochemistry would also be considered. [750-064 (1971) : 360] |
| Di | Applicants may be either male or female, and although academic qualifications would be desirable, previous experience in a sub-editorial department is more important. [758-027 (1971) : 52] |
| Di | Some knowledge of plant physiology would be an advantage. [758-028 (1971) : 52] |
| Di | Formal academic qualifications are of less importance than technical competence, but a background in X-ray analysis, materials science or electronics to at least HNC would be advantageous. [763-016 (1971) : 345] |
| Di | Background in either biochemistry or tissue culture would be an advantage. [763-047 (1971) : 347] |
| Di | Background in either biochemistry or tissue culture would be an advantage. [763-047 (1971) : 347] |
| Di | An experience of analytical chemistry is essential and a pharmaceutical qualification, although not essential, would be an advantage [774-032 (1971) : 190] and students with qualifications in microbiology or biochemistry would also be considered. [750-064 (1971) : 360] |
| Di | A few years of industrial experience or a mission oriented research; post graduate degrees would be an asset but not a prerequisite; fluency of spoken French is not a prerequisite, but a good knowledge of written French is essential. [774-042 (1971) : 191] |
| Di Co | A doctorate and a knowledge of Portuguese or Spanish would be an advantage. [733-023 (1971) : 40] |
| Di Co | A training in zoology is required and an interest in ecology and/or conservation problems in upland areas would be an advantage. [750-001 (1971) : 354] |
| Di Ex | Candidates with other qualifications however and with appropriate experience in either statistics or data processing would be considered. [733-022 (1971) : 40] |
| Di Ex | Qualification in biology or experience in a biological or biochemical laboratory would be an advantage. [737-028 (1971) : 279] |
| Di Ex | Candidates would normally hold a University degree, preferably at Masters’ level and have formal training and practical experience in the field of information science. [745-004 (1971) : 57] |
Di Ex Candidates should have knowledge of biochemical techniques and instrumentation and experience in microbiology, particularly parasitology, would be an advantage. [767-006 (1971) : 541]

E If you're accepted, you'd receive an award worth £1,059 a year, tuition fees paid, the whole time you're at college. [733-002 (1971) : 35]

E School-leaver proceeding to University next autumn would be considered. [737-007 (1971) : 277]

E Would you like to study these topics and have an opportunity to tackle a research project? If so, register for this M.Sc. course, or simply study some of these subjects. [737-036 (1971) : 279]

E F.S.S.U. benefits would be payable. [745-007 (1971) : 57]

E There would be an opportunity to publish research, but little likelihood of field work initially. [745-012 (1971) : 58]

E Work would be primarily in research in earth science topics and writing scripts for Exhibitions, involving liaison with design consultants, to classifying and registering building stone samples and dealing with enquiries on geological topics from the public. [745-012 (1971) : 58]

E Special facilities would be made available to such an appointee. [745-032 (1971) : 60]

E The salary is envisaged initially as between £2,500 and £3,000 p.a. and would be subject to annual review. [750-003 (1971) : 354]

E Assistance would be given with relocation expenses. [750-003 (1971) : 354]

E The appointment would be suitable for a graduate in biological sciences, preferably pharmacology or biochemistry. [750-034 (1971) : 357]

E The vacancy would be of particular interest to a graduate in pharmacy or in one of the biological sciences. [750-045 (1971) : 358]

E The salary would be within the range £1,491 to £2,040 per annum and appointment will be for one year in the first instance. [754-055 (1971) : 603]

E This post would be suitable for a mathematician, physicist, electrical engineer or physical chemist interested in this field. [754-062 (1971) : 604]

E Would suit a technician (A.I.M.L.T. preferred but not essential) with experience in biochemistry or a related field. [754-077 (1971) : 604]

E Would suit Science graduate with previous relevant experience. [754-077 (1971) : 604]

E In the case of an applicant having outstanding qualities of leadership in research and eminence in the broad field of study, appointment at a higher salary would be considered. [754-081 (1971) : Ciii]

E This topic would suit a first-class or 2(i) Honours graduate in engineering (or perhaps physics or mathematics) who finds most academic research remote or narrow. [758-067 (1971) : 55]

E Salary and status would depend on qualifications, [763-019 (1971) : 345]

E but initially would be on a scale reaching £2,611. [763-019 (1971) : 345]

E Applicants should be 30 or over (B.Sc. in electronics or equivalent essential), but if under 30 and suitably qualified, would be considered for post of Junior Technical Officer. [763-020 (1971) : 345]

E The position would involve ad hoc investigations with regard to the process. [763-027 (1971) : 345]

E No previous experience in electron microscopy is required and every facility would be afforded the successful applicant for further qualification. [763-031 (1971) : 346]

E as they would be obtained in the course of work. [767-018 (1971) : 543]

E The post would be suitable for a biochemist with an interest in animal virology or for a virologist with a good knowledge of biochemistry. [767-023 (1971) : 543]

E But one thing is certain: you would have carefully selected, and well motivated students. [767-040 (1971) : 545]

E Candidates, aged 35 to 45, should ideally be graduates in chemical engineering or engineering although qualifications in chemistry, physics or textiles would be considered. [772-012 (1971) : 53]

E Career prospects and competitive conditions of service would be discussed at interview. [772-013 (1971) : 53]

E Assistance towards moving house would be available to married men. [772-013 (1971) : 53]

E Career prospects and competitive conditions of service would be discussed at interview. [772-030 (1971) : 55]

E Assistance towards moving house would be available to married men. [772-030 (1971) : 55]

E Graduates in Biology, Zoology or related fields would be suitable candidates. [772-055 (1971) : 58]

<td>[745-013 (1971) : 58]</td>
</tr>
<tr>
<td>Equivalent experience in the fields of fluid mechanics or acoustics <strong>would</strong> be advantageous.</td>
<td>[745-020 (1971) : 59]</td>
</tr>
</tbody>
</table>
Experience with either electronic or vacuum techniques would be advantageous but is not essential. [745-028 (1971) : 59]

The appointment is primarily in the Production Engineering field, but experience in either Control and Systems Engineering or Tribology would be valuable. [745-032 (1971) : 60]

Experience in the relevant field of photographic or coating technology would be a major consideration. [745-037 (1971) : 60]

For the Lectureship in the Division of Electrical Materials Science the initial qualifications might be in Electronic Engineering, Physics or Chemistry and experience in the evaluation and insulating materials would be an advantage. [745-051 (1971) : 61]

The ability to contribute to the teaching of Operational Research techniques is desirable, and recent experience of their applications in an engineering industry would be a particular advantage. [745-060 (1971) : 62]

Experience in purifying membrane-bound enzymes would be highly desirable. [745-065 (1971) : 62]

The person appointed will be wholly responsible for the development and maintenance of Noise and Vibration Instrumentation, and previous experience with such instrumentation would be an advantage. [750-009 (1971) : 354]

Applicants should have a veterinary qualification and some post graduate experience in immunology would be an advantage. [750-014 (1971) : 355]

Although not essential previous experience in the field would be desirable. [750-015 (1971) : 355]

Previous experience with the crop, particularly for the plant breeder, would be desirable though not essential. [750-027 (1971) : 356]

Some experience of information work is necessary and a degree in a natural science would be an advantage. [750-033 (1971) : 357]

Experience of patent or information work or industrial research would be an advantage. [750-034 (1971) : 357]

Experience in the organisation and maintenance of biological Laboratories would be an advantage. [750-037 (1971) : 357]

A background of teaching science or engineering at elementary level is desirable, and preference would be given to candidates who have taught abroad. [750-039 (1971) : 357]

Some experience of microbiology, virology, tissue culture or immunology would be an advantage. [750-040 (1971) : 358]

Experience in a similar position would ensure priority consideration, but we should also be glad to hear from other applicants including those about to graduate. [750-045 (1971) : 358]

Experience of ultramicrotomy and in the use of AEI 6G would be advantageous. [750-053 (1971) : 359]

Experience in biochemical or clinical analytical techniques would be an advantage. [754-020 (1971) : 600]

Experience in a similar laboratory would be an advantage. [754-028 (1971) : 600]

Previous experience of hatchery and rearing work would be an advantage but is not essential. [754-042 (1971) : 601]

The position includes responsibility for both research and teaching Laboratories and a knowledge of electronics and – or instrumentation would be an advantage. [754-046 (1971) : 602]

A wide range of experience would be welcome, particularly if it includes substantial knowledge of industry. [754-053 (1971) : 602]

Experience in photographic techniques and/or electronics would be an advantage. [754-069 (1971) : 604]

While a practical training will be given, experience of high vacuum systems, low level counting, or glassblowing would be advantageous. [758-012 (1971) : 51]

Experience in biochemistry or physiology would be useful but is not essential, and there are excellent prospects for progression to a higher grade. [758-015 (1971) : 51]

Experience in electron microscopy or tissue culture would be an advantage. [758-021 (1971) : 51]

Previous experience of electronics would be an advantage. [758-044 (1971) : 53]

Experience in problems of electrolyte transport and/or to a lesser extent steroid immunoassays would be an advantage. [758-050 (1971) : 53]
Ex Applicants should have a distinguished academic record with their first degree in either metallurgy or chemical engineering, experience in any aspect of chemical reaction engineering would be an advantage. [763-028 (1971) : 346]

Ex One successful applicant is likely to be placed in the Group concerned with the economic advisory service and experience in macroeconomic forecasting would be valuable. [763-034 (1971) : 346]

Ex Computing and statistical experience would be an advantage, but again are not essential [767-018 (1971) : 543]

Ex A keen interest in economic minerals and the development of mineral resources is essential and some experience of mineral prospecting or mining would be an advantage. [767-042 (1971) : 545]

Ex Some experience of working in an organic chemistry laboratory would be desirable. [767-048 (1971) : 546]

Ex Experience in experimental vibration would be of advantage. [767-072 (1971) : 548]

Ex Previous experience in this field, in industry, would be an advantage. [772-013 (1971) : 53]

Ex Previous experience in this or a related field would be an advantage. [772-021 (1971) : 54]

Ex Applicants should preferably hold ONC/HNC or equivalent qualification, suitable experience without qualification would be considered. [772-040 (1971) : 56]

Ex Familiarity with punch cards and computer programming would be an advantage. [772-049 (1971) : 57]

Ex Applicants should possess a good degree in a biological science or its equivalent; a background in biochemistry and/or physiology would be an advantage but is not essential. [772-052 (1971) : 58]

Ex Previous experience with cocoa or another tree crop would be desirable but not essential. [772-054 (1971) : 58]

Ex Previous involvement in information or library work and the ability to type would be added advantages. [772-065 (1971) : 60]

Ex Experience in digital techniques, telemetry and data logging would be an advantage. [774-005 (1971) : 188]

Ex Experience in electrical materials, corrosion and solid-state thermodynamics, mechanical metallurgy or the processing of polymers would be an advantage. [774-010 (1971) : 188]

Ex Experience in either fracture, plastic deformation or X-ray diffraction though not necessarily in the field of polymers would be an advantage. [774-014 (1971) : 189]

Ex Experience in general laboratory work would be advantageous. [774-028 (1971) : 190]

Ex Candidates should possess a good honours degree in engineering or an allied subject; industrial experience would be an advantage. [776-001 (1971) : 286]

Ex Candidates should preferably have knowledge of biochemical techniques and instrumentation and experience in microbiology, particularly parasitology, would be an advantage. [776-004 (1971) : 286]

Ex Familiarity with scientific computation is essential and a knowledge of analogue / hybrid / digital simulation would be an advantage. [776-018 (1971) : 287]

Ex Di Research experience in fields associated with medicine – including social science – and a research degree would be an advantage. [763-033 (1971) : 346]

A Co Another route for the would-be hospital biomedical scientist, is via a masters degree in the subject. [1980-006 (1995) : 54]

A Co The suitable applicant would probably be in their 20s and starting, or working towards, a Higher National qualification. [1980-043 (1995) : 66]
If you **would** like to discuss the post on an informal basis please contact us on 0181200 7777 ext. 2288. [1971-028 (1995) : 64]

If you are interested in the positions and **would** like to apply please send a detailed CV to: Miss T Casbon, Personnel Assistant, MediSense Contract Manufacturing Limited, Units 3/4, 14/15 Eyston Way, Abingdon, Oxon OX14 1TR or telephone for an application form on (01235) 555440 ext. 2099. [1976-028 (1995) : 69]

If you are interested in these vacancies and **would** like further details or an application form please contact Katie Wond on Ext. 2402 at the address below: [1989-033 (1995) : 66]

If you feel you have the above qualities and experience and are keen to progress your career within a top flight consumer products company, we **would be interested** to discuss this opportunity with you. [1989-022 (1995) : 63]

If you would like to apply for this position, send your CV to Mrs Catriona Shuba, or telephone for a brief discussion first, quoting the reference number 9575. [1993-061 (1995) : 75]

If you would like to develop your career in one of the country's most exciting pharmaceutical companies, please send a full CV, quoting ref NS/11/95 to: The Personnel Manager, Chiroscience Limited, Cambridge Science Park, Milton Road, Cambridge CB4 4WE. [1998-069 (1995) : 93]

If you would like to apply for this position, then send us a full CV, containing the names of two current referees accompanied by a handwritten supporting letter. [1998-063 (1995) : 91]

If you would like to be part of our future success, please send a full CV to: Vincent Tuckwood, Personnel Adviser, Pfizer Central Research, Sandwich, Kent CT13 9NJ. [1993-086 (1995) : 75]

If you would like an information pack and application form then please contact Suffolk College, Rope Walk, Ipswich IP4 1LT. Tel: 01473 296612 (direct line) or 255885, ext 6612. [1989-119 (1995) : 87]

If you **would** like to apply to this position, please send your CV to Mrs Catriona Shuba, or telephone for a brief discussion first, quoting the reference number 9575. [1993-061 (1995) : 69]

If you would like to develop your career in one of the country's most exciting pharmaceutical companies, please send a full CV, quoting ref NS/10/95, to: The Personnel Manager, Chiroscience Limited, Cambridge Science Park, Milton Road, Cambridge CB4 4WE. [1998-069 (1995) : 93]

If you would like to take the first step not just towards any of these roles but to a career with Innovex, send or fax (on 01628 491555) your CV to Louise Woolfenden in the Clinical Resourcing Department, Innovex (UK) Limited, Innovex House, Marlow Park, Marlow, Buckinghamshire SL7 1TB. [1998-100 (1995) : 102]

If you **would** like to develop your career in one of the country's most exciting pharmaceutical companies, please send a full CV, quoting reference NS/11/95 to: The Personnel Manager, Chiroscience Limited, Cambridge Science Park, Milton Road, Cambridge CB4 4WE. [1998-069 (1995) : 93]

If you **would** like to apply to this position, send your CV, including details of current remuneration, with a letter stating what special skills and experience you **would** bring to the position to: Ian Pell, Personnel Department, HRC Ltd., Huntingdon, Cambs. PE18 6ES. [1998-029 (1995) : 82]

If you would like to join this ambitious and expanding business, please send your full cv, including details of present remuneration and quoting reference 966, to the Recruitment Officer, Celltech Group plc, 216 Bath Road, Slough, Berkshire SL1 4EN. [2006-019 (1995) : 66]

If you would like to apply for this position, please send a detailed CV to: Miss T Casbon, Personnel Assistant, MediSense Contract Manufacturing Limited, Units 3/4, 14/15 Eyston Way, Abingdon, Oxon OX14 1TR or telephone for an application form on (01235) 555440 ext. 2099. [1976-028 (1995) : 69]

If you would like to join us, please telephone 01734 535666 or write to the Personnel Department, National Rivers Authority, Thames Region, Kings Meadow House, Kings Meadow Road, Reading, Berks RG1 8DQ. [1980-023 (1995) : 61]

If you would like to be considered please write, enclosing a detailed CV, to Chris Rapson, Personnel Representative, Lilly Industries Ltd., Kingsclere Road, Basingstoke RG21 2XA. Tel: 01256 315765. [2002-048 (1995) : 69]

If you **would** like to apply on an informal basis please contact us on 0181200 7777 ext. 2325. [1971-028 (1995) : 64]

If you would like to discuss this post on an informal basis please contact us on 0181200 7777 ext. 2288. [1971-028 (1995) : 64]

If you would like to discuss the post on an informal basis please contact us on 0181200 7777 ext. 2325. [1963-032 (1995) : 57]

If you would like to join us, please telephone 01734 535666 or write to the Personnel Department, National Rivers Authority, Thames Region, Kings Meadow House, Kings Meadow Road, Reading, Berks RG1 8DQ. [1980-023 (1995) : 61]

If you feel you have the above qualities and experience and are keen to progress your career within a top flight consumer products company, we **would be interested** to discuss this opportunity with you. [1989-022 (1995) : 63]

If you would like to apply on an informal basis please contact us on 0181200 7777 ext. 2325. [1963-032 (1995) : 57]

If you would like to discuss the post on an informal basis please contact us on 0181200 7777 ext. 2325. [1963-032 (1995) : 57]
| Co | The project **will** involve use of finite element methods, knowledge of which **would** be an advantage. [1959-031 (1995) : 52] |
| Co | as **would** a basic understanding of the principles of physical metallurgy. [1959-031 (1995) : 52] |
| Co | Some familiarity with both software and electronics hardware **would** be an advantage. [1959-031 (1995) : 52] |
| Co | A second European language **would** be an asset. [1959-033 (1995) : 53] |
| Co | Some familiarity with both software and electronics hardware **would** be an advantage. [1959-038 (1995) : 54] |
| Co | Sales or marketing experience and fluency in French or another European language **would** be an advantage. [1959-043 (1995) : 56] |
| Co | The Wellcome Trust operates personal support schemes for individuals wishing to develop careers in research and who **would** like to apply mathematical disciplines to research questions in biological and medical science. [1959-043 (1995) : 56] |
| Co | Normally, candidates **would be expected** to have two sponsors, one from each of the biological and mathematical sciences. [1959-049 (1995) : 57] |
| Co | **Typing skills would** be advantageous. [1959-061 (1995) : 60] |
| Co | This Readership is offered from 1 September 1995 to candidates with a proven research record in any branch of organic chemistry; an interest in medicinal and/or bio-organic chemistry **would** be particularly welcome. [1963-021 (1995) : 55] |
| Co | He or she **would also be expected** to liaise closely with earth scientists, geomorphologists, hydrologists, archaeologists and biochemists, [1963-032 (1995) : 57] |
| Co | and a strong interest in one or more of these fields **would** be an advantage. [1963-032 (1995) : 57] |
| Co | The successful applicant **will join** an active multidisciplinary team, an interest in computing and bioelectronics **would** be an advantage. [1963-040 (1995) : 60] |
| Co | It **would also be an advantage** if you could demonstrate an understanding of sound customer relations. [1963-070 (1995) : 66] |
| Co | Computing skills are required, preferably with a knowledge of Fortran or Pascal, and familiarity with PC-based logging equipment **would also be an advantage.** [1963-072 (1995) : 66] |
| Co | Reporting to the Section Manager, you **would initiate and manage** a wide range of product development and product support projects. [1963-081 (1995) : 69] |
| Co | A good research and publication record **would be an advantage.** [1967-001 (1995) : 60] |
| Co | An interest in modern techniques in protein chemistry **would be an advantage.** [1967-001 (1995) : 60] |
| Co | The candidate **should have** excellent command of English, while knowledge of French or Spanish **would also be highly desirable.** [1967-012 (1995) : 66] |
| Co | The ideal candidate **would also have** a working knowledge of computational mathematics and biological systems. [1967-024 (1995) : 70] |
| Co | Candidates **should have** research interests in geomorphology and experience of research in fluvial environments **would be an advantage.** [1967-027 (1995) : 70] |
| Co | We **would expect** the successful candidate to have a commitment to teaching at both undergraduate and postgraduate levels. [1967-027 (1995) : 70] |
| Co | This **would initially be lab based with opportunities to** make customer visits. [1967-029 (1995) : 71] |
| Co | If you can meet our criteria and are enthusiastic, with the ability to work as part of a team, we **would like to hear from you.** [1967-031 (1995) : 72] |
| Co | Applicants who **would augment** our thriving research group in applied mathematics and numerical analysis, enhancing the group's co-operation with other research groups in the University and elsewhere, are especially welcome. [1967-050 (1995) : 77] |
| Co | Currently we have a number of vacancies for individuals who **would enjoy** the challenge of solving complex problems to generate leading-edge products. [1967-066 (1995) : 81] |
| Co | You **will have** the opportunity to gain experience in all sections of the department, and, if suitably qualified, **would be invited** to participate in the voluntary single-discipline out of hours service. [1967-078 (1995) : 84] |
| Co | If you can demonstrate drive, enthusiasm and determination to succeed, Astra **would like to hear from you.** [1967-090 (1995) : 86] |
A ringing licence and an ability to find nests **would** be advantageous. [1967-094 (1995) : 87]

The Lecturers **will** be expected to develop their own research programmes; while the areas of research are open, programmes which make links with existing research projects within the Department **would** be particularly welcomed. [1967-104 (1995) : 89]

A knowledge of French **would** be an advantage but is not essential. [1967-106 (1995) : 91]

A knowledge of other languages **would** be an advantage but is not essential. [1967-106 (1995) : 91]

A knowledge of French **would** be an advantage but is not essential. [1967-106 (1995) : 91]

You **will** be required to work closely with colleagues throughout Europe, and so knowledge of a second European language **would** be a considerable advantage. [1971-007 (1995) : 57]

This is a collaborative project with research laboratories and industry in France, Italy and Denmark, and the post **would** involve coordination and travel between the partners. [1971-023 (1995) : 62]

Additionally, self-motivation and attention to detail are essential and knowledge of, the industry Codes of Practice **would** be an advantage. [1971-024 (1995) : 63]

Given our strong European locus, the ability to speak French, German or another European language **would** be an advantage. [1971-064 (1995) : 76]

In addition it **would** be an advantage to possess some skill in computing. [1971-086 (1995) : 80]

Ideally, we'd also like you to be a member of an appropriate professional body and have first hand experience of the gastrointestinal therapeutic business. [1976-013 (1995) : 64-65]

You **will** need excellent communication skills, flexibility, and familiarity with computerised Data Acquisition Systems **would** be advantageous. [1976-013 (1995) : 64-65]

The University of Auckland has recently established a Centre for Science, Mathematics and Technology Education and the successful applicant **would be expected** to play a leadership role in the activities of the Centre [1976-014 (1995) : 66]

The successful candidate **would be expected** to have a proven research ability and leadership or the post-doctoral level. [1976-014 (1995) : 66]

If you are interested in the above Studentships you **must** have, or expect to gain, a first or upper second class honours degree in an appropriate scientific discipline and **would** register for a higher degree. [1976-045 (1995) : 73]

The possession of data handling and presentation skills **would** be an advantage. [1976-051 (1995) : 75]

Good communication skills; especially written, **would** be an advantage [1976-077 (1995) : 81]

A knowledge of the development of visualisation software and statistical estimation procedures **would** be of benefit, [1976-095 (1995) : 85]

as **would** an interest in field survey work. [1976-095 (1995) : 85]

Proven management capability is required, and commercial experience, although not essential, **would** be an advantage. [1976-096 (1995) : 86]

and who **would** enjoy working within a small expanding company to high quality standards. [1976-096 (1995) : 86]

as **would** shorthand and audio typing skills. [1980-026 (1995) : 62]

Applicants **should** possess, or expect to obtain, a first or an upper second class honours degree in a relevant biological science, but candidates with a strong background in both histology and biochemistry **would** be particularly suitable. [1980-064 (1995) : 71]

A higher degree and the ability to speak French/German **would** be beneficial. [1980-071 (1995) : 73]

Ideally you **will** have some practical laboratory experience with substrate modification and/or chromatographic processes, and a knowledge of biochemical / biological systems **would** be desirable. [1980-072 (1995) : 73]

The successful applicant **would be expected** to be active in research and teaching/supervision of postgraduates, both for clinical MSc courses and Ph.D. [1980-077 (1995) : 74]

This full-time post **would be expected** to assist and support research activities. [1980-077 (1995) : 74]

as **would** familiarity with both PC and UNIX operations. [1980-082 (1995) : 76]

<td>An appreciation of hydrology, including water chemistry, and GIS tools would be an advantage, [1980-082 (1995) : 76]</td>
</tr>
<tr>
<td>Di</td>
<td>A background in in situ hybridisation would be advantageous. [1984-036 (1995) : 63]</td>
</tr>
<tr>
<td>Di</td>
<td>A higher degree would be an advantage. [1989-071 (1995) : 76]</td>
</tr>
<tr>
<td>Di</td>
<td>A Ph.D. in either disciplines would be an advantage. [1989-100 (1995) : 83]</td>
</tr>
<tr>
<td>Di</td>
<td>as would an appropriate postgraduate qualification. [1993-006 (1995) : 53]</td>
</tr>
<tr>
<td>Di</td>
<td>These positions will require at least a Ph.D. or equivalent experience in molecular biology, mammalian cell culture, and/or protein manipulation, although post-doctoral training would be an advantage. [1993-086 (1995) : 75]</td>
</tr>
<tr>
<td>Di</td>
<td>A BSc (Hons) in a scientific or medical discipline is a pre-requisite, whilst further research studies would be an advantage. [1998-011 (1995) : 76]</td>
</tr>
<tr>
<td>Di</td>
<td>It would be desirable if you also had the NEBOSH Certificate or Diploma. [1998-027 (1995) : 81]</td>
</tr>
<tr>
<td>Di</td>
<td>A professional qualification in toxicology <strong>would</strong> be a distinct advantage. [1998-041 (1995) : 86]</td>
</tr>
<tr>
<td>Di</td>
<td>It is expected that Research Assistant B applicants <strong>would</strong> already possess a higher degree. [1998-048 (1995) : 88]</td>
</tr>
<tr>
<td>Di</td>
<td>For both positions, candidates with good “A” level passes <strong>will</strong> be considered but a degree or equivalent in a relevant discipline <strong>would</strong> be preferred. [1998-065 (1995) : 92]</td>
</tr>
<tr>
<td>Di</td>
<td>A relevant science degree <strong>would</strong> be advantageous and you <strong>will</strong> be highly organised, able to work as part of a team and capable of demonstrating a high degree of computer literacy. [2002-057 (1995) : 72]</td>
</tr>
<tr>
<td>Di</td>
<td>A relevant science degree <strong>would</strong> be an advantage. [2002-066 (1995) : 74]</td>
</tr>
<tr>
<td>Di Co</td>
<td>A higher degree and/or membership of the Institute of Occupational Health and Safety <strong>would</strong> be advantageous. [1959-078 (1995) : 64]</td>
</tr>
<tr>
<td>Di Co</td>
<td>If you have, or expect to have, a good honours degree, an MSc or a Ph.D. in earth sciences or a related field and you are computer literate, adaptable and eager to learn new skills, the British Geological Survey <strong>would</strong> like to hear from you. [1963-013 (1995) : 54]</td>
</tr>
<tr>
<td>Di Co</td>
<td>Organisational skills and an interest in library computer systems are essential and a background in materials science, physics, electronics or engineering <strong>would</strong> be an advantage. [1963-071 (1995) : 66]</td>
</tr>
<tr>
<td>Di Co</td>
<td>Qualifications in both science and a relevant business discipline (MBA or marketing MCIM) <strong>would</strong> be a distinct advantage [1976-011 (1995) : 62]</td>
</tr>
<tr>
<td>Di Co</td>
<td>A higher degree and/or membership of the Institute of Occupational Safety and Health <strong>would</strong> be advantageous. [1993-033 (1995) : 60]</td>
</tr>
<tr>
<td>Di Co</td>
<td>The ideal candidate <strong>would</strong> have a degree in Chemistry, end-user experience of ISIS and the strong communication skills necessary to support and train our customers' scientists. [1993-038 (1995) : 62]</td>
</tr>
<tr>

<td>A post graduate qualification or demonstrable research experience <strong>would</strong> be an advantage. [1980-078 (1995) : 75]</td>
</tr>
</tbody>
</table>
Qualifications sought would normally be a degree in a scientific subject, with two years' relevant experience or equivalent. [2006-076 (1995) : 82]

The ideal candidate would have a degree in Chemistry or a related discipline, demonstrable experience of application building in Windows or Macintosh and experience of Relational Database Management Systems. [1998-053 (1995) : 89]

The successful candidate may be offered a fellowship by St Catherine's College for which additional emoluments would be available. [1959-047 (1995) : 56]

The ideal candidate would have a degree in Chemistry or a related discipline, demonstrable experience of application building in Windows or Macintosh and experience of Relational Database Management Systems. [1998-053 (1995) : 89]

The successful candidate may be offered a tutorial fellowship by Hertford College for which additional emoluments would be available. [1959-090 (1995) : 66]

The post would suit a graduate with some work experience looking to develop a career in the wider aspects of science. [1959-057 (1995) : 59]

The successful candidate may be offered a fellowship by St Catherine's College for which additional emoluments would be available. [1959-047 (1995) : 56]

The post would suit a Natural Sciences graduate with experience of working in a commercially driven research based company. [1971-041 (1995) : 68]

The grade of the post and the exact duties assigned would be commensurate with experience. [1971-075 (1995) : 78]

The position would suit a Natural Sciences graduate with experience of working in a commercially driven research based company. [1971-041 (1995) : 68]

The position would suit a young graduate seeking a challenging role in the field of water and environmental analysis. [1971-069 (1995) : 77]

The position would suit an enthusiastic person with drive and commitment, good communication and organisational skills. [1976-096 (1995) : 86]

The post would suit a Natural Sciences graduate with experience of working in a commercially driven research based company. [1971-041 (1995) : 68]

The position would suit a recently qualified graduate with practical skills, who likes working with others. [1976-077 (1995) : 81]

We would also like to hear from recent Ph.D.s. [1976-013 (1995) : 64-65]

If you have a good honours degree or equivalent in a scientific discipline, and preferably some experience of teaching science in higher education, we would be very interested to hear from you. [1976-055 (1995) : 76]

As a specialist employment agency for industry, we would also be keen to hear from industrially experienced chemists, polymer scientists and technicians who are keen to obtain top jobs in the pharmaceutical, chemical, toiletries and polymer industries. [1976-063 (1995) : 78]

We would particularly welcome applications from women, black people and members of other minority ethnic groups and disabled groups as these groups are under represented in the workforce. [1976-068 (1995) : 79]

The position would suit a recently qualified graduate with practical skills, who likes working with others. [1976-077 (1995) : 81]

The successful candidate would be involved in establishing tissue culture techniques and/or using standard recombinant DNA techniques already in use. [1976-083 (1995) : 82]

The position would suit an enthusiastic person with drive and commitment, good communication and organisational skills, [1976-096 (1995) : 86]

The course would be PME accredited. [1976-099 (1995) : 87]
Pfizer offers the salary, career structure and benefits you would expect of a leading and successful company, including flexible working hours and merit based bonus and progression. [1980-004 (1995) : 53]

Although we would be particularly interested in seeing research done in some of the many fundamental geochemical processes relevant to contaminant hydrogeology, this is not a necessary qualification. [1980-039 (1995) : 66]

This full-time post would ideally suit a postdoctoral scientist. [1980-077 (1995) : 74]

The post is ideal for a person who would like to contribute to the expansion and development of the laboratory service within the Centre. [1980-078 (1995) : 75]

The post is available immediately and would suit a postgraduate, ideally with experience in techniques of immunochemistry and/or molecular biology. [1980-108 (1995) : 81]

The role of the specific micro-fauna (including any interactions between them) in the degradation of organic matter would then be studied with a particular emphasis on establishing any radionuclide specific mechanisms that might be important in binding and root uptake. [1980-120 (1995) : 85]

Results would then be included in environmental impact methodology. [1980-120 (1995) : 85]

Both students would become part of well funded multidisciplinary research teams specialising in microbial infection. [1980-121 (1995) : 86]

The course would provide a good grounding for a subsequent Ph.D. programme, or could lead directly to employment. [1980-129 (1995) : 87]

Women, members of ethnic minorities and disabled people are under-represented in the University in posts at this level and the University would therefore welcome applicants from members of such groups whilst, however, affirming that the appointment will be made entirely on merit. [1984-005 (1995) : 52]

Applications from 3rd year undergraduates who are interested in medical work would also be welcome. [1984-007 (1995) : 53]

If you feel you have the above qualities and experience and are keen to progress your career within a top flight consumer products company we would be interested to discuss this opportunity with you. [1984-014 (1995) : 57]

The post will involve work associated with the gene therapy programme and would suit a newly qualified graduate in genetics, cell or molecular biology who wishes to pursue a career in laboratory research. [1984-017 (1995) : 58]

Whichever route you follow, you can be sure of exceptional rewards (including relocation assistance where appropriate) and the kind of benefits you would expect from a leading international company. [1984-022 (1995) : 60]

We offer competitive salaries based on qualifications and experience as well as the usual benefits you would expect from a successful and expanding organisation, including assistance and relocation. Attractive career opportunities based on merit exist. [1984-030 (1995) : 62]

The magnets and acoustics posts would particularly suit graduates in physics or engineering. [1984-041 (1995) : 64]

For the transducer materials post, Physicists, Chemists or Material Scientists would be considered. [1984-041 (1995) : 64]

If you want to play a leading role in preparing information, maintaining and developing computer programmes and converting existing systems to our new format then we’d like to hear from you. [1984-044 (1995) : 65]

The project would suit a person with an interest in molecular recognition, polymer/organic chemistry or material science. [1984-094 (1995) : 77]

The successful candidate may be offered a tutorial fellowship, for which additional emoluments would be available, by either Trinity College or St Hilda's College under arrangements described in the further particulars. [1984-112 (1995) : 81]

The position would suit a Postdoctoral student with experience in one or more of the disciplines of structural geology, elastic sedimentology, stratigraphy and petroleum geology. [1989-016 (1995) : 62]
The project "Genotoxicity of tamoxifen and analogues" (supervisors: Dr D H Phillips and Dr S Venitt) **would** suit graduates with a First or 2.1 Honours degree in Biochemistry, Pharmacology or Medicinal Chemistry. [1989-021 (1995) : 63]

An experienced cytogeneticist **would be appointed** on the B grade, points 8-10 (£16,019 - £17,326) or 11-13 (£18,019 - £19,489). [1989-030 (1995) : 66]

The post which is currently half-time **would be appropriate** for a statistician or geographer at postdoctoral level who already has GIS skills. [1989-061 (1995) : 73]

This post **would ideally suit** a recent Ph.D. both with an interest in this area and training in both recombinant protein expression/purification and antibody production and utilisation. [1989-072 (1995) : 76]

We **would welcome** visits or informal discussions. [1989-090 (1995) : 80]

This position **would particularly suit** a science graduate (or someone with a research background) with office experience, who is interested in developing a career in publishing. [1993-003 (1995) : 52]

The post **would suit** a radiographer keen to gain experience of MRI, a science graduate with an interest in patient care or possibly a nurse with a strong interest in computing. [1993-016 (1995) : 56]

(Newly qualified radiographers **would be considered**). [1993-016 (1995) : 56]

In return, we can offer an attractive salary and the range of benefits you **would expect** from a world leading organisation, including relocation assistance where appropriate. [1993-020 (1995) : 57]

We **would be interested** to receive your C.V., if you have the drive, determination and motivation to succeed in a fast moving Total Quality environment. [1993-023 (1995) : 58]

The post **would suit** a physics graduate keen to establish a career in scientific journalism and publishing. [1993-025 (1995) : 58]

but is not essential since training **would be provided**. [1993-053 (1995) : 67]

although full training **would be given** to candidates without suitable experience including sessions in the University Seminology Laboratory and Regional Cytogenetics Centre. [1993-066 (1995) : 70]

The appointment **would be made** on the other related scale between £14,317 and £18,294, according to age and experience. [1993-066 (1995) : 70]

The post, for six months in the first instance, **would suit** a recent graduate with relevant experience. [1993-075 (1995) : 72]

In return for asking a lot of you, we offer the support to help you succeed, a highly competitive salary, attractive relocation package and all the benefits you’d expect from an industry leader. [1993-086 (1995) : 75]

This appointment **would suit** a newly qualified person. [1993-093 (1995) : 77]

A postgraduate with a recent life sciences degree **would be suitable**. [1993-098 (1995) : 78]

We offer plenty of benefits - competitive salary, flexible hours, subsidised restaurant, our own sports and social facilities too - in fact, all that you **would expect** of one of the world's leading companies. [1998-004 (1995) : 73]

We offer competitive salaries based on qualifications and experience, together with the usual benefits you **would expect** from a successful and expanding organisation. [1998-029 (1995) : 82]

As you **would expect**, our future success will depend very much on their continued ability to discover and develop outstanding new drugs. [1998-038 (1995) : 85]

These positions **would suit** people who seek challenge, who are self motivated and who enjoy the demands of a busy working environment. [1998-041 (1995) : 86]

The successful candidate **would have** the opportunity to rotate through the following sections: Immunocytochemistry and markers, haemoglobin electrophoresis/globin chain synthesis, bone marrow cryopreservation, routine and special coagulation, routine Haematology and Blood Transfusion. [1998-061 (1995) : 91]
If you are a self-starter who can work well under pressure, have a good biological science degree and a minimum of two years relevant experience, we would like to hear from you. [1998-081 (1995) : 95]

These appointments would suit graduates (probably in Applied Physics) who have up to 2 years’ experience of optical work or who have obtained some experience in this field during their studies. [1998-095 (1995) : 100]

This would be an ideal opportunity to gain experience in an increasingly important discipline. [1998-101 (1995) : 102]

If you have a genuine interest in this area of research we would like to hear from you. [2002-018 (1995) : 60]

Applicants without specific analgesic experience but who have full scale Project Development experience within another field would also be of interest. [2002-024 (1995) : 62]

as full training would be given. [2002-026 (1995) : 62]

We offer a competitive salary and the benefits you would expect of an organisation of our calibre - 25 days holiday, a subsidised restaurant and a lively sports and social club. [2002-042 (1995) : 68]

This would suit graduates (probably in Applied Physics) who have up to 2 years’ experience of optical work or who have obtained some experience in this field during their studies. [1998-105 (1995) : 70]

If this sounds like you and you have, or expect to have in 1996, a 1st or 2nd class honours degree in mathematics or statistics, or a post graduate degree, we would like to hear from you. [2002-050 (1995) : 70]

The research, in collaboration with the University of Nottingham, will involve equipment development, catalyst characterisation, and kinetic studies, and would be appropriate to a good experimentalist with an organic or physical chemistry background. [2002-062 (1995) : 74]

It is hoped that the Academic status of the appointee would merit an Honorary Lectureship with King's College School of Medicine and Dentistry. [2006-005 (1995) : 60]

Applicants to blue-chip companies are often asked questions about how they would solve specific problems or persuade people to work together toward a goal. [2006-007 (1995) : 61]

The successful applicant would be encouraged to pursue research in a multidisciplinary environment with, for example, exercise physiologists, biomechanists and psychologists. [2006-016 (1995) : 65]

We would be interested to receive applications from a wide range of candidates from the Educational, Medical and Biomedical fields. [2006-027 (1995) : 68]

The sort of person we seek is a recent graduate, keen on a career in publishing and ideally with some relevant experience, but we would consider others who think they could make a contribution. [2006-036 (1995) : 71]

The department would encourage the candidate to sit for a further degree (ie Ph.D. or MSc as appropriate). [2006-055 (1995) : 76]

This position would suit a recently qualified Chemistry Honours Graduate. [2006-072 (1995) : 81]

As you would expect, we offer a competitive salary and company car, plus a comprehensive range of large company benefits. [2006-073 (1995) : 81]

An extension would be considered in appropriate circumstances, subject to satisfactory review. [2006-074 (1995) : 81]

In exceptional circumstances, as for example where there have been career breaks on family or other grounds, the Institute would consider electing a Fellow aged up to 40 years. [2006-074 (1995) : 81]

The post, which is for a fixed term of three years, would ideally suit a person with postgraduate experience. [2006-076 (1995) : 82]

We offer a competitive salary and the benefits you would expect of an organisation of our calibre - 25 days’ holiday, holiday bonus, pension scheme, a subsidised restaurant and a lively sports and social club. [2006-080 (1995) : 83]

Experience in the following areas would be advantageous: basic molecular biology, bacterial and plant cell gene expression studies, phage antibody library screening, phage isolation and propagation. [1959-006 (1995) : 46]

Experience in theoretical aspects of magnetoacoustic flux tube waves would be an advantage. [1959-044 (1995) : 56]
Experience within a Power Station Chemistry or Health Physics service would be advantageous, particularly with a practical applications bias. [1959-052 (1995) : 58]

Experience of triglyceride synthesis would be preferable and experience of GC and LC methods [1959-053 (1995) : 58]

and lipid chemistry would be an advantage. [1959-053 (1995) : 58]

Experience of research in an academic or industrial setting would be an advantage, [1959-057 (1995) : 59]

as would facility with foreign languages. [1959-057 (1995) : 59]

as would the knowledge of surface analysis techniques. [1959-060 (1995) : 59]

Experience in immunocytochemistry would be an advantage. [1959-066 (1995) : 61]

Experience in molecular biology/modelling or electrophysiology would be an advantage. [1963-014 (1995) : 54]

Experience in tissue culture would be preferred but is not essential as training can be provided on site. [1963-019 (1995) : 54] [1963-021 (1995) : 55]

Previous experience of tissue culture and molecular biological techniques, including PCR would be an advantage, but is not essential. [1963-029 (1995) : 57]

Experience with mitochondrial work would be an advantage [1963-037 (1995) : 58]

Knowledge of geophysical data processing procedures would be an advantage. [1963-039 (1995) : 59]

Experience of DNA manipulation techniques would be desirable. [1963-041 (1995) : 60]

Experience of administration would be an advantage. [1963-056 (1995) : 63]

Experience with bird ecology would be an asset. [1963-062 (1995) : 64]

Experience of cytogenetics and/or molecular biology would be an advantage. [1963-065 (1995) : 64]

as would some experience of managing units. [1963-075 (1995) : 67]

Training will be given, however previous experience of semen analyses would be an advantage. [1963-079 (1995) : 68]

Previous experience of radioimmunoassay or ELISA techniques would be advantageous, but is not essential. [1963-079 (1995) : 68]

Experience in virology and the use of molecular biology techniques would be an advantage. [1963-085 (1995) : 70]

Experience in computer modelling would be advantageous but is not essential. [1963-091 (1995) : 71]

Previous experience in the characterisation of polymeric materials would be an advantage. [1963-091 (1995) : 71]

Experience in computing and word processing would be an advantage. [1963-095 (1995) : 73]

Experience in molecular biology and a strong interest in membrane protein biochemistry would be an advantage. [1967-001 (1995) : 60]

Experience in unstructured mesh generation or parallelisation techniques would be of particular interest. [1967-002 (1995) : 60]

Experience in the dissolution and solution behaviour of polymers/phase control of polymer dispersions would be an advantage. [1967-003 (1995) : 61]

Knowledge of separation techniques such as HPLC and GPC would be an added advantage. [1967-003 (1995) : 61]
Experience of patient care, computer systems and on-line searching **would** be an advantage, but full training **will** be provided, if necessary. [1967-004 (1995) : 62]

Previous experience in running human feeding trials **would** be an advantage. [1967-007 (1995) : 64]

Previous experience in cell culture techniques **would** be an advantage. [1967-007 (1995) : 64]

Additional experience in stable isotope techniques **would** also be a benefit but not essential as training **will** be provided in mass spectrometry and combined LC-MS procedures. [1967-007 (1995) : 64]

some experience in the use of Spectrophotometers HPLC and Electrophoresis **would** be an advantage. [1967-008 (1995) : 65]

Knowledge of a cGMP within a pharmaceutical environment **would** be a distinct advantage. [1967-008 (1995) : 65]

Experience of HPLC, TLC and radioanalytical methods is essential and knowledge of regulatory guidelines **would** be beneficial. [1967-011 (1995) : 66]

Experience in the applications of liquid crystals as spatial light modulators or in the optical design and testing of astronomical spectrographs **would** be an advantage. [1967-036 (1995) : 73]

Some experience in Duplex scanning **would** be an advantage. [1967-038 (1995) : 74]

Experience of seed storage methods and/or embryo culture **would** be an advantage. [1967-046 (1995) : 76]

Additionally, experience in data management and/or life sciences **would** be beneficial. [1967-049 (1995) : 77]

Applicants **should** be educated to GCSE standard and it **would** be desirable if you had previous experience of working in a laboratory environment and handling clinical specimens. [1967-065 (1995) : 81]

Experience in cell culture techniques **would** be an advantage but is not essential. [1967-082 (1995) : 85]

The ideal applicants **must** have a relevant science degree and previous experience of trial monitoring **would be preferred**. [1967-090 (1995) : 86]

Some experience of computer modelling and communications systems or electromagnetic theory **would** be an advantage. [1971-003 (1995) : 55]

However, some experience in scientific data analysis using FORTRAN on PCs **would** be an advantage. [1971-003 (1995) : 55]

Some experience in developing microwave systems and prototype electronics **would** be an advantage. [1971-003 (1995) : 55]

Experience in gas and liquid chromatography is essential, and a knowledge of residue field operations **would** be an advantage as you **will** be involved in the planning and implementation of supervised residue field trials, subsequent analysis and reporting of data to G.L.F [1971-007 (1995) : 57]

Research experience in the role of fauna in soil processes **would** be a particular advantage. [1971-008 (1995) : 58]

Laboratory experience and a good aseptic technique **would** be advantageous. [1971-009 (1995) : 58]

Some familiarity with the use of computer based laboratory data capture systems **would also** be advantageous. [1971-018 (1995) : 61]

Candidates **should** have a Ph.D. in Materials Science or Applied Physics or substantial experience working with thin film and laser ablation, additionally experience with microfabrication processes **would** be an advantage. [1971-021 (1995) : 62]

Experience of leading projects and developing decision systems is essential, whilst a knowledge of agriculture and specific problems faced in agricultural decision-making **would** be an advantage. [1971-025 (1995) : 63]

Experience in the HLA field **would** be an advantage. [1971-028 (1995) : 64]

Experience of single cell microfluorimetry **would** be an advantage. [1971-034 (1995) : 66]

Experience of Quality Systems in the healthcare industry **would** be an advantage, but enthusiasm, drive and energy **will** be of prime importance. [1971-041 (1995) : 68]

Experience in molecular biology or biophysical techniques **would** be an advantage. [1971-058 (1995) : 74]
A previous working knowledge of precious metal chemistry or inorganic chemical production experience would be helpful. [1971-059 (1995) : 74]

Persons with experience in the following areas would be of particular interest: [1971-062 (1995) : 75]

The research will include the overexpression and mutagenesis of genes enclosing bacterial membrane proteins, and experience in the areas of molecular genetics or membrane transport would be an advantage. [1971-089 (1995) : 80]

The course will be suitable for students with a background in medicine, dentistry, veterinary science or basic science, but previous experience in histopathology would be an advantage. [1971-099 (1995) : 83]

as would experience in marketing of a professional discipline or with the management of intellectual property. [1976-011 (1995) : 62]

Experience in products for skincare would be an advantage for one of these positions. [1976-013 (1995) : 64-65]

A good knowledge of antimicrobial agents and susceptibility testing would be an advantage. [1976-013 (1995) : 64-65]

Experience in teaching would be an advantage. [1976-014 (1995) : 66]

In addition, experience in in situ hybridisation and gel electrophoresis would be advantageous. [1976-023 (1995) : 68]

Candidates would be expected to have had experience of preparing materials for students up to A-level physics and hold an appropriate BTEC, HNC or City and Guilds qualification. Experience of working with Apple Macintosh or PC's will be an advantage. [1976-035 (1995) : 71]

Research experience with biological control systems would be an advantage. [1976-041 (1995) : 72]

Experience in fungal genetics and/or molecular cloning techniques would be advantageous. [1976-057 (1995) : 76]

Experience of one or more of the above techniques would be an advantage, but is not essential, as suitable training will be given. [1976-069 (1995) : 79]

as would experience of computer-based word and data processing. [1976-077 (1995) : 81]

Regulatory or biotechnology experience would be an advantage. [1976-081 (1995) : 82]

Experience with the application of advanced information technology to the complex problems of natural resource and environmental planning and management would be highly advantageous. [1976-087 (1995) : 84]

Experience of IMS is particularly relevant, and a broad awareness of other detection techniques would be valuable. [1980-002 (1995) : 51]

Experience of working to the ISO 9000 quality system would be an advantage. [1980-030 (1995) : 63]

Previous experience with cell culture, molecular biology and data analysis would be an advantage. [1980-047 (1995) : 68]

Applicants should be experienced molecular biologists, with a working knowledge of PCR and sequencing. Experience of in situ hybridisation techniques would be advantageous. [1980-051 (1995) : 68]

Although relevant experience would be an advantage, we welcome applications from enthusiastic and motivated graduates who are newly qualified. [1980-076 (1995) : 74]

Although not essential some experience in cryogenics would be advantageous. [1980-088 (1995) : 77]

Experience in microassisted reproduction would be advantageous but not essential. [1980-093 (1995) : 78]

</table>
A working knowledge of ISIS, with UNIX and/or VMS experience would be a distinct advantage. [1998-053 (1995) : 89]

While relevant experience in computer simulation or molecular modelling would be beneficial, it is not essential. [1998-064 (1995) : 91]

Experience in giving training would be an advantage. [1998-079 (1995) : 95]

It would be useful to have experience of a diversity of practical techniques such as cell culture, protein isolation, assay development, detection technologies and kinetic analysis. [1998-094 (1995) : 100]

You should have a degree or similar in a physics, materials science or similar field and relevant experience would be an advantage. [2002-012 (1995) : 57]

The future use of molecular techniques is envisaged and relevant experience would be an advantage. [2002-014 (1995) : 58]

Experience in giving training would be an advantage. [2002-020 (1995) : 60]

Candidates would ideally have experience in optimization methods, modal analysis or artificial intelligence [2002-030 (1995) : 64]

XRF experience would be a distinct advantage for one post and NMR experience essential for the other. [2002-031 (1995) : 64]

Cell biology experience would also be useful. [2002-046 (1995) : 68]

The research programme will be in the area of quadruple ion trap/ion mobility spectrometry and experience of instrumental development and the use of ion simulation software would be particularly welcome. [2002-053 (1995) : 70]

Programming experience in a medical imaging/graphics environment would be advantageous. [2002-068 (1995) : 75]

Experience of nucleic and acid fingerprinting methods would be advantageous although training will be given. [2002-078 (1995) : 77]

Some experience within the food industry would be preferable. [2002-078 (1995) : 77]

Experience in microbiology or communicable disease e.g. hospital laboratory work would be desirable. [2002-080 (1995) : 78]

Practical experience in water quality management, applied ecology or ecotoxicology would be a distinct advantage. [2006-011 (1995) : 63]

Previous experience in the pharmaceutical industry would be an advantage, but is not essential. [2006-019 (1995) : 66]

Experience in recombinant DNA techniques would be extremely useful. [2006-028 (1995) : 68]

Experience in Computer Vision, Image Processing (including functional imaging and image registration) and C++ (or other Object-Oriented programming languages) would be an advantage. [2006-030 (1995) : 69]

Experience of microwave design tools would be an advantage. [2006-035 (1995) : 70]

Experience of statistics of data handling and computing would be an advantage. [2006-037 (1995) : 71]

Post-doctoral experience and some background in protein nutritional assays would be an advantage. [2006-038 (1995) : 71]

Candidates will have a strong degree in chemistry or materials science and will probably have a Ph.D.; post-doctoral or industrial experience would be an advantage. [2006-041 (1995) : 73]

| Ex | Previous exposure to histological, haematological and physiological measurement techniques would be an advantage. [2006-055 (1995) : 76] |
| Ex | Previous experience of CFD or reaction kinetics would be beneficial. [2006-057 (1995) : 76] |
| Ex | Familiarity with marine or satellite - derived gravity data, with the development of database systems, or with the PV-WAVE software environment would be an advantage. [2006-059 (1995) : 77] |
| Ex | Familiarity with glass technology and ceramic powder processing along with a proven ability in carrying out research projects would be advantageous. [2006-061 (1995) : 78] |
| Ex | While 3–4 years experience in a similar environment would be ideal, it is essential that you have a working knowledge of one or more of the following: radioactive handling, physical chemistry, physics, materials science, experimental work, measurement techniques. [2006-087 (1995) : 85] |
| Ex | Previous experience of Immunology would be an advantage but not essential. [2006-088 (1995) : 85] |
| Ex Co | Specific knowledge of colloid chemistry and “BASIC” as a software language would be an advantage. [1963-070 (1995) : 66] |
| Ex Co | An understanding of the use of nuclear science in industry and the structure of Australian industry would be desirable. [1967-005 (1995) : 62] |
| Ex Co | Requires several years analytical chemistry experience and previous involvement with animal studies would be advantageous. [1967-011 (1995) : 66] |
| Ex Co | We are looking for a graduate with a good understanding of at least one area of neurosciences and at least one year's postgraduate experience; further experience in research or scientific editing and an interest in electronic media would be an advantage. [1989-019 (1995) : 63] |
| Ex Co | Previous involvement in ecotoxicological risk assessment with particular reference to pesticides would be an advantage, [1993-006 (1995) : 53] |
| Ex Di | Experience in the use of radioactive isotopes, use of computers (wordprocessing, spreadsheets and statistics) and some physiological measurement techniques would be an advantage. [1959-056 (1995) : 58] |

</tr>
<tr>
<td>Co</td>
<td>Fluency in a second European language apart from English is would be an advantage. [2493-006 (2005) : 56]</td>
</tr>
<tr>
<td>Co</td>
<td>You should have 1-6 years' post BSc experience and, although not essential, some exposure to synthetic development gained in an industrial setting would be preferred. [2493-008 (2005) : 57]</td>
</tr>
<tr>
<td>Co</td>
<td>The candidates should have relevant experience in operating GC MS, GC FID and HPLC instrumentation, knowledge of Agilent Technology systems would be an advantage. [2493-014 (2005) : 58]</td>
</tr>
<tr>
<td>Co</td>
<td>A knowledge of metabolism and experience of working within a GLP environment would be an advantage. [2493-029 (2005) : 64]</td>
</tr>
<tr>
<td>Co</td>
<td>With a pivotal role in the drug discovery and development process a sound knowledge of drug metabolism would be welcome, however it is less important than the ability to work in a multidisciplinary team, where dedication, self-motivation and effective communication are prerequisites. [2493-029 (2005) : 64]</td>
</tr>
<tr>
<td>Co</td>
<td>You would be expected to work in a very flexible way, rapidly defining requirements, prioritising tasks and delivering &quot;one-off&quot; solutions. [2493-031 (2005) : 65]</td>
</tr>
<tr>
<td>Co</td>
<td>Knowledge of detergents and cleaning technology would be an advantage. [2498-007 (2005) : 52]</td>
</tr>
<tr>
<td>Co</td>
<td>Familiarity with SQL and a relational database such as Oracle or MySQL understanding of web-based programming and/or bioinformatics software tools, and some knowledge of statistics and for genetics would be a strong advantage. [2498-009 (2005) : 52]</td>
</tr>
<tr>
<td>Co</td>
<td>Good presentation skills or public speaking experience would be an asset for this post. [2498-016 (2005) : 56]</td>
</tr>
<tr>
<td>Co</td>
<td>Good presentation skills or public speaking experience would be an asset for this post. [2498-016 (2005) : 56]</td>
</tr>
<tr>
<td>Co</td>
<td>In addition, you will also need excellent interpersonal skills while familiarity with Agilent Chemstation, Bruker Hystar or Waters-Micromass Masslynx software would be an advantage. [2498-019 (2005) : 57]</td>
</tr>
<tr>
<td>Co</td>
<td>You will also join a research group with an international reputation so some foreign travel would be expected. [2498-024 (2005) : 58]</td>
</tr>
<tr>
<td>Co</td>
<td>Evidence of publishing ability would be an advantage and a full UK driving licence is essential. [2498-024 (2005) : 58]</td>
</tr>
<tr>
<td>Co</td>
<td>The ability to speak Spanish would also be an advantage. [2498-036 (2005) : 63]</td>
</tr>
<tr>
<td>Co</td>
<td>An understanding of the activities involved in formulation and device development would be an advantage. [2502-016 (2005) : 60]</td>
</tr>
<tr>
<td>Co</td>
<td>You would need to relocate to the South London Area. [2502-017 (2005) : 60]</td>
</tr>
<tr>
<td>Co</td>
<td>A working knowledge of the diversity of Scotland's maritime natural heritage together with knowledge and an understanding of Nature 2000 - the Habitats and Birds Directives - and relevant UK legislation and policies would be a distinct advantage. [2506-012 (2005) : 58]</td>
</tr>
</tbody>
</table>
A proven track record in customer, budget and project management, in the private sector, would be preferred. [2506-015 (2005) : 60]

The student should be interested in biomaterial science and would examine the sequence of events using histology, immunohistochemistry and biochemical techniques. [2506-016 (2005) : 60]

Ability in other languages would be an advantage. [2506-019 (2005) : 60]

It would be advantageous have some understanding of water distribution pipework and/or domestic plumbing but a practical mind and responsible attitude is essential. [2506-034 (2005) : 68]

The project would involve spectrophotometry, HLPC, electrophoresis and biochemical assays. [2506-067 (2005) : 76]

The student should be interested in biomaterial science and would examine the sequence of events using histology, immunohistochemistry and biochemical techniques. [2506-071 (2005) : 77]

Excellent communication skills are also essential, whilst an understanding of database interfaces and UNIX would be welcomed. [2511-006 (2005) : 53]

An appreciation of the mission and objectives of HNR would be desirable. [2511-020 (2005) : 61]

An interest in cellular immunology would be an advantage, but is not essential. [2511-035 (2005) : 63]

Knowledge of HIV and STIs would be an advantage. [2511-043 (2005) : 67]

Fluency in French is highly desirable, although a sound knowledge of the language and a willingness to study it further would be considered. [2515-009 (2005) : 57]

Whilst familiarity with the European medical devices approvals would be an advantage for these roles, full regulatory and auditing training will be provided. [2515-045 (2005) : 71]

In-depth knowledge of EU biocide requirements and the regulatory framework would be a distinct advantage. [2515-048 (2005) : 72]

Knowledge of regulatory requirements in the pharmaceutical industry would be a distinct advantage. [2515-056 (2005) : 74]

You would also need to be a good leader and team builder. [2515-061 (2005) : 76]

Exposure to, and awareness of, commercial business practices would be advantageous. [2519-034 (2005) : 66]

</table>
Ideally you would also have a biological background in a relevant discipline and will have knowledge of immunoassay development, IVDD regulations and compliance expectations. [2498-043 (2005) : 66]

A postgraduate degree or qualification and corporate membership of an approved scientific body would be desirable. [2506-002 (2005) : 54]

The role will be largely technical in its content and therefore a formal electrical engineering qualification with some recent relevant experience would be preferred. [2485-040 (2005) : 72]

Applicants would normally hold a PhD or have equivalent experience in biosensors, electronic engineering or detector physics. [2493-045 (2005) : 69]

An MSc or PhD and/or experience of horticulture or agriculture would be advantageous. [2502-007 (2005) : 56]

Knowledge/experience of protein purification and analysis, and experience in a pharmaceutical environment would be an advantage. [2506-009 (2005) : 57]

Knowledge and/or experience of nuclear power and its practical operation would be advantageous but not essential. [2515-024 (2005) : 64]

Knowledge of botanical and/or cultivated plant nomenclature and experience with scientific publications would be helpful. [2511-032 (2005) : 62]

The ideal applicant would have an MSc in Statistics, and several years' experience, preferably in the pharmaceutical industry. [2511-046 (2005) : 69]

An MSc or PhD and/or experience of horticulture or agriculture would be advantageous. [2502-007 (2005) : 56]

Knowledge of protein purification and analysis, and experience in a pharmaceutical environment would be an advantage. [2506-009 (2005) : 57]

Knowledge of botanical and/or cultivated plant nomenclature and experience with scientific publications would be helpful. [2511-032 (2005) : 62]

The role would be largely technical in its content and therefore a formal electrical engineering qualification with some recent relevant experience would be preferred. [2485-040 (2005) : 72]

Applicants would normally hold a PhD or have equivalent experience in biosensors, electronic engineering or detector physics. [2493-045 (2005) : 69]

Applicants would normally hold a PhD or have equivalent experience in biosensors, electronic engineering or detector physics. [2493-045 (2005) : 69]

The role would be largely technical in its content and therefore a formal electrical engineering qualification with some recent relevant experience would be preferred. [2485-040 (2005) : 72]

Applicants would normally hold a PhD or have equivalent experience in biosensors, electronic engineering or detector physics. [2493-045 (2005) : 69]

Knowledge of botanical and/or cultivated plant nomenclature and experience with scientific publications would be helpful. [2511-032 (2005) : 62]

The ideal applicant would have an MSc in Statistics, and several years' experience, preferably in the pharmaceutical industry. [2511-046 (2005) : 69]

Knowledge and/or experience of nuclear power and its practical operation would be advantageous but not essential. [2515-024 (2005) : 64]

A PhD or equivalent in relevant computing with experience in LabVIEW, C++, Matlab or FPGA programming would be beneficial. [2515-029 (2005) : 66]

A PhD or equivalent experience level would be desirable, together with a publication history. [2481-031 (2005) : 62]

If you would enjoy the challenge of an innovative and constantly evolving Company, this is an ideal opportunity to become a key member of a high-quality team. [2481-027 (2005) : 61]

We would particularly welcome applications from ethnic minority groups and people with disabilities who are under-represented in the University. [2481-068 (2005) : 74]

If you'd been here 10 years ago and came back now you would not recognise it. [2485-001 (2005) : 54-55]

This MSc will appeal if you have a keen interest in programming and would like to learn about HPC and parallel programming. [2485-007 (2005) : 59]

You would be working in a dynamic software development team and developing exciting 3D graphical modelling applications for the Oil & Gas industry. [2485-009 (2005) : 59]

The post would ideally suit someone. [2485-011 (2005) : 60]

who would welcome the opportunity to assist in our efforts to make practical chemistry relevant and exciting to all our students. [2485-011 (2005) : 60]

The post is for two years in the first instance and would suit a person who has completed, or is about to complete, a PhD in MRI. [2485-018 (2005) : 61]

The annual stipend for the studentships would be £15,000 (running for 3 years). [2485-021 (2005) : 62]

If you have communication and presentation skills, are prepared to take responsibility for support of scientists working in the areas of protein analysis and structure/function prediction and are interested in a career in bioinformatics, then we would like to hear from you. [2485-023 (2005) : 64]

We now seek people who would thrive on the challenges and opportunities of working in an underexploited, but expanding, area of drug discovery as key members of a company with very ambitious plans. [2485-066 (2005) : 80]
We thank all candidates for their interest and would appreciate all responses by 18 February 2005. [2485-066 (2005) : 80]

The role would suit a new graduate with a good degree in Chemistry or someone with a couple of years' post-graduation experience in a chemistry lab (not necessarily process chemistry). [2485-070 (2005) : 81]

The outcome would be prediction of solubility for relevant materials under physiologically relevant conditions. [2485-083 (2005) : 85]

During the next three years the student would join the PhD programme in one of the departments at Imperial associated with the Programme. [2485-120 (2005) : 95]

We thank all candidates for their interest and would appreciate all responses by Monday 21 March 2005. [2489-001 (2005) : 58]

Would suit a recent graduate with a good honours degree or laboratory technician. [2489-026 (2005) : 70]

Would you like to visit Ardtoe Marine laboratory? [2489-037 (2005) : 73]

Suitable candidates would be encouraged to join the BPSRG, which is aiming to achieve a 5 rating in the next RAE. [2489-047 (2005) : 76]

The position is initially offered on a one year fixed-term basis and a secondment would also be considered. [2493-003 (2005) : 50]

Wyeth Consumer Healthcare offers a highly attractive package, support for your own professional growth — and all the opportunities you would expect within our challenging international environment. [2498-020 (2005) : 57]

If you have a good degree and an interest in physical sciences or engineering, together with several years’ experience in a science related field or a PhD, we would like to hear from you. [2498-042 (2005) : 65]

In return Roche offers a competitive salary plus the excellent benefits you would expect from a blue-chip organisation, including a genuine interest in your development and progression. [2498-047 (2005) : 67]

The post would suit either a non-nurse healthcare professional or science graduate, with experience of working with patients and/or clinical trials, or a nurse looking for an introduction to research or with some research experience. [2498-052 (2005) : 69]

A chance to join a small, enthusiastic research group with superior purpose-built laboratory and horse handling facilities in Newmarket that would ideally suit a recent post-doc with equine interests. [2502-025 (2005) : 62]

Experience in any of the following would be advantageous: self-assembled monolayers; tethered lipid bilayers; membrane electrophoresis; AFM; fluorescence microscopy; cleanroom techniques. [2502-042 (2005) : 69]

If you would like to speak to a current student, discover which scholarships are available for 2005 or require any other information contact: Carla Watson, Student Enquiries, Cranfield University, Silsoe, Bedford MK45 4DT quoting ref no: NS/21/05. [2502-076 (2005) : 79]

Had Reid tried the same thing after the introduction of a new passenger screening technology developed in the UK, he would not even have reached the duty-free shop. [2506-001 (2005) : 52-53]

The group hopes to attract private investment by September, and to start clinical trials within two years, which would be fast even by privatesector standards. [2506-001 (2005) : 52-53]

Alternatively secondment from your existing employer would be welcomed. [2506-013 (2005) : 59]

This position would particularly suit a new or recent graduate. [2506-022 (2005) : 63]
 Likely to be from a hospital background, this position would suit someone who is both flexible and adaptable. [2506-029 (2005) : 66]

The position would suit a recent graduate; full training will be given. [2506-035 (2005) : 68]

If so we would like to hear from you. [2506-040 (2005) : 69]

The stipend (tax-free) would rise from £13,956 to £15,636 per year. [2506-067 (2005) : 76]

As you would expect for a company at the forefront of medical device development we are offering a highly competitive remuneration package coupled with excellent relocation assistance. [2511-022 (2005) : 58]

The smile that wouldn’t go away? [2511-026 (2005) : 60]

The position would suit a highly motivated individual with excellent written and verbal communication skills. [2511-046 (2005) : 69]

If so we would like to hear from you. [2511-040 (2005) : 69]

The group is expanding and you would contribute to defining new opportunities and areas for development. [2515-014 (2005) : 59]

We thank all candidates in advance for their interest and would appreciate all responses by our closing date Friday 23 September 2005. [2515-039 (2005) : 69]

We would welcome all applications - technicians currently working in a hospital pharmacy, those looking for a change into a hospital pharmacy or those qualifying this summer. [2515-050 (2005) : 72]

We would like you to join our team in this busy, well equipped CPA (conditional at present) and HPC Accredited Laboratory. [2515-055 (2005) : 74]

If you are excited by the challenge of efficiently purifying and characterising diverse small, drug like molecules, we would like to hear from you. [2515-057 (2005) : 74]

You will be expected to underpin and lead further developments in the Field which would allow the courses to diversify, particularly through the creation of more specialised Level 2 and 3 modules within the candidates own research areas and through the supervision of student projects and dissertations. [2515-062 (2005) : 76]

We would welcome applications from individuals with professional experience or with an academic/research background in forensic science. [2515-062 (2005) : 76]

In particular we would welcome applications from individuals who have experience in one or more of the following areas: [2515-062 (2005) : 76]

Recent reviews have indicated that the Protestant proportion of applicants to posts at Magee is lower than would be expected and for that reason we particularly welcome applicants from the Protestant community for posts at the Magee campus. [2515-069 (2005) : 78]

These reviews have also indicated that the Catholic proportion of applicants to clerical, manual and technician posts at the Jordanstown campus is lower than would be expected and for that reason we particularly welcome applicants from the Catholic community for posts in these job groups. [2515-069 (2005) : 78]

Applications are invited from candidates with expertise in any area of Molecular and Cell Biology but applicants with additional expertise in either molecular genetics or bioinformatics would be particularly welcomed. [2515-077 (2005) : 80]

This wouldn't happen in much of the rest of Europe, where the perception of engineers is quite different. [2519-004 (2005) : 50-53]
"I think this figure is higher than most people would have expected and shows how well engineers in the UK can earn," Cleasby says. [2519-004 (2005) : 50-53]

chartered engineers in their 30s would be lucky to be earning this kind of money. [2519-004 (2005) : 50-53]

In Italy, for example, a marginally higher gross salary leaves you with less buying power than you would have in a similar job in the UK, according to an international salary survey carried out this year by human resources consultancy ECA International. [2519-004 (2005) : 50-53]

Unless engineers pick their location wisely, they could find themselves worse off than they would be back home. [2519-004 (2005) : 50-53]

Rosemary Harper, a 28-year-old manufacturing process engineer at chemical company Solvay in Warrington, Cheshire, earns nearly £35,000, a figure she says she would struggle to find elsewhere. [2519-004 (2005) : 50-53]

Wouldn't you like to get involved? [2519-007 (2005) : 56]

As a Scientist you're probably attracted to the wealth of exciting projects on the horizon. However, we'd like you to look at the bigger picture. [2519-007 (2005) : 56]

Would you like to research and write fascinating technical news and features? [2519-009 (2005) : 56]

If you are interested in joining a growing hi-tech specialist analytical services company that is changing the way drugs are developed we would like to hear from you. [2519-012 (2005) : 58]

Salary for this position would be negotiable together with company pension and life insurance, private health insurance and access to sports facilities. [2519-012 (2005) : 58]

The position would suit a recent graduate as full training will be given. [2519-015 (2005) : 58]

We would appreciate all applications by our closing date of 14th October 2005. [2519-025 (2005) : 63]

This position involves editing short pieces in all of Biology for online publication and liaising with top level authors, and would suit someone seeking a career in science publishing. [2519-035 (2005) : 66]

The workgroup has UKAS accreditation and you would have a major role in ensuring this accreditation is maintained. [2519-043 (2005) : 69]

The post would suit a health professional with experience in health services research and an interest in rehabilitation. [2519-065 (2005) : 75]

We now seek people who would thrive on the challenges and opportunities of working in an under exploited, but expanding, area of drug discovery as key members of a company with very ambitious plans. [2524-002 (2005) : 52]

This is an exciting opportunity and would suit someone who is passionate and committed to contributing and impacting on global health issues.

We would like to hear from you if you have: • a background in managing the performance of both individuals and of projects in a diverse and complex research environment. • proven project management and administrative skills and experience. • a proven ability to network successfully. • excellent interpersonal, management and influencing skills as the postholder will be working across several teams and line managing staff, as well as liaising directly with trial managers, administrative and finance staff at a number of other institutions. [2524-011 (2005) : 56]

This position involves editing short pieces in all of Biology for online publication and liaising with top level authors, and would suit someone seeking a career in science publishing. [2524-044 (2005) : 65]

Whether you've recently graduated or are looking for your next career move, if you want to be at the heart of a global business and develop your career, we'd love to hear from you. [2528-016 (2005) : 65]

As the role involves multidisciplinary teams and interaction with client companies, the role would be suited to candidates with several years' relevant industrial experience. [2528-017 (2005) : 66]

The closing date is 15 December 2005 and we would prefer to receive applications by email. [2528-017 (2005) : 66]

You will ideally have a PhD in Pharmacology/Physiology or a closely related subject and additional professional experience within these subject areas would be welcomed. [2528-055 (2005) : 82]
| Ex | Experience of pharmaceutical manufacturing or quality assurance *would* be an advantage, however full training *will* be provided. [2481-030 (2005) : 62] |
| Ex | Experience in protein chemistry and/or the use of small interfering RNA *would* be an advantage. [2481-031 (2005) : 62] |
| Ex | Research experience in the fields of nuclear medicine and medical physics; experience with the SunOs and Solaris operating system and experience in software development *would* be advantageous. [2481-034 (2005) : 64] |
| Ex | Experience acquired in the pharmaceutical or biotechnology industry, in particular with natural products, *would* be a distinct advantage. [2481-038 (2005) : 65] |
| Ex | Experience in interpreting environmental modelling and having an understanding of land contamination *would be required* as well as working in multi-disciplinary organisations. [2481-041 (2005) : 66] |
| Ex | Experience of implementing database systems and/or web interfaces *would* be an advantage, but is not essential. [2481-052 (2005) : 69] |
| Ex | Experience in field-based research *would* be advantageous. [2481-053 (2005) : 69] |
| Ex | Previous experience of managing contractors, packaging/labelling for clinical supply and GCP *would* be an advantage. [2481-063 (2005) : 72] |
| Ex | Experience in signal transduction *would* be an advantage. [2481-074 (2005) : 76] |
| Ex | Previous industrial experience in the development and manufacture of ceramic and glaze products *would* be advantageous, [2485-032 (2005) : 68] |
| Ex | Experience of research including modelling and the use of large-scale datasets is highly desirable and it *would* be advantageous if you also have experience of the funding arrangements within the UK science and technology base. [2485-033 (2005) : 69] |
| Ex | as *would* experience in one or more of the following areas: [2485-042 (2005) : 72] |
| Ex | Some experience in cell biology and biochemistry *would* be advantageous. [2485-043 (2005) : 72] |
| Ex | Candidates without a degree *would* need to have a minimum of six years relevant experience. [2485-075 (2005) : 82] |
| Ex | as *would* experience of open and distance learning. [2485-086 (2005) : 86] |
| Ex | Experience with glasshouse trials or seed microbiology *would* be an advantage. [2485-091 (2005) : 87] |
| Ex | Previous experience of using ACCESS *would* be an advantage. [2485-103 (2005) : 90] |
| Ex | Medical information and literature database search experience *would* be advantageous while you must be highly-motivated and quick to learn. [2489-001 (2005) : 58] |
| Ex | Experience within an analytical sciences department and familiarity with the principles of GMP and GLP *would* be an advantage. [2489-019 (2005) : 68] |
| Ex | Some management experience *would* be an advantage. [2489-020 (2005) : 68] |
| Ex | as *would* experience in the analysis of APIs and/or drug products within the healthcare industry. [2489-022 (2005) : 69] |
| Ex | Experience of nano or capillary HPLC systems *would* be an advantage, although training *will* be provided. [2489-023 (2005) : 69] |
The Senior Programmer would need to have had experience of software project management, including supervision of other programmers. [2489-034 (2005) : 72]

Expertise in Visual Basic is essential, and a working knowledge of Fortran and C would be an advantage. [2489-034 (2005) : 72]

You should have a BSc in biology or related relevant subject and experience in gene therapy, epigenetics and gene regulation would be an advantage. [2489-039 (2005) : 74]

Financial and data management experience would be an advantage. [2489-042 (2005) : 75]

Experience of electron microscopy would be an advantage. [2489-043 (2005) : 75]

Applicants who additionally have professional experience within these subject areas would be welcomed. [2489-047 (2005) : 76]

Experience of teaching in higher education would be desirable and you will be expected to contribute to the research and consultancy activities of the School. [2489-047 (2005) : 76]

but candidates with pharmaceutical or related experience would also be considered. [2493-007 (2005) : 56]

Previous experience of kinases, GPCRs and/or nuclear hormone receptors would be advantageous. [2493-008 (2005) : 57]

Previous experience of genomics and or work in an area of Animal Health research would be preferred. [2493-009 (2005) : 58]

Experience in interfacing detection equipment with computers and software development would be an advantage. [2493-045 (2005) : 69]

It would be advantageous to have worked under GLP/GMP regulatory systems. [2493-053 (2005) : 71]

Experience of integrating molecular biology with new instrument platforms would be an advantage. [2493-054 (2005) : 71]

Electron microscopy, impedance spectroscopy and heterogeneous catalysis experience would be desirable for the Research Fellow posts. [2493-054 (2005) : 71]

Experience of working in a commercial environment would be an advantage. [2498-010 (2005) : 53]

Experience of working in a commercial environment would be an advantage. [2498-010 (2005) : 53]

If you have experience in immunoassay, IVD development, IVD systems engineering and clinical chemistry we would like to hear from you, although applications from other disciplines will be considered on merit. [2498-012 (2005) : 54]

Experience of establishing screening assays would be particularly desirable for one of these positions. [2498-019 (2005) : 57]

Alternatively, an experienced analyst with a proven track record in analytical testing or physical characterisation of materials would be suitable. [2498-027 (2005) : 59]

Several years’ postgraduate planning experience would be ideal, particularly if this involves water management. [2498-028 (2005) : 60]

The Validations Manager must possess a degree in chemistry, biological science or pharmacy, previous experience in the pharmaceutical, QA or validation role would be advantageous. [2498-038 (2005) : 64]

Previous experience in the Pharmaceutical or fine chemical, QA or Technical field would be advantageous. [2498-038 (2005) : 64]
| Ex | Previous experience of clinical research and development in a pharmaceutical company would be a major asset. [2498-047 (2005) : 67] |
| Ex | Experience of using key computer software packages, especially ABAQUS, and MS Office, would be useful. [2498-051 (2005) : 68] |
| Ex | Experience in nonlinear optics, fibre optics or photonic band-gap materials would be an advantage. [2498-054 (2005) : 69] |
| Ex | Experience in cancer cell biology with expertise in one or more of the following areas: enzymology, HPLC analysis, cell culture, molecular biology, cell signalling, fluorescent microscopy, FACS analysis would be an advantage but it is not a pre-requisite. [2498-059 (2005) : 71] |
| Ex | Experience in vascular biology would be advantageous. [2498-060 (2005) : 71] |
| Ex | Experience with patch-clamp electrophysiology or transgenic mouse production / yeast hybrids would be advantageous. [2498-063 (2005) : 72] |
| Ex | Research experience in a clinical setting and previous editorial experience would be a distinct advantage. [2502-009 (2005) : 57] |
| Ex | Experience of the complete drug development process gained within the pharmaceutical industry would be an advantage, as would some experience of safety pharmacology and DMPK. [2502-020 (2005) : 61] |
| Ex | Experience with mycobacteria and/or working in a containment laboratory would be an advantage. [2502-024 (2005) : 62] |
| Ex | Statistical experience in bioassay assessment would be advantageous. [2502-034 (2005) : 66] |
| Ex | Experience in the field of Mass Spectrometry and related techniques, such as vacuum technology or other scientific instrumentation, would be an advantage although not essential. [2502-036 (2005) : 67] |
| Ex | Experience in chemical vapour deposition and optical measurement techniques would be an advantage. [2502-040 (2005) : 68] |
| Ex | Experience in molecular cell biology, biochemistry and pharmacology would be an advantage. [2502-041 (2005) : 68] |
| Ex | Experience in electrochemistry and molecular biology would be an advantage. [2502-042 (2005) : 69] |
| Ex | Previous experience of phage display or molecular enzymology would also be an advantage. [2502-042 (2005) : 69] |
| Ex | Previous experience of phage display or molecular enzymology would also be an advantage. [2502-042 (2005) : 69] |
| Ex | A practical knowledge of molecular biology, nucleic acid and protein purification/manipulation would be an advantage. [2502-047 (2005) : 71] |
| Ex | Familiarity with cell culture techniques and FACS analysis would be an advantage. [2502-058 (2005) : 74] |
| Ex | Experience of project management and managing technical teams would also be highly advantageous. [2506-008 (2005) : 56] |
| Ex | Experience of using antibodies including scFv and Fab; HTS and/or automation; flow cytometry; molecular biology including cloning would be an advantage. [2506-020 (2005) : 62] |
| Ex | Experience with FIB systems, ion beams, electron microscopes or MEMS would be an advantage but not to the exclusion of good candidates who have demonstrated an ability to work successfully at the cutting edge of technology – particularly in some aspect of nanotechnology. [2506-042 (2005) : 70] |
| Ex | Experience in electron optics and vacuum technology would also be useful. [2506-042 (2005) : 70] |
| Ex | Experience in electronic design in one of the following would be an advantage: nanoelectronics; VLSI design and Microsystems; compact modelling for deep sub-micron technologies; computational electromagnetics in electronics. [2506-043 (2005) : 70] |
| Ex | Postdoctoral experience of working within a molecular cell biology, biochemistry and/or pharmacology laboratory would be a distinct advantage. [2506-048 (2005) : 72] |
| Ex | Experience in molecular biology would therefore be an advantage. [2506-053 (2005) : 73] |
Experience in imaging *would* be an advantage but is not essential as training *will* be provided. [2506-062 (2005) : 75]

Experience in the field of vaccines and/or Q/C *would* be advantageous. [2511-014 (2005) : 56]

Experience with this technique *would* be an advantage but full training in this, and other techniques *will* be provided if required. [2511-019 (2005) : 58]

Some experience in a laboratory or hospital environment, ability to use spreadsheet, database and word-processing packages *would* be desirable. [2511-024 (2005) : 59]

Experience of computer programming, database manipulation or forensic science *would* be advantageous. [2511-028 (2005) : 61]

We *would* also welcome applications from non-HPC registered individuals with experience in FISH technology and flow cytometry. [2511-031 (2005) : 62]

Experience in one or more of the following areas *would* be advantageous: mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming, database design. [2511-036 (2005) : 63]

Computer literacy and a keen eye for detail are essential; editorial experience *would* be an advantage, but is not essential for candidates who have editorial aptitude and a relevant science background. [2511-039 (2005) : 65]

Experience with internet projects and html *would* be an advantage. [2511-039 (2005) : 65]

Previous experience in microinjection moulding technology and/or simulation *would* be a valuable contribution to the four-person project team. [2511-065 (2005) : 74]

Previous experience in these areas *would* be an advantage but is not essential. [2511-067 (2005) : 74]

It *would* be to your advantage to have experience in laboratory management and/or hearing biology and in setting up, running, and interpreting experiments independently. [2515-025 (2005) : 64]

Experience of managing a small team of people *would* be advantageous. [2515-026 (2005) : 65]

Experience of cyclotron technology *would* be an asset but is not essential. [2515-026 (2005) : 65]

A good knowledge of cGMP is a must and experience of impurity/degradant characterisation using LC-MS or NMR *would* be an advantage. [2515-027 (2005) : 65]

Any exposure to *in vivo* inflammatory models - particularly respiratory models - *would* be an advantage, although full training *will* be provided. [2515-033 (2005) : 67]

Experience of assay standardisation methods *would* be of particular advantage. [2515-036 (2005) : 68]

Experience of working within a GLP environment *would* be a distinct advantage. [2515-036 (2005) : 69]

Candidates *should* have experience in molecular biology and recombinant antigen techniques, in addition experience in virology and cell culture *would* be an advantage. [2515-049 (2005) : 72]

Some experience of chiral chromatography *would* be considered advantageous. [2515-057 (2005) : 74]

Copy-editing experience *would* be a bonus, although we *will* provide full training. [2515-059 (2005) : 75]

You *will* have a degree or equivalent in a relevant subject for the SO post and for the HSO post you *would* also need relevant postgraduate experience. [2515-061 (2005) : 76]

Experience in the wine industry *would* be advantageous. [2519-018 (2005) : 60]

Project leadership experience *would* be an advantage. [2519-021 (2005) : 61]

as *would* experience of contributing as author or editor to formal regulatory documents. [2519-021 (2005) : 61]

If you have at least ten years’ relevant experience in a clinical trial environment and line management experience then we’d like to hear from you. [2519-039 (2005) : 67]

For the more senior position at least four years’ relevant experience gained in an industrial sector; for the other position relevant postgraduate experience *would* be an advantage. [2519-040 (2005) : 68]

Relevant post graduate experience *would* be an advantage. [2519-040 (2005) : 68]

Marine biological survey experience *would* be an advantage. [2519-041 (2005) : 68]
<p>| Ex | Experience in pharmaceutical pre-formulation and formulation development of therapeutic compounds, as well as experience in developing novel drug delivery systems would also be highly desirable. [2519-054 (2005) : 71] |
| Ex | Previous experience in the Pharmaceutical or fine chemical, QA or Technical field would be advantageous. [2519-058 (2005) : 72] |
| Ex | Experience in development and growth (especially of the muscles), and of molecular biology and histology techniques, would be an advantage. [2519-062 (2005) : 74] |
| Ex | Experience in avian development and growth (especially of the musculoskeletal system), molecular biology and histological analysis would be an advantage. [2519-062 (2005) : 74] |
| Ex | Experience with automated methods would be advantageous. [2519-067 (2005) : 75] |
| Ex | Experience with automation of electrophysiology would be useful. [2524-002 (2005) : 52] |
| Ex | Experience of ion channel medicinal chemistry would be an advantage. [2524-002 (2005) : 52] |
| Ex | Previous experience working in Flavour or related industries would be an advantage. [2524-003 (2005) : 52] |
| Ex | Previous Technical/ Production experience working in Flavour or related industries would be an advantage. [2524-003 (2005) : 52] |
| Ex | Experience of Toxicology and Environmental Fate studies is desirable, whilst knowledge of the 914/14 Biocides Directive and current ‘REACH’ legislation would be a distinct advantage. [2524-009 (2005) : 54] |
| Ex | Experience in MS Office and an awareness of ISO 9001:2000 standards would be helpful. [2524-020 (2005) : 59] |
| Ex | Experience in protein extraction, Western Blot and ELISPOT methodologies would be an advantage. [2524-030 (2005) : 62] |
| Ex | Experience with containment techniques, expression analysis or protein purification would be an advantage. [2524-037 (2005) : 64] |
| Ex | Experience of supporting military operations and trials work would be beneficial. [2524-045 (2005) : 66-67] |
| Ex | Experience in anti-cancer drug discovery would be very useful, although job specific training will be provided. [2524-060 (2005) : 74] |
| Ex | Experience in plasma enhanced chemical vapour deposition and optical measurement techniques (e.g. photoluminescence spectroscopy and waveguide measurements) would be an advantage. [2524-061 (2005) : 74] |
| Ex | Prior experience of spectrometry, both UV-visible and infrared, would also be an advantage. [2524-070 (2005) : 76] |
| Ex | as would experience of working in a Category 3 laboratory. [2524-076 (2005) : 78] |
| Ex | Patent searching experience and/or practical industrial medicinal chemistry experience would be desirable. [2528-023 (2005) : 68] |
| Ex | Scientific publishing or industry information experience would be advantageous, [2528-023 (2005) : 68] |
| Ex | Experience of working in, or undertaking research funded by the pharmaceutical industry would be an added advantage. [2528-032 (2005) : 72] |
| Ex | Experience with identification of plant diseases and use of ELISA based assays would be an advantage. [2528-034 (2005) : 72] |
| Ex | Candidates with experience in the establishment and growth of a bio-technology or similar business and essential interpersonal and leadership skills would be ideally suited to this post. [2528-039 (2005) : 75] |
| Ex | Previous P&amp;L responsibility would be advantageous. [2528-039 (2005) : 75] |
| Ex | Some experience in project management database design, programming or GIS would be a distinct advantage although training will be provided where necessary. [2528-040 (2005) : 75] |
| Ex | In vivo modeling experience is necessary, while in vitro experience would be an advantage though is not essential. [2528-043 (2005) : 77] |</p>

</tbody>
</table>
A sound basis in German would be a considerable advantage. [2545-038 (2006) : 74]

Your job would be to research topics right through to putting together the full agenda plus workshop for a three-day event, attending and opening the event. [2545-039 (2006) : 74]

Reasonable fluency in two European languages would be an advantage. [2545-055 (2006) : 81]

Additional expertise in Java, web development and databases (Oracle/MySQL) would be advantageous. [2545-061 (2006) : 83]

A practical knowledge of protein purification, molecular biology and cell culture would be an advantage. [2545-072 (2006) : 87]

Evidence of productive scientific output in the form of publications and presentations would be an advantage. [2550-042 (2006) : 76]

The applicant would be expected to carry out fundamental research in one or more of the IMRC research areas; to have a supervisory role for other researchers (both PhD and postdoctoral); to liaise with the 12 companies who are partners in the IMRC programme. [2550-066 (2006) : 84]

Some hands on experience of recombinant DNA methods would also be desirable. [2550-066 (2006) : 84]

You will be required to work both individually and as part of the team and would be expected to contribute fully to the efficient running of the laboratory. [2554-023 (2006) : 66]

An interest in renal, metabolic, cardiovascular or gastrointestinal disorders would be preferable. [2554-032 (2006) : 70]

An understanding of cGMP would also be beneficial. [2554-042 (2006) : 76]

Knowledge of other analytical techniques would be useful. [2554-061 (2006) : 82]

An interest or knowledge in spectroscopic techniques and in the application of synthetic chemistry to biology would be an advantage. [2554-063 (2006) : 83]

Knowledge of the marine environment and an understanding of the processes taking place in the marine environment would be helpful. [2558-035 (2006) : 76]

The new researcher would be expected to conduct their own research activities in the field of short pulse interactions and develop new and novel science in collaboration with our user community in this rapidly expanding field. [2558-047 (2006) : 80]

A keen interest in natural history would be advantageous. [2558-048 (2006) : 80]

A knowledge of Food Legislation and an interest in pursuing the MChemA qualification would be an advantage. [2558-060 (2006) : 84]

Applications are invited from enthusiastic, well-motivated and organised individuals who like to fill one of these key posts and join a specialist laboratory supporting one of the largest haematopoietic stem cell transplant and immunotherapy programmes in the country. [2558-071 (2006) : 88]

You would be expected to support developments in the Field [2558-079 (2006) : 92]

Bases accreditation would also be welcomed, but is not essential. [2558-085 (2006) : 94]

Expertise in numerical modelling, such as Finite Elements and/or Computational Fluid Dynamics, would be an advantage. [2558-093 (2006) : 96]

Knowledge of livestock agriculture and an understanding of commercial issues within the animal health or animal breeding industries would be an advantage for the Trainee position and essential for the full Technology Translator role. [2563-015 (2006) : 56]
An appreciation of the mission and objectives of HNR would be desirable. [2563-020 (2006) : 57]

Knowledge of plant biology/taxonomy and experience of fieldwork would also be advantageous. [2563-023 (2006) : 58]

Familiarity with the role of the statistician in QA and ethical review would be beneficial. [2563-035 (2006) : 62]

It would be desirable if you have already obtained the ARTP (part 1) examination and you should either be RCCP registered or at least working towards it. [2563-037 (2006) : 62]

A good working knowledge of Excel and Access would be advantageous. [2563-051 (2006) : 67]

Knowledge of foreign languages, particularly Spanish or Portuguese would be an advantage. [2567-012 (2006) : 55]

Knowledge of pharmacovigilence, the PAGB/ABPI codes of practice, legislation for cosmetics and medical devices would be advantageous but not essential as training will be provided. [2567-020 (2006) : 59]

Knowledge of a second European language or knowledge of Chinese would be an advantage but not essential. [2567-037 (2006) : 66]

The ideal candidate would be a highly motivated synthetic organic chemist with expertise in small molecule and protein modeling. [2567-014 (2006) : 56]

Knowledge of a second European language or knowledge of Chinese would be an advantage but not essential. [2567-029 (2006) : 62]

The KTP associate would be required to undertake an NVQ level 4 in management [2567-037 (2006) : 66]

and would be expected to register for a higher degree if appropriate. [2567-037 (2006) : 66]

and would be expected to participate in and contribute to the success of the product range. [2567-046 (2006) : 68]

We would hope that the successful applicant will start no later than the beginning of December 2006. [2567-062 (2006) : 77]

If you were accepted for the post you would be responsible for maintaining and improving this computer system as well as other pieces of support equipment. [2567-062 (2006) : 77]

You would help him to prepare and deliver seminars and public lectures and assist with scientific papers. [2567-062 (2006) : 77]

You would also accompany Professor Hawking on his many travels and assist other members of the group. [2567-062 (2006) : 77]

The appointment would be for a period of up to 12 months with the possibility of extension for a further year. [2567-062 (2006) : 77]

An understanding of Microsoft access and familial genetics would be advantageous. [2567-072 (2006) : 80]

These strategic posts will also be supportive of Ireland's role and position within the healthcare, medical device, biotechnology industries, to which the candidates would be expected to develop strong links. [2572-011 (2006) : 64]

If you have talent and drive and would thrive in a dynamic company positioned to make a big impact, NTERA may be the place for you. [2572-015 (2006) : 66]

Candidates will need to hold a PhD (or equivalent post-graduate degree) in a life science, ideally in molecular biology or biochemistry or a related field, and an understanding of the general drug discovery process would be an advantage. [2572-024 (2006) : 70]

Evidence for the handling (generation, amplification, measurement etc) of ultra-short laser pulses would also be an advantage. [2572-061 (2006) : 86]

<tr>
<td>Di Ex Co</td>
<td>A background in space plasma physics, experience of handling large datasets, and familiarity with any of the following would be an advantage Perl, C/C++, LINUX, IDL. [2576-092 (2006) : 91]</td>
</tr>
<tr>
<td>Di Ex Co</td>
<td>You would need a degree or equivalent qualification in chemistry, laboratory experience and an inquiring mind. [2580-039 (2006) : 66]</td>
</tr>
<tr>
<td>E</td>
<td>As you would expect, the non-destructive assay of radioactive materials is crucial to AWE and this role will help to ensure the highest possible standards. [2533-018 (2006) : 51]</td>
</tr>
</tbody>
</table>
So, if you *would* like to work for - or be permanently placed by - a company that doesn't just fill vacancies but helps create fulfilling careers, a company that *will* coach you, counsel you and remain committed to you and your development, then why not talk to us about the diverse range of opportunities we have available? [2533-035 (2006) : 56]

**Would** you like to contribute to improving the quality of life? [2533-053 (2006) : 61]

Applications for a three-year PhD *would* be welcome from individuals who already have a Masters in an appropriate scientific discipline. [2533-065 (2006) : 64]

The Wellcome Trust *would* like to invite applications for the autumn 2006 intake to its Four-Year PhD Programmes. [2533-066 (2006) : 65]

There *would* be an opportunity in due course for career advancement [2533-006 (2006) : 58]

The post *would* be ideal for a health professional (nurse, therapist or other) either looking for an introduction to research, or with some research experience. [2537-068 (2006) : 82]

The position *would* suit a capable experimentalist who wishes to make a contribution to an exciting and rapidly growing area of technology. [2537-082 (2006) : 85]

If you have the ability to be a key member of a Team which is actively involved in a wide range of pollution related issues and environmental initiatives, we *would* like to hear from you. [2541-046 (2006) : 76]

This Centre's role is to perform particle accelerator research and development and the team you *would* join are experts in the design, construction and development of advanced high-energy particle accelerators. [2541-062 (2006) : 81]

The work, based at Daresbury Laboratory in North Cheshire, *would* support the development of UK and international accelerator projects, including the commissioning and development of the energy recover linac prototype (ERLP), the design of a highly advanced national light source 4GLS and research towards the International Linear Collider (ILC). [2541-062 (2006) : 81]

but because of the variety of tasks required for this post, graduates from other disciplines *would be considered*, given willingness to learn. [2541-074 (2006) : 84]

This post *would* suit someone with relevant experience of monitoring clinical trials and a proven ability to deal appropriately with people at all levels. [2541-079 (2006) : 86]

For this new role we *would* welcome applications in any area of Biomedical research, [2541-088 (2006) : 89]

but wish particularly to encourage applicants whose experience and expertise *would* strengthen and complement the existing research profile of the school. [2541-088 (2006) : 89]

It *would* be foolish to think Cancer Research UK, the charity I lead, can succeed alone. [2545-004 (2006) : 56-59]

Any experience in a Metabolomics environment *would* be advantageous. [2545-033 (2006) : 72]

Skiers and scientists alike *would* agree that this is a country with much to boast about both. [2550-006 (2006) : 56-57]

The project *would* suit someone with an interest in molecular immunology, and with skills in molecular biology (siRNA). [2550-024 (2006) : 68]

Are you interested in biological systems, animal health and/or food safety, and *would* you find the challenge of these complex issues stimulating? [2550-029 (2006) : 70]

"I have much more influence than I *would* in research," he says. [2554-001 (2006) : 58-59]

If you’re ready to transfer your skills to our organisation and take on a new and considerable challenge, then we *would* like to hear from you. [2554-005 (2006) : 61]

Pharmaceutical R&D is at a crossroads, but *would* you be able to identify the key issues? [2554-028 (2006) : 68]

Starting salary *would* be in the region of £30,000 per annum, plus a generous benefits package including pension scheme and private medical insurance. [2554-031 (2006) : 70]

In return, Roche offers the opportunity to develop your skills at a global level as well as all the rewards you *would* expect of a world class organisation. [2554-036 (2006) : 73]

Funding for this position is available for up to one year and the position *would* suit part-time working (minimum of 26 hours per week) if appropriate. [2554-052 (2006) : 80]

Part-time hours (approximately 7.5 per week) *would* preferably be two half days per week, although there is some flexibility in the hours worked. [2554-052 (2006) : 80]
You would be working within an innovative physical chemistry research environment, supporting business units in applying physical chemistry principles to developing test methods to research and evaluate lubricants and lubricant additive performance. 

In fact, we would be first to recognise the essential contribution that salespeople make to UK business.

The US indisputably outperforms all other nations across a range of measures showing the vigour of its science base, and if this were a marathon, the UK would probably finish several hours behind.

The UK would, nonetheless, often be a valiant runner-up.

If the change goes ahead, it would likely signal the demise of the Particle Physics and Astronomy Research Council (PPARC), which spends a large chunk of its budget on facilities of this kind. The remainder of its responsibilities - the funding of physics and astronomy projects - would be brought under the enlarged umbrella of the Engineering and Physical Sciences Research Council (EPSRC).

The posts would suit science graduates with a BSc in molecular biology, biochemistry or a related subject, with research experience.

This office based role would suit a biology graduate keen to pursue a career in clinical trials.

which would allow the courses to diversify particularly through the creation of more specialised Level 2 and 3 modules within your own research areas and through the supervision of student projects and dissertations.

We would welcome applications from individuals with professional experience or with an academic/research background in forensic science.

In particular we would welcome applications from individuals who have experience in forensic applications of DNA.

Applications would be particularly welcomed from candidates who are BASES accredited.

We would positively welcome early applications from suitable qualified individuals.

In return, we offer excellent development prospects, coupled with the salary and benefits you would expect of an internationally renowned and successful organisation.

This position involves editing short pieces in all of Biology for online publication and liaising with top level al and would suit someone seeking a career in science publishing.

In fact, we would be first to recognise the essential contribution that salespeople make to UK business.

The Fellowship is funded for a fixed term period of five years after which, subject to the successful completion of the University’s probationary period, the post would normally be fully established as a University lectureship.

Candidates with expertise in surface and thin film analysis or molecular spectroscopy would also be welcomed.

This project would suit a student with a strong interest in protein kinases, signal transduction and cancer biology.

"The executive running a fairly big organisation needs to be challenged, to be asked very difficult questions," says Walport, adding that some government departments would benefit from such accountability.

Are you a great scientist who would like to be at the forefront of scientific innovations and developments?

If you are a State Registered, Specialist Biomedical Scientist in Immunology and you are hard working, with a thirst for knowledge, then we would like to hear from you.

The person appointed would be a key member of an enthusiastic, innovative team led by the HPLC Product Manager.
The introduction of novel research collaborations or themes to researchers would also be beneficial, along with the ability to communicate effectively to a wide range of personnel. [2567-048 (2006) : 69]

In fact, we would be first to recognise the essential contribution that salespeople make to UK business. [2567-052 (2006) : 70]

The post would suit a recent doctoral student or someone wishing to return to academia and can be offered on a part time/job share or full time basis. [2567-064 (2006) : 77]

The position would suit a recent graduate or postgraduate looking to gain experience in teaching, administration or involvement with the European Commission. [2567-071 (2006) : 80]

“It would be a very easy thing for us to be reinventing the scientific wheel on a small island in the Atlantic,” he says. [2572-006 (2006) : 58-61]

If researchers can improve the cells’ productivity it would mean better supplies of valuable pharmaceutical protein and lower manufacturing costs. [2572-006 (2006) : 58-61]

How would you describe the research environment? [2572-006 (2006) : 58-61]

This role would suit a biomedical graduate looking to begin a career in publishing. [2572-045 (2006) : 80]

In fact, we would be first to recognise the essential contribution that salespeople make to UK business. [2572-065 (2006) : 88]

The post would suit a science graduate with or without a PhD, or someone with a background in ultrasound or other imaging techniques. [2572-081 (2006) : 94]

You would work as part of a leading-edge, interdisciplinary team, assisting in the processing of customer samples and the development of new applications. [2576-012 (2006) : 65]

You would handle a broad variety of technical subject matter in accordance with your skills and experience. [2576-033 (2006) : 73]

however Dr Cymru would consider candidates who have operational experience in other areas of the water industry as long as knowledge and interest can be demonstrated. [2576-036 (2006) : 74]

The position would offer the opportunity for placements across the business, but particularly within the operational water resource areas. [2576-037 (2006) : 74]

However, Dr Cymru Welsh Water would also give consideration to a graduate with a relevant first degree who can demonstrate enthusiasm in this area [2576-037 (2006) : 74]

and would like to further their development ‘on-the-job’. [2576-037 (2006) : 74]

As part of the graduate programme, we would consider supporting the right person through additional academic qualifications. [2576-037 (2006) : 74]

Pharmaceutical R&D is at a crossroads, but would you be able to identify the key issues? [2576-043 (2006) : 76]

This position involves editing short pieces in all of Biology for online publication and liaising with top level authors, and would suit someone seeking a career in science publishing. [2576-052 (2006) : 79]

This post would suit someone with a first degree in the life sciences, with an interest in the communication of scientific information. [2576-065 (2006) : 81]

In fact, we would be first to recognise the essential contribution that salespeople make to UK business. [2576-071 (2006) : 84]

Opportunities may exist for further training and research would be encouraged. [2576-072 (2006) : 85]

This post would particularly suit applicants who have an interest in the practical application of clinical research data and will provide the opportunity to work within a large and vibrant multi-disciplinary clinical research group and for international collaboration with experts in the field. [2576-078 (2006) : 87]

WOULD YOU CONSIDER MOVING BACK TO THE UK? [2580-003 (2006) : 52-55]

Given the right offer, I would certainly consider it, but it will be hard to beat the location and lifestyle we have at the moment. [2580-003 (2006) : 52-55]

Lars Arendt-Nielsen, co-director with Sinkjaer of SMI and a professor at Aalborg University says that when the centre was first established, researchers recognised that they would have to attract international students to fill at least half of the research positions. [2580-003 (2006) : 52-55]
"We knew we would run short of qualified researchers," he says. [2580-003 (2006) : 52-55]

Applications in all relevant areas of bone biology will be considered, but those which increase understanding of the role of RANK, RANKL or OPG in bone biology would be particularly welcome. [2580-008 (2006) : 57]

In fact, we would be first to recognise the essential contribution that salespeople make to UK business. [2580-049 (2006) : 70]

It would be suitable for a nurse with an interest in research or a graduate with clinical research experience. [2580-060 (2006) : 76]

Both programmes are human-factors related, and the work in each would suit a recent graduate in psychology or cognitive engineering. [2580-075 (2006) : 80]

As well as working with some of the most innovative products available today you will also enjoy the kind of outstanding benefits you'd expect from an exceptional organisation. [2537-020 (2006) : 65]

You'll receive benefits like a final salary pension and generous holidays, and get all the opportunities you'd expect from a 12,000-strong organisation. [2541-012 (2006) : 62]

If you can demonstrate a similar combination of skills developed through a different route, we'd be keen to hear from you. [2541-016 (2006) : 64]

Paula promised she'd always be there. [2545-009 (2006) : 61]

And she made a promise that she'd be there to help every step of the way. [2545-009 (2006) : 61]

So while your specific package will depend on your level of experience, rest assured you'd be hard-pushed to match it elsewhere. [2545-040 (2006) : 75]

If you'd like to develop your professional skills, think about joining us specialising in the interesting and challenging field of radiation safety. [2563-052 (2006) : 67]

"We'd like to develop an infinity-band phone", says Ronan Farrell, director of the institute. [2572-006 (2006) : 58-61]

What have you found most attractive about the country? I'd have to say the people. [2572-006 (2006) : 58-61]

As a global market leader in human health, we provide an exciting and stimulating working environment, with state-of-the-art laboratories, and the kind of rewards you'd expect from a world-leading pharmaceutical company. [2572-059 (2006) : 85]

If you have a life sciences degree or PhD and are looking for a career in pharma/ biotech business analysis, then we'd like to hear from you. [2576-048 (2006) : 78]

Experience in the manufacture of aseptically-prepared parenterals would be a particular advantage. [2533-003 (2006) : 44]

Experience of functional cell assays, tissue culture, flow cytometry and ELISAs would be an advantage. [2533-013 (2006) : 49]

Additionally, some molecular biology experience would be an advantage. [2533-013 (2006) : 49]

Any exposure to in vivo inflammatory models would be an advantage, although full training will be provided. [2533-019 (2006) : 51]

Broad experience of clinical chemistry techniques and equipment would be advantageous. [2533-041 (2006) : 58]

Experience of presenting and publishing research papers would be advantageous. [2533-043 (2006) : 59]

Previous experience in HLPC-based analytical techniques would be beneficial. [2533-052 (2006) : 61]

Experience in a similar position or as a Senior RPS would be advantageous. [2533-054 (2006) : 62]

Good practical skills are essential and experience of solving thermal performance problems using numerical methods would be useful. [2537-002 (2006) : 57]

Experience of modelling, genetics or climate change impacts would be an advantage. [2537-005 (2006) : 58]

Candidates without these qualifications would need at least three years relevant experience. [2537-009 (2006) : 60]

Experience with automated sequencing techniques from a university, research, public health or industry sequencing laboratory would be an advantage. [2537-014 (2006) : 62]
Experience gained in a similar working environment *would* be an advantage. [2537-017 (2006) : 64]

Experience in the use of scientific instrumentation such as rheometers, spectrometers and chromatographic systems *would* be advantageous. [2537-057 (2006) : 77]

Experience in molten carbonate and/or the solid oxide fuel cell technology *would* be of considerable advantage. [2537-065 (2006) : 80]

Alternatively it *would* suit a science graduate with experience of working with people, ideally in a healthcare setting, who wishes to gain experience of research. [2537-068 (2006) : 82]

Experience in the use of scientific instrumentation such as rheometers, spectrometers and chromatographic systems *would* be advantageous. [2537-057 (2006) : 77]

Experience in single crystal x-ray diffraction *would* be an advantage. [2537-082 (2006) : 85]

Experience in the use of scientific instrumentation such as rheometers, spectrometers and chromatographic systems *would* be advantageous. [2537-057 (2006) : 77]

Experience of flow cytometry and biological functional assays *would* be an advantage. [2541-030 (2006) : 69]

Experience of single crystal x-ray diffraction *would* be an advantage. [2537-082 (2006) : 85]

Experience of single crystal x-ray diffraction *would* be an advantage. [2537-082 (2006) : 85]

Alternatively it *would* suit a science graduate with experience of working with people, ideally in a healthcare setting, who wishes to gain experience of research. [2537-068 (2006) : 82]

Experience of flow cytometry and biological functional assays *would* be an advantage. [2541-030 (2006) : 69]

Experience of molten carbonate and/or the solid oxide fuel cell technology *would* be of considerable advantage. [2537-065 (2006) : 80]

Experience in molten carbonate and/or the solid oxide fuel cell technology *would* be of considerable advantage. [2537-065 (2006) : 80]

Experience of modelling the environmental fate of pesticides and/or biocides *would* be a major advantage. [2541-023 (2006) : 67]

Experience in the use of scientific instrumentation such as rheometers, spectrometers and chromatographic systems *would* be advantageous. [2537-057 (2006) : 77]

Experience of flow cytometry and biological functional assays *would* be an advantage. [2541-030 (2006) : 69]

Experience of modelling the environmental fate of pesticides and/or biocides *would* be a major advantage. [2541-023 (2006) : 67]

Experience in molten carbonate and/or the solid oxide fuel cell technology *would* be of considerable advantage. [2537-065 (2006) : 80]

Experience of flow cytometry and biological functional assays *would* be an advantage. [2541-030 (2006) : 69]

Previous experience of experimental ecotoxicology of terrestrial and/or aquatic ecosystems *would* be advantageous. [2541-047 (2006) : 77]

Experience in the use of scientific instrumentation such as rheometers, spectrometers and chromatographic systems *would* be advantageous. [2537-057 (2006) : 77]

Previous experience of flow cytometry and biological functional assays *would* be an advantage. [2541-030 (2006) : 69]

Experience of single crystal x-ray diffraction *would* be an advantage. [2537-082 (2006) : 85]
| Ex | Experience gained in a wound-healing environment **would** be advantageous. [2545-064 (2006) : 84] |
| Ex | Experience in either or both of these **would** therefore be an advantage. [2545-070 (2006) : 86] |
| Ex | Experience of pharmaceutical clean room procedures, working with radiation or knowledge of mechanical machine installations **would** be an advantage, but is not essential as training **will** be given. [2545-072 (2006) : 87] |
| Ex | Expertise in physical characterisation methods is required and some microbiological experience **would** be an asset. [2545-079 (2006) : 89] |
| Ex | The successful candidate **should** possess a good first degree in Engineering, Materials or the Physical Sciences and some industrial experience of paints/ coatings **would** be desirable. [2545-091 (2006) : 93] |
| Ex | Research experience with lasers including short pulse generation, adaptive optics and chirped pulse amplification **would** be an advantage. [2550-023 (2006) : 68] |
| Ex | Experience in aspects of risk assessment or mathematical modelling **would** be valuable. [2550-029 (2006) : 70] |
| Ex | In this key role, you **should** have a minimum of science A level and HPLC experience **would** be an advantage. [2550-033 (2006) : 73] |
| Ex | Experience of working within matrix teams and leadership or scientific projects **will** be advantageous as **would** experience of laboratory automation and laboratory data management. |
| Ex | Experience in one (or more) of the following **would** be a particular advantage: cell culture, cell transfection, RNA interference, Western blotting and enzyme activity assays. [2550-041 (2006) : 76] |
| Ex | Experience with animal models in the field of bone and joint disease **would** be an advantage. [2550-049 (2006) : 79] |
| Ex | Experience with protein production in an industrial environment **would** be an advantage. [2550-049 (2006) : 79] |
| Ex | Experience in programming with MATLAB or JAVA **would** be an advantage. [2550-062 (2006) : 83] |
| Ex | Software packages such as FPC, Oracle based tracking tools and web interfaces **will** be used and although training **will** be provided, some experience using tracking databases **would** be desirable. [2550-034 (2006) : 72] |
| Ex | Experience in chemical and biological warfare defence, arms control (especially the Chemical Weapons Convention) or expert controls **would** naturally be useful, although full training is available. [2550-035 (2006) : 72] |
| Ex | Applicants **should** be good team workers who can demonstrate proven organizational and computer literacy skills and who possess a good eye for detail. 1-2 years’ experience in biomedical publishing **would** be advantageous. [2554-038 (2006) : 74] |
| Ex | Experience in a hazard or risk assessment activity **would** be an advantage. [2554-058 (2006) : 81] |
| Ex | Experience of coatings or polymers **would** be an advantage, but is not essential. [2554-061 (2006) : 82] |
| Ex | Organisational experience **would** be an advantage. [2554-079 (2006) : 87] |
| Ex | Experience in basic circuit design and construction **would** be beneficial. [2554-082 (2006) : 88] |
| Ex | Experience of using molecular biology techniques, especially DNA manipulation, site-directed mutagenesis, protein expression or protein-DNA interactions **would** be advantageous, but training can be provided. [2558-008 (2006) : 62] |
| Ex | Experience in molecular techniques **would** be an advantage. [2558-010 (2006) : 63] |
| Ex | Experience in immunology, molecular biology, primary cell culture, experimental models and transgenesis **would** be advantageous. [2558-011 (2006) : 63] |
| Ex | Although full training **will** be given, previous experience in cellular physiology **would** be a distinct advantage. [2558-016 (2006) : 64] |
| Ex | Experience in fluorescent microscopic techniques **would** be an advantage. [2558-019 (2006) : 65] |
| Ex | Previous experience in the Pharmaceutical or fine chemical, QA or Technical field **would** be advantageous. [2558-032 (2006) : 74] |
| Ex | previous experience in the Pharmaceutical Technical, QA or Validation role **would** be advantageous. Candidates **must** possess previous supervisory experience. [2558-032 (2006) : 74] |
| Ex | It is desirable that you have a degree in ecotoxicology or similar (e.g. environmental biology), or have taken modules in ecotoxicology, while it **would** be highly advantageous that you have experience of working in an ecotoxicity laboratory. [2558-035 (2006) : 76] |
| Ex | Previous experience of polymerisation reaction engineering methods **would** be an advantage but not essential. [2558-038 (2006) : 76] |
| Ex | Some IT experience **would** be useful. [2558-041 (2006) : 78] |
| Ex | At least three years' supervisory experience at a contract laboratory or a Public Analyst **would** be required for either position [2558-060 (2006) : 84] |
| Ex | Experience in the preparation of semen samples for assisted conception **would** be an advantage. [2558-067 (2006) : 87] |
| Ex | Previous experience of polymerisation reaction engineering methods **would** be an advantage but not essential. [2558-069 (2006) : 87] |
| Ex | Previous laboratory experience in industry or in using zebrafish as a model organism **would** be an advantage but is not essential. [2558-069 (2006) : 87] |
| Ex | Scuba diving experience **would** be beneficial but not essential. [2558-073 (2006) : 89] |
| Ex | Candidates **must** have a BSc in a biological subject and relevant research experience **would** be an advantage. [2558-084 (2006) : 93] |
| Ex | Research experience in conducting human intervention studies, analytical/laboratory skills (including -omics technologies), systematic reviewing and an interest in translational research to complement the current expertise **would** be an advantage. [2558-082 (2006) : 92] |
| Ex | Previous experience within a laboratory-based, or chemical manufacturing role with the speciality chemicals sector **would** also be an advantage. [2563-002 (2006) : 50] |
| Ex | Previous Medical Information or related experience **would** be an advantage. |
| Ex | Experience in one or more of the following areas **would** be advantageous; mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming, database design. [2563-007 (2006) : 52] |
| Ex | Full training **will** be given where necessary, but previous experience in protein chemistry or physiology **would** be a distinct advantage. [2563-024 (2006) : 59] |
| Ex | Experience with appropriate molecular biology techniques is essential and skills in microscopy and/or plant genetics **would** be an advantage. [2563-029 (2006) : 60] |
| Ex | With a BSc in Life Sciences and around four years' pre-clinical or Phase I experience, you **should** have a good knowledge of WinNonlin, while experience of a GLP/GCP environment and SAS **would** be beneficial. [2563-055 (2006) : 69] |
| Ex | Experience of working with mycorrhizal fungi **would be welcomed** but is not essential. [2563-071 (2006) : 74] |
| Ex | Experience of handling herbarium specimens, taxonomy of plants and nomenclature **would** be an advantage. [2567-012 (2006) : 55] |
| Ex | Experience with imaging software **would** be an advantage. [2567-012 (2006) : 55] |
| Ex | Previous experience in freeze drying or thermal analysis methods **would** be an advantage, together with knowledge of protein chemistry and/or formulation, however, training can be provided. [2567-016 (2006) : 58] |
| Ex | Experience in basic DNA handling, protein analysis and cell culture **would** be advantageous. [2567-022 (2006) : 59] |
| Ex | Experience of ELISAs, PCR and microbiology **would** be advantageous. [2567-026 (2006) : 60] |
| Ex | Biological, horticultural or crops experience **would** be an advantage. [2567-030 (2006) : 63] |
| Ex | as some experience of operating in a business environment. [2567-037 (2006) : 66] |
| Ex | Previous proof reading experience **would** be an advantage. [2567-042 (2006) : 67] |
| Ex | Experience of the pharmaceutical and/or communications sectors **would** be an advantage. [2567-043 (2006) : 68] |
| Ex | Experience in analysis and purification of peptides, oligonucleotides and proteins would be of benefit as the current focus of the team is in the provision of solutions for the life science market. [2567-046 (2006) : 68] |
| Ex | Previous experience within a CRO environment would be a major advantage [2567-049 (2006) : 69] |
| Ex | Experience working with databases would be advantageous. [2567-053 (2006) : 71] |
| Ex | Experience of specific batch or pharmaceutical manufacture, process modelling and analysis software, and knowledge of CGMP, plant validation and regulatory requirements would be an advantage. [2567-059 (2006) : 75] |
| Ex | The successful candidates should have a minimum of an HND in a biological subject and previous experience working in laboratory-based research would be an advantage. [2567-068 (2006) : 78] |
| Ex | Experience of specific batch or pharmaceutical manufacture, process modelling and analysis software, and knowledge of CGMP, plant validation and regulatory requirements would be an advantage. [2567-068 (2006) : 78] |
| Ex | Experience of tissue microarrays, immunohistochemistry and the management would be an asset. [2576-041 (2006) : 76] |
| Ex | Experience should include: experience in histology and previous experience in fecundity would be an advantage [2576-068 (2006) : 82] |
but not essential as would any experience in fish age and growth. [2576-068 (2006) : 82]

Research experience in these areas would be an advantage. [2576-080 (2006) : 88]

Experience of working with proteins is desirable. Experience of using mass spectrometers would be useful but not essential as training could be given. [2576-084 (2006) : 89]

Experience of working in a microfabrication clean room environment is essential and previous experience in managing a clean room facility would be an advantage. [2576-085 (2006) : 89]

Experience in synthetic organic / polymer chemistry would be advantageous. [2576-087 (2006) : 90]

It would also be advantageous to have experience of working on an international, multi-centre trial or epidemiological study and to be familiar with various computing software packages and programming languages. [2576-091 (2006) : 91]

Experience in a relevant area of Cell Biology would be an advantage. [2580-013 (2006) : 59]

Previous experience of working in the chemical industry or a regulatory environment would be preferable. [2580-032 (2006) : 64]

Experience of project management, using databases and proved technology transfer would be an advantage. [2580-038 (2006) : 66]

Experience of cell culture and cell based assays would be advantageous, but full training will be provided. [2580-055 (2006) : 71]

Experience in a regulated environment would be an advantage. [2580-056 (2006) : 72]

Practical experience in SDS-PAGE, Isoelectric Focussing, HPLC, UV-vis Spectrophotometry and/or ELISA would be an advantage. [2580-056 (2006) : 72]

Practical experience in cell culture, SDS-PAGE, Isoelectric Focussing, HPLC and/or UV-vis Spectrophotometry would be an advantage. [2580-056 (2006) : 72]

Experience of communicating scientific results would be advantageous. [2580-059 (2006) : 75]

Experience in in vivo research would also be desirable. [2580-061 (2006) : 76]

It would be advantageous to have experience with GIS and a variety of statistical software. [2580-079 (2006) : 81]

A dynamic and effective communicator, you will be highly organised and self-motivated, with good presentation and interpersonal skills. You will have an MSc or equivalent in biology or ecology and relevant laboratory experience. Some experience of working with plants would be an advantage and knowledge of plant ecology, seed biology and mathematical modelling is desirable. [2533-001 (2006) : 44]

Previous experience of working within an agency and so understanding what is required to meet the demands of clients would be an advantage, but is not essential. [2537-052 (2006) : 75]

Previous experience in data loading and a good knowledge of molecular biology or computational chemistry/chemoinformatics would be a plus. [2545-013 (2006) : 63]

Industrial experience and knowledge of the oncology area would be an advantage. [2576-007 (2006) : 63]

Previous laboratory experience of in vivo assays, good communication and organisational skills, and the ability to work independently with minimal supervision would be highly desirable. [2576-049 (2006) : 78]

Relevant work experience, knowledge of clinical research processes and an understanding of wound management therapies would be an advantage. [2580-019 (2006) : 61]

We’d like you to add several years’ experience of managing research projects, plus a commitment to publishing your work while at Waltham. [2558-056 (2006) : 83]

Some previous lab experience and knowledge of enzyme assays and screening formats would be an advantage, but full training will be provided. [2576-007 (2006) : 63]
| Ca | If you **would** like to find out more about this excellent opportunity, please telephone Ian Seng, Interim Head of Health and Safety, on 01223 494780 for an informal discussion or make contact via jjs@sanger.ac.uk. [2694-035 (2009) : 65] |
| Ca | Potential applicants **must** contact directly the University where they **would** like to work to discuss their interests and arrange a visit. [2694-046 (2009) : 71] |
| Ca | If you **would** like the chance to play a key role in this exciting new UK-based biotech venture please submit your CV with an accompanying cover letter by email to brian.mcguinness@dsl.pipex.com. [2698-037 (2009) : 65] |
| Ca | If you would like to discuss the details of this vacancy please contact: [2698-040 (2009) : 65] |
| Ca | If you **would** like to know more about these posts, please visit: www.moredun.org.uk or telephone 0131 445 5111. [2698-068 (2009) : 75] |
| Ca | If you **would** like to discuss the details of this vacancy please contact: [2698-040 (2009) : 65] |
| Ca | If you **would** like to know more about these posts, a candidate information pack is available from www.appointments.org.uk, or by ringing 0870 240 3802 quoting reference DH9017. [2702-041 (2009) : 65] |
| Ca | Let us know if you **would** like a pack in large type, Braille or tape. [2702-041 (2009) : 65] |
| Ca | If you feel you have what it takes to fulfil this demanding role and **would** like to join resolution please email your CV to applications@resochem.com telling us why you fit the bill, or call 01438 743900 for an application form. [2706-003 (2009) : 48] |
| Ca | Please apply in writing (state the reference of the job you **would** like to apply for), enclosing your CV and current salary to: [2719-005 (2009) : 48] |
| Ca | If you think you have what we are looking for and **would** like further details and an application form, please contact: [2728-032 (2009) : 66] |
| Ca | If you **would** like to discuss the details of this vacancy please contact: [2728-011 (2009) : 57] |
| Ca | If you **would** like to join us - please send a comprehensive CV, including your current salary package and notice period, together with brief details of why you believe you **would** be an asset to the Eden team to: annette.england@edenbiodesign.com and quote the appropriate reference number. The closing date is 30th October 2009. [2728-011 (2009) : 57] |
| Ca | If you feel you meet the above criteria and **would** like further details and an application form, please: [2728-007 (2009) : 57] |
| Co | You **would** be based at Diamond [2689-003 (2009) : 46] |
| Co | Further, a strong interest in translating research into practice **would** be an important advantage. [2689-033 (2009) : 59] |
| Co | Knowledge of relational database development is required (ideally in SQL Server and MS Access), Business Objects and XML **would** be an advantage. [2694-002 (2009) : 51] |
| Co | Fluency in German and previous publishing experience **would** be advantageous. [2694-006 (2009) : 54] |
| Co | Photoshop experience is a must; working knowledge of Final Cut or Flash **would** be a bonus. [2694-027 (2009) : 63] |
| Co | You **will** be professionally qualified or hold a relevant degree qualification in an engineering or science subject, knowledge in the area of marine science **would** be an advantage. [2694-047 (2009) : 71] |
| Co | Understanding of the processes of tropical deforestation, and a knowledge of current REDD discussions in various global fora, **would** also be advantageous. [2698-013 (2009) : 54] |
| Co | A working knowledge of German **would** be an advantage. [2698-030 (2009) : 61] |
| Co | An understanding of clinical trials regulation **would** be an advantage. [2702-050 (2009) : 68] |
You would contribute to the development of the Applied / Vocational Science curriculum including the new Forensic Science provision and existing programmes for Pharmacy Technicians and Dental Nursing. [2702-055 (2009) : 69]

Knowledge of systematics would be an advantage. [2706-004 (2009) : 48]

as the candidate would be expected to spend a proportion of their time developing their own trial portfolio. [2706-025 (2009) : 57]

They would be expected to play a role on the Broom's Barn management team and to take an interest in the station's developing links with schools and the public. [2706-025 (2009) : 57]

Ideally, the candidate would come with good contacts within the scientific community and the business sector [2706-026 (2009) : 57]

They would be expected to play a role on the Broom's Barn management team and to take an interest in the station's developing links with schools and the public. [2706-025 (2009) : 57]

as the candidate would be expected to spend a proportion of their time developing their own trial portfolio. [2706-025 (2009) : 57]

They would be expected to play a role on the Broom's Barn management team and to take an interest in the station's developing links with schools and the public. [2706-025 (2009) : 57]

and would be confident in exploiting them for fundraising purposes. [2706-026 (2009) : 57]

Evidence of an interest in written communication would be beneficial. [2706-027 (2009) : 58]

In-depth knowledge of EU pesticide, biocide or industrial chemical/REACH requirements and the regulatory framework would be a distinct advantage. [2711-014 (2009) : 55]

The ability to liaise with the food industry for research support would be an advantage. [2711-042 (2009) : 64]

For the position of Chair of the Panel expertise in one of the above areas would be desirable but is not essential. [2715-016 (2009) : 57]

Many projects are multi-disciplinary, so a working knowledge of engineering would also be advantageous. [2715-026 (2009) : 60]

Computer literacy would be an advantage. [2719-004 (2009) : 48]

An interest in chemistry would be beneficial. [2719-013 (2009) : 53]

Knowledge of bioinformatics, comparative genomics, micro-arrays and whole genome sequencing would be a considerable advantage. [2719-019 (2009) : 57]

Knowledge of operational flood warning systems would be an advantage. [2719-028 (2009) : 59]

In-depth knowledge of EU pesticide, biocide or industrial chemical / REACH requirements and the regulatory framework would be a distinct advantage. [2724-013 (2009) : 55]

PMP certification would be useful. [2724-015 (2009) : 57]

Skills in Oracle Discoverer and GIS would be particularly advantageous. [2724-016 (2009) : 58]

Your desire to succeed means you're able to identify and evaluate opportunities and research strategies, can learn on the fly and would relish working in a dynamic environment. [2728-014 (2009) : 58]

You will have a high level of technical competence in cell and molecular biology techniques and knowledge of virology/gene therapy would be an advantage. [2728-022 (2009) : 62]

You will have a high level of technical competence in cell and molecular biology techniques and knowledge of virology/gene therapy would be an advantage. [2728-022 (2009) : 62]

You will have a high level of technical competence in cell and molecular biology techniques and knowledge of virology/gene therapy would be an advantage. [2728-022 (2009) : 62]

All applicants should note that residence eligibility criteria apply to this scheme and applicants would normally be required to demonstrate a relevant connection to the UK (or EEA) and to be employed in the UK at the time of application. [2728-025 (2009) : 63]

An understanding of the basic principles of medicinal chemistry would be an advantage [2728-029 (2009) : 65]

An understanding of carbohydrate chemistry would be advantageous. [2728-030 (2009) : 66]

Applications from candidates with multi-disciplinary interests spanning micro and nanotechnology for healthcare, energy and / or "green" technologies would be particularly welcomed. [2728-034 (2009) : 67]

Looking ahead, our on-board hydrogen fuel system would convert conventional fuels – like petrol, diesel and ethanol – into hydrogen, right on board the fuel cell vehicle. [2733-003 (2009) : 22]

"I teach much more than I would expect to teach at Cambridge". [2733-006 (2009) : 60-61]

A working knowledge of Atomic absorption and X-Ray fluorescence spectrometry for glass analysis would be advantageous [2733-021 (2009) : 67]

as would an interest in chemical safety and environmental impact. [2733-021 (2009) : 67]
Due to the nature of the work we undertake we **would** generally require candidates to fulfil the following criteria: you **must** be a born or naturalised British citizen and one of your parents **must** be a British citizen or have substantial ties to the U.K. [2733-021 (2009) : 67]

Successful candidates **will** be computer literate; data handling/report writing skills **would** be advantageous. [2733-034 (2009) : 72]

Meteorological expertise **would** be a bonus. [2733-041 (2009) : 75]

You’d need to be fluent in Japanese to communicate study procedures to Japanese people, and have a good standard of English to describe any side effects to English-speaking medics. [2715-019 (2009) : 58]

Knowledge of bioinformatics, comparative genomics and a Ph.D. **would** be an advantage. [2706-015 (2009) : 53]

An excellent understanding of organic chemistry is essential, and experience of working as a provider of Open Access NMR analysis **would** be an advantage. [2694-018 (2009) : 59]

The successful candidate **must** have a good knowledge of PCR and sales experience **would** be an advantage. [2694-023 (2009) : 60]

Good customer interfacing skills are required and OEM contracting experience **would** be useful. [2706-023 (2009) : 56]

You will need the confidence to deal with staff at all levels and previous experience at a supervisory level **would** be advantageous. [2715-035 (2009) : 63]

A degree in a Biology, Forestry or related subject **would** be an advantage. [2694-022 (2009) : 60]

A scientific background **would** be an advantage. [2694-027 (2009) : 63]

A post-graduate qualification or relevant experience **would** be an advantage, but is not essential. [2694-037 (2009) : 66]

A degree is required, and a Ph.D. in a relevant subject **would** be an advantage. [2724-035 (2009) : 65]

A Ph.D. or equivalent and knowledge of the academic research environment and of the complexity of NHS interactions **would** be advantageous. [2694-040 (2009) : 68]

Education and/or experience in earth sciences/ minerals and business/commodities journalism/research **would** be beneficial. [2689-018 (2009) : 52]

The ideal candidate **would** be a pharmacist or life science graduate with a Ph.D. in pharmaceutics or a BSc/MSc graduate in pharmacy or life sciences with 2-3 years experience in the pharmaceutical industry in a Formulation role. [2698-021 (2009) : 58]

Applicants **must** have a life science degree (preferably a Ph.D.); previous writing experience **would** be an advantage. [2698-042 (2009) : 65]

A relevant degree, with post graduate qualifications (MSc, Ph.D.), virology and in vivo experience **would** be an advantage. [2706-010 (2009) : 51]

A Ph.D. in biomedical engineering or a related discipline is necessary and experience of contract R&D **would** be beneficial. [2706-023 (2009) : 56]

Desirable attributes **would** include a higher degree, clinical laboratory experience (state registration is an advantage) and knowledge of molecular diagnostic techniques. [2724-031 (2009) : 63]

A postgraduate qualification, experience in microbiology and an interest in bacterial molecular biology with particular experience in molecular typing and bacterial molecular epidemiology **would** be an advantage. [2737-016 (2009) : 59]

An honorary contract with the University of Birmingham **would** also be available, allowing the NHSBT laboratory to cement collaborative studies with the Institute of Cancer Studies and other departments. [2689-009 (2009) : 49]

</tbody>
</table>
They work in a focused, highly collaborative culture and benefit from the training, development and inspirational colleagues that you'd expect to find in a fast growing, international company. [2694-003 (2009) : 52]

"We'd be trying to apply British standards to a situation where you had to use local materials, so we had to make compromises to the design without compromising safety," he says. [2698-004 (2009) : 48-49]

Even if you'd rather keep the action at arm's length, you might consider encouraging the next generation of engineers for the armed services. [2698-004 (2009) : 48-49]

A life-saving drug is the last thing you'd expect to come from salmonella, but researchers at the Roswell Park Cancer Institute in Buffalo, New York, have found that this bacterium can protect against radiation. [2702-005 (2009) : 46-47]

Are you excited by the prospect of creating a new centre of excellence in Swiss Toxicology? If so, we'd like to hear from you. [2733-010 (2009) : 64]

Some organic chemistry knowledge or experience would be advantageous. [2689-005 (2009) : 47]

Experience with FACS analysis would be an advantage. [2689-008 (2009) : 48]

Experience of working with cartilaginous tissues or the intervertebral disc would be advantageous, but not essential. [2689-035 (2009) : 60]

Experience of data manipulation and relational databases would be advantageous. [2694-002 (2009) : 51]

Experience in one or more of the following areas would be advantageous: mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming or database design. [2694-014 (2009) : 57]

Experience in the use of Tecan liquid handlers and supervision of other associates would also be advantageous. [2694-024 (2009) : 61]

Whilst some prior exposure to biological research would be an advantage, it is not essential. [2694-052 (2009) : 73]

Experience of GIS, remote sensing and/or 3D modelling software would be an advantage. [2698-012 (2009) : 54]

Experience with a range of bacterial pathogens would be an advantage, although training will be given. [2698-014 (2009) : 54]

Direct experience of the pharmaceutical industry and R&D would be helpful, but not essential. [2698-032 (2009) : 61]

Experience in a biomedical science company or in health policy would be desirable. [2698-033 (2009) : 62]

Previous experience with registered charities would be useful. [2702-015 (2009) : 53]

Experience in science communication would be an advantage. [2702-016 (2009) : 53]

Experience of working with GIS (specifically ESRI ArcGIS) and Oracle database querying tools would also be an advantage. [2702-021 (2009) : 55]

Experience with project management and contract supervision would be an advantage. [2702-027 (2009) : 60]

Previous experience with registered charities would be useful. [2702-029 (2009) : 60]

Previous regulatory experience would be an advantage, but is not essential. [2706-003 (2009) : 48]

You should have a degree in veterinary science, a Ph.D. and experience of working with viral pathogens high containment facilities would be highly beneficial. [2706-010 (2009) : 51]

Project management experience would be beneficial [2706-023 (2009) : 56]
| Ex | Experience of developing and presenting training and technical seminars would be beneficial. [2706-023 (2009) : 56] |
| Ex | Relevant industrial experience would be advantageous. [2706-029 (2009) : 58] |
| Ex | If you think you have the expertise to play a vital part in the work of this important and influential committee, then we would like to hear from you. [2711-010 (2009) : 53] |
| Ex | Molecular diagnostic testing and test development experience would be an advantage. [2711-023 (2009) : 59] |
| Ex | Experience of test validation and accreditation would be an advantage. [2711-023 (2009) : 59] |
| Ex | Experience in risk assessment/mathematical modelling would be desirable but not essential as on the job training will be provided. [2711-023 (2009) : 59] |
| Ex | Line management experience would be an advantage, but is not essential. [2711-030 (2009) : 61] |
| Ex | Teaching experience and a proven track record in research would be highly desirable. [2711-037 (2009) : 63] |
| Ex | The experience will equip the candidates with a range of highly competitive skills in infection biology and genomics that would be transferable to a future career in research in the public or private section. [2711-051 (2009) : 67] |
| Ex | Experience in minerals or commodities journalism would be beneficial. [2715-005 (2009) : 50] |
| Ex | Experience developing enzyme assays, in particular those measuring protease activity or specificity, would be advantageous. [2715-007 (2009) : 51] |
| Ex | Experience with in vivo murine immunology, T cell analysis and flow cytometry would be an advantage. [2715-023 (2009) : 59] |
| Ex | For each of these roles, ideally your experience would also include the design, scale-up and optimization of processes and technologies supporting Drug Substance and Drug Product development and manufacture. [2719-009 (2009) : 51] |
| Ex | Experience in molecular biology and cell culture is essential and some experience in measuring intracellular calcium or determining ligand binding would be advantageous. [2719-010 (2009) : 52] |
| Ex | Previous experience of working in a medicinal chemistry environment would be an advantage. [2719-013 (2009) : 53] |
| Ex | Experience with yeast would be an advantage but is not essential. [2719-013 (2009) : 53] |
| Ex | Experience of analytical hplc and preparative chromatography would be beneficial. [2719-013 (2009) : 53] |
| Ex | Experience in minerals or commodities journalism would be beneficial. [2719-026 (2009) : 59] |
| Ex | While not essential, previous industrial experience would be an advantage. [2719-031 (2009) : 60] |
| Ex | as would specific experience and knowledge of climate change, life-cycle assessment, and / or environmental regulations affecting products and packaging. [2719-031 (2009) : 60] |
| Ex | Experience of working in a clinical diagnostic laboratory, nephelometric/turbidemetric assays and knowledge of foreign languages would be advantageous. [2724-022 (2009) : 60] |
| Ex | Experience in stable isotope work would be an advantage. [2724-040 (2009) : 67] |
| Ex | Experience in dealing with large pharmaceutical companies, ideally in the USA, would be an Advantage. [2728-005 (2009) : 54] |
| Ex | For specific characterisation and bioassay roles, experience in protein or carbohydrate mass spectrometry and cell based bioassays respectively would be required. [2728-006 (2009) : 55] |
| Ex | Candidates will need to have experience of running chromatography and ultrafiltration systems; previous experience in performing virus clearance validation studies would be a bonus. [2728-006 (2009) : 55] |
| Ex | Expertise/background in molecular biology, cell biology or immunology would be advantageous. [2728-007 (2009) : 56] |
| Ex | Experience of working in an R&D environment, of working outside the UK and of interacting with the EU would all be advantageous. [2728-021 (2009) : 61] |
Prior experience of qPCR and working in GLP/GMP environments would be highly beneficial. [2728-022 (2009) : 62]

Prior experience in the development of upstream manufacturing processes for biologicals and knowledge of downstream purification strategies for biological products would be highly beneficial. [2728-022 (2009) : 62]

Experience of any programming languages would be a plus. [2728-029 (2009) : 65]

Additional experience of using LC/MS systems in purity assessment and purification roles would also be an advantage. [2728-029 (2009) : 65]

You will be a life sciences graduate with strong IT skills, an interest in the emerging Cleantech sector and previous industrial experience in patent work would be a strong advantage. [2728-030 (2009) : 66]

Experience in the international arena (particularly with intergovernmental organisations) and dealing with scientific issues would be an advantage. [2728-031 (2009) : 66]

Direct experience of academic and scientific organisations would be a distinct advantage. [2733-024 (2009) : 69]

Previous relevant experience with the livestock industry (including aquaculture) would be an advantage. [2733-032 (2009) : 72]

Experience conducting glasshouse trials would be advantageous. [2733-034 (2009) : 72]

Experience of working in a School would also be highly desirable. [2733-037 (2009) : 73]

Previous experience in climate science, non-linear systems and decision making would be beneficial. [2733-041 (2009) : 75]

Experience with industrial yeast strains, fermentation design, fermentation modeling and fermentation monitoring would be an advantage. [2737-004 (2009) : 56]

Experience of any of the following would be an advantage: T cell isolation and culture, ELISA, Elispot assays, CTL killing assays and flow cytometry. [2737-015 (2009) : 59]

The successful candidate will carry out research using molecular cloning, site-directed mutagenesis, library construction, protein expression and purification, molecular modelling and directed molecular evolution technologies so experience in any of these areas would be an advantage. [2737-015 (2009) : 59]

Experience of any of the following would be an advantage: T cell isolation and culture, ELISA/Elispot assays, CTL killing assays, flow cytometry and fluorescence microscopy. [2737-015 (2009) : 59]

Prior experience of working to GCLP standards following quality assurance criteria and carrying out PCR, immunohistochemistry and microarray analyses would be an advantage. [2737-022 (2009) : 64]

Some experience in a laboratory or hospital environment, ability to use spreadsheet, database and word-processing packages would be desirable. [2702-034 (2009) : 63]

that your expertise would have been gained either in an industrial setting or within a key academic group and you will probably have been educated to Ph.D. level. [2719-009 (2009) : 51]

84% OF PROFESSIONAL SCIENTISTS WOULD RECOMMEND WWW.NEWSCIENTISTJOBS.COM TO OTHERS. [2694-051 (2009) : 72]

92% WOULD CONSULT WWW.NEWSCIENTISTJOBS.COM WEBSITE WHEN LOOKING FOR A NEW JOB. [2698-018 (2009) : 56]

84% OF PROFESSIONAL SCIENTISTS WOULD RECOMMEND WWW.NEWSCIENTISTJOBS.COM TO OTHERS. [2698-023 (2009) : 58]

84% OF PROFESSIONAL SCIENTISTS WOULD RECOMMEND WWW.NEWSCIENTISTJOBS.COM TO OTHERS. [2698-055 (2009) : 70]

92% WOULD CONSULT WWW.NEWSCIENTISTJOBS.COM WEBSITE WHEN LOOKING FOR A NEW JOB. [2702-014 (2009) : 52]

92% WOULD CONSULT WWW.NEWSCIENTISTJOBS.COM WEBSITE WHEN LOOKING FOR A NEW JOB. [2715-015 (2009) : 57]

<p>| A | Candidates should be aged 22-30; [733-070 (1971) : 46] |
| A | Candidates should be at least 31 years of age. [754-025 (1971) : 600] |
| A | Applicants for all these posts should be aged 25 - 35. [772-034 (1971) : 56] |
| A | An applicant should not have reached his 36th birthday by the 31st of March of the year in which the fellowship is to be taken up [772-093 (1971) : 64] |
| A | Candidates should not be more than 30 years of age [774-040 (1971) : 191] |
| A | but, preferably, they should be under 28 years of age. [774-040 (1971) : 191] |
| A Di | It is envisaged that the successful candidate will be under 30 years of age and have some technical experience in the iron and steel industry and should be educated to H.N.C. or equivalent in an appropriate discipline. [733-088 (1971) : 49] |
| A Di | Candidates should preferably be aged 25-32 and qualified to degree or HNC level in Chemistry. [745-037 (1971) : 60] |
| A Di | Applicants, preferably under 30, should have a degree (or equivalent) in Metallurgy. [754-049 (1971) : 602] |
| A Di | Applicants should be 30 or over (B.Sc. in electronics or equivalent essential), but if under 30 and suitably qualified, would be considered for post of Junior Technical Officer. [763-020 (1971) : 345] |
| A Di | Applicants, preferably under 26, should have G.R.I.C., B.Sc., H.N.C. or equivalent qualifications. [767-048 (1971) : 546] |
| A Di | Candidates, aged 35 to 45, should ideally be graduates in chemical engineering or engineering although qualifications in chemistry, physics or textiles would be considered. [772-012 (1971) : 53] |
| A Di Ex | Candidates should not be more than 28 years of age on taking up their Fellowship, and must hold the Ph.D. degree or have equivalent research experience. [733-010 (1971) : 38] |
| A Di Ex | Candidates should be aged 21-28, preferably with training in Chemistry to HNC level or with experience of coating technology and materials. [745-037 (1971) : 60] |
| A Di Ex | Candidates should be over 30 years of age and have a university degree with either technical or non-technical background and experience in more than one field of graduate employment. [754-030 (1971) : 600] |
| A Di Ex | Candidates should not be more than 28 years of age on taking up their awards, and must hold the Ph.D. degree or have equivalent research experience. [772-095 (1971) : Ciii] |
| Ca | Further particulars and application forms available from the Registrar of the University of Newcastle upon Tyne, 6 Kensington Terrace, Newcastle upon Tyne, NE1 7RU, with whom applications should be lodged not later than 12th February, 1971. [733-010 (1971) : 38] |
| Ca | Application forms may be obtained from the Secretary, East Malling Research Station, East Malling, Maidstone, Kent, to whom they should be returned by 1st February, 1971. [733-013 (1971) : 39] |
| Ca | Application forms available from the Secretary, University of London Institute of Education, Malet Street, London WC1E 7HS: completed forms should be returned by 1 February 1971. [733-027 (1971) : 41] |
| Ca | Applications, stating age, academic qualifications and experience, together with the names of three referees, <strong>should be received</strong> not later than 25th January, 1971, by the Registrar, The University, P.O. Box 147, Liverpool L69 3BX, from whom further particulars may be obtained. Quote Ref: RV/7325/NS. [733-028 (1971) : 41] |
| Ca | Further particulars may be obtained from the Deputy Secretary, The University, Southampton, SO9 5NH, to whom applications (7 copies from United Kingdom applicants) <strong>should be sent</strong> not later than 15 February, 1971 quoting ref. NSc. [733-030 (1971) : 42] |
| Ca | Further particulars may be obtained from the Registrar, The University, Newcastle upon Tyne, NE1 7RU, with whom applications (three copies) together with the names and addresses of three referees, <strong>should be lodged</strong> not later than 28th February, 1971. [733-035 (1971) : 42] |
| Ca | Applications giving brief details as to age, qualifications, experience, <strong>should be addressed</strong> to: [733-038 (1971) : 42] |
| Ca | Applications giving details of education, training and previous appointments <strong>should reach</strong> the Director, National Institute for Medical Research, Mill Hill, London, NW7 1AA before 28th February 1971. [733-040 (1971) : 42] |
| Ca | Applications (three copies) for either post, together with the names of three referees, <strong>should be sent</strong> to the Registrar, University of York, Heslington, York, YO1 5DD, as soon as possible, and not later than 5 February 1971. [733-044 (1971) : 43] |
| Ca | Application forms and further particulars may be obtained from the Personnel Officer, Cardiff Royal Infirmary, Newport Road, Cardiff, to whom applications <strong>should be returned</strong> by Friday, 29th January, 1971. [733-045 (1971) : 43] |
| Ca | Application forms may be obtained from the Staff Officer, University of Surrey, Guildford, Surrey, to whom they <strong>should be returned</strong> as soon as possible. [733-046 (1971) : 43] |
| Ca | Applications <strong>should be received</strong> by 13th February, 1971. [733-052 (1971) : 44] |
| Ca | Applications, quoting reference 159, <strong>should be sent</strong> to: P. G. T. Butler, Gases Division R&amp;D, The British Oxygen Company Limited, Deer Park Road, London SW19. [733-054 (1971) : 44] |
| Ca | Further particulars may be obtained from the Registrar, The University, Newcastle upon Tyne NE1 7RU, with whom applications (three copies), together with the names and addresses of three persons to whom reference may be made, <strong>should be lodged</strong> not later than 27th February, 1971. [733-055 (1971) : 44] |
| Ca | Further particulars and application forms may be obtained from the Secretary of Science, Science Office (Establishment), the University of Sussex, Falmer, Brighton, BN1 9QH, to whom completed applications <strong>should be returned</strong> as soon as possible. [733-058 (1971) : 44] |
| Ca | Applications in writing <strong>should be sent</strong> to the Staff Officer (quoting Ref. Chem Phys. E.O.3), University of Surrey, Guildford, Surrey, from whom application forms may be obtained. [733-064 (1971) : 46] |
| Ca | Application forms may be obtained from the Staff Officer, University of Surrey, Guildford, Surrey, to whom they <strong>should be returned</strong> by Friday, 22nd January, 1971. [733-072 (1971) : 47] |
| Ca | Application forms are obtainable from the Dean, Guy's Hospital Medical School, London Bridge, S.E.1., and <strong>should be returned</strong> by 1st February 1971. [733-077 (1971) : 47] |
| Ca | Applications, stating age and experience <strong>should be sent</strong> to the Secretary to the Board, The General Infirmary, Great George Street, LEEDS LS1 3EX, before 17th January, 1971. [733-078 (1971) : 47] |
| Ca | Further particulars from The Secretary, The University, Aberdeen, with whom applications (8 copies) <strong>should be lodged</strong> by 8th March 1971 (later applications from abroad will be considered). [733-085 (1971) : 48] |
| Ca | Applications giving brief relevant details on a strictly confidential basis <strong>should be forwarded</strong>, quoting ref. no. A.96049, to: [733-089 (1971) : 49] |
| Ca | Applications giving curriculum vitae and the name of two referees <strong>should be sent</strong> as soon as possible to Professor Paul A. Samet, University College London Computer Centre, 19 Gordon Street, WC1H 0AH, who will be pleased to give further details, or telephone 01-387 0858/9. [737-001 (1971) : 277] |
| Ca | Written enquiries <strong>should be addressed</strong> to – [737-006 (1971) : 277]. |
| Ca | APPLICATIONS (INCLUDING NAMES OR TWO REFEREES) <strong>SHOULD BE SENT</strong> BY 15th MARCH 1971. QUOTING REFERENCE D15. TO THE REGISTRAR, THE SENATE HOUSE, BRISTOL BS8 1TH, FROM WHOM FURTHER PARTICULARS MAY BE OBTAINED (LATE APPLICATIONS <strong>WILL BE CONSIDERED AS FAR AS POSSIBLE</strong>). [737-008 (1971) : 277] |
| Ca | Further particulars may be obtained from the Registrar, The University, Newcastle upon Tyne NE5 7RU, with whom applications (three copies), together with the names and addresses of three persons to whom reference may be made, <strong>should be lodged</strong> not later than 1st March 1971. [737-013 (1971) : 278] |
| Ca | Applications (two copies) giving full details of qualifications and experience together with the names and addresses of two referees <strong>should be sent</strong> not later than 28th February 1971, to the Secretary and Registrar, University College of North Wales, Bangor. [737-018 (1971) : 278] |
| Ca | Applications (six copies) containing the names of three referees <strong>should be lodged</strong> by 21st February 1971 with the Secretary, The University, Dundee DD1 4HN from whom further particulars may be obtained. [737-027 (1971) : 279] |
| Ca | Candidates whose applications have not been acknowledged or dispatched because of the Postal strike <strong>should</strong> telephone The Registrar’s Office (Telephone Newcastle 28511 ext 3707) as soon as possible. [737-042 (1971) : 520] |
| Ca | Applications, stating age, qualifications, experience and the names of two referees <strong>should be sent</strong> to the Registrar as soon as possible. [737-034 (1971) : 520] |
| Ca | They <strong>should</strong> ensure that their applications are enclosed in envelopes specifically marked with the number 410/211. [741-008 (1971) : 520] |
| Ca | Local residents <strong>should</strong> collect forms personally. [741-010 (1971) : 520] |
| Ca | Completed forms <strong>should be returned</strong> immediately upon the resumption of normal postal services. [741-010 (1971) : 520] |
| Ca | Further particulars may be obtained from the Secretary to the University, Old College, South Bridge Edinburgh EH8 9YL (031-667 1011 ext. 4315) with whom applications (six copies) giving the names of two referees, <strong>should be sent</strong> not later than 30th April, 1971. [741-014 (1971) : 521] |
| Ca | Applications stating age, qualifications and experience, and including the names of not more than three referees, <strong>should be sent</strong> not later than Monday 22nd March, 1971 to the Registrar, the Senate House, Tyndall Avenue, Bristol BS8 1TH, quoting reference DIS, from whom further particulars may be obtained. [741-015 (1971) : 521] |
| Ca | Applications (eight copies) giving full details of qualifications and experience together with the names and addresses of three referees <strong>should be sent</strong> to the Registrar, King’s College London, Strand, London WC2R 2LS by 15th April, 1971. [741-006 (1971) : 520] |
| Ca | Application, comprising a curriculum vitae, a detailed scheme of the composed investigation, and the names of two referees, <strong>should be sent</strong> to the Registrar, The Nature Conservancy, Merlewood Research Station, Grange-over-Sands, Lancashire, (tel): Grange-over-Sands 2264) not later than 31st March, 1971. [741-029 (1971) : 522] |
| Ca | Applications, together with the names of two referees, should be sent not later than 31st March, 1971, to Professor John Brown, Department of Electrical Engineering, Imperial College, Exhibition Road, London S.W.7. [741-030 (1971) : 522] |
| Ca | Forms should be returned before 19th March, 1971. [741-033 (1971) : 523] |
| Ca | Applications (3 copies) together with the names and addresses of three referees should be submitted to the Administrative Assistant, School of Physics, The University, Newcastle upon Tyne, NE1 7RU, not later than 31st March, 1971. (Tel: 0632/28511 Extension 3359). [741-034 (1971) : 523] |
| Ca | Further particulars from The Secretary, The University of Aberdeen, with whom applications (6 copies) should be lodged by 27th March 1971. [741-035 (1971) : 523] |
| Ca | Applications or enquiries should be sent before March 22nd to the Head of Department, J.J. Thomson, Physical Laboratories, Whiteknights, Reading RG6 2AF (Tel): 0734 85123 ext. 384. Ref: M.70 [741-036 (1971) : 523] |
| Ca | Applications should apply, giving brief details of career, to: [741-037 (1971) : 523] |
| Ca | Applications including curriculum vitae and names of three referees should be sent to the Secretary (R3), The Open University, Walton Hall, Walton Bletchley, Berks from whom further particulars can be obtained. [745-001 (1971) : 57] |
| Ca | Further particulars may be obtained from the Deputy Secretary, The University, Southampton, SO9 5NH, to whom applications (7 copies from United Kingdom applicants) should be sent not later than 20 April 1971, quoting reference NSc. [745-003 (1971) : 57] |
| Ca | Detailed curriculum vitae should be sent to Chief Personnel, WHO, Avenue Appia, Geneva, quoting Vacancy Notice Number 71/10. [745-004 (1971) : 57] |
| Ca | Applications should reach Professor H. F. Wilkins, Department of Biophysics, University of London, King’s College, 26-29 Drury Lane, LONDON WC2B 5RL, by 30th April, 1971. [745-007 (1971) : 57] |
| Ca | For further particulars and application forms, write to the Secretary Office of Arts and Social Studies (Establishment), University of Sussex, Falmer, Brighton, BN1 9QN, to whom complete forms should be returned by 19th April 1971. [745-010 (1971) : 57] |
| Ca | Application should be addressed to Prof. J. Hegin, Vice-President for Research Technion – Israel Institute of Technology, Haifa, Israel. [745-011 (1971) : 57] |
| Ca | Applications should be sent as soon as possible to: [745-013 (1971) : 58] |
| Ca | Applications should be addressed to: [745-015 (1971) : 58] |
| Ca | Applications with names of two referees should be submitted to the Head of Department, Metallurgy Department, Imperial College, London, S.W.7., by the end of April 1971. [745-017 (1971) : 58] |
| Ca | The position will be vacant from April 1st 1971 but the appointment should begin after the end of the current academic year. [745-018 (1971) : 58] |
| Ca | Applications should include a Curriculum Vitae, with details of experience and special teaching and research interests, [745-019 (1971) : 58] |
| Ca | and should reach the Assistant Director, Department of Computing and Control, Imperial College, London S.W.7, as soon as possible. [745-019 (1971) : 58] |
| Ca | Applications, giving date of birth, details of qualifications and experience and the names of two referees should be sent as soon as possible to the Deputy Secretary, The University, Southampton, SO9 5NH, quoting ref: NSc. [745-020 (1971) : 59] |
| Ca | Applications (three copies), together with the names of two referees should be sent to the Secretary to the University, Old College, South Bridge, Edinburgh, EH8 9YL, as soon as possible. [745-021 (1971) : 59] |
| Ca | Curriculum vitae with names of two referees should be sent to Dr. A.R. Jones. [745-023 (1971) : 59] |
| Ca | Applications should be received by 17th April, 1971. Further particulars may be obtained from The Secretary, The Queen’s University of Belfast, Belfast BT7 1NN, Northern Ireland. [745-025 (1971) : 59] |
| Ca | Applications should be sent to the Chief Technician, Department of Metallurgy, The University, Manchester M13 9PL. [745-026 (1971) : 59] |
| Ca | Applications should be returned to the Registrar as soon as possible. [745-032 (1971) : 60] |
| Ca | Applications or enquiries should be sent before 1 May to Dr. I. G. Austin or Dr. T. Searle, Physics Department, The University, Sheffield 3. Ref. R 43/H. [745-033 (1971) : 60] |
| Ca | Further particulars and application forms may be obtained from the Assistant Registrar, Faculty of Natural Sciences, Chemistry Building, The University, Canterbury, Kent, to whom completed applications <strong>should be submitted</strong> not later than 8th May, 1971, quoting reference A.5/71. [745-045 (1971) : 61] |
| Ca | Application: - Suitably qualified people who would like to find out more about these research opportunities <strong>should</strong> send (or telephone) a brief description of their qualifications, experience and research interests to Mr. G. I. James, ARU Administrative Office, The Culham Laboratory, Abingdon, Bercks. Tel: Oxford 41721 – Extension 480. [745-047 (1971) : 61] |
| Ca | Further particulars of these posts may be obtained from the Secretary and Registrar, and applications (2 copies) giving details of age, qualifications and experience together with the names of three referees, <strong>should be sent</strong> to reach the Secretary and Registrar by 23rd April, 1971. [745-051 (1971) : 61] |
| Ca | Applications, together with the names and addresses of two referees, <strong>should be made</strong> by Wednesday 14 April, 1971, to the Registrar, University College of Swansea, Singleton Park, Swansea, Glam., SA2 8PP. [745-055 (1971) : 62] |
| Ca | Applicants <strong>should</strong> state for which vacancy they are applying and in which of the above areas of work they are experienced. [745-059 (1971) : 62] |
| Ca | They <strong>should</strong> also quote 3837/71/71. [745-059 (1971) : 62] |
| Ca | Further particulars may be obtained from the Registrar, The University, Newcastle upon Tyne NE1 7RU, with whom applications (three copies), together with the names and addresses of three referees, <strong>should be lodged</strong> not later than 16th April, 1971. [745-060 (1971) : 62] |
| Ca | Applications, stating age, qualifications etc. together with the names and addresses of two referees <strong>should be sent</strong> to the Secretary and Registrar, University College of North Wales Bangor as soon as possible and in any case by April 19th, 1971. [745-061 (1971) : 62] |
| Ca | Further particulars may be obtained from the Registrar, University Senate House, Bristol BS8 1TH to whom applications <strong>should be sent</strong> by April 16th. [745-062 (1971) : 62] |
| Ca | Applications, in the form of a brief curriculum vitae and the names of two referees <strong>should be sent</strong> to: [745-063 (1971) : 62]. |
| Ca | Further details and application forms may be obtained from the Registrar, University of Warwick, Coventry CV4 7AL, to whom completed forms <strong>should be returned</strong> by 28th April, 1971, quoting Ref. No. 34/A/71. [745-065 (1971) : 62] |
| Ca | Further particulars may be obtained from The Registrar, The New University of Ulster, Coleraine Co. Londonderry (quoting Ref: 71/39) to whom applications <strong>should be sent</strong> not later than 26th April, 1971. [745-071 (1971) : 63] |
| CA | Applications, together with the names of three referees, <strong>should be sent</strong> as soon as possible to the Registrar, The University, P.O. Box 147, Liverpool L69 3BX. Quote Ref: RV/7413.N.S. [745-074 (1971) : 63] |
| Ca | Applications and enquiries <strong>should be sent</strong> to the Secretary, Electric Plasma Course, Engineering Science Laboratory, Parks Road, Oxford OX1 3PJ. [745-078 (1971) : 63] |
| Ca | Applications and enquiries <strong>should be addressed</strong> to Professor I. O. Rattee, Department of Colour, Chemistry and Dyeing. The University, Leeds KS2 9PT. [745-080 (1971) : 63] |
| Ca | Application <strong>should be made</strong> by May 31st 1971. [745-092 (1971) : 64] |
| Ca | Applications, stating age, qualifications and experience, with the names of two referees <strong>should be sent</strong> to the undersigned, by 31st May, 1971. [750-006 (1971) : 354] |
| Ca | The appointee will be expected to assume duty by January 1972 and to develop their teaching and research activities within the existing framework of the department, on which further information <strong>should be obtained</strong> from the Head, Professor W.R. Stern. [750-008 (1971) : 354] |
| Ca | Applications in duplicate, giving full personal particulars, qualifications and experience, <strong>should</strong> reach the Registrar, University of Western Australia, Nedlands, Western Australia, 6009 by 19th June 1971. [750-008 (1971) : 354] |
| Ca | Candidates <strong>should</strong> request three referees to write immediately to the Registrar. [750-008 (1971) : 354] |
| Ca | Applications with the names and addresses of two referees <strong>should be sent</strong> to the Secretary. [750-014 (1971) : 355] |</p>

</table>
Co Applicants should have good organising ability and relevant experience. [733-056 (1971) : 44]

Co Applicants should have research interests in either laboratory Plasma Physics, or the Physics of the Ionosphere and Magnetosphere, or preferably in both fields. [733-058 (1971) : 44]

Co Our team use a wide range of genetical and practical techniques and candidates should have initiative to devise and run a number of programmes simultaneously. [733-063 (1971) : 46]

Co Applicants should be interested in the development and evaluation of new techniques. [733-045 (1971) : 43]

Co Applicants should have good organising ability and relevant experience, [733-056 (1971) : 44]

Co Applicants should have research interests in either laboratory Plasma Physics, or the Physics of the Ionosphere and Magnetosphere, or preferably in both fields. [733-058 (1971) : 44]

Co Our team use a wide range of genetical and practical techniques and candidates should have initiative to devise and run a number of programmes simultaneously. [733-063 (1971) : 46]

Co Applicants should specialize in a major branch of mathematics. [737-009 (1971) : 277]

Co Successful applicant, who should be keen and resourceful, will have opportunity to work in routine Haematology, Blood Transfusion and to carry out Microbiological Assay work. [737-022 (1971) : 278]

Co Applicants should hold a driving licence. [741-021 (1971) : 521]

Co Candidates should have an interest in teaching electronics to undergraduates. [741-030 (1971) : 522]

Co Candidates for the post should have specialist interests in the field of the structure / property relationship in materials and of its industrial applications, and broad interests in the role of technology in the man-made world. [745-001 (1971) : 57]

Co His duties will include the operation and maintenance of sophisticated physical and electronic equipment and he should have a sound knowledge of photography, projection, and the operation and maintenance of audio visual aids. [745-029 (1971) : 59]

Co In addition to the spectrographic interest the work should appeal to those with interests in water quality, pollution and geo-chemistry. [750-024 (1971) : 356]

Co Research interests should be in one of the following areas: Power Electronics, Digital Systems and Instrumentation, Lasers. [750-025 (1971) : 356]

Co The person appointed should have a keen interest in geology and preferably be studying for an academic qualification in geology. [758-052 (1971) : 54]

Co In addition to the spectrographic interest the work should appeal to those with interests in water quality, pollution and geo-chemistry. [750-024 (1971) : 356]

Co Research interests should be in one of the following areas: Power Electronics, Digital Systems and Instrumentation, Lasers. [750-025 (1971) : 356]

Co The person appointed should have a keen interest in geology and preferably be studying for an academic qualification in geology. [758-052 (1971) : 54]

Co Candidates should have interests in some aspects of Plant Physiology. [767-043 (1971) : 546]

Co The problems arising involve linear algebra and real and complex analysis, and the person appointed should have some familiarity with these fields, although a degree is not essential. [767-018 (1971) : 543]

Co The post is based in London but candidates should be prepared to work at sea or from other centres for up to 6 months each year. [767-042 (1971) : 545]

Co Candidates should have interests in some aspects of Plant Physiology. [767-043 (1971) : 546]

Co Candidates should preferably have an interest in chemistry [772-002 (1971) : 52]

Co Three further engineers, each with a first or upper second in electrical engineering, or physics and electronics, and preferably M.Sc or Ph.D. Industrial experience is desirable, and should extend to
research development or design work on electronic circuits - pulse, digital, linear, communications, information processing or control systems. [772-034 (1971) : 56]

**REQUIREMENTS:** the successful candidate, who **must** be cheerful and flexible in approach, **should** possess: [772-065 (1971) : 60]

Applicants **should** be conversant with modern electronic theory. [774-005 (1971) : 188]

Candidates **should** normally be citizens of and permanently resident in the United Kingdom. [774-017 (1971) : 189]

Applicants **should** have interest in the design and analysis of experiments using statistical methods, but **will** also be expected to become generally involved in evaluation. [774-025 (1971) : 190]

The appointment **should be taken up** as soon as possible after 1st March, 1972. [774-026 (1971) : 190]

Research and teaching interests **should** be in microbiology and preference may be given to candidates with special interests in aspects of the physiology of whole micro-organisms. [774-035 (1971) : 190]

**APPLICATIONS** should be male aged 20-22 and preferably have O.N.C. or equivalent. 

**QUALIFICATIONS** Applicants should have a distinguished academic record with their first degree in either metallurgy or chemical engineering, experience in any aspect of chemical reaction engineering would be an advantage. [763-028 (1971) : 346]

The work **will** require knowledge of acoustics and electronic engineering and the applicant **should** be a science graduate with an appropriate Honours degree and five years relevant experience. [758-053 (1971) : 54]

**QUALIFICATIONS** Applicants **should** have a Pass Degree; HND or HNC or an equivalent qualification. [733-087 (1971) : 49]

Applicants, male or female, **should** be of about HNC or pass degree standard. [733-017 (1971) : 39]

**QUALIFICATIONS** Applicants **should** have a Ph. D. or equivalent degree from a university in Britain or higher research qualification in the field of Plant Breeding. [741-025 (1971) : 522]

**QUALIFICATIONS** Applicants **should** have a degree or equivalent qualification and a Librarianship qualification would be an additional advantage. [737-016 (1971) : 278]

**QUALIFICATIONS** Applicants **should** have a degree or equivalent qualification and a Librarianship qualification would be an additional advantage. [737-001 (1971) : 277]

Applicants **should** be qualified in bacteriology or microbiology [737-017 (1971) : 278]

Applicants **should** have two scientific “A” levels or an H.N.C. or scientific degree. [733-056 (1971) : 44]

Candidates **should** have good organising ability and possess ONC or IST qualifications in Biochemistry or Chemistry. [772-019 (1971) : 54]

The work **will** require knowledge of acoustics and electronic engineering and the applicant **should** be a science graduate with an appropriate Honours degree and five years relevant experience. [763-028 (1971) : 346]

Applicants, either men or women, **should** be of about HNC or pass degree standard. [733-017 (1971) : 39]

**QUALIFICATIONS** Applicants **should** have a Pass Degree; HND or HNC or an equivalent qualification. [733-087 (1971) : 49]

Applicants, male or female, **should** have a degree or equivalent qualification and a Librarianship qualification would be an additional advantage. [737-001 (1971) : 277]

Applicants **should** be qualified in bacteriology or microbiology [737-017 (1971) : 278]

Applicants **should** have two scientific “A” levels or an H.N.C. or scientific degree. [733-056 (1971) : 44]

Applicants, male or female, **should** have a degree or equivalent qualification and a Librarianship qualification would be an additional advantage. [737-001 (1971) : 277]

Applicants **should** be qualified in bacteriology or microbiology [737-017 (1971) : 278]

Applicants **should** have two scientific “A” levels or an H.N.C. or a scientific degree. [741-041 (1971) : 523]

</tbody>
</table>
### Ex Co
Candidates **should** preferably have had several years' practical experience of laboratory work in one of the following specialisations: haematology, biochemistry, botany, fibre technology, document or handwriting examination. [745-059 (1971) : 62]

Candidates for the present post **should** preferably have a statistical background and an interest in the application of optimization methods. [745-060 (1971) : 62]

Candidates **should** have research and/or industrial experience, and an interest in interdisciplinary studies. [758-039 (1971) : 53]

The successful candidate, who **should** have previous experience of electron microscopy, **will** be responsible for the day-to-day running of a new electron microscope laboratory, which **will** be equipped in the first instance with a high resolution transmission electron microscope. [763-013 (1971) : 344]

### Ex Di
Experience in a similar position would ensure priority consideration, but we **should** also be glad to hear from other applicants including those about to graduate. [750-045 (1971) : 358]

Candidates **should** have had previous laboratory experience in education or industry and **must** hold the City and Guilds Science Laboratory Technicians Advanced Certificate, Associateship of the Institute of Science Technology or a recognised equivalent qualification. [763-007 (1971) : 344]

Applications **should** have several years’ experience and preferably have passed the City and Guilds Science Laboratory Certificate (or equivalent) for which an additional salary allowance **will** be made. [772-028 (1971) : 55]

### A Ca
Applicants, who **must** not normally be over thirty-one years of age at that date, **should** write to the Rector at Exeter College, Oxford, OX1 3OP, for further particulars. [1963-015 (1995) : 54]

### A Co
Aged up to 28, you **should** be self-motivated, ambitious and hold at least an upper second class degree. [1963-089 (1995) : 71]

Applications **should** be young and energetic with a postgraduate degree in mining engineering and about three years industrial experience in the above areas. [2006-013 (1995) : 64]

### A Co Di Ex
Applicants **should** be at least 26 but not have passed their 40th birthday by 1 October 1995 and have between two and seven years postdoctoral experience. [1959-029 (1995) : 51]

Applicants **should** be young and energetic with a postgraduate degree in mining engineering and about three years industrial experience in the above areas. [1959-014 (1995) : 48]

### Ca
Interested persons **should** send their applications with a detailed c.v. before 15/02/1995, to: Joint Research Center, Unit "Human Resources", I-21020 Ispra (VA). [1959-003 (1995) : 45]

Applications, consisting of a CV, publication list and names of two referees, **should be sent** to Dr K A Brown, Department of Immunology, The Rayne Institute, St Thomas' Hospital, London SE1 7EH (Tel: 071 928 9292, ext 3394/3184) from whom further details may be obtained. [1959-013 (1995) : 48]

Applications **should** enclose a copy of their CV with the names of two referees, addressed to Jane Buller, Department of Electrical and Electronic Engineering, The University of Nottingham, University Park, Nottingham NG7 2RD. [1959-014 (1995) : 48]

Informal enquiries **should be addressed** to Dr K. Hoperaft on 0115 9513844 or Dr M. G. Somekh on 0115 9515572. [1959-014 (1995) : 48]

Further details are available from Professor Richard Munton, Department of Geography, University College London, 26 Bedford Way, London WC1H 0AP (tel 0171 380 7562; fax 0171 380 7565), to whom letters of application, accompanied by curriculum vitae and the names and addresses of three referees, **should be sent** by 3 February 1995. [1959-015 (1995) : 48]

**should** send a CV, description of research experience, list of publications, and the names of 2 referees, to Prof Michael Rowan-Robinson, Astrophysics Group, Blackett Laboratory, Imperial College of Science and Technology, Prince Consort Rd, London SW7 2BZ (from whom further details can be obtained) by Jan 31st, 1995. [1959-016 (1995) : 48]
<p>| Ca | Further particulars are available from the Personnel Department (R) at the address below, tel: 01703 592750, to whom a full curriculum vitae (seven copies from UK applicants and one from overseas), including the names and addresses of three academic referees should be sent by no later than 2nd February 1995. [1959-018 (1995) : 49] |
| Ca | Applications, with CV and names of two referees, should be sent to Dr N. B. Price, Grant Institute, West Mains Road, Edinburgh EH9 3JW. Tel: 031-650 4846. Fax: 031-668 3184. [1959-023 (1995) : 50] |
| Ca | Applicants over 40 may be considered under very exceptional circumstances: they should contact the Research Appointments Department at The Royal Society for advice before submitting an application. [1959-029 (1995) : 51] |
| Ca | Interested candidates should submit a brief CV and letter outlining why they consider themselves to be suitable candidates to: | [1959-032 (1995) : 52] |
| Ca | Applicants should send their CV and current salary, in confidence to: Mr Malcolm Brattle, Sales &amp; Marketing Director, Q-One Biotech Limited, Todd Campus, West of Scotland Science Park, Glasgow G20 0XA. [1959-038 (1995) : 54] |

| Ca | Written applications with CV and names/approaches of two referees **should be sent** to Dr D. Grundy, Department of Biomedical Science, The University of Sheffield, Western Bank, Sheffield S10 2TN by 12 June. [1980-098 (1995) : 79] |
| Ca | Applications, including a CV and the names, addresses and telephone numbers of two referees, **should be sent** to The Administrator, Sussex Centre for Neuroscience, School of Biological Sciences, University of Sussex, Falmer, Brighton BN1 9QG. Fax: 01273 678535. Tel: 01273 678743. Email: A.Fincham@sussex.ac.uk [1980-102 (1995) : 80] |
| Ca | Written applications **should** include a full curriculum vitae together with the names of two professional referees [1980-103 (1995) : 80] and **should be sent** to Mrs A Roche, Department of Biochemistry, South Parks Road, Oxford OX1 3QU or faxed on (01865) 515059 by the 16th June 1995. [1980-105 (1995) : 80] |
| Ca | Applications, to include a CV and the names and addresses of at least two referees, **should be sent** to Dr David J Kelly, Department of Molecular Biology and Biotechnology, The University of Sheffield, PO Box 594, Firth Court, Western Bank, Sheffield S10 2UH. (Telephone 0114-282 4414; Fax: 0114-272 8697; e-mail: d.kelly@sheffield.ac.uk). [1980-110 (1995) : 80] |
| Ca | Applications, with full CV and the names of two referees, **should be sent** by 20 June to: Personnel Officer, WCMC, 219 Huntingdon Road, Cambridge CB3 0DL, UK. Fax: +44 1223 277 314. Email: personnel@wcmc.org.uk. [1980-111 (1995) : 81] |
| Ca | Capability Statements **should be submitted** by 23 June 1995 to ODA, Contracts Branch, Ref AH369/McG/NS, Abercrombie House, Eaglesham Road, East Kilbride, Glasgow G75 8EA. [1980-112 (1995) : 82] |
| Ca | Applicants **should** send a detailed CV, together with the names of two referees, to Professor S P Borriello, Director, Institute of Infections and Immunity, University Hospital, Queen's Medical Centre, Nottingham NG7 2UH. [1980-121 (1995) : 86] |
| Ca | Applicants **should** send a detailed CV, together with the names of two referees, to Dr W L Irving, Division of Microbiology, University Hospital, Queen's Medical Centre, Nottingham NG7 2UH. [1980-121 (1995) : 86] |
| Ca | All applications **should be addressed** to Dr Peter Highfield, Box Number 370, Room 135, New Scientist, King's Reach Tower, Stamford Street, London SE1 9LS. [1980-127 (1995) : 87] |
Interested candidates should contact Professor R Camp immediately on (0116 252 3061), and will be supplied with detailed written information including the names of available supervisors and their specific areas of study. [1980-129 (1995) : 87]

Interested candidates should forward an application in writing with a curriculum vitae to Notox B.V., attn; Mrs Dr I. C. Enninga, Technical Director, PO Box 3476, 5203 DL 's-Hertogenbosch, The Netherlands. [1984-010 (1995) : 54]

Completed applications should be returned by 14 July 1995. [1984-013 (1995) : 56]

Applicants should send a proposed research program, curriculum vitae and the names of three referees to the Personnel Manager, Royal Botanic Gardens, Melbourne, Birdwood Ave, South Yarra VIC: 3141 Australia by 28 July 1995. [1984-019 (1995) : 58]

Candidates with or expecting a good degree in Oceanography, Meteorology, Physics or Mathematics should contact: Dr H Leach, Oceanography Laboratories, The University of Liverpool, Liverpool L69 3BX, providing c.v. and names of two referees. [1984-029 (1995) : 61]

Applications, letters and c.v. should be sent to Miss Colette McNerney, Department of Physiology, The University of Liverpool, Liverpool L69 3BX as soon as possible. [1984-029 (1995) : 61]

Applicants should send a detailed CV, together with the names of two academic referees, to Professor J R King, Department of Theoretical Mechanics, The University of Nottingham, University Park, Nottingham NG7 2RD. [1984-035 (1995) : 62]

Applications, together with a detailed CV and the names of three referees, for the first position, should be sent to Dr M R Davey, Department of Life Science, The University of Nottingham, University Park, Nottingham NG7 2RD. [1984-035 (1995) : 62]

Applicant should send a detailed CV, together with the names of two referees, to Dr Jeremy A Roberts, Department of Physiology and Environmental Science, Faculty of Agricultural and Food Sciences, The University of Nottingham, Sutton Bonington Campus, Loughborough, Leicestershire LE12 5RD. [1984-035 (1995) : 62]

Applications, including a c.v., details of experience, and the names and addresses of three referees, should be sent to Professor R J H Clark, Department of Chemistry, University College London, 20 Gordon Street, London WC1H 0AJ by 14 July 1995. [1984-051 (1995) : 68]

Applications should include a CV [1984-058 (1995) : 69]

Applications and should be forwarded to Mrs Joyce Burberry, Department of Chemical Engineering and Chemical Technology, Imperial College, London SW7 2BY. [1984-058 (1995) : 69]

Further particulars may be obtained from Dr K.S. Richards, Head of Department, Department of Geography, University of Cambridge, Cambridge CB2 3EN, to whom applications (8 copies) should also be sent by 31 July, 1995. [1984-060 (1995) : 70]

Applications, including a CV and names of two referees should reach Dr R. J. Maughan, University Medical School, Forresterhill, Aberdeen AB9 2ZD by 10 July. [1984-061 (1995) : 70]

Applications by c.v. with the names of three referees, should be received by the Director of Personnel (A), The University of Liverpool, Liverpool L69 3BX. [1984-063 (1995) : 70]

Applications consisting of a curriculum vitae and the names of two referees should be sent to Mrs S. Woodward, Departmental Administrator, Nuffield Department of Pathology & Bacteriology, John Radcliffe Hospital, Headington, Oxford OX3 9DU, by 13 July 1995. [1984-069 (1995) : 72]

Applications for this pensionable post, including c.v., and the names of two referees should be sent to the Administrator, Dyson Perrins Laboratory, South Parks Road, Oxford OX1 3QY. [1984-071 (1995) : 72]

Applications in the form of a full CV and covering letter quoting the names, addresses and telephone/fax numbers of two referees should be sent to the Personnel Department, St Mary's Hospital Medical School, Norfolk Place, London W2 1PG. 1984-073 (1995) : 73]

Application forms and further particulars from The Head of Personnel Services, The University, College Gate, St Andrews KY16 9AJ. Tel: 01334 462564 (out of hours - 01334 462571), Fax: 01334 462570, E-mail: vak@st-andrews.ac.uk, to whom completed forms accompanied by a
letter of application, and a CV should be returned not later than Tuesday 25 July, 1995. [1984-074 (1995) : 73]

Ca
A full CV, including the names and addresses of two academic referees, should be sent to: The OCMS Administrator, New Chemistry Laboratory, South Parks Road, Oxford OX1 3QT, quoting reference number __. [1984-077 (1995) : 74]

Ca
A letter of application, current curriculum vitae and the names and addresses of three academic referees should be sent to Dr J. P. Darch, Research Administrator, School of Environmental Sciences, University of East Anglia, Norwich, NR4 7TJ, by 14 July 1995. [1984-078 (1995) : 74]

Ca
Further particulars may be obtained from the Director of Personnel, Registrar's Office, University of Newcastle, 1 Park Terrace, Newcastle upon Tyne NE1 7RU with whom three complete copies of applications, including a full CV with present salary and the names and addresses of three referees, should be lodged not later than 21 July 1995. [1984-079 (1995) : 74]

Ca
Applications including a CV and the names of two referees should be sent to Jennifer Darnley, Diabetes Research Laboratories, Radcliffe Infirmary, Woodstock Road, Oxford OX2 6HE. [1984-081 (1995) : 74]

Ca
Applications, which must include a full CV and publication list and the names of two referees who may be contacted immediately, should be sent to Jessica Amrouni, Dept Electronic & Electrical Engineering, UCL, Torrington Place, London WC1E 7JE [1984-082 (1995) : 74]

Ca

Ca
Applications should be sent to Jill Curley, Department of Electronic & Electrical Engineering, UCL, Torrington Place, London WC1E 7JE by 13 July 1996. [1984-082 (1995) : 74]

Ca
Applicants should request an application form by writing to the Graduate Office, University of York, Heslington, York, YO1 5DD. Further details can be obtained from Dr Ashley Wilson or Dr Bernard Betts on 01904 432935 or 432810. [1984-091 (1995) : 76]

Ca
Informal enquiries on the laser project should be made to Dr L Li on 0161 200 3816 and for casting deformation to Dr K Davey on 0161 200 3834. [1984-109 (1995) : 80]

Ca
Curriculum vitae, together with the names of two referees, should be sent to the above mentioned persons at the following address: Department of Mechanical Engineering, UMIST, PO Box 88, Manchester, M60 1QD. [1984-109 (1995) : 80]

Ca
In the first instance, potential applicants should register their interest in writing, including a brief CV and relevant experience by 21 August 1995, and posted to: Head of Procurement Group, EPSRC, Polaris House, North Star Avenue, Swindon SN2 1ET. [1989-014 (1995) : 61]

Ca
Contractual enquiries should be directed to Mr Chris Moulsley (Tel: 01793 444250, Fax: 01793 444013, E-mail: scmo@ib.rl.ac.uk). [1989-014 (1995) : 61]

Ca
Technical enquiries should be directed to Mr Phil Burnell the Programme Manager for Electronics, IT and Computer Science (Tel: 01793 444158, Fax: 01793 444006, E-mail: spnb@ib.rl.ac.uk ). [1989-014 (1995) : 61]

Ca

Ca
Informal enquiries should be made to Dr Mark Ormerod, tel 01782 583475 or Professor Kevin Kendall, tel 01782 583467. [1989-020 (1995) : 63]

Ca
Applicants should send a full CV and the names and addresses of two academic referees to the Student Registrar, Institute of Cancer Research, McElwain Laboratories, 15 Cotswold Road, Sutton, Surrey SM2 5NG, as soon as possible. [1989-021 (1995) : 63]

Ca
Applicants should submit a CV, identifying two referees, to Prof J. P. Simons, Physical and Theoretical Chemistry Laboratory, South Parks Road, Oxford OX1 3QZ by 1st September. [1989-023 (1995) : 63]
| Ca | Interested applicants **should** forward their c.v., detailing their experience, with current salary and citing two contactable referees to: [1989-027 (1995) : 64] |
| Ca | Requests for application forms **should** include a brief curriculum vitae, an outline of the proposed research of not more than two pages and details of the host laboratory, including a letter of intent from the proposed sponsor. Such requests **must** be received by 23rd October 1995. [1989-029 (1995) : 66] |
| Ca | Requests **should be addressed** to: Dr J M Wilkinson, The Wellcome Trust, 183 Euston Road, London NW1 2BE. Tel: 0171-6118428. [1989-029 (1995) : 66] |
| Ca | Application forms and further details can be obtained upon receipt of a SAE and quoting Ref No RV/95/336 from the Personnel Department, Royal Victoria Infirmary, Queen Victoria Road, Newcastle upon Tyne, NE1 4LP (0191) 232 5131 to whom all applications **should be returned**. [1989-030 (1995) : 66] |
| Ca | Applications with full CV and details of current salary **should be sent** by mail to: Patricia Allen, SC Johnson Wax Limited, RD G E Centre, Eurolabs, Milton Park, Stouede Road, Egham, Surrey TW20 9UH. [1989-035 (1995) : 68] |
| Ca | Applications including full CV and the names and addresses of two referees **should be sent** to Dr W. J. D. Whish, Biochemistry 4 West, University of Bath, Bath BA2 7AY. Tel: (01225) 826557. Fax: (01225) 826449, email: bsswdw@bath.ac.uk. [1989-037 (1995) : 68] |
| Ca | Prospective scholarship holders **should apply** for admission to the course immediately through the Graduate Admissions Office, University Offices, Wellington Square, Oxford OX1 2JO and make clear their interest in the scholarship when submitting their application. [1989-040 (1995) : 68] |
| Ca | Written applications quoting the position number with details of qualifications, experience and a business hours contact telephone number **should be forwarded** to the Personnel Officer, ISIA Tatura, Private Bag, Ferguson Road, Tatura, Victoria Australia 3616 or by facsimile 61-3-058 335 299 by close of business Wednesday 23rd August 1995. [1989-043 (1995) : 70] |
| Ca | Further particulars are available from Dr M. Wyman, DBMS, University of Stirling, Stirling FK9 4LA, where applications, in the form of a CV, together with the names of two referees, **should be sent** as soon as possible. [1989-045 (1995) : 70] |
| Ca | Informal enquiries **should be made** by telephone on 01786 467784 or by email to michael.wyman@stir.ac.uk [1989-045 (1995) : 70] |
| Ca | CV's **should be sent** to: Mrs. Carol Yapp, The Anthony Nolan Bone Marrow Trust, The Royal Free Hospital, Pond Street, London NW3 2QG. [1989-046 (1995) : 70] |
| Ca | Informal enquiries **should be directed** to Dr Dominic Wells (0181 846 7038). [1989-049 (1995) : 71] |
| Ca | Applications with full CV, together with the names and addresses of two referees, **should be sent** to the Director of Personnel, Charing Cross and Westminster Medical School, The Reynolds Building, St Dunstan's Road, London W6 8RP, within three weeks of the appearance of this advertisement. (Quote Ref 95/72). [1989-049 (1995) : 71] |
| Ca | Candidates wishing to discuss the post informally **should** contact Dr. Tony Whittingham, Head of Ultrasonics, Tel. Tyneside (0191) 273 8811 ext. 22946. [1989-050 (1995) : 71] |
| Ca | Prospective applicants wishing to discuss the post informally **should** contact Dr. John Haywood or Mr Robert Royall on Middlesbrough (01642) 854778. Application forms and job descriptions obtainable by telephoning Tyneside (0191) 273 5184 (24 hour answerphone service), quoting the relevant reference number. [1989-050 (1995) : 71] |
| Ca | Applications in the form of a curriculum vitae and covering letter (2 copies) including the names and addresses of two referees **should be sent** to the Personnel Office (Sab), University of Surrey, Guildford GU2 5XH, by 29 August 1995, quoting reference 390. [1989-051 (1995) : 71] |
| Ca | An application form **should be obtained** from the Director of Personnel and Registry Services, University of East Anglia, Norwich, NR4 7TJ (answerphone: 01603 593493), to be returned with a CV and names of three referees, by 15 August 1995. [1989-053 (1995) : 72] |
| Ca | Applications including full CV and names of two referees **should be sent** (by 31 August 1995) to the respective supervisors, Faculty of Medicine, University of Newcastle, Newcastle upon Tyne NE2 4BW. [1989-057 (1995) : 72] |
Ca Further particulars are available from the Director of Personnel, Registrar's Office, University of Newcastle, 1 Park Terrace, Newcastle upon Tyne NE1 7RU with whom three complete copies of applications, including a full cv with present salary and the names and addresses of three referees, should be lodged not later than 8th September 1995. [1989-058 (1995) : 72]

Ca Further particulars including details of the application procedure should be obtained from THE PERSONNEL OFFICE, THE UNIVERSITY OF EDINBURGH, 1 ROXBURGH STREET; EDINBURGH EH8 9TB or TEL: 0131 650 2511 (24 hour answering service). [1998-043 (1995) : 86]

Ca Applications, with curriculum vitae and the names of two referees, should be sent to: The Administrator, Department of Physics, Clarendon Laboratory, Oxford University, Oxford OX1 3PU by 31 October 1995. [1998-044 (1995) : 86]

Ca Applications with full CV, together with the names and addresses of two referees should be sent to the Personnel Officer, John Innes Centre, Norwich Research Park, Colney, Norwich, Norfolk NR4 7UH. Quoting Reference SL/031. [1998-049 (1995) : 88]

Ca Further information and application forms may be obtained from the Secretary of the Appointments Committee of the Faculty of Engineering, Faculty Board Office, Department of Engineering, Trumpton Street, Cambridge CB2 1PZ, to whom completed application forms and a curriculum vitae should be sent so as to reach him not later than 31st October 1995. [1998-058 (1995) : 90]

Ca Letters of application and curriculum vitae should be sent by 2nd November 1995 to Professor Francoise Meunier, Director, EORTC Central Office/Data Centre, Avenue E. Mounier 83, boîte 11, B1200 Brussels, Belgium. [1998-059 (1995) : 90]

Ca Only completed application forms will be accepted and these should be returned by 20 October 1995 to the Recruitment Coordinator, Personnel Office, Queen Mary and Westfield College, Mile End Road London E1 4NS. [1998-066 (1995) : 92]

Ca Those interested should send their CV, together with the names and addresses of two referees, to: Dr. Stef Simons, Dept. Chemical & Biochemical Engineering, University College London, Torrington Place, London WC1E 7JE. E-mail: stefan.simons@ucl.ac.uk Tel: 01711119 3805 (direct) Fax: 0171-383 2348 [1998-072 (1995) : 94]

Ca Applications including a curriculum vitae and the names and addresses of three referees should be sent to Mr I. Paxton, Personnel Officer, by Friday 20 October 1995 quoting the appropriate reference. [1998-093 (1995) : 99]

Ca Applications should write in the first instance, enclosing a detailed cv to: [1998-096 (1995) : 101]

Ca Applications, with a full CV and the names of two referees, should be sent to Dr A. J. Elliott, Marine Science Laboratories, Menai Bridge, Gwynedd LL59 5EY. E-mail: ajc@uces.bangor.ac.uk [1998-104 (1995) : 103]

Ca They may be submitted by either professional colleagues or the individual(s) concerned, and should contain the following information; [2002-001 (1995) : 2]

Ca Nominations should be sent together with an indication of where you read about the 1996 award to: Dr Mark Matfield, Executive Director, RDS, 58 Great Marlborough Street; London W1V 1DD. [2002-001 (1995) : 2]

Ca Applications in writing including full CV with two professional referees should be sent quoting reference PGL/DNU by 24 November 1995 to Sheila Jenkins, Personnel Officer, MRC Centre, Hills Road, Cambridge CB2 2QH. [2002-008 (1995) : 56]

Ca Applications with a curriculum vitae and the letters from two referees should be sent to the Administrator, Department of Physics, Clarendon Laboratory, Parks Road, Oxford OX1 3PU by 31 January 1996. [2002-021 (1995) : 60]

Ca The applicant should state which scientific work he/she considers to be of most importance regarding the application for the position. [2002-022 (1995) : 61]
It should also be made clear in the application which teaching and other qualifications the applicant wishes to draw attention to in the consideration of the application. [2002-022 (1995) : 61]

The application, stating the reference number, should be addressed to the Vice-chancellor of Lund University, and must be received by the registrar, PO Box 117, S-221 00 LUND, no later than Wednesday 6th December 1995. [2002-022 (1995) : 61]

Applications including CV and particulars of three referees should be sent to The Senior Administrator, Department of Engineering Science, University of Oxford, Parks Road, Oxford OX1 3PJ. Tel: (01865) 273013; from whom further particulars can be obtained. [2002-030 (1995) : 64]

Applications are to arrive by 30th November 1995 and envelopes should be addressed "Personal for the Chief Executive", Sir Michael Simmons, UFAW, 8 Hamilton Close, South Mimms, Potters Bar, Herts EN6 3QD. [2002-038 (1995) : 66]

Curriculum vitae in duplicate which should include the names of three referees; [2002-041 (1995) : 67]

Applications in the form of a CV and requests for information should be sent to the Administration Manager, BioChem ImmunoSystems (UK) Ltd, 20 Woking Business Park, Albert Drive. Woking GU21 5JY. Telephone: 01483 755330 / Fax: 01483 755889. [2002-046 (1995) : 68]

Applications, complete with detailed CV and covering letter should be sent to: Dr Sue Snape, Senior Clinical Data Manager-Europe, Alkermes Europe Ltd, The Quorum, Barnwell Road, Cambridge CB5 8RE. Tel: (+44) 01223 416 063. [2002-055 (1995) : 71]

Applications should be by letter, with CV, to Dr, I. D. Howarth, Department of Physics & Astronomy, University College London, Gower Street, London WC1E 6BT; [2006-006 (1995) : 60]

Completed application forms should be returned by 24 November 1995 to the Recruitment Coordinator, Personnel Office, Queen Mary and Westfield College, Mile End Road, London E1 4N5. [2002-075 (1995) : 77]

Details of present and proposed research programmes should be included in your application. [2002-084 (1995) : 79]

They may be submitted by either professional colleagues or the individual(s) concerned, and should contain the following information; [2006-001 (1995) : 13]

Nominations should be sent together with an indication of where you read about the 1996 award to: [2006-001 (1995) : 13]

Applications should be by letter, with CV, to Dr, I. D. Howarth, Department of Physics & Astronomy, University College London, Gower Street, London WC1E 6BT; [2006-006 (1995) : 60]

applicants should arrange for two references to be sent to the same address. Closing date for applications: December 5, 1995. [2006-006 (1995) : 60]

</table>
Applications in the form of a CV, including the names of two referees, should be sent to the Personnel Manager, Institute of Psychiatry, De Crespigny Park, London SE5 8AF, from whom further written details are available. [2006-048 (1995) : 74]

Further particulars are available from the Personnel Office, University of Stirling, Stirling FK9 4LA, tel (01786) 467028, fax (01786) 466155 where applications in the form of a CV including a statement of proposed research interests together with the names and addresses of three referees should be returned by 8 January 1996. [2006-051 (1995) : 75]

Applications, CV and two referees should be submitted to: [2006-056 (1995) : 76]

Applications should be submitted on outline proposal forms. Forms and further details can be obtained from Debbie Harding, Science & Engineering Base Group, BBSRC, Polaris House, North Star Avenue, Swindon SN2 1ET, or at http://www.epsrc.ac.uk under 'What's New'. Tel: 01793 413341, Email: debbie.harding@bbsrc.ac.uk [2006-065 (1995) : 79]

Interested applicants should write as soon as possible for further details to one or more of the following: [2006-066 (1995) : 79]

The deadline for applications will be Friday 8th December 1995. Applications, including the names of two referees should be sent to Professor C M Williams, Department of Food Science and Technology, PO Box 226, Whiteknights, Reading RG6 6AP [2006-069 (1995) : 80]

Only completed application forms will be accepted and these should be returned by 22 December 1995 to the Recruitment Coordinator, Personnel Office, Queen Mary and Westfield College, Mile End Road, London E1 4NS. [2006-071 (1995) : 80]

There is no specific application form. Applicants should send a covering letter explaining his/her qualifications and suitability for the internship, curriculum vitae, dissertation outline/proposal (an early chapter, if available), supporting letter(s) of reference from Ph.D. supervisor(s), and academic record to the address below. [2006-075 (1995) : 82]

Only completed application forms will be accepted and these should be returned by 5 January 1996 to the Recruitment Coordinator, Personnel Office, Queen Mary and Westfield College, Mile End Road, London, E1 4NS. [2006-086 (1995) : 84]

A letter of application and a current curriculum vitae containing the names and addresses of three referees who can testify for your academic abilities should be sent to Dr J P Darch, Research Administrator, School of Environmental Sciences, University of East Anglia, Norwich NR4 7TJ, UK by 13 December 1995. [2006-091 (1995) : 86]

Applicants should send four copies of their CV (please include four copies of any covering letter), together with full details of two referees, to the above address by 2 January 1996. [2006-097 (1995) : 87]

The applicant should combine good mathematical skills, especially of statistical methods, with sound physical intuition. [1959-014 (1995) : 48]

Candidates should reinforce or complement the Centre's current strengths in palaeolimnology and be capable of raising external research contracts. [1959-015 (1995) : 48]

Applicants, who should have an outstanding research record, should satisfy the eligibility requirements for being awarded an EPSRC studentship. [1959-024 (1995) : 50]

You should be able to use a computer as an everyday scientific tool. [1959-028 (1995) : 51]

Candidates should demonstrate organisational skills and attention to detail. [1959-033 (1995) : 53]

You should be well presented and self motivated and be able to work as part of a team as well as on your own initiative. [1959-035 (1995) : 53]

Applicants should note that these fellowships are primarily intended for the acquisition of skills in mathematical biology rather than to sustain the careers of those with an established research background in their discipline. [1959-043 (1995) : 56]

A multi-disciplined professional, you should have the flexibility to perform other duties including plant work and maintenance of on-line chemistry and radiation monitoring instruments. [1959-052 (1995) : 58]
You should have knowledge of distributed computing environments (eg using Unix and Novell) and a good understanding of database management and analytical techniques. [1959-061 (1995) : 60]

Training in embryonic stem cell technology will be available in Edinburgh if required and the appointee should be prepared to spend some time there if required. [1959-072 (1995) : 62]

Applicants should be competent to teach physical chemistry (quantum mechanics, thermodynamics, kinetics, electrochemistry, solution phenomena, etc.) and some aspects of organic chemistry. [1959-077 (1995) : 64]

Applicants should be competent in all aspects of physical chemistry. [1959-077 (1995) : 64]

Applicants should be able to teach widely within a broad 4-year Engineering Science syllabus (in particular on relevant aspects of production engineering) and have a specialised research interest in one or more of composites engineering, polymer engineering, fracture mechanics, or orthopaedic engineering. [1959-090 (1995) : 66]

Applicants should have an established international research reputation. [1963-001 (1995) : 50]

Applicants should either be nationals of a Member State of the European Union, nationals of a European Economic Area Member State (i.e. Austria, Finland, Iceland, Norway or Sweden) or Commonwealth citizens who have an established right of abode and right to work in the United Kingdom. [1963-006 (1995) : 51]

You should also be highly motivated, combining a versatile approach with good communication skills. [1963-022 (1995) : 55]

and should normally be resident in the UK or EC. [1963-028 (1995) : 57]

Applicants should have a good general knowledge of histological techniques. [1963-064 (1995) : 64]

Excellent communication, prioritising and problem-solving skills should be matched by an enthusiastic, self-motivated approach and the ability to develop good internal and external working relationships. [1963-081 (1995) : 69]

The incumbent should also develop effective collaborative networks with NARS National Gene Banks, especially in exploration and collection of germplasm with appropriate training and prepare appropriate protocols for all collection expeditions. [1967-012 (1995) : 66]

The candidate should have excellent command of English, while knowledge of French or Spanish would also be highly desirable. [1967-012 (1995) : 66]

You should have a proven record of preparing witness statements and giving evidence in court. [1967-020 (1995) : 69]

Candidates should have research interests in geomorphology and experience of research in fluvial environments would be an advantage. [1967-027 (1995) : 70]

They should have a responsible and flexible attitude, an adaptable and helpful personality, an eye for detail, and be willing to undertake a varied range of tasks as required. [1967-037 (1995) : 73]

Applications for support should be for a maximum of three years in the first instance with the possibility of renewal for a further two years if outstanding progress has been made. [1967-044 (1995) : 75]

Proposals should contain clear testable objectives which are likely to result in measurable benefits within the lifetime of the research. [1967-044 (1995) : 75]

You should be highly motivated, well organised and possess excellent problem solving skills. [1967-049 (1995) : 77]

Applicants should have achieved research excellence by scientific publications in any area of the above subjects. [1967-051 (1995) : 77]

Contractors are invited to express interest in tendering for these projects, and should provide details of their capability, together with a brief outline proposal. [1967-093 (1995) : 87]

The project should be completed and the report prepared by 31 December 1995. [1967-093 (1995) : 87]

The project should be completed and the report prepared no later than 31 March 1996. [1967-093 (1995) : 87]

Applicants should indicate their preferred areas. [1971-003 (1995) : 55]
<p>| Co | You <strong>should</strong> have good planning and project management skills, and be able to work both independently and as part of a team within a demanding goal oriented environment. [1971-007 (1995) : 57] |
| Co | Candidates <strong>should</strong> be physically fit as the post <strong>will</strong> involve participation on oceanographic cruises in Antarctica. [1971-008 (1995) : 58] |
| Co | You <strong>should</strong> demonstrate skills in one or more of the following: C &amp; UNIX System programming, Video processing, UNIX device drivers, or 3D image manipulations &amp; rendering. [1971-014 (1995) : 60-61] |
| Co | In addition to a commitment in excellence in undergraduate teaching, candidates <strong>should</strong> be able to demonstrate their ability to conduct and attract funding for high quality research, preferably in an area allied to the present research interests of the School. [1971-033 (1995) : 66] |
| Co | Ideally applicants <strong>should</strong> have interests which complement or extend those of the group, but emphasis <strong>will</strong> be on scientific excellence, and applicants working in other areas <strong>will</strong> be seriously considered. [1971-050 (1995) : 72] |
| Co | Applicants <strong>should</strong> have had a broad exposure to molecular genetics and be committed to the applications of gene therapy to the treatment of human disease. [1971-051 (1995) : 72] |
| Co | A graduate in a relevant scientific discipline, you <strong>should</strong> have a good understanding of managing applied research and be able to deal with a large number of projects at various stages of development. [1971-054 (1995) : 73] |
| Co | Applicants <strong>should</strong> possess the enthusiasm and ability to fit into a dynamic academic environment. [1971-057 (1995) : 74] |
| Co | and <strong>should</strong> show considerable promise in both teaching and research. [1971-057 (1995) : 74] |
| Co | Applicants <strong>should</strong> be non-smokers as we operate a nonsmoking site. [1971-059 (1995) : 74] |
| Co | The salary is IR£15,000 pa and applicants <strong>should</strong> be in a position to take up the post at short notice. [1971-081 (1995) : 79] |
| Co | Applicants <strong>should</strong> be highly motivated, enthusiastic and well organised [1971-090 (1995) : 80] |
| Co | Confident, with good interpersonal and leadership skills, you <strong>should</strong> have the ability to operate autonomously when required. [1976-001 (1995) : 59] |
| Co | In addition to outstanding strength in research and scholarship, the successful candidate <strong>should</strong> provide leadership and inspiration for fundamental research, encourage the integration of his/her own research with that of others, and play an active role in teaching and departmental administration. [1976-005 (1995) : 60] |
| Co | The appointee <strong>will</strong> be committed to excellence in teaching and <strong>should</strong> have an outstanding and continuing research record in one or more areas related to Computer Engineering and/or Information Systems Engineering. [1976-005 (1995) : 60] |
| Co | This <strong>should</strong> mean a full understanding of all aspects of medical information, and associated technological issues, plus a good working knowledge of the ABPI Code of Practice. [1976-007 (1995) : 61] |
| Co | Applicants <strong>should</strong> have a good understanding of science and its application through the creation of partnerships with users. [1976-011 (1995) : 62] |
| Co | In addition, you <strong>should</strong> be able to lead the formulation development efforts of the team. [1976-012 (1995) : 63] |
| Co | They <strong>should</strong> have research interests in one or more areas of human biology including ecology, genetics and behaviour, [1976-014 (1995) : 66] |
| Co | <strong>should</strong> have skills in a variety of contemporary perspectives and be able to participate in a general teaching programme. [1976-014 (1995) : 66] |
| Co | Candidates <strong>should</strong> have an outstanding record of research in a relevant field of engineering or science. [1976-060 (1995) : 77] |
| Co | Candidates <strong>should</strong> be UK or EC citizens, <strong>must</strong> be prepared to spend extended periods in Kenya conducting fieldwork [1976-069 (1995) : 79] |
| Co | The Medical Writer is expected to work without secretarial assistance. In principle the job is located in Copenhagen, but it might be performed from another location, from home or from one of the Company's European subsidiary offices. In such case, the candidate <strong>should</strong> be prepared |
| Co | Applicants should either be nationals of the European Union (EU) Member State, or Commonwealth citizens who have an established right of abode and right to work in the United Kingdom. [1980-003 (1995) : 52] |
| Co | Applicants should have an outstanding record of research and teaching achievements in this field. [1980-005 (1995) : 53] |
| Co | and should have an interest in plant cell &amp; molecular biology and its application in the biotechnology industry. [1980-011 (1995) : 57] |
| Co | Candidates should have a proven record of research strength. [1980-046 (1995) : 67] |
| Co | Applicants should have experience in software development and networking using a range of machines (PC, Macintosh, HP and Vax) and be familiar with UNIX and current WAN &amp; LAN (currently Pathworks) systems. [1980-047 (1995) : 68] |
| Co | The new Lecturer, who should be excellent in teaching, will join an active and well-equipped department with established lines of research in organic synthesis, natural products and bio-organic chemistry. [1980-055 (1995) : 69] |
| Co | Ideally you should be physically fit and have working knowledge of Ordnance Survey maps, Geological Survey information and Soil Survey data. [1980-061 (1995) : 71] |
| Co | Candidates should also be able to work on their own initiative, be able to demonstrate competent communication skills, and be able to work within a team environment. [1980-088 (1995) : 77] |
| Co | He/she will be expected to provide R&amp;D, consultancy and postgraduate training leadership in the development of the natural sciences underpinning conservation and should be able to interact effectively with the other research and training programmes within The Institute and with our partners worldwide. [1980-090 (1995) : 77] |
| Co | S/he will assist in the design and testing of equipment and should therefore be capable of exercising initiative and working to deadlines. [1980-096 (1995) : 78] |
| Co | You should also be competent in the use of computers for data handling. [1984-013 (1995) : 56] |
| Co | You should have an appreciation of consumer markets and will have the technical skills and confidence to identify new product and process opportunities, evaluate risks and thus turn concepts and ideas into commercially successful products. [1984-014 (1995) : 57] |
| Co | You should have the ability to pick up ideas quickly and be able to interact within a multi-disciplinary team. [1984-015 (1995) : 57] |
| Co | You should have proven leadership ability and be a first class communicator. [1984-021 (1995) : 59] |
| Co | Applicants should be highly self-motivated and creative with good communication skills. [1984-047 (1995) : 66] |
| Co | The ability (or potential) to lead and fund a viable research activity should be demonstrated. [1984-056 (1995) : 69] |
| Co | Applicants should have worked on AFM, preferably with the Nanoscope. [1984-096 (1995) : 77] |
| Co | Ideally the successful candidate should be able to tackle the research in an interdisciplinary manner. [1984-105 (1995) : 79] |
| Co | Candidates should be able to teach widely within a broad four-year Materials Science syllabus and to carry out a programme of research into the mechanical properties of materials. [1984-112 (1995) : 81] |
| Co | Applicants should be willing to travel anywhere in the world at short notice, possibly for several weeks at a time. [1989-015 (1995) : 61] |
| Co | All candidates should be capable of problem solving using their own initiative as well as being able to work in a team. [1989-015 (1995) : 61] |
| Co | They should also have a working knowledge of structural geometries in extensional settings, tectonic controls on sedimentation and the concepts of seismic and sequence stratigraphy. [1989-016 (1995) : 62] |
| Co | You should be skilled in project management, communications and have a proven track record in a technical leadership position. [1989-028 (1995) : 65] |
| Co | Candidates should only nominate a laboratory to which they wish to return if there are sound scientific reasons for doing so. [1989-029 (1995) : 66] |
| Co | Recipients of VPS departure packages should note that re-employment restrictions apply. [1989-043 (1995) : 70] |
| Co | they should be shortlisted for interview. [1989-054 (1995) : 72] |
| Co | You should demonstrate a strong outgoing personality and be able to communicate effectively. [1989-068 (1995) : 75] |
| Co | The person appointed should also enjoy being part of a team working on different aspects of novel programming languages and systems, taking an active interest in other lines of work. [1989-077 (1995) : 77] |
| Co | Applicants with an understanding of enzyme and protein systems as well as analytical techniques (HPLC) should also possess good communication skills and the ability to function effectively in a multi-disciplinary environment. [1989-080 (1995) : 78] |
| Co | The applicant should be able to demonstrate competency in both experimental and analysis work. [1989-102 (1995) : 83] |
| Co | The applicant should have ability and long term commitment in applying information technology to enhancing laboratory efficiency. [1993-007 (1995) : 53] |
| Co | Applicants should be familiar with remote sensing, image processing and GIS. [1993-016 (1995) : 56] |
| Co | Applicants should be adept in computing [1993-016 (1995) : 56] |
| Co | They should also be able to assist/collaborate with other colleagues in the John Innes Centre in the purification and preparation of proteins and peptides. [1993-039 (1995) : 63] |
| Co | You should have an excellent command of English, good written and verbal communication skills and good attention to detail. [1993-039 (1995) : 63] |
| Co | In addition to the above you should be listed by your professional society as eligible to be a Qualified Person under EC Directive 75/319 and also be eligible to be a Lead Assessor under BS5750, or be prepared to train for this. [1993-041 (1995) : 64] |
| Co | Highly motivated and well organised with sound commercial acumen, you should be an effective communicator at all levels as this role offers the opportunity for full project responsibility and liaison with our international clients. [1993-045 (1995) : 65] |
| Co | They should also have demonstrated ability in writing reports, conducting experiments, computing and analysis of data. [1993-064 (1995) : 70] |
| Co | Candidates should be familiar with networking procedures, and have a good knowledge of agricultural and administrative systems in Africa. [1993-069 (1995) : 71] |
| Co | You should also have a keen interest in the study of benthic communities in relation to the physical environment and be able to demonstrate an aptitude for macrofauna identification. [1993-088 (1995) : 76] |
| Co | You should be able to demonstrate attention to detail, initiative and good communication skills to facilitate liaison with staff in development, packaging and analytical functions. [1998-005 (1995) : 73] |
| Co | Applicants should be enthusiastic, self-motivated, possess good communication skills and be able to work to challenging deadlines. [1998-024 (1995) : 80] |
| Co | They should also be able to communicate effectively with people who have little, or no, knowledge of statistics and be able to work both independently and as part of a team. [1998-035 (1995) : 84] |
| Co | Applicants for the first post (Ref: 5189) should be able to demonstrate good communication skills and the energy and enthusiasm to influence and help co-ordinate much of the organisation and development of the hydrometric function. [1998-052 (1995) : 89] |
| Co | Applicants should be highly motivated, well organized, and used to working with minimal supervision to tight deadlines. [1998-059 (1995) : 90] |
| Co | Candidates should possess strong team-working skills but at the same time have the ability to work under their own initiative. [1998-095 (1995) : 100] |
| Co | and should have an established reputation in research relevant to horticulture. [2002-023 (1995) : 62] |
| Co | Volunteers <strong>should</strong> be adaptable and sensitive to other cultures, and a sense of humour. [2002-044 (1995) : 68] |
| Co | The applicant <strong>should</strong> be computer literate with good communication skills. [2002-078 (1995) : 77] |
| Co | Ideally, your research <strong>should</strong> complement one of the areas of work of the LJMP astrophysics group. [2002-082 (1995) : 78] |
| Co | Applicants <strong>should</strong> have research interests in synthetic organic chemistry, particular enantioselective and/or bioorganic aspects. [2002-084 (1995) : 79] |
| Co | A comprehensive working knowledge of environmental regulatory legislation and practice combined with a strong scientific base is essential, and you <strong>should</strong> be capable of representing the company through effective and authoritative communication with the relevant regulators. [2006-011 (1995) : 63] |
| Co | Research topics <strong>should</strong> relate clearly to one of the following research areas of the UNU/IAS for the initial 1996-97 years: [2006-075 (1995) : 82] |
| Co | Where appropriate, applicants <strong>should</strong> be competent in scientific research methodologies and computer-based analysis. [2006-075 (1995) : 82] |
| Co | and your other qualities <strong>should</strong> encompass problem solving ability and good communication skills. [2006-083 (1995) : 84] |
| Co | The applicant <strong>should</strong> have wide ecological interests and be a self-motivated, organised individual; capable of the planning and execution of a holistic study of this under-researched river ecotone. [2006-093 (1995) : 86] |
| Co Ca | Applicants <strong>will</strong> be expected to develop their own research programmes in this area; an outline research proposal <strong>should be included</strong>. [1998-018 (1995) : 78] |
| Co Di | The successful applicant <strong>should</strong> be an ambitious professional who possesses a degree or doctorate in organic or polymer chemistry. [1971-016 (1995) : 60] |
| Co Di | The SRO <strong>will</strong> be responsible for the planning and organisation of the project and <strong>should</strong> have a Ph.D. in a biological science, an excellent publications record, and strong computing, analytical and statistical skills. [1984-099 (1995) : 78] |
| Co Di | The successful candidate <strong>should</strong> be highly motivated, innovative with a commercial outlook and hold (or expect to obtain) at least a second class degree. [1984-106 (1995) : 80] |
| Co Di | Applicants <strong>should</strong> be medically qualified and have a postgraduate qualification - Ph.D., MRCPath, etc, and have active research interests, teaching experience and significant publications in referred journals. [1989-084 (1995) : 78] |
| Co Di | Applicants <strong>should</strong> be motivated scientists with a good Ph.D., preferably in synthetic inorganic or organometallic chemistry, or a related area. [1993-072 (1995) : 72] |
| Co Di | In addition to having a strong publication record, candidates <strong>should</strong> have a solid state physics background (including lasers), an understanding of semiconductor devices and be adept with PL-related techniques. [2006-039 (1995) : 72] |
| Co Di | You <strong>should</strong> be flexible and team orientated, educated to at least BTEC Higher in a relevant subject, and with a methodical and systematic approach to problem solving. [2006-087 (1995) : 85] |
| Co Ex | Applicants <strong>should</strong> have research interests in an area of mathematics or statistics which makes significant use of computation, and have practical experience in the running of computer systems. [1959-050 (1995) : 57] |
| Co Ex | They <strong>should</strong> also have good organisational skills and an eye for detail, as well as a keen interest in, or experience of, the development of distance-teaching materials. Experience of administration would be an advantage. [1963-056 (1995) : 63] |
| Co Ex | The person appointed <strong>will</strong> be required to work as a member of an interdisciplinary team and <strong>should</strong> have expertise in imaging, mathematical modelling and visualisation of experimental data. [1963-082 (1995) : 69] |
| Co Ex | Applicants <strong>should</strong> have a successful research record and/or recent industrial experience. [1967-068 (1995) : 82] |</p>

</tbody>
</table>
Applicants should have a good honours degree in a numerate subject. [1959-083 (1995) : 65]

Applicants should have a good degree in Physics or an Engineering discipline. [1959-096 (1995) : 67]

Applicants should hold a First or Second Class Honours Degree. [1963-010 (1995) : 52]

Applicants should have a first or second class degree in the biological sciences, and preferably a postgraduate qualification in toxicology. [1963-023 (1995) : 56]

Applicants should have a first or second class degree in biomedical sciences, and preferably a postgraduate qualification in toxicology. [1963-023 (1995) : 57]

Applicants should have or expect to gain a relevant 1st or 2i honours degree [1963-028 (1995) : 58]

Applicant should have a Ph.D. in organic or medicinal chemistry or related discipline [1963-036 (1995) : 58]

or should be about to submit their thesis. [1963-036 (1995) : 61]

Applicants should be state registered MLSOs or possess an accredited biological degree. [1963-046 (1995) : 61]

Applicants should have, or expect to obtain, a first or upper second class honours degree in an appropriate subject. [1963-048 (1995) : 61]

The applicant should hold a Ph.D. [1963-054 (1995) : 62]

Applicants should hold a first degree (or equivalent) in Chemistry or a related subject. [1963-056 (1995) : 63]

Applicants should hold, or expect to obtain, a first or upper second class honours degree; a higher degree may be an advantage. [1963-068 (1995) : 65]

Candidates should be qualified to at least first degree level in a relevant subject area. [1963-088 (1995) : 71]

Potential candidates should have either a First or Upper Second Class degree in Chemistry, or a related subject. [1963-091 (1995) : 71]

Potential candidates should have a 1st or 2(i) Honours Degree in Chemistry, or a related discipline. [1963-094 (1995) : 71]

Applicants should hold or expect to be awarded First Class or Upper Second degrees. [1963-095 (1995) : 71]

Applicants should have a good Honours degree in Physics, Chemistry, Biology, Geology, Geography, Environmental Sciences, Economics or a relevant Social Science discipline. [1963-102 (1995) : 72]

Candidates should possess a suitable degree; a Ph.D. is preferable but not essential. [1963-094 (1995) : 71]

Applicants should have, or expect to obtain, at least a lower second class honours degree. [1963-100 (1995) : 73]

Applicants for MRes or Ph.D. should have, or expect to obtain by July 1995, a first or upper second class degree in a relevant subject. [1963-100 (1995) : 74]

Applicants should have a university degree in any one of the following subjects: medicine, dentistry, veterinary medicine, microbiology, medical laboratory sciences or pharmacy. [1963-102 (1995) : 75]

Applicants for both posts should have a relevant Ph.D. [1967-001 (1995) : 60]

Applicants should have a good honours degree in biochemistry, molecular biology or related subjects. [1967-001 (1995) : 60]

Applicants should have a good honours degree in biochemistry, molecular biology or related subjects. [1967-001 (1995) : 60]

Applicants should have a first or upper second class honours degree in nutrition and a state registration in dietetics. [1967-007 (1995) : 64]

Applicants should have a first or upper second class honours degree in Biochemistry or a related subject. [1967-007 (1995) : 64]

The successful applicant should have expertise in the techniques of culturing and characterising primary cells particularly for their drug metabolising capabilities. [1967-009 (1995) : 65]
| Di | Applicants should have a first degree in Chemistry or related subject and a Ph.D. training, preferably in Physical Chemistry. [1967-017 (1995) : 68] |
| Di | Candidates should have obtained a first degree from a UK university in a science subject within the last six years. [1967-037 (1995) : 73] |
| Di | You should have a qualification in Nursing or in Science with a biological/physics content. [1967-038 (1995) : 74] |
| Di | The other will work as an editorial assistant on a challenging database project, and should have a biological sciences degree. [1967-040 (1995) : 74] |
| Di | Applicants should possess an Honours degree in plant or biological science. [1967-046 (1995) : 76] |
| Di | Required for the Pharmaceutical Quality Control Laboratory, you should have a degree in Microbiology or a related subject. [1967-059 (1995) : 79] |
| Di | The successful candidate should have obtained a Ph.D. in the field of Magnetic Resonance Imaging/Spectroscopy, and have a proven track-record in scientific research. [1967-062 (1995) : 80] |
| Di | You should have a degree in biology, or appropriate MLSO qualifications. [1967-069 (1995) : 82] |
| Di | Applicants, who should have (or expert to have shortly) at degree in a relevant scientific discipline, [1967-071 (1995) : 82] |
| Di | Candidates should possess a degree in Biochemistry or Microbiology and a knowledge of molecular biology would be an advantage. [1967-077 (1995) : 83] |
| Di | Trainee applicants should hold a degree acceptable to the Council for Professions Supplementary to Medicine. [1967-078 (1995) : 84] |
| Di | Candidates should be state registered and hold an HNC or appropriate science degree. [1967-086 (1995) : 85] |
| Di | Applicants should have a first or upper second class degree in biochemistry or cell and molecular biology and those with an MSc are also encouraged to apply. [1967-092 (1995) : 87] |
| Di | You should have a degree (or equivalent) in a numerate subject involving the study of human-environment issues such as Geography, Biology or Environmental Science. [1967-095 (1995) : 88] |
| Di | Candidates should possess (or attain soon) a good university degree in Physiology or related area. [1967-100 (1995) : 89] |
| Di | Applicants should possess a degree in a relevant biological science. [1971-009 (1995) : 58] |
| Di | Applicants should possess a relevant science degree. [1971-028 (1995) : 64] |
| Di | Applicants should have a B.Sc in an appropriate subject. [1971-028 (1995) : 64] |
| Di | Applicants should have, or be about to be awarded, a Ph.D. in a relevant discipline. [1971-034 (1995) : 66] |
| Di | Candidates should hold, or expect to obtain, a first or upper second class honours degree in Biochemistry, Genetics, Molecular Biology or a related subject. [1971-035 (1995) : 66] |
| Di | Applicants should hold at least a 2:1 degree or equivalent. [1971-037 (1995) : 67] |
| Di | Applicants should have a background in physics, mathematics or a quantitative environmental science and have or expect to have at least an upper second class degree. [1971-046 (1995) : 70] |
| Di | Applicants should have a Ph.D. in Biochemistry or related area. [1971-058 (1995) : 74] |
| Di | Candidates should preferably qualify for IEEM membership. [1971-068 (1995) : 76] |
| Di | Candidates should have a degree in a relevant subject. [1971-077 (1995) : 78] |
| Di | You should possess an appropriate science degree. [1971-080 (1995) : 79] |
| Di | Applicants should have appropriate qualifications in Applied Mathematics, Physics or Engineering. [1971-082 (1995) : 79] |
| Di | Applicants should possess or expect to obtain a First or Upper Second Class Degree in relevant disciplines. [1971-083 (1995) : 79] |
| Di | Applicants should have or expect to obtain a First or Upper Second Class Honours Degree in an appropriate subject area and submit a full CV together with the names of two academic referees. [1971-091 (1995) : 81] |
| **Di** | **You should** have a good honours degree and demonstrate good communication skills together with a good working knowledge of computers (IBM and Macintosh). [1971-093 (1995) : 81] |
| **Di** | Applicants **should** hold IBMS / BSc or equivalent and be State Registered. [1971-095 (1995) : 82] |
| **Di** | Candidates **should** possess or expect to obtain a good honours degree in chemistry, physics or materials science. [1976-009 (1995) : 62] |
| **Di** | Applicants **should** have a first and/or second degree in science preferably with a major in the biological sciences, chemistry or geosciences and advanced qualifications (Ph.D. or equivalent) in education or science. [1976-014 (1995) : 66] |
| **Di** | Applicants **should** hold a Ph.D. or equivalent preferably related to Toxicology. [1976-014 (1995) : 66] |
| **Di** | Structural Engineering: candidates **should** possess expertise in some part of this field [1976-029 (1995) : 70] |
| **Di** | To qualify for a scholarship, applicants **should** possess a First or Upper Second Class Honours degree in an appropriate subject. [1976-032 (1995) : 70] |
| **Di** | Applicants **should** hold an HNC/D or degree (or equivalent). [1976-033 (1995) : 70] |
| **Di** | You **should** have, or expect to obtain, a 1st or 2.1 Honours degree in biochemistry, molecular biology or animal science. [1976-069 (1995) : 79] |
| **Di** | Applicants **should** hold, or expect to obtain, a first or upper second class honours degree in a biological science [1976-080 (1995) : 82] |
| **Di** | You **should** have, or expect to obtain, a first or upper second class honours degree in an appropriate discipline. [1980-007 (1995) : 55] |
| **Di** | Candidates for the studentship **should** have or expect a good Honours degree or equivalent in Chemistry. [1980-010 (1995) : 57] |
| **Di** | Applicants **should** have or expect to achieve at least a 2:1 in a biological, biochemical or molecular science, [1980-011 (1995) : 57] |
| **Di** | Applicants **should** hold or expect to gain a first or upper second class honours degree. [1980-019 (1995) : 60] |
| **Di** | Applicants for this position **should** possess a good first degree in metallurgy/materials science/chemistry. [1980-025 (1995) : 61] |
| **Di** | You **should** have a degree in a relevant field, CEng status or a higher degree. [1980-027 (1995) : 62] |
| **Di** | Applicants **should** have a good honours degree or postgraduate qualification in Geography, Geology or an Environmental Science. [1980-032 (1995) : 64] |
| **Di** | The successful candidate **should** have obtained a Ph.D. in the field of Magnetic Resonance Imaging/Spectroscopy. [1980-044 (1995) : 67] |
| **Di** | You **should** have a good degree in a biological science, preferably in biochemistry. [1980-047 (1995) : 68] |
| **Di** | Applicants **should** have, or expect to obtain, a first or upper second class honours degree in an appropriate area of life sciences. [1980-057 (1995) : 70] |
| **Di** | You **should** have a degree, preferably at 2i level, and have an academic background in soil science, geography or environmental science. [1980-061 (1995) : 71] |
| **Di** | Applicants **should** have a good honours degree, preferably in Chemical Engineering, but one in Physics or Chemistry may also be suitable. [1980-062 (1995) : 71] |
| **Di** | Applicants **should** possess, or expect to obtain, a first or an upper second class honours degree in a relevant biological science, but candidates with a strong background in both histology and biochemistry would be particularly suitable. [1980-064 (1995) : 71] |
| **Di** | Candidates **should** have a strong background in organic ligand synthesis and transition metal co-ordination chemistry. [1980-066 (1995) : 72] |
| Di | Candidates should have, or anticipate obtaining a first or 2(i) degree in an appropriate area of environmental science/biology. [1980-068 (1995) : 72] |
| Di | Applicants should possess a Ph.D. involving SPM or associated technologies, and be either newly qualified, or working as a Research Fellow or in industry. [1980-088 (1995) : 77] |
| Di | Applicants should have or expect to graduate this summer with at least an upper second class honours degree in virology, molecular biology or a related field. [1980-097 (1995) : 79] |
| Di | Applicants should have, or expect to obtain, at least a 2.1 in an appropriate biological science. [1980-098 (1995) : 79] |
| Di | Candidates should have at least a 2.1 degree or equivalent in an appropriate subject. [1980-114 (1995) : 82] |
| Di | Applicants should have or expect to obtain a good honours degree in an appropriate discipline. [1980-123 (1995) : 86] |
| Di | You should either be completing your studies this year and have a good first degree in a scientific or engineering discipline, [1984-014 (1995) : 57] |
| Di | Additionally, candidates should either be Qualified Persons or able to achieve this status within 2 years. [1984-021 (1995) : 59] |
| Di | Applicants should hold, or expect to obtain in the near future, a Ph.D. in an applied mathematical discipline. [1984-035 (1995) : 62] |
| Di | Candidates should have or expect to obtain a good Honours degree or Ph.D. [1984-041 (1995) : 64] |
| Di | The successful applicant should have either A degree in scientific, engineering or mathematical subject/or Degree-standard membership of a Professional Institution/or BTEC Higher/SCOTVEC (HNC) in scientific engineering or mathematical subject or an equivalent qualification. [1984-042 (1995) : 65] |
| Di | Applications should possess at least an Upper Second degree or equivalent. [1984-058 (1995) : 69] |
| Di | Candidates should possess or expect to obtain at least a 2.1 Honours Degree in a relevant science. [1984-061 (1995) : 70] |
| Di | Applicants should have a background in molecular biology, tissue culture or immunohistochemistry. [1984-063 (1995) : 70] |
| Di | Applicants should possess a degree, BTEC higher certificate or equivalent qualification in an appropriate scientific discipline. [1984-068 (1995) : 72] |
| Di | Applicants should have a good Honours degree in Physics, Chemistry or Mathematics. [1984-072 (1995) : 72] |
| Di | Applicants should have (or expect to have) a first or upper second in chemistry, biochemistry or another related subject. [1984-077 (1995) : 74] |
| Di | Applicants should possess Ph.D. in Physics, Chemistry, Electronic Engineering or related subject. [1984-082 (1995) : 74] |
| Di | Candidates should have or expect to have at least an Upper Second Class Honours Degree in a relevant subject. [1984-083 (1995) : 75] |
| Di | The applicant should have a first degree in biology. [1984-086 (1995) : 75] |
| Di | Candidates should be well qualified graduates with a minimum 2.1 honours degree that includes a substantial microbiology component. [1984-091 (1995) : 76] |
| Di | Applicants should have, or expect to have a first or 2.1 class (or equivalent) degree in Physics, Chemistry, Materials Science or a related subject. [1984-093 (1995) : 77] |
| Di | The RO will provide support to the SRO, and should have a relevant degree. [1984-099 (1995) : 78] |
| Di | Applicants should have a good Honours degree in Biology, Geology, Geography, Environmental Sciences, Economics or a relevant Social Science discipline. [1984-105 (1995) : 79] |
| Di | Applicants should have, or expect to obtain a 2:1 or 1st class honours degree in Physics, Electrical Engineering or a related subject. [1984-107 (1995) : 80] |
| Di | Candidates should possess, or be nearing completion of, a Ph.D. in an area of Physics or Materials Science. [1984-108 (1995) : 80] |
| **Di** | **Applicants should** possess a good degree in chemistry, biochemistry, food science or similar subject. [1984-110 (1995) : 80] |
| **Di** | **Candidates should** possess or expect to obtain at least a 2.1 degree or M.Sc. in Science, Computer Science, Psychology, Optometry or related subjects. [1984-114 (1995) : 81] |
| **Di** | **Well-qualified students of any nationality in Earth Sciences, Geological Sciences, Physics, Engineering, Applied Mathematics or Theoretical Physics should apply.** [1984-115 (1995) : 81] |
| **Di** | **You should ideally hold a first or upper second class degree in materials science, engineering or physics.** [1989-004 (1995) : 56] |
| **Di** | **To qualify you should have a good honours degree in Topographic Sciences, Geography or Cartography and a postgraduate diploma or MSc in digital cartography or remote sensing.** [1989-005 (1995) : 57] |
| **Di** | **Applicants should be in possession of a Ph.D. or be nearing the completion of their Ph.D. studies.** [1989-016 (1995) : 62] |
| **Di** | **Applicants should preferably have a background in catalysis, surface science or a related area of physical chemistry, inorganic chemistry or materials science.** [1989-020 (1995) : 63] |
| **Di** | **Well-qualified students of any nationality in Earth Sciences, Geological Sciences, Physics, Engineering, Applied Mathematics or Theoretical Physics should apply.** [1984-115 (1995) : 81] |
| **Di** | **You should have at least a 2ii Honours degree in Genetics or a related biological science.** [1989-030 (1995) : 66] |
| **Di** | **You should have at least a 2.1 degree in biochemistry, biology or related subject.** [1989-037 (1995) : 68] |
| **Di** | **Applicants should possess a good honours degree in Physics, Electronic Engineering or other relevant Physical Science.** [1989-050 (1995) : 71] |
| **Di** | **Applicants should have at least a 2ii Honours degree in Genetics or a related biological science.** [1989-030 (1995) : 66] |
| **Di** | **Applicants should have at least a Masters degree (preferably a Ph.D.) in Agricultural Extension/Agricultural Economics, plus experience in teaching and research in Agricultural Economics and Agricultural Extension at the tertiary level.** [1989-070 (1995) : 75] |
| **Di** | **Candidates should have a strong background in physical or electrochemistry.** [1989-088 (1995) : 80] |
| **Di** | **Candidates should have a degree in Microbiology or Biological Sciences.** [1989-091 (1995) : 81] |
| **Di** | **You should possess an honours degree in a suitable scientific discipline from a UK University of equivalent.** [1989-100 (1995) : 83] |
| **Di** | **Candidates should have a degree (or equivalent) in computer science or mathematical / physical sciences with a strong computing background.** [1993-002 (1995) : 52] |
| **Di** | **You should possess an honours degree in a suitable scientific discipline from a UK University of equivalent.** [1989-100 (1995) : 83] |
| **Di** | **Candidates should have a degree (or equivalent) in computer science or mathematical / physical sciences with a strong computing background.** [1993-002 (1995) : 52] |
| **Di** | **and should have a background in remote sensing and/or vegetation modelling.** [1993-016 (1995) : 56] |
| **Di** | **Applicants should have a degree in microbiology or a related subject.** [1993-017 (1995) : 56] |
| **Di** | **Applicants should have a first or upper second class honours degree in a relevant subject.** [1993-043 (1995) : 65] |
| **Di** | **Applicants should have a background in synthetic organic chemistry.** [1993-050 (1995) : 66] |
| **Di** | **Applicants should have, or be about to, obtain a relevant science degree or technical qualification.** [1993-053 (1995) : 67] |
| **Di** | **Applicants should be graduates in one of the biological sciences.** [1993-066 (1995) : 70] |
| **Di** | **Applicants should have a Ph.D. or equivalent in the physical sciences.** [1993-078 (1995) : 73] |
| **Di** | **Applicants should possess a BSc or equivalent in an appropriate subject.** |
| **Di** | **Ideally, candidates should be educated to degree level or equivalent in a science or engineering discipline.** [1993-083 (1995) : 74] |
Applicants should have a Ph.D. degree or equivalent qualification in genetic resources or other fields closely related to germplasm conservation, management and utilisation. [1993-084 (1995) : 74]

Candidates should have a 1st or 2.1 Honours degree in Physics or related subjects. [1993-090 (1995) : 76]

Applicants should have a degree in biochemistry, molecular biology or a related subject. [1993-097 (1995) : 78]

To apply at graduate level you should possess a degree in chemistry, biochemistry or a related subject. [1998-029 (1995) : 82]

Applicants should have, or expect to obtain shortly, a Ph.D. in Physics. [1998-044 (1995) : 86]

You should have, or soon expect to obtain, a Ph.D. in Physical Chemistry/ Chemical Physics. [1998-051 (1995) : 88]

Applicants should be graduates in statistics or other relevant subject. [1998-068 (1995) : 92]

Applicants should possess a degree, BTec Higher Certificate or equivalent qualification in an appropriate scientific discipline. [1998-071 (1995) : 93]

You should have, or be about to complete a Ph.D. [1998-072 (1995) : 94]

The successful applicant should have a minimum of a HNC in electronic engineering. [1998-073 (1995) : 94]

Candidates should have a strong background in either organic synthesis or polymer chemistry. [1998-074 (1995) : 94]

Candidates should ideally possess a life science degree or other relevant qualifications. [1998-080 (1995) : 95]

Candidates should normally have a first or upper second class honours degree in a related science subject. [1998-093 (1995) : 99]

Applicants should have a Ph.D., or equivalent qualification in Civil Engineering or Materials Science. [2002-013 (1995) : 58]

Applicants should have a Ph.D. or equivalent qualification in Materials Science, Chemistry or Physics. [2002-013 (1995) : 58]

Applicants should have a good honours degree in an engineering or science discipline. [2002-013 (1995) : 58]

Candidates should possess an Honours Degree in Horticulture or allied discipline, together with a postgraduate qualification relevant to Horticulture. [2002-023 (1995) : 62]

Candidates should be qualified BSc or degree equivalent standard in an appropriate subject, eg., Biochemistry. [2002-034 (1995) : 65]

Applicants should hold, or expect to gain shortly, a Ph.D. [2002-035 (1995) : 65]

To be eligible to join the Scheme, you should have or expect to gain at least an upper second class degree. [2002-060 (1995) : 73]

Applicants should have a higher degree in a relevant subject or equivalent qualification. [2002-064 (1995) : 74]

Candidates should have a chemical/biological or a chemical/ physical background and at least an ONC or equivalent. [2002-072 (1995) : 76]

Applicants should have a first degree in a relevant subject or equivalent qualification. [2002-074 (1995) : 76]

Applicants should have, or expect to obtain, an Upper Second Class Degree or better in a relevant science subject, or in medicine. [2006-029 (1995) : 69]

The applicants should be qualified to Ph.D. level. [2006-035 (1995) : 70]

Candidates should have a good upper second or first class degree in chemistry, biochemistry or related subjects. [2006-046 (1995) : 74]

The post is for a period of one year in the first instance with the possibility of extension, and you should have a good degree in Earth Sciences or Computing. [2006-059 (1995) : 77]

Candidates should have a good honours degree in molecular biology, biochemistry or a related subject. [2006-063 (1995) : 78]

The applicant should hold a first or upper second class honours degree in chemistry. [2006-072 (1995) : 81]
<p>| Di  | Your formal qualifications <strong>should</strong> include a Degree or HND in Microbiology or associated science [2006-083 (1995) : 84] |
| Di Ca | Applicants are expected to have a first or upper second class degree in one of the relevant disciplines and <strong>should</strong> send their CV, together with the names and addresses of two academic referees, to the Laboratory Personnel Officer, Institute of Food Research, Earley Gate, Whiteknights Road, Reading, Berks RG6 6BZ quoting ref: R20/95. [1984-094 (1995) : 77] |
| Di Ca | Students who have, or expect to obtain, a good degree in chemistry or a related subject <strong>should</strong> send a CV and the names and addresses of two academic referees to the address below as soon as possible. [1998-064 (1995) : 91] |
| Di Co | Students who have, or expect to obtain, a good degree in chemistry or a related subject <strong>should</strong> send a CV and the names and addresses of two academic referees to the address below as soon as possible. [1998-064 (1995) : 91] |
| Di Co | <strong>You should</strong> have a good first degree in Engineering Mathematics, Mechanical Engineering or a related discipline and be able to demonstrate considerable mathematical ability in the fields of both classical continuum mathematics and numerical algorithms. [1959-031 (1995) : 52] |
| Di Co | <strong>You should</strong> ideally have a background in robotics, artificial intelligence, computer science, psychology or a related discipline. [1959-031 (1995) : 52] |
| Di Co | <strong>You should</strong> ideally have a background in robotics, artificial intelligence, computer science, psychology or a related discipline. [1959-031 (1995) : 52] |
| Di Co | Applicants <strong>should</strong> possess a Ph.D. in photochemistry (inorganic or organic), electrochemistry, inorganic synthesis or solid state chemistry with a physics bias. [1959-060 (1995) : 59] |
| Di Co | Applicants <strong>should</strong> possess a degree or equivalent in Mathematics, Aeronautical Engineering or Computer Science with appropriate experience in CFD methods and aerodynamics. [1967-002 (1995) : 60] |
| Di Co | Both the above posts require applicants with a good degree or equivalent in computer science, or a related subject and <strong>should</strong> in addition have practical experience of parallel/distributed systems engineering. [1967-041 (1995) : 74] |
| Di Co | Candidates <strong>should</strong> have a strong technical background in parallel/distributed computer systems engineering and an aptitude for technically-oriented administration. [1967-041 (1995) : 74] |
| Di Co | Applicants <strong>should</strong> hold a Ph.D. in a science or engineering discipline that equips them with the interdisciplinary knowledge and skills required to chemically modify electrolytes, analyse and characterise resulting deposits. [1967-057 (1995) : 78] |
| Di Co | Candidates <strong>should</strong> have (or expect) a 1st or 2.1 degree and a full driving licence. [1967-094 (1995) : 87] |
| Di Co | Applicants <strong>should</strong> have a Ph.D. at the time of appointment and a demonstrated capacity for research and publication. [1976-014 (1995) : 66] |
| Di Co | Applicants <strong>should</strong> have a degree in Animal Science or a similar subject, a desire to work with cattle and an aptitude for computer collection and analysis of data. [1976-040 (1995) : 72] |
| Di Co | Candidates <strong>should</strong> have, or expect to receive, a good honours degree in Biochemistry, Chemistry or related discipline and be interested in the biophysical chemistry of protein structure and function. [1980-031 (1995) : 64] |
| Di Co | Applicants <strong>should</strong> have a good Honours Degree in Physics, a Ph.D. in a relevant area, a strong commitment to teaching and the potential to carry out independent research. [1980-037 (1995) : 65] |
| Di Co | The successful applicant <strong>should</strong> have a higher degree and broad interests in environmental sciences. [1980-041 (1995) : 66] |
| Di Co | Applicants <strong>should</strong> have a good degree or equivalent in physics or a related discipline, with a high level of competence in computing and instrumentation. [1980-047 (1995) : 68] |
| Di Co | The successful candidate, who <strong>should</strong> have a background in physics and/or electronics and with a knowledge of computing, <strong>will</strong> be expected to take an active role in the development and supervision of new experiments as well as the day to day running of the laboratories and their associated staff. [1980-106 (1995) : 80] |
| Di Co | You <strong>should</strong> have a degree or equivalent qualification in Chemistry, Biochemistry or Biological Science and have basic computer skills in document preparation and graph work. [1984-013 (1995) : 56] |
| Di Co | Applicants <strong>should</strong> have a good first degree in a relevant area and an interest in measurement science. [1984-027 (1995) : 61] |
| Di Co | Applicants <strong>should</strong> have a proven research record in digital image processing related to image enhancement and restoration, with particular reference to non linear methods. [1984-028 (1995) : 61] |
| Di Co | The ideal candidate <strong>should</strong> be qualified to degree or equivalent level with an interest in developing a career in bioanalytical mass spectrometry. |
| Di Co | Applicants <strong>should</strong> be graduates with a background in virology and molecular biology and preferably with experience in PCR technology, sequencing and tissue culture. [1984-092 (1995) : 77] |
| Di Co | Candidates <strong>should</strong> hold a 1st or 2.1 honours degree, or an MSc, in Statistics, with an interest in applications in the biosciences. [1984-098 (1995) : 78] |
| Di Co | Applicants <strong>should</strong> have a degree/HND in physics/electronics with an interest in chemistry and instrumentation. [1989-015 (1995) : 61] |
| Di Co | Candidates <strong>should</strong> have received their doctoral training in the UK or the Republic of Ireland and have been engaged in postdoctoral research in either country for not more than five years. [1989-029 (1995) : 66] |
| Di Co | Candidates <strong>should</strong> hold a 1st class or 2nd (1) honours degree in Biological Sciences and have a strong interest in molecular biology. [1989-049 (1995) : 71] |
| Di Co | Good Honours degrees are essential and ideally candidates <strong>should</strong> be members of the Association. [1989-052 (1995) : 72] |
| Di Co | Applicants <strong>should</strong> have a Ph.D. degree or equivalent qualification in genetic resources or other fields closely related to germplasm conservation, management and utilisation. [1989-060 (1995) : 73] |
| Di Co | You <strong>should</strong> have a BSc in a physical science (including Earth Sciences) and have knowledge of mineralogy and petrology or spectroscopy. [1989-078 (1995) : 77] |
| Di Co | Candidates <strong>should</strong> have a strong background in at least one of these areas and a desire to broaden their experience. [1989-091 (1995) : 81] |
| Di Co | The post-holder <strong>should</strong> have an Honours Degree in Occupational Hygiene, or alternatively, a Degree or equivalent in a Science or Engineering discipline together with either a British Examining Board in Occupational Hygiene (BEBOH) or postgraduate qualification in Occupational Hygiene. [1993-082 (1995) : 74] |
| Di Co | Scientific expertise and a track record in problem solving are essential for this position and you <strong>should</strong> be able to demonstrate leadership potential within a team of highly motivated individuals. [1993-086 (1995) : 75] |
| Di Co | Applicants <strong>should</strong> have a background in engineering, with some knowledge of fluid mechanics. [1998-012 (1995) : 76] |
| Di Co | You <strong>should</strong> be educated to honours degree standard, and preferably have a knowledge of Fortran. [1998-028 (1995) : 81] |
| Di Co | Applicants <strong>should</strong> normally have a higher degree, preferably a Ph.D., and hold a Certificate in Radiation Protection from an appropriate organisation. [1998-085 (1995) : 97] |
| Di Co | Applicants <strong>should</strong> have a good honours degree in electronic engineering or equivalent and be chartered. [2002-005 (1995) : 55] |
| Di Co | Applicants <strong>should</strong> have a degree in the biological sciences, preferably biochemistry or physiology, and possess good laboratory skills. [2002-008 (1995) : 56] |
| Di Co | Applicants <strong>should</strong> have a background in molecular microbiology with an interest in bacterial pathogenicity. [2002-037 (1995) : 66] |
| Di Co | Candidates <strong>should</strong> have a Ph.D., possess expertise in molecular microbiology and have an interest in microbial pathogenicity. [2002-037 (1995) : 66] |
| Di Co | Applicants <strong>should</strong> hold a Ph.D. or its equivalent in Physiology and have established a strong research record in the physiological sciences. [2006-016 (1995) : 65] |</p>

<td>Di Ex</td>
<td>You <strong>should</strong> have an honours degree in an appropriate subject together with some experience in cell biology, biochemistry or immunology and you <strong>will</strong> be encouraged to register for a Ph.D. [1998-057 (1995) : 90]</td>
</tr>
</tbody>
</table>
Applicants should possess a BSc or equivalent and have several years' experience in lymphocyte culture or cytotoxic cell assay and virus techniques. [1998-076 (1995) : 94]

You should have a degree or similar in a physics, materials science or similar field and relevant experience would be an advantage. [2002-012 (1995) : 57]

Applicants should hold, or have submitted for a Ph.D., and have software experience including physics-based device modelling. [2002-013 (1995) : 58]

Candidates should possess an Honours Degree in Horticulture or allied discipline supported by relevant postgraduate qualifications and/or industrial experience in production or environmental horticulture. [2002-023 (1995) : 62]

Candidates should be graduates in Horticulture or related studies with specialist knowledge and expertise in landscape design and management. [2002-023 (1995) : 62]

Candidates should have at least a good first degree in Microbiology and relevant experience in a pharmaceutical development, GMP environment extending over a minimum of 3-5 years. [2002-040 (1995) : 67]

Candidates should have, or have submitted for a Ph.D., and have software experience including physics-based device modelling. [2002-043 (1995) : 68]

Candidates ideally be graduates in who have at least two years' experience working in the field of protein purification. [2002-046 (1995) : 68]

You should have: A good (first or second class) first degree in a biological discipline; Preferably, some experience in microbiology or biochemistry [2002-061 (1995) : 74]

You should have a degree in environmental science, ecology or botany, and preferably some research experience. [2002-069 (1995) : 75]

Candidates should have a Ph.D. in geophysics, with some geological experience. [2002-071 (1995) : 76]

Candidates should have a relevant postgraduate degree with teaching/research experience at University level. [2006-013 (1995) : 64]

Candidates should hold a Ph.D. or equivalent in a field of nutritional science or a related area and also have substantive experience in a field related to clinical nutrition. [2006-016 (1995) : 65]

Candidates should have an HNC/D in Medical Laboratory Science or BSc in Biochemistry, Immunology or related subject, and at least 2-3 years post-qualification experience. [2006-023 (1995) : 68]

Candidates should be graduates in physics or materials science with good practical experience of electronics, or graduate electronics engineers with a solid grounding in materials. [2006-041 (1995) : 73]

For this three year appointment, you should have a good degree (or equivalent) in Electronics Engineering or Applied Physics with experience in micro-computing, programming, data transmission or manipulation. [2006-060 (1995) : 77]

The candidate should have a BSc or MSc and one to five years' experience in mineral exploration geophysics. [2006-064 (1995) : 78]

Applicants should possess a first or uppers second class honours degree in chemistry, or chemistry with computing science, and 0 - 3 years experience. [2006-072 (1995) : 81]

Candidates should have an Honours degree in Chemistry or equivalent, with experience in formulation work, surface coatings, and surface treatment. [2006-078 (1995) : 82]

A range of suitable qualifications should indicate experience or the post doctoral level. [2006-091 (1995) : 86]

Applicants should hold a BTEC Certificate/ Diploma or equivalent and have more than three years' laboratory experience. [2006-094 (1995) : 86]

Professionals with appropriate qualifications having at least 5 years experience in the investigation and remediation of derelict and contaminated land should apply (stating which post is of interest) to: Mrs Y. L. Scriven, Johnson Poole & Bloomer, Copthall House, New Road, Stourbridge DY8 1PH. Telephone 01384 444800. [1989-026 (1995) : 64]

You should have a good honours degree in Electronic Engineering and expertise in the design, test and build of analogue interface electronics (between low-level signals and a microprocessor)
| Di Ex Co | Applicants for this post **must** hold, or about to be awarded, a Ph.D. degree, and **should** have a strong background in molecular biology and some interest and expertise in immunology or protein chemistry. [1959-031 (1995) : 52] |
| Di Ex Co | The candidate **should** have a Ph.D. or equivalent, at least three years’ experience of applied ornithology and ecology, with a proven track record of applied field research, scientific publications and supervision of students. [1963-050 (1995) : 62] |
| Di Ex Co | Applicants **should** have a Ph.D. in a relevant field, experience of field and laboratory techniques including AAS and preferably ICP-AES with a proven ability to meet deadlines. [1967-001 (1995) : 60] |
| Di Ex Co | Applicants **should** have a good scientific degree in one of the fields covered by NERC, at least two years’ relevant postgraduate experience, together with a strong interest in the sciences relevant to environmental research. [1976-011 (1995) : 62] |
| Di Ex Co | You **should** be graduating with a Ph.D. in organic chemistry, or with up to 2 years’ experience and able to apply your intuitive grasp of organic chemistry to drug development challenges. [1976-019 (1995) : 67] |
| Di Ex Co | The candidate **should** have: a strong background in pest management, experience in research and application of biological control, demonstrated ability for management of scientific programmes, and at least 7 years' experience in relevant applied science in developing countries. [1976-053 (1995) : 75] |
| Di Ex Co | Reporting to the Senior Manager of Manufacturing Operations, the successful candidate **should** fulfil the following criteria: A Ph.D. degree in biotechnology/chemical engineering, biochemistry or chemistry, at least 4-6 years management experience in manufacturing and process development for a pharmaceutical or biotechnology company, and have prior experience with regulatory compliance issues for the manufacture of bulk pharmaceuticals, especially proteins, and recombinant products. [1976-073 (1995) : 80] |
| Di Ex Co | The applicant is likely to be a graduate, with some experience of Apple Systems and Ethernet Networking, and **should** be knowledgeable and enthusiastic about supporting both hardware and software in a lively and hardworking school environment. [1980-104 (1995) : 80] |
| Di Ex Co | The successful candidates **should** have: a relevant university degree; 5 to 10 years industrial / CRO experience in toxicological research; proven management ability; excellent organisational skills; good verbal and written communications skills; willingness to follow courses in Dutch [1984-010 (1995) : 54] |
| Di Ex Co | You **should** have a first degree in Zoology, Animal Physiology or related subject, a relevant higher degree or at least 5 years relevant experience, a Home Office Personal Licence and a current driving licence. [1984-013 (1995) : 56] |
| Di Ex Co | The successful applicants **should** have: a relevant degree, two to three years relevant experience, a practical approach and the ability to work within a multi-disciplinary team, good interpersonal skills, an enthusiasm for their subject and a desire to develop their contribution, a current UK driving licence, all three posts will involve travel, an appropriate grade of membership within a relevant professional body. [1984-016 (1995) : 58] |
| Di Ex Co | Applicants **should** have a science degree, be experienced and confident in the use of micro computers and proficient in handling large databases (including the use of proprietary software and a working knowledge of basic statistics). [1989-071 (1995) : 76] |
| Di Ex Co | Applicants **should** have a science degree, be experienced and confident in the use of micro computers and proficient in handling large databases (including the use of proprietary software and a working knowledge of basic statistics). [1989-071 (1995) : 76] |
| Di Ex Co | In addition you **should** have a higher degree (Ph.D. desirable) and at least three years post-doctoral experience preferably in cellular signalling/ receptor biochemistry and have some experience in rPCR techniques. [1989-100 (1995) : 83] |
| Di Ex Co | Educated to degree level in a relevant discipline and possessing a postgraduate qualification in the field of plant biochemistry and/or physiology, you **should** have relevant research experience. |
in a plant biology laboratory and **must** be a flexible, cooperative team player with good communication skills. [1989-100 (1995) : 83]

Di Ex Co Applicants **should** possess a BSc or equivalent and have several years' experience in lymphocyte culture, cytotoxic cell assay and ELISA techniques. [1989-106 (1995) : 84]

Di Ex Co With a degree in ecology or a related subject, you **should** have considerable experience of environmental management, a detailed knowledge of statutory and voluntary conservation and recreation organisations and the legislative and political context within which the NRA fulfils its role. [1993-040 (1995) : 63]

Di Ex Co Applicants **should** have tertiary qualifications in aquaculture, preferably M.S, extensive experience in all aspects of a large-scale laboratory for the culture of marine alga, and good organizational skills. [1993-064 (1995) : 70]

Di Ex Co You **should** have a good understanding of high-frequency fields, experience of computational modelling, and a strong interest in developing a new clinical technique. [1998-001 (1995) : 72]

Di Ex Co You **should** have at least an upper second class honours degree in chemical biochemical/engineering, supported by at least two years' post-graduate experience including, preferably, mathematical modelling and process simulation. [1998-020 (1995) : 79]

Di Ex Co Applicants for this post **should** have a degree in one of the Biological Sciences, experience in classification of medical or pharmaceutical data, a meticulous approach to work, good interpersonal skills and an ability to work under pressure. [1998-045 (1995) : 87]

Di Ex Co Candidates **should** normally have a first or upper second class degree in molecular biology/plant biotechnology or similar, and/or experience in molecular biological techniques such as DNA isolation, PCR, Southern and Northern Blotting and vector construction. [1998-093 (1995) : 99]

Di Ex Co Candidates **should** have a good honours degree (or equivalent) in mathematics, physics or engineering and preference **will** be shown to those candidates with experience in numerical techniques, especially in the field of computational fluid dynamics as applied to combustion and/or building aerodynamics. [2002-018 (1995) : 60]

Di Ex Co Applicants for both posts **should** have good honours and postgraduate degrees in a scientific or engineering discipline, with practical experience of mathematical software and modelling, C and/or Fortran programming and experience of applying computational techniques to industrial problems. [2002-029 (1995) : 64]

Di Ex Co Candidates **should** be educated to degree level in Chemistry or Physics, ideally with 2/3 years relevant experience in a laboratory environment and be familiar with the technologies we employ. [2002-031 (1995) : 64]

Di Ex Co In addition to a good degree in civil engineering, materials science or physics, you **should** have at least five years' experience in two or more of the following areas: • asphalt research • asphalt road design and construction • bitumen rheology • polymer modification of bitumen. Proven leadership, communication and presentation skills are required, together with the ability to design experiments and manage multi-site research programmes within an ISO 9001 environment. [2002-059 (1995) : 73]

Di Ex Co You **should** have a good honours degree in physics or computer science, three years' relevant postgraduate experience and a strong grounding in computer programming. [2002-068 (1995) : 75]

Di Ex Co You **should** be trained in research to Ph.D. level, or have at least two years' postgraduate experience in a relevant field of ecology, and **must** hold a full, clean driving licence. [2002-069 (1995) : 75]

Di Ex Co A graduate in a mathematical or engineering discipline, you **will** preferably have a further degree or relevant experience. In addition, you **should** have experience of scientific programming and be prepared to assist in the enhancement of current software, mainly written in FORTRAN. [2002-081 (1995) : 78]

Di Ex Co Applicants **should** have a good degree in a mathematical or physical science; experience of scientific computing and knowledge of the UNIX operating system are essential, and some knowledge of astronomy desirable. [2006-006 (1995) : 60]

Di Ex Co Applicants **should** ideally have a Ph.D. degree or similar research experience but less experienced candidates with good educational qualifications **will** be considered. Experience in
Computer Vision, Image Processing (including functional imaging and image registration) and C++ (or other Object-Oriented programming languages) \textit{would} be an advantage. [2006-030 (1995) : 69] [2006-033 (1995) : 70]

Applicants \textbf{should} have a strong mathematical background, experience in numerical methods and FORTRAN/C code development in a UNIX/PC environment. [2006-034 (1995) : 70]

Applicants \textbf{should} have a Ph.D. in the field of antennas or electromagnetic theory and experience in programming in FORTRAN. [2006-071 (1995) : 80]

It \textbf{should be noted} that the Trust's remit is primarily to support research in medicine, veterinary medicine and related biomathematical sciences. [1959-043 (1995) : 56]

Applicants \textbf{should} have a Ph.D. in the field of antennas or electromagnetic theory and experience in programming in FORTRAN. [2006-071 (1995) : 80]

It \textbf{should be noted} that the Trust's remit is primarily to support research in medicine, veterinary medicine and related biomathematical sciences. [1959-043 (1995) : 56]

The industrial / commercial support \textbf{should} be for basic / strategic research of industrial or commercial relevance: not contract research related to a particular company's immediate needs. [1963-047 (1995) : 61]

\textbf{EVALUATION OF THE FARM WOODLAND PREMIUM SCHEME (FWPS): FARM SURVEY - a research project intended to evaluate and review the FWPS in order to decide whether, or in what form, the scheme \textbf{should} continue after 31 MARCH 1997, and to inform the review Farm Woodland Scheme (FWS) and FWPS payment rates which \textbf{must} be undertaken and reported to Parliament by July 1996. [1967-093 (1995) : 87]

The course is open to all science and medical graduates and \textbf{should} be of interest to those wishing to gain experience in both the theory and practical techniques of molecular biology and \textbf{will} focus on how these techniques can be applied to the understanding, diagnosis and therapy of endocrine disease. [1976-100 (1995) : 87]

The position is one that \textbf{should be viewed} as having good career prospects. [1980-083 (1995) : 76]

An important aspect of the RNRRRS is that the research which ODA supports \textbf{should} be demand-led. [1980-112 (1995) : 82]

Applicants \textbf{should} note that this programme now includes fellowships previously considered under the Trust's scheme for Travelling Fellowships to Europe. [1989-029 (1995) : 66]

The projects involve research into new environmentally-friendly catalytic methods for the synthesis of important speciality chemicals and chemical intermediates and \textbf{should} appeal to those with interests in inorganic or organic chemistry and clean technology. [1989-036 (1995) : 68]

Those interested \textbf{should} note that the standard needed to progress to the later stages of the competition is extremely high. [1989-054 (1995) : 72]

Overseas candidates \textbf{should} also note that the College \textbf{will} not be responsible for payment of airfares [1989-054 (1995) : 72]

The work \textbf{should} prove both challenging and rewarding to anybody willing to apply themselves to this interesting and valued activity. [2002-065 (1995) : 74]

"There is a momentum for change which \textbf{should} result in benefits for universities, employers, students and Britain's economy. [2006-007 (1995) : 61]

The successful candidate \textbf{should} have experience in immunology, cell biology or experimental animal models of arthritis. [1959-025 (1995) : 50]

Candidates \textbf{should} preferably have a background in insect behaviour and/or pheromone chemistry. [1959-073 (1995) : 63]

Candidates \textbf{should} have worked in Materials Science, Solid State Chemistry or Geochemistry and experience in transmission electron microscopy is essential. [1963-004 (1995) : 51]

Candidates \textbf{should} preferably have experience of RNA extraction and RT-PCR. [1963-097 (1995) : 73]

\textbf{You should} have experience in vibration analysis and/or active control, ideally to post-doctoral level. [1971-023 (1995) : 62]

Applicants for the permanent lectureship \textbf{should} also have substantial experience in both teaching and research. [1971-057 (1995) : 74]
Ex and **should** ideally have experience of molecular biology and/or protein purification. [1971-090 (1995) : 80]

Ex and **should** have experience in research and/or engineering practice. [1976-029 (1995) : 70]

Ex You **should** ideally have toxicological, entomological or pest management experience. [1976-043 (1995) : 73]

Ex Applicants **should** have a minimum of 2 years' experience of monitoring studies to GCP requirements working either in the pharmaceutical industry or with a CRO. [1976-047 (1995) : 74]

Ex Applicants **should** have had experience in recording neurogenically and pharmacologically evoked smooth muscle activity in vitro. [1976-067 (1995) : 79]

Ex Applicants **should** preferably have experience in molecular genetics or protein purification. [1976-097 (1995) : 86]

Ex Applicants **should** have experience in one or more of the following areas: transgenic biology, mouse developmental biology, molecular biology. IAT qualified candidates are also encouraged to apply. [1980-038 (1995) : 65]

Ex You **should** have some experience in writing applications software. [1980-047 (1995) : 68]

Ex Applicants **should** be experienced molecular biologists, with a working knowledge of PCR and sequencing. [1980-051 (1995) : 68]

Ex The successful candidate **will** have developed an active working knowledge of vacuum coating processes such as sputtering and ion plating, and **should** have experience of technology transfer from laboratory to production. [1980-072 (1995) : 73]

Ex Applicants **should** ideally have experience of working with animal models as well as cell biology in the field of diabetes. [1980-074 (1995) : 74]

Ex Candidates **should** have experience of one and two dimensional electrophoresis (not necessarily in a medical context). [1980-092 (1995) : 78]

Ex Candidates **should** ideally have experience of tissue culture. [1980-092 (1995) : 78]

Ex The zoologist **should** be experienced in the survey of birds and protected species, in particular, badgers, bats and amphibians. [1980-113 (1995) : 82]

Ex The eco-management and audit specialist **should** have experience of BS7750, EMAS or site environmental auditing and be prepared to work overseas. [1980-113 (1995) : 82]

Ex Candidates **should** have experience in molecular biology and in the case of the Nottingham position, also in plant transformation. [1984-035 (1995) : 62]

Ex Ideally candidates **should** have some experience in one of molecular biology or transgenic techniques or flow cytometry; however this is not essential as training can be given. [1984-068 (1995) : 72]

Ex As a Computational Fluid Dynamacist, you **should** have 3 years or more experience of modelling in gas turbines. [1989-044 (1995) : 70]

Ex In addition candidates **should** ideally have experience of: [1989-044 (1995) : 70]

Ex Candidates **should** have practical knowledge of extraction and purification techniques as well as GC and HPLC gained within a GLP or NAMAS environment. [1989-047 (1995) : 70]

Ex Applicants **should** have experience of protein chemistry and analytical techniques. [1989-048 (1995) : 71]

Ex For appointment to the established B14-16 grade of the post, candidates **should** have five years relevant experience since graduating. [1989-050 (1995) : 71]

Ex This appointment **will** be made at the level of Research Assistant and candidates **should** have previous experience with FISH. [1989-086 (1995) : 79]

Ex The candidate **should** have broad experience of diagnostic bacteriology, parasitology and mycology. [1993-004 (1995) : 52]

Ex and **should** also have particular experience in diagnostic virology. [1993-004 (1995) : 52]

Ex Candidates **should** therefore have recent relevant experience and we **will** consider applications from professionals who can be released from their present employer to undertake this work on a part time basis. [1993-054 (1995) : 67]

Ex You **should** have experience characterising/fabricating superconductors including measuring the critical current density in magnetic fields. [1998-036 (1995) : 84]
| Ex | Applicants *should* have experience in cell culture and immunoassays, while FACS analysis *would* be of benefit. [1998-037 (1995) : 84] |
| Ex | Applicants *should* have a minimum of 5-8 years postgraduate experience in a toxicology environment. [1998-041 (1995) : 86] |
| Ex | Applicants *should* possess relevant experience/qualifications in the biological sciences and be able to work in a team. [1998-056 (1995) : 90] |
| Ex | You *should* have a good understanding of electromagnetic effects and relevant material properties. [1998-087 (1995) : 98] |
| Ex | The successful candidate *should* possess substantial experience in the provision of undergraduate and postgraduate education [2002-023 (1995) : 62] |
| Ex | Applicants *should* also have relevant laboratory experience. [2002-034 (1995) : 65] |
| Ex | and *should* possess experience in numerical modelling of the atmosphere, oceans and other fluid systems. [2002-035 (1995) : 65] |
| Ex | Applicants *should* have at least three years project management experience gained in a regulated industry - ideally pharmaceuticals. [2006-004 (1995) : 60] |
| Ex | Applicants *should* have experience in teaching Physiology at the undergraduate level. [2006-016 (1995) : 65] |
| Ex | For this post, candidates *should* have a proven research record in the areas of semiconductor device design, fabrication and assessment. [2006-035 (1995) : 70] |
| Ex | Candidates *should* have experience in the design and assessment of optoelectronic devices for use in high data rate or microwave frequency systems. [2006-035 (1995) : 70] |
| Ex | Candidates *should* have at least four years of postdoctoral research experience in the spectroscopic characterisation of semiconductor materials and devices. [2006-039 (1995) : 72] |
| Ex | Candidates *should* have at least one year of postdoctoral research experience in semiconductor devices. [2006-039 (1995) : 72] |
| Ex | Candidates *should* have at least one year of postdoctoral research experience in the area of computer simulation and modelling. [2006-039 (1995) : 72] |
| Ex Co | Candidates *should* have a proven track record in analytical research and currently be in a management or supervisory position within the pharmaceutical industry. [1963-083 (1995) : 69] |
| Ex Co | He/She *should* have field experience in several tropical countries with a flair for strategic thinking in addressing worldwide strategic issues in forest genetic resources also with successful management experience. [1967-012 (1995) : 66] |
| Ex Co | Applicants *should* have experience in a wide range of molecular biology techniques and be able to apply them to a number of projects on mechanisms of antimicrobial / disinfectant resistance in bacteria and the application of "antisense" to antimicrobial therapy. [1971-032 (1995) : 66] |
| Ex Co | Applicants *should* have a proven track record in similar consultancy work and an ability to develop business over a broad client base. [1971-044 (1995) : 69] |
| Ex Co | Applicants *should* have an outstanding record of research and teaching achievements in this field. [1976-002 (1995) : 59] |
| Ex Co | Candidates *should* have an outstanding research record, with strong interests in Synthetic Inorganic Chemistry. [1976-003 (1995) : 60] |
| Ex Co | The person *should* have experience and practical skills in cell culture, T cell cloning and lymphocyte activation. [1976-022 (1995) : 68] |
| Ex Co | Applicants *should* be able to show that they have the necessary experience and qualifications to lead a small entomology research unit and train Papua New Guinean scientists and technicians. [1976-041 (1995) : 72] |
| Ex Co | You *should* have practical experience of conservation management and of working with UK government bodies and NGOs involved in conservation. [1980-128 (1995) : 87] |
| Ex Co | As manager of a team involved in a very active area of policy in both the UK and Europe, the successful candidate *will* demonstrate evidence of experience in team leadership, project management, conservation legislation and *should* be a skilful advocate. [1984-011 (1995) : 54] |
| Ex Co | or, in addition you *should* have from 1-3 years of technical/research experience with a consumer-oriented, blue-chip organisation, in sectors such as: fmcg, food, pharmaceuticals, |
Ex Co Applicants should have a good record in one or more fields relating to exercise physiology or sports science, be able to demonstrate success in attracting funding, and have a positive enthusiastic character who can drive high quality research, run stimulating courses and contribute fully in devising policies and activities of the Institute. [1984-014 (1995) : 57]

Ex Co Candidates should have previous laboratory experience in virology and/or molecular biology, and a working knowledge of PCR would be an advantage. [1984-088 (1995) : 68]

Ex Co Candidates should have experience in low and high level (C) software design, signal processing and knowledge of state-of-the-art design and fabrication of low power, microminiature embedded systems[1989-005 (1995) : 57]

Ex Co Candidates should have experience or an interest in molecular biology and be willing to participate in oceanographic cruises. [1989-045 (1995) : 70]

Ex Co Ideally applicants should have some experience in the FMCG R&D sector & knowledge of analytical chemistry may be desirable. [1989-062 (1995) : 74]

Ex Co You should have herbarium curatorial experience and a good understanding of gymnosperms, particularly conifers, and their taxonomy. [1989-113 (1995) : 86]

Ex Co The successful applicant should have demonstrated experience in the selection and ongoing evaluation of major interdisciplinary research projects; extensive negotiating skills which have been illustrated in cementing research alliances with industry, academia and/or other scientific laboratories, both in Australia and overseas; leadership ability to inspire scientists and support staff to be creative and output-oriented; interpersonal skills for successful management of a multi-disciplined scientific environment; significant scientific achievement in a field relevant to work conducted at ANSTO [1993-008 (1995) : 54]

Ex Co He/She should also have an established record of managerial and administrative responsibilities in the international arena, the ability to develop rapport with national and international peers, and the ability to be an effective spokesperson for collaborative research initiatives involving many stakeholders. [1993-069 (1995) : 71]

Ex Co Applicants should have experience in electronic materials processing, colloid chemistry, surface modification and polymer processing. [1993-071 (1995) : 71]

Ex Co You should ideally have an experimental research background, a knowledge of modern physical metallurgy principles and the ability to undertake a wide range of microstructural investigations using state-of-the-art techniques. [1998-031 (1995) : 83]

Ex Co You should have relevant research experience together with experience of the development and manufacture of laboratory equipment and/or the testing of materials. [1998-066 (1995) : 92]

Ex Co You should also have experience of teaching undergraduate and postgraduate students the principles and operation of a range of experimental techniques and be able to organise an undergraduate laboratory programme including the writing of laboratory instruction sheets for students. [1998-066 (1995) : 92]

Ex Co You should have at least two years post degree experience (or equivalent) and a thorough understanding of the latest analytical techniques including analysis at ppm levels. [1998-090 (1995) : 99]

Ex Co Applicants should have a minimum of 5 years' experience in regulatory affairs with a significant pharmaceutical company, combined with good appreciation of the different principles applied to ethical and generic pharmaceuticals. [2002-002 (1995) : 54]

Ex Co Applicants should demonstrate considerable experience in the management and motivation of technical and scientific staff and have a proven record in the development of equipment for clinical research. [2006-003 (1995) : 59]

Ex Co Di Applicants should have several years experience, preferably recent, in ultrasound and be graduates in physical sciences or engineering and/or hold a relevant postgraduate degree. [1967-087 (1995) : 86]

Ex Di Candidates must be widely experienced and should have a post graduate qualification. [1959-051 (1995) : 57]
| Ex Di | Applicants should have experience, preferably recent in radiotherapy physics and be graduates in physical sciences and/or hold a relevant postgraduate degree. [1967-087 (1995) : 86] |
| Ex Di | Applicants should preferably have had experience in the technique at Ph.D. or post-doctoral level. [1984-051 (1995) : 68] |
| Ex Di | The candidate should have international experience and a background relating to forestry research. [1993-087 (1995) : 76] |
| Ex Di | Candidate should have experience as a Clinical Laboratory technician and hold the FIMLS, or equivalent qualifications, with fifteen years experience including training. [2002-041 (1995) : 67] |
| Ex Di Co | You should have one year's laboratory experience and a HNC/D or degree (or equivalent) in chemistry or a related subject, or be prepared to study for a further qualification. [1959-088 (1995) : 66] |
| Ex Di Co | For Grade C, you should have a minimum of three years’ experience and be qualified to BTEC National level or equivalent and preferably have an interest in mineralogy, physics or chemistry. [1963-051 (1995) : 62] |
| Ex Di Co | The individual should either have physiological measurement background or nursing qualifications, and be prepared to work in a flexible manner. [1963-060 (1995) : 64] |
| Ex Di Co | The applicant will work under the supervision of an MTO3 and should have relevant laboratory experience, expertise in cell culture is a specific requirement, and flexible approach is required in that this post will be required to be transferred within Cell Resources as income generation demands. [1971-043 (1995) : 69] |
| ExCo | Applicants should have practical experience of intracellular recording techniques with an interest in synaptic pharmacology. [1980-102 (1995) : 80] |

Ca | Informal enquiries should be sent to mng@sanger.ac.uk [2481-005 (2005) : 54] |
Ca | Applications, including a covering letter, a full CV and the names and addresses of two professional referees, should be sent to: [2481-019 (2005) : 58] |
Ca | Candidates should be available for interview in January 2005. [2481-024 (2005) : 60] |
Ca | Applicants wishing to apply for more than one position should cite reasons for applying for each position in Section 4 of the SEPA application form and reference all positions being applied for on the front page of the form. [2481-033 (2005) : 63] |
Ca | An application letter and CV together with the names and addresses of two referees should be sent to Tracy Jennings, Biotica, - Chesterford Research Park, Little Chesterford, Nr. Saffron Walden, Essex, CB10 1XL, UK; tracy.jennings@biotica.com [2481-038 (2005) : 65] |
Ca | Applications should be sent to the HR Department, The Wellcome Trust, 215 Euston Road, London NW1 2BE or to hr@wellcome.ac.uk by Friday 21 January 2005. [2481-043 (2005) : 67] |
Ca | Applications, including a covering letter, a full CV and the names and addresses of two professional referees, should be sent to: [2481-059 (2005) : 71] |
Ca | Applications should be made in writing with full CV, daytime contact number, and the contact details of two referees who can be contacted prior to interview. [2481-069 (2005) : 74] |
Ca | Applications, consisting of a curriculum vitae, including a list of publications, an outline of a proposed research project(s) and the names of three referees, should be sent to the Personnel Officer at the London School of Hygiene & Tropical Medicine, Keppel Street, London WC1 E 7HT (telephone 020 7927 2203; fax: 020 7636 4771, e-mail: personnel@lshtm.ac.uk) by 10 January 2005 quoting the appropriate reference PD3 or GW5. [2481-070 (2005) : 75] |
Ca | A 5-year plan outlining specific research directions in physical / environmental chemistry should be provided on one page A4. [2481-071 (2005) : 75] |
Ca Interested applicants **should** write, attaching a CV, before 21 January 2005, to one or more of the following: [2481-076 (2005) : 77]

Ca Applicants **should** submit a formal application, providing details of up to 3 potential supervisors whose research areas are most related to their interests. [2481-077 (2005) : 77]

Ca Any other relevant information such as previous research or industrial laboratory experience **should** also be included. [2481-077 (2005) : 77]

Ca Applicants **should be submitted** as soon as possible and no later than 17th January 2005. [2481-077 (2005) : 77]

Ca Requests to attend the meeting **should be addressed** to Mr Keith Butler at: [2481-081 (2005) : 78]

Ca The application, which **must** be on the new form for 2005, **should be made** by the person supervising the research. [2481-085 (2005) : 79]

Ca Students from the UK/EU who are interested in the above positions **should** respond by e-mail to c.e.bain@abdn.ac.uk, attaching a short CV that includes the names of at least 2 academic referees. [2485-008 (2005) : 59]

Ca The application, which **must** be on the new form for 2005, **should be made** by the person supervising the research. [2481-083 (2005) : 85]

Ca Interested candidates **should** send their application using the NTU application form together with detailed curriculum vitae, copies of the educational certificates, 3 international referee reports (including contact details), statement of research intent, list of publications to: [2485-046 (2005) : 74]

Ca Applications **should be made** at www.supa.ac.uk by March 11th. [2485-017 (2005) : 61]

Ca Candidates **should** submit a full C.V., including the name and addresses of two referees, to Dr Andrew McAinsh, Chromatin Segregation Laboratory, Marie Curie Research Institute, The Chart, Oxted, Surrey, RH8 OTL, UK. Tel: +44 (0) 1883-722-30 [2485-043 (2005) : 72]

Ca Applications **should include** a full CV, publications list, and the names of three professional referees, [2485-083 (2005) : 85]

Ca and **should be accompanied** by a completed form PD18 (downloadable from http://www.admin.cam.ac.uk/offices/personnel/forms/pd18 , [2485-083 (2005) : 85]

Ca Applications **should include** a full CV and the names of two professional referees. [2485-083 (2005) : 85]

Ca All applications **should be sent** to Mrs S.M. Begg, Unilever Centre for Molecular Informatics, Department of Chemistry, Lensfield Road, Cambridge CB2 1 EW, E-mail: smb28@cam.ac.uk quoting the appropriate job reference. [2485-083 (2005) : 85]

Ca Applications **should include** a full CV, publications list, and the names of three professional referees, [2485-083 (2005) : 85]

Ca and **should be accompanied** by a completed form PD18 (downloadable from http://www.admin.cam.ac.uk/offices/personnel/forms/pd18 , [2485-083 (2005) : 85]

Ca Applications **should include** a full CV and the names of two professional referees. [2485-083 (2005) : 85]

Ca All applications **should be sent** to Mrs S.M. Begg, Unilever Centre for Molecular Informatics, Department of Chemistry, Lensfield Road, Cambridge CB2 1 EW, E-mail: smb28@cam.ac.uk quoting the appropriate job reference. [2485-083 (2005) : 85]

Ca Prior to application, further information (including application procedure) **should be obtained** from: [2485-089 (2005) : 87]

Ca Further particulars for the above three posts may be obtained from Mr C J Scotcher, The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford
Applications including a CV, list of publications and the contact details of three referees should be sent to the Senior Administrator, Clarendon Laboratory, Department of Physics, Parks Road, Oxford OX1 3PU, or e-mail: a.gordon@physics.ox.ac.uk by 4th March 2005 and quoting reference number DK05/002. [2485-097 (2005) : 89]

Interested candidates should send a CV to Allison Shakespeare, e-mail: a.s.shakespeare@bham.ac.uk [2485-110 (2005) : 92]

Interested applicants should send a detailed CV quoting current salary and references to Right Hand HR, Ltd, Rotterdam House, 118 Quayside, Newcastle upon Tyne, NE1 3DY or e-mail sue.little@rhhr.com [2489-006 (2005) : 60]

Informal inquiries should be addressed to Professor Sir John Walker via e-mail walker@mrc-dunn.cam.ac.uk or phone 01223 252701. [2489-008 (2005) : 62]

Interested scientists should contact Dr Kenny Black at the address below in the first instance. [2489-037 (2005) : 73]

Letters of application, including two CVs, the names, postal and e-mail addresses and fax numbers of two academic referees, should be sent to Lesley Frew, IBLS, West Medical Building, University of Glasgow, Glasgow G12 8QQ, UK quoting Ref 11119/DPL/A3. [2489-039 (2005) : 74]

Interested applicants should obtain an application pack from Miss Tracy Woods, Departmental Administrator, Biochemical Engineering, University College London, Torrington Place, London WC1E 7JE (Tel: 020 7679 3003 or email: t.woods@ucl.ac.uk). [2489-041 (2005) : 74]

Applications in the form of a full CV, together with letter of application quoting Research Assistant, should be sent to the above address. [2489-041 (2005) : 74]

Applications, including research interests, CV, and two letters of reference should be sent to the Team Leader (contact below). [2489-046 (2005) : 76]

Candidates to the post-doc position should include copies of selected publications. [2489-046 (2005) : 76]

Applications (two copies of a curriculum vitae, a statement of research plans for the future (up to four pages), and the names and addresses of three referees) should be sent to Dr Rosie Ward, Department of Materials Science and Metallurgy, Pembroke Street, Cambridge CB2 3QZ. [2489-048 (2005) : 76]

Form PD18, obtainable from http://www.admin.cam.ac.uk/offices/personnel/forms/pd18 should be included with the application. [2489-048 (2005) : 76]

Further particulars and details of the application procedure should be requested from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on 0151 794 2210 (24 hr answerphone), via email: jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html [2489-049 (2005) : 77]

Should you experience any difficulties please contact mandip.nijjar@kcl.ac.uk [2489-054 (2005) : 78]

Applications (two copies of a curriculum vitae, a statement of research plans for the future (up to four pages), and the names and addresses of three referees) should be sent to Dr Rosie Ward, Department of Materials Science and Metallurgy, Pembroke Street, Cambridge CB2 3QZ. [2489-063 (2005) : 79]

Form PD18, obtainable from http://www.admin.cam.ac.uk/offices/personnel/forms/pd18 should be included with the application. [2489-063 (2005) : 79]

Applications, including two copies of a detailed CV, the names and addresses of two referees (one of whom must be the current employer), and two copies of a letter setting out, with examples, how you meet the selection criteria, should be sent to: The Deputy Administrator,
Department of Biochemistry, University of Oxford, South Parks Road, Oxford OX1 3OU.

Ca
Informal enquiries should be made to Dr. David Marshall, Senior Lecturer, tel: 0131 650 3822, e-mail: david.marshall@ed.ac.uk

Ca
Applicants from the EU who have an interest and experience in field ornithology, are keen to acquire new ecological skills, and possess suitable qualifications (either a relevant MSc or a 2i or 1st in Ecology, Biology or other related subject) should apply to Ms Emily Chambers, CAER, Department of Agriculture, The University of Reading, Earley Gate, PO Box 237, Reading RG6 6AR, enclosing a CV with the names of two academic referees, by 17th March 2005.

Ca
Please note that if you have not received a response from the Company within 4 weeks of the closing date, you should assume that your application has been unsuccessful.

Ca
Applicants should e-mail their c.v, covering letter and current salary to d.theis@i2analytical.com.

Ca
Applications for both posts, including a CV, publications list, names and addresses of three referees and a brief description of experience and aspirations, should be sent to Mrs E.A. Daghorn (ead@mssl.ucl.ac.uk), Mullard Space Science Laboratory, University College

Ca
Informal enquiries should be directed to Professor A R Cossins, Liverpool Microarray Facility, School of Biological Sciences (cossins@liv.ac.uk) or Professor P Allport, High Energy Physics Group, Department of Physics (allport@cern.ch)

Ca
Further particulars and details of the application procedure should be requested from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on 0151 794 2210 (24 hr answerphone), via email: jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html

Ca
Application forms are available on request from Carol Jovanovic (c.jovanovic@imperial.ac.uk) Tel: +44(0)20 7594 2745 or by writing to Mrs C Jovanovic, Administrator, Imperial College London, Wye campus, Ashford, Kent TN25 5AH, UK and should be returned to her by 19 April 2005 together with a CV and statement on the research the applicant would wish to pursue in one of the above research areas.

Ca
Applications should be addressed to Executive Director, Prof. James W. Vaupel

Ca
and should include a CV with a statement of academic interests and relevant experience, qualifications, a list of publications and the contact details of 3 referees.

Ca
All material should be e-mailed to: math-evol.positions@demogr.mpg.de.

Ca
Formal applications should be made to Jonathan Lloyd, Faculty of Life Sciences, The University of Reading, Whiteknights, Reading RG6 6AF on forms which can be obtained from the University website, or by contacting j.d.lloyd@reading.ac.uk.

Ca
Applications including a full CV and the names and addresses (including email addresses) of two academic referees and indicated project of interest should be sent to: Human Resources, Roslin Institute (Edinburgh), Roslin, Midlothian, EH25 9PS (tel: 0131 527 4481) email: Roslin.HR@bbsrc.ac.uk by 21 April 2005.

Ca
Candidates should apply via http://www.shef.ac.uk/physics/postgradbrochure.html

Ca
Applicants should send a PD18 application form, which is available from the office or http://www.admin.cam.ac.uk/offices/personnel/forms/pd18 a covering letter and full CV, with the names and addresses of two professional referees, to Pat Hamilton, Cancer Research UK Genetic Epidemiology Unit, Strangeways Research Laboratory, Worts Causeway, Cambridge CB1 8RN.

Ca
In the first instance, applicants should send their CV and covering letter (including details of current / last salary) to Mrs. Jennie Rankin, Employee Relations Manager, Innovia Films Ltd, Wigton, CA7 9BG.
For an application and job description you should contact Sabrina Senior in HR via e-mail sabrina.senior@hpa.org.uk quoting the reference and details will be returned via e-mail. [2498-037 (2005) : 64]

Applications (eight copies except from candidates overseas who need send only one), including a curriculum vitae, a list of principal publications, and the names of two referees, should be sent to Professor Gordon L Clark, Head, School of Geography and the Environment, Mansfield Road, Oxford OX1 3TB for receipt not later than 1st June 2005. [2498-049 (2005) : 68]

Applications for the research studentships should be directed to Professor Philip Russell, Department of Physics, University of Bath, Bath BA2 7AY [2498-054 (2005) : 69]

Informal enquiries are welcome and should be made to Dr A Purohit: e-mail: a.purohit@imperial.ac.uk [2498-059 (2005) : 71]

Further particulars may be obtained from Mr C J Scotcher, The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ, or from administrator@eng.ox.ac.uk to whom written applications should be made enclosing a curriculum vitae and the names and addresses of two referees. [2498-061 (2005) : 73]

Questions about the post should be directed to Dr A. J. Kenyon (Department of Electronic and Electrical Engineering, University College London, Torrington Place, London WC1E 7JE, t.kenyon@ee.ucl.ac.uk, web site: www.ee.ucl.ac.uk). [2502-038 (2005) : 68]

Details of how to apply should be requested from: Vicky Coombes, Department of Electronic and Electrical Engineering, University College London, Torrington Place, London WC1E 7JE, Tel: 020 7679 7612 or via v.coombes@ee.ucl.ac.uk [2502-040 (2005) : 68]

Informal enquiries should be sent to cellbiol@uc.ac.uk tel: 020 7608 6859. [2502-044 (2005) : 70]

PhD candidates with a relevant first degree should send a CV together with the names and address of two referees to the appropriate principal Investigator from whom further particulars can be obtained. [2502-055 (2005) : 73]

Candidates for this postdoctoral post should send a CV together with the names and address of two referees to Professor J Govan, Medical Microbiology, Teviot Place, Edinburgh EH8 9AG, or email as above, to whom informal enquiries may also be addressed (tel: 0131 650 3164). [2502-055 (2005) : 73]

Applications with a detailed CV, together with the names and addresses of two referees, should be sent to Mrs C Hardwige, School of the Built Environment, The University of Nottingham, University Park, Nottingham, NG7 2RD. Closing date: 30 June 2005. [2502-067 (2005) : 77]

Application forms are available at http://www.chem.rdg.ac.uk/ and should be returned to Mrs T D Cussen, Postgraduate Admissions Secretary, School of Chemistry, University of Reading, Whiteknights, Reading RG6 6AD, or by email to: t.d.cussen@rdg.ac.uk [2502-070 (2005) : 77]

Applications should be received by 15th July 2005. [2506-018 (2005) : 61]
| Ca  | Applications with full CV and covering letter stating current salary and notice conditions should be emailed to sales@agropharm.co.uk and marked for the attention of Mrs G Walker. [2506-024 (2005) : 64] |
| Ca  | Applications, quoting reference number DU05/021, should be submitted by 5th September 2005. [2506-038 (2005) : 69] |
| Ca  | Informal enquiries should be sent to Dr Mark Chapman (m.chapman@uea.ac.uk) [2506-041 (2005) : 70] |
| Ca  | An application form should be obtained from the Personnel Office, University of East Anglia, Norwich NR4 7TJ (Internet: http://www.uea.ac.uk/personnel/jobs/ or email: personnel@uea.ac.uk or answerphone: 01603 593493), to be returned by 22 July 2005 quoting reference RA176. [2506-041 (2005) : 70] |
| Ca  | Informal enquiries should be addressed to Dr. Martin Brand via e-mail martin.brand@mrc-dunn.cam.ac.uk or phone 01223 252800. [2506-050 (2005) : 72] |
| Ca  | Forms should be returned via email to: csq-recruit@qmul.ac.uk or by post to: Recruitment Office, Campus Management Team, Barts and The London School of Medicine and Dentistry, Queen Mary University of London, The Lodge House, Charterhouse Square, London EC1M 6BQ. [2506-062 (2005) : 75] |
| Ca  | Applicants should send a CV and names of two academic referees to Professor G R Gibson, g.r.gibson@reading.ac.uk [2506-064 (2005) : 76] |
| Ca  | The candidate must meet the eligibility criteria for a BBSRC studentship. CVs and the names and addresses of two referees should be addressed to: Professor P Anand, Peripheral Neuropathy Unit, Imperial College London, Hammersmith Hospital, Du Cane Road, London W12 0NN, UK. Alternatively you can call 020 8383 3309 or email: p.anand@imperial.ac.uk [2506-068 (2005) : 77] |
| Ca  | Further particulars may be obtained from Mr C J Scotcher, The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ, or by email to administrator@eng.ox.ac.uk to whom written applications should be made enclosing a curriculum vitae and the names and addresses of two referees. [2506-070 (2005) : 77] |
| Ca  | Informal enquiries should be made to Mr Kevin Artley, Medical Director or Paula Cox, Fertility Services Manager on (01283) 593098. [2511-008 (2005) : 54] |
| Ca  | Candidates should submit a full C.V., including the names and addresses of two referees, to Dr Rob Cross, Molecular Motors Laboratory, Marie Curie Research Institute, The Chart, Oxted, Surrey RH8 0TL, UK. E-mail r.cross@mcri.ac.uk [2511-010 (2005) : 54] |
| Ca  | Completed applications should be submitted not later than 3.00 pm on Friday 2nd September 2005. [2511-013 (2005) : 56] |
| Ca  | Before you apply, you should have discussed the basis of your research training programme with your intended supervisor. [2511-021 (2005) : 58] |
| Ca  | Completed application forms should be returned to the above address no later than Wednesday 31st August 2005. [2511-036 (2005) : 63] |
| Ca  | Informal enquiries are welcome, and should be addressed to Kathy Baisley on 020 8963 4524 (email: kbaisley@hmrlondon.com) [2511-046 (2005) : 69] |
| Ca  | Further particulars may be obtained from Mr C J Scotcher, The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ; or to administrator@eng.ox.ac.uk to whom written applications should be made enclosing a curriculum vitae and the names and addresses of two referees. [2511-051 (2005) : 70] |
| Ca  | Further particulars and details of the application procedure should be requested from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on 0151 794 2210 (24 hr answerphone), via email: jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html [2511-052 (2005) : 71] |
| Ca  | Application details are available from Human Resources, Sussex House, University of Sussex, Falmer, Brighton BN1 9RH. Tel: (01273) 678706, fax: (01273) 877401, email: recruitment@sussex.ac.uk [2511-056 (2005) : 72] |
| Ca  | Applicants should identify their area(s) of interest and send a current c.v. with the names of two academic referees to: Professor Declan Naughton / Professor Angela Russell, BPSRG Research
Studentships, School of Life Sciences, Kingston University Penrhyn Road, Kingston, Surrey KT1 2EE by 30th August, 2005. [2511-068 (2005) : 75]

Ca Applications should be sent to Margaret Stone, Registrar, The School of Pharmacy, 29/39 Brunswick Square, London WC1N 1AX, tel 020 7753 5958, fax 020 7753 5829, e-mail phd@ulsop.ac.uk [2511-074 (2005) : 77]

Ca Requests for further details should be sent to Dr Monique Marrec-Fairley mfa@cefic.be CEFIC-LRI, Avenue E. Van Nieuwenhuyse 4, B-1160 Brussels, Belgium. [2511-075 (2005) : 77]

Ca Completed forms should be sent to: Ms L Wardale, PPARC, Polaris House, North Star Ave, Swindon SN1 1SZ, UK [2515-021 (2005) : 62]

Ca Application forms, obtainable from the British Energy website www.british-energy.com or by telephoning the Resourcing Team on 01355 262727, should be returned to the Resourcing Team to arrive as soon as possible and no later than 8 September 2005. [2515-024 (2005) : 64]

Ca Interested and qualified candidates should submit a copy of their CV, together with their current remuneration package and the appropriate reference number for the vacancy. [2515-045 (2005) : 71]

Ca If you wish to be considered for more than one position you should make this clear in your letter of application. [2515-063 (2005) : 76]

Ca Applications (two copies), including a CV, list of publications and the names and addresses of two referees, should be sent to Professor Jon Cooper, Department of Electronics, University of Glasgow, Glasgow G12 8LT. [2515-065 (2005) : 77]

Ca Completed forms should reach her at the Institute of Women’s Health, Elizabeth Garrett Anderson Hospital, Huntley Street, London WC1E 6DH by Friday, 9th September 2005. [2515-067 (2005) : 78]

Ca Applicants should arrange for three confidential letters of recommendation to be sent to the address below. [2515-067 (2005) : 78]

Ca A curriculum vitae, description of current and proposed areas of research, selected reprints of published or in-press research articles, a description of areas of teaching competency, interest, and approaches, and other relevant material, should also be sent to: [2515-067 (2005) : 78]

Ca Candidates should submit an outline of their current research and proposals for future work. [2515-068 (2005) : 78]

Ca Applications including a CV and the contact details of two referees should be sent to the Senior Administrator, Department of Physics, Clarendon Laboratory, Parks Road, Oxford OX1 3PU by 20th September 2005 and quoting reference number DC05/027. [2515-078 (2005) : 81]

Ca Further particulars and details of the application procedure should be requested from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on 0151 794 2210 (24 hr answerphone), via email: jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html [2515-081 (2005) : 82]

Ca Interested applicants should send an up-to-date curriculum vitae to Professor Spikes. [2515-082 (2005) : 82]

Ca Applications should be made to one of the partner universities by Friday, 16 September 2005, any enquiries may be made to any of the principal investigators (simon.gaskell@manchester.ac.uk; r.beynon@liverpool.ac.uk; k.s.lilley@bioc.cam.ac.uk) [2515-083 (2005) : 82]

Ca Interested candidates should contact the relevant supervisors directly by email. [2515-086 (2005) : 82]

Ca Your application must address the selection criteria, include a C. V. and the details of three professional referees, and should be forwarded to Ms Deanne Wood by e-mail or mail to The Institute for Nuclear Geophysics, ANSTO, PMB 1, Menai, NSW 2234. [2519-017 (2005) : 60]

Ca Applications should forward their completed Application Form available from the Human Resources Section, their Curriculum Vitae and List of Publications, together with not more than three selected reprints of their recent work to: [2519-044 (2005) : 69]

Ca Applications, including a CV and details of three referees who may be contacted prior to interview, should be sent to Mrs Marilyn Goulding, FMRIB Centre, John Radcliffe Hospital,
Ca Further particulars and details of the application procedure **should be requested** from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on +44 (0) 151 794 2210 (24 hr answerphone), via email: jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html [2519-067 (2005) : 75]

Ca Interested candidates **should** send their curriculum vitae, names of three referees along with a description of research accomplishments, and a 5 page research proposal with an appropriate budget to: [2519-068 (2005) : 76]

Ca Further particulars and details of the application procedure **should be requested** from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on +44 (0) 151 794 2210 (24 hr answerphone), via email: jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html [2519-071 (2005) : 76]

Ca Further particulars may be obtained from Mr C J Scotcher, The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ; or to administrator@eng.ox.ac.uk to whom written applications **should** be made enclosing a curriculum vitae and the names and addresses of two referees. [2519-073 (2005) : 77]

Ca Applications **should be sent** to Professor R C Darton, FREng, Head of Department, Department of Engineering Science, University of Oxford, Parks Road, Oxford OX1 3PJ, fax: (01865) 283310, e-mail: head@eng.ox.ac.uk including a plan for proposed research and the names and addresses of three referees, to arrive no later than 4th November 2005. [2519-076 (2005) : 78]

Ca A letter of application, together with full details of education and employment history and the names of two referees, **should be addressed** to Dr Stephen Salisbury, Business Director, CCDC, 12 Union Road, Cambridge CB2 1EZ, to arrive by Monday 14 November 2005. [2524-042 (2005) : 65]

Ca Application details are available from and **should be returned** to Human Resources, Sussex House, University of Sussex, Falmer, Brighton BN1 9RH. Tel: (01273) 678706, fax: (01273) 877401, email: recruitment@sussex.ac.uk [2524-049 (2005) : 69]

Ca Applications (complete Application Form & Curriculum Vitae) **should be marked** with the appropriate reference code and submitted to: Human Resources Department, Dublin City University, Dublin 9, Ireland. [2524-053 (2005) : 71]

Ca Applications by letter enclosing a full CV giving the names and addresses of three referees **should be sent** to Human Resources, University of Wales Aberystwyth, Old College, King Street, Aberystwyth, Ceredigion SY23 2AX no later than the closing date. [2524-055 (2005) : 72]

Ca Applications **should** include a CV, a list of publications, copies of three publications, a one-page summary of scientific achievements, and a two-page research plan. [2524-059 (2005) : 73]

Ca For informal enquiries, applicants **should** in the first instance contact Janis Sweeney on 013 82 425258 or janis.sweeney@cancer.org.uk [2524-060 (2005) : 74]

Ca Technical questions **should be directed** to Dr A. J. Kenyon, email: t.kenyon@ee.ucl.ac.uk, [2524-061 (2005) : 74]

Ca Applicants **should** quote DJO5/022 and note the closing date of 2nd December 2005, and an expected interview date in the week starting 16th January 2006. [2524-063 (2005) : 74]

Ca Questions about the post **should be directed** to Dr Karl Woodbridge, Department of Electronic and Electrical Engineering, University College London, Torrington Place, London WC1E 7JE, tel: 020 7679 3969, email: k.woodbridge@ee.ucl.ac.uk, web site: www.ee.ucl.ac.uk [2524-069 (2005) : 76]

Ca Informal enquiries **should be made** to Dr Geoff Parker; e-mail: geoffparker@manchester.ac.uk [2524-071 (2005) : 77]

Ca Applications quoting Analytical Technical Manager **should be sent** to the above address. [2524-073 (2005) : 77]

</tr>
</tbody>
</table>
Further information can be found at [http://users.aber.ac.uk/gwg/wbd.htm](http://users.aber.ac.uk/gwg/wbd.htm) Applications (full CV) or other enquiries should be directed to Dr. Griffith (gwg@aber.ac.uk; 0044-1970-622325).

Strong communication skills are therefore essential and you should be able to work independently or as part of a team.

Students should be undergraduates in the middle (i.e. not the first or last) years of their first degree studies.

Candidates will possess excellent communication and reporting skills and should be keen to acquire new techniques and develop their scientific expertise.

You should also be competent in the use of most components of Microsoft packages particularly in the use of e-mail and the internet.

At the same time, you should have the confidence to communicate effectively with people at different levels of the organisation while your common sense approach will see client issues resolved quickly.

Applicants should be enthusiastic and versatile practical people who can rise to intellectual and hands-on technical problem solving challenges.

Candidates should be proactive, organised and be eager to make a positive impact on the laboratory.

Applicants should ideally have guaranteed research funding from a source other than the Academic Fellowship for at least part of the five-year fellowship period (or a track record likely to attract research funding during the period of the fellowship); the scheme is open to researchers supported on any type of grant funding and to holders of current fellowship awards.

Applicants should have enthusiasm for science subjects and the ability to promote education in science especially in an industrial context.

They should also have a clear vision of the future direction of their research, sources of future funding, and how the research will fit within the context of ongoing research at LSHTM.

You must demonstrate flexibility and in the future, you should expect to work on new scientific areas depending on the success and direction of the project.

And should be committed to their scientific career progression.

You should be able to learn quickly in many areas of biology and mathematical computation, assimilate the complex phenomenology of problems and develop practical as well as creative approaches.

At the same time you should also have an excellent grounding in several of the following: optimisation, differential equations, function approximation, dynamical systems, fractals and stochastic processes, modeling, and other modern computational techniques.

Above all, you should possess exceptional attention to detail and first-rate organisational skills.

Applicants should have initiative and drive, the ability to trouble-shoot testing and analytical problems, possess good inter-personal skills and be able to motivate a team.

Applicants for both positions should be enthusiastic and competent researchers with excellent communication skills.

Applicants should be highly motivated, enthusiastic individuals, and have an undergraduate degree in a relevant subject.

Candidates should be aware that this post is subject to extensive travel within the United Kingdom.

You should have been resident in the UK for at least 5 years.

You should have established yourself as an expert in your field.

You should have an organised and adaptable approach to work and have strong IT skills (familiarity with Microsoft Office and Internet-based searches).
Co and **should** have demonstrated scientific achievement in terms of publications, project funding and project management. [2485-092 (2005) : 88]

Co S/he **will** demonstrate the ability to analyse complex issues and make clear business decisions and **should** be able to open doors to companies in the relevant industrial sectors. [2485-093 (2005) : 88]

Co You **should** be an accomplished organiser and a fluent communicator, capable of building internal and external relationships at all levels. [2489-014 (2005) : 66]

Co Applicants **should** be aware that the work can generate a considerable amount of both public and media interest. [2489-018 (2005) : 67]

Co and **should** be highly numerate. [2489-025 (2005) : 70]

Co You **should** be prepared to deal with a range of problems. [2489-029 (2005) : 71]

Co Candidates **should** have basic experience of Windows operating systems, and be familiar with the standard Microsoft Office applications (including Access, Excel and Word). [2489-034 (2005) : 72]

Co You **should** additionally possess excellent communication skills (both written and verbal), and enjoy working both independently and as part of a small team. [2493-001 (2005) : 54]

Co You **should** possess excellent written and verbal communication skills, be practical, a good team player, hungry for intellectual challenge and eager to succeed. [2493-007 (2005) : 56]

Co Candidates **should** note that the appointment **will** be subject to a satisfactory Enhanced Disclosure Scotland Application. [2493-053 (2005) : 71]

Co and **should** indicate one or more areas of interest from the list of topics mentioned. [2493-063 (2005) : 74]

Co **Skills should** include numerical optimization of model parameters. [2498-015 (2005) : 55]

Co You **should** also possess a thorough understanding of chromatographic separations and the impact of structure on retention properties, together with an appreciation of other structural characterisation techniques. [2498-019 (2005) : 57]

Co Candidates **should** also hold a full driving licence and be willing to travel. [2498-021 (2005) : 58]

Co You **should** have good verbal and written communication skills with the ability to design and implement a project independently. [2498-026 (2005) : 59]

Co You **should** be a critical thinker with strong problem solving and analytical skills. [2498-026 (2005) : 59]

Co You **should** have good verbal and written communication skills with the ability to work within a team. [2498-026 (2005) : 59]

Co Comfortable working both within a team environment and individually, you **should** possess impressive analytic and problem-solving skills with the tenacity and drive to overcome problems and drive solutions through to implementation. [2498-043 (2005) : 66]

Co You **should** be a good communicator, a team player and able to analyse problems and plan and prioritise workload effectively. [2498-044 (2005) : 66]

Co The applicant **should** be fluent in English. [2498-048 (2005) : 67]

Co The applicant **should** be fluent in English. [2498-048 (2005) : 67]

Co Applicants **should** have guaranteed research funding from a source other than the Academic Fellowship for at least part of the five-year fellowship period; the scheme is open to researchers supported on any type on grant funding and to holders of current fellowship awards. In the case of cell cycle and development, departmental funds are available to help support returners or other researchers without current research support. [2498-049 (2005) : 68]

Co Applicants **should** have research interests that encompass a wide spectrum of emerging microfluidic and (bio)analytical systems. [2498-061 (2005) : 71]

Co This research **should** focus on the innovative design and fabrication of such systems for applications in biomedical diagnostics and biopharmaceutical sciences, as well as other sensing applications. [2498-061 (2005) : 71]

Co Whatever your background, you **should** be able to operate in a commercial environment to develop scientific solutions to real life problems. [2502-010 (2005) : 58]
Your attention to detail and interpersonal skills should go without saying. [2502-014 (2005) : 59]

Personal qualities should include the ability to work harmoniously in a multi-cultural environment; [2502-027 (2005) : 63]

Duties will include tissue processing, histology and immunofluorescence staining, and applicants should have experience or knowledge in at least one of these areas, and have relevant academic qualifications up to degree level or equivalent. [2502-044 (2005) : 70]

You should have a well-developed sense of responsibility, be able to work independently, be interested in learning new techniques and have excellent communication skills. [2502-047 (2005) : 71]

and should be either UK citizens or from a member state of the EU. [2502-070 (2005) : 77]

You will have a major interest in general haematology and coagulation but should also be competent in transfusion. [2506-014 (2005) : 59]

The student should be interested in biomaterial science and would examine the sequence of events using histology, immunohistochemistry and biochemical techniques. [2506-016 (2005) : 60]

You will have good communication and teamwork skills and should also be able to communicate scientific information to technical and non-technical groups. [2506-048 (2005) : 72]

Applicants should have an understanding of current speech technologies and excellent communication skills. [2506-065 (2005) : 76]

The student should be interested in biomaterial science and would examine the sequence of events using histology, immunohistochemistry and biochemical techniques. [2506-071 (2005) : 77]

In addition, you should bring an expert knowledge of UNIX, SAS and the software development process. [2511-006 (2005) : 53]

Ideally you should have a commercial understanding of the pharma and biotech industries. [2511-009 (2005) : 54]

Candidates should: Have good presentation and excellent interpersonal, written and verbal communication skills. [2511-016 (2005) : 56]

Candidates should have the ability to apply standard fish stock assessment techniques and develop new approaches.

Candidates should be capable of working as part of a small, dedicated team and be prepared to fill a flexible role, including participation in research cruises.

Applicants should have an interest/qualification in science, be prepared to be flexible in their approach, and work to a high standard. [2511-050 (2005) : 70]

The candidate should be a self-motivated and a well organised team player with good communications skills. [2515-029 (2005) : 66]

The applicant should have a keen eye for detail and excellent communication skills. [2515-046 (2005) : 71]

You should have demonstrable knowledge of a wide range of statistical epidemiological applications and principles. [2515-047 (2005) : 72]

You should have excellent practical skills and an innovative approach as well as the ability to work independently within a multi-disciplinary team environment. [2515-049 (2005) : 72]

Candidates should be methodical and organised in their approach, with excellent interpersonal and communication skills. [2515-054 (2005) : 74]

Applicants should have an international reputation in research related to the development and maintenance of health related behavior, and have demonstrated excellence in teaching. [2515-067 (2005) : 78]

Applicants should present evidence of a record of significant, externally-funded research productivity and excellence in undergraduate and graduate teaching. [2515-067 (2005) : 78]

For the second post, we are seeking candidates with research interests in physical chemistry that should ideally complement existing research activities in the School. [2515-068 (2005) : 78]
| Co | The postholder **will** work in a team of technicians but **should** have particular skills and knowledge in the area of Microbiology. [2515-072 (2005) : 79] |
| Co | You **should** have enthusiasm for web-based taxonomy and be at ease with managing data and IT Team-working skills are important. [2515-075 (2005) : 80] |
| Co | and **should** have relevant knowledge of the materials sector. [2515-081 (2005) : 82] |
| Co | Applicants **should** not hold external grants of more than £15,000 in total [2515-088 (2005) : 83] |
| Co | and their salary **should** not be provided by research councils, charities, industry or other sponsorship. [2515-088 (2005) : 83] |
| Co | You **should** be a team-player and be able to work under pressure. [2519-012 (2005) : 58] |
| Co | Only candidates entitled to work in the UK without a work permit **should** apply. [2519-034 (2005) : 66] |
| Co | You **should** expect to grow your team to support our proven, continuous growth and you **will** be part of our European Biostatistics management team developing and implementing departmental strategies. [2519-039 (2005) : 67] |
| Co | You **should** be reliable and work with attention to detail. [2519-060 (2005) : 73] |
| Co | You **will** carry out research, training, and teaching in the Centre and you **should** have a strong publication record in a relevant area of materials chemistry such as synthesis/materials characterisation. [2519-067 (2005) : 75] |
| Co | Applicants **should** have fluent written and oral communication skills in English. [2519-068 (2005) : 76] |
| Co | You **should** already show innovation with respect to development of therapeutic molecules and/or routes to their synthesis. [2519-074 (2005) : 77] |
| Co | Candidates **should** be able to teach a range of topics in Mechanical and Biomedical Engineering within a 4-year Engineering Science syllabus, and have research interests in orthopaedic biomechanics. [2519-076 (2005) : 78] |
| Co | The individual **should** be highly motivated, demonstrate initiative and good analytical, organizational and multitasking skills. [2524-004 (2005) : 52] |
| Co | This expertise **should be complemented** by a flexible working style that is attuned to a multi-cultural environment, excellent people management skills and the ability to communicate to a high standard with both written and spoken English. [2524-009 (2005) : 54] |
| Co | You **should** have excellent communication and team building skills, along with the enthusiasm to continue to develop this role. [2524-013 (2005) : 56] |
| Co | Candidates **should** have an interest in animal health and welfare or public health. [2524-020 (2005) : 59] |
| Co | Previous experience is not required, but you **should** be a well-organised, computer-literate team worker. [2524-038 (2005) : 64] |
| Co | Applicants for both posts **should** have excellent organisational, communication and team-working skills. [2524-050 (2005) : 69] |
| Co | Candidates **should** have strong research interests in the application of synthetic organic chemistry to biological problems and ideally an established record of independent research achievement and external funding. [2524-064 (2005) : 75][2524-065 (2005) : 75] |
| Co | and **should** have research interests that lie within the primary focus areas of the NCSR (www.ncsr.ie). [2528-009 (2005) : 63] |
| Co | They **should** also be able to demonstrate effective multidisciplinary teamworking and communication skills. [2528-014 (2005) : 64] |
| Co | You **should** have good communication skills and plenty of enthusiasm. [2528-018 (2005) : 66] |
| Co | Applicants **should** be self-motivated, innovative and have the desire to contribute to the development of Small - an exciting new micro- and nanoscience journal. [2528-037 (2005) : 73] |
| Co | You **should** be fluent in English (native speaker preferred) and be familiar with text and graphics PC programs. [2528-037 (2005) : 73] |
| Co | You **should** also have good communication and interpersonal skills and be able to solve a range of technical problems. [2528-054 (2005) : 81] |
| Co | You **should** have an international reputation and an excellent publication record, with demonstrated ability in winning soil erosion-related research funding from research councils,
government departments and agencies, the EU Commission and industrial sponsors.

Co The successful candidate should have a keen interest in research into teaching and learning physics in Higher Education and will join a small team developing online laboratory experiments and e-learning resources for use in distance and onsite learning of Physics and Mathematics.

Co Di Candidates should have enthusiasm for laboratory work and be educated to BTEC or equivalent.

Co Di You should have an established research record, preferably with a higher degree, a desire to further develop your research activities and an enthusiasm for contemporary approaches to learning and teaching.

Co Di Applicants should be highly motivated, enthusiastic individuals, and have an undergraduate degree in a relevant subject.

Co Di Ca Enthusiastic graduates with a first or upper 2:1 degree in biological sciences interested in this opportunity should send a full CV including three referees and letter of application to:

Co Ex The editor should be a native English speaker with excellent writing and editing skills, preferably with experience in teaching and communicating science. Journalistic or editorial experience and a scientific background would be an advantage.

Co Ex You should enjoy working both on your own and as part of a team, and have some experience of project management.

Co Ex Candidates should be excellent communicators preferably with first-hand experience of involvement in a multi-site collaborative project.

Co Ex You should have an outstanding international record of research and publication or the equivalent industrial experience.

Co Ex You should be a physical or biophysical scientist with postgraduate experience of working with organic thin films.

Co Ex You should also be familiar with two dimensional gel analysis software and mass spectrometry data systems and have relevant experience in bioinformatics, with a strong background in other molecular biology techniques.

Co Ex Candidates need to be EU residents, and should ideally have practical experience of the molecular techniques.

Co Ex Applicants should have strong interpersonal skills and extensive experience of managing a research laboratory, preferably in the area of materials chemistry.

Co Ex An understanding of the trends and forces within the pharmaceutical industry is essential, and ideally you should also have experience of business development within a global pharmaceuticals environment.

Di Candidates should have an MSc or PhD in medical physics or a related field.

Di They should be registered for a basic science, medical or veterinary degree at a university within the UK or the Republic of Ireland (RoI).

Di or should have a PhD.

Di Applicants should have a PhD and postdoctoral experience.

Di Applicants should have a good degree, and PhD in Molecular Cell Biology, or other relevant area of Biosciences.

Di You should possess a minimum 2nd Class Honours Degree, HNC, HND (or equivalent) qualification in Chemistry, an Environmental, Geological or Physical Science or a related discipline.

Di Applicants for post-doctoral positions should have a Ph.D. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline.

Di Applicants for post-doctoral positions should have a Ph.D. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline.

Di Applicants should hold a PhD in an area that demonstrates commitment to the subject area
Di Applicants **should** hold or expect to gain a first or upper second class honours degree. [2485-104 (2005) : 91]

Di Applicants **should** normally have obtained or expect to obtain at least upper second class honours in their first degree. [2485-111 (2005) : 93]

Di You **should** be educated to degree level, preferably in the physical, biological or medical sciences. [2489-042 (2005) : 75]

Di Applicants **should** possess a PhD in biochemistry, bioinformatics or an equivalent discipline. [2489-064 (2005) : 79]

Di Applicants **should** have a 1st or 2.1 degree in any area of the mathematical, physical, computer, engineering or life sciences. [2489-067 (2005) : 80]

Di Applicants **should** possess, or expect to possess, a first or upper second-class honours primary degree (or equivalent) from Ireland, the EU or from any overseas university and intend to pursue a PhD degree. [2489-072 (2005) : 81]

Di You **should** have a first degree in the physical or biological sciences and a PhD in biophysics, chemistry, surface science, biomaterials, or a related discipline. [2493-043 (2005) : 69]

Di Applicants **should** have, or expect to obtain, a 1st or upper 2nd class degree or equivalent qualification. [2493-056 (2005) : 72]

Di You **should** have a degree/MSc in Biochemical or Biological Sciences. [2506-009 (2005) : 57]

Di You **will** have a first degree in a biological science, which **should** include a substantial cell biology component. It’s likely that you **will** be a recent graduate. [2506-022 (2005) : 63]

Di You **should** be educated to degree level in a relevant scientific subject (i.e. biomedical, chemistry or bioscience). [2508-026 (2005) : 59]

<tr>
<td>E</td>
<td>In short, this team turns policies into practice, detailing how things can and <strong>should be done</strong> at ground level; as well as giving strategic advice on all elements of FRM. [2498-028 (2005) : 60]</td>
</tr>
<tr>
<td>E</td>
<td>&quot;Instead of pushing public-sector science to industry, we <strong>should</strong> be pushing industry towards the public sector. [2506-001 (2005) : 52-53]</td>
</tr>
<tr>
<td>E</td>
<td>The industry <strong>should</strong> look to its talented graduates for the answer, says John Bonner [2515-002 (2005) : 52-53]</td>
</tr>
<tr>
<td>E</td>
<td>“If the consultancies want experienced people, they should be prepared to take on more placement students,” he argues. [2515-002 (2005) : 52-53]</td>
</tr>
<tr>
<td>E</td>
<td>It should give the student excellent training and the employer the chance to find out what they can do. [2515-002 (2005) : 52-53]</td>
</tr>
<tr>
<td>E</td>
<td>Covering radionuclide therapies, diagnostic radiology physics and general radiation safety—with direct involvement in patient treatment, X-ray equipment testing and radioactive substances management—this post should suit a physicist who has completed the basic Training Scheme. [2515-017 (2005) : 60]</td>
</tr>
<tr>
<td>E</td>
<td>Engineers are the happiest UK professionals. But looking at the job conditions abroad, should the UK engineer be smiling? [2519-004 (2005) : 50-53]</td>
</tr>
<tr>
<td>E</td>
<td>Whether this view is accurate or ill-founded, the UK engineering sector should take steps to address the perception of low pay to avoid a graduate brain drain overseas, the panel concluded. [2519-004 (2005) : 50-53]</td>
</tr>
<tr>
<td>E</td>
<td>So while UK engineers have to cope with the occasional frustrating dinner party conversation and a salary that could probably be bettered, the range of opportunities and the challenging work that engineering can provide mean that UK engineers should be very happy people indeed. [2519-004 (2005) : 50-53]</td>
</tr>
<tr>
<td>E</td>
<td>&quot;Getting chartered status should be seen as an investment, but it is only the larger firms that tend to offer this to their employees.&quot; [2519-004 (2005) : 50-53]</td>
</tr>
<tr>
<td>E</td>
<td>It should be noted that applications from well-qualified candidates with interests in other areas are also encouraged. [2519-071 (2005) : 76]</td>
</tr>
<tr>
<td>E</td>
<td>Interested? then please send your CV, details of current salary, and a letter of application stating why we should consider you for this position, to Dave Arnold, CEA, Battlegate Road, Boxworth Cambridge CB3 8NN, UK. [2524-007 (2005) : 54]</td>
</tr>
<tr>
<td>Ex</td>
<td>You should have broad experience in biological techniques including several of the following: PCR, sub-cloning, DNA sequencing, FPLC, SDS PAGE, ELISA, CDC, ADCC assays and Western analysis. [2481-024 (2005) : 60]</td>
</tr>
<tr>

</tr>
<tr>
<td>Ex</td>
<td>You should have experience in research relevant to neurotoxicology. [2498-037 (2005) : 64]</td>
</tr>
<tr>
<td>Ex</td>
<td>and should have a minimum of 5 years’ relevant experience in fuel additives, or a related product area. [2506-023 (2005) : 64]</td>
</tr>
<tr>
<td>Ex</td>
<td>and should have about 3 years’ relevant experience. [2506-023 (2005) : 64]</td>
</tr>
<tr>
<td>Ex</td>
<td>and should have a minimum of 5 years’ relevant experience. [2506-023 (2005) : 64]</td>
</tr>
<tr>
<td>Ex</td>
<td>and should preferably have 2 years' industrial experience. [2506-023 (2005) : 64]</td>
</tr>
<tr>
<td>Ex</td>
<td>You should also have experience of specifying, undertaking and interpreting soil analysis. [2511-041 (2005) : 65]</td>
</tr>
</tbody>
</table>
Ex You **should** have experience in undertaking soil monitoring programmes and of specifying, undertaking and interpreting soil analysis. [2511-041 (2005) : 65]

Ex For the senior position you **should** have an additional 3-5 years' practical work experience validating immunoassay based technologies. [2515-038 (2005) : 69]

Ex Candidates **should** have experience in molecular biology and recombinant antigen techniques, in addition experience in virology and cell culture **would** be an advantage. [2515-049 (2005) : 72]

Ex For the SSO post, as well as all the above qualifications and experience, you **should** also preferably have regulatory and staff management experience. [2515-061 (2005) : 76]

Ex and **should** have some experience of teaching in higher education. [2515-077 (2005) : 80]

Ex Applicants **should** have experience in a commercial or business development capacity. [2515-081 (2005) : 82]

Ex and **should** ideally have postdoctoral research experience in the area. [2528-006 (2005) : 61]

Ex Applicants **should** have previous experience in managing and directing multidisciplinary research teams. [2528-009 (2005) : 63]

Ex Senior Technicians **should** have at least 3 years' previous experience of working in a laboratory. [2528-069 (2005) : 87]

Ex while Research Technicians **should** have at least 6 months. [2528-069 (2005) : 87]

Ex Co Eligible applicants **should** have at least 10 years' post-doctoral research experience in either an academic and/or an industrial setting with extensive peer reviewed publications in relevant learned journals and conferences. [2481-054 (2005) : 70]

Ex Co They **should** also have experience of research project management in terms of leading teams, generating external funding and supervision of PhDs. [2481-054 (2005) : 70]

Ex Co Applicants **should** have an established track record in research and **will** be expected to develop innovative projects and collaborate in existing studies. [2481-067 (2005) : 74]

Ex Co You **should** have some knowledge of general aspects of cellular biology (training can be provided) and you **must** have high levels of personal initiative and conscientiousness and overall enthusiasm to interact with others. [2481-074 (2005) : 76]

Ex Co You **should** also have 2-3 years relevant GLP/QA experience, which **must** include some practical auditing in laboratory environments, and technical experience in at least one of the following: classic toxicology, environmental toxicology, environmentally beneficial species, analytical chemistry. [2485-075 (2005) : 82]

Ex Co Candidates **should** have strong research experience in atomic force microscopy, scanning tunnelling microscopy or single molecule electronics, and be keen to work in an inter-disciplinary research team that includes physical and life scientists. [2485-097 (2005) : 89]

Ex Co You **should** have experience in chairing scientific committees and knowledge of regulatory procedures relevant to the assessment of human health and/or environmental impacts.

Ex Co Applicants **should** have considerable postgraduate experience and have gained recognition in the scientific community in their field. [2489-018 (2005) : 67]

Ex Co You **should** have experience in theoretical and/or computational modelling of fusion plasmas with the ability to establish an independent research programme and obtain grant funding. [2489-062 (2005) : 79]

Ex Co Applicants **should** be able to demonstrate several years experience of working with a broad range of food and beverage matrices, for compositional and microbiological analysis, ideally with at least two years international exposure to food manufacturing and analysis. [2493-006 (2005) : 56]

Ex Co You **should** have 1-6 years' post BSc experience and, although not essential, some exposure to synthetic development gained in an industrial setting **would** be preferred. [2493-008 (2005) : 57]
| Ex Co | The candidates **should** have relevant experience in operating GC MS, GC FID and HPLC instrumentation, knowledge of Agilent Technology systems **would** be an advantage. [2493-014 (2005) : 58] |
| Ex Co | Applicants **should** have a proven track record in project-management, relationship-building, strategic and business planning, and marketing/promotional activities, with a rounded knowledge of the relevant business sectors. [2506-055 (2005) : 74] |
| Ex Co | They **should** have experience and working knowledge of mouse handling and experimental procedures, including a strong working knowledge of Animal (Scientific Procedures) Act 1986. [2506-062 (2005) : 75] |
| Ex Co | In this challenging environment, you **will** soon gain reporting experience and **should** be aiming to achieve registration with the Council for the Registration of Forensic Practitioners within five years of appointment. [2511-007 (2005) : 54] |
| Ex Co | You **should** have experience in computer programming in C, C++, IDL, java or Perl preferably in a Unix environment and ideally knowledge of SQL, XML and website scripting. [2511-027 (2005) : 61] |
| Ex Co | The successful candidate **should** possess at least three years of relevant experience that includes protocol preparation, study set-up, monitoring and report writing. [2511-037 (2005) : 63] |
| Ex Co | In addition, you **should** also have at least ten years’ experience in geological mapping projects in Africa or the Middle East, and be prepared to spend extended periods on overseas fieldwork. [2515-009 (2005) : 57] |
| Ex Co | You **should** have experience of developing and validating analytical methods using HPLC to determine the strength, purity, and analysis of dissolution of samples. [2515-027 (2005) : 65] |
| Ex Co | With at least five years in-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications **should** reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2515-045 (2005) : 71] |
| Ex Co | You **should** have good knowledge of data design and web technologies, especially of XML and related schema, and of issues concerning the semantic web. [2515-075 (2005) : 80] |
| Ex Co | You **should** be experienced and efficient in project management and have a strong record of successful leadership of research groups. [2519-017 (2005) : 60] |
| Ex Co | Enthusiastic applicants **should** have experience in basic molecular biology techniques, as well as excellent technical, organisational and communication skills. [2519-052 (2005) : 70] |
| Ex Co | You **should** have at least 6 years' postdoctoral experience in organic synthetic chemistry and already have a significant track record in the design and synthesis of potential therapeutic agents or probes as judged by publications and significant grant success. [2519-074 (2005) : 77] |
| Ex Co | Applicants **should** have at least two to three years industry experience of LC-MS method development in a drug discovery setting, analysing PK-ADME samples in a variety of matrices. [2524-004 (2005) : 52] |
| Ex Co | With at least five years' in-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications **should** reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2528-047 (2005) : 79] |
| Ex Di | Candidates **should** have at least 1 years post State Registration experience and preferably hold FIBMS or equivalent. [2481-001 (2005) : 52] |
| Ex Di | Qualified and/or trained in regulatory affairs, your experience and knowledge **should** ideally include European trademark law, the pharmaceutical wholesale/PI business and dealing with PI licences. [2485-052 (2005) : 76] |
| Ex Di | You **should** have relevant experience in cell biology (particularly protein biochemistry and molecular biology) and hold a PhD in a biological science. [2489-042 (2005) : 75] |
| Ex Di | You **should** have at least three years’ post-degree experience in cell biology, biochemistry or molecular biology research, which may include a PhD. [2498-003 (2005) : 50] |
| Ex Di | You **should** have a minimum of seven years' relevant experience and be qualified to BTEC Higher level or equivalent. [2519-067 (2005) : 75] |

6512
**Ex Di**  You will preferably have at least two years' working knowledge within a laboratory environment and **should** be qualified to a minimum ONC, NVO Level 2 or A-level standard in a Biological Science or related subject. [2524-066 (2005) : 75]

**Ex Di Co**  Applicants **should** have experience of pharmaceutical formulation, HPLC, pulmonary and/or colloidal drug delivery and preferably also be a qualified pharmacist. [2489-060 (2005) : 79]

**Ex Di Co**  You **should** have an established research record, preferably with a higher degree, a desire to further develop your research activities and an enthusiasm for contemporary approaches to learning and teaching. [2528-061 (2005) : 85]

**Pub**  Should I stay [2485-019 (2005) : 62]

**Pub**  or **should** I go? [2485-019 (2005) : 62]

**Pub**  **Should** I stay [2485-116 (2005) : 94]

**Pub**  or **should** I go? [2485-116 (2005) : 94]

**Pub**  DO YOU COME HERE OFTEN? If you don’t, perhaps you **should**. [2502-054 (2005) : 72]

**Pub**  DO YOU COME HERE OFTEN? If you don’t, perhaps you **should**. [2524-056 (2005) : 72]

**Pub**  DO YOU COME HERE OFTEN? If you don’t, perhaps you **should**. [2528-068 (2005) : 87]

Interested applicants **should** write, attaching a CV, before 20th January 2006, to one or more of the following: [2533-059 (2006) : 63]

Interested candidates **should** send their CV to Prof Matsen *(m.w.matsen@reading.ac.uk)* by no later than 1 February 2006. [2533-060 (2006) : 63]

Candidates **should** send a detailed CV and covering letter to the respective supervisor. [2533-061 (2006) : 63]

Applications including a full CV with names and addresses (including email addresses) of two academic referees, indicating project of interest **should be sent to**: Roslin.HR@bbsrc.ac.uk Human Resources, Roslin Institute (Edinburgh), Roslin, Midlothian, EH25 9P5 (tel 0131 527 4481) by 27 January 2006. [2533-062 (2006) : 63]

Potential PhD students **should** send a full CV including the contact details of two referees, and a covering letter, to Dr Nita Forouhi, PhD Coordinator, MRC Epidemiology Unit, Elsie Widdowson Laboratory, Fullbourn Road, Cambridge CB1 9NL, United Kingdom. [2533-065 (2006) : 64]

(overseas applicants **should** contact the individual programmes for further advice). [2533-066 (2006) : 65]

Each programme runs independently and interested candidates **should**, therefore, send enquiries and applications to the individual programmes and not to the Wellcome Trust. [2533-066 (2006) : 65]

Requests to attend the meeting, which **will** be held at the York Moat House Hotel, York, **should be addressed** to Ms Toni Gray at: Chemical Safety Division, Room 511 C, Food Standards Agency, Aviation House, 125 Kingsway, London WC2B 6NH. Tel: 020 7276 8588 Fax: 020 7276 8513 or e-mail at Toni.Gray@foodstandards.gsi.gov.uk [2533-071 (2006) : 67]

A covering letter and a full CV **should be sent** to Ms Ruth Pickering at the above address, or e-mailed to ruth.pickering@ulsop.ac.uk [2537-010 (2006) : 60]

Applications **should** include a cover letter and full CV, stating the contact details of two professional referees, who can be approached prior to interview. [2537-030 (2006) : 68]

Candidates **should** send a detailed CV, together with the names and addresses of two referees, to Mrs S Northover, Division of Agricultural and Environmental Sciences, School of Biosciences, The University of Nottingham, Sutton Bonington Campus, Loughborough, Leicestershire LE12 5RD. Tel: 0115 951 6100. Fax: 0115 951 6099. [2537-059 (2006) : 78]

General enquiries **should be addressed** to Dr Bill Jones e-mail: WJ10@cam.ac.uk [2537-060 (2006) : 79]

Applications including a CV, the names and contact details of two referees and a completed PD18 form, which can be downloaded from [http://www.admin.cam.ac.uk/offices/personnel/forms/pd18](http://www.admin.cam.ac.uk/offices/personnel/forms/pd18), **should be sent** to Ms Jane Bryant, Department of Materials Science, New Museums Site, Pembroke Street, Cambridge C82 3QZ. E-mail: pipmsadmin@msm.cam.ac.uk [2537-060 (2006) : 79]

Applications including CV and names and addresses of two referees **should be sent** to Professor Tessa Holyoake, Division of Cancer Sciences & Molecular Pathology, University of Glasgow, Glasgow G12 8QQ, E-mail: tlh1g@clinmed.gla.ac.uk, Tel: 0141 211 4676 quoting Ref 11925/DPC/A3. [2537-061 (2006) : 79]

Further enquiries **should be directed** to: Professor Stephen Nortcliff, Head of the Department of Soil Science, telephone (0118) 931 6559/8911 or e-mail: s.nortcliff@reading.ac.uk. [2537-063 (2006) : 80]

Applications **should be made** via the web at [www.ncl.ac.uk/nsci/postgrad/chemistry/apply.htm](http://www.ncl.ac.uk/nsci/postgrad/chemistry/apply.htm) [2537-066 (2006) : 81]

Applicants **should** be aware that it is necessary to read the full text for this position before applying. [2537-078 (2006) : 84]

Candidates **should** submit to Human Resources a CV, to include the names and addresses of two referees, and a statement as to why you are interested in the Studentship and return to: [2537-084 (2006) : 86]
| Ca | Interested candidates **should** send their application to Lesley Harris, Biochemistry Building, Imperial College London, London SW7 2AZ *(lesleyharris@imperial.ac.uk)*. [2537-086 (2006) : 87] |
| Ca | Applicants **should** send full curriculum vitae and the names and contact details of two academic referees. [2537-086 (2006) : 87] |
| Ca | Applications **should be submitted** as soon as possible since interviews will take place late February/early March. [2537-087 (2006) : 87] |
| Ca | Applications in writing together with CV **should be sent** to: [2541-009 (2006) : 60] |
| Ca | Applicants **should** send full curriculum vitae and the names and contact details of two academic referees. [2537-086 (2006) : 87] |
| Ca | Applications **should be submitted** as soon as possible since interviews will take place late February/early March. [2537-087 (2006) : 87] |

| Co  | With postgraduate qualifications in aquaculture, possibly a PhD, and broad-based experience in microbiology, immunology or a related discipline, the ideal candidate should be keen to apply their research skills to the development of new vaccines. [2533-037 (2006) : 57] |
| Co  | Candidates should demonstrate excellent attention to detail and a logical and analytical approach. [2533-048 (2006) : 60] |
| Co  | Candidates should be able to demonstrate enthusiasm, good communication skills, the ability to work independently and to interact with a team of researchers. [2533-049 (2006) : 60] |
| Co  | Candidates should have a strong track record in publications and for a more senior appointment proven success in grant-winning. [2537-005 (2006) : 58] |
| Co  | Candidates should also possess good presentational skills. [2537-010 (2006) : 60] |
| Co  | Fluency in English is essential and you should be used to working in a dynamic, multi-cultural campaigning environment. [2537-029 (2006) : 68] |
| Co  | You should be able to demonstrate an aptitude for team working, achieving targets, attention to detail, good verbal and written communication skills and customer focus. [2537-040 (2006) : 71] |
| Co  | This should be in the areas of population dynamics or mathematical modelling. [2537-053 (2006) : 75] |
| Co  | You should be able to critically appraise data, to ensure its validity and accuracy, and be skilled in data handling, storage, manipulation and retrieval. [2537-053 (2006) : 75] |
| Co  | You should have good interpersonal and communication skills and be capable of working independently or as part of a team. [2537-054 (2006) : 76] |
| Co  | You should be able to engage in critical scientific and commercial analyses of applied research projects across a range of life science disciplines, possess a creative approach to problem solving and enthusiasm for delivering healthcare outcomes. [2537-054 (2006) : 76] |
| Co  | You should be able to work independently and as part of a team and possess enthusiasm, good organisational skills, and initiative. [2537-068 (2006) : 82] |
| Co  | Candidates should have knowledge of the theory and practical experience of Raman Spectroscopy/SERS knowledge and experience in the use of silver sol-gels and nanostructured surface development is also required. [2541-028 (2006) : 69] |
| Co  | You should have evidence of publications in good scientific journals and the ability to work independently and in a team. [2541-034 (2006) : 72] |
| Co  | You should also be able to demonstrate you are a motivated, self-starter, with effective interpersonal, management and organisational skills. [2541-054 (2006) : 80] |
| Co  | You should have a willingness to take or lead a variety of tasks, both experimental and theoretical. [2541-062 (2006) : 81] |
You should have an interest in developing collaborative links with animal welfare scientists and will also contribute to teaching, particularly on the Animal Behaviour and Welfare BSc programme. [2541-068 (2006) : 83]

You should be computer-literate, well-organised, self-motivated, a good communicator and good at solving problems. [2541-074 (2006) : 84]

You should have a working knowledge of a wide range of experimental techniques, including molecular cloning and sequencing methods, preferably including experience with RT-PCR of mammalian genes, gene expression studies, microarrays and mammalian biotechnology databases. [2541-084 (2006) : 87]

You should be an enthusiastic Scientist, with experience in molecular biology/molecular genetics that includes molecular cloning, RT PCR, gene expression and gene sequencing methods. [2541-084 (2006) : 87]

The successful applicant should be recognised internationally as a leading scientist in their field and have an exceptional research and publication record. [2541-088 (2006) : 89]

Candidates should be computer literate and have working knowledge of a popular programming language. [2545-013 (2006) : 63]

Applicants should be proficient in Java. Experience with any of the following technologies will be advantageous: relational database management systems; Perl; Apache; web interfaces; application servers; web services. [2545-013 (2006) : 63]

Candidates should be highly self-motivated and have the ability to both work independently and as part of a team. [2545-015 (2006) : 64]

The lay member should have a proven track record as a patient advocate with a particular interest in, and knowledge of, cancer. [2545-018 (2006) : 65]

For Post 1 you should preferably have an understanding of the issues currently affecting academic training and career development. [2545-019 (2006) : 65]

For Post 2 you should have an understanding of the issues currently affecting funding in the Institutes sector. [2545-019 (2006) : 65]

In addition, you should have a proven track record in leadership and management in order to develop the Unit's Statistical team as you will have responsibility for the line management of two Unit staff in the Statistical Group. [2545-021 (2006) : 66]

Applicants should have initiative and drive, the ability to trouble-shoot testing and analytical problems, possess good inter-personal skills and be able to motivate a team. [2545-041 (2006) : 76]

In addition to the above you should: [2545-048 (2006) : 79]

The ideal candidate should also be enthusiastic and pay good attention to detail. [2545-051 (2006) : 80]

You should have a well-developed sense of responsibility, be able to work independently, be interested in learning new techniques and have excellent communication skills. [2545-072 (2006) : 87]

and should be interested in pursuing your career with a scientific base in a demanding environment. [2545-073 (2006) : 88]

The research project should relate to the epidemiology of infectious diseases of animals, including zoonoses, either suggested by the student or chosen from our web site. [2545-094 (2006) : 94]

Applicants for this position should be self-motivated, innovative, and have the drive and enthusiasm to further develop these exciting journals. [2550-008 (2006) : 60]

Applicants should have a flair for organic chemistry and enjoy problem solving. [2550-034 (2006) : 73]

Candidates should be UK nationals, nationals of member states of the European Economic Area (EEA), Swiss nationals or citizens of the Commonwealth who have the right to work in the UK. [2554-017 (2006) : 65]

As well as being a scientific expert, you should be a confident communicator and networker, who can explain scientific ideas to a non-scientific audience and build productive relationships at all levels. [2554-035 (2006) : 72]
| Co | Applicants **should** be good team workers who can demonstrate proven organizational and computer literacy skills and who possess a good eye for detail. [2554-038 (2006) : 74] |
| Co | You **should** demonstrate strong analytical and technical problem solving skills, use of sound scientific judgement together with a good understanding of GMP and equipment/systems qualification requirements. [2558-042 (2006) : 78] |
| Co | You **should** be a team player with excellent written and verbal communication skills. [2558-046 (2006) : 79] |
| Co | Applicants **should** be self-motivated, innovative and have the desire to contribute to the further development of an exciting science journal. [2558-065 (2006) : 86] |
| Co | The successful candidate **should** be an excellent, highly motivated postdoctoral scientist with proven leadership abilities. [2558-075 (2006) : 90] |
| Co | Applicants **should** work with modern genomic technologies on microbial, preferentially fungal interactions mediated by secondary metabolites, or the pathogenicity of human-pathogenic fungi. [2558-075 (2006) : 90] |
| Co | You **should** also engage in top level Systems Biology research in the MCISB, with some of the doctoral students and with others. [2558-078 (2006) : 91] |
| Co | Alternatively, applying biologists, veterinarians or pharmacologists **should** have a comprehensive technical background. [2558-081 (2006) : 92] |
| Co | We are seeking a highly motivated individual to play an important role in the delivery of our Exercise, Nutrition and Health Courses. Specifically, you **should** be able to contribute to teaching of Growth and Development, Physical Activity and Health Promotion, Exercise Prescription and Research Methods within the Sports and Exercise field. [2558-085 (2006) : 94] |
| Co | Successful candidates **should** be excellent, highly motivated scientists. [2558-089 (2006) : 95] |
| Co | The Post Doc **should** have coordinative abilities. [2558-089 (2006) : 95] |
| Co | You **should** have a strong motivation for interdisciplinary research and the ability to work independently. [2558-093 (2006) : 96] |
| Co | You **should** also have good time management and organisational skills and the ability to work effectively within a busy team environment. [2558-093 (2006) : 96] |
| Co | Candidates **should** have the ability to apply standard fish stock assessment techniques and develop new approaches. [2558-093 (2006) : 96] |
| Co | Candidates **should** be able of working as part of a small, dedicated team and be prepared to fill a flexible role, including participation in research cruises. [2563-007 (2006) : 52] |
| Co | You **should** possess excellent understanding of vascular treatment and assessment products, and have the ability to plan, co-ordinate and report on clinical research projects. [2563-010 (2006) : 54] |
| Co | Applicants **should** be innovative, self-motivated, and have the desire to contribute to the further development of one of the world's top scientific book programmes. [2563-054 (2006) : 68] |
| Co | Your native tongue **should** be either English whilst having very good knowledge in German as well or German with excellent knowledge in English (both written and verbal). [2563-054 (2006) : 68] |
| Co | You **should** generate enthusiasm and confidence in equal measure, and have excellent communication skills. [2563-055 (2006) : 69] |
| Co | You **should** bring good communication skills to the role, helping you build effective working relationships with colleagues and external stakeholders alike, and it's vital that you share our ambition. [2563-055 (2006) : 69] |
| Co | You **should** also have a good knowledge of EMEA, plus excellent organisational skills. [2563-055 (2006) : 69] |
| Co | You **should** have the ability to work effectively on multidisciplinary problems. The ability to use CAD packages is essential. [2563-058 (2006) : 70] |
| Co | You **should** have good verbal and written communication skills, and will be expected to develop a systematic exploration of the effects of surface feature geometry, scale and orientation on the yields of trapped DNA material. [2563-058 (2006) : 70] |
| Co | You **should** demonstrate excellent attention to detail and a logical and analytical approach. [2563-074 (2006) : 76] |
You should demonstrate strong attention to detail and accuracy, along with excellent planning and organisational skills and the ability to make decisions in the absence of the Project Coordinator. [2567-012 (2006) : 55]

Candidates should possess excellent communication and presentational skills and enjoy working in a multi-team multidisciplinary environment. [2567-014 (2006) : 56]

They should have good attention to detail, good communication skills and be well motivated in a bench science role. [2567-016 (2006) : 58]

Applicants should be excellent team workers with proven organizational and computer literacy skills [2567-018 (2006) : 58]

and should possess an acute eye for detail. [2567-018 (2006) : 58]

Applicants should be self-motivated and be able to manage their own time effectively. [2567-029 (2006) : 62]

Due to the high level of response expected, candidates should already have a permit to work in the UK. [2567-039 (2006) : 67]

The post holders should preferably have a good understanding of cell biology or cell culture and some knowledge of immunology. [2567-068 (2006) : 78]

The candidate should be familiar with device modelling and simulation. [2572-015 (2006) : 66]

The candidate should be aware of various system aspects of displays and knowledge of human visual perception is a bonus. [2572-015 (2006) : 66]

You should also be a good problem solver with well-honed report writing capabilities and excellent communication skills. [2572-036 (2006) : 75]

To be considered for employment you must be eligible to reside and work in the UK and you should be aware that appointments to all vacancies will be subject to the granting of a UK Security Clearance.[2572-040 (2006) : 77]

The cost of the project should be no more than £25,000 p.a. for up to three years. [2572-048 (2006) : 80]

Moreover, you will need to be comfortable working to tight deadlines and your interpersonal and communication skills should be nothing short of excellent. [2572-058 (2006) : 84]

Applicants should have a keen eye for detail and excellent interpersonal and communication skills. [2576-010 (2006) : 64]

and you should have an interest in protein characterisation as well as commercial or academic experience of working with chromatographic, electrophoresis and/or mass spectrometric methods. [2576-035 (2006) : 74]

You should also have the ability to communicate effectively as there will be key relationships within internal DCWW colleagues, our operational contact partners, the Environment Agency Wales and other key stakeholders. [2576-036 (2006) : 74]

You should also have the ability to communicate effectively as there will be key relationships within internal DCWW colleagues, our operational contact partners, the Environment Agency Wales and other key stakeholders. [2576-037 (2006) : 74]

Candidates should also possess excellent organisational, communication and presentational skills, and enjoy working in a multi-team multidisciplinary environment. [2576-045 (2006) : 77]

They also should have good communication skills and an independent outlook, be capable of working in a team and deliver to tight deadlines. [2576-064 (2006) : 81]

The candidate should have interest in physical sciences. [2576-064 (2006) : 81]

You should be an effective team player as the role necessitates a close working relationship with other members of the team to improve and extend the high standard of services available. [2576-072 (2006) : 85]

You should be enthusiastic, a good communicator and enjoy working as part of a close team. [2576-076 (2006) : 86]

You should have an understanding of the issues currently affecting funding in the Institutes sector. [2580-025 (2006) : 63]

You should also possess excellent written and verbal communication skills, with a concern for impact and standards and attention to detail, have good computer literacy, be adaptable and self-
motivated and used to working to tight deadlines, and able to multi-task and prioritise under pressure. [2580-032 (2006) : 64]

Co Candidates **should** possess excellent communication skills in oral and written English, and be familiar with Linux, and scripting languages. [2580-059 (2006) : 75]

Co You **should** have a well-developed sense of responsibility, be able to work independently and be interested in learning new techniques. [2580-061 (2006) : 76]

Co Di You **should** have the potential to achieve grade 3*/4* RAE level, be able to contribute to the School's existing areas of research expertise and ideally have specialist expertise in the area of data analysis/modelling of biological processes and biostatistics. [2545-080 (2006) : 89]

Co Di Post holders **should** be strong team players with excellent communication skills at all levels, as they **will** be responsible for providing expert advice on the management and processing of data contributing towards the dissemination of research results. [2550-053 (2006) : 80]

Co Di Applicants **should** be enthusiastic and of high quality, with at least an upper second class honours degree in the biological/biomedical sciences or a related subject. [2550-055 (2006) : 81]

Co Di You **should** have a well-developed sense of responsibility, be able to work independently and be interested in learning new techniques. [2550-061 (2006) : 76]

Co Di The applicant **should** be fluent in English (native speaker preferred) and have some experience in publishing. A knowledge of German is desirable but not essential. [2550-008 (2006) : 60]

Co Di You **should** be fluent in English (native speaker preferred) and be familiar with text and graphics PC programs. [2558-065 (2006) : 86]

Co Di In addition, you **should** have basic database search skills, ideally Medline and Embase, and be fully computer literate with MS Office and keyboard skills. [2563-003 (2006) : 51]

Co Ex and you **should** have an interest in protein characterisation as well as commercial or academic experience of working with chromatographic, electrophoresis and/or mass spectrometric methods. [2576-009 (2006) : 64]

Co Ex The postholder **will** work in a team of technicians but **should** have particular skills and knowledge in the area of Microbiology with knowledge or prior experience of CL3 facilities. [2580-072 (2006) : 79]

Di You **should** hold or expect to gain a first or upper second class honours degree. [2533-061 (2006) : 63]

Di Applicants **should** have, or expect to obtain, a first or upper second class degree in a related discipline. [2533-062 (2006) : 63]

Di Applicants **should** have, or expect to obtain, a 1st or 2:1 degree, or equivalent [2533-066 (2006) : 65]

Di Ideally candidates **should** have a strong background in synthetic organic chemistry, especially in the areas of palladium-catalysed carbon-carbon bond formation and parallel solution phase combinatorial synthesis. [2537-014 (2006) : 62]

Di The successful applicant **should** have a relevant science degree and a PhD or relevant research/laboratory experience. [2537-014 (2006) : 62]

Di You **should** possess a PhD in biochemistry, biophysics or a related discipline. [2537-080 (2006) : 85]

Di Funding is for one year and you **should** have a PhD in an appropriate subject. [2541-091 (2006) : 89]

Di Students **should** have, or expect to gain, a first or upper second class degree in Biological or Physical Sciences. [2541-094 (2006) : 91]

Di Candidates **should** hold or expect to gain a good Honours degree in a relevant scientific discipline. [2541-099 (2006) : 94]

Di Candidates **should** have a BSc Hons. in plant molecular biology or a related discipline. [2541-101 (2006) : 94]

Di To be considered, you **should** have a strong background in practical histology. [2545-010 (2006) : 62]

Di The expert members **should** have a proven track record in Medical/Clinical Oncology, Infectious Diseases or Stem Cell Biology. [2545-018 (2006) : 65]

Di You **should** have a Master's or a doctoral degree in statistics or a related subject. [2545-021 (2006) : 66]

</table>
Di Applicants **should** have, or expect to gain, a First or Second class UK Honours degree or equivalent. [2558-091 (2006) : 96]

Di You **should** have a good science background and possess at least a BTEC/HTEC in Physiological Measurement or preferably a BSc in Clinical Physiology (or equivalent). [2563-037 (2006) : 62]

Di Candidates **should** have a good Honours degree or its equivalent and have completed, or be near to completing a doctorate or other post-graduate research. [2563-061 (2006) : 71]

Di Applicants **should** have, or expect to obtain, at least a second-class honours degree in Physics or a related subject. [2558-099 (2006) : 98]

Di You **should** have a good science background and possess at least a BTEC/HTEC in Physiological Measurement or preferably a BSc in Clinical Physiology (or equivalent). [2563-037 (2006) : 62]

Di You **should** possess a Degree or higher qualification in a relevant scientific discipline (biology, biochemistry, molecular biology, developmental biology, medical science etc). [2567-022 (2006) : 74]

Di You **should** have a degree in ecological science. [2567-009 (2006) : 64]

Di You **should** have a good Honours degree or its equivalent and have completed, or be near to completing a doctorate or other post-graduate research. [2567-083 (2006) : 90]

Di Applicants **should** have or expect to gain, a First or Second class UK Honours degree or equivalent. [2558-091 (2006) : 96]

Di You **should** have a good science background and possess at least a BTEC/HTEC in Physiological Measurement or preferably a BSc in Clinical Physiology (or equivalent). [2563-037 (2006) : 62]

Di Candidates **should** have a good Honours degree or its equivalent and have completed, or be near to completing a doctorate or other post-graduate research. [2563-061 (2006) : 71]

Di Postgraduate applicants **should** have a good honours degree (2.1 or better) in a relevant subject area. Please visit [www.bdi.ie](http://www.bdi.ie) for more information on these positions and topic areas. [2563-062 (2006) : 71]

Di You **should** have a Masters degree in either chemistry or physics. [2563-073 (2006) : 75]

Di You **should** have a good honours degree and/or Masters qualification in an appropriate subject. [2563-078 (2006) : 77]

Di Applicants **should** have a good honours degree or a related discipline. [2563-073 (2006) : 75]

Di Candidates for the Research Officer post **should** have a PhD or a similar level of industrial experience. [2563-076 (2006) : 76]

Di Applicants **should** have a good degree in Biological Sciences, Chemical Engineering or related topic. [2563-065 (2006) : 77]

Di You **should** have a Masters degree in either chemistry or physics. [2563-073 (2006) : 75]

Di You **should** have a degree or equivalent. [2563-072 (2006) : 80]

Di You **should** have a good honours degree or a related discipline. [2563-073 (2006) : 75]

Di Candidates **should** hold or expect to hold a 1st or upper 2nd Class Honours in Biochemistry, Molecular Biology or a related subject. [2563-080 (2006) : 77]

Di You **should** have a good honours degree in Biological Sciences, Chemical Engineering or related topic. [2563-065 (2006) : 77]

Di You **should** have or expect to gain, a First or Second class UK Honours degree or equivalent. [2558-091 (2006) : 96]

Di You **should** have a good science background and possess at least a BTEC/HTEC in Physiological Measurement or preferably a BSc in Clinical Physiology (or equivalent). [2563-037 (2006) : 62]

Di Candidates **should** have a good Honours degree or its equivalent and have completed, or be near to completing a doctorate or other post-graduate research. [2563-061 (2006) : 71]

Di You **should** hold or expect to hold a 1st or upper 2nd Class Honours in Biochemistry, Molecular Biology or a related subject. [2563-080 (2006) : 77]

Di You **should** have a degree in biological or chemical science. [2567-016 (2006) : 58]

Di Applicants **should** have a degree in biological or chemical science. [2567-016 (2006) : 58]

Di You **should** have a Masters degree in either chemistry or physics. [2563-073 (2006) : 75]

Di You **should** have a Masters degree in either chemistry or physics. [2563-073 (2006) : 75]

Di Candidates **should** have a good Honours degree or its equivalent and have completed, or be near to completing a doctorate or other post-graduate research. [2563-061 (2006) : 71]

Di You **should** have a good Honours degree in Biological Sciences, Chemical Engineering or related topic. [2563-065 (2006) : 77]

Di You **should** have a degree or equivalent. [2563-072 (2006) : 80]

Di You **should** have a good honours degree in Biological Sciences, Chemical Engineering or related topic. [2563-065 (2006) : 77]

Di You **should** have a degree or equivalent. [2563-072 (2006) : 80]

Di Applicants **should** hold or expect to hold a 1st or upper 2nd Class Honours in Biochemistry, Molecular Biology or a related subject. [2563-080 (2006) : 77]

Di You **should** have a good honours degree in Biological Sciences, Chemical Engineering or related topic. [2563-065 (2006) : 77]

Di You **should** have a degree or equivalent. [2563-072 (2006) : 80]

Di Applicants **should** be graduates with a background in an appropriate discipline and possibly a second degree. [2567-077 (2006) : 81]

Di Candidates **should** have a good Honours degree or its equivalent and have completed, or be near to completing a doctorate or other post-graduate research. [2567-083 (2006) : 83]

Di Ideally, you **should** be educated to degree level in the field of chemical engineering or a related science based discipline. [2572-042 (2006) : 78]

Di You **should** have a degree or equivalent. [2563-072 (2006) : 80]

Di Applicants **should** have a good science background and possess at least a BTEC/HTEC in Physiological Measurement or preferably a BSc in Clinical Physiology (or equivalent). [2563-037 (2006) : 62]

Di You **should** have a good Honours degree or its equivalent and have completed, or be near to completing a doctorate or other post-graduate research. [2563-061 (2006) : 71]

Di You **should** have or expect to gain, a First or Second class UK Honours degree or equivalent. [2558-091 (2006) : 96]

</tr>
<tr>
<td>Di Ex</td>
<td>Candidates should be educated to degree level in a biology-related subject or have equivalent industrial experience. [2576-007 (2006) : 63]</td>
</tr>
<tr>
<td>Di Ex</td>
<td>Candidates should be educated to degree level in a biology or chemistry related subject or have equivalent industrial experience. [2576-007 (2006) : 63]</td>
</tr>
<tr>
<td>Di Ex</td>
<td>A mathematics, statistics or physical science graduate, you should have detailed knowledge of developing mathematical modes of physical systems, gained in academia or industry. [2576-017 (2006) : 67]</td>
</tr>
<tr>
<td>Di Ex</td>
<td>You should have a scientific degree or equivalent, which includes protein biochemistry as well as detailed knowledge and understanding of a range of analytical methods and their application for the investigation of proteins. [2576-035 (2006) : 74]</td>
</tr>
<tr>
<td>Di Ex</td>
<td>Applicants should have a good honours degree and a PhD in a relevant scientific discipline with knowledge and laboratory experience in biochemistry, microbiology and immunology. [2576-049 (2006) : 78]</td>
</tr>
<tr>
<td>Di Ex</td>
<td>The candidate should hold at least a BSc degree or have an equivalent practical experience. [2576-064 (2006) : 81]</td>
</tr>
<tr>
<td>Di Ex</td>
<td>You should already hold a PhD in physical or engineering sciences and ideally have experience in the preparation, chemical modification, characterisation and handling of carbon nanotubes or fullerenes. [2576-082 (2006) : 88]</td>
</tr>
<tr>
<td>Di Ex</td>
<td>You should have a good degree in a relevant area, knowledge of all fundamental Silicon fabrication processes together with familiarity with the equipment that carries out these processes. [2576-085 (2006) : 89]</td>
</tr>
<tr>
<td>Di Ex</td>
<td>You should have a PhD or equivalent experience, a strong publication record, [2580-014 (2006) : 59]</td>
</tr>
<tr>
<td>Di Ex</td>
<td>Candidates should have a PhD either in applied mathematics/statistics or biology/ecology with demonstrable experience in modelling both spatial and temporal population processes. [2580-027 (2006) : 63]</td>
</tr>
<tr>
<td>Di Ex</td>
<td>The ideal candidate <strong>should</strong> have a degree, or equivalent, in Chemistry or Biological Sciences and a basic understanding of toxicology, ecotoxicology and/or physical chemistry. [2580-032 (2006) : 64]</td>
</tr>

<tr>
<td>Di Ex Co</td>
<td>You <strong>must</strong> be degree qualified and offer at least 10 years’ high calibre forensic support experience, five of which <strong>should</strong> have been spent working at a senior level. [2541-008 (2006) : 60]</td>
</tr>
<tr>
<td>Di Ex Co</td>
<td>To be successful, you <strong>should</strong> have a University degree or equivalent in an environmental science, meteorology or a relevant technical area, and a minimum of 6 years experience in the planning and management of international satellite activities, with proven experience of successful negotiations. [2541-039 (2006) : 75]</td>
</tr>
<tr>
<td>Di Ex Co</td>
<td>At Band 4 level the candidate <strong>should</strong> be an established physicist with a successful track record of innovative research in the field of accelerator physics, including a proven ability to lead such research. [2541-062 (2006) : 81]</td>
</tr>
<tr>
<td>Di Ex Co</td>
<td>You <strong>should</strong> have a strong background in laboratory research (ideally with formal qualifications at degree level or equivalent) with good organisational, communication, management, financial and interpersonal skills. [2541-071 (2006) : 84]</td>
</tr>
<tr>
<td>Di Ex Co</td>
<td>You <strong>should</strong> have: • academic degree in medicine, biology, biochemistry or chemistry (preferably PhD) • broad experience in pathology, cancer and molecular biology • some experience in clinical chemistry &amp; haematology • good English communication skills • excellent skills in writing &amp; editing general knowledge in statistics business focused • ready to work in international project teams [2545-056 (2006) : 82]</td>
</tr>
<tr>
<td>Di Ex Co</td>
<td>You <strong>should</strong> hold a PhD or equivalent degree, and have at least three years’ experience at postdoctoral level, together with a record of publication in international journals. [2545-066 (2006) : 85]</td>
</tr>
<tr>
<td>Di Ex Co</td>
<td>Ideal candidates <strong>will</strong> have a PhD in theoretical biology, mathematics or economy and <strong>should</strong> be experienced in modelling (e.g. game theory, agent-based simulation models, dynamic programming), preferably with a sound background in theoretical issues in evolutionary biology. [2550-010 (2006) : 60]</td>
</tr>
</tbody>
</table>
| Di Ex Co | Applicants **should** be life sciences graduates or PhDs with a minimum of 3 years’ practical laboratory experience in a drug discovery environment for research scientists and a minimum of
Di Ex Co You **should** have a biological degree (preferably clinical physiology) or an HNC in MPPM and some experience of sleep and respiratory function tests studies, preferably with a background in lung function, sleep or neurophysiology. [2550-047 (2006) : 78]

Di Ex Co Well-motivated and forward-thinking, you **should** have an established research record, preferably with a higher degree, a desire to further develop your research activities and enthusiasm for contemporary approaches to learning and teaching. [2554-083 (2006) : 88]

Di Ex Co You **should** have a degree in either Biochemistry or Cell Biology or a related field, and experience in molecular biology, biochemistry and cell biology (at least three years), with an interest in the molecular mechanisms underlying neurodegeneration and cellular responses to abnormal protein accumulation. Experience in fluorescent microscopic techniques **would** be an advantage. [2558-019 (2006) : 65]

Di Ex Co Applicants **should** have a Ph.D. or three years equivalent experience with laser plasma experiments and preferably a minimum of two years experience at Research assistant level. [2558-047 (2006) : 80]

Di Ex Co Educated to degree level or equivalent in a science subject, ideally chemistry, you **should** possess 5-10 years' laboratory experience, with at least 2 years' at a supervisory/management level. [2563-005 (2006) : 52]

Di Ex Co You **should** be a science graduate or similar and ideally have some experience in building water systems and/or some knowledge in the control of legionella bacteria. [2563-022 (2006) : 58]

Di Ex Co Applicants **should** hold a BSc or PhD in a relevant discipline and have experience and enthusiasm. [2567-022 (2006) : 59]

Di Ex Co Degree qualified in Chemistry or relevant discipline, applicants **should** have experience in pharmaceutical analytical development, a sound understanding of regulatory guidelines and the ability to work in an organised, diligent manner with an attention to detail. [2572-018 (2006) : 67]

Di Ex Co Applicants **should** be qualified to at least BSc or equivalent in chemistry or polymer science and have some experience working with polymers, scale-up of polymers and/or polymer formulation gained either in industry or academia. [2576-031 (2006) : 72]

Di Ex Co Appropriately qualified, you **should** have relevant experience in photogramatry, image and object comparison, facial analysis, estimation, differential comparison, measurement from video, gait analysis, or other related area of expertise. [2576-034 (2006) : 73]

Di Ex Co The ideal candidate **should** have a PhD in a relevant area (e.g. chemical, biological or physical sciences), and experience in molecular biology (at least three years), with an interest in the molecular mechanisms underlying neurodegeneration and cellular responses to abnormal protein accumulation. Experience in fluorescent microscopic techniques **would** be an advantage. [2576-045 (2006) : 77]

Di Ex Co Candidates **should** have a PhD, a good publication record, proven field skills and a clean driving licence. [2576-050 (2006) : 78]

E Applicants **should** be aware that the work can generate a considerable amount of both public and media interest. [2541-047 (2006) : 77]

E A follow-up to the clinical network is planned, which **should** provide some of the most exciting opportunities for non-clinicians in cancer research. [2545-004 (2006) : 56-59]

E "It **will** be broken down into the nature of the individual's cancer and therefore we **will** know how that person's cancer **should** be treated." [2545-004 (2006) : 56-59]

E As a result, physicians on their route to consultancy **should** now find it easier to take time out for research, without being penalised for doing so. [2545-004 (2006) : 56-59]

E Yet I believe that scientific endeavour **should** not finish at the point of publication. [2545-004 (2006) : 56-59]

E We had campaigned long and hard for this legislation, but we **should** not have needed to wait half a century for legislators and the public to accept and act upon the science. [2545-004 (2006) : 56-59]

E It **should** be noted that these posts are designed as career development posts for someone who is newly qualified and wishes to gain experience in this field. [2545-006 (2006) : 85]
**E** So it **should** come as no surprise that Switzerland - with its strengths in life sciences and computing - is at the forefront. [2550-006 (2006) : 56-57]

**E** Metabolic reactions, drug delivery as well as fungal infection mechanisms **should be investigated** real-time in the living animal at the cellular level. [2558-081 (2006) : 92]

**E** Increasingly, he believes, funding bodies **should** review work afterwards too. [2567-002 (2006) : 50-51]

**E** Should research funding bodies be more like businesses? [2567-002 (2006) : 50-51]

**E** He knows well the effort that goes into grant applications, for example, and feels that researchers **should** always be able to find out why they failed. [2567-002 (2006) : 50-51]

**E** The Food Standards Agency has therefore decided that the Chair of the ACMSF (and similar committees advising the Agency) **should** not be employed by, or receive personal remuneration from, industrial organisations or pressure groups during his or her term of appointment. [2567-003 (2006) : 52]

**E** "The combination of this and excellent science **should** make for a bright future.” [2572-006 (2006) : 58-61]

**E** fact: Clean, green, open spaces - we believe everyone, everywhere **should** have access to them. [2572-044 (2006) : 79]

**E** Support that **should** help them achieve their goals. [2576-001 (2006) : 2]

**E** One obvious disadvantage of joining a company outside the clusters is that it’s trickier to further your career nearby **should** you decide to move on, or the company folds. [2576-003 (2006) : 58-61]

**E** First stop **should** be the company's annual report, where public businesses **must** include detailed information about their drugs pipeline. [2576-003 (2006) : 58-61]

**Ex** You **should** have a demonstrated track record as an accepted expert in modelling science, statistics, or closely related discipline. [2533-022 (2006) : 52]

**Ex** You **should** also have experience in leading and managing a team of scientists, a successful record in obtaining substantial research funding, providing scientific advice and consultancy at national level, as well as experience of project leadership. [2533-022 (2006) : 52]

**Ex** The ideal candidate **should** have experience of cellular and molecular immunology techniques. [2533-046 (2006) : 59]

**Ex** The ideal candidate **should** have experience of cellular and molecular immunology techniques. [2537-018 (2006) : 64]

**Ex** Ideally, this **should be complemented** by relevant agency, industry or academic experience. [2537-018 (2006) : 64]

**Ex** You **should** have experience of working as part of an interdisciplinary team, ideally gained in an industrial environment. [2537-065 (2006) : 80]

**Ex** and you **should** ideally have some previous experience in programming software agents, agent platforms/environments, distributed systems or web-services. [2558-017 (2006) : 65]

**Ex** You **should** have at least 4-5 years' successful writing experience in a pharmaceutical company or CRO, and have experience in line management and the training of writers. [2558-057 (2006) : 83]

**Ex** Ideally applicants **should** have direct experience in this field or in a related area such as Haematology, Blood Transfusion or Immunology. [2558-071 (2006) : 88]

**Ex** Candidates without this level of qualification **should** have at least three years relevant experience. [2563-040 (2006) : 63]

**Ex** Applicants **should** have experience of applying molecular techniques to study microbial diversity and/or function. [2563-071 (2006) : 74]

**Ex** This **should** include experience of immunochemical techniques and the ability to work independently. [2567-039 (2006) : 67]

**Ex** Candidates **should** possess up to four years' relevant postdoctoral or postgraduate experience. [2567-054 (2006) : 72]

**Ex** Candidates **will** generally be expected to have had already some postdoctoral experience of research, although this **should** normally not have exceeded two years. [2567-073 (2006) : 80]
| Ex | The role will be laboratory based, and the successful applicant should have experience of mammalian tissue culture techniques such as proliferation assays and western blotting. [2576-007 (2006) : 63] |
| Ex | Ideally, you should be able to provide a proven track record or portfolio of work undertaken. [2576-034 (2006) : 73] |
| Ex | Ideally you should have a good understanding in the following areas: [2576-037 (2006) : 74] |
| Ex | Experience should include: [2576-068 (2006) : 82] and should have experience in protein expression, purification and characterization, or in Structural Biology. [2580-014 (2006) : 59] |
| Ex Co | In this challenging environment, you will soon gain reporting experience and should be aiming to achieve registration with the Council for the Registration of Forensic Practitioners within five years of appointment. [2533-010 (2006) : 48] |
| Ex Co | Candidates should have a strong track record in high impact peer reviewed publications and for a more senior appointment, evidence of external income generation and research grant success. [2537-005 (2006) : 58] |
| Ex Co | You should also have some experience of statistical modelling and knowledge of a high-level programming language (a working knowledge of Fortran 90, S-Plus or R would be desirable). [2537-053 (2006) : 75] |
| Ex Co | Candidates for this position should have a demonstrated excellent track record in leading a successful and sustained research programme at the forefront of particle physics. [2537-075 (2006) : 84] |
| Ex Co | With at least five years in-depth medical device experience, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/ she has worked. [2541-026 (2006) : 68] |
| Ex Co | A hard working member of our bench-based team, you should have practical skills in gene, MA and RNA isolation and characterisation, cell culture techniques and the generation of stable mammalian cell lines. [2541-038 (2006) : 74] |
| Ex Co | Prior experience is desirable, but above all you should have an aptitude and interest in learning new and practical skills. [2541-038 (2006) : 74] |
| Ex Co | Scientific applicants should have considerable postgraduate experience and have gained recognition in the scientific community in their field. [2541-047 (2006) : 77] |
| Ex Co | In addition, you should have experience in interacting with customers and business development and be willing to undertake travel on a regular basis as part of the department's marketing activities. [2541-054 (2006) : 80] |
| Ex Co | You should have experience of laboratory management and have strong IT skills. [2541-071 (2006) : 84] |
| Ex Co | You should also have experience of interacting with researchers and responding to their evolving needs, and in promoting services. [2545-010 (2006) : 62] |
| Ex Co | Candidates should have: • academic experience in molecular biology or medicine, preferably oncology • experience in the diagnostic industry, preferably in a product management or sales related position • excellent communication capabilities with technical, academic and economical conversational partners • good teaching skills • entrepreneurial spirit coupled with strong target and sales orientation [2545-056 (2006) : 82] |
| Ex Co | You should have at least four years' clinical research experience with at least 12 months' experience of trial management. [2545-064 (2006) : 84] |
| Ex Co | Candidates should have extensive practical experience (3-5 years) of NMR spectroscopy, together with a high level of theoretical knowledge. [2554-061 (2006) : 82] |
| Ex Co | and should ideally have some background in agent-based virtual organisations, knowledge representation, logic-based argumentation, web-services and programming. [2558-017 (2006) : 65] |
| Ex Co | The successful applicant should have at least three years' experience of molecular biology techniques and preferably some knowledge of developmental biology. [2558-020 (2006) : 65] |
| Ex Co | You **should** have a minimum of one-two years laboratory experience and be able to communicate effectively at all levels. [2558-027 (2006) : 72] |
| Ex Co | As a hard working member of our team you **should** have demonstrated practical skills in the development of a range of *in vitro* screening assays for the study of G protein-coupled receptors, ion channels and/or enzymes. [2558-034 (2006) : 75] |
| Ex Co | You **should** have a successful track record within a quality role, preferably within an FMCG environment, and possess a strong drive for results. [2558-039 (2006) : 77] |
| Ex Co | For appointment at the top of the range, applicants **should** have about five years post doctoral experience, demonstrating their ability to lead independent research activities. [2558-047 (2006) : 80] |
| Ex Co | This is a permanent position and candidates **should** have previous experience of relevant computer programming with a background in either ecology or computing. [2558-048 (2006) : 80] |
| Ex Co | You **should** have some experience, or a keen interest in, environmental control, particularly related to hazardous materials, dust and fibres. [2558-063 (2006) : 85] |
| Ex Co | Ideally, applicants **should** link superior operation of the CT/PET system with excellent skills in animal handling. [2558-081 (2006) : 92] |
| Ex Co | Applicants **should** have an excellent knowledge of molecular biology and English communication skills. [2558-089 (2006) : 95] |
| Ex Co | This **should** include a sound working knowledge of oil and gas operations, experience of auditing procedures and analytical techniques, plus the ability to prepare detailed laboratory procedures and documentation. [2563-005 (2006) : 52] |
| Ex Co | Candidates **should** have experience of investigative research and possess good organisation skills along with an interest in cancer and statistics. [2563-056 (2006) : 70] |
| Ex Co | Applicants **should** have sufficient postdoctoral experience to demonstrate their outstanding research potential and **must** not currently have a permanent lectureship position. [2563-063 (2006) : 72] |
| Ex Co | You **should** have demonstrable experience of research administration at a senior level and **will** be able to evidence leadership qualities and strong interpersonal skills. [2567-007 (2006) : 56] |
| Ex Co | For the Medical Writer position you **should** have 2 years medical writing experience in a clinical trials environment as well as the ability to assimilate and objectively interpret large quantities of data and communicate their findings in a clear and concise manner, both orally and in writing. [2567-056 (2006) : 73] |
| Ex Co | Candidates **should** have significant research experience in analysis and modelling of semiconductor materials and extensive knowledge and experience of electrochemical systems and modelling of transient behaviour in chemical systems. [2572-015 (2006) : 66] |
| Ex Co | Applicants **should** have significant practical experience of a wide variety of pharmaceutical analytical techniques, coupled to a thorough knowledge of GMP and other pharmaceutical regulations. [2572-018 (2006) : 67] |
| Ex Co | You **should** have a record of research in any area of GIS and its application though preference may be given to applicants who are able to offer teaching and research expertise in one or more of the following areas: Visualisation, Spatial analysis and GIS modelling, GIS programming, Internet GIS or mobile GIS. [2572-085 (2006) : 96] |
| Ex Co | In-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications **should** reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2576-020 (2006) : 69] |
| Ex Co | Candidates for the Engineering Design post **should** have a proven research record in the area of Engineering Design, and **will** be expected to contribute directly to the research and teaching of the Engineering Design Centre (EDC). [2576-077 (2006) : 87] |
| Ex Co | You **should** be able to demonstrate experience of research, for example an undergraduate dissertation, preferably in a subject relevant to terrestrial ecology and conservation. [2580-079 (2006) : 81] |
Alongside teaching or presentation experience relating to ecology you should have experience of practical field ecology. [2580-079 (2006) : 81]

You should be either an experienced cancer nurse or have a first degree in science, with an additional qualification in science communication. [2533-020 (2006) : 52]

You should have significant experience in research as a laboratory technician and possess a university degree in the biological/biomedical sciences and/or have completed appropriate technical qualifications. [2563-079 (2006) : 77]

In this challenging environment, you will soon gain reporting experience and should be aiming to achieve CRFP registration within five years of appointment. [2567-010 (2006) : 54]

You should ideally have significant experience in a clinical IVF setting, be a licensed ICSI practitioner and be in possession of, or working towards, the ACE Certification in Clinical Embryology and State Registration. [2576-076 (2006) : 86]

You should have significant experience in research as a laboratory technician and possess a university degree in the biological/biomedical sciences and/or have completed appropriate technical qualifications. [2563-075 (2006) : 76]

You should be able to demonstrate • A proven track record of excellence in a related scientific field, with a PhD or other post graduate degree and a strong publication record; • An understanding of the role of science in the formulation of advice to government; • Proven management experience, preferably leading scientific projects; • An ability to lead and motivate project teams; • Excellent interpersonal and communication skills and in particular ability to communicate complex issues to a wide audience. [2567-008 (2006) : 53]

With at least six years' experience in pharmaceutical science, you should have a relevant science degree while some supervisory experience is also required. [2572-036 (2006) : 75]

You should have an excellent academic record, a degree in a numerate discipline (minimum 2.1), good communication skills, and experience in any of Java, NET, C#, C++ or C. [2576-008 (2006) : 63]

DO YOU COME HERE OFTEN? If you don’t, perhaps you should. [2537-066 (2006) : 80]

HAVEN’T WE MET BEFORE? If we haven’t, maybe we should. [2541-053 (2006) : 79]

DO YOU COME HERE OFTEN? If you don’t, perhaps you should. [2550-054 (2006) : 80]

HAVEN’T WE MET BEFORE? If we haven’t, maybe we should. [2554-081 (2006) : 88]

DO YOU COME HERE OFTEN? If you don’t, perhaps you should. [2558-077 (2006) : 90]

2009 – 247 occurrences
2 occurrences must
13 occurrences will
6 occurrences would
36 voix passive

Applicants should send a covering letter, CV and names, e-mail addresses and telephone numbers of three referees to the Institute Secretary, Thrombosis Research Institute, Emmanuel Kaye Building, Manresa Road, London SW3 6LR or email cv@tri-london.ac.uk [2689-008 (2009) : 48]

A full Curriculum Vitae (C.V.) and covering letter should be sent by paper mail to the Director, BIPM, Pavillon de Breteuil, F-923 12 Sèvres Cedex, France by 15 January 2009 quoting the reference of the job vacancy. [2689-020 (2009) : 53]

Applications should include the names of two referees who will be asked to comment upon the candidate’s suitability for the post. [2689-020 (2009) : 53]

The closing date for applications is 17h00 (Australian Eastern Standard Time) 30 April 2009. Applications should be submitted electronically to recruit@ccamlr.org [2689-022 (2009) : 54]

A copy of the application should also be sent to the Member Country contact (see the CCAMLR Website for details). [2689-022 (2009) : 54]
Applications should include a curriculum vitae with a list of publications, a concise statement of research and teaching interests, and the names and addresses (including e-mail) of at least five referees. [2689-023 (2009) : 55]

Applications should be uploaded to: http://neuroprosthetics-rec.epfl.ch [2689-023 (2009) : 55]

Candidates should forward a CV and a statement of vision for the development of the Centre for Systems Biology, Luxembourg to: Prof. Dr. Eric Tschirhart • University of Luxembourg • 162a, avenue de la Faïencerie • L-1511 Luxembourg [2689-033 (2009) : 59]

Applicants should send a CV with the names of two academic referees to Pam Smart (p.j.smart@reading.ac.uk) by the closing date of January 30 2009 indicating a preference for two projects. [2689-034 (2009) : 60]

Interested applicants should write, attaching a CV, before 23 January 2009, to one or more of the following: [2689-046 (2009) : 63]

Applications should be submitted electronically to hradmin@exeter.ac.uk. [2694-006 (2009) : 54]

Completed application forms should be returned to the above address no later than Thursday 5th March 2009. [2694-014 (2009) : 57]

Applications should be submitted electronically to hradmin@exeter.ac.uk. [2694-042 (2009) : 69]

Applications should be made to the individual universities and copied to sinapse.centre@ed.ac.uk [2694-046 (2009) : 71]

Applications for this role should be made online at http://jobs.mrc.ac.uk [2698-026 (2009) : 60]

A full job description is available and interested candidates should contact the HR Strategy & Development Manager on jwallace@abpi.org.uk. [2698-032 (2009) : 61]

Interested applicants should forward a comprehensive cv, with current salary details to: fred@howiewhite.co.uk [2698-038 (2009) : 63]

An application, electronic or single-sided hard copy, should include a curriculum vitae, publications list and contact details for three professional referees, [2698-044 (2009) : 67]

This should be accompanied by a completed form PD18 (Parts I and III) available from http://www.admin.cam.ac.uk/offices/hr/forms/pd18/, [2698-050 (2009) : 68]

and should be sent to Mrs Christine Carey, Dept. of Materials Science & Metallurgy, Pembroke street, Cambridge, CB2 3QZ, UK (cmse2@msm.cam.ac.uk). [2698-044 (2009) : 67]

An application, electronic or single-sided hard copy, should include a curriculum vitae, a publications list, contact details for three professional referees, and a statement (up to six pages) covering the applicant's research experience to date and research plans for the future. [2698-050 (2009) : 68]

This should be accompanied by a completed form PD18 (parts I and III) available from http://www.admin.cam.ac.uk/offices/hr/forms/pd18/, [2698-050 (2009) : 68]

and should be sent to Dr REM Ward, Academic Secretary, Department of Materials Science & Metallurgy, Pembroke Street, Cambridge, CB2 3QZ, UK (lectureships2009@msm.cam.ac.uk). [2698-050 (2009) : 68]

Applications with CV and the names of three referees should be sent to: The Director for Human Resources Management and Development, Room 216, Administration Building, University of Malta, Msida, MSD 2080, MALTA. [2698-069 (2009) : 75]

Informal enquiries should be made by e-mail to Kate Tettmar (kate.tettmar@nhsbt.nhs.uk). [2702-030 (2009) : 61]

Candidates should be available for interviews during mid-May 2009 at the Research Council offices in Swindon. [2702-039 (2009) : 65]

Should you require a visa to undertake paid employment in the UK, you will be required to fulfil the minimum points criteria to be granted a Certificate of Sponsorship and Tier 2 visa. [2702-047 (2009) : 67]

Applications should include a CV, publications list, contact details for three professional referees, and a completed form PD18 Parts I and III [2702-052 (2009) : 68]

Ca Further particulars, which detail the application procedure, should be obtained from http://www.cardiov.ox.ac.uk/vacancies [2728-038 (2009) : 69]

Ca Further particulars, which detail the application procedure, should be obtained from http://www.cardiov.ox.ac.uk/vacancies [2728-038 (2009) : 69]

Ca Completed applications including a full CV and a personal statement of no more than 400 words should be returned to: Admissions Office, Faculty of Science, University of East Anglia, Norwich, Norfolk NR4 7TJ [2733-051 (2009) : 78]

Ca Interested candidates should contact Professor Phil Blower, Professor of Imaging Chemistry on 020 7188 9513 or e-mail philip.blower@kcl.ac.uk [2737-028 (2009) : 66]

Co Gresham lectures attract large audiences and are also archived and made available through the internet, so candidates should have an interest in reaching a wide audience. [2689-030 (2009) : 58]

Co Applicants for this position should have a broad interest in chemistry, be self-motivated, have excellent organizational and communication skills (written and verbal), be diplomatic, flexible, familiar with text and graphics computer applications, and have an excellent command of the English language. [2694-006 (2009) : 54]
<p>| Co | Candidates <strong>should</strong> have the ability to apply standard fish stock assessment techniques and develop new approaches. [2694-014 (2009) : 57] |
| Co | Candidates <strong>should</strong> be capable of working as part of a small, dedicated team and be prepared to fill a flexible role, including participation in research cruises. [2694-014 (2009) : 57] |
| Co | You <strong>should</strong> demonstrate the ability to develop analytical strategies to help direct chemical synthesis and to influence Syngenta scientists to make best use of our analytical resources. [2694-018 (2009) : 59] |
| Co | Candidates <strong>should</strong> demonstrate: - An international reputation for scientific work on the health consequences of exposure to radiation and/or chemicals, with a solid understanding of the associated public health issues - Excellent leadership and management skills to drive motivation and continual performance improvement within highly professional teams - An ability to command credibility amongst senior stakeholders and to promote the HPA and constructively engage internal and external partners - Strong decision-making and analytical skills with a focus on delivering impressive results, innovative solutions and an ability to add to the commercial development of the Centre’s activities [2694-034 (2009) : 65] |
| Co | You <strong>should</strong> have a willingness and flexibility to work cross functionally in a team-orientated approach to support multiple functional areas. [2694-039 (2009) : 67] |
| Co | The Head <strong>should</strong> also have standing as a researcher and an academic or professional. [2698-009 (2009) : 51] |
| Co | You <strong>should</strong> be capable of communicating to different target audiences, ranging from scientists to the general public and have excellent writing skills. [2698-016 (2009) : 56] |
| Co | Proven management, leadership and team working skills <strong>should be matched</strong> by the ability to network and influence at the highest levels. [2698-019 (2009) : 57] |
| Co | Expertise in bioinformatics <strong>should be matched</strong> by significant experience of managing and delivering solutions related to high-throughput DNA sequencing and integration of large data sets to provide high utility resources and deliver novel science. [2698-019 (2009) : 57] |
| Co | A good team player you <strong>should</strong> be confident in handling existing customer accounts and have the ability to develop new business. [2698-020 (2009) : 58] |
| Co | The successful applicant <strong>should</strong> be innovative, possess good scientific knowledge and have first-rate laboratory skills and an awareness of cGMP. [2698-021 (2009) : 58] |
| Co | In addition, he/she <strong>should</strong> have excellent oral and written communication skills, be able to work within a team environment and manage their time effectively. [2698-021 (2009) : 58] |
| Co | The ideal candidate <strong>should</strong> be able to demonstrate a flexible can-do attitude [2702-022 (2009) : 56] |
| Co | The lay members <strong>should</strong> have a proven track record in patient advocacy, ethics, governance or the life sciences. [2702-041 (2009) : 65] |
| Co | Both expert and lay members <strong>should</strong> have the ability to consider complex issues around cell and gene therapies, ethics and clinical research. [2702-041 (2009) : 65] |
| Co | To be successful in this role, you <strong>should</strong> be an enthusiastic specialist in Technical Cardiology, ready to make a valued and significant contribution to the organisation, teaching and assessment of the curriculum within the School of Medical Technology. [2702-053 (2009) : 69] |
| Co | Applicants <strong>must</strong> comply with BHF residency requirements i.e. <strong>should</strong> normally be a national of the EEA. [2702-056 (2009) : 70] |
| Co | In addition you <strong>should</strong> have knowledge of modern research techniques (geological, geochemical, isotopic, mineralogical and geophysical) used in metallogenic studies. [2706-020 (2009) : 55] |
| Co | You <strong>should</strong> also have a clear understanding of performing such work to GMP standards as required by NHSBT. [2706-031 (2009) : 59] |
| Co | It <strong>should</strong> be obvious from your application that you are developing your own scientific profile. [2706-038 (2009) : 61] |
| Co | Research concepts <strong>should</strong> be interdisciplinary and integrate research methods that explore interconnections between global and regional environmental problems. [2706-038 (2009) : 61] |
| Co | non-German applicants should be prepared to learn German. [2706-038 (2009) : 61] |
| Co | The candidate should also be familiar with data assimilation, have knowledge of pedological and/or ecological processes and be willing to work as part of an interdisciplinary team. [2711-020 (2009) : 57] |
| Co | You should have drive to initiate and manage commercial contracts and research projects including liaison, negotiation, development and marketing plans. [2715-003 (2009) : 50] |
| Co | The UK North and French positions are both field based, and applicants should already reside within their required territory. [2719-005 (2009) : 48] |
| Co | Applicants should have demonstrated technical leadership skills paired with strong attention to team work, excellent communication and strategic thinking. [2719-017 (2009) : 55] |
| Co | All candidates should be fluent in English. [2719-017 (2009) : 55] |
| Co | In addition you should have an ability to learn new concepts and approaches as required, to deliver the appropriate level of service to customer/clients. [2719-020 (2009) : 58] |
| Co | Scientifically the successful applicant should participate in the soft matter research program of the Forschungszentrum Jülich. [2719-025 (2009) : 59] |
| Co | Applicants for Band 7 should be registered in Molecular Genetics with the Health Professions Council [2719-029 (2009) : 60] |
| Co | The applicant should build up an own research team within the BIO department in cooperation with existing staff. [2719-035 (2009) : 62] |
| Co | You will have a good grasp of developing funding opportunities and strategies in research councils, government agencies and the private sector and should be able to act as a forward-looking spokesperson for BGS in the area of Groundwater Science [2724-009 (2009) : 53] |
| Co | You should also demonstrate evidence of successfully developing Commissioned Research with a variety of clients, and be able to demonstrate an involvement in science and science policy through engagement with professional bodies, representation on advisory bodies, scientific evaluation boards etc. [2724-009 (2009) : 53] |
| Co | This experience should include the identification of appropriate test methods. [2724-010 (2009) : 54] |
| Co | A strategic thinker with good influencing and negotiating skills, you should be able to work as part of dynamic global teams across projects and networks. [2724-015 (2009) : 57] |
| Co | We're looking for a background in training and system deployment / exploitation and you should be fully conversant with processes that support global R&amp;D activities. [2724-015 (2009) : 57] |
| Co | Should you require a visa to undertake paid employment in the UK you will be required to fulfil the minimum points criteria to be granted a Certificate of Sponsorship and Tier 2 visa. [2724-040 (2009) : 67] |
| Co | He or she should have in-depth knowledge of science, technology and innovation (STI) systems, extensive experience in the design and implementation of performance measurements within (Dutch or European) STI policy settings, as well as indicator-based evaluations of research performance. [2724-045 (2009) : 69] |
| Co | Candidates should have international knowledge of drug development in key areas of research, such as CNS, cardiovascular and oncology. [2728-005 (2009) : 54] |
| Co | Candidates should have international knowledge of scientific research and development into food and drink formulation, manufacture and contamination control. [2728-005 (2009) : 54] |
| Co | You should have good communication, organisational and time management skills. [2728-007 (2009) : 56] |
| Co | You should also have a full clean driving licence. [2728-015 (2009) : 58] |
| Co | You should also have a full clean driving licence. [2728-015 (2009) : 58] |
| Co | In addition you should have an ability to learn new concepts and approaches as required, to deliver the appropriate level of service to customer/clients. [2728-018 (2009) : 60] |
| Co | Ideally they should have a UK Home Office Licence. [2728-038 (2009) : 69] |
| Co | You should have experience of ‘wet biochemistry’ or plant physiology. [2728-045 (2009) : 71] |</p>

| Di Ex | **You should** ideally have a Ph.D. in a relevant discipline or equivalent experience.  
[2728-033 (2009) : 67] |
| Di Ex | Applicants **should** have a Ph.D. in a relevant subject and have substantial expertise in one or  
more of the following areas: *in vivo* murine cardiac surgical models, cardiac ultrasound,  
hemodynamic monitoring, and in myocardial pathology. [2728-038 (2009) : 69] |
| Di Ex | Prospective candidates **should** have an MSc or Ph.D. with relevant experience in Protein  
Engineering, ideally directed molecular evolution. [2737-015 (2009) : 59] |
| Di Ex | Candidates **should** ideally hold a degree in a related biological science, although less  
qualified candidates with appropriate experience **will** be considered. [2737-015 (2009) : 59] |
| Di Ex Co | Applicants **should** have: • a Ph.D. in physics; • experience in surface science and vacuum  
systems; • a fluent level of spoken and written English; • ability to work in a multicultural  
environment and to maintain good working relations inside and outside the organization. [2689-020 (2009) : 53] |
| Di Ex Co | Applicants **should** have: • a Ph.D in physics or physical chemistry; • experience in laser  
spectroscopy of the gas phase; • a fluent level of spoken and written English; • ability to work  
in a multicultural environment and to maintain good working relations inside and outside the  
organization. [2689-020 (2009) : 53] |
| Di Ex Co | Candidates **should** have a Ph.D. degree (or equivalent work experience) in a scientific  
discipline relevant to research in Antarctica or the Southern Ocean; an established track record  
as a scientist and/or as a manager of scientific activities; extensive experience in international  
scientific research and collaboration; and excellent communication and organizational skills.  
[2702-015 (2009) : 53] |
| Di Ex Co | Candidates **should** have a Ph.D. degree (or equivalent work experience) in a scientific  
discipline relevant to research in Antarctica or the Southern Ocean; an established track record  
as a scientist and/or as a manager of scientific activities; extensive experience in international  
scientific research and collaboration; and excellent communication and organizational skills.  
[2702-029 (2009) : 60] |
| Di Ex Co | The Senior Principal/Consultant **will** take the lead role and **should** hold a relevant Ph.D,  
have experience of cellular therapy in a clinical environment and specific knowledge of Good  
Manufacturing Practice, immunoselection technology, cell culture, flow cytometry and in  
| Di Ex Co | You **should** have a Ph.D. or a minimum of three years postgraduate research experience and  
be a highly motivated individual, confident and fluent at presenting and communicating with  
a range of audiences. [2715-014 (2009) : 56] |
| Di Ex Co | You **should** have a good honours degree in a relevant scientific subject, preferably physics,  
and a higher science degree or equivalent experience; proficiency in computational  
programming; and experience in managing a scientific team. [2719-019 (2009) : 57] |
| E     | The quorum **will** be two members, at least one of which **should** be an independent HPA  
committee member. [2694-020 (2009) : 60] |
| E     | How **should** we restructure our economy and energy systems to combat climate change?  
[2694-055 (2009) : 74] |
| E     | Whether as part of a university, business or new research-based venture, opportunities for  
those interested in working in this area **should** not be hard to find. [2702-005 (2009) : 46-47] |
| E     | The research **should** focus on developing and emerging countries. [2706-038 (2009) : 61] |
| E     | Studies **should** focus on the effect of such a change on the epidemiology of (a) human  
disease(s) and the potential for adaptation. [2706-038 (2009) : 61] |
| E     | We welcome applications from all nationalities. Prospective candidates **should** note that this  
is not a UN post. [2724-018 (2009) : 58] |
| E     | This exciting development **should** further facilitate academic and clinical links. Guy’s and St  
Thomas' Trust is also building a new Cancer Centre to enhance research and treatment of  
patients with cancer. [2737-028 (2009) : 66] |
| Ex    | Candidate **should** have five years relevant mechanical engineering. [2689-005 (2009) : 47] |
| Ex    | Possessing a degree (or equivalent) in Physics or a related engineering discipline, the  
successful candidate **should** ideally have prior technical development experience. Recently |
<p>| Ex | qualified candidates, with the desire to develop in a fast moving commercially focussed environment, <strong>will</strong> also be considered. Knowledge of radiation and instrumentation <strong>would</strong> be beneficial. [2694-011 (2009) : 56] |
| Ex | and <strong>should</strong> preferably have experience in a similar role. [2702-022 (2009) : 56] |
| Ex | You <strong>should</strong> also have experience with sequence analysis databases including using BLAST and FASTA and the use of alignment packages such as CLUSTAL. [2702-030 (2009) : 61] |
| Ex | Applicants <strong>should</strong> have experience of java and of developing database driven web applications. [2706-013 (2009) : 51] |
| Ex | Scientifically or technically qualified, you <strong>should</strong> have at least five years of success working in a fast moving international product management and/or marketing environment. [2706-023 (2009) : 56] |
| Ex | Scientifically or technically qualified, you <strong>should</strong> have at least five years of success working in a fast moving international product management and/or marketing environment. [2706-023 (2009) : 56] |
| Ex | You <strong>should</strong> also have experience in a consultancy, academic, governmental or regulatory position where use, analysis and understanding of hydrogeological information was/is a major part of day-to-day duties. [2719-020 (2009) : 58] |
| Ex | Candidates <strong>should</strong> have 3-6 years research and/or development experience in a relevant field and ideally an understanding of ophthalmic diseases including retinal dystrophy, macular degeneration and corneal graft rejection. [2728-022 (2009) : 62] |
| Ex | Applicants <strong>should</strong> be able to demonstrate ESIA expertise in these technical fields, as well as in the sector and region. [2733-054 (2009) : 79] |
| Ex Co | You <strong>should</strong> preferably be experienced in vetting and approving agreements, negotiating terms and explaining policies and procedures, however applications from post-doctoral scientists with an appropriate aptitude who are wishing to develop a career in the management of research contracts and intellectual property are also invited. [2711-028 (2009) : 60] |
| Ex Co | You <strong>should</strong> have experience of running ecosystem experiments in field campaigns, be prepared to spend extended periods travelling to and from field sites and working at the sites with a research assistant, and be able to work effectively and efficiently as part of a team. [2724-040 (2009) : 67] |
| Ex Co | You <strong>should</strong> also have experience in a consultancy, academic, governmental or regulatory position where use, analysis and understanding of hydrogeological information was/is a major part of day-to-day duties. [2728-018 (2009) : 60] |
| Ex Co | The successful candidate for this exceptional opportunity <strong>will</strong> hold an appropriate chemistry-related qualification, <strong>should</strong> have at least five years experience within the pharmaceutical industry and be able to demonstrate a proven track-record and thorough cross-functional knowledge of relevant API production activities, including: [2733-026 (2009) : 70] |
| Ex Co | Candidates <strong>should</strong> have at least five years post-doctoral experience, a strong publications record in a relevant ecological field, experience of developing research programmes and a desire to work collaboratively to tackle complex research issues. [2737-008 (2009) : 56] |

Here is a random selection of 100 solutions from the 1470 found.

**Verbe**

Verbe avec le sens "to send / to deposit"

**A0E** 480 More recently, he adapted David Lodge's SMALL WORLD for Granada and UPLINE for Zenith.

**A0E** 526 David Lodge illustrates this fact from his own experience of adapting his novel NICE WORK, as a drama serial for BBC2.

**A15** 121 The future of Mar Lodge, which includes three of Britain's five highest mountains, was also raised in an adjournment debate in the House of Commons by Labour MP Tam Dalyell.

**A1A** 474 To quote Lodge again, ‘instead of having desperately to defend the possibility of a fixed or stable meaning in isolated utterances, we can cheerfully accept that meaning exists in the process of intersubjective communication, since no utterance ever is truly isolated.’

**A1A** 71 My main reservation about the book, which is more evident to me now than when it first appeared, is that Lodge has too direct and univocal an understanding of the elusive concept of ‘literature’.

**A25** 20 INTERVIEW / Industrious relations: Novelist David Lodge talks to Mark Lawson about the television version of his latest book Nice Work

**A67** 141 Wexford House has demonstrated that the Eagle Lodge concepts should be a success.

**AB4** 120 It was built by Lord Williams of Thame in 1540 as a hunting lodge beside the once busy Roman road from Dorchester to Bicester.

**ABK** 1688 His more startling assertion in a long television interview last week that some members of the banned P2 masonic lodge were also ‘patriots’ brought Mr Cossiga within a hair’s breadth of provoking a constitutional crisis.

**ACR** 2824 The Same Antares 130 plus Gem sprayer on Bob, Chris and John Germany's Lodge Farm, Norwell near Newark, Notts.

**ADM** 1789 A large iron gateway sagged permanently open, beside a lodge house and a cattle grid.

**ADM** 643 The Guinness family, the last owners of the estate, had also built a fanciful fishing lodge beside the castle.

**AHB** 769 Though unarguably a large property — with 11 bedrooms, three staff cottages and a gate lodge — Stackallan retains the atmosphere of a family house.

**AK2** 1233 In Belfast, George Patton, executive officer of the Grand Orange Lodge of Ireland, says: ‘The battle marked a turning point and brought great benefits to these islands.

**AK4** 660 One of his most significant points is that Mozart chose to join a Roman Catholic masonic lodge when the Pope had banned freemasonry.

**AKY** 525 Lt-Col Lodge and 30 members of the British advance party will depart by air for Belgrade and then travel to the British headquarters in Zagreb next week, with the main contingent travelling by sea in early May.

**APC** 979 ‘Take your own pace back to the lodge,’ Chris said and marched off, a slight figure in butchered jeans and a torn striped shirt like a huge smock; a long feather of hair down his neck.

**APS** 211 All these combinations, recent and current, suggest the continuing validity of the picture of British fiction David Lodge presented in 1971.

**APS** 212 In his essay ‘The Novelist at the Crossroads’, Lodge sees most British authors hesitating between, or combining in a variety of ways, the possibilities of a main road of tradition —‘the realist novel…coming down through the Victorians and Edwardians’ — and alternatives offered by modernism and the developments that have followed it (Lodge 1971: 18).

**AR3** 88 But then there is one lounge suit, passed on to me in 1931 or 1932 by Sir Edward Blair — practically brand new at the time and almost a perfect fit — which might well be appropriate for evenings in the lounge or dining room of any guest houses where I might lodge.

**AS7** 1817 Indoors as well, because Tom and his wife Ray run one of the most comfortable and welcoming holiday centres in the north, the Birchbank Activity Holiday Lodge at Elphin.

**ASN** 2200 There was a bell-pull connected up to a small porter's lodge inside.
B2G 1206 Grand Lodge are appalled by the often-used argument that modern freemasonry was founded by middle-class gentlemen who wanted a secret society to study alchemy and the occult.

B2G 1235 I also have its organisation flow up to 1969 when many OTO lodge members were arrested and sentenced for child abuse in California.

B2G 1254 Even as late as 1984, the Revd Francis Heydon, the then Third Grand Principal of Grand Lodge, gave this interpretation.

C8D 1148 When he heard of the murder this morning, he was terrified of being questioned, imagining that Vera would somehow get to hear that he'd spent the night at the Lodge — especially if he was detained.

C8D 1627 As they drove back to Randall Lodge, the afternoon sun still shone mockingly bright.

C8D 2285 She swung round rather abruptly, and recognised the young man as one of the detective constables who had been haunting the Lodge all day.

C8D 938 We'll have our work cut out here taking statements from every person in this Lodge — the fingerprint boys will be after them, too.

CBC 13884 Friends from the masonic lodge whose Master he had been.

CC6 282 Jack was offered voluntary redundancy in late August and it was confirmed that there was suitable accommodation at the Kings Lodge base.

CEN 925 Suzanne's mother, Mrs Rosemary Lodge, 39, pleaded with a Cardiff Crown Court judge yesterday not to jail Coombes.

CF9 1009 In the semi-finals Walton B play Green Lodge D, and Saints face Brotherhood I.

CHJ 860 It's good to see some sound sense being talked about the Mar Lodge estate controversy by the John Muir Trust, fast becoming one of the foremost environment bodies in Scotland.

CHK 1517 After dropping down towards Affric Lodge a good track follows the loch shore back to the car park.

CHK 1531 From the Bruce's Stone the public road is followed until Glen Trool Lodge.

CHK 1532 Its grounds are private and to the west of the lodge the trail leaves the road to cross Kenmure Moss.

CK4 837 I'm sitting up on a hillside looking down on Lollapalooza, by a ski lodge which is shut down for the summer.

CK5 1976 The Silence Of The Lambs director Jonathan Demme and screenwriter Ted Tally are preparing an unlikely adaptation of David Lodge's Midlands college — and-factory novel Nice Work, already filmed by ITV.

CK9 2331 Not in the lodge; it is a very nice, large house.

CKN 942 Amis's Lucky Jim is something other; so is William Cooper's Struggles of Albert Woods (1952), written in slapstick vein by a follower of Snow's; so is Angus Wilson's Anglo-Saxon Attitudes (1956) and a fistful of novels soon after by David Lodge and Malcolm Bradbury, both of them professors of English in civic universities.

E9P 505 The day-time surgeries in Suffolk and Essex are at: Thursday, April 15, Cedars Hotel, Stowmarket; Tuesday, April 27, Severals Hotel, Newmarket; Thursday, April 29, Butterfly Hotel, Colchester; Friday, April 30, South Lodge Hotel, Chelmsford; Monday, May 10, Severals Hotel, Newmarket.

E9P 818 Opponents to the opt-out now have a chance to lodge objections to the Education Secretary.

EC9 589 YORK LODGE PRIVATE HOTEL

EWA 204 As to tenet (iii), Lodge cites the case of Hardy, who has figured in criticism as "a great novelist" in spite of "gross defects" , including the "capacity to write badly" .

EWA 209 In keeping with this thesis, Lodge is prepared to see no difference between the kind of choice a writer makes in deciding to call a character dark or fair, and the choice between synonyms such as dark and swarthy.

F8U 481 The one is in the corridor that goes from the porter's lodge to the stairs up to.

FA2 969 Luz is unquestionably a town it would be pleasant to lodge in.

FEM 340 His apartment was decorated like a hunting lodge.

G17 2398 If Sidacai cared to lodge a formal complaint, the jailers would suffer punishment.

G37 1354 Twenty-six-year old Mark Lodge, a suspended ceiling fitter from Canvey Island, also saw it.
Two applications in respect of the same premises may be heard together, even if one is by a new applicant and the other is not. Such a situation arises, for example, when the present licence-holder and a person claiming, with the owner's consent, to be a new tenant or occupant, both lodge conflicting claims for renewal.

She died of cholera 2 August 1834 at her husband's home, Woodford Lodge.

The stylistic evidence of drawings and documented buildings, supported by patronage links and geographical proximity, enable a number of other houses to be attributed to him, including Bärborough Hall, Derbyshire; Doddington Hall, Lincolnshire; Worksop Manor Lodge, Nottinghamshire; Fountains Hall, Yorkshire; and Wootton Lodge, Staffordshire.

Meanwhile, in the Office of Works he was in 1727 appropriately appointed to the new post of clerk of the works at the White Lodge, doubtless through the influence of Herbert; while in 1734 he was made master carpenter to the Board of Ordnance, a lucrative preferment which he undoubtedly owed to John Campbell, second Duke of Argyll [q.v.], who was then master-general of the Ordnance.

I have just bought David Lodge's splendid The Art of Fiction and there, on the verso page with the usual fruit-salad of publisher and ISBN, is something new, a statement with a line all to itself, isolated but defiant.

For a time, when she first took to the seclusion of the Lodge, days had been wasted in a sort of restless grief, but it had passed, resentment fell away, and gradually he found his way back into his own strength.

Had it not been for the ignorant impetuosity which demanded the Lodge as the most appropriate environment for her work, the truth might have continued to elude them.

So well had her work progressed at the Lodge, and so greatly — for all the discomfort — had she enjoyed her solitude, that Louisa momentarily tried defiance; but she was shivering uncontrollably even as she did so.

He paused for a while to compose himself then staggered down to the porter's lodge.

Sarah Osborne (left) and Amanda Lodge (right), from the Colchester Institute, are pictured with their tutor Martin Fordham (second right) and chef Anton Mosimann after being named winners of the Nestlé Food Service 1993 Toque d'Or competition.

Here is a random selection of 50 solutions from the 1470 found.

She had been, before her second marriage a few years ago to Mr Alderley, Baroness to Lord Switham, who owned all the land round about, with the exception of Merchiston Lodge and other hunting boxes in the vicinity belonging to various members of the haut ton.

'This is the last will and testament of Lavinia Dorothy, Lady Merchiston of Merchiston Lodge, Switham, Leicestershire.'

In addition to the agreed sum of her own portion, all my jewellery, all the silver and plate, and any items of furnishing she wishes to remove from Merchiston Lodge, which property itself she may not have.'

But Benedict cared only for Merchiston Lodge and the money.
solicitors acting for the other party, together with a Court of Session process in terms of Rule of Court 20.

HTJ 1630 The Rolls drawn up in front of Prince's Lodge was evidence that they had arrived.

HUY 123 Had there ever been a a feeling amongst the members of the lodge that erm that with this in increasing involvement with outsiders, the local M Ps, the ministers of religion, the er Transport and General Workers' Union, et cetera, as well as coverage by H TV and the B B C that there would be a kind of accumulation of pressure and you would they would give in?

HUY 134 You know sure there were committees to manage either financial affairs, or various other bits and pieces that went on, but even then decisions they took were taken to the lodge to be voted on.

HUY 76 Erm, we called a lodge meeting before the annual leave, annual shutdown, and in that lodge meeting all three quarries agreed to go on a work to rule as from the resumption of work, which is second week of August.

J79 1044 If the lessor's title is already registered as absolute, this is a simple matter—but remember to have in the contract for sale or your requisitions on title, a special condition that before or immediately after completion the lessor will lodge or cause to be lodged in the Registry the land or charge certificate of his title, and will furnish the buyer with the deposit reference.

J79 1232 It's desirable to lodge at the District Registry an approved estate plan (two copies); searches by individual buyers can then be made by reference to the plot number alone.

J79 890 Lodge in District Land Registry under Land Registry Cover A4 with the prescribed fee.

JY6 1261 He was carrying a huge wicker basket, provided by the lodge for ‘tea’.

JY6 167 He was sitting on the balcony of Room 302 at the Anpetuwi Lodge, and he was snorting smoke...'

JY6 370 ‘I'll be back in an hour to take you down for a tour of the lodge and to meet Mrs Foster.

JY6 3730 ‘You can't leave the lodge in the lurch like that, Charity,' Mandy told her sternly.

K1B 1515 When Alice Hyde came out of the Broadward Lodge Elderly Peoples home in Leominster today, there was a surprise waiting.

K2F 190 Matthew Patterson, from the Railway Gate Lodge, Castle Road, Antrim and his daughter, Joy, of Oriel Park, were found guilty of having pit bull terrier type dogs and not having dog licences for the animals.

K4S 208 BR did not lodge a defence until it was too late and judgement had been made.

K4V 2680 Six years on, the family moved to Ugthorpe Lodge on the Whitby moors, a hotel with caravan site and smallholding where Mr Chance also had stables and where he involved himself with the Goathland Pony Club.

K55 2408 Heather Countley dialled 999 at 12.35pm a minute after the car accident involving her son outside her home at Peghorn Lodge, Harwood-in-Teesdale, near Barnard Castle.

K59 3001 Emphasise that you have property to lodge as security, if necessary.

K5D 11441 More than £650,000 has been spent converting part of Queen's Bay Lodge in Milton Road East, into new headquarters for the Church's board of social responsibility.

K97 1201 ATTENDANCE: 20,941 REFEREE: S.J. Lodge

K97 13040 The Commons motion states that Mr Sainsbury and David Charles Jones are senior partners in the same Cardiff accounting practice and both are members of the same Masonic lodge of which the minister is Chief Steward.

KAA 179 Finally, good wishes for a quick return to health to Audrey Foster, Hilda Lodge and Doris Patten, who have all been in hospital.

KAD 14 On a very cold afternoon in February the then Vice-Chairman Hilda Lodge, accompanied by Hilda Hewitt and Pauline Kenward, planted a tree in memory of our Founder and First President, Molly Braithwaite.

KAE 67 Finally the Meeting was brought to a close by the new chairman, Hilda Lodge, who made a presentation on behalf of the Society to June Bascombe in recognition of all her hard work over the last four years.
Annexe 8-1  
Occurrences de (AL)THOUGH dans CAEMS  

1971

1. Althought not essential, previous experience in Pharmacology or Biochemistry would be desirable. [733-014 (1971) : 39] expérience

2. The research workers in the three Departments will work as a team, though the project has been sub-divided to give each Department a particular responsibility. [733-035 (1971) : 42] recherche

3. Ideally applicants will be in their early / middle twenties with 1 or 2 years practical experience in the above techniques, although new graduates will also be considered. [733-038 (1971) : 42] expérience

4. Applicants should have a special interest in the Taxonomy of either algae or insects, though Taxonomists with interests in other groups will be considered. [733-039 (1971) : 42] formation

5. Knowledge of COBOL is desirable, although applicants with FORTRAN or ASSEMBLER will be considered provided they have disk or tape experience. [733-048 (1971) : 43] formation

6. Applicants should have a good working knowledge of electronics, preferably though not necessarily with experience of r.f. transmission. [737-018 (1971) : 278] expérience

7. Althought not essential previous experience in the field would be desirable. [750-015 (1971) : 355] expérience

8. Previous experience with the crop, particularly for the plant breeder, would be desirable though not essential. [750-027 (1971) : 356] expérience

9. Althought based in the United Kingdom, the successful applicant would be expected to make periodic visits to the Antarctic to supervise the work of young scientists in Field Stations. [754-025 (1971) : 600] contrainte mobilité

10. Applicants may be either male or female, and although academic qualifications would be desirable, previous experience in a sub-editorial department is more important. [758-027 (1971) : 52] formation

11. Althought based at Aberdeen, the duties will occasionally require periods of duty at sea on research or commercial fishing vessels. [767-012 (1971) : 542] contrainte mobilité

12. The problems arising involve linear algebra and real and complex analysis, and the person appointed should have some familiarity with these fields, although a degree is not essential. [767-018 (1971) : 543] formation

13. Candidates, aged 35 to 45, should ideally be graduates in chemical engineering or engineering although qualifications in chemistry, physics or textiles would be considered. [772-012 (1971) : 53] formation

14. Previous editorial experience, though desirable, is not essential, as training will be given. [774-006 (1971) : 188] expérience

15. Experience in either fracture, plastic deformation or X-ray diffraction though not necessarily in the field of polymers would be an advantage. [774-014 (1971) : 189] expérience

16. An experience of analytical chemistry is essential and a pharmaceutical qualification, although not essential, would be an advantage [774-032 (1971) : 190] expérience
1. A Ph.D. or a similar background in genetics is highly desirable, although applicants with other relevant experience and skills (BMSU management, transgenic and SPF work) will also be considered. [1959-076 (1995) : 63] expérience

2. Applicants will be expected to have completed a Ph.D., although those with a suitable industrial background will also be considered. [1959-091 (1995) : 66] expérience

3. Although this post is on a clinical scientist grade, applications are welcomed from individuals with a good honours degree in a scientific or social scientific discipline. [1963-026 (1995) : 56] formation

4. To qualify you will have research experience in palaeolimnology at the Master or Doctoral level, although a good honours degree and relevant experience will also be considered. [1963-039 (1995) : 59] formation expérience

5. For appointment to Grade C, candidates should have at least BTEC or an equivalent qualification, although higher qualifications would be desirable, and more than 3 years’ relevant experience. [1963-057 (1995) : 63] formation expérience

6. Excellent communication skills are necessary and some administrative experience although not essential, would be advantageous, as would some experience of managing units. [1963-075 (1995) : 67] compétences expérience

7. The successful applicant will probably already have had some research experience and may have recently completed their doctorate, although candidates with their relevant skills may also be considered. [1963-080 (1995) : 68] compétences

8. Duties will cover all laboratory aspects of IVF including embryo cryopreservation and ICSI. Previous IVF experience is preferred although training will be available. [1967-075 (1995) : 83] formation

10. You will contribute to the delivery of the routine clinical service, though some participation in research activities may also be possible. [1971-075 (1995) : 78] recherche

11. Research on all classes of such products will be considered although the potential for significant wealth creation will be a key criterion for selection. [1976-058 (1995) : 77] contrainte commerciale

13. Although employed via the Oxford Radcliffe Hospital NHS Trust, this post is based at Wexham Park Hospital, and involves the supervision of their Immunology laboratory service to clinicians within the Heatherwood/ Wexham Park Trust and other clinicians including general practitioners in Berkshire. [1980-013 (1995) : 58] contrainte mobilité

14. The studentships are open to all candidates although candidates will be expected to show a record of academic achievement and be highly motivated. [1980-028 (1995) : 62] contrainte formation contrainte recherche
15. Although we would be particularly interested in seeing research done in some of the many fundamental geochemical processes relevant to contaminant hydrogeology, this is not a necessary qualification. [1980-039 (1995) : 66] contrainte recherche

16. Expertise in chemometrics would be highly advantageous although applications from any numerate, computer literate analytical chemists are invited. [1980-063 (1995) : 71] formation

17. Although relevant experience would be an advantage, we welcome applications from enthusiastic and motivated graduates who are newly qualified. [1980-076 (1995) : 74] expérience

19. The post holder will be expected to contribute the full range of procedures carried out in a busy diagnostic laboratory, although training may be given where necessary. [1980-107 (1995) : 81] formation

20. Although the field of research is open, especial consideration will be given to established research workers in 'basin and sediment studies' or 'fluid rock interaction and fluid processes' or 'geomicrobiology'. [1984-006 (1995) : 52] recherche

21. Although cells may be thus committed, the overt demonstration of their fate, ie differentiation, may not be apparent until a later stage. [1984-066 (1995) : 71] ne concerne pas RH

22. Ph.D. or equivalent experience is generally required, although there are also opportunities for postgraduate research workers. [1984-082 (1995) : 74] formation recherche

23. The position is based at York, although there will be some travel to Loughborough. [1984-091 (1995) : 76] contrainte mobilité

24. Applications are invited from candidates with experience in clinical research, although consideration will also be given to new graduates and those with a nursing background, as training will be given. [1984-102 (1995) : 78] formation

25. Although the student will be based at The University of Edinburgh and under the direction of Dr J R Underhill, the Project is collaborative with Dr R L Gawthorpe at The University of Manchester. [1989-016 (1995) : 62] contrainte mobilité

26. Previous publishing experience together with a familiarity with TEX would be useful, although full training will be given. [1989-111 (1995) : 85] formation

27. There is some formal teaching although the training is primarily laboratory-based. [1993-018 (1995) : 56] formation

28. Previous experience particularly with micro-injection and manipulation methods would be an advantage, although full training would be given to candidates without suitable experience including sessions in the University Seminology Laboratory and Regional Cytogenetics Centre. [1993-066 (1995) : 70] formation

29. Although the post-holder will be a physical scientist, the emphasis of the post will be on working with a range of disciplines such as nutrition, microscopy, mathematical modelling and biochemistry. [1993-078 (1995) : 73] contrainte formation
30. These positions will require at least a Ph.D. or equivalent experience in molecular biology, mammalian cell culture, and/or protein manipulation, although post-doctoral training would be an advantage. [1993-086 (1995) : 75] formation

31. Training will be available although previous experience and a degree level qualification in biological sciences will be an advantage. [1998-046 (1995) : 87] contrainte formation contrainte expérience

32. Experience in mammalian embryology is an advantage although full training will be given. [1998-067 (1995) : 92] formation

33. Prior experience of developing software in Microsoft ACCESS is desirable, although candidates with experience of developing applications in other Windows relational database packages or in Visual Basic may apply. [1998-086 (1995) : 97] expérience

34. Experience of tissue culture and Agrobacterium transformation is also desirable although training in this aspect could be given. [1998-093 (1995) : 99] formation

35. Although based in the haematology section you will have the opportunity to rotate to the haemostasis and blood transfusion sections. [2002-033 (1995) : 65] expérience

36. Excellence in research and the ability to rapidly establish a research programme are the primary criteria for appointment, although an interest in pharmaceutical or medicinal chemistry would be an advantage. [2002-075 (1995) : 77] compétences

37. Experience of nucleic and acid fingerprinting methods would be advantageous although training will be given. [2002-078 (1995) : 77] formation

38. Applicants are invited for a Lectureship in Organic Chemistry, available from 1 February 1996 or as soon as possible thereafter (although 1 October may be considered appropriate). [2002-084 (1995) : 79] date de début

39. Your experience in Quality Assurance, ideally, although not exclusively, gained from within a crop protection environment, will ensure that you have the technical credibility to win the support and commitment from your colleagues. [2006-058 (1995) : 77] contrainte expérience

2005

1. A graduate or equivalent in chemistry, biochemistry or a related subject, you will preferably have practical experience of GMP manufacturing, although applicants with a directly relevant qualification will be considered. [2481-025 (2005) : 60] formation

2. Experience in developing and running randomised control trials, although not essential, is highly desirable. So too is a postgraduate research qualification. [2481-029 (2005) : 61] expérience

3. Although the vacancies offered have no formal management responsibility, some of the positions offered in the Radioactive Substances Policy Unit may have responsibility for the supervision of others in the Unit. [2481-033 (2005) : 63] contrainte poste

4. The fact remains, though: whatever your background, this will challenge you. [2485-029 (2005) : 67] publicité poste

5. Although a biologist would be preferred someone with a chemical background with a sound knowledge of generation of intellectual property would also be considered. [2485-039 (2005) : 71] formation
6. The ideal candidate will have at least three years industrial experience as an electrophysiologist, although other disciplines will be considered. [2485-039 (2005) : 71] formation

7. One objective of this group is to generate scientific information on the aetiology and prognosis of bladder and prostate cancer, although new studies in the field of paediatrics are at hand. [2485-092 (2005) : 88] adversatif

8. The successful candidates will be anticipated to commence on 1 September 2005 (though this is negotiable) and will be paid a stipend of £10,000 p.a. (tax free). [2485-114 (2005) : 93] date de début

9. You’ll have a PhD in a biological subject, with extensive experience of molecular biology and mammalian cell culture, knowledge of skin biology, although not essential, would be highly desirable. [2489-013 (2005) : 64-65] expérience

10. The posts are part-time and voluntary, although modest travel and subsistence costs are met and attendance and preparation fees paid. [2489-018 (2005) : 67] compensation financière

11. To be successful in these roles, you will have a minimum of an honours degree in Chemistry or a related subject, although a MSc/PhD would be a definite advantage, as would experience in the analysis of APIs and/or drug products within the healthcare industry. [2489-022 (2005) : 69] contrainte formation

12. Experience of nano or capillary HPLC systems would be an advantage, although training will be provided. [2489-023 (2005) : 69] formation

14. You should have 1-6 years' post BSc experience and, although not essential, some exposure to synthetic development gained in an industrial setting would be preferred. [2493-008 (2005) : 57] expérience

15. If you have experience in immunoassay, IVD development, IVD systems engineering and clinical chemistry we would like to hear from you, although applications from other disciplines will be considered on merit. [2498-012 (2005) : 54] formation

16. You should be educated to degree level in a relevant scientific subject (i.e. biomedical, biology, biochemistry) with three to five years relevant work experience, ideally within the area of drugs of abuse testing, although this is not essential. [2498-026 (2005) : 59] formation expérience

17. All appointments will be for two years, although may be renewable for a further year, subject to funding. [2498-062 (2005) : 72] contrainte durée poste

18. Experience in the field of Mass Spectrometry and related techniques, such as vacuum technology or other scientific instrumentation, would be an advantage although not essential. [2502-036 (2005) : 67] expérience

19. An understanding of pharmacology and radiobiology and practical experience in molecular biology techniques would be an advantage although training will be given. [2502-057 (2005) : 73] formation

20. PhD students may enrol at any time during the year although most studentships commence in either October or February. [2502-069 (2005) : 77] date de début

21. Overseas travel will account for about 25% of their time, although this is variable. [2506-019 (2005) : 61] contrainte mobilité
22. An ability to plan and prioritise work and meet deadlines is vital, a knowledge of the use of animals in research and the 3Rs is important and a PhD is desirable, although not essential. [2511-018 (2005) : 57]

23. Previous experience within the pharmaceutical industry, although useful, is not essential. [2511-023 (2005) : 59]

24. Fluency in French is highly desirable, although a sound knowledge of the language and a willingness to study it further would be considered. [2515-009 (2005) : 57]

25. PET imaging can detect the presence of disease earlier than conventional imaging methods and, although in its infancy here, is widely used in Europe and the USA. [2515-026 (2005) : 65]

26. Any exposure to in vivo inflammatory models - particularly respiratory models - would be an advantage, although full training will be provided. [2515-033 (2005) : 67]

27. Applicants should ideally hold a life sciences degree or equivalent MLSO qualification (although training will be given in immunoassay and liquid handling). [2515-038 (2005) : 69]

28. You are therefore expected to have recent relevant experience in immunology, preferably to MSc or PhD level, although this is not essential, together with an excellent grasp of English language and grammar. [2515-059 (2005) : 75]

29. Copy-editing experience would be a bonus, although we will provide full training. [2515-059 (2005) : 75]

30. You will be based at Imperial's Silwood Park Campus although will work closely with the Museum and Kew. [2515-075 (2005) : 80]

31. Please note that eligibility for full funding (tuition fees and stipend) is restricted to UK students only although EU citizens will be eligible for payment of fees. [2515-083 (2005) : 82]

32. Knowledge of electronics is desirable although not essential. [2519-061 (2005) : 74]

33. Although the post will be based at the MRC Clinical Trials Centre, London, the postholder would be expected to occasionally travel to Africa. [2524-011 (2005) : 56]

34. You will need experience in explosives engineering and technology, although relevant experience in weapons technology, electronics or mechanical engineering will be considered. [2524-045 (2005) : 66-67]

35. Experience in anti-cancer drug discovery would be very useful, although job specific training will be provided. [2524-060 (2005) : 74]

36. Both positions are research focussed although you will provide up to 20% of your time to the development and delivery of the Department's evolving teaching provision. [2524-067 (2005) : 76]

37. Scientist with MSc/PhD in Cellular or Molecular Biology, ideally familiar with ELISA and Elispot Assays, although training can be given. [2528-031 (2005) : 72]

38. Some experience in project management database design, programming or GIS would be a distinct advantage although training will be provided where necessary. [2528-040 (2005) : 75]
39. In vivo modeling experience is necessary, while in vitro experience would be an advantage though is not essential. [2528-043 (2005) : 77] expérience

40. A background in drug safety, although useful, is not essential: we are also interested in candidates with in-depth knowledge of drug development gained through other disciplines such as clinical research regulatory, or pharmacology. [2528-045 (2005) : 77] formation

41. Teaching experience at postgraduate level would be an advantage, although depending on experience, you may be required to complete and pass the Post Graduate Certificate in Learning, Teaching & Assessment in Higher Education, run internally by Cranfield University. [2528-056 (2005) : 83] contrainte expérience

42. Previous research experience in embryology or implantation is desirable, though not essential. [2528-065 (2005) : 86] expérience

43. PhD students may enrol at any time during the year, although most studentships commence in either October or February. [2528-081 (2005) : 90] date de début

2006

1. Any exposure to in vivo inflammatory models would be an advantage, although full training will be provided. [2533-019 (2006) : 51] formation

2. Note: Although current funding expires in September 2007, subject to a successful quinquennial review by CR-UK in 2006, it is anticipated that the post will continue beyond this. [2537-010 (2006) : 60] contrainte durée poste

3. A relevant first degree is required, although a PhD is desirable for the HE roles. [2537-018 (2006) : 64] formation

4. You will possess a PhD in genetics, genomics or other related area with at least three years' relevant research experience, although candidates with an MSC and at least five years' research experience will also be considered. [2537-036 (2006) : 70] formation expérience

5. You should have experience of working as part of an interdisciplinary team, ideally gained in an industrial environment. Salaries will be in the RA1A skill range, although for appropriately experienced individuals higher rates may be negotiable. [2537-065 (2006) : 80] salaire

6. You will possess a postdoctoral qualification in a relevant biomedical science and preferably have some experience of whole-animal integrative physiology and Pharmacokinetics although full training will be provided. [2537-073 (2006) : 83] formation

7. Although registered through UK Universities as indicated above students will usually be based in Aberdeen. [2537-084 (2006) : 86] contrainte poste

8. The appointments are currently unpaid although necessary expenses will be reimbursed. [2541-018 (2006) : 65] compensation financière

9. Experience of transfusion practice and/or theatre work would help, although training will be given. [2541-043 (2006) : 76] formation

10. The posts are part-time and voluntary, although modest travel and subsistence costs are met and attendance and preparation fees paid. [2541-047 (2006) : 77] compensation financière
11. Previous experience of accelerator physics, although welcome, is not essential; [2541-062 (2006) : 81] expérience

12. Practical experience in molecular biology would be an advantage, although full training will be given. [2541-067 (2006) : 83] formation

13. That's something else of which we are very proud. Because it is not just about Nobel prize-winning scientists – although we've had our share of them. [2545-004 (2006) : 56-59] publicité entreprise

14. The ideal candidate should possess an honours degree in a biological science plus previous experience in a relevant discipline (although recent graduates will be considered). [2545-017 (2006) : 64] expérience

15. PET imaging can detect the presence of disease earlier than conventional imaging methods and, although in its infancy here, is widely used in Europe and the USA. [2545-028 (2006) : 70] ne concerne pas RH

16. Full training will be provided in all roles although proven practical laboratory skills will be considered an advantage, together with an understanding of Good Laboratory Practice and Good Manufacturing Practice. [2545-032 (2006) : 72] compétences

17. Experience with silicones and or optical coatings would be an advantage though not essential. [2545-047 (2006) : 78] expérience

18. Experience working in a high throughput environment would be an advantage although full training will be given. [2545-051 (2006) : 80] formation

19. Experience in working in a high throughput environment would be an advantage although full training will be given. [2545-051 (2006) : 80] formation

20. Any exposure to in vivo inflammatory models would be an advantage, although full training will be provided. [2533-019 (2006) : 51] formation

21. Note: Although current funding expires in September 2007, subject to a successful quinquennial review by CR-UK in 2006, it is anticipated that the post will continue beyond this. [2537-010 (2006) : 60] contrainte durée poste

22. A relevant first degree is required, although a PhD is desirable for the HE roles. [2537-018 (2006) : 64] formation

23. You will possess a PhD in genetics, genomics or other related area with at least three years' relevant research experience, although candidates with an MSC and at least five years' research experience will also be considered. [2537-036 (2006) : 70] formation expérience

24. Salaries will be in the RA1A skill range, although for appropriately experienced individuals higher rates may be negotiable. [2537-065 (2006) : 80] salaire

25. You will possess a postdoctoral qualification in a relevant biomedical science and preferably have some experience of whole-animal integrative physiology and Pharmacokinetics although full training will be provided. [2537-073 (2006) : 83] formation

26. Although registered through UK Universities as indicated above students will usually be based in Aberdeen. [2537-084 (2006) : 86] contrainte poste
27. The appointments are currently unpaid **though** necessary expenses will be reimbursed. [2541-018 (2006) : 65] compensation financière

28. Experience of transfusion practice and/or theatre work would help, **although** training will be given. [2541-043 (2006) : 76] formation

29. The posts are part-time and voluntary, **although** modest travel and subsistence costs are met and attendance and preparation fees paid. [2541-047 (2006) : 77] compensation financière

30. Previous experience of accelerator physics, **although** welcome, is not essential; [2541-062 (2006) : 81] expérience

31. Practical experience in molecular biology would be an advantage, **although** full training will be given. [2541-067 (2006) : 83] formation

32. That's something else of which we are very proud. Because it is not just about Nobel prize-winning scientists – **although** we've had our share of them. [2545-004 (2006) : 56-59] publicité entreprise

33. The ideal candidate should possess an honours degree in a biological science plus previous experience in a relevant discipline (**although** recent graduates will be considered). [2545-017 (2006) : 64] expérience

34. PET imaging can detect the presence of disease earlier than conventional imaging methods and, **although** in its infancy here, is widely used in Europe and the USA. [2545-028 (2006) : 70] ne concerne pas RH

35. Full training will be provided in all roles **although** proven practical laboratory skills will be considered an advantage, together with an understanding of Good Laboratory Practice and Good Manufacturing Practice. [2545-032 (2006) : 72] contrainte compétences

36. Experience with silicones and or optical coatings would be an advantage **though** not essential. [2545-047 (2006) : 78] expérience

37. Experience working in a high throughput environment would be an advantage **although** full training will be given. [2545-051 (2006) : 80] formation

38. Experience in working in a high throughput environment would be an advantage **although** full training will be given. [2545-051 (2006) : 80] formation

39. It is intended that the appointment should take effect as soon as possible, **although** there is some flexibility in order to secure the most effective Director. [2545-063 (2006) : 84] date de début

40. For example, Swiss scientists can compete for funding from the European Union's Framework programmes for research, even **though** Switzerland is not an EU member. [2550-006 (2006) : 56-57] ne concerne pas RH

41. **Although** Basel is Switzerland's third largest city, and the work ethic - as in the rest of the country - is strong, the pace of life is relaxed, says Metcalfe. [2550-006 (2006) : 56-57] ne concerne pas RH

42. Applicants should have a flair for organic chemistry and enjoy problem solving. Ideally, applicants should hold a PhD in Chemistry, **although** graduates with relevant experience will also be considered. [2550-034 (2006) : 73] expérience

43. Turley's career so far is impressive by anyone's standards. It has been no easy ride, **though**. [2554-001 (2006) : 58-59] ne concerne pas RH
44. It can be a challenge to get on the ladder, though, says Paul Seeley of recruitment agency Eden Recruitment, as employers often want people with years of experience under their belt (New Scientist, 3 September 2005, p 52). [2554-001 (2006) : 58-59] ne concerne pas RH

45. Software packages such as FPC, Oracle based tracking tools and web interfaces will be used and although training will be provided, some experience using tracking databases would be desirable. [2554-034 (2006) : 72] formation

46. Experience in chemical and biological warfare defence, arms control (especially the Chemical Weapons Convention) or expert controls would naturally be useful, although full training is available. [2554-035 (2006) : 72] formation

47. Part-time hours (approximately 7.5 per week) would preferably be two half days per week, although there is some flexibility in the hours worked. [2554-052 (2006) : 80] temps de travail

48. You may have experience of preparing PPE and/or Medical Device Technical Files and product certification, although full training will be provided. [2554-057 (2006) : 81] formation

49. Applications are accepted for UK, EU and international students, though restrictions may apply to one or more of the projects. [2554-092 (2006) : 91] contrainte nationalité

50. University applications for some subjects have dropped by as much as 30 per cent in recent years, the Higher Education Funding Council says. It's not all bleak, though. [2558-004 (2006) : 58-59] ne concerne pas RH

51. All posts will be predominately research, although some teaching at both undergraduate and postgraduate levels will be required. [2558-010 (2006) : 63] contrainte poste

52. This post, which will use high throughput technologies such as SELDI-ToF, may suit a Scientist in biological sciences, though this opportunity may appeal to a Scientist who has an interest in developments in functional genomics. [2558-016 (2006) : 64] compétences

53. Although full training will be given, previous experience in cellular physiology would be a distinct advantage. [2558-016 (2006) : 64] formation

54. All of the roles will be broad, though there will be particular focus on the continued development of novel materials and processes, the build and testing of prototype systems and product planning. [2558-049 (2006) : 80] contrainte recherche

55. A higher degree and/or state registration is desirable, although a solid general scientific knowledge combined with a logical and enquiring mind is considered most essential. [2563-047 (2006) : 64] contrainte compétences

56. Walport is open to ideas, though he warns against simplistic measures. [2567-002 (2006) : 50-51] ne concerne pas RH

57. Note: Although current funding expires in September 2007, subject to a successful review by CR-UK, it is anticipated that the post will continue beyond this. [2567-014 (2006) : 56] contrainte durée poste

59. Technical expertise in informatics is not required although an understanding of the role of informatics in bio-medical research will be important. [2567-034 (2006) : 64] contrainte compétences
60. Although sound computer skills are essential for this post, particularly SQL, your primary responsibility will be data security and integrity, rather than simply back office design and as such you will be required to interact with a wide range of contacts on a daily basis and must have strong communication skills. [2567-070 (2006) : 79] contrainte compétences

61. Candidates will generally be expected to have had already some postdoctoral experience of research, although this should normally not have exceeded two years. [2567-073 (2006) : 80] contrainte expérience

62. Industrial experience of process development or large scale laboratory production to GMP standards is desirable, although full training will be given to newly qualified candidates. [2572-029 (2006) : 72] formation

63. Ideally degree qualified you will have a background in either science or engineering (although we will consider candidates with other extensive experience). [2572-037 (2006) : 76] expérience

64. The post will be held at Leeds, although time will also be spent on-site with RESON and in field deployments of the sonar. [2572-073 (2006) : 92] contrainte mobilité

65. Although the emphasis of these appointments is research, there is an expectation that you will make some contribution to undergraduate and postgraduate teaching. [2572-084 (2006) : 95] contrainte poste

66. You should have a record of research in any area of GIS and its application though preference may be given to applicants who are able to offer teaching and research expertise in one or more of the following areas: Visualisation, Spatial analysis and GIS modelling, GIS programming, Internet GIS or mobile GIS. [2572-085 (2006) : 96] compétences

67. Rewarding careers have been available in British biotech since its early days, though until recently the average life expectancy of a start-up has been short. [2576-003 (2006) : 58-61] ne concerne pas RH

68. An understanding of cGMP and analytical method development and validation would be an advantage although training is available. [2576-009 (2006) : 64] formation

69. The search is focused on experimental physicists (Junior or Senior) with strong research accomplishments in the field of quantum information (although exceptional theorists will also be considered). [2576-025 (2006) : 70] formation

70. An understanding of cGMP and analytical method development and validation would be an advantage although training is available. [2576-035 (2006) : 74] formation

71. Successful candidates will have a good BSc or higher degree in a life science or medicinal chemistry, although strong candidates with a background in organic chemistry will be considered. [2576-043 (2006) : 76] formation

72. Note: Although current funding expires in September 2007, subject to a successful review by CR-UK, it is anticipated that the post will continue beyond this. [2576-045 (2006) : 77] contrainte durée poste

73. To join us, you will normally require a 2.1 degree (although on occasion a 2.2 will be acceptable) in Maths, Physics, Computer Science, Oceanography, Chemistry or Meteorology, plus some knowledge of programming in Fortran or Unix. [2576-070 (2006) : 83] formation

74. Although the emphasis is on research, as the scheme progresses there will be an increasing amount of teaching, project management and outreach to schools to try and enthuse the future generation. [2576-087 (2006) : 90] contrainte poste
75. Although this is also a common problem in other countries, it is exacerbated in Finland by the fact that there are few permanent university positions at all between postdocs and professors, and the latter tend to hold their appointments until they retire. [2580-003 (2006) : 52-55] ne concerne pas RH

76. Some day the oil will run out, though, and Norwegians are making a conscious effort to look beyond petroleum. [2580-003 (2006) : 52-55] ne concerne pas RH

77. This is a collaborative project with Dr Neil Millar's laboratory at University College London, and although an employee of Rothamsted Research, the post-holder will be expected to conduct experiments at both sites. [2580-048 (2006) : 69] contrainte mobilité

78. Ideally you will have experience in post marketing pharmacovigilance, although equally important is an enthusiastic, flexible attitude and willingness to learn new skills. [2580-057 (2006) : 73] contrainte savoir-être

79. Although we're a large company, we pride ourselves on providing a friendly and supportive environment that encourages everyone to contribute. [2580-057 (2006) : 73] publicité entreprise

80. The Network has funding for this post for three years in the first instance although it is envisaged the funding will be longer term. [2580-060 (2006) : 76] contrainte durée poste

2009

1. The post is available for two years in the first instance, although this may be extended and is funded by the Oxford Radcliffe Hospitals Biomedical Research Centre. [2689-031 (2009) : 58] contrainte durée poste

2. Candidates may come from a wide range of background and experience although the successful candidates will need to have a proven track record in at least one of the areas outlined above. [2694-001 (2009) : 50] contrainte formation contrainte expérience

3. Fixed term for three years - extension of the contract or conversion to permanency is possible although there is no guarantee. [2694-022 (2009) : 60] contrainte durée poste

4. You'll probably already be working in online publishing, although recent graduates with strong portfolios will also be considered. [2694-027 (2009) : 63] compétences

5. A relevant health and safety qualification would be an advantage although support and training in this area will be provided. [2694-035 (2009) : 65] formation

6. The appointment is for a fixed period of five years, though this period may be shortened by mutual agreement to no less than three years. [2698-009 (2009) : 51] durée poste

7. For Ph.D. Studentships, applications from Qatari citizens and neighbouring areas are particularly encouraged, although the call is open to candidates of all nationalities. [2698-011 (2009) : 53] contrainte nationalité

8. Experience with a range of bacterial pathogens would be an advantage, although training will be given. [2698-014 (2009) : 54] formation
9. You should have a degree and Ph.D. in Microbiology, ideally with specialisation in pharmaceutical microbiology although this is not essential, or other suitable discipline, plus relevant experience.

10. Most of the posts are based in central London, although you may need to be able to spend time with Defra stakeholders elsewhere in the UK.

11. Although supervision of junior staff is required, there is no line management associated with this post.

12. Extension of the contract, conversion to permanency or transfer to another part of the civil service is possible although there is no guarantee.

13. Candidates may come from a wide range of background and experience although the successful candidates will need to have a proven track record in at least one of the areas outlined above.

14. So, previous research experience, though desirable, is not required.

15. Applicants are welcomed from all aspects of chemistry or from a mass spectrometry engineering background, although candidates with advanced expertise in Mass Spectrometry are particularly encouraged.

16. That said, a life sciences or biomedical background is often required, and these days postgraduate qualifications are increasingly important, though not necessarily in a purely scientific discipline.

17. Extension or conversion to permanency is possible although there is no guarantee.

18. (York for details of the BDM posts although these can be located at any one of the Universities).

19. There is a one-year vacancy for a cell biologist/immunologist to work in our T cell biology group, to validate mTCR cellular targeting using fluorescence microscopy, although the successful candidate will be involved in other research projects.

20. Candidates should ideally hold a degree in a related biological science, although less qualified candidates with appropriate experience will be considered.
Annexe 8-2
Occurrences de HOWEVER dans CAEMS

1971
1. The immediate vacancy is in the Biology Division which deals mainly with the problems of perishable foods, ranging from electron microscopy through microbiology to commodity sections, with a staff of about 60 and an operating budget of nearly £200,000. **However**, the scientific discipline of the successful applicant is relatively unimportant, provided he has demonstrated his ability in his chosen field and has an appreciation of work in other areas. [733-019 (1971) : 40]

2. Candidates with other qualifications **however** and with appropriate experience in either statistics or data processing would be considered. [733-022 (1971) : 40]

3. You actually receive the award, **however**, as soon as you’re up at University or on a full-time CNAA degree course at Polytechnic or college of technology. [774-002 (1971) : 187]

1995
1. The successful candidate should have experience in immunology, cell biology or experimental animal models of arthritis. **However**, a suitable individual without such expertise can be appointed and will receive appropriate training. [1959-025 (1995) : 50]

2. Applicants should have a degree in Biochemistry or related subject, and preferably have experience of molecular biology techniques. **However** good interpersonal skills and initiative are of prime importance as necessary techniques will be taught. [1959-092 (1995) : 67]

3. Training will be given, **however** previous experience of semen analyses would be an advantage. [1963-079 (1995) : 68]

4. The scheme is open to applicants from the 15 European Member States, plus Norway and Iceland, **however** because the programme supports mobility of researchers between European Countries, applicants from Germany and UK where the post is being held are not eligible to apply. [1967-001 (1995) : 60]

5. The quest for tomorrow's medicines will require the resolution of problems of daunting complexity. **However**, this challenge can be faced in an environment of unprecedented scientific progress and the prospect of elucidation of the fundamental regulatory biological processes responsible for health and disease. [1967-006 (1995) : 63]

6. Prior knowledge of radiowave propagation is not required. **However**, some experience in scientific data analysis using FORTRAN on PCs would be an advantage. [1971-003 (1995) : 55]

7. Women, members of ethnic minorities and disabled people are under-represented in the University in posts at this level and the University would therefore welcome applicants from members of such groups whilst, **however**, affirming that the appointment will be made entirely on merit. [1984-005 (1995) : 52]

8. This will be for a fixed term of 3 years, **however** there is a possibility that this post may be extended or made permanent. [1984-013 (1995) : 56]

9. Appointment to the post will be on a three year fixed term contract. **However**, there is a possibility that the contract may be extended and/or converted to permanent status. [1984-045 (1995) : 66]
10. Ideally candidates should have some experience in one of molecular biology or transgenic techniques or flow cytometry; however this is not essential as training can be given. [1984-068 (1995) : 72] expérience

11. LOCATION: South Perth, however appointee may be required to serve for extended periods in country/regional locations. [1989-042 (1995) : 69] contrainte mobilité

12. We offer an outstanding benefits package which includes essential user car allowance or loan and flexible hours. Your real reward, however, will be helping to improve the quality of life for our residents. [1989-087 (1995) : 80] publicité poste

13. Experience in molecular biological techniques such as PCR, subcloning and sequencing is essential, however, a background in parasitology is not necessary. [1998-001 (1995) : 72] formation

14. The funding of the post is, however, subject to external funding and is, therefore, contingent upon agreement being reached between the University and Nashua in respect of the terms and conditions of research. [1998-019 (1995) : 78] contrainte durée poste

15. Applications from candidates with expertise in anti-infectives, anti-virals, oncology, psychiatric illness or regulatory affairs would be particularly welcome, however, good writing skills and an enthusiastic attitude are as important. [1998-081 (1995) : 95] contrainte compétences

2005

1. Experience of pharmaceutical manufacturing or quality assurance would be an advantage, however full training will be provided. [2481-030 (2005) : 62] formation

2. You will have a good degree in a relevant chemically orientated science and either a PhD or considerable relevant experience. However, both would be an advantage. [2481-068 (2005) : 74] formation expérience

3. The work of this laboratory currently involves the microbiological, parasitological and haematological examination of samples for diagnosis and health monitoring. However in early 2006 the unit will move to a new laboratory when it will expand to include serological testing. [2481-069 (2005) : 74] adversatif

4. This is an administrative post; however, applicants should hold a PhD and have at least two years' experience as a research scientist in a field of biomedical research. [2485-003 (2005) : 58] contrainte formation contrainte expérience

5. A previous background in technology transfer and/or knowledge of legal issues would also be of value; however, a sound and robust understanding of scientific and medicinal applications is paramount. [2485-003 (2005) : 58] contrainte compétences

6. Experience within an analytical sciences department and familiarity with the principles of GMP and GLP would be an advantage. However, if you have a BSc (or equivalent) in Chemistry and a strong interest in and aptitude for analytical chemistry, as well as the ability to work as part of a small team, we are interested in hearing from you. [2489-019 (2005) : 68] formation

7. With a pivotal role in the drug discovery and development process a sound knowledge of drug metabolism would be welcome, however it is less important than the ability to work in a multidisciplinary team, where dedication, self-motivation and effective communication are prerequisites. [2493-029 (2005) : 64] formation

8. It is likely that there will be a need for a Molecular Biologist, however since more than one appointment is planned, those with other degree disciplines are encouraged to apply. [2493-053 (2005) : 71] candidature
9. Ideally, you will have experience in the chemistry and/or biology of soil phosphorus. **However** applications from candidates with experience in other areas of soil science (e.g. nutrient cycling and/or microbial biomass) are also invited. [2498-024 (2005) : 58] expérience

10. For our bioscientists, that means a tremendous amount of variety in a week — here, you'll work on developing a whole range of popular home and personal care brands. Crucially, **however**, you'll also enjoy the support and inspiration of a team of like-minded scientists, the freedom to conduct your own research, and the backing of one of the largest consumer goods companies in the world. [2498-041 (2005) : 65] publicité poste

11. We actively encourage on line applications using Requisition No 309125, by applying on line at [www.mod.uk](http://www.mod.uk) you can be sure that your application has been received on time. If **however** you are unable to apply on line contact Regional Personnel Centre, Room G08, Building 1/88, South Office Block, HM Naval Base, Portsmouth PO1 3LU. Telephone 023 92724312 and quote ARO/05/06/28. [2511-019 (2005) : 58] candidature

12. You will have a track record of achievement in the application of modern analytical techniques in biological systems relevant to food and with expertise in statistical analysis of data. **However**, applications are invited from researchers with more general experience in analytical methods interested in developing their expertise in this rapidly moving area. [2511-064 (2005) : 73] expérience

13. "Employers like candidates with a good grounding in the basic sciences or in engineering", says Seeley. **However**, employers will have to cast a wider net if they want to fill their vacancies. [2515-002 (2005) : 52-53] contrainte employeur

14. It would be to your advantage to have experience in laboratory management and/or hearing biology and in setting up, running, and interpreting experiments independently. We will, **however**, consider outstanding candidates with less practical experience if you have the willingness and ability to learn new techniques quickly. [2515-025 (2005) : 64] compétences

15. The position is based at our Hemel Hempstead office **however** occasional UK and overseas travel will be required. [2515-045 (2005) : 71] contrainte mobilité

16. The position is based at our Hemel Hempstead office **however** occasional UK and overseas travel will be required. [2528-047 (2005) : 79] contrainte mobilité

17. The position is based at our Hemel Hempstead office, **however** UK and overseas travel will be required. [2528-047 (2005) : 79] contrainte mobilité

18. All qualified candidates are encouraged to apply, **however** Canadians and permanent residents will be given priority. [2515-067 (2005) : 78] contrainte nationalité

19. It can be hard to convince outsiders that engineering is a worthwhile profession, **however**. [2519-004 (2005) : 50-53] publicité domaine

20. Cleasby recognises, **however**, that the vast majority of the survey's respondents were over 45 years old; [2519-004 (2005) : 50-53] ne concerne pas RH

21. Universities are taking steps in the right direction, **however**, and are now offering four-year MEng courses to bring the UK closer into line with the five-year European courses. [2519-004 (2005) : 50-53] durée cours

22. **However**, employers need to do more to reward those with higher academic qualifications to ensure the trend continues. [2519-004 (2005) : 50-53] contrainte employeur
23. As a Scientist you’re probably attracted to the wealth of exciting projects on the horizon. However, we’d like you to look at the bigger picture. [2519-007 (2005) : 56] contrainte poste

24. The starting salary will be in the range £27,116-£30,363 p.a. (University Grade RS2 II), however less experienced scientists will also be considered and if successful will be appointed on University Grade RS1(A) (starting salary £20,540 - £25,699 p.a.). [2519-066 (2005) : 75] expérience

25. You will have (or soon obtain) a PhD, and may have experience in proteomics, MS, bioinformatics, biochemistry or pharmacology. However, talented applicants are welcomed from any discipline who can demonstrate good technical abilities and willingness to work within a team dedicated to the development of new drugs to tackle human and animal diseases. [2519-067 (2005) : 75] formation

26. All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority. [2519-068 (2005) : 76] contrainte nationalité

27. Tackling the root of the imbalance of the sexes in academia could prove more difficult, however. [2528-002 (2005) : 58-59] contrainte employeur égalité des chances

28. Together with a relevant degree and considerable industry experience, you'll need a broad understanding of chemical analysis and the techniques involved. Equally important, however, are team leadership experience, a forward-thinking approach and the ability to bring out the best in multi-disciplinary teams. [2528-036 (2005) : 73] contrainte experience contrainte compétences

2006

1. Early application is encouraged, as places are strictly limited, however, the closing date for requests to attend the meeting is Friday 20 January 2006. [2533-071 (2006) : 67] contrainte candidature

2. The post is full-time, (however part-time applicants will be considered) [2537-014 (2006) : 62] Temps de travail

3. It's not just technical ability that we're after, however: we need people with the confidence, enthusiasm and people skills to make a real difference to our teams – and the business as a whole. [2541-005 (2006) : 58] compétences

4. It pays to be prepared, especially where radioactive material is concerned; a university might lose a source, or a power station could discover a fault that has potential consequences for human health or the environment. However, you'll make sure we're ready by using your radiological expertise and astute management skills to improve our incident response procedures. [2541-012 (2006) : 62] contrainte poste

5. The position is based at our Hemel Hempstead office however occasional UK and overseas travel will be required. [2541-026 (2006) : 68] contrainte mobilité

6. The position is based at our Hemel Hempstead office; however occasional UK and overseas travel will be required. [2576-020 (2006) : 69] contrainte mobilité

7. Ideally, you will hold or be completing an MSc in statistics or a related field and have an awareness and interest in the application of statistics in the biological/medical areas. However, new graduates with a good honours degree in statistics or a related field will be considered. [2541-050 (2006) : 78] formation

8. "People arrive at the office early and stay late." However, you can often build up holiday by working extra hours, and the work culture is friendly and open. [2550-006 (2006) : 56-57] temps de travail
9. This position attracts a salary in the range A$71,205 -A$80,096 per annum plus superannuation, however, exceptional candidates may be remunerated at a higher level. [2554-058 (2006) : 81] salaire

10. For informal discussions please contact Professor H. J. McArdle on (01224) 716628 or e-mail H.McArdle@rowett.ac.uk - however to apply for the position please use the contact details below. [2558-009 (2006) : 62] contrainte candidature

11. For informal discussions please contact Professor H.J. McArdle on (01224) 716628 or e-mail H.McArdle@rowett.ac.uk - however to apply for the position please use the contact details below. [2558-016 (2006) : 64] contrainte candidature

12. For informal discussions please contact Professor H. J. McArdle on (01224) 716628 or e-mail H.McArdle@rowett.ac.uk - however to apply for the position please use the contact details below. [2563-024 (2006) : 59] contrainte candidature

13. While ideally you'll be PhD-qualified in an appropriate physical discipline, a strong track record of research is a must. However, you could have gained this experience in an academic or commercial environment. [2563-004 (2006) : 51] expérience

14. Applicants should have a degree in biological or chemical science. They should have good attention to detail, good communication skills and be well motivated in a bench science role. Previous experience in freeze drying or thermal analysis methods would be an advantage, together with knowledge of protein chemistry and/or formulation, however, training can be provided. [2567-016 (2006) : 58] formation

15. There are benefits to living outside the capital, however. [2572-006 (2006) : 58-61] ne concerne pas RH

16. All qualified candidates are encouraged to apply; however Canadian and permanent residents will be given priority. [2576-025 (2006) : 70] contrainte nationalité

17. A background in water resources and hydrology would be advantageous however Dr Cymru would consider candidates who have operational experience in other areas of the water industry as long as knowledge and interest can be demonstrated. [2576-036 (2006) : 74] expérience

18. Primarily you will support the Strategic Water Resources Manager in meeting our regulatory requirements to deliver the Water Resources Plan and the Drought Plan. However, water resources is an area currently of significant change and innovation and there will be considerable scope to work on a wide range of projects in the area of water resource and hydrology. [2576-037 (2006) : 74] publicité domaine

19. We are seeking a candidate with a relevant masters degree in water resources and hydrology. However, Dr Cymru Welsh Water would also give consideration to a graduate with a relevant first degree who can demonstrate enthusiasm in this area and would like to further their development ‘on-the-job’. [2576-037 (2006) : 74] formation

20. [Engineering Design Center] currently has secure funding as an EPSRC-funded Integrated Manufacturing Research Centre (IMRC), however, the successful candidate will also be expected to build a strong, externally funded research program. [2576-077 (2006) : 87] contrainte recherche

21. Denmark's relatively small research community is not exclusive however – researchers from overseas are in demand. [2580-003 (2006) : 52-55] contrainte recherche
1. Due to anticipated high levels of interest we will not be able to respond to individual applications, however if you are successful at this stage, we will contact you to arrange a first interview. [2694-009 (2009) : 55] candidature

2. Candidates from outwith the EU are not eligible for MRC studentships. However, we can consider applications for this programme from candidates with external funding. [2694-057 (2009) : 75] candidature

3. The successful candidate will have a BSc or equivalent qualification in Molecular Biology or a related subject area and experience of working in a laboratory, however, applicants with a laboratory Technician's Diploma and suitable experience will be considered. [2698-037 (2009) : 63] formation

4. You should preferably be experienced in vetting and approving agreements, negotiating terms and explaining policies and procedures, however applications from post-doctoral scientists with an appropriate aptitude who are wishing to develop a career in the management of research contracts and intellectual property are also invited. [2711-028 (2009) : 60] formation

5. In the first instance, this is a fixed contract for maternity cover. There is however, the opportunity for the right candidate to develop a long-term career in a dynamic organization at the forefront of biomedical publishing. [2724-026 (2009) : 61] publicité poste

6. Applications are encouraged across all areas of the MRC's remit. However, individuals whose research interests include public health should note MRC operates a separate competition for Population Health Sciences Fellowships. [2728-025 (2009) : 63] candidature

7. Suitable candidates for the role will have a life science degree and ideally some experience in medical education/communication; however, this is not essential as full on-the-job training will be provided. [2733-019 (2009) : 67] formation

8. You should have a Ph.D. (or should expect to submit a thesis for Ph.D. before 31st December 2010), preferably in Statistics or a related field. However, applicants are invited from a wide range of backgrounds, including machine learning and areas in which complex models are used, subject to having strong statistical skills. [2733-041 (2009) : 75] expérience

9. (Our preference is to appoint at the level of Professor, however, for posts J09/156 and 109/158 consideration will be given to appointing at the level of Reader or Senior Lecturer.) [2733-046 (2009) : 76] formation
**Annexe 8-3**  
**Occurrences de YET dans CAEMS**

**1971**
1. Our modern, well-equipped Research Laboratories are situated in rural North Cheshire, *yet* within easy reach of Manchester and main road and rail routes. [737-030 (1971) : 279] *locus amœnus*

2. We can offer the advantages of joining a large modern, well-equipped I.C.I. research department, pleasantly situated in rural North Cheshire, *yet* within easy reach of Manchester and main road and rail routes. [741-018 (1971) : 521] *locus amœnus*

**1995**
1. Are you a Graduate Scientist (eg, Chemist, Biochemist, Biologist, Environmental Scientist), or a person of similar standing seeking a secure *yet* challenging future in the field of Chemical Analysis? [1989-121 (1995) : 87] *poste*

3. The speed at which technology moves forward means that knowledge is soon out of date, *yet* skills can be continually developed and adapted to suit new situations. [2006-007 (1995) : 61] *compétences*

**2005**
1. Syngenta is the leader in crop protection and the third largest seeds business worldwide. We are a young company for the 21st century, *yet* we have years of innovation behind us. [2481-012 (2005) : 57] *publicité entreprise*

2. Surrounded by the Peak District National Park and *yet* within daily commuting distance of several major towns and cities, our location is ideal for both urban and rural living. [2481-015 (2005) : 58] *locus amœnus*

3. You will be self-motivated and capable of working with minimal supervision, *yet* also able to work closely with others in the team. [2485-025 (2005) : 65] *contrainte travail équipe*

4. We are located only 30 minutes from the vibrant city of Newcastle-upon-Tyne and *yet* close to the majestic Northumbrian coastline and countryside. [2489-019 (2005) : 68] *locus amœnus*

5. One of the main frustrations PSREs faced, the report concluded, was that the private sector was unwilling to risk investing in early-stage, unproven ideas, *yet* the institutions could not afford to prove commercial viability. [2506-001 (2005) : 52-53] *ne concerne pas RH*

6. So it is difficult for graduates without the right experience to get their first jobs, *yet* they can’t get that vital experience any other way. [2515-002 (2005) : 52-53] *contrainte expérience*

7. We are a young company for the 21st century, *yet* we have years of innovation behind us. [2515-010 (2005) : 58] *publicité entreprise*

8. In addition, the University is set in one of the most beautiful areas of southern Britain, *yet* is close to London and Europe. [2524-074 (2005) : 78] *locus amœnus*

**2006**
1. We are located only 30 minutes from the vibrant city of Newcastle upon Tyne and *yet* close to the majestic Northumbrian coastline and countryside. [2533-026 (2006) : 54] *locus amœnus*
2. [Tea] is consumed in nearly every country in the world and yet the rich variety of tea taste properties still provides exciting opportunities to expand the market for both hot and ready to drink beverages. [2537-011 (2006) : 61] ne concerne pas RH

3. Portland cement concretes are supreme in construction because of their flexibility, yet their very success creates pressing technical and environmental problems and need for improved functionality requiring new approaches. [2537-047 (2006) : 73] publicité entreprise

4. We are a young company for the 21st century, yet we have years of innovation behind us. [2537-048 (2006) : 73] publicité entreprise

5. Our knowledge of cancer is growing at an explosive rate, making this a fascinating time to be involved in cancer research. Yet I believe that scientific endeavour should not finish at the point of publication. [2545-004 (2006) : 56-59] ne concerne pas RH

6. Prevention is better than cure, yet few people today connect a healthy weight and activities such as walking to the shops with fewer cases of cancer. [2545-004 (2006) : 56-59] ne concerne pas RH

7. Yet the combination of high salaries and relatively low taxes is undeniably attractive. [2550-006 (2006) : 56-57] salaire

8. We are located only 30 minutes from the vibrant city of Newcastle upon Tyne and yet close to the majestic Northumbrian coastline and countryside. [2558-021 (2006) : 66] locus amœnus

9. Working hand-in-hand with manufacturing, you'll develop and apply robust, yet efficient, quality systems within the drinks factory, assuring the safety, legality and consistent quality of our products at the optimum cost to the business. [2558-039 (2006) : 77] contraintes poste

10. Our five individual, yet complementary, divisions offer a unique range of services and world-class career opportunities. [2563-039 (2006) : 63] publicité entreprise

11. For instance, he says that many papers in the highest-impact journals are never cited, while other papers have impact by influencing clinical practice but yet are not cited. [2567-002 (2006) : 50-51] ne concerne pas RH

12. "There is real tangible support from the government", says Wrixon, "yet they are doing it in a sensible way that does its best to ensure the high standards needed to make Ireland globally relevant are maintained". [2572-006 (2006) : 58-61] ne concerne pas RH

2009

1. The candidate needs to be able to talk credibly to senior lab-heads at the top institutes about how a sequencer might fit into their current or future scientific environment. Yet they also need to be able to talk to ground-level scientists who will use the machine, and develop robust experimental protocol applicable to use in the wider broad access research community. [2689-005 (2009) : 47] contraintes compétences

2. From supporting cleaner and more efficient manufacturing to developing biofuels and discovering new sustainable materials, biotech innovations play a major role in solving the world’s biggest energy challenges. Yet current economic realities demand new investment models. [2698-001 (2009) : 4] ne concerne pas RH
3. “We had to work with satellite systems because communications can be difficult because of the terrain.” And he was never far from the front line, going out with the soldiers on patrol. Yet Graham's most memorable experience was not of danger but of working closely with the Afghan National Army. [2698-004 (2009) : 48-49] ne concerne pas RH

4. From supporting cleaner and more efficient manufacturing to developing biofuels and discovering new sustainable materials, biotech innovations play a major role in solving the world’s biggest energy challenges. Yet current economic realities demand new investment models. [2702-001 (2009) : 2] ne concerne pas RH

5. How food interacts with this salivary film is basic research that is poorly understood and yet is central to our understanding of how we perceive food. [2702-051 (2009) : 68] ne concerne pas RH

6. Carbon nanotubes are nanometer diameter tubes of carbon over a thousand times as long. They are a new nanosized form of carbon with fascinating properties making them interesting and important future materials. They are light, yet immensely strong with good heat transfer properties and electrical conductivity. [2719-038 (2009) : 63] ne concerne pas RH

7. Both Manica Balasegaram and Sally Ellis are staff at the Drugs for Neglected Diseases initiative, an NGO in Geneva, Switzerland, working on clinical trials involving visceral leishmaniasis, the second-largest parasitic killer in the world after malaria. Yet they have had very different career paths. [2728-004 (2009) : 52-53] poste

8. It's rare that a commercial corporation can stand up and announce new science that will transform an industry. Yet our momentous breakthrough doesn't stop there: it has profound implications for the generation of energy on the global scale-sustainable, low carbon energy that can be produced from a broad range of raw materials, including recycled waste. [2728-030 (2009) : 66] publicité entreprise

9. Swiss medical-data laws protect patient anonymity, yet Dindoyal has still found it easier to obtain data for his research in Switzerland than in the UK. [2733-006 (2009) : 60-61] ne concerne pas RH

ANNEXE
LA CLASSIFICATION RÉVISÉE DES DOMAINES SCIENTIFIQUES ET TECHNOLOGIQUES

1. Sciences exactes et naturelles

1.1 Mathématiques
• Mathématiques pures, mathématiques appliquées, statistiques et probabilités.

1.2 Informatique et science de l’information
• Informatique, science de l’information et bio-informatique (le développement de matériel est à classer sous 2.2 et les aspects sociaux sous 5.8)

1.3 Sciences physiques
• Physique atomique, moléculaire et chimique (physique des atomes et des molécules, y compris les collisions, l’interaction avec la radiation, la résonance magnétique, l’effet Moessbauer) ;
• physique de la matière condensée (y compris ce qu’on appelait autrefois la physique de l’état solide, supraconductivité) ; physique des particules et des champs ; physique nucléaire ; physique des fluides et des plasmas (y compris la physique des surfaces) ; optique (y compris l’optique laser et l’optique quantique) ; acoustique ; astronomie (y compris l’astrophysique, les sciences spatiales).

1.4 Sciences chimiques
• Chimie organique, chimie minérale et nucléaire ; chimie physique ; science des polymères ; électrochimie (piles sèches, accumulateurs, piles à combustible, corrosion des métaux, électrolyse) ; chimie des colloïdes ; chimie analytique.

1.5 Sciences de la Terre et sciences connexes de l’environnement
• Géosciences, études pluridisciplinaires ; minéralogie, paléontologie, géochimie et géophysique, géographie physique, géologie, vulcanologie, sciences de l’environnement (les aspects sociaux sont à classer sous 5.7) ;
• météorologie et autres sciences de l’atmosphère, recherche climatique ;
• océanographie, hydrologie, ressources en eau.

1.6 Sciences biologiques (les sciences médicales sont à classer sous 3 et les sciences agricoles sous 4)
• Biologie cellulaire, microbiologie ; virologie ; biochimie et biologie moléculaire ; méthodes de recherche en biochimie ; mycologie, biophysique ;
• génétique et hérédité (génétique médicale à classer sous 3) ; biologie de la reproduction (aspects médicaux à classer sous 3) ; biologie du développement ;
• phytologie, botanique ;
• zoologie, ornithologie, entomologie, éthologie/biologie du comportement ;
• biologie marine, biologie des eaux douces, limnologie, écologie, préservation de la biodiversité ;
• biologie (théorique, mathématique, thermale), cryobiologie, biorythmes ; biologie de l’évolution ;
• autres thèmes liés à la biologie.

1.7 Autres sciences naturelles

2. Sciences de l’ingénieur et technologiques

2.1 Génie civil
• Génie civil ; techniques architecturales ; ingénierie des bâtiments et travaux publics ; études des infrastructures urbaines ; ingénierie des transports.

2.2 Génie électrique, électronique, ingénierie informationnelle
• Génie électrique, électronique, robotique et régulation automatique, systèmes d’automatisation et de commande, ingénierie et systèmes de communication ; télécommunications, matériel et architecture informatiques.

2.3 Génie mécanique
• Génie mécanique ; mécanique appliquée ; thermodynamique ;
• génie aérospatial ;
• ingénierie liée au nucléaire (physique nucléaire à classer sous 1.3) ;
• ingénierie du son, analyses de fiabilité.

2.4 Génie chimique
• Génie chimique (installations, produits) ; ingénierie des procédés chimiques.

2.5 Génie des matériaux
• Génie des matériaux ; céramiques, revêtements et films ; composites (y compris les laminés, les plastiques armés, les cerments, les tissus mélangeant fibres naturelles et synthétiques, les composites renforcés) ; papiers et bois ; textiles y compris les colorants de synthèse, les teintures, les fibres (nanomatériaux à classer sous 2.10 ; biomatériaux, sous 2.9).

2.6 Ingénierie médico-technologique
• Ingénierie médico-technologique ; technologie des laboratoires médicaux (y compris l’analyse des prélèvements en laboratoire, les technologies de diagnostic). (Les biomatériaux sont à classer sous 2.9 [caractéristiques physiques du vivant par rapport aux implants, dispositifs, capteurs médicaux]) ;

2.7 Génie de l’environnement
• Sciences du milieu et géologie appliquée ; géotechnique ; génie pétrolier (combustible, huiles), énergie et carburants : télédétection ; extraction et traitement des minerais, mécanique navale, navires maritimes, génie océanique.

2.8 Biotechnologie environnementale
• Biotechnologie appliquée à l’environnement ; biorestauration ; biotechnologies de diagnostic (biopuces et dispositifs de biodétection) dans la gestion de l’environnement ; éthique liée à la biotechnologie environnementale.

2.9 Biotechnologie industrielle
• Biotechnologie industrielle ; technologies de traitement biologique (procédés industriels reposant sur des agents biologiques pour enclencher un processus), biocatalyse, fermentation ; bioproduits (produits fabriqués au moyen de matériaux biologiques utilisés comme matière première), biomatériaux, bioplastiques, biocarburants, produits chimiques en vrac et produits chimiques fins dérivés de la biologie, nouveaux matériaux dérivés de la biologie.

2.10 Nanotechnologies
• Nanomatériaux [production et propriétés] ;
• nanoprocessus [applications à l’échelle nanométrique] ; (biomatériaux à classer sous 2.9).

2.11 Autres domaines techniques et technologiques
• Aliments et boissons ;
• autres domaines techniques et technologiques.

3. Sciences médicales et sanitaires

3.1 Médecine fondamentale
• Anatomie et morphologie (phytologie à classer sous 1.6) ; génétique humaine ; immunologie, neurosciences (y compris la psychophysologie) ; pharmacologie et pharmacie ; produits chimiques médicaux ; toxicologie, physiologie (y compris la cytologie) ; pathologie.
3.2 Médecine clinique
• Andrologie, gynécologie et obstétrique, pédiatrie, appareils cardiaque et cardiovasculaire ; atteintes vasculaires périphériques ; hématologie ; appareil respiratoire ; soins intensifs et médecine d’urgence ; anesthésiologie ; orthopédie ; chirurgie, radiologie, médecine nucléaire et imagerie médicale ; transplantations ; dentisterie, chirurgie buccale et maxillo-faciale et stomatologie ; dermatologie et maladies vénériennes ; allergies ; rhumatologie ; endocrinologie et maladies du métabolisme (y compris diabète, troubles hormonaux) ; gastroentérologie et hépatologie ; urologie et néphrologie, oncologie, ophtalmologie, ORL, psychiatrie, neurologie clinique, gériatrie et gérontologie, médecine générale et médecine interne ; autres aspects de la médecine clinique ; médecine intégrative (médecines complémentaires et alternatives).

3.3 Sciences sanitaires
• Sciences et services de soins de santé (y compris l’administration des hôpitaux, le financement des soins de santé) ; politique et services de santé ;
• soins infirmiers, nutrition, diététique ;
• santé publique et salubrité de l’environnement ; médecine tropicale ; parasitologie ; maladies infectieuses ; épidémiologie ;
• hygiène du travail, médecine du sport et de l’entretien de la condition physique ;
• sciences sociales biomédicales (y compris la planification des naissances, la santé génésique, la psycho-oncologie, les effets politiques et sociaux de la recherche biomédicale) ; éthique médicale ; abus d’alcool ou d’autres drogues.

3.4 Biotechnologie médicale
• Biotechnologies liées à la santé ; technologies impliquant la manipulation de cellules, de tissus, d’organes ou l’organisme tout entier (procréation médicalement assistée) ; technologies impliquant l’identification du fonctionnement de l’ADN, des protéines et des enzymes et la manière dont ils influence sur l’apparition de la maladie et le maintien du bien-être (diagnostic génétique et interventions thérapeutiques ; pharmacogénomique, thérapie génique) ; biomatériaux (en rapport avec les implants, dispositifs et capteurs médicaux), éthique liée aux biotechnologies médicales.

3.5 Autres sciences médicales
• Criminalistique ;
• autres sciences médicales.

4. Sciences agricoles

4.1 Agriculture, sylviculture et pêche
• Agriculture ; sylviculture ; pêche ; science des sols ; horticulture, viticulture ; agronomie, sélection et protection des plantes (biotechnologie végétale à classer sous 4.4).

4.2 Zootechnie et science laitière
• Zootechnie et science laitière (biotechnologie animale à classer sous 4.4) ;
• élevage ; animaux de compagnie.

4.3 Sciences vétérinaires

4.4 Biotechnologie agricole
• Biotechnologie végétale et biotechnologie alimentaire ; technologie de la manipulation génétique (cultures et bétail) ; clonage du bétail ; sélection à l’aide de marqueurs moléculaires ; diagnostic (biopuces et dispositifs de biodétection pour la détection précoce/précise des maladies) ; technologies de production de biomasse, agropharmacologie transgénique) ; éthique liée à la biotechnologie agricole.

4.5 Autres sciences agricoles
5. Sciences sociales

5.1 Psychologie
• Psychologie en général (y compris les relations homme-machine) ;
• psychologie en particulier (y compris les thérapies d’apprentissage pour les personnes souffrant de troubles du langage, de l’ouïe ou de la vue ou d’autres handicaps physiques ou mentaux).

5.2 Économie et administration des entreprises
• Économie, économétrie ; relations industrielles ;
• administration et gestion des entreprises.

5.3 Sciences de l’éducation
• Éducation en général, y compris la formation, la pédagogie, la didactique ;
• éducation en particulier (surdoués, personnes présentant des troubles de l’apprentissage).

5.4 Sociologie
• Sociologie, démographie ; anthropologie ; ethnologie ;
• sujets particuliers (études sur les femmes et la problématique hommes-femmes, problèmes sociaux ; études sur les familles ; action sociale).

5.5 Droit
• Droit, criminologie, pénologie.

5.6 Sciences politiques
• Sciences politiques ; gestion publique ; théorie de l’organisation.

5.7 Géographie sociale et économique
• Science de l’environnement (aspects sociaux) ; géographie culturelle et économique ; études d’urbanisme (aménagement et développement urbains) ; planification des transports et aspects sociaux des transports (ingénierie des transports à classer sous 2.1).

5.8 Médias et communication
• Journalisme ; science de l’information (aspects sociaux) ; bibliothéconomie ; médias et communication socioculturelle.

5.9 Autres sciences sociales
• Sciences sociales, études interdisciplinaires ;
• autres sciences sociales.

6. Sciences humaines

6.1 Histoire et archéologie
• Histoire (histoire de la science et de la technologie à classer sous 6.3 ; histoire de sciences spécifiques à classer dans les rubriques correspondantes) ; archéologie.

6.2 Langues et littérature
• Études générales de langue ; langues particulières ; études de littérature générale ; théorie littéraire ; littératures particulières ; linguistique.

6.3 Philosophie, morale et religion
• Philosophie, histoire et philosophie des sciences et de la technologie ;
• éthique (sauf l’éthique liée à des sous-catégories particulières) ; théologie ; études religieuses.

6.4 Arts (arts, histoire de l’art, arts de la scène, musique)
• Arts, histoire de l’art ; conception architecturale ; études des arts de la scène (musicologie, science théâtrale, dramaturgie) ; études du folklore ;
• études portant sur les films, la radio et la télévision.

6.5 Autres sciences humaines
Annexe 9-2 Occurrences de DISCIPLINE dans CAEMS

1971

1. The course may either be taken alone as a broad general introduction or be followed by a specialist course aligned toward the discipline of the student. [733-004 (1971) : 38]

2. This is a project-orientated course for persons well qualified in other disciplines, who need electronics and instrumentation in the course of their work, such as mechanical engineers, scientists, doctors and other members of the medical profession. [733-005 (1971) : 38]

3. An honours degree in appropriate disciplines (including biological sciences, psychology, and the natural sciences, mathematic and engineering) or equivalent professional qualifications is required. [733-006 (1971) : 38]

4. However, the scientific discipline of the successful applicant is relatively unimportant, provided he has demonstrated his ability in his chosen field and has an appreciation of work in other areas. [733-019 (1971) : 40]

5. The Research Division of Pfizer Limited is broadly based in the major scientific disciplines, has a staff of over 450 and an annual budget approaching £2 million. [733-038 (1971) : 42]

6. Applicants should have qualifications and experience either in haematology or in a relevant scientific discipline and should be interested in the development and evaluation of new techniques. [733-045 (1971) : 43]

7. Conversion Fellowships, starting from £ 1,045 p.a. are available for young postdoctoral scientists wishing to enter the social sciences and for social scientists wishing to change disciplines. [733-068 (1971) : 46]

8. This provides information, library, and publication services covering a wide range of scientific disciplines and particular aptitude is required in presenting technological information in a manner of interest to the lay reader. [733-070 (1971) : 46]

9. If you expect to graduate in one of the following disciplines: ENGINEERING (Chemical, Gas, Civil or Mechanical) or MATHEMATICS, STATISTICS and ECONOMICS, or MANAGEMENT ACCOUNTING the North Western Gas Board have openings in ENGINEERING, ACCOUNTING COMPUTERS OR ECONOMIC RESEARCH. [733-075 (1971) : 47]

10. It is envisaged that the successful candidate will be under 30 years of age and have some technical experience in the iron and steel industry and should be educated to H.N.C. or equivalent in an appropriate discipline. [733-088 (1971) : 49]

11. As a prerequisite to the thesis, students will: Develop their understanding of a chosen academic discipline in its relevance to organisation and management [737-045 (1971) : 281]

12. Candidates should have an established research reputation in dairy technology or in a relevant discipline, and have demonstrated ability to lead a research group. [741-008 (1971) : 520]

13. This Lecturer would also be expected to teach his own discipline on graduate and/or undergraduate courses. [745-010 (1971) : 57]

14. Candidates should be graduates in an appropriate discipline and the completion of a course in genetics would normally be expected. [745-049 (1971) : 61]
15. These are staffed from a number of disciplines including chemistry, metallurgy, physics and chemical and mechanical engineering. [745-072 (1971) : 63]

16. Applications are invited from candidates who hold or expect to obtain good honours degrees (or equivalent professional qualifications) in any of the above or related disciplines, and for senior posts from candidates who hold or expect to obtain a Ph.D. degree. [745-072 (1971) : 63]

17. This work will be concerned with the evaluation of complete new routes or improvements, which requires a complex analysis involving all three of these disciplines. [750-072 (1971) : 63]

18. Candidates should have, or be expecting to obtain, a 1st or 2nd class Honours Degree in Physics, Chemistry, Printing Technology, Chemical Engineering or some other appropriate discipline. [758-024 (1971) : 52]

19. QUALIFICATIONS Queen’s Fellows should have a Ph.D., or equivalent qualifications, or equivalent research or professional experience, in a discipline applicable in marine science. [763-046 (1971) : 347]

20. Applicants should have a degree in mathematics, statistics, engineering, operational research, computer science or an allied discipline. [767-010 (1971) : 542]

21. Shell International Petroleum Company Limited offers three post-doctoral Fellowships annually to assist recipients to pursue research in a subject of their own choice within the following disciplines: Engineering Mathematics Physics Chemistry Biochemistry Botany Zoology Microbiology Geology Geophysics [772-090 (1971) : 64]

22. Candidates should be graduates in marine science or a related discipline with considerable experience in the conduct of fisheries research and development work. [774-017 (1971) : 189]

23. The University offers training in the additional disciplines necessary to your research project. [774-050 (1971) : 192]

24. The normal entry is in October, but a small number of projects covering a variety of disciplines will become available from January 1972 onwards. [774-050 (1971) : 192]

25. Candidates should be graduates in mathematics, geography, economics, computer science or other numerate discipline. [776-023 (1971) : 288]

1995

1. Up to 10 fellowships will be offered to professional scientists and engineers - in any discipline - to allow them to spend between 4 and 8 weeks working with a media organisation. [1959-001 (1995) : 39]

2. Candidates will be expected to have a good first degree in a related science/engineering discipline, or equivalent. [1959-010 (1995) : 47]

3. Candidates should have a relevant 'A' level education or BTEC Certificate/Diploma in an appropriate discipline. [1959-022 (1995) : 50]

4. Applicants should have a 2.1 honours degree in physics (or a related discipline) and should satisfy the eligibility requirements for being awarded an EPSRC studentship. [1959-024 (1995) : 50]

5. The Faculty of Engineering is a broad based multi-disciplinary faculty which covers the disciplines of Mechanical, Manufacturing, Aeronautical and Electronic and Electrical Engineering. [1959-031 (1995) : 52]
6. We pride ourselves on our close links with industry and our research spans all of the above engineering disciplines. [1959-031 (1995) : 52]

7. You should have a good honours degree in an Engineering discipline, and preferably a higher degree. [1959-031 (1995) : 52]

8. You should have a good first degree in Engineering Mathematics, Mechanical Engineering or a related discipline and be able to demonstrate considerable mathematical ability in the fields of both classical continuum mathematics and numerical algorithms. [1959-031 (1995) : 52]

9. You should ideally have a background in robotics, artificial intelligence, computer science, psychology or a related discipline. [1959-031 (1995) : 52]

10. You should have a good first degree in Electronic Engineering or a related discipline, and will ideally have competence in both classical control and neural networks. [1959-031 (1995) : 52]

11. Applicants should be educated to degree standard in the chemical or biological sciences and preferably have several years experience in regulatory affairs or in a relevant scientific discipline, either in industry or government. [1959-032 (1995) : 52]

12. Applicants with a good honours degree in an appropriate discipline should send a CV, with the names of two academic referees, to the Director, Research Institute, The Churchill Hospital, Oxford OX3 7LJ, by 20 January 1995. [1959-039 (1995) : 54]

13. The Wellcome Trust operates personal support schemes for individuals wishing to develop careers in research and who would like to apply mathematical disciplines to research questions in biological and medical science. [1959-043 (1995) : 56]

14. Applicants should note that these fellowships are primarily intended for the acquisition of skills in mathematical biology rather than to sustain the careers of those with an established research background in their discipline. [1959-043 (1995) : 56]

16. A multi-disciplined professional, you should have the flexibility to perform other duties including plant work and maintenance of on-line chemistry and radiation monitoring instruments. [1959-052 (1995) : 58]

17. One postdoctoral post, based in the Department of Biochemistry, Charing Cross and Westminster Medical School, will be concerned with molecular aspects of viral persistence and analysis of cardiovirulence: this post will be supported by a technician who will be a graduate in an appropriate biological discipline. [1959-067 (1995) : 61]

18. The appointee will have a higher degree in an appropriate biological discipline. [1959-072 (1995) : 62]

19. Applicants should have a good degree in Physics or an Engineering discipline. [1959-096 (1995) : 67]

20. Although this post is on a clinical scientist grade, applications are welcomed from individuals with a good honours degree in a scientific or social scientific discipline. [1963-026 (1995) : 56]
21. The appointment is part-time and the principal obligation is to offer six lectures a year, in pursuance of Sir Thomas Gresham’s wish to provide free public lectures, in a number of specified disciplines. [1963-034 (1995) : 58]

22. Applicant should have a Ph.D. in organic or medicinal chemistry or related discipline or should be about to submit their thesis. [1963-036 (1995) : 58]

23. Applicants should have a first degree in a major engineering discipline and a postgraduate qualification and/or a minimum of 2 years’ experience in the field of Biomedical Engineering. [1963-044 (1995) : 60]

25. Each training programme provides an excellent opportunity for comprehensive training in the chosen discipline by combining, in some cases, formal teaching at a University (on a part-time MSc course. [1963-048 (1995) : 61]

26. Suitable candidates will have a Ph.D. in a Physics or Electronics related discipline, and will have experimental skills relevant to intensifiers or analogue signal processing. [1963-049 (1995) : 62]

27. The studentship is immediately available. Potential candidates should have a 1st or 2(i) Honours Degree in Chemistry, or a related discipline. [1963-091 (1995) : 71]

28. The successful applicants will join research groups led by their supervisor and receive research training in disciplines appropriate to the subject. [1963-092 (1995) : 72]

29. Applicants should have a good Honours degree in Physics, Chemistry, Biology, Geology, Geography, Environmental Sciences, Economics or a relevant Social Science discipline. [1963-092 (1995) : 72]

30. As a well qualified graduate, with a good Honours Degree in chemistry/applied chemistry, ideally supported by 1-2 years relevant industry experience, you'll be a key member of a mixed discipline team responsible for establishing process improvements - requiring a good understanding of the interaction of the product and the process from the chemical viewpoint. [1967-003 (1995) : 61]

31. Working in the areas of product design and manufacturing process development, using chemical analytical methods, you will either be a new/recently qualified graduate in a relevant chemistry or applied chemistry discipline, or alternatively have a HND, backed by practical experience in a related environment, such as analytical chemistry, surfactant, colloids, surface engineering, adhesives or coating technology. [1967-003 (1995) : 61]

32. At SmithKline Beecham, advanced genomics research joins the myriad of other disciplines needed to discover pioneering drugs, vaccines and diagnostic tests. [1967-006 (1995) : 63]

33. Working within a disciplined team you will have to work accurately with minimum supervision and possess good documentation and communication skills. [1967-008 (1995) : 65]

34. This position would suit a new graduate in Biochemistry or a similar discipline, some experience in the use of Spectrophotometers HPLC and Electrophoresis would be an advantage. [1967-008 (1995) : 65]

35. Full-time and part-time research programmes are also available for those candidates with a minimum of 2:i in an appropriate discipline. [1967-014 (1995) : 67]
36. Candidates must have at least an upper second class honours degree in mathematics or other discipline with a strong mathematical content with at least 2 years' experience. [1967-024 (1995) : 70]

37. Candidates will have strong analytical skills and a Ph.D. relevant to at least one of the specific disciplines mentioned above. [1967-041 (1995) : 74]

38. A graduate in Chemistry, Pharmacy/Pharmaceutical sciences or other related discipline - ideally complemented with a Ph.D., you must have at least 5/6 years practical bench experience in a wide range of pre-formulation science techniques and instrumental methods. [1967-043 (1995) : 75]

40. Applicants should hold a Ph.D. in a science or engineering discipline that equips them with the interdisciplinary knowledge and skills required to chemically modify electrolytes, analyse and characterise resulting deposits. [1967-057 (1995) : 78]

41. Applicants, who should have (or expert to have shortly) at degree in a relevant scientific discipline, should write to The Director, The Royal Institution, 21 Albemarle Street, London W1X 4BS, enclosing a CV and the names of two referees. [1967-071 (1995) : 82]

42. You will have the opportunity to gain experience in all sections of the department, and, if suitably qualified, would be invited to participate in the voluntary single-discipline out of hours service. [1967-078 (1995) : 84]

43. The Co-ordinator will be expected to promote, co-ordinate and monitor research within the Programme and encourage collaboration both between industry and academia, and, within academia, between sciences and engineering disciplines. [1967-085 (1995) : 85]

44. Applications are invited from EC citizens who hold or who expect to obtain a first or upper second class degree in an appropriate scientific discipline. [1971-006 (1995) : 56]

45. You will have a degree or higher qualification in a geophysics or science related discipline. [1971-014 (1995) : 60-61]

46. Applicants should have, or be about to be awarded, a Ph.D. in a relevant discipline. [1971-034 (1995) : 66]

47. 40 Studentships providing payment of the UK tuition fee plus maintenance at the rate offered by UK research councils (approx. £5,000), available for doctoral research in all disciplines. [1971-037 (1995) : 67]

48. The successful candidate must be able to demonstrate: […] proven managerial and leadership skills, and the ability to work across disciplines [1971-053 (1995) : 72]

49. A graduate in a relevant scientific discipline, you should have a good understanding of managing applied research and be able to deal with a large number of projects at various stages of development. [1971-054 (1995) : 73]

50. This means we're looking for highly motivated, experienced scientists and engineers with honours degrees in polymer science, physics, chemistry, ceramics, materials science and related disciplines. [1971-064 (1995) : 76]

51. This means we're just as interested in your resourcefulness, commitment, problem-solving abilities and interpersonal skills as we are in your specialist degree discipline. [1971-064 (1995) : 76]
52. Applicants should possess or expect to obtain a First or Upper Second Class Degree in relevant disciplines. [1971-083 (1995) : 79]

53. Qualifications in both science and a relevant business discipline (MBA or marketing MCIM) would be a distinct advantage [1976-011 (1995) : 62]

54. as would experience in marketing of a professional discipline or with the management of intellectual property. [1976-011 (1995) : 62]

55. Good honours graduates in Biology, Biochemistry, Chemistry or a related discipline, plus 2-4 years' postgraduate experience in the pharmaceutical industry, are needed to identify and develop innovative healthcare products. [1976-013 (1995) : 64-65]

56. A graduate in a scientific discipline, you will have over 5 years' relevant experience, showing an innovative approach plus the ability to take calculated risks and produce results to tight deadlines. [1976-013 (1995) : 64-65]

57. To succeed, you'll need a good honours degree in a scientific discipline and at least 5 years' experience in pharmaceutical regulatory affairs. [1976-013 (1995) : 64-65]

58. Applications are invited from graduates in CHEMISTRY, BIOCHEMISTRY, MICROBIOLOGY, FOOD TECHNOLOGY, ENGINEERING or related disciplines. [1976-021 (1995) : 68]

59. Essential: An honours university degree or equivalent in a relevant discipline together with appropriate experience in research or industry and /or a relevant postgraduate qualification. [1976-021 (1995) : 68]

60. If you are interested in the above Studentships you must have, or expect to gain, a first or upper second class honours degree in an appropriate scientific discipline and would register for a higher degree. [1976-045 (1995) : 73]

61. The post holder will be required to supervise staff and liaise effectively with scientists from other disciplines. [1976-051 (1995) : 75]

62. Candidates should hold a degree in ecology, forestry or related discipline and, ideally, have recent research experience in one or more of the following fields: British mammals, silviculture and botanical monitoring. [1976-051 (1995) : 75]

63. The Science Faculty offers courses within and across the disciplines of Biology, Chemistry, Earth Sciences and Physics and Science Education, of which the two so far covered in the HEFCE Quality Assessment exercise - Chemistry and Earth Sciences - have both received 'excellent' ratings. [1976-055 (1995) : 76]

64. If you have a good honours degree or equivalent in a scientific discipline, and preferably some experience of teaching science in higher education, we would be very interested to hear from you. [1976-055 (1995) : 76]

65. You should have, or expect to obtain, a good Honours degree in a relevant biological discipline. [1976-078 (1995) : 81]

66. You will need a Ph.D. or equivalent research experience in a relevant discipline. [1976-087 (1995) : 84]

67. We also have vacancies in a range of disciplines in our other divisions. [1980-002 (1995) : 51]
68. Funded by BBSRC and industry, we are now offering studentships, to commence in October 1995, in the following disciplines: Process Engineering; Environmental Physics; Vision and Robotics [1980-007 (1995) : 55]

69. You should have, or expect to obtain, a first or upper second class honours degree in an appropriate discipline. [1980-007 (1995) : 55]

70. An MSc in Statistics, with a 2:1 minimum in a Mathematics/Science discipline, you will have relevant experience working as a consulting Statistician within industry or have a proven record of success as an external consultant. [1980-009 (1995) : 57]

71. You must hold a degree in an appropriate environmental discipline, have at least two years' experience in project based wildlife work, possess excellent communication skills and demonstrate an ability to work as part of a team. [1980-012 (1995) : 58]

72. Candidates should have, or expect to receive, a good honours degree in Biochemistry, Chemistry or related discipline and be interested in the biophysical chemistry of protein structure and function. [1980-031 (1995) : 64]

73. The studentships are only available to UK nationals, who must have, or expect to obtain this year, at least an upper second class honours degree in an appropriate discipline. [1980-033 (1995) : 64]

74. Applicants should have a first degree in computing or a related discipline with a relevant postgraduate qualification, ideally a Ph.D., and prior experience in teaching, preferably in higher education. [1980-046 (1995) : 67]

75. Applicants should have a good degree or equivalent in physics or a related discipline, with a high level of competence in computing and instrumentation. [1980-047 (1995) : 68]

76. Applicants should have or expect to obtain a good honours degree in an appropriate discipline. [1980-123 (1995) : 86]

77. Research activities in all areas of chemical engineering, biotechnology and related scientific disciplines are organised into eight Research Programmes as follows: [1980-126 (1995) : 87]

78. The section is currently providing services in the fields of megavoltage therapy X-ray, CT scanning, ultrasound imaging and various paramedical disciplines. [1984-007 (1995) : 53]

79. Applications are invited from candidates who have, or expect to have a First or Upper Second Class honours degree in an appropriate science or engineering discipline. [1984-008 (1995) : 53]

80. Whether we're assessing the contribution of the Attack Helicopter in anti-armour warfare, or conducting an historical analysis of the effects of shock and surprise in land battle, our work exercises the minds of over 600 scientific and military staff encompassing a wide range of disciplines and skills. [1984-012 (1995) : 55]

81. You should either be completing your studies this year and have a good first degree in a scientific or engineering discipline, or, in addition you should have from 1-3 years of technical/research experience with a consumer-oriented, blue-chip organisation, in sectors such as; fmcg, food, pharmaceuticals, paper, medical products or toiletries. [1984-014 (1995) : 57]

82. Along with a degree in a Bioscience or Chemistry discipline, you should have spent a minimum of two years in a food and drink, fermentation or pharmacology environment. [1984-022 (1995) : 60]
83. Applicants should hold, or expect to obtain in the near future, a Ph.D. in an applied mathematical discipline. [1984-035 (1995) : 62]

84. The successful candidate will have a good honours degree in Mechanical Engineering or a related discipline, have relevant postgraduate experience, and a proven ability to work on applied materials mechanics problems. [1984-040 (1995) : 64]

85. We also have vacancies in a range of disciplines in our other divisions. [1984-041 (1995) : 64]

86. A degree or equivalent in Chemistry or a related discipline is required. [1984-045 (1995) : 66]

87. Applicants should possess a degree, BTEC higher certificate or equivalent qualification in an appropriate scientific discipline. [1984-068 (1995) : 72]

88. Applicants are expected to have a first or upper second class degree in one of the relevant disciplines and should send their CV, together with the names and addresses of two academic referees, to the Laboratory Personnel Officer, Institute of Food Research, Earley Gate, Whiteknights Road, Reading, Berks RG6 6BZ quoting ref: R20/95. [1984-094 (1995) : 77]

89. The School of Environmental Sciences invites applications for the following studentships. Applicants should have a good Honours degree in Biology, Geology, Geography, Environmental Sciences, Economics or a relevant Social Science discipline. [1984-105 (1995) : 79]

90. Applicants should have a good degree in a Freshwater Science or a related discipline, plus two years' relevant postgraduate experience. [1989-005 (1995) : 57]

91. The position would suit a Postdoctoral student with experience in one or more of the disciplines of structural geology, elastic sedimentology, stratigraphy and petroleum geology. [1989-016 (1995) : 62]

92. Candidates should possess a good honours degree in Biochemistry or a similar discipline, have a strong knowledge of Protein Chemistry gained through several years of post-graduate study or industrial experience. [1989-028 (1995) : 65]

93. A Research Fellowship is available for the above work, which is particularly suited to applicants with postgraduate qualifications in a scientific or engineering discipline who have preferably some experience in particle technology. [1989-051 (1995) : 71]

94. Applications are invited from MRCVS or degree qualified/ experienced candidates to develop new course modules/ facilities in wildlife rehabilitation, physiology and other animal disciplines, to national diploma level. [1989-065 (1995) : 74]

95. Working as part of a multi-disciplinary team, you should be qualified to degree level or equivalent in Chemistry, Geology, Civil Engineering, Environmental Science or other relevant discipline (with Chemistry studied to at least "A" level standard, or as part of a subsequent qualification). [1989-068 (1995) : 75]

96. Applicants should have a Ph.D. or a good first degree and research experience in a relevant discipline. [1989-073 (1995) : 76]

97. The person we are looking for must hold a Ph.D. in economics, sociology, anthropology or other appropriate social science discipline. [1989-083 (1995) : 78]

98. You should possess an honours degree in a suitable scientific discipline from a UK University of equivalent. [1989-099 (1995) : 82]
99. Educated to degree level in a relevant discipline and possessing a postgraduate qualification in the field of plant biochemistry and/or physiology, you should have relevant research experience in a plant biology laboratory and must be a flexible, cooperative team player with good communication skills. [1989-100 (1995) : 83]

100. A Ph.D. in either disciplines would be an advantage. [1989-100 (1995) : 83]

101. Applicants must have a first degree in a related scientific discipline and be familiar with basic laboratory practice gained in a molecular biology environment. [1989-109 (1995) : 84]

102. The successful applicant should have demonstrated: [...] interpersonal skills for successful management of a multi-disciplined scientific environment. [1993-008 (1995) : 54]

103. With a Ph.D. in either plant chemistry, plant biochemistry or a related discipline, you will have an aptitude for practical work and be conversant with either chromatographic techniques and/or the use of enzymes in catabolic work. [1993-027 (1995) : 59]

104. The nature of the research programme is highly cross-disciplinary, so the flexibility to operate effectively in areas outside your specialist discipline is essential. [1993-034 (1995) : 61]

105. A Ph.D. in an appropriate discipline and at least three (3) years of relevant experience is required. [1993-064 (1995) : 70]

106. Although the post-holder will be a physical scientist, the emphasis of the post will be on working with a range of disciplines such as nutrition, microscopy, mathematical modelling and biochemistry. [1993-078 (1995) : 73]

107. Essential requirements are a 2(i) degree in Food Science or Food Technology or equivalent discipline and the ability to assimilate and interpret detailed requirements of foods laws, together with excellent communication and interpersonal skills. [1993-080 (1995) : 73]

108. The post-holder should have an Honours Degree in Occupational Hygiene, or alternatively, a Degree or equivalent in a Science or Engineering discipline together with either a British Examining Board in Occupational Hygiene (BEBOH) or postgraduate qualification in Occupational Hygiene. [1993-082 (1995) : 74]

109. Ideally, candidates should be educated to degree level or equivalent in a science or engineering discipline. [1993-083 (1995) : 74]

110. Excellent communication skills, effective contribution of ideas to a multi-disciplined project effort and an ability to provide support to your colleagues will enable you to succeed. [1993-086 (1995) : 75]

111. The confidence and broad technical knowledge to work across several scientific disciplines is required, and experience of process validation would be a distinct advantage. [1993-092 (1995) : 77]

112. With a first degree in Chemistry, Environmental Science or other relevant discipline, you must have at least 10 years experience in contaminated land investigation, evaluation and reporting, preferably in a consultancy environment. [1998-010 (1995) : 75]

113. Degree qualified (or equivalent) in Environmental Science, Oceanography or related discipline, you will have at least 2-5 years relevant working experience where you have gained a particular strength in two or more of the following areas, with an appreciation of them all: “Oceanography”, “Mathematical Modelling”, “Water quality”, “Marine Ecology”. [1998-010 (1995) : 75]
114. A BSc (Hons) in a scientific or medical discipline is a pre-requisite, whilst further research studies would be an advantage. Specific knowledge of all aspects of product/skin interactions is essential. [1998-011 (1995) : 76]

115. Applicants must have at least a lower second class honours degree, or equivalent primary qualification in a relevant discipline, [1998-016 (1995) : 78]

116. and hold, or expect to obtain shortly, a Ph.D. in biochemistry, microbiology, pharmacy or related discipline. [1998-016 (1995) : 78]

117. You must have a 2.1 honours degree in a relevant discipline. [1998-028 (1995) : 81]

118. Arising from a further expansion of the Faculty's Research Centre, applications are invited from graduates with a minimum of an upper second class honours degree in an appropriate discipline and with appropriate experience for research posts in the following areas: [1998-048 (1995) : 88]

119. Candidates should possess an Honours Degree and postgraduate research experience in a relevant discipline such as Biochemistry, Molecular Genetics, Microbiology or Plant Pathology. [1998-049 (1995) : 88]

120. The ideal candidate would have a degree in Chemistry or a related discipline, demonstrable experience of application building in Windows or Macintosh and experience of Relational Database Management Systems. [1998-053 (1995) : 89]

121. For both positions, candidates with good “A” level passes will be considered but a degree or equivalent in a relevant discipline would be preferred. [1998-065 (1995) : 92]

122. Applicants should possess a degree, BTec Higher Certificate or equivalent qualification in an appropriate scientific discipline. [1998-071 (1995) : 93]

123. This is a company that believes in individual responsibility, a multi-disciplined approach and a strong team ethos. [1998-095 (1995) : 100]

124. With a range of high-technology products, encompassing mechanical, optical, electronic and IT disciplines, they present a diverse and challenging Engineering environment. [1998-095 (1995) : 100]

125. We have opportunities countrywide at every level - from those with six months' experience as a CRA or in a related discipline, to CRAs with several years' experience and who are now ready for a bigger and more interesting challenge. [1998-100 (1995) : 102]

126. This would be an ideal opportunity to gain experience in an increasingly important discipline. [1998-101 (1995) : 102]

127. The successful candidate is expected to have a degree in a relevant scientific discipline with two to four years experience in Quality Assurance, Pharmaceutical R&D or manufacturing. [2002-007 (1995) : 56]

128. Applicants should have a good honours degree in an engineering or science discipline. [2002-013 (1995) : 58]

129. The discipline is a key area for terrestrial studies of climate change and is also fundamental to the understanding of nutritional interactions and food webs in freshwater and marine ecosystems. [2002-014 (1995): 58]
130. Candidates for this post will have a good first degree and preferably a postgraduate degree in a relevant discipline. [2002-019 (1995) : 60]

132. Candidates should possess an Honours Degree in Horticulture or allied discipline supported by relevant postgraduate qualifications and/or industrial experience in production or environmental horticulture. [2002-023 (1995) : 62]

133. Applicants for both posts should have good honours and postgraduate degrees in a scientific or engineering discipline, with practical experience of mathematical software and modelling, C and/or Fortran programming and experience of applying computational techniques to industrial problems. [2002-029 (1995) : 64]

134. Acquire team management responsibility while retaining hands-on contact with your discipline as a Microbiologist [2002-040 (1995) : 67]

135. The applicant's duties will be of a multidiscipline nature and will be both in the laboratory and in the field. [2002-041 (1995) : 67]

136. We also look for qualities beyond your degree discipline - the capacity for development, and ability to acquire managerial and professional skills rapidly. [2002-060 (1995) : 73]

137. You should have: A good (first or second class) first degree in a biological discipline [2002-061 (1995) : 74]

138. Previous laboratory experience in standard molecular biology techniques is essential as is a BSc in a biological discipline. [2002-071 (1995) : 76]

139. A graduate in a mathematical or engineering discipline, you will preferably have a further degree or relevant experience. [2002-081 (1995) : 78]

140. Of great importance will be your creative approach to problem solving combined with the enthusiasm and the ability to communicate effectively with scientists from a broad range of disciplines. [2006-002 (1995) : 59]

141. Degree level in a scientific or business related discipline, you will have a broad knowledge of business and a good understanding of project planning theory and practical experience of the latest software packages. [2006-004 (1995) : 60]

142. These were followed by conceptual ability, knowledge and competence in an academic discipline, foreign languages and numeracy. [2006-007 (1995) : 61]

143. You should be educated to degree level or equivalent, in a relevant discipline, and possess excellent communication skills and an enthusiasm to develop your experience across a diverse range of projects. [2006-011 (1995) : 63]

144. We now have an opportunity for a graduate in pharmacology or a related discipline to join a multidisciplinary team engaged in the identification of novel anti-inflammatory/immunomodulatory drugs. [2006-019 (1995) : 66]

145. The successful applicant will be expected to develop skills in a wide range of disciplines, from molecular biology and virology to clinical investigation of disease. [2006-025 (1995) : 68]
146. The twelve editorial and production groups will manage publications in most medical, scientific, business, social sciences and humanities disciplines. [2006-036 (1995) : 71]

147. The Linbury Trust invites applications from scientists and researchers from a broad range of disciplines for the first Linbury Research Fellowship in Chronic Fatigue Syndrome. [2006-040 (1995) : 72]

148. These positions will evolve to include studies in other disciplines of toxicology after appropriate training. [2006-049 (1995) : 75]

149. Reporting to the General Manager Toxicology Operations, the successful candidate will be responsible for directing studies in the discipline of neurotoxicology. [2006-049 (1995) : 75]

Similarly, as a disciplined professional, you will recognise the importance of adopting an ethical and proactive approach in this key area of our business. [2006-058 (1995) : 77]

150. The successful candidate will hold a good degree in a materials-related discipline (materials, ceramics, chemistry, physics) preferably complemented by postgraduate or industrial experience. [2006-061 (1995) : 78]

151. Applications are invited from candidates who have, or expect to have, a First or Upper Second Class Honours degree in an appropriate science or engineering discipline. [2006-067 (1995) : 79]

152. It is essential that you have a Degree, preferably in a science or engineering based discipline and ideally a Health and Safety qualification, (NEBOSH, Dip SM or equivalent). [2006-086 (1995) : 84]

2005

1. Ideal academic qualifications are an Honours degree in an ecological or biological science and an MSc in a related discipline. [2481-011 (2005) : 56]

2. Establishing the safety of our crop protection products in the environment, we sit at the interface of a number of different scientific disciplines and offer a stimulating setting in which to progress a specialist career. [2481-012 (2005) : 57]

3. Each comprehensive programme in the chosen discipline combines the completion of an MSc, where appropriate, and practical training in hospital laboratories or departments. [2481-013 (2005) : 57]

4. D Young & Co is a large firm of Patent and Trade Mark attorneys active across a diverse range of science and engineering disciplines. [2481-014 (2005) : 57]

5. Antisoma operates a project management system, and you will be required to work extensively across all appropriate disciplines in house to help the team achieve the required project objectives. [2481-025 (2005) : 60]

6. For all four posts, a degree or equivalent in a relevant discipline and at least 5 years' industrial, research or regulatory experience relevant to environmental regulation and/or decommissioning in the nuclear industry are essential. [2481-033 (2005) : 63]

7. A degree or equivalent in a relevant discipline, such as natural sciences or engineering, is essential whilst corporate membership of a relevant professional body is desirable. [2481-033 (2005) : 63]
8. An appropriate degree, or equivalent, in a science or engineering based discipline is essential coupled with at least 5 years' processes/industry or other experience relevant to environmental strategies and waste management. [2481-033 (2005) : 63]

9. This is made up of experts ranging across relevant specialist disciplines who assist on a variety of site designation and species management issues as well as in quality control of research and scientific advice. [2481-036 (2005) : 64]

10. You will probably have a degree in a relevant discipline and/or experience in relevant areas. [2481-049 (2005) : 68]

11. You must hold a degree in Geology, Hydrology, or related discipline and possess at least 2 years' relevant experience. [2481-058 (2005) : 71]

12. A graduate in a relevant scientific discipline with at least 2 years' GIS experience including working knowledge of ESRI Geographic Information System software, you will possess experience in the preparation and presentation of reports with cartographic content, both technical and non-technical. [2481-058 (2005) : 71]

13. The Department of Epidemiology and Population Health (EPH) is looking for someone to work within the discipline of demography, epidemiology, public health nutrition or statistics. [2481-070 (2005) : 75]

14. The appointee will be expected to develop an internationally competitive research profile and contribute to the teaching and training of undergraduates and postgraduates in both the disciplines of Chemistry and Environmental Science. [2481-071 (2005) : 75]

15. You will have the ability to lead a multidisciplined team, manage budgets and deliver against challenging timelines. [2485-002 (2005) : 56-57]

16. You will have either a relevant postgraduate degree and a degree in ecology or similar discipline [2485-012 (2005) : 60]

17. and at least two years' experience in a professional ecological field or a degree in ecology or similar discipline plus three years professional ecological experience. [2485-012 (2005) : 60]

18. This will require a proven scientific background, preferably including experience in a QC laboratory and a degree level education in Chemistry or a related discipline. [2485-028 (2005) : 66]

19. Ideally degree qualified in a scientific, environmental or engineering discipline, you’ll need at least three years’ relevant industry experience, ideally within a regulated industry. [2485-038 (2005) : 71]

20. The ideal candidate will have at least three years industrial experience as an electrophysiologist, although other disciplines will be considered. [2485-039 (2005) : 71]

21. With a BSc in a life sciences discipline you will have some experience with molecular biology including DNA and protein extraction, protein and nucleic acid blotting and PCR. [2485-039 (2005) : 71]

22. A PhD in a relevant scientific discipline is preferred, together with at least 5 years experience either in an academic or industrial development pharmaceutics environment. [2485-041 (2005) : 72]

23. You must be educated to ONC level or equivalent, in an appropriate discipline (for UK nationals), or High School Graduation with further military or civilian technical school training (for US nationals). [2485-044 (2005) : 73]
24. The Research Centre in Oxfordshire brings together scientists of multiple disciplines and varying backgrounds who have access to state-of-the-art technology. [2485-045 (2005) : 73]

25. In addition to your degree in Biology, Geography or a related discipline, you will have at least three years' experience in, and a good knowledge of, the Biodiversity Action Plan process and of the way in which local and regional government works and relates to national Government. [2485-049 (2005) : 74]

26. For a senior role, you'll need to be an established research professional with an international reputation in aerodynamics, control systems, computational fluid dynamics, combustion science, or another relevant discipline. [2485-051 (2005) : 75]

27. You should possess a minimum 2nd Class Honours Degree, HNC, HND (or equivalent) qualification in Chemistry, an Environmental, Geological or Physical Science or a related discipline. [2485-060 (2005) : 78]

28. The candidates should possess a first degree in a relevant discipline and have excellent interpersonal and organisational skills. [2485-062 (2005) : 78]

29. Applicants for post-doctoral positions should have a Ph.D. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline. [2485-083 (2005) : 85]

30. Applicants for post-doctoral positions should have a Ph.D. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline. [2485-083 (2005) : 85]

31. You will work as a media developer, making a critical contribution to the quality of our courses, collaborating closely with academics and other specialists to deliver world-class learning materials across a wide range of media and disciplines. [2485-086 (2005) : 86]

32. The postholder will be encouraged to initiate his/her own research line in these or related disciplines. [2485-092 (2005) : 88]

33. You will be comfortable working across a broad range of scientific disciplines. [2485-093 (2005) : 88]

34. What we require The candidate holds a PhD in a relevant engineering discipline, e.g. agricultural, horticultural or biosystems engineering; has ample research experience and proven scientific excellence, as evidenced by publications in major scientific journals; is a competent teacher and contributes to innovating education programmes; is active in attracting students to the University; contributes to the chair group's strategic positioning both in the University and at national and international level; is an inspiring leader and an excellent communicator; has a wide experience and good contacts in industry, as evidenced by contract research and consultancy; has Dutch for a native language or is willing to learn the language quickly, and is fluent in English. [2485-095 (2005) : 88]

35. The successful applicant for this post will have a good first degree plus doctorate (or be close to submission) in Engineering, Computer Science or related discipline. [2485-096 (2005) : 89]

36. The successful applicant will have a good first degree and doctorate (or be close to submission) in Engineering, Computer Science or related discipline with experience in 3D computer vision and strong programming skills in C/C++. [2485-096 (2005) : 89]

37. The successful candidate will have a good first degree and doctorate (or be close to submission) in Engineering, Computer Science or related discipline, experience in sensor-driven actuation and strong computing skills in C/C++. [2485-096 (2005) : 89]

38. With a good First Degree in Chemistry, Physics, Biology or other relevant subject and significant practical work experience in a related discipline, you will be able to contribute to curriculum design and
development and be able to teach at a range of levels, i.e. undergraduate / postgraduate. [2485-101 (2005) : 90]

39. You will be educated in an engineering or scientific discipline at good degree/ further degree level. [2489-005 (2005) : 60]

40. Interested applicants will be educated to degree level or equivalent ideally with a science related discipline. [2489-006 (2005) : 60]

41. This is a 3 year training and development position for a post-doctoral scientist who has either recently completed his/her doctoral studies, is moving into a new research discipline or has limited previous experience of key transferable skills. [2489-008 (2005) : 62]

42. Your duties will be broad reaching, ranging from the biochemical analysis of clinical samples through to formulation and analysis of new products for skin care. With a BSc (Hons) in a biological discipline, you'll ideally have 2-3 years' practical experience of biochemical and/or molecular biology techniques. [2489-013 (2005) : 64-65]

43. The successful candidate will ideally possess either a PhD or a good 1st / 2nd degree in physics, maths or similar discipline. [2489-021 (2005) : 68]

44. URGENT OPPORTUNITIES Graduates/Technicians – Any disciplines [2489-032 (2005) : 72]

45. Your proactive approach will enable you to anticipate project requirements and lead a multidiscipline team, manage budgets, and deliver against challenging timelines. [2489-035 (2005) : 72]

46. Applicants should possess a PhD in biochemistry, bioinformatics or an equivalent discipline. [2489-064 (2005) : 79]

47. The ideal candidate should have a good degree in a scientific discipline and an appreciation of consumer markets. [2493-007 (2005) : 56]

48. Managing a team of between 4-5 scientists in the disciplines of medicinal, analytical and synthetic chemistry, you will be responsible for deriving and delivering medicinal chemistry strategy on Galapagos' programmes. [2493-008 (2005) : 57]

49. You will also be degree qualified in science, engineering or a related discipline, and ideally have membership of a professional institution. [2493-033 (2005) : 66]

50. You should have a first degree in the physical or biological sciences and a PhD in biophysics, chemistry, surface science, biomaterials, or a related discipline. [2493-036 (2005) : 67]

51. With a PhD in physics, electronic engineering, materials science or a related discipline, you will have experience in one or more of the following: MBE growth, ultra-high vacuum systems, semiconductor device fabrication and characterisation, and the ability to work as part of a team in an interdisciplinary environment and liaise with Government, EC and University collaborators. [2493-037 (2005) : 67]

52. We are seeking able scientists from all levels with strong academic track records in quantitative disciplines. [2493-052 (2005) : 71]

53. It is likely that there will be a need for a Molecular Biologist, however since more than one appointment is planned, those with other degree disciplines are encouraged to apply. [2493-053 (2005) : 71]

54. Applicants should have, or expect to obtain, a first or upper second class degree in statistics/quantitative genetics or a related discipline. [2493-058 (2005) : 72]
55. Applicants should have, or expect to obtain, a first or upper second class degree in biochemistry, pharmacology or related discipline. [2493-060 (2005) : 73]

56. Candidates should have, or be likely to obtain, a first or upper second class honours degree in a relevant discipline, and should indicate one or more areas of interest from the list of topics mentioned. [2493-063 (2005) : 74]

57. Requirements Minimum of a degree level in Chemistry or Physics or an associated discipline [2498-006 (2005) : 52]

58. Applicants should have a good degree in a science-based discipline and knowledge of a high-level language such as Perl, Java or C++. [2498-009 (2005) : 52]

59. You will manage an interdisciplinary team of post doctoral level scientists and will liaise with your UK and USA colleagues across a wide range of scientific disciplines, including software, hardware, molecular biology and chemistry. [2498-010 (2005) : 53]

60. A BSc in a physical or life-science discipline and/or experience in the operation of sophisticated scientific instruments and familiarity with scientific software are required. [2498-010 (2005) : 53]

61. If you have experience in immunoassay, IVD development, IVD systems engineering and clinical chemistry we would like to hear from you, although applications from other disciplines will be considered on merit. [2498-012 (2005) : 54]

62. You are likely to have postgraduate qualifications in one of the following disciplines: microbiology, aerobiology, chemical or mechanical engineering, ideally with experience of working within a food research or food industrial environment. [2498-013 (2005) : 54]

63. Suitable candidates are likely to have a postgraduate qualification in microbiology or a related discipline. [2498-013 (2005) : 54]

64. Qualified candidates should have a Ph.D in a relevant scientific discipline and more than 5 years of post-doctoral research. [2498-015 (2005) : 55]

65. The candidate must have a Ph.D. in a relevant scientific discipline (Biophysics, Biochemistry); prior experience in modeling metabolic pathways; good knowledge of kinetics and thermodynamics of enzymatic processes and skills to model enzyme kinetics with the use of a variety of approaches. [2498-015 (2005) : 55]

66. You will need: A good honours degree (or equivalent) in either Maths/Physics or other relevant scientific discipline. [2498-016 (2005) : 56]

67. You will need: A good honours degree (or equivalent) in either Maths, Physics, Geography, Environmental Science or other relevant scientific discipline. [2498-016 (2005) : 56]

68. Applicants should be educated to degree level in a science based discipline, with 3 - 5 years postgraduate industrial experience. [2498-027 (2005) : 59]

69. A Ph.D. in Organic Chemistry, Polymer Science or a related discipline would be advantageous. [2498-027 (2005) : 59]

70. You’ll need a PhD in relevant discipline and 3-5 years’ post doctoral experience. [2498-037 (2005) : 64]
71. You’ll need a PhD in a relevant discipline and 3-5 years’ post doctoral experience. [2498-037 (2005) : 64]

72. Ideally you would also have a biological background in a relevant discipline and will have knowledge of immunoassay development, IVDD regulations and compliance expectations. [2498-043 (2005) : 66]

73. Both roles require a PhD, MSc or equivalent in a biomedical discipline, a flexible approach, and the ability to work on a variety of projects within schedule across different therapeutic areas. [2498-047 (2005) : 67]

74. The Life and Environmental Sciences Division at the University of Oxford is a highly interdisciplinary organisation, bringing together academic departments representing diverse disciplines but sharing common thematic interests. [2498-049 (2005) : 68]

75. You should: Have a postgraduate qualification, preferably PhD. A minimum requirement of a good honours degree in a related scientific discipline is essential; [2498-053 (2005) : 69]

76. Applications are invited from graduates educated to PhD level in Chemistry, Physics, Electrical Engineering and related disciplines for ten Postdoctoral positions funded through a recent Basic Technology award to a consortium including the Universities of Sheffield, Glasgow, Manchester and Nottingham to develop a massively parallel near-field photolithography system, the “Snomipede”. [2498-062 (2005) : 72]

77. With a broad competence in a range of technical disciplines, including monitoring techniques, computing and electronics, you’ll be able to produce concise scientific reports and manuals. [2502-002 (2005) : 54]

78. Educated to a minimum of degree level in physics, chemistry or related discipline plus two years' relevant experience, or a minimum of eight years' relevant experience, you will be marked out by your strong analytical, prioritisation and project management skills. [2502-004 (2005) : 55]

79. A good degree in a relevant discipline and at least four years' relevant experience. [2502-010 (2005) : 58]

80. A graduate in an appropriate scientific discipline or with three years equivalent experience, you’ll have at least two years' exposure to medical or scientific writing and editing and therefore be well used to working to deadlines. [2502-014 (2005) : 59]

81. You should have a degree or further qualifications in an appropriate scientific discipline and will have postgraduate experience in biological NMR. [2502-024 (2005) : 62]

82. You will have a biological sciences or veterinary degree possibly with further qualifications in an appropriate scientific discipline and will have experience/ working knowledge in mouse handling and experimental procedures, mouse breeding and genetics, a strong working knowledge of Animal (Scientific Procedures) Act 1986 or equivalent. [2502-024 (2005) : 62]

83. Successful small company in Biosciences is looking for a PhD to assist in the continued expansion of the company in an exciting variety of disciplines, particularly cell culture, virology, immunology and flow cytometry. [2502-031 (2005) : 65]

84. You will be degree qualified in a science discipline, and possess 5-10 years' QA experience in the Pharmaceutical industry in positions of increasing breadth and responsibility. [2502-034 (2005) : 66]
85. We believe that the next generation of disruptive technologies will spring from a marriage of the unique tools offered to us by biology with the powerful, highly developed discipline of digital microelectronics. [2502-042 (2005) : 69]

86. You must have, or be expecting to receive, a PhD in an appropriate discipline; a good track record of publications, and a proven ability to work on multidisciplinary projects are highly desirable. You will work collaboratively between the four Departments, augmenting the existing departmental research groups and drawing upon the outstanding infrastructure and facilities available. [2502-042 (2005) : 69]

87. You must be educated to at least ONC level (or equivalent) in any biological science discipline, together with an employment history in a research laboratory. [2502-047 (2005) : 71]

88. You must be educated to at least ONC level (or equivalent) in any biological science discipline, together with an employment history in a research environment. [2502-047 (2005) : 71]

89. He/she will have a BSc or equivalent in genetics, biochemistry or a relevant discipline. [2502-050 (2005) : 72]

90. The minimum requirement for candidates is an Upper Second Class honours degree in mathematics or related discipline. [2502-062 (2005) : 75]

91. Over 100 taught Masters programmes across a wide range of disciplines [2502-066 (2005) : 76]

92. Students should possess a first degree (minimum 2.1 or 2.2 with a MSc qualification) in the fields of mechanical engineering, building services engineering, chemical engineering, physics or other technical disciplines. [2502-067 (2005) : 77]

93. Applicants should have a good honours degree in chemistry (or a closely related discipline) and should be either UK citizens or from a member state of the EU. [2502-070 (2005) : 77]

94. You must hold a honours degree or equivalent in a relevant discipline, while a postgraduate degree or qualification would be desirable. [2506-002 (2005) : 54]

95. You must hold a degree or equivalent in a relevant science discipline. [2506-002 (2005) : 54]

96. As well as being a graduate in a Biological, Toxicological, Environmental or health-based discipline, or in Chemistry, you will have the ability to evaluate technical data, and compile in-depth reports. [2506-003 (2005) : 54]

97. Technical expertise in molecular biology and a postgraduate degree in a related discipline are essential. [2506-004 (2005) : 55]

98. With a degree or equivalent qualification in a relevant discipline, you will have at least 5 years' experience of working in a healthcare industry or regulatory environment. [2506-005 (2005) : 55]

99. Our Department is a significant funder of scientific research in a number of relevant scientific disciplines spending almost £100m annually directly and through its agencies. [2506-013 (2005) : 59]

100. The Candidate: […] A proven track record in the conduct and strategic management of scientific research in a relevant discipline and knowledge transfer. [2506-013 (2005) : 59]

102. The positions require highly self-motivated and organised individuals capable of managing several projects simultaneously, and interacting successfully with people of different disciplines and at many levels, both within and outside the company. [2506-019 (2005) : 61]

103. You should be qualified to degree level in Chemistry or a relevant scientific discipline, and should have a minimum of 5 years’ relevant experience in fuel additives, or a related product area. [2506-023 (2005) : 64]

104. You should be qualified to degree level in Chemistry or a relevant scientific discipline, and should have about 3 years’ relevant experience. [2506-023 (2005) : 64]

105. You should be qualified to degree level in Chemistry or other relevant discipline, and should have a minimum of 5 years’ relevant experience. [2506-023 (2005) : 64]

106. You should be qualified to degree level in Chemistry or other relevant discipline, and should preferably have 2 years’ industrial experience. [2506-023 (2005) : 64]

107. The successful applicant will have a first degree in Physics or related discipline, preferably a higher degree, and 3 years relevant experience in optics/materials. [2506-025 (2005) : 64]

108. You will gain: […] primary responsibility for a number of Schools across a variety of disciplines; [2506-040 (2005) : 69]

109. You will have a PhD in molecular biology, genetics, pharmacology or a similar discipline. [2506-048 (2005) : 72]

110. You will have a PhD in molecular biology, cell biology, biochemistry, pharmacology or a similar discipline. [2506-048 (2005) : 72]

111. This is a three year training and development position for a post-doctoral scientist who has either recently completed doctoral studies, is moving into a new research discipline or has limited previous experience of key transferable skills. [2506-050 (2005) : 72]

112. The disciplines of Medicine, Dentistry Psychiatry, Biomedical Sciences, Health & Life Sciences and Nursing & Midwifery there are 17 integrated divisions that invested a combined £85 million in research in 2003-2004. [2506-055 (2005) : 74]

113. Fully funded studentships are available for suitably qualified graduates (2(i) and above) with backgrounds in biological science, process engineering and related disciplines. [2506-077 (2005) : 79]

114. You will be educated to degree level, with an MSc in GIS or a related discipline, and experience of using GIS in a botanical and/or environmental context. [2511-002 (2005) : 52]

115. You will have the interpersonal skills required to work with people from a wide range of disciplines and seniority across the site. [2511-011 (2005) : 55]

116. You will be educated to at least BSc in a relevant scientific discipline and have at least five years experience in an appropriate analytical laboratory. [2511-020 (2005) : 58]

117. There are several positions in each discipline to be filled, mainly for blue chip pharmaceutical companies in London and the Home Counties. [2511-025 (2005) : 59]

118. Delivering internationally respected research of the highest quality, PML's research base is diverse and stimulating in many marine science disciplines, concentrating on integrating fundamental discoveries to
understand the complexity of marine systems and developing sophisticated ecosystem models. [2511-027 (2005) : 61]

119. You will be a highly motivated graduate from a numerate discipline, with experience in remote sensing, image processing, GIS or spatial analysis. [2511-027 (2005) : 61]

120. Candidates should ideally be qualified to PhD level in an appropriate biological, fisheries or mathematical discipline with at least two years’ experience of fisheries stock assessment [2511-036 (2005) : 63]

121. or other relevant discipline, such as population dynamics. [2511-036 (2005) : 63]

122. Specific water experience isn't essential, as long as you have around three months' laboratory experience and an HNC (or equivalent) in a biological discipline. [2511-045 (2005) : 69]

123. Applicants must hold a minimum of an HNC (or equivalent) in analytical chemistry, physical or life science or other relevant discipline. [2511-062 (2005) : 73]

124. High calibre students who have recently graduated with a first or upper second class honours degree in an appropriate discipline are being sought. [2511-068 (2005) : 75]

125. Fully funded studentships are available for suitably qualified home students with backgrounds in biological science, process engineering and related disciplines. [2511-079 (2005) : 79]

126. Masters qualification in a marine or a coastal discipline [2515-003 (2005) : 54]

127. As an experienced hydrometric officer, you’ll probably be a graduate or equivalent in an appropriate discipline or will have relevant experience. [2515-005 (2005) : 55]

128. With a degree in Environmental Sciences, Geography or a numerate discipline and experience of water resources issues including permitting, you’ll have strong project management and organisational skills and an analytical approach to problem-solving. [2515-005 (2005) : 55]

129. Qualified to degree level or equivalent in a biological discipline you will need good communication skills, be able to think innovatively and work well as part of a team. [2515-010 (2005) : 58]

130. Responding to a technology leader in this discipline, you will provide a reliable service in support of new product introduction, catalyst applications and process development, utilising a range of spectroscopic techniques available within the department. [2515-015 (2005) : 60]

131. Have you recently graduated with a good honours degree in Chemistry, Mathematics, Physics or other relevant scientific discipline? [2515-022 (2005) : 63]

132. You will need: A good honours degree (or equivalent) in either Physics, Mathematics, Chemistry or other relevant scientific discipline. [2515-022 (2005) : 63]

133. Educated to degree level, or equivalent, in an engineering or physics discipline, you will be a chartered engineer or have relevant experience that could lead to chartered status. [2515-024 (2005) : 64]

134. You will be a bright, motivated individual with a degree in a biological discipline. [2515-025 (2005) : 64]

135. We are now seeking innovators from a range of disciplines to join our dynamic teams introducing these technologies into our research programs and to our customers. [2515-041 (2005) : 70]
136. In addition, you will assist in the provision of advice and guidance on matters relating to the regulatory process and specific scientific discipline. [2515-061 (2005) : 76]

137. This post is in the chemistry/residues discipline. [2515-061 (2005) : 76]

138. You should hold a good honours degree and hold a doctorate degree in any of the relevant discipline (described above). [2515-063 (2005) : 76]

139. Applicants should have at least a first degree in biological sciences or in a related discipline, proven IT experience, and excellent written and verbal communication skills, and be able to work effectively in a multidisciplinary academic and clinical environment. [2515-065 (2005) : 77]

140. Applicants must have experience of teaching undergraduate and/or postgraduate programmes in pharmacology or a related discipline, [2515-069 (2005) : 78]

141. and have at least two years experience of research at postgraduate level in pharmacology or a related discipline. [2515-069 (2005) : 78]

142. Applicants should hold a good Honours Degree and a Doctorate in any of the relevant Engineering, Science or Textile related discipline. [2515-074 (2005) : 80]

143. Chemical engineers are the highest-paid graduates of all the engineering disciplines, closely followed by mechanical and electronic engineers. [2519-004 (2005) : 50-53]

144. Petroleum, Well, Project, Discipline and Production engineering, & Petro/Geophysicists [2519-005 (2005) : 54]

145. You must be educated to ONC level, or equivalent, in an appropriate discipline (for UK nationals), or High School Graduation with further military or civilian technical school training (for US nationals). [2519-010 (2005) : 57]

146. An enthusiastic scientist with 5-10 years' post-doc in vivo drug discovery experience with a PhD in Pharmacology, Physiology or a related discipline, you will be scientifically credible with significant experience of drug discovery in a biotech or pharmaceutical environment and a track record of delivery on NCE projects as part of a multidisciplinary team. [2519-021 (2005) : 61]

147. A Degree or equivalent qualification in an appropriate scientific discipline together with wide ranging experience of cell culture techniques in a research environment is essential. [2519-024 (2005) : 62]

148. To join us you will require a PhD in Epidemiology or a related discipline and experience in one or more of the following: GIS-modelling, satellite imagery, statistical analysis, insect vectors, vectors competence, arboviruses. [2519-032 (2005) : 65]

149. You will need: A good degree, or equivalent, in chemical engineering, physical science or a closely related scientific discipline. [2519-040 (2005) : 68]

150. You will need: A good degree, or equivalent, in chemical engineering, physical science or a closely related scientific discipline. [2519-040 (2005) : 68]

151. A degree in an appropriate scientific discipline is essential. [2519-042 (2005) : 68]

152. A degree in an appropriate scientific discipline is essential. [2519-048 (2005) : 70]

153. Applicants should possess a Degree or equivalent qualification in an appropriate scientific discipline. [2519-052 (2005) : 70]
154. He or she will be capable of networking with experts in diverse disciplines across multiple sites and has highly developed interpersonal communication skills. [2519-059 (2005) : 72]

155. You will have (or soon obtain) a PhD, and may have experience in proteomics, MS, bioinformatics, biochemistry or pharmacology. However, talented applicants are welcomed from any discipline who can demonstrate good technical abilities and willingness to work within a team dedicated to the development of new drugs to tackle human and animal diseases. [2519-067 (2005) : 75]

156. Applications from graduates in microbiology or a related discipline will be welcome. [2519-067 (2005) : 75]

157. You will be required to develop and grow all the various cognate disciplines within the School, this will include overseeing and facilitating the success of the Department of Pharmacy which resides within the School and working closely with its Head. [2519-072 (2005) : 77]

158. The programme covers a broad range of disciplines across the physical, life and behavioural sciences. [2524-001 (2005) : 16]

159. You will design and synthesize small molecule ion channel ligands, working in a multidisciplinary environment interacting with scientists from other disciplines. [2524-002 (2005) : 52]

160. Qualified candidates should have a Ph.D. in Life Sciences, Neuroscience, Pharmacology, or related discipline. [2524-004 (2005) : 52]

161. Educated to degree level in Pharmacology or a related discipline, you will be a self-motivated individual with a creative approach and good practical laboratory skills. [2524-005 (2005) : 53]

162. We are keen to recruit individuals with expertise in one or more of the following disciplines: • Ecological Risk Assessment • Probabilistic Risk Assessment • Population modelling and statistical analysis • Exposure modelling • Aquatic and terrestrial ecotoxicology [2524-007 (2005) : 54]

163. The ideal candidate will have a relevant post graduate qualification in Chemistry, or related discipline. [2524-016 (2005) : 57]

164. Applicants must have a PhD or equivalent in a relevant science or engineering discipline. [2524-021 (2005) : 60]

165. There are several positions in each discipline to be filled, mainly for blue chip pharmaceutical companies in London and the Home Counties. [2524-025 (2005) : 61]

166. The successful candidate is likely to have a PhD in a relevant discipline together with a sound understanding of fermentation technology and experience of operating fermenters. [2524-043 (2005) : 65]

167. A good scientific degree in a relevant discipline or extensive equivalent experience with a firm commitment to quality and safety are essential. [2524-045 (2005) : 66-67]

168. Supporting the Vehicle Assessment project teams, you will need an HNC or equivalent in an engineering discipline, together with experience in mechanical computer aided design. [2524-045 (2005) : 66-67]

169. Applicants must hold a minimum qualification in a relevant discipline at National Certificate and preferably at National Diploma level, or equivalent. [2524-053 (2005) : 71]

170. Ideally, you will have a postgraduate qualification, industry experience or research interests in related disciplines and previous teaching experience would be an advantage. [2524-058 (2005) : 73]
You will have a PhD or equivalent in an analytical **discipline** and a minimum of three years' experience in the analysis of positron emission tomography (PET) data. [2524-066 (2005) : 75]

You should possess a good honours degree in a numerate **discipline** [2524-071 (2005) : 77]

together with a PhD or equivalent research experience in a relevant **discipline**. [2524-071 (2005) : 77]

The successful candidate will have an honours degree in a relevant scientific **discipline** and a sound knowledge of good research practice. [2524-076 (2005) : 78]

Recruiting Scientists & Engineers on behalf of an Irish and International Clientbase All Levels All **Disciplines**

The successful applicant should have a degree in a relevant **discipline** and be a member of a professional body or possess appropriate post-graduate qualification. [2528-013 (2005) : 64]

Qualified to degree level in microbiology, biotechnology, biochemistry or a related **discipline**, you will be able to illustrate a proven track record working on infectious diseases. [2528-019 (2005) : 66]

Qualified to degree level in a scientific **discipline**, you will have a technical understanding of water supply and treatment processes. [2528-021 (2005) : 68]

Ideally you will be a recent graduate/post graduate probably in a chemistry/chemical engineering/biotechnology **discipline**, preferably with two or more years' industrial experience, and will have a thorough grounding in one of our core technology areas. [2528-030 (2005) : 71]

If you have a particular interest in synthetic organic chemistry, analytical chemistry, chemical engineering, pharmaceutical formulation or biology (including pharmacology, biochemistry and related **disciplines**), all the better. [2528-042 (2005) : 76]

To be successful in this role, you will need a BSc (ideally with an MSc or PhD) in a Biomedical **discipline**. [2528-045 (2005) : 77]

A background in drug safety, although useful, is not essential: we are also interested in candidates with in-depth knowledge of drug development gained through other **disciplines** such as clinical research regulatory, or pharmacology. [2528-045 (2005) : 77]

You are a graduate candidate from a technical **discipline** at any stage in your career. [2528-046 (2005) : 78]

The post holders will have a PhD in an ecological or related **discipline** and experience in modelling. [2528-051 (2005) : 81]

As part of our planning for RAE 2008, the School's research portfolio now integrates its scientific and clinical **disciplines** into cross cutting multi-disciplinary programmes focussing on human health, disease and treatment. [2528-060 (2005) : 85]

A core technology programme and the key **disciplines** of Chemical, Microbial, Nutrition & Food and Integrative Physiological Sciences underpin each theme. [2528-060 (2005) : 85]

The successful applicant for the Project Manager post will have a research degree (PhD or equivalent) in a relevant biological **discipline** and at least 5 years' R&D experience. [2528-067 (2005) : 87]
With related research/consultancy interests which complement existing work on microbial pathogens of food, food safety and textile microbiology, you will need demonstrable expertise in the field of Clinical Microbiology, evidenced by a first degree in a relevant discipline and a PhD or equivalent professional and research experience. [2528-075 (2005) : 89]

2006

1. You should have an excellent academic record, a degree in a numerate discipline (minimum 2.1), good communication skills, and experience in any of Java, .NET, C#, C++ or C. Applicants with Masters / PhD’s welcomed. Extensive training is provided. [2533-006 (2006) : 46]

2. With a higher degree in an experimental discipline and relevant industrial experience, you will have excellent interpersonal skills, practical ability and leadership potential. [2533-011 (2006) : 48]

3. You will have a BSc, MSc or PhD in a biotechnology discipline with at least two years experience in molecular biology and protein engineering. [2533-013 (2006) : 49]

4. You should have a demonstrated track record as an accepted expert in modelling science, statistics, or closely related discipline. [2533-022 (2006) : 52]

5. SCIENTIFIC OPPORTUNITIES (urgent) Graduates/Technicians-Any disciplines [2533-027 (2006) : 54]

6. To succeed in any of these roles, it is essential that you have a strong analytical background with a good honours degree in a relevant discipline and experience in a GMP regulated industry. [2533-029 (2006) : 55]

7. Each comprehensive programme in the chosen discipline combines the completion of an MSc, where appropriate, and practical training in hospital laboratories or departments. [2533-034 (2006) : 56]

8. With postgraduate qualifications in aquaculture, possibly a PhD, and broad-based experience in microbiology, immunology or a related discipline, the ideal candidate should be keen to apply their research skills to the development of new vaccines. [2533-037 (2006) : 57]

9. The successful candidate will have a first or upper second class degree in engineering or a closely related discipline with experience of building and testing electronic circuits. [2533-043 (2006) : 59]

10. The successful candidate will have a PhD or postdoctoral experience in computer vision, computer graphics or a closely related area together with a good first degree in engineering, computer science or related discipline. [2533-043 (2006) : 59]

11. Applicants should have, or expect to obtain, a first or upper second class degree in a related discipline. [2533-062 (2006) : 63]

12. Our research encompasses both pure and applied science that find solutions to specific scientific, and technological problems in traditional disciplines and new interdisciplinary areas. [2533-063 (2006) : 64]

13. Applications for a three-year PhD would be welcome from individuals who already have a Masters in an appropriate scientific discipline. [2533-065 (2006) : 64]

14. Applications are accepted from candidates with backgrounds from within a broad range of disciplines, including the biological, chemical, physical and mathematical sciences. [2533-066 (2006) : 65]
15. Applicants must have an honours level 8 degree in biochemistry or related discipline. [2537-004 (2006) : 58]

16. You will have a degree in a relevant science or engineering discipline and good skills in numerical and data analysis. [2537-007 (2006) : 59]

17. You’ll have a degree in a relevant science or engineering discipline and ideally a higher degree (or relevant experience). [2537-007 (2006) : 59]

18. Integrating into your research together with a team of scientists and specialists from different disciplines across food research, to understand the power of just how a cup of tea can quench thirst so remarkably. [2537-011 (2006) : 61]

19. It is an exciting and challenging role in which you will be able to influence many innovation projects, so besides strong leadership and experience of working with multi-discipline teams, your academic and professional record will need to be top-class. [2537-011 (2006) : 61]

20. Educated to degree level (2:1 or above) in a life science discipline, you will have an understanding of GMP/GCP requirements, excellent communication and organisational skills, a sharp eye for detail and computer literacy. [2537-017 (2006) : 64]

21. You should be educated to degree or HNC level in Biochemistry/life sciences or a related discipline with two years' relevant industrial/medical laboratory experience. [2537-023 (2006) : 66]

22. A degree or other equivalent qualification in a relevant scientific discipline such as pharmacology, veterinary science, epidemiology or clinical data management. [2537-027 (2006) : 67]

23. Minimum qualifications are a good honours degree in computer science, science or related discipline and experience of TCP/IP networking. [2537-035 (2006) : 69]

24. They must demonstrate a clear understanding of, and commitment to, the furthering of the discipline of Physiology. [2537-037 (2006) : 70]

25. A proven performance record in the form of peer-reviewed publications, integration with the international research community and demonstrated abilities to conduct research independently in multidisciplined diverse team will be essential. [2537-038 (2006) : 70]

26. In these key roles, you will be part of a multi-disciplined team working on a number of diverse projects from technical transfer of products from R&D through to process optimisation for existing products. [2537-051 (2006) : 75]

27. You will have graduated in a Science based discipline and have the ability to resolve technical issues and drive process improvements. [2537-051 (2006) : 75]

28. We are an exciting, vibrant Medical Education company with a rapidly growing reputation for excellence in all aspects of medical communications, particularly in the fields of oncology and other specialist disciplines. [2537-052 (2006) : 75]

29. You should be able to engage in critical scientific and commercial analyses of applied research projects across a range of life science disciplines, possess a creative approach to problem solving and enthusiasm for delivering healthcare outcomes. [2537-054 (2006) : 76]

30. You should be a graduate in Food Technology, Food Science or other relevant engineering discipline with a broad interest in the technical issues that underpin food manufacturing. [2537-057 (2006) : 77]
31. You should have a PhD in immunology, or a closely related subject, some postdoctoral research experience, an established research profile and ability to create a strong research plan and communicate effectively with other scientific disciplines and clinicians. [2537-062 (2006) : 79]

32. You should possess a PhD in biochemistry, biophysics or a related discipline. [2537-080 (2006) : 85]

33. You should have a first degree and PhD in an appropriate discipline and a proven record of post-doctoral research, evidenced by publications. [2541-003 (2006) : 56]

34. Within the multi-disciplinary structure of Unilever, we’re currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. [2541-004 (2006) : 57]

35. We’ll consider people at all levels. You should either have a degree or equivalent in a quantitative discipline, [2541-005 (2006) : 58]

36. or at least four years' experience in a range of quantitative disciplines (ideally in modelling), along with a strong academic background, preferably with a good understanding of current statistical software, such as SAS, SPSS and GIS. [2541-005 (2006) : 58]

37. And with a relevant degree in a numerate discipline, a full professional qualification and at least six years' relevant experience, you can influence the entire country's air pollution control from industry. [2541-006 (2006) : 58]

38. Within the multi-disciplinary structure of Unilever, we're currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. [2541-007 (2006) : 59]

39. Within the multi-disciplinary structure of Unilever, we're currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. [2541-011 (2006) : 61]

40. With a consultative and flexible approach, candidates will be graduates from a technical or scientific discipline, with a strong product/process development background and at least 5 years experience in a senior Technical/Project Management role, ideally in a highly regulated environment, e.g. medical, cosmetic, food, FMCG. [2541-019 (2006) : 66]

41. Experience of leading and working in multi-disciplined product development teams will have been gained in a high volume process manufacturing or possibly a research environment. [2541-019 (2006) : 66]

42. A graduate, in either a mechanical, electrical or scientific discipline, you will already have gained at least 3 years project management experience ideally, but not essentially, in manufacturing and preferably in a highly regulated environment, whilst excellent organisational and communication skills will be essential to success. [2541-019 (2006) : 66]

43. Degree qualified, ideally in an engineering discipline, you will already have at least 2 years experience in manufacturing/production management gained in a high volume batch manufacturing environment, where your leadership and people skills have enabled you to deliver results. [2541-019 (2006) : 66]

44. We currently have vacancies for regulatory scientists in a number of scientific disciplines [2541-023 (2006) : 67]

45. You will have a BSc, MSc or PhD in a biotechnology discipline with at least two years experience in molecular biology and protein engineering. [2541-024 (2006) : 67]
46. Degree qualified in Mechanical Engineering or related discipline with post graduate qualifications or related light/precision engineering industrial experience an advantage, you will possess excellent interpersonal, presentation, and communication skills. [2541-031 (2006) : 70]

47. Degree qualified in an engineering discipline, you will have previous experience of planning and controlling small to medium engineering projects. [2541-031 (2006) : 70]

48. For the Information Processing Regulatory Team Leader position, you will have a degree in chemistry, medical chemistry, pharmacology, or another relevant scientific discipline or equivalent qualification. [2541-032 (2006) : 71]

49. A graduate in life sciences or another relevant scientific discipline, you will be able to demonstrate excellent attention to detail when reviewing complex documentation and possess proven organisational and administrative skills. [2541-032 (2006) : 71]

50. The successful candidate will have a minimum of 5 to 7 years senior management experience and a qualification in an appropriate discipline. [2541-040 (2006) : 75]

51. Candidates will have an advanced degree in zoology and/or a related discipline and have a solid knowledge of species issues, with at least 5 years' experience in the sector. [2541-052 (2006) : 79]

52. In addition, you'll have ten years postgraduate experience, ideally gained in one of the following scientific disciplines: Bioanalysis, Central Laboratory Services/Immunology or DMPK. [2541-054 (2006) : 80]

53. You will have a PhD in an appropriate discipline, a proven record of research achievement and will be expected to develop a research programme and attract external funding. [2541-069 (2006) : 83]

54. The most appropriate background subjects would be Epidemiology and Public Health, and/or Nutrition, but because of the variety of tasks required for this post, graduates from other disciplines would be considered, given willingness to learn. [2541-074 (2006) : 84]

55. You should possess a relevant first or postgraduate degree in epidemiology, medical statistics or a closely related discipline and relevant experience. [2541-082 (2006) : 86]

56. Applicants must have, or be about to obtain, a PhD in a relevant discipline such as evolutionary or molecular ecology and have a keen interest in sexual selection and sperm competition. [2541-083 (2006) : 87]

57. Candidates should hold or expect to gain a good Honours degree in a relevant scientific discipline. [2541-099 (2006) : 94]

58. Candidates should have a BSc Hons. in plant molecular biology or a related discipline. [2541-101 (2006) : 94]

59. Roland Wolf, a cancer scientist and the director of the Biomedical Research Centre at the University of Dundee says that in addition to the obvious need for molecular biologists, geneticists and cell biologists in the next few years, there will be an increasing demand for scientists who have broad interests and training, because the process of creating new drugs, from basic genetics to clinical trials, will need research that overlaps many traditional disciplines. [2545-004 (2006) : 56-59]

60. Last October, the first annual NCRI conference brought together researchers of different disciplines from all over the world to discuss their work. [2545-004 (2006) : 56-59]
61. Experience of planning and managing budgets, and working with committees and senior scientists from different **disciplines** is essential. [2545-008 (2006) : 60]

62. You will have a PhD in synthetic organic chemistry, pharmacology or a similar **discipline**. [2545-012 (2006) : 62]

63. The ideal candidate should possess an honours degree in a biological science plus previous experience in a relevant **discipline** (although recent graduates will be considered). [2545-017 (2006) : 64]

64. A graduate in an appropriate life science **discipline**, e.g. medicinal chemistry, pharmacy, pharmacology, or other biological and pharmaceutical sciences (or equivalent) you will have a minimum of 2 years experience of medical or scientific writing and editing. [2545-023 (2006) : 67]

65. A PhD in Physics or a related **discipline**, you will have managed complex research and customer support programs in the field of organic electronics. [2545-026 (2006) : 68]

66. A post graduate in physics or relevant **discipline**, you will have a proven record of customer technical support and innovation within the organic electronics field. [2545-026 (2006) : 68]

67. A post graduate in materials science or a relevant **discipline**, you will have an in-depth knowledge of the materials science of thin films. [2545-026 (2006) : 68]

68. A PhD in a relevant **discipline**, together with five years' experience in drug metabolism and pharmacokinetics are essential, and you will have strong design and management skills in routine and mechanistic animal PK studies. [2545-027 (2006) : 69]

69. You must hold a degree or equivalent (GNVQ/HNC plus two years' laboratory experience in a relevant **discipline**, or a closely related subject e.g. Applied Biology). [2545-032 (2006) : 72]

70. Qualified to MSc or PhD level in Statistics or a similar **discipline**, you must have at least eight years' experience of Biostatistics and clinical drug development within the pharmaceutical industry. [2545-036 (2006) : 73]

71. The ability to understand complex biomedical information is essential, so you should have a good degree (preferably in a biomedical **discipline**) and time-management skills. [2545-046 (2006) : 78]

72. You will require an Honours science degree and preference will be given to candidates with a post-graduate qualification in a **discipline** relevant to occupational and environmental toxicology. [2545-049 (2006) : 79]

73. **SCIENTIFIC OPPORTUNITIES** (urgent) Graduates/Technicians-Any **disciplines** [2545-058 (2006) : 83]

74. Qualified to degree level in a computing or physical science **discipline**, you will have already worked in an IT environment where data analysis is high on the agenda. [2545-061 (2006) : 83]

75. The ideal candidate will have experience in technical support within a biology or chemistry **discipline**, and experience in the use of some of the following techniques: HPLC, LC and electrophoresis. [2545-067 (2006) : 85]

76. You must be educated to at least ONC level (or equivalent) in any biological science **discipline**, together with an employment history in a research environment. [2545-072 (2006) : 87]
77. You will have proven skills in mammalian cell culture, a BTEC HND/HNC or equivalent in biological sciences or related discipline and preferably expertise in cell-based assays and Western blotting. [2545-075 (2006) : 88]

78. Applicants will be subject to standard BBSRC terms and conditions that include at least an upper second class UK honours degree or an equivalent qualification and/or an MSc in a relevant discipline (e.g. biology, genetics, mathematics, data mining) and a 3 year qualifying UK residence period. [2545-087 (2006) : 92]

79. Candidates should hold or expect to gain a good Honours degree in a relevant scientific discipline. [2545-088 (2006) : 92]

80. Applicants should have, or expect to be awarded, a First or Upper Second Class Honours Degree or MSc in an appropriate discipline. [2545-090 (2006) : 93]

81. The University of Reading has a number of NERC studentships available across a variety of disciplines starting in October 2006. [2545-093 (2006) : 94]

82. Ideal profile: A degree qualification in a scientific discipline (e.g. Pharmacy, Chemistry, Biochemistry) [2550-011 (2006) : 61]

83. Ideal profile: A degree qualification in a scientific discipline (e.g. Pharmacy, Chemistry, Biochemistry) [2550-011 (2006) : 61]

84. You will need a good degree, or equivalent, in a chemistry-related discipline. [2550-027 (2006) : 70]

85. You must possess a degree in physical or natural sciences/engineering or a closely related discipline and three to five years' relevant technical and professional experience. [2550-028 (2006) : 70]

86. You should hold a degree in Marine Biology or very closely related discipline and have a minimum of one year's postgraduate experience in a related field, specifically including taxonomic identification of benthic macrofauna. [2550-030 (2006) : 70]

87. A higher degree in a science-based subject, preferably in an ecological discipline and a minimum two years relevant experience is required or a degree (or equivalent qualification) in biological sciences with a minimum of three years postgraduate experience of ecology. [2550-031 (2006) : 71]

88. Applicants should have a BSc / PhD in Chemistry or an appropriate biological discipline. [2550-034 (2006) : 73]

89. You will have a PhD or an excellent honours degree in Electronic Engineering, Physics, Chemistry, or another relevant discipline. [2550-036 (2006) : 74]

90. The candidate should be a graduate in molecular cell biology or a related discipline with previous experience in working with mammalian cell systems. [2550-041 (2006) : 76]

91. Requirements Minimum of degree level education in engineering or an associated physical science discipline. [2550-043 (2006) : 76]

92. Educated to degree level or equivalent in biological sciences or a related discipline, you will have a minimum of five years' experience in a scientific teaching laboratory. [2550-055 (2006) : 81]

93. You should have a good degree in the biological/biomedical sciences or a closely related discipline and preference will be given to those with a higher research degree. [2550-055 (2006) : 81]
This programme provides advanced academic, laboratory and research training in modern cellular, molecular and clinical aspects of this rapidly emerging discipline. [2550-072 (2006) : 86]

Over 100 taught Masters programmes across a wide range of disciplines [2550-074 (2006) : 87]

Suitable for candidates with strong quantitative skills from any discipline [2554-006 (2006) : 61]

You must hold a degree in a relevant Science discipline while a postgraduate degree in hydrogeology would be desirable. [2554-015 (2006) : 64]

You must hold a minimum of an HNC or vocational equivalent in a relevant civil engineering, geology or related earth sciences discipline. [2554-015 (2006) : 64]

A degree or equivalent in physical or natural sciences or engineering or a closely related discipline is essential, as is three to five years' technical/scientific experience. [2554-015 (2006) : 64]

We are keen to recruit individuals with expertise in one or more of the following disciplines: • Ecological Risk Assessment • Probabilistic Risk Assessment • Population Modelling and Statistical Analysis • Environmental Modelling and Risk Assessment • Ecotoxicology [2554-022 (2006) : 66]

It's a high-profile role that will see you both coordinate the growth of the discipline internally and lead external collaborations - accessing samples, developing and applying analytical methods to tumours and assessing the impact of pre-clinical compounds. [2554-025 (2006) : 67]

Candidates should possess a degree in a scientific or technical discipline and be highly computer literate, especially in the use and development of databases. [2554-031 (2006) : 70]

The successful candidate will be educated to at least degree level in a bio/chemical discipline with a minimum of five years experience in a medical diagnostics manufacturing or development environment. [2554-040 (2006) : 74]

The successful candidate will have a background in immunology or a related discipline with a PhD degree, and at least 4 years of post-doctoral experience in immunology, with a focus on HIV/AIDS. [2554-041 (2006) : 75]

The successful candidate will have a background in molecular virology or a related discipline with a PhD degree, and at least 1 year of post-doctoral experience in molecular virology, with a focus on HIV/AIDS. [2554-041 (2006) : 75]

You will be educated to at least BSc level, and preferably PhD level, in a relevant scientific discipline with at least five years' experience in an appropriate analytical laboratory [2554-044 (2006) : 76]

Applicants must have a first degree in a biological discipline as well as good computer and organisational skills and experience in molecular biology, mouse genetics or immunohistochemistry. [2554-052 (2006) : 80]

Applicants must have a BSc, or equivalent, in biology or related discipline. [2554-052 (2006) : 80]

You should have, or be working towards, a PhD in Chemistry or related discipline, or equivalent. [2554-059 (2006) : 81]

Qualified to BSc level, or equivalent, in a chemistry related discipline, you will also have a minimum of five years' experience in a chemistry, engineering or customer facing role. [2554-059 (2006) : 81]
111. Experience in a relevant scientific discipline or 3rd year practical project/sandwich year and holding of a personal Home Office licence is desirable. [2554-060 (2006) : 82]

112. You will have a good degree in chemical/petroleum engineering or a related subject and demonstrable academic or professional expertise in a relevant aspect of those disciplines. [2554-076 (2006) : 87]

113. The applicant should have a PhD in Electronic Engineering, Physics or a related discipline, and a proven background in device fabrication and the development of processes for micro-fabrication. [2554-082 (2006) : 88]

114. You will have a first degree in horticulture or a related discipline, together with a minimum of 2 years' experience in areas relevant to the Department. [2554-085 (2006) : 89]

115. As part of this exciting initiative, EaStCHEM requires a world-class scientist to a Chair of Physical Chemistry, to be based at the University of Edinburgh. Edinburgh's School of Chemistry offers an innovative and interdisciplinary approach to traditional chemistry subjects and is at the forefront of research in emerging disciplines. [2554-086 (2006) : 89]

116. Applicants should have, or expect to obtain a first or upper second class degree in a relevant discipline. [2554-090 (2006) : 90]

117. As an ambitious group, we require highly motivated individuals who are able to work across disciplines. [2558-010 (2006) : 63]

118. Applicants should hold a PhD degree in an appropriate scientific discipline. [2558-011 (2006) : 63]

119. Bristol is one of the UK's premier and most sought after universities with an international reputation for ground-breaking research across a diverse range of disciplines. [2558-013 (2006) : 64]

120. You should have a BSc/MSc in Computer Science, Mathematics, Electrical Engineering, or a cognate discipline, and you should ideally have some previous experience in programming software agents, agent platforms/environments, distributed systems or web-services. [2558-017 (2006) : 65]

121. You should have a PhD or equivalent research experience in Computer Science, Mathematics, Electrical Engineering, or a cognate discipline, and should ideally have some background in agent-based virtual organisations, knowledge representation, logic-based argumentation, web-services and programming.[2558-017 (2006) : 65]

123. We wish to recruit a suitably qualified person to act as a Research Assistant on a one year MRC Discipline Hopping project. [2558-018 (2006) : 65]

124. Having graduated with a good degree in a chemistry-related discipline, you will have the drive required to support change in moving the business forward. [2558-024 (2006) : 67]

125. In addition to an enthusiastic approach to laboratory work and problem solving, you’ll have either a PhD with two years’ relevant experience or a degree coupled with five years experience in Chemistry, Material Science or another related discipline. [2558-025 (2006) : 68-71]

126. The job holder should be educated to degree level or equivalent in a relevant biological discipline and be able to demonstrate a sound understanding of protein purification and characterisation techniques. [2558-027 (2006) : 72]
The successful candidate will be a self-motivated individual who possesses a diploma, HNC or equivalent experience in electronics, engineering or a related discipline. [2558-033 (2006) : 74]

Working in the Ink and Print Features Group with particular focus on security print designs and novel materials, the successful applicant will have a first degree in chemistry or a related discipline. [2558-037 (2006) : 76]

Working in the New Processes Group with particular focus on paper science/technology, the successful applicant will have a first degree in physics/chemistry/paper science or a related discipline. [2558-037 (2006) : 76]

You will have the opportunity to interact with: experts in a wide range of disciplines; government departments, and stakeholders in businesses and NGOs. [2558-041 (2006) : 78]

You should have a degree in Chemistry or a related discipline with a minimum of five years experience within the pharmaceutical or related industries. [2558-042 (2006) : 78]

MSc in relevant discipline preferred. [2558-043 (2006) : 78]

You should be educated to degree level or equivalent in a materials science, engineering or physics discipline and have proven relevant experience. [2558-046 (2006) : 79]

Previous experience in nuclear or other safety-critical engineering disciplines, particularly in-reactor materials performance, is advantageous but not essential. [2558-046 (2006) : 79]

To be able to work with scientists from a range of disciplines. [2558-053 (2006) : 82]

Degree qualified in Chemistry, Pharmacy or relevant discipline, applicants should have at least 2 years experience in development of solid-dose products. [2558-062 (2006) : 85]

Degree qualified in Chemistry or relevant discipline, applicants should have at least 2 years experience in pharmaceutical analytical development. [2558-062 (2006) : 85]

You must be educated to at least ONC level (or equivalent) in any biological science discipline. [2558-078 (2006) : 91]

Fully funded studentships are available for suitably qualified home students with backgrounds in biological science, process engineering and related disciplines. [2558-098 (2006) : 98]

Excellent verbal and written communication skills are essential, together with the ability to work effectively and contribute to a multi-discipline team environment. [2563-002 (2006) : 50]

While ideally you'll be PhD-qualified in an appropriate physical discipline, a strong track record of research is a must. [2563-004 (2006) : 51]

Candidates should ideally be qualified to PhD level in an appropriate biological, fisheries or mathematical discipline with at least two year's experience of fisheries stock assessment [2563-007 (2006) : 52]

or other relevant discipline, such as population dynamics. [2563-007 (2006) : 52]

Providing high level advice on scientific issues of concern to Government across the spectrum of disciplines; [2563-009 (2006) : 53]
145. For all roles you will need to be educated to at least degree level in a relevant discipline. [2563-011 (2006) : 54]

146. Candidates should be qualified to at least HND level or equivalent in a relevant electronics/computing discipline and be highly motivated, capable team members. [2563-014 (2006) : 56]

147. Educated to at least degree level in genetics, agriculture/animal science or relevant discipline you will have excellent knowledge of genetics. [2563-015 (2006) : 56]

148. You will be educated to at least BSc in a relevant scientific discipline and have at least five years experience in an appropriate analytical laboratory. [2563-020 (2006) : 57]

149. You should be a graduate in Food Technology, Food Science or other relevant engineering discipline with a broad interest in the technical issues that underpin food manufacturing. [2563-027 (2006) : 56]

150. You’ll need a first degree and PhD in a Public Health related discipline or equivalent academic experience, as well as knowledge of chemical and other environmental hazards. [2563-032 (2006) : 61]

151. You must possess a degree in an appropriate discipline and a recognised statistical qualification with a minimum of 3 years' relevant postgraduate experience in statistical research and/or consultancy, more than 5 years' experience is desirable. [2563-035 (2006) : 62]

152. Qualified to degree level in a scientific or technical discipline, you must have excellent communication skills and the ability to work well in a team. [2563-052 (2006) : 67]

153. Applicants with a higher degree in a relevant discipline are sought to support research into Endocannabinoids in Reproduction and locally Progestogens in Endometriosis by investigating the cellular and molecular mechanism by which levonorgestrel acts on endometrial cells and endocannabinoids influence reproduction, and the role endocannabinoids in predicting adverse pregnancy outcome. [2563-057 (2006) : 70]

154. For the Research Fellow post you would be expected to have a PhD in an Engineering, Design or physical science discipline. [2563-058 (2006) : 70]

155. You should have a PhD in applied mathematics or related discipline. [2563-073 (2006) : 75]

156. The School (rated 5 in RAE 2001) is the largest department in the University, with 63 academic staff covering the full range of biological sub-disciplines. [2563-073 (2006) : 75]

157. We offer a range of courses that can help you become a great scientist and secure a satisfying career, ready to meet the challenges of providing new services in the ever-changing technologically driven world of science, working alongside professionals from other disciplines. [2563-085 (2006) : 79]

158. With a degree or equivalent in Botany/Biology or other relevant discipline, you will have advanced computer skills, particularly Microsoft Office, databases and digital imaging software: Knowledge of plant taxonomy and nomenclature and a relevant postgraduate qualification would be an advantage. [2567-012 (2006) : 55]

159. You will hold a degree or equivalent in Botany/Biology or related discipline and have knowledge of the full Microsoft Office suite, databases and imaging software. Experience of handling herbarium specimens, taxonomy of plants and nomenclature would be an advantage. [2567-012 (2006) : 55]

160. The FGHP is launching an open-access online service that will include news, reviews and peer-reviewed research about emerging health threats which professionals in the discipline can contribute to and use. [2567-019 (2006) : 58]
161. Applicants should hold a BSc or PhD in a relevant discipline and have experience and enthusiasm. [2567-022 (2006) : 59]

162. You should possess a Degree or higher qualification in a relevant scientific discipline (biology, biochemistry, molecular biology, developmental biology, medical science etc). [2567-022 (2006) : 59]

163. A 3-year MRC funded PhD studentship for those who already have a Masters in an appropriate scientific discipline. [2567-023 (2006) : 60]

164. Situated close to Newmarket, the Trust employs over 220 staff comprising scientists, clinicians and support staff in a variety of disciplines. [2567-026 (2006) : 60]

165. You will join us with a NEBOSH Diploma or Certificate and a degree in a scientific discipline (preferably Biology or Chemistry), plus at least three years' experience of working with unsealed sources of ionising radiation. [2567-032 (2006) : 64]

166. The Immunology Laboratories are contained within the Pathology Suite facilitating interaction with the other disciplines and there are close ties with Imperial College School of Medicine. [2567-038 (2006) : 67]

167. You will at least be an honours graduate in a biological/ biomedical science (or equivalent) and will preferably hold a post-graduate qualification in toxicology or a related discipline. [2567-040 (2006) : 67]

168. You will possess MSc or PhD qualification in statistics or a closely related discipline, and be proficient in advanced statistics packages (SAS, S-Plus, etc.). [2567-053 (2006) : 71]

169. You will possess a degree (or equivalent) in Chemistry or related discipline and have a minimum of 3 years experience in an analytical/testing environment. [2567-053 (2006) : 71]

170. The Centres exciting goal is to translate genomic information into drugs in the clinic, and all the science disciplines are in place to make this possible. [2567-054 (2006) : 72]

171. You will need to have acquired an upper second class Honours degree in Chemistry with a PhD in a relevant discipline. [2567-057 (2006) : 74]

172. The GSK manufacturing site at Dartford is seeking technical experts and leaders who care passionately about what they achieve, but also about how they deliver it, to join us in a number of challenging roles across engineering and scientific disciplines. [2567-059 (2006) : 75]

173. The successful candidate will have a PhD or equivalent experience in a relevant discipline, and excellent organisational, communication and teamwork skills. [2567-066 (2006) : 78]

174. Applicants should be graduates with a background in an appropriate discipline and possibly a second degree. [2567-077 (2006) : 81]

175. Recruiting Scientists & Engineers on behalf of an Irish and International Clientbase All levels All disciplines All sectors [2572-009 (2006) : 62]

176. Headquartered in the US, with its research and development base in Dublin, we are now seeking to develop the next level of the technology and are looking for creative and talented scientists in a variety of disciplines. [2572-015 (2006) : 66]

177. The project is open to applicants who have recently graduated with an honours degree in a relevant engineering or scientific discipline (e.g. mechanical engineering, materials science). [2572-016 (2006) : 66]
178. Degree qualified in Chemistry or relevant **discipline**, applicants should have experience in pharmaceutical analytical development, a sound understanding of regulatory guidelines and the ability to work in an organised, diligent manner with an attention to detail. [2572-018 (2006) : 67]

179. Degree qualified in Chemistry, Pharmacy or relevant **discipline**, applicants should have experience in development of solid-dose products, a sound understanding of regulatory guidelines and the ability to work in an organised, diligent manner. [2572-018 (2006) : 67]

180. UCD is at the forefront of leading-edge research and teaching activities across a wide range of **disciplines**. [2572-019 (2006) : 67]

181. Project teams for individual programmes include specialists from **disciplines** across Veterinary Medicine in the UK and US. [2572-023 (2006) : 69]

182. Educated to BSc, MSc or PhD level in an engineering or numerate **discipline**, you will have good computational skills and thrive on using your initiative to solve challenging problems. [2572-035 (2006) : 74]

183. A degree or equivalent level qualification in a science-based subject (preferably in an environmental, geographical or hydrological **discipline**) is required. [2572-041 (2006) : 78]

184. Ideally, you should be educated to degree level in the field of chemical engineering or a related science based **discipline**. [2572-042 (2006) : 78]

185. They must have a strong academic background, including a higher degree in a relevant **discipline**, and several years' experience working with business requirements for research and knowledge transfer. [2572-043 (2006) : 78]

186. We also understand your commitment to the importance of the scientific **disciplines**. [2572-044 (2006) : 79]

187. A scientific specialist who’s respected in your field, you may currently be working in government, a regulatory body, academia or industry. You're committed to your **discipline** and keen to apply your knowledge in a real-world environment. [2572-044 (2006) : 79]

188. Potential applicants must have a minimum of HNC/HND in a scientific **discipline** (or equivalent experience) and will have already worked in a pharmaceutical or highly regulated laboratory. [2572-053 (2006) : 82]

189. If you’re an experienced and enthusiastic *in vivo* scientist with a degree in pharmacology, physiology or a similar biology-based **discipline**, this is an excellent career opportunity. [2572-059 (2006) : 85]

190. With a degree or equivalent in a technical **discipline**, you'll use your expert knowledge and experience in engine oil development and related technologies to lead and successfully deliver complex development projects. [2572-064 (2006) : 87]

191. You will have a PhD or equivalent in molecular biology, pharmacology, systems biology or a related **discipline** with at least five years' broad experience in bioinformatics including sequence based analysis and preferably with experience in RNA profiling analysis and/or the use of genomic technologies for clinical disease applications. [2572-072 (2006) : 91]

192. A senior programmer with a B.S or M.S in Computer Science, Biology, Statistics or other scientific **discipline** and at least eight years' application development experience, you will have strong project management and communication skills, proficiency with Java and Java IDE toots, Oracle RDBMS, SQL,
PL/SQL, Perl, C++, Experience in developing Validated and 21-CFR-Part 11 compliant systems in the pharmaceutical industry is also required. Ref: CS/1465/NS. [2572-072 (2006) : 91]

The position requires a broad-based knowledge and ability to interact and have active participation in research (preclinical) study design and clinical protocol development across several therapeutic areas and across all scientific disciplines active within the TMRI. [2572-072 (2006) : 91]

You will have a PhD in molecular biology, pharmacology or a related discipline, with up to 2 years of laboratory experience in proteomic research. [2572-072 (2006) : 91]

You will have a degree in analytical biochemistry/chemistry, biology or a related discipline with at least six years' of lab experience. Experience in mass spectrometry, HPLC and related technologies is required. [2572-072 (2006) : 91]

You will have a PhD in Molecular Biology, Pharmacology or a related discipline, with up to two years' laboratory experience in the development of biological assay methods. [2572-072 (2006) : 91]

You will have an HND/degree in molecular biology, biology, biochemistry or a related discipline with at least 2 years lab experience. [2572-072 (2006) : 91]

You will have a PhD in Molecular Biology, Pharmacology or a related discipline with up to 2 years of laboratory experience in assay and assay development. [2572-072 (2006) : 91]

You will have a degree in analytical biochemistry/chemistry, biology, or a related discipline with at least 6 years of lab experience. [2572-072 (2006) : 91]

You will have a BSc in Physics, Mechanical/Electrical Engineering, or a related discipline plus at least two to three years’ related technical experience. [2572-077 (2006) : 93]

A post-doctoral scientist or exceptional graduate in a relevant discipline will join a multidisciplinary group with a special focus on CF disease. [2572-078 (2006) : 94]

Applicants should have a PhD in polymer chemistry, formulation science, or other relevant discipline. [2572-079 (2006) : 94]

A degree in materials science, physics, chemistry or a related discipline and advanced knowledge and practical experience of transmission electron microscopy and scanning transmission electron microscopy are essential. [2572-080 (2006) : 94]

Coming from the disciplines of Biology or Physics, you should have research interests at the Biology-Physics interface in any area of molecular and/or cellular biology. [2572-084 (2006) : 95]

You will have completed a PhD in Geography, Earth Science, Geology or a cognate discipline, have a strong profile of academic publication and be able to demonstrate the potential to develop externally-funded research programmes. [2572-085 (2006) : 96]

Open to UK / certain EU nationals with a good first degree (upper second or better) in any relevant physical science or engineering discipline. [2572-086 (2006) : 97]

208. A check indicates you have selected options in that discipline [2572-136 (2006) : 98-99]

209. We're currently looking to recruit the highest calibre scientists from within the antibody field and other related disciplines in order to fuel our rapidly expanding discovery and development pipeline. [2576-004 (2006) : 62]

210. You should have an excellent academic record, a degree in a numerate discipline (minimum 2.1), good communication skills, and experience in any of Java, .NET, C#, C++ or C. Applicants with Masters / PhD's welcomed. [2576-008 (2006) : 63]

211. You must: be educated to higher degree level in any numerate scientific discipline, requiring high-volume automated data analysis [2576-012 (2006) : 65]

212. If you are a graduate or equivalent in a life science discipline, we have opportunities in our molecular biology department. [2576-012 (2006) : 65]

213. Degree educated in a relevant discipline, you'll be a confident communicator - often involving complex issues. [2576-014 (2006) : 66]

215. A graduate with a degree in a scientific discipline, you will have intuitive business acumen and real entrepreneurial drive, with proven experience in delivering successful innovation in a dynamic, multinational FMCG environment, and a track record in a line management role with significant team development and coaching responsibilities. [2576-038 (2006) : 75]

216. You will have a degree in a relevant scientific discipline and will have experience working on regulatory matters, preferably in the food industry, along with a proven ability to network and influence across internal business functions, and in the external regulatory community. [2576-039 (2006) : 75]

217. Applicants should have a good honours degree and a PhD in a relevant scientific discipline with knowledge and laboratory experience in biochemistry, microbiology and immunology. [2576-049 (2006) : 78]

218. Candidates must have a PhD in a chemical, physical or food-related discipline. [2576-053 (2006) : 79]

219. Applicants should have or expect to obtain a first or upper second class degree in genetics, immunology or related disciplines. [2576-054 (2006) : 79]

220. Your qualifications should include a degree in an appropriate science, engineering or environmental discipline. [2576-057 (2006) : 80]

222. The following qualifications are essential: a degree in Biological Sciences or a related discipline; [2576-065 (2006) : 81]

223. You must be educated to at least HNC (or equivalent) in any biological science discipline. [2576-078 (2006) : 87]
224. The Norwegian University of Science and Technology (NTNU) in Trondheim represents academic eminence in technology and the natural sciences as well as in other academic disciplines ranging from the social sciences, the arts, medicine, architecture to fine arts. [2576-094 (2006) : 91]

225. All three studentships are suitable for candidates with a good first degree in Maths, Physics, Computer Science, Electrical Engineering or other mathematical science disciplines; or a relevant masters. [2576-097 (2006) : 92]

226. You can search multiple disciplines [2576-152 (2006) : 94]

227. A check indicates you have selected options in that discipline [2576-152 (2006) : 94]

228. The Norwegian University of Science and Technology (NTNU) in Trondheim represents academic eminence in technology and the natural sciences as well as in other academic disciplines ranging train the social sciences, the arts, medicine, architecture to fine arts. [2580-004 (2006) : 56]

229. The Norwegian University of Science and Technology (NTNU) in Trondheim represents academic eminence in technology and the natural sciences as well as in other academic disciplines ranging from the social sciences, the arts, medicine, architecture to fine arts. [2580-010 (2006) : 57]

230. A good degree in a numerate discipline will have given you impressive mathematical and analytical skills, and you will bring a proven track record in applying hydrodynamic and water quality models and developing environmental impact assessments for fresh, estuarine and marine waters. [2580-011 (2006) : 58]

231. We welcome applications from HPC-registered Clinical Scientists in haematology or genetics, as well as pre-registration clinical scientists in these disciplines who have completed their formal training programme and are presently working to develop their portfolio for submission to the Association of Clinical Scientists and subsequent HPC-registration. [2580-016 (2006) : 60]

232. Educated to degree level (mathematical or scientific discipline preferable), you will have proven experience of working with and producing complex statistics as well as using IT for data interrogation and manipulation. [2580-033 (2006) : 65]

233. You should have a degree and preferably a PhD in Molecular Biology or a related discipline. [2580-038 (2006) : 66]

234. Applicants are expected to possess a solid scientific background, with a postgraduate qualification in a relevant discipline, or meteorology degree. [2580-059 (2006) : 75]

235. You must be educated to at least BSc level (or equivalent) in any biological science discipline, together with relevant experience of working in a research environment. [2580-061 (2006) : 76]

236. The School seeks a leader for the subdiscipline of parasitology, who will contribute actively to research, curriculum development and teaching in the field. [2580-062 (2006) : 77]

237. All three studentships are suitable for candidates with a good first degree in Maths, Physics, Computer Science, Electrical Engineering or other mathematical science disciplines; or a relevant masters. [2580-078 (2006) : 81]

239. A check indicates you have selected options in that discipline [2580-131 (2006) : 83]
The Royal Society’s Medals and Awards are an important part of our work in recognising excellence in science across the disciplines and exist to reward those who have made outstanding achievements. [2689-001 (2009) : 11]

Suitable candidates will be qualified to degree level in a scientific discipline, possess excellent practical skills and have a keen eye for attention to detail. [2689-005 (2009) : 47]

The role provides an exciting opportunity to apply an interest in biological sciences within a business discipline. [2689-007 (2009) : 48]

A degree in a relevant scientific discipline is required together with a good level of experience in mammalian cell culture techniques. [2689-008 (2009) : 48]

All this plus top employer profiles specialising in science and engineering disciplines to help you choose the right employer for you, it’s a must read! [2689-015 (2009) : 51]

Appointments to senior posts will be required to promote and facilitate teaching and research in their discipline and maintain an international reputation, possess leadership skills to develop new initiatives and contribute to, and enhance, existing research programmes. [2689-026 (2009) : 57]

Substantial experience in recruiting, leading the integration of multiple scientific disciplines into a coherent program and the multidisciplinary (biology, mathematical and computational biology, and new technologies) development of research teams is mandatory. [2689-033 (2009) : 59]

Candidates from related disciplines are welcome to apply. [2689-033 (2009) : 59]

Students will gain experience of several of the constituent disciplines of Pharmacy before embarking on their Ph.D. project and we hope to appoint high calibre students to these positions. [2689-034 (2009) : 60]

Open to UK / certain EU nationals with a good first degree (upper second or better) in any relevant mathematics, physical science or engineering discipline. [2689-041 (2009) : 62]

Are you interested in learning computing from the perspective of more than just one scientific discipline? [2689-042 (2009) : 62]

Applicants should possess, or hope to obtain, a 1st or 2i honours degree in one of the following sciences: Biology, Chemistry, Computer Science, Engineering, Mathematics, Physics and Statistics. Applicants from closely related disciplines will also be considered. [2689-042 (2009) : 62]

Open to UK / certain EU nationals with a good first degree (upper second or better) in any relevant physical science or engineering discipline. [2689-047 (2009) : 63]

Working alongside experts in related toxicology and metabolism disciplines, the successful candidates will have the opportunity to extend their own experience whilst making a critical contribution to the selection and development of new agrochemicals. [2694-003 (2009) : 52]

Educated to at least degree level in a relevant discipline, you will bring significant ADME experience and sound background knowledge of mammalian toxicology. [2694-003 (2009) : 52]

You will represent the department on project teams and will liaise closely with colleagues across a range of disciplines. [2694-005 (2009) : 53]
17. The Ideal Candidate will have: A good honours degree in a science or engineering discipline. [2694-008 (2009) : 54]

18. Possessing a degree (or equivalent) in Physics or a related engineering discipline, the successful candidate should ideally have prior technical development experience. [2694-011 (2009) : 56]

20. Candidates should ideally be qualified to Ph.D. level in an appropriate biological, fisheries or mathematical discipline with at least two years' experience of fisheries stock assessment [2694-014 (2009) : 57]

21. or other relevant discipline, such as population dynamics. [2694-014 (2009) : 57]

22. All this plus top employer profiles specialising in science and engineering disciplines to help you choose the right employer for you, it's a must read! [2694-026 (2009) : 62]

23. Applicants should have a Ph.D. (or equivalent) in biochemistry or a related discipline with relevant haemostasis laboratory experience in the health service, industry or academia. [2694-029 (2009) : 63]

24. We are seeking an exceptional individual to lead and drive Kew's ground-breaking activities in the discipline of restoration ecology. [2694-033 (2009) : 64]

25. Preferably you will have studied to Post Graduate level but as a minimum you will have attained a degree in a Biological discipline. [2694-035 (2009) : 65]

26. You will have a degree in a relevant discipline with post-graduate experience of working in mammalian cell culture and in a Life Sciences research laboratory. [2694-041 (2009) : 68]

27. Interests in neuro, vascular or oncology imaging, complementary to our considerable existing research strengths in these disciplines, are particularly desirable. [2694-046 (2009) : 71]

28. You will have energy drive and commitment to fulfil the vision and objectives of the organisation and be able to lead, develop and support multi-disciplined teams. [2694-047 (2009) : 71]

29. You should have a degree in Biochemistry or a related discipline, and experience in recombinant protein expression and purification. [2694-048 (2009) : 72]

30. We wish to encourage students from non-biomedical backgrounds and applicants from any appropriate discipline (including physics, engineering, mathematics, chemistry computing and informatics) are invited to apply. [2694-052 (2009) : 73]

31. Students with a BSc Hons (at least upper second class) or MSc in any appropriate discipline are invited to apply for the Programme. [2694-052 (2009) : 73]

32. This programme explores these issues, and encourages students to link knowledge from different disciplines to gain a holistic view of sustainability. [2694-055 (2009) : 74]

33. Biomedical Engineering is an exciting and rapidly expanding discipline that endeavours to apply engineering principles to challenges faced in biology, life sciences and medicine. [2698-005 (2009) : 50]

34. Our team of specialist consultants offer a totally flexible service to meet each clients needs, covering the full spectrum of disciplines within the Engineering sector, including. [2698-006 (2009) : 51]
An award from the EPSRC for a Doctoral Training Centre in Sustainable Chemical Technologies is centred on a four-year Ph.D. programme aimed at graduates of Chemistry, Chemical Engineering and related disciplines who already have or expect to obtain a first or upper second class honours degree. [2698-008 (2009) : 51]

Ph.D. candidates should have, or expect to receive, a first or upper second class honours degree (or equivalent) in a relevant engineering, physical or earth science discipline. [2698-011 (2009) : 53]

To be successful you should have a university degree or equivalent in a relevant discipline, as well as several years' experience in a User/Customer interface environment, preferably gained in a scientific, academic or similar environment. [2698-016 (2009) : 56]

All this plus top employer profiles specialising in science and engineering disciplines to help you choose the right employer for you, it’s a must read! [2698-017 (2009) : 56]

To be considered you should have an appropriate qualification in communication and outreach management in addition to a University Degree in a relevant discipline. [2698-030 (2009) : 61]

Experience of the application of internal communications programmes in a multi-discipline (scientific / technical / administrative) and mixed cultural environment is a prerequisite. [2698-030 (2009) : 61]

In both cases candidates should have a relevant degree or equivalent in a chemical discipline, first class communication skills allied with strong project management ability, the ability to lead and develop a team and the drive and enthusiasm to make a real contribution to the business. [2698-038 (2009) : 63]

You will represent the department on project teams and will liaise closely with colleagues across a range of disciplines. [2698-039 (2009) : 64]

Forensic Science (any analytical discipline) [2698-040 (2009) : 65]

UKAS is looking for Assessment Managers to be responsible for laboratory assessments in the above disciplines, to lead assessment visits, make technical appraisals and to implement accreditation policy. [2698-040 (2009) : 65]

The applicants will: Be educated to degree level in a relevant discipline. [2698-040 (2009) : 65]

Rated in the Research Assessment Exercise 2008 as one of the top UK departments in any science/engineering discipline, the Department of Materials Science & Metallurgy provides an outstanding environment in which to pursue forefront materials research. [2698-044 (2009) : 67]

You will be able to demonstrate a clear understanding of both the supply and demand side issues affecting the environment and energy sectors, together with an educational background in a relevant discipline. [2698-045 (2009) : 67]

You will undertake a period of research within a strong and disciplined research environment. [2698-047 (2009) : 68]

You should have a degree and Ph.D. in Microbiology, ideally with specialisation in pharmaceutical microbiology although this is not essential, or other suitable discipline, plus relevant experience. [2698-049 (2009) : 68]

Rated in the Research Assessment Exercise 2008 as the top materials department and one of the top UK departments in any science/engineering discipline, DMSM provides an outstanding environment in which to pursue forefront materials research. [2698-050 (2009) : 68]
51. We are seeking professional researchers to work in systems biology from a variety of disciplines including bioinformatics (expertise in computational biology and mathematics included), proteomics, genomics, genetics, biochemistry, molecular biology and biophysics. [2698-056 (2009) : 71]

52. Qualified applicants must have a minimum of a MS Degree in one of the above mentioned disciplines (Ph.D. preferred) [2698-056 (2009) : 71]

53. and at least two years of experience in a research capacity in one or more of the disciplines listed above. [2698-056 (2009) : 71]

54. IT skills at an advanced level using MS Office applications with excellent attention to detail are essential, as are social skills in managing and working in teams of people from a wide variety of countries, backgrounds and disciplines. [2698-060 (2009) : 72]

55. The Faculty of Agricultural Sciences, Aarhus University, Denmark, is looking for a number of bright and enthusiastic people with excellent MSc degrees in relevant natural science, agricultural or engineering disciplines to fill 14 Ph.D. positions. [2698-061 (2009) : 73]

56. Applicants are expected to have completed a Ph.D. in the relevant area and will be required to kick start the relevant discipline through the development of curricula and research in the respective area. [2698-069 (2009) : 75]

57. Moreover, they will supervise undergraduate research projects as well as initiate postgraduate research projects in the relevant discipline. [2698-069 (2009) : 75]

58. This meeting is a chance for scientists from a wide range of disciplines to input into plans and proposals to create a new Light source ranging from soft X-rays to Terahertz. [2702-002 (2009) : 9]

59. But now that their potential in a variety of applications is increasingly being recognised, bacteria are proving their worth as a useful tool in a vast range of disciplines. [2702-005 (2009) : 46-47]

60. Our consultants are qualified specialists from a range of scientific disciplines, and we pride ourselves on the technical expertise and in-depth understanding that we offer our clients and candidates. [2702-009 (2009) : 49]

61. Candidates should have a Ph.D. degree (or equivalent work experience) in a scientific discipline relevant to research in Antarctica or the Southern Ocean; an established track record as a scientist and/or as a manager of scientific activities; extensive experience in international scientific research and collaboration; and excellent communication and organizational skills. [2702-015 (2009) : 53]

62. All this plus top employer profiles specialising in science and engineering disciplines to help you choose the right employer for you, it’s a must read! [2702-019 (2009) : 54]

63. With an honours degree or equivalent in physical or natural sciences or engineering or a closely related discipline, you should have specialist knowledge in one or more areas relevant to radioactivity and dose assessment. [2702-021 (2009) : 55]

64. This role calls for a degree (or equivalent) in a scientific discipline along with significant post-qualification experience. [2702-021 (2009) : 55]

65. Working closely with scientists across a number of disciplines and other operations and technical staff, you will manage a small number of research support staff providing core services to assist the research activities being undertaken in the new laboratories, which forms part of a new large multi-function campus. [2702-022 (2009) : 56]
66. Educated to degree level in a relevant discipline, you will be able to demonstrate: [2702-024 (2009) : 57]

67. Educated to degree level in a relevant discipline, you will be able to demonstrate: [2702-024 (2009) : 57]

68. Candidates should have a Ph.D. degree (or equivalent work experience) in a scientific discipline relevant to research in Antarctica or the Southern Ocean; an established track record as a scientist and/or as a manager of scientific activities; extensive experience in international scientific research and collaboration; and excellent communication and organizational skills. [2702-029 (2009) : 60]

69. Requirements Ph.D. degree in Biochemistry, Immunology or related discipline [2702-036 (2009) : 64]

70. Each year the Research Councils invest around £2.8 billion in research, training and knowledge transfer covering the full spectrum of academic disciplines. [2702-039 (2009) : 65]

71. To be successful in this role, you should have a Ph.D., MD or equivalent in Epidemiology, Demography, Public Health or other numerate health-related discipline. [2702-047 (2009) : 67]

72. With a degree in Forensic Chemistry, Forensic Science, Chemistry or related discipline; or equivalent qualification and experience, you will have experience of working for a recognised forensic science provider and preferably a suitable postgraduate qualification. [2702-048 (2009) : 67]

73. Applicants should hold or expect to obtain a first-class or upper second-class Honours degree in a relevant discipline. [2702-051 (2009) : 68]

74. You will need a Ph.D. in a relevant discipline, i.e. epidemiology or biostatistics, and expertise in working with large, health-related datasets. [2702-054 (2009) : 69]

75. The Centre provides doctoral training using expertise drawn from a range of disciplines including: Electrical and Electronic Engineering, Civil Engineering, Manufacturing Engineering, Materials Science, Computer Science, Physics, Medical Physics, Nanotechnology, Bioengineering / Biotechnology and Business. [2702-060 (2009) : 71]

76. Applicants should have, or expect to obtain, a first class or upper second-class honours degree in an appropriate discipline. [2702-062 (2009) : 71]

77. Right now we are seeking a number of experienced practitioners in the disciplines of Firearms, Documents & Computer examinations. [2706-008 (2009) : 49]

78. In addition to these specific roles we are also actively seeking individuals with various levels of experience (graduates, assistants and experts) in a range of forensic disciplines: Drugs (Coventry), Biology (Coventry, Norwich & Warrington), DNA profiling (Warrington & Norwich), Mark & Traces (Coventry & Warrington), e-forensics (Coventry & Warrington) [2706-008 (2009) : 49]

79. All this plus top employer profiles specialising in science and engineering disciplines to help you choose the right employer for you, it’s a must read! [2706-009 (2009) : 50]

80. A Ph.D. in biomedical engineering or a related discipline is necessary and experience of contract R&D would be beneficial. [2706-023 (2009) : 56]

81. A Ph.D. in a life sciences discipline is required together with three years' experience in managing IP or technology transfer. [2706-023 (2009) : 56]
82. You should have a relevant degree or HNC/HND in a scientific discipline, preferably microbiology. [2706-024 (2009) : 57]

83. The Office of the Deputy President (Research & Technology) at NUS (Website: http://www.nus.edu.sg/dpr/) is responsible for facilitating, regulating and developing research and technology in a wide range of disciplines and cross-disciplinary areas. [2706-039 (2009) : 62]

84. The successful candidate will have an undergraduate degree, probably in the fields of Chemical Engineering, Materials Science, Pharmacy, or equivalent discipline, which will be augmented by a higher degree (Ph.D., EngD) or significant recent experience (>4 years) in the field. [2711-005 (2009) : 52]

85. Ideally you will have been working in a CRO and will have: Minimum of a BA/BSc in Sciences or Technical Discipline or equivalent knowledge [2711-018 (2009) : 56]

86. All this plus top employer profiles specialising in science and engineering disciplines to help you choose the right employer for you, it’s a must read! [2711-022 (2009) : 58]

87. Using your existing and newly acquired knowledge you will assist in the development of risk assessments, write project reports and scientific papers, give oral presentations and keep up to date with developments in selected areas of the risk analysis discipline. [2711-023 (2009) : 59]

88. You should hold a Ph.D. in Chemistry or appropriate biological discipline; or hold a good first degree with relevant industrial experience. [2711-030 (2009) : 61]

89. The successful candidate will be a scientist with a Ph.D. in a relevant discipline and a thorough understanding of the purpose and operation of different analyses so as to be able to advise the most appropriate technique. [2711-040 (2009) : 64]

90. You will have: […] the ability to apply your research expertise across disciplines, and work closely with other researchers [2711-042 (2009) : 64]

91. All this plus top employer profiles specialising in science and engineering disciplines to help you choose the right employer for you, it’s a must read! [2715-010 (2009) : 54]

92. You will come to us with a degree in a biology-related discipline or equivalent coupled with the ability to learn quickly and manage a diverse, rapidly changing portfolio of activities. [2715-017 (2009) : 58]

93. Leading pest control services company seeks Trainees who are degree qualified in a Science based discipline. [2715-021 (2009) : 58]

94. Successful candidates will have an interest in the wider implications of assisted reproduction and embryo research, a high level of analytical skills, be a good team player with excellent communication skills and will be specialised in one of the following fields: […] biological sciences - scientist specialising in a biological discipline (e.g. cell biology) working outside the fertility sector; [2715-025 (2009) : 60]

95. Possessing a degree in a relevant area of expertise, you must have experience of working across a range of disciplines, team working and good communication skills. [2715-030 (2009) : 62]

96. The successful applicant will be qualified to degree level or equivalent in a relevant discipline and have substantial experience in a technical support role. [2715-036 (2009) : 63]

97. The successful applicant will have at least a BSc in Human Biology or a related discipline. [2715-036 (2009) : 63]
98. You must have a BSc in a relevant discipline, and appropriate postgraduate experience, with excellent communication, interpersonal and presentation skills. [2715-038 (2009) : 64]

99. The Sofja Kovalevskaja Award enables young researchers to spend five years in Germany working on high-profile, innovative research. Application is open to all nationalities and disciplines. [2715-043 (2009) : 65]

100. This is a unique opportunity to work in a technical department that supports all these disciplines of critical care. We are looking for enthusiastic and motivated technologists to join our expanding team. [2719-004 (2009) : 48]

101. Working alongside experts in related toxicology and metabolism disciplines, the successful candidates will have the opportunity to develop their own expertise further whilst making a critical contribution to the selection and development of new agrochemicals. [2719-007 (2009) : 49]

102. You will have a Ph.D. in a relevant discipline together with several years of experience in antibacterial drug discovery and development. [2719-013 (2009) : 53]

103. A degree in an appropriate discipline together with laboratory experience is required. [2719-013 (2009) : 53]

104. You will have a Ph.D in biochemistry or a related discipline and join a team involved in the genetic engineering of microorganisms for the production of natural products, biofuels and commodity chemicals. [2719-013 (2009) : 53]

105. You will have a BSc or Ph.D. in chemistry, analytical chemistry or a related discipline and strong mass spectroscopy skills. [2719-013 (2009) : 53]

106. You will have a BSc or Ph.D. in biochemistry or a related discipline. [2719-013 (2009) : 53]

107. All this plus top employer profiles specialising in science and engineering disciplines to help you choose the right employer for you, it’s a must read! [2719-018 (2009) : 56]

108. Leading pest control services company seeks Trainees who are degree qualified in a Science based discipline. [2719-021 (2009) : 58]

109. Degree educated in a science-based discipline, you'll have a proven management background and an extensive knowledge of developing forensic science processes, tools and techniques. [2719-027 (2009) : 59]

110. All this plus top employer profiles specialising in science and engineering disciplines to help you choose the right employer for you, it’s a must read! [2724-014 (2009) : 56]

111. A graduate or equivalent in a scientific discipline, you'll need experience of providing business analysis in life sciences (preferably R&D). [2724-015 (2009) : 57]

112. As well as a Ph.D. (or equivalent experience) in a biological discipline, you should be familiar with a broad range of molecular techniques and bioinformatics. [2724-029 (2009) : 62]

113. That said, a life sciences or biomedical background is often required, and these days postgraduate qualifications are increasingly important, though not necessarily in a purely scientific discipline. [2728-004 (2009) : 52-53]
114. Through wider client account teams the specialists will [...] have experience of building long term relationships across a wide range of multi disciplines from academic to business contacts; [2728-005 (2009) : 54]

115. We welcome applications from candidates from a range of disciplines and experience and we will be recruiting into temporary and permanent positions. [2728-006 (2009) : 55]

116. This is a hands-on leadership role and requires a minimum of a Bachelor's degree in a life sciences or biochemical engineering discipline. [2728-011 (2009) : 57]

117. Ideally you will have a minimum of a Bachelor's degree (or equivalent) in a life sciences discipline. [2728-011 (2009) : 57]

118. You will have a Bachelor's degree (or equivalent) in a life science discipline, with experience in the design/optimisation of biological / biopharmaceutical assays. [2728-011 (2009) : 57]

119. The Candidate Degree (or equivalent) in Biochemistry, toxicology or a related biological sciences discipline, a postgraduate qualification highly desirable. [2728-020 (2009) : 61]

120. As a prospective candidate you should possess a degree in a scientific or technical discipline and be highly computer literate, especially in the use and development of databases. [2728-032 (2009) : 66]

121. You should ideally have a Ph.D. in a relevant discipline or equivalent experience. [2728-033 (2009) : 67]

122. Apart from providing prompt, effective replies to queries, you will also build up and interact with a network of experts across a number of toxicological disciplines from within and beyond the SCAHT research community who can be called upon to support the regulatory decision-making process. [2733-010 (2009) : 64]

123. A good biomedical science degree is essential, ideally supported by a Ph.D. in a relevant discipline. [2733-022 (2009) : 68]

124. Graduate students are accepted into one of the following areas, but are encouraged to take part in courses and seminars from all three disciplines: Comparative and Molecular Primatology; Evolutionary and Functional Genomics, Ancient DNA; Molecular Anthropology and Genome Bioinformatics; Human Paleontology, Prehistoric Archaeology and Archaeological Science [2733-035 (2009) : 73]

125. The successful candidate will therefore hold a degree in a relevant discipline, and previous experience of cell culture and working with radioactivity is considered essential. [2733-040 (2009) : 74]

126. You should have a Ph.D. or equivalent in statistics, mathematics, computer science, physics or a related discipline. [2733-041 (2009) : 75]

127. The Faculty of Science has a powerful reputation for innovation, excellence and working across the boundaries of different academic disciplines. [2733-052 (2009) : 78]

128. Candidates must have at least a good 1st degree or equivalent in the relevant discipline, with proven experience and expertise in a range of analytical/testing techniques. [2737-012 (2009) : 57]

129. Suitable candidates will have a first degree in immunology, cellular biology or biochemistry, with an MSc or Ph.D. in a related discipline, and be experienced in mammalian cell culture and fluorescence microscopy. [2737-015 (2009) : 59]
130. You will have an MSc or Ph.D. in Cellular Biology, Immunology or a related discipline, and be experienced in mammalian cell culture. [2737-015 (2009) : 59]

131. The successful applicant must have a relevant degree or HNC/HND in a scientific discipline. [2737-016 (2009) : 59]
Annexe 9-2-1 Listes (>2) avec DISCIPLINE dans CAEMS

1971

1. An honours degree in appropriate disciplines (including biological sciences, psychology, and the natural sciences, mathematic and engineering) or equivalent professional qualifications is required. [733-006 (1971) : 38]

2. If you expect to graduate in one of the following disciplines: ENGINEERING (Chemical, Gas, Civil or Mechanical) or MATHEMATICS, STATISTICS and ECONOMICS, or MANAGEMENT ACCOUNTING the North Western Gas Board have openings in ENGINEERING, ACCOUNTING COMPUTERS OR ECONOMIC RESEARCH. [733-075 (1971) : 47]

3. These are staffed from a number of disciplines including chemistry, metallurgy, physics and chemical and mechanical engineering. [745-072 (1971) : 63]

4. Shell International Petroleum Company Limited offers three post-doctoral Fellowships annually to assist recipients to pursue research in a subject of their own choice within the following disciplines: Engineering Mathematics Physics Chemistry Biochemistry Botany Zoology Microbiology Geology Geophysics [772-090 (1971) : 64]

1995

1. The Faculty of Engineering is a broad based multi-disciplinary faculty which covers the disciplines of Mechanical, Manufacturing, Aeronautical and Electronic and Electrical Engineering. [1959-031 (1995) : 52]

3. Candidates should hold a degree in ecology, forestry or related discipline and, ideally, have recent research experience in one or more of the following fields: British mammals, silviculture and botanical monitoring. [1976-051 (1995) : 75]

4. The Science Faculty offers courses within and across the disciplines of Biology, Chemistry, Earth Sciences and Physics and Science Education, of which the two so far covered in the HEFCE Quality Assessment exercise - Chemistry and Earth Sciences - have both received 'excellent' ratings. [1976-055 (1995) : 76]

5. Funded by BBSRC and industry, we are now offering studentships, to commence in October 1995, in the following disciplines: Process Engineering; Environmental Physics; Vision and Robotics [1980-007 (1995) : 55]

6. The position would suit a Postdoctoral student with experience in one or more of the disciplines of structural geology, elastic sedimentology, stratigraphy and petroleum geology. [1989-016 (1995) : 62]

7. Although the post-holder will be a physical scientist, the emphasis of the post will be on working with a range of disciplines such as nutrition, microscopy, mathematical modelling and biochemistry. [1993-078 (1995) : 73]
8. Candidates should possess an Honours Degree and postgraduate research experience in a relevant discipline such as Biochemistry, Molecular Genetics, Microbiology or Plant Pathology. [1998-049 (1995) : 88]

9. With a range of high-technology products, encompassing mechanical, optical, electronic and IT disciplines, they present a diverse and challenging Engineering environment. [1998-095 (1995) : 100]

10. The successful applicant will be expected to develop skills in a wide range of disciplines, from molecular biology and virology to clinical investigation of disease. [2006-025 (1995) : 68]

11. The twelve editorial and production groups will manage publications in most medical, scientific, business, social sciences and humanities disciplines. [2006-036 (1995) : 71]

12. The successful candidate will hold a good degree in a materials-related discipline (materials, ceramics, chemistry, physics) preferably complemented by postgraduate or industrial experience. [2006-061 (1995) : 78]

2005

1. The Department of Epidemiology and Population Health (EPH) is looking for someone to work within the discipline of demography, epidemiology, public health nutrition or statistics. [2481-070 (2005) : 75]

2. Ideally degree qualified in a scientific, environmental or engineering discipline, you'll need at least three years’ relevant industry experience, ideally within a regulated industry. [2485-038 (2005) : 71]

3. In addition to your degree in Biology, Geography or a related discipline, you will have at least three years' experience in, and a good knowledge of, the Biodiversity Action Plan process and of the way in which local and regional government works and relates to national Government. [2485-049 (2005) : 74]

4. What we require The candidate holds a PhD in a relevant engineering discipline, e.g. agricultural, horticultural or biosystems engineering; has ample research experience and proven scientific excellence, as evidenced by publications in major scientific journals; is a competent teacher and contributes to innovating education programmes; is active in attracting students to the University; contributes to the chair group's strategic positioning both in the University and at national and international level; is an inspiring leader and an excellent communicator; has a wide experience and good contacts in industry, as evidenced by contract research and consultancy; has Dutch for a native language or is willing to learn the language quickly, and is fluent in English. [2485-095 (2005) : 88]

5. Managing a team of between 4-5 scientists in the disciplines of medicinal, analytical and synthetic chemistry, you will be responsible for deriving and delivering medicinal chemistry strategy on Galapagos' programmes. [2493-008 (2005) : 57]

6. You will manage an interdisciplinary team of post doctoral level scientists and will liaise with your UK and USA colleagues across a wide range of scientific disciplines, including software, hardware, molecular biology and chemistry. [2498-010 (2005) : 53]

7. You are likely to have postgraduate qualifications in one of the following disciplines: microbiology, aerobiology, chemical or mechanical engineering, ideally with experience of working within a food research or food industrial environment. [2498-013 (2005) : 54]

8. Successful small company in Biosciences is looking for a PhD to assist in the continued expansion of the company in an exciting variety of disciplines, particularly cell culture, virology, immunology and flow cytometry. [2502-031 (2005) : 65]
9. The disciplines of Medicine, Dentistry Psychiatry, Biomedical Sciences, Health & Life Sciences and Nursing & Midwifery there are 17 integrated divisions that invested a combined £85 million in research in 2003-2004. [2506-055 (2005) : 74]

10. Candidates should ideally be qualified to PhD level in an appropriate biological, fisheries or mathematical discipline with at least two years’ experience of fisheries stock assessment [2511-036 (2005) : 63]

11. Applicants should hold a good Honours Degree and a Doctorate in a relevant Engineering, Science or Textile related discipline. [2515-074 (2005) : 80]

13. We are keen to recruit individuals with expertise in one or more of the following disciplines: • Ecological Risk Assessment • Probabilistic Risk Assessment • Population modelling and statistical analysis • Exposure modelling • Aquatic and terrestrial ecotoxicology [2524-007 (2005) : 54]

14. Ideally you will be a recent graduate/post graduate probably in a chemistry/chemical engineering/biotechnology discipline, preferably with two or more years’ industrial experience, and will have a thorough grounding in one of our core technology areas. [2528-030 (2005) : 71]

15. A core technology programme and the key disciplines of Chemical, Microbial, Nutrition & Food and Integrative Physiological Sciences underpin each theme. [2528-060 (2005) : 85]

2006

1. Applications are accepted from candidates with backgrounds from within a broad range of disciplines, including the biological, chemical, physical and mathematical sciences. [2533-066 (2006) : 65]

2. A degree or other equivalent qualification in a relevant scientific discipline such as pharmacology, veterinary science, epidemiology or clinical data management. [2537-027 (2006) : 67]

3. Within the multi-disciplinary structure of Unilever, we’re currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. [2541-004 (2006) : 57]

4. Within the multi-disciplinary structure of Unilever, we're currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. [2541-007 (2006) : 59]

5. Within the multi-disciplinary structure of Unilever, we're currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. [2541-011 (2006) : 61]

6. In addition, you'll have ten years' postgraduate experience, ideally gained in one of the following scientific disciplines Bioanalysis, Central Laboratory Services/Immunology or DMPK. [2541-054 (2006) : 80]

7. A graduate in an appropriate life science discipline, e.g. medicinal chemistry, pharmacy, pharmacology, or other biological and pharmaceutical sciences (or equivalent) you will have a minimum of 2 years experience of medical or scientific writing and editing. [2545-023 (2006) : 67]
8. We are keen to recruit individuals with expertise in one or more of the following disciplines: • Ecological Risk Assessment • Probabilistic Risk Assessment • Population Modelling and Statistical Analysis • Environmental Modelling and Risk Assessment • Ecotoxicology [2554-022 (2006) : 66]

9. You should be educated to degree level or equivalent in a materials science, engineering or physics discipline and have proven relevant experience. [2558-046 (2006) : 79]

10. You should possess a Degree or higher qualification in a relevant scientific discipline (biology, biochemistry, molecular biology, developmental biology, medical science etc). [2567-022 (2006) : 59]

11. A degree or equivalent level qualification in a science-based subject (preferably in an environmental, geographical or hydrological discipline) is required. [2572-041 (2006) : 78]

12. Your qualifications should include a degree in an appropriate science, engineering or environmental discipline. [2576-057 (2006) : 80]

13. The Norwegian University of Science and Technology (NTNU) in Trondheim represents academic eminence in technology and the natural sciences as well as in other academic disciplines ranging from the social sciences, the arts, medicine, architecture to fine arts. [2576-094 (2006) : 91]

14. All three studentships are suitable for candidates with a good first degree in Maths, Physics, Computer Science, Electrical Engineering or other mathematical science disciplines; or a relevant masters. [2576-097 (2006) : 92]

2009

1. Open to UK / certain EU nationals with a good first degree (upper second or better) in any relevant mathematics, physical science or engineering discipline. [2689-041 (2009) : 62]

2. We wish to encourage students from non-biomedical backgrounds and applicants from any appropriate discipline (including physics, engineering, mathematics, chemistry computing and informatics) are invited to apply. [2694-052 (2009) : 73]

3. Ph.D. candidates should have, or expect to receive, a first or upper second class honours degree (or equivalent) in a relevant engineering, physical or earth science discipline. [2698-011 (2009) : 53]

4. We are seeking professional researchers to work in systems biology from a variety of disciplines including bioinformatics (expertise in computational biology and mathematics included), proteomics, genomics, genetics, biochemistry, molecular biology and biophysics. [2698-056 (2009) : 71]

5. The Faculty of Agricultural Sciences, Aarhus University, Denmark, is looking for a number of bright and enthusiastic people with excellent MSc degrees in relevant natural science, agricultural or engineering disciplines to fill 14 Ph.D. positions. [2698-061 (2009) : 73]

6. The Centre provides doctoral training using expertise drawn from a range of disciplines including: Electrical and Electronic Engineering, Civil Engineering, Manufacturing Engineering, Materials Science, Computer Science, Physics, Medical Physics, Nanotechnology, Bioengineering / Biotechnology and Business. [2702-060 (2009) : 71]

7. In addition to these specific roles we are also actively seeking individuals with various levels of experience (graduates, assistants and experts) in a range of forensic disciplines: Drugs (Coventry), Biology (Coventry, Norwich & Warrington), DNA profiling (Warrington & Norwich), Mark & Traces (Coventry & Warrington), e-forensics (Coventry & Warrington) [2706-008 (2009) : 49]
8. Graduate students are accepted into one of the following areas, but are encouraged to take part in courses and seminars from all three disciplines: Comparative and Molecular Primatology; Evolutionary and Functional Genomics, Ancient DNA; Molecular Anthropology and Genome Bioinformatics; Human Paleontology, Prehistoric Archaeology and Archaeological Science [2733-035 (2009) : 73]

Annexe 9-2-4 Occurrences de DISCIPLINE dans BNC

Les occurrences en rouge renvoient au discours des ressources humaines

Les occurrences grisées, ne pouvant être prises en considération à cause du manque de contexte, une nouvelle requête a dû être faite au BNC pour compléter le corpus de 50 occurrences.

Here is a random selection of 50 solutions from the 5508 found.

A0K 1078 For example, Section 5, para. 14 of the West Mercia Force Standing Orders is entitled the ‘Maintenance of Discipline’, and contends:

A6G 1053 In fact it seems to this reviewer that Quinton's framework offers essential support for Eccleshall's vision of Conservatism, in that the axioms Quinton describes provide for a specifically Conservative conception of political authority and social discipline.

B08 805 A procedure which keeps alive a warning (even for a major breach of discipline) for more than two or three years is almost always unjust.

B10 431 Warm, loving and consistent discipline, in which reasons are given (when the child can understand them), is thought to produce the rational sort of ‘obedience’ rather than the mindless and emotionally dependent following of orders.

CGE 1684 However, there had been a number of complaints from parents about the increasingly firm discipline in the school.

Evn 597 The discipline never bothered me too much.

FB1 40 Steps were taken to restrict the autonomy of the zemstvos, to discipline the universities, to intensify censorship.

FB1 464 Industry was nationalized and steps were taken to tighten discipline in the factories and extract food from the countryside.

FEP 48 My subsequent book was an early attempt to define the range and focus of this discipline.

FNU 2224 It was a breach of discipline, Geoffrey being absent.

FP2 1380 Market discipline: conclusion

FR2 533 Rural recreation geography: An emerging or mature discipline?

GOR 567 We can also enquire into the extent to which a discipline promotes an open debate.

H9L 154 ‘There was no discipline, and too many niches had been conveniently created for too many friends, lovers and other attachments.

HGP 970 In contrast, armies and navies rely on discipline and secrecy.

HHW 3558 What was unacceptable and intolerable suddenly — just like that — became acceptable and tolerable, as the Conservative party line turned, with a discipline which I found quite remarkable and which was reminiscent of societies that Conservative Members often dismiss contemptuously.

HHY 3366 Discipline:

HKT 663 He added that "indications of chaos" and "lack of discipline" were present in the campaign of opposition groups against state bureaucracy and warned that their sustained attacks on the MPRP would hinder future political co-operation.

HY6 1098 The technique in Scale 1 is to fuel the recluse's imaginative understanding of a condition where she can freely maximise her spiritual potential and, at the same time, promote the discipline which allows her to do so.

JXM 472 For over two years the ILP had been moving towards a position where it could no longer work within the limitations of Parliamentary discipline and electoral necessity.

K5A 521 Ferguson scored against Partick Thistle on his return from a month of inactivity caused by discipline problems at Tannadice.

**Here is a random selection of 50 solutions from the 5508 found.**

A0C 660 Basic discipline can save you hours of wasted time, preserve years of carefully built up data and give you peace of mind.

A6G 1424 As late as the 1900s, Mrs Humphry Ward, the best-selling Victorian novelist and leading anti-suffragist, stressed that marriage had to be regarded as a necessary discipline, for if husbands and wives could not resolve their differences what hope remained for the larger polity?

AL8 1139 A tutor-organiser (or equivalent) who as a professional employee is susceptible to discipline if he or she proves negligent or misguided, can help to ensure that the voluntary movement lives up to
its obligations — through advice and encouragement as far as possible, through seizing the initiative himself if there is no alternative.

AMK 468 It is interesting to note that these German demands for greater centrally-imposed discipline, together with their attacks on British plans for currency competition, came in spite of increasing interest in the proposal in France.

APD 1185 In any case it soon demonstrated its reluctance to accept the discipline of the Unified National Leadership of the Uprising, by organizing a major strike on the twentieth anniversary of the arson attack on the al Aqsa Mosque in Jerusalem on 21 August.

ASF 733 Whereas Augustus had had the poet Virgil to sing his praises, Constantine had the ecclesiastical politician and historian Eusebius as the man who sat immediately to the right of his throne during the sessions of the Council of Nicaea in 325 and exercised a decisive influence on the creed and discipline of the Universal, or Catholic, Church.

B10 1684 An analysis of aggressive episodes could help you to work out a practical campaign to deal with a persistent problem over discipline.

B1T 567 With boys in unskilled employment, the intention was not so much to impart skills, ‘as to retain [them]at an impressionable age and to mould and discipline their character’, and in such cases specialization or technical training would be out of place.

BME 162 With a resurgence of technology, it will be unnecessary in future years to seek artificial academic support for the discipline; instead the study of construction technology, construction method, design and materials and construction management should be allowed to form the core with the relevant contribution of legal and financial (rather than economic) subjects directed towards it.

C9B 723 No monastic or holy order within the Christian tradition demands greater dedication and discipline, and the basic requirements of a satyāgrahi correspond to the vows of poverty, chastity and obedience, that are expected of certain Christian orders of monks and priests.

CBY 799 There was no variance analysis, no discipline and no control in the conventional sense.’

CLL 906 What it aims to do is discipline students, systematically, in the areas mentioned above, training them to edit their own work, correcting errors in style, grammar, and punctuation.

CLP 589 The observer needs some discipline which ensures that he really does focus on the detail and separates the action into a coherent sequence.

CRX 825 A whole series of arguments against correctionalism can be discerned, originating from various sources, but all gaining impetus in the 1960s and early 1970s: the corrective stance was seen as being inappropriate to an academic discipline in that its partiality had the effect of distorting the nature and appearance of the phenomena it was studying; it was seen as neglecting the possibility that crime may have positive qualities and consequences; correctionalism was seen as having led to the violation of fundamental human rights and principles of justice in its single-minded quest for efficient crime control.

ED5 1575 In the government's view the relationship between the decision to spend and the financial discipline of meeting the cost had been weakened as the proportion of local expenditure covered by grant had increased.

EDD 231 The Growth of a Discipline
224 St Antony's invited applications from graduates with language specialisms who wished to change discipline.

It trains, in a way no other discipline can, intelligence and sensibility together, cultivating a sensitiveness and precision of response and a delicate integrity of intelligence — intelligence that integrates as well as analyses and must have pertinacity and staying power as well as delicacy.

Knowledge is categorized in terms of four parameters: the nature of the concepts involved, the logical structure of the discipline, the truth criteria used, and the methods employed.

But both Woodruffe and Hodson denied strongly that the Association was in any sense a secret society, that it sought to discipline members in breach of rules, to dictate terms to shipowners or to enforce a closed shop.

It is more than likely that any changes in industrial discipline are related to the demand for labour, i.e. stricter discipline for workers during periods of high unemployment, and easier discipline at times of full employment or particular local or industrial labour shortages.

The discipline of the elementary school classroom is enforced on people who as soon as they leave the store, are considered full members of society with the right to vote.

The reasons for this neglect are many and complex, in the case of social anthropology in particular it is rooted deep in the history of the discipline.

As lack of discipline at home had been found to be important to later sociopathy, she recommended improved discipline at school for such at-risk youngsters: a more vigorous role in preventing truancy, supervision for completion of assignments, controlled use of leisure time and so on.
It begins from the premiss that English singers performing a cappella are currently able to give exceptional performances of medieval and Renaissance polyphony from England and the Franco-Flemish area because the ability of the best English singers to achieve a purity and precision instilled by the discipline of repeated a cappella singing in the choral institutions is singularly appropriate to the transparency and intricate counterpoint of the music.

Here is a random selection of 50 solutions from the 1112 found.

A04 147 There is no need to be intimidated by the formality of a staid institution's catalogue, or to neglect popular magazines; as for writing in various academic disciplines, there ought to be no barrier to learning about an interesting topic.

ADP 172 In fact, Chesterman had put the charge of perfectionism in person in his CBC interview, where Karajan had suggested that the word was one used by those too idle or impatient to attend to the basic disciplines of their craft.

ADV 433 The teacher's slap, and his colleagues' support, served notice that women, too, would in future be subject to the disciplines of institutions outside the family, that fathers and husbands would have to share their authority over women.

ARG 1957 The dazzling reality of God's happiness can only become a living experience in our lives when we discover the spiritual disciplines that keep us close to God.

B21 799 In order to achieve the state of energy that manifests as a rested body and mind, we must become active against our negative emotions as well as following other disciplines on a daily basis.

B3C 1791 Consumer Studies brings together the disciplines governing the design, development and management of consumer goods and services (with particular reference to food, textiles and the home) and explores the interdisciplinary relationship of these to the needs and responses of consumers.

B7H 669 Of course, the disciplines of science and engineering are not always sharply separated.

B7J 2027 He argues that humans are unique in their ability ‘to identify with any conspecific and feel sympathy with him’, and that this widely ignored fact provides the necessary bridge between the disciplines.

B7N 1865 Rather than to characterise Genetic Alchemy as definitive I prefer to view it as a valuable ‘second generation’ effort, considerably more scholarly than its predecessors but with more than a whiff of the critical and sceptical attitudes of the disciplines that focus not so much on the substance of science as on its character as a social institution.

CD4 224 He certainly doesn't have to submit to normal disciplines!

CER 48 There has been one undoubted benefit of the cold fusion saga: it has stimulated interactions among scientists from different disciplines and thereby brought together expertise that might otherwise have remained untapped on individual islands.

CH2 12136 Ministers expect the current public spending round to be the toughest for many years as the Government seeks to maintain its anti-inflation policy outside the ERM disciplines.

CKP 771 Social gerontology draws on a broad range of social science disciplines for its theories and methodologies, but to date its debt to economics and economists has been slight.
Sometimes it is good to get away from the particular disciplines of our own medium and techniques and try something else.

In real terms, this means 20,000 software professionals are now living in the region, while another 7,000 or so students are studying software-related disciplines in Scotland's 12 universities.

The City has been quite good at throwing off old habits, less good at mastering new disciplines.

It was said that he was not enamoured of the tight business disciplines which they attempted to impose.

Whichever way it was phrased, Edwardian Britain considered that in the problem of ‘boy labour’ it faced a crisis of some magnitude in the social reproduction of steady work disciplines and skills.

A key feature of this event will be the extensive demonstrations and displays of the main equine disciplines from dressage to driving and cross-country to showjumping to showjumping.

They weren't too well versed in the disciplines and restraints imposed by TV.

Decisions taken by other disciplines may have a costly impact over which the nurse manager is powerless to intervene; the general manager's control of ward clerks, the contents of contracts agreed before privatisation or the consultant surgeon's annual leave arrangements are examples.

The first is the place of mathematics in any scheme of ‘science’, a problem not only for positivism but for any theory of knowledge; as Schwab (1964) notes, mathematics is one of the perenially puzzling disciplines.

It shows why philosophy may penetrate so many disciplines and yet remain a distinct discipline itself.

Generally it has resisted (both academically and administratively) the challenge of other disciplines.

The first view is probably more common among natural scientists and technologists and the second among social scientists, but this is not always the case, and the debate goes on within disciplines as well as between them.

The portrait of the study of social policy as presented in the last few paragraphs shows that it is a subject that draws upon a number of different academic disciplines.

Indeed, there is a greater likelihood that they could give the names of more researchers in the same field in another country than they could give the names of staff in other disciplines in the same building.

But a course which only consisted of getting the student on to the inside of one or more disciplines would not count as a course of higher education; it would merely be a training in those disciplines.

Initial training courses for secondary school teachers frequently consisted of methods or subject studies, for part of the time, and formal work in each of the four ‘foundation disciplines’ for the rest.
In the technical disciplines, Furuseth and Tomba predictably exchanged victories (two for Furuseth, three for Tomba whose bandwagon is definitely rolling again).

Group members have to co-operate within the disciplines of time and equal opportunities for participation.

The students and others were highly critical of the Dip.AD for a number of reasons, not all of them compatible: that it did not impart a sound technical training and failed to produce good design practitioners; that it was becoming so academic in content that it was losing touch with the market-place; that its status was popularly regarded as inferior to that of courses in other subjects which led to the award of degrees; and that instead of a network of inter-related courses imparting a wide range of studies, it offered only a small number of ladder-like disciplines.

Kung fu incorporates ideas from many disciplines, including wrestling, with its locks, holds, throws and takedowns.

In attempting to summarize the developments in studies of environmental processes pertinent to, and made by, physical geographers it is evident that it is extremely artificial to distinguish the contributions made by physical geographers per se from those contributed by practitioners of other disciplines.

We are a voluntary body, but thankfully are able to influence the decision-makers because we have among our members those with local knowledge and with expertise in many disciplines relevant to our work.

In a general scheme, all disciplines in human knowledge must obviously be represented.

Pottery, for example, may be treated as art, science or technology, and within a discipline oriented scheme the opportunity will probably exist to classify pottery in at least any one of these three disciplines.

The Northern Ireland Chamber of Commerce has stated that it supports the privatisation of NIE because it is convinced that the introduction of private sector business disciplines will ultimately produce a more efficient industry.’

Stage II of the programme, 1986-1988, will bring together the Centre's various disciplines — social administration, economics, political science, policy analysis — in order to illuminate policy choices.

Garfield has described twigging as the inexorable result of realignments in the organization of disciplines 67.

This teaching should be available to every engineering student, in all disciplines.

As far as computing expenditure is concerned, ‘Other Physical Sciences’ include many of the ‘number-crunching’ disciplines, where large numbers of complex calculations have to be performed on the research data, and so correlation between ranking (as defined above) and computer expenditure might be expected.

There are many opportunities for students from all disciplines to enhance and make use of their computing skills while they are undergraduates.

Table III shows pattern of referral from different types of hospital and the two main disciplines.
The Henley MBA combines study and practical application in the key management disciplines with challenging work on Strategy, Managing Strategic Change and Managing Strategic Information.

Open at management level, not only to HCIMA members, but also to the industry as a whole, the management development topics will cover a range of disciplines, from marketing and personnel to finance.

And it is better so, because all these value concerns do need to be pursued within other disciplines as within RE.

Scientific research is usually carried out by a team of scientists, often from several disciplines who work together, each of whom contributing something to the whole.
Annexe 9-3 Occurrences de TOPIC dans CAEMS

En rouge le sens « matière / thématique de recherche / de travail »
En bleu le sens « sujet / thème de discussion / débat »

1971

1. The following topics are covered: transuranic element chemistry; nuclear chemistry, analytical methods, reactor chemistry with special reference to contamination reactor circuits. [733-009 (1971) : 38]

2. Preference will be given to candidates with experience in surface physics, band theory of solids, the theory of soft X-ray spectroscopy or related topics. [733-044 (1971) : 43]

3. Staff research interests cover a wide range of topics including spectroscopy, high temperature chemistry, nuclear chemistry, radio-tracer studies in biochemistry, kinetics, thermodynamics, organic mechanism studies, etc. [733-051 (1971) : 44]

4. Topics under investigation include both toxic and ionising radiation hazards and also those due to the inhalation of dusts causing silicosis, asbestosis, byssinosis and similar industrial lung diseases. [733-084 (1971) : 48]

5. The person appointed will be required to participate in the teaching of statistics at an undergraduate level and general and specialist mathematical topics at undergraduate and post graduate levels to students in this other Faculties. [737-025 (1971) : 279]

6. Would you like to study these topics and have an opportunity to tackle a research project? [737-036 (1971) : 279]

7. Work would be primarily in research in earth science topics and writing scripts for Exhibitions, [745-012 (1971) : 58]

8. involving liaison with design consultants, to classifying and registering building stone samples and dealing with enquiries on geological topics from the public. [745-012 (1971) : 58]

9. Applications are invited from graduates with at least six years experience in research and development and it would be an advantage to have worked on one of the following topics: Ion implantation, sputtering, ion optics and semiconductor or thin film devices. [745-013 (1971) : 58]

11. The person appointed will be required to participate in the teaching of statistics at an undergraduate level and general and specialist mathematical topics at undergraduate and postgraduate level, to students in this and other Faculties. [745-060 (1971) : 62]

12. A wide range of interesting topics are being investigated in the fields of Powder Technology, Materials Engineering and Materials Protection and vacancies will exist in all research groups. [745-072 (1971) : 63]

13. Topics include management of research and development, scientific method, communication in science and political and social aspects of science. [745-082 (1971) : 63]
14. **Topics** to be covered include the effects of nutrition, drugs, smoking, radiation, pollution and social factors affecting the foetal and maternal environment. [745-093 (1971) : 64]

15. The work will involve Research in gas engineering and the exact **topic** will be selected after discussion of preference with the successful candidate. [750-063 (1971) : 360]

16. The successful candidate will be expected to register for a higher degree and will be given background training in gasdynamics and other related **topics**. [750-068 (1971) : 360]

17. This **topic** would suit a first-class or 2(i) Honours graduate in engineering (or perhaps physics or mathematics) who finds most academic research remote or narrow. [758-067 (1971) : 55]

18. Applications are invited for an S.R.C. studentship on the above **topic**, in collaboration with Pilkington Bros. Ltd. (Industrial Supervisor Dr. P. H. Gaskell). Applicants, who should have a first or upper second class honours degree in Chemistry or Physics, should contact Dr. A. J. Leadbetter, School of Chemistry, University of Bristol, Bristol RS8 1TS as soon as possible. [758-072 (1971) : 55]

19. A limited number of vacancies exist for graduates in pure or applied science to carry out research for M.Sc. and Ph.D. degrees. The department offers a wide range of research **topics**, including chemical process development, heat and mass transfer studies, reactor and electrochemical engineering, process control and fuel science. [758-073 (1971) : 55]

21. Our other services include INSPEC **topics**, science abstracts, current papers and magnetic tapes. [763-023 (1971) : 345]

22. The Division offers opportunities for engineers and scientists to undertake research in a wide variety of **topics**. [772-018 (1971) : 54]

23. Specialisation is available in a wide range of **topics** including Operational Research, Finance, Personnel, Marketing and Production. [772-042 (1971) : 57]

24. **Topics** discussed will include Penicillins, Cephalosporins, Tetracyclines and Polypeptide-Antibiotics, Antibiotics-Sugars and Mode of Action of Antibiotics, Affecting Cell-wall Structure. [772-072 (1971) : 60]

25. Your superficial knowledge of the **topic** is just the tip of a very lucrative iceberg. [772-081 (1971) : 62]

26. Opportunities exist for research leading to the degree of Ph.D. in a wide range of **topics** in both experimental and Theoretical Solid State Physics and in the Physics of Materials. [774-047 (1971) : 191]

**1995**

1. **Topics** will include: Preparation and processing of tissue Immunoperoxidase techniques for electron microscopy; Colloidal gold techniques; Cryoultramicratomy; Multiple staining procedures; Lowicryl technology [1959-034 (1995) : 53]

3. The Institute is instrumental in identifying and investigating new issues in this field and publishes authoritative documents on **topics** of major interest. [1963-023 (1995) : 56]
4. Applications are invited from well qualified candidates for Ph.D., MPhil and MSc degrees in a wide variety of topics within the above subject areas. [1963-092 (1995) : 72]

5. [The course] provides teaching in the core elements of Biotechnology, and gives students an opportunity to complete an in-depth 36-week research project. See Ph.D. Research Projects for details of topics and supervisors. [1963-100 (1995) : 74]

7. The specific topics for which resources are likely to be available next year are detailed in the MAFF Food Research Requirements Document 1996/97: Strategic Research, which has recently been published. [1967-044 (1995) : 75]

8. The Lecturers will be expected to make innovative and significant contributions to the teaching of these highly successful courses which cover such topics as economics and management in the chemical industry, atmospheric chemistry, geochemistry, and applications of clean technology and analytical chemistry. [1967-104 (1995) : 89]

9. The BBSRC studentships are open to competition but at least two must be CASE awards, possible topics are: Professor G. M. Gadd (fungal metabolism), Professor R. A. Herbert (microbiology of extremophiles), Dr S. F Hubbard (insect populations/genetics), Dr C. J. Hutchison (control of cell division), Dr R. Parsons (plant nitrogen nutrition), Dr P. Rowell (cyanobacterial differentiation), Professor J. I. Sprent (nitrogen fixing legumes), Dr J. D. B. Weyers (stomatal physiology), Dr W. G. F. Whitfield (insect developmental biology). [1971-006 (1995) : 56]

10. An outline of all available topics (NERC and BBSRC) can be obtained by writing to, telephone or faxing Miss Angela Nicoll, Department of Biological Sciences, University of Dundee, Dundee DD1 4HN. Tel: (01382) 344765. Fax: (01382) 322318. [1971-006 (1995) : 56]

11. Research Council studentships are available, tenable or three years from October 1995 for study for the degree of Ph.D. on each of the following topics: [• Viral load and transmission efficiency of BYDV in cereal aphids • Slugs and their natural enemies: coping with problems generated by set-aside land • Spatial processes and local diversity • Biochemical and molecular analysis of the role of melatonin in ageing in the nematode Caenorhabditis elegans [1971-030 (1995) : 65]

12. This course provides a broad background in general pathology and mechanistic toxicology, and is jointly organised by the Departments of Histopathology and Clinical Pharmacology. Theoretical and practical based tuition covers a wide range of topics fundamental to toxicology: cell and tissue biology, molecular biology techniques, cell damage, inflammation, healing, vascular disease, neoplasia, diagnostic histopathology, chemical analysis, pharmacokinetics, mechanisms of toxicity, teratogenesis, clinical toxicology, epidemiology, toxicity testing. [1971-099 (1995) : 83]

13. Nuclear Engineering: preference will be given to a person with an active research record in the general field of thermodynamics and fluid mechanics and who is able to offer specialist lectures on engineering topics relevant to the nuclear industry. [1976-029 (1995) : 70]

14. Topics include biotransduction with enzymes, antibodies and receptors; microelectronic devices and signal processing; biocompatibility and interfacing of biosensors for applications to, eg, medicine and the food industry. [1976-030 (1995) : 70]

15. Study for a higher degree in the exciting research environment of the Norman Borlaug Institute, by investigating one of the following topics: 1. Root specific expression vectors for sugar beet. 2. Production of low nitrogen input wheat plants by gene manipulation. [1976-078 (1995) : 81]
16. The judges will be looking for interesting research topics, scientific accuracy, clarity of expression and a lively writing style. [1980-001 (1995) : 47]

17. There are several possible research topics for this award: (i) natural product chemistry and nmr spectroscopy (ii) Raman spectroscopy and co-ordination chemistry (iii) mass spectrometry of novel organic ions (iv) synthetic polymer chemistry or (v) photocatalysis [1980-010 (1995) : 57]

18. Further details of these projects are available on request, preference for one or more of the research topics should be stated in the application. [1980-010 (1995) : 57]

19. Funded by NERC as part of its ROPA scheme, the research will address topics of symbiont diversity, transmission and co-evolution. [1980-051 (1995) : 68]

20. A research studentship has been awarded to Dr P. McDonald (Westlakes) and Dr K. N. White (Manchester) available on the topic entitled "The distribution of polonium in marine biota", from 20 September 1995. [1980-068 (1995) : 72]

21. Available from home/EC graduates holding 1st or 2i honours degrees in Chemical Engineering, Physics, Chemistry or Biological Sciences for Ph.D. projects on the following topics: * Clean Technology * Catalysis * Solids Processing * Environmental Engineering * Bioseparations * Animal Cell Culture [1984-076 (1995) : 73]

22. A commitment to teaching will be required as the successful candidate will also be expected to teach at undergraduate level in these areas and at postgraduate level in appropriate topics. [1984-080 (1995) : 74]

23. The UK Natural Environment Research Council has approved funding of £1.4 m for a 3-year interdisciplinary Special Topic on marine biofouling, to address surface properties, attachment processes and other interactions between organisms and marine substrata. [1984-085 (1995) : 75]

24. Knowledge and experience of one or more relevant topics, such as the use of molecular methods in characterisation of germplasm, GIS analyses of biodiversity, computer applications and database development for genetic resources and in situ conservation would be particularly advantageous. [1989-060 (1995) : 73]

25. Knowledge and experience of one or more relevant topics, such as the use of molecular methods in characterisation of germplasm, GIS analyses of biodiversity, computer applications and database development for genetic resources and in situ conservation would be particularly advantageous. [1993-084 (1995) : 74]

26. The appointee will, with the Head of the MRU, lead a research programme into novel diagnostic and identification methods, molecular epidemiology, drug susceptibility testing and other topics relevant to the study of mycobacteria. [2006-005 (1995) : 60]

27. Your main responsibilities will include the development and control of an external research programme, as well as maintaining awareness of nutritional topics relevant to the Company’s business. [2006-008 (1995) : 62]

28. As part of an expansion programme on our Basingstoke site, we have vacancies for graduates in microbiology or a related topic to join our R & D team developing a range of products for use in both clinical and industrial laboratories. [2006-032 (1995) : 70]

29. The research topic will be on the molecular and cellular actions of toxicants that inhibit fertility in the male. [2006-052 (1995) : 76]
30. Please identify which of the topics above interest you and explain why you would like to study for a Ph.D. in that area. [2006-067 (1995) : 79]

31. Requirements: Applicants should be at the dissertation stage of their Ph.D. with a research topic accepted by the candidate's university and able to make use of the UNU/IAS facilities in Tokyo to carry out their research. [2006-075 (1995) : 82]

32. Research topics should relate clearly to one of the following research areas of the UNU/IAS for the initial 1996-97 years: (i) eco-restructuring for sustainable development; (ii) mega-cities and urban development (iii) policy aspects of science, technology, and society in relation to sustainable development; and (iv) peace, multilateralism, and governance. Where appropriate, applicants should be competent in scientific research methodologies and computer-based analysis. [2006-075 (1995) : 82]

2005

1. The Medical Research Council Virology Unit has four funded research studentships available, starting October 2005 and of 3 ½ years duration, for work leading to the Ph.D degree on topics in human molecular virology. [2485-005 (2005) : 58]

2. The School offers specialist postgraduate training at MSc/ PgDip/ PgCert level in the following topics: Aquatic Ecosystem Management; Biomedical Science; Drug Design and Biomedical Science; Ecotourism; Wildlife Biology and Conservation [2485-013 (2005) : 61]

3. There is no specific requirement regarding field of research but you will be expected to make a contribution to the teaching activities of the Department across a wide range of materials topics. [2489-048 (2005) : 76]

4. There is no specific requirement regarding field of research but you will be expected to make a contribution to the teaching activities of the Department across a wide range of materials topics. [2489-063 (2005) : 79]

5. Topics include: • Chemoinformatics • Computer-aided molecular design • Programming and data mining • Databases and web technologies [2489-069 (2005) : 81]

6. Candidates should have, or be likely to obtain, a first or upper second class honours degree in a relevant discipline, and should indicate one or more areas of interest from the list of topics mentioned. [Advanced Drug Delivery and Tissue Engineering; Analytical Bioscience; Medicinal Chemistry and Structural Biology; Biophysics and Surface Analysis] [2493-063 (2005) : 74]

7. A first degree in environmental sciences, meteorology, physics, mathematics or a similar topic is essential. [2498-056 (2005) : 70]

8. Two NERC projects on environmental / ecological / ecophysiological topics. [2498-068 (2005) : 74]

9. Our one-year MSc courses cover all the topics you need to become a “complete” graduate - language skills, personal development programmes and so much more. [2498-072 (2005) : 75]

10. Our one-year MSc courses cover all the topics you need to become a “complete” graduate - language skills, personal development programmes and so much more. [2502-076 (2005) : 79]

11. Applicants should have a good honours degree in Biological Sciences, Chemical Engineering or related topic. [2502-078 (2005) : 79]
12. Our one-year MSc courses cover all the **topics** you need to become a “complete” graduate - language skills, personal development programmes and so much more. [2506-076 (2005) : 79]

13. Ideally with a PhD in a farm science / health **topic** and at least five year's experience, you will have a proven ability to meet deadlines and work on your own initiative. [2511-040 (2005) : 65]

14. Our one-year MSc courses cover all the **topics** you need to become a “complete” graduate - language skills, personal development programmes and so much more [2511-077 (2005) : 79]

15. For a list of research **topics**, full details of the programme and to register to apply, please visit Toshiba’s website: [2515-011 (2005) : 58]

16. With a first degree in a related **topic** and a Masters degree in Computer Animation, you possess strong programming and mathematic skills, knowledge of 3D computer graphics and a sound knowledge of a computer animation system. [2519-069 (2005) : 76]

17. Candidates should be able to teach a range of **topics** in Mechanical and Biomedical Engineering within a 4-year Engineering Science syllabus, and have research interests in orthopaedic biomechanics. [2519-076 (2005) : 78]

18. Our MSc in Science enables you to explore broad scientific **topics** at postgraduate level, while still pursuing your career. [2519-080 (2005) : 79]

19. "If there’s one intellectual **topic** that’s starting to blaze red hot, it is the relationship between science and religion." [2524-010 (2005) : 55]

20. The program starting February 1st 2006 will cover the following **topics**: • interactions between microorganisms • host/microbial pathogen interactions • role of networks and bioinformatics [2524-078 (2005) : 79]

21. Our MSc in Science enables you to explore broad scientific **topics** at postgraduate level, while still pursuing your career. [2524-080 (2005) : 79]

**2006**

1. With the creation of the Nuclear Decommissioning Authority in 2005, nuclear regulation and planning is a hot **topic**. [2541-012 (2006) : 62]

2. The post is full-time and fixed-term for two years with the possibility of an extension, in which case there may be an opportunity to enrol for a PhD in a **topic** allied to the research programme. [2541-074 (2006) : 84]

3. **Topics** include spatially-embedded complex systems; adaptive modelling of complex data; principles of biomolecular organisation; evolution of complexity. [2541-104 (2006) : 95]

4. We also offer an intensive Spring School (29th March - 12th April covering some of the same **topics**, designed for postgraduate students and industrial employees. [2541-104 (2006) : 95]

5. Research **topics** currently include: Magnetic/piezo/strain coupling in multiferroics, high power non-linearity in bulk piezoelectric ceramics, piezoelectric MEMS/NEMS integration issues, nano-scale functionalised AFM probes, non-linear modelling for piezoelectrics, and measurement of thin film electroactive properties. [2545-031 (2006) : 71]
6. Your job would be to research topics right through to putting together the full agenda plus workshop for a three-day event, attending and opening the event. [2545-039 (2006) : 74]

8. At a later stage, come up with topic subjects for conferences [2545-039 (2006) : 74]

9. Against a background of increasing regulatory developments affecting the chemical industry product stewardship is a topic of growing importance, and a priority issue for the Company. [2545-049 (2006) : 79]

10. [The UK Clinical Research Network] is initially supporting the development of six Topic Specific Research Networks in the fields of cancer, dementias and neurodegenerative diseases, diabetes, medicines for children, mental health and stroke and, over time, will hopefully enable research to be conducted across the full spectrum of disease and clinical need. [2545-077 (2006) : 89]

11. You should have a good first degree in Energy Science/Engineering, Environmental Science/Engineering, Mechanical Engineering, Chemical Engineering or Applied Chemistry or related topic. [2545-095 (2006) : 94]

12. Using your existing and newly acquired knowledge you will conduct risk assessments on current topics of interest such as bovine TB, BSE, Salmonella and antibiotic resistance. [2550-029 (2006) : 70]

13. Research topics include: computational method and software development, and applications to modeling the excited electronic states of large molecules and their photochemical reaction dynamics; modeling biological chromophores; condensed phase solvation dynamics; theoretical study of ionic liquids; computer simulations of materials and the design of new materials; theoretical study of catalysis and the development of chemistry on the internet. [2550-068 (2006) : 85]

14. Topics covered include: • High throughput Genotyping • Quantitative RT-PCR • Microarray analysis • Whole library sequencing [2550-073 (2006) : 86]

15. Further details on the topics can be found at www.nerc-essc.ac.uk [2554-014 (2006) : 64]

16. The course covers topics of current interest including; drug selection in the main therapeutic areas, formularies, guidelines and protocols, shared care prescribing, disease management, alternatives to prescribing, the drug industry, audit of prescribing, critical reading, and prescribing research. [2554-039 (2006) : 74]

17. The successful candidate will be trained to PhD level in a relevant topic and, ideally, will have experience in one or more of the following areas: device fabrication and characterisation, device physics, surface analysis, microfabrication and clean room practices. [2554-072 (2006) : 86]

18. It is hoped that the appointee will register for a part-time research degree on a topic related to the project's work, and pursue this in their other time. [2554-077 (2006) : 87]

19. Topics include the application of fluorescence techniques and nanoparticles in biophysics; nanoscale optical imaging of nanomaterials and biological cells; and x-ray sources, detectors and optics for x-ray microscopy, studies of radiation damage mechanisms related to cancer, and lithography. [2558-099 (2006) : 98]

20. Please visit www.bdi.ie for more information on these positions and topic areas. [2563-062 (2006) : 71]

21. The ideal candidate will have a PhD in a relevant topic, combined with a broad interest in genetic medicine. [2567-018 (2006) : 58]
22. To apply, write a short news article (maximum 400 words) aimed at a professional audience about a recently published research article on a global health threat topic you consider interesting. [2567-019 (2006) : 58]

23. You should have a good honours degree in Biological Sciences, Chemical Engineering or related topic. [2567-065 (2006) : 77]

24. The BIDR is divided into departments that deal with a variety of topics; Desert Ecology, Dryland Agriculture, Dryland Biotechnologies, Environmental Hydrology and Microbiology, Desalination and Water Treatment, Man in the Desert, Solar Energy and Environmental Physics. [2567-074 (2006) : 80]

25. The Editor will also work to research and identify the next protein-based topics for coverage in the database, and then take the lead in developing and building the Editorial Boards and content for these new fields. [2572-024 (2006) : 70]

26. You should have a good honours degree in Biological Sciences, Chemical Engineering or related topic. [2572-087 (2006) : 97]

27. You will develop innovative and spatially explicit approaches to interpret marine geospatial data whilst supporting and leading sub-topics within marine science research programmes using GIS modelling techniques. [2576-042 (2006) : 76]

28. Current research topics include NEMS devices, spintronics, Silicon-based optoelectronics, optoelectronic applications of polymers, Nanoelectronics and RF electronics. [2576-085 (2006) : 89]

29. In addition, the post holder will ideally have more than 1 year's post graduate experience of air pollution related topics, within a university, private company or environmental consultancy. [2580-071 (2006) : 79]

2009

1. All Ph.D. projects involve collaborations between at least two internationally competitive and well-funded laboratories, with topics covering the whole range of neuroscience related to pain mechanisms and their control: molecular biology, cellular mechanisms, integrated systems neuroscience and human neurophysiology. [2689-039 (2009) : 61]

2. In terms of qualifications, you should have a Ph.D. (or equivalent) in a DMPK related topic. [2694-024 (2009) : 61]

3. This includes the topics of thermo-mechanical metamaterials, (including anomalous properties such as negative Poisson’s ratio, thermal expansion coefficient and stiffness, and novel manufacturing methods such as Additive Layer Manufacturing), electromagnetic metamaterials, plasmonics, spintronics, data storage/memory materials and devices and THz photonics. [2694-042 (2009) : 69]

4. You should have a Ph.D. in a theoretical topic in Engineering or Physics or Applied Mathematics. [2698-053 (2009) : 70]

5. "While I was doing my postdoc I got engaged in courses on topics such as commercialising science - it really lit a fire in me;" he says. [2702-005 (2009) : 46-47]

8. Your experience and knowledge in cardiology-related **topics** will be essential, and experience in pacing and echocardiography an advantage. [2702-053 (2009) : 69]

9. This year’s research **topics** include: • Climate change impacts on treatment and assets • Drinking water quality • Flood risk and treatment failure analysis • Novel investment and project appraisal methods [2711-050 (2009) : 67]

10. Within the cooperation programme FOKUZ, 'Fundamenteel Onderzoek Kust en Zee' (Fundamental Research on Seas and Coasts), the two institutes will develop a joint research programme on the **following topics**: • The physics, biogeochemistry and ecology of small particles in the North Sea. • Biogeochemical cycles in relation to climate change and eutrophication. • The role of biodiversity in ecosystem functioning. [2719-035 (2009) : 62]

11. You should have a degree in a relevant biological **topic** and some laboratory experience. [2728-022 (2009) : 62]

12. The Senior AQA post requires postgraduate experience of air pollution related **topics**, within a university, private company or environmental consultancy including the operation of air quality monitoring equipment. [2728-036 (2009) : 68]
Annexe 9-3-1 Listes (> 2) de TOPIC dans CAEMS

1971

1. The following topics are covered: transuranic element chemistry; nuclear chemistry, analytical methods, reactor chemistry with special reference to contamination reactor circuits. [733-009 (1971) : 38]

2. Staff research interests cover a wide range of topics including spectroscopy, high temperature chemistry, nuclear chemistry, radio-tracer studies in biochemistry, kinetics, thermodynamics, organic mechanism studies, etc. [733-051 (1971) : 44]

3. Topics under investigation include both toxic and ionising radiation hazards and also those due to the inhalation of dusts causing silicosis, asbestosis, byssinosis and similar industrial lung diseases. [733-084 (1971) : 48]

4. Applications are invited from graduates with at least six years experience in research and development and it would be an advantage to have worked on one of the following topics: Ion implantation, sputtering, ion optics and semiconductor or thin film devices. [745-013 (1971) : 58]

6. Topics include management of research and development, scientific method, communication in science and political and social aspects of science. [745-082 (1971) : 63]

7. Topics to be covered include the effects of nutrition, drugs, smoking, radiation, pollution and social factors affecting the foetal and maternal environment. [745-093 (1971) : 64]

8. A limited number of vacancies exist for graduates in pure or applied science to carry out research for M.Sc. and Ph.D. degrees. The department offers a wide range of research topics, including chemical process development, heat and mass transfer studies, reactor and electrochemical engineering, process control and fuel science. [758-073 (1971) : 55]

10. Specialisation is available in a wide range of topics including Operational Research, Finance, Personnel, Marketing and Production. [772-042 (1971) : 57]

11. Topics discussed will include Penicillins, Cephalosporins, Tetracyclines and Polypeptide-Antibiotics, Antibiotics-Sugars and Mode of Action of Antibiotics, Affecting Cell-wall Structure. [772-072 (1971) : 60]

12. Opportunities exist for research leading to the degree of Ph.D. in a wide range of topics in both experimental and Theoretical Solid State Physics and in the Physics of Materials. [774-047 (1971) : 191]
1. **Topics** will include: Preparation and processing of tissue Immunoperoxidase techniques for electron microscopy; Colloidal gold techniques; Cryoultramicatomy; Multiple staining procedures; Lowicryl technology [1959-034 (1995) : 53]

2. The Lecturers will be expected to make innovative and significant contributions to the teaching of these highly successful courses which cover such **topics** as economics and management in the chemical industry, atmospheric chemistry, geochemistry, and applications of clean technology and analytical chemistry. [1967-104 (1995) : 89]

3. The BBSRC studentships are open to competition but at least two must be CASE awards, possible **topics** are: Professor G. M. Gadd (fungal metabolism), Professor R. A. Herbert (microbiology of extremophiles), Dr S. F Hubbard (insect populations/genetics), Dr C. J. Hutchison (control of cell division), Dr R. Parsons (plant nitrogen nutrition), Dr P. Rowell (cyanobacterial differentiation), Professor J. I. Sprent (nitrogen fixing legumes), Dr J. D. B. Weyers (stomatal physiology), Dr W. G. F. Whitfield (insect developmental biology). [1971-006 (1995) : 56]

4. Research Council studentships are available, tenable or three years from October 1995 for study for the degree of Ph.D. on each of the following **topics**: [• Viral load and transmission efficiency of BYDV in cereal aphids • Slugs and their natural enemies: coping with problems generated by set-aside land • Spatial processes and local diversity • Biochemical and molecular analysis of the role of melatonin in ageing in the nematode Caenorhabditis elegans [1971-030 (1995) : 65]

5. This course provides a broad background in general pathology and mechanistic toxicology, and is jointly organised by the Departments of Histopathology and Clinical Pharmacology. Theoretical and practical based tuition covers a wide range of **topics** fundamental to toxicology: cell and tissue biology, molecular biology techniques, cell damage, inflammation, healing, vascular disease, neoplasia, diagnostic histopathology, chemical analysis, pharmacokinetics, mechanisms of toxicity, teratogenesis, clinical toxicology, epidemiology, toxicity testing. [1971-099 (1995) : 83]

6. **Topics** include biotransduction with enzymes, antibodies and receptors; microelectronic devices and signal processing; biocompatibility and interfacing of biosensors for applications to, eg, medicine and the food industry. [1976-030 (1995) : 70]

7. Study for a higher degree in the exciting research environment of the Norman Borlaug Institute, by investigating one of the following **topics**: 1. Root specific expression vectors for sugar beet. 2. Production of low nitrogen input wheat plants by gene manipulation. [1976-078 (1995) : 81]

8. There are several possible research **topics** for this award: (i) natural product chemistry and nmr spectroscopy (ii) Raman spectroscopy and co-ordination chemistry (iii) mass spectrometry of novel organic ions (iv) synthetic polymer chemistry or (v) photocatalysis [1980-010 (1995) : 57]

9. Funded by NERC as part of its ROPA scheme, the research will address **topics** of symbiont diversity, transmission and co-evolution. [1980-051 (1995) : 68]

10. Available from home/EC graduates holding 1st or 2i honours degrees in Chemical Engineering, Physics, Chemistry or Biological Sciences for Ph.D. projects on the following **topics**: * Clean Technology Catalysis * Solids Processing * Environmental Engineering * Bioseparations * Animal Cell Culture [1984-076 (1995) : 73]

11. Knowledge and experience of one or more relevant **topics**, such as the use of molecular methods in characterisation of germplasm, GIS analyses of biodiversity, computer applications and database development for genetic resources and in situ conservation would be particularly advantageous. [1989-060 (1995) : 73]
12. Knowledge and experience of one or more relevant topics, such as the use of molecular methods in characterisation of germplasm, GIS analyses of biodiversity, computer applications and database development for genetic resources and in situ conservation would be particularly advantageous. [1993-084 (1995) : 74]

13. Research topics should relate clearly to one of the following research areas of the UNU/IAS for the initial 1996-97 years: (i) eco-restructuring for sustainable development; (ii) mega-cities and urban development (iii) policy aspects of science, technology, and society in relation to sustainable development; and (iv) peace, multilateralism, and governance. Where appropriate, applicants should be competent in scientific research methodologies and computer-based analysis. [2006-075 (1995) : 82]

2005

1. The School offers specialist postgraduate training at MSc/ PgDip/ PgCert level in the following topics: Aquatic Ecosystem Management; Biomedical Science; Drug Design and Biomedical Science; Ecotourism; Wildlife Biology and Conservation [2485-013 (2005) : 61]

2. Topics include: • Chemoinformatics • Computer-aided molecular design • Programming and data mining • Databases and web technologies [2489-069 (2005) : 81]

3. Candidates should have, or be likely to obtain, a first or upper second class honours degree in a relevant discipline, and should indicate one or more areas of interest from the list of topics mentioned. [Advanced Drug Delivery and Tissue Engineering; Analytical Bioscience; Medicinal Chemistry and Structural Biology; Biophysics and Surface Analysis] [2493-063 (2005) : 74]

4. Two NERC projects on environmental / ecological / ecophysiological topics. [2498-068 (2005) : 74]

5. The program starting February 1st 2006 will cover the following topics: • interactions between microorganisms • host/microbial pathogen interactions • role of networks and bioinformatics [2524-078 (2005) : 79]

2006

1. Topics include spatially-embedded complex systems; adaptive modelling of complex data; principles of biomolecular organisation; evolution of complexity. [2541-104 (2006) : 95]

2. Research topics currently include: Magnetic/piezo/strain coupling in multiferroics, high power non-linearity in bulk piezoelectric ceramics, piezoelectric MEMS/NEMS integration issues, nano-scale functionalised AFM probes, non-linear modelling for piezoelectrics, and measurement of thin film electroactive properties. [2545-031 (2006) : 71]

3. Using your existing and newly acquired knowledge you will conduct risk assessments on current topics of interest such as bovine TB, BSE, Salmonella and antibiotic resistance. [2550-029 (2006) : 70]

4. Research topics include: computational method and software development, and applications to modeling the excited electronic states of large molecules and their photochemical reaction dynamics; modeling biological chromophores; condensed phase solvation dynamics; theoretical study of ionic liquids; computer simulations of materials and the design of new materials; theoretical study of catalysis and the development of chemistry on the internet. [2550-068 (2006) : 85]
5. **Topics covered include:** • High throughput Genotyping • Quantitative RT-PCR • Microarray analysis • Whole library sequencing [2550-073 (2006) : 86]

6. The course covers topics of current interest including; drug selection in the main therapeutic areas, formularies, guidelines and protocols, shared care prescribing, disease management, alternatives to prescribing, the drug industry, audit of prescribing, critical reading, and prescribing research. [2554-039 (2006) : 74]

7. **Topics** include the application of fluorescence techniques and nanoparticles in biophysics; nanoscale optical imaging of nanomaterials and biological cells; and x-ray sources, detectors and optics for x-ray microscopy, studies of radiation damage mechanisms related to cancer, and lithography. [2558-099 (2006) : 98]

8. The BIDR is divided into departments that deal with a variety of topics; Desert Ecology, Dryland Agriculture, Dryland Biotechnologies, Environmental Hydrology and Microbiology, Desalination and Water Treatment, Man in the Desert, Solar Energy and Environmental Physics. [2567-074 (2006) : 80]

9. Current research topics include NEMS devices, spintronics, Silicon-based optoelectronics, optoelectronic applications of polymers, Nanoelectronics and RF electronics. [2576-085 (2006) : 89]

---

2009

1. All Ph.D. projects involve collaborations between at least two internationally competitive and well-funded laboratories, with topics covering the whole range of neuroscience related to pain mechanisms and their control: molecular biology, cellular mechanisms, integrated systems neuroscience and human neurophysiology. [2689-039 (2009) : 61]

2. This includes the topics of thermo-mechanical metamaterials, (including anomalous properties such as negative Poisson’s ratio, thermal expansion coefficient and stiffness, and novel manufacturing methods such as Additive Layer Manufacturing), electromagnetic metamaterials, plasmonics, spintronics, data storage/memory materials and devices and THz photonics. [2694-042 (2009) : 69]

3. You should have a Ph.D. in a theoretical topic in Engineering or Physics or Applied Mathematics. [2698-053 (2009) : 70]

6. This year’s research topics include: • Climate change impacts on treatment and assets • Drinking water quality • Flood risk and treatment failure analysis • Novel investment and project appraisal methods [2711-050 (2009) : 67]

7. Within the cooperation programme FOKUZ, ‘Fundamenteel Onderzoek Kust en Zee' (Fundamental Research on Seas and Coasts), the two institutes will develop a joint research programme on the following topics: • The physics, biogeochemistry and ecology of small particles in the North Sea. • Biogeochemical cycles in relation to climate change and eutrophication. • The role of biodiversity in ecosystem functioning. [2719-035 (2009) : 62]

Annexe 9-3-4 Occurrences de TOPIC dans BNC

En rouge les occurrences qui font référence aux matières (universitaires)

Here is a random selection of 50 solutions from the 2418 found.

A0L 1573 ‘Only a certain topic is censored, a certain party's name is not to be mentioned.’

A6A 231 The rise and fall and rise again of independent record companies is a topic of great debate within the industry.

ANS 326 At level 8, this might include some debating activities within a formal structure, opportunities to give talks on a topic of individual interest or expertise, leading a group activity towards a planned outcome or presentation (which might include a wider audience than the class).

B17 1219 It has become one of the basic and seminal texts in the sociological study of this topic.

B25 879 One set of interviews, with the literary editors of national newspapers, was carried out using half a dozen ‘topic headings’ simply to ensure that at each interview I covered the ground I had decided beforehand was important for my purpose.

B7H 2071 ACID rain has been a topic in the pages of this magazine for years and a frequent one recently.

C88 120 Housing was the next topic — Mr. Jenks called for the unfreezing of money from council house sales, while Mr. Malone spoke of the government's record of investment in housing associations.

CBR 1676 On the one hand there is knowledge of conceptual content or topic area.

CFX 140 Even if this is taken as a fair comment on the general scientific validity of the biographical approach to the topic, the preconceptions which Cox brought to her own analysis are also much in evidence.

CG6 333 On the basis of past experience the child is likely to try and interpret the adult's next act as some form of ‘comment’ on this topic.

CHA 1520 You may wince at the ‘blurbs’ at the top of features today but how about this from 40 years ago: ‘A new feature called ‘Argument’ — a spontaneous tape-recorded discussion by leading personalities on a topic of the moment faithfully transcribed by assistant editor Jack Baverstock.’

CHS 1508 Briefing on this topic should cover the incidence of crime, whether it is usual for expatriates to employ security staff and, if so, when such staff should be on duty, and procedures for dealing with the police.

CJ3 590 Nevertheless, the topic remains a fascinating one: the magic of seeing animals like Melia, as it waves its two fearsome anemones at a predator, is not to be denied.

CMF 142 In the 1980s, the publication of the Black Report on inequalities in health prompted a mass of research into this topic (Townsend and Davidson 1982; Whitehead 1988).

CMF 579 Before leaving the topic of longitudinal studies, it is worth pointing out that the Census can be seen as an example.

EDL 1485 There is an Inter-American Convention on the Taking of Evidence Abroad 1975 (with a supplementary Protocol of 1984) and the Asian-African Legal Consultative Committee has drafted model bilateral conventions including provisions on the same topic.
Now, once again, the topic was timely as a substantial area of policy that had been within the ambit of the Royal Commission, but one which had not been pre-empted by Government intentions for legislation.

A term's work can be planned with a variety of experiences in different modes, enabling the slower students at least to master basic points and others to fill out this minimum with what the jargon calls "horizontal enrichment", in other words different facets of the topic in wider contexts and relationships.

The last session before Christmas was taken up with an activity unrelated to the topic.

The reader presumably can just as easily reconstruct an alternative context (e.g. a description of the effects of marijuana on a Nativity play performance) in which Mary would not be proposed as 'the topic of the discourse'.

The general point in this case is something like 'the effect of restoring old buildings' which is already part of the topic framework established by the preceding discourse.

In the following, for example, the speakers alternate between the main topic of the aerobics and the lesser topic of the missing watch:

In fact, the first piece I ever wrote about fish was on this topic.

The evidence is that communications from the judiciary to the Home Secretary on this topic are confidential; and I accept that there is at least a tacit agreement that neither side will disclose them without the consent of the other.

Well yes in actual fact our topic at the moment is weather and space.

To return to the main topic itself, that of the nature of the relationship between housing and fertility, it can be argued that for, those who choose a local authority tenancy, early childbearing, with or without marriage, is a rational strategy because it facilitates access to such a dwelling.

Whichever explanation is revealed by the major research effort that is still needed for the rest of the 1980s, the population changes discussed above have also had a major impact on rural communities, and so it is to this topic that attention is now turned.

The topic of a clause in topic-prominent languages always occurs in initial position (Li, 1976).

If initial position is reserved for theme and if topic always occurs in initial position, then theme and topic are presumably the same thing.

The topic lasted them all the way back to the Campo San Maurizio and it was not until they were climbing the stairs up to their respective rooms that he let himself say:

The question arises therefore, of combining care with other groups, but other than noting a joint social work/geriatric medicine/geriatric psychiatry proposal to build a combined day facility locally, discussion of this topic lies out with the scope of this talk.

These are based largely on existing historical studies and usually offer a good overview of a period or topic.

The key factor, phrase or word is more important than the main topic.
Another way of linking through **topic** is by means of subject matter introduced in the textbook for language practice.

The video camera's objective eye records an activity where several things happen at once: the interviewer is talking, responding, assessing, deciding which **topic** to introduce next; the interviewee is interpreting, responding, reacting to the situation and so on.

The subject of tax reform is a **topic** in its own right and can only be touched upon here.

Peter Hitt's **topic** is teacher's perceptions of management in schools.

Next **topic** is on memory.

The workshops will invite the wider research community and policy makers and practitioners to hear the findings of the Initiative presented in 3 **topic** areas: Education, training and employment; Domestic and family socialisation; youth politics and youth culture.

Papers subsequently published by such researchers may show no obvious Scottish connection in their titles, but it cannot be assumed that the work is unrelated to their thesis **topic**.

By mutual consent, it seemed, they spoke for the rest of the meal of anything but the one **topic** that was on both their minds.

In addition to this, candidates are required to submit a dissertation on a **topic**. The course has been developed with a view to preparing students for proceeding to research work in their field, or seeking employment in cultural institutions or the media.

While we are very happy to provide a list we ask that the students understand a little about the essay **topic** so the student's answer is his and not ours.

By linking your drama and your **topic** work, you can take ten or fifteen minutes at various times during the day to work with small groups.

Research then, which is really the, erm, the the type of the whole **topic** today.

David Jones of Sharelink has proposed an order-driven system for small value share transactions which would be displayed on investors' TV screens at home instead of on **TOPIC**.

The first **topic** to be considered is that of selling to industrial/commercial/public authority purchasers.

**Here is a random selection of 50 solutions from the 1912 found.**

**Topics** covered in this chapter

There was little cold blood about the **topics** discussed in these Margate letters.

Indeed, with some **topics** if the teacher does not handle them indirectly, the class will hastily protect themselves by opting out, fooling around, etc.
ANM 1191 NEXT SEASON TOPICS

ART 834 ‘Just how long can he continue to draw on the northern W.C. subculture to fuel his quill or equally abused topics of consternation?’

B1P 903 In considering the topics of the works to be collected it may be useful to visualize the whole subject in the form of a large sheet of paper divided into columns and rows.

B25 1289 The writing stage, when topics and questions are actually put down, can be quite a salutary experience.

B75 1620 Instead he has conducted a balanced exploration of such topics as organic systems, factory farming and the impact of agriculture on wildlife.

B7B 11 Do we really need lots of people sitting around pondering on research topics that are of little benefit to man or beast?

BNG 795 These topics may all be within some children's experience.

BNM 533 The following response: ‘Topics which cannot be adequately covered by the Council's training policy’ was rare.

BNM 899 The third aim of the project was to consider needs that are being, or could be, met from external/co-operative sources, and Chapter 5 examines the topics that libraries indicated as those for which there was most need for external training provision.

CG5 47 Checking high bills and dealing with tree roots are among the topics we cover.

CG9 621 Whatever breakdown is chosen, the course content must address all the ensuing topics.

CLL 251 Advanced students appreciate the cognitive approach (reflected in the Language Review sections throughout the units and the self-contained Grammar Section at the back of the Student's Book), the first-rate listening and reading texts, and the stimulating tasks and topics.

CPM 36 ‘I could do it if I wanted to, but I don't want to,’ he told a gathering of the Computer Journalists Club in Paris yesterday, as he held court on a range of topics, from the US government and economy, to the increasing pervasiveness of personal computer technology.

CRS 520 Given the degree and stubbornness of such inequalities, the topics that concern us are those of power, choice, entitlement and social justice: issues of rights, not needs.

CS3 263 The liberal theory of the press (see pp. 37 — 41) vests substantial discretionary power in private proprietors to campaign to change public perceptions of issues, or to foreclose discussion of threatening social topics.

EBG 45 Topics for discussion include Technologies of International Communication, The MacBride Movement: Flourishing or Perishing? and International Communication and International Conflict: Lessons from Recent History.

EF8 17 This work resulted in a series of seminal papers on topics such as word meaning, classification, processes of comparison, conservation, reasoning, verification, and egocentricity — e.g., Donaldson and Balfour, 1968; Donaldson, 1970, 1971, 1976; Donaldson and Wales, 1970; Donaldson and Lloyd, 1974; Donaldson and McGarrigle, 1974; McGarrigle and Donaldson, 1974; Donaldson and Hughes, 1979.
One reason for them being so common is that they reproduce at a high rate, and their high reproduction rate is one of the main topics of this chapter.

The first of these was the existence of an IS syllabus in the first year, in which pupils were required to seek out material on a range of topics amongst which the civilisation of antiquity appears to have featured heavily.

It is unlikely that many of the top band of lower attainers will get a high score on questions concerned with these topics.

Using this guide, the analyst must find that the following two discourse fragments, one each from stretches of spoken and written discourse, have several such topics.

Since they are applied to various topics throughout the text, an initial awareness is essential.

The outline of your notes should be based on the syllabus or programme of the subjects and built up from key words abstracted from textbooks and other writings on the topics concerned.

But not all topics of discourse, of course, are legitimate candidates for ontological existents.

You could draw up a checklist of topics which are of current concern to your students to help you select suitable items from news programmes.

The second term includes such topics as a study of poetry and the use of materials to support writing.

Throughout their journey several topics remained alive between them, to be returned to again and again, not so much as if the first discourse had not resolved matters — more as if they remained as life issues, or questions of the day.

Between 1845 and 1868 Waterston published papers in various journals, on the nature of heat, the behaviour of gases and liquids, related chemical topics, and on astronomical matters.

The value of projects lies less in the subject matter than in the fact that topics are chosen and worked on by the pupils themselves.

Since pupils' performances vary across different mathematical topics, profiling, such as that described in Examples C and D, will provide a fairer description of pupil progress than will a single grade.

A collection of general medical books in a public library may deal with the same range of topics, but the indexing can be broader than in a specialist context, and the terms used for the same thing may be different.

Topics for discussion with the Romanian Bar Association included the draft code for the practice of lawyers, currently before the Romanian Parliament.

As well as verifying centres' assessments, our verifiers offer support and advice on assessment and other topics during their visits.

One of the many topics covered by the research team was that of friendships and their importance to adolescents.

And they will focus upon three topics:
In addition to being crucial for successful orientation and movement in the world, spatial abilities are central to many classroom tasks, for instance, interpretation of graphs and map-reading. Despite this importance, developmental spatial cognition is under-researched compared with other topics such as development of reading, writing and mathematical skills.

The Research Development as a whole is concerned with four major topics: the policies employers adopt towards the labour force; the attitudes of workers to employment and the labour market; changes in the household and their relationship to both paid and unpaid work; and the impact of economic change on social integration and social stratification.

Attention has been given to such topics as the marking of subjects for gender, the differential achievements of boys and girls, and the poor performance of secondary school girls in mathematics.

Its shorter Broadsheets, over 150 of which had been produced by 1940, provided discussion on a wide range of topics of economic and social concern.

People's reaction to loss remains one of society's least understood and most off limits topics for discussion.

These topics are studied through active discussion in seminar groups.

Pupils soon grow weary of a parade of historical topics selected solely because they appear to have a popular appeal or relevance.

Pupils begin by contrasting the period in the past with their own experience today, using familiar topics like homes or the family.

The range of topics covered and the nature of the professional development activities undertaken are detailed in 2.2.2.

If er, scientists and his team works on a, or think they are on to a discovery or something that needs researching, can get, the necessary funding, office, or firms that they benefit, say this in the previous paragraph, that's fine, but to concentrate on topics which are I don't think that happens.

Erm, there was a big reunion at the house of the Mayor of Strasbourg, Baron Dietrich, and they discussed a number of things, and one of the topics was raised was how coarse the Revolutionary songs were.

And er that was er that was er the main topics of the conference.
Annexe 9-4 Occurrences de SUBJECT dans CAEMS

1971

1. Qualification – A.I.S.T. or equivalent experience (salary range £941 - £1,411) or "A" levels in Science subjects including Biology (salary range £832 at 21 - £1,247). [733-014 (1971) : 39]

2. Candidates should have a degree, HNC or equivalent in appropriate subject, and normally be aged 26-30. [733-018 (1971) : 39]

3. Applicants should possess 2 G.C.E. 'A' levels of O.N.C. in relevant subjects (chemistry would be an advantage). [733-020 (1971) : 40]

4. Qualifications: degree, or equivalent in scientific subject e.g. food science; and ability to communicate with scientists and laymen. [733-024 (1971) : 40]

5. Candidates should be qualified in chemistry or a related subject. [733-031 (1971) : 41]

6. A qualification of the standard of HNC or a general degree in an appropriate subject is normally required. [733-031 (1971) : 41]

7. Graduate with some experience in microbiology or equivalent subject required for above laboratory. [733-041 (1971) : 42]

8. A vacancy has arisen in the Council's headquarters office for a Scientific Adviser to be concerned with the administration of research in Plant Physiology and Biochemistry. Applicants should have a good record of research in one of these subjects and a good knowledge of the other. [733-042 (1971) : 42]

9. Applicants should have a good honours degree in Chemical Engineering, Chemistry, Mathematics, Civil Engineering, or other subjects relevant to the process design of water and waste-water treatment units. [733-055 (1971) : 44]

10. GKN needs graduates in all subjects, especially engineers and technologists. [733-059 (1971) : 45]

11. Qualifications: Four O levels (including English, Maths or a Science Subject) [733-073 (1971) : 47]

12. Applications are invited from suitably qualified persons with HNC degree in biological subjects. [733-083 (1971) : 48]

13. Candidates should have a degree, HNC or equivalent in an appropriate subject, and experience in a chemical or physical laboratory or an associated workshop is desirable. [733-084 (1971) : 48]

15. A pass degree in the above subjects is required for the Assistant Experimental / Experimental Officer position. [737-012 (1971) : 278]

16. 2 “A” levels in Science subjects [737-014 (1971) : 278]

17. and some laboratory experience or a degree in a Biological subject required. [737-014 (1971) : 278]

18. The Technical Division is engaged on investigational and development work on a wide variety of projects extending from farm milk to manufactured products and related subjects. [737-016 (1971) : 278]
19. Applicants for the technicians’ vacancies should possess H.N.C. or “A” levels in scientific subjects. [737-017 (1971) : 278]

20. Applicants for the junior technicians’ vacancies should be of “O” – “A” level standard in scientific subjects, or hold an O.N.C. [737-017 (1971) : 278]

21. Candidates must have a minimum of “O” level English, Maths, one Science and one other subject and will be expected to attend an appropriate day release course. [737-020 (1971) : 278]

23. Would you like to study these topics and have an opportunity to tackle a research project? If so, register for this M.Sc. course, or simply study some of these subjects. [737-036 (1971) : 279]

24. This course is intended for scientists and technologists concerned with Colour Measurement in Industry and deals with the fundamentals of the subject. [737-037 (1971) : 279]

25. Entry to the course is open to Honours Graduates in Chemistry, Physics, Chemical Engineering, Materials Science or related subjects and to persons holding other qualifications approved by the Senate. [737-039 (1971) : 280]

26. Applications are invited for the post of Lecturer engaged mainly in the development of a Higher National Certificate in Medical Laboratory subjects (alternative syllabus B), Medical Physics with physiological measurement or radiation technology. [741-010 (1971) : 520]

27. While it will be an advantage if applicants have already had some postgraduate experience in virology, excellent facilities will be available in newly built accommodation for those who wish to begin studying the subject as a career. [741-014 (1971) : 521]

28. Candidates should have a good honours degree and preferably experience in a related subject. [741-017 (1971) : 521]

29. There will be further scope for studying the subject in depth for devising new experiments in association with the team leader. [741-018 (1971) : 521]

30. GCE (or equivalent) in five subjects, two of which should be at “A” level preferably Geology, Physics, Mathematics or Chemistry. [745-012 (1971) : 58]

31. At age 22 or over, candidates are expected to have a degree, HNC or equivalent qualification in an appropriate subject. [745-012 (1971) : 58]

32. Applications are invited from candidates who have a good Honours Degree in an appropriate subject and preferably some industrial or research experience, to work in the field of fatigue crack propagation in high strength Naval steels. [745-021 (1971) : 59]

33. Block release, part-time day and evening, and short courses are provided in all aspects of printing and related subjects. [745-024 (1971) : 59]

34. candidates must have a minimum of “O” level English, maths., one science and one other subject and will be expected to attend an appropriate day release course. [745-030 (1971) : 59]

35. Graduates with a first or upper second class degree or equivalents in engineering, mathematics, physics or also in biological subjects for the hearing studies, will be considered. [745-031 (1971) : 60]
36. Qualifications: Four G.C.E. “O” level passes to include English and Mathematics or a Science Subject. [745-041 (1971) : 60]

37. Applicants should have a Pass Degree. Dip. Tech: H.N.C. or equivalent in appropriate subjects. [745-053 (1971) : 61]

38. Candidates must have a university degree or a Higher National Certificate in appropriate subjects or an equivalent qualification and must be over 26 years of age. [745-059 (1971) : 62]

39. The studentship will be available from 1st April, and the successful applicant will be expected to work for the degree of Ph. D. and must have an upper second class Honours Degree, or better, in Metallurgy or a related subject. [745-074 (1971) : 63]

40. It will be held on 20 April, and the subjects dealt with will include basic principles, programming, standards and manufacturing and management aspects, including problems in introducing NC into the factory. [745-076 (1971) : 63]

41. Applications are invited for entry to this new course, starting in October 1971, from persons with an honours degree in any subject and a good knowledge of mathematics and statistics. [745-077 (1971) : 63]

42. Applicants should normally possess a good Honours degree (or its equivalent) in chemistry or a related subject. [745-080 (1971) : 63]

43. Applications are also invited from those interested in studying for a Ph.D. in any of these subjects. [745-089 (1971) : 64]

44. Qualifications. GCE (or equivalent) in five subjects, [750-001 (1971) : 354]

45. two of which should be A level passes in scientific mathematical subjects. [750-001 (1971) : 354]

46. At age 22 or over, candidates are required to have a Pass degree HNC or equivalent qualification in an appropriate subject. [750-001 (1971) : 354]

47. Qualifications: Over age 22 pass degree or H.N.C. in appropriate subject. [750-002 (1971): 354]

49. and scientific subjects at Advanced level. Salary (under review) according to age and experience. [750-002 (1971): 354]

50. Candidates must have ‘O’ level Maths and at least one Science subject. [750-007 (1971) : 354]

51. Statistician required to lead a small Statistics Section: to advise research workers in the Establishment on the design and execution of their experiments and to analyse their data; and occasionally to act as consultant to other Establishments on special problems in subjects ranging from Aeronautics to Pharmacology. [750-011 (1971) : 355]

52. Minimum requirements are 4 “O” levels including English, Mathematics and one Science subject. [750-013 (1971) : 355]

53. Qualifications AIMIT AIST or “A” levels in science subjects including biology. [750-015 (1971) : 355]
54. Candidates should have a good honours degree and preferably post graduate experience, in genetics or other relevant subject. [750-028 (1971) : 356]

55. Degree or appropriate qualification in horticulture, agriculture, botany or a related subject. [750-044 (1971) : 358]

56. Among subjects to be discussed will be newer plastics and recently available grades, structural foams, reinforced materials, composites, films, electroplating of plastics, and applications, e.g. in packaging, footwear and engineering. [750-061 (1971) : 360]

57. Joint or general honours degrees at the same level in these subjects would be acceptable and students with qualifications in microbiology or biochemistry would also be considered. [750-064 (1971) : 360]

58. The course in Combustion and Explosion, given in collaboration with the Departments of Fuel and Combustion Science and of Physical Chemistry, consists of lectures on the fundamentals of the subject and their application to industry and to the different types of internal combustion engine. [750-066 (1971) : 360]

59. Candidates should have a first or upper second class degree in Astronomy, Applied Physics, or a related subject. [754-002 (1971) : 598]

60. Candidates should have a good Honours Degree in an appropriate subject. [754-006 (1971) : 598]

61. These projects include many subjects within Computer Science, Information Systems, Management Science and Social Applications of computers. [754-009 (1971) : 598]

62. Degree or equivalent in biochemistry, chemistry or biological subject. [754-020 (1971) : 600]

63. For candidates under 22, minimum qualifications are two Scientific / Mathematical subjects at “A” Level. [754-029 (1971) : 600]

64. Degree or other appropriate qualification in horticulture, agriculture, zoology, or related subject is desirable. [754-027 (1971) : 600]

65. Applicants should either have had experience in Histology or be prepared to take a course in this subject. [754-034 (1971) : 600]

66. Applicants should have a degree or HNC in an appropriate subject. [754-042 (1971) : 601]

68. Minimum qualifications: 2 “A” levels in Science subjects or equivalent. [754-075 (1971) : 604]

69. Applicants should preferably have a university degree, or equivalent qualifications, a knowledge of the theoretical aspects of their subject, and at least four years practical experience. [758-001 (1971) : 50]

70. Post-doctoral research associate should have or be about to complete a Ph.D. degree in chemistry or biochemistry and Technical Officer should have an honours degree or equivalent in a relevant scientific subject. [758-020 (1971) : 51]

71. The successful applicant will be expected to register for a higher degree and will join a newly established and expanding postgraduate research group carrying out fundamental studies of printing and related subjects. [758-024 (1971) : 52]
72. Candidates should have a good honours degree or equivalent qualification in chemistry, agricultural chemistry or physics and a good record of research in a relevant subject. [758-028 (1971) : 52]

73. Applications are invited from holders of an Honours Degree in a Biological subject or those expecting to qualify this year, for a Research Assistantship. [758-029 (1971) : 52]

74. Candidates must be interested in the applied aspects of their subjects and will be expected to undertake research work. [758-030 (1971) : 52]

75. Minimum qualifications: four O levels including English language and mathematics or scientific subject. [758-037 (1971) : 52]

76. Physics graduate (man or woman) required in September to teach the subject up to G.C.E. Ordinary level, in small pleasant girls grammar school in Central London. [758-058 (1971) : 54]

77. The applicant must hold a First or Upper Second Class Honours Degree in Physics or related subject and will register for a higher degree. [758-078 (1971) : 55]

78. The entry requirements are two G.C.E. A-level passes, including Physics or Chemistry, and a suitable standard in three other subjects, or an appropriate O.N.C. or O.N.D. [758-080 (1971) : 56]

79. Minimum qualifications: 2 A levels in Science subjects or equivalent. [763-001 (1971) : 343]

80. Qualifications: minimum of four passes at “O” level, including English and a Mathematical or Science subject. [763-015 (1971) : 344]

81. Duties will include lecturing, etc. to students in Horticulture and cognate subjects. [763-017 (1971) : 345]

82. The vacant post will be concerned primarily with part of the Council’s nonclinical activities which include such subjects as physiology, psychology, genetics, immunology, microbiology and molecular biology. [763-033 (1971) : 346]

83. Candidates should have a degree in a chemical subject with post-graduate experience in modern methods of organic analysis, preferably with food or other natural products. [767-009 (1971) : 542]

84. Applicants should have ordinary National Certificate or Ordinary National Diploma, City and Guilds Laboratory Technicians Certificate, four GCE passes with two A levels in appropriate subjects. [767-020 (1971) : 543]

85. The theory of random processes of all fields, time series analysis, and into application of these subjects in the social sciences, genetics, medicine and physics. [767-026 (1971) : 544]

86. Most opportunities are for teachers in the age band 22-27 with a Degree in Mathematics, Physics or engineering subjects; [767-040 (1971) : 545]

87. Minimum requirements normally degree with 1st or 2nd Class honours or equivalent qualification in appropriate subject. [767-042 (1971) : 545]

89. Applicants should have one or two “A” levels in scientific subjects or equivalent background. [767-061 (1971) : 547]
90. Also many thoroughly useful (non-exam) courses in Business Subjects. [767-068 (1971) : 547]

91. Write today for details or advice stating subjects in which interested [767-068 (1971) : 547]

92. Candidates should preferably have an interest in chemistry and should have a GCE (or equivalent qualification) with passes in four distinct subjects to include English or English Language [772-002 (1971) : 52]

93. and a Science or a Mathematical subject. [772-002 (1971) : 52]

94. The work will entail searching Patent and Technical literature on a wide variety of subject matter connected with the Steel Industry, and preparing reports of results of searches. [772-004 (1971) : 52]

95. Research Assistant required for investigating biochemical aspects of renal failure under direction of physician actively engaged in research upon this subject. [772-025 (1971) : 54]

96. They are intended for those who wish to become effective managers, or as a prelude to teaching management subjects. [772-042 (1971) : 57]

97. If you possess ‘O’ levels in science subjects, write now for details [772-080 (1971) : 62]

98. The applications should be in the field of Mathematics, Natural Sciences, Geography and allied subjects. [772-088 (1971) : 63]

99. Shell International Petroleum Company Limited offers three post-doctoral Fellowships annually to assist recipients to pursue research in a subject of their own choice within the following disciplines: Engineering Mathematics Physics Chemistry Biochemistry Botany Zoology Microbiology Geology Geophysics [772-090 (1971) : 64]

100. Age not more than 32 years, with a Degree, HNC or HND in an appropriate scientific, engineering or mathematical subject, or the equivalent. [774-005 (1971) : 188]

101. Some background in one or more of the following subjects will be useful: plastics, composites, test procedures, physics, engineering, chemical engineering, chemistry, material science. [774-025 (1971) : 190]

102. Minimum qualification normally required: Pass degree or HNC in an appropriate subject. [774-031 (1971) : 190]

103. Science Research Council studentships (including CAPS awards) are generally available to candidates holding (or expecting to hold) a first or upper second class honours degree in Physics or related subject from a British university. [774-047 (1971) : 191]

104. Candidates should possess a good honours degree in engineering or an allied subject: industrial experience would be an advantage. [776-001 (1971) : 286]

105. Subjects include advanced general structural theory and design, computer applications, and special lectures in either steel, concrete or aircraft structures, or in structural problems of nuclear and chemical engineering (pressure vessels, etc.). [776-027 (1971) : 288]

106. Research grants are available for British students, at post-graduate, post-Grad.R.I.C., post-Dip.Tech. level for research in the following subjects from October 1972: Heterocyclic and Aromatic Chemistry; Organic Reaction Mechanisms; Free Radical Chemistry; Carbene Chemistry; Organic Photochemical Reactions; Synthetic Organic Chemistry; Organo-sulphur Chemistry; Organometallic Chemistry; Metal Carbonyls; Organosilicon Chemistry; Inorganic Polymers; Organophosphorus Chemistry; Petrochemical
1. Candidates should have a Ph.D. in Immunology or a closely related subject and post-doctoral research experience utilising tissue culture techniques and flow cytometry. [1959-013 (1995) : 48]

2. Qualifications: A first or second-class degree in a relevant subject is required. [1959-019 (1995) : 49]

3. Subjects of interest include: the integration of self-sufficiency with task requirements; utility based action selection; learning, and hierarchical architectures. [1959-031 (1995) : 52]

4. Applicants for this post will be expected to have a first or upper second class honours degree in either immunology, biochemistry or related subjects. [1959-042 (1995) : 55]

5. Fellowship support can be requested for up to five years, and can include funding, where appropriate, to attend an MSc course on the subject, or to obtain experience at a suitable centre abroad, or both. [1959-043 (1995) : 56]

6. Research Training Studentships are available for graduates, with an upper second or first class degree in any mathematical or biological subject, who wish to study for a Ph.D. degree in the UK or the Republic of Ireland. [1959-043 (1995) : 56]

7. This is to allow those with mathematical training to apply their knowledge to the study of a biological project, and to allow those who graduated in a biological subject additional time to develop mathematical skills. [1959-043 (1995) : 56]

8. Qualified to a minimum of BTEC National or equivalent in a science subject, you will be expected to pursue extra qualifications to be eligible for career progression. [1959-052 (1995) : 58]

9. Qualifications: Candidates should normally have a first or upper second class honours degree in chemistry or a related science subject, together with at least three years’ postgraduate research. [1959-053 (1995) : 58]

10. The successful candidate should have a Ph.D. in a relevant subject with at least 2 years postdoctoral experience and practical skills of molecular genetic, biochemical and cytological techniques. [1959-069 (1995) : 62]

11. The successful candidate will have a Ph.D. in a relevant subject with at least 2 years postdoctoral experience in PCR-based techniques. [1959-069 (1995) : 62]

12. The successful candidate should hold or shortly be expecting to hold a Ph.D. in a relevant subject. [1959-069 (1995) : 62]

13. Applicants should hold a good first degree in a Physical Sciences subject. [1959-078 (1995) : 64]

14. Applicants should have a good honours degree in a numerate subject. [1959-083 (1995) : 65]

15. You should have one year's laboratory experience and a HNC/D or degree (or equivalent) in chemistry or a related subject, or be prepared to study for a further qualification. [1959-088 (1995) : 66]

16. Applicants should have a degree in Biochemistry or related subject, and preferably have experience of molecular biology techniques. [1959-092 (1995) : 67]
17. This full-time course prepares suitable graduate for both employment and further study in all aspects of toxicology by providing a broad coverage of the subject whilst focusing on the molecular mechanisms of toxicity. [1959-094 (1995) : 67]

18. This full-time course prepares suitable graduate for both employment and further study in all aspects of toxicology by providing a broad coverage of the subject whilst focussing on the molecular mechanisms of toxicity. [1963-016 (1995) : 54]

19. Candidates with a 1st or 2(i) Honours degree in an appropriate biological subject should apply [1963-040 (1995) : 60]

20. Applicants should have a first or upper second class honours degree in a biological subject and at least 2 years postgraduate experience. [1963-041 (1995) : 60]

21. Applicants should have, or expect to obtain, a first or upper second class honours degree in an appropriate subject. [1963-048 (1995) : 61]

22. Applicants should hold a first degree (or equivalent) in Chemistry or a related subject. [1963-056 (1995) : 63]

23. Applicants should possess an Honours degree in a relevant subject such as molecular biology, microbiology or plant science and have postgraduate research experience. [1963-058 (1995) : 64]

24. Principal requirements for the post are: A good honours degree in biology, botany, ecology or closely related subject [1963-077 (1995) : 68]

25. Qualifications: Applicants should have a degree in a relevant subject and at least 3 years research experience. [1963-085 (1995) : 70]

26. Candidates should be qualified to at least first degree level in a relevant subject area. [1963-088 (1995) : 71]

27. Potential candidates should have either a First or Upper Second Class degree in Chemistry, or a related subject. [1963-091 (1995) : 71]

28. Applications are invited from well qualified candidates for Ph.D., MPhil and MSc degrees in a wide variety of topics within the above subject areas. [1963-092 (1995) : 72]

29. The successful applicants will join research groups led by their supervisor and receive research training in disciplines appropriate to the subject. [Molecular Biology / Microbiology; Cell Biology; Population Biology] [1963-092 (1995) : 72]

30. Candidates should have at least a BSc in Nutrition with a wide background knowledge of the subject and a good command of written English. [1963-095 (1995) : 73]

31. Applicants for MRes or Ph.D. should have, or expect to obtain by July 1995, a first or upper second class degree in a relevant subject. [1963-100 (1995) : 74]

32. The course will involve students from a wide range of relevant subjects in order to encourage multidisciplinary cooperation. [1963-104 (1995) : 75]

33. Applicants should have a university degree in any one of the following subjects: medicine, dentistry, veterinary medicine, microbiology, medical laboratory sciences or pharmacy. [1963-105 (1995) : 75]
34. Applicants should have a good honours degree in biochemistry, molecular biology or related subject. [1967-001 (1995) : 60]

35. Applicants should have a good honours degree in biochemistry, molecular biology or related subject. [1967-001 (1995) : 60]

36. Applicants should have a first or upper class honours degree in a biological subject and at least 2 years post-graduate experience. [1967-007 (1995) : 64]

37. Applicants should have a first or upper second class honours degree in Biochemistry or a related subject. [1967-007 (1995) : 64]

38. Suitable applicants will be educated to degree level or equivalent in Microbiology or a related subject. [1967-008 (1995) : 65]

39. Applicants will be educated to degree level or equivalent in Biochemistry or a related subject. [1967-008 (1995) : 65]

40. Suitable candidates will be qualified to BTEC HND/HNC level in a science subject and have some experience of microbiological techniques. [1967-008 (1995) : 65]

41. Applicants should have a first degree in Chemistry or related subject and a Ph.D. training, preferably in Physical Chemistry. [1967-017 (1995) : 68]

42. The main content of the work will be to assist with the procedures for handling applications for research grants with particular reference to science subjects. [1967-037 (1995) : 73]

43. Candidates should have obtained a first degree from a UK university in a science subject within the last six years. [1967-037 (1995) : 73]

44. Both the above posts require applicants with a good degree or equivalent in computer science, or a related subject and should in addition have practical experience of parallel/distributed systems engineering. [1967-041 (1995) : 74]

45. Applicants should have achieved research excellence by scientific publications in any area of the above subjects. [1967-051 (1995) : 77]

46. provision of a national focus for interdisciplinary debate on the subject. [1967-052 (1995) : 78]

47. First or upper second class honours degree in a mathematical or relevant scientific subject with a minimum of two years' experience. [1967-053 (1995) : 78]

48. Degree or equivalent in soil science or appropriate science subject. [1967-053 (1995) : 78]

49. Required for the Pharmaceutical Quality Control Laboratory, you should have a degree in Microbiology or a related subject. [1967-059 (1995) : 79]

50. Experimental zoologists with an ability to teach a wide range of subjects at the undergraduate levels will be given preference. [1967-063 (1995) : 80]

51. Applicants must have a HNC/D in medical laboratory science or BSc in microbiology or related subject (or equivalent). [1967-073 (1995) : 82]
52. The successful applicant will have a good knowledge of both the subject matter and the relevant research and user communities, demonstrate strong communication and organisational skills, and be an enthusiastic ambassador for the Programme. [1967-085 (1995) : 85]

53. You should have a degree (or equivalent) in a numerate subject involving the study of human-environment issues such as Geography, Biology or Environmental Science. [1967-095 (1995) : 88]

54. Applications are invited from graduates with an upper second class honours degree or equivalent in agriculture/agriculture economics, veterinary or food-related subjects. [1967-102 (1995) : 89]

55. 12 Months M.Sc. Course by Advanced Study and Research are offered in the following subjects: Surface Chemistry and Colloids (Physical Chemistry); Foundations of Mathematics and Theory of Computation (Mathematics); Fluid Mechanics (Mathematics); Advanced Neuro- and Molecular-Pharmacology (Pharmacology); Nonlinear Mathematics (Mathematics/Engineering Maths) [1967-107 (1995) : 91]

56. To qualify you will need a degree or equivalent in a related subject plus 2 years' postgraduate experience or a Ph.D. [1971-008 (1995) : 58]

57. Candidates should preferably have a Ph.D. in soil science or related subject, experience of colloid chemistry an advantage. [1971-010 (1995) : 58]

58. Applicants should have a B.Sc in an appropriate subject. [1971-028 (1995) : 64]

59. The successful candidates will have a degree in an appropriate subject and general knowledge of crop protection/agriculture/environmental sciences. [1971-029 (1995) : 65]

60. The successful candidate will have an appropriate degree, knowledge of AIDS/HIV and the issues surrounding the subject, the ability to write clearly and succinctly, and meet deadlines, and possess good communication skills (with the ability to field technical questions). [1971-029 (1995) : 65]

61. Applications are invited for quota and CASE studentships from highly motivated individuals possessing or expecting to gain a I or 2i Honours degree in a relevant subject such as Biochemistry, Biology, Chemistry, Molecular biology or Biotechnology. [1971-030 (1995) : 65]

62. Candidates must have (or expect to attain) a good honours degree in a suitable subject area. [1971-030 (1995) : 65]

63. Candidates should hold, or expect to obtain, a first or upper second class honours degree in Biochemistry, Genetics, Molecular Biology or a related subject. [1971-035 (1995) : 66]

64. Applicants must have a BSc in a Microbiological subject or Plant Pathology. [1971-048 (1995) : 70]

65. The successful candidate will have a science degree in a relevant subject. [1971-055 (1995) : 73]

66. The successful applicant will have, or expect to gain, a First or Upper Second Class degree in molecular biology, biochemistry or a related subject. [1971-061 (1995) : 75]

67. You should have a good degree in a biological subject [1971-073 (1995) : 77]

68. Candidates should have a degree in a relevant subject. [1971-077 (1995) : 78]

69. You should have a degree or equivalent qualification in a relevant subject and ideally some laboratory experience in molecular genetics. [1971-079 (1995) : 79]
70. Applicants should have or expect to obtain a First or Upper Second Class Honours Degree in an appropriate subject area and submit a full CV together with the names of two academic referees. [1971-091 (1995) : 81]

71. With a degree in an agriculturally related subject, you will have a minimum 4/5 years' trials development experience, of which at least 2 years must have been spent in a coordination role. [1971-094 (1995) : 81]

72. This full-time course prepares suitable graduate for both employment and further study in all aspects of toxicology by providing a broad coverage of the subject whilst focusing on the molecular mechanisms of toxicity. [1971-101 (1995) : 83]

73. The subject of the Chair has been defined as: Natural Resource Management deals with the sustainable use and development of natural resources, using a problem definition based on natural science, but including also social, political, legal and technical aspects. [1976-002 (1995) : 59]

74. Applicants should hold a first or second class honours degree (or equivalent) in Physics or a related subject and have at least seven years experience in Medical Physics including substantial experience in one or more imaging modalities. [1976-025 (1995) : 69]

75. Candidates for the position should be qualified to degree level in a science related subject and will either be a recent graduate or have 1-2 years' research and development experience. [1976-028 (1995) : 69]

76. The qualifications and experience required are a degree in a scientific subject, at least two years' experience of commissioning and a proven track record of project management. [1976-031 (1995) : 70]

77. To qualify for a scholarship, applicants should possess a First or Upper Second Class Honours degree in an appropriate subject. [1976-032 (1995) : 70]

78. You will need A good honours degree in Physics or in another relevant physical science / engineering subject (or the expectation of obtaining one this summer). [1976-034 (1995) : 71]

79. Applicants should have a degree in Animal Science or a similar subject, a desire to work with cattle and an aptitude for computer collection and analysis of data. [1976-040 (1995) : 72]

80. The successful candidate will have a good first degree in a biosciences subject. [1976-052 (1995) : 75]

81. Applicants must have an honours degree or equivalent in a chemistry-related subject, a Ph.D. or equivalent with a significant chemical content, research publications and must provide evidence of ability to conduct a high quality, independent experimental research programme in an area of analytical chemistry. [1976-056 (1995) : 76]

82. A minimum 2.1 honours degree or equivalent in a chemistry-related subject, a Ph.D. with a significant content of analytical chemistry, teaching experience in chromatography and other separation techniques, several years post Ph.D. experience, a substantial number of research publications and an established high quality, independent research programme in analytical chemistry are desirable. [1976-056 (1995) : 76]

83. Qualifications: BSc in Microbiology, Genetics or related subject. [1976-057 (1995) : 76]

84. Minimum qualifications are HTEC/HNC or equivalent in a relevant subject. [1976-071 (1995) : 80]
85. Applications are now invited for this course, which begins in Autumn 1995, from graduates with a first degree in Science, preferably Biosciences, Medicine or related subjects. [1976-099 (1995) : 87]

86. The subject of the Chair has been defined as: Natural Resource Management deals with the sustainable use and development of natural resources, using a problem definition based on natural science, but including also social, political, legal and technical aspects. [1980-005 (1995) : 53]

87. Another route for the would-be hospital biomedical scientist, is via a masters degree in the subject. [1980-006 (1995) : 54]

88. Naturally enough, biochemistry is a laboratory-based subject where you begin as a bench scientist and gradually progress into management. [1980-006 (1995) : 54]

89. Four three-year postgraduate studentships are available from October 1995, working under the researchers named, open to graduates with 2.1 honours or equivalent qualification in the subjects indicated: Electrical oxidation of organic molecules; Removal of ammonia from effluent; Modelling of odours [1980-014 (1995) : 58]

90. The School of Chemistry of the University of Bath offers research programmes leading to Ph.D. degrees in a wide range of subjects. [1980-018 (1995) : 59]

91. Applicants should have a degree or equivalent in a biological subject and substantial technical experience in cell or molecular biology including mammalian cell culture. [1980-020 (1995) : 60]

92. An industrially relevant or academically-based project complements technical and management subjects, and there are opportunities to gain hands-on workstation experience. [1980-021 (1995) : 60]

93. Qualified to degree level in chemistry or a related subject you will have several years experience in polymer synthesis within a commercial R&D environment. [1980-030 (1995) : 63]

94. Candidates must hold an UNIVERSITY DEGREE in a relevant subject with a post-graduate qualification and at least 5 years relevant post-graduate experience. [1980-052 (1995) : 69]

95. Applications for the following studentships are invited from candidates who hold (or expect to hold) an upper second or first class honours degree in an appropriate subject [1980-053 (1995) : 69]

96. Applications are invited from candidates who hold or expect to hold a First or Upper Second Class Honours Degree in a relevant subject for the following Higher Degree studentships tenable for three years from 1st October 1995. [1980-054 (1995) : 69]

97. The gliding motility of Eimeria sporozoites and its role in target cell invasion is the subject of this investigation. [1980-057 (1995) : 70]

98. You must: […] possess an HNC or recognised equivalent in Chemistry, Environmental Science, Chemical Engineering or other relevant subject. [1980-065 (1995) : 72]

99. Candidates must hold an university degree in a relevant subject with post-graduate qualification and at least 15 years relevant post-graduate experience. [1980-073 (1995) : 73]

100. These studentships are available to UK applicants only with a degree of 2(i) or higher in engineering materials science, chemistry, physics, or related subjects. [1980-081 (1995) : 75]

102. Applications are invited from candidates who are interested in any area of the Unit's work and who have, (or who will shortly have), a first or upper second class degree in a relevant subject. [1980-103 (1995) : 80]

103. Required by leading and progressive independent boarding school as soon as possible after August 1st to manage and support the subject throughout the curriculum. [1980-104 (1995) : 80]

104. Applicants must have, or expect to obtain, a first or upper second class honours degree in microbiology, genetics, biochemistry or a related subject. [1980-105 (1995) : 80]

105. Candidates should have at least a 2.1 degree or equivalent in an appropriate subject. [1980-114 (1995) : 82]

106. We are seeking recent graduates or postgraduates with a minimum qualification of an upper second in an appropriate subject plus a genuine interest in applying their knowledge to real problems in a research consultancy. [1980-120 (1995) : 85]

107. Applications are invited for three-year studentships in the following subject areas: Atomic and Molecular Physics ; Liquid Crystal Physics ; Laser Photonics ; Experimental Condensed Matter Physics ; Theoretical Condensed Matter Physics [1980-122 (1995) : 86]

108. Applications are invited for the following studentships from candidates who have (or expect to gain) a first class or an upper second honours degree in an appropriate subject: Cell biology; Fish physiology ; Biotransformations ; Molecular plant pathology. [1980-124 (1995) : 86]

109. The successful candidate will have a Ph.D. in a relevant subject and at least two years post-doctoral laboratory experience. [1980-125 (1995) : 86]

110. Applications are therefore encouraged from graduates of any scientific, mathematical or engineering subject. [1980-126 (1995) : 87]

111. The latter is offered jointly with the Interdisciplinary Research Centre for Process Systems Engineering and is open to graduates of any scientific or engineering subject. [1980-126 (1995) : 87]

112. You should have a first degree in Zoology, Animal Physiology or related subject, a relevant higher degree or at least 5 years relevant experience, a Home Office Personal Licence and a current driving licence. [1984-013 (1995) : 56]

113. A good honours degree in Zoology or related subject is required together with a particular interest in animal behaviour. [1984-013 (1995) : 56]

114. You should have a degree in an appropriate biological subject and some experience of research in microbial diagnosis. [1984-013 (1995) : 56]

115. The successful applicants should have: [...] an enthusiasm for their subject and a desire to develop their contribution [1984-016 (1995) : 58]

117. A degree in scientific, engineering or mathematical subject/or Degree-standard membership of a Professional Institution [1984-042 (1995) : 65]

118. /or BTEC Higher/SCOTVEC (HNC) in scientific engineering or mathematical subject or an equivalent qualification. [1984-042 (1995) : 65]
119. Applicants must have an honours degree or equivalent in pharmacology, biochemistry, physiology or other related scientific subject. [1984-050 (1995) : 68]

120. The Department of Pharmacology now invites applications from either recently qualified graduates in pharmacology, physiology, neuroscience and related subjects or those with two/three years' experience for a position within the molecular neuropathology group. [1984-065 (1995) : 71]

121. Both studentships are funded by the School at a level equivalent to the BBSRC. Candidates must have or expect to gain a 1st Class or Upper 2nd Class degree in a relevant subject. [1984-067 (1995) : 72]

122. Applicants must have a degree (or equivalent) in a relevant subject, and must have at least 5 years experience in a scientific, research or engineering environment in a design or development capacity. [1984-075 (1995) : 73]

123. Applicants should have (or expect to have) a first or upper second in chemistry, biochemistry or another related subject. [1984-077 (1995) : 74]

124. Applicants should possess Ph.D. in Physics, Chemistry, Electronic Engineering or related subject. [1984-082 (1995) : 74]

125. Candidates should have or expect to have at least an Upper Second Class Honours Degree in a relevant subject. [1984-083 (1995) : 75]

126. You must have a degree or equivalent in a relevant scientific subject. [1984-084 (1995) : 75]

127. Applicants should have a degree in a biological subject, experience of educational administration and good communication and keyboard skills. [1984-089 (1995) : 76]

128. Applicants should have, or expect to have a first or 2.1 class (or equivalent) degree in Physics, Chemistry, Materials Science or a related subject. [1984-093 (1995) : 77]

129. The subject matter could be based on agriculture in transition, conservation of threatened ecosystems, managing coastal retreat in the face of the sea level changes, or rural renaissance through Local Agenda 21 sustainable development schemes. [1984-105 (1995) : 79]

130. Applicants should have, or expect to obtain a 2:1 or 1st class honours degree in Physics, Electrical Engineering or a related subject. [1984-107 (1995) : 80]

131. Applicants should possess a good degree in chemistry, biochemistry, food science or similar subject. [1984-110 (1995) : 80]

132. Candidates should possess or expect to obtain at least a 2.1 degree or M.Sc. in Science, Computer Science, Psychology, Optometry or related subjects. [1984-114 (1995) : 81]

133. Applications are invited from students with good Honours degrees in Chemistry, Physics, Materials Science or related subjects for Ph. D. Studentships. [1984-117 (1995) : 81]

134. BSc courses in: Analytical Chemistry, Biological Science, Chemistry, Geography, Geology and Physics Combined Sciences Degrees (BSc): Biochemical Sciences, Environmental Science/Conservation, Molecular Biology, Physical Geography and Geology or select 2 subjects from a choice of Biology, Chemistry, Geography, Geology, Physics. [1984-122 (1995) : 83]

135. The course is open to graduates in a Science or Engineering subject. [1984-123 (1995) : 83]
136. Applicants should hold an honours degree or equivalent in a related subject and have at least five years experience in a broad range of molecular genetic techniques. [1989-008 (1995) : 58]

137. Ideally aged in your mid-twenties, you will have gained a first class degree in a relevant science based subject. [1989-022 (1995) : 63]

138. You should have at least a 2.1 degree in biochemistry, biology or related subject. [1989-037 (1995) : 68]

139. Applicants should possess a first or second class honours degree in a relevant subject. [1989-050 (1995) : 71]

140. The attrition of fine porous catalyst particles, as used in fluid catalytic cracking units in the oil refineries, is the subject of investigation here. [1989-051 (1995) : 71]

141. Applications are invited for Research Fellowships tenable from 1 October 1996 for three years, to be held in any subject. [1989-054 (1995) : 72]

142. The closing date for applications is Friday 29 September 1995 for those applying in an Arts subject and Wednesday 4 October 1995 for those applying in a Science subject. [1989-054 (1995) : 72]

143. Applicants will need to have chemistry to at least A level standard and will be keen to improve knowledge in this key subject area. [1989-062 (1995) : 74]

144. You will have a degree or equivalent in either environmental sciences, biology, chemistry, geology, hydrogeology, civil/geotechnical/chemical engineering or other relevant scientific subject. [1989-093 (1995) : 81]

145. A qualification in either environmental sciences, biology, chemistry, geology, hydrogeology, civil/geotechnical/chemical engineering or a related scientific subject is required, and the minimum entry level qualification is GCSE. [1989-093 (1995) : 81]

146. You will have a degree or equivalent in either environmental sciences, biology, chemistry, geology, hydrogeology, civil/geotechnical/chemical engineering or a related scientific subject with at least two years' experience in molecular genetics. [1989-104 (1995) : 84]

147. A 2.1 Hons degree, or MSc in ecology or a related subject is the minimum qualification. [1993-010 (1995) : 54]

148. Applicants should possess a degree or equivalent qualification in an appropriate subject and ideally have some relevant practical experience. [1989-097 (1995) : 82]

149. Candidates should hold a first or upper second class honours degree in genetics or a related biological subject with at least two years' experience in molecular genetics. [1989-104 (1995) : 84]

150. Applicants should have a degree in microbiology or a related subject. [1993-017 (1995) : 56]

151. To apply you must be qualified to degree level in chemistry or related subject preferably with a knowledge of electrochemistry or applied catalysis, and a broad appreciation of chemical and physical techniques, plus the ability to lead projects. [1993-023 (1995) : 58]

152. You will possess one of the following qualifications, or equivalent, in appropriate subjects relevant to the duties of the post: ONG, OND, BTEC/TEC Certificate, 2 'A' Levels, Ordinary or Part 1 City & Guilds. [1993-024 (1995) : 58]

153. The successful candidate will have a good first degree in a biosciences subject. [1993-033 (1995) : 60]
154. With a degree in ecology or a related subject, you should have considerable experience of environmental management, a detailed knowledge of statutory and voluntary conservation and recreation organisations and the legislative and political context within which the NRA fulfils its role. [1993-040 (1995) : 63]

155. Applicants should have a first or upper second class honours degree in a relevant subject. [1993-043 (1995) : 65]

156. Applicants must hold a primary degree in biological sciences, biochemistry, molecular biology, pharmacology or other relevant scientific subject, hold a Ph.D. and have two years postdoctoral experience and a good publication record commensurate with experience. [1993-049 (1995) : 66]

157. Applicants should possess a BSc or equivalent in an appropriate subject. [1993-079 (1995) : 73]

158. Candidates should have a 1st or 2.1 Honours degree in Physics or related subjects. [1993-090 (1995) : 76]

159. Applicants should have a degree in biochemistry, molecular biology or a related subject. [1993-097 (1995) : 78]

160. For admission to the course you must hold at least a 2.1 honours degree in chemistry, physics, materials science, engineering or a related subject. [1993-100 (1995) : 78]

161. Qualifications: Candidates must have a First or Second Class Honours Degree in a scientific subject with a sound knowledge of British Quaternary Geologic (Stratigraphy)/Geomorphology. [1998-007 (1995) : 74]

162. A postgraduate qualification in either of these subject areas or a minimum of two years’ relevant postgraduate experience is also required. [1998-007 (1995) : 74]

163. 5-10 years experience will have given you a sound understanding of Marine Science and scientific surveys and will be complemented by a degree level education in a Scientific / Oceanographic subject. [1998-010 (1995) : 75]

164. There are over 300 undergraduates reading single-subject Chemistry in 3-year (BSc) and 4-year (MChem) courses; [1998-018 (1995) : 78]

165. Each year Harvard University awards a limited number of Bullard Fellowships to individuals in biological, social, physical and political sciences to promote advanced study, research or integration of subjects pertaining to forested ecosystems. [1998-025 (1995) : 80]

166. To apply at graduate level you should possess a degree in chemistry, biochemistry or a related subject. [1998-029 (1995) : 82]

167. You should have a Ph.D. in a relevant subject and experience of these techniques would be an advantage. [1998-033 (1995) : 84]

168. Applications are invited from candidates with a good honours degree in immunology or a related subject, for a Ph.D. studentship investigating mechanisms of inflammation in intestinal disease. [1998-037 (1995) : 84]

169. The minimum entry requirements for this grade are 4 GCSE passes (at Grades C or above) including English and Maths or a science subject. [1998-056 (1995) : 90]
170. You should have an honours degree in an appropriate subject together with some experience in cell biology, biochemistry or immunology and you will be encouraged to register for a Ph.D. [1998-057 (1995) : 90]

171. Students who have, or expect to obtain, a good degree in chemistry or a related subject should send a CV and the names and addresses of two academic referees to the address below as soon as possible. [1998-064 (1995) : 91]

172. Applicants will be expected to have a BSc in a biological subject and to have an interest in reproductive physiology. [1998-067 (1995) : 92]

173. Applicants should be graduates in statistics or other relevant subject. [1998-068 (1995) : 92]

175. You will need a good Honours Degree in a relevant scientific subject, MRCPath or Ph.D. with ten years' comprehensive experience in Cytogenetics and a demonstrable level of competence in research, including teaching. [1998-082 (1995) : 96]

176. The post-holder is required to have 10 years relevant experience in radiation protection and allied subjects. [1998-085 (1995) : 97]

177. Applicants' experience is most likely to have been in Physics based subjects [1998-087 (1995) : 98]

178. Qualifications: Candidates should normally have a first or upper second class honours degree in a related science subject. [1998-093 (1995) : 99]

179. As an Engineer with a real curiosity and interest in your subject, you'll thrive in our Client's R&D function. [1998-095 (1995) : 100]

180. Applicants must have an honours degree in a relevant subject, a post-graduate qualification i.e an MSc or fellowship of the I.B.M.S and minimum of 3 years' experience in diagnostic virology. [1998-098 (1995) : 101]

181. The University Board has decided that no special description of the subject will be given. [2002-022 (1995) : 61]

182. Candidates should be qualified BSc or degree equivalent standard in an appropriate subject, eg., Biochemistry. [2002-034 (1995) : 65]

183. A degree in a science or technology subject is desirable and familiarity with Solaris, Mac and Ethernet systems would be an advantage. [2002-056 (1995) : 71]

184. A record of research and publications or demonstrated potential for research in relevant subject areas is essential. [2002-064 (1995) : 74]

185. Applicants should have a first degree in a relevant subject or equivalent qualification. [2002-074 (1995) : 76]

186. A record of research in relevant subject areas is essential. [2002-074 (1995) : 76]

187. The ideal candidate will be educated to degree level or equivalent in food science or technology, or other scientific subjects, and will have gained skills in computing and data handling. [2002-078 (1995) : 77]
188. Each year Harvard University awards a limited number of Bullard Fellowships to individuals in biological, social, physical and political sciences to promote advanced study, research or integration of subjects pertaining to forested ecosystems. [2002-085 (1995) : 79]

189. The successful candidate will need to have research experience in mycobacteriology and a higher research-based degree, preferably a Ph.D. in a relevant subject. [2006-005 (1995) : 60]

190. You are likely to be a graduate in an engineering related subject with a strong general science background, excellent communication skills and commercial awareness. [2006-009 (1995) : 62]

191. The successful applicants for these positions would be required to teach the following subjects: Mining Engineering: Alluvial Mining; Mining Legislation; Underground and Surface Mining Methods; Computerised Metal Mine Planning and Design; Rock Mechanics; Material Handling; Rock Fragmentation and Blast Design; Mineral Economics. Applied/Mining Geology: General Geology; Structural, Economic and Engineering Geology; Mineralogy; Mine Geological Mapping; Exploration Techniques; Mine Geology and Hydrogeology; Geostatistics and Reserve Estimation. [2006-013 (1995) : 64]

192. Applicants should have an HNC/D in Medical Laboratory Science or BSc in Biochemistry, Immunology or related subject, and at least 2-3 years post-qualification experience. [2006-023 (1995) : 68]

193. Applicants should have, or expect to obtain, an Upper Second Class Degree or better in a relevant science subject, or in medicine. [2006-029 (1995) : 69]

194. The successful candidate will be a graduate in physics, mathematics engineering or a related subject. [2006-043 (1995) : 73]

195. The aim of the Department of Communication and Neuroscience is to explore the function of the brain by research into vision, hearing and speech. In addition to an MSc course on Machine Perception and Neurocomputing, the Department is establishing an undergraduate Neuroscience course as a major new contribution to Keele's popular dual honours programme, a course that will be especially valuable to students interested in Psychology or Computing but will also be available in combination with a wide range of other subjects. [2006-045 (1995) : 74]

196. Candidates should have a good upper second or first class degree in chemistry, biochemistry or related subjects. [2006-046 (1995) : 74]

197. Applications are invited from students who have or expect to attain at least a Class II (1) honours degree in toxicology, biochemistry or related subject. [2006-052 (1995) : 76]

198. Postgraduate experience in astronomy, geophysics or a closely related subject as well as proven writing skills and creative flair are essential. [2006-054 (1995) : 76]

199. Candidates should have a good honours degree in molecular biology, biochemistry or a related subject. [2006-063 (1995) : 78]

200. Each year Harvard University awards a limited number of Bullard Fellowships to individuals in biological, social, physical and political sciences to promote advanced study, research or integration of subjects pertaining to forested ecosystems. [2006-070 (1995) : 80]

201. Salary will be on Band 6 (£13,416 to £24,567 per annum) for HSO. Qualifications sought would normally be a degree in a scientific subject, with two years' relevant experience or equivalent. [2006-076 (1995) : 82]
202. Applicants for both Studentships should have, or expect to gain, a first or upper second class honours degree in an appropriate subject, and must ordinarily be resident in the UK. [2006-081 (1995) : 83]

203. You should be flexible and team orientated, educated to at least BTEC Higher in a relevant subject, and with a methodical and systematic approach to problem solving. [2006-087 (1995) : 85]

204. The Biomedical Engineering Department provides a clinical support service 24 hours a day, 365 days a year and the team of Clinical Support Technicians are looking for someone who is: qualified to at least HNC or equivalent in a technical or scientific subject [2006-089 (1995) : 85]

2005

1. Successful candidates will handle a broad variety of technical subject matter in accordance with skills and experience. [2481-014 (2005) : 57]

2. For this key strategic post you will need: A good honours degree in a relevant subject, e.g. Ergonomics or Acoustics, with at least four years' relevant post graduate experience. [2481-015 (2005) : 58]

3. A graduate or equivalent in chemistry, biochemistry or a related subject, you will preferably have practical experience of GMP manufacturing, although applicants with a directly relevant qualification will be considered. [2481-025 (2005) : 60]

4. We have an exciting opportunity for an ambitious, experienced graduate in chemistry or a related subject to join our Healthcare Formulation team in Nottingham. [2481-040 (2005) : 66]

5. We are interested in individuals with a degree or an MSc in a life sciences subject or the prospect of achieving one. [2481-045 (2005) : 67]

6. There is an additional £4m potentially available subject to SISB (Science and Innovation Strategy Board) approval. [2481-065 (2005) : 73]

7. Applicants should have enthusiasm for science subjects and the ability to promote education in science especially in an industrial context. [2481-068 (2005) : 74]

8. With at least 3 years experience gained in a similar role, you will have a degree in Statistics or a related subject, and experience of SPSS or similar. [2485-002 (2005) : 56-57]

9. A graduate or equivalent in chemistry, biochemistry or a related subject, you will have practical experience of GMP manufacturing, preferably in the food industry. [2485-010 (2005) : 60]

10. You must have a first degree in Physics, or other appropriate science subject, and preferably a postgraduate qualification (MSc or PhD) with additional relevant experience. [2485-022 (2005) : 63]

11. You will have a degree in biological sciences or an appropriate subject with significant experience in microscopy in a research or service environment. [2485-027 (2005) : 66]

12. The successful candidate will be educated to degree level or above in a materials engineering/science related subject. [2485-032 (2005) : 68]

13. Applicants should be highly motivated, enthusiastic individuals, and have an undergraduate degree in a relevant subject. [2485-043 (2005) : 72]

14. You must hold a university degree in an appropriate technical subject. [2485-044 (2005) : 73]
15. We are looking for someone with an undergraduate or higher degree in a biological or biomedical subject who has the confidence and ability to communicate with eminent scientists. [2485-065 (2005) : 79]

16. A training and career development programme will be established to include: quantitative genetics and other relevant subjects; [2485-068 (2005) : 80]

17. You will have a degree in agriculture, horticulture, agricultural botany, biology or equivalent subject with a minimum of five years' experience of science-based testing programmes. [2485-072 (2005) : 81]

18. You will need a degree in marine biology or a relevant subject. [2485-073 (2005) : 82]

19. Applicants should have a degree, or equivalent qualification, in statistics or mathematics or a degree in a relevant science subject with a strong statistics/mathematics component and a post-graduate degree (MSc, Diploma or PhD) in statistics or its applications. [2485-075 (2005) : 82]

20. A degree (or equivalent level of qualification) in a biological science or chemistry subject [2485-075 (2005) : 82]

21. (or a related subject) is required. [2485-075 (2005) : 82]

22. If you have a PhD in a biomedical subject with at least two years' writing experience in a medical communications agency and are keen to assume a high profile role interacting directly with clients and international medical thought leaders, wed be delighted to hear from you. [2485-078 (2005) : 83]

23. Applicants must be highly motivated with an honours degree (at least II:1 or equivalent) in Chemistry, Physics or other relevant subjects. [2485-083 (2005) : 85]

24. Applicants must be highly motivated with an honours degree (at least II:1 or equivalent) in Chemistry, Polymer Science, Physics or other relevant subjects. [2485-083 (2005) : 85]

25. Essential requirements for this post include a PhD in a relevant subject and previous experience in proteome research. [2485-087 (2005) : 86]

26. Applicants should hold a PhD in an area that demonstrates commitment to the subject area and should have demonstrated scientific achievement in terms of publications, project funding and project management. [2485-092 (2005) : 88]

27. With a good First Degree in Chemistry, Physics, Biology or other relevant subject and significant practical work experience in a related discipline, you will be able to contribute to curriculum design and development and be able to teach at a range of levels, i.e. undergraduate / postgraduate. [2485-101 (2005) : 90]

28. Applicants must hold or expect to obtain a 1st or 2.1 university degree in a relevant science subject. [2485-105 (2005) : 91]

29. Studentships are thus open to applicants with first degrees in subjects such as Chemistry Physics, Mathematics and Engineering. [2485-107 (2005) : 92]

30. The next 3 years are devoted to the PhD project, subject areas and supervisors for which are: Role of stroma in T cell development ; Role of stroma in leukocyte survival ; Epstein-Barr virus & B cell transformation ; Leukocyte recruitment and inflammation [2485-110 (2005) : 92]

31. Applications are invited from candidates who hold or expect to obtain a first or second class Honours degree in a relevant subject for the following research projects: Novel Gene associations in colorectal
cancer, Professor Alastair Watson, Division of Gastroenterology. Mechanisms and regulation of cell shedding in the intestinal epithelium, Professor Alastair Watson, Division of Gastroenterology. Investigation of protein expression in clonogenic intestinal epithelial cells. Dr Mark Pritchard, Division of Gastroenterology. Selenium Metabolism in the failing kidney. Dr Frank McArdle, Division of Metabolic and Cellular Medicine. [2485-114 (2005) : 93]

32. You will have a PhD in an appropriate subject, preferably with interest and proven expertise with membrane proteins required to study the structure and function of the rotary engine in ATP Synthase from mitochondria. [2489-008 (2005) : 62]

33. You’ll have a PhD in a biological subject, with extensive experience of molecular biology and mammalian cell culture, knowledge of skin biology, although not essential, would be highly desirable. [2489-013 (2005) : 64-65]

34. Applicants will have a good degree in a relevant subject and a keen interest in reproductive biology. [2489-015 (2005) : 66]

35. To be successful in these roles, you will have a minimum of an honours degree in Chemistry or a related subject, although a MSc/PhD would be a definite advantage, as would experience in the analysis of APIs and/or drug products within the healthcare industry. [2489-022 (2005) : 69]

36. You should have a BSc in biology or related relevant subject and experience in gene therapy, epigenetics and gene regulation would be an advantage. [2489-039 (2005) : 74]

37. In the 2000 QAA teaching quality subject review, Biosciences at Kingston University was awarded 24/24 points. [2489-047 (2005) : 76]

38. You will ideally have a PhD in Immunology/Haematology or a closely related subject. [2489-047 (2005) : 76]

39. Applicants who additionally have professional experience within these subject areas would be welcomed. [2489-047 (2005) : 76]

40. The successful applicant will hold a PhD in a relevant subject, will preferably have at least one year's relevant postdoctoral research experience, and will have practical experience of molecular biology and/or immunohistochemistry and cell culture techniques. [2489-049 (2005) : 77]

41. The successful applicant must have a good first degree in a life/health science, physical science or bioengineering subject and is likely to have decided on a career combining research and business. [2489-054 (2005) : 78]

42. Applicants from the EU who have an interest and experience in field ornithology, are keen to acquire new ecological skills, and possess suitable qualifications (either a relevant MSc or a 2i or 1st in Ecology, Biology or other related subject) should apply to Ms Emily Chambers, CAER, Department of Agriculture, The University of Reading, Earley Gate, PO Box 237, Reading RG6 6AR, enclosing a CV with the names of two academic referees, by 17th March 2005. [2489-070 (2005) : 81]

43. Applicants must have, or be about to obtain, a first or second class honours degree in Chemistry, Biochemistry or a related subject. [2489-073 (2005) : 82]

44. Professional Requirements: BSc or equivalent in Biochemistry, Pharmacology, Analytical Chemistry or a related subject. [2493-029 (2005) : 64]

45. At least 2 years of relevant laboratory experience or a postgraduate qualification in similar subject areas. [2493-029 (2005) : 64]
46. Applicants should have a good honours scientific degree in a **subject** related to the biological sciences and should ideally have a background in immunology or microbiology. [2493-043 (2005) : 69]

47. You must have a BTEC Higher National Certificate or Higher Diploma or equivalent in a relevant **subject** and at least seven years' experience (which may include a period of study). [2493-055 (2005) : 71]

48. The Department of Mechanical Engineering at Bristol University has a number of PhD studentships starting 1st October 2005 for UK Nationals with a good degree in physics, maths, engineering or other relevant **subject**. [2493-061 (2005) : 73]

49. You should be educated to degree level in a relevant scientific **subject** (i.e. biomedical, biology, biochemistry) with three to five years relevant work experience, ideally within the area of drugs of abuse testing, although this is not essential. [2498-026 (2005) : 59]

50. You should be educated to degree level in a relevant scientific **subject** (i.e. biomedical, chemistry or bioscience). [2498-026 (2005) : 59]

51. Applicants should be educated to degree level in Chemistry (or a chemistry based **subject**), with a mathematical capability. [2498-027 (2005) : 59]

52. You will have a PhD in Chemistry or related **subject** and preferably 3-5 years experience in postdoctoral or industrial research positions. [2498-035 (2005) : 63]

53. With excellent communication and organisational skills, you will have a good degree in a relevant **subject** area and basic knowledge of molecular techniques, including PCR and DNA sequencing. [2498-036 (2005) : 63]

54. Neurotoxicology has been identified as a major **subject** area for the Unit and it is intended that a Centre of Excellence is developed in Newcastle. [2498-037 (2005) : 64]

55. You should have a good general standard of education, preferably with a degree or equivalent in a science **subject**. [2498-044 (2005) : 66]

56. Fellowships tenable from 1st August 2005 are available in the following **subject** areas: Biomathematics; Motivations and Means of Global Migration; Chromosomes and Development; Archaeological Science (Tephrochronology) [2498-049 (2005) : 68]

57. The candidate will have recently received a PhD degree, or will be in the final stages of writing up their thesis, in a climate-related **subject**, and with experience in the analysis of climate model data. [2498-056 (2005) : 70]

58. Forming a major part of the Institute of Biomedical and Biomolecular Sciences that was rated 5 in the 2001 Research Assessment Exercise, we received top grades for all elements of teaching quality in our last QAA **Subject** Review. [2498-067 (2005) : 73]

59. Applicants should have, or expect, at least a 2:1 Honours degree in an appropriate **subject**. [2498-068 (2005) : 74]

60. Applications are welcome from students with at least an upper second-class degree in an appropriate biological **subject** and good quantitative skills. [2498-069 (2005) : 74]
Applications are invited from graduates or Final Year students from the EU who have or expect to gain a First or Upper Second Class Honours degree in Chemical Engineering, Food Science or Technology, or a related subject. [2498-073 (2005) : 75]

Wide range of subjects: reactor physics through decommissioning to nuclear waste disposal and storage [2498-074 (2005) : 75]

Developing and promoting our position externally, while liaising with our own specialists, you’ll act as an ‘ambassador’ for us, as well as managing our overall work on this subject. [2502-002 (2005) : 54]

Qualifications: An honours degree in Applied Biology, Biological Sciences or a related subject. [2502-007 (2005) : 56]

You must have a degree in medicine or a PhD in a neurology or neuroscience-related subject. [2502-009 (2005) : 57]

You will be a Team player, have excellent interpersonal skills, attention to detail, the ability to grasp disparate subjects and be familiar with Microsoft Project. [2502-016 (2005) : 60]

The successful applicants will have completed a BSc course in Biomedical Sciences or a related subject recognised by the Health Professions Council (HPC). [2502-022 (2005) : 62]

Reporting to the Technical and Environmental Executives, the ideal candidate will be a new graduate in Food Science or similar subject. [2502-033 (2005) : 65]

Ideally, you will have a degree in a physical science or engineering subject and be able to demonstrate a methodical approach to problem solving. [2502-036 (2005) : 67]

You will have a good honours degree in a life science subject, preferably biochemical or pharmacology related and ideally a higher degree such as a PhD. [2502-041 (2005) : 68]

You should have research experience, a PhD or degree in a biological subject and an interest in utilising behavioural and physiological approaches, to develop novel methods to assess fatigue in sheep after transportation. [2502-052 (2005) : 72]

With research experience, you will have a degree in a biological subject and an interest in studying behavioural responses of cattle and pigs to road transportation. [2502-052 (2005) : 72]

The successful applicant should have a good honours or masters degree in Immunology, Biochemistry, Biomedical Sciences or a related subject. [2502-058 (2005) : 74]

Applicants should possess a good honours degree in Chemistry or Physics or any related subject area [2502-064 (2005) : 75]

Graduates from the UK/EU with an Upper Second Class degree in a management-cognate subject are invited to apply by submitting a research proposal (not exceeding 1,000 words) on a topical issue related to environmental, economic, social and ethical problems in managing agriculture and the countryside. [2502-065 (2005) : 75]

You will have a degree in a relevant subject and have extensive knowledge of mechanical engineering and the properties of materials. [2506-008 (2005) : 56]

You will also be required to contribute to the development of marine aquaculture policy and guidance, and to represent SNH on a range of working groups relating to this subject. [2506-012 (2005) : 58]
78. Applicants for any post must be HPC registered and experienced in their subject. [2506-014 (2005) : 59]

79. A minimum of a 2:1 in a science subject, or paper, chemical or polymer engineering, preference given to Ph.D. degree holders. [2506-019 (2005) : 61]

80. The successful candidate will have a degree in biological science, a PhD in ecology or a numerate relevant subject and a sound understanding of spatial ecology. [2506-033 (2005) : 68]

81. You will have a degree in a life science subject and will preferably have postgraduate research experience in drug analysis, enzyme kinetics or other molecular biology techniques. [2506-048 (2005) : 72]

82. Entry requirements: First degree in Pharmacy, Pharmaceutical Sciences, Pharmacology, Physiology, Physical Science, Biochemistry, Biotechnology, Chemistry, Chemical Engineering, Genetics, Materials Science and other related subjects. [2506-049 (2005) : 72]

83. You will have a PhD in an appropriate subject, preferably with an interest and proven expertise in mitochondrial bioenergetics and enzymology. [2506-050 (2005) : 72]

84. You will have a good honours degree and preferably a higher degree in an appropriate subject area. [2506-054 (2005) : 73]

85. Specific subject areas are aerodynamics, lightweight composite structures, energy-saving and electrical systems, and stability and control. [2506-060 (2005) : 75]

86. Applicants should hold or expect to hold a first or upper second-class degree in physics, mathematics, computer science or a related subject. [2506-069 (2005) : 77]

87. With a degree or equivalent in Botany or a related subject, you will have experience in handling collections together with data and a broad understanding of plant conservation issues. [2511-002 (2005) : 52]

88. This post requires at least a 2nd Class honours degree, or equivalent, in chemistry or a related subject. [2511-007 (2005) : 54]

89. Applicants should be highly motivated, enthusiastic individuals, and have an undergraduate degree in a relevant subject. [2511-010 (2005) : 54]

90. Applicants must possess, by the closing date for applications: at least 4 years' post graduate experience in ruminant production, animal science or a related subject. [2511-013 (2005) : 56]

91. at least 2 years' post graduate experience in ruminant production, animal science or a related subject. [2511-013 (2005) : 56]

92. European Respiratory Society Journals Limited publishes a number of European and International Respiratory Journals and is currently wishing to appoint a Technical Editor with a Ph.D. in Biological Sciences or a related subject. [2511-016 (2005) : 56]

93. The Institute of Naval Medicine which is located in an attractive setting close to Stokes Bay on the Hampshire coast provides operational medical support to the Royal Navy, carries out biomedical research and conducts training in all aspects of naval occupational medicine and allied subjects. [2511-019 (2005) : 58]

6697
94. Degree in chemistry or a related **subject**, or HNC/HND or degree standard membership of professional institution plus relevant experience. [2511-019 (2005) : 58]

95. The awards provide the opportunity for up to 3 years (salary and consumables) to train in research techniques and methodology, in **subjects** relevant to the overall objectives of the Charity, including the field of bioengineering. [2511-021 (2005) : 58]

96. Candidates should have a PhD or equivalent experience in aquatic ecology or related **subject** and have research interests that include aquatic biodiversity, eutrophication, and assessing the impacts of environmental change on aquatic ecosystems. [2511-028 (2005) : 61]

97. The successful candidate will have recently graduated with a degree in a relevant **subject**, will be a clear communicator both in writing and in person, and keen to work as part of a team. [2511-039 (2005) : 65]

98. A recent PhD in a relevant **subject** is desirable, background in clinical research or bioinformatics would be an advantage. [2511-039 (2005) : 65]

99. You should possess a minimum of a degree in a relevant **subject**, with 2 years' post qualifying experience for the scientist posts and 5 years' post qualifying experience for the senior scientist posts. [2511-041 (2005) : 65]

100. Working in a unique information-based environment, your key tasks will include abstracting and indexing scientific and technical reports and conducting literature searches of both 'defence controlled' and 'open literature' sources across a wide range of **subject** areas. [2511-042 (2005) : 66]

101. You will have a higher degree in a relevant **subject** and at least 5 years' postgraduate work experience in epidemiology and/or surveillance, and have previous management experience. [2511-043 (2005) : 67]

102. Applicants should have, or be about to obtain, a PhD in a relevant **subject** (e.g. Chemistry, Physics, Biological Sciences) and have experience in and understanding of some or all of: MR imaging, modern NMR methods, Mathematica and C programming, and NMR/MR instrumentation. [2511-048 (2005) : 70]

103. Ideally you’ll have a degree or equivalent in an Environmental Science **subject** and relevant experience - but if you don’t, and have strong skills in a related area, we might consider training you for this role. [2515-005 (2005) : 55]

104. Ideally, you will have an honours degree in one of the physical sciences, Chemistry, Physics and variants thereof, or the Biological Sciences where analytical chemistry formed a major **subject**, or hold an HNC accompanied by at least three years' industrial experience in the application of spectroscopy. [2515-015 (2005) : 60]

105. The successful candidate is likely to be educated to degree level or equivalent in an appropriate **subject**, and this will be coupled with at least five years' practical experience in the field of immunoassay/diagnostic development or manufacture. [2515-036 (2005) : 68]

106. You will have at least three years research experience in human or animal epidemiology as well as an Honours degree or equivalent training, involving statistics as a main **subject**. [2515-047 (2005) : 72]

107. We currently have a variety of opportunities for, and are seeking applications from, Graduates with a BSc, MSc or PhD in the **following subjects**: Biochemistry; Chemistry; Toxicology; Veterinary Medicine; Biological Sciences; Pharmacology; Biotechnology and Animal Technology. [2515-056 (2005) : 74]

108. You will have a degree or equivalent in a relevant **subject** for the SO post and for the HSO post you would also need relevant postgraduate experience. [2515-061 (2005) : 76]
In addition, you will be educated to at least A Level standard in a science subject. [2515-072 (2005) : 79]

You should have a PhD in a relevant subject and significant experience in proteomics. [2515-073 (2005) : 79]

Relational database and DBA experience with Oracle/MySQL and a degree in a numerate subject or equivalent experience are also desirable. [2515-078 (2005) : 81]

The posts are available for three years and applicants should have a PhD in Chemistry, Materials Science or other relevant subject. [2515-081 (2005) : 82]

Highly motivated students holding a first or upper second class honours degree in a relevant subject are invited to apply. [2515-084 (2005) : 82]

In Germany and many other European countries it is almost inconceivable not to practise as an engineer after studying the subject. [2519-004 (2005) : 50-53]

There has been a 400 per cent increase in the number of engineering master's and PhD degrees completed in the last 10 years, and around 20 per cent of engineering and technology undergraduates now go on to do a master's degree, more than with most other subjects. [2519-004 (2005) : 50-53]

You will hold a university degree in an appropriate technical subject. [2519-010 (2005) : 57]

A graduate in chemistry biochemistry molecular biology or a related science subject, your minimum of five years in the QC of pharmaceutical products, ideally in finished dosage form analysis, will include working to cGMP and managing a team. [2519-025 (2005) : 63]

You will hold a BSc degree in a relevant subject and should have experience of molecular genetic technology and ideally experience with automation, robotic systems and electronic data management. [2519-028 (2005) : 64]

Extensive experience of radioactivity metrology, neutron metrology, nuclear physics or a related subject is required. [2519-038 (2005) : 67]

You will need: To be able to demonstrate a good understanding of the physical and chemical basis of fire and the underlying mathematics of the subject. [2519-040 (2005) : 68]

Applicants with suitable qualifications and experience in biotechnology, microbiology, molecular biology, biochemistry or a closely related subject are invited to apply for the following positions to join the CAMBio research team. [2519-044 (2005) : 69]

Applicants should have as a minimum qualification a HNC/HBTEC, in Biology or a related subject and must have a good grounding in molecular genetics laboratory techniques, preferably in an evolutionary biology context, and the ability to work independently but also to collaborate in a larger team. [2519-061 (2005) : 74]

Applicants should hold a PhD in a relevant subject area. Experience in development and growth (especially of the muscles), and of molecular biology and histology techniques, would be an advantage. [2519-062 (2005) : 74]

Applicants should hold a PhD in a relevant subject area. Experience in avian development and growth (especially of the musculoskeletal system), molecular biology and histological analysis would be an advantage. [2519-062 (2005) : 74]
125. The successful applicant will have a first and a higher (e.g. doctoral) degree in a relevant engineering-oriented subject, with strong research and programming experience. [2519-066 (2005) : 75]

126. The successful candidate will have a higher degree, preferably a doctorate in a relevant subject such as computing science, engineering science, physics, mathematics or a suitable aspect of biology. [2519-073 (2005) : 77]

127. Applicants should preferably be qualified to degree level in a relevant subject, such as geography, land management or environmental science. [2524-027 (2005) : 62]

128. Ideally you will have a background in an analytical laboratory and experience of QA systems. Qualified to HNC standard, or ideally degree level, in Chemistry or a related subject, you will be a team player with a flexible attitude and first class communication skills. [2524-033 (2005) : 63]

129. For any of these posts, you'll need a first or second-class honours degree in a relevant subject coupled with two years relevant postgraduate experience, giving you a good understanding of Scotland's maritime natural heritage and a commitment to its conservation. [2524-034 (2005) : 63]

130. Senior Researchers will have at least a Master's qualification or preferably a PhD in a relevant subject, plus at least three years of academic research which may include experience of policy development. [2524-054 (2005) : 72]

131. The successful candidate should have state registration with the Health Professions Council (HPC) and have an MSc, Fellowship of the Institute of Biomedical Sciences or equivalent in a relevant subject. [2524-065 (2005) : 75]

132. You will preferably have at least two years' working knowledge within a laboratory environment and should be qualified to a minimum ONC, NVO Level 2 or A-level standard in a Biological Science or related subject. [2524-066 (2005) : 75]

133. A first degree in engineering or a physical sciences subject, and a research track record of publications in the area of surveillance or communications technologies are required. [2524-069 (2005) : 76]

134. A PhD in a relevant subject area would be desirable. [2524-069 (2005) : 76]

135. With a science degree in a relevant subject and a postgraduate qualification in a biological subject, or safety subject, you will have at least five years' experience working in a biological/GM laboratory or equivalent, or two years' experience as a biological safety advisor or equivalent. [2524-071 (2005) : 77]

136. You will need to have experience of surveying or studying birds in the field and may have got a degree in a biological subject. [2528-022 (2005) : 68]

137. A first degree and PhD in a relevant subject and research experience in bio catalysis are essential, coupled with communication skills, technical writing ability, organizational management skills and the ability to work with academics. [2528-039 (2005) : 75]

138. The School of Life Sciences at Kingston University is recognised for its excellent teaching quality, with Biosciences achieving the maximum 24/24 points in the latest QAA subject review. [2528-055 (2005) : 82]

139. You will ideally have a PhD in Pharmacology/Physiology or a closely related subject [2528-055 (2005) : 82]
141. and additional professional experience within these subject areas would be welcomed. [2528-055 (2005) : 82]

142. You will have a BSc in Biological Sciences or similar subject and a PhD and have experience in developmental biology or a background in basic scientific research. [2528-059 (2005) : 84]

143. Funds are available to support a high calibre Post Doctoral Research Fellow to conduct international quality research leading to publications and further grant funding in support of research in biosciences in the subject area "Allied Health Professions and Studies". [2528-070 (2005) : 88]

144. With a degree in Microbiology or a related subject, you will have experience of working in a laboratory environment. [2528-073 (2005) : 88]

145. The School of Biomedical & Natural Sciences has been awarded "excellence" status across all subject areas for teaching quality, and in recognition of this has been awarded maximal funding by HEFCE to establish a national Centre for Excellence in Teaching and Learning in Science. [2528-075 (2005) : 89]

2006

1. The successful candidate will have a minimum of a degree in a relevant science subject and at least two to three years QA experience. [2533-003 (2006) : 44]

2. Applicants must have a degree, or preferably a PhD, in biochemistry or a related subject, a good command of the English language and the ability to work quickly and accurately under pressure. [2533-007 (2006) : 46]

3. With a minimum of seven years recent, relevant, laboratory-based experience, together with a good first degree and PhD in a relevant subject, you must be a proven strong team player with experience of supervising junior staff and the ability to develop research ideas to meet customer needs. [2533-008 (2006) : 47]

4. With a minimum of four years, recent, relevant, laboratory-based experience, a good degree or equivalent in Chemistry, Physical Sciences or other related subject, you must be a strong team player with a proven ability to develop research ideas to meet customer needs, have sound presentation skills, together with an organised and methodical approach. [2533-008 (2006) : 47]

5. The post requires at least a 2nd Class honours degree, or equivalent, in chemistry or a related subject. [2533-010 (2006) : 48]

6. The successful candidate will ideally be educated to degree level in a subject with significant physics content or may possess other academic qualifications supplemented with relevant work experience. [2533-018 (2006) : 51]

7. A first degree in a quantitative subject (for example mathematics, statistics, modelling science, physics, engineering etc) is essential. [2533-022 (2006) : 52]

8. You may be an experienced safety pharmacologist. On the other hand, you could be degree qualified in a relevant subject with at least two years’ pharmaceutical research experience including in vivo studies. [2533-036 (2006) : 57]

9. Applicants should have a PhD in a relevant ecological or environmental subject area, experience of GIS and the manipulation of large spatial datasets. For further information please contact Simon Mortimer, e-mail caer@reading.ac.uk [2533-044 (2006) : 59]

10. Applicants should have qualifications and/or experience in the field of radiation protection and have a degree in a relevant subject eg science or engineering. [2533-054 (2006) : 62]
11. The first year combines taught courses with laboratory rotations to broaden students' theoretical and technical knowledge in the subject area of the Programme, before embarking upon a three year PhD project. [2533-066 (2006) : 65]

12. All roles require a good degree in the relevant subject. [2537-002 (2006) : 57]

13. First and postgraduate degrees in relevant subjects and a deep knowledge of plant ecology are essential. [2537-005 (2006) : 58]

14. Candidates should have a PhD or equivalent experience in hydro-ecology or related subject area. [2537-005 (2006) : 58]

15. Applications are invited from UK residents with a degree, MSc or MA in a related subject, and possibly some industrial experience. For more information or an application form please visit www.civeng.ucl.ac.uk/EngD or contact Katie Dallison (k.dallison@ucl.ac.uk). [2537-007 (2006) : 59]

16. You will be a postdoctoral scientist with a PhD in Immunotherapy or a closely related subject and you will work in the Cancer Research UK Targeted Therapy Group, based at the Paterson Institute for Cancer Research (PICR). [2537-062 (2006) : 79]

17. You should have a PhD in immunology, or a closely related subject, some postdoctoral research experience, an established research profile and ability to create a strong research plan and communicate effectively with other scientific disciplines and clinicians. [2537-062 (2006) : 79]

18. You should have a BSc degree or similar qualification in a biological subject and some previous laboratory experience. [2537-068 (2006) : 82]

19. The successful candidates will have an outstanding record of research, or have demonstrated outstanding research potential, in the subject area and will be expected to take leading roles in a vibrant research programme at the energy and symmetry frontiers, in particular in the exploitation of data from the LHC. [2537-075 (2006) : 84]

20. For the publishing and conference roles we’re looking for people who’ve studied chemical science or a related subject. [2541-014 (2006) : 64]

21. Degree qualified in a scientific subject, you will possess 3-5 years experience in process or project management, ideally across a range of technologies. [2541-019 (2006) : 66]

22. The successful candidates must have a degree level qualification in a life science subject and preferably a business qualification in Marketing or Business Studies. [2541-041 (2006) : 75]

23. You must possess a degree in a Biological Science or equivalent related subject and demonstrate a higher level of experience in statistical analyses as well as relational databases and data manipulation. [2541-048 (2006) : 78]

24. You will have, or be expected to achieve, an excellent international research profile in a biological subject that is relevant to animal welfare assessment, which will complement existing strengths within the University of Bristol. [2541-068 (2006) : 83]

25. You will have a degree and PhD (or equivalent) in a relevant subject, a good publication record commensurate with age and experience and the ability to lead and motivate people. [2541-068 (2006) : 83]
26. The most appropriate background **subjects** would be Epidemiology and Public Health, and / or Nutrition, but because of the variety of tasks required for this post, graduates from other disciplines would be considered, given willingness to learn. [2541-074 (2006) : 84]

27. Funding is for one year and you should have a PhD in an appropriate **subject**. [2541-091 (2006) : 89]

28. The University of Sheffield is a leading research-led institution of international standing. In the 2001 Research Assessment Exercise, 35 **subjects** achieved the top two grades, and 9 were accorded the highest rating of 5*. [2541-092 (2006) : 90]

29. You must have or expect to receive a first or upper second class honours degree in a Biological Science **subject**. [2541-098 (2006) : 94]

30. With a HND or degree in a life science **subject** and research laboratory experience, you will perform relevant laboratory techniques to support the drug synthesis including bulk synthesis and will be required to maintain general chemistry laboratory areas. [2545-012 (2006) : 62]

31. You should have a Master's or a doctoral degree in statistics or a related **subject**. [2545-021 (2006) : 66]

32. Both positions will require a honours degree in a relevant **subject** with a minimum of three years postgraduate experience in pharmacy, pharmacology, drug evaluation, physiology or similar, and you will possess excellent written and verbal communication skills and be able to demonstrate effective organisational skills and a high attention to detail. [2545-023 (2006) : 67]

33. You must hold a degree or equivalent (GNVQ/HNC plus two years' laboratory experience in a relevant discipline, or a closely related **subject** e.g. Applied Biology). [2545-032 (2006) : 72]

34. At a later stage, come up with topic **subjects** for conferences [2545-039 (2006) : 74]

35. Key selection criteria are: Qualified to degree level in fisheries or other natural resource related **subjects**; [2545-057 (2006) : 83]

36. The Engineering and Physical Sciences Research Council is the main UK Government agency for funding research and training in engineering and the physical sciences, investing over £500 million a year in a broad range of **subjects** - from mathematics to materials science, and from information technology to structural engineering. [2545-063 (2006) : 84]

37. You will be educated to degree level in a relevant **subject**. [2545-077 (2006) : 89]

38. EU and UK candidates holding or expecting 1st class or 2i degrees or equivalent in appropriate **subject** areas are invited to apply for the following PhD studentships, available from 1st October 2006, in the Faculty of Life Sciences which consists of five schools conducting cutting-edge research in biology, agriculture, food sciences, psychology and pharmacy. [2545-086 (2006) : 91]

39. Applicants must hold or be expecting to gain a good Bachelors Degree (2:1) in a relevant **subject** and be from the UK or EU. [2545-093 (2006) : 94]

40. MSc applicants should have a goodHonours degree in a relevant **subject**, including veterinary medicine or medicine. [2545-094 (2006) : 94]

41. First and post-graduate degrees in relevant **subjects**, a strong track record in publications and grant-winning, and a willingness to operate as a team player in the Soils theme, are essential. [2550-015 (2006) : 64]
42. First and post-graduate degrees in relevant subjects, a strong track record in publications and grant-winning, and a willingness to operate as a team player in the management of soils research at the Institute, are essential. [2550-015 (2006) : 64]

43. You must have a degree in a quantitative subject or a degree which includes a substantial quantitative element. [2550-029 (2006) : 70]

44. A higher degree in a relevant subject and a minimum of two years experience is required, [2550-031 (2006) : 71]

45. or a degree, (or equivalent qualification), in a relevant subject with a minimum of three years postgraduate experience. [2550-031 (2006) : 71]

46. A degree (or equivalent qualification) in Chemistry, Food Science or a related subject plus one years relevant experience is required. [2550-031 (2006) : 71]

47. A higher degree in a science-based subject, preferably in an ecological discipline and a minimum two years relevant experience is required or a degree (or equivalent qualification) in biological sciences with a minimum of three years postgraduate experience of ecology. [2550-031 (2006) : 71]

48. A degree, (or equivalent professional qualification), in a biology based subject is required. [2550-031 (2006) : 71]

49. For all the vacancies a degree in Chemistry or a related subject, or an equivalent qualification, is required. [2550-031 (2006) : 71]

50. Both posts require a B.Sc. (or equivalent) qualification in a Computational, Mathematical or Science related subject, along with at least six months to one year's experience in handling large volumes of data, programming and/or the design of new databases. [2550-053 (2006) : 80]

51. Applicants should be enthusiastic and of high quality, with at least an upper second class honours degree in the biological/biomedical sciences or a related subject. [2550-055 (2006) : 81]

52. The School achieved an ‘excellent’ rating in all aspects of its teaching provision in the latest QAA Subject Review. [2550-063 (2006) : 84]

53. Applicants should have a PhD in Biochemical Engineering, Molecular Biology, Biochemistry, Biotechnology or similar subject. [2550-066 (2006) : 84]

54. Highly motivated students holding, or expecting to obtain, a first or upper second class honours degree in a relevant subject are invited to apply. [2550-070 (2006) : 85]

55. A PhD in a virological subject would be an advantage, and you will be an experienced Virologist with a thorough knowledge of molecular biological techniques, including microarray technology and the experience and skills to manage a small team of scientists. [2554-024 (2006) : 66]

56. Drawing on a proven ability to network across the scientific community - among whom you've gained deserved recognition as an expert in your field - you'll hold a degree in Chemistry Toxicology (or a related subject). [2554-033 (2006) : 71]

57. Working in UKAS accredited laboratories, you will have a good knowledge of science subjects and be qualified to degree level in Chemistry, Polymer or Materials Science. [2554-057 (2006) : 81]

58. Qualified to degree level in a science related subject, and with relevant experience, your excellent communication skills will enable you to discuss regulatory issues at all levels. [2554-057 (2006) : 81]
59. This is an opportunity to join a team providing technical support across a broad range of biologically orientated subjects in the Department, working with academic and research staff, postgraduate and undergraduate students to support, lead and develop techniques and equipment. [2554-063 (2006) : 83]

60. Applicants must have a degree in maths, science or another health-related subject and at least 3 years' experience as a statistician, including statistical programming. [2554-067 (2006) : 85]

61. Applicants must have as a minimum a first degree in Mechanical, Automotive or General Engineering or other relevant subject. [2554-071 (2006) : 85]

62. You will have a good degree in chemical/petroleum engineering or a related subject and demonstrable academic or professional expertise in a relevant aspect of those disciplines. [2554-076 (2006) : 87]

63. Applicants should possess an Honours degree in a subject that involves laboratory research training at undergraduate level. [2554-077 (2006) : 87]

64. Edinburgh's School of Chemistry offers an innovative and interdisciplinary approach to traditional chemistry subjects and is at the forefront of research in emerging disciplines. [2554-086 (2006) : 89]

65. Applications are invited from graduates or final year students in the UK who have or expect to gain a First or Upper Second Class Honours degree in Chemistry, Biochemistry, Food Science or a related subject. [2554-089 (2006) : 90]

66. University applications for some subjects have dropped by as much as 30 per cent in recent years, the Higher Education Funding Council says. [2558-004 (2006) : 58-59]

67. At the opposite end of the pipeline, the number of science graduates being churned out by universities over the past five years has shot up for some subjects, as have PhD numbers (see "Out of the Pipeline", left). [2558-004 (2006) : 58-59]

68. The posts would suit science graduates with a BSc in molecular biology, biochemistry or a related subject, with research experience. [2558-008 (2006) : 62]

69. The subject of the project is research and development into the possibility of allowing a blind person to build up a useful perception of their surrounding environment using sound cues derived from live video images. [2558-018 (2006) : 65]

70. You will have a good degree in a science-based subject and have the ability to resolve technical issues and drive process improvements. [2558-024 (2006) : 67]

71. Educated to HNC, HND or degree level in a scientific subject, you will be an experienced hands-on laboratory professional with a good understanding of relevant regulatory and Health & Safety requirements. [2558-026 (2006) : 72]

72. If you are a recent graduate in chemistry or a related subject, ideally with some experience from an industrial placement, are enthusiastic, innovative and looking to work in a busy and challenging environment, then this might be the role for you. [2558-029 (2006) : 73]

73. Experience: PhD in a biochemistry, molecular biology or immunology-related subject and a minimum of one year’s postdoctoral research experience. [2558-031 (2006) : 74]

74. It is desirable that you have knowledge of one or more of the areas being studied such as materials science and nanotechnology or urban/environmental subjects. [2558-041 (2006) : 78]
75. You will have a relevant first degree in a scientific subject, ideally with a postgraduate qualification such as a Masters or PhD, and several years’ relevant experience in research or policy. [2558-041 (2006) : 78]

76. Candidates must have a BSc in a biological subject and relevant research experience would be an advantage. All posts are available immediately. [2558-084 (2006) : 93]

77. In the 2001 QAA teaching quality subject review, Sports Science at Kingston was awarded an excellent 22/24 points. [2558-085 (2006) : 94]

78. Subject areas in this one-year full-time MSc include: Multiphoton Laser Microscopy; Cell and Tissue Imaging; Optical Biosensors; Quantum Dots as Bio-labels; Optical Tweezers; Ablation and Laser Surgery; Photo-activation of drugs and Optical Bio-chips. [2558-094 (2006) : 96]

79. Applicants should have, or expect to obtain, at least a second-class honours degree in Physics or a related subject. [2558-099 (2006) : 98]

80. Educated to degree level or equivalent in a science subject, ideally chemistry, you should possess 5-10 years’ laboratory experience, with at least 2 years' at a supervisory/management level. [2563-005 (2006) : 52]

81. Qualifications & Experience: BSc in Biological Sciences (or related subject), plus MSc or PhD (ideally). [2563-008 (2006) : 52]

82. Candidates will need a PhD in biology, biochemistry or related subject and ideally 2-3 years postdoctoral experience. [2563-029 (2006) : 60]

83. For both the above posts you should have a degree or the equivalent knowledge in a relevant subject plus wide-ranging, in-depth experience [2563-030 (2006) : 60]

84. A higher degree in a biology subject [2563-040 (2006) : 63]

85. or a related subject, preferably incorporating molecular biology (or an equivalent qualification), is required plus a minimum two years relevant experience. [2563-040 (2006) : 63]

86. Alternatively a degree in a biology subject with a minimum of three years post graduate experience. [2563-040 (2006) : 63]

87. You will need a degree in marine biology or a relevant subject, be able to organise and manage data, have sound computer skills and be capable of organising your own work. [2563-051 (2006) : 67]

88. In addition you will be responsible for the development and implementation of the strategic publishing plan for designated market/subject categories. [2563-054 (2006) : 68]

89. Postgraduate applicants should have a good honours degree (2.1 or better) in a relevant subject area. [2563-062 (2006) : 71]

90. You should posses a PhD or an equivalent qualification in science or engineering subjects with relevant practical experience in real-time process logic control or programming and computing. [2563-066 (2006) : 73]

91. Applicants should have a good honours degree and/or Masters qualification in an appropriate subject. [2563-078 (2006) : 77]
92. Applicants should hold or expect to hold a 1st or upper 2nd Class Honours in Biochemistry, Molecular Biology or a related subject. [2563-080 (2006) : 77]

93. The person appointed will provide a focus for leadership in the subject of cardiovascular disease relating to the mechanisms of ischaemic injury with particular emphasis on directing basic science and the provision of translational research. [2567-009 (2006) : 53]

94. Both posts require at least a 2nd Class honours degree, or equivalent, in a relevant science subject. [2567-010 (2006) : 54]

95. As well as a first degree in Life Sciences or a related subject and an MSc/PhD in an applicable informatics field, you’ll have at least three years’ experience in a pharmaceutical or biotechnology organisation. [2567-027 (2006) : 61]

96. You’ll bring a strong honours degree in chemistry, biology or another relevant subject or an equivalent professional qualification such as MIBiol, MRSC, MIQA. [2567-028 (2006) : 62]

97. The successful candidate will hold a degree in an Agricultural or Environmental subject, have excellent interpersonal skills and a good working knowledge of agricultural systems. [2567-035 (2006) : 65]

98. You must possess a First or upper 2nd class honours degree in Plant Science, Genetics, Horticulture or a related subject with a minimum of 2 years’ experience working in a tissue culture laboratory. [2567-037 (2006) : 66]

99. The successful candidates should have a minimum of an HND in a biological subject and previous experience working in laboratory-based research would be an advantage. [2567-068 (2006) : 78]

100. Experience of laboratory work in relevant areas of the biological sciences is essential and you will have a degree or equivalent in a biological science subject. [2567-076 (2006) : 81]

101. Subjects offered include: Computer Science; Earth Sciences; Biological and Chemical Sciences; Geography; Crystallography; Psychology; Structural Biology; Bioinformatics [2567-078 (2006) : 82]

102. This role involves: […] working with Subject Matter Experts to create effective on-line and print medical education [2572-008 (2006) : 62]

103. Degree qualified in Chemistry or a related subject, applicants will have practical experience within pharmaceutical analytical development. [2572-018 (2006) : 67]

104. These roles will require enthusiastic, well-organised postgraduates (MSc, PhD or equivalent) in biochemistry, molecular biology or a related subject. [2572-024 (2006) : 70]

105. Teaming your Chemistry, Toxicology or related subject degree with an impressive track record in Research & Development (which may include time completing a PhD), you’ll create a reputation for yourself that is second-to-none. [2572-031 (2006) : 73]

106. Candidates should be educated to degree level in a biology or chemistry related subject or have equivalent industrial experience. [2572-038 (2006) : 76]

107. With a minimum of three years postgraduate experience in the use of mathematical modelling, you will possess a degree in Mathematics or a Physics related subject. [2572-039 (2006) : 76]

108. Alternatively, you will have a degree in a biological subject, but with evidence of a strong, high-level, mathematical component. [2572-039 (2006) : 76]
109. A degree or equivalent level qualification in a science-based subject (preferably in an environmental, geographical or hydrological discipline) is required. [2572-041 (2006) : 78]

110. With a good honours degree and/or a higher degree, preferably in marine science, a physical science or a related subject, you will have highly-developed computing skills and good communication skills. [2572-052 (2006) : 81]

111. It provides advice and assistance on subjects including intellectual property protection, business development, commercial negotiation, market research and funding opportunities to doctors, nurses, therapists and administrative staff, together with business consultancy services to the wider healthcare industry. [2572-058 (2006) : 84]

112. Candidates, as a minimum, will be expected to hold a recent PhD in a relevant subject or possess a degree in a physical science with a minimum of 4 years’ relevant postgraduate experience. [2572-061 (2006) : 86]

113. You will have a first degree in a science-based subject and will have completed a PhD qualification (or equivalent) in a relevant area of signal processing, acoustic engineering, or similar. [2572-073 (2006) : 92]

114. You will have a BSc in a Biological Sciences subject and a PhD and have experience in developmental biology or a background in basic scientific research. [2572-077 (2006) : 93]

115. To preserve the nomadic culture of the Evenk by setting up a nomadic school teaching traditional skills alongside modern subjects. [2576-001 (2006) : 2]

116. Candidates should be educated to degree level in a biology-related subject or have equivalent industrial experience. [2576-007 (2006) : 63]

117. Candidates should be educated to degree level in a biology or chemistry related subject or have equivalent industrial experience. [2576-007 (2006) : 63]

118. We’re looking for people who’ve studied chemical science or a related subject. [2576-022 (2006) : 70]

119. Ideally, you will be a graduate with a degree in a human biological science subject, possess good interpersonal skills and enjoy being part of a team. [2576-024 (2006) : 70]

120. You would handle a broad variety of technical subject matter in accordance with your skills and experience. [2576-033 (2006) : 73]

121. We are looking for candidates for positions at both graduate (2:1 and above) and PhD level in chemistry or a related subject. [2576-069 (2006) : 83]

122. Applications are invited from graduates having degrees with substantial components of relevant subjects such as cell and molecular biology, genetics and immunology and from postgraduates who have recently completed a relevant PhD for positions in the experimental Haematology Research Group. [2576-083 (2006) : 89]

123. You should have a good (1 or 2:1), relevant degree preferably in biology or ecology and a higher degree (MSc or PhD) or equivalent in a related subject. [2576-090 (2006) : 90]

124. You should: have a first degree in physical science, mathematics or a related subject. [2580-023 (2006) : 62]

125. Candidates must have a PhD or equivalent in chemistry or a related subject. [2580-024 (2006) : 62]
Applications welcome from candidates holding a PhD in biology, biochemistry or a related subject, and preferably with some post doctoral research experience, including standard molecular biology procedures (including plasmid construction, RNA/DNA isolation, and PCR). [2580-048 (2006) : 69]

Candidates should be educated to degree level in a biological subject or have equivalent industrial experience. [2580-055 (2006) : 71]

You will have a degree in a life sciences subject, with practical analytical expertise in ELISA or similar immunoassays. [2580-056 (2006) : 72]

You will have a degree/HNC/HND or equivalent qualification in a life sciences subject. [2580-056 (2006) : 72]

You will have a degree/HNC/HND or equivalent qualification in a life sciences subject. [2580-056 (2006) : 72]

With a degree/HNC/HND in a life sciences subject, you will perform DNA Sequencing activities in support of CAT’s drug development programmes. [2580-056 (2006) : 72]

The post holder will be required to have an honours degree in a relevant science subject (e.g. physics or engineering) [2580-071 (2006) : 79]

or a subject related to environmental sciences and meteorology. [2580-071 (2006) : 79]

A PhD or equivalent qualification in a relevant subject is required. [2580-073 (2006) : 80]

You should be able to demonstrate experience of research, for example an undergraduate dissertation, preferably in a subject relevant to terrestrial ecology and conservation. [2580-079 (2006) : 81]

The School is divided into three clinical divisions each responsible for teaching the basic clinical sciences as well as clinical subjects. [2689-026 (2009) : 57]

Experience of culture of human cells and tissue explants, histology, molecular biology and protein biochemistry techniques is required as is a Ph.D. or equivalent in a subject related to cell or molecular biology. [2689-035 (2009) : 60]

You will have or expect a good honours degree in physics or a related subject. [2689-044 (2009) : 62]

You will also have a strong base of knowledge gained by a degree or equivalent in a biological or related subject and/or relevant experience. [2694-010 (2009) : 56]

A degree in a Biology, Forestry or related subject would be an advantage. [2694-022 (2009) : 60]

With a degree in a biological subject, you will use your scientific knowledge to provide expert administrative support to the senior science team across the institute research portfolio. [2694-030 (2009) : 63]

Successful candidates will be a graduate or Ph.D. in Chemistry or a related subject with a 2.1 or above. [2694-039 (2009) : 67]

Almost 90% of our research is at internationally recognised levels and every single subject submitted included world-leading (4*) research. [2694-042 (2009) : 69]
9. You will be professionally qualified or hold a relevant degree qualification in an engineering or science subject, knowledge in the area of marine science would be an advantage. [2694-047 (2009) : 71]

10. We deliver sound training in this highly interdisciplinary subject and include core modules such as systems physiology, statistics and data analysis, physiological monitoring, biomedical imaging, and modelling in biology. [2698-005 (2009) : 50]

11. Both positions require you to be qualified with a degree in a biomedical/biological / immunology subject or Ph.D., with cell separation experience preferable. [2698-020 (2009) : 58]

12. Qualified to Ph.D. level with a 1st degree in a biomedical/immunology subject or can prove exceptional equivalent experience in flow cytometry. [2698-005 (2009) : 50]

13. A formal qualification in an environmental-related subject and/or experience in an environmental field are essential. [2698-036 (2009) : 63]

14. The successful candidate will have a BSc or equivalent qualification in Molecular Biology or a related subject area and experience of working in a laboratory, however, applicants with a laboratory Technician's Diploma and suitable experience will be considered. [2698-037 (2009) : 63]

15. This is suitable for a researcher with Ph.D. in a relevant subject and experience of the clinical research environment. [2698-047 (2009) : 68]

16. A degree in a biological or related subject is desirable. [2702-012 (2009) : 52]

17. You should have an honours degree in a relevant biological subject e.g. Biology, Microbiology, Virology and must have sound molecular knowledge and experience including real-time amplification techniques and sequencing. [2702-030 (2009) : 61]

18. Do you have a good degree-level qualification in a scientific or engineering subject? [2702-035 (2009) : 63]

Then, as now, the evolution of humans was a touchy subject, and after the publication of On the Origin of Species, Darwin devoted a separate work, The Descent of Man, to untangling how evolutionary understanding could be applied to humans and their special traits. [2706-001 (2009) : 2]

19. The required qualification is a good honours degree in a scientific subject (preferably life sciences), ideally complemented by a Ph.D. and postdoctoral research experience. [2706-027 (2009) : 58]

20. Candidates with a good degree in biomedical science or related subjects are invited to apply before 27 May. [2706-041 (2009) : 62]

21. Preferably with a degree in a scientific subject and an interest in science communication, you will have excellent communication and organisational skills, a flexible approach to tackling a range of tasks, the ability to prioritise competing demands and demonstrate excellent attention to detail. [2711-003 (2009) : 50]

22. You must have a degree in a quantitative subject or a degree that includes a substantial quantitative element. [2711-023 (2009) : 59]

23. The candidate should have a Ph.D. in a subject related area. [2711-034 (2009) : 62]

24. The candidate should have a Ph.D. in a subject related area. [2711-038 (2009) : 63]
25. Subject areas covered include: Ecological Conservation; Economics for Natural Resource and Environmental Management; Environmental Management for Business; Geographical Information Management; Natural Resource Management; Land Reclamation and Restoration; Soil Management; Water and Wastewater Engineering; Water Management [2711-047 (2009) : 66]

26. In conjunction with top rank academic partners, VLA is now offering two Ph.D. studentships in the following subject areas: Characterisation of proteomic biomarkers of host response to lyssavirus infection with particular focus on rabies virus. Probing the host response secretome of vaccinated and TB infected cattle to define biomarkers of protection. [2711-051 (2009) : 67]

27. You will need a BSc or equivalent in a life science subject, with good knowledge of molecular biology. [2715-011 (2009) : 55]

28. Candidates should possess or about to be awarded a Ph.D. in Cellular Immunology or another relevant subject. [2715-023 (2009) : 59]

29. The junior position will require a degree in a relevant science subject and a major interest in instrumentation and technology. [2719-004 (2009) : 48]

30. You should have a good honours degree in a relevant scientific subject, preferably physics, and a higher science degree or equivalent experience; [2719-019 (2009) : 57]

31. A degree in Chemistry or a related subject, or equivalent qualification, is required. [2719-023 (2009) : 58]

32. A degree or equivalent in Biology or a related subject, or an equivalent professional qualification, is required. [2719-023 (2009) : 58]

33. The role involves running enzyme-based screening assays. Candidates should be educated to degree level in a biology or chemistry-related subject and/or have equivalent industrial experience. [2724-012 (2009) : 55]

34. A degree is required, and a Ph.D. in a relevant subject would be an advantage. [2724-035 (2009) : 65]

35. Applications are encouraged from all countries and all Universities in all subjects. [2724-052 (2009) : 71]

36. A degree in a science based subject [2728-009 (2009) : 56]

37. or equivalent qualification in a relevant subject is required. [2728-009 (2009) : 56]

38. You must have experience in both field and laboratory work and a demonstrable knowledge and interest in plants, trees and the environment. It is also essential that you have A level passes in two of the following subjects - Biology, Environmental Science, Physics, Chemistry, Maths or Geography. [2728-010 (2009) : 56]

39. The successful applicant will, in addition to being the field leader for pharmaceutics and setting the tone and direction of future teaching, lead research and development in the subject. [2728-035 (2009) : 68]

40. For both posts you will be required to have an honours degree in a relevant science or environmental subject. [2728-036 (2009) : 68]
41. Applicants should have a Ph.D. in a relevant subject and have substantial expertise in one or more of the following areas: *in vivo* murine cardiac surgical models, cardiac ultrasound, hemodynamic monitoring, and in myocardial pathology. Ideally they should have a UK Home Office Licence. [2728-038 (2009) : 69]

42. You will need at least a Degree or equivalent in a biological or related subject and/or relevant experience, ideally in a commercial context. [2733-017 (2009) : 66]

43. To apply please send your CV and covering letter explaining your interest and expertise relevant to this subject to Lyn Grove at l.grove@lse.ac.uk [2733-041 (2009) : 75]

44. Understanding the science involved is critical, so a 1st degree in a hard science subject is a must. [2737-012 (2009) : 57]

45. You will contribute to the creative effort of the group, to understand subject background [2737-022 (2009) : 64]

46. in the specific subject area and the wider field. [2737-022 (2009) : 64]
Annexe 9-4-1 Listes (>2) avec SUBJECT dans CAEMS

1971

1. Qualifications: degree, or equivalent in scientific subject e.g. food science; and ability to communicate with scientists and laymen. [733-024 (1971) : 40]

2. GCE (or equivalent) in five subjects, two of which should be at “A” level preferably Geology, Physics, Mathematics or Chemistry. [745-012 (1971) : 58]

3. It will be held on 20 April, and the subjects dealt with will include basic principles, programming, standards and manufacturing and management aspects, including problems in introducing NC into the factory. [745-076 (1971) : 63]

4. These projects include many subjects within Computer Science, Information Systems, Management Science and Social Applications of computers. [754-009 (1971) : 598]

6. The vacant post will be concerned primarily with part of the Council’s nonclinical activities which include such subjects as physiology, psychology, genetics, immunology, microbiology and molecular biology. [763-033 (1971) : 346]

7. The theory of random processes of all fields, time series analysis, and into application of these subjects in the social sciences, genetics, medicine and physics. [767-026 (1971) : 544]

8. Some background in one or more of the following subjects will be useful: plastics, composites, test procedures, physics, engineering, chemical engineering, chemistry, material science. [774-025 (1971) : 190]

9. Subjects include advanced general structural theory and design, computer applications, and special lectures in either steel, concrete or aircraft structures, or in structural problems of nuclear and chemical engineering (pressure vessels, etc.). [776-027 (1971) : 288]

10. Research grants are available for British students, at post-graduate, post-Grad.R.I.C., post-Dip.Tech. level for research in the following subjects from October 1972: Heterocyclic and Aromatic Chemistry; Organic Reaction Mechanisms; Free Radical Chemistry; Carbene Chemistry; Organic Photochemical Reactions; Synthetic Organic Chemistry; Organo-sulphur Chemistry; Organometallic Chemistry; Metal Carbonyls; Organosilicon Chemistry; Inorganic Polymers; Organophosphorus Chemistry; Petrochemical Research; Polymer Synthesis; Combustion and Flame; Heterogeneous Catalysis; Application of the Woodward Hoffman Rules; Valence-bond Isomers [776-029 (1971) : 288]

1995

1. Subjects of interest include: the integration of self-sufficiency with task requirements; utility based action selection; learning, and hierarchical architectures. [1959-031 (1995) : 52]

2. Applicants should possess an Honours degree in a relevant subject such as molecular biology, microbiology or plant science and have postgraduate research experience. [1963-058 (1995) : 64]

3. The successful applicants will join research groups led by their supervisor and receive research training in disciplines appropriate to the subject. [Molecular Biology / Microbiology; Cell Biology; Population Biology] [1963-092 (1995) : 72]
4. Applicants should have a university degree in any one of the following subjects: medicine, dentistry, veterinary medicine, microbiology, medical laboratory sciences or pharmacy. [1963-105 (1995) : 75]

5. You should have a degree (or equivalent) in a numerate subject involving the study of human-environment issues such as Geography, Biology or Environmental Science. [1967-095 (1995) : 88]

6. 12 Months M.Sc. Course by Advanced Study and Research are offered in the following subjects: Surface Chemistry and Colloids (Physical Chemistry); Foundations of Mathematics and Theory of Computation (Mathematics); Fluid Mechanics (Mathematics); Advanced Neuro- and Molecular-Pharmacology (Pharmacology); Nonlinear Mathematics (Mathematics/ Engineering Maths) [1967-107 (1995) : 91]

7. Applications are invited for quota and CASE studentships from highly motivated individuals possessing or expecting to gain a 1 or 2i Honours degree in a relevant subject such as Biochemistry, Biology, Chemistry, Molecular biology or Biotechnology. [1971-030 (1995) : 65]

8. The subject of the Chair has been defined as: Natural Resource Management deals with the sustainable use and development of natural resources, using a problem definition based on natural science, but including also social, political, legal and technical aspects. [1976-002 (1995) : 59]

9. The subject of the Chair has been defined as: Natural Resource Management deals with the sustainable use and development of natural resources, using a problem definition based on natural science, but including also social, political, legal and technical aspects. [1980-005 (1995) : 53]

10. Four three-year postgraduate studentships are available from October 1995, working under the researchers named, open to graduates with 2.1 honours or equivalent qualification in the subjects indicated: Electrical oxidation of organic molecules; Removal of ammonia from effluent ; Modelling of odours [1980-014 (1995) : 58]

11. Applications are invited for three-year studentships in the following subject areas: Atomic and Molecular Physics ; Liquid Crystal Physics ; Laser Photonics ; Experimental Condensed Matter Physics ; Theoretical Condensed Matter Physics [1980-122 (1995) : 86]

12. Applications are invited for the following studentships from candidates who have (or expect to gain) a first class or an upper second honours degree in an appropriate subject: Cell biology; Fish physiology ; Biotransformations ; Molecular plant pathology. [1980-124 (1995) : 86]

13. Applications are therefore encouraged from graduates of any scientific, mathematical or engineering subject. [1980-126 (1995) : 87]

14. The subject matter could be based on agriculture in transition, conservation of threatened ecosystems, managing coastal retreat in the face of the sea level changes, or rural renaissance through Local Agenda 21 sustainable development schemes. [1984-105 (1995) : 79]

15. BSc courses in: Analytical Chemistry, Biological Science, Chemistry, Geography, Geology and Physics Combined Sciences Degrees (BSc): Biochemical Sciences, Environmental Science/Conservation, Molecular Biology, Physical Geography and Geology or select 2 subjects from a choice of Biology, Chemistry, Geography, Geology, Physics. [1984-122 (1995) : 83]

16. The successful applicants for these positions would be required to teach the following subjects: Mining Engineering: Alluvial Mining; Mining Legislation; Underground and Surface Mining Methods; Computerised Metal Mine Planning and Design; Rock Mechanics; Material Handling; Rock Fragmentation and Blast Design; Mineral Economics. Applied/Mining Geology: General Geology; Structural, Economic and Engineering Geology; Mineralogy; Mine Geological Mapping; Exploration
Techniques; Mine Geology and Hydrogeology; Geostatistics and Reserve Estimation. [2006-013 (1995) : 64]

17. Applicants should have an HNC/D in Medical Laboratory Science or BSc in Biochemistry, Immunology or related subject, and at least 2-3 years post-qualification experience. [2006-023 (1995) : 68]

2005

1. Applicants should have a degree, or equivalent qualification, in statistics or mathematics or a degree in a relevant science subject with a strong statistics/mathematics component and a post-graduate degree (MSc, Diploma or PhD) in statistics or its applications. [2485-075 (2005) : 82]

2. Studentships are thus open to applicants with first degrees in subjects such as Chemistry Physics, Mathematics and Engineering. [2485-107 (2005) : 92]

3. You should be educated to degree level in a relevant scientific subject (i.e. biomedical, biology, biochemistry) with three to five years relevant work experience, ideally within the area of drugs of abuse testing, although this is not essential. [2498-026 (2005) : 59]

4. You should be educated to degree level in a relevant scientific subject (i.e. biomedical, chemistry or bioscience). [2498-026 (2005) : 59]

5. Fellowships tenable from 1st August 2005 are available in the following subject areas: Biomathematics; Motivations and Means of Global Migration; Chromosomes and Development; Archaeological Science (Tephrochronology) [2498-049 (2005) : 68]

7. A minimum of a 2:1 in a science subject, or paper, chemical or polymer engineering, preference given to Ph.D. degree holders. [2506-019 (2005) : 61]

8. Specific subject areas are aerodynamics, lightweight composite structures, energy-saving and electrical systems, and stability and control. [2506-060 (2005) : 75]

9. Applicants should have, or be about to obtain, a PhD in a relevant subject (e.g. Chemistry, Physics, Biological Sciences) and have experience in and understanding of some or all of: MR imaging, modern NMR methods, Mathematica and C programming, and NMR/MR instrumentation. [2511-048 (2005) : 70]

10. We currently have a variety of opportunities for, and are seeking applications from, Graduates with a BSc, MSc or PhD in the following subjects: Biochemistry; Chemistry; Toxicology; Veterinary Medicine; Biological Sciences; Pharmacology; Biotechnology and Animal Technology. [2515-056 (2005) : 74]

11. The successful candidate will have a higher degree, preferably a doctorate in a relevant subject such as computing science, engineering science, physics, mathematics or a suitable aspect of biology. [2519-073 (2005) : 77]

12. Applicants should preferably be qualified to degree level in a relevant subject, such as geography, land management or environmental science. [2524-027 (2005) : 62]
2006

1. A first degree in a quantitative subject (for example mathematics, statistics, modelling science, physics, engineering etc) is essential. [2533-022 (2006) : 52]

2. The most appropriate background subjects would be Epidemiology and Public Health, and / or Nutrition, but because of the variety of tasks required for this post, graduates from other disciplines would be considered, given willingness to learn. [2541-074 (2006) : 84]

3. The Engineering and Physical Sciences Research Council is the main UK Government agency for funding research and training in engineering and the physical sciences, investing over £500 million a year in a broad range of subjects - from mathematics to materials science, and from information technology to structural engineering. [2545-063 (2006) : 84]

4. It is desirable that you have knowledge of one or more of the areas being studied such as materials science and nanotechnology or urban/environmental subjects. [2558-041 (2006) : 78]

5. Subject areas in this one-year full-time MSc include: Multiphoton Laser Microscopy; Cell and Tissue Imaging; Optical Biosensors; Quantum Dots as Bio-labels; Optical Tweezers; Ablation and Laser Surgery; Photo-activation of drugs and Optical Bio-chips. [2558-094 (2006) : 96]

6. Subjects offered include: Computer Science; Earth Sciences; Biological and Chemical Sciences; Geography; Crystallography; Psychology; Structural Biology; Bioinformatics [2567-078 (2006) : 82]

7. It provides advice and assistance on subjects including intellectual property protection, business development, commercial negotiation, market research and funding opportunities to doctors, nurses, therapists and administrative staff, together with business consultancy services to the wider healthcare industry. [2572-058 (2006) : 84]

8. Applications are invited from graduates having degrees with substantial components of relevant subjects such as cell and molecular biology, genetics and immunology and from postgraduates who have recently completed a relevant PhD for positions in the experimental Haematology Research Group. [2576-083 (2006) : 89]

2009

1. You should have an honours degree in a relevant biological subject e.g. Biology, Microbiology, Virology and must have sound molecular knowledge and experience including real-time amplification techniques and sequencing. [2702-030 (2009) : 61]

2. Subject areas covered include: Ecological Conservation; Economics for Natural Resource and Environmental Management; Environmental Management for Business; Geographical Information Management; Natural Resource Management; Land Reclamation and Restoration; Soil Management; Water and Wastewater Engineering; Water Management [2711-047 (2009) : 66]

3. In conjunction with top rank academic partners, VLA is now offering two Ph.D. studentships in the following subject areas: Characterisation of proteomic biomarkers of host response to lyssavirus infection with particular focus on rabies virus. Probing the host response secretome of vaccinated and TB infected cattle to define biomarkers of protection. [2711-051 (2009) : 67]

4. You must have experience in both field and laboratory work and a demonstrable knowledge and interest in plants, trees and the environment. It is also essential that you have A level passes in two of the
following subjects - Biology, Environmental Science, Physics, Chemistry, Maths or Geography. [2728-010 (2009) : 56]

Annexe 9-4-4 Occurrences de SUBJECT dans BNC

Here is a random selection of 50 solutions from the 23007 found.

Les occurrences en rouge renvoient au discours académique

A1A 1284 To speak personally, I might have found life easier, though possibly less interesting, if the English synthesis had continued to exist in approximately the same state as when I became a university teacher at the end of the 1950s: a genuine humane discipline, self-respecting, enjoyable, expanding, with methods that were established and familiar, if subject to variation between the different emphases associated with Oxford and Cambridge.

A2M 398 But other US officials said they believed the subject of the convertible rouble, and the gold standard, would arise in Moscow.

A69 243 The natural history of the upas tree of housing as a social service, growing from the twin roots of rent restriction and indiscriminate subsidy, would be a fascinating subject for a long book.

AE7 999 Biologists try to interpret the structures they see as performing some function, subject to the constraints set by the materials of which they are made, and the conditions under which they must operate.

AM6 500 Equally foolish in my view, to return to the central subject of this book, is the insistence by Brian Way that children should be given practice in concentration, for second-order activities are nothing if not absorbing.

ANB 413 Opposite the tomb, at the other side of the transept, is a statue of St Bartholomew, remarkable for its subject and for its conceit.

AP7 98 That remains true: and the recent past, which is the one period open to direct study through life story testimony, is the least subject to research by either historians or sociologists because it falls uneasily between their concerns.

BMC 789 The wild, rhythmic drive of the first subject owes much to Shostakovich, yet the second subject would not sound out of place in a Star Trek film score, and its pseudo-oriental counter-theme is pure Hollywood.

BNT 358 That is why I cherish the work of Messrs David Alford and Ted Hynds of the People, who condensed my musings on the subject of my nasal ingestion of the powdered and refined fruits of the coca leaf into the terse, pithy and intriguingly erect motto, ‘Cocaine And Me, By Funny Man Fry.’

CBV 2870 On the subject of delays in responding to minutes, Mr Holden pointed out that speeding up the process would also add to costs, and that some delay arose because reports had to be considered by the Institute as well as by the JMU; any suggestions on how to cut down on the time involved would be gratefully received.

CCB 616 For a comprehensive account on the subject of private press and press books, the collector is referred to such books as Roderick Cave, The Private Press (1971).

CFX 1163 He admires in Horace ‘the beauty, force and vehemence of Impression: which leads me on to a more rare and entertaining subject, not anywhere (I think) insisted on by others’.

ED6 1150 Gunzenhauser makes the very best of the repetitive rhythmic ideas of the outer movements and although he is perhaps a share more rhythmically plainspun than Kertész, in the first movement he
eases the second subject in very nicely and the lolloping theme of the third movement Allegretto has much folksy charm.

EDF 58 By treating his subject as widely as possible, by seeing it in terms of the history of war, rather than as the more narrowly defined military history, the modern student will come to understand it in its many facets and complexities.

EEN 270 The Acts were the subject of repeated Parliamentary enquiries, while the repeal organisations alone published at least 520 books and pamphlets on venereal disease and prostitution.

EF3 694 In both cases, the subject matter of the treaty with respect to the territory in question, regardless of the identity of the controlling body, is treated as paramount.

EVX 1124 The general subject of determinism and our inclinations, however, is that of a companion volume to this one, The Consequences of Determinism.

EW7 965 2 RBL hopes to increase student motivation by presenting varied possibilities, of subject matter, method of working, and medium of communication, in contrast to the class lesson where all must learn one thing in one way.

EW8 1273 If the client does not want to answer, he need not do so; and the way is opened for him to raise the subject later if he so chooses.

FA6 919 However, it is significant that modern physics appears to have had little impact on their philosophy of physics; they still construct it as a subject which is capable of revealing absolute truths.

FBC 1346 To what extent they are affected, and whether this makes them dependent upon forces that are beyond their control in the way they exercise their discretion, as opposed to being ‘free agents’ and therefore capable of choosing to follow a different policy in the light of changing circumstances, is the subject of this section.

FBK 600 The best known example is the relaxation in the binding quality of its own decisions in favour of the liberty of the subject, provided for by Taylor.

FDW 266 These cases show that the courts in the early 19th century were willing to hold that the Inns, as private voluntary societies, had a power to refuse entry to would-be members which was not subject to the jurisdiction of the courts or the visitors, even though barristers of the Inns possessed certain monopoly rights in the courts.

FE1 514 My Lords, I have come to the conclusion that, as a matter of law, there are sound reasons for making a limited modification to the existing rule (subject to strict safeguards) unless there are constitutional or practical reasons which outweigh them.

FNR 2990 They are basic to the growing subject of computational linguistics, which aims to let computers talk and make sense of human language; but before that arose, they proved invaluable for computer languages like Basic, Pascal and Prolog.

FRN 759 In an imperfect capital market it need not be the same for all firms, and in an economy subject to cyclical fluctuations in economic activity it need not be the same over time.

FTV 1423 The dualist (I am here thinking primarily of the Cartesian type of dualism) insists on the ontological separation of physical from nonphysical phenomena and is led to postulate a non-physical subject distinct from the body in an effort to explain the meaning of experience ascriptions.
The National Curriculum may introduce a greater degree of consistency in respect of subject content, but quality in the way such content is treated will only be achieved if the anomalies at the various levels — LEA support, school curriculum management and development, classroom provision — are attended to.

When he reported for duty in Simla, then the headquarters of the meteorological department, he had no knowledge of the subject; he had to learn it by reading, guided by senior staff.

A narrative description of a subject under the guise of another suggestively similar subject; a simile extended into a story; a sustained metaphor.

A project-based approach can provide interesting and meaningful links between mathematics and other subject areas, but only if the curriculum aspects are considered in sufficient depth, and the actual mathematics involved is made explicit.

Expressive notation is generally easier to truncate — by deleting final characters to create the notation for a more general subject.

It had been an attempt to let in a bit of fresh air on the subject.

So serious on many occasions that it subsided into ponderousness, pretentiousness, and treated the subject as life-style, liberation, and meaning of life.

If you are given the opportunity to work flexible working hours, you may agree your working times with your manager within the flexible working hours scheme in operation where you work, subject to the operational needs of the organisation.

Primary Subject Area:

Subject Area:

Those theses with related papers being published several years before submission were presented for the degree of D Sc, which, as previously described, is granted on the basis of a scientist's record of published work in a subject field.

For, unlike conquerors before and after, the Romans did not only take from their subject peoples, they contributed also, and the result of these contributions in road communications, law and administration, heating systems, architecture and art has had a permanent effect in Europe despite the 1000 years which intervened between the collapse of the Western half of the Roman Empire and the rise of the Renaissance.

Or we can describe the same action using a Passive sentence, in which the subject of the sentence (italicised below) is acted upon (rather than acting).

This is Dame Sirith, the subject of the next chapter.

Subject: Leeds fan steals a Porsche

Subject: re England Team.

Subject: Wingers
For instance, clauses restricting liability for late delivery, allowing for variation of the delivery date or tolerances in relation to the quantity to be delivered, clauses enabling the proferens to substitute alternative goods for those ordered, to withhold performance of its obligations or vary the terms of the contract, and force majeure clauses excusing non-performance, or extending the time for performance in the event of circumstances outside the proferens' control, and possibly even clauses giving one party the right to withhold performance, or terminate the contract, in the event of breach by the other party, are all potentially subject to s3.

Sure erm no amount of audience contact will compensate for a boring subject.

Here is a random selection of 50 solutions from the 7660 found.

Sometimes they were misty and abstract, especially when one talked intimately of the past, of subjects he had long forgotten — or wanted to forget — awakening memories — nightmares?— from deep within.

They showed, for instance, that if you look at someone saying ‘ga’ on a piece of film with the sound being removed and replaced by the sound ‘ba’, then subjects will actually report hearing the sound ‘da’.

Because of the sensitivity of the subjects under consideration, the highest recommendation in considering who might be suitable to sit on these investigations is the fact that they have a safe pair of hands.

Surprisingly perhaps, the results were highly productive and the basic laws of learning under certain strictly controlled laboratory conditions were achieved through the monumental labours of B. F. Skinner and his colleagues using such amenable subjects as the white rat and the domesticated pigeon.

Researchers there say that they achieved similarly fascinating results, though handicapped first by a small budget and also by several death threats from potential subjects.

The effects of this training were found to generalize to the texture cue in experimental subjects, who tended to avoid contact with that particular flooring whereas control subject showed something of a liking for it.

Studies are therefore mostly in agreement that hypercholesterolaemia and hypertriglyceridaemia are more prevalent in both Type I and 2 diabetic subjects, especially at diagnosis of diabetes.

Anecdotal stories show that Smith had often understood the subjects of other mathematicians' researches better than they had themselves, but had not published because he saw further than they did, and realised that their results were special cases of a general theory not fully uncovered.

My own experience suggests that, the further one moves away from television studios and other hot-houses, where the thrill of constitutional debate has ousted boring subjects like poverty and unemployment, the less enthused the populace becomes.

As we have seen, ardent friendship and commitment to the monastic life were the most frequently intertwining subjects of his years at Bec.

He has purchased Freud's production from the last eighteen months, perhaps a dozen canvases, including several pictures of considerable scale, the subjects of which are nude female figures and portraits of performance artist, Leigh Bowery.
Certainly subjects are studied at much greater depth than when I was trained.

Throughout the study subjects were asked to complete at least one seven point home blood glucose monitoring profile a week and to collect a series of capillary blood samples simultaneously with the home monitoring profile at least once a fortnight.

For the historian, then, the problem becomes one of discovering the contours of Victorian sexual mores without surrendering to facile generalisations, for despite a plethora of studies we are still woefully ignorant of general trends in the development of sexual attitudes, of their effects on individual lives, and of the particular meanings given to their activities by the sexual subjects in all their variety — by class, by gender, by generation and by region.

Subjects began to feel a loss of control of the course of their thinking.

A similar study, using 7-11-year-old children as subjects compared dream reports following a violent western compared to a bland film about baseball.

And to stimulate their observation we must give them suitable subjects, within their personal experience — and we must see that they get the experience of looking and observing the visual world around them.

OCEA is a scheme covering the assessment of different subjects within the school curriculum.

It is considered more conventional for girls to take arts subjects than sciences; as convergers tend to be more conventional in outlook, girls are in something of a double bind — they have to decide whether to follow their inclinations or to make a ‘conventional’ choice.

Subjects in which it is possible to have fun are not serious subjects.

Subjects and methods

It is only in embryonic forms of thought, or professional fields trying to establish themselves (paramedical areas), or subjects where there is a lot of infighting (sociology), where the standards of critical judgement come up for much review.

In his experiments, subjects were presented with an informative sentence on a screen for 4 seconds, and then presented with a question about the content of the sentences.

However as Harvey (1969, p. 449) noted, systems concepts, although old, had tended to remain on the fringe of scientific interest acting more as constraints than as subjects for intensive investigation.

It is only in certain subjects — notably mathematics, technical subjects and physics — that boys do better than girls.

The recommendation most widely noticed was that full-time students should normally study a wider range of subjects — five A levels plus one AS level, rather than three A levels as at present.

Figure 12.1 shows a small hierarchy or group of ranked subjects which makes some statement concerning the relationships between those subjects.

If not, subjects with limited literature may be subdivided too extensively, producing unused or little used subdivisions, whereas ‘large’ subjects, if allocated only the same number of subdivisions, will have some trying to accommodate unmanageable quantities of literature.
Even to relatively unsophisticated subjects it is quite intuitive to sell when the price is high and store when the price is low, but it is much less intuitive to produce where the marginal cost is equal to some expectation.

The Kings Quest series is basically set in the mythical kingdom of Daventry, and revolves around the adventures of King Graham, his family and subjects.

The couple have now moved on to the more complicated use of silks, and subjects have varied from masterpieces such as The Old Mill and The Haywain to a girl skating on a lake and a Victorian winter scene.

In the Christianson and E. F. Loftus (1991) study subjects were shown a series of slides with a critical slide showing either a woman cycling (neutral condition), a woman lying on the ground near her bicycle and bleeding from a head injury (arousal condition), or a woman carrying her bicycle (unusual condition).

However, the number of subjects is very small for such an analysis and self reported accident estimates themselves are not a very reliable measure.

No subjects reported having expected a memory test even though many of them had already taken part in Study 1.

However, another way of explaining this effect is to ask the subjects how they performed the experimental task.

After completing a core course in foundation subjects in general and applied linguistics, MSc students put together a personal programme of options chosen from a set of more than 25 courses ranging from highly practical topics like language teaching methodology, language testing, teacher education etc. to theoretical and descriptive studies such as second language acquisition, socio/psycho-linguistics, pedagogical descriptions and literary stylistics.

To keep pace with these fast-moving subjects, undergraduates become involved in industrially-relevant projects and research in later years of the course.

All individuals gave informed consent and had gastric juice analysis: after an overnight fast, a nasogastric tube was positioned in the gastric antrum with endoscopy guidance and its correct position checked by the water recovery test with the subjects in semirecumbent position.

Table I presents data for individual subjects.

In comparison with a control group of 20 normal subjects, studied in our laboratory, patients with acromegaly had large fasting volumes, even without treatment (18.9 (1.6 ml)v 42.1 (6.3 ml); p<0.002).

Firstly, intestinal permeability could be primarily abnormal in treated coeliac disease subjects.

A response to evening primrose oil was also reported by Schalin-Karrila et al in a parallel-group study of 12 weeks duration with 25 adult subjects.

Until the seventeenth century many, even most, European frontiers were very vague, zones in which the claims and jurisdictions of different rulers and their subjects overlapped and intersected in a complex and confusing way.
The assessable elements, in common with the other social subjects are: Knowledge and Understanding; Evaluating; and Investigating.

It, in the nineteen eighties and nineteen nineties, must be one of the best subjects they could ever conceive of going into because the whole of the future of modern civilization depends on chemistry.

During the next few programmes, we're going to take a look at trends in science and engineering, particularly in the way that the subjects are taught, and opportunities for employment.
Annexe 9-5 Occurrences de THEME dans CAEMS

1971
Ø

1995

1. comprehensive vision of a systemic approach to complex, multidisciplinary research themes, involvement in the formulation of informatics strategies; [1959-003 (1995) : 45]

3. Candidates will be asked to provide short written submissions on specified themes to accompany their formal application. [1971-053 (1995) : 72]

4. Applications for project grant support are invited which successfully address the scientific themes of one or other of the two Programmes and the generic LINK objectives.

5. The scientific themes of the Programmes are as follows: [Integrated Approaches to Healthy Ageing; Genetic & Environmental Interactions in Health] [1989-034 (1995) : 67]

6. This post is available immediately for two years, to carry out research and apply new molecular techniques in the study of gene regulation in microvascular cells, with particular reference to the endothelium-derived vasomodulatory agents, to contribute to the enhancing of the research profile and develop new research themes in the department. [1993-049 (1995) : 66]

7. The central theme of the project is process tomography, in which the attenuation of some form of energy beam by the different phases within a process vessel can be used to reconstruct (3-D) cross sectional images of the phase distributions. [1998-072 (1995) : 94]

8. Outline proposals for research grants are sought from all areas of bioinformatics, under the following themes: • Analysis of sequences and genomes • Biomolecular structure prediction and modelling • Novel approaches to the storage, integration and exploitation of evolving biological data collections • Novel applications of systems engineering techniques to biological problems. [2006-065 (1995) : 79]

2005

1. SUPA is organised around five major theme areas of research excellence, linked together by a Graduate School which will offer studentships and a Distinguished Visitor Programme. [2485-017 (2005) : 61]

2. For details of posts and theme areas, of the Graduate School, and to learn more about SUPA, visit: www.supa.ac.uk [2485-017 (2005) : 61]

3. Major research themes being pursued are astronomy, condensed matter and materials physics, nuclear and plasma physics, elementary particles and photonics. [2485-017 (2005) : 61]

4. ACES is now offering up to 8 funded studentships across the three ACES research themes of Environmental Degradation and Ecosystem Restoration, Sustaining Biodiversity and Livelihoods, and Catchment and Coastal Studies. [2493-059 (2005) : 73]

5. It is headed by Prof Philippe Froguel, who also holds the Chair of Genomic Medicine in the Division of Medicine and is Theme Leader for Genetics and Genomics across the whole Faculty of Medicine. [2502-050 (2005) : 72]
6. The two main themes are Science Studies and Frontiers in Medical Science, with courses including Science and the Public and Issues in Brain and Behaviour - see our website for a full list of courses. [2519-080 (2005) : 79]

7. The two main themes are Science Studies and Frontiers in Medical Science, with courses including Science and the Public and Issues in Brain and Behaviour - see our website for a full list of courses. [2524-080 (2005) : 79]

8. A core technology programme and the key disciplines of Chemical, Microbial, Nutrition & Food and Integrative Physiological Sciences underpin each theme. [2528-060 (2005) : 85]

2006

1. Thirteen of the themed Programmes fund five places per annum. [2533-066 (2006) : 65]

4. This is a theme picked up by Wolf. [2545-004 (2006) : 56-59]

5. Further details can be found at www.ls.manchester.ac.uk/research/themes/organellefunction/. [2545-072 (2006) : 87]

6. First and post-graduate degrees in relevant subjects, a strong track record in publications and grant-winning, and a willingness to operate as a team player in the Soils theme, are essential. [2550-015 (2006) : 64]

7. The Interdisciplinary Manufacturing Research Centre for Bioprocessing at UCL is funded by the Engineering and Physical Sciences Research Council (EPSRC) and currently have research themes on protein and plasmid DNA production with hosts such as Escherichia coli, Pichia pastoris and mammalian cells. [2550-066 (2006) : 84]

8. Individuals with relevant experience in any of the main SERG research themes (biodiversity/ecosystem function relationships in coastal environments, ecophysiology of microphytobenthos, bio-dynamics of sediments) will be considered. [2554-079 (2006) : 87]

9. There are two themes. First, to understand how these beams remove molecules from surfaces, so their use can be tailored to the samples to be analysed. Second, in an adventurous instrumental development with a UK company-Ionoptika Ltd, ToF-SIMS will be combined with ATR-IR spectroscopy, enabling the surface and sub-surface chemistry of complex biological, organic and inorganic materials to be studied at the same time. [2554-089 (2006) : 90]

11. This research Theme will characterise landscape sensitivity to climate, tectonics and anthropogenic activity over various temporal and spatial scales, including understanding landscape responses to past climate change and human activity. [2558-005 (2006) : 60-61]

12. You will be an outstanding researcher into the dynamics and modelling of landscapes, who will provide leadership for modelling research within this Theme. [2558-005 (2006) : 60-61]

14. In this Theme we will extend current work and develop new directions in characterising carbon sinks and sources through field, laboratory and remotely-sensed studies, contributing to predictive models at global, regional and local scale. [2558-005 (2006) : 60-61]

16. Key posts in each Theme above will link our research in environmental science with the development, testing and application of policy and with economic development through knowledge transfer. [2558-005 (2006) : 60-61]

17. we also seek a lectureship to contribute to this cross-cutting programme through links with all three Themes: [Lectureship in Environmental Decision Support; Working at the interface between natural science and policy, you will develop numerical modelling approaches to environmental decision making]. [2558-005 (2006) : 60-61]

18. The Centre will bring together modellers and dynamicists from across SAGES' three research Themes, with a central hub based in the School of GeoSciences at the University of Edinburgh with dedicated computing hardware and support. [2558-005 (2006) : 60-61]

19. We fund research prioritised by consumers, which falls under the three themes of cause, cure and care through the Quality Research in Dementia (QRD) funding programme. [2558-006 (2006) : 62]

20. Cancer Research (5* RAE 2001) is a major research theme in the Medical School and we will be seeking applications from scientists with an excellent record of research achievement able to secure substantial external funding to develop and maintain an independent internationally competitive research group. [2563-064 (2006) : 72]

21. As part of the Department's strategic development of its three research themes, Nanotechnology & Materials, Miniaturizing Chemistry and Molecules for Health, we are recruiting three talented academics seeking a good first post in which to build their independent research. [2563-065 (2006) : 72]

22. The introduction of novel research collaborations or themes to researchers would also be beneficial, along with the ability to communicate effectively to a wide range of personnel. [2567-048 (2006) : 69]

23. We now intend to build our capabilities further across an exciting range of interdisciplinary themes. [Bioengineering, Bioprocessing and Materials Science; Computer Engineering, Embedded Systems and Wireless Communications; Mathematical Sciences; Mathematics and Computational Modelling of Complex Systems; Sustainable Energy, Resources and Development; Physics and Imaging Sciences] [2572-019 (2006) : 67]

2009

1. The School is research driven and is already achieving international acclaim in the five research themes (Comparative Medicine, Reproductive Biology, Population Health, Infection and Immunity and Veterinary Education). [2689-026 (2009) : 57]

2. A team of three Research Fellows will supervise and undertake research in the Centre’s core themes of strategic risk appraisal, risk and evidence, and organisational risk management. [2689-029 (2009) : 58]

3. Climate System and Biodiversity Theme Leaders [2694-036 (2009) : 66]

5. on the implementation of our Science Themes. [2694-036 (2009) : 66]
6. With excellent leadership and people skills and the ability to facilitate and negotiate, you will work with other Theme Leaders and the NERC Executive ensuring cohesion and the delivery of all NERC strategic targets. [2694-036 (2009) : 66]

7. Also, we are happy for our Theme Leaders to base themselves at a location of their choice. [2694-036 (2009) : 66]

8. An initial £30 million of existing funds will be spent on new appointments, infrastructure and studentships in five groundbreaking interdisciplinary research themes. [2694-042 (2009) : 69]

10. Three major sub-themes provide the focus for investment, namely nanoscale materials, structured metamaterials and photonic materials. [2694-042 (2009) : 69]

11. Under the overall leadership of Professor David Wright in Engineering and Professor Bill Barnes in Physics, the Functional Materials theme encompasses much of the work of a community of 24 permanent academics and over 70 Physics and Engineering researchers. [2694-042 (2009) : 69]

13. Appointments will be made to the posts of Lecturer/Research Fellow. Engineering (Ref 1947) and Lecturer, Physics (Ref 1946) and Associate Professor (Ref 1945) or Chair in Graphene or Electromagnetic Materials (see sub theme below), Physics (Ref 1969). [2694-042 (2009) : 69]

14. We seek to appoint outstanding Research Professors in Radiology, Imaging Physics, Molecular Imaging and Image Analysis to augment the established strengths in these themes. [2694-046 (2009) : 71]

15. The first year of graduate study will be undertaken in at least two different laboratories in one of the research themes listed below. [2702-056 (2009) : 70]

16. Research themes • Cardiac development, cardiac imaging and stem cells • Cardiovascular epidemiology, genetics and gene transfer • Cardiovascular signaling, vascular inflammation and pharmacology • Integrated Physiology and systems biology • Myocardial biology and myocardial disease [2702-056 (2009) : 70]

17. Further information regarding research themes and supervisors, together with application details and residency requirements, is available on: [2702-056 (2009) : 70]

18. Application letters, with full CV and details of two academic referees, together with your choice of one research theme or two potential supervisors, are to be emailed to […] [2702-056 (2009) : 70]

19. The primary theme of Space School 2009 is again Space Exploration, covering current and planned missions to the Moon and Planets, and reviewing the latest results on extra-solar planets, gamma ray bursts and black holes. [2702-058 (2009) : 70]

20. Jeffrey Schloss is distinguished professor and chair of biology at Westmont College. He is the co-editor of several books on evolutionary themes, including the Believing Primate: Scientific, Philosophical, and Theological Perspectives on the Origin of Religion (with Michael Murray). [2706-001 (2009) : 2]

21. International Crops Research Institute for the Semi-Arid Tropics (ICRISAT) seeks a dynamic and experienced person to be the Principal Scientist / Global Theme Leader-Agro-Ecosystems, to be based at its Head Quarters near Hyderabad, Andhra Pradesh, India. [2706-016 (2009) : 53]
As part of this we are looking for someone to develop a research theme that couples the acquisition of real time, web-based information on emerging innovations (technology, financial) to risk identification and management. [2715-028 (2009) : 61]
1. The scientific **themes** of the Programmes are as follows: [Integrated Approaches to Healthy Ageing; Genetic & Environmental Interactions in Health] [1989-034 (1995) : 67]

2. Outline proposals for research grants are sought from all areas of bioinformatics, under the **following themes**: • Analysis of sequences and genomes • Biomolecular structure prediction and modelling • Novel approaches to the storage, integration and exploitation of evolving biological data collections • Novel applications of systems engineering techniques to biological problems. [2006-065 (1995) : 79]

### 2005

1. Major research **themes** being pursued are astronomy, condensed matter and materials physics, nuclear and plasma physics, elementary particles and photonics. [2485-017 (2005) : 61]

2. ACES is now offering up to 8 funded studentships across the three ACES research **themes** of Environmental Degradation and Ecosystem Restoration, Sustaining Biodiversity and Livelihoods, and Catchment and Coastal Studies. [2493-059 (2005) : 73]

### 2006

1. Individuals with relevant experience in any of the main SERG research **themes** (biodiversity/ecosystem function relationships in coastal environments, ecophysiology of microphytobenthos, bio-dynamics of sediments) will be considered. [2554-079 (2006) : 87]

2. Research **Theme** on Atmosphere, Oceans and Climate [2558-005 (2006) : 60-61]

3. We fund research prioritised by consumers, which falls under the three **themes** of cause, cure and care through the Quality Research in Dementia (QRD) funding programme. [2558-006 (2006) : 62]

4. As part of the Department's strategic development of its three research **themes**, Nanotechnology & Materials, Miniaturizing Chemistry and Molecules for Health, we are recruiting three talented academics seeking a good first post in which to build their independent research. [2563-065 (2006) : 72]

5. We now intend to build our capabilities further across an exciting range of interdisciplinary **themes**. [Bioengineering, Bioprocessing and Materials Science; Computer Engineering, Embedded Systems and Wireless Communications; Mathematical Sciences; Mathematics and Computational Modelling of Complex Systems; Sustainable Energy, Resources and Development; Physics and Imaging Sciences] [2572-019 (2006) : 67]

### 2009

1. The School is research driven and is already achieving international acclaim in the five research **themes** (Comparative Medicine, Reproductive Biology, Population Health, Infection and Immunity and Veterinary Education). [2689-026 (2009) : 57]

2. A team of three Research Fellows will supervise and undertake research in the Centre’s core **themes** of strategic risk appraisal, risk and evidence, and organisational risk management. [2689-029 (2009) : 58]
3. Three major sub-themes provide the focus for investment, namely nanoscale materials, structured metamaterials and photonic materials. [2694-042 (2009) : 69]

4. Research themes • Cardiac development, cardiac imaging and stem cells • Cardiovascular epidemiology, genetics and gene transfer • Cardiovascular signaling, vascular inflammation and pharmacology • Integrated Physiology and systems biology • Myocardial biology and myocardial disease [2702-056 (2009) : 70]

5. Jeffrey Schloss is distinguished professor and chair of biology at Westmont College. He is the co-editor of several books on evolutionary themes, including the Believing Primate: Scientific, Philosophical, and Theological Perspectives on the Origin of Religion (with Michael Murray). [2706-001 (2009) : 2]

6. As part of this we are looking for someone to develop a research theme that couples the acquisition of real time, web-based information on emerging innovations (technology, financial) to risk identification and management. [2715-028 (2009) : 61]

Annexe 9-5-4 Occurrences de THEME dans BNC

Les occurrences en rouge renvoient au discours des ressources humaines

Here is a random selection of 50 solutions from the 3814 found.

A04 665 This sort of listing is worth knowing by a reader, who may occasionally notice that it underlies the degree of attention being paid to a theme by a critic.

A07 441 It is based on the theme of protestant liberty, which is consciously contrasted with catholic authoritarianism.

A1B 1450 The poem itself he found ‘a pompous parade of erudition’, and he decided that ‘were it not for the Laforgue mechanism, Mr Eliot s poetic variations on the theme of a super-refined futility would be increasingly thin and incredibly second rate’(The Freeman , 17 January 1923).

ABF 684 Los Angeles took the census as its theme for its float in the Rose Bowl Parade.

ACP 2072 Perhaps the most paranoid variation on this theme comes from William Milton Cooper, who suggests in his pamphlet The Secret Government that J.F. Kennedy was in fact killed because he was about to blow the gaff on the alien conspiracy.

AHG 651 It is also a pleasure for a nation of country lovers to escape from what is in danger of becoming a land of theme parks and golf courses, to a place in which the earth is actually used for growing things and where the workers haven't been reduced to the statutory rustic who sits in the corner of the saloon bar entertaining the merchant bankers.

AJ9 670 Stewart, a 35-year-old architect who also runs a firm manufacturing tartan fabrics and ceramics, is no get-rich-quick developer looking to convert the castle into a Highland theme park.

APV 1125 Refinements to this basic theme centre on additional intermediate and final rinses and the circulation of disinfectants or the inclusion of a hot water disinfection cycle.

ARD 131 Although it may blunt some of the sharpness of the terms, we might map their literary specificity against terms traditional to film and television analysis such as ‘style’ (or ‘mise-en-scene’), ‘narrative structure’, and theme.

B7H 630 On the other hand, as Pasteur so wisely pointed out over 100 years ago ‘fortune favours the prepared mind’, and so we thought that a theme based on understanding the science rather than say on product development ought to tip the balance of probabilities in favour of the unexpected innovation we are looking for.

BMC 788 Glebov's Fifth Symphony opens with an introduction featuring a solo tuba, low in its register, winding a motto theme over the distant rumbling of a bass drum.

BPF 158 From Stephen Haudé, it uses gift boxes from Tiffany's of New York as its theme.

C88 1241 WRITERS on our Doorstep is the theme of a lecture to be given on Friday to the Petersfield and District Literary Society.

C8B 435 One battle the CPRE is fighting concerns a planning application for a theme park in the historic grounds of Woburn Abbey, Bedfordshire, even though the grounds are within an ‘Area of Great Landscape Value’, as designated by the local county council.
CBC 1411 It will have a golf course, theme park, entertainment, swimming pools, waterfalls, nature trails and its own steam train service to Rapid City.

CFE 1185 The dilemma for the formal carer is further compounded by a variation on the old theme — ‘who is my client?’.

CH1 3853 authorities in Moscow plan a showpiece funeral for the family — and even a ‘theme park’ on the site where they were dug up to commemorate the atrocity.

CH6 4635 A LUXURY £12 million hotel with a TV theme is to open just a stone's throw from Coronation Street.

CHB 1590 Akerman's throwaway pseudo-feminist conclusion strains for a progression missing from the drama — Julie attaining adulthood — although it might be an interesting bid to reverse the casual sexism of Truffaut's Jules Et Jim , similar in theme, 30 years ago.

CKY 2175 Sculptors' drawings — by Eberhard Bosslet, Robin Collyer, Donald Judd, Bernard Lallemand, Sol LeWitt and Wolfgang Luy — is the chosen theme of Gilles Peyroulet, until the 19th, whereas, at the Monde de l'art, until the end of the year, Mikhail Chemiakin is exhibiting his larger-scale works and Gustavo Vejarano his ‘mandalas’.

CL0 1205 I can recommend Houses and Buildings as an excellent instructional resource book to those already interested in this theme and as a tempting introduction to a new subject area to those who are not.

CLH 1257 This is a particular theme followed up by Conrad (1980).

CLP 406 Again, because of the elusive if all-pervading nature of the theme, it is difficult to formalise into legislation on humanising work as several European countries have discovered by experience.

CN9 1099 In particular, it added yet another chapter of disapprobation on the theme of the narrow intelligence and heavy hand of the Treasury within the government machine [Barnett, 1982].

CLU 824 The Old Stager was on to a theme which he had clearly been bottling up all season.

EB9 6 The theme of the ‘95 congress will be Communication for Human Dignity.

EBT 1826 Far from it, for he has matched his chosen designs to the theme of the growth of professionalism in architecture from the formation of the Architects' Club in 1791 to the founding of the Institute of British Architects in 1837; and more than this, for just as architects strove for recognition in a professional world being transformed by the Industrial Revolution and new sciences, so does Worsley show us how this new breed of architect acquired technical proficiencies: in the presentation of drawings, in methods of copying and reproduction, in colour coding, and in advanced modes of perspective.

EBU 2253 So how do the fair's organisers' choose a theme and what do the dealers think of it?

ED7 1854 I have to return to the theme of Catholicism in Enya's music, because the spiritual impact is simply unavoidable.

EDG 190 ‘I couldn't find a mirror I liked or that was even the right size, so I decided to have one handmade that would incorporate the colours and the theme of the living room,’ said Geoff.

EV3 988 The committee shared these sentiments and adopted as the major focus for its library proposal the theme "The Challenge of Change" .
The old, old fashion — Death!(4) Oh thank GOD, all who see it, for that older fashion yet, of immortality!(5) And look upon us, angels of young children, with regards not quite estranged, when the swift river bears us to the ocean!(6) At such points Dickens has a way of enlarging his theme beyond the narrative pretext, addressing his readers directly as sharers of a common human lot with himself and his characters.

Poetry's ability to cast things in a kind of temporary order, to defy the destabilising effects of time, if only for a moment, will be a recurrent theme of this chapter.

The Labour government sought from the start to construct and hold together a support bloc around the theme of a 'social contract', and I propose to organise my account of the development of political forces in this period around that same theme.

Here, the tone unit coincides with the clause as a grammatical unit, theme coincides with given, and rheme coincides with new.

Note that this approach tends, by and large, to equate theme with given (context-dependent) and rheme with new (context-independent) elements.

Beverly Anderson took up the theme of new media.

His address was on the theme of "What to read — when to read — how to read."

Isaiah 61: takes up this theme, and the prophet cries:

The political theme was raised in many different ways.

Somehow we then got on to the theme of French poetry, and Eliot expressed surprise at one of Herbert Read's recent pronouncements on Laforgue and another nineteenth-century poet I cannot recall and about whom at the time I knew too little to be able to arrive at an opinion.

He's a classically trained tenor and concert entertainer — and even performs Pav's World Cup theme Nessun Dorma.

Particular events: topics within this theme focus on a selected event taking a developmental and interdisciplinary perspective.

For a change of theme here's a crossword compiled by Gainsborough.

Indeed it is my theme that Utopian "dreams" still have a valuable role to play by bringing the potentials of scientific and technological change into the arena of social and political action.

The annual summer event, held in Castle Park, normally takes on a Victorian theme but organisers decided to change it to coincide with July 4.

Drinking and drunkenness are a familiar theme of his bilingual stand-up comedy acts, and have made him a cult-figure among Gaelic-speaking lounge-bar audiences in the Western Isles.

The ongoing vigorous policy of offering paddock admission (£7 per head) at £10 per couple and Club enclosure facilities (£12 individually, but £20 for couples), plus various theme days and a draw for a gallon of whisky at each fixture, will help to continue the success story.
Here is a random selection of 50 solutions from the 1612 found.

**A04** 535 Among recent successes is the notable pelican series, whose titles are varied between civilisations (say, Japan), countries (say, France, 1500 — 1700), and international themes (Ars Sacra, about medieval Christendom).

**A66** 456 Underlying these themes was the belief that the problems of the British system were being thrown into stark relief by the endless economic difficulties of the 1970s.

**A6S** 595 Capital refers again and again to the themes of Formen.

**AA2** 177 Social themes are not of major importance in the first part of the exhibition.

**ABH** 480 And everywhere there are to be seminars on Mozartian themes and exhibitions, the most ambitious in Salzburg and Vienna.

**AJR** 42 Vegetable and fruit growing under polythene covering and the conservation of the environment and energy are two of the show’s dominant themes.

**AJV** 564 The brave idea of starting the concert with Luciano Berio’s Sequenza VI for solo viola (Paul Silverthorne) alerted us to the fact that, in orchestral concerts, we have become accustomed to concert ‘themes’ and the overture/concerto/symphony format.

**AMM** 593 The changes that they underwent are an infinite set of variations on a relatively limited number of themes.

**AN1** 206 From 1837–1843, as far as in known, all Hahnemann’s administration of remedies was done in liquid form using variations on the above themes.

**B28** 1487 More specifically, Cornall noted; ‘cross-curricular themes may be all right but they cannot adequately be taught through foundation subjects.

**B28** 1623 Cross-curricular themes were welcomed by Cornall, Lawton and Hewlett, but we were sceptical.

**B3C** 2162 The conflict in Ireland is the most important of the case studies, and some of the broader themes have been selected to provide a wider perspective on this issue.

**BPE** 264 Basic instinct almost goes a little too far, too many tabloid themes in two hours detracts from each of them.

**BPE** 280 Although the costumes are laughable, the themes are not.

**CJN** 248 The Latin American Institute for Communication Education (ILPEC), based in Costa Rica, has published a series of six books on Christian themes for use by churches, non-government organisations and community groups throughout Central America.

**CLL** 659 The themes covered in Advance with English have been chosen for their appeal to young learners who are becoming aware of the world around them.

**CR5** 857 Themes of decision-making, personal choice, respect, importance of support, knowledge about sexual intercourse and safer sex practices, parental anxiety, and independence run through the story in ways which are sensitive to the experiences and needs of its intended audience.
I learn to listen, look and find themes, not instant pictures.

A long introductory essay discusses his themes in a chronological development and is followed by a catalogue of 455 works, with major projects and cycles, such as the Burghclere Chapel, ‘Shipbuilding on the Clyde’ or the Port Glasgow Resurrection series being treated in single entries.

‘All the great themes have been used up and turned into theme parks,’ he bitterly complains.

Moreover, the cross-curricular Working Party which is looking at a variety of themes including Economic Awareness, will also make demands on the support of the local business community.

Themes very closely related to the idea of ‘locality’ have been employed to bring us up to an account of region.

After much talk of shape, height, floor space, safety, capacity, shipping, assembly, colours, themes and aesthetics we had a forest of drawings — and then a first prototype.

More use of open ended case studies is made from the second year onwards and the subjects have been unified under broad themes rather than treated as separate subjects.

Moseley cites two definitions of physical accessibility which have strong common themes; ‘the ease with which people can reach distant but necessary services…’

The Rodier group's heritage is in wool, so knitwear is strong all year round, often acting as the linking garments between two colour themes.

The songs contain up to eight themes, each one consisting of repeated phrases.

For this reason, predicated and identifying themes tend to be more common in written than in spoken English.

Predicated and identifying themes must be handled carefully in translation because they are far more marked in languages with relatively free word order, such as German, than they are in English.

Predicated themes are more marked in Brazilian Portuguese than they are in English:

The themes identified in the chapter are also likely to be re-worked as poverty research engages with feminist debates about diversity and difference.

Discussions are taking place on a number of other issues, for example, to ensure that these themes are co-ordinated and promoted more strongly, and to investigate the funding of short-term feasibility studies involving applicants from both IT and engineering departments.

Love, warmth, the earth as mother of us all and the inevitable return to the womb are the themes he reiterates, albeit through the familiar, bloated imagery of fat parasites, suicide, blood and pain.

Do you collect stamps which follow particular themes or areas, or do you collect all sorts of subjects?

Among more specific causes Tilly mentions the growth of cities, trade, merchants and manufacturers, and observes that ‘Later on a powerful reciprocal relationship between the expansion of capitalism and the growth of state power developed’; a relationship which was noted earlier by Max
Weber (see p. 88) and is one of the principal themes in Fernand Braudel's (1972) study of Europe in the sixteenth century.

1501 Since the three theories are rather different, it may be helpful to bring out here two common themes.

The necessity of job retention in healthy profitable industries such as banking and criticism of the failure to deliver on promises made a year ago of ‘several hundred new jobs’ were strong themes at the second Biennial Delegate Conference of the Association held in the Burlington Hotel on Saturday, 24th April 1993.

Since the three theories are rather different, it may be helpful to bring out here two common themes.

The second section is a survey of the work attitudes and work histories of 1,000 people, focusing on the themes of occupational change, technical change, attitudes toward features of the local labour market, and the relationship between household activities, labour market strategies and leisure patterns.

For the Nov. 16 poll against Democrat Edwin Edwards, Duke's campaign emphasized the themes that had promoted his rapid political rise: opposition to affirmative action, to high taxes, to crime, and to a welfare system which, he said, encouraged mothers to have more babies just to increase their benefits.

In order to provide sufficient information on the three principal themes, data on around 200 individual environmental variables are in process of collection and recording.

One of the main themes of the first two acts is the conflict between Mycetes and his brother, Cosroe.

Preparations for the completion of the single market and discussions about economic and political union have been particularly prominent themes during the year.

How many themes do we select?

Although he welcomed many of the central themes in the Government White Paper, Choice and Diversity, he had reservations about the way the status of teachers was being undermined.

They still abound in virile superheroes and violent themes, with women, when they appear, relegated to seductive and helpless stereotypes.

So I go on the same as er, weeks two to four an analysis written, and, or drawn or made of examples on one of these themes.

This fiction has various names: ‘private eye fiction’, ‘hardboiled fiction’ which is a way of describing its style, and erm I have been interested in this for some time, partly trying to assess the reasons why such fiction occurred in America as a complete breakaway from the old kind of detective fiction which we all know about, the country house murder, why erm the figure of the private detective becomes so important in this kind of fiction between the wars, and what the relationship of this sort of fiction is to not merely other kinds of American fiction during that period but to more abiding American themes, particularly erm themes of individualism and toughness.
Annexe 9-5-5 Réponse de Termium Plus THEME
Objet : RE: Terme “theme” dans Termium Plus
De : Kim Boumansour (Kim.Boumansour@tpsgc-pwgsc.gc.ca)
À : mirceaut@yahoo.com;
Cc : Amelie.Bazin@tpsgc-pwgsc.gc.ca;
Date : Jeudi 7 août 2014 16h58

Bon jour,

Effectivement, il n’existe pas de fiche couvrant la notion de « thématique de recherche » dans notre base de données. L’équivalent anglais de « thématique de recherche » serait « research themes », puisque « thématique » désigne un ensemble ou un système organisé de thèmes. Pour ce qui est de « theme », nous ne pourrions l’inscrire sur cette fiche comme synonyme, puisqu’il s’agit de la forme elliptique. Le sens du mot « theme » est sous-entendu dans un texte où il est clairement question de thèmes de recherche ou d’étude.

Par ailleurs, nous avons apporté des modifications à la fiche générale « thématique » (« themes » et « thematic » en anglais). Elle sera diffusée publiquement dans Termium sous peu.

Nous vous remercions d’avoir pris le temps de nous signaler cette lacune. N’hésitez pas à communiquer avec nous à nouveau si vous avez des questions ou des commentaires.

Cordialement,

Kim Boumansour

1. However, the scientific discipline of the successful applicant is relatively unimportant, provided he has demonstrated his ability in his chosen field and has an appreciation of work in other areas. [733-019 (1971) : 40]

2. This is a complex area of study which offers scope for originality of approach. [733-047 (1971) : 43]

3. Vacancies exist for qualified staff in the fields of glass technology, glass science and furnace technology. Applications are invited from qualified scientists or engineers with at least two to three years’ experience in the above areas. [737-006 (1971) : 277]

4. As a prerequisite to the thesis, students will: […] Develop particular expertise in a chosen special area of management. [737-045 (1971) : 281]

5. Postgraduate work in an area related to management or relevant managerial experience is desirable. [737-045 (1971) : 281]

6. Research interests in the area of applications orientated Stochastic Processes or Multivariate Analysis an advantage. [745-002 (1971) : 57]

7. It is expected that candidates will have experience in academic or commercial research, probably in one or more of the following areas: advertising or communications research, programmed learning, sociology, psychology or statistics. [745-027 (1971) : 59]

8. Scientific Assistants are required in the following areas: Biometrics, Plant Physiology, Analytical Chemistry [745-041 (1971) : 60]

9. Applicants should have a research interest in one or more of the following areas: Far Infra-red or millimetre wave techniques, Digital Systems, Control Systems, Communications, Radio Astronomy, Solid State Electronics, Space Research, Experimental Relativity. [745-045 (1971) : 61]

10. Applicants should state for which vacancy they are applying and in which of the above areas of work they are experienced. [745-059 (1971) : 62]

11. Research interests should be in one of the following areas: Power Electronics, Digital Systems and Instrumentation, Lasers. [750-025 (1971) : 356]

12. Research Areas Fellows will be generally expected to work on some aspect or other of existing and planned Scientific Centre projects. [754-009 (1971) : 598]

13. Excellent research facilities are available in all areas of modern Chemical Science, ranging from Bio-Organic Chemistry to Chemical Physics. [754-056 (1971) : 603]

14. Preference will be given to candidates with clear ability in teaching, and capable of developing active research interests related to industrial inorganic chemistry in areas other than transition metal chemistry. [758-011 (1971) : 51]

15. Areas of work will include the development of undergraduate and postgraduate courses and of an extensive research programme. [758-039 (1971) : 53]
16. The Fellow will participate in the research activities of the School in areas of automatic control, noise and vibration or fatigue, for which excellent facilities are available. [758-064 (1971) : 54]

17. Appropriate post-graduate experience in one of these areas is desirable, and a higher degree is advantageous. [758-064 (1971) : 54]

18. Areas of interest include ecosystem and population dynamics, ecological energetics, and nutrient cycling. [772-014 (1971) : 53]

19. Excellent research facilities are available in all areas of modern Chemical Science, ranging from Bio-Organic Chemistry to Chemical Physics. [772-015 (1971) : 54]

20. The work will relate to such areas as aviation, man-computer interaction, and the design and organisation of automation systems. [772-023 (1971) : 54]

21. Previous experience in this area is desirable but not essential since we are seeking an experimentalist whose interests would not be limited to this field. [772-060 (1971) : 59]

22. Lectures will cover the analysis of numerical methods, differential equation theory and a choice of application areas. [772-082 (1971) : 62]

23. Excellent research facilities are available in all areas of modern Chemical Science, ranging from Bio-Organic Chemistry to Chemical Physics. [774-003 (1971) : 188]

24. The Institute of Sound and Vibration Research has several three to five year vacancies for qualified Engineers, Physicists and Mathematicians to conduct fundamental research in the areas of turbulence, aerodynamic noise, optical flow measurement and silencers for internal combustion engines. [774-020 (1971) : 189]

25. Areas of interest include ecosystem and population dynamics, ecological energetics, and nutrient cycling. [774-037 (1971) : 191]

26. The successful applicant will be expected to initiate and supervise research and conduct classes in the general area of his speciality as well as assisting in the general teaching programme of the Department. [774-041 (1971) : 191]

27. Excellent research facilities are available in all areas of modern Chemical Science, ranging from Bio-Organic Chemistry to Chemical Physics. [776-021 (1971) : 288]

1995

1. Experience in the following areas would be advantageous: basic molecular biology, bacterial and plant cell gene expression studies, phage antibody library screening, phage isolation and propagation. [1959-006 (1995) : 46]

2. 3-year Temporary Lectureship in Astrophysics to be held in the Astrophysics Group, in the areas of cosmology and extragalactic astrophysics. [1959-016 (1995) : 48]

3. As a result of a new focus within our Group research programme we are seeking two experienced research scientists with specialist expertise in the areas of Bioceramics and Biomechanics. [1959-017 (1995) : 49]
4. Applicants are likely to have a first degree in Materials Science or Biological Sciences, and 4-6 years research experience in areas relevant to our core business interests, including biomaterials and the application of ceramics within the healthcare industry. [1959-017 (1995) : 49]

5. An EPSRC studentship is available, tenable immediately, for a project in experimental condensed matter physics, with amorphous materials or thin films being the favoured research areas. [1959-024 (1995) : 50]

6. The research, which is aimed at improving treatment of cancer with radiation by reducing its adverse effects on healthy normal tissues, will be directed in the following areas: molecular and cellular mechanisms of radiation injury to the central nervous system; effects of radiation on the skin with specific reference to the problems of reconstructive surgery; effects of essential fatty acids in modulating radiation injury to normal tissues and their effects on wound healing. [1959-039 (1995) : 54]

7. You will have specific responsibility in the areas of chemical literature and biomedical information. [1959-040 (1995) : 55]

8. Applicants should have research interests in an area of mathematics or statistics which makes significant use of computation, and have practical experience in the running of computer systems. [1959-050 (1995) : 57]

9. The University positively welcomes applications from women, people from ethnic minorities and disabled people who are currently under-represented in this area. [1959-064 (1995) : 60]

11. The appointee will be expected to conduct research in areas of their choice. [1959-077 (1995) : 64]

12. Two vacancies exist in the following areas. Thermophysical properties; Adhesives [1959-085 (1995) : 65]

13. The University positively welcomes applications from women, people from ethnic minorities and disabled people who are currently under-represented in this area. [1959-092 (1995) : 67]

14. The Department, graded 4 in the last UFC research selectivity exercise, has particular research strengths in the areas of protein crystallography, molecular graphics and modelling, time-resolved spectroscopy and transient intermediates, biomolecular spectroscopy, supported reagents, reaction mechanisms and synthetic organic chemistry, as well as aspects of analytical, surface, and materials chemistry. [1963-001 (1995) : 50]

15. The Department seeks to build on its existing strengths in physical chemistry and the appointment is open to all areas within this field. [1963-001 (1995) : 50]

16. A Ph.D. with at least 5 years’ original research experience including at least 3 years’ spent in in vivo Pharmacology, preferably in respiratory or inflammation research, you will have the ambition and commitment to innovate in new areas. [1963-012 (1995) : 53]

17. You will need to acquire and maintain a significant and up to date knowledge of the various therapeutic areas in which you will work. [1963-020 (1995) : 55]

18. Enquiries, by 27 February, stating area of interest, should be made to [1963-024 (1995) : 56]
19. Applications are invited for three-year research studentships in the following areas, tenable from October 1995 in the Department of Biology, part of the modern, well-equipped, Research School of Biological Sciences: Biochemistry and molecular biology of defence responses in higher plants. Physiology and molecular biology of membrane transport in plants, especially of calcium, sugars and growth regulators. Molecular and cellular mechanisms controlling epithelial differentiation in the mouse preimplantation embryo. Characterisation of genes controlling the growth of sensory neurons in Drosophila melanogaster. Species diversity, taxonomy and computer-assisted identification of invertebrates used as indicators of soil biodiversity. Experimental and modelling studies of grassland plant competition. [1963-028 (1995) : 57]

20. The Department operates a 14UD tandem accelerator and has an active program of AMS research in a number of different areas including hydrology, exposure-age dating and biomedicine. [1963-032 (1995) : 57]

22. To qualify you must have a good first degree in an area of earth science, including a significant computing element. [1963-039 (1995) : 59]

23. All six Research Councils, and all their research areas, come within the scope of the new scheme. [1963-047 (1995) : 61]

24. Outline proposals for research grants are sought from all areas of bioinformatics, [1963-055 (1995) : 63]

25. especially in the following general areas: • Analysis of sequences and genomes • Biomolecular structure prediction and modelling • Novel approaches to the storage, integration and exploitation of evolving biological data collections • Novel applications of systems engineering techniques to biological problems [1963-055 (1995) : 63]

26. The Epilepsy Research Foundation invites applications for Research Grant(s) preferably in the areas of genetics or neurotransmitters to a maximum of £50,000. [1963-061 (1995) : 64]

27. We now have a vacancy for a graduate, with experience in the field of scientific and technological information, to be responsible for the management of the library and to contribute to our search activities, particularly in the techno-commercial and business areas. [1963-071 (1995) : 66]

28. You should have a Ph.D. with a sound track record of research and at least three years’ post-doctoral experience in one of the following areas: biochemistry, molecular biology, molecular genetics, cell biology or developmental biology. [1963-075 (1995) : 67]

29. Applicants should have a postgraduate qualification, a substantial research portfolio (preferably related to food choice behaviour and its nutritional consequences) and teaching experience in the area of human nutrition and food. [1963-087 (1995) : 70]

30. Candidates should be qualified to at least first degree level in a relevant subject area. [1963-088 (1995) : 71]

31. Applications are invited from well qualified candidates for Ph.D., MPhil and MSc degrees in a wide variety of topics within the above subject areas. [1963-092 (1995) : 72]

32. University and Research Council Studentships are available in many areas. [1963-092 (1995) : 72]
33. Applications are invited for Ph.D. studentships associated with each of the listed projects, and other projects in the area of molecular biology, cell biology and population biology, to start in October 1995. [1963-092 (1995) : 72]

34. Applications are invited for Research Council and industry-sponsored research grants in support of Ph.D. degrees in the following areas: atmospheric chemistry, bioinorganic chemistry, colloid chemistry, molecular spectroscopy, organometallic chemistry, physical aspects of interfacial chemistry, synthetic inorganic chemistry, synthetic and physical chemical aspects of materials, synthetic medicinal chemistry, theoretical chemistry [1963-092 (1995) : 72]

37. The final six months is devoted to a full time research project - examples of research areas are shown under Ph.D. Research Projects. [1963-100 (1995) : 74]

38. Working in the areas of product design and manufacturing process development, using chemical analytical methods, you will either be a new/recently qualified graduate in a relevant chemistry or applied chemistry discipline, or alternatively have a HND, backed by practical experience in a related environment, such as analytical chemistry, surfactant, colloids, surface engineering, adhesives or coating technology. [1967-003 (1995) : 61]

39. Janssen-Cilag Ltd, one of the UK's fastest growing pharmaceutical companies, is an innovative research-based organisation with products covering a wide and expanding range of therapeutic areas. [1967-004 (1995) : 62]

40. Join us and you will be working as part of a highly professional team in a particularly interesting and challenging area of the industry. [1967-004 (1995) : 62]

41. The Institute of Food Research has been successful in winning MAFF support for new projects in several scientific areas. [1967-007 (1995) : 64]
42. A career with Innovex can offer you: Experience in working within a variety of therapy areas. [1967-013 (1995) : 67]

43. Huge expansion of business in the area of surface analysis means we are looking for a high calibre science graduate to work alongside the Product Manager. [1967-015 (1995) : 67]

44. CHEMIST: a Technical Officer is required to manage the accreditation process for laboratories in the chemical area. [1967-016 (1995) : 68]

47. An ability to address demanding interdisciplinary challenges is essential, and previous experience in one or more of the areas of biophysical chemistry, experimental surface science and physical organic chemistry would be advantageous. [1967-045 (1995) : 76]

48. Applicants should have achieved research excellence by scientific publications in any area of the above subjects. [1967-051 (1995) : 77]

49. The appointees will join strong research groups in these areas. [1967-051 (1995) : 77]

50. rationalisation of the Research Council's support in this key area by maximising collaboration and interdisciplinarity between the relevant research communities within a co-ordinated programme environment, leading to increased effectiveness and value for research funding; [1967-052 (1995) : 78]

51. For this, the first call from the Programme, outline proposals are invited from the academic community covering the entire area of Combustion. [1967-052 (1995) : 78]

52. If you are competent in Visual Basic, C++ or C, have a basic understanding of electronics and computer interfacing and feel you could make a strong contribution in any or all of the following areas please contact us. [1967-066 (1995) : 81]

54. The Public Health Laboratory Service is a unique resource working closely with the NHS in the vital areas of diagnosing and preventing infection and communicable diseases. [1967-089 (1995) : 86]

56. Where more than one project in any area is eventually selected for funding, successful contractors may be asked to modify their proposals if it appears to the Department that collaborative research will yield better value for money than projects conducted in isolation. [1967-093 (1995) : 87]
57. You should have a Ph.D. in a relevant area and preferably experience in molecular genetics. [1967-097 (1995) : 88]

58. Candidates should possess (or attain soon) a good university degree in Physiology or related area. [1967-100 (1995) : 89]

59. The Lecturers will be expected to develop their own research programmes; while the areas of research are open, programmes which make links with existing research projects within the Department would be particularly welcomed. [1967-104 (1995) : 89]

60. A number of applied research scientists and engineers are required by the Radio Communications Research Unit in the following areas: Development of numerical models and prediction methods for the scatter and diffraction of millimetre waves by buildings and vegetation. Scientific analysis of experimental data and development of prediction methods associated with studies of millimetre wave propagation. Investigation of tropospheric radiowave propagation on transhorizon paths involving the development, commissioning and operation of an experimental system operating at several frequencies in the microwave millimetre wave part of the spectrum. [1971-003 (1995) : 55]

61. Applicants should indicate their preferred areas. [1971-003 (1995) : 55]

62. The three areas involve collaboration with other groups in the UK and abroad. [1971-003 (1995) : 55]

63. If you have a strong desire to succeed and a flexible approach to your work - If you seek variety of experience with different companies, in different therapeutic areas and in all four phases of research - We can offer you: [1971-004 (1995) : 56]

64. We have pioneered the development of Visual Computing for technical, scientific and creative professionals in every area of industry and commerce. [1971-014 (1995) : 60-61]

65. You will have an excellent understanding of the software in Chemical or BioSciences marketplace, and an interest in emerging computer technologies and their application into your area of expertise. [1971-014 (1995) : 60-61]

66. Major areas of departmental research include: • Imaging Systems and Neural Computing • Parallel and Fault Tolerant Computer Systems • Radio, Microwaves, mm waves and Optoelectronics • Mobile, Personal and Satellite Communications • Electromagnetic Compatibility • Numerical Electromagnetics • Archaeological Remote Sensing • Robust Control Theory and Applications • Speech and Music Technology • Device Modelling, Fabrication, Characterisation and Micromachining [1971-020 (1995) : 62]

67. These positions provide a unique opportunity to work with various aspects of drug registration and to gain experience in these areas at a time of major change and implementation of the European single market in pharmaceuticals. [1971-026 (1995) : 64]

68. IN RETURN WE CAN OFFER: unparalled experience in challenging areas of drug regulation; [1971-026 (1995) : 64]

69. Current research areas include: Protein engineering; Plant cell wall biology; Gene targeting; DNA methylation and gene silencing; Light-regulated gene expression; Gene function analysis in vivo; Sex determination in plants; Transgenic crop resistance; Molecular farming. [1971-030 (1995) : 65]

70. Candidates must have (or expect to attain) a good honours degree in a suitable subject area. [1971-030 (1995) : 65]
71. There is also a quota studentship which is available in one of the following study areas: [Biomechanics; Plant-animal interactions; Biogeography systematics and speciation; Plant nutrition, physiology & ecophysiology; Parasites and Pathogens and Invertebrate neuroendocrinology; Animal development using Caenorhabditis elegans; Sewage, heavy metals, mycorrhizas, and plant growth [1971-030 (1995) : 65]

72. In addition to a commitment in excellence in undergraduate teaching, candidates should be able to demonstrate their ability to conduct and attract funding for high quality research, preferably in an area allied to the present research interests of the School. [1971-033 (1995) : 66]

73. The successful candidate will probably have a Ph.D. or MSc with experience of the design and analysis of pharmacokinetic studies as well as familiarity with the commonly used computer software in this area. [1971-036 (1995) : 67]

74. Applications are sought from candidates with several years' experience in two or more of the following areas: Finite element analysis; Fundamental Physics; Electro Chemistry; Hydrodynamics; Acoustics; Magnetics/electromagnetics [1971-039 (1995) : 68]

75. A Ph.D. in the same area is desirable. [1971-048 (1995) : 70]

76. You will also have the opportunity to develop your statistical knowledge in this interesting area of clinical research. [1971-049 (1995) : 71]

77. The emphasis is on comparative and evolutionary aspects, but the group is active in a number of applied areas, and is part of an interdepartmental Cellular Cardiology Group. [1971-050 (1995) : 72]

78. Ideally applicants should have interests which complement or extend those of the group, but emphasis will be on scientific excellence, and applicants working in other areas will be seriously considered. [1971-050 (1995) : 72]

79. Research Fellow in the general area of sediment dynamics to assist Professor Michael Collins in nearshore and shallow offshore programmes. [1971-052 (1995) : 72]

80. For two of the appointments, preference will be given to applicants who can demonstrate expertise in at least one of these areas. [1971-057 (1995) : 74]

81. Strong applications in other areas that match departmental interests are also welcomed. [1971-057 (1995) : 74]

82. Applicants should have a Ph.D. in Biochemistry or related area. [1971-058 (1995) : 74]

83. We are pleased to announce these two new posts, falling in areas of established research strength within the Department of Electronics, and made possible by a grant award under the EPSRC Integrated Graduate Development Scheme for MSc. courses in Electromagnetic Compatibility and Radio Frequency Communications. [1971-062 (1995) : 75]

84. Persons with experience in the following areas would be of particular interest: Electromagnetic modelling; Electromagnetic metrology; Antenna measurement and design; Simulation of radio communications systems; Personal and mobile communications systems; Radio propagation and spectrum management [1971-062 (1995) : 75]

85. The group is part of The Centre for Plant Membrane Biology in Adelaide and there will be considerable scope for collaboration with other researchers in this area. [1971-072 (1995) : 77]
86. A relevant Ph.D. is preferred, but three years postgraduate research experience in this area may be considered. [1971-077 (1995) : 78]

87. The research will include the overexpression and mutagenesis of genes enclosing bacterial membrane proteins, and experience in the areas of molecular genetics or membrane transport would be an advantage. [1971-089 (1995) : 80]

88. Current research is focused on two main areas: identification of the molecular mechanisms controlling the melanocyte-specific gene expression, differentiation and development; and transcriptional regulation by a novel class of cyclins. [1971-090 (1995) : 80]

89. Applicants should have or expect to obtain a First or Upper Second Class Honours Degree in an appropriate subject area and submit a full CV together with the names of two academic referees. [1971-091 (1995) : 81]

90. There will be a 22 week formal taught course, followed by a research project which will be designed to allow the student to make an original contribution in the chosen area of research. [1971-099 (1995) : 83]

91. The appointee will be committed to excellence in teaching and should have an outstanding and continuing research record in one or more areas related to Computer Engineering and/or Information Systems Engineering. [1976-005 (1995) : 60]

92. You'll be responsible for developing protocols and preparing and monitoring studies in all phases of clinical research and a variety of therapeutic areas. [1976-013 (1995) : 64-65]

93. Your work will cover a variety of therapeutic areas and you will provide statistical support for smaller scale studies within R&D. [1976-013 (1995) : 64-65]

94. They should have research interests in one or more areas of human biology including ecology, genetics and behaviour, should have skills in a variety of contemporary perspectives and be able to participate in a general teaching programme. [1976-014 (1995) : 66]

95. The Department of Immunology at University College London currently has approximately 50 members, spanning many areas of basic and clinical Immunology. [1976-022 (1995) : 68]

96. The areas of research focus on diet and lifestyle in relation to healthy bowels and irritable bowel syndrome. [1976-024 (1995) : 68]

97. Electrical Drives / Communications Electronics: preference will be given to a person with a record of excellence in research in one of these fields and an ability to teach with enthusiasm in the general area of electrical and electronic engineering. [1976-029 (1995) : 70]

98. Preference will be given to candidates who have general expertise in computing, and specialist skills in one of the following areas: Computer vision, speech processing, robotics, neural networks, software engineering and computer communications. [1976-029 (1995) : 70]

99. Ability to teach in other areas such as surveying, soil mechanics, civil engineering fluid mechanics offshore engineering would be an advantage. [1976-029 (1995) : 70]

100. The scholarships provide a maintenance allowance of £5,500 per annum along with payment of tuition fees at the home student rate and will be available for all areas of research in the departments listed below: [1976-032 (1995) : 70]
101. Required to join a large, thriving research department involved in a number of areas of cell and molecular biology with particular interests in neurobiology, muscle biology, atherosclerosis and gene therapy approaches. [1976-033 (1995) : 70]

102. The main areas of work include the development and establishment of biological control systems which form the basis of an integrated pest management program, and the study of the insect pollination of oil palm. [1976-041 (1995) : 72]

103. We are currently collaborating with Professor David Billington; at Aston University, and there is an opportunity for a first class synthetic chemistry graduate to undertake research in this area. [1976-042 (1995) : 73]

105. Successful candidates will be expected to make a substantial contribution to the research activities of the Neural Computing Research Group, in the area of neural computing. [1976-046 (1995) : 74]

106. or a related area concerned with advanced information processing, and to contribute to the teaching activities of the Department. [1976-046 (1995) : 74]

107. Two three year posts are available on a DTI / EPSRC Link programme relating to rapidly developing areas of motion control technology, which is the enabling technology for a new generation of manufacturing systems for the 21st Century. [1976-054 (1995) : 76]

108. Applicants must have an honours degree or equivalent in a chemistry-related subject, a Ph.D. or equivalent with a significant chemical content, research publications and must provide evidence of ability to conduct a high quality, independent experimental research programme in an area of analytical chemistry. [1976-056 (1995) : 76]

109. Candidates will be expected to offer expertise in one or more of the following areas:- atmospheric science and pollution, pure and applied ecology, earth sciences, economic and social development, environmental policy, legislation and management, spatial information technology. [1976-070 (1995) : 80]

110. Applications are invited for Faculty positions/appointments under the Materials Science Programme from candidates who possess a Ph.D. degree or its equivalent in any of the following areas: Electrical and Magnetic Materials; Electronic Materials; Composite Materials; Corrosion and Protection [1976-084 (1995) : 83]

111. The position is for a Condensed Matter/Applied Physicist with experience in either theory or experiment in the areas of compound semiconductors, electroactive polymers, superconductivity, non-linear optics, device modelling, X-ray scattering and fast laser spectroscopy. [1976-085 (1995) : 83]

112. Applicants should have a Ph.D. in a relevant area and experience of applying molecular biology techniques. [1976-089 (1995) : 84]
113. BIOCHEMISTS enjoy the enviable position of being able to pick and choose between numerous areas in which their skills and knowledge are in demand. [1980-006 (1995) : 54]

114. Production and quality control are other important areas of employment for biochemists, especially when manufacturing a drug involves several intermediate reactions. [1980-006 (1995) : 54]

115. Food supply is another highly varied area, offering employment at many stages in the chain. [1980-006 (1995) : 54]

116. Master's and diploma courses also give postgraduates an opportunity to specialise in a particular area of biochemistry. [1980-006 (1995) : 54]

117. With 22 offices in 12 countries and £10 million invested in advanced technology, it's not surprising that we're respected for our expertise in such areas as Strategic Programme Design, Data Management and Clinical Research, as well as our ability to deliver results anywhere and everywhere. [1980-008 (1995) : 56]

118. Exceptional communication skills are also necessary as you will be required to discuss and explain technical statistical issues to people not familiar with your specialist area. [1980-009 (1995) : 57]

119. A suitable candidate will have a Ph.D. degree, preferably with postdoctoral experience in the area of NMR spectroscopy. [1980-022 (1995) : 60]

120. The Department of Chemical and Biological Sciences is currently offering a number of research studentships to undertake work in the following areas: Preparation of chiral organic synthons; Use of enzymes in organic asymmetric synthesis; Drug design and synthesis; Chemical and bio-sensors using luminescence for trace analysis; Preparation and application of chiral liquid crystals; Biotechnology; STM studies of self-assembled monolayers; Solid state chemistry [1980-028 (1995) : 62]

121. Wain Fellowships may be awarded (following an interview) in any area of science relevant to the remit of BBSRC. [1980-036 (1995) : 65]

122. Applicants should have a good Honours Degree in Physics, a Ph.D. in a relevant area, a strong commitment to teaching and the potential to carry out independent research. [1980-037 (1995) : 65]

123. Applicants should have experience in one or more of the following areas: transgenic biology, mouse developmental biology, molecular biology. [1980-038 (1995) : 65]

124. The School of Applied Sciences wishes to appoint an enthusiastic environmental scientist to play a major role in the research and teaching in this area. [1980-041 (1995) : 66]

125. The above post is available immediately for a fixed period of 2 years to teach primarily multimedia networking and systems and contribute to the School's research programme in these areas. [1980-046 (1995) : 67]

126. No restriction is placed on the area of inorganic chemistry. [1980-046 (1995) : 67]

127. Scientific Staff in the Remote Sensing Field in the following areas: Remote Sensing Specialists; Agriculturalists, Agronomists and Agrometeorologists; Computer Scientists; Tropical Vegetation Specialists; Ecologists; Theoretical Modellers; Earth Observation Ground Segment Specialists [1980-052 (1995) : 69]

128. A description of the duties and qualifications required for the different positions and compulsory application form must be requested in writing (making reference to the number of the area considered) before 30/6/1995 from: [1980-052 (1995) : 69]
129. It is hoped that applicants will have strong interests in one of these areas and be capable of developing an independent and dynamic research portfolio as rapidly as possible. [1980-055 (1995) : 69]

130. Applicants should have, or expect to obtain, a first or upper second class honours degree in an appropriate area of life sciences. [1980-057 (1995) : 70]

131. Candidates should have, or anticipate obtaining a first or 2(i) degree in an appropriate area of environmental science/ biology. [1980-068 (1995) : 72]

133. The successful applicants will be expected to work on problems in one or more of the following areas: the kinetics of phase ordering, kinetic roughening, spin glasses and glassy phases generally. [1980-075 (1995) : 74]

134. The major research areas are glass polyalkenoate cements, laser application and hard tissue removal, polymeric systems as release devices, and ceramics. [1980-077 (1995) : 74]

135. The Genetics Unit, Westlakes Research Institute, situated on the fringe of the Lake District, undertakes a programme of research in the areas of population monitoring and radiation genetics, and provides a clinical cytogenetics service for West Cumbria. [1980-079 (1995) : 75]

136. The present openings are for experimental and theoretical work in the following areas: Distributed Fibre Optic Sensors; Fibre Fabrication; Planar Waveguides; Fibre Sensors; Non-Linear Optics; Optical Materials Growth [1980-081 (1995) : 75]

137. 6 Ph.D. Studentships […] to support research in the following areas: Medicinal Chemistry; Combinatorial Chemistry; Natural product synthesis; Drug Delivery; Molecular Biology; Microbiology. [1980-086 (1995) : 76]

138. Established R&D scientists in any branch of the natural sciences pertaining to biodiversity conservation can apply but we are particularly interested in those who can focus much of their research and consultancy on areas relevant to organismal conservation, information systems, biodiversity databases, and/or population conservation. [1980-090 (1995) : 77]

139. Candidates may not necessarily at present be employed full-time in safety, but will have had sufficient exposure to the areas above. [1980-092 (1995) : 78]

140. Applications are invited from candidates who are interested in any area of the Unit's work and who have, (or who will shortly have), a first or upper second class degree in a relevant subject. [1980-103 (1995) : 80]

141. The ODA now invites UK organisations and institutes with a proven track record in systems-based research and related fields, particularly from those with working experience in developing countries, to submit a capability statement of research experience and capabilities in the systems areas specified. [1980-112 (1995) : 82]

142. At this stage we are not seeking invitations to bid for projects but responding organisations may be invited, on the basis of their expertise and experience, to tender at a later stage for research in defined areas. [1980-112 (1995) : 82]

143. The areas of study are: Project 1 - The use of VA mycorrhizal fungi in the establishment, growth and disease resistance of turf grasses. Project 2 - Water quality management for golf course irrigation. Project 3 - Respiration monitoring of potatoes in store with relation to storage life and store design. Project
4 - The effect of elevated winter temperatures on the growth, development and yield of over-wintering temperate crops. [1980-114 (1995) : 82]

144. Proposals for research projects, to begin in 1996/97, are invited for consideration under the above scheme in the following areas: [Veterinary Science; Animal Science; Biotechnology; Horticulture Science; Pesticides Safety & Arable Crops; Environmental Research; Physical Sciences] [1980-117 (1995) : 83]

145. The Ministry also intends to commission research through open competition to start in 1995 in the following areas: [Environmental Research; Horticultural Science] [1980-117 (1995) : 83]

146. Research assistant posts are available in the following areas to commence in October 1995. [The role of microfauna in the uptake of radionuclides from organic matter; Kr-85 in the environment; The speciation of Iodine-129 in the vicinity of a nuclear reprocessing plant] [1980-120 (1995) : 85]

147. Applications are invited for three-year studentships in the following subject areas: Atomic and Molecular Physics; Liquid Crystal Physics; Laser Photonics; Experimental Condensed Matter Physics; Theoretical Condensed Matter Physics [1980-122 (1995) : 86]

148. Three PPARC research studentships are available from October 1995 for research in molecular line astronomy in the following areas: [Observational studies of star formation regions and interstellar molecular clouds. The development of a low noise heterodyne receiver for submillimetre molecular line astronomy at 800-900 GHz] [1980-123 (1995) : 86]

149. Research activities in all areas of chemical engineering, biotechnology and related scientific disciplines are organised into eight Research Programmes as follows: [1980-126 (1995) : 87]

150. Available areas of study include biochemistry, genetics, immunology, microbiology, pharmacology, physiology and toxicology. [1980-129 (1995) : 87]

151. Interested candidates should contact Professor R Camp immediately on (0116 252 3061), and will be supplied with detailed written information including the names of available supervisors and their specific areas of study. [1980-129 (1995) : 87]

152. Candidates must be distinguished professors who have established themselves in any area of Internal Medicine. [1984-003 (1995) : 51]

153. The successful candidate is expected to teach and conduct research in his or her area of interest. [1984-003 (1995) : 51]

154. Departmental staff are involved in service, teaching (both undergraduate and postgraduate) and research in the following areas: Cardiology, Clinical Pharmacology, Dermatology, Endocrinology/Metabolism, Gastroenterology, Haematology-Oncology, Nephrology, Neurology and Respiratory Medicine. [1984-004 (1995) : 52]

155. The successful applicants will be expected to establish an internationally competitive, independent research programme in an area which coheres with existing strengths at Lancaster. [1984-004 (1995) : 52]

156. The appointments will be in the following areas: [Polymer Chemistry; Physics; Particle Physics] [1984-004 (1995) : 52]

157. Polymer Science is a major research activity in the School and creation of this post demonstrates our intention to strengthen and further expand in this area. [1984-004 (1995) : 52]
The School has major strengths in the following areas: Theoretical Physics, Advanced Materials, Mesoscopics and Photonics, Non-Linear and Stochastic Physics. [1984-004 (1995) : 52]

The successful candidate will contribute to one of these areas, as well as to undergraduate and graduate teaching. [1984-004 (1995) : 52]

The research will be based in a multi-disciplinary School which is currently active in the following areas: Aerodynamics and Fluid Mechanics; Control and Guidance; Civil and Mechanical Systems; Communications; Design; Environmental Chemistry; Applied Chemistry; Materials Science and Engineering; Power Systems; Software Engineering [1984-008 (1995) : 53]

In both areas of responsibility, managerial and technical, you will need to display relevant experience, as well as the enthusiasm to contribute to a rapidly expanding business. [1984-009 (1995) : 54]

Particular areas of concern include fisheries, coastal zone planning, shipping, land drainage and water resources. [1984-011 (1995) : 54]

As manager of a team involved in a very active area of policy in both the UK and Europe, the successful candidate will demonstrate evidence of experience in team leadership, project management, conservation legislation and should be a skilful advocate. [1984-011 (1995) : 54]

All three posts will have a role in: providing technical support to Waterway Managers within their area of specialism, [1984-016 (1995) : 58]

Cell culture, protein chemistry and molecular techniques will be involved; experience in some of these areas would be an advantage. [1984-018 (1995) : 58]

Working as a project manager within specific projects, you will need to be experienced within a variety of therapeutic areas and have a knowledge of SAS and database management. [1984-020 (1995) : 59]

Experience of techniques in some of the following areas is required: protein biochemistry, characterisation of monoclonal antibodies, in situ hybridisation, northern blots, immunocytochemistry, RT-PCR. [1984-024 (1995) : 60]

Applicants should have a good first degree in a relevant area and an interest in measurement science. [1984-027 (1995) : 61]

Our stability testing area undertakes the setting up, running and associated analytical work for short and long term test programmes on drug substances and finished pharmaceuticals. [1984-030 (1995) : 62]

The scope of the work will involve research in areas such as radioelement metabolism, internal dosimetry and epidemiology. [1984-036 (1995) : 63]

In the following areas, we are seeking ambitious physicists, engineers and scientists with relevant expertise and a keen desire to be at the forefront of their particular field. [Magnetic Materials; Transducer Materials / Ceramics; Acoustics [1984-041 (1995) : 64]

Applications are invited for 2 Post-Doctoral Research Fellows and a Research Studentship to join an inter-disciplinary research team working in the area of optical-based sensors for chemical and in-situ health monitoring of materials and structures. [1984-047 (1995) : 66]

Applicants should have a Ph.D. and relevant qualifications and experience in one of the following areas: (a) synthetic dye chemistry; (b) photochemistry; (c) photophysics. [1984-047 (1995) : 66]

6763
174. The appointee will have duties in teaching, administration and research and will be expected to become expert in the field of human performance, thus opening up the possibility for consultancy work in this rapidly developing area. [1984-052 (1995) : 68]

175. Initial teaching responsibilities will be focused on the exercise physiology, exercise biochemistry and human performance modules on the existing Masters courses. There is much scope for developing into other areas and the appointee will be expected to contribute fully to the expansion of the Institute's teaching portfolio. [1984-052 (1995) : 68]

176. We are now seeking graduates to study for a Ph.D. by research in the following areas where we shortly expect to have a number of funded places available: On-line industrial process monitoring; Immunosensors; Interfacial bioadhesion; Optical biosensors; Environmental monitoring; Thermotolerant enzymes; Electrochemical DNA biosensors; Molecular biology of lactic acid bacteria [1984-070 (1995) : 72]

177. A commitment to teaching will be required as the successful candidate will also be expected to teach at undergraduate level in these areas and at postgraduate level in appropriate topics. [1984-080 (1995) : 74]

178. [The studentships] will be held in one of the following research areas. [Measurement and Instrumentation; Information Engineering; Control Engineering and Control Theory] [1984-083 (1995) : 75]

179. Applications are invited in the following areas. Theory of vortex line phases of high temperature superconductors; Experimental studies of magnetic materials; Comets and cosmic dust in the solar system; Optical properties of transition metals in silicate glasses for solar control; Neutron scattering and muon spin rotation studies of amorphous materials. [1984-090 (1995) : 76]

180. The projects will involve research into the growth of ferroelectric materials and their use in the area of Nanotechnology, [1984-104 (1995) : 79]

181. Candidates should possess, or be nearing completion of, a Ph.D. in an area of Physics or Materials Science. [1984-108 (1995) : 80]

182. Applications are invited for EPSRC studentships leading to Ph.D. and EngD degrees in the above areas of research. [1984-109 (1995) : 80]

183. The Person: […] Ph.D. or MSc in analytical chemistry or related area, or MChemA, with in-depth understanding of analytical chemistry applied to organic analytes, experience of GC and HPLC, and a good knowledge of mass spectrometry are essential. [1984-111 (1995) : 80]

184. Plaster Technologist to work as a member of a small team working on product quality and process improvement projects in the areas of gypsum calcining and building plaster production. [1984-120 (1995) : 82]

185. Its purpose is to prepare students to undertake research and development in advanced engineering either in industry or by proceeding to further research study (Ph.D.) and to enable people already working in industry to deepen their knowledge in certain key areas while undertaking a suitable research project. [1984-123 (1995) : 83]

186. The research project will be in the area of gamma-ray spectroscopy of nuclear states associated with high angular momentum. [1989-007 (1995) : 58]

187. The successful applicant will have a Ph.D. or equivalent in an area related to crop or soil management. [1989-007 (1995) : 58]

188. The initial focus of the work includes (1) the further development of our systems modelling capability for dryland cereals, grain legumes and ley pastures grown in the Australian sub-tropics, and (2) the
application of this simulation capability to issues of importance to industry. This latter area will be conducted using a participatory approach in which farmers and advisers are part of the research team [1989-007 (1995) : 58]

189. The successful applicant will have a Ph.D. or equivalent in an area related to crop physiology or agronomy. [1989-007 (1995) : 58]

190. Research activities may be in any relevant area of Geology. [1989-011 (1995) : 60]

191. We are looking for a graduate with a good understanding of at least one area of neurosciences and at least one year’s postgraduate experience; further experience in research or scientific editing and an interest in electronic media would be an advantage. [1989-019 (1995) : 63]

192. Applications are invited for a three-year EPSRC-funded postdoctoral research fellow in the area of heterogeneous catalysis and fuel cell research, in collaboration with UMIST. [1989-020 (1995) : 63]

193. The project is in a highly technologically and environmentally relevant research area, with the objectives of gaining an increased understanding of the catalytic chemistry which is occurring in Solid Oxide Fuel Cells (SOFCs) and the problems associated with running SOFCs on natural gas. [1989-020 (1995) : 63]

194. Applicants should preferably have a background in catalysis, surface science or a related area of physical chemistry, inorganic chemistry or materials science. [1989-020 (1995) : 63]

195. Your success in this role will also depend on your comprehensive understanding of clinical issues, a good knowledge of the anti-infectives (including antivirals) area, and an ability to interact effectively with senior clinical staff. [1989-024 (1995) : 64]

196. The student will be expected to research their dissertation in an area of relevance to the Company, that is, the broad area of the automotive industry and the environment. [1989-040 (1995) : 68]

197. that is, the broad area of the automotive industry and the environment. [1989-040 (1995) : 68]

198. Particular areas of focus for development and expansion are: [Clinical Sciences; Biopharmaceuticals] [1989-041 (1995) : 69]

199. The position: The successful applicant will lead the Soil and Water Sub-Program of ISIA - Tatura; provide scientific leadership to a hydrologic research team of four scientists; maintain a high quality research program in an area of hydrology relevant to sustainable irrigated agriculture systems; identify irrigation industry needs and priorities for sustainable management of soil and water resources; obtain resources to support personal and sub-program projects, contribute to sustainable agriculture program at all levels within Agriculture Victoria; and maintain effective communication with professional peers, funding bodies and clients. [1989-043 (1995) : 70]

200. Research will be enhanced in a range of areas including spatial analyses of biodiversity, molecular characterisation of germplasm, ex situ and in situ conservation methodologies, and development of cote collections. [1989-060 (1995) : 73]

201. Applicants will need to have chemistry to at least A level standard and will be keen to improve knowledge in this key subject area. [1989-062 (1995) : 74]

203. For this fixed-term 1 year post in the first instance, you will have experience of research using experimental techniques in the areas of surface science and solid state chemistry. [1989-066 (1995) : 74]
204. Our research priority is in the area of food crops and small animals. [1989-070 (1995) : 75]

205. Candidates should have at least a Masters degree (or preferably a Ph.D.) in the area of Crop Pests, plus experience in teaching and research in Agricultural Economics and Agricultural Extension at the tertiary level. [1989-070 (1995) : 75]

206. The candidate is expected to become part of a multi-disciplinary team whose research priority is in the area of tropical food crops and the sustainability of agriculture in Papua New Guinea and the Pacific region. [1989-070 (1995) : 75]

207. This post would ideally suit a recent Ph.D. both with an interest in this area and training in both recombinant protein expression/purification and antibody production and utilisation. [1989-072 (1995) : 76]

208. The successful applicant will have an appropriate biological degree with proven experience in the above areas. [1989-076 (1995) : 76]

209. The post is rotational which involves working in all areas of Haematology including the Diagnostic, Specials and Blood Transfusion Laboratories. [1989-089 (1995) : 80]

210. We have established a reputation as a teaching centre of excellence in many specialist areas. [1989-090 (1995) : 80]

211. Candidates should have a strong background in at least one of these areas and a desire to broaden their experience. [1989-091 (1995) : 81]

212. Recently qualified in a relevant area should write, enclosing a curriculum vitae, to Dr G. Smith, Senior Lecturer, School of Applied Science, De Montfort University, The Gateway, Leicester LE1 9BH. [1989-092 (1995) : 81]

213. This is a new post created to augment and further develop the research profile of the School where the strategy is to consolidate research areas where there is already staff activity and output. [1989-095 (1995) : 82]

214. You will be responsible for all biochemical techniques currently in line in the areas of wound healing, inflammation and cancer, these including, protein separation techniques, HPLC of carbohydrate derived molecules, use of ELISA techniques in the identification of cell-surface markers. [1989-099 (1995) : 82]

216. Due to the promotion of the current holder of this post, a vacancy has occurred for a Research Fellow in the area of Microwave Properties and Applications of High Temperature Superconductors. [1989-102 (1995) : 83]

217. The successful candidate will be an active researcher in the area of ecophysiology and will be based within the Marine Environment Group. [1989-107 (1995) : 84]

218. The main areas of research and development are diabetes, hormone replacement therapy and growth hormone substitution. [1989-110 (1995) : 85]

219. The Director will need to develop a network of external contacts to define needs for education and training in this area. [1989-115 (1995) : 86]
220. This is a full-time academic appointment and therefore the Director will also be expected to make his/her contribution to research in an area of environmental management and technology. [1989-115 (1995) : 86]

221. There will be a 22 week formal taught course, followed by a research project which will be designed to allow the student to make an original contribution in the chosen area of research. [1989-117 (1995) : 86]

222. In particular, the LINK programme will seek to address the priority areas identified by the Agriculture, Natural Resources and the Environment (ANRE) sector panel. [1993-022 (1995) : 57]

223. The successful applicant will be part of a technician team providing a service to the Science section, with Biology as a specialist area of work. [1993-024 (1995) : 58]

224. Physics World has a reputation for producing lively, accurate and up-to-date coverage of all areas of physics and science policy for an international readership every month. [1993-025 (1995) : 58]

225. The successful candidate will need to demonstrate a wide-ranging interest in physics and related policy areas, and an ability to convey complex ideas with clarity and flair. [1993-025 (1995) : 58]

226. The nature of the research programme is highly cross-disciplinary, so the flexibility to operate effectively in areas outside your specialist discipline is essential. [1993-034 (1995) : 61]

227. It is an opportunity for an ambitious graduate with practical experience in gas chromatographic techniques - in particular column and detection technology - and ideally experience in other analytical chemistry areas for future programmes [1993-034 (1995) : 61]

228. Its operations, which have a strong international bias, are characterised by research, production and marketing in the area of pharmaceutical products through subsidiaries and agents world-wide. [1993-039 (1995) : 63]

229. Experience in the areas of pain control, dentistry or dermatology would be an advantage. [1993-039 (1995) : 63]

230. In its quest for true scientific innovation, this top-ten, research-based pharmaceutical company has underlined its commitment by targeting specific disease areas. [1993-052 (1995) : 67]

231. The Department of Chemistry, The University of British Columbia is seeking to fill two tenure-track openings at the assistant professor level starting 1 July 1996: (1) an appointment in the area of theoretical chemistry and (2) an appointment in inorganic chemistry. [1993-062 (1995) : 69]

232. We are expanding our business in the areas of trace inorganics and general microbiological work and offer a high quality and quick turn round from our state of the art laboratory near Chelmsford. [1993-063 (1995) : 69]

233. This EPSRC-funded post is available from 1 December 1995 for a fixed period of one year in the first instance, with the possibility of extension to two years, to work in novel areas of molecular boron-cluster chemistry. [1993-072 (1995) : 72]

234. Applicants should be motivated scientists with a good Ph.D., preferably in synthetic inorganic or organometallic chemistry, or a related area. [1993-072 (1995) : 72]

235. Research will be enhanced in a range of areas including spatial analyses of biodiversity, molecular characterisation of germplasm, ex situ and in situ conservation methodologies, and development of cote collections. [1993-084 (1995) : 74]
236. This is an outstanding opportunity to work together with marketing and regulatory functions to provide drug information support for products in a defined therapeutic area. [1993-085 (1995) : 75]

237. You will supervise the research of individuals at Sandwich and become involved in external collaborations in these disease areas. [1993-086 (1995) : 75]

238. The successful candidate will have to curate the collections in his or her area of responsibility according to modern standards [1993-089 (1995) : 76]

239. A Ph.D. or good honours degree in Chemistry or Material Science will be required together with some industrial experience, preferably in areas of plastics, adhesives, polymers, foils or surface coatings. [1993-093 (1995) : 77]

240. A Degree in Chemistry or Material Science will be required together with some industrial experience, preferably in areas of plastics, adhesives, polymers, foils or surface coatings. [1993-093 (1995) : 77]

241. Young Post-doc or Post-graduate students seeking opportunities for fellowships in Portugal, under the EU programme "TMR - TRAINING AND MOBILITY OF RESEARCHERS" should contact JNICT (Dra. Ana Paula Cruz), Fax: 351-1-6007481 indicating one of the seven thematic areas of the Programme (Mathematics & Information Technologies, Physics, Chemistry, Life Sciences Engineering Sciences, Earth Sciences, Economy/Management / Human & Social Sciences) and their particular research interests. [1993-094 (1995) : 78]

242. A one-year Master of Research course is offered in the area of surface science. [1993-100 (1995) : 78]

243. It is therefore envisaged that on completion of the course candidates will pursue careers in the industrial or academic research area. [1993-100 (1995) : 78]

244. A postgraduate qualification in either of these subject areas or a minimum of two years' relevant postgraduate experience is also required. [1998-007 (1995) : 74]

245. This high profile role carries full responsibility for co-ordinating the development of laboratory and consultancy services, as well as marketing this key area of the business. [1998-010 (1995) : 75]

246. With full responsibility for the development of this key area of the business, you will use your extensive experience and well developed contacts to increase the diversity of our client base maximising our profile on an international basis. [1998-010 (1995) : 75]

247. Degree qualified (or equivalent) in Environmental Science, Oceanography or related discipline, you will have at least 2-5 years relevant working experience where you have gained a particular strength in two or more of the following areas, with an appreciation of them all: “Oceanography”, “Mathematical Modelling”, “Water quality”, “Marine Ecology”. [1998-010 (1995) : 75]

248. Experience in the following areas would be advantageous: routine preparation of samples for TEM and SEM, including ultramicrotomy, light microscopy, in situ hybridisation, immunocytochemistry and other modern molecular histological techniques. [1998-017 (1995) : 78]

249. The Department, graded 4 in the last UFC research selectivity exercise, has particular research strengths in the areas of time-resolved spectroscopy and transient intermediates, biomolecular spectroscopy, protein crystallography, molecular graphics and modelling, supported reagents, reaction mechanisms and synthetic organic chemistry. [1998-018 (1995) : 78]
250. Applicants will be expected to develop their own research programmes in this area; [1998-018 (1995) : 78]

251. This is an exciting area which is being funded by the Nashua Corporation for one year. [1998-019 (1995) : 78]

252. Extensive hands-on experience of online database search and retrieval systems especially in biomedical and business/commercial areas is essential. [1998-022 (1995) : 80]

253. The work is funded by the EPSRC. Research will be conducted at Cranfield in the nanotechnology area of the School of Industrial and Manufacturing Science with close collaboration with several industries, including the DRA, Xaar, Intravascular Research, GEC Marconi and Morgan Matroc. [1998-023 (1995) : 80]

254. In recent years Bullard Fellows have been associated with the Harvard Forest, Department of Organismic and Evolutionary Biology and Kennedy School of Government and have worked in areas of ecology, forest management, policy and conservation. [1998-025 (1995) : 80]

256. These areas are subject to continuing change and growth and as a result we are looking for an enthusiastic and dedicated Occupational and Environmental Hygienist to provide advice and support to the Astra Charnwood site. [1998-027 (1995) : 81]

257. The development of sophisticated software and models is an increasingly important part of our operations and we are now looking to appoint a number of technical specialists to join teams in this area. [1998-028 (1995) : 81]

258. For appointment at postgraduate level you will need a Ph.D. or MSc in similar areas or equivalent laboratory research experience in a relevant organisation. [1998-029 (1995) : 82]

259. If you possess the self confidence and expertise to set up and run this expanding area in a small company, where flexibility in dealing with issues from the highest to the lowest level will be crucial to your success, send your cv to Micheline Eames, Eames - Jones -Judge - Hawkings, 29 High Street, Welwyn, Herts AL6 9EE. [1998-032 (1995) : 83]

260. Applicants should be in possession of a higher degree in statistics and preferably have previous experience of working in the area of medical statistics. [1998-035 (1995) : 84]

261. Experience in any of the above areas is welcome but not essential. [1998-040 (1995) : 85]

262. The successful applicant will be expected to have research skills in one or more of the following areas: hydrogeochemistry; mineral surface processes in the weathering regime; geohydrology; physico-chemical theory and modelling of fluid-rock interactions; applications of studies of fundamental processes to environmental pollution. [1998-043 (1995) : 86]

263. The position is a strategic one, and the lecturer will be expected to interact with established groups in allied areas which include marine geochemistry, experimental fluid-rock interactions under in situ conditions, and near-surface geophysical methods. [1998-043 (1995) : 86]

264. Applicants for this post will need to possess a First or Upper Second Class honours degree covering one of the following areas: Pharmacology, Pharmacy, Toxicology or Physiology. [1998-045 (1995) : 87]
265. Arising from a further expansion of the Faculty's Research Centre, applications are invited from graduates with a minimum of an upper second class honours degree in an appropriate discipline and with appropriate experience for research posts in the following areas: The extent and mechanisms of cross contamination in domestic food preparation; Techniques and strategies for assessing the effect of educational hygiene intervention on consumer food hygiene practices; Modelling effect of modified atmosphere packaging on microbial growth/survival characteristics; Authenticating the protein composition of heated foods; Mechanisms of death and recovery of micro-organisms following the application of combined food preservation treatments; Bacterial contamination of surfaces and the survival and growth of pathogens in microbial films associated with food production [1998-048 (1995) : 88]

266. The specific area of research will be concerned with a recently discovered RNA polymerase sigma factor and its role in pathogenesis of Xanthomonas to plants. [1998-049 (1995) : 88]

267. There may be opportunities to work in other areas of Environmental Health as well. [1998-050 (1995) : 88]

268. We need a high-calibre Clinical Scientist to provide electronic and computing engineering design services in support of the Epilepsy Surgery Programme at this Hospital as well as participating in research specifically in the area of problems associated with epilepsy monitoring. [1998-062 (1995) : 91]

269. The project is concerned with the development of a computer simulation method for the design of novel guest molecules for macrocyclic hosts (e.g. proteins and DNA molecules) and hence lies in the general area of rational drug design. [1998-064 (1995) : 91]

270. It will utilise classical force-field methods and molecular dynamics, and will entail methodological development in these areas. [1998-064 (1995) : 91]

271. In both areas, the persons appointed will be joining a small, flexible team and will be required to participate in a shift working operation. [1998-065 (1995) : 92]

272. Some postgraduate research or work experience in biostatistics, medical statistics, epidemiology or related area is essential. [1998-068 (1995) : 92]

273. Physics research on acoustical and electromagnetic materials, the interaction of wave propagations with materials, and associated measurement techniques are key capabilities and we are expanding our research in these areas for a wide range of Defence, Civilian and Medical applications. [1998-087 (1995) : 98]

274. With advanced computing facilities which make extensive use of the SAS statistical package, we can offer you the opportunity to work on a range of therapeutic areas, have close liaison with clinical research teams and further develop your design and analytical skills. [1998-088 (1995) : 98]

275. The successful candidate will be expected to have good laboratory practise and expertise in at least one of the following areas: soil biology, feeding-trials and plant bioassays. [1998-093 (1995) : 99]

276. We seek highly motivated individuals who desire to make a practical contribution to a high profile area of life science research. [1998-094 (1995) : 100]

277. A wide knowledge of health related aspects of water microbiology and other areas such as environmental health, biotechnology or molecular biology is also required. [1998-099 (1995) : 102]

278. You will need a minimum of 3-4 years' clinical research/ project management experience in the above therapeutic areas. [1998-100 (1995) : 102]
279. Research in wood chemistry will be carried out in association with Dr Richard Ede, another joint University-NZFRI appointee, but independent research in other areas of organic chemistry will be possible. [1998-102 (1995) : 103]

281. The discipline is a key area for terrestrial studies of climate change and is also fundamental to the understanding of nutritional interactions and food webs in freshwater and marine ecosystems. [2002-014 (1995) : 58]

282. The successful candidate will become part of a team working on areas such as the application of CFD models to problems of smoke movement and control, the development of existing models to include fire development and suppression, the development of user-friendly interfaces for the input and output from CFD models (including the possibility of using virtual reality techniques) and the development of a consolidated approach to fire safety design in buildings. [2002-018 (1995) : 60]

283. If you have a genuine interest in this area of research we would like to hear from you. [2002-018 (1995) : 60]

284. The candidate is expected to have prior knowledge of connectionist / Markov modal hybrids, large vocabulary recognition or a related area. [2002-019 (1995) : 60]

285. The Institute was founded in 1961, and provides education in seven areas of engineering for about 5,000 undergraduate students. [2002-022 (1995) : 61]

286. It'll be up to you to challenge the status quo, identify areas for improvement, generate innovative, practical solutions and drive them through to completion. [2002-028 (1995) : 63]

287. Following the recent appointment of G M Megson to a Chair in Computer Science applications are invited for a four year fellowship in the area of parallel and distributed architectures with an emphasis on emergent computing structures for algorithm specific design techniques. [2002-032 (1995) : 64]

288. You will be working closely with Professor Megson in one of the following areas: Regular Algorithm Design, High Level Array Design tools, Algorithm Engineering and Hardware Compilation and must be able to link effectively with other members of the Parallel, Emergent and Distributed Architectures Laboratory (PEDAL) at Reading. [2002-032 (1995) : 64]

289. The University of Nottingham has a leading international research department in Pharmaceutical Sciences and to strengthen the key area of molecular microbiology, a three year fixed-term lectureship is available. [2002-037 (1995) : 66]

290. These are immediate vacancies but there are more opportunities in other technical areas as well as for people who have already made the break into sales. [2002-051 (1995) : 70]

291. The research programme will be in the area of quadruple ion trap/ion mobility spectrometry and experience of instrumental development and the use of ion simulation software would be particularly welcome. [2002-053 (1995) : 70]

292. You will also provide ad-hoc technical consultancy and support to the business, as well as covering for colleagues with specialisms in other areas. [2002-059 (1995) : 73]

293. In addition to a good degree in civil engineering, materials science or physics, you should have at least five years' experience in two or more of the following areas: • asphalt research • asphalt road design and construction • bitumen rheology • polymer modification of bitumen. [2002-059 (1995) : 73]
294. A record of research and publications or demonstrated potential for research in relevant subject areas is essential. [2002-064 (1995) : 74]

295. It is anticipated that applicants will have recently completed (or are about to complete) a Ph.D. degree in an area of research that is currently being pursued within the University and, if successful will be attached to the research programme of a specific department. [2002-064 (1995) : 74]

296. If you are interested in a varied job involved in many different therapeutic areas, then please send a CV to: Vicky Diment – Head of Clinical Trials. [2002-066 (1995) : 74]

297. In return, Euro Bio-Pharm offers a stimulating and challenging working environment with openings in project management and the opportunity to work across a variety of therapeutic areas on both UK and pan-European projects. [2002-067 (1995) : 75]

298. As a research and development Physicist you will work in the area of computerised conformal radiotherapy in a post sponsored by the EC BIOMED-2 programme as part of the multinational INFOCUS project. [2002-068 (1995) : 75]

299. The main activities will involve research and development work in all areas of this field, from pre-formulation through production of clinical samples to the manufacture of finished product. [2002-070 (1995) : 75]

300. Applications will be welcomed from candidates with a proven track record in any branch of sports medicine or sports science or in a related area. [2002-073 (1995) : 76]

301. A record of research in relevant subject areas is essential. [2002-074 (1995) : 76]

302. The job will involve screening and developing new technologies in food processing as well as working in the general food process engineering areas of heat processing, food mixing, etc. [2002-078 (1995) : 77]

303. Our research covers the fields of computational fluid dynamics, heat transfer and aerodynamics applied to studies arising in the general areas of ballistics and energetic materials. [2002-081 (1995) : 78]

304. Ideally, your research should complement one of the areas of work of the LJMP astrophysics group. [2002-082 (1995) : 78]

305. In recent years Bullard Fellows have been associated with the Harvard Forest, Department of Organismic and Evolutionary Biology and Kennedy School of Government and have worked in areas of ecology, forest management, policy and conservation. [2002-085 (1995) : 79]

306. As Assistant Director, Clinical Research, you will fulfil a crucial role in this process, joining our central cardiopulmonary therapeutic team with responsibility for the successful planning and implementation of pivotal clinical studies in Europe, leading to the effective registration of new products in this expanding therapeutic area. [2006-002 (1995) : 59]

307. This role provides an exceptional opportunity in which to establish yourself within our world-class clinical research team, with good prospects of further career development within this or another therapeutic area. [2006-002 (1995) : 59]

308. If you have the necessary qualities to make a major contribution in this important area, please send your full career details, quoting Ref: CRM1, to the Human Resources Manager, Clinical, SmithKline Beecham Pharmaceuticals, New Frontiers Science Park (South), Third Avenue, Harlow, Essex CM19 5AW. [2006-002 (1995) : 59]
309. The certainty that a career will not be spent with one single employer or even a single area of work makes it essential for employees to adapt continuously to change throughout their careers. [2006-007 (1995) : 61]

310. Contributing to the work of the department across a broad range of issues, and working both as part of a busy team and autonomously, your initial effort will focus upon providing support in the area of non-radiological discharges to the estuarine and marine environment. [2006-011 (1995) : 63]

311. The postholder will have the opportunity to develop his/her specialist interest in this area and will be responsible for researching and introducing new clinical procedures and developing advanced techniques. [2006-012 (1995) : 63]

312. A large proportion of the Department's teaching occurs at first and second year levels and all staff contribute to these areas. [2006-013 (1995) : 64]

313. The present positions prefer people specialising in one or more of the areas: database, real time, software engineering operating systems or applicable mathematics. [2006-013 (1995) : 64]

314. Applicants should be young and energetic with a postgraduate degree in mining engineering and about three years industrial experience in the above areas. [2006-013 (1995) : 64]

315. Applicants should hold a Ph.D. or equivalent in a field of nutritional science or a related area and also have substantive experience in a field related to clinical nutrition. [2006-016 (1995) : 65]

316. Preference will be given to applicants with strengths in GIS applications in at least one sub area of Geography. [2006-016 (1995) : 65]

317. The Research Technician will provide technical support in all areas of the project. [2006-017 (1995) : 66]

318. Maybridge is seeking an organic chemist with knowledge of purchasing and marketing organic chemicals (in the area of research rather than heavy chemicals). [2006-020 (1995) : 66]

319. Research interests of members of the Division include areas of anatomy, molecular biology, biophysics, pharmacology, physiology, human biology and physiotherapy, with particular emphasis on neurobiology and neuropharmacology, cell biology, human biology and physiology, receptors and intracellular signalling, cellular and molecular endocrinology and reproduction. [2006-029 (1995) : 69]

320. We wish to recruit research staff for projects in the following areas: Functional Imaging in Neuroscience; Quantitative Interpretation of Biomedical Images [2006-030 (1995) : 69]

321. Due to expansion of business in the area of surface analysis we are looking for a high calibre science graduate to work alongside the Product Manager. [2006-031 (1995) : 69]

322. For this post, candidates should have a proven research record in the areas of semiconductor device design, fabrication and assessment. [2006-035 (1995) : 70]

323. Candidates should have at least one year of postdoctoral research experience in the area of computer simulation and modelling. [2006-039 (1995) : 72]

324. Expansion of our research programme has created opportunities in the following areas. Plastics; Electronics; Experimental and mathematical modeling; Joining Technology [2006-041 (1995) : 73]
325. The Department offers a wide-ranging and imaginative teaching programme which it wishes to expand in applied areas of physics. [2006-045 (1995) : 74]

326. The successful applicant will contribute to the planning and delivery of new courses which will form part of joint Honours Degrees involving Chemistry, and will establish a distinct research programme within the overall areas of interest in the School of Natural Sciences. [2006-051 (1995) : 75]

327. Similarly, as a disciplined professional, you will recognise the importance of adopting an ethical and proactive approach in this key area of our business. [2006-058 (1995) : 77]

328. Outline proposals for research grants are sought from all areas of bioinformatics, under the following themes: • Sequence to function: making sense of sequence data • Comparative genome analysis • Understanding how computer science and IT techniques can aid biological research • Methods to create biological databases from uncomputerised or unstructured data • Tools for handling images of biological material • New approaches to the integrity and maintenance of biological databases [2006-065 (1995) : 79]

329. In particular, the programme has identified a number of priority areas within its remit, [2006-065 (1995) : 79]

330. and is especially keen to fund high quality applications in the following areas: Sequence to function: making sense of sequence data; Comparative genome analysis; Understanding how computer science and IT techniques can aid biological research; Methods to create biological databases from uncomputerised or unstructured data; Tools for handling images of biological material; New approaches to the integrity and maintenance of biological databases [2006-065 (1995) : 79]

331. Each of the five successful applicants will undertake research in one of the following areas: Communications and Electro Optics; Large eddy simulation in fluids; Control of flexible structures; Boundary-layer stability; Heat transfer in internal combustion engines using advanced instrumentation; Modelling and control of multi-wheel skid-steer hybrid vehicles; Development of armour systems for ballistic protection of personnel; Hydrocode modelling of fibre reinforced composite materials; The optimisation of a novel form of sandwich construction; Optimisation of hull design for inland waterway craft; Verification, validation and accreditation of networked simulations [2006-067 (1995) : 79]

332. Please identify which of the topics above interest you and explain why you would like to study for a Ph.D. in that area. [2006-067 (1995) : 79]

333. Vacancies currently exist in the following areas: Marine pelagic and demersal fisheries; Shellfisheries; Salmonid and freshwater fisheries; Ecological and fisheries modelling [2006-068 (1995) : 80]

334. In recent years Bullard Fellows have been associated with the Harvard Forest, Department of Organismic and Evolutionary Biology and Kennedy School of Government and have worked in areas of ecology, forest management, policy and conservation. [2006-070 (1995) : 80]

335. Training will be provided for these and other areas of physical characterisation, as necessary. [2006-072 (1995) : 81]

336. Research topics should relate clearly to one of the following research areas of the UNU/IAS for the initial 1996-97 years: (i) eco-restructuring for sustainable development; (ii) mega-cities and urban development (iii) policy aspects of science, technology, and society in relation to sustainable development; and (iv) peace, multilateralism, and governance. [2006-075 (1995) : 82]

337. Applicants who will probably hold a higher degree must demonstrate: […] Training and skills in areas of research methods, experimental design or statistics. [2006-077 (1995) : 82]
338. Your duties will involve setting up, checking and maintaining analysers, monitoring and treatment equipment used in clinical areas. [2006-089 (1995) : 85]

339. A particular interest is protein crystallisation, and training will be given in this area. [2006-094 (1995) : 86]

340. Queen’s University is pleased to announce a new and attractive post, tenable from 1 February 1996 or such other date as may be agreed, to strengthen research in archaeology; establish and oversee an archaeological field unit capable of bidding for contracts in areas such as archaeological excavation, archaeological building or underwater survey, and to teach within a proposed new MSc programme in Archaeological Field Studies. [2006-096 (1995) : 87]

341. Applicants must have an honours degree or equivalent in archaeology or related area, evidence of relevant postgraduate research experience/field archaeology experience and have relevant publications/reports. [2006-096 (1995) : 87]

342. Managerial experience, experience in bidding for excavation and field work contracts, research interests in the archaeology of Ireland and in problems of more than one period of archaeology, experience in the main geophysical surveying techniques used in field archaeology, four RAE countable research publications, teaching experience at further/higher education level, a 2.1 honours degree or equivalent in archaeology or other related area [2006-096 (1995) : 87]

343. and a Ph.D. or equivalent recognised qualification in a relevant area are desirable. [2006-096 (1995) : 87]

2005

1. What’s more our collaborative culture – chemists and biologists work together on a wide range of therapeutic areas – gives you exposure to huge scope and variety, across companion, livestock and laboratory species. [2481-006 (2005) : 55]

2. To strengthen our team we are seeking graduate trainee patent attorneys with knowledge and experience in one or more of the following areas: Electronic engineering; Optical communication and devices; Software engineering [2481-014 (2005) : 57]

3. Our well-established Noise and Vibration team are seeking an Ergonomist, or a Vibration Specialist with human factors expertise, to extend their capabilities in this area and to develop new work building on an integrated Engineering/Human Factors approach. [2481-015 (2005) : 58]

4. If you are educated to degree level or above, have a science background, a strong interest in the area of complementary therapies and cancer, several years experience in research, clinical trials or complimentary therapies and experience of writing research protocols and preparing grant applications then this could be the job for you. [2481-029 (2005) : 61]

5. The Radioactive Substances Policy Unit works across a broad spectrum of areas relating to SEPA’s policy on the regulation of radioactive substances. [2481-033 (2005) : 63]

6. Two permanent positions and two fixed-term positions have been created to address developments in a number of these areas. [2481-033 (2005) : 63]

7. SNH is now looking for a number of new members who have expertise in one or more of the following five areas: 1) Coastal ecology/ornithology, 2) Field botany/plant ecology, 3) Geology/ earth Sciences, 4) Landuse systems/modelling, 5/ Marine ecology. [2481-036 (2005) : 64]
8. You should have a MSc in an appropriate area such as environmental science, land contamination, chemistry etc with a minimum of 2 years' relevant post graduate work experience. [2481-041 (2005) : 66]

9. We are seeking to appoint a Science Programme Manager to be responsible for the management of the Trusts programme of support in the area of Physiological Sciences. [2481-043 (2005) : 67]

10. A background in the area of physiological sciences would be desirable. [2481-043 (2005) : 67]

11. You will probably have a degree in a relevant discipline and/or experience in relevant areas. [2481-049 (2005) : 68]

12. Based in the Health Protection, Toxicology and Radiation Branch, you will undertake chemical risk assessments of a variety of areas including pesticides, biocides and consumer products. [2481-051 (2005) : 69]

13. This is a busy and challenging role in a complex area, therefore you must be prepared to work to tight timescales and under pressure from conflicting priorities. [2481-055 (2005) : 70]

14. Post-graduate experience is desirable in such areas as GIS, database development or groundwater modelling. [2481-058 (2005) : 71]

15. The Analytical Sciences Team conducts world-leading research in a diverse range of areas including nanotechnology, electrochemistry, environmental measurements, and remote sensing. [2481-062 (2005) : 72]

16. The appointee will have a PhD in a Physical / Environmental Chemistry area and a strong background in basic and applied research. [2481-071 (2005) : 75]

17. It undertakes research in areas which are key to health in the 21st Century including work on obesity appetite and associated diseases such as diabetes. [2481-072 (2005) : 75]

18. The Department is seeking an experienced individual to work in this exciting and high-profile area, supporting academic staff by co-ordinating and driving the development of its research strategy [2481-072 (2005) : 75]

19. A degree in a life sciences/medicine area is essential, as is the ability to meet tight deadlines and to co-ordinate the work of others at all grades. [2481-072 (2005) : 75]

20. You must demonstrate flexibility and in the future, you should expect to work on new scientific areas depending on the success and direction of the project. [2481-074 (2005) : 76]

21. Applicants should submit a formal application, providing details of up to 3 potential supervisors whose research areas are most related to their interests. [2481-077 (2005) : 77]

22. Research areas include: • advanced materials • cost engineering • water sciences • manufacturing • welding • nanotechnology• biomedical engineering • microsystems engineering • water sciences [2481-080 (2005) : 78]

23. Specifically in the areas: • Host bacteria interactions • Fermentation/Processing • Molecular methods for identification • Therapeutic effects [2481-084 (2005) : 79]

24. Established 70 years ago, Yakult the pioneering international probiotic company is committed to educating and advancing research in areas of intestinal health. [2481-084 (2005) : 79]
25. Applicants should have a good degree, and PhD in Molecular Cell Biology, or other relevant area of Biosciences, and should be committed to their scientific career progression. [2485-003 (2005) : 58]

26. Applications are invited for studentships in the following areas: [Role of Dectin-1 in dendritic cell function; A novel role for HLA-827 in the inflammatory disorder Ankylosing Spondylitis; Control of Gene Expression by Induced Protein Folding; Gene nutrient interactions and bone health; Regulatory circuits that control the responses of a fungal pathogen to its host; Cell-cell adhesion and mechanotransduction in bone; Novel genetic systems to study brain circuits; Cell cycle, hyphal growth and pathogenesis of Candida albicans; Cancer as a developmental disease; TNF life/death switching as a means of controlling human cancer cell fate; Neuromuscular adaptations to vibration; The involvement of PrLZ in human prostate cancer; Functional genomics of alpha-catenin function: understanding the role of an important tumour suppressor; Species differences in substrate specificity and induction of hepatic drug transporters [2485-008 (2005) : 59]

27. You will be involved in developing and implementing a research strategy to underpin new product development in the area of Inflammatory Bowel Disease (IBD). [2485-010 (2005) : 60]

28. You are likely to be a highly motivated postdoctoral scientist or MD with research experience in the area of IBD or colon cancer. [2485-010 (2005) : 60]

29. Want to be part of the team providing ecological and environmental advice across a range of policy areas? [2485-012 (2005) : 60]

30. SUPA is organised around five major theme areas of research excellence, linked together by a Graduate School which will offer studentships and a Distinguished Visitor Programme. [2485-017 (2005) : 61]

31. For details of posts and theme areas, of the Graduate School, and to learn more about SUPA, visit: www.supa.ac.uk [2485-017 (2005) : 61]

32. In 2005, SNH will fund three Ph.D studentships drawn from one or more of the following areas within the SNH Corporate Plan: Access and nature conservation; Impacts of renewable energy development; Biodiversity; Climate change and the natural heritage; Largescale ecology, especially in relation to ecological networks and catchment management; Coastal dynamics and sediment regimes [2485-021 (2005) : 62]

33. It is expected that training will be provided in some areas and there are good opportunities and funding available. [2485-022 (2005) : 63]

34. You'll be expected to make a contribution to the day-to-day physics support in a number of areas of radiotherapy physics. [2485-022 (2005) : 63]

35. There is an active research and development group with interests in Monte Carlo simulation and radiotherapy imaging and networking, with opportunities to participate in project work within the diagnostic imaging areas of the Medical Physics Department. [2485-022 (2005) : 63]

36. If you have communication and presentation skills, are prepared to take responsibility for support of scientists working in the areas of protein analysis and structure/function prediction and are interested in a career in bioinformatics, then we would like to hear from you. [2485-023 (2005) : 64]

37. Applicants should be educated to degree level in a biological science, with 3-4 years research experience of current techniques in this area of science. [2485-023 (2005) : 64]

38. You should be able to learn quickly in many areas of biology and mathematical computation, assimilate the complex phenomenology of problems and develop practical as well as creative approaches. [2485-024 (2005) : 64]
39. We are now looking to expand our capability in these areas. [2485-025 (2005) : 65]

40. In these vital and growing areas of our work, two new leading roles have been created. [2485-026 (2005) : 66]

41. Biovail's primary focus is on the development of advanced, proprietary oral controlled release technologies that provide significant advantages over existing formulations for the treatment a broad portfolio of therapeutic areas. [2485-041 (2005) : 72]

42. An understanding of crop traceability, quality assurance and registration issues for pharmaceutical products would be beneficial, as would experience in one or more of the following areas: cereal chemistry; plant volatile emissions; post-harvest physiology. [2485-042 (2005) : 72]

43. For information on the Fellowship and the research areas, please visit the website: http://www.ntu.edu.sg/personnel/adminres/StaffRec/AdLKY2005.html. [2485-046 (2005) : 74]

44. Probably you will also be up to date with technical, OEM and engineering trends and be able to interact with other internal and external professionals in these areas. [2485-058 (2005) : 77]

45. A well-funded drug discovery company, we are using our proprietary ion channel capabilities to develop a pipeline of ion channel drug molecules across a number of indications - focusing on the cardiovascular, neurology and metabolic disease areas. [2485-066 (2005) : 80]

46. We now seek people who would thrive on the challenges and opportunities of working in an under exploited, but expanding, area of drug discovery as key members of a company with very ambitious plans. [2485-066 (2005) : 80]

47. A PhD with good electrophysiology skills, your several years' postdoctoral experience, preferably in industry will probably include a cardiovascular, endocrine or CNS area. [2485-066 (2005) : 80]

48. We are offering 3 Post Doctoral Fellowships in the areas of X-Ray Science, Imbedded Intelligence and Biomedical Endovascular Research. [2485-067 (2005) : 80]

49. You will have obtained a PhD in a biomedically related area and will have completed a period of postdoctoral research of at least one year. [2485-077 (2005) : 83]

50. Applicants for post-doctoral positions should have a Ph.D. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline. [2485-083 (2005) : 85]

51. Unilever HPC, home to leading brands such as Dove, Persil, Sunsilk and Axe and the Unilever Centre for Molecular Informatics at Cambridge are creating a dynamic new research group that will investigate the academic and commercial challenges in the exciting area of Polymer Informatics. [2485-083 (2005) : 85]

52. In this key role you will manage and co-ordinate the team of scientists and students working in the area of Polymer Informatics. [2485-083 (2005) : 85]

53. Applicants for post-doctoral positions should have a Ph.D. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline. [2485-083 (2005) : 85]

54. Applications are invited for a Lectureship in the Department of Mechanical Engineering in the areas of Dynamics/Control Engineering. [2485-090 (2005) : 87]
55. An important area includes methodology development including computational genomics and bioinformatics. [2485-092 (2005) : 88]

56. Applicants should hold a PhD in an area [2485-092 (2005) : 88]

57. that demonstrates commitment to the subject area and should have demonstrated scientific achievement in terms of publications, project funding and project management. [2485-092 (2005) : 88]

58. The Fellow will be expected to establish research in the area of Bioterrorism, [2485-099 (2005) : 89]

59. and to contribute to teaching in appropriate areas in the biological sciences. [2485-099 (2005) : 89]

60. We are seeking a highly motivated candidate who has, or expects shortly to obtain, a PhD in image processing, computer vision or a closely related area, to join a team of researchers studying vision algorithms and human vision. [2485-100 (2005) : 90]

61. The research will aim at improved strategies and levels of performance in object recognition, tracking, visual search, and scene interpretation, in a selection of applied problem areas. [2485-100 (2005) : 90]

62. You will contribute to the development, delivery and promotion of courses in the area of forensic science, together with research and consultancy.

63. It is essential that you have specialist knowledge of one or more of the following areas: drugs and toxicology, the examination of marks and traces (tool marks, glass, paint etc), hairs and fibres or analytical chemistry experience applicable within the forensic science arena. [2485-101 (2005) : 90]

64. Projects are available in the following areas: Adhesives and Composites; Laser Diagnostics; Chemistry of Advanced Fuels; Catalytic Oxidation; Distributed Power Systems; Carbon Capture; Environmental Engineering; Multiphase Flows; Non-destructive Evaluation; Mechanics of Soft Solids; Nano-particles and Materials; Medical Robotics; Renewable Fuel Technologies; Railway Technology; Thermal Barrier Coatings; Turbulent Reacting Flows [2485-107 (2005) : 92]

65. The next 3 years are devoted to the PhD project, subject areas and supervisors for which are: Role of stroma in T cell development; Role of stroma in leukocyte survival; Epstein-Barr virus & B cell transformation; Leukocyte recruitment and inflammation [2485-110 (2005) : 92]

66. Applications are invited for suitably qualified UK or other EU nationals for studentships in the following areas. • Behaviour and ecology of fish and freshwater invertebrates. • Ecology of soils, plants and fungi. • Functional and genetic diversity in marine and freshwaters. • Interactions between viruses and bacteria in aquatic ecosystems. • Intercellular signaling and communication in microbes. • Unraveling host-parasite interactions. • Why have sex? The evolution of sex and recombination. • Physiology of defective luteal function: a proteomics approach. • Proteomics of oocyte maturation in Welsh breeds of sheep. • Mechanisms of invasion of bovine mammary epithelial cells by Staphylococcus aureus. • Role of the Somatotropic Axis on Mammary Epithelial Cell Function. • The effect of yeast on microbial numbers and activity in the rumen and the hindgut of equines. [2485-111 (2005) : 93]

67. A one year Masters by Research postgraduate course, comprising three 15-week research projects in phylogenetics, palaeontology, molecular systematics and bioinformatics (related to these areas). [2485-122 (2005) : 95]

68. You will need a fascination with technology as well as excellent interpersonal skills and either experience in, or have a desire to move into the challenging area of regulatory affairs in a sales environment. [2489-005 (2005) : 60]
69. Going back a bit, you’ll need a PhD or equivalent scientific qualification and a reputation for delivering in scientific or technical areas. [2489-007 (2005) : 61]

70. We are specifically seeking expertise for the vacancies in the following areas: [Chair; Member (Medical Toxicologist)] [2489-018 (2005) : 67]

71. Our modern well-equipped research facility in Alnwick is engaged in the development of a wide range of new pharmaceutical products, and is helping us develop leading positions in seven major therapeutic areas; cardiovascular disease, thrombosis, oncology, diabetes, central nervous system, internal medicine and vaccines. [2489-019 (2005) : 68]

73. Candidates should have a Ph.D. or equivalent research experience in a relevant area, and should be highly numerate. [2489-025 (2005) : 70]

74. As section head, you will have responsibility for the co-ordination and delivery of core service work for a specified subset of diseases and provide training programmes in those areas. [2489-030 (2005) : 71]

75. You will also be responsible for service development in a specialist area. [2489-030 (2005) : 71]

76. You will have the opportunity to become involved with all areas within the laboratory and personal development will be encouraged. [2489-031 (2005) : 72]

77. UCD wishes to expand its current research portfolio into the area of nutrigenomics with the ultimate goal of contributing to the application of a knowledge of the interaction between nutrition, genomics and human health.

78. Candidates will have obtained a PhD degree and should ideally have some postdoctoral research experience in the area.

79. The successful candidate will be expected to initiate and conduct a research programme in the area and form collaborative links with researchers at the newly established Conway Institute for Biomolecular & Biomedical Research at UCD. [2489-045 (2005) : 76]

80. Applicants who additionally have professional experience within these subject areas would be welcomed. [2489-047 (2005) : 76]

81. Applicants must have previous research experience in auditory physiology, biophysics, psychoacoustics or a related area, preferably at postdoctoral level, together with a strong basic science background. [2489-059 (2005) : 78]

82. Candidates must have a formal qualification in an appropriate area of electronics or basic science and have practical experience with software-based signal acquisition and processing instrumentation. [2489-059 (2005) : 78]

83. The School of Pharmacy is seeking a postgraduate research associate to conduct and supervise research in the area of clinical pharmaceutics, including formulation and stability studies. [2489-060 (2005) : 79]

84. Applicants should have a 1st or 2.1 degree in any area of the mathematical, physical, computer, engineering or life sciences. [2489-067 (2005) : 80]
85. Studentships are available in all areas of chemical research, as described on the School of Chemistry website: www.chem.bham.ac.uk [2489-068 (2005) : 80]

86. Successful candidates will have a degree/MSc/PhD or equivalent in the area of life sciences or organic/medicinal chemistry. [2493-001 (2005) : 54]

87. Experience in any of the areas of immuno-magnetic separation, propagating and purification of bacteriophages and of antibody production is highly desirable as is direct experience of dealing with AOAC and AFNOR. [2493-006 (2005) : 56]

88. Previous experience of genomics and or work in an area of Animal Health research would be preferred. [2493-009 (2005) : 58]

89. In return, we offer the opportunity to develop your career in a constantly evolving area of science and to use your skills to help improve the understanding of the interaction between genome and animal health status. [2493-009 (2005) : 58]

90. Other areas of interest to the Division include the molecular mechanisms of synaptic transmission, circadian rhythms and neurodegenerative diseases. [2493-017 (2005) : 59]

91. We are expanding our experimental trials work for the Hardy Nursery Stock (FINS) and other crop sectors and are seeking someone who can develop these areas further. [2493-019 (2005) : 60]

92. This is an excellent opportunity to develop specialist skills in a rapidly developing and expanding area of cellular therapy and full training will be given. [2493-026 (2005) : 63]

93. At least 2 years of relevant laboratory experience or a postgraduate qualification in similar subject areas. [2493-029 (2005) : 64]

94. Already scientifically credible within the UK science community for your specialist area, you will have five years' experience, including management of research projects, and probably a post-graduate qualification. [2493-030 (2005) : 65]

95. A good working knowledge of GMPs and of the regulations impacting areas of work is also essential. [2493-032 (2005) : 66]

96. Whichever specialist area you focus on, you will contribute to determining and supporting the guiding strategies for characterisation, treatment, storage and disposition/disposal. [2493-033 (2005) : 66]

97. Applicants should be State Registered Biomedical Scientists (Grade 1) or Research Technicians with a relevant first degree and at least 2-3 years experience in at least one of the following areas: immunology, biochemistry and infectious agents. [2493-034 (2005) : 67]

98. Applications are invited for PhD fellowships, plus 3-month and 6-month stays, under the EU FP6 Marie Curie program for Early Stage Training. Areas of interest include, but are not limited to, nickel superalloy design, lightweight aluminium alloys, novel low cost or superelastic titanium alloys, new oxide ceramic based composites and substrate stainless steel development for fuel cells. [2493-038 (2005) : 67]

99. Applications are invited for a tenured lectureship in the area of Synthetic Organic/Medicinal Chemistry within the School of Chemistry. [2493-039 (2005) : 68]

100. Applicants should hold a PhD in an area of chemistry relevant to the position and have a proven track record of excellence, flair and productivity in their field of research. [2493-039 (2005) : 68]
101. Applicants must have a PhD and at least 2 years' postdoctoral experience in an area relevant to one of the following interests of staff: [2493-047 (2005) : 70]

102. Application forms are available on request from Carol Jovanovic […] and should be returned to her by 19 April 2005 together with a CV and statement on the research the applicant would wish to pursue in one of the above research areas. [2493-047 (2005) : 70]

103. The Max Planck Society wishes to increase the share of women in areas where they are underrepresented, and strongly encourages women to apply. [2493-052 (2005) : 71]

104. Opportunities currently exist in the following areas: Medical; Materials; Engineering design; Sensors; Non-linear dynamics [2493-061 (2005) : 73]

105. Medical: Projects in conjunction with Clinical Science & Department of Anatomy in areas of dynamics & control and materials engineering. [2493-061 (2005) : 73]

106. We are an RAE grade 5 department undertaking research in a wide number of areas: Astronomy and astrophysics; Astroparticle theory and cosmology; Organic opto-electronic materials and devices; Particle physics; Polymer physics and soft nanotechnology; Semiconductor physics and devices; Theoretical condensed matter physics [2493-062 (2005) : 73]

107. Candidates should have, or be likely to obtain, a first or upper second class honours degree in a relevant discipline, and should indicate one or more areas of interest from the list of topics mentioned. [2493-063 (2005) : 74]

108. Develop a technological leadership position in the area of coating substrates focusing on flexible electronics [2498-006 (2005) : 52]

109. Experience of developing and applying new technology in the area of genomics or human genetics. [2498-010 (2005) : 53]

110. BioFocus Discovery is a leading Company working with major pharmaceutical and biotechnology companies in the drug discovery area. [2498-011 (2005) : 54]

111. Working in the Pedestrian Safety team your work will be varied and could encompass the following areas: assessment of the slip potential of footwear and flooring research into the prevention of slip and trip accidents; root causes of accidents and behavioural change; accident characteristics of stairs, walkways, ramps and ergonomics issues in prevention of low falls. [2498-016 (2005) : 56]

112. The internal role involves training and developing staff in the team in specific regulatory areas and assisting the Business Unit Head in spotting commercial opportunities and efficient delivery of the services. [2498-017 (2005) : 56]

113. The Clinical Pharmacology (Europe) group manages early phase clinical trials with the Company’s novel compounds over a broad range of therapeutic areas. [2498-021 (2005) : 58]

114. However applications from candidates with experience in other areas of soil science (e.g. nutrient cycling and/or microbial biomass) are also invited. [2498-024 (2005) : 58]

115. We are currently looking for individuals to work within our Research and Development facility, working within the area of drugs of abuse testing [2498-026 (2005) : 59]

116. and other areas. [2498-026 (2005) : 59]
117. You should be educated to degree level in a relevant scientific subject (i.e. biomedical, biology, biochemistry) with three to five years relevant work experience, ideally within the area of drugs of abuse testing, although this is not essential. [2498-026 (2005) : 59]

118. Previous work experience within the area of drugs of abuse testing is ideal but not essential. [2498-026 (2005) : 59]

119. There are a number of areas you could work in. [2498-028 (2005) : 60]

120. To strengthen our natural resource modelling and fisheries management capability we are recruiting a Senior Scientist with a track record of innovation and publication in this area. [2498-032 (2005) : 61]

121. You must have experience of working in a consultancy, industrial or regulatory environment in the area of environmental risk assessment, preferably relating to chemicals in the environment. [2498-032 (2005) : 61]

122. With excellent communication and organisational skills, you will have a good degree in a relevant subject area and basic knowledge of molecular techniques, including PCR and DNA sequencing. [2498-036 (2005) : 63]

123. Neurotoxicology has been identified as a major subject area for the Unit and it is intended that a Centre of Excellence is developed in Newcastle. [2498-037 (2005) : 64]

124. Both roles require a PhD, MSc or equivalent in a biomedical discipline, a flexible approach, and the ability to work on a variety of projects within schedule across different therapeutic areas. [2498-047 (2005) : 67]

125. Fellowships tenable from 1st August 2005 are available in the following subject areas: Biomathematics; Motivations and Means of Global Migration; Chromosomes and Development; (Tephrochronology) [2498-049 (2005) : 68]

126. Following the award of a major £2.7 million grant from EPSRC, we are seeking outstanding candidates for five postdoctoral positions and four PhD studentships (EU citizens only) in the area of photonic crystal fibres (PCFs) and their applications. [2498-054 (2005) : 69]

127. You will demonstrate academic expertise and/or professional experience in a specific area directly relevant to forensic science and we will consider a range of expertise particularly in relation to crime scene investigation, biological and chemical forensic analysis or human identification. [2498-055 (2005) : 70]

128. You should have a PhD and two years’ post-doctoral experience in one or more relevant areas (cell signalling, adipogenesis, micro-array analysis, proteomics). [2498-057 (2005) : 70]

129. Experience in cancer cell biology with expertise in one or more of the following areas: enzymology, HPLC analysis, cell culture, molecular biology, cell signalling, fluorescent microscopy, FACS analysis would be an advantage but it is not a pre-requisite. [2498-059 (2005) : 71]

130. Expertise in one or more of the following areas is essential: • Microfluidics / Lab-on-a-chip systems • Integrated analytical systems consisting of optical, (electro-)chemical, mechanical, or biological components • Biochips / Bio-MEMS devices • Polymer device fabrication [2498-061 (2005) : 71]

131. A position is available in this area at Sheffield from October 1, under the supervision of Dr J K Hobbs and Prof G J Leggett. [2498-062 (2005) : 72]

132. The Department collaborates in these areas with several other UCL centres […] [2498-066 (2005) : 73]
133. The Chair plus a number of the other four posts are available in the area of materials applied to biological and medical systems. [2498-066 (2005) : 73]

134. The remaining posts are available in the areas of structures and fluids with applications in biological and medical systems. [2498-066 (2005) : 73]

135. Areas of expertise relevant to the five posts include: development and application of materials to biological/medical systems theoretical or experimental analysis of human body systems, implants and prostheses, drug delivery systems, applications of engineering to surgery applications of micro-engineering to biological and medical systems and analysis of fluid flows in the human body. [2498-066 (2005) : 73]

136. We undertake research in the areas of oncology, biomaterials, drug delivery, molecular design, pharmacology, physiology, molecular medicine, natural products and pharmacy practice. [2498-067 (2005) : 73]

137. We have an opportunity for an innovative and energetic scientist with an established international reputation in an area relevant to biomedical/pharmacological sciences. [2498-067 (2005) : 73]

138. Qualified to PhD level in an area related to pharmaceutical and/or biomedical microbiology, you will teach general microbiology, disinfection, sterilisation, antimicrobial chemotherapy and undertake other teaching duties. [2498-067 (2005) : 73]

139. PhD studentships in Exeter and Cornwall funded by NERC, BBSRC, EPSRC (including CASE awards), industry and charities are available in the following areas: • Understanding the causes of urban house sparrow population decline • Genetic status of stocked Atlantic salmon populations • Integrative mechanisms controlling gender-assignment in fish • In silico modelling of insect-mediated gene escape from GM crops • Integrating transcriptomics and metabolomics to study plant adaptation • Evolutionary/behavioural ecology of risk and information use by animals • Exploring the plant growth promotion and biocontrol attributes of fungi • Chemical genetics - novel molecular components of plant infection by fungi • Estuarine habitat modifications and their impact on shorebirds • Two NERC projects on environmental/ecological/ecophysiological topics. [2498-068 (2005) : 74]

140. Six further PhD projects (funded by 4-year graduate teaching assistantships) are available in the areas of molecular biology, plant sciences, microbiology, chemical biology, environmental biology and ecology. [2498-068 (2005) : 74]

141. Europe’s leading practical environmental course in one of the world’s major and most rewarding growth areas. [2498-070 (2005) : 74]

142. East Mailing Research is the principal UK contractor for horticultural research and development in the perennial crop sector, with an increasing interest in the complementary areas of environment and landscape research. [2502-007 (2005) : 56]

143. In this critical clinical development area, we devise the commercial strategies that enable us to prepare drug candidates for Phase I-IV trials. [2502-008 (2005) : 57]

144. In particular, we are looking individuals to help us develop business in the following areas: Environmental Microbiology; Occupational Health Services; Other Specialist Services [2502-010 (2005) : 58]

145. We are looking for candidates educated to degree or higher level in food science or a related science area with at least 2 years experience in developing food products. [2502-011 (2005) : 58]

146. The position gives the job holder the opportunity to make a real difference in an exciting new business area. [2502-011 (2005) : 58]
Current areas of research include food allergens, enzymes for time temperature integrators and molecular biology techniques for variety and species identification. [2502-012 (2005) : 58]

It's a growing area which is why we are now looking for more experienced medical and scientific writers to help compile assessment reports and assist in related administrative tasks. [2502-014 (2005) : 59]

In addition, knowledge and proven skills in the following areas: [2502-027 (2005) : 63]

The Council is seeking applications for new Council members in the following areas: • Philosophy • Cell biology/neuroscience • Clinical epidemiology • Immunology • The media [2502-029 (2005) : 64]

The Group develops products in three targeted therapeutic areas: oncology, endocrinology, and neuromuscular disorders and is also engaged in developing certain biological derived products. [2502-034 (2005) : 66]

A first degree in Physics or Electronic/Electrical Engineering, with a subsequent PhD and a research track record of publications in the area of photonic materials is required. [2502-040 (2005) : 68]

Duties will include tissue processing, histology and immunofluorescence staining, and applicants should have experience or knowledge in at least one of these areas, and have relevant academic qualifications up to degree level or equivalent. [2502-044 (2005) : 70]

You will be capable of providing high quality research and organisational support for the groups working in areas that include yeast cell culture, molecular biology and biochemical analysis of proteins. [2502-047 (2005) : 71]

You must hold an Honours degree in Anatomy or related area plus teaching and/or demonstrating experience. [2502-048 (2005) : 71]

Candidates should have or expect to get shortly, a good primary degree in Physiology, Pharmacology, Biochemistry, Cell-biology or similar area. [2502-058 (2005) : 74]

Following the appointment of Professor Peter Gregory as Director of SCRI, Dundee, we are seeking to appoint a Professor to lead and initiate research in Soil Science and teach in areas of Soil Science and Environmental Science from 1 January 2006 or as soon as is possible thereafter. [2502-061 (2005) : 74]

Bursaries and travel funding are currently available for studentships in the following areas: • Synthesis of materials for nanoscale devices • Molecular self-assembly • AFM/STM studies of molecular scale devices • Molecular electronics • Sensors [2502-064 (2005) : 75]

Applicants should possess a good honours degree in Chemistry or Physics or any related subject area and apply to: Professor G.J. Ashwell, The Nanomaterials Group, Cranfield University, Cranfield, Bedford MK43 0AL. [2502-064 (2005) : 75]

Within the School’s extensive Industrial Collaborative Programme, there is an opportunity for the successful students to work closely with companies (e.g. Baxi, E.ON, Gifford, Hoare Lea and Thermacore) in research areas including energy efficiency, renewable energy, energy conservation, and architecture technology. [2502-067 (2005) : 77]

WestCHEM offers opportunities for research in all areas of modern chemistry, including functional materials chemistry, medicinal chemistry, organic and inorganic synthesis, structural chemistry, analytical chemistry, biological chemistry, chemical proteomics and heterogeneous catalysis. [2502-068 (2005) : 77]
Highlighted research areas include: • analytical and environmental chemistry • combinatorial chemistry • e-science - medicinal chemistry • chemical biology • electrochemistry • organic synthesis • organometallic and co-ordination chemistry • solid-state chemistry • supramolecular chemistry • theoretical chemistry and molecular modelling • surface and interfacial science [2502-069 (2005) : 77]

Starting in September, we are seeking to recruit graduates onto our one-year, full time Secondary Postgraduate Certificate in Education programme who have a good background at degree level, or a closely related area, in either Chemistry, Geography, Mathematics or Physics. [2502-072 (2005) : 78]

To help us in this important task and to play a major part in a new initiative that's set to take the UK's health and safety standards to even higher levels, we are now looking for more Regulatory Scientists to join us in the key areas of health effects of chemicals and a biocides permissioning scheme. [2506-003 (2005) : 54]

In this challenging role, we will look to you to be the focus of technical expertise in your product areas and to act as team leader. [2506-005 (2005) : 55]

Responsibilities will include development, management and delivery of research contracts relating to these issues, as well as providing training in this area. [2506-012 (2005) : 58]

A wide range of science features in that work and the Department is looking to strengthen scientific leadership across all its business areas by appointing a Chief Scientific Adviser. [2506-013 (2005) : 59]

At Smith&Nephew we do pioneering work in many important areas, including adult stem cells and tissue engineering. [2506-022 (2005) : 63]

Adept at problem solving, degree educated in Biology and with technical laboratory experience, you will have an understanding of fundamental cell biology procedures and be willing to transfer your skills to other areas such as histology and molecular biology. [2506-022 (2005) : 63]

You will work in our Wound Management Research Programme contributing new ideas within the area of tissue engineering/regenerative medicine. [2506-022 (2005) : 63]

A Platform Leader has responsibility for heading each area of technology. [2506-023 (2005) : 64]

You should be qualified to degree level in Chemistry or a relevant scientific discipline, and should have a minimum of 5 years’ relevant experience in fuel additives, or a related product area. [2506-023 (2005) : 64]

With previous commercial experience gained in areas such as the diagnostic and/or pathology markets [2506-026 (2005) : 65]

you will be required to provide strategic direction in the positioning of Invitrogen key technology platforms within these areas. [2506-026 (2005) : 65]

We require consultants to join our team and commit 100% to the growth of the company and be involved in all areas our work activities. [2506-034 (2005) : 68]

The work will focus mainly on support in preclinical and clinical pharmacokinetic and pharmacodynamic areas. [2506-048 (2005) : 72]

This post will be for a period of 3 years and represents an exciting opportunity to get involved with world-class research in a dynamic area of sensor development. [2506-052 (2005) : 73]
178. The School is rapidly enhancing its portfolio of academic provision with emphasis in areas of Health and Applied Science. [2506-054 (2005) : 73]

179. You will have a good honours degree and preferably a higher degree in an appropriate subject area. [2506-054 (2005) : 73]

180. In addition, you will be tasked with supervising PhD students in the relevant research areas and giving lectures in the field of sustainable development based on ASSET projects. [2506-060 (2005) : 75]

181. Specific subject areas are aerodynamics, lightweight composite structures, energy-saving and electrical systems, and stability and control. [2506-060 (2005) : 75]

182. Areas of research include the development of novel insecticides and the design and evaluation of physical methods of insect detection and control. [2506-063 (2005) : 75]

183. The successful candidate will have a doctoral degree in sensing, estimation, mobile robotics or a closely related area with an understanding of the SLAM problem and contemporary approaches. [2506-070 (2005) : 77]

184. The successful candidate will have a doctoral degree in estimation, mobile robotics, computer vision or a closely related area in computer science and an understanding of the Simultaneous Localisation and Mapping (SLAM) problem and contemporary approaches. [2506-070 (2005) : 77]

185. Applications are invited from UK and international organisations for research and surveys in the following areas: • Chemical contaminants from food contact materials, articles and food production • Reduction of campylobacter and salmonella in poultry • Post-market monitoring strategies for consumption of Novel Foods [2506-075 (2005) : 78]

186. With continued growth, Roche is looking for more ambitious people to join its teams in a wide range of areas. [2511-006 (2005) : 53]

187. Experience in a forensic laboratory in the area of drugs analysis or general chemistry, quality management, report writing and giving evidence in Court is particularly desirable. [2511-007 (2005) : 54]

188. You will have at least 2 years' full-time experience in at least one of the following areas: Process Control Equipment, Laboratory Equipment or Instrumentation. [2511-011 (2005) : 55]

189. With a strong background and experience in working within Intellectual Property, you will be degree qualified with 5 years industry experience or PhD and experience in relevant industry sector and scientific area. [2511-022 (2005) : 58]

190. CSIRO recognises the need to ensure that we have emerging talent in areas critical to Australia's future [2511-030 (2005) : 62]

191. Details of key research areas in CSIRO Divisions or National Flagship programs can be found on the CSIRO Careers website. [2511-030 (2005) : 62]

192. Experience in one or more of the following areas would be advantageous: mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming, database design. [2511-036 (2005) : 63]

193. Our foremost requirement is for scientists with expertise in the following areas: * Reproductive Toxicology * Inhalation Toxicology * Intravenous Infusion Closing * Chronic Toxicology [2511-037 (2005) : 63]
194. In addition, we encourage cross-training in other areas of toxicology as part of career development and we support the publishing or presentation of work at scientific meetings. [2511-037 (2005) : 63]

195. BioMed Central Ltd is also looking for an Assistant Editor to join the team responsible for the peer-review process of published articles in a wide range of life science and clinical research areas. [2511-039 (2005) : 65]

196. Working in a unique information-based environment, your key tasks will include abstracting and indexing scientific and technical reports and conducting literature searches of both 'defence controlled' and 'open literature' sources across a wide range of subject areas. [2511-042 (2005) : 66]

197. The successful candidate will have a doctorate degree (or be working toward submission of thesis) in a relevant area, proven skills in detailed optical measurements and computational simulation techniques. [2511-051 (2005) : 70]

198. There may be some more advanced undergraduate or MSc teaching, depending on the area of expertise. [2511-054 (2005) : 71]

199. The School has considerable involvement on Health and Safety issues, and whilst you have the support of a dedicated full-time Safety Advisor, you will be expected to play a leading role in this area. [2511-056 (2005) : 72]

200. The successful candidate will be able to demonstrate considerable experience in all of these areas. [2511-056 (2005) : 72]

201. Areas of experience could be in spectroscopic methods and/or methods of separation and/or quality management. [2511-060 (2005) : 73]

202. However, applications are invited from researchers with more general experience in analytical methods interested in developing their expertise in this rapidly moving area. [2511-064 (2005) : 73]

203. The work will involve molecular and cell biological techniques. Previous experience in these areas would be an advantage but is not essential. [2511-067 (2005) : 74]

204. General areas of research carried out by the BPSRG are: Biomedical Sciences: haematology, oncology, immunology, nutrition, microbiology, parasitology and vector biology; medical physics and sports science. Pharmaceutical Sciences/Pharmacy: organic synthesis of bioactive molecules, medicinal chemistry, drug action and drug delivery, and pharmacology. [2511-068 (2005) : 75]

205. Applicants should identify their area(s) of interest and send a current c.v. with the names of two academic referees to: Professor Declan Naughton / Professor Angela Russell, BPSRG Research Studentships, School of Life Sciences, Kingston University Penrhyn Road, Kingston, Surrey KT1 2EE by 30th August, 2005. [2511-068 (2005) : 75]

206. In the context of its Environment programme, Cefic-LRI is requesting grant applications from research institutes in the areas of: Evaluation of fish embryo and fish cell line tests for their potential use as alternatives to fish acute studies; Establishing a bio-concentration factor (BCF) gold standard database [2511-075 (2005) : 77]

207. Recognised globally for our multi-disciplinary approach to research in the three key areas of manufacturing, materials and sustainable systems, our focus is on fundamental research and its application to meet the needs of industry and society. [2511-076 (2005) : 78]
208. Unfortunately, and unexpectedly, there are not enough people with the crucial five to 10 years of experience that jobs in these high-growth areas usually require - and the shortage is expected to get worse over the next five years. [2515-002 (2005) : 52-53]

209. Bright young people feel that they can get better jobs in other areas, such as law and financial services. [2515-002 (2005) : 52-53]

210. They could fill a vacancy with a graduate who has only some of the skills needed, or someone currently working in a related area of the environmental sector, and accept the task of filling experience gaps. [2515-002 (2005) : 52-53]

211. MSc or PhD and 5 years experience in the following areas: • Catchment modelling • Flooding and low flow assessments • Integrated assessment of hydrology and ecology [2515-004 (2005) : 54]

212. MSc or PhD and 5 years experience in one or more of the following areas: • Freshwater ecology for flooding and low flow assessments • Terrestrial ecology (particularly botany) and habitat management [2515-004 (2005) : 54]

213. BSc and/or MSc and 1-3 years experience in one or more of the following areas: • River or coastal development studies • Ecology (terrestrial/aquatic) • Environmental impact assessment [2515-004 (2005) : 54]

214. And they’re also your goal as part of a team co-ordinating projects to deliver biodiversity improvements, joining our Anglian Region, you’ll focus on an area with incredible environmental diversity, but equally diverse challenges from agriculture, development, water demands and changing coastlines. [2515-005 (2005) : 55]

215. In this varied role, you’ll be part of a team ensuring good practice is applied consistently within the Region and will be our internal expert on specialist IT systems and other areas of hydrometry. [2515-005 (2005) : 55]

216. Ideally you’ll have a degree or equivalent in an Environmental Science subject and relevant experience - but if you don’t, and have strong skills in a related area, we might consider training you for this role. [2515-005 (2005) : 55]

217. The group is expanding and you will need to contribute to defining new opportunities and areas for development. [2515-014 (2005) : 59]

218. The group is expanding and you would contribute to defining new opportunities and areas for development. [2515-014 (2005) : 59]

219. In addition the group is expanding and as such you can have immediate impact helping to define new opportunities and areas for development. [2515-014 (2005) : 59]

220. This is your chance to join us - and play a key role in accelerating the pace of innovation in a number of important areas of medical need. [2515-018 (2005) : 61]

221. We're looking for a senior-level individual to join our Research and Technology team, and provide expert manufacturing process support to various project teams, especially in the area of granulation. [2515-018 (2005) : 61]

222. You will also lead technological and scientific developments in this key area, and drive your own mix of internal and external research programmes. [2515-018 (2005) : 61]
223. Because in very many **areas**, the difference between your success and failure could affect millions of people. [2515-023 (2005) : 63]

224. We provide for our clients authoritative economic and technical analysis of markets, technologies, and policy options. Sustainable and clean technologies are a particular **area** of expertise. [2515-040 (2005) : 70]

225. Your relevant tertiary qualifications or equivalent professional expertise is required in both of the following **areas**: [Research Physicists/Engineers; Textile Technologists] [2515-041 (2005) : 70]

226. NIAB is engaging in a major new activity in the **area** of pre-breeding for food, non-food and ornamental plants. [2515-042 (2005) : 70]

227. You will rotate through all **areas** of the laboratory and work closely in conjunction with the Lead Consultant Haematologist, Blood Bank Manager, Transfusion Nurse and the Hospital Transfusion Team. [2515-055 (2005) : 74]

228. BioFocus Discovery Ltd is a leading company working with international pharmaceutical and biotech companies in the drug discovery **area**. [2515-057 (2005) : 74]

229. These posts are in the **areas** of chemistry/residues, operator exposure and project management. [2515-061 (2005) : 76]

230. You will be expected to underpin and lead further developments in the Field which would allow the courses to diversify, particularly through the creation of more specialised Level 2 and 3 modules within the candidates own research **areas** and through the supervision of student projects and dissertations. [2515-062 (2005) : 76]

231. In particular we would welcome applications from individuals who have experience in one or more of the following **areas**: • Human biology, anatomy or physical anthropology, forensic applications of DNA • Forensic palynology or forensic entomology and their relation to environmental profiling • Drugs of abuse related to analytical chemistry or toxicology • Materials, particularly related to fibres, documents, arson and firearms. [2515-062 (2005) : 76]

232. You will be expected to contribute to teaching and to the development of research in your particular **area** of expertise. [2515-062 (2005) : 76]

233. The Department of Psychology of McGill University seeks applicants for a Canada Research Chair (Tier 1) in the **area** of behavioural health. [2515-067 (2005) : 78]

234. Specific research **areas** of interest include, but are not limited in, treatment adherence, motivation toward behavioural rehabilitation, and the study of interactions between patients and health-care professionals. [2515-067 (2005) : 78]

235. A curriculum vitae, description of current and proposed **areas** of research, selected reprints of published or in-press research articles, [2515-067 (2005) : 78]

236. a description of **areas** of teaching competency, interest, and approaches, and other relevant material, should also be sent to: [2515-067 (2005) : 78]

237. For one post we are seeking candidates with research interests in the physical chemistry of soft condensed matter, nanomaterials or polymers, to build on major new investment at Reading in these **areas** and to take advantage of the forthcoming Diamond Synchrotron facility nearby. [2515-068 (2005) : 78]

238. The postholder will work in a team of technicians but should have particular skills and knowledge in the **area** of Microbiology. [2515-072 (2005) : 79]
The School is recognised for its excellent teaching quality in the area of Biosciences (QAA 24/24 points) and many of the staff are research active and are members of the Biomedical and Pharmaceutical Sciences Research Group (BPSRG, PE 3A). [2515-077 (2005) : 80]

You should possess a PhD in molecular/cell biology or a closely related area and should have some experience of teaching in higher education. [2515-077 (2005) : 80]

Applications are invited from candidates with expertise in any area of Molecular and Cell Biology but applicants with additional expertise in either molecular genetics or bioinformatics would be particularly welcomed. [2515-077 (2005) : 80]

As a result of £8.3m of recent funding, the University of Liverpool is launching a new Research Centre in the area of accelerated materials discovery. [2515-081 (2005) : 82]

Applicants should have strong interpersonal skills and extensive experience of managing a research laboratory, preferably in the area of materials chemistry. [2515-081 (2005) : 82]

Applicants should have relevant postgraduate research experience in the area of Materials Chemistry, ideally with some knowledge of automated synthesis or automated characterisation techniques. [2515-081 (2005) : 82]

We are expanding our research and development in the area of gene therapy for neurodegenerative diseases, particularly Parkinson's disease and motor neurone disease. [2519-011 (2005) : 58]

We have vacancies in a number of therapeutic areas, as well as in the newly formed Biomarkers and Translational Biology Group (BTB). [2519-016 (2005) : 59]

The posts require expertise in one of the following areas: ecotoxicology; environmental chemistry; fate and behaviour of nano-materials in the environment; hazard and risk assessment of nano-materials. [2519-027 (2005) : 63]

We are offering 3 Post Doctoral Fellowships in the areas of Mapping Underground Infrastructure, Biodegradable Composites and Functional Composites. [2519-029 (2005) : 64]

The Bioinformatics and BioStatistics Service provides support to Cancer Research UK-funded scientists primarily in the areas of expression data analysis, sequence analysis, genomics and biostatistics. [2519-036 (2005) : 66]

You will also participate in a range of research projects in this area, often collaborating with other laboratories in Europe and commercial organisations such as oil companies. [2519-040 (2005) : 68]

It is part of the Institute of Molecular Medicine, Epidemiology and Cancer Research, and conducts regional, national and international phase II/III, multi-centre trials in the areas of cancer (minimally invasive surgery) care of the elderly, mental health, mother and child health, primary care and surgery. [2519-060 (2005) : 73]

Applicants should hold a PhD in a relevant subject area. [2519-062 (2005) : 74]

Applicants should hold a PhD in a relevant subject area. [2519-062 (2005) : 74]

We require a postdoctoral researcher to carry out research in mathematical modelling of functional MRI data, in the areas of timeseries analysis, spatial processes, independent component analysis and Bayesian methods. [2519-066 (2005) : 75]
As a result of £8.3M of recent funding, we are launching a new Research Centre in the area of accelerated materials discovery. [2519-067 (2005) : 75]

You will carry out research, training, and teaching in the Centre and you should have a strong publication record in a relevant area of materials chemistry such as synthesis/materials characterisation. [2519-067 (2005) : 75]

Candidates with an excellent research background in computational or theoretical studies in any area of chemistry will be considered. [2519-068 (2005) : 76]

The Department of Chemistry (www.uwo.ca/chem) is a large research intensive department with strong programs in many areas of chemistry and with good interdisciplinary links to research groups in other departments in the Faculties of Science, Engineering and Medicine and Dentistry. [2519-068 (2005) : 76]

Specific areas of interest are: physics of new electronic and magnetic materials; oxide film growth by pulsed laser deposition; ionic (oxide and proton) and mixed conducting materials; synthesis of new fulleride materials; synthetic oxide chemistry; high pressure synthesis; polymer synthesis; surfactants; chemometrics; organic synthesis; supercritical fluids; nanoparticles and colloids as "building blocks" for higher-order structures; metal-organic and inorganic nanoporous materials. [2519-071 (2005) : 76]

It should be noted that applications from well-qualified candidates with interests in other areas are also encouraged. [2519-071 (2005) : 76]

A PhD in chemistry, materials science or physics and an excellent publication record are essential, with skills in the specific areas identified above desirable. [2519-071 (2005) : 76]

Applications are invited from UK and international organisations for research in the following areas: Chemical contaminants from food contact materials and food production Microbiological risk management Foodborne diseases Food law enforcement Food authenticity [2519-082 (2005) : 79]

We now seek people who would thrive on the challenges and opportunities of working in an underexploited, but expanding, area of drug discovery as key members of a company with very ambitious plans. [2524-002 (2005) : 52]

A PhD with several years' postdoctoral experience, preferably in industry you will have good electrophysiology skills and, preferably a background in a cardiovascular, endocrine or CNS area. [2524-002 (2005) : 52]

Acta manage products from concept to approval, utilizing the skills and experience of professionals who have worked in the specific product areas in government and industry. [2524-009 (2005) : 54]

Potential areas of study include comparison of the methods of science and religion, neuroscience, quantum uncertainty, and spirituality and health. [2524-010 (2005) : 55]

The Initiative, which is to be carried out in partnership with industry, governments, scientists and communities, is focused on delivering bycatch conservation outcomes in three areas: technology/gear innovation, policy frameworks and conservation zoning. [2524-019 (2005) : 59]

6792
Owing to increasing demands from customers, we continue to grow and now need additional forensic scientists in a number of areas. [2524-024 (2005) : 61]

A relevant scientific degree is required and a PhD in Cell Biology, Molecular Biology or similar area would be an advantage. [2524-030 (2005) : 62]

We are seeking a researcher in the area of pharmacogenomics and personalized medicine to join our publishing team. [2524-038 (2005) : 64]

You will work closely with scientists and engineers in both areas and with forensic case officers, you may be required to present evidence in Court. [2524-045 (2005) : 66-67]

Qualified to a minimum of BSc with 2+ years' experience in this area, you will have good interpersonal skills and basic IT knowledge. [2524-046 (2005) : 68]

You will have a strong scientific background with either a Ph.D. degree in Computer Science/Systems Engineering or an M.Sc. with similar research experience in a relevant area. [2524-051 (2005) : 70]

You will have either a Ph.D. degree in Computer Science/Systems Engineering or an M.Sc. with similar research experience in a relevant area. [2524-051 (2005) : 70]

We are seeking candidates with expertise in one or more of the following areas: • Science Education or Science Communication • Lecturing experience in Biomedical Diagnostics • Development & coordination of Masters Degree programmes [2524-053 (2005) : 71]

We seek researchers of outstanding calibre and a proven record of attracting research funding for this senior position which can be in any area of Solar System Physics. [2524-055 (2005) : 72]

Programmes include Foundation, Honours and Masters degrees in the areas or Agriculture, Animal Science, Equine, Sports Sciences and Management. [2524-058 (2005) : 73]

Areas of specialism include: Animal production (livestock/poultry), behavioural scientist (general behaviour/companion animal), avian science, aquatic science and wildlife management. [2524-058 (2005) : 73]

A first degree in Physics or Electronic/Electrical Engineering, with a subsequent PhD and a research track record of publications in the area of photonic materials is required. [2524-061 (2005) : 74]

The Department and the College are seeking outstanding candidates with a proven record of scholarship and research in the general area of either [A] Microanalysis of Materials or [B] Polymers. [2524-063 (2005) : 74]

Preference will be given to applicants with experience and research vision in one of the highlighted areas. [2524-063 (2005) : 74]

Applications are welcomed from candidates in any area of Medicinal Chemistry/Drug Design/Chemical Biology/Biological Chemistry, or those with chemistry or pharmacy training, an appropriate PhD and a strong background in synthetic organic/medicinal chemistry. [2524-064 (2005) : 75]

Applications from candidates who would strengthen or complement these areas are especially welcome. [2524-064 (2005) : 75]

Experience in any of these areas will be required. [2524-066 (2005) : 75]
287. We are seeking outstanding candidates to develop our research and teaching in two areas. [2524-067 (2005) : 76]

288. There is flexibility in the area of specialism of this position. [2524-067 (2005) : 76]

289. There is flexibility in the area of specialism of this position. [2524-067 (2005) : 76]

290. You will interact with and strengthen the research capability in one or more of these areas. [2524-067 (2005) : 76]

291. A first degree in engineering or a physical sciences subject, and a research track record of publications in the area of surveillance or communications technologies are required. [2524-069 (2005) : 76]

292. A PhD in a relevant subject area would be desirable. [2524-069 (2005) : 76]

293. The person will work in a team of technicians providing a service in the areas of Chemistry and Biology. [2524-070 (2005) : 76]

294. With colleagues, you will also review and identify training needs in the area of biological and GM safety and support the provision of the training. [2524-071 (2005) : 77]

295. You will be responsible for overseeing the successful operation of state-of-the-art analytical equipment, which underpins the biopharmaceutical and biotechnology area. [2524-073 (2005) : 77]

296. At the forefront of your field, you will provide academic and scientific leadership in areas of research that complement the current ORC portfolio (see www.orc.soton.ac.uk). [2524-074 (2005) : 78]

297. Applications are invited from UK and international organisations for research and surveys in the following area: National Diet and Nutrition Survey: Rolling Programme [2524-077 (2005) : 78]

298. [The Irish government] has set high targets for itself to encourage industry R&D, and is building an army of scientists in its strongest areas such as biotechnology and regenerative medicine, aiming to be among the best in the world. [2528-002 (2005) : 58-59]

299. UCD wishes to expand its current research portfolio into the area of toxicology as applied to food safety, quality and human health. [2528-006 (2005) : 61]

300. Candidates should have a PhD degree and should ideally have postdoctoral research experience in the area. [2528-006 (2005) : 61]

301. The successful candidate will be expected to initiate and conduct a research programme in the area of food toxicology and form collaborative links with national and international research teams. [2528-006 (2005) : 61]

302. Applicants should have previous experience in managing and directing multidisciplinary research teams and should have research interests that lie within the primary focus areas of the NCSR (www.ncsr.ie). [2528-009 (2005) : 63]

303. The successful candidate will have demonstrable skills in the following areas: • Leadership in Research • Research Excellence • Communication • Management and Organisational • Strategic Vision • Commercialisation [2528-009 (2005) : 63]

304. The successful candidate should have a PhD degree in a relevant area or a good BSc degree and significant relevant experience. [2528-014 (2005) : 64]
305. BioFocus Discovery Ltd is a leading company working with international pharmaceutical, agrochemical and biotech companies in the discovery area. [2528-017 (2005) : 66]

306. In the Medicinal Chemistry Division we work with a number of major pharmaceutical and biotech companies on a range of biological targets across multiple therapeutic areas. [2528-017 (2005) : 66]

307. In these key roles, you’ll play your part in supporting the science of the future over a vast range of exciting areas. [2528-026 (2005) : 70]

308. We are looking for up to three exceptional individuals to join our public sector programmes, working with industry, academia and government to set and implement strategy for future technology developments in our core areas. [2528-030 (2005) : 71]

309. Ideally you will be a recent graduate/post graduate probably in a chemistry/chemical engineering/biotechnology discipline, preferably with two or more years' industrial experience, and will have a thorough grounding in one of our core technology areas. [2528-030 (2005) : 71]

310. A competitive salary will be offered and there is scope to broaden the role into new areas in the future. [2528-030 (2005) : 71]

311. If you have experience in any area of molecular biology, cellular biology or immunology, and would like to work in an exciting and challenging environment, please send us your CV for consideration. [2528-031 (2005) : 72]

312. East Malling Research is the principal UK contractor for horticultural research and development in the perennial crop sector, with an increasing interest in the complementary areas of environment and landscape research. [2528-033 (2005) : 72]

313. Alternatively, as part of our graduate training scheme, you will receive 6 months' intensive training across all of our research areas and will then participate in any one of our projects. [2528-038 (2005) : 74]

314. Join us and you'll have access to resources that few can match, along with the scope to develop your career into a range of scientific areas. [2528-042 (2005) : 76]

315. Help shape our Respiratory Disease Area for cystic fibrosis at our state of the art research facility in Horsham, Sussex and you'll have the freedom to do just that. [2528-043 (2005) : 77]

316. The post holder will be expected to maintain and develop these relationships in his or her areas of responsibility. [2528-044 (2005) : 77]

317. Forest Laboratories UK Ltd is a subsidiary of Forest Laboratories Inc. USA, involved in the development and marketing of ethical and OTC medicines in a wide range of therapeutic areas. [2528-049 (2005) : 79]

318. We'll have opportunities in the following areas: Zoological Field Assistant; Electronic Field Engineers; Physicists / Antarctic Meteorologists [2528-050 (2005) : 80]

319. You will ideally have a PhD in Pharmacology/Physiology or a closely related subject and additional professional experience within these subject areas would be welcomed. [2528-055 (2005) : 82]

320. You would be expected to support developments in the Field which would allow the courses to diversify, particularly through the creation of more specialised Level 2 and 3 modules within your own research areas and through the supervision of student projects and dissertations. [2528-055 (2005) : 82]
In particular we would welcome applications from individuals who had experience in one or more of the following areas: 1. Forensic archaeology, anatomy or physical anthropology. 2. Forensic palynology or forensic entomology and their relation to environmental profiling. 3. Drugs of abuse related to analytical chemistry or toxicology 4. Materials, particularly related to fibres, documents, arson and firearms. [2528-055 (2005) : 82]

You will be expected to contribute to teaching and to the development of research in your particular area of expertise. [2528-055 (2005) : 82]

Relevant research areas include synthetic polymer chemistry, polymer nanocomposites and organic-inorganic hybrids. [2528-060 (2005) : 85]

Funds are available to support a high calibre Post Doctoral Research Fellow to conduct international quality research leading to publications and further grant funding in support of research in biosciences in the subject area "Allied Health Professions and Studies". [2528-070 (2005) : 88]

Key research areas within the BPSRG include: Biomedical Sciences: haematology, oncology, immunology, nutrition, microbiology, parasitology and vector biology, medical physics and exercise physiology. [2528-070 (2005) : 88]

The School of Biomedical & Natural Sciences has been awarded "excellence" status across all subject areas for teaching quality, and in recognition of this has been awarded maximal funding by HEFCE to establish a national Centre for Excellence in Teaching and Learning in Science. [2528-075 (2005) : 89]

We invite applications from outstanding students who wish to study for a doctorate, commencing October 2006, in any of the following areas • Asymmetric synthesis methodologies, both catalytic and stoichiometric • Bio-organic and bio-inorganic chemistry • Biocatalysis and biotechnology • Biophysical chemistry • Carbohydrate science • Chemical biology • Chemical genetics and combinatorial chemistry • Coordination and supramolecular chemistry • Electrochemistry • Electronic liquids • Electronic structures of inorganic and organometallic molecules • Hydrogen storage • Molecular imaging • Nanotechnology • Natural product synthesis • Organic synthesis of new materials possessing new optical and conducting properties • Organic synthetic methodology • Organometallic chemistry and catalysis • Photochemistry and reaction dynamics • Protein structure, dynamics and engineering • Single molecule chemistry • Spectroscopy and molecular structure • Structure at interfaces • Surface chemistry • Synthetic and structural solid-state chemistry • Theoretical chemistry • Total synthesis. [2528-085 (2005) : 91]

2006

1. Experience in a forensic laboratory in the area of drugs analysis or general chemistry, quality management, report writing and giving evidence in Court is particularly desirable. [2533-010 (2006) : 48]

2. You will also collaborate within other areas of the VLA, and first class research institutes to provide modelling and statistical inputs into projects on a wide range of pathogens, as well as leading and developing modelling projects from within the group. [2533-022 (2006) : 52]

3. Our modern well-equipped research facility in Alnwick is engaged in the development of a wide range of new pharmaceutical products and is helping us develop leading positions in seven major therapeutic areas: cardiovascular disease, thrombosis, oncology, diabetes, central nervous system, internal medicine and vaccines. [2533-026 (2006) : 54]

4. You will be educated to PhD level in a relevant area, with at least five years' experience of pharmacokinetics and drug development, gained within the pharmaceutical industry. [2533-026 (2006) : 54]
5. To carry out research within bioscience areas to support all stages in the set up of a venture company from conception to point of sale. [2533-031 (2006) : 55]

6. To carry out research within renewable energy and low carbon technology areas on an existing project in support of the Carbon Trust. [2533-031 (2006) : 55]

7. Or as a recent graduate, you may be looking for the chance to make your mark in an emerging area of pharmacology. [2533-036 (2006) : 57]

8. Specifically in the areas of: Probiotics; Molecular methods for identification; Immune modulation; Biomarkers to show health benefits [2533-038 (2006) : 57]

9. Established 70 years ago, Yakult the pioneering international probiotic company is committed to educating and advancing research in areas of intestinal health. [2533-038 (2006) : 57]

10. The successful candidate will have a PhD or postdoctoral experience in computer vision, computer graphics or a closely related area together with a good first degree in engineering, computer science or related discipline. [2533-043 (2006) : 59]

11. Applicants should have a PhD in a relevant ecological or environmental subject area, experience of GIS and the manipulation of large spatial datasets. [2533-044 (2006) : 59]

12. Requirements: BSc. (Hons) in Biology/Biochemistry, PhD in Biosensor Development or related area; relevant employment record in medical device/diagnostic industry at senior scientist/management level. [2533-045 (2006) : 59]

13. Preference will be given to researchers with a PhD in Sensor Technology or related area with experience in electrochemistry/biosensor development and micro-sensor fabrication techniques. [2533-045 (2006) : 59]

14. Applications are invited from all areas of AMOPP from candidates with significant accomplishments and promise for future achievements. [2533-047 (2006) : 60]

15. The main area where additional help is required is the SEARCH study, a double-blind, randomised clinical trial with 12,064 patients randomised across 88 centres. [2533-048 (2006) : 60]

16. You will have, or be about to obtain, a PhD in a relevant area of Science or Engineering, with a proven ability of conducting high quality experimental and/or theoretical/numerical research in thermoacoustics, thermo-fluids and/or acoustics and very good written and oral communication skills. [2533-051 (2006) : 61]

17. You should have an HNC in biological science or a related area and previous laboratory experience of molecular biology techniques. [2533-058 (2006) : 62]

18. Two, four year studentships funded under the above scheme will be available from October 2006 for the following research areas: Comparative genetics of germination in Arabidopsis and cereals; Improving the zinc (Zn) composition of Brassica crops [2533-061 (2006) : 63]

19. Our research encompasses both pure and applied science that find solutions to specific scientific, and technological problems in traditional disciplines and new interdisciplinary areas. [2533-063 (2006) : 64]

20. Expressions of interest in the form a letter detailing research area together with a CV and the names of 2 referees to: [2533-064 (2006) : 64]
21. The first year combines taught courses with laboratory rotations to broaden students' theoretical and technical knowledge in the subject area of the Programme, before embarking upon a three year PhD project. [2533-066 (2006) : 65]

22. Opportunities exist to join NPL as a Higher Research Scientist in the following areas: [Primary Electrical Measurement; Thermophysical Properties; Acoustics [2537-002 (2006) : 57]

23. Candidates should have a PhD or equivalent experience in hydro-ecology or related subject area. [2537-005 (2006) : 58]

24. You will focus on the areas of water recycling and water efficiency from pilot schemes to full-scale implementation on a range of exciting new sustainable water initiatives. [2537-007 (2006) : 59]

25. We aim to win, and this post is key to our success. As Deputy Director of OIE/FAO/EU International Reference Laboratory for Avian Influenza and Newcastle Disease, based at VLA Weybridge, you will be responsible for the research that underpins our international role in this high profile area, as well as providing support to the Director in the international forum. [2537-008 (2006) : 60]

26. Ideally candidates should have a strong background in synthetic organic chemistry, especially in the areas of palladium-catalysed carbon-carbon bond formation and parallel solution phase combinatorial synthesis. [2537-010 (2006) : 60]

27. A key area of responsibility is in liaising between editorial and web and print production so excellent communication skills are required, as is the ability to work with colleagues in an efficient and flexible manner. [2537-012 (2006) : 62]

28. In this role you will be leading the European clinical area of a global programme for assigned development candidates. [2537-020 (2006) : 65]

29. The position on offer will allow you to play a major role in the development of Council research policies within the remit of its portfolio, and exists in the following key area: Infections and Immunology [2537-025 (2006) : 67]

30. The courses aim to teach advanced laboratory techniques in leading-edge areas, principally genomics-related. [2537-036 (2006) : 70]

31. You will possess a PhD in genetics, genomics or other related area with at least three years' relevant research experience, although candidates with an MSC and at least five years' research experience will also be considered. [2537-036 (2006) : 70]

32. These posts are opportunities for dynamic, result-oriented and well-qualified individuals with a minimum qualification of a PhD in a relevant scientific area and at least two years experience as leader of a research group (consisting of two to five researchers plus technical support staff). [2537-038 (2006) : 70]

33. Relevant scientific areas include physics, materials science or chemistry. [2537-038 (2006) : 70]

34. The applicant must have at least five years post-doctoral experience in areas such as nanocomposites, bionanotechnology or nanostructured materials. [2537-038 (2006) : 70]

35. Relevant scientific areas include laser physics, materials science, engineering or electronics. [2537-038 (2006) : 70]
36. The applicant must have at least five years post-doctoral experience in areas such as solid state light sources, fibre optic sensors, electro-optic materials or laser design (especially femto-second lasers). [2537-038 (2006) : 70]

37. With continued growth, Roche is looking for ambitious people to join its teams in a wide range of areas. [2537-046 (2006) : 73]

38. This should be in the areas of population dynamics or mathematical modelling. [2537-053 (2006) : 75]

39. There is an exciting opportunity for a highly motivated self starter to contribute to and initiate research and development activity for our industrial clients in the areas of new product development, process development and food packaging. [2537-057 (2006) : 77]

40. The Assistant will, after discussion with the project supervisors, select a research project for studies leading to the degree of PhD from one of the following areas: • Predictive microbiology and bioinformatics • Survival of foodborne pathogens • Probiotic microorganisms and human intestinal microbiology • Natural fermentations. [2537-058 (2006) : 78]

41. The Institute now intends to develop expertise in the area of scanning probe microscopy of organic crystals, and especially pharmaceutical materials. [2537-060 (2006) : 79]

42. Initial work will focus on the interface of crystalline and amorphous domains. Applicants are therefore sought from experimentalists with experience in these areas. [2537-060 (2006) : 79]

43. The second area involves using mAbs to augment T-cell responses to tumour by blocking or stimulating co-receptors in the immune system. [2537-062 (2006) : 79]

44. Applications are invited for a Lectureship in Soil Biology, or a closely related area, tenable from 1 September 2006. [2537-063 (2006) : 80]

45. We also seek to identify up to five individuals in the area of solid oxide fuel cell technology to work on a project initially to be subcontracted from St Andrews Fuel Cells Ltd to St Andrews University. [2537-065 (2006) : 80]

46. Applications are invited within the broad areas of Medicinal and Biological Chemistry, Synthesis, Photonics, Materials and Catalysis and Chemical Nanoscience. [2537-067 (2006) : 81]

47. We welcome applications from students with interests throughout the School's research areas: Power Electronics, Drives and Machines; Communications and Signal Processing; Microelectronics Technology; Microelectronics Design. [2537-067 (2006) : 81]

49. For further details of staff and research areas visit www.ncl.ac.uk/mech [2537-067 (2006) : 81]

50. The Department of Health and Human Sciences is looking for enthusiastic and student-focused part-time professionals to help in the delivery of a range of undergraduate and postgraduate courses in the areas of Biology, Molecular Biology, Biochemistry, Chemistry and Nutrition commencing in February 2006. [2537-069 (2006) : 82]

51. Applicants should be appropriately qualified in one or more of the above areas and preferably have experience of teaching in an HE environment. [2537-069 (2006) : 82]
The successful candidates will have an outstanding record of research, or have demonstrated outstanding research potential, in the subject area and will be expected to take leading roles in a vibrant research programme at the energy and symmetry frontiers, in particular in the exploitation of data from the LHC. [2537-075 (2006) : 84]

The position would suit a capable experimentalist who wishes to make a contribution to an exciting and rapidly growing area of technology. [2537-082 (2006) : 85]

The Division of Molecular Biosciences is well equipped with international leading expertise in the following research areas: structural biology, biochemistry, bioinformatics, enzymology, glycobiology and membrane proteins. [2537-086 (2006) : 87]

In the first year, students will have an opportunity of registering for an MRes degree in which they will rotate through three laboratories of their choice prior to selecting their thesis area and mentor. [2537-087 (2006) : 87]

They have active research programmes in support of that advice; current areas of interest include taxonomy and biology of honey fungus, Phytophthora, powdery mildews and box blight. [2541-003 (2006) : 56]

Here's your chance to work with them – even those who are outside of your specialist area. [2541-004 (2006) : 57]

We're looking to build our team in the following areas: Toxicology; Microbiology; Environmental Science; Occupational Safety [2541-004 (2006) : 57]

To find out more about Unilever and SEAC, view details on the individual roles available, and read some profiles of people working in these areas, please visit www.unilever.co.uk/seac [2541-004 (2006) : 57]

Keeping these brands at the very top of their respective trees, of course, also represents a big challenge. That's why we're looking to build our team in the following areas: Toxicology; Microbiology; Environmental Science; Occupational Safety [2541-007 (2006) : 59]

To find out more about Unilever and SEAC, view details on the individual roles available, and read some profiles of people working in these areas, please visit www.unilever.co.uk/seac [2541-007 (2006) : 59]

The area we police is one of the most unique in the country, as is this opportunity. [2541-008 (2006) : 60]

Now, we are looking to build our team in the following areas: Toxicology; Microbiology; Environmental Science; Occupational Safety [2541-011 (2006) : 61]

To find out more about Unilever and SEAC, view details on the individual roles available, and read some profiles of people working in these areas, please visit www.unilever.co.uk/seac [2541-011 (2006) : 61]

Astex Therapeutics is a world-leading UK based biotechnology company committed to developing molecularly-targeted drugs in areas of unmet medical need. [2541-015 (2006) : 64]

The role will support a range of Pre-clinical and Clinical stage projects in the oncology area. [2541-015 (2006) : 64]
67. Join us and inspire the direction of our research as we blend biochemical systems to electronics in areas such as molecular diagnostics and healthcare. [2541-016 (2006) : 64]

68. Vacancies exist in the following areas: [Water Efficiency; Acoustics; Wind Tunnel Research & Environmental Assessment; Environmental Impact Assessment; Wind Tunnel Research & Environmental Assessment [2541-022 (2006) : 67]

69. They offer exceptional customer support in key areas, including: regulatory issues, application techniques, interpretation of scientific studies, product logistics, product certification, consistent product delivery. [2541-027 (2006) : 68]

70. Lipid Nutrition is focusing on the following three health areas: Body Weight Management, Heart Health and Natural Defense. [2541-027 (2006) : 68]

71. We develop technology and provide technical guidance across a range of areas for the UK Police and government departments. [2541-028 (2006) : 69]

72. Internal promotion has created these two senior roles, where research is focused in the CNS and oncology therapeutic areas. [2541-029 (2006) : 69]

73. As well as the opportunity to continually develop your abilities within a challenging area, you'll enjoy a good benefits package that includes 28 days' holiday in addition to statutory bank holidays and a generous final salary pension scheme. [2541-037 (2006) : 74]

74. As Head of Strategy and International Relations, you will assist EUMETSAT's Director General in implementing key areas of EUMETSAT strategy [2541-039 (2006) : 75]

75. and develop related business areas in conjunction with existing and new partners. [2541-039 (2006) : 75]

76. To be successful, you should have a University degree or equivalent in an environmental science, meteorology or a relevant technical area, and a minimum of 6 years experience in the planning and management of international satellite activities, with proven experience of successful negotiations. [2541-039 (2006) : 75]

77. We are specifically seeking expertise for the vacancies in the following areas: Ecology/Ecotoxicology; Environmental Fate and Behaviour [2541-047 (2006) : 77]

78. Ideal candidates will hold a PhD in Bioinformatics, Statistics or equivalent or have a significant record of post-graduate achievement in these areas. [2541-050 (2006) : 78]

79. Ideally, you will hold or be completing an MSc in statistics or a related field and have an awareness and interest in the application of statistics in the biological/medical areas. [2541-050 (2006) : 78]

80. In this key role, you'll ensure that financial targets are met, generate an appropriate forward load and determine future areas of activity. [2541-054 (2006) : 80]

82. As an Application Scientist for ADInstruments you will be expected to sell and advise customers in a highly technical market, and must have the ability to develop a good understanding of the ADInstruments product range and its practical application areas. [2541-064 (2006) : 82]
Based in the internationally-recognised Animal Behaviour and Welfare Research Group within the School of Clinical Veterinary Science at Langford, this role will involve developing an active research programme in one of the following broad areas: 1) vertebrate behavioural or stress physiology, 2) vertebrate sensory or biology, or 3) decision making and animal motivation. [2541-068 (2006) : 83]

You should have a PhD in any area of Chemistry, Physics, Biological or Medical Sciences related to experimental studies involving MRI and have at least 2 years' experience with MRI. [2541-070 (2006) : 83]

The successful candidate is not expected to have experience with superconducting materials but will preferably have worked in the area of microwave engineering. [2541-075 (2006) : 85]

The successful candidate is expected to have obtained a good degree in virology, microbiology or a related area of biological sciences, have good organisational skills and some previous laboratory experience. [2541-076 (2006) : 85]

The Department has an active clinical, translational and basic research programme with a number of specific areas of focus, including cell cycle regulation and epigenetics, functional genomics, gene therapy and leukaemia immunobiology. [2541-085 (2006) : 88]

For this new role we would welcome applications in any area of Biomedical research, but wish particularly to encourage applicants whose experience and expertise would strengthen and complement the existing research profile of the school. [2541-088 (2006) : 89]

Projects are available across a range of modern and interdisciplinary research areas including structural biology, biochemistry, virology, biological chemistry, enzymology, neurobiology, cell biology, physiology, computational biology and biophotonics. [2541-094 (2006) : 91]

The EPSRC Engineering Doctorate is a 4 year course enhanced by the provision of taught material in both management skills and technical areas. [2541-097 (2006) : 92-93]

We are currently recruiting in the following research areas: Medicinal & Biological Chemistry; Pharmaceutical Biology; Pharmaceutical Technology; Pharmacology; Regenerative Medicine; Pharmacy Practice [2541-099 (2006) : 94]

Already it has flagged up neglected areas of research and treatment, such as palliative care and lung cancer, and made them priorities. [2541-004 (2006) : 56-59]

Its goal is to bring information gained in every area of cancer science and medicine together into one accessible place. [2541-004 (2006) : 56-59]

One area where basic research is now showing its worth is personalised medicine. [2541-004 (2006) : 56-59]

This area is a glaring weakness in the UK, according to Wolf. [2541-004 (2006) : 56-59]

For example, Macmillan Cancer Relief, which has historically had more interest in treatment than biomedical science, is funding areas such as the psychological impact of cancer (see "Mind and body", opposite). [2541-004 (2006) : 56-59]

A second untapped research area is cancer prevention. [2541-004 (2006) : 56-59]

Cancer organisations are realising that a previously neglected research area could shed new light on the cancer effort and help them better direct their funding. [2541-004 (2006) : 56-59]
99. Cancer Research UK has begun a review of the research that we fund - and some fields that we don’t – to identify "orphan" areas. [2545-004 (2006) : 56-59]

100. Opportunities exist to work on all areas within the project. [2545-013 (2006) : 63]

101. Previous experience in healthcare and oncology is desirable but a genuine interest in both areas is essential. [2545-014 (2006) : 64]

102. This exciting area of research may lead to a more effective approach to the staging of treatment, thus resulting in a higher percentage of curable patients. [2545-017 (2006) : 64]

103. For both of these posts, you will have obtained a PhD in a bio-medically related area and completed a period of postdoctoral research of at least one year. [2545-019 (2006) : 65]

105. The group is expanding and you will also need to contribute to defining new opportunities and areas for development. [2545-031 (2006) : 71]

106. Areas include the measurement of reliability of electronic materials systems (solder or conductive interconnects, substrate structures), electrochemical reactions of new solder materials, and performance of protective coatings for electronics. [2545-031 (2006) : 71]

107. With continued growth, Roche is looking for ambitious people to join its teams in a wide range of areas. [2545-036 (2006) : 73]

108. In this challenging position, you will be part of a team providing histology support for our Respiratory Disease Area. [2545-037 (2006) : 74]

109. The ideal candidate will also have experience with one or more of the following: in situ hybridisation, image analysis, laser capture microdissection, working with animal tissues, confocal microscopy or working in the area of lung disease. [2545-037 (2006) : 74]

110. As such, the classification and interpretation of adverse drug reports, assessment of drug safety issues and the provision of drug safety information to enquirers will be key areas of your remit. [2545-043 (2006) : 77]

111. The successful candidate will be expected to contribute initially to some of the following roles and possibly take responsibility for all areas on the retirement of the chief chemist in 2007. [2545-047 (2006) : 78]

112. R&D work in the area of metal filled silicones [2545-047 (2006) : 78]

113. ICI is a global blue chip organisation producing high value speciality chemicals, with a broad portfolio of products and application areas. [2545-055 (2006) : 81]

114. The EPSRC plans to make a considerable strategic investment of £14.5 million in this area in the form of an Interdisciplinary Research Collaboration (IRC) that will be funded for an initial period of six years. [2545-063 (2006) : 84]

115. You will have, or expect to attain, a PhD or equivalent degree in an area relevant to high temperature plasma physics, and your future research must strengthen the Centres programme in fusion plasmas. [2545-066 (2006) : 85]
The department is 5* RAE rated, with an expanding and varied portfolio, providing a stimulating environment for its five distinctive areas of research. [2545-067 (2006) : 85]

The School is the largest grouping of marine scientists and technologists in Europe, with internationally recognised expertise in areas that include tropical coastal management, chemical ecology and marine biofouling. [2545-069 (2006) : 86]

As part of a new initiative involving the Astronomy & Astrophysics and Particle Physics groups, the University seeks to appoint to the broad area of Theoretical Cosmology. [2545-072 (2006) : 87]

This post provides an ideal opportunity for a motivated, enthusiastic individual who wishes to build on their existing experience in clinical research and further develop their career in this area. [2545-077 (2006) : 89]

You should have the potential to achieve grade 3*/4* RAE level, be able to contribute to the School's existing areas of research expertise and ideally have specialist expertise in the area of data analysis/modelling of biological processes and biostatistics. [2545-080 (2006) : 89]

The School's research covers the whole range of bioscience with focus in the following areas: • Biodiversity and Ecological Processes • Connective Tissue Biology • Genetics • Microbiology • Molecular Cell Biology • Neuroscience [2545-080 (2006) : 89]

The person appointed will establish a research programme within the area of predictive nutrition that will enhance the research activity of the School through peer-reviewed grant income and journal publications. [2545-084 (2006) : 90]

EU and UK candidates holding or expecting 1st class or 2i degrees or equivalent in appropriate subject areas are invited to apply for the following PhD studentships, available from 1st October 2006, in the Faculty of Life Sciences which consists of five schools conducting cutting-edge research in biology, agriculture, food sciences, psychology and pharmacy. [2545-086 (2006) : 91]

We are currently recruiting in the following research areas: Medicinal & Biological Chemistry, Pharmaceutical Biology, Pharmaceutical Technology, Pharmacology, Regenerative Medicine, Pharmacy Practice. [2545-088 (2006) : 92]

Before becoming chancellor she spent many years as environment minister, where she is credited with helping foster the country's renewable technology sector, an area in which Germany is now a world leader (see "Green Glory"). [2550-007 (2006) : 58-59]

With the government committed to shutting down all its nuclear reactors by 2020, this growth is likely to continue, and Germany has its sights set on leading Europe - if not the world - in this area. [2550-007 (2006) : 58-59]

Ideal profile: [...] 2-5 years experience in a product development role within the pharmaceutical industry, ideally in the area of inhalation dosage forms [2550-011 (2006) : 61]

The areas of expertise that we are looking to recruit for are: Biopharmaceutical products; Validation, Compliance; Quality Management Systems; Advocacy & Regulatory Intelligence; Risk Assessment; Operational Quality Assurance; Microbiology [2550-017 (2006) : 65]

We have a range of other opportunities within the organisation so, if none of these specifically relate to your area of expertise, please do feel free to review the website for vacancies relating to your specialism. [2550-017 (2006) : 65]
131. Maintaining a sound knowledge base, regarding registration requirements and process, for key market areas and products. [2550-022 (2006) : 68]

132. As the Environment & Hazards Director, you will be responsible for delivering the BGS's contribution to the NERC's key science objectives in the areas of groundwater; soils, environmental risks and hazards; pollution and waste; and global climate change. [2550-026 (2006) : 69]

133. You will be a leader of science business and research, and have a good general knowledge of areas of geoscience in the present, and emerging core missions for the BGS. [2550-026 (2006) : 69]

134. You will be able to provide evidence of high-level communication and negotiation with stakeholders in your area. [2550-026 (2006) : 69]

135. Responsible for initiating appropriate statutory and remedial action with regard to radioactive contaminated land, you will be a key point of contact for SEPA staff and external stakeholders (including the public) in this sometimes delicate area. [2550-028 (2006) : 70]

137. If you can answer yes to all these questions, and are ready to use your modelling and analysis skills to help inform Government policy in the area of animal health and food safety then why not consider a career as a risk modeller in the internationally recognised Risk Analysis workgroup at the Veterinary Laboratories Agency? [2550-029 (2006) : 70]

138. The ability to work well in a team and liaise effectively with diverse teams across Chemical Development and other areas of Research & Development and Manufacturing will also be very important. [2550-032 (2006) : 72]

139. BioFOCUS Discovery Ltd is a leading company working with international pharmaceutical, agrochemical and biotech companies in the discovery area. [2550-034 (2006) : 73]

140. A practical working knowledge of in vitro ADME assays, and the interpretation of ADME data, is required together with good communication skills and a minimum of 3 years' working experience in the area of in vitro ADME. [2550-034 (2006) : 73]

141. In the Medicinal Chemistry Division we work with a number of major pharmaceutical and biotech companies on a range of biological targets across multiple therapeutic areas. [2550-034 (2006) : 73]

142. Take a lead role in ensuring smooth engineering operations of the FESF in areas covering safety management, maintenance, procurement, planning & facility enhancement. [2550-043 (2006) : 76]

143. Develop a technological leadership position in the area of cleanroom technology & thin film coating of substrates. [2550-043 (2006) : 76]

144. You will preferably have at least 3 years of consultancy experience in these areas. [2550-051 (2006) : 79]

145. Consultants, Energy In the Built Environment (2 posts). In these roles you will be aiding in the acquisition and delivery of projects in the area of energy efficiency and renewable energy in buildings and in low energy building design or zero carbon strategies. [2550-051 (2006) : 79]

146. We are looking for two professionals with at least 5 years of consultancy acquisition experience in these two areas, preferably international. [2550-051 (2006) : 79]
Developing an externally-funded personal research programme in Molecular Parasitology, you will integrate with, and strengthen, the existing research base in that area (www.aber.ac.uk/biology/research/mmp.html), whilst also contributing to undergraduate and postgraduate teaching in parasitology and animal biology. [2550-056 (2006) : 82]

Specialist knowledge in the areas of Histology, Cytology and Cellular Pathology is essential. [2550-063 (2006) : 84]

The successful candidate will be expected to carry out high quality research in any relevant area of biomedical science and to contribute to the Institute of Biomedical and Biomolecular Science (RAE grade 5). [2550-063 (2006) : 84]

The applicant would be expected to carry out fundamental research in one or more of the IMRC research areas; to have a supervisory role for other researchers (both PhD and postdoctoral); to liaise with the 12 companies who are partners in the IMRC programme. [2550-066 (2006) : 84]

You will have a PhD (or equivalent) and at least three years' post-doctoral research experience in the relevant area. [2550-067 (2006) : 84]

Applications are invited from UK home students for several PhD studentships in the broad area of Theoretical and Computational chemistry. [2550-068 (2006) : 85]

An opportunity for graduates in biomedical and medical research to enhance and develop their careers in the key areas of molecular and cellular mechanisms of disease. [2550-072 (2006) : 86]

These include part-time MScs for those working in the sector, or full time MScs for those looking to embark on a career in the following areas: • Environment; • Land; • Soil; • Waste; • Water [2554-003 (2006) : 60]

This will include broad knowledge of the issues associated with Knowledge Transfer, Commercialisation and Science into Policy and in-depth knowledge of at least one of these areas. [2554-005 (2006) : 61]

The Managing Director heads a small, complex organization with highly qualified staff, specialized in different environmental areas. [2554-010 (2006) : 63]

You will have the opportunity to explore new areas of work as well as broaden the current activities of GRID-Arendal. [2554-010 (2006) : 63]

MRes, MPhil and PhD opportunities in Physical and Environmental Geography research areas include remote sensing, hydrology, fluvial geomorphology, fluid dynamics, sedimentology, environmental change, glaciology and public policy. [2554-011 (2006) : 63]

In line with our sustained growth we wish to make senior appointments to strengthen our core business and to support new developments in the area of General Chemicals (including REACH). [2554-022 2006) : 66]

You will also be encouraged to pursue your own area of specialism and build on existing national and international collaborations. [2554-024 (2006) : 66]

Other benefits include 30 days annual leave, an on-site nursery, flexible working in most areas and annual pay reviews. [2554-024 (2006) : 66]
162. The merger between UCB and Celltech has formed a biopharmaceutical company that leads the world in a range of clinical areas. [2554-025 (2006) : 67]

163. It will be your role to offer far-reaching practical support to the Group Leader in areas such as cell biology, molecular biology and immunohistochemistry. [2554-025 (2006) : 67]

164. What's more, you can expect plenty of interactions across other departments as you work with and develop the latest technologies in the area. [2554-025 (2006) : 67]

165. With continued growth, Roche is looking for ambitious people to join its teams in a wide range of areas. [2554-036 (2006) : 73]

166. The course covers topics of current interest including; drug selection in the main therapeutic areas, formularies, guidelines and protocols, shared care prescribing, disease management, alternatives to prescribing, the drug industry, audit of prescribing, critical reading, and prescribing research. [2554-039 (2006) : 74]

167. A further aspect of the role will involve working with the wider BASF innovation pipeline in the area of crop production. [2554-050 (2006) : 79]

168. The successful postholder should possess a PhD or an equivalent qualification in any area of chemistry, materials, biological science, engineering or dentistry. [2554-062 (2006) : 83]

169. The department is 5* RAE-rated, with an expanding and varied portfolio, providing a stimulating environment for its five distinctive areas of research. [2554-063 (2006) : 83]

170. The ideal candidate will have experience in technical support within a biological environment and experience in the use or support of techniques within some of the following areas: molecular biology, tissue culture, pharmacology, microbiology or physiology. [2554-063 (2006) : 83]

171. The department is 5* RAE-rated, with an expanding and varied portfolio, providing a stimulating environment for its five distinctive areas of research. [2554-063 (2006) : 83]

172. The appointee should have qualifications within the following areas: • Research qualifications within Advanced Chemometrics, Multiway Analysis, Experimental Design, Process Analytical Technology and Visualization of Data and Algorithms • Leadership and management of research in the field of advanced chemometrics, with special reference to multiway chemometrics and process analytical technology • Teaching in the field of advanced chemometrics with special emphasis on multiway chemometrics and process analytical technology [2554-064 (2006) : 84]

173. KVL carries out technically advanced research and education within the veterinary agricultural and human nutrition areas - as well as related fields of natural science. [2554-064 (2006) : 84]

174. You will contribute to scientific studies [...] and develop an independent research profile in a relevant area of spatial epidemiology. [2554-070 (2006) : 85]

175. The successful candidate will be trained to PhD level in a relevant topic and, ideally, will have experience in one or more of the following areas: device fabrication and characterisation, device physics, surface analysis, microfabrication and clean room practices. [2554-072 (2006) : 86]

176. Ideally you will have an area of research or the potential to develop one. [2554-076 (2006) : 87]

177. You will have a first degree in horticulture or a related discipline, together with a minimum of 2 years' experience in areas relevant to the Department. [2554-085 (2006) : 89]
With proven expertise in any area of medical science, you will be expected to attract external funding and develop an independent research programme to complement existing strengths in cancer biology, medical photonics, virology and structural biology [2554-087 (2006) : 89]

A substantial research project in a chosen area of study is undertaken during the last six months of the programme. [2554-091 (2006) : 91]

Physics is arguably one area in which the UK and its European neighbours have stolen a march on the US, thanks to projects such as the Large Hadron Collider, due to power up in Geneva, Switzerland, next year. Relatively little well-placed funding can leave a big footprint. [2558-004 (2006) : 58-59]

Research into the operation of the coupled ocean-atmosphere-climate system will build on existing areas of research excellence in process studies, palaeo-environmental reconstruction, modelling and hazard assessment to create an exceptional and distinctive capability in understanding and predicting the causes and consequences of climate variability and change on local to global scales. [2558-005 (2006) : 60-61]

You will develop your own research programme in the area of high-resolution palaeoceanography / palaeoclimatology and/or novel ocean tracers of past environmental change. [2558-005 (2006) : 60-61]

SIMBIOS is a Centre of Excellence in the area of biophysics of terrestrial ecosystems. [2558-010 (2006) : 63]

Posts will link with the new £22M SAGES (http://www.sages.ac.uk) initiative with Scottish universities in the area of Environmental Research. [2558-010 (2006) : 63]

Our modern well-equipped research facility in Alnwick is engaged in the development of a wide range of new pharmaceutical products and is helping develop leading positions in seven major therapeutic areas: cardiovascular disease, thrombosis, oncology, diabetes, central nervous system, internal medicine and vaccines. [2558-021 (2006) : 66]

Working closely with multi-disciplinary scientists from all areas of discovery and development, you will provide expert technical input to the selection of developable materials for candidate drugs used in pre-clinical and early clinical studies. [2558-025 (2006) : 68-71]

An NMR Spectroscopist with expertise in Liquids NMR, here you’ll lead and support technological developments within this area as part of our Research and Technology strategy, contributing to both internal and external research programmes. [2558-025 (2006) : 68-71]

Working within the Analytical Development group, your extensive knowledge and practical experience of HPLC and other analytical separation technologies mean you’ll be highly influential in shaping our processes and procedures in this area. [2558-025 (2006) : 68-71]

Results-focused and able to build effective relationships within the wider organisation and beyond, you’ll be quick to identify new opportunities to apply separation technologies and will enjoy acting as the focal point for all activities in this area. [2558-025 (2006) : 68-71]

Leading a team of scientists responsible for the validation, compliance and aseptic manufacturing processes for NCEs, biopharmaceuticals and line extensions manufactured within the Pharmaceutical Development Facility (PDF) aseptic processing areas, here you’ll develop parenteral formulations to support clinical trials and scale-up and development trials to establish commercial formulations for the global market. [2558-025 (2006) : 68-71]

You will collaborate with other AZ scientists to ensure the delivery of late stage development projects and will also develop further technical expertise within this area. [2558-025 (2006) : 68-71]
192. As such, at least five years’ post qualification (PhD/BSc) specialist experience in either area will be essential. [2558-025 (2006) : 68-71]

193. Leading the biopharmaceutics input and strategy for assigned projects, your wide-ranging expertise in this area will be crucial, [2558-025 (2006) : 68-71]

194. both in supporting specific projects and in coaching other scientists in this area. [2558-025 (2006) : 68-71]

195. A PhD with a well-established reputation in at least one area of biopharmaceutics – absorption pharmacokinetics, in vivo relevant dissolution, permeability or delivery route/system specific biopharmaceutics – [2558-025 (2006) : 68-71]

196. you’ll enjoy the scope to advance new thinking in this area. [2558-025 (2006) : 68-71]

197. This is an exciting new area for AZ and a multi-skilled team with responsibility for formulation design and development of these projects has recently been established. [2558-025 (2006) : 68-71]

198. The nature of the projects and the composition of this team provide an exceptionally dynamic and progressive environment for those wishing to develop their careers in this area. [2558-025 (2006) : 68-71]

199. The scope of this position is extensive. The candidate would be expected to contribute his/her expertise in one or more of the following areas: molecular cloning, development and validation of assays, screening for drug candidates through binding interactions, recombinant protein purification, preparative and analytical liquid chromatography, high throughput nucleotide sequencing. [2558-031 (2006) : 74]

201. Novartis is a company committed to the discovery and development of medicines in areas of unmet clinical need. [2558-040 (2006) : 77]

202. It is desirable that you have knowledge of one or more of the areas being studied such as materials science and nanotechnology or urban/environmental subjects. [2558-041 (2006) : 78]

203. Pharmaceutical products account for around 80% of the business, and the Company is a world leader in cardiovascular and metabolic disease, anti-infectives, neurosciences and anti-cancer agents with a significant number of new compounds in a range of therapeutic areas. [2558-042 (2006) : 78]

204. As the lead microbiologist in the Group, you’ll need to be proactive and influential, as you’ll be liaising closely with clinical research organisations and working with a variety of project teams across all therapeutic areas at Sandwich. [2558-052 (2006) : 81]

205. As a member of our Research Team, you’ll be responsible for devising inventive training and habituation methodologies for our animals, bringing in new techniques in this area, and acting as ambassadors for our ways of working externally. [2558-056 (2006) : 83]

206. You will be responsible for writing and editing documents, such as manuscripts, newsletters and congress materials, across a broad range of therapeutic areas. [2558-057 (2006) : 83]

207. You will be responsible for writing and editing documents, such as clinical study reports, protocols and investigator brochures, across a broad range of therapeutic areas. [2558-057 (2006) : 83]

208. Candidates should have a degree in a relevant area of the life sciences, and previous copy editing experience is essential. [2558-061 (2006) : 84]
Founded in 1986, Gerard Laboratories products cover a wide range of therapeutic areas including gastrointestinal and cardiovascular medicines and currently employs in excess of 320 staff. [2558-062 (2006) : 85]

Due to increased business demand and significant new product development activity, we are now seeking to recruit the following high calibre candidates within Research and Development area: [Formulation Development Manager; Formulation Scientist; Analytical Scientist] [2558-062 (2006) : 85]

Ideally applicants should have direct experience in this field or in a related area such as Haematology, Blood Transfusion or Immunology. [2558-071 (2006) : 88]

The appointee should have qualifications within the following areas: Biophysical characterisation of biological structures and macromolecular aggregates in solution e.g. using scattering techniques (SANS, SAXS, SLS, DLS). Structural and dynamical studies of self-organisation and self-organisation processes for biological macromolecules, in particular self-organisation of amphiphiles/lipids, (bio)polymers and proteins in solution. [2558-072 (2006) : 89]

KVL carries out technically advanced research and education within the veterinary, agricultural and human nutrition areas - as well as related fields of natural science. [2558-072 (2006) : 89]

Candidates should hold, or expect to hold by 15 August 2006, a first or upper second class honours degree in a Biological Science or Marine Science or a cognate area.

Measuring change in seabed habitats in marine Special Areas of Conservation (SACs) is necessary to determine if the conservation status of a particular area is changing. [2558-073 (2006) : 89]

This is an excellent opportunity for an ambitious self-starter to develop applied research programmes and consultancy services in the area of natural materials. [2558-074 (2006) : 90]

With extensive and excellent research and academic teaching experience in an area related to Systems Biology, [2558-078 (2006) : 91]

You will also have sufficient background knowledge of the areas to serve as a basis for teaching diverse aspects thereof. [2558-078 (2006) : 91]

You would be expected to support developments in the Field which would allow the courses to diversify particularly through the creation of more specialised Level 2 and 3 modules within your own research areas and through the supervision of student projects and dissertations. [2558-079 (2006) : 92]

You will be expected to contribute to teaching and to the development of research in your particular area of expertise. [2558-079 (2006) : 92]

You must possess a PhD degree (or evidence of several years postgraduate research) in nutrition/biological sciences or related area, and relevant research experience. [2558-082 (2006) : 92]

In a joint research project between the Hans Knoell Institute, the Friedrich-Schiller-University Jena and the Leibniz Institute for Age Research - Fritz Lipmann Institute - the research area Dermatophytic Fungi will be established. [2558-089 (2006) : 95]

The Centre for Biomimetics of the University of Reading seeks a well-qualified, enthusiastic person to fill a PhD position to work in the area of insect hair mechanosensors. [2558-093 (2006) : 96]
Subject areas in this one-year full-time MSc include: Multiphoton Laser Microscopy; Cell and Tissue Imaging; Optical Biosensors; Quantum Dots as Bio-labels; Optical Tweezers; Ablation and Laser Surgery; Photo-activation of drugs and Optical Bio-chips. [2558-094 (2006) : 96]

This applied and innovative research project will investigate information visualisation in the area of health technology assessment. [2558-095 (2006) : 97]

The MRes programme provides experience of real research in the rapidly developing interdisciplinary areas of Biophotonics, Nanomaterials, Nanophotonics and X-Ray Physics. [2558-099 (2006) : 98]

PhD opportunities are also available in areas listed [2558-102 (2006) : 99]

A good track record in the development of business opportunities in high technology areas. [2563-006 (2006) : 52]

Experience in one or more of the following areas would be advantageous; mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming, database design. [2563-007 (2006) : 52]

The research link can be in any area of science, engineering and technology, including social sciences and humanities. [2563-017 (2006) : 56]

The successful applicant will have attained a PhD in a relevant area, will be expected to demonstrate the capacity to work independently and will be able to link well within a larger grouping. [2563-024 (2006) : 59]

CCFRA is offering exciting opportunities in the Food Manufacturing Technologies Department for highly motivated self starters to contribute to and initiate research and development activity for our industrial clients in the areas of new product development, process development and food packaging. [2563-027 (2006) : 59]

You will manage and develop a portfolio of research projects in a variety of areas relevant to sustainable farming and food, tailored to your scientific knowledge and expertise, for example, we undertake work on climate change, water quality, biodiversity, livestock systems and food. [2563-034 (2006) : 61]

With appropriate scientific training to at least postgraduate level, or relevant experience, you will have a good understanding of, or the ability to develop skills in, a range of the above areas. [2563-034 (2006) : 61]

This will include co-ordinating and representing the JNCC in relevant working groups and assisting with the development of work in other relevant areas. [2563-051 (2006) : 67]

The recently formed Gastrointestinal Disease Area based in Horsham, UK and Basel, Switzerland is dedicated to the discovery of new medicines to treat functional bowel disorders and inflammatory bowel disease. [2563-053 (2006) : 68]

Postgraduate applicants should have a good honours degree (2.1 or better) in a relevant subject area. [2563-062 (2006) : 71]

Please visit www.bdi.ie for more information on these positions and topic areas. [2563-062 (2006) : 71]
241. We are particularly keen to attract a scientist to work collaboratively in developing research in the area of aetiological and/or therapeutic aspects of the tumour cell and its microenvironment [2563-063 (2006) : 72]

242. but outstanding applicants from any relevant area of cancer biology will be considered. [2563-063 (2006) : 72]

243. You will have a teaching, research or publication record in any one of the following areas: Biochemistry/Molecular Biology, Environmental Biology, Evolutionary Psychology, Genetics, Microbiology or Zoology and will make a major contribution to the teaching of first and second year undergraduates. [2563-073 (2006) : 75]

244. You will be based in the Division of Immunology and preferably have research interests in Innate Immunity or another area which complements interests in the Division or Faculty of Medicine. [2563-073 (2006) : 75]

246. PhD opportunities are also available in areas listed [Applied Bioinformatics; Clinical Research; Medical Diagnostics; Molecular Medicine; Medical Technology Regulatory Affairs; Translational Medicine [2563-087 (2006) : 79]

247. Each stream has a committee of leading external scientists who advise on how best to develop areas of research and training, and at least one funding committee that awards grants. [2567-002 (2006) : 50-51]

248. Experience in a forensic laboratory in the area of forensic biology, forensic chemistry or drugs analysis, report writing and giving evidence in Court is particularly desirable. [2567-010 (2006) : 54]

250. As one of the world’s leading pharmaceutical companies, we know the crucial role Discovery Medicine plays in bringing our innovative therapies to important areas of need. [2567-027 (2006) : 61]

251. That’s why we’re expanding our capabilities in this area, and are looking for a number of Scientists to join us at this exciting time. [2567-027 (2006) : 61]

252. Research Clinical Scientist - Imaging (Respiratory and Inflammation therapy areas) [2567-027 (2006) : 61]

253. Research Clinical Scientists - Imaging (Oncology and Infection therapy areas) [2567-027 (2006) : 61]

254. With a PhD and at least three years’ relevant post-doctoral experience, you’ll have a thorough knowledge of the Respiratory or Inflammation disease area, as well as immunology. [2567-027 (2006) : 61]

255. For this post you will have obtained a PhD in a bio-medically-related area or other appropriate field and will have completed a period of postdodoral research of at least one year Technical expertise in informatics is not required although an understanding of the role of informatics in bio-medical research will be important. [2567-034 (2006) : 64]
256. Unilever has a continuous focus on breakthrough product innovation and is therefore expanding in several scientific areas, offering talented candidates scientifically challenging and diverse careers. [2567-036 (2006) : 66]

257. We are currently recruiting in the following scientific areas: [Flavour Generation & Delivery; Product & supply Chain Microbiology; Cardiovascular Health; Process Engineering] [2567-036 (2006) : 66]

258. Initiate and manage research activities on process engineering, particularly in the area of powders and particulates in order to generate and develop new opportunities for the Unilever business. [2567-036 (2006) : 66]

259. Your background: Doctoral degree (PhD) in a related scientific area; [2567-036 (2006) : 66]

260. To apply; send your CV and motivation letter to recruitmentnl@unilever.com citing the scientific area and "New scientist" as your reference. [2567-036 (2006) : 66]

261. The research link can be in any area of science, engineering and technology, including social sciences and humanities. [2567-044 (2006) : 68]

262. This group forms part of the team responsible for supporting the current range of polymeric HPLC columns and media, identification and exploitation of new application areas and the design and development of new and novel polymeric HPLC packings. [2567-046 (2006) : 68]

263. We have an opportunity for someone who can demonstrate experience of project management within the areas of chemistry, engineering and/or mechanical testing who can effectively develop and implement project plans that result in product approvals. [2567-053 (2006) : 71]

264. Our computational chemists use modelling, structure-based design and virtual screening techniques to support the drug discovery projects, and one post is available in this area. [2567-054 (2006) : 72]

265. As the global leaders in the areas of Gastrointestinal and Respiratory Disease we are influencing the future of Early Compound Selection and Development. [2567-056 (2006) : 73]

266. You must hold a PhD in ecology or organismal biology, have teaching experience at university level and have conducted research in some area of Marine Mammal Science. [2567-064 (2006) : 77]

267. You will be involved in the development of lectures and demonstration material, principally in the area of magnetism, for levels of ability ranging from primary school, through secondary school, to the general public. [2567-071 (2006) : 80]

268. Experience of laboratory work in relevant areas of the biological sciences is essential and you will have a degree or equivalent in a biological science subject. [2567-076 (2006) : 81]

269. The role will work with colleagues in the Research Development and Collaborations team comprising of three Research and Innovation Managers responsible for marketing and supporting the knowledge transfer strategies in three University defined areas: (i) Advanced Engineering, Physical Sciences and ICT (ii) Life Sciences and Health, and (iii) Humanities and Social Sciences. [2567-077 (2006) : 81]

270. Research opportunities also exist in the above areas. [2567-081 (2006) : 83]

271. One area that is still problematic is career development for scientists. [2572-006 (2006) : 58-61]

272. The confluence of good critical mass in my area of research and the funding opportunities of Science Foundation Ireland. [2572-006 (2006) : 58-61]
273. Our research group, the Genome Stability Cluster, is a world-class group of scientists, and the density of faculty in this area is unique - you don't find this in typical biochemistry departments around the world. [2572-006 (2006) : 58-61]

274. The UCD School of Agriculture, Food Science and Veterinary Medicine is a research leader in the areas of sustainability and competitiveness of agriculture, the health and welfare of animals, the quality and security of food and improving consumer well-being. [2572-007 (2006) : 62]

275. In 2006, the School has secured substantial research funding and is currently recruiting up to 60 researchers (at postgraduate and postdoctoral level) in these areas: • Agribusiness • Pathobiology of Disease • Animal Science • Sustainable Agriculture • Food and Health • Veterinary Clinical Sciences [2572-007 (2006) : 62]

276. Research Frontiers Programme (RFP) supporting all areas of high-quality, novel exploratory research in the third-level sector, normally ranging up to €150,000 over three years. [2572-010 (2006) : 63]

278. Expressions of interest are invited in the above thematic area. [2572-011 (2006) : 64]

279. Enquiries should be addressed to: Dr David Fitzpatrick, Chair, Thematic Area Search Committee Head, UCD School of Electrical, Electronic and Mechanical Engineering. Engineering and Materials Sciences Centre University College Dublin, Belfield, Dublin 4. [2572-011 (2006) : 64]

280. Requirements: BSc. (Hons) in Chemistry/Biochemistry, PhD in Biosensor Development or related area; relevant employment record in medical device/ diagnostic industry at senior scientist/management level. [2572-013 (2006) : 64]

281. Proposals are now being sought from the following research areas: • Electronics • Nanotechnology • Compound Semiconductors • Photonics • ICT for Life Sciences • Silicon Fabrication • Device Design • Materials Characterisation • MEMS / Microsystems • Simulation & Modelling [2572-017 (2006) : 66]

283. Expressions of interest are invited for the following thematic areas in the College of Engineering, Mathematical and Physical Sciences: [Bioengineering, Bioprocessing and Materials Science; Computer Engineering, Embedded Systems and Wireless Communications; Mathematical Sciences; Mathematics and Computational Modelling of Complex Systems; Sustainable Energy, Resources and Development; Physics and Imaging Sciences [2572-019 (2006) : 67]

284. Immediate roles with flexible terms exist for Pharma & Biotech professionals in a number of areas. [2572-022 (2006) : 68]

285. Our broad range of project areas includes the manipulation of productivity and carcass composition, enhancing reproductive performance, and improving the management of infectious and metabolic disease. [2572-023 (2006) : 69]

286. This is a superb opportunity for you to apply solid experience in one of these three areas, adding your expertise to that of the teams involved in creating exciting new products. [2572-027 (2006) : 71]
The Group develops products in three targeted therapeutic areas: oncology, endocrinology, and neuromuscular disorders and is also engaged in developing certain biological-derived products. [2572-032 (2006) : 74]

Astex Therapeutics is a world-leading UK based biotechnology company using an innovative fragment-based drug discovery platform to discover and develop medicines in areas of unmet medical need. [2572-038 (2006) : 76]

A position is available within our assay biology group to support a range of projects, principally in the oncology area. [2572-038 (2006) : 76]

From the start, you'll determine areas for exploration and oversee a multi-disciplinary programme that encompasses both desk and laboratory research. [2572-040 (2006) : 77]

TrusTECH, is part of the National NHS Innovation Hub network. It works with NHS Trusts throughout Greater Manchester, Cheshire, Cumbria, Lancashire and Merseyside to manage innovations and their intellectual property arising from all areas of healthcare provision. [2572-058 (2006) : 84]

Part of the MHRA's Licensing Division, the PLPI Units are responsible for all licensing activities in the challenging and complex area of parallel importation of medicinal products within the European Union. [2572-060 (2006) : 85]

Candidates would be expected to have experience of one area of the envisaged XUV/VUV science programme (materials, surface, physics, chemistry etc) and/or techniques such as time and angle resolved photoemission or quantum control. [2572-061 (2006) : 86]

More experienced candidates will be expected to have, in addition to the above, several years post doctoral experience at an appropriate level with a proven track record in the relevant experimental science area. [2572-061 (2006) : 86]

You will also be required to assist other members of the technical team in other areas. [2572-068 (2006) : 89]

The successful candidate will be expected to take an active part in the setting up of service in a new area. [2572-068 (2006) : 89]

The Fellowships thus represent exciting opportunities to build careers in these areas and to provide a permanent academic position at the end of the initial five year contract. [2572-069 (2006) : 90]

The research areas in which the six fellowships are offered are given below with contact details for informal enquiries. [2572-069 (2006) : 90]

The TMRC laboratory will be devoted to innovative biomarker identification and development in areas of Cardiovascular & Metabolic Disease, Inflammation, Musculoskeletal Biology, Neuroscience, Oncology and Reproductive Health. [2572-072 (2006) : 91]

The position requires a broad-based knowledge and ability to interact and have active participation in research (preclinical) study design and clinical protocol development across several therapeutic areas and across all scientific disciplines active within the TMRI. [2572-072 (2006) : 91]

You will have a first degree in a science-based subject and will have completed a PhD qualification (or equivalent) in a relevant area of signal processing, acoustic engineering, or similar. [2572-073 (2006) : 92]

Applicants should have a HNC (or equivalent) in a relevant area, and previous experience of working in a similar role. [2572-074 (2006) : 92]
303. You will be given a unique opportunity to develop expertise in the area of PET research or consolidate and enhance acquired expertise. [2572-077 (2006) : 93]

304. You will have a PhD in a relevant area, project management experience and experience in experimental magnetic resonance. [2572-082 (2006) : 95]

305. You must have a PhD in a relevant area, experience in experimental magnetic resonance in solid materials and a willingness to work across the whole MR group portfolio. [2572-082 (2006) : 95]

306. Coming from the disciplines of Biology or Physics, you should have research interests at the Biology-Physics interface in any area of molecular and/or cellular biology. [2572-084 (2006) : 95]

307. You should have a record of research in any area of GIS and its application [2572-085 (2006) : 96]

308. though preference may be given to applicants who are able to offer teaching and research expertise in one or more of the following areas: Visualisation, Spatial analysis and GIS modelling, GIS programming, Internet GIS or mobile GIS. [2572-085 (2006) : 96]

309. These are primarily research positions but will also include some Undergraduate and Masters-level teaching in areas appropriate to the successful candidates' expertise. [2572-085 (2006) : 96]

310. These make their money by focusing on one or two therapeutic areas and buying up promising compounds discovered elsewhere, often by biotechs, and then taking them to market. [2576-003 (2006) : 58-61]

311. Perhaps the highest-profile company is Shire in Basingstoke, Hampshire, which specialises in developing treatments for the central nervous system and four other niche areas. [2576-003 (2006) : 58-61]

312. Astex Therapeutics is a world-leading UK based biotechnology company using an innovative fragment-based drug discovery platform to discover and develop medicines in areas of unmet medical need. [2576-007 (2006) : 63]

313. Industrial experience and knowledge of the oncology area would be an advantage. [2576-007 (2006) : 63]

314. A position is available within our assay biology group to support a range of projects, principally in the oncology area. [2576-007 (2006) : 63]

315. Experience in chromatography, electrophoresis and spectrometric methods, gained in an academic or commercial environment, particularly in the area of protein degradation and stability would be an advantage. [2576-009 (2006) : 64]

316. With a firm grasp of the software development lifecycle and design methodologies such as UML, you'll show proven ability in one or more of the following areas: web service development; distributed simulation interoperability; parallel processing; [2576-017 (2006) : 67]

317. As part of the Society's Science base and Innovation team, you will work directly on projects in the area of exploitation of university research, and innovation more generally. [2576-019 (2006) : 68]

318. Drawing on the expertise of leading scientists, engineers and other experts, you will deliver the Society's input to national and international policy in these areas, and will contribute to the development of the Society's own related activities (eg funding). [2576-019 (2006) : 68]
As part of a small specialist team, you will manage laboratory data collected in clinical trials across a range of therapeutic areas for phases II to IV of drug development. [2576-032 (2006) : 72]

To strengthen our team we are seeking to recruit several graduate trainee Patent Attorneys for our Southampton office with relevant knowledge in one or more of the following areas: • Software Engineering • Physics-based Technologies • Electronic, Electrical or Mechanical Engineering • Audio and Video Systems [2576-033 (2006) : 73]

Appropriately qualified, you should have relevant experience in photogrammetry, image and object comparison, facial analysis, estimation, differential comparison, measurement from video, gait analysis, or other related area of expertise. [2576-034 (2006) : 73]

Experience in chromatography, electrophoresis and spectrometric methods, gained in an academic or commercial environment, particularly in the area of protein degradation and stability would be an advantage. [2576-035 (2006) : 74]

We are seeking a candidate with experience in the water industry, working in one or more of the following areas: - Water operations - Principles of supply / demand balance - Regulatory returns / reporting - Abstraction Licensing - Communications / management at senior management level - Experience of dealing with key stakeholders [2576-036 (2006) : 74]

A background in water resources and hydrology would be advantageous however Dr Cymru would consider candidates who have operational experience in other areas of the water industry as long as knowledge and interest can be demonstrated. [2576-036 (2006) : 74]

However, water resources is an area currently of significant change and innovation [2576-037 (2006) : 74]

and there will be considerable scope to work on a wide range of projects in the area of water resource and hydrology. [2576-037 (2006) : 74]

The position would offer the opportunity for placements across the business, but particularly within the operational water resource areas. [2576-037 (2006) : 74]

However, Dr Cymru Welsh Water would also give consideration to a graduate with a relevant first degree who can demonstrate enthusiasm in this area and would like to further their development ‘on-the-job’. [2576-037 (2006) : 74]

Ideally you should have a good understanding in the following areas: - Water resource planning - Current Legislative Requirements - Climate Change - Habitats Directive [2576-037 (2006) : 74]

Based in our UK hub site in Slough, you will play a crucial part in ensuring a regulatory environment that is supportive of our business strategies, particularly in the areas of food safety, and nutrition and health. [2576-039 (2006) : 75]

The ideal candidate should have a PhD in a relevant area (e.g. chemical, biological or physical sciences), and experience in molecular simulations packages (e.g. AMBER), docking programs, bioinformatics software and commonly used molecular modeling interfaces. [2576-045 (2006) : 77]

An integral part of the position will be to write concise analytical articles on deals, trends in therapy and technology areas, and company activities. [2576-048 (2006) : 78]

The successful candidate will have a Ph.D. in an appropriate area of biological or fisheries science. [2576-068 (2006) : 82]
334. You must have a willingness and flexibility to work cross functionally with a team-orientated approach to support multiple functional areas. [2576-069 (2006) : 83]

335. The Department is also active in a number of areas of research including human embryo development, embryo selection and embryo culture biotechnology. [2576-072 (2006) : 85]

336. Each Graduate Assistant will, after discussion with the Project supervisors, select a research project for studies leading to the degree of PhD from one of the following areas: • Human complement system • Human molecular genetics in health and disease] [2576-075 (2006) : 86]

337. Candidates for the Engineering Design post should have a proven research record in the area of Engineering Design, and will be expected to contribute directly to the research and teaching of the Engineering Design Centre (EDC). [2576-077 (2006) : 87]

338. Research experience in these areas would be an advantage. [2576-080 (2006) : 88]

339. You should have a good degree in a relevant area, knowledge of all fundamental Silicon fabrication processes together with familiarity with the equipment that carries out these processes. [2576-085 (2006) : 89]

340. You will need to have a strong drive for academic achievement, a recognised track record in an area related to the interface of organics/inorganics and be able to show evidence of academic leadership and the ability to be a team player. [2576-087 (2006) : 90]

341. You will work at the interface of these two areas. [polymers / organics and inorganics] [2576-087 (2006) : 90]

342. The successful candidate will have a PhD or equivalent experience in a quantitative science, preferably in an area related to climate, meteorology or hydrology, together with proven statistical and computer programming skills. [2576-093 (2006) : 91]

343. Thanks to Swedish law, one area in particular is benefiting from the life-sciences boom. [2580-003 (2006) : 52-55]

344. FUGE's backbone facilities cover 11 areas of expertise, from a transgenic-animal development lab to a bioinformatics centre. [2580-003 (2006) : 52-55]

345. Despite all this investment across wide areas of science, for now petroleum remains the critical driver for the Norwegian economy. [2580-003 (2006) : 52-55]

346. A Ph.D fellowship in the area of Aluminium castings, is available at the Department of Materials Science and Engineering. [2580-004 (2006) : 56]

347. We are particularly interested in candidates with an interest in developing their own portfolio, particularly in the regulatory (e.g. REACH), risk analysis or molecular areas.

349. Internal networking with other research areas (polymer design) and business units (Film & Fiber, Moulding, production) [2580-006 (2006) : 56]

Applications in all relevant areas of bone biology will be considered, but those which increase understanding of the role of RANK, RANKL or OPG in bone biology would be particularly welcome. [2580-008 (2006) : 57]

Applicants should have a honours masters degree or equivalent within relevant areas. [2580-010 (2006) : 57]

The Centre works within the following areas: new network structures, wireless networks included, multimedia signal processing, dependability, traffic and security as applied to multiparty communication between stationary and mobile users. [2580-010 (2006) : 57]

Educated at least to BSc/MSc level, you will need extensive experience in in vivo pharmacology—specifically in the areas of respiratory and inflammation—while histological experience would be a distinct advantage. [2580-013 (2006) : 59]

You will undertake research projects focusing primarily on the structure of protein complexes related to nuclear transport and related areas. [2580-014 (2006) : 59]

Experience in a relevant area of Cell Biology would be an advantage. [2580-014 (2006) : 59]

In return, you’ll enjoy every opportunity to shape this all-new post, contribute to HMD service development and build your experience by playing a key role in what is a rapidly evolving specialist area of clinical diagnosis. [2580-016 (2006) : 60]

Located in the recently refurbished and equipped Molecular Diagnostics Centre at the Manchester Royal Infirmary, areas of molecular oncology service provision from the laboratory presently include the leukaemias and myeloproliferative disorders, including monitoring of minimal residual disease (MRD) in patients with CML, AML and APL. [2580-016 (2006) : 60]

You will have obtained a PhD in a bio-medically-related area and will have completed a period of postdoctoral research of at least one year. [2580-025 (2006) : 63]

This post is also part of a Centre of Excellence funded by the Scottish Executive Environment and Rural Affairs Department in the area of Epidemiology, Population health and Infectious disease Control (EPIC). [2580-027 (2006) : 63]

Future Science Group is at the forefront of biomedical publishing - our programme of high-quality review journals spans the key therapeutic areas and cutting-edge biomedical research specialties. [2580-041 (2006) : 67]

A good general knowledge in the area of disease resistance to plant pathogens and at least some experience in plant virology would be desirable. [2580-048 (2006) : 69]

A graduate/technician level position is available within our UK biology group to support a range of projects in the area of oncology. [2580-055 (2006) : 71]

You will also have experience in the respiratory and/or inflammation therapeutic area(s), preferably gained in a fast-moving, collaborative, industrial research environment. [2580-056 (2006) : 72]

It is expected that links with other academic units throughout the University will be initiated and fostered, and that strong associations with the appointee's primary research area will be maintained to promote continued scholarship there as well as publications directed at science communication. [2580-064 (2006) : 77]
366. The new professor will be expected to lead developments in this exciting area of research. [2580-065 (2006) : 77]

367. Applications are invited from fresh PhD graduates or experienced post-doctoral scientists to join Professor Barry Halliwell’s research team in the area of free radical and antioxidant biology [2580-067 (2006) : 78]

368. Within these areas, [2580-067 (2006) : 78] we are particularly anxious to strengthen the area of Oxidant and Antioxidant Biology. [2580-067 (2006) : 78]

370. Potential research areas can be quite broad but might include: quantum estimation, quantum open systems, quantum multi-party protocols, quantum games, quantum control, and quantum algorithms. [2580-068 (2006) : 78]

371. Our research is expanding in all areas of micro/nano fabrication and design - particularly MEMS, the interface between silicon, biology and medicine, sensor and actuator devices and integrated photonics. [2580-070 (2006) : 79]

372. The postholder will work in a team of technicians but should have particular skills and knowledge in the area of Microbiology with knowledge or prior experience of CL3 facilities. [2580-072 (2006) : 79]

373. Six BBSRC/Charity funded PhD studentships are available in the following areas: [• Developing biocatalysts for enhanced selenate bioremediation • Role of metacaspases in the apoptotic cell death response of Candida albicans • Control of cell shape in the human fungal pathogen Candida albicans • Investigating eukaryotic cell evolution using comparative genomics • Investigating the role of glutathione-S-transferase in cancer • The role of pyroglutamyl modification of peptides in Alzheimer's [2580-077 (2006) : 81]

374. You will possess a first class or a high 2:1 Honors degree or Masters, specializing in a relevant area of study. [2580-079 (2006) : 81]

2009

1. The technology is expected to have a profound effect on genome research, with benefits in human health, agriculture, energy, security/defence and many other areas. [2689-005 (2009) : 47]

2. All areas of GI measurement are covered, although the focus is on anorectal and oesophageal function tests. [2689-006 (2009) : 48]

3. Philips Research creates innovations in the areas of healthcare, lifestyle and enabling technologies. [2689-010 (2009) : 49]

4. Merck Sharp & Dohme Limited (MSD) is the UK subsidiary of Merck & Co., Inc., of Whitehouse Station, New Jersey, USA, a leading research-based pharmaceutical company that has a track record of discovering, developing, manufacturing and marketing a wide range of leading-edge, innovative pharmaceutical products in a wide range of exciting therapy areas. [2689-011 (2009) : 50]

5. Reporting to the Director of Medical Affairs, you will support the company's products in the Oncology area to ensure scientific credibility and high corporate ethical standards. [2689-011 (2009) : 50]

6. You will have a demonstrable ability to understand the ABPI Code of Practice and have expert knowledge in the Oncology therapy area. [2689-011 (2009) : 50]
7. Focused on the development and commercialisation of products that address medical needs in areas such as infectious disease, oncology, and respiratory and autoimmune disease, MedImmune primarily employs antibody and vaccine technologies in its product development. [2689-021 (2009) : 54]

8. Demonstration of a high level of managerial and leadership experience and proven competence, in such areas as: [2689-022 (2009) : 54]

9. The School of Engineering and the Institute of Bioengineering offer strength in areas that include bio-MEMS/NEMS, bioelectronics, robotics and learning, integrated systems, biomaterials, biophotonics, molecular and computational systems biology, and stem cell biotechnology. [2689-023 (2009) : 55]

10. Research and development areas encompass novel targets in psychiatric and neurologic disorders, pain, oncology, infectious disease, diabetes, haematology, metabolic disorders, immunological disorders, and reproductive medicine. [2689-025 (2009) : 56]

11. Applications are invited for Associate Professors and Lecturers with research interests in the following areas: • Host Pathogen Interactions • Bioinformatics • Molecular and Cellular Biology • Molecular and Quantitative Genetics • Developmental Biology [2689-026 (2009) : 57]

12. Our aim is to enhance our international standing with a significant investment in our premises, and by continuing to build on our successes, developing new areas of research and commercial activity with a range of partners and research collaborators. [2689-032 (2009) : 59]

13. Significant research experience, preferably working in the area associated with the intervertebral disc or cartilage biology is required. [2689-035 (2009) : 60]

14. In addition to this taught component there is a long project which can be in any area of Scientific Computing. [2689-042 (2009) : 62]

15. This will enable you to apply the techniques you have learnt to real problems in your area of scientific specialisation. [2689-042 (2009) : 62]

16. Applications are invited from candidates with, or expecting to obtain, at least an upper-second class honours degree in an area relevant to the project. [2689-045 (2009) : 63]

17. Candidates may come from a wide range of background and experience although the successful candidates will need to have a proven track record in at least one of the areas outlined above. [2694-001 (2009) : 50]

18. Experienced in quantitative epidemiology in animal or public health, you will lead multi-disciplinary research and/or surveillance project teams in challenging areas including food-borne zoonoses and TSEs. [2694-002 (2009) : 51]

19. Using your extensive practical skills, you will play a key role in developing and implementing new assays and methodologies, mentoring junior staff in these areas. [2694-005 (2009) : 53]

20. As part of the development of our chemistry portfolio we are about to launch ChemCatChem covering all areas of catalysis. [2694-006 (2009) : 54]

21. Leading the development of agreed policy and strategy initiatives in the areas of bioscience skills and careers, you will actively work with partners in developing strategic, evidence-based interventions in the skills pipeline. [2694-010 (2009) : 56]

22. Managing and delivering BBSRC strategy for business engagement and activities in a designated area, you will build relationships with a range of organisations and stakeholders. [2694-010 (2009) : 56]
23. Experience in one or more of the following areas would be advantageous: mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming or database design. [2694-014 (2009) : 57]

24. In this role you will provide expert DMPK support to the drug discovery efforts in our Respiratory and Gastrointestinal Disease Areas. [2694-024 (2009) : 61]

25. Air quality is an area that is more important today than it has ever been. [2694-025 (2009) : 62]

26. You will also represent the Agency to national and international partners and institutions on all relevant areas within the Centre's remit. [2694-034 (2009) : 65]

27. A relevant health and safety qualification would be an advantage although support and training in this area will be provided. [2694-035 (2009) : 65]

28. The Natural Environment Research Council (NERC) is the main funder of environmental science research in the UK. To drive the delivery of our ‘Next Generation Science for Planet Earth’ strategy, we are seeking to attract highly influential leaders in climate science and biodiversity to drive these areas forward and promote collaboration. [2694-036 (2009) : 66]

29. You should have a willingness and flexibility to work cross functionally in a team-orientated approach to support multiple functional areas. [2694-039 (2009) : 67]

30. You will be involved in carrying out defined research projects and aiding senior research staff in the area of preclinical pharmacology. [2694-041 (2009) : 68]

31. In April 2008 the University of Exeter announced plans to invest £80 million in science, engineering and medicine, building on existing areas of excellence. [2694-042 (2009) : 69]

32. We are now seeking to appoint a further 6 permanent academic staff in the areas of: Graphene-related research, Electromagnetic materials, Metamaterials and Nanoscale materials. [2694-042 (2009) : 69]

33. The research of the Centre will focus on three main areas: methods of producing graphene and nanostructured graphene systems; experimental and theoretical studies of graphene structures and devices; development of new graphene-based electronic devices and sensors. [2694-042 (2009) : 69]

34. Applications from those with expertise in these or related areas will be most welcome. [2694-042 (2009) : 69]

35. You will be professionally qualified or hold a relevant degree qualification in an engineering or science subject, knowledge in the area of marine science would be an advantage. [2694-047 (2009) : 71]

36. You should have a Ph.D. (or equivalent) in Chemical/Biochemical Engineering or related area and have a strong background in the practical application of statistics, in an industrial environment. [2694-049 (2009) : 72]

37. Students can then make an informed choice of the research area and complete their Ph.D. within the four year period. [2694-052 (2009) : 73]

38. The MA in Philosophy, Politics and Economics of Health is the first of its kind in the world and is aimed at individuals wanting to specialise in this area with a background in medicine, social science, health economics or philosophy. [2694-056 (2009) : 74]
39. Potential supervisors are drawn from the faculties of Biomedical and Life sciences, Medicine and Veterinary Medicine within the research areas of neuroscience, cardiovascular science and immunology. [2694-057 (2009) : 75]

40. Candidates must have, or expect to gain in the summer of 2009, at least an upper second class honours degree or equivalent in physiology or a related area. [2694-057 (2009) : 75]

41. It is interdisciplinary by nature and at Imperial College London encompasses a number of diverse areas of research. [2698-005 (2009) : 50]

42. You can select your own area of specialisation by taking one of our three streams: • Medical Physics stream; • Biomechanics stream • Neurotechnology stream] [2698-005 (2009) : 50]

43. These projects are many and varied in nature allowing you to actively pursue your particular area of interest. [2698-005 (2009) : 50]

44. The scientific areas in which we will offer research projects cover a broad spectrum of chemical sciences relating to issues of sustainability including: [2698-008 (2009) : 51]

45. But there are also plenty of other options in areas like Project Management, IT and Business that enable you to transfer your skills and take your career in a whole new direction. [2698-010 (2009) : 52]

46. Applications are also invited for 3 Lectureships and up to 10 Research Fellowships/Associateships from candidates with a proven world-class research track record who wish to build major new research activities in this area. [2698-011 (2009) : 53]

47. Appointments at a more senior level will be considered for candidates with appropriate experience. Fully-funded Ph.D. studentships are also available to work in these areas. [2698-011 (2009) : 53]

48. We are looking for an enthusiastic and forward thinking team player to manage the Centre's research funding activities and advance the NC3Rs capacity in this area by identifying novel opportunities for collaboration and innovation. [2698-026 (2009) : 60]

49. The successful candidate will have a BSc or equivalent qualification in Molecular Biology or a related subject area and experience of working in a laboratory, however, applicants with a laboratory Technician's Diploma and suitable experience will be considered. [2698-037 (2009) : 63]

50. Using your extensive practical skills, you will play a key role in developing and implementing new assays and methodologies, mentoring junior staff in these areas. [2698-039 (2009) : 64]

51. Our mission is to raise public awareness and engagement in science and innovation and we work closely with business areas of the seven UK Research Councils, from knowledge transfer to research programmes. [2698-041 (2009) : 65]

52. We are particularly looking for individuals familiar with at least one of the following therapy areas: oncology, cardiology, diabetes, psychiatric disorders and viral infection. [2698-042 (2009) : 65]

53. This post has been developed in collaboration with the Greater Manchester Comprehensive Local Research Network (CLRN) and the University of Manchester, to promote and facilitate a portfolio of high quality well designed clinical research studies in the area of photobiology / photodermatology. [2698-047 (2009) : 68]

54. Applicants should have an excellent research track record and expertise in one of the research areas defined below, experience in working with industry is desirable. [2698-051 (2009) : 69]
Areas of scientific expertise required are: [Deposition of thin films by CVD and ALD; Physical property characterisation of thin films, particularly by probe microscopy and related methods; Polymer synthesis and characterisation; Organic synthetic and catalytic chemistry with experience in high-throughput methods; Oxide materials discovery and electroceramic property measurement] [2698-051 (2009) : 69]

A Lecturer (JA/20/2009) will lead a new programme of research in a novel area of space systems engineering, deliver undergraduate teaching, supervise Ph.D. students and undertake relevant administrative tasks. [2698-052 (2009) : 70]

The University has selected a few high priority scientific focus areas in order to achieve international excellence in these fields. [2698-056 (2009) : 71]

Characterization and functional analysis of skin and mammary stem cells and applying a chemical biology approach to Hh-signalling are areas of particular interest. [2698-057 (2009) : 72]

The major areas of interest in the Cell Biology Lab are regulation of IGF-I Receptor signalling pathway by adapter proteins and phosphatases, and the characterization of new IGF-I-regulated proteins using cell and murine models. [2698-058 (2009) : 72]

The JIC has recently been awarded priority studentships from the Biotechnology and Biological Sciences Research Council (BBSRC) to support this collaboration and we are offering 4 studentships in the following areas: Crop breeding, Plant biology, Population genetics, Microbial ecology, Rhizosphere biology, Bioinformatics, Climate change, Elemental cycles, Greenhouse gases [2698-065 (2009) : 74]

Applications are invited for six Fellowships in the following areas: Bioinformatics, Biotechnology, Particle Physics, Marine Software and Systems Engineering, Alternative Energy and Science and Technology Transfer. [2698-069 (2009) : 75]

Applicants are expected to have completed a Ph.D. in the relevant area and will be required to kick start the relevant discipline [2698-069 (2009) : 75]

through the development of curricula and research in the respective area. [2698-069 (2009) : 75]

This is your chance to make your views known and explore benefits for your scientific area. [2702-002 (2009) : 9]

Given the potential for using bacteria across so many areas, it is no surprise that big business is keen to join forces with academia. [2702-005 (2009) : 46-47]

One of the biggest growth areas is biofuels, using bacteria to convert biomass to high-value bioethanol or biodiesel on a large scale. [2702-005 (2009) : 46-47]

"Those interested in this area have access to a number of fellowships across our remit," says Avril Ferris, the BBSRC's policy implementation manager. [2702-005 (2009) : 46-47]

"There's a perception that not enough people are skilled in this area of biotechnology," says Turner. [2702-005 (2009) : 46-47]

"That means there is huge potential for people coming into this area." [2702-005 (2009) : 46-47]

Whether as part of a university, business or new research-based venture, opportunities for those interested in working in this area should not be hard to find. [2702-005 (2009) : 46-47]
71. This £91 million initiative facilitates early-stage small-molecule drug discovery in areas of unmet medical need. [2702-007 (2009) : 49]

72. The diverse, ground-breaking projects we finance frequently lead to world-leading advances in drug design and help generate improvements in high profile areas such as animal health and the biological processes used in industrial manufacturing. [2702-012 (2009) : 52]

73. We are seeking an enthusiastic and motivated individual to join a multidisciplinary team delivering a range of knowledge exchange activities aimed at different stakeholder groups and areas pertinent to the Moredun group, including: Scientists, Veterinarians, Farmers, Policy, Education and Public. [2702-016 (2009) : 53]

74. Key to the success of this Programme is the expertise of a team of R&D Specialists - experts in technologies and industry areas. [2702-020 (2009) : 55]

75. hold a higher degree, along with experience in key areas of UK R&D [2702-020 (2009) : 55]

76. With an honours degree or equivalent in physical or natural sciences or engineering or a closely related discipline, you should have specialist knowledge in one or more areas relevant to radioactivity and dose assessment. [2702-021 (2009) : 55]

77. You will be expected to provide expertise in and be responsible for all areas of ELL's Health and Safety, not only in our scientific activities but also in other aspects of general ELL H&S. [2702-022 (2009) : 56]

78. You will play a lead role in portfolio evaluation at the Trust, ensuring high quality and timely analysis of specific areas of the Trust's work and funding schemes. [2702-024 (2009) : 57]

79. We have 9, exciting 3 year research training opportunities across the following areas: Field Instrumentation, Environmental Data Science, Environmental Statistics, Ecology and Analytical Chemistry. [2702-026 (2009) : 59]

80. Future Medicine is at the forefront of biomedical publishing, with a portfolio of journals covering a wide range of therapeutic areas [2702-028 (2009) : 60]

81. Experience in development of biologics and knowledge of the major therapeutic areas are an asset [2702-036 (2009) : 64]

82. Your role will see you encouraging users from new areas of science and planning future developments of the beamline to ensure it continues to meet scientific requirements. [2702-037 (2009) : 64]

83. The Research Council's Nanoscience programme is led by the Engineering and Physical Sciences Research Council (EPSRC) and will commit £39 million to the area over the period 2008/09 to 2010/11. [2702-039 (2009) : 65]

84. Search our website for your area and your dream job. [2702-044 (2009) : 66]

85. This European masters programme brings together 3 internationally renowned Universities (Versailles, Bergen and Edinburgh) and world leading research institutes to train students in the area of climate change. [2702-045 (2009) : 66]

86. The programme is designed for geoscience, physical and social science students seeking advanced qualifications for research and administrative careers in the area of climate change. [2702-045 (2009) : 66]
87. The project will be in the area of crystal engineering and cocrystal formation, focusing on developing strategies, principally using experimental approaches, for the selection of cocrystal formers in the design of pharmaceutical cocrystals. [2702-052 (2009) : 68]

88. Experience and knowledge in the areas of crystal engineering and organic solid state chemistry is essential. [2702-052 (2009) : 68]

89. Candidates must provide a covering letter detailing precisely their research experience to date in the area of crystal engineering and organic solid state chemistry. [2702-052 (2009) : 68]

90. We have over 30 years' experience in the delivery of high quality courses in this professional area, and are justly proud of our national reputation in this regard. [2702-053 (2009) : 69]

91. You will be responsible for working with key senior scientists and clinicians to design and execute projects in several areas, overseeing the compilation of databases and conducting statistical analyses using standard software packages, and supervising Ph.D. students. [2702-054 (2009) : 69]

92. If so there could be an exciting opportunity to play a major role in the establishment of a new vocational curriculum area to be located in the College's new Science and Technology Campus in Chester. [2702-055 (2009) : 69]

93. The regulatory areas which Exponent undertakes for clients include dietary intake assessments; health claims; food & feed additives; novel foods and food safety assessments. [2706-005 (2009) : 48]

94. The successful candidate will also be a recognised technical expert in the area of food regulation/safety and/or nutrition and will continue to apply this knowledge to clients' problems. [2706-005 (2009) : 48]

95. To meet these demands you will have a relevant degree, MSc or Ph.D. with at least 15 years of food industry or regulatory expertise and be recognized expert in a high profile area relating to food safety and/or nutrition. [2706-005 (2009) : 48]

96. You will have a first degree in Geosciences together with a Master level qualification in a relevant area of economic geology, and have an understanding of the genesis of mineral deposits and how to explore for them. [2706-020 (2009) : 55]

97. The successful candidate for this exceptional opportunity will have a Ph.D. in the area of pharmacology and be able to demonstrate a broad, in-depth understanding of pharmacology and physiology, as well as hands-on experience of both in vitro and in vivo research techniques in relevant physiological systems. [2706-029 (2009) : 58]

98. Areas of education and research include technology, science, law, social sciences, economics, medicine, humanities, theology and performing arts. [2706-034 (2009) : 60]

99. This is an exciting opportunity for a talented, dynamic individual to play a leading role in a key area, increasingly identified as a 'top 6' issue in public funding of research. [2706-035 (2009) : 60]

100. Areas addressed [2706-038 (2009) : 61]

101. We are looking for an outstanding young scientist whose research areas concern the sustainable use of renewable natural resources relating to agriculture, forestry, fisheries, use of biodiversity (animal and plant genomic resources) and water. [2706-038 (2009) : 61]
102. We welcome applications from all areas of research. [2706-038 (2009) : 61]

103. For this year's call for applications, we would especially like to encourage applications in the following area of research: Global Environmental Change and Health [2706-038 (2009) : 61]

104. Applicants must show that their planned research is a confident and genuinely innovative step into new areas in their field. [2706-038 (2009) : 61]

105. The Office of the Deputy President (Research & Technology) at NUS (Website: http://www.nus.edu.sg/dpr/) is responsible for facilitating, regulating and developing research and technology in a wide range of disciplines and cross-disciplinary areas. [2706-039 (2009) : 62]

106. You must have a Ph.D. (or equivalent) in a relevant area, have scientific programming experience, possess good organisational skills and have the ability to work collaboratively. [2706-040 (2009) : 62]

107. You will take a lead in the development and implementation of EO research activities in the area of atmospheric gas retrieval. [2711-004 (2009) : 51]

108. This post relates to the areas of pesticide residues and metabolism, MRLs/import tolerances and consumer exposure assessment. [2711-014 (2009) : 55]

109. You will contribute to batch release, standardisation and research in the area of typhoid, anthrax and cholera vaccines under the guidance of the study director. [2711-017 (2009) : 56]

110. Do you want to help inform Government policy in the area of animal health and food safety? [2711-023 (2009) : 59]

111. Using your existing and newly acquired knowledge you will assist in the development of risk assessments, write project reports and scientific papers, give oral presentations and keep up to date with developments in selected areas of the risk analysis discipline. [2711-023 (2009) : 59]

112. Sound judgement in weighing the needs of MRC against the requirements of third parties, good communication skills, a friendly and persuasive personality and a willingness to develop an understanding of the science in key areas are also important requirements. [2711-028 (2009) : 60]

113. Our ADME/PK Laboratory works with a number of pharma companies, major biotechs and other organisations on a range of projects covering multiple therapeutic areas. [2711-030 (2009) : 61]

114. This opportunity is the chance to develop a career in the area at one of the world's best universities (UCL is currently ranked 7th in the world). [2711-033 (2009) : 62]

115. A Ph.D. in a related area is essential. [2711-033 (2009) : 62]

116. This opportunity is the chance to develop a career in the area at one of the world's best universities (UCL is currently ranked 7th in the world). [2711-034 (2009) : 62]

117. The candidate should have a Ph.D. in a subject related area. [2711-034 (2009) : 62]

118. You will contribute to undergraduate/postgraduate teaching and research in the areas of the Biomedical and Life Sciences. [2711-037 (2009) : 63]

119. The candidate should have a Ph.D. in a subject related area. [2711-038 (2009) : 63]
This opportunity is the chance to develop a career in the area at one of the world's best universities (UCL is currently ranked 7th in the world). Challenge us to invite you to have this opportunity! [2711-038 (2009) : 63]

We invite applications from internationally recognised researchers in the area of diet, human health and risk of chronic disease to complement and enhance research strengths within the Hugh Sinclair Human Nutrition Group [2711-042 (2009) : 64]

We will particularly welcome applications from researchers with experience in the area of nutrient-gene interactions in relation to obesity, CVD, metabolic disease, cancer or neurodegenerative disease. [2711-042 (2009) : 64]

You will have: international recognition for excellence in your research area [2711-042 (2009) : 64]

You will ensure international standards in trial management for the developing portfolio by supervising complex trials and associated trial co-ordination staff across the therapeutic area. [2711-043 (2009) : 65]

Subject areas covered include: • Ecological Conservation • Economics for Natural Resource and Environmental Management • Environmental Management for Business • Geographical Information Management • Natural Resource Management • Land Reclamation and Restoration • Soil Management • Water and Wastewater Engineering • Water Management [2711-047 (2009) : 66]

The Veterinary Laboratories Agency - Weybridge, is an internationally recognised centre of excellence, delivering research for animal and public health. In conjunction with top rank academic partners, VLA is now offering two Ph.D. studentships in the following subject areas: [Characterisation of proteomic biomarkers of host response to lyssavirus infection with particular focus on rabies virus. Probing the host response secretome of vaccinated and TB infected cattle to define biomarkers of protection. [2711-051 (2009) : 67]

You will carry out scientific research with responsibility for development of key methods and apparatus in your area. [2715-003 (2009) : 50]

Expert, Heavyweight, Specialist. When it comes to the area of water quality, you’ll have been described as them all. [2715-012 (2009) : 55]

With oversight of a budget of £135 million, you'll lead a team which sets the strategic agenda for water quality policy, as well as shaping all our activities and actions in this area. [2715-012 (2009) : 55]

Natural England and the Joint Nature Conservation Committee are currently establishing the Regional Projects that will take this work forward. MCZs [...] will form an ecologically coherent network of protected sites in the marine area that will contribute to achieving the Government's vision of, 'Clean, safe, healthy, productive and biologically diverse oceans and seas'. [2715-016 (2009) : 57]

To be considered for the role of panel member, you must possess an impressive track record in one or more of the following four areas of expertise: • UK Marine Ecology • Marine ecosystem processes and the ecosystem approach • Marine conservation tools and conservation planning • Marine Protected Areas and network design [2715-016 (2009) : 57]

More details about each area are contained in the pack which will be sent on request to potential applicants. [2715-016 (2009) : 57]

For the position of Chair of the Panel expertise in one of the above areas would be desirable but is not essential. [2715-016 (2009) : 57]
134. Candidates may come from a wide range of background and experience although the successful candidates will need to have a proven track record in at least one of the areas outlined above. [2715-016 (2009) : 57]

135. Reporting to the Head of Technology Translation, you will facilitate a better understanding of potential routes to translation in BBSRC's areas of activity. [2715-017 (2009) : 58]

136. The business is experiencing rapid growth and we now need professionals who can contribute to our expansion in the following key areas: Chemistry (which includes PWR primary water chemistry, AGR gas chemistry, ion exchange technology, analytical chemistry and radiochemistry); Metallurgy (including pressure vessel steels and their welding together with high temperature properties, fatigue/creep and fracture mechanics) and Waste Technology (materials engineering, radioactive waste treatment and immobilisation technologies, cement / geological chemistry). [2715-026 (2009) : 60]

137. Possessing a degree in a relevant area of expertise, you must have experience of working across a range of disciplines, team working and good communication skills. [2715-030 (2009) : 62]

138. We are seeking candidates who have a strong background in the area of environmental sustainability, and with proven leadership capability. [2715-031 (2009) : 62]

139. The Environmental Sustainability KTN stimulates innovation by working with businesses and other stakeholders involved in the management of environmental sustainability, especially in Key Priority Areas. [2715-031 (2009) : 62]

140. Details available online of interdisciplinary studentships areas [2715-049 (2009) : 67]

141. Today it employs 90 people and has diversified into many areas of clean-fuel production. [2719-002 (2009) : 16]

142. Duties will involve maintaining all medical equipment within these increasingly high-tech areas, including testing, calibration of equipment, performing physiological measurements, assisting in diagnostic procedures and supporting an extensive research programme. [2719-004 (2009) : 48]

143. To progress these exciting areas we are looking to enhance our current skills in: [2719-009 (2009) : 51]

144. Chemical Engineering: In this area we are interested in hearing from you if you have experience of Process/Mechanical/design engineering applied to understanding and industrializing new equipment types with emphasis in high pressure systems for materials of construction/scaleability/robustness. [2719-009 (2009) : 51]

145. If any of the above areas are of interest to you then please apply online and in full confidence at www.gsk.com/careers referencing Req ID 54766. [2719-009 (2009) : 51]

146. A MS degree with significant experience in relevant area(s) will be considered [2719-017 (2009) : 55]

147. Future Science specializes in the publication of high-quality commentary and analysis in today’s key areas of research endeavour including Medicinal Chemistry and Bioanalysis. [2724-007 (2009) : 53]

148. This role involves: The opportunity to work with the latest information across a broad range of areas including chemistry and bioanalysis [2724-007 (2009) : 53]
The British Trust for Ornithology is currently reviewing its project development team and seeking the right individual to take on a portfolio of responsibilities in the areas of project management, system development, quality assurance, project proposals and contract management. [2724-008 (2009) : 53]

You will be expected to develop and communicate a near and long term vision for the Groundwater Science area, covering a range of activities from public policy to scientific research. [2724-009 (2009) : 53]

You will have a good grasp of developing funding opportunities and strategies in research councils, government agencies and the private sector and should be able to act as a forward-looking spokesperson for BGS in the area of Groundwater Science [2724-009 (2009) : 53]

We divide our operations into three distinct business areas: Fuel Specialties, Active Chemicals and Octane Additives. [2724-010 (2009) : 54]

A Ph.D. in polymer science (or equivalent), you will have a broad range of generalist polymer knowledge and ideally expertise in two different areas of polymer science. [2724-011 (2009) : 54]

Significant research experience in an area related to food science, either academia or in a FMCG company, is essential. [2724-011 (2009) : 55]

The role involves developing new scientific methodologies in the structural bioinformatics and chemoinformatics area and maintaining applications around our proprietary database platform. [2724-012 (2009) : 55]

This is an exciting opportunity to help define the scope, strategy and methods for the Information Connection unit - a new area for Syngenta. [2724-015 (2009) : 57]

You will also provide checks on classification results in the area, support data enquiries and interpretation and handle a wide range of other duties, including data support for EC Directives, monitoring plans and environmental action plans. [2724-016 (2009) : 58]

Whilst you may come from an academic, public or private sector background, it will be essential that you can demonstrate scientific and technical knowledge in areas that can be applied to counter-terrorism science and technology efforts. [2724-020 (2009) : 59]

The company is focused on the areas of infection, respiratory and inflammatory disease, oncology and neuroscience, with two marketed-products and a robust pipeline of promising new product candidates. [2724-024 (2009) : 61]

We are currently looking for three Research Scientists (two of the posts will be 12 month fixed-term contracts and one will be a permanent opportunity) to join our Lead Generation Team, an exciting growth area for MedImmune. [2724-024 (2009) : 61]

Expert Reviews is at the forefront of biomedical publishing, with a portfolio of journals covering a wide range of therapeutic areas. [2724-026 (2009) : 61]

You will develop the area of DNA virus research within the workgroup and build up collaborations across and beyond the Virology department. [2724-035 (2009) : 65]

Five post-doctoral Research Associate positions are available in the Optoelectronics Group at the Cavendish Laboratory in the area of organic electronics. [2724-039 (2009) : 67]

The group is one of the world's leading centres for research in solution-processed semiconductors, and has recently been awarded a Programme Grant from the EPSRC to develop this field of research across several project areas. [2724-039 (2009) : 67]

6830
165. Candidates should have a Ph.D. in physics or a related area, with research experience relevant to the proposed project, and a strong track record of high-quality publications. [2724-039 (2009) : 67]

166. A Research Associate position is available in the Optoelectronics Group at the Cavendish Laboratory in the area of organic electronics. [2724-042 (2009) : 68]

167. Candidates should have a Ph.D. in physics, chemistry, materials science or a related area and a strong track record of high-quality publications. [2724-042 (2009) : 68]

168. You will have a maths or science degree (2.1 or above) or equivalent and either have or be working towards a Ph.D., or have equivalent work experience in one or more of the areas of medical data / image analysis, informatics and statistical evaluations. [2724-043 (2009) : 68]

169. The teaching duties involve the development of courses at graduate or post graduate levels (in Dutch and English) both in this area and interrelated issues in the field of science policy and research evaluation. [2724-045 (2009) : 69]

170. The AMI assesses pharmaceutical companies on their performance in areas like equitable pricing and the licensing of drugs to developing countries so that affordable versions can be made locally. [2728-004 (2009) : 52-53]

171. Useful though both league tables are, making rigorous judgements in this area is tricky, and both lists rely partly on submissions from the companies themselves as well as media reports. [2728-004 (2009) : 52-53]

172. Then there's pricing and patenting-two complex, interrelated areas, with different companies adopting different strategies in each market. [2728-004 (2009) : 52-53]

173. "It is very multidisciplinary, the whole area of global health research, drug access, delivery and quality assurance," says Shunmay Yeung, who also works on malaria at LSHTM. [2728-004 (2009) : 52-53]

174. Candidates should have international knowledge of drug development in key areas of research, such as CNS, cardiovascular and oncology. [2728-005 (2009) : 54]

175. The candidates […] hold a higher degree, along with experience in key areas of UK R&D. [2728-005 (2009) : 54]

176. Project areas on offer include: DNA Damage Response, Cell Cycle, Cell Division, Stem Cell Haematopoiesis, Computational Biology, Inosotides and Cell Signalling. [2728-023 (2009) : 62]

177. Applications are encouraged across all areas of the MRC's remit. [2728-025 (2009) : 63]

178. Advice on the technical area may be obtained from Professor Ashburn, tel: +44 (0)23 8059 2886 or email: pa@ecs.soton.ac.uk [2728-034 (2009) : 67]

179. The successful applicant will lead future teaching, research and development in their specialist area and the Chair in Medicinal/Pharmaceutical Chemistry will also contribute to the development of further undergraduate and postgraduate courses. [2728-035 (2009) : 68]

180. The professorship comprises research and teaching in Plant Nutrients within one or more of the following areas: • Methods for diagnosis of plant nutritional status and characterisation of bio-active nutrient pools in plants • Plant nutritional metabolomics, including high-throughput elemental analysis technologies and their integration with tools in bioinformatics and molecular genetics • Stable isotopes as indicators for
tracing authenticity and nutritional sources of vegetable food products • New methods for assessment of soil pools of bioavailable nutrients. [2728-037 (2009) : 69]

181. The Faculty of Life Sciences is one of Europe's leading university environments in the areas of food, health, plants, biotechnology, natural resources, the environment [2728-037 (2009) : 69]

182. and related academic areas. [2728-037 (2009) : 69]

183. Applicants should have a Ph.D. in a relevant subject and have substantial expertise in one or more of the following areas: in vivo murine cardiac surgical models, cardiac ultrasound, hemodynamic monitoring, and in myocardial pathology. Ideally they should have a UK Home Office Licence. [2728-038 (2009) : 69]

184. This £91 million initiative facilitates early-stage small-molecule drug discovery in areas of unmet medical need. [2728-044 (2009) : 71]

185. As a geotechnical engineer at ETHZ, one of Sarah Springman's areas of research is unstable soil in the mountains. [2733-006 (2009) : 60-61]

186. Topical academic networks ensure that the best people in major fields work together and these centres of competence act as useful gateways for scientists interested in a particular area of research (www.snf.ch). [2733-007 (2009) : 62]

187. Search our website for your area and your dream job. [2733-015 (2009) : 66]

188. The successful candidate for this exceptional opportunity will have a Ph.D. in the area of pharmacology or related sciences and preferably hands-on experience of both in vitro and in vivo research techniques. [2733-016 (2009) : 66]

189. The diverse, ground-breaking projects we finance frequently lead to world-leading advances in drug design and help generate improvements in high profile areas such as animal health and the biological processes used in industrial manufacturing. [2733-017 (2009) : 66]

190. We are seeking to recruit an analytical chemist to support the chemistry department in providing a comprehensive chemical service to all areas of our business. [2733-021 (2009) : 67]

191. To help achieve our mission through our science funding activities, we are currently seeking to appoint two Science Portfolio Advisors in the area of Molecular and Physiological Sciences (MPS). [2733-025 (2009) : 70]

192. You will receive focused, on-the-job editorial training from experienced staff and will also be made familiar with the related areas of publishing, including production, marketing and finance. [2733-029 (2009) : 71]

193. For our editorial department we are looking for candidates with an academic background and a broad education in the area of chemistry. [2733-029 (2009) : 71]

194. Besides being part of a team which is developing drugs in an area of real unmet need - paediatrics - the salary will be competitive and reflect the seniority and experience of the successful applicant. [2733-033 (2009) : 72]

195. Graduate students are accepted into one of the following areas, but are encouraged to take part in courses and seminars from all three disciplines: Comparative and Molecular Primatology, Evolutionary and Functional Genomics, Ancient DNA, Molecular Anthropology and Genome Bioinformatics, Human Paleontology, Prehistoric Archaeology and Archaeological Science [2733-035 (2009) : 73]
This is a multi-disciplinary project concerned with quantifying and reducing uncertainty in the predictions of complex models across a wide range of application areas, including basic science, environmental science, engineering, technology, biosciences and economics. [2733-041 (2009) : 75]

However, applicants are invited from a wide range of backgrounds, including machine learning and areas in which complex models are used, subject to having strong statistical skills. [2733-041 (2009) : 75]

The Nanotechnology and Advanced Materials Institute and the Computer Science Research Institute are working in partnership with the Dublin City University and various industrial collaborators in the area of point of care diagnostics and Connected Health. [2733-046 (2009) : 76]

The University is also partnering with the Network for Excellence for Functional Materials at the National University of Ireland, Galway in the area of tissue engineering. [2733-046 (2009) : 76]

The successful candidates for the newly established posts will spearhead research initiatives associated with the projects and will be instrumental in building sustainable research capacity in these areas. [2733-046 (2009) : 76]

You are expected to have an established international reputation for research in the area of homogeneous catalysis and will play a leadership role in building the CCI to become one of the leading centres for catalysis research in the world. [2733-047 (2009) : 76]

This £91 million initiative facilitates early-stage small-molecule drug discovery in areas of unmet medical need. [2733-050 (2009) : 77]

The main technical areas to be covered are: rural socioeconomics, community liaison and dynamics; West African cultural issues; botany and zoology of the Guinea region rainforest types and the West African coast; tropical soils; geotechnics; hydrology; hydrogeology; marine geomorphology; air quality and emissions control; noise and vibrations; urban water supply, sanitation and wastewater management; landscape and visual amenity. [2733-054 (2009) : 79]

In this position your responsibility will be to define, initiate and execute R&I projects involving industrial yeast strain genetics and fermentation in order to innovate and improve processes and products and to maintain and generate knowledge in this area of expertise. [2737-004 (2009) : 56]

You will deliver support in your area of expertise throughout the company. [2737-004 (2009) : 56]

Future Medicine is at the forefront of biomedical publishing, with a portfolio of journals covering a wide range of therapeutic areas [2737-007 (2009) : 56]

You will initially undertake Earth observation research for quantification of ocean biogeochemistry and carbon fluxes, with the areas of inherent optical property model development; phytoplankton functional type and primary production algorithm development; biogeochemical time series analysis and ocean provinces. [2737-010 (2009) : 57]

It will encompass areas of molecular biology, cell biology and biochemistry. [2737-013 (2009) : 57]

The successful candidate will carry out research using molecular cloning, site-directed mutagenesis, library construction, protein expression and purification, molecular modelling and directed molecular evolution technologies so experience in any of these areas would be an advantage. [2737-015 (2009) : 59]

We invest in areas of scientific and technological development that will place the UK at the forefront of world innovation. [2737-017 (2009) : 61]
211. This programme is designed to support UKTI in raising the UK’s profile overseas and marketing the UK’s strengths and areas of expertise. [2737-021 (2009) : 63]

212. You will contribute to the creative effort of the group, to understand subject background in the specific subject area and the wider field. [2737-022 (2009) : 64]

213. You will have a biomedical degree (2:1 or above) (or equivalent), a Ph.D. (or equivalent) and experience in one or more of the areas of PET imaging, experimental tumour models, preclinical therapeutics, radiochemistry and/or imaging data analysis. [2737-022 (2009) : 64]

214. Building on eight strategically identified areas of advance, we are now seeking ambitious women and men for Assistant Professorships in fields that will further our vision of sustainability. [2737-024 (2009) : 65]

216. The UK has a very strong track record in imaging research and continues to be an excellent environment for research in this area, due to a wide range of funding opportunities through the government research councils and medical charities. [2737-028 (2009) : 66]

217. Health services research including large-scale multicentre randomised trials cohort studies, health economic research, health services research, and health technology assessment in a range of clinical areas e.g. pain, cancer, CHD, drug misuse. [2737-031 (2009) : 67]
Annexe 9-6-1 Listes (>2) avec AREA dans CAEMS

1971

1. It is expected that candidates will have experience in academic or commercial research, probably in one or more of the following areas: advertising or communications research, programmed learning, sociology, psychology or statistics. [745-027 (1971) : 59]

2. Scientific Assistants are required in the following areas: Biometrics, Plant Physiology, Analytical Chemistry [745-041 (1971) : 60]

3. Applicants should have a research interest in one or more of the following areas: Far Infra-red or millimetre wave techniques, Digital Systems, Control Systems, Communications, Radio Astronomy, Solid State Electronics, Space Research, Experimental Relativity. [745-045 (1971) : 61]

4. Research interests should be in one of the following areas: Power Electronics, Digital Systems and Instrumentation, Lasers. [750-025 (1971) : 356]

5. The Fellow will participate in the research activities of the School in areas of automatic control, noise and vibration or fatigue, for which excellent facilities are available. [758-064 (1971) : 54]

6. Areas of interest include ecosystem and population dynamics, ecological energetics, and nutrient cycling. [772-014 (1971) : 53]

7. The work will relate to such areas as aviation, man-computer interaction, and the design and organisation of automation systems. [772-023 (1971) : 54]

8. Lectures will cover the analysis of numerical methods, differential equation theory and a choice of application areas. [772-082 (1971) : 62]

9. The Institute of Sound and Vibration Research has several three to five year vacancies for qualified Engineers, Physicists and Mathematicians to conduct fundamental research in the areas of turbulence, aerodynamic noise, optical flow measurement and silencers for internal combustion engines. [774-020 (1971) : 189]

10. Areas of interest include ecosystem and population dynamics, ecological energetics, and nutrient cycling. [774-037 (1971) : 191]

1995

1. Experience in the following areas would be advantageous: basic molecular biology, bacterial and plant cell gene expression studies, phage antibody library screening, phage isolation and propagation. [1959-006 (1995) : 46]

2. The research, which is aimed at improving treatment of cancer with radiation by reducing its adverse effects on healthy normal tissues, will be directed in the following areas: molecular and cellular mechanisms of radiation injury to the central nervous system; effects of radiation on the skin with specific reference to the problems of reconstructive surgery; effects of essential fatty acids in modulating radiation injury to normal tissues and their effects on wound healing. [1959-039 (1995) : 54]

3. The Department, graded 4 in the last UFC research selectivity exercise, has particular research strengths in the areas of protein crystallography, molecular graphics and modelling, time-resolved spectroscopy
and transient intermediates, biomolecular spectroscopy, supported reagents, reaction mechanisms and synthetic organic chemistry, as well as aspects of analytical, surface, and materials chemistry. [1963-001 (1995) : 50]

4. Applications are invited for three-year research studentships in the following areas, tenable from October 1995 in the Department of Biology, part of the modern, well-equipped, Research School of Biological Sciences: Biochemistry and molecular biology of defence responses in higher plants. Physiology and molecular biology of membrane transport in plants, especially of calcium, sugars and growth regulators. Molecular and cellular mechanisms controlling epithelial differentiation in the mouse preimplantation embryo. Characterisation of genes controlling the growth of sensory neurons in Drosophila melanogaster. Species diversity, taxonomy and computer-assisted identification of invertebrates used as indicators of soil biodiversity. Experimental and modelling studies of grassland plant competition. [1963-028 (1995) : 57]

5. The Department operates a 14UD tandem accelerator and has an active program of AMS research in a number of different areas including hydrology, exposure-age dating and biomedicine. [1963-032 (1995) : 57]

7. especially in the following general areas: • Analysis of sequences and genomes • Biomolecular structure prediction and modelling • Novel approaches to the storage, integration and exploitation of evolving biological data collections • Novel applications of systems engineering techniques to biological problems [1963-055 (1995) : 63]

8. You should have a Ph.D. with a sound track record of research and at least three years’ post-doctoral experience in one of the following areas: biochemistry, molecular biology, molecular genetics, cell biology or developmental biology. [1963-075 (1995) : 67]

10. Applications are invited for Research Council and industry-sponsored research grants in support of Ph.D. degrees in the following areas: atmospheric chemistry, bioinorganic chemistry, colloid chemistry, molecular spectroscopy, organometallic chemistry, physical aspects of interfacial chemistry, synthetic inorganic chemistry, synthetic and physical chemical aspects of materials, synthetic medicinal chemistry, theoretical chemistry [1963-092 (1995) : 72]

13. The final six months is devoted to a full time research project - examples of research areas are shown under Ph.D. Research Projects. [1963-100 (1995) : 74]

15. An ability to address demanding interdisciplinary challenges is essential, and previous experience in one or more of the areas of biophysical chemistry, experimental surface science and physical organic chemistry would be advantageous. [1967-045 (1995) : 76]

18. A number of applied research scientists and engineers are required by the Radio Communications Research Unit in the following areas: Development of numerical models and prediction methods for the scatter and diffraction of millimetre waves by buildings and vegetation. Scientific analysis of experimental data and development of prediction methods associated with studies of millimetre wave propagation. Investigation of tropospheric radiowave propagation on transhorizon paths involving the development, commissioning and operation of an experimental system operating at several frequencies in the microwave millimetre wave part of the spectrum. [1971-003 (1995) : 55]

19. Major areas of departmental research include: • Imaging Systems and Neural Computing • Parallel and Fault Tolerant Computer Systems • Radio, Microwaves, mm waves and Optoelectronics • Mobile, Personal and Satellite Communications • Electromagnetic Compatibility • Numerical Electromagnetics • Archaeological Remote Sensing • Robust Control Theory and Applications • Speech and Music Technology • Device Modelling, Fabrication, Characterisation and Micromachining [1971-020 (1995) : 62]

20. Current research areas include: Protein engineering; Plant cell wall biology; Gene targeting; DNA methylation and gene silencing; Light-regulated gene expression; Gene function analysis in vivo; Sex determination in plants; Transgenic crop resistance; Molecular farming. [1971-030 (1995) : 65]

21. There is also a quota studentship which is available in one of the following study areas: [Biomechanics; Plant-animal interactions; Biogeography systematics and speciation; Plant nutrition, physiology & ecophysiology; Parasites and Pathogens and Invertebrate

22. Applications are sought from candidates with several years' experience in two or more of the following areas: Finite element analysis; Fundamental Physics; Electro Chemistry; Hydrodynamics; Acoustics; Magnetics/electromagnetics [1971-039 (1995) : 68]

23. Persons with experience in the following areas would be of particular interest: Electromagnetic modelling; Electromagnetic metrology; Antenna measurement and design; Simulation of radio communications systems; Personal and mobile communications systems; Radio propagation and spectrum management [1971-062 (1995) : 75]

24. Current research is focused on two main areas: identification of the molecular mechanisms controlling the melanocyte-specific gene expression, differentiation and development; and transcriptional regulation by a novel class of cyclins. [1971-090 (1995) : 80]

25. They should have research interests in one or more areas of human biology including ecology, genetics and behaviour, should have skills in a variety of contemporary perspectives and be able to participate in a general teaching programme. [1976-014 (1995) : 66]

26. Preference will be given to candidates who have general expertise in computing, and specialist skills in one of the following areas: Computer vision, speech processing, robotics, neural networks, software engineering and computer communications. [1976-029 (1995) : 70]

27. Ability to teach in other areas such as surveying, soil mechanics, civil engineering fluid mechanics offshore engineering would be an advantage. [1976-029 (1995) : 70]

28. Required to join a large, thriving research department involved in a number of areas of cell and molecular biology with particular interests in neurobiology, muscle biology, atherosclerosis and gene therapy approaches. [1976-033 (1995) : 70]

30. Candidates will be expected to offer expertise in one or more of the following areas:- atmospheric science and pollution, pure and applied ecology, earth sciences, economic and social development, environmental policy, legislation and management, spatial information technology. [1976-070 (1995) : 80]

31. Applications are invited for Faculty positions/appointments under the Materials Science Programme from candidates who possess a Ph.D. degree or its equivalent in any of the following areas: Electrical and Magnetic Materials; Electronic Materials; Composite Materials; Corrosion and Protection [1976-084 (1995) : 83]
32. The position is for a Condensed Matter/Applied Physicist with experience in either theory or experiment in the areas of compound semiconductors, electroactive polymers, superconductivity, non-linear optics, device modelling, X-ray scattering and fast laser spectroscopy. [1976-085 (1995) : 83]

33. The Department of Chemical and Biological Sciences is currently offering a number of research studentships to undertake work in the following areas: Preparation of chiral organic synthons; Use of enzymes in organic asymmetric synthesis; Drug design and synthesis; Chemical and bio-sensors using luminescence for trace analysis; Preparation and application of chiral liquid crystals; Biotechnology; STM studies of self-assembled monolayers; Solid state chemistry [1980-028 (1995) : 62]

34. Applicants should have experience in one or more of the following areas: transgenic biology, mouse developmental biology, molecular biology. [1980-038 (1995) : 65]

35. Scientific Staff in the Remote Sensing Field in the following areas: Remote Sensing Specialists; Agriculturalists, Agronomists and Agrometeorologists; Computer Scientists; Tropical Vegetation Specialists; Ecologists; Theoretical Modellers; Earth Observation Ground Segment Specialists [1980-052 (1995) : 69]

37. The successful applicants will be expected to work on problems in one or more of the following areas: the kinetics of phase ordering, kinetic roughening, spin glasses and glassy phases generally. [1980-075 (1995) : 74]

38. The major research areas are glass polyalkenoate cements, laser application and hard tissue removal, polymeric systems as release devices, and ceramics. [1980-077 (1995) : 74]

39. The present openings are for experimental and theoretical work in the following areas: Distributed Fibre Optic Sensors; Fibre Fabrication; Planar Waveguides; Fibre Sensors; Non-Linear Optics; Optical Materials Growth [1980-081 (1995) : 75]

40. 6 Ph.D. Studentships [...] to support research in the following areas: Medicinal Chemistry; Combinatorial Chemistry; Natural product synthesis; Drug Delivery; Molecular Biology; Microbiology. [1980-086 (1995) : 76]

41. Established R&D scientists in any branch of the natural sciences pertaining to biodiversity conservation can apply but we are particularly interested in those who can focus much of their research and consultancy on areas relevant to organismal conservation, information systems, biodiversity databases, and/or population conservation. [1980-090 (1995) : 77]

42. The areas of study are: Project 1 - The use of VA mycorrhizal fungi in the establishment, growth and disease resistance of turf grasses. Project 2 - Water quality management for golf course irrigation. Project 3 - Respiration monitoring of potatoes in store with relation to storage life and store design. Project 4 - The effect of elevated winter temperatures on the growth, development and yield of over-wintering temperate crops. [1980-114 (1995) : 82]

43. Proposals for research projects, to begin in 1996/97, are invited for consideration under the above scheme in the following areas: [Veterinary Science; Animal Science; Biotechnology; Horticulture Science; Pesticides Safety & Arable Crops; Environmental Research; Physical Sciences] [1980-117 (1995) : 83]

44. The Ministry also intends to commission research through open competition to start in 1995 in the following areas: [Environmental Research; Horticultural Science] [1980-117 (1995) : 83]
45. Research assistant posts are available in the following areas to commence in October 1995. [The role of microfauna in the uptake of radionuclides from organic matter; Kr-85 in the environment; The speciation of Iodine-129 in the vicinity of a nuclear reprocessing plant] [1980-120 (1995) : 85]

46. Applications are invited for three-year studentships in the following subject areas: Atomic and Molecular Physics; Liquid Crystal Physics; Laser Photonics; Experimental Condensed Matter Physics; Theoretical Condensed Matter Physics [1980-122 (1995) : 86]

47. Three PPARC research studentships are available from October 1995 for research in molecular line astronomy in the following areas: [Observational studies of star formation regions and interstellar molecular clouds. The development of a low noise heterodyne receiver for submillimetre molecular line astronomy at 800-900 GHz] [1980-123 (1995) : 86]

48. Available areas of study include biochemistry, genetics, immunology, microbiology, pharmacology, physiology and toxicology. [1980-129 (1995) : 87]

49. Departmental staff are involved in service, teaching (both undergraduate and postgraduate) and research in the following areas: Cardiology, Clinical Pharmacology, Dermatology, Endocrinology/Metabolism, Gastroenterology, Haematology-Oncology, Nephrology, Neurology and Respiratory Medicine. [1984-003 (1995) : 51]

50. The appointments will be in the following areas: [Polymer Chemistry; Physics; Particle Physics] [1984-004 (1995) : 52]

51. The School has major strengths in the following areas: Theoretical Physics, Advanced Materials, Mesoscopics and Photonics, Non-Linear and Stochastic Physics. [1984-004 (1995) : 52]

52. The research will be based in a multi-disciplinary School which is currently active in the following areas: Aerodynamics and Fluid Mechanics; Control and Guidance; Civil and Mechanical Systems; Communications; Design; Environmental Chemistry; Applied Chemistry; Materials Science and Engineering; Power Systems; Software Engineering [1984-008 (1995) : 53]

53. Particular areas of concern include fisheries, coastal zone planning, shipping, land drainage and water resources. [1984-011 (1995) : 54]

54. Experience of techniques in some of the following areas is required: protein biochemistry, characterisation of monoclonal antibodies, in situ hybridisation, northern blots, immunocytochemistry, RT-PCR. [1984-024 (1995) : 60]

55. In the following areas, we are seeking ambitious physicists, engineers and scientists with relevant expertise and a keen desire to be at the forefront of their particular field. [Magnetic Materials; Transducer Materials / Ceramics; Acoustics [1984-041 (1995) : 64]

56. Applicants should have a Ph.D. and relevant qualifications and experience in one of the following areas: (a) synthetic dye chemistry; (b) photochemistry; (c) photophysics. [1984-047 (1995) : 66]

57. We are now seeking graduates to study for a Ph.D. by research in the following areas where we shortly expect to have a number of funded places available: On-line industrial process monitoring; Immunosensors; Interfacial bioadhesion; Optical biosensors; Environmental monitoring; Thermotolerant enzymes; Electrochemical DNA biosensors; Molecular biology of lactic acid bacteria [1984-070 (1995) : 72]

58. [The studentships] will be held in one of the following research areas. [Measurement and Instrumentation; Information Engineering; Control Engineering and Control Theory] [1984-083 (1995) : 75]
59. Applications are invited in the following areas. Theory of vortex line phases of high temperature superconductors; Experimental studies of magnetic materials; Comets and cosmic dust in the solar system; Optical properties of transition metals in silicate glasses for solar control; Neutron scattering and muon spin rotation studies of amorphous materials. [1984-090 (1995) : 76]

60. Applicants should preferably have a background in catalysis, surface science or a related area of physical chemistry, inorganic chemistry or materials science. [1989-020 (1995) : 63]

61. Particular areas of focus for development and expansion are: [Clinical Sciences; Biopharmaceuticals] [1989-041 (1995) : 69]

62. Research will be enhanced in a range of areas including spatial analyses of biodiversity, molecular characterisation of germplasm, ex situ and in situ conservation methodologies, and development of cote collections. [1989-060 (1995) : 73]

63. The post is rotational which involves working in all areas of Haematology including the Diagnostic, Specials and Blood Transfusion Laboratories. [1989-089 (1995) : 80]

64. You will be responsible for all biochemical techniques currently in line in the areas of wound healing, inflammation and cancer, these including, protein separation techniques, HPLC of carbohydrate derived molecules, use of ELISA techniques in the identification of cell-surface markers. [1989-099 (1995) : 82]

65. The main areas of research and development are diabetes, hormone replacement therapy and growth hormone substitution. [1989-110 (1995) : 85]

66. Experience in the areas of pain control, dentistry or dermatology would be an advantage. [1993-039 (1995) : 63]

67. Research will be enhanced in a range of areas including spatial analyses of biodiversity, molecular characterisation of germplasm, ex situ and in situ conservation methodologies, and development of cote collections. [1993-084 (1995) : 74]

68. A Ph.D. or good honours degree in Chemistry or Material Science will be required together with some industrial experience, preferably in areas of plastics, adhesives, polymers, foils or surface coatings. [1993-093 (1995) : 77]

69. A Degree in Chemistry or Material Science will be required together with some industrial experience, preferably in areas of plastics, adhesives, polymers, foils or surface coatings. [1993-093 (1995) : 77]

70. Young Post-doc or Post-graduate students seeking opportunities for fellowships in Portugal, under the EU programme "TMR - TRAINING AND MOBILITY OF RESEARCHERS" should contact JNICT (Dra. Ana Paula Cruz), Fax: 351-1-6007481 indicating one of the seven thematic areas of the Programme (Mathematics & Information Technologies, Physics, Chemistry, Life Sciences Engineering Sciences, Earth Sciences, Economy/Management / Human & Social Sciences) and their particular research interests. [1993-094 (1995) : 78]

71. Degree qualified (or equivalent) in Environmental Science, Oceanography or related discipline, you will have at least 2-5 years relevant working experience where you have gained a particular strength in two or more of the following areas, with an appreciation of them all: “Oceanography”, “Mathematical Modelling”, “Water quality”, “Marine Ecology”. [1998-010 (1995) : 75]

72. Experience in the following areas would be advantageous: routine preparation of samples for TEM and SEM, including ultramicrotomy, light microscopy, in situ hybridisation,
immunocytochemistry and other modern molecular histological techniques. [1998-017 (1995) : 78]

73. The Department, graded 4 in the last UFC research selectivity exercise, has particular research strengths in the areas of time-resolved spectroscopy and transient intermediates, biomolecular spectroscopy, protein crystallography, molecular graphics and modelling, supported reagents, reaction mechanisms and synthetic organic chemistry. [1998-018 (1995) : 78]

74. In recent years Bullard Fellows have been associated with the Harvard Forest, Department of Organismic and Evolutionary Biology and Kennedy School of Government and have worked in areas of ecology, forest management, policy and conservation. [1998-025 (1995) : 80]

76. The successful applicant will be expected to have research skills in one or more of the following areas: hydrogeochemistry; mineral surface processes in the weathering regime; geohydrology; physico-chemical theory and modelling of fluid-rock interactions; applications of studies of fundamental processes to environmental pollution. [1998-043 (1995) : 86]
