'Cooperative Awards in Pure Science'

The Science Research Council offers about 200 research studentships each year for projects in pure science of specific industrial value. These 'Cooperative Awards in Pure Science' (CAPS) studentships are intended to encourage cooperation between industrial companies and science departments of universities and colleges and to give students some insight into the challenges and problems of R & D in industry. They provide an opportunity for able graduate students to undertake research of direct interest to industrial firms and to become acquainted with the firms at first hand. The CAPS scheme is directed specifically at pure science departments, whose contacts with industry have generally been more limited than those of applied science and engineering departments.

CAPS awards are allocated by SRC on a competitive basis to projects submitted jointly by an academic department and an industrial company: the initiative for setting them up may come from either side. Projects must provide a good training and a stimulating intellectual challenge for the student, as well as a worthwhile opportunity for him to spend part of the period of the award in industry.

SRC contributes to that joint venture a studentship at its normal rates and the industrial partner is expected to make a financial contribution to the research or to provide facilities not available in the academic institution. Subject to suitable arrangements being made SRC is prepared to waive its claim to any patent rights which may arise.

The closing date for applications in 1971 is March 1. Further information may be obtained from

SCIENCE RESEARCH COUNCIL, STATE HOUSE, HOLBORN, LONDON WC1R 4TA. 
[733-001 (1971) : 23]
Sixth formers. Apply now for a University Cadetship.
You could be earning £1,059 a year in college?
As a Naval officer.

If you are hoping to, go to college next autumn to read for a degree, you could be considered now for a Naval University Cadetship.

If you're accepted, you'd receive an award worth £1,059 a year, tuition fees paid, the whole time you're at college. More important still, you'll have started your life as a Naval Officer.

This is a challenging career. One that makes real demands on a man. But the rewards are high – and the road to the very top is open to you.

How you qualify? Royal Naval University Cadetships are open to young men over 17½ and are awarded by competition.

The award is made as soon as you are up at university or start on a full-time CNAA degree course at polytechnic or college of technology. But now is the time to apply.

Whilst you lead a normal student life during term-time (studying for virtually any degree you want) you'll go to sea during vacations. To get a taste of life ahead. Find out more – you won't be committing yourself.

Royal Marines. Similar opportunities exist here too. Details will be sent if you write ‘Royal Marines' on the coupon.

They tell me maths is the only branch of learning without finite limits. They say this isn’t a problem, it’s a challenge. Perhaps I can study Roman Law instead?

The Guinness Awards for Science and Mathematics

A total of £1,500 is once again being offered by the Guinness Awards for significant and original proposals in the teaching of Science and Mathematics. Entries are now invited and a first prize of £250 is offered in each of the two categories.

1 For teachers in service.
2 For teachers in training and first two years in service.

The judges this year include:
Dr. Cyril Bibby, M.A., M.Sc., Ph.D.
Dr. K. Laybourn, M.Sc., Ph.D.
Dunstan Adams, B.Sc.
Brian Jones, B.Sc.
Miss F. M. Eastwood, B.A., B.Sc.
E.J. Machin, M.A.

Closing date for registration is May 1, 1971, and for completed entries is December 31, 1971.
[733-003 (1971) : 36]
LECTURES, MEETINGS AND COURSES

INTRODUCTION TO RADIOISOTOPES
3 to 14 May 1971
8 to 19 November 1971

These courses aim to present an outline of the main theoretical and practical considerations in the application of radioisotopes and radiation to problems in research and technology. In addition to the set exercises, there is provision for practical work to meet special needs.

The course may either be taken alone as a broad general introduction or be followed by a specialist course aligned toward the discipline of the student.

Fee: £100. Application forms and further details from the Education and Training Centre (ITR.3b)
A.E.R.E. Harwell, Didcot, Berks.

HARWELL POST-GRADUATE education centre
[733-004 (1971) : 38]
NORTH EAST LONDON POLYTECHNIC

BASIC ELECTRONICS AND INSTRUMENTATION

This is a project-orientated course for persons well qualified in other disciplines, who need electronics and instrumentation in the course of their work, such as mechanical engineers, scientists, doctors and other members of the medical profession.

The syllabus is arranged so that no previous knowledge of electronics is assumed and individual projects may be attempted.

Eight evening meetings from 7.00 p.m. to 9.00 p.m. starting on Thursday, 11\textsuperscript{th} February 1971. Course Fee; £55. 0d.

This course is offered at the Barking precinct of the North East London Polytechnic and further information is available from:
The Short Course Organiser, Faculty of Engineering, North East London Polytechnic, Longbridge Road, Dagenham, Essex, RM8 2A5. Tel: 01-599 5141 Ext. 49
[733-005 (1971) : 38]
M.SC. IN APPLIED PSYCHOLOGY (1971/72)

This course, of one calendar year, is intended for post-graduate and post-experience students who wish to practise as applied psychology specialists in research centres, industrial establishments, and educational or medical research institutions. The content includes: Research Techniques; Experimental, Occupational, Neuro and Mathematical Psychology; Ergonomics and Systems Design. An honours degree in appropriate disciplines (including biological sciences, psychology, and the natural sciences, mathematic and engineering) or equivalent professional qualifications is required. A limited number of S.R.C. and S.S.R.C. studentships may be available for graduates with good honours degrees.

Further information can be obtained from Professor W. T Singleton, Applied Psychology Department, The University of Aston, Birmingham B4 7ET.
[733-006 (1971) : 38]
A combined lecture and practical course on THE BASIC PRINCIPLES OF COLOUR REPRODUCTION will be given in the Applied Optics Section by Professor R. W. G. Hunt (Kodak Ltd.), Dr. K. H. Ruddock and Professor W. D. Wright on February 18, 19, 25, 26, March 5, 12, 19, 1971.

The course will consist of lectures at 10 a.m. and 3 p.m. each day, together with practical experiments, demonstrations, class work and discussion periods. The fee for the course is £25 and further particulars and application forms for admission can be obtained from the Registrar of the Imperial College, Imperial Institute Road, London, S.W.7.
FOR FUN AND FEELING try Exploring Human Contact. Day Conference, non-verbal and verbal (no lectures), Central London Sat. 16 Jan., 10-6, £2 10s. (students 30s.). Weekly groups, country weekend courses, 15-day summer school. S.a.e. Anne Elphick, 20 Frobisher Court, Sydenham Rise, S.E.23.
[733-008 (1971) : 38]
ADVANCES IN APPLIED RADIOCHEMISTRY
17 to 27 May, 1971

A course for chemists who are already familiar with radioisotope techniques. It consists largely of lectures but there are opportunities for practical work. The following topics are covered: transuranic element chemistry; nuclear chemistry, analytical methods, reactor chemistry with special reference to contamination reactor circuits.

Fee: £50.

Application forms and further details from the EDUCATION AND TRAINING CENTRE (AAR.1), A.E.R.E. HARWELL, DIDCOT, BERKS.

HARWELL
POST-GRADUATE education centre
[733-009 (1971) : 38]
Applications are invited for the Turner & Newall Fellowship tenable for two years in either the University of Durham or Newcastle upon Tyne from 1st October, 1971 (or from such earlier date as may be arranged) and available for research in Applied Mathematics, Engineering, Chemistry, Geology, Medicine, Metallurgy, Mineralogy, Physics or related technologies.

Candidates should not be more than 28 years of age on taking up their Fellowship, and must hold the Ph.D. degree or have equivalent research experience.

The stipend will be £1,350 for the first year and £1,400 for the second year together with F.S.S.U. benefits.

Further particulars and application forms available from the Registrar of the University of Newcastle upon Tyne, 6 Kensington Terrace, Newcastle upon Tyne, NE1 7RU, with whom applications should be lodged not later than 12th February, 1971.

[733-010 (1971) : 38]
VISITS TO INDIA FOR YOUNGER SCIENTISTS

The Younger Scientists Exchange Scheme is designed to promote mutual understanding and the formation of professional links between scientists in Indian and British universities, and to facilitate the exchange of information and techniques.

Applications are invited from suitably qualified British scientists to take part in a research or teaching project at an Indian university or other institute financially controlled by the Indian University Grants Commission. Visits should preferably be of 2-3 months duration to enable a useful programme of work to be carried out; at least two thirds of this time will be spent at the Institution. Applicants should hold a staff appointment at a university or research institute and preferably be between 27 and 35 years of age. The Indian UGC will arrange a suitable programme in India, bearing in mind the candidate’s requirements and suggestions, and provide a grant to cover local expenses. The British Council will pay the return tourist class air fare.

Application forms for visits between July 1971 and February 1972 (except mid September-mid October) may be obtained from the Director, Science Department, The British Council, 59 New Oxford Street, London WC1A 1BP, and returned by 15th March 1971.

[733-011 (1971) : 38]
SEMINARS
UNIVERSITY OF SOUTHAMPTON
Series of One-Day Seminars 1971

CRYOGENICS

The following seminars on various aspects of cryogenics will be held on Fridays of the Spring Term 1971 in the Department of Physics:
29 January 1971 Cryogenics in Aerospace
5 February 1971 Safety and Handling of Cryogenic Liquids
12 February 1971 Superconducting Materials Technology
19 February 1971 Large Tanks for Storage and Handling of LNG
26 February 1971 Small Close-Cycle Refrigerators for Temperatures below 100 K
5 March 1971 Cryo-surgery

For further details write to Dr. R. G. Scurlock, The University, Southampton, SO9 5NH or phone Southampton 56331 extension 2093, quoting ref. N Sc.
[733-012 (1971) : 39]
STUDENTSHIPS
EAST MALLING RESEARCH STATION
BLACKMAN STUDENTSHIP FOR 1971

The East Malling Research Station Association offers a postgraduate Studentship of £750 per annum (tax free) tenable for three years, for study in one of the following fields: crop physiology, the water relations of plants, mycology (soil-borne pathogens), virology, biometrical statistics. The award is available from 1st October 1971, but could be made earlier for an outstanding candidate.

Application forms may be obtained from the Secretary, East Malling Research Station, East Malling, Maidstone, Kent, to whom they should be returned by 1st February, 1971.

[733-013 (1971) : 39]
APPOINTMENTS AND SITUATIONS VACANT

TOBACCO RESEARCH COUNCIL LABORATORIES,
HARROGATE, Yorkshire

Technician or Senior Technician required for Department of Pharmacology concerned with studies on effects of smoking on the central nervous system. Although not essential, previous experience in Pharmacology or Biochemistry would be desirable.

Qualification – A.I.S.T. or equivalent experience (salary range £941 - £1,411) or "A" levels in Science subjects including Biology (salary range £832 at 21 - £1,247).

Write, giving brief details of education, qualifications, experience (if any) and age to:
The Personnel Officer,
Tobacco Research Council Laboratories, Harlow Hill, HARROGATE, Yorkshire.
[733-014 (1971) : 39]
PROFESSORSHIP OF INDUSTRIAL ENGINEERING (within the Engineering School)

Applications are invited for the above Post. The latest date for receiving Applications will be: 18th February, 1971.

Prior to application, further particulars may be obtained from the Secretary of the College.
[733-015 (1971) : 39]
Applications are invited for an S.R.C. supported Research Associateship for work on the lattice dynamics of hydrogen halide single crystals using inelastic neutron scattering techniques. Appointment for two years. Salary (under review) within range £1,355 x £125 - £1,605 p.a., plus London Allowance.

Further details and application forms from The Registrar (Physics/S), Queen Mary College, Mile End Road, London E1 4NS.

[733-016 (1971) : 39]
RTZ
RIO TINTO-ZINC CORPORATION

Chemists

We need several more Chemists for our Research Centre pleasantly situated at Chessington in Surrey. Initial projects will be concerned with the introduction of new and improved processes for bulk inorganic chemicals and the evaluation of alternative methods for recovery of values from aqueous liquors. Work will be mainly on a bench scale but with opportunities for pilot and full-scale investigations.

Following at least a good Honours Degree or equivalent professional qualification, preferably in inorganic or physical chemistry or chemical engineering, several years' industrial experience would be valuable. An appreciation of the problems of transition from the laboratory to large scale commercial applications is considered essential. A senior man could be appointed at Section Leader level.

Assistant Chemists

They will join teams investigating various outlets for borates, and perform technical service work including visits to customers. Applicants, either men or women, should be of about HNC or pass degree standard. Some industrial experience would be useful.

Attractive salaries will be offered plus generous fringe benefits. Please write with brief details to: Personnel Manager, Borax House, Carlisle Place, London, S.W.1.

BORAX CONSOLIDATED LIMITED
[733-017 (1971) : 39]
Fisheries Laboratory, Burnham-on-Crouch

CHEMIST

required to develop a system of monitoring the occurrence and distribution of important polluting substances such as pesticide residues and heavy metals in the seas around Britain. The materials to be sampled and analysed may include fish, shellfish and other invertebrates, plankton, seawater and seabed materials.

The successful candidate will assist in the planning and organisation of an extended sampling system and take direct day-to-day responsibility for analysis within the laboratory. Duties may involve seagoing in the Ministry of Agriculture's research ships or in commercial fishing vessels.

Candidates should have a degree, HNC or equivalent in appropriate subject, and normally be aged 26-30. Extensive working knowledge of modern methods of chemical analysis and several years of practical experience in analytical work essential.

The successful candidate will be appointed as Experimental Officer, salary £1,725 - £2,177. Starting salary may be above minimum.

**Food Research Manager**

The British Food Manufacturing Industries Research Association requires a Divisional Manager. The immediate vacancy is in the Biology Division which deals mainly with the problems of perishable foods, ranging from electron microscopy through microbiology to commodity sections, with a staff of about 60 and an operating budget of nearly £200,000. However, the scientific discipline of the successful applicant is relatively unimportant, provided he has demonstrated his ability in his chosen field and has an appreciation of work in other areas. Some internal reorganisation can be contemplated if necessary. Experience in managing an industrial research team by modern research management techniques is essential. Food experience is desirable. The preferred age is around or below 40.

This is a most attractive senior post in one of the best equipped food laboratories in this country.

**Research Supervisor – Microbiology**

A first class microbiologist is required to head a section engaged on both long range research in food microbiology and short term investigation into the more immediate microbiological problems of the food industry. The Microbiology Section currently consists of over 15 people including 4 graduate microbiologists, and it is expanding. The facilities available include a separate secure laboratory for work with pathogens and also experimental animal facilities.

The person appointed will ideally combine a sound background of research with a knowledge of food microbiology.

The Association is located in very pleasant surroundings in Surrey and working conditions are excellent. Please apply in writing to:

BFMIRA

The Director, BFMIRA, Leatherhead, Surrey.

[733-019 (1971) : 40]
KING'S COLLEGE HOSPITAL
DENMARK HILL, S.E.5

TECHNICIAN (grade III, IV, or V) required for Radioactive Isotope work including the preparation and measurement of labelled radioactive compounds and assisting in Diagnostic tests. Applicants should possess 2 G.C.E. 'A' levels of O.N.C. in relevant subjects (chemistry would be an advantage). Also previous experience would be desirable. Salary scale £1,035 - £1,764 plus £90 London Weighting. Allowance depending on age, experience and qualifications.

Further details from the Director of Medical Physics department. Applications in writing giving the names and addresses of two referees to the Hospital Secretary, King's College Hospital, Denmark Hill, S.E.5, quoting Ref. P.172.

[733-020 (1971) : 40]
SENIOR LABORATORY TECHNICIAN with experience or appropriate qualifications required for School Physics Laboratories. Some electronic experience desirable. The School is just opening an Audio-Visual room, and any suitably qualified applicant would be expected to take charge of the technical work connected with this. Salary dependent on qualifications and scope of job agreed, but at least up to recommended scales. Apply in writing to the Senior Science Master, Marlborough College, Wiltshire.
[733-021 (1971) : 40]
ADMINISTRATIVE ASSISTANTS
(STATISTICS)
£1,670 to £1,967

The successful candidates will assist in the organisation and administration of large scale tests, data processing and statistical analysis concerning the utilisation of electricity by the principal classes of consumer and the main applications of electricity. A wide range of computing facilities is available.

Appropriate qualifications for the posts would be Associateship of the Institute of Statisticians or a degree including statistics or mathematics and some relevant experience. Candidates with other qualifications however and with appropriate experience in either statistics or data processing would be considered.

Write, giving full personal and career details and quoting NS/225/70 by 18th January, 1971 to:

Howard Bussey, Personnel Officer
the electricity council
30, Milbank, London, S.W.1
[733-022 (1971) : 40]
THE BRITISH COUNCIL
BRAZIL

THE FEDERAL UNIVERSITY OF PARANA, CURITIBA, requires a **VISITING PROFESSOR IN APPLIED ENTOMOLOGY** by April 1971 or as soon after as possible. Candidates should have a higher degree, preferably in Applied Entomology, from a university in Britain and experience in teaching and research. A doctorate and a knowledge of Portuguese or Spanish would be an advantage. Teaching is in English.

Salary: £2,580 - £3,205 per annum according to qualifications and experience. Oversea allowances within the following ranges: married (accompanied) £746 - £569, married (unaccompanied) £556 - £379, single £141 - £Nil. Children's and home education allowances. Income tax refunded if levied. Free furnished accommodation. Outfit grant. Employer's superannuation contribution paid. Medical and insurance schemes. Fares paid for Professor and family, including mid-tour passages for children in Britain. Assistance with freight and import duty on approved car. Two year contract with the British Council.

Write quoting reference number 71/OU1 to Appointments Division, The British Council, 65 Davies Street, London W1Y 2AA for further particulars and application form to be returned completed as soon as possible.

[733-023 (1971) : 40]
AGRICULTURAL RESEARCH COUNCIL
MEAT RESEARCH INSTITUTE

PUBLICATIONS AND INFORMATION OFFICER required to prepare technical publications for use by the meat industry, and to deal with technical trade enquiries. Other duties will include preparation of information leaflets, and assisting with Open Days and visitors. A knowledge of information retrieval systems would be useful.

Qualifications: degree, or equivalent in scientific subject e.g. food science; and ability to communicate with scientists and laymen.

Salary: £1,020 at age 22; £1,311 p.a. at age 26 or over; rising to £1,578 p.a. or £1,725 to £2,177 depending upon age and experience.

Application forms and further details: Secretary, Meat Research Institute, Langford, Bristol BS18 7DY. [733-024 (1971) : 40]
Applications are invited for research either at postdoctoral or at postgraduate level involving thermooosmosis of sorbable gases and vapours through high area microporous membranes. Salary scales: (under review) Postdoctoral, £1,355 x 125 p.a. + £100 London Allowance; Postgraduate, £825 x 60 p.a. FSSU benefits are also payable. Appointment renewable annually up to three years. Opportunity is provided to proceed to a higher degree. Applications, giving curriculum vitae and the names of two referees, to: Professor R. M. Barrer, Chemistry Department, Imperial College, London, S.W.7, England.

[733-025 (1971) : 40]
NEW TEACHING HOSPITAL FOR SOUTHAMPTON

SENIOR TECHNICIAN – RESEARCH

To open and run laboratory for the Professors of Obstetrics & Human Reproduction and Surgery, in new research unit.

I.M.L.T. qualification with experience of immuno-assay desirable, but not essential.

Salary: Medical Laboratory Technician Senior I scale, £1,358 - £1,751.

Opportunity to view laboratory available – contact the Senior Lecturer, Mr. Elstein.

Applications to the Personnel Officer, Southampton General Hospital, Tremona Road, Shirley, Southampton SO9 4XY.

[733-026 (1971) : 40]
The Research Unit in the Economics of Education under the direction of Professor Mark Blaug is forming a small team to carry out job analysis of high-level engineering jobs in private industry, with particular reference to the fit between occupation and education. Applications for appointment as Research Officer are invited from candidates possessing a good honours degree or equivalent qualification in engineering or technology, including some course-work in economics: some practical experience in industry is required. A real interest in manpower planning at the factory and national level is essential: knowledge of job analysis is desirable. The post is for one year with the possibility of an extension to four years and participation in the publication of results. The salary scale for Research Officers is £1,355 x £125 - £2,230/£2,355 x £125 - £3,105 + F.S.S.U. Entry point according to age and experience.

Application forms available from the Secretary, University of London Institute of Education, Malet Street, London WC1E 7HS: completed forms should be returned by 1 February 1971.
Applications are invited for the post of Lecturer in Mathematical Statistics or Operational Research. Applicants should have research interests, and have or expect to obtain appropriate postgraduate qualifications, in one of these or related fields.

The initial salary will be within the range £1,491 - £1,767 per annum on a scale rising to £3,417 per annum according to qualifications and experience. Applications, stating age, academic qualifications and experience, together with the names of three referees, should be received not later than 25th January, 1971, by the Registrar, The University, P.O. Box 147, Liverpool L69 3BX, from whom further particulars may be obtained. Quote Ref: RV/7325/NS. [733-028 (1971) : 41]
UNIVERSITY OF BIRMINGHAM
Department of Physics

SENIOR RESEARCH ASSOCIATE

A physicist with several years' experience of high energy physics and practical knowledge of counters, spark chambers and computer programming is required immediately to take part in a CERN experiment using the omega magnet. After several months' preparatory work at Birmingham and the Rutherford High Energy Laboratory he would be expected to move to CERN, Geneva, for at least a year.

Salary: £1,605 - £2,230 (under review) + F.S.S.U.

Applications (three) naming three referees by 15th January to the Assistant Registrar (S), University of Birmingham, P.O. Box 363, Birmingham B15 2TT. Please quote ref NP2.
[733-029 (1971) : 41]
Applications are invited for the post of Lecturer in Genetics in the Department of Zoology. Preference will be given to candidates with experience in one of the following fields - Cytogenetics, Developmental Genetics, Molecular Cytology or Population Genetics. Salary scale: Lecturer - £1,491 - £3,417 with a merit bar at £2,454. The initial salary will depend on qualifications and experience.

Further particulars may be obtained from the Deputy Secretary, The University, Southampton, SO9 5NH, to whom applications (7 copies from United Kingdom applicants) should be sent not later than 15 February, 1971 quoting ref. NSc.
SCIENTISTS & ENGINEERS
IN GOVERNMENT RESEARCH
Warren Spring Laboratory

SURFACE/ANALYTICAL CHEMIST
required in the Physical and Chemical Service Division to take charge of a programme of research into oil pollution. The work will involve undertaking basic laboratory studies of methods of abating pollution; leading a small team assessing relevant materials; and carrying out research on means of identification of recovered polluted material.

Experience in liquid/liquid and liquid/solid interface chemistry and some experience of modern physical techniques of analysis is desirable. The successful candidate will be appointed as Scientific Officer or Senior Scientific Officer. Superannuation under FSSU.

APPLICATION FORMS from the Director, Warren Spring Laboratory, Stevenage, Herts. Please quote HC/3D/183/F. Closing date: 25 January 1971.

Tropical Products Institute, London
PESTICIDE CHEMIST
for the Pesticides Analysis Section, to work on a research project concerning terminal pesticide residues in tropical products. The studies will involve labelled compounds and the use of various modern techniques. Candidates should be qualified in chemistry or a related subject. Experience of isotope work and chromatographic techniques is essential; knowledge of other physico-chemical methods and of pesticides would be an advantage.

The successful candidate will be appointed as Scientific Officer or Senior Scientific Officer. Prospects of permanent pensionable appointment and of promotion.

APPLICATION FORMS from the Administrative Secretary, Tropical Products Institute, Foreign and Commonwealth Office, Overseas Development Administration. 56/62 Gray's Inn Road, London WC1X 8LU.

Forest Products Research Laboratory
ORGANIC CHEMIST
required in the Chemical Processing Group to join a team carrying out research into problems involving surface coatings for timber and the chemical modification of wood, glues and gluing.

A knowledge of paint technology is essential. The successful candidate will be appointed as Experimental Officer or Assistant Experimental Officer. Prospects of permanent pensionable appointment and of promotion.

APPLICATION FORMS from the Director, Forest Products Research Laboratory, Princes Risborough. Aylesbury, Bucks. Please quote HC/2D/196/F. Closing date: 25 January 1971.

Water Pollution Research Laboratory
CHEMISTS
required at Stevenage, Herts., for
1. Analysis by traditional, automatic, and instrumental methods in the central analytical section of the Laboratory (3 posts).
2. Assessment of biodegradability of detergents and other materials using laboratory-scale and pilot-plant techniques (1 post).
3. Field and laboratory investigations of the effects of polluting discharges on natural waters in order to develop mathematical models (1 post).
The successful candidates will be appointed as Experimental Officer or Assistant Experimental Officer. Prospects of permanent pensionable appointments and of promotion.

APPLICATION FORMS from the Director, Water Pollution Research Laboratory, Stevenage, Herts. Please quote HC/3D/180/F. Closing date: 25 January 1971.

SALARIES, QUALIFICATIONS AND AGE LIMITS

SCIENTIFIC OFFICER CLASS
We normally expect you to have a 1st or 2nd class honours degree. For Senior Scientific Officer posts you must be 26 or over and have a minimum of three years' post-graduate research experience. Starting salaries depend on age, experience, and qualifications; within the range £1,162 - £2,703. Good promotion prospects to Principal Scientific Officer (salary £2,820 - £3,902).

Salary of post in Inner London carries a supplement of £125.

EXPERIMENTAL OFFICER CLASS
A qualification of the standard of HNC or a general degree in an appropriate subject is normally required. Starting salaries depend on age and experience in the range £1,020 (at 22) - £2,177.

[733-031 (1971) : 41]
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry. For further details write or telephone: G.K. Bureau, 17 Shaftesbury Avenue, London, W.1. 01-734 7232. Interviews by appointment [733-032 (1971) : 41]
TECHNICIAN or STUDENT TECHNICIAN reqd. in Pharmacology Dept., Royal Free Hospital Medical School, for research work in histology.

Experience in histochemistry desirable. Salary on Whitley Council scales (Technician: £1,129 - £1,443; student technician on age scale i.e. £670 at 19) plus £90 London Weighting allowance. Apply School Secretary, 8, Hunter Street, London, W.C.1, with the names and addresses of two referees.

[733-033 (1971) : 41]
A CHANGE FOR THE BETTER
[733-034 (1971) : 41]
UNIVERSITY OF NEWCASTLE UPON TYNE
Department of Civil Engineering
Interdisciplinary Research in Farm Waste

RESEARCH ASSOCIATE/ SENIOR RESEARCH ASSOCIATE

The Departments of Civil, Chemical and Agricultural Engineering are undertaking a joint investigation into the generation, handling and treatment of farm wastes. The project is supported by a grant from the Agricultural Research Council. The research workers in the three Departments will work as a team, though the project has been sub-divided to give each Department a particular responsibility. The research associate/ senior research associate in the Department of Civil Engineering is to investigate primarily the nature of farm wastes and biological treatment systems and will be assisted by a technician.

Qualifications: A degree in Chemistry, Biology or Engineering is necessary and research and/or design experience in biological treatment processes is desirable.

Salary: The commencing salary will be at an appropriate point on the scale £1,355 - £3,105 (under review) according to age, qualifications and experience.

Further particulars may be obtained from the Registrar, The University, Newcastle upon Tyne, NE1 7RU, with whom applications (three copies) together with the names and addresses of three referees, should be lodged not later than 28th February, 1971.

[733-035 (1971) : 42]
Applications are invited for the following posts in DEPARTMENT OF CHEMISTRY:

(a) **PROFESSOR OF ANALYTICAL CHEMISTRY**;
(b) **LECTURER IN ANALYTICAL CHEMISTRY**. Appointee will be expected to teach mainly analytical chemistry (but initially some teaching in other fields of chemistry, preferably organic chemistry will be necessary) and to undertake research in a field of interest to the Department.
(c) **LECTURER IN PHYSICAL/ANALYTICAL CHEMISTRY**. Appointee will be expected to be responsible for teaching mainly physical/analytical chemistry and to undertake research in a field of interest of the Department.

Salary scales: (a) £U3,150; (b) and (c) £U1,350 - £U2,230 p.a. (£U1=£1 3s 4d sterling). Salaries supplemented in range £612 - £1,068 p.a. (sterling) and education allowances and children's holiday visit passages payable in appropriate cases by British Government. F.S.S.U. Family passages; biennial overseas leave. Detailed applications (6 copies) naming 3 referees by 29 January 1971 to Inter-University Council 90/91 Tottenham Court Road, London, W1P 0ODT., from whom particulars are available.
MEMORIAL UNIVERSITY OF NEWFOUNDLAND
TECHNICAL SERVICES DEPARTMENT
Applications are invited for the following posts:

1. **ELECTRONICS TECHNICIAN**, Grade V ($6,250 - $8,000)
   Education and Qualifications: High School Diploma and a Trade School Diploma in Electronic Technology or equivalent. Not less than five years, excluding technical training, in the repair and maintenance of analytical instruments in a University or Research Institution.

2. **JUNIOR SCIENTIFIC GLASSBLOWER** ($6,250 - $8,000)
   Education and Qualifications: High School Diploma or equivalent with not less than four years as an apprentice in a University or Research Institution.
   Write with full details to B. W. Tucker, Personnel Officer, Memorial University of Newfoundland, St. John's, Newfoundland, Canada.

[733-037 (1971) : 42]
DRUG RESEARCH

The Research Division of Pfizer Limited is broadly based in the major scientific disciplines, has a staff of over 450 and an annual budget approaching £2 million. Internal promotions, together with a widening spectrum of research interest have created a need for additional members of the scientific staff.

Those appointed will work in modern well equipped laboratories located at Sandwich on the Kent coast.

To enable us to fill these positions we are looking for:

**BSc/GRIC Chemist**
for our Analytical Research Department, whose prime responsibility will be to ensure the efficient operation of NMR, IR and UV services. Ideally applicants will be in their early/middle twenties with 1 or 2 years practical experience in the above techniques, although new graduates will also be considered.

**BSc, GRIC, HND, HNC Chemists**
who are interested in synthetic organic chemistry involving laboratory research to establish economic manufacturing processes for new drugs. Some of these appointments are particularly suitable to women graduates in their twenties.

**ONC/'A' Level Technicians**
both for the Analytical and Process Research Departments. For the former Mass Spectrometry and or GLC experience would be advantageous as would synthetic organic chemistry experience for the latter. Suitable applicants with 'O' levels would be considered.

Applications giving brief details as to age, qualifications, experience, should be addressed to:
K. Horn, Personnel Officer,
Research Division, Pfizer Limited, Sandwich, Kent.

Pfizer
[733-038 (1971) : 42]
ULSTER:
THE NEW UNIVERSITY
SCHOOL OF BIOLOGICAL AND ENVIRONMENTAL STUDIES

Applications are invited for Lectureships within the School of Biological and Environmental Studies, in the following fields of interest:

Ref: 77/9 TAXONOMY:
Applicants should have a special interest in the Taxonomy of either algae or insects, though Taxonomists with interests in other groups will be considered.

Ref: 71/10 ECONOMIC GEOGRAPHY:
Applicants should have a special interest in quantitative locational analysis, preferably related to North America.

Ref: 71/77 METEOROLOGY:
Preference will be given to a person whose main interests are in Biometeorology and/or Agricultural Meteorology.

Ref: 77/72 SYSTEMS ANALYSIS:
Applicants should have special interest or experience in environmental science or planning. The person appointed would be required to teach the nature of systems analysis and its application to environmental problems.

Salary scale (under review) with FSSU: £1,355 x £125 (14) - £3,105. (It is intended to appoint at one of the first six points on the scale.)

Further particulars may be obtained from
The Registrar, The New University of Ulster, Coleraine, Northern Ireland (quoting appropriate reference number) to whom applications, together with the names and addresses of three referees, should be sent not later than 5th February, 1971.

[733-039 (1971) : 42]
MEDICAL RESEARCH COUNCIL
National Institute for Medical Research

SENIOR MECHANICAL ENGINEER

The Engineering Department, the main function of which is to provide ideas and equipment for research divisions of the Institute, requires a Senior Engineer, preferably in his thirties, to run the mechanical section and to lead a small mechanical design team.

Much of the work will involve close collaboration with scientists, and the ability to combine a fundamental approach with sound practical skills is important. Experience in the design of small electromechanical devices and/or instrumentation will be an asset.

The appointment will be to the scientific staff, probably in the salary range £3,065-£3,690 p.a. and superannuable under F.S.S.U. A good honours degree would normally be required.

Applications giving details of education, training and previous appointments should reach the Director, National Institute for Medical Research, Mill Hill, London, NW7 1AA before 28th February 1971.

[733-040 (1971) : 42]
Graduate with some experience in microbiology or equivalent subject required for above laboratory. The present success in identification of Gram-negative aerobic bacteria of medical origin requires extension to other bacterial groups and expansion of service. Programmer on staff and online computer facilities available. Starting salary in accordance with age and experience. Possibility of a permanent career in the Public Health Laboratory Service.

Applications with full curriculum vitae and names of referees to Personnel Officer, Central Public Health Laboratory, Colindale Avenue, London NW9 5HT.
[733-041 (1971) : 42]
AGRICULTURAL RESEARCH COUNCIL

SCIENTIFIC ADVISER

A vacancy has arisen in the Council's headquarters office for a Scientific Adviser to be concerned with the administration of research in Plant Physiology and Biochemistry. Applicants should have a good record of research in one of these subjects and a good knowledge of the other. The appointment will be in the grade of Principal Scientific Officer (£2,945 - £4,027) or Senior Principal Scientific Officer (£4,515 - £5,140) according to age, experience and qualifications. Superannuation under FSSU together with non-pensionable allowance of 4 ½ per cent of salary.

THE UNIVERSITY OF MANCHESTER
EXPERIMENTAL OFFICER
DEPARTMENT OF GEOLOGY

Applications invited for this post in which the person appointed will assist in maintenance and repair of a 100 KV transmission microscope and an electron probe microanalyser, and if suitably qualified can also participate in research and development associated with these instruments. Experience in dealing with electronics and vacuum systems essential. Salary range p.a. £1,090 - £2,110 (under review). F.S.S.U. Particulars and application forms (returnable by February 3rd) from the Registrar, The University, Manchester M13 9PL. Quote ref. 253/70/NS. [733-043 (1971) : 42]
UNIVERSITY OF YORK, ENGLAND
DEPARTMENT OF PHYSICS
Surface Physics
RESEARCH FELLOW AND RESEARCH ASSISTANT

A vacancy exists for a **RESEARCH FELLOW** to join a group of experimental and theoretical physicists working on the structure and properties of solid surfaces. The group has substantial support from the Science Research Council and is interested in the techniques of LEED and Auger Electron Spectroscopy and the problems of crystallographic ordering at surfaces and interfaces. The Fellow will be concerned with the theory of elastic and inelastic scattering of electrons at surfaces and with the calculation of surface structures. Preference will be given to candidates with experience in surface physics, band theory of solids, the theory of soft X-ray spectroscopy or related topics.

The initial salary will be in the range £2,105 - £2,605 per annum, depending upon age and experience, and the appointment will be for a maximum period of five years.

A second vacancy exists for a postdoctoral **RESEARCH ASSISTANT** to work on a programme concerned with pseudomorphism and epitaxial growth, with particular reference to metal/metal and metal/oxide systems. Preference will be given to candidates with experience of UHV technology, or experimental surface physics.

This appointment will be for a maximum period of three years, from April 1971. The initial salary will be £1,355 or £1,480, depending on previous experience, with FSSU.

Applications (three copies) for either post, together with the names of three referees, should be sent to the Registrar, University of York, Heslington, York, YO1 5DD, as soon as possible, and not later than 5 February 1971. Please quote reference no. 12/6008a for Fellowship, and 12/7010a for Assistantship. Further information may be obtained from Dr J. A. D. Matthew or Dr M. Prutton.

[733-044 (1971) : 43]
UNIVERSITY HOSPITAL OF WALES
Department of Haematology

SENIOR SCIENTIFIC OFFICER

This is a new post in the Medical Teaching Centre associated with the Welsh National School of Medicine in Cardiff. The Department provides a comprehensive service for the investigation of blood diseases, including a number of specialised laboratories dealing with blood transfusions and Immunohaematology, Radioactive Isotopes, Blood Coagulation and Microbiological Assays.

Applicants should have qualifications and experience either in haematology or in a relevant scientific discipline and should be interested in the development and evaluation of new techniques.

Salary £2,325 p.a. rising by annual increments to £2,865 p.a.

Application forms and further particulars may be obtained from the Personnel Officer, Cardiff Royal Infirmary, Newport Road, Cardiff, to whom applications should be returned by Friday, 29th January, 1971.

[733-045 (1971) : 43]
UNIVERSITY OF SURREY
DEPARTMENT OF BIOLOGICAL SCIENCES

TECHNICIAN required for neurobiological research and occasional assistance with class preparation in physiology. Applicants should be experienced in physiology or biochemistry. The post will be to assist the Reader in Physiology, and to help in the development of a proposed neurobiology group.

Salary: £1,041 - £1,410 per annum.

Application forms may be obtained from the Staff Officer, University of Surrey, Guildford, Surrey, to whom they should be returned as soon as possible.

[733-046 (1971) : 43]
**SCIENTISTS**
Beecham Group Research Unit

Beecham Group Ltd has the following vacancies in its newly established multidisciplinary Research Unit for scientists interested in providing scientific support for internationally used proprietary products: -

**Biologist (Skin)**
to study the characteristics of healthy skin and the influence of topically applied cosmetic agents. This work will involve the use of animal models and specific training could be provided for an otherwise well qualified candidate.

**Animal Biologist/Dental Scientist**
to establish animal models of certain oral conditions and use them to follow up laboratory studies now in progress. Previous experience of small animal work is highly desirable, together with statistical knowledge appropriate to experimental design and analysis.

**Physicist or Tribologist**
prepared to adapt his or her knowledge to the study of cleaning and polishing systems used in toothpastes. This is a complex area of study which offers scope for originality of approach.

Successful applicants will work in small teams and have considerable freedom in planning their work to achieve set objectives. They are likely to have good honours degrees and relevant post-graduate experience. Some industrial experience would be an added advantage.

**Technicians**
are also required to work with the Physicist and with an already appointed Chemist. For these posts, qualifications, ranging from 'O' level to HNC/HND, are appropriate. Part-time release is possible for junior staff wishing to improve their qualifications.

The Research Unit's laboratory is situated in country surroundings within easy reach of London. There are excellent dining facilities and a flourishing sports and social club. Successful applicants will qualify for Beecham Group’s generous profit sharing and non-contributory pension schemes. Competitive salaries are paid according to qualifications and experience and are reviewed annually.

Please apply, giving brief details of qualifications and experience, to:

The Senior Personnel Officer,
Beecham Group Research Unit,
Brockham Park, Betchworth, Surrey.

1966
1970

[733-047 (1971) : 43]
COMPUTER PROGRAMMER
£1,505 to £2,117

We are implementing a data-processing system on an IBM 360/85 in mid-1971. The system will provide both engineering and management information on electricity distribution networks. We require two programmers to participate in the development of this system, particularly in developing interrogation packages. They will join an expanding data-processing team responsible for the system.

The successful candidates will probably have about three years’ experience in at least one of the following fields:

- information systems
- statistical data processing
- survey analysis
- commercial programming

Knowledge of COBOL is desirable, although applicants with FORTRAN or ASSEMBLER will be considered provided they have disk or tape experience. Write, giving full personal and career details and quoting NS/205/70 by Thursday, 14th January, to:

Howard Bussey, Personnel Officer
the electricity council
30 Millbank, London, S.W.1

[733-048 (1971) : 43]
MICROMETEOROLOGIST required
To develop a climatological-micrometeorological programme of study, in a department with a research programme in geotechnical science. The applicant must have a strong background in physical and earth sciences, and research interests relating to interdisciplinary geotechnical studies, which involve liaison with civil engineers and geologists. Well-equipped research facilities with electronics, metal and woodwork shops, and technological assistance. Academic rank open. Further information from the Chairman, Geography Department, Carleton University, Ottawa, Canada.
[733-049 (1971) : 43]
INSTITUTE OF CANCER RESEARCH
ROYAL CANCER HOSPITAL,

JUNIOR TECHNICAL OFFICER required in biochemistry department at Chester Beatty Research Institute, Fulham Road, S.W.3., to assist in group working on interaction of carcinogens with cellular constituents. Candidates should have two or more GCE 'A' level passes including Chemistry and Biology and experience in handling radioactive compounds and in cellular fractionation techniques would be useful. Starting salary around £1,200 - £1,400 in scale progressing to £1,720 p.a. Apply with names of 2 referees to the Secretary, 34 Sumner Place, S.W.7. quoting reference 301/B/417.

[733-050 (1971) : 43]
UNIVERSITY OF SASKATCHEWAN
Regina Campus

**Research and Teaching Assistantships** leading to the M.Sc. or Ph.D. degree in Chemistry. Stipends range from $3,000 to $4,000 per year. Minimum Qualifications - B.Sc., G.R.I.C., or equivalent.

Staff research interests cover a wide range of topics including spectroscopy, high temperature chemistry, nuclear chemistry, radio-tracer studies in biochemistry, kinetics, thermodynamics, organic mechanism studies, etc. Equipment includes: Varian NMR, Fabritek 1072 signal averager, Cary 14H, Beckman IR12, Durrum stop-flow spectrometer, neutron generator, research GLC apparatus, Nuclear Chicago Mark I scintillation counter and paper strip scanner, Beckman Lowbeta counter, research potentiostats, Bendix time-of-flight mass spectrometer, IBM 360 computer and many other instruments.

New and expanding campus.

Admission for either the September or January semesters.

For further information write: Chairman, Department of Chemistry, University of Saskatchewan Regina Campus, Regina, Saskatchewan, Canada.

[733-051 (1971) : 44]
UNIVERSITY OF BELFAST
DEPARTMENT OF PHARMACY
Department of Chemistry (Industrial)

The Senate of The Queen's University of Belfast invites applications for the following posts from 1st April 1971, or such later date as may be arranged:
(a) Department of Pharmacy - Chair and Lectureships.
(b) Department of Chemistry (Industrial) - Chair and Lectureships.

The salary for the Chairs is £5,337 and the salary scale for the Lectureships is £1,491 to £3,417. Initial placing on the lectureship scale will depend on qualifications and experience. Certain of the Lectureships appointments may be subject to a period of probation up to three years in duration and will be made on one of the first three points of the lectureship scale.

Applications should be received by 13th February, 1971. Further particulars may be obtained from The Secretary, The Queen's University of Belfast, Belfast BT7 1NN, Northern Ireland. [733-052 (1971) : 44]
The University of Western Ontario

Dean of Faculty of Engineering Science

Applications are invited for the position of Dean of the Faculty of Engineering Science, to be held preferably from July 1st, 1971 under conditions of appointment current in the university.

The non-departmentalized Faculty has undergraduate options in Chemical, Civil, Electrical, Mechanical and Materials Science with complementary graduate programmes to Ph.D. Emphasis is now being given to industrially oriented and multidisciplinary M.Eng. programmes; special strength is developing in Environmental Engineering. The medium sized Faculty has a strength of 42 faculty, 440 undergraduates and 125 graduates.

Considerable scope exists for administrative and academic leadership towards contemporary engineering objectives.
Reply to

Dr. R.J. Rossiter,
Vice-President (Academic),
The University of Western Ontario,
London 72, Ontario, Canada
[733-053 (1971) : 44]
BOC

Senior Scientist
Medical Gases

We want to interview graduates, men or women, aged 30-35, with a minimum of an honours degree in physiology or physics; a further degree would be an advantage. Essentials are a knowledge of chemistry, with at least five years' working experience on respiratory problems or anaesthesia in a university research department, hospital or recognised school of medicine.

Primarily, the appointment consists of advising the medical and allied professions on respiratory problems and anaesthesia. Additionally involved is the 'uses' development of gases, gas mixtures, chemical compounds and associated equipment for respiration, resuscitation and anaesthesia. This aspect of the work necessitates evaluation and assessment of new and existing products.

Salary is negotiable, commensurate with the importance of the appointment.

Applications, quoting reference 159, should be sent to:
[733-054 (1971) : 44]
UNIVERSITY OF NEWCASTLE UPON TYNE
LECTURER IN PUBLIC HEALTH ENGINEERING

Applications are invited for the post of Lecturer in process design in the Division of Public Health Engineering of the Department of Civil Engineering. Applicants should have a good honours degree in Chemical Engineering, Chemistry, Mathematics, Civil Engineering, or other subjects relevant to the process design of water and waste-water treatment units. Duties will include lecturing to undergraduate and postgraduate public health engineering students. The lecturer will be encouraged to pursue research and will be expected to supervise the work of postgraduate research students.

The salary will be at an appropriate point on the Lecturers' scale £1,355 - £3,105 (under review) according to age, qualifications and experience. Membership of F.S.S.U. required.

Further particulars may be obtained from the Registrar, The University, Newcastle upon Tyne NE1 7RU, with whom applications (three copies), together with the names and addresses of three persons to whom reference may be made, should be lodged not later than 27th February, 1971. Please quote reference NSc.

[733-055 (1971) : 44]
CHELSEA COLLEGE OF SCIENCE AND TECHNOLOGY  
(University of London)  

MANAGER OF TECHNICAL SERVICES  
Department of Pharmacy  

To be responsible to the Head of Department for the overall organisation and administration of technical services including teaching and research laboratories, and for departmental finance, purchasing and technical staffing.  

Applicants should have good organising ability and relevant experience, and should preferably possess a university degree or other appropriate qualification. Salary scale £2,355 x £125 (3) - £2,730, plus £100 London Allowance. Application forms from the Secretary, Chelsea College, Manresa Road, London, S.W.3. Closing date 25th January 1971.  
[733-056 (1971) : 44]
AGRICULTURAL RESEARCH COUNCIL

INFORMATION OFFICER

A senior information officer is required at the London headquarters to take charge of and develop the Council's information services and public relations.

Candidates should be graduates, preferably in science, experienced in information and publicity or journalism and capable of interpreting scientific material and writing about it in good English.

Salary £2,654 - £3,224 or £3,383 - £3,998 depending on age, qualification and experience. Superannuation scheme.

Applications by 1st February to The Establishment Officer, Agricultural Research Council, 160 Great Portland Street, London, W1N 6DT, from whom further particulars may be obtained. [733-057 (1971) : 44]
THE UNIVERSITY OF SUSSEX
School of Mathematical and Physical Sciences

LECTURER IN PHYSICS

Applicants should have research interests in either laboratory Plasma Physics, or the Physics of the Ionosphere and Magnetosphere, or preferably in both fields.

The salary will be on the scale £1,491 to £3,417 and will depend on age and relevant experience.

Further particulars and application forms may be obtained from the Secretary of Science, Science Office (Establishment), the University of Sussex, Falmer, Brighton, SN1 9QH, to whom completed applications should be returned as soon as possible.

[733-058 (1971) : 44]
Make a choice

The choice of a company to join for your first job is one of the most important decisions in your working life.

Decisions should be based on facts. Here are some:

One. GKN is Britain's largest engineering group comprising many companies offering the opportunity to work in a wide variety of activities.
Two. GKN needs graduates in all subjects, especially engineers and technologists.
Three. GKN needs individuals who are capable of responding to responsibility and who can make a contribution after a very short period indeed.
Four. GKN companies are leaders in many fields in terms of sheer size of output and in the application of technology.
Five. GKN offers entry in two ways – by direct entry to a first appointment or by the Graduate Training Scheme with programmes planned to meet individual needs.
Six. A degree is the first qualification but progress will depend on the ability of the individual to make the change from learning to applying knowledge to achieve results.

Ask your Appointments Officer or Careers Adviser about GKN or write direct to us. When our interviewing teams visit your university find out about your career in particular. It could be the best decision you ever made.

GKN
Britain's largest international engineering group.
[733-059 (1971) : 45]
Research Scientist
Food Industry

A vacancy exists for a graduate, or holder of a recognised Institute qualification, to join a team researching into muscle biochemistry. The objective of the research is to improve techniques of handling fresh meat between slaughter and sale. The laboratories are situated in central London and the starting salary will be about £1,850 per annum.

Applicants should preferably have had two years research experience in the field of animal biochemistry and physiology.

Phone (or write) for application form to: The Recruitment Secretary (L.28/NS), J, Sainsbury Limited, 23, Blackfriars Road, London, S.E.1. Telephone 01-928 3355 Extension 2774

SAINSBURY’S
[733-060 (1971) : 45]
GRADUATES

Do you have experience of small scientific computers (e.g. IBM 1130, PDP 9, Elliott 903) and wish to widen your experience by working on a wide range of problems? We are looking for a young graduate (or equivalent) to work in the Computer Services unit of our Economics and Operations Research Group, programming our PDP 15 with 16K, 4 DEC tapes, 250K DEC disk, card-reader and line-printer. The person appointed will spend about half of his/her time assisting in developing non-numerical and general data-processing applications of the machine, and the remainder on programming Economics and Operations Research models. While we are particularly keen to hear from anyone having experience with DEC computers, especially working in Assembler, those conversant with FORTRAN or ALGOL on any machine are also welcome to apply.

The Economics and Operations Research Group of the International Wool Secretariat consists of about thirty graduates comfortably housed in one of London's most attractive new office buildings situated in one of the most convenient and pleasant areas of Central London.

If you are interested and wish to apply or obtain further details, please contact W. Lampkin, Manager, Operations Research Section, International Wool Secretariat, Wool House, Carlton Gardens, London, S.W.1. Tel: 01-930 7300.

[733-061 (1971) : 45]
RESEARCH IN TRANSPORTATION

Research and Development Engineer in
Department of Engineering
COUNTY BOROUGH OF TEESSIDE
Salary: £2,751 - £3,150 (Ref. 4TT3)

Starting salary will be determined within the scale shown and will be in accordance with qualifications and experience.

OBJECT
Research into transportation Systems and Operation, leading to the development of new techniques for Transportation Planning and advice on future Public Transport Systems.

STATUS
A Principal Assistant Engineer leading a team of up to 12 engineers, mathematicians and computer technicians.

QUALIFICATIONS
Experience in the above work, and the successful applicant should have either a Ph.D. M.Sc., or be a Chartered Engineer. Car allowances, 100% removal expenses, mortgage facilities and/or Council accommodation will be available in approved cases.

Full applications in writing are required, quoting the relevant reference and stating age, experience and qualifications and the names of two referees, to arrive not later than Thursday 21st January 1971 addressed to:

[733-062 (1971) : 46]
SUTTONS SEEDS, READING

PLANT BREEDER
Graduate with training in applied plant genetics required for developing programmes with vegetables and flowers. Our team use a wide range of genetical and practical techniques and candidates should have initiative to devise and run a number of programmes simultaneously. Excellent prospects, starting salary according to age/experience. Company superannuation scheme.

Applications with names of referees please to Dr. L. E. Watts, Suttons Seeds, Reading.
[733-063 (1971) : 46]
CHEMICAL PHYSICS DEPARTMENT

An **ASSISTANT EXPERIMENTAL OFFICER/EXPERIMENTAL OFFICER** is required to take responsibility for the daily running of a Varian HA 100 N.M.R. Spectrometer and a Siemens A.E.D. Single Crystal Diffractometer (training will be given). A Higher National Certificate in Physics or Chemistry is a minimum requirement.

Salary scale: Assistant Experimental Officer - £1,491 - £1,767 p.a. Experimental Officer: £1,902 - £2,592 p.a.

Applications in writing should be sent to the Staff Officer (quoting Ref. Chem Phys. E.O.3), University of Surrey, Guildford, Surrey, from whom application forms may be obtained.

[733-064 (1971) : 46]
MEDICAL RESEARCH COUNCIL

**Technician** required in the Division of Immunological Products Control at our Hampstead Laboratories. Applicants should be trained in the techniques of tissue culture and have a working knowledge of techniques in virology. Salary on scale £1,219 - £1,533 p.a. Please apply quoting our reference NS 79/1 and giving brief details of experience and qualifications to Mrs. A. Harrell, National Institute for Medical Research, The Ridgeway, Mill Hill, London, NW7 1AA. Tel: 959 3666.

[733-065 (1971) : 46]
EUROPEAN ROTOGRAVURE ASSOCIATION

ERA is an international organisation for the development of printing by the gravure process. For its recently founded Institute for technical development and information it is looking for the following staff members:

QUALIFIED PHYSICIST
QUALIFIED CHEMIST

Applicants should already have had some practical experience and preferably by the physicist in ultrasonics, acoustics or optics, and by the chemist in photopolymers or organic chemistry.

Previous experience in printing is not necessary. The salary is negotiable according to experience.

Please write with full details including salary range expected and possible starting date to Dipl.-Ing. M. Dini, ERA Institute, 8 München 80, Kopernikusstrasse 9, Germany, Tel. 45 44 14.

[733-066 (1971) : 46]
ROYAL VETERINARY COLLEGE
Hawkshead House,
Hawkshead Lane,
Potters Bar, Herts.

**Junior Technician**
required to assist with a project in the department of surgery. Experience in bacteriology an advantage. Training will be given with day release for appropriate qualification. Apply in writing to Mr. W. J. Gooden.

[733-067 (1971) : 46]
SOCIAL SCIENCE RESEARCH COUNCIL

Conversion Fellowships, starting from £1,045 p.a. are available for young postdoctoral scientists wishing to enter the social sciences and for social scientists wishing to change disciplines.

Candidates may use the Fellowships to obtain training in methods of research or to take an accepted postgraduate course in the social sciences.

The awards start from October 1971, or at the latest 1 January 1972, and may be for one or two years.

Write for further details to SSRC, State House, High Holborn, London WC1 or telephone 01 405 6491 extn. 291.

Closing date for receipt of completed applications - 3 March 1971.
[733-068 (1971) : 46]
Applications are invited for the post of Experimental Officer to join a small team engaged on the development and construction of equipment for research in Agricultural Engineering.

Qualifications: University Pass Degree in Electrical Engineering or H.N.C. with suitable endorsements. Experience: Experience in one or more of the following would be advantageous: -Integrated circuit applications; Magnetic tape recording; Data acquisition and processing. Salary £1,725 - £2,177 (plus 5½ % non-pensionable allowance.)

Further information and application forms from The Secretary, N.I.A.E., Scottish Station, Bush Estate, Penicuik Midlothian. Closing date for applications -23rd January 1971. [733-069 (1971) : 46]
COMMUNICATION WITH INDUSTRY

The B.L.R.A. offers a challenging job for an assistant to the Manager of the Information Group. This provides information, library, and publication services covering a wide range of scientific disciplines and particular aptitude is required in presenting technological information in a manner of interest to the lay reader.

Candidates should be aged 22-30; a degree in science or a similar qualification is preferable. Starting salary will be £1,000 - £1,400 depending on age, experience and ability.

Apply to: Director of Research, British Launderers' Research Association, Hill View Gardens, HENDON, NW4 2JS.

[733-070 (1971) : 46]
VICTORIA UNIVERSITY OF WELLINGTON
New Zealand

GEOPHYSICS TECHNICIAN

Applications are invited for a Grade I or II Technician in Geophysics from candidates with appropriate technical qualifications. Principal duties will be to maintain geophysical instruments and equipment, to maintain and prepare geophysical model experiments used in teaching, to take part in occasional field excursions, and to assist in the design and construction of electronic, electrical and mechanical devices required for research.

Salary scales: Gr. I $NZ2,218 - 2,913; Gr. II $NZ3,081 - 3,504. These salaries are at present under review. The commencing salary and grading will be according to qualifications and experience. Superannuation scheme available and allowance towards travel and removal expenses.

Further particulars and information as to the method of application available from Association of Commonwealth Universities (Appts), 36 Gordon Square, London WC1H 0PF.

Applications close in New Zealand and London on 15 February 1971.
[733-071 (1971) : 47]
Applications are invited for the above post, which will run for 3 years from the date of appointment, within a research group studying the electrical effects of implanted impurity ions in GaAs crystals. The successful applicant will be expected to assume an active role within the group assisting on the preparation and bombardment of GaAs specimens and in the physical and electrical assessment of the implanted material.

Applicants should be able to show an aptitude for practical tasks and the ability to learn new techniques, and it would be an advantage to have experience in one or more of the following fields: vacuum technology, semiconductor device technology, chemical analysis, metallurgical sample handling, electronics, instrument mechanics. Salary scale: £1,676 - £1,909 per annum. Application forms may be obtained from the Staff Officer, University of Surrey, Guildford, Surrey, to whom they should be returned by Friday, 22nd January, 1971.

[733-072 (1971) : 47]
SCIENTIFIC ASSISTANT
required for interesting laboratory work determining the digestibility of herbage. QUALIFICATIONS:
Four O levels (including English, Maths or a Science Subject)
SALARY: Based on age e.g. £587 (age 18) £1003 /age 25) £1253 (maximum).

MACHINE OPERATOR
required to operate punched card and paper tape equipment. Training will be given and no previous
experience of this type of work is necessary.
APPLY: PERSONNEL OFFICER TELEPHONE HURLEY 363
[733-073 (1971) : 47]
ASSISTANT EXPERIMENT OFFICERS
required by the Applied Geochemistry Research Group to assist in the investigation of geochemistry applied to problems of mineral exploration, epidemiology and marine mineral resources. Training provided in use of instrumental methods of trace analysis. G.C.E. “A” level essential. Salary £911 to £1,490 per annum according to age and qualifications.

Application forms from Professor J. S. Webb, Geology Department, Imperial College, Prince Consort Road, London, S.W.7.
[733-074 (1971) : 47]
Graduates!
Go North West
young man and start ‘living’ on £1,365

The North Western Gas Board offers boundless opportunity for graduates who enjoy fast learning as much as they enjoy fast living. You'll have opportunity to do both in an area where a starting salary of £1,365 goes a long way.

If you expect to graduate in one of the following disciplines: ENGINEERING (Chemical, Gas, Civil or Mechanical) or MATHEMATICS, STATISTICS and ECONOMICS, or MANAGEMENT ACCOUNTING the North Western Gas Board have openings in ENGINEERING, ACCOUNTING COMPUTERS OR ECONOMIC RESEARCH.

The rewards of the job are directly related to the scope of your talents and ambitions. You'll go just as far as you want to go in industry where responsibility and involvement in new management techniques come at an early age. And you'll be a part of the natural gas technology which promises exciting new challenges for the seventies.

If you want to be part of a stimulating growth industry then go North West young man with N.W.G.B.

Write for full details and application form. Complete the coupon and post to:

SK & F

MEDICAL INFORMATION SCIENTIST

Smith Kline and French Laboratories Limited, one of the leading international pharmaceutical companies, has a vacancy for a Medical Information Scientist to work in the company's modern building in Welwyn Garden City, 25 miles from the centre of London.

 Responsibilities include the answering of technical queries, mainly related to the company's products, both from outside the company and from internal sources including overseas markets, support operations for projects under development, critical assessment of data and the maintenance of background files. The work is responsible and varied, with scope for creativity and with considerable contact with other departments. The Library and information facilities are excellent.

A biological degree, preferably in biochemistry, physiology, or pharmacology is essential. Familiarity with information techniques as applied to the medical or biological literature, or experience within the pharmaceutical industry, would be an advantage.

Salary and conditions of employment are first-rate. Please write, quoting ref. A96043, giving brief relevant details to:
John Ostle, Personnel Officer, Smith Kline and French Laboratories Limited, Mundells, Welwyn Garden City, Herts.
[733-082 (1971) : 48]
HUNTINGDON RESEARCH CENTRE
We are an organisation employing some 630 personnel in the United Kingdom and having several overseas units, in various branches of medicine for government and industry.

HEAD OF MICROBIOLOGY

WE REQUIRE a young enthusiastic graduate to head the Department of Microbiology. MAIN WORK INVOLVED will be the responsibility for directing the routine and research bacteriological studies and assays for the Pharmaceutical and Food industries. The successful candidate will be expected to develop the work of the department and to enlarge the studies undertaken.

STARTING SALARY will be attractive. The facilities exist for a higher degree by thesis.

APPLICATIONS are invited from a science graduate; an interest in tissue culture would be an advantage. Ref: M/EJFS/NS/39.

RESEARCH OFFICER
Department of Environmental Physiology

WE REQUIRE a young male/female to join a team within the Department of Environmental Physiology.

MAIN WORK INVOLVED will be the supervision of the evaluation of irritancy of atmospheric contaminants.

STARTING SALARY will be attractive.

APPLICATIONS are invited from suitably qualified persons with HNC degree in biological subjects. Experience of laboratory management would be desirable. Ref: EP/RB/NS/34.

CONDITIONS are good and are in line with any large employee orientated company, including educational facilities.

WRITE quoting relevant reference to: Allen A. Schofield, Personnel Officer, Huntingdon Research Centre, HUNTINGDON PE18 6ES.

H.M. Factory Inspectorate
CHEMICAL BRANCH

Chemists
required in the Industrial Hygiene Section which is located in West London but will be moving to North West London later this year.

The Laboratory is currently expanding and is engaged on work concerning the investigation of environmental conditions in industry using the most modern analytical equipment. Topics under investigation include both toxic and ionising radiation hazards and also those due to the inhalation of dusts causing silicosis, asbestosis, byssinosis and similar industrial lung diseases. Candidates must be willing to undertake occasional travel within the UK to visit factories and other premises with a senior officer and also to participate in field experiments.

Candidates should have a degree, HNC or equivalent in an appropriate subject, and experience in a chemical or physical laboratory or an associated workshop is desirable.

The successful candidates will be appointed with salary in the scale £1,145 (at 22) - £1,436 (at 26 or over) - £1,703. Further study encouraged. Prospects of promotion. Noncontributory pension.

APPLICATION FORMS from Civil Service Commission, Alencon Link, Basingstoke, Hants., or telephone BASINGSTOKE 29222 ext 500 or LONDON 01-734 6464 (24 hour "Ansafone" service). Please quote 594-95/H1/F. Closing date: 25 January 1971.

[733-084 (1971) : 48]
LECTURESHIPS are vacant in:
Experimental Physics, including Geophysics and Radioastronomy.
Theoretical Physics, particularly Classical Mechanics,
Electromagnetic Theory and Relativity.
Instrument Design, including Electronics.

These posts are concerned with research and with teaching at graduate and undergraduate level. Preference will be given to applicants with interests primarily in fundamentals.

Salary on scale £1,491 - £3,417 with initial placing according to qualifications and experience. Superannuation (F.S.S.U.) and removal allowance.

Further particulars from The Secretary, The University, Aberdeen, with whom applications (8 copies) should be lodged by 8th March 1971 (later applications from abroad will be considered).
[733-085 (1971) : 48]
Enquiries are invited from persons interested in this position which becomes vacant in the latter half of 1971.

This institution serves Hobart, capital city of Tasmania, and has a high reputation for its size. Under the Director there are 6 curators and a total staff of 24 with an annual budget, at present, of $135,000.

The Trustees are looking for a scientist and administrator with an interest in the educational and social aspects of museum and art gallery activities and preferably with experience in these fields. The position is generally regarded as equivalent in status to a senior academic appointment.

Further information may be obtained from the Secretary, Tasmanian Museum, Hobart, Tasmania, or the office of the Agent General for Tasmania, 458/9 Strand, London, W.C.2.

[733-086 (1971) : 49]
EXPERIMENTAL STAFF
required by UKAEA, Aldermaston for 2 posts in the RADIATION MEASUREMENTS Section

POST A GRADED AS ASSISTANT EXPERIMENTAL OFFICER
To develop and apply radiation measurement methods to the evaluation of materials and components to support work in the fields of nuclear industry and defence.
The post involves the use of radiations from machines and radio isotopes with a wide range of detector electronic equipment. Experience in radiation measurements and/or nuclear electronics would be an advantage.

POST B GRADED AS EXPERIMENTAL OFFICER/ASSISTANT EXPERIMENTAL OFFICER
To determine the radiation characteristics of new types of gamma, neutron and beta detecting and measuring instruments and development of standards for calibrating them.
The post involves the extensive use of sealed radiation sources and X-ray sets.
An interest in radiation physics coupled with a careful experimental technique is required. Previous experience in this field is desirable but not essential.

QUALIFICATIONS Applicants should have a Pass Degree; HND or HNC or an equivalent qualification.

SALARY
Assistant Experimental Officer £1,015 at age 21; £1,405 at age 26 rising to a maximum of £1,690 pa.
Experimental Officer £1,850 - £2,330 pa.
A house, assistance with house purchase or hostel accommodation available.

Write for application form to Chief Personnel Officer, UKAEA, Aldermaston, Reading RG7 4PR quoting reference 3792/215
[733-087 (1971) : 49]
British Steel
GENERAL STEELS DIVISION

INFORMATION ASSISTANT

A vacancy exists in the Information Unit of the Library and Information Services for an Information Assistant to be involved in the operation of a computer-based library and information system at our Research Centre (Scotland), Meadow Road, Motherwell.

The person appointed will cover all aspects of information work, particularly the preparation of abstracts, the conducting of literature searches and liaison with clients of the service.

It is envisaged that the successful candidate will be under 30 years of age and have some technical experience in the iron and steel industry and should be educated to H.N.C. or equivalent in an appropriate discipline.

The successful applicant will enjoy excellent conditions of employment associated with a large organisation.

Applications quoting ref. 10/RC/70 giving brief details of education and career history to:
Personnel Officer - Recruitment,
Group Personnel Services,
Scottish, Shelton & East Moors Group,
BRITISH STEEL CORPORATION,
Dalzell Works, Motherwell.

UNIVERSITY OF HONG KONG
Applications are invited for the following appointments:

LECTURESHIP / ASSISTANT LECTURESHIP IN MATHEMATICS: Applicants should specialize
in a major branch of mathematics.
Appointments are available from September 1, 1971, or January 1, 1972.
Annual salaries (superannuable) approximate sterling equivalents at current rate of exchange in brackets
are:
Lecturer: HK$ 34,368 – 55,272 (£2,362 - £3,799) (man); HK$ 31,080 – 55,272 (£2,136 - £3,799)
(woman)
Assistant Lecturer: HK$ 23,568 – 28,574 (£1,620 - £1,956) (man); HK$ 19,560 - £24,600 (£1,344 -
£1,691) (woman).
Further particulars and application forms may be obtained from the Secretary-General, Association of
Commonwealth Universities (Appts), 36 Gordon Square, London WC1H 0PF, (telephone 01-387-8572
or call in person), or the Secretary to the Council, University of Hong Kong. The closing date for
applications is 15 March 1971.
[737-009 (1971) : 277]
IMPERIAL COLLEGE,
Department of Chemical Engineering and Chemical Technology.
SHOCK TUBE RESEARCH
A post doctoral research assistant, for two years on an S.R.C. grant, is required for study of pyrolysis of hydro carbons.
Applications to Prof A.G. Gaydon, F.R.S.
[737-010 (1971) : 277]
KENNEDY INSTITUTE OF RHEUMATOLOGY

JUNIOR TECHNICIAN for Histology and Auto-Radiography to assist Dr. S.R. Pelc. Minimum qualifications 2 A Levels in Science Subjects or relevant experience. Starting salary on Whitley Council scale within the range of £627 - £1,144 per annum inclusive. Applications in writing naming two referees to Laboratory Superintendent, Kennedy Institute, Bute Gardens, London, W.6.

[737-011 (1971) : 277]
THE GRASSLAND RESEARCH INSTITUTE
Hurley, Maidenhead, Berkshire

BIOMETRICIAN

One Scientific Officer / Senior Scientific Officer and one Assistant Experimental Officer / Experimental Officer are required for work in the Biometrics Department of the Grassland Research Institute. This department provides a data processing service and also advises on and undertakes research into all statistical and mathematical aspects of the Institute research programme which is directed towards the improvement of animal production from grass and other forage crops. At present, considerable use is made of off-line computing facilities including a terminal to an IBM 360/75 and ICL 4/70. Plans are being made for a high speed terminal to be installed in about a year’s time.

Applicants for the Scientific Officer / Senior Scientific Officer position should have a 1st or upper 2nd class honours degree in Statistics, Mathematics with Statistics or similar qualifications and an interest in applying these skills to biological problems. Applicants with research experience and those newly qualified will both be considered.

A pass degree in the above subjects is required for the Assistant Experimental / Experimental Officer position.

Salary range in the Scientific Officer class is £1,162 - £2,703 p.a. and the point of entry will depend on postgraduate qualifications and approved experience.

Salary range in the Experimental Officer class range £1,020 age 22 - £2,177 p.a. plus 5 ¼ % of basic salary non pensionable allowance.

[737-012 (1971) : 278]
UNIVERSITY OF NEWCASTLE UPON TYNE
EXPERIMENTAL ASSISTANT IN ROCK ANALYSIS

The Department of Geology requires an Experimental Assistant with a degree or equivalent qualification in chemistry or chemistry/geology to assist in the rock and mineral analysis laboratory. The techniques in use include conventional analysis, spectrophotometry, emission spectrography, X-ray diffraction and X-ray fluorescence analysis.

The salary will be at an appropriate point on the scale £1,140 to £1,902 per annum. Membership of F.S.S.U. required.

Further particulars may be obtained from the Registrar, The University, Newcastle upon Tyne NE5 7RU, with whom applications (three copies), together with the names and addresses of three persons to whom reference may be made, should be lodged not later than 1st March 1971. Telephone enquiries: 0632 / 28511 extension 3668 or 3681. Please quote reference N.S.1.

[737-013 (1971) : 278]
INSTITUTE OF CANCER RESEARCH, ROYAL CANCER HOSPITAL RESEARCH ASSISTANT required for laboratories at Sutton, Surrey, for clinical immunology unit to take part in investigation into host reactions to tumors. 2 “A” levels in Science subjects and some laboratory experience or a degree in a Biological subject required. Starting salary according to age and experience in Junior Technical Officer scale £900 - £1,400. Apply giving names of two referees to the Secretary, 34 Summer Place, S.W. 7, quoting reference 301/B/421.

[737-014 (1971) : 278]
TECHNICIAN required to work on research project on lipids. Minimum qualifications “A” level chemistry. Apply Reader in Chemical Pathology, Westminster Medical School, Biochemical Research Laboratories, Udall Street, S.W.1. Telephone 823 9811 ext. 445.
[737-015 (1971) : 278]
BACTERIOLOGY LABORATORY CONTROLLER
Technical Division

We are seeking a graduate, in the 25 to 35 age range, to take charge of the Bacteriology Laboratory in the Technical Division, located at our Head Office in Surrey.

The Technical Division is engaged on investigational and development work on a wide variety of projects extending from farm milk to manufactured products and related subjects. It also provides scientific and technical advisory services to other divisions of the Board. The successful applicant will be responsible for the bacteriological aspects of these activities and these will also involve contacts with Universities, research institutes, farmers and other sections of the dairy industry.

Applicants should be qualified in bacteriology or microbiology and should have several years’ experience in the food or dairy industries. Salary will be dependent on age, qualifications and experience, and there are the usual fringe benefits such as contributory pension scheme, free life assurance scheme and subsidised staff cafeteria. We invite you to write, or telephone, for an application form, giving brief details and quoting reference AQ.334 to

MMB
The Personnel Officer,
Milk Marketing Board

Tel: 01-398 4101
[737-016 (1971) : 278]
G.D. Searle & Co. Ltd. require

**Biochemical Technicians**

and

**Junior Technicians**

Two technicians and two junior technicians are required in the Biochemistry Department of the Research Laboratory. These positions will be concerned with the extraction and purification of nucleic acids, enzymes and other compounds from natural sources, and will involve many varied biochemical techniques. The successful applicants will be encouraged to continue studying for further qualifications.

Applicants for the technicians’ vacancies should possess H.N.C. or “A” levels in scientific subjects.

Applicants for the junior technicians’ vacancies should be of “O” – “A” level standard in scientific subjects, or hold an O.N.C.

Previous experience for both grades would be an advantage, but is not essential.

Company benefits are above average and include pension fund, recreative club, three weeks’ holiday.

Please apply to the Personnel Manager, G.D. Searle & Co. Ltd. Tel: High Wycombe 21124

SEARLE

Research in the Service of Mankind

[737-017 (1971) : 278]
UNIVERSITY COLLEGE OF NORTH WALES, BANGOR
Department of Physical Oceanography

RESEARCH ASSISTANTS
Applications are invited for the above post in a small research team investigating the circulation of the Irish Sea. The programme of research, which is sponsored by NERC, involves the development of radio located buoy systems and their application to the evaluation of numerical models of the circulation. The appointment will be in the first instance for two years commencing as soon as possible.
Applicants should have a good working knowledge of electronics, preferably though not necessarily with experience of r.f. transmission. A suitably qualified honours graduate may be able to register for a higher degree. Previous experience of work at sea is also considered an advantage.
Salary will be in the range £800 to £950.
Applications (two copies) giving full details of qualifications and experience together with the names and addresses of two referees should be sent not later than 28th February 1971, to the Secretary and Registrar, University College of North Wales, Bangor.
[737-018 (1971) : 278]
RESEARCH TECHNICIAN
required for work on connective tissue disease in the Clinical Division of Medical Research Institute.
Previous experience of radiochemical or immunological techniques an advantage.
Starting salary within the range of £1,219 - £1,533 per annum, depending on qualifications and experience.
Applications in writing, naming two referees to Laboratory Superintendent, Kennedy Institute, Bute Gardens, London W.6.
[737-019 (1971) : 278]
UNIVERSITY COLLEGE HOSPITAL MEDICAL SCHOOL
Young Man required as Student or Junior Technician to train as an Electronics Engineer. Candidates must have a minimum of “O” level English, Maths, one Science and one other subject and will be expected to attend an appropriate day release course. Salary according to age and experience from £706 at age 18 years. Please ring 387 7841 to arrange interview.
[737-020 (1971) : 278]
MEDICAL RESEARCH COUNCIL requires a Junior Technician (female), preferably with “O” level chemistry and physics, for an interesting post in their radiochemistry laboratories at Hammersmith Hospital. Day release arranged, for further education if appropriate, such as the Science Laboratory Technicians course. Salary according to age, qualifications and experience, within the range £587 - £1,144, including London weighting. Write with full details to The Director, M.R.C. Cyclotron Unit, Hammersmith Hospital, London, W12 0HS, 01-743 4594.

[737-021 (1971) : 278]
SENIOR TECHNICIAN I
Required for new post in Department of Haematology. Successful applicant, who should be keen and resourceful, will have opportunity to work in routine Haematology, Blood Transfusion and to carry out Microbiological Assay work.
[737-022 (1971) : 278]
GALAPAGOS ISLANDS. Tourist cruise ship requires **Naturalist Guide** for eighteen month tour. Intimate knowledge and love of islands plus languages an advantage. Vacancies also for **engineer** and **chef** on cruise schooner. Single men only. Apply Jameson, The Oare Windmill, Faversham. Tel. 2311. [737-023 (1971) : 278]
TECHNICAL RESEARCH ASSISTANT for new Philipps 300 Electron Microscope in Department of Experimental Pathology, Charing Cross Hospital Medical School at West London Hospital, Hammersmith. Telephone 748 3441.
[737-024 (1971) : 278]
Applications are invited for the post of **LECTURER IN ENGINEERING MATHEMATICS**. The person appointed will be required to participate in the teaching of statistics at an undergraduate level and general and specialist mathematical topics at undergraduate and post graduate levels to students in this other Faculties.

Candidates for the present post should preferably have a statistical background and an interest in the application of Optimization methods. The ability to contribute to the teaching of Operational Research techniques is desirable and recent experience of their application in an engineering industry would be a particular advantage.

Salary will be at an appropriate point on the scale £1,491 - £3,417 according to age, qualification and experience. Membership of F.S.S.U. required.

Further particulars may be obtained from the Registrar, The University, Newcastle upon Tyne, NE1 7RU, with whom applications (3 copies) together with the names and addresses of 3 referees should be lodged not later than 19th February, 1971. please quote reference Nsc.

[737-025 (1971) : 279]
WHITGIFT SCHOOL CROYDON
LABORATORY TECHNICIAN

Required for Physics Department. Salary scale if suitably qualified £1,032 - £1,362 p.a. (as paid by L.E.A.) Non-contributory pension scheme, lunch and tea provided during term. Apply in writing giving details of experience and qualification to Head of Science Department, Whitgift School, Haling Park, South Croydon, or telephone 01-688 9222.
[737-026 (1971) : 279]
UNIVERSITY OF DUNDEE
DEPARTMENT OF BIOLOGICAL SCIENCES

Applications are invited for a LECTURESHIP IN BOTANY in the Department of Biological Sciences from 1st October 1971. Preference may be given to applicants with an interest in plant physiology or plant biochemistry. Salary scale £1,491 - £3,417 with placing according to qualifications and experience; FSSU; grant towards removal of household effects.

Applications (six copies) containing the names of three referees should be lodged by 21st February 1971 with the Secretary. The University, Dundee DD1 4HN from whom further particulars may be obtained. [737-027 (1971): 279]
INSTITUTE OF CANCER RESEARCH, ROYAL CANCER HOSPITAL JUNIOR TECHNICAL OFFICER OR TECHNICIAN required in Physics department at Belmont, Sutton, Surrey, to collaborate with Scientific Staff in research on early chemical and biological effects of ionising radiation. Qualification in biology or experience in a biological or biochemical laboratory would be an advantage. Opportunities for further training. Qualifications: J.T.Q. below age 22, 2 “A” levels in science subjects; over 22 degree or equivalent. Technician suitable “O” levels or O.N.C. and appropriate experience. Salary scale: J.T.O. range £859 - £1,721; Technician £1,219 - £1,533. Apply with names of two referees to the Secretary, 34 Summer Place, S.W.7 quoting ref : 301/B/420.

[737-028 (1971) : 279]
JUNIOR TECHNICIAN for Research Laboratory. Training given in various research techniques, also required to look after animals. Salary range £667 - £1,144, including London Weighting. Application forms from: Chief Technician, Department of Obstetrics and Gynaecology, Royal Free Hospital, Liverpool Road, London N.1.

[737-029 (1971) : 279]
ICI PHARMACEUTICAL DIVISION
Wound Healing
THE QUEEN’S AWARD TO INDUSTRY

We are looking for a graduate to work in our biology department to help in the study of wound healing. He or she will be interested in fundamental aspects of cell behaviour which underlie the reactions of tissue to physical injury, such as cell movement and cell division, and will be concerned with the discovery of chemical compound or material which beneficially affect the healing process. Experience of handling animals and an abundance of practical ingenuity and ability are essential. Our modern, well-equipped Research Laboratories are situated in rural North Cheshire, yet within easy reach of Manchester and main road and rail routes. Conditions of service, prospects and assistance given to married men in moving home will be discussed at interview. Applications, giving brief details of age, experience and qualifications to be made to: P.M. J. Eyre, Personnel Officer, I.C.I. Ltd., Pharmaceuticals Division, Mereside, Alderley Park, Macclesfield, Cheshire. Telephone Alderley Edge 2828.
[737-030 (1971) : 279]
UNIVERSITY OF SOUTHAMPTON
Department of Chemistry

Lecturer in Organic Chemistry

Applications are invited for the post of Lecturer or Assistant Lecturer in Organic Chemistry vacant from 1 October 1971. Salary scales: Lecturer £1,902 - £3,417 with a merit bar at £2,454. Assistant Lecturer £1,491 - £1,902. The initial salary will depend on qualifications and experience. Further particulars may be obtained from the Deputy Secretary, The University, Southampton SO9 5NB. (Telephone: Southampton 56331) to whom applications (7 copies from United Kingdom applicants) including curriculum vitae and names of three referees should be sent as soon as possible and not later than 23 March, 1971, quoting ref: NSc.

[737-031 (1971) : 279]
UNIVERSITY OF BIRMINGHAM
Department of Chemistry
RESEARCH FELLOWSHIP
Applications are invited for a post-doctoral Research Fellowship supported by the S.R.C. to be awarded for one year in the first instance. The work involves the production of excited species by flash photodissociation and their study by kinetic spectroscopy in the vacuum ultra-violet. Further information may be obtained from Dr. J.P. Simons.
Salary: £1,491 - £1,767 with possible extension to £1,902 + F.S.S.U.
Applications (3 copies) naming three referees by 12th March 1971 to the Assistant Registrar (S), P.O. Box 363, Birmingham B15 2TT. Please quote ref SC9
[737-032 (1971) : 279]
LABORATORY TECHNICIAN
required in the Department of Mathematics and Physics. Experience in laboratory practice is essential
and a knowledge of practical electronics would be an advantage.
Salary scale (under review): according to age and qualifications from £906 at age 21 to £1,353 per
annum plus £125 London Weighting Allowance.
The appointment can be made at SENIOR LABORATORY TECHNICIAN level in the case of an
outstanding application for which the salary scale (under review) is £1,248 to £1,635 per annum plus
£125 London Weighting Allowance.
Superannuation scheme.
For further details please telephone 01-580 2020 Ext. 133
[737-033 (1971) : 279]
THE UNIVERSITY OF SHEFFIELD
DEPARTMENT OF CIVIL AND STRUCTURAL ENGINEERING
Applications are invited from Graduates in Engineering or Physics for a post of **RESEARCH ASSISTANT** in the above department, to work on an interesting project involving the application of reflective photoelasticity and laser beam techniques to concrete. The post is initially for 18 months and is likely to be extended for 3 years, and suitable candidates may be permitted to register for a higher degree. Initial salary in the range of £1,140 - £1,320. Applications, stating age, qualifications, experience and the names of two referees should be sent to the Registrar as soon as possible. Quote Ref: R25/H.

[737-034 (1971) : 279]
UNIVERSITY OF BIRMINGHAM
CHUBB RESEARCH FELLOWSHIP

Applications are invited for a Research Fellowship which may be held in the DEPARTMENTS OF MECHANICAL ENGINEERING, PHYSICAL METALLURGY AND SCIENCE OF MATERIALS or INDUSTRIAL METALLURGY. The successful candidate will be expected to undertake research within the broad field of interest of the Company under the direction of the head of the department. Tenure of the Fellowship would normally be two years.

Salary £1,491 - £1,767 + F.S.S.U.

Applications (4) naming three referees by February 18th 1971 to Assistant Registrar (S), P.P. Box 363, Birmingham B15 2TT. Please quote ref SYS.

POSTGRADUATE ADVANCED COURSE IN ELECTROCHEMICAL TECHNOLOGY leading to the degree of M.Sc.

The course, which will be of twelve months duration, starting in October, is designed to meet the needs of industry and research establishments for graduates in the modern theory in current experimental methods of Electrochemical Technology. 

Included in the course will be lectures on the thermodynamics of cells, electrode kinetics, the theory of electrocatalysis, electroanalysis, corrosion, batteries and fuel cells, deposition, machining, processing and synthesizing.

Entry to the course is open to Honours Graduates in Chemistry, Physics, Chemical Engineering, Materials Science or related subjects and to persons holding other qualifications approved by the Senate. The Science Research Council has approved the course as suitable for the award of Advanced Course Studentships. A number of industrial scholarships are also available.

The Department also offers facilities for research leading to the degree of M. Phil and Ph. D.

Application forms and further details from:  
Dr. A.C.C. Tseung, Course Organiser, The City University, at the above address.

FELLOWSHIPS, GRANTS AND SCHOLARSHIPS.

THE NUFFIELD FOUNDATION TRAVELLING FELLOWSHIPS IN TROPICAL MARINE BIOLOGY
The Nuffield Foundation offers annually up to three fellowships to enable established teachers of biology in UK universities to travel overseas (for a period of between six and twelve months) to gain research experience in a tropical inshore marine environment. Consideration can also be given to applications from physical scientists for whose teaching such experience would provide a special stimulus, and from candidates with teaching interests who may be working in institutions other than universities. The fellowships are open to men and women holders of UK or other Commonwealth university degrees, preferably in their thirties or forties. The value of the awards will be determined on an ad hoc basis but will cover fares, subsistence allowances, research and other running expenses. Applications for awards to be taken up to 1972, should be submitted by 31st March, 1971. Further particulars and forms of application are available from the Nuffield Foundation, Nuffield Lodge, Regent’s Park, London, NW1 4RS.

A challenging academic career through
The Doctoral Programme in Management Studies

Manchester Business School has earned a reputation as a highly innovative teaching institution. The Doctoral Programme is the most recently established of the School’s main programmes and is aimed at alleviating the country’s crucial shortage of management teachers. Twelve places are available in September 1971, bringing the doctoral enrolment to 36, the size provided for by funding from the Ford Foundation and the Foundation for Management Education.

Providing a thorough basic grounding in problems analysis and methods of research, the successful completion of the programme, which normally lasts about three years, leads to the University of Manchester Ph. D., enabling graduates to pursue careers involving:

Research: To understand and explain organisations and management.
Teaching: The country’s future managers.
Consultancy: Advising and teaching the country’s present managements on ways to improve their effectiveness.

Students, as their interests develop, will work closely and informally with faculty members.

THE CORE OF THE PROGRAMME IS THE THESIS BASED ON AN ORIGINAL PIECE OF RESEARCH.

As a prerequisite to the thesis, students will:
1. Learn modern research methodology;
2. Become familiar with the concept and practice of management.
3. Develop their understanding of a chosen academic discipline in its relevance to organisation and management, and
4. Develop particular expertise in a chosen special area of management.

They will also develop professional skills in teaching and consultancy.

The Doctoral Programme demands an exacting level of scholarship. Formally, a good first degree of professional qualification is necessary. Postgraduate work in an area related to management or relevant managerial experience is desirable.

Applications: Grants are normally available for successful applicants. The closing date for applications is 1st March, 1971.
For application form and prospectus write or phone:
Miss Pat Ward, Dept. N.S.1
Doctoral Programme, Manchester Business School, Hilton Street,
Manchester M1 2FE. Phone 061-236 3192 (ext. 59)

LECTURESHIP – BASSER COMPUTING DEPARTMENT

Applications are invited for a lecturership position in the Basser Computing Department within the School of Physics. Applicants should have a background and experience in Computer Science. Other things being equal, preference will be given to applicants with experience in Numerical Analysis, Operating system Design, Operations Research Computations, Simulation, Computer Graphics, or the use of computers for control.

The Department is equipped with an English Electric KDF9, a CDC 1700, an IBM 7040/1401, and a PDP-8 with display facilities. All these machines are being interconnected to operate as a network under computer control. In addition, it is hoped that the installation will be connected to a regional computing centre in the near future.

The Department conducts a post-graduate diploma and in addition to an honours year in Computer Science, offers courses in the third year of a B.Sc. sequence, and in the early years of B.A., B.Ec. and B.Sc. sequences.

The appointee will be expected to participate in the Department’s teaching programme, and to engage in research of his own choosing.

(Following national wage case, 6% increase under consideration). Salary range $A6,318 - $A8,760 p.a. fares to Australia will be paid.

Information concerning position available from Professor J.M. Bennett, Professor of Physics (Electronic Computing), Basser Computing Department, University of Sydney.

Applications by 19 March 1971, to Acting Registrar, University of Sydney, N.S.W. Wales, 2006, Australia, from whom information about conditions of appointment, superannuation, housing etc., available. This information, also available from Secretary-General, Association of Commonwealth Universities (Appts.), 36 Gordon Square, London WC1H 0PF, telephone 01-387 8572 or call personally.

POST DOCTORAL RESEARCH FELLOWSHIPS IN ENVIRONMENTAL SCIENCES
Applications are invited for two Esme Fairbairn POST DOCTORAL RESEARCH FELLOWSHIPS in any aspect of Environmental Studies which can be investigated adequately at King’s College Field Station, Rogate, Near Petersfield, Hants.
The persons appointed will be expected to contribute to the Teaching programme at the station. Details of living accommodation and field facilities at Rogate are obtainable from Doctor P. Coker, Warden (Telephone Rogate 367), with whom arrangements for visiting the station may be made.
The Fellowships are tenable for one year initially from 1st October 1971, at a salary of £1,215 with F.S.S.U. Application, comprising a curriculum vitae, a detailed scheme of the composed investigation, and the names of two referees, should be sent to the Registrar, King’s College London, Strand, London WC2R 2LS by 15th April, 1971.
[741-006 (1971) : 520]
POST-DOCTORAL RESEARCH FELLOWSHIP
The above vacancy exists for a research worker to carry out a bio-chemical investigation on the macro-
molecular components of secretions of the female genital tract in farm animals.
The candidate should have a Ph.D. in bio-chemistry or reproductive physiology with an interest in
characterization of proteins and glycoproteins. Period of tenure 2 years with possibility of extension to
3. Salary up to £2,500 p.a. according to age. Apply Secretary (Reference number 126). Telephone
Compton (Berks) 343.
The Executive of the Commonwealth Scientific and Industrial Research Organization invites applications from scientists wishing to be considered for the position of Officer-in-Charge of the Organization’s Dairy Research Laboratory. The laboratory – formerly designated the Division of Dairy Research – will in future form part of the Organization’s Division of Food Research, and thus ensure close association with other food research being conducted by CSIRO as well as with the dairy manufacturing industry.

The work of the Laboratory covers research related to the processing of milk and the manufacture of dairy products. It serves as a centre of technological and scientific information for the industry.

The Laboratory has a staff of over 70, including 22 professional staff and 35 technical and workshop staff. It is housed in modern laboratories situated at the Melbourne suburb of Highett.

The appointee will be responsible for the direction of the research activities of the Laboratory, under the general direction of the Chief of the Division of Food Research. He will be an Assistant Chief of the Division of Food Research.

The appointee will be required to maintain close contact with the Australian dairy industry and to encourage co-operation with general food science studies in other parts of the Division. He will have the opportunity to develop his own research interests.

Candidates should have an established research reputation in dairy technology or in a relevant discipline, and have demonstrated ability to lead a research group. A knowledge of the dairy manufacturing industry is particularly desirable.

The salary of the appointee will be the subject of negotiation, depending on the experience and achievements of the successful applicant, but will be not less than $A15,370 p.a. The position carries with it superannuation privileges.

Scientists interested in this position should write confidentially in the first instance to:
The Chief, CSIRO,
Division of Food Research,
P.O. Box 43, Ryde, N.S.W., Australia, 2112
by the 3rd April, 1971.

They should ensure that their applications are enclosed in envelopes specifically marked with the number 410/211.

[741-008 (1971) : 520]
METROPOLITAN POLICE FORENSIC SCIENCE LABORATORY

JUNIOR RESEARCH FELLOWSHIP

Applications are invited for the post of Junior Research Fellow in the Division of Biology to participate in a programme of research aimed at increasing our fundamental knowledge of the dematuration of plasma proteins which takes place during the drying of blood to form a stain.

Qualifications: 1 or 2(1) honours degree in Chemistry or Bio-Chemistry. Post-graduate experience in protein and / or immuno-chemistry is desirable. Facilities for registering for a higher degree are available.

Salary: Appointment will be made on a three year stipend at a point between £1,490 and £1,980 according to experience.

POSTCARD to The Secretary, Room 733 (JRF/NS) New Scotland Yard, Broadway, SW1 (or telephone 01-405 3601 Ext 53) for full particulars and application form.
Intending applicants may visit the laboratories by arrangement with the Director.

[741-009 (1971) : 520]
SURREY EDUCATION COMMITTEE
Ewell County Technical College
Reigate Road, Ewell
Department of Biological Sciences

Lecturer I or II in BIO-PHYSICS and BIO-METRICS required as soon as possible. Applications are invited for the post of Lecturer engaged mainly in the development of a Higher National Certificate in Medical Laboratory subjects (alternative syllabus B), Medical Physics with physiological measurement or radiation technology. Applications should preferably have a degree and a knowledge of nuclear physics (particularly with reference to the medical uses of x-ray and radio activity), mathematics and electronics in that order of priority. Other experience and/or qualifications will be considered.

This course is the only one of its kind and as such serves the hospital service and university department throughout the country.

Salary: Lecturer I £1,230 x 14 increments to £2,075 p.a. (£2,200 for good honours graduate).
Commencing salary according to previous experience.
Lecturer II £1,497 x 10 increments to £2,537 p.a.

Generous relocation assistance available in approved cases.
Stamped foolscap envelope please for further details and application forms from the Vice-Principal (Telephone 01-393 0961), to be returned within 10 days. If postal dispute has not been resolved, please phone details to the College. Local residents should collect forms personally.

[741-010 (1971) : 520]
Applications are invited for the post of Biology Technician to work on the preparation of course material within Comparative Physiology and Behaviour, and to participate in the Biology research programme. Candidates should be experienced in Physiological and / or biochemical techniques. Salary scale £1,041 - £1,410 p.a. Further particulars and application forms are obtainable from Mrs. E.M. Grayson, The Open University, Walton Hall, Walton Bletchley 4066 Ext. 3225. Completed forms should be returned immediately upon the resumption of normal postal services.
THE UNIVERSITY OF MANCHESTER
Department of Chemistry

EXPERIMENTAL OFFICER
Applications invited for this post in the faculty of Science, to synthesise and characterise organic polymers in a polymer science group composed primarily of physical chemists and physicists. Previous experience in the field, and suitable academic qualifications and / or industrial experience required. Salary range £1,200 to £2,322 p.a. F.S.S.U. Particulars and application forms (returnable by March 31st) from The Registrar, The University, Manchester M13 9PL. Quote ref: 35/71/NSc.

[741-012 (1971) : 520]
WESTMINSTER HOSPITAL TEACHING GROUP. Research Assistant to one small Laboratory in Tumour and Skin immunology. Technical skill in general immunology and microscopy essential. Salary £779 - £1,226 according to experience. Applications to Doctor Branfoot, Vincent Square Laboratories, 124 Wauxhall Bridge Road, SW1, Telephone 01-828 9811 ext. 420.

[741-013 (1971) : 520]
UNIVERSITY OF EDINBURGH
Department of Veterinary Pathology

LECTURESHP IN VIROLOGY

Applications are invited for the post of Lecturer in Veterinary Virology. In addition to assisting with teaching duties, the successful applicant will be encouraged to undertake research. While it will be an advantage if applicants have already had some postgraduate experience in virology, excellent facilities will be available in newly built accommodation for those who wish to begin studying the subject as a career.

Salary scale: £1,491 - £3,417 p.a. with placement according to qualifications and experience, and with superannuation.

Further particulars may be obtained from the Secretary to the University, Old College, South Bridge Edinburgh EH8 9YL (031-667 1011 ext. 4315) with whom applications (six copies) giving the names of two referees, should be lodged not later than 30th April, 1971. Please quote reference 1077.

[741-014 (1971) : 521]
UNIVERSITY OF BRISTOL

Applications are invited from Mathematicians for an appointment as Lecturer in the Department of Theoretical Mechanics, which is responsible for the teaching of Mathematics to Students in the faculty of Engineering, and also to students in the department of Architecture.

Research in the department has been mainly in the fields of elasticity, plasticity, heat transfer, decision theory and optimal control and the theory of minimum weight structures. Work is starting on the application of functional analysis to a range of engineering problems.

The appointment will date from 1st August, 1971, or soon as possible after that date, and the initial salary will be in the range £1,491 - £3,417. The appointment carries membership of the F.S.S.U.

Applications stating age, qualifications and experience, and including the names of not more than three referees, should be sent not later than Monday 22nd March, 1971 to the Registrar, the Senate House, Tyndall Avenue, Bristol BS8 1TH, quoting reference DIS, from whom further particulars may be obtained.

[741-015 (1971) : 521]
Have you got a good explanation?
We’re looking for somebody who’s quick at understanding things and superb at explaining them. Our work is in making complicated information clear. We use anything that does the job—words, pictures, diagrams, anything.
And anybody.
No matter if it hasn’t been your kind of work before. If you’ve ever looked at a workshop manual or a list of regulations and known there had to be a better way, telephone us.

[741-016 (1971) : 521]
BIRKBECK COLLEGE  
(University of London)  
An opportunity exists for a Civil Engineer, Physicist, or Material Scientist, to join an established research group to study the characteristics of cement hydration products in hardened concrete and their relationship to the engineering properties of concrete. Candidates should have a good honours degree and preferably experience in a related subject. Salary will be within the range £1,143 - £1,767 p.a. and the appointment will be for a period of up to three years.  
Applicants should phone Dr. S. Chatter, Department of Crystallography, Birkbeck College, Malet Street telephone no. 01-580 6622 ext. 347.  
[741-017 (1971) : 521]
ICI PHARMACEUTICALS DIVISION
CARDIOVASCULAR RESEARCH

We are looking for a graduate level pharmacologist or physiologist to join a small team looking for antihypertensive drugs. He or she will assume responsibility for supervising and running experiments, troubleshooting, and analysing results. There will be further scope for studying the subject in depth for devising new experiments in association with the team leader.

We expect that the successful candidate will have had a minimum of three years’ laboratory experience in mammalian physiology, preferably cardiovascular work, and we will be looking for evidence of scientific knowledge, initiative and ingenuity.

We can offer the advantages of joining a large modern, well-equipped I.C.I. research department, pleasantly situated in rural North Cheshire, yet within easy reach of Manchester and main road and rail routes. Career prospects, conditions of service and assistance given to married men moving house will be discussed at interview.

Application, giving brief details of age, experience and qualifications to be made to:
P.M.J. Eyre, Personnel Officer
I.C.I. Ltd., Pharmaceuticals Division,
Mereside, Alderley Park, Macclesfield, Cheshire
Telephone Alderley Edge 2828.

Separate interviews will be conducted by the appointments consultant named and by a specialist in the industry, profession or function concerned.

West of London c.£3,750 (+car)

Research Manager

An internationally known company making specialised products for the building industry requires an able and imaginative Research Manager. He will take charge of a research and product development team, the main emphasis of whose work will be on the development of new products, utilising the company’s technical experience in the fields of silicates, glass, resine cement and the like.

The ideal candidate, aged about 35, will be technically qualified, probably a graduate chemist, metallurgist, glass technologist or engineer who understands the needs of the building or contracting industries. He will have developed new products in production stage and have successfully project control and pilot plant development.

Please write in confidence to M. Lomas (Ref. L.890.187)

Replies may be telephoned to the above address, 01-235 5444, or delivered to any P.E. area office.
GRASSLAND RESEARCH INSTITUTE
Hurley, Maidenhead, Berks, Grassland Survey. Applications are invited from candidates who will be available on or before 1st April 1971, for a 2-year engagement in the A.E.O. / E.O. grade to take part in a survey of grassland on farms in England and Wales. The survey is already in progress, and after a short period of training the officer will be expected to work independently, with an assistant. The post offers a unique opportunity for a graduate in Agriculture, Botany or Geography, with some knowledge of the flora to become familiar with grassland farming in the various natural regions, and with methods of survey and analysis. Candidates should hold a driving licence. Salary A.E.O. over age scale e.g. £946 age 21, £1,311 age 26 or over at entry to £1,578 p.a. E.O £1,725 - £2,177 p.a. There is a Contributory Superannuation Scheme in force upon the member of Staff joining this scheme and supplementary allowance of 5 ½ % of salary is granted. Applications to the Secretary, by March 19th, 1971. Telephone Hurley 363, Quoting Ref: E.3.10 Post 24

[741-021 (1971) : 521]
BEE RESEARCH ASSOCIATION
Biology graduate required for information work concerned especially with production of Apicultural Abstracts. Experience of any of the following an advantage: editing, languages, information work, subject classification, bees / beekeeping. Salary according to qualifications and experience. Bee Research Association, Hill House, Chalfont St Peter, Bucks, phone Gerrards Cross 85011.
[741-022 (1971) : 521]
THE BRITISH COUNCIL ARGENTINA
THE NATIONAL UNIVERSITY OF THE LITORAL SANTA FE requires a PROFESSOR OF UNIT OPERATIONS as soon as possible. Candidates, men only, should have an M.Sc. degree from a university in Britain, teaching and research experience, and published work. A Ph.D. degree would be an advantage. A basic knowledge of Spanish, on arrival at post is required.
[741-023 (1971) : 522]
BRAZIL
THE ENGINEERING SCHOOL, FEDERAL UNIVERSITY OF PARAIBA, requires VISITING PROFESSORS in (a) ELECTRICAL POWER ENGINEERING and (b) TELECOMMUNICATIONS as soon as possible. Candidates should have an M.Sc. degree from a university in Britain and postgraduate teaching experience. A doctorate and experience in industry are desirable. A knowledge of Portuguese, French or Spanish would be an advantage.
[741-024 (1971) : 522]
COMMONWEALTH EDUCATIONAL COOPERATION PAKISTAN
THE EAST PAKISTAN AGRICULTURAL UNIVERSITY, MYMENSINGH requires a VISITING PROFESSOR IN PLANT BREEDING by June 1971 or as soon after as possible. Candidates should have a Ph. D. or equivalent degree from a university in Britain or higher research qualification in the field of Plant Breeding. They should also have at least ten years’ teaching and research experience, preferably at university level, and the ability to conduct and guide the research of advanced students. Salary £3,934 - £5,176 per annum according to qualifications and experience. Married overseas allowance: married (accompanied) £526 - nil, married (unaccompanied) £426 - nil. Children’s and home education allowance. Income tax refunded if levied. Free furnished accommodation. Outfit grant. Employer’s superannuation contribution paid. Medical and insurance schemes. Fares paid for Professor and family, including mid-tour passages for children in Britain. Assistance with freight and import duty on approved car. Two-year contract guaranteed by the British Council. 70/OU133.
Write quoting relevant reference number to Appointments Division. The British Council, 65 Davies Street, London W1Y 2AA for further particulars and application form to be returned completed as soon as possible.
During P.O. dispute please telephone 01-499 8011 ext. 251.
[741-025 (1971) : 522]
UNIVERSITY OF ABERDEEN
SECOND CHAIR OF ZOOLOGY

Applications are invited for this newly created Chair, tenable from 1st October 1971. Candidates should have experience in some aspects of whole-animal or environmental zoology.

Superannuation (F.S.S.U.) and removal allowance.

Further particulars from The Secretary, University of Aberdeen, with whom applications (8 copies) should be lodged by 27th March 1971.

[741-026 (1971) : 522]
A well qualified **micro-biologist** or **bio-chemist** will find that this appointment in our fermentation development department offers a wide scope. Our Ulverston manufacturing unit is Europe’s largest single producer of antibiotics, and the person appointed will be responsible for the development of the fermentation of an existing product. Normally development work is carried out in a range of experimental fermenters ranging from 1 gallon to 1000 gallons in capacity. However, in appropriate circumstances full size production vessels are used and one of the responsibilities of the position will be to scale up new processes from the pilot to production stage. The position will suit a man 25 to 35 years old, who has experience of operating pilot scale fermenters and who is keen to translate this into worthwhile production achievements.

Salary will reflect the importance of the appointment, profitability conditions include the opportunity to share in profitability, pension scheme and relocation assistance. Ulverston is a quiet market town situated in North Lancashire on the fringe of the National Park area of the Lake District.

Please phone Ulverston 2261 or write, if possible, to E.W. Morgan, Senior Personnel Officer.

GLAXO LABORATORIES LIMITED
Ulverston, Lancashire.
[741-027 (1971) : 522]
MICROBIOLOGIST

The successful applicant will join a team involved in the development of new pharmaceutical formulations working mainly on his own initiative but with the assistance of laboratory assistants. The ideal candidate will be a graduate or equivalent, with at least two years’ experience of pharmaceutical microbiology. Conditions of service are extremely attractive in a modern expanding environment. If you are interested, or would like further details, please ring: Julie Franklin, Swindon (0793) 24411.

ROUSSEL
ROUSSEL LABORATORIES LTD.
Kingfisher Drive, Covingham, Swindon, Wilts.
[741-028 (1971) : 522]
ECOLOGIST
The Nature Conservancy invites applications for a temporary appointment (equivalent to Scientific Officer) at Merlewood Research Station, Grange-over-Sands, Lancashire, to complete a programme of field research and to develop synthesis of results as part of an ecosystem study on the Moor House National Nature Reserve.
Applicants should have a good honours degree and preferably post graduate research experience in plant or animal ecology. A working knowledge of statistics and/or computer experience would be an asset.
The appointment initially will be until 31st March 1972. Before that date the appointment will be reviewed and an extension is possible.
Salary between £1,162 - £1,982 according to experience. Applications, in the form of a curriculum vitae, including names and addresses of two referees should be sent to the Director, The Nature Conservancy, Merlewood Research Station, Grange-over-Sands, Lancashire, (tel): Grange-over-Sands 2264) not later than 31st March, 1971.
[741-029 (1971) : 522]
IMPERIAL COLLEGE
LECTURER IN ELECTRICAL ENGINEERING
Applications are invited for a Lectureship (salary in the range £1,491 - £2,471) in the Department of Electrical Engineering for appointment not later than October 1971. Candidates should have an interest in teaching electronics to undergraduates. Their research experience should be in a broad field of electrical networks, so as to complement the work of a group concerned with circuit theory, computer-aided design and device modelling.
Applications, together with the names of two referees, should be sent not later than 31st March, 1971, to Professor John Brown, Department of Electrical Engineering, Imperial College, Exhibition Road, London S.W.7.
[741-030 (1971) : 522]
Applications are invited for a RESEARCH OFFICER to develop techniques for investigating pulsed high-field conduction in insulating films. Experience in pulse and measurement circuitry is essential; a Ph.D. in Physics, Electrical Engineering, or Electronics, or equivalent postgraduate industrial experience, is desirable.

The appointment, which is supported by an S.R.C. grant, will be for a period of up to 3 years starting on 1st April 1971, or as soon as possible thereafter. Salary within range £1,491 - £2,454, plus London Allowance £100 p.a.

Telephone Dr. J. Hirsch, Physics Department, 01-580 6622 Ext. 336 as soon as possible.
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry. For further details write or telephone: G.K Bureau, 17 Shaftesbury Avenue, London, W.1. 01-734 7232. Interviews by appointment only. [741-032 (1971) : 522]
MEDICAL RESEARCH COUNCIL

SENIOR SCIENTIFIC OFFICER APPOINTMENT

Applicants for a post in the Council’s Headquarters Office are invited from Science Graduates. Preferably in the age range 26 – 35 years, with a first or good second class honours degree, and preferably with a higher degree.

The post will initially be in the University’s Grants and Training Awards Division, and will be concerned with the scientific administration of the Council’s scheme, or Project Grants. The work of this Division is varied and interesting and concerned with a wide field of biological and medical research.

Salary will be within the scale £2,318 – 2,826 (according to age and experience), with possibilities of further advancement. The appointment will be subject to the satisfactory period of two years and will be superannuable.

Please write or telephone for application form to Mr. D. Langrish, Medical Research Council, 20 Park Crescent, London W1N 4AL (Tel 636-5422) quoting reference E2/479. Forms should be returned before 19th March, 1971.

[741-033 (1971) : 523]
THE UNIVERSITY OF NEWCASTLE UPON TYNE
SCHOOL OF PHYSICS
Applications are invited for the post of DEMONSTRATOR in the Department of Geophysics. The appointment will be from 1st May or a mutually agreed date. The successful candidate will be expected to undertake some undergraduate teaching responsibilities in the School of Physics, but will be able to devote his major efforts to research in his chosen field.
The salary will be at an appropriate point on the scale £1,491 x £138 - £1,767 (extendable to £2,178). Membership of F.S.S.U. required.
Applications (3 copies) together with the names and addresses of three referees should be submitted to the Administrative Assistant, School of Physics, The University, Newcastle upon Tyne, NE1 7RU, not later than 31st March, 1971. (Tel: 0632/28511 Extension 3359).
[741-034 (1971) : 523]
UNIVERSITY OF ABERDEEN
ELECTRON MICROSCOPICS
Department of Biochemistry and Physiology
Applications are invited for above post to take charge of the Electron Microscope serving these two departments. Applicants should have a University degree or equivalent qualification, and experience in the use of the Electron Microscope in biological research.
Salary on scale £1,842 - £2,487 with placing according to qualifications and experience. Superannuation (F.S.S.U.) and removal allowance.
Further particulars from The Secretary, The University of Aberdeen, with whom applications (6 copies) should be lodged by 27th March 1971.
[741-035 (1971) : 523]
UNIVERSITY OF READING
POSTDOCTORAL RESEARCH IN PHYSICS
Two new posts are available at the lower end of the University Lecturers salary scales for:

1. Theoretical Studies of Molten Alkali Halides, with and without impurities to be carried out in conjunction with a computer simulation project. This work will complement experimental work done in the same laboratories. (5 years)

Applications or enquiries should be sent before March 22nd to the Head of Department, J.J. Thomson, Physical Laboratories, Whiteknights, Reading RG6 2AF (Tel): 0734 85123 ext. 384. Ref: M.70

[741-036 (1971) : 523]
TAYLOR WOODROW CONSTRUCTION LIMITED  

Graduate Engineer and Material Scientists

A GRADUATE ENGINEER
With an interest in materials technology to work on the many problems associated with the use of concrete in the construction industry.
The main zones of activity are as follows:
Research on concrete for use in Nuclear Pressure, Vessels including the study and prediction on creep and shrinkage of concrete mixes at temperature over 30 years. Also the study of internal strain build up in mass concrete pours.
Applied research on concrete: including the relation between standard cube and in situ strength, the mechanics of concrete pumping and factors affecting the hardening of concrete.
Problem analysis work: including cause of cracking, spalling corrosion and frost damage in structures.

GRADUATE ENGINEERS OR MATERIAL SCIENTISTS
To specialise in composite materials in general, and to undertake research into the properties of materials used in the building industry; these include: fibre reinforced concrete, g.r.p. adhesives, paints, sealants and cements.
To undertake the development of new materials and techniques, and initiate projects using novel ideas with the full support of the laboratory team.
The successful candidates will need the willingness to tackle tough problems in realistic time scales, and undertake relevant testing and site visits with good presentation of results.

Salary to be negotiated according to qualifications and experience.
Applicants should apply, giving brief details of career, to:
The Personnel Manager (R.D.B.),
Taylor Woodrow Construction Ltd.,
345 Ruislip Road, Southall, Middlesex or telephone (01) 578 2366, Ext. 65.

STUDENTSHIPS
POSTGRADUATE RESEARCH
ATOMIC PHYSICS
UNIVERSITY OF STIRLING
Research leading to the degree of Ph.D. and M.Sc. in Theoretical and Experimental Atomic Physics. The theoretical group is concerned with classical, semi-classical and quantum mechanical descriptions of atomic and molecular collision processes and the relations between these theories. Experiments are in progress to measure the Lamb shift and Stark effect in H-like ions, excitation of sections in atomic hydrogen, scattering of polarized electrons by atoms, electron-atom cross-sections by coincidences techniques and other related experiments. The groups are expanding their interests into theoretical and laboratory astrophysics.
STC studentships are generally available to candidates with a first or upper second class honours degrees. A university studentship or some other award may be available for doing research. For further details write to Professor H. Kleinpoppen, Department of Physics, University of Stirling, telephone enquiries Stirling 3171.
[741-050 (1971) : 524]
UNIVERSITY OF EDINBURGH
SCIENCE STUDIES UNIT
RESEARCH in the SOCIAL DIMENSIONS and implications of modern SCIENCE and TECHNOLOGY. Studentships available for M.Sc. and Ph.D. degree courses. Contact the Director Science Studies Unit, University of Edinburgh, 34, Buccleuch Place, Edinburgh EH8 9JT. Telephone number 031-667 1011 ext. 6245. Please quote reference 5007.
[741-051 (1971) : 524]
Applications are invited for the post of Reader in Materials in the Faculty of Technology. The person appointed will be required to participate in the planning and production of courses in the developing Open University system of education, and to conduct and supervise research activities.

Candidates for the post should have specialist interests in the field of the structure / property relationship in materials and of its industrial applications, and broad interests in the role of technology in the man-made world. Experience of teaching interdisciplinary science and technology-based courses is desirable. Salary, with F.S.S.U. benefits, will be at an appropriate point on the scale £3,186 - £4,401 according to age, qualifications and experience.

Applications including curriculum vitae and names of three referees should be sent to the Secretary (R3), The Open University, Walton Hall, Walton Bletchley, Berks from whom further particulars can be obtained. Closing date for applications, Wednesday 21st April 1971
QUEEN MARY COLLEGE  
(University of London)  
**LECTURESHIP IN STATISTICS**  
Applications are invited for this post in the Computer Science and Statistics division of the Mathematics Department, to teach undergraduates specialising in statistics, computer science, mathematics or combination of these. The Department is a large one – 30 staff (8 Professors) 40 postgraduate students and 250 under graduate students. Research interests in the area of applications orientated Stochastic Processes or Multivariate Analysis an advantage.  
Salary scale £1,491 - £3,417 (bar £2,454) + £100 London Allowance. FSSU participation. Application forms obtainable from the Registrar, Queen Mary College, Mile End Road, London E.1. to be returned by 20 April 1971.  
[745-002 (1971) : 57]
UNIVERSITY OF SOUTHAMPTON

Lectureship in Pure Mathematics

Applications are invited for the post of Lecturer or Assistant Lecturer in Pure Mathematics in the Department of MATHEMATICS. Salary Scales: Lecturer £1,902 - £3,417 with a merit bar at £2,454. Assistant Lecturer £1,491 - £1,902. The initial salary will depend on qualifications and experience. Further particulars may be obtained from the Deputy Secretary, The University, Southampton, SO9 5NH, to whom applications (7 copies from United Kingdom applicants) should be sent not later than 20 April 1971, quoting reference NSc.

[745-003 (1971) : 57]
THE WORLD HEALTH ORGANIZATION
invites applications for the post of
TECHNICAL INFORMATION OFFICER
to maintain and develop further its Programme Information Retrieval System, train staff, and follow up developments in this field for application to the Organization’s information retrieval work.

Candidates would normally hold a University degree, preferably at Masters’ level and have formal training and practical experience in the field of information science.

Salary range from US $11,283 – 15,092.50 yearly net of income tax. In addition cost of living and dependents’ allowance and educational grant for children under certain conditions, sickness and accident insurance, annual and passage paid home leave every two years, pension fund scheme, repatriation grant.

Detailed curriculum vitae should be sent to Chief Personnel, WHO, Avenue Appia, Geneva, quoting Vacancy Notice Number 71/10. Further information and application forms will be sent only to those applicants who seem suitable for serious consideration and meet the needs of the Organization.

[745-004 (1971) : 57]
UNIVERSITY OF READING
Institute of Agricultural History

RESEARCH ASSISTANT

Applications are invited for the position of Research Assistant to be responsible for a large and expanding collection of historical records of the Agricultural Engineering Industry. Applicants should be graduates, with some knowledge of mechanical engineering and an interest in technological history. Archival experience is not essential. The appointment will be for a period of 3 years, commencing not later than October 1971. Initial salary within the range £1,350 - £1,500 p.a.

Application forms and further details can be obtained from the Assistant Bursar (Personnel), University of Reading, Whiteknights, Reading RG6 2AH. The closing date for receipt of applications is 14\textsuperscript{th} May 1971 (Ref. M 72)

[745-005 (1971) : 57]
WESTMINSTER HOSPITAL
Department of Clinical Measurement

An **ELECTRONICS TECHNICIAN** is required for design, development and servicing of equipment used for measurements in applied physiology and cardiac surgery. Salary according to qualifications and experience in the range £1,356 - £1,764 plus £90 London Weighting. Apply naming two referees to: The Secretary, Department of Clinical Measurement, Westminster Children’s Hospital, Vincent Square, S.W.1.

[745-006 (1971) : 57]
UNIVERSITY OF LONDON
KING'S COLLEGE
DEPARTMENT OF BIOPHYSICS
Applications are invited for the post of RESEARCH ASSISTANT in the Department of Biophysics, to work on studies on simple nervous systems. Candidates should normally be graduates; experience in histology, electron microscopy or electro-physiology would be an advantage, but is not essential. Salary scale: £1,077 x £138 to £1,767 plus £100 London Allowance. F.S.S.U. benefits would be payable. Applications should reach Professor H. F. Wilkins, Department of Biophysics, University of London, King’s College, 26-29 Drury Lane, LONDON WC2B 5RL, by 30th April, 1971.
[745-007 (1971) : 57]
MEDICAL RESEARCH COUNCIL
A Junior Technical Officer is required in the Division of Cytopathology for a responsible role in Electron Microscopical Research, covering the full range of biological preparative techniques, including Freeze-Etching. Previous experience an advantage, but not essential. Good Prospects. Initial Salary range: £859 - £1,721 p.a. For further details apply now giving qualifications and quoting our reference NS91/1 to: Mr. J. H. WOODCOCK, Personnel Officer, National Institute of Medical Research, The Ridgeway, Mill Hill, N.W. 7 1AA. Tel: 959 3666.
[745-008 (1971) : 57]
NAVAL RADIOLOGICAL PROTECTION SERVICE

HEALTH PHYSICISTS
required at the Institute of Naval Medicine, Alverstoke near Portsmouth (2 posts) and HM Dockyard, Chatham (2 posts).
At Alverstoke, studies are undertaken relating to Radiation Physics, Radiation Chemistry, Radiobiology and the chemical uses of isotopes. Staff are loaned often at short notice, to dockyards when peak workloads occur there.
At Chatham, the work is concerned with practical radiological control and the day-to-day running of an operational health physics organisation.

QUALIFICATIONS: Normally a degree, preferably with 1st or 2nd class honours, in physics, biology or chemistry; or corporate membership of an appropriate professional institution (those awaiting election will also be considered). Candidates may be appointed to the Basic or Main Grade. Practical experience in health physics is not necessary for the Basic Grade, but such experience, particularly in radiological protection, is essential for the Main Grade.

SALARY: Main Grade, £2,359 - £3,101, Basic Grade £1,405 - £2,359. Starting salary may be above minimum. Salary rates to be increased by 9 ½ %. Non-contributory pension. Promotion prospects.
Full details and an application form (to be returned by 3 May 1971) may be obtained from Civil Service Commission, Alencon Link, Basingstoke, Hants, or by telephoning BASINGSTOKE, 29222 ext. 500 or LONDON 01-734 6464 (24-hour “Ansafone” service) quoting T/7688.
[745-009 (1971) : 57]
UNIVERSITY OF SUSSEX
School of Cultural and Community Studies

LECTURER IN COMMUNITY STUDIES
The School of Cultural and Community Studies is proposing to appoint a Lecturer in Community Studies who will be particularly connected with its contextual or common courses. He (or she) should be a social or behavioural scientist with an interest in the exploration of community as a social system and in the contribution of the literary imagination to the study of people in the community. This Lecturer would also be expected to teach his own discipline on graduate and/or undergraduate courses.

For further particulars and application forms, write to the Secretary Office of Arts and Social Studies (Establishment), University of Sussex, Falmer, Brighton, BN1 9QN, to whom complete forms should be returned by 19th April 1971.

[745-010 (1971) : 57]
PLANT PHYSIOLOGIST
Technion – Israel Institute of Technology requires a Plant Physiologist with Ph.D. or equivalent, capable of conducting independent research projects in plant physiology with particular reference to irrigation and plant nutrition. Previous research experience – beyond work connected with these – desirable. Application should be addressed to Prof. J. Hegin, Vice-President for Research Technion – Israel Institute of Technology, Haifa, Israel.

[745-011 (1971) : 57]
INSTITUTE OF GEOLOGICAL SCIENCES

EXPERIMENTAL OFFICERS
Applications are invited for posts at the Institute of Geological Sciences in London and Leeds.
A. Mineral Assessment Unit (London and Leeds) has a responsibility for investigating and assessing resources of economically important bulk materials in this country. Work would involve supervision of drilling, and sampling programmes in the field, recording and processing basic geological and assessment data and preparing items for publication.
B. Mineralogy Unit (London) has a responsibility for examination by various techniques of a wide range of mineral rock and ore samples. The work calls for a sound training in general mineralogy. Some practical experience in one or more techniques would be an advantage but is not essential. More important is an aptitude for laboratory work and a methodical approach. There would be an opportunity to publish research, but little likelihood of field work initially.
C. Geological Museum (London). Work would be primarily in research in earth science topics and writing scripts for Exhibitions, involving liaison with design consultants, to classifying and registering building stone samples and dealing with enquiries on geological topics from the public.

Qualifications
GCE (or equivalent) in five subjects, two of which should be at “A” level preferably Geology, Physics, Mathematics or Chemistry. At age 22 or over, candidates are expected to have a degree, HNC or equivalent qualification in an appropriate subject.
Assistant Experimental Officer (at least 18 and under 28 on 31 December 1971) £741 (age 18) - £1,311 (age 26) - £1,578 – scale under review.
Experimental Officer (at least 26 and under 31 on 31 December 1971) £1,725 - £2,177 – scale under review.

An additional £125 per annum is paid to staff employed in central London. Superannuation arrangements. Application forms from the Director, Institute of Geological Sciences, Exhibition Road, London SW7 stating for which post you are applying and quoting reference LL71.
Closing date: 3 May 1971.

NATURAL ENVIRONMENT RESEARCH COUNCIL
[745-012 (1971) : 58]
UNIVERSITY OF SURREY

RESEARCH FELLOW IN ION IMPLANTATION

A vacancy exists within the ion implantation group of the Department of Electronic and Electrical Engineering for a senior Research Fellow to work on some aspects of ion beam doping and sputtering. The work is supported by SRC and is initially for a three year period. Applications are invited from graduates with at least six years experience in research and development and it would be an advantage to have worked on one of the following topics: Ion implantation, sputtering, ion optics and semiconductor or thin film devices. The salary will be determined at an appropriate point between £2,400 and £3,003 p.a. which is part of the Lecturer scale according to age and experience. Applications should be sent as soon as possible to:
Professor D.R. Clark
Head of Department
Department of Electronic and Electrical Engineering
University of Surrey,
Guildford, Surrey
[745-013 (1971) : 58]
THE ROYAL VETERINARY COLLEGE
Royal College Street, London N.W.1.

JUNIOR TECHNICIAN
Required for Biochemistry Research at the above address. Training will be given during employment with day release for appropriate qualification. Applications in writing to the Assistant Secretary.

[745-014 (1971) : 58]
As a result of the centralisation of the Company’s Research facilities at Basingstoke, we require qualified and unqualified staff.

There are vacancies for a Chemist-Biochemist, with interests in Haematology and Protein Chemistry, and for Assistants of about H.N.C. level to work as Technicians in the same laboratory.

The existing programmes include fractionation and investigation of snake venoms and work in the field of blood coagulation.

The remuneration will be commensurate with qualifications and experience.

If necessary, relocation costs will be paid.

Conditions of employment are good including a contribution pension scheme, sickness benefits and B.U.P.A. facilities.

Applications should be addressed to:
The personnel manager
CROOKES LABORATORIES LTD
TELFORD ROAD
HOUNDMILLS ESTATE BASINGSTOKE, HANTS.
or telephone Basingstoke 3212.
[745-015 (1971) : 58]
G.D. Searle & Co. Ltd. require

**Electron Microscope Technician**

We have an interesting vacancy in our New Research Laboratories at High Wycombe for an experienced technician to work in the Electron Microscope Unit.

Applicants should have reached H.N.C. or Degree Level and be well trained in such techniques as thin sectioning and staining, negative staining, Kleinschmidt DNA, shadowing, particle counting and photography. The unit has a Phillips 300 microscope and all accessory equipment.

The job will involve working with a number of people, helping in the evaluation of results, organising the work load and providing a technical service of EM work to the Research Department.

Salary will be attractive and Company benefits and working conditions are excellent.

Please apply to:
The Personnel Manager,
G.D. Searle & Co. Ltd.,
Lane End Road, High Wycombe, Bucks.
SEARLE
Research in the Service of Mankind.
[745-016 (1971) : 58]
Applications are invited for:
Two vacancies in the Department of Metallurgy at the Lecturer level, for Physical, Metallurgists or Material Scientists.

One post is likely to be of interest to people with up to five years’ research experience in the application of Electron Microscopy to the study of materials, the facilities within the Department include 1MV and 100kV transmission Electron Microscopes, a Scanning Electron Microscope and both normal and Scanning Electron Diffraction Cameras.

The second post is likely to be of interest to people with up to five years’ research experience in the application of x-ray techniques to the study of versatile diffractometers, microfocus and standard x-ray generators, with a liquid helium cryostat and a high temperature camera.

Applications with names of two referees should be submitted to the Head of Department, Metallurgy Department, Imperial College, London, S.W.7., by the end of April 1971.

The appointment will date from 1st October 1971. Salary on the scale £1,491 - £3,417 plus £100 London allowance and F.S.S.U. benefits.

[745-017 (1971) : 58]
University of Edinburgh  
DEPARTMENT OF MOLECULAR BIOLOGY  
Applications are invited for the position of Technical Officer to work on Analysis of Bacteria. Structure and Function on Electron Microscopy.  
Applicants should preferably have a good Honours Degree and knowledge of Biochemistry, Genetics and Microbiology. Experience in Electron Microscopy is not necessary. The position will be vacant from April 1st 1971 but the appointment should begin after the end of the current academic year. Salary scale £1,487 - £1,838.  
Apply to:  
Dr. P.J. Highton  
Dept. of Molecular Biology,  
King’s Buildings,  
Mayfield Road, Edinburgh, EH5 3JR giving names of two referees.  
Please quote reference 2916.  
[745-018 (1971) : 58]
IMPERIAL COLLEGE
LECTURESHIPS IN COMPUTING

Applications are invited for lecturerships in Computing Science for existing post-graduate and for the prospect of under-graduate courses. Departmental interests include the principles of computing systems, operating systems, formal theory and software for advanced applications. Successful applicants will be expected to contribute to teaching and research in these fields. A dedicated machine for experiments in teaching methods is available, as well as computing services using both IBM and CDC machines. A CDC 6400 will be installed in the College shortly.

Appointments will be made at an appropriate point in the Lecturer scale £1,491 x £135/£138 to £2,454 (bar) to £3,414 plus £100 London Allowance per annum, and carry F.S.S.U.

Applications should include a Curriculum Vitae, with details of experience and special teaching and research interests, and should reach the Assistant Director, Department of Computing and Control, Imperial College, London S.W.7. as soon as possible.

[745-019 (1971) : 58]
UNIVERSITY OF SOUTHAMPTON
INSTITUTE OF SOUND AND VIBRATION RESEARCH
Applications are invited for an appointment to work with a group on fundamental studies of jet engine noise.
The appointment will be made either in the grade of **Experimental Officer** or **Research Assistant** according to qualification and experience. The work will be principally of an experimental nature utilising the model jet noise facility at the Institute of Sound and Vibration Research.
Applicants should possess either a degree in physics or engineering. Equivalent experience in the fields of fluid mechanics or acoustics would be advantageous.
Salary in accordance with age and experience. Experimental Officer salary scale: £1,491 - £2,454. Research Assistant – up to £1,926.
Applications, giving date of birth, details of qualifications and experience and the names of two referees should be sent as soon as possible to the Deputy Secretary, The University, Southampton, SO9 5NH, quoting ref: NSc.
[745-020 (1971) : 59]
UNIVERSITY OF EDINBURGH
SCHOOL OF ENGINEERING SCIENCE
RESEARCH ASSISTANT in MECHANICAL ENGINEERING

Applications are invited from candidates who have a good Honours Degree in an appropriate subject and preferably some industrial or research experience, to work in the field of fatigue crack propagation in high strength Naval steels. The work is Government-approved and is for a period of three years. The person appointed may be permitted to register as a Postgraduate student and submit for a Higher Degree. Initial salary according to qualifications and experience up to £1,491 per annum, with increments for later years, together with superannuation under the F.S.S.U.

Applications (three copies), together with the names of two referees should be sent to the Secretary to the University, Old College, South Bridge, Edinburgh, EH8 9YL, as soon as possible.

Please quote reference 5005.

[745-021 (1971) : 59]
UNIVERSITY COLLEGE CARDIFF
Applications are invited for the following post:

**Post-Doctoral Assistant**

The successful applicant will join a group working on the theory of the semiconductor injection laser and will be expected to maintain close contact with a team working on experimental aspects of this project in the Department of Applied Physics, UWIST. The post is tenable for two years, with the possibility of renewal for a third year. Closing date for applications April 19th 1971. Please quote 00178. Duties to commence on 1 June 1971.

Further details can be obtained from Dr. M. J. Adams, Department of Applied Mathematics and Mathematical Physics, University College, P.O. Box 78, Cardiff CF1 1XL.

[745-022 (1971) : 59]
Applications are invited from physicists or electrical engineers for a postdoctoral Research Assistantship to study flame ionisation using far infrared lasers. The salary is £1,491 plus £100 London Allowance with F.S.S.U. membership. Curriculum vitae with names of two referees should be sent to Dr. A.R. Jones.
ilea
INNER LONDON EDUCATION AUTHORITY

London College of Printing
Elephant & Castle, S.E.1.
(Revised Advertisement)
The College is the major centre of education for the printing and allied industries, recruiting students regionally, nationally, and from overseas. Full-time and ‘sandwich’ courses are provided at an advanced level in printing technology and management, graphic design (Dip. A.D.) typographic designs, and graphic reproductions. Block release, part-time day and evening, and short courses are provided in all aspects of printing and related subjects.

Since the original advertisement for the post of Vice-Principal, the College Governors have decided to create two positions and readvertise, as follows:

(i) **Deputy Principal and Director of Higher Studies**
A person of high academic attainment to organise, develop and supervise all higher level work in the College with special responsibility for the advance of scientific, technological and management education with the aim of extending the contribution of the College to the development of the printing industry.

(ii) **Assistant Principal and Director of Studies**
A person with experience of further education and wide knowledge of the printing industry to organise, develop and supervise all operative, craft and technician courses, with special responsibility for the Clerkenwell Branch.

Within the broad framework set out above, the Principal will delegate additional specific administrative and academic responsibilities relating to the work of the College as a whole to each of the persons appointed. One of these responsibilities, dependent upon the applicant’s qualifications, will be to assist the co-ordination of the full-time courses in design and photography.

Qualifications:
Post (i) Candidates should have a high academic qualification in applied science and / or technology, and either have occupied a senior position in a college of higher education covering a wide range of technological studies, or, alternatively, offer development experience in, or in association with, the printing industry.

Post (ii) Candidates should have a good technical qualification and have a wide knowledge and experience of the printing industry. Normally, candidates will be expected to have held a senior position in further education, but exceptional industrial experience will also be considered.

Salary Scale
The salary scale for both posts will be in accordance with Burnham F.E. Report for a Vice-Principal of a college in group 9, plus London allowance £85.

Scale for post (i) Deputy Principal and Director of Higher Studies £3,904 to £4,259 plus L.A.
Scale for post (ii) Assistant Principal and Director of Studies £3,639 to £3,994 plus L.A.

Assistance may be given towards household removal expenses.

Application forms (returnable within a fortnight of this advertisement) and further particulars obtainable from the Senior Administrative Officer, London College of Printing, Elephant and Castle, London S.E.1. Candidates are asked to indicate on their application forms the post for which they are applying. Previous applicants are being notified of this revised advertisement.
[745-024 (1971) : 59]
THE QUEEN’S UNIVERSITY OF BELFAST
LECTURESHIP IN ZOOLOGY
Applications are invited from persons with qualifications in any field of Zoology for a Lectureship in Zoology from 1 October 1971 or such other date as may be arranged. The appointment may be subject to a period of probation up to three years in duration. Initial placing, which will depend on experience and qualifications, will be made at one of the first three points on the Lecturers’ scale. £1,491 x £138 (2) £1,767 rising to £3,417 with F.S.S.U. Applications should be received by 17th April, 1971. Further particulars may be obtained from The Secretary, The Queen’s University of Belfast, Belfast BT7 1NN, Northern Ireland. (Please quote reference 71/NS/26.)
[745-025 (1971) : 59]
THE UNIVERSITY OF MANCHESTER
A vacancy exists for a **TECHNICIAN** in the Department of Metallurgy for an initial period of 5 years. Applicants should be male aged 20-22 and preferably have O.N.C. or equivalent. The duties will be to assist with a Research Project involving Mechanical Testing and Vacuum Technology. Experience in these fields will be advantageous.
Salary in accordance with the University scales for Technicians i.e. £1,041 - £1,410 p.a. with supplements for approved qualifications.
Applications should be sent to the Chief Technician, Department of Metallurgy, The University, Manchester M13 9PL.

[745-026 (1971) : 59]
THE OPEN UNIVERSITY
INSTITUTE OF EDUCATIONAL TECHNOLOGY
(Director: Professor D.G. Howbridge)
LECTURER IN MEDIA RESEARCH

Applications are invited for the post of Lecturer in Broadcast Media Research in the Institute of Educational Technology at the Open University. The successful candidate will join an interdisciplinary team of Scientists, Psychologists, Statisticians and Natural Scientists carrying out research into aspects of the Open University’s operation. The appointed Lecturer will be expected to play a central part in investigating the role and effectiveness of radio and television as used by the University; and will also advise course teams as to the advantageous use of these media. It is expected that candidates will have experience in academic or commercial research, probably in one or more of the following areas: advertising or communications research, programmed learning, sociology, psychology or statistics.

Further particulars and application forms are available by post card requests from the Secretary (UM2), The Open University, Walton Hall, Walton Bletchley, Bucks. Closing date for applications, Friday 30th April 1971.

[745-027 (1971) : 59]
THE UNIVERSITY OF SUSSEX
School of Mathematical and Physical Sciences

SENIOR / CHIEF TECHNICIAN

Applications are invited for a post of Senior or Chief Technician level in the Physics Laboratories. The successful applicant will be trained to take charge of operation and maintenance of a 3MV accelerator to be installed at the University in 1972. Experience with either electronic or vacuum techniques would be advantageous but is not essential.

Qualifications normally required, are: H.N.C. for Chief Technicians or ONC for Senior Technicians. The appointment will be made under an SRC research grant and will be for a period of five years in the first instance. Salary will be in the range £1,398 - £2,062 per annum.

[745-028 (1971) : 59]
EXPERIENCED LABORATORY TECHNICIAN required to take charge of Physical Measurements. Laboratory concerned with Physical Chemical work with a Pharmaceutical bias. His duties will include the operation and maintenance of sophisticated physical and electronic equipment and he should have a sound knowledge of photography, projection, and the operation and maintenance of audio visual aids. The individual selected will be requested to work largely on his own and will be responsible through the Laboratory Steward to the Head of the Chemistry Department for the operation of the laboratory as a service to the Academic Departments of the School. Salary £1,827 by annual increments to £2,061 plus a London Weighting of £125 per annum. Point of entry depending on age, qualifications and experience. Contributory Pension Scheme. Apply in writing to the Clerk of the Council, The School of Pharmacy, University of London, 29/39 Brunswick Square, London WC1N 1AX. The closing date for applications is 30th April 1971.

[745-029 (1971) : 59]
YOUNG MAN REQUIRED as student or junior technician to train as an electronics engineer; candidates must have a minimum of “O” level English, maths., one science and one other subject and will be expected to attend an appropriate day release course. Salary according to age and experience from £706 at age 18 years. Apply in writing to The Secretary, University College Hospital Medical School, University Street, London WC1E 6JJ. quoting ref. J.E.T/M.U.

[745-030 (1971) : 59]
THE UNIVERSITY OF WARWICK
School of Engineering Science
RESEARCH WORK IN NOISE, HEARING AND VIBRATION
Postgraduate students are needed to work on the following topics:
Noise generated by tractor-type vehicles
Fluid mechanic and computer models of the inner ear
Studies of mechanisms of the middle ear
Vibration and driver fatigue
Vibration characteristics of structural joints
Vibratory energy transmission in structures
Vibration variability in production-line items
Vibration of rotating shafts
Computer graphics in vibration analysis
Graduates with a first or upper second class degree or equivalents in engineering, mathematics, physics or also in biological subjects for the hearing studies, will be considered. S.R.C. studentships may be available. Further details can be obtained from The Registrar, The University of Warwick, Coventry, CV4 7AL. Quote reference PG/13/71.
[745-031 (1971) : 60]
THE UNIVERSITY OF LEEDS
Applications are invited for a post in the Department of
MECHANICAL ENGINEERING LECTURER
The appointment is primarily in the Production Engineering field, but experience in either Control and Systems Engineering or Tribology would be valuable. Consideration will be given to applicants otherwise suitably qualified who would welcome the opportunity of developing Production Engineering as a major personal interest. Special facilities would be made available to such an appointee.
CLOSING DATE: 21st April, 1971
SALARY SCALE: £1,491 - £3,417 (efficiency bar £2,454)
Forms of application and further particulars of the post can be obtained by writing to the Registrar, The University, Leeds, LS2 9JT quoting reference number 32/16/E. Applications should be returned to the Registrar as soon as possible.
[745-032 (1971) : 60]
THE UNIVERSITY OF SHEFFIELD
POSTDOCTORAL RESEARCH IN PHYSICS

Applications are invited for two SRC posts concerned with the experimental study of electron and phonon states in amorphous semiconductors using

(1) Electron beam luminescence and
(2) far infrared spectroscopy

Electrical and structural studies are also envisaged. The posts are within a small group mainly concerned with low mobility transport problems and recombination mechanisms.

The appointment will be for the period 1 June 1971, or as soon as possible thereafter to 31 March 1974 with possibility of extension to provide for three-year tenure of appointment. The initial salary will be £1,491 p.a.

Applications or enquiries should be sent before 1 May to Dr. I. G. Austin or Dr. T. Searle, Physics Department, The University, Sheffield 3. Ref. R 43/H.

[745-033 (1971) : 60]
TECHNICIAN required for new Clinical Virology Laboratory serving large general hospital. Opportunity to learn all relevant techniques as diagnostic work is just starting. Qualifications AIMLT/HNC or equivalent. Salary in range £1,235 to £1,535 per annum. Applications to Secretary, Royal Postgraduate Medical School (01-743 2030 Ext 351) Hammersmith Hospital, Duncane Road, London, W.12 quoting reference 10/112.

[745-034 (1971) : 60]
CERN European Organization for Nuclear Research
Organisation Européenne pour la Recherche Nucléaire

CERN is a modern research laboratory, situated near Geneva, which offers first-class social and financial conditions of employment, and the opportunity to work in an international atmosphere.

ENGINEER, PHYSICIST or CHEMIST
for the Magnet Group
Intersecting Storage Rings Division

to participate in the planning and execution of work required for radiation safety. He will carry out studies and development work in the following fields: beam loss, shielding for radiation protection, material damage dosimetry, methods of evaluating the lifetime of materials around accelerators.

Candidates should have a university degree or an equivalent diploma. Several years’ experience in radiation damage studies and safety are necessary.

Please write for an application form to the address given below, quoting the reference ISR-MA-306.

Head of Personnel
CERN
1211 Geneva 23, Switzerland.
[745-035 (1971) : 60]
SENIOR TECHNICIAN I required for new Clinical Virology Laboratory. Experience in this field an advantage as diagnostic work is just starting. Qualifications: F.I.M.L.T. or equivalent. Salary in range £1,445 to £1,865 per annum. Applications to Secretary Royal Postgraduate Medical School (01-743 2030 Ext. 351) Hammersmith Hospital, Ducane Road, London, W.12 quoting reference 10/111.

[745-036 (1971) : 60]
PHOTO PRODUCT AND COATING RESEARCH
We manufacture specialist coated materials for the Printing Industry. Expansion in our Research and Development programme has created two attractive opportunities.

CHEMIST / TECHNOLOGIST to work on novel light sensitive coatings and their application to graphic arts processes.
Candidates should preferably be aged 25-32 and qualified to degree or HNC level in Chemistry. Experience in the relevant field of photographic or coating technology would be a major consideration. Salary range £1,700 - £2,100.

COATING TECHNOLOGIST to supervise pilot coating plant and carry out development of novel coated products.
Candidates should be aged 21-28, preferably with training in Chemistry to HNC level or with experience of coating technology and materials. Salary range £1,300 - £1,700.

These vacancies provide an opportunity to join a stimulating project with early progression to key positions in the team.
Write or telephone for application form to:
Mr. I.M. Robertson,
AUTOTYPE,
Brownlow Road, West Ealing, London W13 0RR.
Tel: 01-567 8861
A MEMBER OF NORPRINT LIMITED, NORCROS GROUP.
[745-037 (1971) : 60]
GRADUATE required in Biophysics Department for research on blood flow. Three-year appointment at salary of £870 p.a. Facilities to work for higher degree are available for suitable candidates. Apply, giving names of two referees, to Secretary, St. Mary’s Hospital Medical School, Paddington, London, W.2.

[745-038 (1971) : 60]
LOGHBOROUGH UNIVERSITY OF TECHNOLOGY

INFORMATION SCIENTIST

Applications are invited for the post of assistant to the Director of the Particle Science and Technology Information Service. Duties will include the continuing development of a retrieval system and the production of a monthly current titles bulletin. Experience in information retrieval and some technical background desirable.

Salary within scale £1,491 - £2,454, starting point depending on age and experience.

Further details from P.J. Lloyd, Director, Particle Science and Technology Information Service, Department of Chemical Engineering.
Loughborough Leicestershire

[745-039 (1971) : 60]
Applications are invited for a RESEARCH OFFICER to develop techniques for investigating pulsed high-field conduction in insulating films. Experience in pulse and measurement circuitry is essential; academic or industrial post-graduate experience in Physics, Electrical Engineering, or Electronics, is desirable.

The appointment, which is supported by an S.R.C. grant, will be for a period of up to 3 years and the successful applicant will be required to take up the post as soon as possible. Salary £1,491 - £1,629 - £1,767, plus London Allowance £100 p.a. F.S.S.U. benefits.

Application forms may be obtained from the Deputy Secretary, Birkbeck College, Malet Street, W.C.1. and must be returned not later than 19th April 1971.
THE GRASSLAND RESEARCH INSTITUTE
Hurley, Maidenhead, Berks.

**SCIENTIFIC ASSISTANTS** are required in the following areas:

**BIOMETRICS**: Involves the use of electrical and electronic desk calculators in producing statistics.

**PLANT PHYSIOLOGY**: To assist with experiments in our controlled environment and radioisotope laboratories.

**ANALYTICAL CHEMISTRY**: This is an interesting laboratory post determining the digestibility of herbage.

**QUALIFICATIONS**: Four G.C.E. “O” level passes to include English and Mathematics or a Science Subject.

**SALARY**: According to age: £587 (age 18) increasing to £1,003 (age 25) to a maximum of £1,253 p.a. Apply to PERSONNEL OFFICER.

[745-041 (1971) : 60]
RESEARCH ASSISTANT

Research Assistant required for electron spin resonance programme on organic and polymeric materials. Candidates should have a good honours degree in a chemical or physical science. The successful candidate will be expected to register for a higher degree of the C.N.A.A.

Salary £930 x £30 (2) - £990 per annum.

Further particulars and application form (to be returned by 20 April 1971) from the Secretary, Thames Polytechnic, Wellington Street, London, S.E.18.

[745-042 (1971) : 60]
LOUGHBOROUGH UNIVERSITY OF TECHNOLOGY
CHEMISTRY
Early applications are invited for the following posts to date from 1st September next.
Senior Lecturer (and / or Lecturer) in Inorganic Chemistry
Lecturer in Instrumental Analysis
Salaries (entry at appropriate point)
Senior Lecturer £3,453 - £4,401
Lecturer £1,491 - £3,417
Further particulars and application form from Assistant Registrar, ref 71/12
Loughborough Leicestershire LE11 3TU
[745-043 (1971) : 61]
LONDON BOROUGH OF ENFIELD EDUCATION COMMITTEE

LABORATORY TECHNICIAN required for expanding Science department at ARNOS SCHOOL, Wilmer Way, Southgate, London N14 7HY (on Piccadilly Line). Plenty of scope for initiative and hard work for the right candidate, who will assist with the introduction of new “A” level courses from next September.

Applicants should be qualified by examination and / or experience, and the salary will be within Technician Grade 2/3 (£1,032 - £1,362 including London Weighting) plus £30 or £50 per annum qualification awards where appropriate. Commencing point to be determined according to qualifications and experience. Five day 38 hour week.

Application forms are obtainable from (s.a.e.) and returnable to the Chief Education Officer, Education Department, Church Street, Edmonton, London N9 9PD, by the 16th April 1971.
[745-044 (1971) : 61]
Applications are invited for the post of **LECTURER** or **TUTORIAL FELLOW** in **ELECTRONICS**. Applicants should have a research interest in one or more of the following areas: Far Infra-red or millimetre wave techniques, Digital Systems, Control Systems, Communications, Radio Astronomy, Solid State Electronics, Space Research, Experimental Relativity.

Salary scale £1,491 - £3,417 with F.S.S.U.

Further particulars and application forms may be obtained from the Assistant Registrar, Faculty of Natural Sciences, Chemistry Building, The University, Canterbury, Kent, to whom completed applications should be submitted not later than 8th May, 1971, quoting reference A.5/71.
NATIONAL VEGETABLE RESEARCH STATION
WELLESBOURNE, WARWICK
Plant Physiology Section

RESEARCH FELLOWSHIP
of the Tropical Products Institute tenable at the N.V.R.S. to investigate onion dormancy and evolve systems of onion storage suitable for the tropics. Preference will be given to a post-doctoral plant physiologist with experience or interest in hormones.
The appointment will be for three years on the scale £1,491 (age 24) to £3,441 (age 38). F.S.S.U.
Further details and application form from the Secretary, National Vegetable Research Station. (Closing date 17th April 1971).
[745-046 (1971) : 61]
SCIENCE RESEARCH COUNCIL
ASTROPHYSICS RESEARCH UNIT – CULHAM LABORATORY

Vacancy for a Research Associate

The work of the Astrophysics Research Unit covers Space Astrophysics and Laboratory Plasma Spectroscopy. On the space side, experiments are flown on rockets to probe the physics of the sun’s atmosphere and to record the spectra of selected stars. The Unit is engaged in a number of collaborative projects with Universities and Research Institutes both in the United Kingdom and abroad. These include the exchange of members of staff and the supervision in the Unit’s laboratory of Ph.D. research students.

The Unit has a vacancy for a Research Associate to work in the Laboratory Plasma Spectroscopy Group. The Group has available a Theta-Pinch which produces plasma of temperature up to four million degrees and a gigawatt laser system for plasma generation. Also available is a wide range of spectroscopic equipment suitable for the study of the spectra of these plasmas in the wavelength range from soft-X rays to the visible.

Qualifications and Experience: - Candidates must have good honours degrees: research experience in Space Research, Astrophysics, Spectroscopy, Optics or Atomic Physics might be an advantage.

Salary and Tenure: - The salary will normally be between £1,490 and £2,700 p.a. according to experience, qualifications and age, but higher salaries can be paid to particularly well qualified and experienced associates. The successful candidate will be offered a Research Associateship tenable for a period of up to three years.

Application: - Suitably qualified people who would like to find out more about these research opportunities should send (or telephone) a brief description of their qualifications, experience and research interests to Mr. G. I. James, ARU Administrative Office, The Culham Laboratory, Abingdon, Bercks. Tel: Oxford 41721 – Extension 480.

[745-047 (1971) : 61]
POST DOCTORAL RESEARCH BIOCHEMIST required to join the study of Free and Cellular Immunoglobulines with ultimate application to Neoplasma of Lymphoid Tissue in Man.
Salary £1,611 to £2,103 with N.H.S. superannuation.
Further information available from Dr. G.T. Stevenson. Applications to Personnel Officer, Southampton General Hospital, Tremona Road, Shirley, Southampton, SO9 4XY.
[745-048 (1971) : 61]
MEAT AND LIVESTOCK COMMISSION

GENETICIST

Applications are invited for a Geneticist to work in the Commission’s Headquarters at Bletchley, Bucks. The officer will be involved in livestock testing programmes, including the development and use of selection indices.

Candidates should be graduates in an appropriate discipline and the completion of a course in genetics would normally be expected. Salary according to age, qualifications and experience will be on the scale £1,123 - £2,639.

The Commission operates a contributory Pension Scheme and conditions of service are comparable with those of other public bodies.

Application forms, to be returned by 23rd April 1971, may be obtained from the Chief Establishment Officer, Meat and Livestock Commission, P.O. Box 22, Queensway House, Queensway, Bletchley, Bucks.

[745-049 (1971) : 61]
ROTHAMSTED EXPERIMENTAL STATION
Harpenden, Herts.
CHEMIST for INSTRUMENTAL ANALYSES of amino acids and carbohydrates in plant materials. Qualifications: Degree HNC or equivalent and experience with modern instruments essential. Appointment in grade of Assistant Experimental Officer £946 at age 21 to £1,311 at age 26 (maximum on entry) on scale to £1,578 or Experimental Officer £1,725 to £2,177. Superannuation optional. Applications, naming two referees and quoting reference 21473 to the Secretary by 30th April.

[745-050 (1971) : 61]
UNIVERSITY COLLEGE OF NORTH WALES
SCHOOL OF ELECTRONIC ENGINEERING SCIENCE

**Lectureship** in Electrical Materials Science

**Lectureship** in Systems Electronics

Re-issue of Advertisement

Applications are invited for the above posts.

For the Lectureship in the Division of Electrical Materials Science the initial qualifications might be in Electronic Engineering, Physics or Chemistry and experience in the evaluation and insulating materials would be an advantage.

The electrical properties of both organic and inorganic amorphous materials are a major research activity of the Division under Professor T.J. Lewis and facilities include scanning and transmission electron microscopes and an X-ray microprobe analyser.

For the Lectureship in the Electronics Division candidates should have research experience in communications systems, preferably involving digital techniques and computers. The School is well-equipped for such studies and the successful candidate will be joining a strong research group working on both communication theory, and components and devices for advanced communication systems.

Salary will be on the scale £1,491 - £3,417.

Further particulars of these posts may be obtained from the Secretary and Registrar, and applications (2 copies) giving details of age, qualifications and experience together with the names of three referees, should be sent to reach the Secretary and Registrar by 23rd April, 1971.

[745-051 (1971) : 61]
CHARING CROSS GROUP OF HOSPITALS
Agar Street, Strand, W.C.2.
Applications are invited from candidates with Electronics experience to help in setting up a service in electronic instrumentation for the Hospital Group.
Applications with Graduate qualifications – salary scale £1,320 - £2,955, other applicants with adequate knowledge and experience who have obtained the O.N.C., H.N.C., or H.N.D. in electrical or mechanical engineering – salary scale £1,215 - £1,854. (Commencing salary on both scales depends upon experience and qualifications.) Whitley Council terms and conditions of service.
Applications giving the names of two referees to the Establishment Officer within ten days of appearance of advertisement.
[745-052 (1971) : 61]
Applications are invited for a post of **Assistant Experimental Officer** or **Experimental Officer** in the Analytical Chemistry Section of the Chemistry Department. Candidates should be familiar with the analytical methodology employed in agricultural chemistry and have experience with automated and instrumental techniques. Experience in supervision and training of junior staff is desirable. Applicants should have a Pass Degree, Dip. Tech, H.N.C. or equivalent in appropriate subjects.

Salary (A.E.O.) up to £1,311 according to age, in scale to £1,578 (E.O) £1,725 in scale to £2,177 plus 5 ¼ % superannuation allowance. Apply on forms obtainable from the Secretary, N.I.R.D. Shinfield, Reading. RG2 9AT. Quote reference 71/6.

[745-053 (1971) : 61]
TECHNICIAN required as soon as possible for work in zoological laboratories. Salary depending on age and qualifications up to £1,587 per annum. Write, stating age, qualifications, experience and references, to the Head of the Department of Biology, Northern Polytechnic, Holloway, London, N7 8DB.
[745-054 (1971) : 61]
UNIVERSITY OF WALES
UNIVERSITY COLLEGE OF SWANSEA
Department of Chemistry
Instrumental Development in Photoelectron Spectroscopy
Applications are invited from persons with experience in one or more of the following: electronics, instrument design, vacuum techniques and spectroscopy, to join a research group engaged in applying the new technique of analysis of pesticides, pollutants, etc. It is hoped that the person appointed will be able to materially assist with the developments of a photoelectron spectrometer. The appointment will be for a three year period.
Initial salary in a range up to £1,707 per annum, according to age, qualifications and experience.
Applications, together with the names and addresses of two referees, should be made by Wednesday 14 April, 1971, to the Registrar, University College of Swansea, Singleton Park, Swansea, Glam., SA2 8PP.
[745-055 (1971) : 62]
UNIVERSITY OF EDINBURGH
Department of Genetics

Applications are invited for the post of Demonstrator. This position is in the first instance for one year only, from 1st September 1971. The person appointed will be required to organise and run a practical class on Quantitative and Population Genetics. Experience with Drosophila will be essential.
Salary: between £1,272 and £1,734 according to qualifications and experience.
Applications, naming two referees, to The Secretary to the University, Old College, Edinburgh, EH8 9YL, before 1st June. Please quote reference 1019.
[745-056 (1971) : 62]
Applications are invited from suitably qualified (or about to be qualified) Analytical Chemists for a postgraduate studentship or post-doctoral fellowship, in the Department of Preventive Dentistry, to study the methods of micro-analysis of biological material for fluoride. Appointment initially for one year: in the case of the studentship, two years. Suitable candidates for the studentship will be encouraged to submit for a higher degree. Salary range £1,491 - £2,040 p.a. for post-doctoral appointee and in accordance with S.R.C. Studentship rates for other graduates. Further particulars from the Registrar, The University, Manchester, M13 9PL. Quote ref: 66/71/NSc. Applications returnable by May 12th. [745-057 (1971) : 62]
RESEARCH TECHNICIAN
required for work on connective tissue disease to the Clinical Division of Medical Research Institute. Previous experience of radiochemical or immunological techniques an advantage. Starting salary within the range £1,219 - £1,833 per annum, depending on qualifications and experience. Applications in writing, naming two referees, to Laboratory Superintendent, Kennedy Institute, Bute Gardens, London W6 7DW.
[745-058 (1971) : 62]
EXPERIMENTAL OFFICER / ASSISTANT EXPERIMENTAL OFFICER

Applications are invited for three permanent and pensionable posts in the Forensic Science Division of the Department of Industrial and Forensic Science in the Ministry of Commerce, Belfast.

CHEMISTRY SECTION – Two vacancies
Candidates should preferably have had several years’ practical experience of laboratory work in general chemistry, or in one of the following specialisations: toxicology, pharmacy, food and drugs, metallurgy, glass or paint technology or firearms examination.

BIOLOGY AND PHOTOGRAPHY SECTION – One vacancy
Candidates should preferably have had several years’ practical experience of laboratory work in one of the following specialisations: haematology, biochemistry, botany, fibre technology, document or handwriting examination.

The work is mainly in the laboratories but there will be opportunities for some outdoor work including the examination of scenes of crime and persons appointed as Experimental Officers may be required to give evidence in courts.

Salary Scales:
Experimental Officer £1,725 - £2,177 (Entry point according to experience)
Assistant Experimental Officer £741 (age 18), £946 (age 21), £1,311 (age 26 or over) rising to £1,578.

Qualifications:
Experimental Officer Candidates must have a university degree or a Higher National Certificate in appropriate subjects or an equivalent qualification and must be over 26 years of age.
Assistant Experimental Officer Candidates must have an Ordinary National Certificate or an equivalent qualification.

Please write now for an application form to the Secretary, Civil Service Commission, Clarendon House, Adelaide Street, Belfast BT2 8ND (telephone number Belfast 27963 extension 26). Completed forms must be returned by 15 April 1971. Applicants should state for which vacancy they are applying and in which of the above areas of work they are experienced. They should also quote 3837/71/71.

[745-059 (1971) : 62]
Applications are invited for the post of **LECTURER** IN ENGINEERING MATHEMATICS. The person appointed will be required to participate in the teaching of statistics at an undergraduate level and general and specialist mathematical topics at undergraduate and postgraduate level, to students in this and other Faculties.

Candidates for the present post should preferably have a statistical background and an interest in the application of optimization methods. The ability to contribute to the teaching of Operational Research techniques is desirable, and recent experience of their applications in an engineering industry would be a particular advantage.

Salary will be at an appropriate point on the scale £1,491 to £3,417 according to age, qualifications and experience. Membership of F.S.S.U. required.

Further particulars may be obtained from the Registrar, The University, Newcastle upon Tyne NE1 7RU, with whom applications (three copies), together with the names and addresses of three referees, should be lodged not later than 16th April, 1971. Please quote reference NSc.
UNIVERSITY COLLEGE OF NORTH WALES, BANGOR
School of Plant Biology
School of Electronic Engineering, Division of Material Science

GRADUATE RESEARCH ASSISTANT
A graduate research assistant required, preferably post-doctoral, for work on a two year A.R.C. award from June 1st 1971 (or on a date to be mutually arranged) in connection with the application of the electron micro-probe analyser to deposition of silica in grass leaves. Graduates in Botany, Agricultural Botany or Material Science / Physics will be considered. Salary according to qualifications.
Applications, stating age, qualifications etc. together with the names and addresses of two referees should be sent to the Secretary and Registrar, University College of North Wales Bangor as soon as possible and in any case by April 19th, 1971.
[745-061 (1971) : 62]
University of Bristol
Applications are invited for the post of **TEMPORARY LECTURER** in the Department of PSYCHOLOGY for the session 1971-72.
Salary within the range £1,491 - £2,040 p.a. Further particulars may be obtained from the Registrar, University Senate House, Bristol BS8 1TH to whom applications should be sent by April 16th. (please quote reference E8).
[745-062 (1971) : 62]
UNIVERSITY OF SOUTHAMPTON
DEPARTMENT OF AERONAUTICS AND ASTRONAUTICS
Wolfson Marine Craft Unit

NAVAL ARCHITECT
A vacancy exists for a young Naval Architect who has had experience and is interested in the application of the computer to naval architecture and other related problems. An interest in small craft and yachts would also be an advantage.
The salary will be in the range £1,491 to £2,454. The appointment will be for one year in the first instance, with the possibility of renewal for a further year or more.
Applications, in the form of a brief curriculum vitae and the names of two referees should be sent to: -
The Deputy Secretary, The University, Southampton SO9 5NH, quoting reference NSc.
[745-063 (1971) : 62]
UNIVERSITY OF DAR ES SALAAM, TANZANIA
Applications are invited for 2 posts of SENIOR LECTURER / LECTURER IN GEOGRAPHY. The first post will be filled by an applicant with interests in ecology, soil science or biogeography. The second post will be filled by an applicant with interests in social geography and population. Salary scales Senior Lecturer £EA1,950 - £EA2,615 p.a. Lecturer £EA1,350 - £EA2,230 p.a. (£EA6 - £7 sterling). Salary supplemented in range £612 - £900 (sterling) and education allowance and children’s holiday visit passages payable in appropriate case by British Government. FSSU. Family passages. Biennial overseas leave. Detailed applications (6 copies) to Inter-University Council. 90/91 Tottenham Court Road, London W1P 0DT, from whom particulars are available.
[745-064 (1971) : 62]
Applications are invited for a post-doctoral research fellowship in the Division of Biological Sciences to work in the chloroplast group directed by Dr. R.J. Ellis. The aim of the project which is supported by S.R.C., is to purify chloroplast RNA polymerase and to determine the mechanism of its stimulation by light. Experience in purifying membrane-bound enzymes would be highly desirable. The appointment will be for two years commencing on 1st October, 1971. Salary £1,629 x £138 - £1,767 p.a. with F.S.S.U. Further details and application forms may be obtained from the Registrar, University of Warwick, Coventry CV4 7AL, to whom completed forms should be returned by 28th April, 1971, quoting Ref. No. 34/A/71.
UNIVERSITY OF MANCHESTER  
EXPERIMENTAL OFFICER  
Department of Geology  
Applications invited for this post in which the person appointed will assist in maintenance and repair of a 100kV transmission electron microscope and an electron probe microanalyser, and if suitably qualified, can also participate in research and development associated with these instruments. Experience in dealing with electronic and vacuum systems essential. Salary range p.a. £1,200 - £2,322.
F.S.S.U. Particulars and application forms (returnable by April 17th) from the Registrar, The University, Manchester, M13 9PL. Quote ref: 47/71/NSc.
[745-066 (1971) : 62]
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry. For further details write or telephone: GK Bureau, 17, Shaftesbury Avenue, London, W.1. 01-734 7232. Interviews by appointment only.

[745-067 (1971) : 62]
APPOINTMENTS WANTED

PHYSICIST (M.Sc., F. Inst. P., age 35) returning from work in France seeks interesting and demanding post of responsibility in Britain. Anything considered, experienced in supervision of materials research and some teaching. Box D686 New Scientist.

[745-068 (1971) : 63]
BIOLOGICAL SCIENCE graduate, requires permanent position. Anything considered. Tel. Sheffield STD 0743-305706.

STUDENTSHIPS
ULSTER: THE NEW UNIVERSITY
SCHOOL OF BIOLOGICAL and ENVIRONMENTAL STUDIES
Postgraduate Studentships
Applications are invited for a number of University Postgraduate Studentships to be held within the following fields of interest:

1. Physiological ecology of Lough Neagh particularly zooplantation and chironomids. Eco-behavioural studies of freshwater fish.
2. Physiology, structure and growth of higher plants and microorganisms.
4. Predatory and reproductive behaviour of selected animals including insects, spiders and mammals.
7. Settlement and agrarian history in Ireland.

Further particulars may be obtained from The Registrar, The New University of Ulster, Coleraine Co. Londonderry (quoting Ref: 71/39) to whom applications should be sent not later than 26th April, 1971.
LOUGHBOROUGH UNIVERSITY OF TECHNOLOGY
MATERIALS TECHNOLOGY

Research studentships and post-doctoral posts will be available for researchers in the new and expanding Department of Materials Technology. A wide range of interesting topics are being investigated in the fields of Powder Technology, Materials Engineering and Materials Protection and vacancies will exist in all research groups. These are staffed from a number of disciplines including chemistry, metallurgy, physics and chemical and mechanical engineering.

Applications are invited from candidates who hold or expect to obtain good honours degrees (or equivalent professional qualifications) in any of the above or related disciplines, and for senior posts from candidates who hold or expect to obtain a Ph.D. degree. There is also a scheme for Industrial Ph.D. degrees. Further information and application forms can be obtained from: Professor Ian Monties, Department of Materials Technology.
Loughborough Leicestershire LE11 3TU
[745-072 (1971) : 63]
THE UNIVERSITY OF MANCHESTER
RESEARCH STUDENTSHIPS IN SCIENCE
Applications are invited for these awards, normally tenable for three years and of a value comparable to that of an S.R.C. Research Studentship. Candidates must hold the degree of Bachelor or Master in a University or other approved institution. Particulars and application forms from the Registrar, The University, Manchester, M13 9PL; forms returnable by June 1st, but effort will be made to consider late applications from candidates who have had to await degree results. Quote ref: 55/71/NSc.
[745-073 (1971) : 63]
UNIVERSITY OF LIVERPOOL
DEPARTMENT OF METALLURGY AND MATERIALS SCIENCE
Applications are invited for an SRC Research Studentship to work on the problem of High Temperature Oxidation and Sulphidation of Cobalt-base Alloys. The studentship will be available from 1st April, and the successful applicant will be expected to work for the degree of Ph. D. and must have an upper second class Honours Degree, or better, in Metallurgy or a related subject. The grant will be £550 per annum, plus fees and other allowances. Applications, together with the names of three referees, should be sent as soon as possible to the Registrar, The University, P.O. Box 147, Liverpool L69 3BX. Quote Ref: RV/7413.N.S. LECTURES, MEETINGS AND COURSES
UNIVERSITY OF EAST ANGLIA
SCHOOL OF BIOLOGICAL SCIENCES
COURSE FOR BIOLOGY TEACHERS
19-23 July 1971
This is a residential / non-residential course of general lectures and seminars, accompanied by a choice of further lectures and practical sessions in one of four sub-courses:

(1) Animal Physiology
(2) Plant Physiology
(3) Cell Biology
(4) Radionuclides in Schools

The course will be of particular interest to teachers of “A” level Biology.
Further details are obtainable from Dr. G. Rich, School of Biological Sciences, University of East Anglia, Norwich NO8 8BC.

[745-075 (1971) : 63]
CAN NUMERICALLY CONTROLLED MACHINES SOLVE YOUR PRODUCTION PROBLEMS?
Are you a busy executive with little time to spare? Are you worried that NC is passing you by?
A one-day NC appreciation course for senior management has been specially structured by the Bimiehill Institute of East Kilbride. It will be held on 20 April, and the subjects dealt with will include basic principles, programming, standards and manufacturing and management aspects, including problems in introducing NC into the factory.
For further details contact the Course Organiser, Bimiehill Institute, National Engineering Laboratory, East Kilbride, Glasgow. Telephone East Kilbride 20222 extension 570.
[745-076 (1971) : 63]
Applications are invited for entry to this new course, starting in October 1971, from persons with an honours degree in any subject and a good knowledge of mathematics and statistics. The course could be of particular interest to working scientists (not necessarily mathematicians) who already have some experience of data analysis and wish to deepen their knowledge of computational and statistical techniques. The S.R.C. has accepted the course as suitable for the tenure of its Advanced Course Studentships. For further details write to:

UNIVERSITY OF OXFORD

**M.Sc. IN THE SCIENCE AND APPLICATIONS OF ELECTRIC PLASMAS**

A course of nine months duration, leading to the M.Sc. in The Science and Applications of Electric Plasmas, is held annually. It is concerned with Ionization Phenomena in Gases, Fundamental Properties of Plasmas and Practical Applications; it includes experimental work, part of which is done at the Culham Laboratory of the U.K.A.E.A. The teaching is carried out by the staff of the Department of Engineering Science and by invited scientists from government laboratories and industry. Applications are invited for the course beginning in October, 1971, from candidates who have a good honours degree in Engineering, Physics or Mathematics (or a comparable qualification) or expect to qualify in 1971.

The course is a valuable preparation for D.Phil, candidates who normally require an additional two years of research.

Applications and enquiries should be sent to the Secretary, Electric Plasma Course, Engineering Science Laboratory, Parks Road, Oxford OX1 3PJ.

[745-078 (1971) : 63]
A CAREER IN SCIENCE TEACHING

Full-time courses in teacher training for one, two or three years may be open to you – with grants – if you are over 18 and under 45 and possess any of the following qualifications: G.C.E., “O” or “A” levels, O.N.C. or H.N.C., City and Guilds Full Certificate, L.R.L.C. or Grad. R.I.C., Linst.P., or Grad. Inst. One further year of study after the Certificate in Education – B.Ed. For personal advice and information please write giving full details of your qualifications to: The Registrar, Whitelands College, West Hill, London S.W.15 (mark envelope “Science”).

[745-079 (1971) : 63]
UNIVERSITY OF LEEDS
Department of Colour Chemistry and Dyeing

M.Sc. COURSE IN COLOUR CHEMISTRY

Applications are invited for entry to a twelve month postgraduate course commencing October, 1971. The course, leading to the degree of M.Sc. by examination, will provide instruction in the branches of chemistry of particular concern to those whose interests lie in the field of colour. The course will consist partly of lectures on the chemistry of colour matters, the physical chemistry of absorption, photochemistry, colour physics and the chemistry of natural and synthetic polymers. The remainder of the course will be concerned with practical instruction and a research project. Applicants should normally possess a good Honours degree (or its equivalent) in chemistry or a related subject.

The course is accepted as suitable for the tenure of S.R.C. Advanced Course Studentships. Firms wishing to second members of their staff may reserve places for candidates to be named at a later date.

Applications and enquiries should be addressed to Professor I. O. Rattee, Department of Colour, Chemistry and Dyeing. The University, Leeds KS2 9PT.

[745-080 (1971) : 63]
The following two postgraduate courses leading to the M.Sc. degree by examination are available:
QUANTUM ELECTRONICS which includes quantum effects in solids, liquids and gases, magnetic resonance, masers and lasers, semiconductors, non-linear optics, coherent optics.
FUNDAMENTALS OF CERAMIC TECHNOLOGY (in conjunction with Chemistry Department and North Staffordshire Polytechnic) which includes solid state physics and chemistry, principles of ceramics, ceramic technology.
Both courses include practical exercises and a study project. These courses are recognised by the Science Research Council for the tenure of Advanced Course Studentships.
Application forms, brochure and further particulars including accommodation available, from the Registrar, The University, Keele, Staffs.

Postgraduate Courses with Finite Element Methods in Engineering Mechanics

Applications are invited from graduates in engineering, mathematics and physics for one year postgraduate courses leading to the degree of M.Sc. of the University of Wales. These courses are in the general field of ENGINEERING MECHANICS with emphasis on the use of FINITE ELEMENT METHODS and other ADVANCED NUMERICAL PROCESSES. It will be possible to specialise in three main branches of study: SOLID AND STRUCTURAL MECHANICS, FLUID MECHANICS; GEO MECHANICS.

The twelve month programme includes formal lecture courses and research work leading to the preparation of a dissertation. Excellent computing and laboratory facilities are available. The courses commence on October 1, 1971 and are recognised by the Science Research Council for studentships in advanced study and research.

Applications are also invited from those wishing to study for the degree of Ph.D. in the same general fields. Normally applicants for Ph.D. will be expected to have an M.Sc. degree or appropriate industrial experience.

Further details of the courses and information on fees and grants may be obtained from the following:
Professor of Civil Engineering, University College of Swansea, Singleton Park. Swansea Glam. SA2 8PP.

FELLOWSHIPS, GRANTS AND SCHOLARSHIPS

HANDLEY PAGE AWARD for Aeronautical Research

The Handley Page Award, administrated by the Royal Aeronautical Society, recognises Sir Frederick Handley Page’s many contributions to aviation. It will enable citizens of the British Commonwealth to undertake original work leading to advancement in aeronautics, with special reference to safety and reliability in air transportation. The total awards during any year may amount to about £2,000 and may be used to cover facilities, equipment, travelling and other expenses. Application should be made by May 31st 1971. Further particulars and forms of application may be obtained from the Secretary, Handley Page Award, Royal Aeronautical Society, 4 Hamilton Place, London, W1V 0BQ Telephone (01-499 3515)

[745-092 (1971) : 64]
SYMPOSIUM
ENVIRONMENTAL INFLUENCES ON REPRODUCTION
A one-day multi-disciplinary symposium, sponsored by Inveresk Research International, will be held at the Royal Society of Medicine, London on Monday 24th 1971. Topics to be covered include the effects of nutrition, drugs, smoking, radiation, pollution and social factors affecting the foetal and material environment.
Further information and registration forms from Dr. R. E. Lister, Inveresk Research International, Inveresk Gate, Musselburgh, Midlothian. Closing date for registration is 3rd May 1971.
[745-093 (1971) : 64]
APPOINTMENTS AND SITUATIONS VACANT

NATURE CONSERVANCY

EXPERIMENTAL OFFICERS

Applications are invited for the following posts in the Nature Conservancy.

A. Grouse Research Team, Banchory, Kincardineshire, Scotland.

To help with research being carried out by a team of scientists on the study of the nutrition and behaviour of red grouse and ptarmigan. The work involves rearing birds, studying their behaviour, collection of food samples in the field and analysis of data. (Reference P.512).

B. Range Ecology Group based initially at Edinburgh and subsequently at Banchory.

To assist with the research programme of a team working on Red Deer. Much of this work will be done at various places in the Highlands and periods will be spent away from home. A training in zoology is required and an interest in ecology and / or conservation problems in upland areas would be an advantage. (Reference P.490/1).

C. Pedology Section, Bangor. Caerns (2 posts).

To take part in research on soils, especially relating soil formation, classification, mineralogy and chemistry to environmental factors and on soil ecological relationships in areas of conservation importance throughout the UK. The work includes field and laboratory studies and involves liaison with other research groups and with the conservation branch of the Conservancy. For one post a background which includes earth sciences and for the other a background which includes chemistry would be preferred. A training or experience in soil science is very desirable. (Reference P 510)

Qualifications. GCE (or equivalent) in five subjects, two of which should be A level passes in scientific mathematical subjects. At age 22 or over, candidates are required to have a Pass degree HNC or equivalent qualification in an appropriate subject. A current driving licence is essential.

Assistant Experimental Officer (at least 18 and under 28 on 31 December 1971) £741 (age 18) - £1,316 (age 26) - £1,725 - £2,177 - scale under review.

Experimental Officer (at least 26 and under 31 on 31 December 1971) £1,725 - £2,177 - scale under review.

Initial appointment will be non-pensionable but the successful candidate can be considered for pensionable status after a period of service.

Application forms and future particulars from Establishment(s), Nature Conservancy, 19 Belgrave Square, London SW1X 8P, stating for which post you are applying and quoting the appropriate reference number.

Closing date: 7 June 1971.

[750-001 (1971) : 354]
AGRICULTURAL RESEARCH COUNCIL
Food Research Institute.

**Assistant Experimental Officer** or **Experimental Officer** required for work on the fungal flora of stored commodities. Qualifications: Over age 22 pass degree or H.N.C. in appropriate subject. Under 22 G.C.E. in 5 subjects including English Language at Ordinary Level and scientific subjects at Advanced level. Salary (under review) according to age and experience. A.E.O. on scale £741 to £1,578. Starting point according to age, maximum starting salary £1,311. E.O. £1,725 - £2,177. A supplement of 5 1/2 % is paid to members of the optional contributory superannuation scheme. Further particulars and application forms from Secretary, Food Research Institute, Colney Lane, Norwich, NOR 70F, quoting ref. 71/2.

[750-002 (1971) : 354]
The Central Research Laboratories of the TI Group are seeking an experienced man to initiate and build up a new section of activity dealing with engineering applications of plastics and fibre composites. The work will involve giving direct technical support to individual TI companies in the development of new or improved products using plastic materials and will necessitate consideration of basic design and strength requirements, techniques of manufacture and overall economic viability. We are looking primarily for a graduate with several years’ relevant industrial experience and with a good knowledge of plastics technology and of the physical properties of plastic materials and composites. Expertise on theoretical and experimental stress analysis, economic evaluations etc. is currently available in the Laboratories and the candidate will be able to draw on the support of these and other specialist functions.

This is a key post in a new and challenging field of activity and there is considerable development potential for a suitable applicant. The salary is envisaged initially as between £2,500 and £3,000 p.a. and would be subject to annual review. Assistance would be given with relocation expenses.

Application forms may be obtained on application to the Assistant Director:

THE UNIVERSITY OF SUSSEX
School of Biological Sciences

TECHNICIAN
Technician required to work in 3rd year teaching laboratory. Applicants should have sound knowledge of biochemical techniques. Preference will be given to those applicants who have previous teaching laboratory experience.
Qualifications: Final City & Guilds or Higher National Certificate.
Salary range: £1,041 - £1,410 per annum.
Applications (3 copies) to Laboratory Superintendent, School of Biological Sciences, the University of Sussex, Falmer, Brighton, BN1 9QG.
[750-004 (1971) : 354]
ASSISTANT EXPERIMENTAL OFFICER required by the Statistics Section of the National Vegetable Research Station, Wellesbourne, Warwick, to assist in the preparation of computer programs and to organise the flow of work to the computer. Degree in mathematics, statistics or computing, advantageous. Salary scale £741 (at 18) rising to £1,578 p.a., plus 5 ½ % superannuation allowance. Further information and application form (to be completed by 28th May 1971) obtainable from the Secretary.

[750-005 (1971) : 354]
Applications are invited from suitably qualified Graduates for the above post. The work will involve the estimation of steroid hormones in various biological systems. A knowledge of steroid chemistry, while helpful is not essential but the successful candidate will be expected to use the work for a Ph.D., M.Sc., thesis. Starting date negotiable. Applications, stating age, qualifications and experience, with the names of two referees should be sent to the undersigned, by 31st May, 1971. Further particulars on request.

William Hamilton, M.D., Royal Hospital for Sick Children. Yorkhill, Glasgow, C.3.
STUDENT OR JUNIOR TECHNICIAN required for research laboratory. Candidates must have ‘O’ level Maths and at least one Science subject. Previous experience not essential. Salary according to age from £616 plus £90 London Weighting per annum, at age 18. Applications in writing to The Secretary. University College Hospital Medical School, University Street, London, WC1 quoting Ref. MU/LW.

[750-007 (1971): 354]
Applications for appointment to two positions of *LECTURER OR SENIOR LECTURER* in the Department of Agronomy are invited from persons with interest and suitable qualifications in any of the following fields:

1. Agricultural Systems – with emphasis on crop / pasture productivity in relation to climatic factors.
2. Genetics / Plant Breeding – either with interest in quantitative genetics to develop a programme on breeding methodology in self-pollinated crops, or with an interest in studying physiological variability.
3. Ecology – with emphasis on weed ecology or crop / pasture ecology, e.g. physiological mechanisms of adaption.

The appointee will be expected to assume duty by January 1972 and to develop their teaching and research activities within the existing framework of the department, on which further information should be obtained from the Head, Professor W.R. Stern. The salary range for a Lecturer is $A6,697 - £A9,286 p.a. and for a Senior Lecturer $A9,540 - $A11,130 p.a. Benefits include superannuation similar to FSSU, fares to Perth for appointee and dependent families, removal allowance, study leave, subsidised temporary accommodation and housing loan scheme.

Applications in duplicate, giving full personal particulars, qualifications and experience, should reach the Registrar, University of Western Australia, Nedlands, Western Australia, 6009 by 19th June 1971.

Candidates should request three referees to write immediately to the Registrar.

Further information and conditions of appointment may be obtained from the Association of Commonwealth Universities (Appts.) 36, Gordon Square, London WC1H 0PF (Tel: 01-387 8572). [750-008 (1971) : 354]
LOUGHBOROUGH UNIVERSITY OF TECHNOLOGY

SENIOR ELECTRONICS TECHNICIAN

Noise and Vibration Instrumentation

Applications are invited for a permanent appointment as a Senior Technician to take charge of the new Acoustics Facility. The person appointed will be wholly responsible for the development and maintenance of Noise and Vibration Instrumentation, and previous experience with such instrumentation would be an advantage. A capability for independent data acquisition work would also be desirable.

In addition similar posts on 1 year renewable contracts may also be available.

Salary scales:
Technician: £1,041 - £1,410, Senior Technician: £1,398 - £1,707.
Chief Technician: £1,827 - £2,061 (+)

Starting salary according to qualifications and experience.

Applications to Professor D.J. Johns, Department of Transport Technology, University of Technology, Loughborough, Leics. LE11 3TU

[750-009 (1971) : 354]
A Scientist is required in the Highway Economics Unit located in Central London for work involving traffic engineering, transportation modelling and economic appraisal methods. This work will be concerned with the evaluation of complete new routes or improvements, which requires a complex analysis involving all three of these disciplines; other work planned includes the evaluation of junction design and the analysis of delays due to road works.

The Unit is a multidisciplinary team of scientists, economists and engineers. Its basic purpose is the application of economic methods to highway planning and practice, concerning construction, maintenance and other operational aspects of interurban roads.

Candidates should be qualified in Science, Engineering or Mathematics.

The successful candidate will be appointed within the Scientific Officer class. Age: normally under 32.

Application Forms are available from Establishment Personnel 4A, Room 8177, St. Christopher House, Southwark Street, London, S.E.1 or telephone 01 428 7999 ext. 3003.

[750-010 (1971) : 355]
Microbiological Research Establishment
Porton

Statistician
required to lead a small Statistics Section: to advise research workers in the Establishment on the design and execution of their experiments and to analyse their data; and occasionally to act as consultant to other Establishments on special problems in subjects ranging from Aeronautics to Pharmacology.
The successful candidate will be encouraged to undertake research into new methods for the statistical treatment of biological data and to devise mathematical models for the treatment of biological systems, such as the epidemic spread of infectious disease in terms of climate and ecology, in human and other host populations.
The Section has direct access to a digital computer and has its own peripheral equipment.
Candidates for this post, which is at Senior Scientific Officer level, should have a 1st or 2nd class Honours degree preferably in statistics, or in mathematics, including statistics. At least 3 years postgraduate experience is essential. Prospects of permanent pensionable appointment and of promotion. Age over 26 and normally under 32.
Application Forms from Miss Y. Molyneux, Ministry of Defence, Room 320, Lacon House, Theobalds Road, London, WC1X 8RG.
Please quote E39/5/F.
SCS
Qualifications and Salaries
For appointments to the Scientific Officer class you should have a 1st or 2nd class honours degree. Starting salaries, which will be dependent upon experience and age, are within the range £1,152 - £2,703 for the Scientific Officer class (£2,193 - £2,703 at Senior Officer level). Salary of post in London carries a supplement of £175.
[750-011 (1971) : 355]
LEE CONSERVANCY CATCHMENT BOARD

Deputy Protection of Water Officer

Applications are invited for the post of Deputy Protection of Water Officer from persons who are qualified scientists having technical knowledge of methods of waste water treatment, pollution prevention of rivers and water quality management.

The salary is within the range £3,714 per annum rising by four annual increments of £84 each to £4,050 per annum (70% of Protection of Water Officer’s salary range) together with motor car, travelling and subsistence allowances. The post is superannuable. The protection of Water Department and laboratory are in Cheshunt, Herts.

Further particulars together with an application form, can be obtained from the undersigned:
Protection of Water Officer, Lee Conservancy Catchment Board. The Grange, Crossbrook Street, Waltham Cross, Herts.

The closing date will be the 17th May 1971

[750-012 (1971) : 355]
STUDENT OR JUNIOR TECHNICIAN required for this well-known London Teaching Hospital, a student awaiting University entrance in the Autumn, or wanting a post for a year would be considered. Minimum requirements are 4 “O” levels including English, Mathematics and one Science subject. An allowance of £40 is payable for two “A” levels. Salary range: £537 at age 16 to £1,014 at age 25 and over, plus £90 p.a. London Allowance. Application to Miss A. Ogleys, Assistant Personnel Officer, University College Hospital, Gower Street, London. WCAE 6AU Tel. 387 8300 Ext. 382.

[750-013 (1971) : 355]
Applications are requested for the post of Deputy to the Head of the Cattle Blood Typing Service. In addition to providing a Blood Typing Service, the laboratory supports research on immunoglobulins and cell membrane structure in ruminant. Applicants should have a veterinary qualification and some post graduate experience in immunology would be an advantage. The post is subject to review in five years and carries a salary ranging from £2,007 -£3,088 depending to age, qualifications and experience. Salaries which are presently under review are subject to a 4 ½ % non pensionable addition to offset superannuation contribution under F.S.S.U. Applications with the names and addresses of two referees should be sent to the Secretary. ARC Animal Breeding Research Organisation. West Mains Road, Edinburgh RH9 3JQ.

WORKSHOP SUPERVISOR
required to take charge of the Mechanical Engineering Workshop, Birkbeck College, Malet Street, London WC1E 7HX.
A man is sought, not under 30 years of age, who has served an apprenticeship and obtained subsequent experience as a tool maker or instrument maker, preferably in a research prototype or similar workshop. Salary according to qualifications and experience, in one of two ranges £1,827 to £2,061 or £2,085 to £2,604 plus £125 p.a. London allowance. For full details apply to the Secretary, Birkbeck College, Malet Street, London WC1E 7HX.
[750-017 (1971) : 355]
HEAD TECHNICIAN
required as soon as possible for NEW LABORATORY BLOCK, at Victoria College, Jersey, Channel Islands.
A new science block of over 19,000 sq ft will be opened in the Autumn of 1971. There are seven laboratories, a project work area, a library darkrooms, greenhouse radioactivity room animal house, etc. The Head Technician will under the Head of Science, be responsible for all technical service, including supervision and training of the three assistant technicians servicing and construction of apparatus, technical instructions for pupils, performing project work.
Victoria College is a school with the age range 11 to 16.
Salary within the range £1,305 - £2,394 according to qualifications and experience. Rented accommodation is provided.
Application forms and details may be obtained from the Head of Science, Victoria College, Jersey C.I.
[750-018 (1971) : 355]
GRADUATE or someone of HNC Applied Biology or equivalent status required to assist investigations of the biochemistry of transmission processes in the central nervous system. The post offers experience in a wide range of neurochemical techniques. Experience of biochemistry is essential. Salary according to age, qualifications and experience in the range £1,206 to £1,548 p.a. Apply for application form giving brief details to Departmental Superintendent, Department of Biochemistry, Imperial College, London, S.W.7.
[750-019 (1971) : 355]
UNIVERSITY OF NEWCASTLE UPON TYNE
Wolfson Research Group
for
High-Strength Materials

SENIOR RESEARCH ASSOCIATESHIP,
RESEARCH ASSOCIATESHIPS AND STUDENTSHIPS

are available for work on high-strength metallic and non-metallic materials.
A new metal-strengthening mechanism based upon the formation of mixed substitutional interstitial
solute-atom clusters is being explored and applied to a variety of alloy systems in the Metallurgy
Department of the University of Newcastle upon Tyne. Generous support from the Wolfson Foundation
now enables this research to be extended and continued during the next five years. Complementary
Investigation of new ceramic materials is sponsored by Joseph Lucas Limited.

Three post-doctoral research associates and one senior research associate are required for work on (a)
ferrous materials (b) non-ferrous metallic materials and (c) the preparation and characterization of new
interstitial alloys. One post requires experience with mechanical testing and internal friction technique,
a second with electron microscopy and x-ray methods or field-ion microscopy and a third with gas-metal
interactions, high-temperature preparative techniques or diffusivity measurements.
The senior research associate will be expected to share in supervisory and administrative duties.
Starting salaries are in the range £1,491 x £138 - £1,767 for a research associate and £1,902 x £2.592
for a Senior research associate.

A limited number of post-graduate research studentships are also available under the same conditions
as for S.R.C awards.

All applications should be submitted as soon as possible to Professor K. H. Jack, Crystallography
Laboratory, The University, Newcastle upon Tyne, NE1 7RU.
[750-020 (1971) : 356]
IMPERIAL COLLEGE
POSTDOCTORAL RESEARCH ASSISTANTSHIP
available for a suitably qualified scientist with interests in the preparation and characterisation of some novel molecular sieve materials.
Commencing salary £1,491 plus £100 London Allowance (with FSSU benefits).
Applications, with curriculum vitae and names of two referees, to Dr. D. L. Trimm, Dept. of Chemical Engineering and Chemical Technology, Imperial College, London. S.W.7.
[750-021 (1971) : 356]
Applications are invited for the post of LECTURER in the above School, duties to commence 1 October 1971. Candidates should normally be experienced Honours Graduates. Salary in the range £1,491-£3,417 according to qualifications and experience. Further particulars from the Registrar to whom applications should be sent by 31 May 1971. Quote Ref.R.74/H.
THE EDINBURGH SCHOOL OF AGRICULTURE
(University of Edinburgh)

RESEARCH ASSISTANT
Applications are invited from suitably trained agriculture or biology graduates for a research assistantship, tenable for 3 years to participate in a study of the variation in certain aspects of the reproduction of the domestic fowl. The experimental programme will be carried out in collaboration with the A.R.C. Poultry Research Centre, Edinburgh. The successful applicant will be required to register for a higher degree. Salary on the scale £650 - £720 per annum plus superannuation benefits. Further particulars may be obtained by writing to The Secretary, The Edinburgh School of Agriculture, West Mains Road, Edinburgh, EH9 3JG.
[750-023 (1971) : 356]
The Water Research Association

**Corrosion Engineer**
To investigate the effects produced by changing water qualities on plumbing fittings in water distribution systems.
The person appointed must be capable of working on his own initiative as much of the work will involve periods away from base dealing with senior engineers and scientists. Experience of the water industry is not essential. Post No. 162

**Emission Spectrographer**
An experienced spectrographic analyst is required to set up an emission spectrographic laboratory for determining trace metals in water as part of the Association’s research programme on the re-use of river water.
The person appointed will be responsible for developing suitable analytical techniques of high sensitivity and for supervising the routine analysis of samples. In addition to the spectrographic interest the work should appeal to those with interests in water quality, pollution and geo-chemistry. Post No. 167
Salary according to age and experience but as a guide:
Post No. 162 - at age 25 £1,328 - £1,558 (with good degree) and at age 35 £1,958-£2,522 (with good degree)
Post No. 167 - in Experimental Officer Grade at age 25 £1,328 and at age 35 £1,958
The WRA is a Research Association grant aided by the Government. It is situated by the Thames, and is concerned with a wide variety of problems in the collection, storage, treatment and distribution of potable water.

WATER R.A.
Write or telephone for application forms, quoting relevant Post No. to:
The Water Research Association, Ferry Lane, Medmenham, Marlow. Bucks,

[750-024 (1971) : 356]
UNIVERSITY OF EDINBURGH  
DEPARTMENT OF ELECTRICAL ENGINEERING  
Vacancies will shortly occur in the following grades:

LECTURERS (2)  
RESEARCH FELLOWS (2)  
RESEARCH ASSISTANTS  
RESEARCH STUDENTS  

All applicants (preferably under 30 years of age) will be expected to have obtained a high class of honours in their first degree. Recent industrial experience is a desirable qualification for the Lectureships. Research interests should be in one of the following areas: Power Electronics, Digital Systems and Instrumentation, Lasers. The research posts are to support Professor J. H. Collings in a substantial industrially supported research programme in the field of acoustoelectronic integrated circuits and their applications to telecommunication systems.

Salary scales: Lecturers £1,491 - £3,417 per annum  
Research Fellows £1,491 - £2,040 per annum  
Research Assistants £1,273 – £1,629 per annum  
Research Students S.R.C Studentship rates  

Further particulars regarding the above posts and details of the Department and its work can be obtained from Professor W E. J. Farvis, Department of Electrical Engineering, King’s Building – Edinburgh, EH9 3JL (telephone 031-667 1011 Ext. 3260).

Letters of application giving age, full details of qualifications and relevant experience together with the names and addresses of two referees should be sent to the Secretary to the University, Old College, South Bridge. Edinburgh. EHB 9YL not later than 22nd May, 1971. Please quote reference 1026.  
[750-025 (1971) : 356]
SCHOOL OF PHYSICAL SCIENCES

LECTURESHIP IN PHYSICS

Applications are invited for the post of Lecturer in Physics. Preference will be given to candidates having experience either in
(1) The physical electronics of Solid State devices, or
(2) Some aspect of Biophysics.

Applications will also be considered from Solid State physicists interested in the properties of semiconductors, semi-insulators and surfaces.

Salary Scale (under review) with FSSU: £1,491 x 138 (2) x 135 (1) x 138 (5) x 135 (1) x 138 (5) - £3,417.

Further particulars may be obtained from
The Registrar
The New University of Ulster, Coleraine, Northern Ireland
to whom applications, together with the names and addresses of three referees should be sent not later than 30th May 1971 (quoting Ref: 77/144/56).

ULSTER: THE NEW UNIVERSITY
[750-026 (1971) : 356]
UNIVERSITY OF THE WEST INDIES - TRINIDAD

Applications are invited for the following posts in the Cocoa Research Unit (shortly to become the International Cocoa Research Centre):

(a) **SENIOR RESEARCH FELLOW/ RESEARCH FELLOW** (Plant Breeder)

(b) **SENIOR RESEARCH FELLOW/ RESEARCH FELLOW** (Plant Pathologist).

Previous experience with the crop, particularly for the plant breeder, would be desirable though not essential. The plant breeder will be required to continue the existing programme of breeding for yield and disease resistance in the crop. The plant pathologist will work on one or more aspects of the major diseases. Witches’ Broom and the Black Pod. Salary scales: Senior Research Fellow £2,700 - £4,200 p.a. Research Fellow £1,850 - £3,265 p.a. Child allowances, F.S.S.U. Family passages, triennial study leave. Detailed applications (6 copies) naming 3 referees by 19 May, 1971, by persons living in the Americas and Caribbean are to Secretary. University of the West Indies, St. Augustine Trinidad, and by all others to Inter-University Council. 90/91 Tottenham Court Road, London W1P 0DT. Further particulars obtainable similarly.

[750-027 (1971) : 356]
A.R.C. ANIMAL BREEDING RESEARCH ORGANISATION. **SCIENTIFIC OFFICER** or **SENIOR SCIENTIFIC OFFICER** required to collaborate on experimental studies of genetic variation in mineral metabolism and in production traits of ruminants. Candidates should have a good honours degree and preferably post graduate experience, in genetics or other relevant subject. Statistical and data handling experience desirable. Salary (under review): S.O. £1,162 - £1,982. S.S.O. £2,193 - £2,703. F.S.S.U. with compensatory allowance. Applications giving age, qualifications and experience and names of two referees to: The Secretary A.R.C. Animal Breeding Research Organisation. King’s Buildings, West Mains Road, Edinburgh EH9 3JQ. [750-028 (1971) : 356]
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry. For further details write or telephone: G.K. Bureau, 17 Shaftesbury Avenue, London. W.1. 01-734 7232. Interviews by appointment.
[750-029 (1971) : 356]
MACQUARIE UNIVERSITY
Sydney, Australia
Applications are invited for appointment as SENIOR LECTURER / LECTURER IN MATHEMATICS in the School of Mathematics and Physics. Applications will be welcome from those with specialist interests in Control Theory including applications. The successful applicant will be expected to teach courses in computing as well as a Control Theory Course. Control Theory is an integral part of the Diploma of Electronics programme and also part of the advanced Mathematics offerings. The salary for a Senior Lecturer will be within the range $A9,667 with 5 annual increments to $A11,130 per annum and for a Lecturer $A6,697 with 7 annual increments to $A0,286 per annum. Macquarie University occupies an attractive site in Sydney. Postgraduate teaching was commenced in 1966 and undergraduate teaching in 1967. Some 5,000 students are currently enrolled including approximately 580 postgraduate students. The organisation of the University provides considerable flexibility in the construction of degree courses for individual students and provides for interdisciplinary studies. Further information including advice regarding the method of application should be obtained from the Secretary General, Association of Commonwealth, Universities (Appts.) Gordon Square, London WC1H 0PF, or from the Registrar, Macquarie University, North Ryde, N.S.W. 2113 Australia. Applications close in Sydney and London on 24 June 1971.
[750-030 (1971) : 357]
Applications are invited from *graduates* with research experience in plant physiology to join a programme of work as Research Associates on the Physiology of Tropical Grain Legumes under controlled environment conditions. Appointment for three years at a salary in the range £1,000 to £1,900 depending upon qualifications and experience with F.S.S.U. membership. Starting date as soon as possible and not later than October 1st.

Further information may be obtained from Dr. A.P. Hughes, Plant Environment Laboratory, Shinfield Grange, Shinfield, Reading, Berks., to whom subsequent applications, with a curriculum vitae and the name of two referees should be sent.

[750-031 (1971) : 357]
NATIONAL INSTITUTE FOR MEDICAL RESEARCH

Technical Officer required for Laboratory for Leprosy and Mycobacterial Research. The person appointed will be required to use a range of Immunological Techniques, applicable to bacteria and the host, e.g. serological techniques, column separation, preparation and separation of various cell types. Candidates should have relevant degree or H.N.C. or equivalent. Permanent post, with initial salary according to age and experience on grade Junior Technical Officer £1,160 to £1,721 or Technical Officer £1,813 to £2,611. Please apply quoting our reference NS 97/1 to: Mr. J. H. Woodcock, Personnel Officer, National Institute for Medical Research, The Ridgway, Mill Hill, London NW7 1AA. Tel: 959 3666.

[750-032 (1971) : 357]
INDEXER required by A.R.C. Weed Research Organization to produce bi-monthly and annual indexes for the journal “Weed Abstracts” and operate a related information storage and retrieval system. Some experience of information work is necessary and a degree in a natural science would be an advantage. Salary according to age in scale £1,072 to £1,630. Optional contributory superannuation scheme in respect of which there is a non pensionable supplement of 5 ½ % of salary. For further particulars and application form write to Secretary, Weed Research Organization, Begbroke Hill, Yarnton, Oxford, OX5 1PF, quoting 8/71. Closing date for applications 3 May 1971.
[750-033 (1971) : 357]
G.D. Searle & Co. Ltd.
require
Patents Officer

This vacancy has arisen in the Information Department of the Searle group of companies, based in High Wycombe. The Company’s activities cover a wide range of medical and hospital supplies. A Patents Officer is required to administer our patent and licensing activities in conjunction with our patent agents. The appointment would be suitable for a graduate in biological sciences, preferably pharmacology or biochemistry. Experience of patent or information work or industrial research would be an advantage.
Salary will be negotiable depending upon qualifications and experience. Company benefits and conditions are excellent.

Please write giving brief details of career and education to:
The Personnel Manager,
G.D. Searle & Co. Ltd.,
Lane End Road,
High Wycombe,
Bucks.

SEARLE
Research in the Service of Mankind
[750-034 (1971) : 357]
Applications are invited for this post which is graded Senior Principal Scientific Officer (Salary scale £4,390 - £5,015; now under review).

The officer appointed will be responsible for three regional teams (46 staff) for 38 National Nature Reserves (over 185,000 acres) and 1600 Sites of Special Scientific Interest and for a wide range of planning and liaison activities with Universities, Government and voluntary bodies. These responsibilities will be reviewed in the near future and may also embrace the direction of research in terrestrial and freshwater ecology.

Candidates must be scientists of high standing and be experienced in directing a team of scientists.

The successful candidate will be based in Edinburgh for at least one year after which he may be transferred elsewhere in Scotland.

Superannuation arrangements.

Application forms and further particulars from the Natural Environment Research Council, 27/33 Charing Cross Road, London WC2 or telephone 01-930 9232 Ext 120 Quoting E2/7/184. Closing date 7 June 1971.
UNIVERSITY OF OXFORD
DEPARTMENT OF METALLURGY

Opportunities are available for research leading to the degree of D. Phil. in the Science of Materials and the Physics of Metals, including: Crystal Defects Mechanical Properties of Metals, Alloys, Polymers, Ceramics, Composites.
Solid State Transformations
Solidification of Metals and Alloys
Development and Application of new techniques of Transmission and Scanning Electron Microscopy, and X-ray Microscopy
Electron microscopy at 1 Million Volts
Theory of Electron Scattering and Image Contrast
Field Ion Microscopy, experiment and theory
Radiation Damage in Crystals
Defects and Electrical Properties of Semiconductors
Magnetic Properties and Microstructure
Band Theory of Metals

Candidates should possess a good Honours Degree in Metallurgy, Physics or Chemistry. A limited number of SRC and other grants are available for successful candidates. Applications and enquiries for further details should be sent as soon as possible to:
The Administrator, Department of Metallurgy, University of Oxford, Parks Road, Oxford OX1 3BH.
[750-036 (1971) : 357]
CITY OF BIRMINGHAM
COLLEGE OF EDUCATION
Westbourne Road, Edgbaston, Birmingham B15 3TN

LABORATORY TECHNICIAN
Applications are invited from suitable qualified or experienced persons for the post of Laboratory Technician in which Science Department, the duties of which would include participation in the servicing of the laboratories, the construction and maintenance of equipment and the care of plants and animals. Experience in the organisation and maintenance of biological Laboratories would be an advantage.
Salary Scale - £1,292 - £1,515 per annum, in accordance with the Technicians and Technical Staffs Grade T4.
Applications forms from the Bursar (V 8426)
[750-037 (1971) : 357]
CHELSEA COLLEGE OF SCIENCE AND TECHNOLOGY
(University of London)
LECTURER IN BIOPHARMACY – DEPARTMENT OF PHARMACY
The person appointed will be expected to teach and undertake research in the biochemical and kinetic aspects of drug metabolism and distribution, and to teach some of the physical aspects of Pharmacy. Applicants should have a higher degree and some teaching experience.
Salary Scale: £1,591 - £3,517 per annum.
Application forms, to be returned by 31st May 1971, and further particulars from the Secretary, Chelsea College, Manresa Road, London, SW3 6LX.
[750-038 (1971) : 357]
Science Editor required to assist in the preparation of a comprehensive technical reference book for school use overseas. A background of teaching science or engineering at elementary level is desirable, and preference would be given to candidates who have taught abroad. Some editorial or writing experience at this level is essential. The person appointed will be expected to undertake a contractual arrangement which would be reviewed after a minimum of 12 months.

Please write in detail to: Michael Neville, Personnel Manager, Oxford University Press, Ely House, 37 Dover Street, London W.1.

[750-039 (1971) : 357]
CITY OF LONDON POLYTECHNIC
SIR JOHN CASS SCHOOL OF SCIENCE AND TECHNOLOGY
Department of Biological Sciences

SENIOR TECHNICIAN

A vacancy exists for an experienced person (A.I.S.T. or H.N.C. standard) who will be required to cover a wide range of general preparative work for under-graduate and post-graduate students. Some experience of microbiology, virology, tissue culture or immunology would be an advantage.

Salary scale £1,491 - £1,884 per annum (inclusive London Allowance), starting point according to qualifications and experience.

Further particulars and an application form may be obtained from the Head of Department of Biological Sciences, Sir John Cass School of Science and Technology, 31 Jewry Street, London, EC3N 2EY, quoting ref. STI.

[750-040 (1971) : 358]
UNIVERSITY OF BIRMINGHAM
Department of Electronic & Electrical Engineering

**Senior Technician** required to work on a research programme concerned with the development of novel kinds of semiconductor microwave transit-time, devices. Excellent facilities are available for microelectronic device processing and for microwave measurements.

Candidates should possess at least H.N.C. but preferably H.N.D. or equivalent and have suitable experience in either integrated circuit technology or microwave measurements. Salary will be in the range £1,398 to £1,707 depending on age and experience. Ref: 169/B/715.

Apply: Assistant Secretary (Personnel), Personnel Office, University of Birmingham, P.O. Box 363, Birmingham B15 2TT. Closing date 14\(^{th}\) June 1971.

[750-041 (1971) : 358]
UNIVERSITY OF LONDON
CHAIR OF APPLIED BIOLOGY AT CHELSEA COLLEGE
The Senate invite applications for the Chair of Applied Biology tenable at Chelsea College of Science and Technology. Salary not less than £4,533 a year plus £100 London Allowance. Candidates should have had some experience of industrial biology. Applications (10 copies) must be received not later than 1 June 1971 by the Academic Registrar, University of London, Senate House, WC1E 7HU from whom further particulars may be obtained.
[750-042 (1971) : 358]
QUEEN MARY COLLEGE  
(University of London)  
DEPARTMENT OF ZOOLOGY AND COMPARATIVE PHYSIOLOGY  
Applications are invited for a **Temporary Lectureship**. For one year from 1 October 1971. Preference will be given to candidates with a special interest in oceanography or marine biology. Salary within scale £1,491 - £3,417 p.a. plus £100 London Allowance. Application forms obtainable from the Registrar, Queen Mary College, Mile End Road, London E1 4NS, to be returned not later than 1 June 1971.

[750-043 (1971) : 358]
ASSISTANT EXPERIMENTAL OFFICER
CER (Male) required for research in Plant Breeding, particularly on carrots. Degree or appropriate qualification in horticulture, agriculture, botany or a related subject. Appointment in grade A.E.O. (salary £741 at age 18, rising to £1,578), or exceptionally in grade E.O. (£1,725 - £2,177), plus 5 ½ % superannuation allowance. Further information and application form (to be completed by 22nd May 1971) from the Secretary, National Vegetable Research Station, Wellesbourne, Warwick.
[750-044 (1971) : 358]
INFORMATION OFFICER

A vacancy exists in the Drug Registration Department of Fisons Limited, Pharmaceutical Division for an Information Officer, to work in close conjunction with the scientific and commercial staff on the preparation of documentation for medicinal products intended for submission to Health Authorities throughout the world.

The vacancy would be of particular interest to a graduate in pharmacy or in one of the biological sciences. Experience in a similar position would ensure priority consideration, but we should also be glad to hear from other applicants including those about to graduate.

The Company is strongly research based and has already made notable contributions to world medicine.

We are a member of the Fisons Group, providing a first-class pension scheme, generous holidays and other welfare benefits which come from being part of a large internationally known British Group. Applications giving full details of age, qualifications and experience should be addressed to: The Research Personnel Assistant, Fisons Limited, Pharmaceutical Division, Bakewell Road, Loughborough, Lecs. Job reference No. 301R

FISON
[750-045 (1971) : 358]
AN FORAS FORBARTHA

ECOLOGIST

An Foras Forbartha, the national institute for physical planning and construction research in Ireland, is responsible for research and advisory services in the field of environmental ecology with special reference to the Local Government (Planning and Development) Act, 1963. There is a vacancy for a Research Officer (Ecologist) in the Planning Division. Applicants should possess an honours degree in agriculture, forestry, botany, zoology, geography or geology, with wide experience in conservation and ecology in a planning context. It is likely that the successful candidate will also have a post-graduate qualification in the field of ecology or conservation.

Duties of the Research Officer will include advisory, research and educational work in relation to the ecology and conservation of natural resources with special reference to the problems of local planning authorities.

The salary range for Research Officer is £2,690 to £3,325. Entry point on scale will depend upon qualifications and experience. A non-contributory superannuation scheme and contributory widows’ and orphans’ scheme will operate.

Application forms may be obtained from the Managing Director, An Foras Forbartha, St. Martins House, Waterloo Road, Dublin 4, Ireland. Telephone 64211. Latest date for receipt of completed application forms is 7 June 1971.

[750-046 (1971) : 358]
THE BRITISH COUNCIL BRAZIL
THE FEDERAL UNIVERSITY OF SANTA CATARINA. FLORIANOPOLIS requires a VISITING PROFESSOR IN ENGINE DESIGN as soon as possible. Candidates should have a Ph.D. in engineering from a university in Britain and experience in postgraduate teaching and supervision of research work. Membership of an engineering institution and a Knowledge of Portuguese would be an advantage.

Write quoting relevant reference number to Appointments Division. The British Council, 65 Davies Street, London W1Y 2AA for further particulars and application form to be returned completed as soon as possible.

[750-047 (1971) : 358]
WESTFIELD COLLEGE  
(University of London)  
PROGRAMMER  
Applications are invited for the post of Programmer to work on a Modular I Computer which is soon to replace the college 200 Terminal Link to the University of London CDC 6.600.  
Duties will include some systems programming and providing a service to users within the College.  
Applicants should have a degree or at least two years experience. A knowledge of Fortran would be useful.  
The post will be initially for one year but there is a possibility of it becoming a permanent post: salary up to £1,500 plus London Allowance.  
Application forms available from the Administrative Assistant, Westfield College (N.S). Kidderpore Avenue, Hampstead, N.W.3.  
[750-048 (1971) : 358]
UNIVERSITY OF OXFORD
Sir William Dunn School of Pathology

POST-DOCTORAL FELLOWSHIP
Applications are invited from biochemists or organic chemists to take part in investigations relating to the active centres of $\beta$-lactamase enzymes and similar problems. The appointment will normally be for three years and the person appointed will not be more than 28 years of age on October 1$\textsuperscript{st}$ 1971. The salary will be appropriate to age and experience and will include provision for F.S.S.U.

Applications, giving academic qualifications, details of research experience and names of two referees, should be sent to Professor E. P. Abraham, Sir William Dunn School of Pathology. South Parks Road, Oxford OX1 3RE.
[750-049 (1971) : 358]
MEDICAL RESEARCH COUNCIL

A Junior Technical Officer is required in the Division of Cytopathology for a responsible role in Electron Microscopical Research: covering the full range of biological preparative techniques, including freeze-etchings. Previous experience an advantage, but not essential. Good prospects. Initial salary range: £859 to £1,721 p.a. For further details apply now giving qualifications and quoting our reference NS 97/2 to: Mr. J. H. Woodcock, Personnel Officer. National Institute for Medical Research. The Ridgeway. Mill Hill, London NW7 1AA. Tel: 959 3666
[750-050 (1971) : 358]
RESEARCH DEMONSTRATOR required in the Department of Horticulture to assist with practical classes and carry out research in applied plant or crop physiology. Good degree in Horticulture or Botany essential. Person appointed can apply for registration for a higher degree. Salary £775 x £25 = £825 per annum. Applications to Professor P. A. Huxley, University of Reading, Horticultural Research Laboratories, Shinfield Grange, Reading RG2 9AD.

[750-051 (1971) : 359]
UNIVERSITY OF BRISTOL. Research Unit for Comparative Animal Respiration **Technician** required for project concerned with the ultrastructure of respiratory organs, which is supported by Research Council grants. Experience of ultramicrotomy and in the use of AEI 6G would be advantageous. Salary range £855 to £1,275 according to qualifications and experience. Applications in writing, giving names of two referees to Professor G. M. Hughes, Research Unit for Comparative Animal Respiration, University of Bristol, Woodland Road, Bristol, BS8 1UG by May 14th.

Vapour Phase Chromatography in Biochemistry
A short full-time course lasting three days
Tuesday 8th June to Thursday 10th June 1971 inclusive
The course is designed to cover current usage and modern advances in the theory and practice of vapour phase chromatography.
The following will be covered:
A Instrumentation, design and operation of vapour phase chromatographs and their limitations
B Theory and practice of vapour phase chromatography
C Materials will include sugars, steroids, fatty acids and amino acids
The course is suitable for postgraduate personnel and others who have had extensive laboratory experience in biochemical and relevant fields.
Visiting specialists will participate in this course
Further details may be obtained from the Secretary, Ref: BJ105
Department of Postgraduate Molecular Biology
North East London Polytechnic.

LOUGHBOROUGH UNIVERSITY OF TECHNOLOGY
RECENT DEVELOPMENTS IN PLASTICS
A one-week residential course from June 7-11, 1971 on recent developments in the provision and utilization of plastics.
The course, which will include demonstrations and lectures by industrial experts, is designed to assist scientists, industrial managers and technical representatives in keeping abreast with modern developments in plastics provision and use. Among subjects to be discussed will be newer plastics and recently available grades, structural foams, reinforced materials, composites, films, electroplating of plastics, and applications, e.g. in packaging, footwear and engineering.
Fee £44, inclusive of accommodation and all meals.
Enquiries and applications to Dr. R. R. Smith, Institute of Polymer Technology, Loughborough Leicestershire
[750-061 (1971) : 360]
Applications are invited for the Mark Brickhill Scholarship valued at between £300 and £700 per annum according to the studies followed. The award is available to students entering upon a course leading to either the degree of B.Sc. the Post-Graduate Diploma in Technical Science, or to the degrees of M.Sc. or Ph.D in Textile Technology and Textile Chemistry. Application Forms may be obtained from the Registrar, U.M.I.S.T., P.O. Box 88, Manchester, M60 1QD to whom they should be returned by 1st May, 1971.
Applications are invited for a Scottish Gas Board Research Fellowship tenable in the Gas Engineering section. The work will involve Research in gas engineering and the exact topic will be selected after discussion of preference with the successful candidate. The appointment will be for a maximum of three years. Forms of application may be obtained from the Secretary, Heriot-Watt University, Chambers Street, Edinburgh, EH1 1HX, with whom applications should be lodged by 15th May, 1971.

[750-063 (1971) : 360]
STUDENTSHIPS
UNIVERSITY OF NEWCASTLE UPON TYNE
DEPARTMENT OF GEOLOGY – ORGANIC GEOCHEMISTRY UNIT
Applications are invited for a N.E.R.C. POSTGRADUATE STUDENTSHIP IN ORGANIC GEOCHEMISTRY, tenable for 3 years from 1st October. 1971. Applicants should have, or expect to have, a 1st or upper 2nd class special honours degree in geology with subsidiary chemistry or in chemistry with subsidiary geology. Joint or general honours degrees at the same level in these subjects would be acceptable and students with qualifications in microbiology or biochemistry would also be considered.
The research unit is currently investigating the nature and distribution of organic matter in recent and fossil sediments, lipids of lower marine organisms, petroleum generation and occurrence, and the organic geochemistry of coals, using a wide range of chromatographic and spectroscopic techniques. Applications giving details of age, qualification and the names of two referees should be sent as soon as possible to Dr. D. G. Murchison, Organic Geochemistry Unit, Department of Geology The University, Porter Building, St. Thomas Street. Newcastle upon Tyne, NE1 7RU.
[750-064 (1971) : 360]
Applications are invited for a Ph.D. studentship offered by the S.R.C. under their scheme for “Co-operative Awards in Pure Science”. The research work will be concerned with various aspects of streptomycin biosynthesis and the recipient will be expected to spend a short period of time in the laboratories of the Industrial sponsor.

The value of the award is £550 per annum plus payment of approved fees and dependants and other allowances where appropriate.

Candidates should have a First or Upper Second Class Honours degree in Biochemistry or Chemistry.

Enquiries and applications from students in Great Britain, including those who expect to graduate this year (not residents in N. Ireland), should be sent as soon as possible with a curriculum vitae and the names of two referees to Dr. N. L. Blumsom, Department of Biochemistry, Medical Biology Centre, Queen’s University of Belfast, 97 Lisburn Road, Belfast, BT9 7BL.

[750-065 (1971) : 360]
UNIVERSITY OF LEEDS
DEPARTMENT OF MECHANICAL ENGINEERING
M.Sc. COURSES IN
1. Combustion and Explosion
2. Exploitation of Materials
3. Tribology

SHELL POSTGRADUATE STUDENTSHIPS
Shell International Petroleum Company Limited offers postgraduate studentships for each of the above M.Sc. Courses. The value of the award is £750 p.a. free of tax plus approved fees. Candidates should be graduates of UK, or Eire Universities and would be expected to seek a career in one of the Royal Dutch / Shell Group of Companies.

The course in Combustion and Explosion, given in collaboration with the Departments of Fuel and Combustion Science and of Physical Chemistry, consists of lectures on the fundamentals of the subject and their application to industry and to the different types of internal combustion engine.

The course in Exploitation of Materials is presented in collaboration with the Departments of Ceramics, Metallurgy and Physics and covers the full range of materials of construction, both metallic and non-metallic, with particular reference to their comparative properties, processing requirements and exploitation in engineering design applications.

The course in Tribology consists of lectures on the fundamentals of lubrication, friction and wear and their application to machine elements, with particular emphasis on bearing selection and design.

Individual experimental projects are an essential part of each course.

Applications, stating the course of interest, should be made before 24th May, 1971. to Dr. D. Bradley, Postgraduate Tutor, Department of Mechanical Engineering, The University, Leeds LS2 9JT.

[750-066 (1971) : 360]
UNIVERSITY OF STIRLING
Research Studentships in the TECHNOLOGICAL ECONOMICS of
ENERGY RUBBER MINERALS
If you can meet the S.R.C. terms and conditions for Research Studentships, are you interested in studying
for a Ph.D. in Technological Economics? Our interests now include research on energy, rubber and
minerals. Why not apply? Further enquiries and applications to:
The Assistant Secretary (PG)
University of Stirling
STIRLING, Scotland Quote ref: PTE/1/2
If you wish to telephone informally before applying, ring Mr. C. Sorrill on Stirling (0786) 3171,
extension 2108 during office hours.
[750-067 (1971) : 360]
UNIVERSITY OF SOUTHAMPTON
Department of Aeronautics and Astronautics
RESEARCH STUDENTSHIP IN HIGH TEMPERATURE TECHNOLOGY
Good class honours graduate (physical chemist, physicist or chemical engineer preferred) to investigate
titanium tetrachloride decomposition and oxidation using shock tube techniques. An interest in one or
more of spectroscopy, chemical kinetics, chemical thermodynamics and computational techniques will
be an advantage. The successful candidate will be expected to register for a higher degree and will be
given background training in gasdynamics and other related topics.
Applications giving brief personal and academic details, by the end of May 1971 to the
Academic Registrar, University of Southampton, SO9 5NH, quoting ref: N.S.
[750-068 (1971) : 360]
Applications are invited from candidates possessing a good Honours degree, or equivalent, in Chemistry, and from persons expecting to graduate in June, for two postgraduate studentships for work on the kinetics and mechanisms of oxidation processes involving metal complexes. These studentships are available through the S.R.C. C.A.P.S. Scheme and are subject to its standard conditions. Work will be carried out under the supervision of Dr. J. S. Littler in co-operation with I.C.I. Ltd., Heavy Organic Chemicals Division, and Johnson Matthey and Co. Ltd.

Applications giving the names of two referees should be made as soon as possible, and in any case before 30th June to Dr. J. S. Littler, School of Chemistry, Cantock’s Close, Bristol BS8 1TS.

[750-069 (1971) : 360]
STUDENTSHIPS
UNIVERSITY OF LEEDS
DEPARTMENT OF PHYSICS
POSTGRADUATE RESEARCH
A number of S.R.C. research studentships and similar grants are available in the following fields:
COSMIC RAY PHYSICS
LOW TEMPERATURE SOLID STATE PHYSICS
POLYMER PHYSICS
For further information write to Professor M. Ward, Department of Physics, University of Leeds, Leeds LS2 9JT
[754-001 (1971) : 598]
Applications are invited from students in the United Kingdom (including those who expect to graduate this year) for a Ph.D. studentship award offered by the Science Research Council under their scheme for “Co-operative Awards in Pure Science”. The research work will be concerned with an investigation of astronomical sources of polarised infra-red radiation. The recipient will be expected to spend a period of time in the industrial sponsor’s laboratories.

The value of the award is £550 p.a. plus payment of approved fees and dependants and other allowances where appropriate. The award is tenable for a period of three years. Candidates should have a first or upper second class degree in Astronomy, Applied Physics, or a related subject.

Details and applications form from Mr. J. C. D. Marah, The Hatfield Polytechnic Observatory, Bayfordbury, Near Hertford, Tel: Hertford 3067, to whom applications should be lodged by the 30th June, 1971. Quote ref: 528/NS.
UNIVERSITY OF BELFAST
Chemistry Department

RESEARCH STUDENTSHPIS

Applications are invited for a post-graduate C.A.P.S. studentship, available to students with British Nationality under the usual conditions of Science Research Council awards, for three years commencing on 1st October 1971. This is intended to allow a student to carry out research leading to a Ph.D. and will involve close contact with the Dyestuffs Division of Imperial Chemical Industries Ltd., including specified periods spent in their laboratories. The work involves studies of reactions of nitrenes with a view to new syntheses of nitrogen heterocycles. Applications should be sent to Dr. B. J. Walter, The Department of Organic Chemistry, David Keir Building, Belfast BT9 5AG.

[754-003 (1971) : 598]
ABERDEEN UNIVERSITY

Research studentship available for chemical study of T.P.S. in soil organic matter. Application forms, obtainable from the Soil Science Department, Aberdeen AB9 2UE. Tel: 40241, should be returned to Dr. J. Timley by June 21.

[754-004 (1971) : 598]
UNIVERSITY OF SOUTHAMPTON
Department of Botany
CO-OPERATIVE AWARD IN PURE SCIENCE
Applications are invited for an **S.R.C. S.A.C.S. Studentship** to study the translocation of Systemic Fungicides in collaboration with I.C.I. Ltd. Agricultural Division. The applicant must hold a First or Upper Second Class Honours degree in Botany and will be eligible to register for a higher degree. Applications, giving full particulars and names of two referees to reach the Deputy Secretary, The University, Southampton, SO9 5NH before 11th June 1971.
[754-005 (1971) : 598]
UNIVERSITY OF BRADFORD
Postgraduate School of Studies in Biological Sciences
Applications are invited for a Research Studentship to undertake research in one of the following fields: plant or animal biochemistry; microbiology; nematology. Candidates should have a good Honours Degree in an appropriate subject. Further particulars and application forms from the Registrar, University of Bradford, Yorkshire, BD7 1DP, quoting ref. RS/UB/LS/7/L.

[754-006 (1971) : 598]
THE UNIVERSITY OF ASTON IN BIRMINGHAM
DEPARTMENT OF BIOLOGICAL SCIENCES
A limited number of Studentships will be available in the above Department for research in the fields of microbiology, applied biochemistry, water pollution and animal physiology. Full particulars, together with the names and addresses of two referees, to be forwarded to: Head of Department of Biological Sciences, The University of Aston in Birmingham, Goose Green, Birmingham B4 7ET.

CONFERENCES
[754-008 (1971) : 598]
FELLOWSHIPS, GRANTS AND SCHOLARSHIPS

Fellowship at the IBM UK Scientific Centre

The IBM UK Scientific Centre is launching a Fellowship program for scientists, administrators and managers to work at the new Northern Research Park at Peterlee near Newcastle. This new centre is where IBM scientists are using computers to help investigate man’s environmental and management problems and explore solutions.

Research Areas
Fellows will be generally expected to work on some aspect or other of existing and planned Scientific Centre projects. These projects include many subjects within Computer Science, Information Systems, Management Science and Social Applications of computers. A detailed list of these projects will be sent to you on request; if you wish to pursue a project not listed you are invited to apply and discuss it further with members of the Scientific Centre. In addition, one or two Fellowships are available for exploring the present and future impact of computer technology on society.

The tenure of a Fellowship will be from three months up to one year in the first instance and may be renewable. The value of the Fellowship will vary but in any case will be competitive. Part-furnished accommodation in flat or house may be included as part of the arrangement.

You should be qualified in Ph.D, M.Sc., or M.BA. or have the equivalent experience. Also experience in using computers is essential.

If you are interested please write stating age, qualifications and experience together with a brief description of your particular interests, to Dr. C. J. Bell, IBM UK Scientific Centre, Peterlee, County Durham, quoting reference NS/90789. Or if you prefer, telephone Peterlee 3322 and reverse the charges.

LECTURES, MEETINGS AND COURSES

Electronics at The Open University
Catch up in your spare time by studying at home a new, introductory university course in Electromagnetics and Electronics which the Open University is offering in 1972. Accepted students each receive an oscilloscope, and other equipment, to augment tuition by text, tutor, TV and radio. Whilst applicants are expected to have a scientific or technical background, no formal qualifications are needed. Further information can be obtained by writing to
G.A.H. Kiloh,
The Open University
Walton Hall, Bletchley, Bucks.
[754-010 (1971) : 599]
DEPARTMENT OF CHEMISTRY
M.Sc. in Inorganic Macromolecules

This college offers a two or three year course of lectures and practical work held in the evenings only, leading to the degree of Master of Science of the Council for National Academic Awards.

Inorganic and semi-inorganic macromolecules will be studied in the context of inorganic and polymer chemistry. The course is intended for students possessing an Honours Degree in chemistry or an equivalent qualification.

Apply for further information to the Head of the Department of Chemistry.
[754-011 (1971) : 599]
THE POLYTECHNIC OF SOUTH BANK
M.Sc. Course in Applied Nuclear Physics
Full-time or Part-time
This is a modular course involving a basic lecture / laboratory course which is designed to cover the fundamental nuclear physics and the experimental techniques of radiation production, detection and measurement. The applications of nuclear techniques to various fields, e.g. activation analysis or medical physics and specialised techniques, e.g. accelerator design and nuclear electronics are covered in optional modules.
One-half of the course is devoted to an experimental project. Collaborative work with industry is encouraged and the project may be carried out in an external laboratory.
Full-time students complete the course in 12 months; part-time students may take a course extending over 2/3 years.
The Science Research Council has approved the course for the tenure of its Advanced Course Studentships.
Further details are available from The Secretary, Department of Physics, Polytechnic of the South Bank, Borough Road, London SE1. 01-928 8989 Ext. 360.
[754-012 (1971) : 599]
University of Reading
APPLIED AND MODERN OPTICS
M.Sc. Course
Studentships Available
This is a 1-year course for the M.Sc. degree by examination. The course may also be taken on a part-time basis.
The course is open to graduates in physics, mathematics or engineering. Students with recognised equivalent qualifications may also be admitted.
Opportunities also exist for research leading to the Ph.D. degree.
Further details may be obtained from
Prof. H.H. Hopkins,
Department of Applied Physical Sciences
The University, Whiteknights, Reading RG6 2AY.
[754-013 (1971) : 599]
APPOINTMENTS AND SITUATIONS VACANT

RESEARCH ASSISTANT, School of Physics Kingston Polytechnic. Applications invited from graduate or final year student to study certain aspects of oceanography under Dr. B. Ray. Will be expected to study for a higher degree. Details and application form from Appointments Officer, Kingston Polytechnic, Penrhyn Rd., Kingston, Surrey. [754-014 (1971) : 599]
Applications are invited for the following technical appointments

**BIOCHEMISTRY**

experienced **senior technician** to take charge of a teaching laboratory in a growing department.

**CHEMISTRY**

**senior electronics technician** with good general experience, preferably H.N.C. or equivalent qualification required to operate an electronics workshop. The man appointed will be concerned with the design and construction of new apparatus and the maintenance and repair of existing apparatus. Salaries on the scale £1,398 - £1,707 a year. Applications together with the names and addresses of two referees should be sent to the Personnel Officer by 30th June 1971.

[754-015 (1971) : 599]
UNIVERSITY OF ABERDEEN
THREE LECTURESHIPS IN BOTANY

Applications are invited for the following posts:

(i) Environmental Physics: Preference will be given to candidates with qualifications in physics and interests in micrometeorology or the application of physics to plant systems.

(ii) Ecology: Preference will be given to candidates with interests in either Root Studies or Ecosystem Modelling.

(iii) Morphogenesis: Preference will be given to candidates with interests in developmental anatomy.

Salary on scale - £1,491 - £3,417 with appropriate initial placing. Superannuation (F.S.S.U.) and removal allowance.

Further particulars from the Secretary, The University, Aberdeen, with whom applications (8 copies) should be lodged by 3rd July, 1971.

[754-016 (1971) : 599]
RESEARCH PHYSICIST
The Natural Rubber Producers Research Association is looking for a graduate Physicist to study the problems associated with friction and abrasion of rubber. The work involves both fundamental research and application of the results to tyre performance. Previous experience in the field not necessary. Minimum qualifications: 2nd Class Honours Degree in Physics or Applied Physics. Superannuation under F.S.S.U. Please apply to: The Director of Research, The Natural Rubber Producers Research Association, 56, Tewin Road, Welwyn Garden City, Herts.
[754-017 (1971) : 599]
Applications are invited for a post on the Scientific Officer or Senior Scientific Officer scales for research with the Director’s Group on the physiology of secretory epithelia. Minimum qualifications: First or second-class honours degree in physiology, biochemistry or zoology. Salary scales (under review) at present: S.O. £1,163 to £1,962; S.S.O. £2,193 to £2,703. In addition a non-pensionable allowance of 4 ¼ % of salary is payable to cover contributions to F.S.S.U. Apply with names of two referees to the Secretary of the Institute by 30th June 1971, quoting reference D.G.1.
SCIENTIFIC TYPIST required in S.W. London to work at home, from tapes (typewriter and “Stenorette” supplied). Mainly advanced organic chemistry. About 20 hours per week. Tel: 01-673 8976.

[754-019 (1971) : 599]
UNIVERSITY COLLEGE OF NORTH WALES BANGOR
Department of Marine Biology N.E.R.C. UNIT

Applications are invited for the post of Assistant Experimental Officer in the above Unit. The work of the Unit concerns the Biology of marine invertebrates in the first instance; the AEO will assist in the biochemical analysis of marine invertebrate larvae.

Qualifications:
Degree or equivalent in biochemistry, chemistry or biological subject. Experience in biochemical or clinical analytical techniques would be an advantage. For candidates under 22, minimum qualifications are two Scientific / Mathematical subjects at “A” Level.

Salary will be at a suitable point on the scale:
£741 - £1,578 per annum.

There is a Pension Scheme.

Further details can be obtained from the Secretary and Registrar, University College of North Wales, Bangor, to whom applications (two copies), giving details of age and education, together with the names and addresses of two referees, should be sent to reach him not later than 25th June, 1971.

[754-020 (1971) : 600]
BEDFORDSHIRE EDUCATION COMMITTEE

Qualified Laboratory Technician required at Queen Eleanor’s School for Girls, Langdale Road, Dunsante, Beds., to start duties either immediately or in September 1971. 38 hours per week. For suitably qualified and experienced person, salary in scale £1,089 to £1,272 per annum.

Applicants should possess the City and Guilds Science Laboratory Technician’s Certificate or an appropriate equivalent qualification for which an additional £30 per annum above the scale salary will be paid. Further payment of £20 per annum for possession of Advanced Certificate or equivalent alternative qualification.

Apply by letter to the Headmistress, Miss. C. M. Scott, at the school stating age, qualifications, experience and giving the names of two referees.

[754-021 (1971) : 600]
Surface Coating Development
Rentokil Laboratories Limited, specialists in timber protection, have a vacancy for a man aged 24-30 years. Applicants should have studied chemistry at least to first degree standard and practical experience in the formulation and development of surface coatings is desirable. The successful candidate will initially develop improved water repellent and fire retardant coatings, but will later be expected to contribute to other development projects and technical service. Enthusiasm and the ability to communicate are definite requirements. Application forms are available from: Secretary to Director of Research, Rentokil Laboratories Limited, Felcourt, East Grinstead, Sussex, Tel. E. Grinstead 23881.
[754-022 (1971) : 600]
INSTITUTE OF CANCER RESEARCH, ROYAL CANCER HOSPITAL, JUNIOR TECHNICAL OFFICER required at Pollards Wood Research Station, Chalfont St. Giles, Bucks., to assist with programme involving extraction and fractionation of nucleic acids and nucleo-proteins from animal sources. Techniques include use of ultracentrifuge, spectrophotometry and labelling with radioactive tracers. Candidates should have G.C.E. “A” level passes in Chemistry and Biology. Starting salary in region £950 p.a. according to age and qualifications on scale extending to £1,631. Apply with names of 2 referees to the Secretary, 34 Summer Place, SW7 3NU quoting reference 301/B/427.

[754-023 (1971) : 600]
RESEARCH ASSISTANT to work on laboratory aspects of cell-mediated immunity. Commencing salary in the region of £1,400 per annum. Applications to the General Secretary, Kennedy Institute of Rheumatology, Hammersmith, London, W5 7DW.

[754-024 (1971) : 600]
British Antarctic Survey  
Zoologist  
Salary Scale £2,820 - £3,902 (now under review)

A Zoologist (Principal Scientific Officer grade) with ecological, physiological or oceanological interests is required to lead a team working on marine ecosystems in the Life Sciences Division of the British Antarctic Survey which is at present based at Monks Wood Experimental Station, Abbots Ripton, Huntingdon but the intention is to base the Division at Cambridge. The biological research programme carried out by the Division are concerned with the study of the terrestrial freshwater and marine ecosystems of the Antarctic and with adaptations of the organisms to the environment.

Although based in the United Kingdom, the successful applicant would be expected to make periodic visits to the Antarctic to supervise the work of young scientists in Field Stations. These can involve a 3 – 4 month field trip every 2 – 3 years. The supervision would also extend to the work of the scientists when they return to the United Kingdom and are engaged in preparing the results of their work for publication.

Candidates should be at least 31 years of age. Pension arrangements.

Application forms and further particulars from:  
Establishment Officer,  
Natural Environment Research Council,  
Alhambra House,  
27-33 Charing Cross Road,  
London W.C.2,  
or telephone 01-930 9232 Ext. 120  
quoting reference E2/10/7.  
Closing date for formal applications: 5th July, 1971.

NATURAL ENVIRONMENT RESEARCH COUNCIL  
[754-025 (1971) : 600]
THE CITY UNIVERSITY
ST. JOHN STREET
LONDON EC1V 4PB
Department of Mechanical Engineering

RESEARCH ASSISTANT
Creep of Metals
Applications are invited from holders of an honours degree in engineering to join a research group working on a sponsored project concerned with Strength of Metals at high temperatures. The salary will be within the range £1,200 to £1,400 or higher in the case of an exceptionally well qualified applicant. Applicants should write giving details of qualifications and experience to Professor J. C. Levy, Head of Department of Mechanical Engineering, at the above address, from whom further details are available.

[754-026 (1971) : 600]
NATIONAL VEGETABLE RESEARCH STATION

ASSISTANT EXPERIMENTAL OFFICER / EXPERIMENTAL OFFICER (Male) required to assist in research on the development and improvement of methods of pest control with conventional pesticides. Degree or other appropriate qualification in horticulture, agriculture, zoology, or related subject is desirable. Appointment in grade A.E.O. salary £741 at age 18, rising to £1,578, or in grade E.O. (£1,725 - £2,177), plus 5½ per cent superannuation allowance. Further information and application form (to be completed by 18th June 1971) from the Secretary, National Vegetable Research Station, Wellesbourne, Warwick.

[754-027 (1971) : 600]
Applications are invited for the post of Chief Cardiological Technician in the Cardiovascular Unit. The Unit is involved in a diagnostic service to the Departments of Thoracic Surgery, Cardiology and Medicine, and in research into Cardiovascular problems both basic and applied. The laboratory maintains a busy electrocardiographic and phonocardiographic service, within the hospital in addition to providing for measurement of intravascular and intra-cardiac blood pressure, blood gas analysis, angiocardiography, dye dilution techniques, etc. Knowledge of all the techniques involved is not essential – training within the unit will be given. Experience in a similar laboratory would be an advantage. Salary scale £1,266 - £1,674. Applications to the Secretary to the Board, Leeds General Infirmary, Great George Street, Leeds, LS1 3EK, stating age and experience.
MEDICAL RESEARCH COUNCIL

JUNIOR TECHNICAL OFFICER required at our Hampstead Laboratories, London, N.W.3, to assist scientist in research on the physiology of exercise and athletics. Suitable for candidates with experience of biochemical techniques and able to prepare diagrams. Qualifications to include two scientific “A” levels including Chemistry, H.N.C. or relevant degree. Salary depending on age and qualifications on scale £859 to £1,721 p.a. Please apply quoting our reference ND 101/4 to: Mr. J. H. Woodcock, Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London, NW7 1AA. Telephone: 959 3666.

[754-029 (1971) : 600]
Applications are invited for three posts of Careers Officer within the service (two new posts and one replacement). Duties include assisting students in all years of study to plan their future careers and to obtain suitable posts.

Candidates should be over 30 years of age and have a university degree with either technical or non-technical background and experience in more than one field of graduate employment. For one post engineering experience is necessary. The initial appointments will be made within the salary range of £2,454 to £2,727. There are expectations of moving to a maximum of £3,417.

Applications, giving full details and names of three referees, as soon as possible but not later than the 15th June, to the Assistant Secretary, Personnel, University of Birmingham, P.O. Box 363, Birmingham B15 2TT. Ref. 706/A/741.

[754-030 (1971) : 600]
UNIVERSITY MARINE BIOLOGICAL STATION MILLPORT
ISLE of CUMBRAE SCOTLAND

The re-organised Station, controlled by the Universities of London and Glasgow, conducts Courses and offers research facilities in marine biology. Applications are invited for appointment to the post of Lecturer / Senior Lecturer w.e.f. October 1971. Applicants will be required to teach Field Courses, supervise post-graduate students, and to undertake research in marine biology.

Salary: Lecturer: £1,491 to £3,417
Senior Lecturer: £2,321 to £4,401

Full particulars may be obtained from the Director.

Applications (5 copies), naming 3 referees, should be received by the Director not later than June 30th 1971.

[754-031 (1971) : 600]
INSTITUTE OF CHILD HEALTH
DEPARTMENT OF IMMUNOLOGY
The following are required for work in IgE antibody studies as applied to childhood allergy, on a grant-supported research project.

1. **Graduate Research Assistant** – appointment on N.H.S. Hospital Biochemist scale. (Degree in immunology-related sciences, permitting registration for Ph.D.)

2. **Student / Junior Technician** – terms of service similar to Whitley scale.

Applications to Professor J. F. Soothill, Department of Immunology, Institute of Child Health, 30 Guildford Street, London WC1N 1EH.

[754-032 (1971) : 600]
Honours Science Graduate with practical experience in microbiology wanted for a vacancy in the Dissentery Reference Laboratory at Colindale. Experience in identification methods, taxonomic techniques of phage typing and drug resistance work an advantage. Initiative, adaptability and common sense imperative. Starting salary, in accordance with age and experience. Applications with full curriculum vitae and names of two referees to the Personnel Officer (telephone 01-205 7041) at the above address.
JUNIOR TECHNICAL OFFICER required to assist Scientist in the Division of Immunology. Qualifications: two scientific G.C.E. “A” levels (preferably to include Zoology), or scientific degree. Applicants should either have had experience in Histology or be prepared to take a course in this subject. Salary dependent on age and qualifications in range £859 - £1,721. Please apply quoting our reference: NS 101/5 to Mr. J. H. Woodcock, Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA. Tel: 959 3666.

[754-034 (1971) : 600]
Fire Research Station

**Mechanical Engineer / Physicist**

required in the Extinguishing Materials and Equipment Section which deals with all aspects of the extinction of fire and covers research and development work on materials, methods, equipment, and standardisation. The successful candidate would join a small team engaged in testing and evaluating the performance of automatic sprinklers, alarm valves, pumps, exhausters, accelerators, etc. The work will involve testing equipment, writing reports and assisting in the development and improvement of test procedures for use in future international standards.

The successful candidate will be appointed as an Assistant Experimental Officer.

Application forms from the Director, Fire Research Station, Melrose Avenue, Boreham Wood, Herts. Please quote EB/576/E.

[754-035 (1971) : 601]
British Museum (Natural History)

**Palynologist**

required in the Department of Botany to work on recent pollen. The Museum plans to build up a Palynological Section covering both recent and fossil pollens and spores.

The Palynologist will initiate and build up a world wide reference collection of pollen and spores, and develop methods of preparing reference specimens. The work will also involve research on aspects of recent palynology, depending upon the interests of the successful candidate.

Transmission and scanning electron microscopes are available. Computer facilities can be arranged.

The successful candidate will be appointed within the Scientific Officer class. Non-contributory pension and prospects of promotion.

Application forms from Civil Service Commission, Alencon Link, Basingstoke, Hants., or telephone Basingstoke 29222 ext. 500 or London 01-839 1696 (24 hour “Ansafone” service). Please quote S52-53/CAF.

Closing date: 28th June 1971.

[754-036 (1971) : 601]
UNIVERSITY OF LIVERPOOL
Applications are invited for the post of Research Assistant in the Cytogenetics Unit of the Nuffield Unit of Medical Genetics. The work will be associated with a programme in human cancer research. The field of study will depend primarily on the interests of the person appointed. Initial salary will be within the range £1,200 - £1,518 per annum, according to qualifications and experience.
Applications, stating age, academic qualifications and experience, together with the names of two referees, should be received not later than 30th June, 1971, by the Registrar, The University, P.O. Box 147, Liverpool, L69 3BX. Quote Ref. RV/7508/NS.
[754-037 (1971) : 601]
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry. For further details write or telephone: G.K. Bureau, 17 Shaftesbury Avenue, London. W.1. 01-734 7232. Interviews by appointment.
[754-038 (1971) : 601]
Applications invited for a post-doctoral Research Fellowship, tenable from October 1971 for 2 years. The research, in collaboration with Dr. M. A. A. Clyne, consists of studies of the mechanisms and rates of rapid gas phase reactions of atoms and small radicals using vacuum ultraviolet resonance spectrometry and mass spectrometry.

Salary scale £1,491 x £138 - £1,767 p.a. plus £100 London Allowance.

Appointments to the Registrar (MAAC), Queen Mary College, 327 Mile End Road, London E1 4NS.

[754-039 (1971) : 601]
THE CLARENDON PRESS
has an immediate vacancy for a Science Editor for college textbooks. Age 25 – 35 preferred. Salary according to age and experience. Applications, to include brief curriculum vitae and names of two referees, to The Secretary, The Clarendon Press, Oxford, by 28 June.
[754-040 (1971) : 601]
Ministry of Agriculture, Fisheries and food
Fisheries Laboratory, Burnham on Crouch, Essex

**Biologist**
up to £3,902
required to lead a team engaged upon a variety of shellfish population studies. These studies provide advice on the rational exploitation of stocks of shellfish and crustacean shellfish in England and Wales. The successful candidate will be expected to supervise and progress studies already in hand and to initiate a line of research. The appointment is initially for a period of three years, and will entail travelling and periods of work at sea.

Candidates should have a good honours degree in biology, with suitable post-graduate experience, and be over 31. Familiarity with statistical methods and techniques of population assessment is highly desirable. The successful candidate will be appointed as a Principal Scientific Officer, £2,820 - £3,902.

Application Forms from Mr. W. Taplin, Ministry of Agriculture, Fisheries and Food, Room 619, Great Westminster House, Horseferry Road, London SW1.
Closing date: 28th June.
Please quote S17F.

[754-041 (1971) : 601]
Department of Agriculture and Fisheries for Scotland
Freshwater Fisheries Laboratory

**Biologist**

required to take day-to-day charge of a salmon smolt rearing unit which is being established at
ALMONDBANK NEAR PERTH. The successful candidate will be required to live in or near
Almondbank. Applicants should have a degree or HNC in an appropriate subject. Previous experience
of hatchery and rearing work would be an advantage but is not essential.
The successful candidate will be appointed as either Experimental Officer or Assistant Experimental
Officer. Application Forms from Scottish Office Establishment Division, Room 171, St Andrew’s
House, Edinburgh, EH1 3BX.
Please quote SOED/27/71/F
Closing date: 28th June 1971.

SCS
Qualifications, Salaries and Age Limits
For appointment to the Scientific Officer class you should have a 1st or 2nd class honours degree; and for
the Experimental Officer class, a degree, HNC or equivalent. Starting salaries, which will be dependent
upon experience and age, are within a range £1,162 - £2,703 for the Scientific Officer level, and £1,020
- £2,177 for the Scientific Officer class, £2,193 - £2,703 at Senior Officer level, and £1,020 - £2,177 for
the Experimental Officer class. Salaries of posts in London carry a supplement of £175 in Inner London
and £90 in Outer London.
Age limits: SSO and EO at least 26 and normally under 32, SO under 29 and AEO under 28.
[754-042 (1971) : 601]
SENIOR LABORATORY TECHNICIAN required at Wandsworth School (ILEA), Sutherland Grove, S.W.18, to take charge of a large department. 36 hour week. £1,368 to £1,677 plus £75 London Weighting. Holders of C.G.I. science laboratory technician’s advanced certificate, or recognised equivalent, £1,449 to £1,758 plus £75 London Weighting. Forms, returnable within 14 days, from the Secretary.
[754-043 (1971) : 601]
MEDICAL RESEARCH COUNCIL unit requires **physicist** to work in a small group using polarographic tracer and optical techniques to study problems of oxygenation and blood supply in tumours. Salary according to qualifications and experience. Apply to the Director, Medical Research Council Experimental Radiopathology Unit, Hammersmith Hospital, London, W12 0HS.

[754-044 (1971) : 601]
UNIVERSITY COLLEGE OF NORTH WALES (Bangor)
ELECTRONIC ENGINEERING SCIENCE

Applications are invited for the Post of Lecturer in Control Engineering within the above School.
Candidates should preferably have research experience in electrical machines, one or more branches of control theory or system identification. The successful candidate, in addition to undergraduate teaching, will have the opportunity to participate in research and postgraduate teaching within the Inter-University Institute of Engineering Control which comprises the School of Engineering of Bangor, Sussex University and Warwick University.
Salary will be on the scale £1,491 - £3,147.
Further particulars of this post may be obtained from the Secretary and Registrar, and applications (2 copies), giving details of age, qualifications and experience together with the names and addresses of three referees, should be sent to reach the Secretary and Registrar by 20th June 1971.
[754-045 (1971) : 602]
SENIOR TECHNICIAN
Applications are invited for the post of Senior Technician in the Department of Pharmacy. Candidates should have experience in Physical Chemistry Laboratories. The position includes responsibility for both research and teaching Laboratories and a knowledge of electronics and – or instrumentation would be an advantage.
Salary will be in accordance with the Scale Technician Grade £1,366 - £1,677 per annum with supplementary payments up to £81 per annum if approved qualifications held. Application forms from the Staff Officer, The University of Aston in Birmingham, Goose Green, Birmingham B4 7ET quoting reference L590/S.
[754-046 (1971) : 602]
Applications invited for this post, to work on Upper Carboniferous non-marine faunas of Britain and the U.S.A. (including some zoological work on certain recent bivalve species) and to undertake Ph.D. work after two or three years this work to be concerned primarily with Pennsylvania non-marine faunas and stratigraphy. Appointment for one year initially, but renewable. Net salary after tax approximately £550 p.a. Further particulars and application forms (returnable by July 8th) from the Registrar, The University, Manchester, M13 9PL. quote ref: 110/71/NSe.

[754-047 (1971) : 602]
NATIONAL INSTITUTE FOR MEDICAL RESEARCH

Technical Officer required for Laboratory for Leprosy and Mycobacterial Research. The person appointed will be required to use a range of Immunological Techniques, applicable to bacteria and the host, e.g. serological techniques, column separation, preparation and separation of various cell types. Candidates should have relevant degree or H.N.C. or equivalent. Permanent post, with initial salary according to age and experience, on grade Junior Technical Officer £1,300 to £1,721, or Technical Officer £1,823 to £2,611. Please apply quoting our reference NS 101/3 to Mr. J. H. Woodcock, Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA. Tel: 959 3666.

[754-048 (1971) : 602]
metallurgist information assistant

International Nickel Limited require a young Metallurgist to join the Technical Information Section at their Office as an Information Assistant. This Section provides a comprehensive Information Service to the Company’s Technical and Research Departments. The Information System, which is computerised, is being actively developed.

The duties of the Information Assistant will be primarily to act as a link between users and the computer data bank, and also to abstract and index metallurgical literature.

Applicants, preferably under 30, should have a degree (or equivalent) in Metallurgy. Knowledge of a European language would be an asset.

Applications, in writing, giving brief details of qualifications and experience, should be made to:
The Personnel Administrator,
INTERNATIONAL NICKEL
[754-049 (1971) : 602]
FORESTRY REMOTE SENSING AND AERIAL PHOTOGRAPHY SPECIALIST
FIRE PHYSICAL CHEMIST
DEPARTMENT OF FISHERIES AND FORESTRY
OTTAWA, CANADA

The Canadian Forestry Service requires doctorate graduates or equivalent for the following positions:

FORESTRY REMOTE SENSING AND AERIAL PHOTOGRAPHY SPECIALIST
Reference 71-110-20
Scientist to undertake research and development work in remote sensing and air photography procedures related to forestry projects. The incumbent will select problems and assume the major responsibility for completing the assignments, either as independent projects or as significant elements of a group program. Field work, direction of photo-interpretation and ability to use photo-grammetric equipment, multi-brand cameras and image enhancement techniques is required.

FIRE PHYSICAL CHEMIST
Reference 71-110-21
Scientist to conduct a field and laboratory program pertaining to the chemistry of forest fuels, the chemistry and effects of fire retardant and suppressant agents: the physics of ignition, flame propagation and heat emission of forest fires, and to develop a fire model theory.

Send a detailed résumé to Public Service of Canada
BIO-PHYSICAL SCIENCES PROGRAM
PUBLIC SERVICE COMMISSION OF CANADA,
OTTAWA ONTARIO
Canadian citizens have statutory preference for appointment.
PLEASE QUOTE THE RELEVANT REFERENCE NUMBER ON ALL RESUMES AND CORRESPONDENCE.
[754-050 (1971) : 602]
Applications are invited for the following post, duties to commence 1 September 1971, or as soon as possible thereafter.

**SENIOR LECTURER IN MICROBIOLOGY**

A Senior Lecturer in Microbiology required to teach on HNC in Applied Biology and HNC in Medical Laboratory Scheme courses, and to be responsible for post HNC development in Microbiology. Applicants should have an honours degree or equivalent, preferably with a post-graduate qualification and/or relevant industrial experience, and teaching experience.

Salary Scale: Senior Lecturer £2,537 - £2,872.

Further details and application forms (to be returned by 18 June 1971) from Central Personnel Officer, Bristol Polytechnic, Ashley Down, Bristol BS7 9BU.

Please quote Post Reference Number L/12/32/2 in all communications.
RESEARCH ASSISTANT
Palaeoecology Laboratory
Applications are invited for the post of research assistant in the Palaeoecology Laboratory from graduates with some biological training and interests in one or more of the following fields: biology, chemistry, geography or archaeology. Work will initially be on pollen analysis of post-glacial deposits and archaeological sites, and preparation of samples for C-14 dating. Applicants should be able to resist with heavy field-work.
The appointment will be for one year from 1 October, 1971, but may be renewed, and the salary in the range £780 - £1,248 per annum will be commensurate with age and qualifications.
Applications, together with the names of two referees, should be sent to Dr. A. G. Smith, Palaeoecology Laboratory, The Queen’s University, Belfast, BT7 1NN, Northern Ireland by 31 July, 1971.
[754-052 (1971) : 602]
Applications are invited for the second chair in the Department of Engineering (courses started in 1969). There is no restriction as to field, but there is less likelihood of a mechanical engineer being chosen. The person appointed will be required to help in developing undergraduate courses (which are on novel lines) and establishing postgraduate activities. A wide range of experience would be welcome, particularly if it includes substantial knowledge of industry.

Further particulars may be obtained (quoting reference L595/F) from the Deputy Secretary and Establishment Officer, University House, Bellrigg, Lancaster to whom applications (nine copies) naming three referents should be sent not later than 27 July 1971.
UNIVERSITY OF MANCHESTER
LECTURER IN PSYCHOLOGY
Applications invited for this post from those with (preferably) a good Honours degree in Psychology and experience in the use of computers; duties to include teaching and principles of computing to psychology students. The Department has its own on-line computing system (Modular Office) and access to the University computing facilities. Salary range per annum £1,409 - £3,417 F.S.S.U. Particulars and application forms (returnable by June 30th) from the Registrar, The University, Manchester, M13 9PL. Quote ref: 168/71/NSc.
[754-054 (1971) : 602]
UNIVERSITY OF GLASGOW
RESEARCH FELLOWSHIP
Department of Aeronautics and Fluid Mechanics
Applications are invited for a Research Fellowship in the Department of Aeronautics and Fluid Mechanics to form part of a small team working on Alleviation of Leading Edge Beating under a Ministry of Defence (Aviation Supply) Research Agreement. An interest in either the assessment of heat transfer from boundary layers at high speeds, or in thermal buckling would be required. The salary would be within the range £1,491 to £2,040 per annum and appointment will be for one year in the first instance.
Applications, giving details of experience and qualifications, should be sent to Professor T. R. F. Nonwetler, Department of Aeronautics and Fluid Mechanics, James Watt Engineering Laboratories, The University of Glasgow, Glasgow W.2. not later than 14th July 1971 and in reply please quote Ref. No. 5038N.
[754-055 (1971) : 603]
UNIVERSITY OF BRITISH COLUMBIA  
Department of Chemistry

GRADUATE TEACHING ASSISTANTSHIPS
Graduate Teaching Assistantships are available for candidates with high academic records who wish to pursue further studies towards the Ph.D. in Chemistry. Excellent research facilities are available in all areas of modern Chemical Science, ranging from Bio-Organic Chemistry to Chemical Physics. Stipends $3,760 (minimum) per annum.
Application forms and further particulars may be obtained from the undersigned
Professor C.A. McDowell  
Department of Chemistry  
University of British Columbia  
Vancouver 8, British Columbia  
Canada  
[754-056 (1971) : 603]
Applications are invited for the post of **TUTORIAL STUDENT** in CHEMISTRY, tenable from 1 October 1971. Candidates should have or expect to have a good honours degree and will be expected to engage in research leading to a higher degree and to perform certain limited teaching duties. The value of the Studentship is at present £650 p.a.

Application forms and conditions of appointment may be obtained from the Registrar, King’s College, London, Strand, LONDON WC2R 2LS and should be returned to him by 15th June 1971.

[754-057 (1971) : 603]
Applications are invited for a post as **TUTOR in GEOLOGY** tenable from 1st October 1971, principally to direct the studies of Second Year Honours Students and assist with field work. Ample opportunities will be given for research.

Salary within the range £1,200 - £1,332.

Application forms quoting ref. G.T.3 are obtainable from the Registrar, to whom they should be returned by 15th June, 1971.

[754-058 (1971) : 603]
NATIONAL INSTITUTE FOR MEDICAL RESEARCH

Junior Technical Officer with experience in biochemistry to work on the structure and biosynthesis of plasmin membranes, required in our Division of Chemistry. Candidates should have relevant degree or H.N.C. or equivalent. Salary according to age and experience on scale £859 to £1,721 p.a. Please apply quoting our reference NS 101/6 to Mr. J. H. Woodcock, Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA. Tel: 959 3666.

[754-059 (1971) : 603]
RESEARCH IMMUNOLOGY DEPARTMENT requires Junior Technician for studies of nucleoprotein synthesis in antibody producing cells in tissue culture. Experience in these fields an advantage, but not essential. Apply in writing to Secretary, St Mary’s Hospital Medical School, Paddington W.3.

[754-060 (1971) : 603]
GENERAL: The Tobacco Research Institute at Mareeba is a unit of the Division of Land Research of the Commonwealth Scientific and Industrial Research Organization, and is located 40 miles inland from Cairns, North Queensland, in the centre of a district in which tobacco growing under irrigation has expanded rapidly in recent years. Work at the Institute includes physiological, nutritional, and agronomic studies to determine factors responsible for the yield and quality of the cured tobacco leaf. The Institute has excellent facilities for laboratory and field research, including well-equipped laboratories, glasshouses, library and experiment station. In addition, it has strong links with the headquarters of the Division in Canberra A.C.T. which is engaged in several fields of crop research. Secondary education is available, and housing will be provided at a nominal rental in the case of married male appointee. Applicants are invited for appointment to the following research position.

DUTIES: A Soil Chemist is required to investigate the rehabilitation of deteriorated sandy loams and the possibility of preventing such deterioration under intensive irrigation. In this the effect of irrigation on soil micro-organism activity will play an important part. The appointee will also be required to study the contribution of rotation crops to tobacco nutrition.

QUALIFICATIONS: Applicants should have a Ph.D. degree in an appropriate field, or postgraduate research experience of equivalent standard and duration, supported by satisfactory evidence of research ability.

SALARY: Depending upon qualifications and experience, the appointment will be made within the salary range of Research Scientist (male) $A7,484 - $A9,494 p.a. (female) $A7,110 - $A9,066 p.a., or Senior Research Scientist (male) $A9,880 - $A11,517 p.a. (female) $A9,452 - $A11,089 p.a. In addition to salary a District Allowance of $A140 p.a. (married) or $A70 p.a. (single) is payable.

NOTE: The appointment will be initially for a fixed term of three years, after which, if mutually desired, either an extension of tenure or appointment for an indefinite period will be considered. The appointment will be conditional upon passing a medical examination and an initial probationary period of twelve months may be specified. An indefinite appointment carries with it Commonwealth Superannuation Fund or Provident Account privileges. Further particulars supplied on application.

Application (quoting Appointment No. 815/90) and stating full name, place, date and year of birth, nationality, marital status, present employment, details of qualifications and experience, together with the names of not more than four persons acquainted with the applicant’s academic and professional standing, should reach: -

The Deputy Chief Scientific Liaison Officer, Australian Scientific Liaison Office, 64-78, Kingsway, LONDON WC28 6BD
by the 3rd July, 1971.

Applications in USA and Canada should be sent to Professor H. C. Webster, C. M. G., Counsellor (Scientific), Australian Embassy, 1601 Massachusetts Avenue, N.W. WASHINGTON D C 20036, U.S.A. [754-061 (1971) : 603]
ULSTER: THE NEW UNIVERSITY
SCHOOL OF PHYSICAL SCIENCES
(PHYSICS)
RESEARCH FELLOW IN THE THEORY OF ELECTROCHEMICAL TRANSPORT
(to work in collaboration with Professor R. H. Tredgold)

This post would be suitable for a mathematician, physicist, electrical engineer or physical chemist interested in this field. Some knowledge of numerical analysis and computer work is desirable.
The appointment is for two years starting from 1st October 1971 or earlier.
Salary: Starting salary up to a maximum of £2,040 per annum (with FSSU) depending upon qualifications and experience.
Further particulars may be obtained from The Registrar, The New University of Ulster, Coleraine, Northern Ireland (quoting Ref: 71/69) to whom completed applications, including the names and addresses of two referees, should be returned as soon as possible but not later than 21st June 1971.
[754-062 (1971) : 603]
THE ROWETT RESEARCH INSTITUTE
Bucksburn, Aberdeen AB2 9SB

SCIENTIFIC OFFICER CLASS POSTS

Applications are invited from candidates with good Honours degree for the following posts:

APPLIED NUTRITION DEPARTMENT
Scientific Officer or Senior Scientific Officer required to carry out research on problems associated with systems of pig production in which piglets are weaned at or soon after birth. Post-graduate experience or qualification and a sound knowledge of nutritional biochemistry of reproductive physiology. The appointment will be for three years (terminable) in the first instance, but with a view to permanency. Salary (at present under review) Scientific Officer £1,162 - £1,982 p.a. Senior Scientific Officer £2,193 - £2,703 with placing according to qualifications and experience. F.S.S.U. Superannuation, with a compensatory non-pensionable allowance of 4½% of basic salary.

NUTRITIONAL BIOCHEMISTRY DEPARTMENT Biochemist or physiologist to participate in studies on the metabolic effects of iron deficiency in young ruminant animals. The appointee will investigate the effects of iron deficiency upon the cardiac functions and energy exchange. Opportunities will also exist for radio-isotope investigations of the kinetics of iron metabolism during depletion and repletion.

The post will be tenable for a fixed period of 3 years and the salary will be based upon the Scientific Officer scale £1,262 - £1,982 p.a. with placing according to experience. F.S.S.U. Superannuation scheme.

Applications, together with the names of three referees, should be sent to the Secretary of the Institute from whom further details can be obtained. Closing date 25th June, 1971.

[754-063 (1971) : 603]
SCHOOL LEAVERS, WITH EXPECTATIONS OF “A” LEVEL CHEMISTRY

A Junior Technician vacancy will occur in August. The successful applicant to attend H.N.C. day release course (two years) for State Registration, Whitley Council conditions. Applications giving details of age, education and interests to Chief Technician, Department of Chemical Pathology, The Hospital for Sick Children, Great Ormond Street, W.C.1 by 18th June.

[754-064 (1971) : 603]
RESEARCH CHEMIST / RUBBER TECHNOLOGY
The Natural Rubber Producers Research Association is looking for a graduate to study the influence of compounding on creep and stress relaxation processes of natural rubber.
Minimum qualifications: 2nd Class Honours Degree in Chemistry or Polymer Science and Technology.
Age, preferably under 30.
Superannuation under F.S.S.U.
Please apply to: The Director of Research, The Natural Rubber Producers Research Association, 56, Tewin Road, Welwyn Garden City, Herts.
[754-065 (1971) : 603]
INSTITUTE OF CANCER RESEARCH ROYAL CANCER HOSPITAL JUNIOR TECHNICAL OFFICER required in Chester Beatty Research Institute, Fulham Road, S.W.3 to assist with work in the field of gene control, with particular reference to the chemistry of nuclear proteins. Candidates should have at least 2 G.C.E. “A” level passes in Chemistry, Physics or Mathematics. Starting salary in region £900 p.a. at age 19 in scale extending to £1,720 p.a. Apply with names of 2 referees to the Secretary, 34 Summer Place, S.W.7 7NU quoting ref. 301/B/426.

[754-066 (1971) : 603]
UNIVERSITY OF EDINBURGH
DEPARTMENT OF VETERINARY PHARMACOLOGY

Applications are invited for the post of **LECTURER** in the above Department. The post involves teaching pharmacology and chemotherapy to undergraduate and post-graduate veterinary students. Appropriate chemical and – or research experience is desirable. The successful applicant will be encouraged to conduct research and if necessary register for a higher degree.

Salary scale - £1,491 – £3,417 per annum with placing according to qualifications and experience, together with superannuation benefits.

Applications by letter (three copies) giving the names of two referees, should be sent to the Secretary to the University, Old College South Bridge, Edinburgh EH8 9YL from whom further particulars may be obtained. The closing date for applications is 30th June 1971. Please quote reference 1035.

[754-067 (1971) : 604]
Applications are invited from suitably qualified biologists or chemists for the post of Head of the Insecticides and Fungicides Department to succeed to Dr. C. Porter, who retires on 31 March 1972. Appointment in grade of S.P.S.O. (£4,300 - £5,015) F.S.S.U.

Applications, giving full details of career and naming two referees to the Secretary by 31st July 1971.

[754-068 (1971) : 604]
WE wish to recruit TWO TECHNICIANS / SENIOR TECHNICIANS to work in the teaching and research laboratories of the Department of Physiology. Experience in photographic techniques and/or electronics would be an advantage. Salary Scales: £1,493 - £1,883 per annum or £1,136 - £1,586 per annum according to experience and qualifications. Application forms from Mr. J. Thynne, Department of Physiology, Chelsea College of Science and Technology, Manresa Road, London SW3 6LX.

[754-069 (1971) : 604]
IRELAND

SCIENTISTS, ENGINEERS, ECONOMISTS

Are invited to apply for the position of

Principal Scientific Officer under the National Science Council

Requirements: An Honours University degree in one of the above fields with at least 8 years experience in Research and Development or in comparable activity.

Upper age limit of 40.

Duties of Post: The National Science Council’s functions are to advise the Government on science and technology, with particular reference to economic development. The Principal Scientific Officer will be concerned with research and development activities. He will be expected to survey and assess current work, to initiate technical economic studies of proposed future research and to attempt technological forecasts of requirement.

Salary, etc.: £3,475 - £4,080 (men). Entry above the minimum may be allowed.

The appointment will be either permanent or short-term with prospects of becoming permanent as may be mutually agreed; a secondment arrangement will be considered.

Application forms and further particulars may be obtained from the Secretary, Civil Service Commission, 48 Upper O’Connell Street, Dublin 1. The latest date for receiving completed application forms is 1st July, 1971.

[754-070 (1971) : 604]
SCIENCE RESEARCH COUNCIL
RUTHERFORD HIGH ENERGY LABORATORY

SCIENTISTS FOR NEUTRON BEAM RESEARCH

There are a few vacancies for neutron beam scientists in the Neutron Beam Research Unit which is being set up at the Rutherford Laboratory by the Science Research Council. The Council supports the research of about 100 university scientists in an expanding programme for the study of the physics and chemistry of condensed matter and is at present considering the provision of improved high flux facilities for the work. The Unit will be particularly concerned in the longer term development of instruments and research techniques, and with the study of new neutron sources. It will collaborate closely with university scientists and the existing support teams of the UKAEA.

Applications are invited from scientists with experience in research using neutron beams and in the design and development of the research instruments employed. In carrying out their duties in the Unit successful candidates will themselves have opportunities to participate in aspects of the neutron beam research programme.

The appointments will be 3 year contracts as Research Associates or as permanent posts in the Scientific Officer class. Salaries will depend on age and experience, but will be within the following ranges:
Scientific Officer class £2,350 - £4,180
Research Associates £2,2790 - £3,900

These scales are at present under review. A contributory superannuation scheme is operated for permanent staff: the FSSU scheme is available for Research Associates.

Please write or telephone for an application form to: Mr. P. Nichols, Rutherford Laboratory, Chilton, Didcot, Berks. (Abingdon 1900 Ext 510) Quote reference 199. Closing date 11th June 1971.
[754-071 (1971) : 604]
JUNIOR OFFICER OR TECHNICIAN
required to assist scientists in a Division working in close collaboration with the world health organization. The research is concerned with the physiology and immunology of hormones which control cell formation. Would suit a technician (A.I.M.L.T. preferred but not essential) with experience in biochemistry or a related field.
Salary in the range £859 p.a. to £1,721 p.a. with scope for progression to higher grades. Excellent opportunity to learn new techniques using modern equipment in first rate laboratories. Good terms of employment including superannuation provision. Please apply in writing, quoting our reference NS 101/2 to Mr. J. H. Woodcock, Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London, NW7 1AA. Telephone 959 3666.
[754-072 (1971) : 604]
LONDON BOROUGH OF RICHMOND UPON THAMES

LABORATORY ASSISTANT

(full or part-time) Salary Technical Grade 2 £1,032 - £1,179, part-time pro-rata to this scale. Duties include assembly, care and maintenance of apparatus, preparation of solutions, etc. preference will be given to candidates with good knowledge in Biology.

Apply Headmaster at
Hampton Grammar School
Hanworth Road, Hampton.
[754-073 (1971) : 604]
TECHNICIANS OR JUNIOR TECHNICIANS REQUIRED
Two vacancies exist for suitably qualified persons to assist with Bacteriological and Pathological research work. Minimum qualifications: 4 G.C.E. “O” levels including English Language, Mathematics and science subject. Initial salary according to age, experience and qualifications on following scales: Junior Technician £587 - £1,144; Technician £1,219 - £1,533; Senior Technician £1,448 - £1,841. Please apply quoting our reference NS 101/1 to Mr. P. A. Collingridge, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1RA. Telephone 969 3666.
[754-074 (1971) : 604]
INSTITUTE OF CANCER RESEARCH: Royal Cancer Hospital. Junior Technical Officer required at Chester Beatty Research Institute, Fulham Road, S.W.3. to work in tissue culture laboratory on problems of gene regulation in cultured mammalian cells. Work will involve bio-chemical methods in addition to tissue culture techniques. Previous experience of tissue culture not essential. Minimum qualifications: 2 “A” levels in Science subjects or equivalent. Salary according to age and experience in scale £780 - £1,631. Apply with names of two referees to the Secretary, 34 Summer Place SW7 3NU quoting reference 30/1/B/420.
[754-075 (1971) : 604]
TECHNICIAN / SENIOR TECHNICIAN required next session for Chemical Laboratory involved in teacher training. Good chemical qualifications, experience in laboratory organization, and experimental development work expected. Salary Scales £1,483 - £1,883 per annum or £1,138 - £1,586 per annum according to experience and qualifications. Application forms from the Chemistry Secretary, Science Education Centre, Bridge Place, S.W.6. to be returned by 21st June 1971.
[754-076 (1971) : 604]
LABORATORY TECHNICIAN required to take charge of Blood Transfusion Unit. Would suit Science graduate with previous relevant experience. Applications, stating age, education, experience, naming two referees to Establishment Officer, St Mary’s Hospital, Praed Street, W.2. immediately.
[754-077 (1971) : 604]
We have a vacancy for **SENIOR SCIENTIFIC ASSISTANTS** holding H.N.C. and having experience in one of the following fields:

- Metallography
- Crystal growing
- Operation of autoclaves
- Mechanical testing
- Microstructural studies
- Electrical measurements
- With modern electronic equipment
- Low temperature techniques

There are also posts available for Assistants with extended experience but without formal qualification.

Salary rising to a maximum of £1,881 p.a.

Further details and an application form can be obtained from the Personnel Officer, Central Electricity Research Laboratories, (CEGB), Kelvin Avenue, Leatherhead, Surrey. Quote Ref. NS/139 [754-078 (1971) : Ciii]
AGRICULTURAL RESEARCH COUNCIL
INSTITUTE OF ANIMAL PHYSIOLOGY
BABRAHAM, CAMBRIDGE

EXPERIMENTAL OFFICER required for the Department of Applied Biology. Educational qualifications: H.N.C. F.I.M.L.T. or equivalent. Present salary in scale £1,725 p.a. (minimum age 26) - £2,177 p.a. In addition, a non-pensionable allowance of 5 ½ % of salary is payable to cover contributions to a Superannuation Scheme. Applications, with full details and names of 2 referees, to the Secretary of the Institute by 12th June 1971 quoting reference E.L.

[754-079 (1971) : Ciii]
Hertfordshire Education Committee
Hertfordshire College of Agriculture and Horticulture
Oaklands, St. Albans

LECTURER IN SCIENCE
Applications invited for above post from graduates in Agricultural, Horticultural or Biological Science. Special interest in Crop Protection or Animal Nutrition desirable. Salary scale Lecturer Grade I in Agricultural Colleges, £1,235 - £2,200 per annum.
Details and Application Form from Principal.
[754-080 (1971) : Ciii]
CSIRO
RESEARCH SCIENTIST
POPULATION GENETICS
AUSTRALIA
DIVISION OF PLANT INDUSTRY

GENERAL The Division of Plant Industry of the Commonwealth Scientific Research and Industrial Research Organization, situated in Canberra ACT comprises some 150 scientists conducting pure and applied research in genetics, plant breeding biochemistry, physiology, microbiology, inorganic nutrition, ecology, agronomy and plant introduction. It is well equipped with instruments for the characterization of macromolecules and has immediate access to high speed computer facilities.

DUTIES An experienced population geneticist is required to develop a research programme in experimental population biology and evolution which is related to current interests in the Genetics Section. These interests include the molecular and biochemical analysis of population variability in domesticated and wild plant species and Drosophila. Related studies concern molecular mechanisms of adaptation, mutation and quantitative variation, the evolution of novel gene functions, and evolutionary aspects of the molecular organization of chromosomes.

QUALIFICATION Applicants should have a Ph.D. degree in an appropriate field or postgraduate research experience of equivalent standard and duration, supported by satisfactory evidence of research ability.

SALARY Depending upon qualification and experience, the appointment will be made within the salary range of Research Scientist, $A7,484 - $A9,494 p.a. or Senior Research Scientist, $A9,880 - $A11,517 p.a. In the case of an applicant having outstanding qualities of leadership in research and eminence in the broad field of study, appointment at a higher salary would be considered. Salary rates for women are currently less than those for men, but this differential will be eliminated by January 1972. Promotion within CSIRO to a higher classification is determined by merit.

CONDITIONS The duration of the appointment will be for a fixed term of three years, after which, if mutually desired, either an extension of tenure or appointment for an indefinite period will be considered. The appointment will be conditional upon passing a medical examination. An initial probationary period of twelve months may be specified. Further details supplied on application.

In addition to salary, a reasonable rental subsidy on furnished accommodation may be paid to a married male appointee.

Applications (quoting Appointment No. 130/1120), and stating full name, place, date and year of birth, nationality, marital status, present employment, details of qualifications and experience, together with the names of not more than four persons acquainted with the applicant’s academic and professional standing should reach –

The Deputy Chief Scientific Liaison Officer
Australian Scientific Liaison Office, 64-78, Kingsway, LONDON WC28 6BD by the 25th June, 1971.
Applications in USA and Canada should be sent to
Professor H. C. Webster, C. M. G., Counsellor (Scientific),
Australian Embassy, 1601 Massachusetts Avenue, N.W.
WASHINGTON D C 20036, U.S.A.
[754-081 (1971) : Ciii]
ORGANIC CHEMIST (aged 22 to 28, at degree level) is required for research work at CHESSINGTON involving organic synthesis, especially the preparation of new compounds and the polymerization of vinyl-type monomers. Some experience in polymer chemistry an asset. Promotion prospects for an active, versatile, inventive man. Hours: 9 – 5.30. Mon. – Fri. Subsidised lunches. Pension scheme.

Apply to YARSLEY RESEARCH LABORATORIES LIMITED, Clayton Road, CHESSINGTON, Surrey. (Tel: 01-397 6111/5)

[754-082 (1971) : Ciii]
APPOINTMENTS AND SITUATIONS VACANT

NATIONAL INSTITUTE FOR METALLURGY
Johannesburg, South Africa

VACANCIES FOR SCIENTISTS IN THE ANALYTICAL DIVISION
The National Institute for Metallurgy, which undertakes research into the properties, composition, recovery and utilization of minerals and mineral products, invites applications for research workers in the following sections:

SPECTROGRAPHIC ATOMIC ABSORPTION SEPARATIONS
These sections undertake research and development work on the analysis for major and trace elements in a wide variety of rocks, minerals, ores and process solutions. All the sections are fully equipped with modern instruments.

DUTIES: (i) SPECTROGRAPHIC AND ATOMIC ABSORPTION SECTIONS.
Successful applicants will be required with a minimum amount of supervision, to undertake research and development projects concerned with the analysis if minerals and mineral products.
(ii) SEPARATIONS SECTION. The successful applicant will be the leader of this section and therefore must have experience in separation techniques, such as liquid-liquid extraction, ion exchange and chromatography and have the ability to direct research projects in those fields. The analytical chemistry of the noble metals has been under investigation for three years and will continue to be the main project in the future. Hence preference will be given to applicants who have a special interest in that field.

QUALIFICATIONS: Applicants should preferably have a university degree, or equivalent qualifications, a knowledge of the theoretical aspects of their subject, and at least four years practical experience.

BENEFITS: - Encouragement is given to the publication of results of Investigations - Opportunity to present papers at overseas congresses - Attractive Salary based on qualifications and experience - A pension scheme - A medical aid scheme - Generous vacation and sick leave privileges - A subsidy scheme for housing loans.

Enquiries and applications giving details of qualifications and experience should be addressed to the Director, National Institute for Metallurgy Private Bag 6, Cottesloe. Republic of South Africa. Please quote reference no. 16/9/S/1/71 in your application.

[758-001 (1971) : 50]
UNIVERSITY OF ABERDEEN  
LECTURESHIP IN MICROBIOLOGY  
Applications are invited for this post within the Department of Biochemistry. Salary on scale: £1,491 - £3,417 with appropriate placing. Superannuation (F.S.S.U.) and removal allowance.  
Further particulars from The Secretary, The University, Aberdeen with whom applications (8 copies) should be lodged by 30 July, 1971.  
[758-002 (1971) : 50]
RESEARCH DEMONSTRATOR required in Department of Physiology & Biochemistry. Salary £800 x 25 - £850 p.a. Further particulars from, and applications quoting M.100, to Assistant Bursar (Personnel), University of Reading, Whiteknights, Reading RG6 2AH. Closing date 25th July.

[758-003 (1971) : 50]
LIVERPOOL POLYTECHNIC
DEPARTMENT OF CHEMISTRY
1. RESEARCH ASSISTANT in ORGANIC CHEMISTRY
Applicants should be Honours Graduates in Chemistry or Graduate Members of the Royal Institute of Chemistry. To work on natural products, synthesis and mass spectrometry of compounds related to either prostaglandins or tetracycline antibiotics.

DEPARTMENT OF BIOLOGY
2. RESEARCH ASSISTANT
Applicants should be good Honours Graduates. The post is concerned with an investigation of the effects of industrial and domestic effluents on the diatom flora of rivers.
SALARY £1,038 - £1,272 per annum.
Application forms and further particulars available from: Staff Officer, Dept. NS, Liverpool Polytechnic, Clarence Street, Liverpool L3 5TP
[758-004 (1971) : 50]
BRISTOL POLYTECHNIC
DEPARTMENT OF SCIENCE

Applications are invited for the following posts in the Biology Section. Duties to commence 1 September, 1971, or as soon as possible thereafter:

**SENIOR TECHNICIAN** (GRADE T.4) to take charge of Microbiology laboratories - T4/93.

**SENIOR TECHNICIAN** (GRADE T.4) to take charge of Mammalian Physiology laboratories - T41/94.

**TECHNICIAN** (GRADE T.2) (one post) - T41/95.

**ASSISTANT TECHNICIAN** (GRADE T.1) (two posts) - T41/96.

Further details and application forms, to be returned by 15 July 1971, from Central Personnel Office, Bristol Polytechnic. Ashley Down, Bristol BS7 9BU. Please quote appropriate post reference number in all communications.

[758-005 (1971) : 50]
UNIVERSITY OF EDINBURGH
Department of Molecular Biology
Applications are invited for the post of **LECTURER** (salary scale £1,491 - £3,417) a vacancy for which will occur on 1st October 1971 in the above Department. The Department, which includes the MRC Molecular Genetics Unit, occupies new laboratories on the King’s Buildings site, and is very well equipped with most modern apparatus needed for basic research into Macromolecular Biology of bacteria and their viruses. It is hoped in particular to attract those with experience in the physical chemistry of proteins and/or nucleic acids, and are interested in applying their knowledge to the integrated biology of living organisms; but no specific limitations of research field is envisaged. Members of staff are expected to take part in teaching the courses available to 3rd and 4th year undergraduates, to assist in postgraduate training and to help in administration. Further particulars may be obtained from Professor M. R. Pollock. F.R.S., Department of Molecular Biology, King’s Buildings, Mayfield Road, Edinburgh. EH9 3JR, with whom applications giving details of qualifications, experience and the names of two referees, should be lodged by 9th July 1971.

[758-006 (1971) : 50]
POLYTECHNIC OF THE SOUTH BANK,
DEPARTMENT OF CHEMISTRY AND POLYMER TECHNOLOGY
Borough Road, London, SE1 0AA.
Applications are invited for a **Postdoctoral Fellowship** sponsored by the Wellcome Trust and in collaboration with the Royal Postgraduate Medical School Hammersmith, to work on the synthesis of folic acid derivatives; technical assistance is available. Some knowledge of peptide chemistry or in the manipulation of multifunctional molecules is desirable. Starting salary not less than £1,450. Applications with the names of two referees to Dr. C. N. C. Drey.
[758-007 (1971) : 50]
UNIVERSITY OF STRATHCLYDE
SCHOOL OF MATHEMATICS AND PHYSICS
DEPARTMENT OF APPLIED PHYSICS

LECTURESHIPS

Applications for two Lectureships are invited from physicists preferably with research interests in the applications of physics to problems of the environment. A knowledge of either solid state physics, or of some branch of biology (e.g. physiology), or of cybernetics, is particularly desirable.

The successful candidates will be expected to take part in undergraduate and postgraduate teaching and to help to establish research with emphasis on long-term relevance to social and industrial problems, particularly in their environmental aspects.

Salary scale: £1,491 - £3,417 with F.S.S.U. Placing according to qualifications and experience.

Application forms and further particulars (quoting 37/71) can be obtained from the Registrar, University of Strathclyde, George Street Glasgow, C.1, with whom applications should be lodged not later than 31st July, 1971 (applications from overseas candidates will be accepted up to 26th August, 1971).

[758-008 (1971) : 50]
IMPERIAL COLLEGE OF SCIENCE AND TECHNOLOGY
DEPARTMENT OF CHEMISTRY

Applications are invited at Post-doctoral level, or at Graduate level for research in the chemistry and physical chemistry of porous crystals and molecular sieves (ion exchange, intracrystalline sorption complexes, structure chemistry, syntheses and crystal growth). Successful applicants will work under the supervision of Professor R. M. Barrer, F.R.S., and may proceed to higher degrees.

Post-doctoral starting salary: £1,491 + £100 London Allowance.
Graduate starting salary: £837 per annum.

Applications giving full academic background and the names of two referees should be made to Professor R. M. Barrer, Chemistry Department, Imperial College, London SW7.

[758-009 (1971) : 50]
SENIOR MEDICAL LABORATORY TECHNICIAN II to take charge of Blood Transfusion Laboratory in Routine Haematology Department. Candidates must be fully experienced State Registered medical laboratory technicians. Applications, stating age, qualifications, previous experience, naming two referees to Establishment Officer, St Mary’s Hospital, Praed Street, London, W.2, as soon as possible.

[758-010 (1971) : 50]
Applications are invited for the following posts in the Department of Chemistry. The Department, which recently moved into a new building has a large active research school and has close contacts with the chemical industry.

**SENIOR LECTURER** (REF: CH/98/L)

This post is in a group led by Professor R. N. Haszeldine, F.R.S., and industrial experience in the fields of Petroleum, Chemistry and Petrochemicals is required. Candidates should have active research interests in fundamental or applied aspects of petrochemicals or general hydrocarbon Chemistry. Preference may be given to candidates with interests in (a) relevant physical-organic or synthetic-organic chemistry, or (b) development or process chemistry aspects of petrochemicals. The Senior Lecturer would be expected to play the major role in the teaching and administration of the new M.Sc. Course in Hydrocarbon chemistry, and would participate in other teaching in the Department; interest, ability and drive necessary to build up an active, high-calibre research group working closely with industry are prime requirements.

Commencing salary according to qualifications and experience in the scale £3,591 - £4,401 per annum, with Superannuation under F.S.S.U.

**LECTURER** (REF: CH/99/L)

Preference will be given to candidates with clear ability in teaching, and capable of developing active research interests related to industrial inorganic chemistry in areas other than transition metal chemistry. Salary is within the scale £1,491 - £3,417 (merit barline at £2,454), per annum, with Superannuation under F.S.S.U.

Requests for application form and conditions of appointment, quoting the appropriate Reference number, should be made to The Registrar, U.M.I.S.T., Sackville Street, Manchester, M60 1QD. Closing date for applications 9th August, 1971.
Applications are invited for the above post. The successful applicant will be involved in the chemical preparations and radiometric assay of C-14 in samples of geological and archaeological interest. While a practical training will be given, experience of high vacuum systems, low level counting, or glassblowing would be advantageous.

Initial salary within the ranges
Technician £1,041 - £1,410
Senior Technician £1,398 - £1,707

Applications including details of qualifications, experience, age and present salary should be forwarded to the Director, Scottish Research Centre, East Kilbride, Glasgow, before 9th July 1971. Housing may be available to the successful applicant.

[758-012 (1971) : 51]
MEDICAL RESEARCH COUNCIL DEMYELINATING DISEASES UNIT

Chemist with special interest in protein chemistry and metabolism required to study myelin and its turnover in conjunction with Dr. D. H. Adams and Dr. F. R. Carnegie. Excellently equipped laboratories with ancillary techniques - e.g. electron microscopy, tissue culture - available. Ph.D. desirable.

Salary and status according to experience.

Apply: Director MRC Unit, Newcastle General Hospital, Westgate Road, Newcastle upon Tyne NE4 6BE.

[758-013 (1971) : 51]
SHELL

Graduates and Technicians
Chemistry / Biochemistry

Shell Research Limited, have a number of vacancies for graduates and technicians in the Chemical Toxicology Division of their Tunstall Laboratory at Sittingbourne, Kent. This Division co-operates with biologists and toxicologists in the assessment of the effects of chemicals upon man and his environment. It is specifically concerned with environmental surveys of the occurrence of chemicals in man and other vertebrates, kinetic and chemical studies of the fate of foreign chemicals and endogenous chemicals such as steroids and nucleic acids in vertebrates.

Preference will be given to candidates with previous experience in analytical chemistry, biochemistry or the physico chemical aspect of the toxicology of vapours and aerosols.

The salary offered will be competitive depending on previous background and experience. Fringe benefits include an excellent pension scheme, staff restaurant and sports/social facilities.

Applications in writing giving brief details of age, experience and qualifications, should be sent to: Shell International Petroleum Company Limited, Recruitment Division (O) PNEL/3, Shell Centre London, SE1 7NA.

[758-014 (1971) : 51]
MEDICAL RESEARCH COUNCIL
BRAIN METABOLISM UNIT, EDINBURGH

JUNIOR TECHNICAL OFFICER or TECHNICIAN
required to assist in development and application of techniques for measuring ion transport in psychiatric illness, particularly depression. The person appointed would assist a Medical Research Scientist in studies in animals and man. Experience in biochemistry or physiology would be useful but is not essential, and there are excellent prospects for progression to a higher grade. Applications should be addressed to the Clerical Officer, M.R.C. Brain Metabolism Unit, University Department of Pharmacology, 1, George Square, Edinburgh, EH8 9JZ. Telephone 031-667 1011 Extn. 2509. Please quote reference 2037.

[758-015 (1971) : 51]
INSTITUTE OF TREE BIOLOGY

There is a vacancy for a forester at the Institute of Tree Biology, which is presently accommodated within the Department of Forestry and Natural Resources, Edinburgh University to assist the members of a team attempting to characterize the growth, patterns of forest and woodland trees. The work involves a blend of field and laboratory work and requires an interest in recording instruments.

Salary Range: £797 - £1,777. Starting pay according to age and experience.

Qualifications: Senior Certificate of the Royal Scottish Society, the Forester’s Certificate of the Royal Forestry Society or their equivalents.

Application forms from N.E.R.C. Alhambra House, 27/33 Charing Cross Road, London WC2. Closing date for receipt of completed applications, 14 August 1971.

[758-016 (1971) : 51]
AGRICULTURAL RESEARCH COUNCIL
INSTITUTE FOR RESEARCH ON ANIMAL DISEASES
Compton, Nr. Newbury, Berks.
Applications are invited from graduates with a good honours degree in microbiology for a temporary appointment in the Department of Microbiology for 2 years to investigate aspects of work which in being carried out on the disease hazards of farm waste disposal. Special attention will be given to the survival of pathogenic organisms, including salmonellas, in slurry subjected to various treatments. An important feature of this work will be the infectivity for farm livestock of pathogens on pastures which have received slurry. The appointment will be in the SO/SSO grades, salary £1,162 - £2,703 p.a. according to age and experience, with F.S.S.U. Applications with curriculum vitae and the names of two referees should be submitted to the Institute Secretary quoting Vacancy No. 128 not later than 23rd July, 1971.
[758-017 (1971) : 51]
FRESHWATER BIOLOGICAL ASSOCIATION
Vacancy for resident manager river experimental station near Puddletown, Dorset, Senior Scientific Assistant £1,188 - £1,572 p.a. free modern two bedroom flat. Pension scheme. Apply by 19 July, Secretary, River Laboratory, East Stoke, Wareham, Dorset BH20 6BB (Bindon Abbey 314)
[758-018 (1971) : 51]
SENIOR TECHNICIAN / TECHNICIAN required for Department of Pharmacy. Duties will include servicing of Physical Chemistry equipment. Some practical experience in Electronics desirable. Post-entry training facilities. Salary Scale: £1,493 - £1,883 or £1,136 - £1,586 per annum according to experience and qualifications. Application forms from the Secretary, Chelsea College of Science and Technology, Manresa Road, London, SW3 6LX.
[758-019 (1971) : 51]
Applications are invited for the following positions: **POST-DOCTORAL RESEARCH ASSOCIATES** to work on (1) nucleotide sequence determination in viral DNA and (2) automated amino acid sequence determination; **TECHNICAL OFFICERS** to assist in work on (1) characterisation of mutant bacterial proteins and (2) fractionation and characterisation of large fragments of nucleic acids.

Post-doctoral research associate should have or be about to complete a Ph.D. degree in chemistry or biochemistry and Technical Officer should have an honours degree or equivalent in a relevant scientific subject. Appointments will be for two years in the first instance from Autumn 1971.

Salaries: Post-doctoral research associate £1,491 x £138 p.a. and FSSU benefits. Technical officer £1,497 x £63 p.a. Applications, with a Curriculum vitae and the names of two referees, should reach the Secretary, Department of Molecular Biology, King’s Buildings, Mayfield Road, Edinburgh, EH9 3JR, by 31st July 1971. Please quote reference 5021.
A SENIOR TECHNICIAN and a Technician are required for research in developmental biology. Experience in electron microscopy or tissue culture would be an advantage. Salary on Whitby Council rates. Applications in writing, together with the names of two referees, to Professor L. Wolpert, Department of Biology as Applied to Medicine, The Middlesex Hospital, Medical School, Cleveland Street, London W1P 6DB.

[758-021 (1971) : 51]
A HISTOLOGY RESEARCH ASSISTANT (technical or graduate) required to co-operate in a grant-financed research project. Some experience of autoradiography preferable but not essential. Salary according to experience and qualifications. Applications to: Dr. D. A. Brown, Department of Pharmacology, St. Bartholomew’s Hospital Medical College, Charterhouse Square, London, E.C.1.

[758-022 (1971) : 51]
An **ASSISTANT EXPERIMENTAL OFFICER** / **EXPERIMENTAL OFFICER** is required to work in the Irrigation and Soil Water Section of the Agronomy Division. The Section is concerned with developing methods of management and irrigation of forage crops which will make the most efficient use of both water applied as irrigation and soil water.

The officer appointed will assist with field studies on the effect of water stress on the growth of animal and perennial forage crops with small scale irrigation experiments, and with the development of techniques for the measurement of the water potential in plants and soil in relation to current evaporative conditions.

**QUALIFICATIONS** A Pass degree or HNC in Physics, Botany or Soil Science with experience or an interest in the physical properties of water in plants and soils.

**SALARY:** EO - £1,725 p.a. rising to £2,177 p.a. AEO – on age scale e.g. £948 at age 21, £1,311 at age 26 or over, rising to £1,578 p.a.

Contributory Superannuation Scheme. Staff joining the scheme are granted a 5 ½ % allowance.

**APPLICATIONS** to the **SECRETARY** by JULY 18th 1971.

**TELEPHONE NUMBER:** HURLEY 363.

**PLEASE QUOTE REFERENCE E/3/10 - POST 25.**

[758-023 (1971) : 52]
WATFORD COLLEGE OF TECHNOLOGY

RESEARCH ASSISTANT

Applications are invited for a Research Assistantship for work on the cavitation and behaviour of fluids between rollers, with particular reference to printing inks.

Candidates should have, or be expecting to obtain, a 1st or 2nd class Honours Degree in Physics, Chemistry, Printing Technology, Chemical Engineering or some other appropriate discipline. The successful applicant will be expected to register for a higher degree and will join a newly established and expanding postgraduate research group carrying out fundamental studies of printing and related subjects. The College offers the only Honours Degree course in Printing Technology in the United Kingdom.

Salary within the range £930 - £1,020 p.a.

Applications, including a curriculum vitae and the names of two referees, should be sent as soon as possible to the Registrar. Watford College of Technology, Hempstead Road, Watford. WD1 3EZ.

[758-024 (1971) : 52]
MEDICAL RESEARCH COUNCIL

**Junior Technical Officer** required to assist in the Division of Virology. Experience in tissue culture preferable but not essential. Candidates should possess either two G.C.E. Advance levels or be a science graduate. Salary according to age, qualifications and experience on the scale £859 to £1,721 p.a.

Please write or telephone for application forms, quoting our reference NS 105/VIR to: Mr. J. H. Woodcock. Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA. Telephone: 959 3666.

[758-025 (1971) : 52]
MEDICAL RESEARCH COUNCIL

A Junior Technical Officer is required in the Division of Biophysics for a responsible role in virological and macromolecular research using a wide range of electron microscopical techniques. Previous experience an advantage, but not essential. Good prospects. Initial salary range: £859 to £1,721 p.a. For further details apply now giving qualifications and quoting our reference. NS 105/BP to: Mr. J. H. Woodcock, Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA. Tel. 959 3666.

[758-026 (1971) : 52]
JOHN WILEY & SONS LTD. require a 

**SUB-EDITOR**

with previous experience in Chemistry and/or Physics required by International Publishers with offices in Chichester, Sussex. Applicants may be either male or female, and although academic qualifications would be desirable, previous experience in a sub-editorial department is more important.

The duties entail the marking of authors’ manuscripts for the printer, proof-reading, and preparation of diagrams for the artist. It is essential that applicants should have an eye for detail and a genuine interest in the clean presentation of scientific literature.

We offer modern working conditions in pleasant surroundings.

Applications in writing, stating age, qualifications and present salary to the Production Manager, JOHN WILEY & SONS LTD., Baffins Lane, Chichester, Sussex.

[758-027 (1971) : 52]
AGRICULTURAL RESEARCH COUNCIL
Appointment of a Scientific Adviser in Soil Science and Plant Nutrition. The Agricultural Research Council invites applications for a vacancy at its Headquarters office in London for a Scientific Adviser to the Secretary of the Council in the fields of Soil Science and Plant Nutrition, with particular reference to plants and soils. The appointment will be in the grade of Principal Scientific Officer (£2,995 - £4,007 inclusive of Inner London Weighting) or Senior Principal Scientific Officer (£4,565 - £5,190, also inclusive) according to age, qualifications and experience. The salary scales are currently under review. Candidates should have a good honours degree or equivalent qualification in chemistry, agricultural chemistry or physics and a good record of research in a relevant subject. Some knowledge of plant physiology would be an advantage. Further particulars from the Establishment Officer, Agricultural Research Council, 160 Great Portland Street, London W1N 6DT. Closing date 31st July 1971.
[758-028 (1971) : 52]
THE POLYTECHNIC OF CENTRAL LONDON

RESEARCH ASSISTANTS (TWO)

Applications are invited from holders of an Honours Degree in a Biological subject or those expecting to qualify this year, for a Research Assistantship in the field of:

(a) Freshwater Pollution, and

(b) Applied Fungal Genetics.

A sound chemical background is required for post (a).

Salary scale: £1,050 x £30 (2) - £1,110 per annum.

Application form and further details available from the Head of Department of Life Sciences, 115 New Cavendish Street, London, W1M 8JS.

[758-029 (1971) : 52]
A vacancy either at the Senior Lecturer or Lecturer Grade II level exists in the Department. It is proposed to appoint a specialist either in the field of cell biology or in that of ecology. The person appointed will be expected to assist in the teaching of the C.N.A.A. degrees in Applied Biology offered by the Department. Candidates must be interested in the applied aspects of their subjects and will be expected to undertake research work.

Salary: Senior Lecturer: £2,537 - £2,872
Lecturer Grade II: £1,947 - £2,537
+ £85 London allowance.

Further particulars and form of application can be obtained from the Secretary, Thames Polytechnic, Wellington Street, London, SE18 0PF to be returned by 9th July 1971.

[758-030 (1971) : 52]
UNIVERSITY OF BIRMINGHAM
COMPUTER CENTRE

Applications are invited for one post of **SENIOR RESEARCH ASSOCIATE** (from 1st October 1971) and one for **RESEARCH ASSOCIATE**. Successful applicants will be required to participate in software development projects related to the needs of the Centre. They will also be encouraged to pursue their research interests and to assist in the M.Sc. Computer Science course. Registrations for higher degrees are possible.

Salary Scale: Senior Research Associate £1,767 - £2,454 + F.S.S.U.
Research Associate £1,200 - £1,767 F.S.S.U.

Applications (3 copies) naming 3 referees by 16th July 1971 to the Assistant Registrar (S), PO. Box 363, Birmingham B15 2TT from whom further particulars may be obtained. Please quote ref NJ7. [758-031 (1971) : 52]
THE UNIVERSITY OF SUSSEX
SCHOOL OF BIOLOGICAL SCIENCES

Technician required for microbial genetics group to assist academic staff in research work associated with microorganisms. Experience in microbiology and biochemistry an advantage. Minimum qualifications: ONC or equivalent + at least three years experience in laboratory work. Three weeks holiday + University closures. Day release granted for further study. Salary range: £1,041 - £1,410 per annum.

Applications in writing to the Laboratory Superintendent, School of Biological Sciences, University of Sussex, Falmer, Brighton, BN1 9QG.

[758-032 (1971) : 52]
UNIVERSITY OF NATAL
DEPARTMENT OF GEOLOGY

Applications are invited from suitably qualified persons for an appointment to the post of **LECTURER IN ENGINEERING GEOLOGY**, Durban.

The annual salary scale applicable to the post is: R4,800 x 300 – R6,900. In addition an annual vacation bonus is payable subject to Treasury regulations.

Further particulars of the concomitant amenities such as travelling expenses on first appointment: pension, medical aid, staff bursar and housing loan schemes; long leave conditions, etc. are obtainable from the Registrar, University of Natal, King George V Avenue, Durban or from the Association of Commonwealth Universities (Appts.) 36 Gordon Square, London WC1H 0PF.

Applications, on the prescribed form, must be lodged not later than 16 August 1971.

[758-033 (1971) : 52]
UNIVERSITY OF SOUTHAMPTON
Department of Psychology
Applications are invited for the post of Temporary Lecturer or Assistant Lecturer in the Department of Psychology for one year, to give undergraduate courses in experimental design and statistics. Salary Scales: Lecturer £1,902 - £3,417 with a merit bar at £2,454. Assistant Lecturer £1,491 - £1,902. The salary will depend on qualifications and experience. Further particulars may be obtained from the Deputy Secretary’s Section (Ext. 731). The University; Southampton, SO9 5NH to whom applications (7 copies from United Kingdom applicants) should be sent as soon as possible quoting reference: NS/121/70/A.
[758-034 (1971) : 52]
IMPERIAL COLLEGE
Department of Chemical Engineering and Chemical Technology

ASSISTANT EXPERIMENTAL OFFICER
Required for interdepartmental electron microscope unit, working on problems in chemical physics, metallurgy, biology, etc. Good qualifications (H.N.C.) advantageous and experience in electron microscopy essential. Salary in range £1,017 to £1,956 per annum. Applications together with full curriculum vitae and the names of two referees to Professor A.R. Ubbelohde, F.R.S., Imperial College, London S.W.7.
[758-035 (1971) : 52]
THE UNIVERSITY OF MANCHESTER
LECTURER IN COMPUTER SCIENCE

Applications are invited for this post in the Department of Computer Science. Applicants must have experience in one or more of the following fields: Operating Systems, High Level Languages, Numerical Analysis. Duties to commence as soon as possible. Initial appointment within the salary range p.a. £1,491 - £1,902 F.S.S.U. Further particulars and application form (returnable by July 26th) from the Registrar, The University, Manchester, M13 9PL. Quote ref/ 130/71/NS.

[758-036 (1971) : 52]
NATURAL HISTORY MUSEUM requires **Scientific Assistants** for Zoology, Entomology, Palaeontology, Mineralogy and Botany Departments. Minimum qualifications: four O levels including English language and mathematics or scientific subject. Salary: £665 (at 16) to £1,173 (at 25) (according to age) rising to maximum £1,428 p.a. Application form from Mr. Whiting, British Museum (Natural History), Cromwell Road, London SW7. Telephone 01-589 6223 Extn. 273.

[758-037 (1971) : 52]
THE MEDICAL RESEARCH COUNCIL requires a **Technician** or **Junior Technical Officer** preferably with experience in tissue culture techniques, for work on the biochemistry of cultured cells. Age 20 – 27. Apply in writing: The Hon. Director, Human Biochemical Genetics Unit, Wolfson House, Stephenson Way, London NW1 2HE.

[758-038 (1971) : 52]
LOUGHBOROUGH UNIVERSITY OF TECHNOLOGY
LECTURER IN MATERIALS ENGINEERING

Applications are invited for a lectureship in the University’s new department of Materials Technology. Areas of work will include the development of undergraduate and postgraduate courses and of an extensive research programme.

Candidates should have research and/or industrial experience, and an interest in interdisciplinary studies. Preference will be given to those with an engineering background and some degree of specialisation in the mechanisms of materials, materials production, design and reliability, or materials finishing.

Salary within scale £1,491 - £3,417. Further details and application forms from Assistant Registrar, ref. 71/29.

Loughborough Leicestershire
[758-039 (1971) : 53]
UNIVERSITY OF MELBOURNE

CHAIR OF BIOCHEMISTRY (MEDICAL)

Applications are invited for appointment to the Chair of Biochemistry (Medical) which has become vacant on the resignation of Professor P. F. Hall. This Chair is one of three Chairs in the School of Biochemistry. It is desirable, but not essential, that the successful applicant holds a medical qualification permitting registration in Victoria.

SALARY: $A15,900 per annum.

Further information about the position and the School, together with details of application procedure, superannuation, travel and removal expenses, housing assistance and conditions of appointment, is available from the Association of Commonwealth Universities (Appts.) 36 Gordon Square, London WC1H 0PF (Tel: 01-387 8572).

Applications close on 1 September 1971.

[758-040 (1971) : 53]
NATIONAL INSTITUTE FOR MEDICAL RESEARCH

Technical Officer required for Laboratory for Leprosy and Mycobacterial Research. The person appointed will be required to use a range of Immunological Techniques, applicable to bacteria and the host, e.g. serological techniques, column separation, preparation and separation of various cell types. Candidates should have relevant degree or H.N.C. or equivalent. Permanent post, with initial salary according to age and experience, on grade Junior Technical Officer £1,160 to £1,721, or Technical Officer £1,813 to £2,611. Please apply quoting our reference NS 105/LEP to Mr. J. H. Woodcock, Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA. Tel: 959 3666.

[758-041 (1971) : 53]
MEDICAL LABORATORY TECHNICIAN

Technician up to S.T. II grade (according to qualification and experience) required in Regional Public Health and Virus Laboratories, East Birmingham Hospital. Routine and research, mainly virology, in new, large, well-equipped Laboratory.

Further details from Chief Technician 021-772 4341 Ext. 686. Applications to: Director, Regional Virus Laboratory, East Birmingham Hospital, Borderline Green, Birmingham, B9 5ST.

[758-042 (1971) : 53]
GEOMIN GROUP OF LABORATORIES
GEOMIN
AUSTRALIA
(Sydney, Perth, Kalgoorlie, Darwin)

SENIOR CHEMISTS

Geochemical and Mineralogical Laboratories (Geomin) require at their Sydney and Perth Laboratories Senior Chemists with experience in the analysis of rock silicates, minerals and ores. The Geomin Group of laboratories with a staff of more than 200 is the largest commercial assaying organisation serving the mining industry in Australia. These modern laboratories have been built and equipped with the latest instrumentation to afford optimum working conditions. There is a vigorous programme of research and development into analytical techniques.

DUTIES: The positions are for men of proven initiative and ability in the application and innovation of chemical techniques both classical and by modern instrumentations.

QUALIFICATIONS: Applicants should hold an appropriate degree from a recognised university or should have equivalent qualification.

SALARY: The salary will be negotiated appropriate to the seniority of the position and will be subject to regular review.

REMOVAL EXPENSES: Suitable financial assistance will be arranged to enable the successful applicants to take up appointments in either Sydney or Perth.

APPLICATIONS: (Including your home telephone number where possible) which will be treated in strictest confidence should be made to the Managing Director who will be in England during the months of July and August and addressed to: —

Dr. A. L. Mather.
c/- Mr. R. A. Claydon,
51 Clarendon Road, Worthing. Sussex.
[758-043 (1971) : 53]
NORTHERN REGIONAL HOSPITAL BOARD
(SCOTLAND)
REGIONAL MEDICAL PHYSICS DEPARTMENT
Raigmore Hospital,
Inverness

Medical Physics Technician, Grade III, required to assist in the work of this new Department, with special responsibility in the fields of Radioisotope and Ultrasonic Scanning, Radiation measurement and Diagnostic Radioisotope procedures.
Previous experience of electronics would be an advantage.
Salary scale £1,356 rising to £1,764 per annum in accordance with the Whitley Council Conditions of Service.
Further particulars regarding this appointment are obtainable from the Senior Administrative Medical Officer, Northern Regional Hospital Board, Reay House, 17 Old Edinburgh Road, Inverness, to whom applications should be submitted, along with the names of two referees, within three weeks of the appearance of this advertisement.
[758-044 (1971) : 53]
MEDICAL RESEARCH COUNCIL
National Institute for Medical Research

POSTDOCTORAL SCIENTIST required in the Division of Biological Standards to supervise bioassays and control of hormones. Training or experience in biochemistry, physiology and biometry desirable. Excellent opportunities to engage in relevant research and to collaborate with other biochemists and biologists. The appointment will be for three years in the first instance but is renewable. Salary according to age, qualifications and experience. FSSU benefits.

Apply before the end of July to
the Director
National Institute for Medical Research, Mill Hill, London NW7 1AA.

[758-045 (1971) : 53]
Applications are invited for appointment as **LECTURER** in the Department of Mechanical Engineering. The salary scale is £1,491 - £2,454 (BAR) - £3,417 per annum according to qualifications and experience, with F.S.S.U. benefits.

The duties will consist of Lecturing, laboratory and tutorial work and the supervision of research projects. There are ample opportunities and facilities for personal research work and for lecturing at postgraduate level.

Preference will be given to a candidate whose chief interests are in the field of either materials or machines.

The appointment will take effect as soon as is practicable, preferably not later than 1st October 1971. Applications (including the names of two referees) should be sent by 12th July to the Registrar, The Senate House, The University, Bristol BS8 1TH, quoting reference DIS. Late applications will be considered as far as possible: further details can be obtained informally from Professor C. Andrew, Department of Mechanical Engineering, University of Bristol, Bristol, BS8 1TR. Telephone Bristol 24161.

[758-046 (1971) : 53]
UNIVERSITY OF BIRMINGHAM
Department of Chemistry

RESEARCH FELLOWSHIP

Applications are invited for a post-doctoral Research Fellowship supported by the S.R.C. to be awarded for one year in the first instance. The work involves the production of excited species by flash photodissociation and their study by kinetic spectroscopy in the vacuum ultra-violet. Further information may be obtained from Dr. J. P. Simons.

Salary: £1,491 - £1,767 with possible extension to £1,902. – F.S.S.U.

Applications (3 copies) naming three referees by 2nd August 1971 to the Assistant Registrar (S), P.P. Box 363 Birmingham B16 2TT. Please quote ref. SC9.

[758-047 (1971) : 53]
Applications are invited for the above post which is connected with a research project for the study of SCATTERING PROPERTIES OF BACTERIAL SUSPENSIONS. Both conventional scattering methods and novel electro optical methods will be employed. The successful candidate, who will preferably be a Physicist, will work under the supervision of Dr. B. R. Jennings, Reader in Physics. The appointment is initially for one year from 1 September 1971 but is expected to continue for a second year.

Postcard for application form and further details from Establishment Officer, Brunel University, Uxbridge, Middlesex. Closing date: 19th July, 1971

[758-048 (1971) : 53]
THE INSTITUTE OF PHYSICS require a **Trainee Editorial Assistant** for work in their Bristol Publishing Office. Candidates should have degree or equivalent qualifications in physics or mathematics (or expect to qualify shortly). Previous editorial experience not required but ability to concentrate on detail, while sometimes working under pressure, is essential. Starting salary, depending on age, class of degree etc. not less than £1,215 per annum. Applications to Executive Editor, Institute of Physics, Netherton House, 23 Marsh Street, Bristol, BS1 4BP.

[758-049 (1971) : 53]
BIOLOGICAL TECHNICIAN required to join a team working on control of steroid biosynthesis. Experience in problems of electrolyte transport and/or to a lesser extent steroid immunoassays would be an advantage. Starting salary £1,219 per annum. Applications giving details of age, qualifications and experience, with the names of two referees, should be sent to The Secretary, Department of Physics Applied to Medicine, The Middlesex Hospital Medical School, London W1P 6DB.
Applications are invited for the following posts:

**POST-DOCTORAL RESEARCH ASSISTANTSHIP**
- Dept of Physics
Preference will be given to candidates with experience in the application of high power lasers. The successful candidate will be required to participate in a study of the non-linear interaction of laser radiation with gases.
The appointment will be for one year in the first instance with a salary on a scale having a maximum of £1,900 together with F.S.S.U. benefits.
Closing date - Monday July 12, 1971

**POST-DOCTORAL FELLOWSHIP**
- Dept of Chemistry
To work on the synthesis of carbohydrate derivatives of importance in biosynthesis. The post is available from October 1971, at a salary of £1,629 per annum.

Closing date: - As soon as possible.
Application forms and further particulars may be obtained from the Registrar, University College of Swansea, Singleton Park, Swansea, Glam., SA2 8PP, to whom the application form should be returned as stated above.

(PLEASE STATE CLEARLY THE POST FOR WHICH YOU ARE APPLYING)
[758-051 (1971) : 54]
Applications are invited for the post of Technician in the Geology Department to start as soon as possible.
The person appointed should have a keen interest in geology and preferably be studying for an academic qualification in geology.
Duties would include:
1. Curating the Departmental map and specimen collections.
2. Thin section making.
3. Photographic and reprographic work.
4. Display work.
5. The geology technician usually accompanies field-classes.
Salary on one of the following scales according to age, qualifications, and experience:
Unqualified: £1,011 by annual increments to £1,380.
Qualified: £1,041 by annual increments to £1,410.
Higher qualified: £1,092 by annual increments to £1,461.
plus £75 London Weighting Allowance. For further details write, enclosing a stamped, addressed foolscap envelope, to the Personnel Officer, to whom applications should be sent as soon as possible.
[758-052 (1971) : 54]
SENIOR SCIENTIFIC OFFICER required, to participate in research including the design and construction of sound producing and response recording equipment, for the evaluation more particularly of auditory discrimination in children. The work will require knowledge of acoustics and electronic engineering and the applicant should be a science graduate with an appropriate Honours degree and five years relevant experience. He will be working in close co-operation with the Medical Director. There will be considerable scope for personal initiative, with special responsibility for the bio-engineering aspects of a project scheduled to last five years initially. The work will be carried out in association with the Institute of Laryngology and Otology (University of London). Salary scale £2,300 - £2,800 plus £90 p.a. London Weighting. Applications with names of two referees, to the Director, Nuffield Hearing and Speech Centre by July 22nd 1971.

[758-053 (1971) : 54]
MEDICAL RESEARCH COUNCIL
RADIOBIOLOGY UNIT
Harwell, Didcot, Berkshire

EXPERIMENTAL PATHOLOGIST
Applications are invited from those medically or otherwise qualified. Problems currently under investigation centre around the haemopoietic and lymphopoietic deficiencies which follow exposure to ionizing radiation and the long term sequelae such as leukaemia and other neoplasms. Original investigations on personally chosen problems encouraged.

Salary, according to Medical Research Council scales for a 3-5 year contract in the first instance. Starting date to be arranged. Further information and application forms may be obtained by writing to: - The Administrator, M.R.C. Radiobiology Unit. HARWELL, DIDCOT, Berkshire. Quoting RHM/5/2.

[758-054 (1971) : 54]
UNIVERSITY OF STIRLING
DEPARTMENT OF BIOLOGY

SENIOR TECHNICIAN / ELECTRON MICROSCOPIST
A Senior Technician is required for a small E.M. Unit. Duties will include initial responsibility for the operation and maintenance of an AB Corinth 275 Electron Microscope: development of specimen preparation techniques and preparation of specimens for photography; routine servicing (maintenance will be done by AEI); and other duties associated with the unit. Applicants must have experience in this field and have a sound knowledge of Ultramicrotomy. Salary in range £1,398 - £1,707).

Applications giving details of experience, qualifications and the names of two referees should be sent to the Deputy Secretary (N.Sc.), University of Stirling, Stirling by not later than 9 July 1971.

[758-055 (1971) : 54]
ROTHAMSTED EXPERIMENTAL STATION
HARPENDEN, HERTS

PLANT PHYSIOLOGIST to study the metabolism and growth of potatoes. The appointment will be for two years at a salary according to experience in scale £1,162 - £1,982.

Applications, giving full details of career and names of two referees, and quoting reference 11203 by 30th July to the Secretary.

[758-056 (1971) : 54]
SHEFFIELD POLYTECHNIC
Department of Hotel and Institutional Management

PRINCIPAL LECTURER IN FOOD TECHNOLOGY APPLIED TO CATERING
An important appointment with responsibility for applying food engineering to the needs of the catering industry. Close co-operation with School of Engineering and School of Science. Research and consultancy encouraged. Candidates should have a higher degree in Food Engineering, Food Technology, Food Science or Chemical Engineering, together with a record of successful research or development work. Previous involvement with degree course planning is desirable.
Salary Scale: £2,802 - £3,142 (under review).

Further particulars and application forms from the Secretary (Ref. NS), Sheffield Polytechnic, Pond Street, Sheffield, S1 1WB to whom they should be returned as soon as possible.

[758-057 (1971) : 54]
DAME ALICE OWEN’S GIRLS’ SCHOOL

Physics graduate (man or woman) required in September to teach the subject up to G.C.E. Ordinary level, in small pleasant girls grammar school in Central London. Nuffield Physics used for first three years. New laboratories. Grade B Head of Department allowance available for suitably qualified and experienced candidate.

Apply, with curriculum vitae and names of referee(s) to Head Mistress, Dame Alice Owen’s Girls’ School, Owen’s Row, Goswell Road, London, ECIV 4NP. Telephone: 01-837 2191.

[758-058 (1971) : 54]
LABORATORY TECHNICIAN required at Brixton School of Building, Ferndale Road, S.W.4, to work in the Department of Architecture. Candidates should have an interest in architecture and a knowledge of photographic techniques. 36 ¾ hour week. £1,011 to £1,46l, according to age (minimum 21) and qualifications, plus £126 London Weighting. Forms, returnable within 14 days, from the Senior Administrative Officer.

[758-059 (1971) : 54]
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry. For further details write or telephone: G.K. Bureau, 17 Shaftesbury Avenue, London. W.1. 01-734 7232. Interviews by appointment.
[758-060 (1971) : 54]
UWIST CARDIFF

RESEARCH ASSISTANT

for work on project involving assessment of magnetic materials by magneto-optical and other physical means. Candidate with degree or HNC preferred. The appointment is for three years.

Salary Range: £741 - £1,578 with superannuation.

Application form (returnable by 16th July) from Personnel Section, UWIST, Cardiff, CF1 3NU.

[758-061 (1971) : 54]
UNIVERSITY OF SOUTHAMPTON
LECTURESHIP IN SHIP SCIENCE

Applications are invited for a Lectureship in Ship Science. Applicants should have a good Honours degree, preferably in Naval Architecture, together with experience in the structural design of ships. The person appointed should take his or her duties on 1 October, 1971. Salary scale: £1,902 - £3,417 with a merit bar at £2,454. The initial salary will depend upon qualifications and experience. Further particulars may be obtained from the Deputy Secretary Section. (Tel. Ext. 2400) The University, Southampton, SO9 5NH, by whom applications (7 copies from United Kingdom applicants) should be received not later than 10 July, 1971, quoting reference NS/163/70A.

[758-062 (1971) : 54]
GLASSHOUSE CROPS RESEARCH INSTITUTE requires **Scientific Assistants** for physiological research. Minimum qualifications 4 G.C.E. “O” levels. Salary £718 (age 20) rising to £1,253. Superannuation scheme. Further details from Secretary, Glasshouse Crops Research Institute, Rustington, Littlehampton, Sussex.

[758-063 (1971) : 54]
THE UNIVERSITY OF WARWICK

English Electric Research Fellowship

Applications are invited for the above post in the School of Engineering Science. The Fellow will participate in the research activities of the School in areas of automatic control, noise and vibration or fatigue, for which excellent facilities are available. Appropriate post-graduate experience in one of these areas is desirable, and a higher degree is advantageous. Salary will be in the scale £1,491 x £138 - £1,767 (exceptionally) x £135 - £1,902 p.a. with F.S.S.U. The appointment is for a period of two years. Further particulars and application forms may be obtained from the Registrar, University of Warwick, Coventry CV4 7AL, quoting Ref. No. 47/2A/71. Closing date for applications is 30th July, 1971.

[758-064 (1971) : 54]
KING’S COLLEGE HOSPITAL MEDICAL SCHOOL
(University of London)
Denmark Hill, London, S.E.5
RESEARCH SCHOLARSHIP
(M.R.C.)
Graduate required for group studying gut innervation by physiological, pharmacological, histochemical and electron-microscopical methods. Apply Dr. Garrett, Department of Oral Pathology, Dental School. [758-065 (1971) : 54]
Research in Spectroscopy and Gas Kinetics **Fellowships / Studentships**

Applications are invited for two post-doctoral fellowships, one to study energy distribution amongst products of simple atom molecule reactions using infrared chemiluminescence techniques; the other in an associated group studying transient species by photoelectron spectroscopy. An interest in molecular dynamics and quantitative spectroscopy is desirable.

There are also two postgraduate studentships available in each of the above groups. Successful applicants for these will be required to register for a higher degree.

Salaries / grants will be in line with current S.R.C. rates. Applications should include a brief curriculum vitae and the names of two referees and should be sent to Dr. N. Jonathan. Department of Chemistry, The University, Southampton, SO9 5NH, quoting ref: NS.

[758-066 (1971) : 55]
STUDENTSHIPS

UNIVERSITY OF LANCASTER
DEPARTMENT OF ENGINEERING
New Development in Vehicle Transmissions. An **S.R.C. studentship** is available for study for a Ph.D. in connection with new forms of automatic transmission. This topic would suit a first-class or 2(i) Honours graduate in engineering (or perhaps physics or mathematics) who finds most academic research remote or narrow.

For further information and application forms write or telephone Prof. M. J. French, St. Leonard’s House, St. Leonard Gate, Lancaster (0524 65201).

[758-067 (1971) : 55]
THE UNIVERSITY OF SHEFFIELD
DEPARTMENT OF PATHOLOGY
Applications are invited for a Research Studentship in the above department to investigate the spread of neoplastic cells in lymphoid tissue. Tenable for one year from 1 September 1971 in the new laboratories at Weston Park Hospital where there is a full range of equipment including an electron microscope. Honours graduates in Biological Science will be preferred, and applicants must register for a Ph.D. Value £550 a year plus fees. Applications to the Registrar not later than 14 July 1971. Quote Ref: R.13/H.
[758-068 (1971) : 55]
THE UNIVERSITY COLLEGE OF WALES
Aberystwyth
DEPARTMENT OF PHYSICS
Applications are invited for post-graduate work in Ionosphere and Space Research. The Science Research Council is prepared to offer to suitable candidates a limited number of research studentships tenable in the Department.
Applications to Professor W. J. G. Beynon, Head of Department of Physics, University College of Wales, Aberystwyth.
[758-069 (1971) : 55]
RESEARCH STUDENTSHIP IN CHEMISTRY
Applications are invited for a Research Studentship in connection with work on the laser Raman spectra of high temperature gases and flames. Candidates must hold or expect to obtain a 1st Class or Upper 2nd Class Honours degree and will be expected to register for a higher degree. Applications, naming two referees, should be sent to Professor I. R. Beattie, Department of Chemistry, The University, Southampton, SO9 5NH, quoting ref: NS.
[758-070 (1971) : 55]
UNIVERSITY OF DURHAM  
Department of Chemistry  

POST-GRADUATE STUDENTS SHIPS  
Applications are invited for research studentships leading to Ph.D. degrees in the following fields.  
C.A.P.S. awards are available for: -  
(i) Carbanion chemistry involving fluorocarbon systems.  
(ii) Infrared studies of high pressure reactions or organometallic compounds.  
(iii) Inorganic cyclic sulphur-nitrogen chemistry.  
(iv) Organofluorine chemistry which may include work on polymers.  
(v) Inorganic Chemistry in non-aqueous solvents.  
Candidates should have a first or upper second honours degree or equivalent Grad. R.I.C. Applications, giving the names of two referees, should be made as soon as possible to Professor W.E.R. Musgrave, Department of Chemistry, South Road, Durham City.  
[758-071 (1971) : 55]
UNIVERSITY OF BRISTOL
SCHOOL OF CHEMISTRY
RESEARCH STUDENTSHIP
on the vibrational properties of Silicate glasses by inelastic neutron scattering and laser-raman spectroscopy.
Applications are invited for an S.R.C. studentship on the above topic, in collaboration with Pilkington Bros. Ltd., (Industrial Supervisor Dr. P. H. Gaskell). Applicants, who should have a first or upper second class honours degree in Chemistry or Physics, should contact Dr. A. J. Leadbetter, School of Chemistry, University of Bristol, Bristol RS8 1TS as soon as possible.
[758-072 (1971) : 55]
UNIVERSITY OF NEWCASTLE UPON TYNE
CHEMICAL ENGINEERING RESEARCH

A limited number of vacancies exist for graduates in pure or applied science to carry out research for M.Sc. and Ph.D. degrees. The department offers a wide range of research topics, including chemical process development, heat and mass transfer studies, reactor and electrochemical engineering, process control and fuel science.

Grants, of value equivalent to S.R.C. Research Studentships, are available to suitably qualified candidates possessing First or Upper Second Class Honours Degrees or equivalent.

Applications and enquiries should be addressed to: Dr. A. Mearns, Dept. of Chemical Engineering, University of Newcastle upon Tyne, Merz Court, Newcastle upon Tyne, NE1 7RU.

[758-073 (1971) : 55]
RESEARCH STUDENTSHIPS
Basic and Molecular Virology
Two vacancies are available for October, 1971 for graduates who have a first or upper second class honours degree in a biological science and who wish to work for a Ph.D. degree. The Institute has a large scientific staff and the current research programme covers the following fields:
Virus-specified nucleic acids and proteins; physiology and genetics of mammalian virus; tumour virology; electron microscopy of cells, viruses and nucleic acids; genetics of mammalian cells.
Applicants should send a Curriculum Vitae and the names of three referees not later than 15th July, 1971 to: Professor J. H. Subak-Sharpe, Institute of Virology, University of Glasgow.
[758-074 (1971) : 55]
UNIVERSITY OF SURREY
Guildford, Surrey

RESEARCH STUDENTSHIPS
Department of Electronic and Electrical Engineering
The Science Research Council is prepared this year to offer to suitable candidates a limited number of research studentships tenable at the University of Surrey, in the Ion Implantation Research Group and the Laser Applications and Telecommunications Research Group.
Recent graduates now working in industry, and those about to graduate with a good honours degree in Electrical Engineering, Electronics of Material Science, are invited to apply to Professor D. R. Chick, Head of the Department of Electronic and Electrical Engineering at the University

UNIVERSITY OF SURREY
Research in Radiation Studies
Well-qualified graduates are sought for the following research posts involving applications of ionising radiations. Financial support will be available for successful candidates.
a. A Collaborative Ph.D. student is required to work in conjunction with a Surrey nucleonics firm on the development and applications of solid state avalanche detectors.
b. A Ph.D. student is required to research into applications of radiation technology in the fields of either medicine or archaeology.
Further details can be obtained by writing or telephoning the Radiation Unit at the University. Tel: Guildford 71261 ext. 322.
[758-075 (1971) : 55]
Applications are invited for a **PH.D. STUDENTSHP** offered by the S.R.C. under their scheme for “Co-operative Awards in Pure Science”. The Research will involve the gas chromatography of amino acids.

Candidates should have a good B.Sc. degree in Chemistry or Biochemistry.

Applications (including curriculum vitae and the names of two referees) should be sent to Dr. A. Darbre, King’s College, Strand, London WC2R 2LS from whom further details may be obtained on request.

[758-076 (1971) : 55]
LECTURES, MEETINGS AND COURSES

THE POLYTECHNIC OF NORTH LONDON
Holloway, London, N7 8DB

DEPARTMENT OF CHEMISTRY
M.Sc. in Inorganic Macromolecules

This college offers a two or three year course of lectures and practical work held in the evenings only, leading to the degree of Master of Science of the Council for National Academic Awards.

Inorganic and semi-inorganic macromolecules will be studied in the context of inorganic and polymer chemistry. The course is intended for students possessing an Honours Degree in chemistry or an equivalent qualification.

Apply for further information to the Head of the Department of Chemistry.
[758-077 (1971) : 55]
SUNDERLAND POLYTECHNIC
Department of Physical Sciences (Physics Division)

RESEARCH STUDENTSHP (S.R.C. / C.A.P.S.)
Applications are invited for a C.A.P.S. studentship tenable for two to three years under the usual conditions of Science Research Council awards commencing 1st October 1971. The applicant must hold a First or Upper Second Class Honours Degree in Physics or related subject and will register for a higher degree. The research work will be concerned with property modifications induced by electrolysis in silica-alkali-aluminium glasses at intermediate temperature. Some periods will be spent in the Research and Development Laboratories of Pilkington Brothers at Lathom, Lancs.

Application forms and further details may be obtained from the Chief Administrative Officer, The Polytechnic, Chester Road, Sunderland SR1 3SD and should be returned to him not later than 14 days after the appearance of this advertisement.

[758-078 (1971) : 55]
UWIST CARDIFF
University of Wales Institute of Science and Technology

RESEARCH STUDENTSHIPS (TWO)
for computer recording and storage, and for studies of problems associated with the design and
construction of transformers and electrical machines. These studentships carry similar awards and
conditions to SRC grants and have the support of industrial organisations. Good Honours degree in
Physics, Metallurgy, Materials Science, or Electrical Engineering essential, and candidates are expected
to submit for a higher degree.
Details (quoting Ref. NS) and application forms (returnable by 12th July, 1971) from Academic
Registrar, UWIST, Cardiff CF1 3NU.
[758-079 (1971) : 55]
THAMES POLYTECHNIC
B.Sc. Honours Materials Science
A new 4-year course, including one year in industry, in the structure and properties of materials will start in September, 1971. The course leads to the B.Sc. Honours Degree of the Council for National Academic Awards.
The entry requirements are two G.C.E. A-level passes, including Physics or Chemistry, and a suitable standard in three other subjects, or an appropriate O.N.C. or O.N.D.

Further information and application forms from:
Tel: 01-854 9624
[758-080 (1971) : 56]
CRANFIELD
SHORT COURSES IN ENGINEERING DESIGN WITH POLYMERS
4th - 8th OCT.
ENGINEERING DESIGN WITH PLASTICS
25th - 29th OCT.
ENGINEERING DESIGN WITH RUBBER
8th - 12th NOV.
ENGINEERING DESIGN WITH FIBRE-REINFORCED PLASTICS
4th OCT. - 10th DEC.
POLYMER PHYSICS AND ENGINEERING

[758-081 (1971) : 56]
UNIVERSITY OF ESSEX
DEPARTMENT OF ELECTRICAL ENGINEERING SCIENCE
Vacancies exist for suitably qualified graduates for
RESEARCH LEADING TO THE DEGREE OF PH.D
Topics available include the following:
(1) Computer-aided circuit and filter design.
(2) Microwave components and antennas.
(3) Millimetre wave systems.
(4) Optical signal processing and switching.
(5) Viewphone and visual systems.
(6) Telecommunication systems.
(7) Circuit techniques.
(8) Medical Instrumentation.
(9) Display Systems.
(10) Algebraic system theory.
Studentships are available.
Applications should be addressed to: Professor G. B. B. Chaplin, Department of Electrical Engineering Science, University of Essex, Wivenhoe Park, Colchester, Essex. (Tel: 0206 5141).
[758-082 (1971) : 56]
THE ANNUAL MEETING of the British Section of the Combustion Institute will be held at the University College of Swansea on 21\textsuperscript{st} and 22\textsuperscript{nd} September, 1971. The subject of the meeting will be “Flames, Flammability and Fires” and there will be sessions on Fire Research and Flammability of Polymers on 21\textsuperscript{st} September and a session on Turbulent Flames on 22\textsuperscript{nd} September. Further particulars may be obtained from the Hon. Secretary, Professor C. P. Cullis, Department of Chemistry, The City University, London, E.C.1. (Telephone 01-253 43119 extension 367).

[758-083 (1971) : 56]
UNIVERSITY OF LEEDS
Mechanical Engineering Department

POSTGRADUATE STUDIES
Opportunities exist in the following fields:
Research for the degree of M.Phil or Ph.D. in Combustion Control, Fluid Mechanics, Heat Transfer,
Metal Forming, Stress Analysis and Tribology.
Advanced Courses for the degree of M.Sc. in Tribology (Lubrication, Friction and Wear), Combustion
and Explosion (with the Departments of Fuel and Combustion Science and Physical Chemistry) and
Exploitation of Materials (with the Departments of Metallurgy, Physics and Ceramics).
A number or S.R.C. grants will be available.
Further details from Dr. D. Bradley, Mechanical Engineering Department, The University of Leeds,
Leeds LS2 9JT.
[758-084 (1971) : 56]
SYMPOSIA

IMRU
Industrial Innovation
POLYMER COMPOSITES: FAILURE PROPERTIES AND THEIR IMPROVEMENT
A one-day micro-symposium of interest to chemists, physicists, engineers and technologists, intended

to reveal the deficiencies of existing composites and to indicate steps being taken to remedy these
deficiencies
Particle-, Fibre- and Whisker-Reinforced Rubbers and Plastics
Wood and Bone
Cement-Concrete-polymer Blends
Wear and Ablation

Lecturers are from industry and from the College.
DATE: MONDAY, 13th SEPTEMBER 1971 (10.00 – 17.30)
FEE: £10, including lunch and light refreshments.

Further details and application forms from INDUSTRIAL MATERIALS RESEARCH UNIT, Queen
Mary College, (University of London), Mile End Road, London E1 4NS. (Telephone: 01-980 9291 24-
hr Ansafone.)

[758-085 (1971) : 56]
APPOINTMENTS AND SITUATIONS VACANT

INSTITUTE OF CANCER RESEARCH
ROYAL CANCER HOSPITAL

JUNIOR TECHNICAL OFFICER required at Chester Beatty Research Institute, Fulham Road, S.W.3. to work in tissue culture laboratory on problems of gene regulation in cultured mammalian cells. Work will involve routine biochemical methods in addition to tissue culture techniques. Previous experience of tissue culture not essential but experience of general laboratory work desirable. Minimum qualifications: 2 A levels in Science subjects or equivalent. Salary according to age and experience in scale £769 - £1,631. Apply with names of 2 referees to the Secretary, 34 Summer Place, SW7 3NU quoting reference 301 B 431

[763-001 (1971) : 343]
TECHNICIAN OR SENIOR TECHNICIAN
required for the virus laboratory. Experience in general virology an advantage. Salary scale for Technician £1,059 - £1,383; Senior Technician £1,333 - £1,666. £90 London Allowance in addition. Applications in writing, stating age, sex, previous experience and the names and addresses of two referees, to The Secretary. INSTITUTE OF OPHTHALMOLOGY, Judd Street, London, WC1H 9QS. [763-002 (1971) : 343]
SCOTTISH AGRICULTURAL DEVELOPMENT COUNCIL

Principal Officer

Applications are invited for the post of Principal Officer of this Council which is to be set up in the Autumn 1971 with the main object at promoting and co-ordinating agricultural development work in Scotland which is carried out mainly by the three Agricultural Colleges. The Council will be drawn from the Colleges, agricultural research institutes in Scotland and the farming community and will be financed through grant-aid by the Department of Agriculture and Fisheries for Scotland. Its offices will be in or near Edinburgh. The Principal Officer will be the executive head of the Council’s staff which will include a Secretary and a small number of agricultural specialists who will liaise with the Colleges and other publicly financed bodies which carry out development work. He must have a good relevant university degree, a sound grasp of agricultural research and its application to farming practice and considerable administrative talent. The salary will be on a scale from £4,695 to £5,240.

Application forms and further particulars may be obtained from The Secretary, Department of Agriculture and Fisheries for Scotland, St. Andrew’s House (Room 64) Edinburgh EH1 3DA.

Closing date for applications will be 30 September 1971.
IMPERIAL COLLEGE

LECTURER IN INDUSTRIAL HAZARDS

Applications are invited from those with a good Honours degree and with postgraduate experience in science engineering. Applicants must be interested in the development of basic research in relevant fields and must contribute to undergraduate teaching in Chemical Engineering. The department has a large research school with excellent facilities. Salary in the lecturer scale plus London Allowance and F.S.S.U. Applications in confidence giving full curriculum vitae together with names and addresses of referees to: Professor A. R. Ubbelonde, C.B.E., F.R.S., Head of Department of Chemical Engineering and Chemical Technology, Imperial College, London S.W.7.

[763-004 (1971) : 343]
Applications are invited from Organic Chemists for a **post doctoral appointment** for research on the Chemistry and Biosynthesis of Fungal Antibiotics. The appointment would be initially for one year (with possible renewal) at a salary of £1,491 per annum, F.S.S.U. Further details may be obtained from Dr. N. J. McCorkindale, Department of Chemistry, The University of Glasgow, Glasgow, W.2. In reply, please quote Ref. No. 5056N.

[763-005 (1971) : 343]
UNIVERSITY OF LEEDS
Applications are invited for vacancies in the following Departments:

MECHANICAL ENGINEERING

RESEARCH ENGINEER
To take over a project concerned with high-speed, oil-free refrigeration compressors. The appointment is for one year in the first instance. Salary up to £1,759 according to qualifications and experience.
Reference Number: 32/18/E.

CAREERS AND APPOINTMENTS SERVICE
ASSISTANT FOR TECHNICAL VACATION WORK
Candidates should be graduates with industrial experience to be responsible for helping students in pure and applied science to obtain suitable practical experience during the long vacations. The work will require to be carried out in close co-operation with the relevant academic departments. Salary on a scale rising to £2,454 according to qualifications and experience.
Reference Number: 71/2/E.

Forms of application and further particulars of the posts can be obtained by writing to The Registrar, The University, Leeds LS2 9JT, quoting reference number. Applications should be returned to the Registrar as soon as possible.
[763-006 (1971) : 344]
SOUTHAMPTON TECHNICAL COLLEGE
Department of General Studies
Required, SENIOR SCIENCE LABORATORY TECHNICIAN. The duties include the supervision of two technicians, the maintenance of apparatus for Physics, Chemistry and Biology and routine servicing of the laboratories.
Candidates should have had previous laboratory experience in education or industry and must hold the City and Guilds Science Laboratory Technicians Advanced Certificate, Associateship of the Institute of Science Technology or a recognised equivalent qualification.
Application forms obtainable from the Registrar, Southampton Technical College, St. Mary Street, Southampton, returnable as soon as possible.
[763-007 (1971) : 344]
THE UNIVERSITY OF MANCHESTER
DEPARTMENT OF BOTANY

Applications invited from graduates for the post of **Research Assistant** to work with Dr. J. A. Lee on the ecology of inland salt marshes. The post, financed by N.E.R.C. is for one year in the first instance, from September 1st 1971 with possible extensions for a further two years. Salary: £950 p.a. The person appointed may be able to read for a higher degree. Particulars and application forms (returnable by August 16th) from the Registrar. The University, Manchester M13 9PL. Quote ref: 151/71/NS.

[763-008 (1971) : 344]
MALE TECHNICIANS required for Department of Anatomy for the maintenance and efficient organisation of the gross anatomy and postmortem rooms. Duties include preserving, storing and handling of specimens and the handling and care of livestock. Department of Pathology, Gnotobiotic Unit. Duties include preparation of isolators, care of animals. Salary Scale - £1,166 - £1,535 p.a. (London Weighting included). Applications to the Assistant Secretary, The Royal Veterinary College, Royal College Street, London. NW1.

[763-009 (1971) : 344]
GOVERNMENT OF NORTHERN IRELAND

SENIOR SCIENTIFIC OFFICER/SCIENTIFIC OFFICER

Applications are invited for a permanent and pensionable post in the Biometrics Division of Ministry of Agriculture.

Duties:
A major aspect of the work will be concerned with the development, specification and implementation of computer based systems for handling scientific and other data associated with research and development and with specification of systems such as that used in farm census work.

Qualifications:
A good honours degree preferably in mathematics or statistics. Applicants for the higher grade will be expected to have appropriate postgraduate experience.

Salary Scales: (under review)
Senior Scientific Officer £1,162 - £1,982
Scientific Officer £2,193 - £2,703
Grading and entry point will be related to qualifications and experience.

Please send now for an application form to the Secretary, Civil Service Commission, Clarendon House, Adelaide Street, Belfast, BT2 8ND (tel 27963 ext 26). Completed applications should be returned by 26 August 1971.

Please quote SB121/71/71.
[763-010 (1971) : 344]
Senior Analytical Biochemist

The Clinical Pharmacology Department of Beecham Research Laboratories is creating an Analytical Section within the Drug Metabolism Unit and seeking an experienced analytical biochemist to direct the work of the section.

The person appointed will be responsible for a team of graduates and assistants involved in the development and application of methods for the analysis of pharmacological compounds in biochemical systems. The post requires extensive knowledge and practical experience of modern techniques. A generous salary will be offered, together with attractive fringe benefits.

Please apply briefly, stating age, qualifications and experience to:
Head of Personnel Department,
Beecham Research Laboratories,
The Pinnacles Fourth Avenue,
Harlow, Essex

BRL 1971
[763-011 (1971) : 344]
BEECHAM RESEARCH LABORATORIES
PERSONNEL OFFICER
Research Laboratories
A young man or woman is required to take responsibility for the provision of the personnel services for a site for the South of London. This is a new appointment and the successful applicant will be responsible for the recruitment and personnel services of staff up to and including postgraduate degree level. In addition, the personnel officer will be assigned certain projects, for instance review of selection and salary review procedures, job evaluation techniques, and involved in the appraisal and training scheme implemented for the site.
An imaginative individual with sound judgement is required, who is not afraid to take decisions. It is desirable that the person concerned has either a degree in Biological or Chemical Sciences, or alternatively, a degree in Social Sciences, with some experience preferably in a Personnel Department. A generous starting salary will be paid in line with qualifications and experience. There are sound prospects for promotion to a more senior appointment within the Group. The Company will also consider payment of removal expenses to married men, and there are generous fringe benefits. Please apply to Head of Personnel Department, Beecham Research Laboratories, Brockham Park, Betchworth, Surrey.
[763-012 (1971) : 344]
UNIVERSITY OF EXETER
Department of Biological Sciences

ELECTRON MICROSCOPIST
Applications are invited from Science Graduates or Technicians for the post of Experimental Officer in Electron Microscopy. The successful candidate, who should have previous experience of electron microscopy, will be responsible for the day-to-day running of a new electron microscope laboratory, which will be equipped in the first instance with a high resolution transmission electron microscope. Salary will be within the range £1,277 - £2,040 with F.S.S.U. Further details may be obtained from the Secretary of the University, Northcote House, The Queen’s Drive, Exeter, EX4 4QJ, to whom applications should be sent by 20th August 1971. Please quote reference no. 1/13/7033.

[763-013 (1971) : 344]
Applications invited for the post of technician in the ENZYME TECHNOLOGY GROUP. One of the studies of this interdisciplinary group concerns the immobilisation of enzymes to permit their retention in catalytic reactors for medical and industrial application. The chemistry of immobilisation is a large and rapidly growing field and the successful applicant would be called upon to assist in the preparation of immobilised derivatives and their use in reactor systems. Salary in range £1,041 to £1,410 plus £125 London Weighting Application forms from Personnel Officer (Technical Staff EB11), Gower Street, London WC1E 6BT.
[763-014 (1971) : 344]
Applications are invited for a post as **Scientific Assistant** to work with biologists studying the ecology and physiology of benthic invertebrates. Work varied and interesting and suitable for either sex. Qualifications: minimum of four passes at “O” level, including English and a Mathematical or Science subject. Post is superannuable. Application form and particulars of salary and conditions may be had on written application from the Director, Dunstaffnage Marine Research Laboratory. P.O. Box 3. Oban, Argyll, Scotland.

[763-015 (1971) : 344]
Scanning Electron Microscopist – Probe Analyst
The Materials Science Division of ERA has a vacancy in the Structure Unit for a scanning electron microscopist, preferably with experience of wavelength dispersive X-ray analysis. The Structure Unit provides a service to scientists both within ERA and in industry, and thus the person appointed will be working with a variety of people in several fields. Formal academic qualifications are of less importance than technical competence, but a background in X-ray analysis, materials science or electronics to at least HNC would be advantageous. Training will be given if required. The appointment will be made in grades carrying salaries in the range £1,154 - £1,827 or £1,268 - £2,368 according to age and experience. Please apply to:
Mr G. J. Dempsey
Personnel Manager
Electrical Research Association
Cleeve Road, Leatherhead, Surrey.
Telephone: Leatherhead 74151
[763-016 (1971) : 345]
THE WEST OF SCOTLAND AGRICULTURAL COLLEGE

Applications are invited for the following posts from candidates with the Qualifications noted:

1. **Lecturer** in Botany. A Degree in Horticultural Botany or Horticultural Science and, preferably, an interest in Crop Physiology. Duties will include lecturing, etc. to students in Horticulture and cognate subjects. Facilities available for higher degree research.

2. **Assistant Plant Pathologist**. A Degree in Botany with, preferably, specialization in Plant Pathology. Duties will include routine diagnostic work and investigation.

Salary (dependent on age, qualifications and experience) will be on one or other of the following Grades:

- Grade IV - £1,128 (Honours £1,162) rising to £1,612
- Grade III - £1,754 rising to £2,749

Conditions of appointment and application forms are available from the secretary, Auchincruive, Ayr, with whom applications should be lodged not later than 16th August, 1971.

[763-017 (1971) : 345]
OXFORD UNIVERSITY
Department of Engineering Science

RESEARCH FELLOWSHIP IN FLUID MECHANICS
Applications are invited from candidates with a science degree to work on wake hydrodynamics. The project entails work at Oxford and at the Ship Division, National Physical Laboratory, and is supported by the Science Research Council for an initial period of two years.
Salary in the range £1,491 to £3,003 with superannuation under the FSSU scheme.
Applications to be submitted by 26th September 1971 to the Administrator, Department of Engineering Science, Oxford University, Parks Road, Oxford.
[763-018 (1971) : 345]
MEDICAL RESEARCH COUNCIL
The Engineering Department of the National Institute for Medical Research requires an **Electronic Engineer** to develop devices for instrumentation and control in medical research laboratories. A new electronics Laboratory is being fitted out, and the post provides an opportunity for interesting work in a worth-while field. Experience of electronic development is essential.
Salary and status would depend on qualifications, but initially would be on a scale reaching £2,611. Apply quoting our reference N.S.1 and giving details of past experience to: Mr. J. H. Woodcock, Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA.
[763-019 (1971) : 345]
TECHNICAL OFFICER (Electronics) is required to develop new electronic equipment for research on the human nervous system. Some knowledge of computer programming desirable. Medical Research Council post. Applicants should be 30 or over (B.Sc. in electronics or equivalent essential), but if under 30 and suitably qualified, would be considered for post of Junior Technical Officer. Please apply in writing, to Dr J. A. V. Bates, National Hospital, Queen Square, London, WC1N 3BG.
[763-020 (1971) : 345]
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools, and industry. For further details write or telephone: G.K. Bureau, 17 Shaftesbury Avenue, London, W.1. 01-734 7232. Interviews by appointment.
[763-021 (1971) : 345]
INSTITUTE OF OPHTHALMOLOGY
(University of London)
Judd Street, London, WC1H 9QS
DEPARTMENT OF PATHOLOGY
REQUIRED IMMEDIATELY: 1 Senior Technician and 1 Technician with experience in Electron Microscopy to join the research staff of the above Department in studying the ultra-structure of eye disease.
Apply in writing, stating age, sex, qualifications, experience and giving names of two referees to: The Director, Department of Pathology, at the above address.
[763-022 (1971) : 345]
Science graduates – connoisseurs of the significant

The information explosion started in science. Discoveries and developments proliferate at such a pace that the problems involved in getting the right information to the right people – before it’s out of date – are staggering.

Our information services to physicists and engineers lead the world. To cope with increasing demand we must strengthen our staff of discriminators – the people who select, edit and classify the relevant material from the enormous mass of information available.

Besides being responsible for the input in the computer data base, from which all our services are generated, you will write computer-search profiles for SDI – Selective Dissemination of Information. Our other services include INSPEC topics, science abstracts, current papers and magnetic tapes.

Promotion prospects excellent – you’ll be in the middle of the information explosion. Location: new, extensive, purpose-built offices in Hitchin, Harts.

Please write with brief details to:
The Personnel Manager,
Institute of Electrical Engineers,
Savary Place, London WC2 0BL.
[763-023 (1971) : 345]
UNIVERSITY COLLEGE
RESEARCH ASSISTANTSHIP OR POST DOCTORAL FELLOW

Applications are invited from graduates or immediate post-doctoral workers with interests in protein biochemistry to join a project financed by the Tenovus Foundation in which possible changes in the protein components of plasma membranes as a result of cell transformation are being investigated. The appointment is tenable for one year in the first instance to start as soon as possible. Salary range £1,320 p.a. or £1,491 - £1,767 p.a. Further details may be obtained from Dr. H. W. Thomas, Department of Physiology, University College, P.O. Box 78, Cardiff, CF1 1XL, to whom a curriculum vitae and the names of two referees should be sent as soon as possible.

Please quote 0073.

[763-024 (1971) : 345]
GUY’S HOSPITAL MEDICAL SCHOOL

**Technician** (with A.I.M.L.T. or equivalent qualification) required to assist in clinical and laboratory research in the cardiopulmonary field in the Department of Anaesthetics. Experience of blood-gas and physiological measurement an advantage. Salary at present up to £1,443 plus £90 London Weighting according to experience. Further details obtainable from Dr R. F. Seed, Senior Lecturer, Department of Anaesthetics, Guy’s Hospital. Applications to the Secretary, Guy’s Hospital Medical School, London Bridge, S.E.1, quoting Ref. A.N.

[763-025 (1971) : 345]
STOKE MANDEVILLE HOSPITAL
Aylesbury, Bucks
BIOCHEMIST (Basic, Probationary or Post Probationary) required to work in Pathology Laboratory under supervision of Top Grade Biochemist. The post offers the experience and opportunities required for taking a higher qualification. The laboratory is modern and well equipped, and may be viewed by arrangement with the Biochemist. Applications with age, qualifications, experience and two names for reference to the Administrative Officer.
[763-026 (1971) : 345]
TECHNICAL ASSISTANTS GRADE 1.
We have a vacancy for a Technical Assistant in the Technical Department at our Atlas Road Factory. Applicants should have a working knowledge of meat handling and processing, some science, and preferably some statistics. The position would involve ad hoc investigations with regard to the process. He should be able to supervise other personnel if necessary, and have a good manner to liaise with Management. Applications in writing should be addressed to Mrs. M. Lawrey, Clerical Recruitment Officer, T. Wall & Sons (Meat and Handy Foods) Limited, Atlas Road, Willesden London NW10 6DJ. [763-027 (1971) : 345]
WOLLONGONG UNIVERSITY COLLEGE
University of New South Wales

**LECTURER METALLURGY**

Salary $A6,697 range $A9,286 per annum. Commencing salary according to qualifications and experience.

Applicants should have a distinguished academic record with their first degree in either metallurgy or chemical engineering, experience in any aspect of chemical reaction engineering would be an advantage. The successful applicant will assist in presenting the course in chemical and extractive metallurgy and will be encouraged to participate in the research activities of the Department.

The current research programme in chemical and extractive metallurgy is mainly concerned with flow phenomena in packed beds and with aspects of solidification.

Details of appointment including superannuation, study leave and housing scheme may be obtained from the Secretary-General, Association of Commonwealth Universities (Appts.), 96 Gordon Square, London WC1H 0PF. (Tel: 01-387 8572).

Applications close in Australia and London on 20 September.

[763-028 (1971) : 346]
UNIVERSITY OF DURHAM

SENIOR RESEARCH ASSISTANT IN THE DEPARTMENT OF BOTANY

Applications are invited for the post of SENIOR RESEARCH ASSISTANT in the Electron Microscope Laboratories of the Department of Botany, to start on October 1971 or thereafter, as mutually greed. Duties will include participation in research on fine structure and function of fungi and other organisms, and collaboration in the design and the interpretation of the results of research undertaken in the Department.

The post will be for two years in the first instance, and the salary will be £1,440 per annum with F.S.S.U. benefits and with increments of £105 per annum.

Applications (3 copies) together with the names and addresses of two referees, should be sent not later than 25 August 1971 to the Registrar and Secretary, Old Shire Hall, Durham, from whom further particulars may be obtained.

[763-029 (1971) : 346]
WELLCOME INSTITUTE OF COMPARATIVE PHYSIOLOGY
ZOOLOGICAL SOCIETY OF LONDON

Laboratory Technician required to assist in reproductive studies, September 1971. Experience in histological techniques advantageous. Salary in range £615-£1,299 according to age, qualifications and experience. Write, giving full details, to Establishment Officer, Zoological Society of London, Regent’s Park. London. NW1 4RY.

[763-030 (1971) : 346]
JUNIOR TECHNICIAN OR TECHNICIAN required for Electron Microscopy Unit of Dept. of Neuropathology. This is a newly built dept. fully equipped with modern apparatus. The work is mainly concerned with research in the central and peripheral nervous systems. No previous experience in electron microscopy is required and every facility would be afforded the successful applicant for further qualification. Whitley Council Conditions. Application forms obtainable from the Secretary, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE5 8AF (Ref. NP).

[763-032 (1971) : 346]
MRC
Science Graduate is required by
MEDICAL RESEARCH COUNCIL
in their Headquarters Office

If you are a science graduate with a first or good second class honours degree, age 32 or over, and would like to make a career in the administration of research, a post of Scientific Administrative Officer in the MRC Headquarters Office in London will be of interest to you. Research experience in fields associated with medicine – including social science – and a research degree would be an advantage.

The Medical Research Council is the main government agency responsible for the promotion of medical research and sponsors an extensive programme both at home and abroad. The vacant post will be concerned primarily with part of the Council’s nonclinical activities which include such subjects as physiology, psychology, genetics, immunology, microbiology and molecular biology. The work will include liaison with members of the Council’s scientific staff and others active in the relevant research field, participation in scientific committee and conference activities, and provision of general assistance and advice within the Council’s administrative organisation.

Salary will be in the range of £2,995 to £4,077 per annum, with provision for superannuation. The appointment will be to the Council’s established staff, subject to satisfactory completion of a probationary period of two years.

Applications, which will be treated in strict confidence, should give full personal and career details and explain why you consider that you may be suitable to fill this post, and should be sent to Miss M. Walton, Medical Research Council, 20 Park Crescent, London. W1N 4AL telephone 01-636 5422, together with the names and addresses of two professional referees. Closing date for applications is 25 August 1971.

Please quote E.2/487.
[763-033 (1971) : 346]
ECONOMISTS
£1,983 to £2,433

The main duties of the Economics and Forecasting Section are to prepare short and long term forecasts of electricity requirements by all types of customers. As part of these duties, the Section undertakes research and forecasting methods and prepares forecasts of national economic development. It also provides an economic advisory service covering a wide range of commercial and technical aspects of the industry’s work.

One successful applicant is likely to be placed in the Group concerned with the economic advisory service and experience in macroeconomic forecasting would be valuable. The other could be in the Group concerned with domestic and commercial customers. Computer facilities are available.

Candidates should have a degree or equivalent in economics with mathematics and statistics or in engineering with commercial experience and an interest in business economics.

Practical experience in the electricity supply industry or other business organisation is preferred.

N.J.B. Conditions of Service.
Write, giving full personal and career details and quoting NS/79/71 by 13th August 1971 to:
Howard Bussey, Personnel Officer

the electricity council
30 Millbank, London, SW1P 4RD

Queen’s FELLOWSHIPS in Marine Science

To commemorate the Royal Visit to Australia in 1970 the Australian Government established the Queen’s Fellowships Scheme. Under this scheme up to five fellowships may be awarded each year for full-time research by young scientists of exceptional promise and proved capacity for original work. These awards are tenable at the Australian Institute of Marine Science, Townsville, an Australian university or approved research institution normally for two years. Tenure of a Fellowship is expected to commence within nine months of the announcement of the award.

QUALIFICATIONS Queen’s Fellows should have a Ph.D., or equivalent qualifications, or equivalent research or professional experience, in a discipline applicable in marine science. Awards will, in general, be restricted to applicants who are not more than 30 years of age on the date when applications close.

• STIPEND $7,000 (Australian) per annum - increased to $7,500 per annum at age 28 years.
• ALLOWANCES are payable in respect of a Fellow’s wife ($500 p.a.), each dependent child ($200), superannuation payments (up to 10% of stipend), appropriate insurance coverage and necessary travel expenses. Host institutions are paid an allowance towards the cost of setting up the fellow and his research work.

APPLICATIONS U.K. residents interested in applying for the above fellowships should obtain application forms and a statement of the conditions of award from the Education Liaison Officer, Canberra House, 10-16 Maltravers Street, London W.C.2. Applications for the awards, which will be announced in DECEMBER 1971, close on 16 SEPTEMBER 1971.

[763-046 (1971) : 347]
TWO TECHNICIANS (one temporary) required in Immunology Department for tissue culture studies
of nucleoprotein synthesis in antibody-producing cells. Background in either biochemistry or tissue
culture would be an advantage. Salary scale £1,221 - £1,464 p.a. Apply Secretary, St. Mary’s Hospital
Medical School, Paddington, London, W.2, giving names of two referees.

Commonwealth of Australia
AUSTRALIA
Queen Elizabeth II FELLOWSHIPS in Physical and Biological Sciences

To commemorate the Royal Visit to Australia in 1963 the Australian Government established the Queen Elizabeth II Fellowships Scheme. Under this scheme up to ten fellowships may be awarded each year for full-time research by young scientists of exceptional promise and proved capacity for original work. These are post-doctoral awards tenable in an Australian university or approved research institution normally for two years. Tenure of a Fellowship is expected to commence within nine months of the announcement of the award.

QUALIFICATIONS Queen Elizabeth II Fellows must be either Australian or United Kingdom citizens. They should have a Ph.D., or equivalent qualifications, in one of the physical or biological sciences (which are deemed to include mathematics and the scientific aspects of statistics, engineering, metallurgy, agriculture and medicine).

Awards will, in general, be restricted to applicants who are not more than 30 years of age on the date when applications close.

- STIPEND $7,000 (Australian) per annum increased to $7,500 per annum at age 28 years.
- ALLOWANCES are payable in respect of a Fellow’s wife ($500 p.a.), each dependent child ($200), superannuation payments (up to 10 per cent of stipend), appropriate insurance coverage and necessary travel expenses. Host institutions are paid an allowance towards the cost of setting up the fellow and his research work.

APPLICATIONS U.K. residents interested in applying for the above fellowships should obtain application forms and a statement of the conditions of award from the Education Liaison Officer, Canberra House, 10-16 Maltravers Street, London W.C.2. Applications for the awards, which will be announced in DECEMBER 1971, close on 16 SEPTEMBER 1971.

STUDENTSHIPS

CRANFIELD
Research Into the Effects of Environment on Metal Fatigue
Applications are invited for Research Studentships in the Department of Materials to work on the effects of frequency and environment on the high temperature fatigue properties of structural commercial alloys, used in the chemical engineering and aviation industries. S.R.C. support for these Studentships is available and the Student will be registered for a Cranfield Ph.D. Suitably qualified physicists, metallurgists or engineers with 1st or 2nd class honours degrees or equivalent qualifications are invited to write for further information to:
Professor P. Hancock Department of Materials
Cranfield Institute of Technology Cranfield Bedford
There are also research opportunities in the following fields:
Engineering properties of plastics Welding Technology
Superplasticity and sheet metal deformation problems
[763-050 (1971) : 348]
THE UNIVERSITY OF MANCHESTER INSTITUTE OF SCIENCE & TECHNOLOGY

RESEARCH STUDENTSHPs

In connection with an N.E.L sponsored research project on the condensation of vapours from gases and the design of suitable condensers for this process, applications are invited for two research studentships valued at S.R.C. rates. Candidates should at least hold a second class honours degree in Chemical Engineering or its equivalent.

Applications should be addressed as soon as possible to: Professor G. L. Standart, Department of Chemical Engineering, THE UNIVERSITY OF MANCHESTER INSTITUTE OF SCIENCE & TECHNOLOGY, Manchester M60 1QD

[763-051 (1971) : 348]
PAISLEY COLLEGE OF TECHNOLOGY

A

RESEARCH STUDENTSHIP

is available for study leading to a higher degree in the field of Flow Induced Vibrations in Tube Bundles. Applications are invited from candidates possessing a good Honours degree or equivalent in Engineering, Physics or Mathematics.

All enquiries and applications should be addressed to Dr. A. M. Petrie, Mechanical Engineering Department, Paisley College of Technology, High Street, Painsley, Renfrewshire.

[763-052 (1971) : 348]
Applications are invited for two S.R.C. / C.A.P.S. RESEARCH STUDENTSHIPS in the Department of Applied Physics. One involves the study of gas flows using laser scattering in collaboration with Ideal Standard Ltd. The second is a study of laser breakdown in liquids, in collaboration with the Electricity Research Council. Candidates should have a first or upper second class honours degree.

Applications, with the names of two referees, should be sent as soon as possible to Dr. B. J. Rye, Department of Applied Physics. The University, Hull, HU6 7RX, from whom further details can be obtained.

[763-053 (1971) : 348]
LECTURES, MEETINGS AND COURSES

Electronics AND Power?

Certainly! The electrical power engineer must have a thorough understanding of electrical machinery, and must also be competent in the electronics and logic circuit technology of modern instrumentation and control.
The Honours Electrical Engineering Degree and the Ordinary Degree in Electrical and Electronic Engineering at North Staffordshire Polytechnic provide the foundation for worth-while careers in Power Engineering.
For the electronics specialist the department offers a highly successful Honours Degree in Electronic Engineering.
For full details apply to the Head of the Department, Electrical and Electronic Engineering, North Staffordshire Polytechnic, Beaconside, Stafford.
[763-054 (1971) : 348]
APPOINTMENTS AND SITUATIONS VACANT

THE EDINBURGH SCHOOL OF AGRICULTURE

Applications are invited for a post of

LECTURER IN SOIL SCIENCE

Applicants should have a good honours degree in Chemistry, Soil Science, or equivalent. The appointment will be made at commencing salary of

Grade IV £1,162 - £1,612

or

Grade III £1,754 - £2,749

according to qualifications. These scales under review. F.S.S.U. There will be an opportunity to work for a further degree. Further particulars and application form from The Secretary, The Edinburgh School of Agriculture, West Mains Road, Edinburgh, EH9 3JG.

[767-001 (1971) : 541]
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry. For further details write or telephone: G.K. Bureau, 17 Shaftesbury Avenue, London, W.1. 01-734 7232. Interviews by appointment.
[767-002 (1971) : 541]
UNIVERSITY OF NEWCASTLE-UPON-TYNE
SCHOOL OF PHYSICS
OPPORTUNITIES FOR RESEARCH STUDENTS
Applications are invited from graduates with a first-class or upper second degree in mathematics, physics or geology to take part in various research projects in the Department of Geophysics & Planetary Physics. Opportunities exist in lunar and planetary studies, the history of the Earth’s rotation (palaeontological growth ring studies) and geophysical studies of the East African rift system. Applications should be sent as soon as possible to Mr. W. F. Mayor, School of Physics, The University, Newcastle-upon-Tyne, NE1 7RU.
[767-003 (1971) : 541]
RESEARCH DEMONSTRATOR in Physical Geography, University of Reading. The successful candidate will be expected to register for a Higher Degree and will be required to assist in undergraduate laboratory and field classes. Salary £800 x £25 - £850. Apply with names of two referees, by 10th September 1971 to Professor R. A. G. Savigear, Department of Geography, University of Reading, Whiteknights, Reading RG6 2AH.
[767-004 (1971) : 541]
UNIVERSITY OF BRADFORD
Postgraduate School of Studies in Medical and Surgical Sciences.

Honours graduate required to continue investigations on the lysosomal enzymes of the human invertebral disc, in close collaboration with the Orthopaedic Department of the Bradford Royal Infirmary. The successful candidate will be expected to register for a higher degree. Studentship value £550 p.a. plus approved fees.

Application forms obtainable from the Registrar, Post MSS/RS/BR1/L University of Bradford, Yorkshire BD7 1DP.

[767-005 (1971) : 541]
A Senior Technician is required in the Division of Parasitology. Candidates should have knowledge of biochemical techniques and instrumentation and experience in microbiology, particularly parasitology, would be an advantage. Salary on scale £1,448 - £2,399, depending on age, qualifications and experience. Please apply to Mr. P.A. Collingridge, quoting reference NS/114/Para [767-006 (1971) : 541]
Rothamstead Experimental Station
Harpenden, Herts.
Statistics Department

Assistant Experimental Officer to supervise the analysis of results of crop and livestock experiments: the Station has a computer. Applicants should have degree or equivalent qualification in mathematics or statistics with some knowledge of agriculture or biology, or degree in economics or agricultural science with knowledge of Statistics.

Salary according to age in scale £946 - age 21, £1,311 - age 26 or over, to £1,578. Superannuation.

Applications giving names and addresses of two referees and quoting reference 2152 to The Secretary by 24th September 1971.

[767-007 (1971) : 541]
SEALE-HAYNE AGRICULTURAL COLLEGE
Newton Abbot, Devon

TECHNICIAN required for Physics and Chemistry Laboratories. CGLI/1st/HNC or equivalent qualifications preferred. Interest in instrumentation essential. Salary £1,194 x 36 to £1,302 per annum. Applications to Mr. B. M. Dougall Head of Chemistry Department.

[767-008 (1971) : 541]
Ministry of Agriculture, Fisheries and Food
Food Research Institute, Norwich

**Organic Chemist**
required to work on a project concerned with the development of sensitive analytical methods for the
detection, isolation and measurement of organic compounds (other than nitrosamines) which may be
formed from nitrites in foods. The project is expected to last for about three years.

Candidates should have a degree in a chemical subject with post-graduate experience in modern methods
of organic analysis, preferably with food or other natural products.

Appointment will be as Scientific Officer.
Application Forms from Miss A. S. McEwan, Ministry of Agriculture, Fisheries and Food, Room 619,
Great Westminster House, Horseferry Road, London S.W. 1
Closing date: 1st October 1971.
[767-009 (1971) : 542]
Department of the Environment
Transportation Planning

The Department’s Mathematical Advisory Unit is one of the United Kingdom’s leading transportation planning research centres and employs some 30 professional scientists and economists together with supporting staff. There are now several vacancies in teams carrying out important transportation planning projects, and developing the associated methodology, including mathematical and economic computer-based models.

Current work includes studies of the inter-urban highway system, an urban transportation study, and the development of new software packages.

Applicants should have a degree in mathematics, statistics, engineering, operational research, computer science or an allied discipline. For some posts several years relevant experience is required but for others new graduates will be suitable.

Successful candidates will be appointed as either Scientific Officer or Senior Scientific Officer according to age and experience.

Application Forms and further details from Establishment Personnel 4C, Room 8/177, St. Christopher House, Southwark Street, London, SE1 or telephone 01-928 7999 ext 3083. Closing date: 24th September 1971.

[767-010 (1971) : 542]
Department of the Environment

**Geologists**
are required for at least two posts in the Department’s Planning Division. The successful candidates will be concerned with giving advice and preparing memoranda on geological aspects of planning; with environmental problems associated with the working of minerals; and the distribution of minerals and their economic importance.

Candidates should have a degree in Geology, preferably with some training in Geography, or an equivalent qualification.

Appointment will be as **Scientific Officer** or **Senior Scientific Officer**. For appointment at the senior level candidates must have had at least three years appropriate experience, ideally in the minerals industry or in local authority planning work.

Non-contributory pension scheme.
Application Forms from Civil Service Commission, Alencon Link, Basingstoke. Hants, telephone Basingstoke 29222 extension 500 or London 01-839 1696. (24 hour ‘Ansafone’ service).

Please quote reference: S52-53/L6/F.

Closing date: 27th September 1971.
[767-011 (1971) : 542]
Marine Laboratory, Aberdeen

**Physicist / Electrical Engineer**
to take charge of a small group concerned with general instrumentation in fisheries research. The initial emphasis will be on undersea optical problems and will involve collaboration with biologists concerned with the visual capacity of fish. Although based at Aberdeen, the duties will occasionally require periods of duty at sea on research or commercial fishing vessels.

Appointment will be at **Scientific Officer** or **Senior Scientific Officer** level according to age, qualifications and experience. For appointment at the senior level candidates should have at least three years postgraduate experience.

Prospects of permanent pensionable appointment and of promotion.

Application Forms from Scottish Office Establishment Division, Room 171, St. Andrew’s House, Edinburgh EH1 3BX.

Please quote: SOED/68/71/F.

Closing date: 9th October 1971.

[767-012 (1971) : 542]
Department of the Environment
Archaeological Science

There are vacancies for a chemist, a pedologist and a geologist/palynologist at the Department’s Ancient Monuments Laboratory in Central London.

The work includes the examination of archaeological finds using a variety of techniques (e.g. chemical, metallurgical and microscopical); studies in ancient and historical metal and pottery technology; and pedological, botanical and zoological investigations of the environment.

Appointments will be at either Experimental Officer or Assistant Experimental Officer level according to age and experience. Candidates should have a degree or equivalent qualification in geology, chemistry or soil science together with some botanical training, whilst those wishing to be considered for the higher grade post must have experience of dealing with archaeological material.

Salary: Assistant Experimental Officer - £1,195 (at 22) - £1,486 (at 26) - £1,753.
Experimental Officer - £1,900 - £2,352. Non-contributory pension scheme.
Age: AEO under 28, EO normally 26-31.

Application Forms from Civil Service Commission,
Alencon Link, Basingstoke, Hants, telephone Basingstoke 29222 extension 500 or London 01 -839 1696
(24 hour 'Ansafone' service)
Please quote: S94-95/L7/F.

Closing date: 27th September 1971

SCS
Qualifications, Salaries and Age Limits
For appointment to the Scientific Officer class you should have a 1st or 2nd honours degree; and for the Experimental Officer class a degree, or equivalent. Starting salaries, which will be dependent upon experience and age, are within the range £1,162 - £2,703 for the Scientific Officer class (£2,193 - £2,703 at Senior Scientific Officer level, and £1,020 - £2,177 for the Experimental Officer class). These salaries are shortly to be increased, and the London posts carry a supplement of £175.
Age limits: SSO and EO at least 26 and normally under 32. SO under 29 and AEO under 26.
[767-013 (1971) : 543]
BRISTOL POLYTECHNIC
DEPARTMENT OF SCIENCE
Applications are invited for the following post, duties to commence as soon as possible:
TECHNICIAN (GRADE T2) IN CHEMISTRY
The successful applicant will assist with the preparatory work in a group of laboratories and may be
required to take responsibility for a preparation form, providing standard solutions to other laboratories.
Applicants should preferably have an Ordinary National Certificate or Intermediate City and Guilds
qualification. Previous laboratory experience is essential.
Salary Scale: T2 £1,038 - £1,194. Additional allowance of £30 or £51 for appropriate National
Certificate or City and Guilds qualifications.
Further details and application forms (to be returned by 14 September 1971) from Central Personnel
Office, Bristol Polytechnic, Ashley Down, Bristol BS7 9BU.
Please quote Post Reference Number F42/118 in all communications.
[767-014 (1971) : 543]
THE GAME CONSERVANCY  
Partridge Survival Project  
**SCIENTIFIC OFFICER**, preferably entomologist-ecologist with some research experience required to investigate certain aspects of the distribution and abundance of insects on farmland. The appointment will be for three years, starting salary approx. £1,400. Apply, with names of two referees to Dr. G. R. Potts, North Farm, Pulborough, Washington, Sussex. 
[767-015 (1971) : 543]
GUY’S HOSPITAL MEDICAL SCHOOL.
Applications are invited from graduates with immunological experience and an interest in immunological methods of investigating and treating disease for the posts of Lecturer (full-time) in the Department of Medicine. A medical qualification is not essential. Salary in the range £2,450 - £3,926 (or £2,454 - £3,417 plus £100 London Allowance non-clinical scale), according to qualifications and experience, with superannuation. Forms of application obtainable from the Dean’s Office, Guy’s Hospital Medical School, London Bridge, SE1 9RT. Closing date 8th September 1971.
[767-016 (1971) : 543]
A MICROBIOLOGIST

is sought for the evaluation of antibacterial substances in vitro and in vivo as a member of a research team. Applicants should possess a degree in Bacteriology or Microbiology and have previous experience of working with natural or synthetic antibacterials. Some supervision of Junior staff would be involved. Beecham Research Laboratories, part of the Beecham Group, is a leading company in the field of antibiotic research with laboratories situated in a pleasant area of Surrey within easy reach of London. The laboratories have recently been enlarged and new buildings were opened in May, 1971. The successful applicant will qualify for the Group’s generous profit sharing and non-contributory pension and life assurance schemes.

Please apply briefly stating age, qualifications and experience to the Personnel Officer at the above address, quoting ref. M/l/LJ.

[767-017 (1971) : 543]
BIRKBECK COLLEGE
(University of London)

PROGRAMMER
in the Department of Statistics
This position involves participation in the development of mathematical and statistical packages on a variety of machines (programmable desk calculators, teletype consoles and the CDC 6600 and IBM 360 computers) for research and teaching purposes.
The problems arising involve linear algebra and real and complex analysis, and the person appointed should have some familiarity with these fields, although a degree is not essential. Computing and statistical experience would be an advantage, but again are not essential as they would be obtained in the course of work. Initial salary in the range £1,200 - £1,380 p.a. plus superannuation.
Application forms from the Deputy Secretary (Ref. N.S.), Birkbeck College, Malet Street, London WC1E 7HX. Closing date 13th September.
[767-018 (1971) : 543]
UNIVERSITY OF SOUTHAMPTON
Department of Electronics
LASER RESEARCH GROUP
POST-DOCTORAL RESEARCH FELLOW required for studies of laser-induced damage of surfaces of nonlinear crystals. Some preliminary experiments have already been carried out and the Fellow will be expected to concentrate on the mechanisms of damage. Applications are sought from Chemists, Physicists and Material Scientists with particular knowledge of surface properties. The appointment is for a one year period at a salary of £1,491 per annum. Applications should be sent by 20 September, 1971, to the Deputy Secretary’s Section. (Tel. Ext. 2400) The University, Southampton SO9 5NH, quoting reference NSc/173/70/A.
[767-019 (1971) : 543]
LONDON BOROUGH OF HARINGEY

Full-time Laboratory Assistant

Salary £1,299 rising to £1,500 per annum according to experience and qualifications. Required at Highgate Wood School Montenotte Road, Hornsey N.8. Applicants should have ordinary National Certificate or Ordinary National Diploma, City and Guilds Laboratory Technicians Certificate, four GCE passes with two A levels in appropriate subjects. Membership of Institute of Science Technology or an equivalent suitable qualification or five years suitable experience. Five day week of 38 hours. Application forms obtainable from Chief Education Officer, Education Offices, Somerset Road, Tottenham, N.17 returnable by September 16. (Quoting ref. FF).
PORTSMOUTH POLYTECHNIC

TECHNICIANS

School of Architecture

One required to operate photographic equipment including print developing, production of slides and visual teaching aids. The work involves use of reprographic apparatus and some record keeping. The technician will assist staff and students in projects and research.

One required to operate microfilm equipment and reprographic apparatus including photocopy and dyeline machines. The work involves assistance to staff and students in projects and research.

One required to construct, calibrate and maintain models and equipment in the design studios and workshop. The technician must have skill and experience in construction, light machine shop work and electrics. The work involves assistance to staff and students in projects and research including record keeping and inventory control.

Salary Scale (dependent on experience, qualifications and age) T1/2/3 £477 - £1,395.

Application forms are obtainable from the Staff Officer, Portsmouth Polytechnic, Ravelin House, Alexandra Road, Portsmouth PO1 2QQ, and should be returned as soon as possible.

[767-021 (1971) : 543]
BEDFORDSHIRE EDUCATION COMMITTEE

Qualified Laboratory Technician required at Robert Bruce County Secondary School, Hill Grounds, Kempston, Bedford. 38 hours per week. For suitably qualified and experienced person, salary in scale £1,038 to £1,194 per annum.

Applicants should possess the City and Guilds Science Laboratory Technicians Certificate or an appropriate equivalent qualification for which an additional £42 per annum above the scale salary will be paid. Further payment of £30 per annum for possession of Advanced Certificate or equivalent alternative qualification.

Apply by letter to the Headmaster, Mr G. E. Tagg, B.A., at the school, stating age, qualifications, experience and giving the names of two referees.

[767-022 (1971) : 543]
THE UNIVERSITY OF WARWICK
Postdoctoral Fellowship in Biological Sciences

Applications are invited for the above post to work with Professor D. C. Burke on the biochemistry of RNA virus multiplication or on the mechanism of interferon formation. The post would be suitable for a biochemist with an interest in animal virology or for a virologist with a good knowledge of biochemistry. Initial salary in the range £1,491 x £138 - £1,767 x £135 - £1,902 p.a. Appointment for up to three years. Further particulars and application forms may be obtained from the Registrar, University of Warwick, Coventry CV4 7AL, quoting Ref. No. 4/2F/71. Closing date for applications is 27th September, 1971.

[767-023 (1971) : 543]
RESEARCH ASSISTANT required in Department of Geology, in high pressure / high temperature experimental unit. Honours degree in geology or mineralogy. No previous experience in experimental petrology necessary but candidates must have genuine interest in crystalline rocks. Assistant will carry out research towards a higher degree. Salary £750 - £800 p.a. Apply for further details to Assistant Bursar (Personnel), University of Reading, Whiteknights, Reading RG6 2AE, quoting ref. M.112. [767-024 (1971) : 543]
STUDENT / JUNIOR TECHNICIAN required in Biochemistry Laboratory of Department of Gynaecology for work on analysis of steroid hormones. Minimum qualifications - Chemistry to ‘A’ Level standard. Write giving age, G.C.E. results and details of other qualifications and experience, if any, to Professor P. Rhodes, St. Thomas’s Hospital Medical School (University of London), London, S.E.1.

[767-025 (1971) : 543]
Applications are invited for the post of **RESEARCH FELLOW** the Department of Statistics, (Head: Professor P.A.P. Tran).

The Department is engaged on mathematical research into problems of theoretical and applied statistical inference.

The theory of random processes of all fields, time series analysis, and into application of these subjects in the social sciences, genetics, medicine and physics.

The salary of a Research Fellow is determined in the range $A6,700 - $A9,220 per annum. Appointment is usually for three years with a possible extension to five years.

Superannuation is on the FSSU pattern with supplementary benefits. Reasonable travel expenses are paid and assistance with housing is provided for appointee from outside Canberra.

Further particulars may be obtained from the Association of Commonwealth Universities (Appts), 36 Gordon Square, London WC1H 0PF (Tel: 01-387 8572).

Applications close on 1 October 1971.

[767-026 (1971) : 544]
UNIVERSITY OF BRISTOL
Zoology Department

RESEARCH ASSISTANTSHIP
Applications are invited for the post S.R.C. Research Assistant to Dr. T. E. Thompson, commencing on 1 October 1971. Candidates may not necessarily possess a scientific qualification, and skill in methods of illustration for scientific papers would be an advantage. The research work, financed by the S.R.C. involves histological and ultrastructural studies of Mollusca, taxonomic and the morphological work on European and tropical animals, and physiological and embryological work using early developmental stages of invertebrates. Salary according to age and experience in the range £757 - £1,353 per annum. Send a brief curriculum vitae before 14 September to Dr. T. E. Thompson, Zoology Department, University, Bristol, UK. Give the names and addresses of two referees.
[767-027 (1971) : 544]
AGRICULTURAL RESEARCH COUNCIL
INSTITUTE FOR RESEARCH ON ANIMAL DISEASES
Compton, Berkshire
Applications are invited from graduates with at least an upper second class honours degree and research experience for a vacant post in the Institute’s Department of Parasitology. The successful candidate will be required to conduct research on nematodes of farm livestock. The appointment will be in the S.O/S.S.O. scale: £1,162 - £1,982 p.a. or £2,193 - £2,703 p.a. according to age, qualifications and experience, plus 4 ¼ % allowance to offset F.S.S.U. superannuation contributions. Applications, accompanied by curriculum vitae and the names and addresses of two referees, should be submitted to the Institute Secretary, citing vacancy No. 130, by the 10th September, 1971.
[767-028 (1971) : 544]
CHELSEA COLLEGE OF SCIENCE AND TECHNOLOGY
(University of London)

ELECTRON MICROSCOPIST, preferably post-doctoral, required to join a group engaged in research in Cardiovascular and Respiratory Physiology. Post tenable for three years (British Heart Foundation). Salary negotiable, according to experience. Applications to Dr. A. Howe. Department of Physiology, (NS2A), Chelsea College, Manresa Road, London, SW3 6LX.

[767-029 (1971) : 544]
Applications are invited for the above position.
Salary:
$A8,597 per annum range $A9,206 per annum. Further progression to $A9,938 is possible subject to certain conditions.
Qualifications:
A research degree or a degree and equivalent experience in Mineralogy and Petrology and knowledge of and aptitude in the use of modern techniques in this field. Museum experience desirable.
Duties:
The Curator is—
(1) responsible for the curation of the mineral, rock and meteorite collections;
(2) expected to carry out good quality research within this broad field.
General:
The Australian Museum is located in Sydney and has a total staff of over 100 with 12 departments covering all systematic groups of animals plus Environmental Studies, Palaeontology, Mineralogy and Anthropology. The scientific staff numbers 20. Field research is emphasised and a wide range of field equipment is available.
Subject to certain conditions the successful applicant will be eligible for: —
* Payment of fares to Sydney
* Financial assistance towards the cost of removal and establishment expenses
* Financial assistance towards the cost of initial accommodation expenses.
[767-030 (1971) : 544]
The University of Leeds
Houldsworth School of Applied Science

Livesey Professorship
Re-Advertisement

Applications are invited for the post of Livesey Professor and Head of the Department of Fuel and Combustion Science that will become vacant on the retirement of Professor A. L. Roberts on 30th September, 1971. The salary will be not less than £4,533 a year.

Applications (sixteen copies) stating age, qualifications and experience and naming three referees should reach the Registrar, The University of Leeds, Leeds LS2 9JT (from whom further particulars may be obtained) not later than 1st November, 1971. Applicants from overseas may apply in the first instance by cable, naming three referees, preferably in the United Kingdom.

[767-031 (1971) : 544]
BEECHAM RESEARCH LABORATORIES

CHEMICAL TECHNICIANS

are sought for the Chemotherapeutic Research Centre, Brockham Park, Betchworth, Surrey to work as a member of a multi-disciplinary team engaged upon research in the field of anti-bacterials. Duties will involve synthesis of organic compounds of potential medical interest. Applicants, who should preferably have had previous laboratory experience, should be of ‘A’ level G.C.E. standard or ONC standard in Chemistry, preferably with a special interest in Organic Chemistry. Starting salary will be based upon age, qualifications and experience. Day release facilities will be given up to the age of 25 for those wishing to continue their studies. Beecham Research Laboratories is part of the Beecham Group, and is situated in a pleasant area of Surrey within easy reach of London. The successful applicant will qualify for the Group’s generous profit-sharing and non-contributory pension and life assurance schemes. There are excellent dining facilities and a flourishing sports and social club. Please apply in writing to the Personnel Officer, Beecham Research Laboratories, Brockham Park, Betchworth, Surrey or telephone Betchworth 3202.
RE-ADVERTISEMENT
NATIONAL INSTITUTE OF AGRICULTURAL ENGINEERING
Scottish Station
PRINCIPAL SCIENTIFIC OFFICER
Applications are invited for the post of Principal Scientific Officer to lead a section concerned with research into basic cultivations, farm transport and some aspects of combine harvesting.
A first or good second class honours degree, or equivalent, or a higher degree is required in Agricultural Engineering or in some other branch of Engineering, provided the applicant has a good knowledge of agricultural practice. Experience in research and development and the analysis of results and preparation of reports is essential.
Salary is in the range £2,820 to £3,901 p.a. plus a 4 ¼ per cent non-pensionable allowance.
Further details and application forms from The Secretary, N.I.A.E., Scottish Station, Bush Estate Penicuik, Midlothian, Closing date for applications 30th September 1971.
[767-033 (1971) : 544]
THE WELSH NATIONAL SCHOOL OF MEDICINE

RESEARCH CHEMIST

Applications are invited for the post of JUNIOR SCIENTIFIC OFFICER to work on the biophysical aspects of adhesion of polymeric films to tooth substance. This is a joint project between the Dental Materials Section at the Dental School and the Chemistry Department of University College, Cardiff and is sponsored by the M.R.C.

Applicants should possess a good honours degree or equivalent qualifications in Chemistry. Salary in the range £1,095 - £1,545.

Applications, including the names of two referees, should be forwarded to the Registrar, Welsh National School of Medicine, Heath Park, Cardiff, CF4 4XN, from whom further information may be obtained. [767-034 (1971) : 544]
CANCER RESEARCH CAMPAIGN

ELECTRONICS TECHNICIAN to assist in research into chemical and biological effects of radiation involving a 2MeV linear accelerator and associated equipment. Keen practical interest in electronics, especially pulse circuits, essential. Salary in accordance with M.R.C. Technical Scales depending on age, qualifications and experience. Day release possible. Apply in detail with names of two referees to Director C.R.C. Gray Laboratory, Mount Vernon Hospital, Northwood, Middlesex.

[767-035 (1971) : 544]
THE ROWETT RESEARCH INSTITUTE
Bucksburn, Aberdeen

BIOCHEMIST (Group Leader)

The Institute is establishing a new Group in its Nutritional Biochemistry Department to study the biochemistry of the growth of the protein mass of the body, particularly in relation to nutritional changes. Three appointments to the senior staff are to be made in the next six months and the Group will receive adequate technical support.

Applications are now invited for a biochemist to lead this Group and to help in the formulation of its programme. Candidates should have a good Honours degree and experience in the general field of protein biosynthesis in mammalian and avian systems; and the appointment is to the Principal Scientific Officer grade. The remaining posts will be advertised later. More detailed information about the post can be supplied. Salary scale £2,820 to £3,902 max. (under review). Superannuation under F.S.S.U. with a compensatory non-pensionable allowance of 4 ¼ % of basic salary. Candidates should address their applications to the Secretary of the Institute and include details of their careers, reference to published work, and the names of three persons to whom reference can be made. The closing date is 20 October.

[767-036 (1971) : 545]
ROYAL MARSDEN HOSPITAL, SUTTON, SURREY
DEPARTMENT OF PHYSICS

An appointment will be made for a two-year period of a **Physicist** or **Electrical Engineer** to work on digital processing of data from clinical radioisotope and ultrasound detecting equipment. Familiarity with machine language programming will be essential and experience in the design of digital logic desirable. The department is equipped with an extended PDP-8 configuration and delivery of a second machine with 8K core and 2M word disc is expected shortly.

The successful applicant is expected to develop an interest in medical physics and its clinical applications but previous experience in this field is not necessary. Salary on the first two points of the D.H.H.S. Systems Designer Scale 6 (£1,899 - £1,989) plus £90 London Weighting.

Applications with curriculum vitae and the names of two referees to the Administrator, Royal Marsden Hospital, Fulham Road, London S.W.3.

[767-037 (1971) : 545]
THE POLYTECHNIC OF CENTRAL LONDON

RESEARCH ASSISTANTSHIP

Applications are invited from suitably qualified graduates, preferably in physics or chemistry, for a Research Assistantship in the Department of Photography.

The successful applicant will be required to work in one of the following fields:

a) Chemistry of development
b) Holography
c) Gelatin in photographic emulsions.

Salary will be on a scale £1,050 x £30 (2) to £1,110 p.a. The post will normally be tenable for a period of three years. The successful applicant will be expected to register for a higher degree (C.N.A.A.)

Applications together with curriculum vitae should be addressed to: Miss M. F. Harker, Dept. of Photography, Polytechnic of Central London, 309 Regent Street, London W1R 8AL, to arrive not later than Monday 13th September 1971.

[767-038 (1971) : 545]
TECHNICIAN (with H.N.C. or equivalent qualification) required in Physics Department to assist in Radiological research and teaching. Some experience in the use, maintenance and repair of X-ray and counting equipment an advantage. Applications in writing, giving details of qualifications and experience, to the Secretary, Guy’s Hospital Medical School, London Bridge SE1 9RT, quoting Ref. P.Y.
[767-039 (1971) : 545]
Teachers
especially of physics and maths

£2,460* p.a. at 25; work that will keep your mind at full stretch; and you can be commissioned for four years with a gratuity of £1,100 cash when you leave

For men and women graduates between 22 and 27, here is a quite outstanding opportunity: a special kind of education - vocational, adult, and visibly productive. It combines academic and technical work with everyday experience of administration and management. This will be of particular interest to the teacher who is contemplating a later - possibly civilian - appointment at senior level. The variety of the work is remarkable. You might teach at any level from GCE to post-Graduate; at Cranwell, at an apprentice school, or at an operational flying station; in this country or abroad. But one thing is certain: you would have carefully selected, and well motivated students.

You must be a graduate
Most opportunities are for teachers in the age band 22-27 with a Degree in Mathematics, Physics or engineering subjects; there are also vacancies for arts graduates with good Honours Degrees. Minimum period of commissioned service, four years. RAF service counts for Burnham increments. For full information please write, giving date of birth, qualifications and experience, to Group Capt. E. Batchelar, RAF, Adastral House (609 RXS), London WC1X 8RU.
Royal Air Force

*Women’s rates are slightly lower.
[767-040 (1971) : 545]
CHEMIST

We have a vacancy in our modern Fibre Research Laboratory for a Chemist educated to A.R.I.C. or B.Sc. standard in the age range 21-25 years.

Duties will include non-routine mineral and silicate analysis; investigations on the chemical and physicochemical properties of asbestos and other inorganic fibres and their composites; use of mineralogical and microscopical techniques.

A knowledge or interest in the field of mineralogy and microscopy will be an advantage in this post.

There is a staff dining room, active social and sports club plus free transport to and from Uxbridge and West Drayton. Interested applicants are invited to write detailing qualifications etc., to:
Mr. M. J. Balls,
CAPE ASBESTOS FIBRES LIMITED,
Iver Lane,
Cowley, Uxbridge, Middx.
Tel: Uxbridge 37111
[767-041 (1971) : 545]
INSTITUTE OF GEOLOGICAL SCIENCES
Natural Environment Research Council

SCIENTIFIC OFFICERS / SENIOR SCIENTIFIC OFFICERS

There are vacancies in the Scientific Officer Class:

ENGINEERING GEOLOGY UNIT: primarily for overseas work concerned with dam-site, land-slide phenomena or other civil engineering works. Appointments overseas of duration from short visits of 1-2 months to longer secondments up to three years. Candidates should have specialised in engineering geology.

PETROGRAPHICAL DEPARTMENT: primarily to develop research in sedimentary petrology (including sedimentary processes) related, in part, to those areas under current or future field survey of the UK. The officer will also be expected to develop an interest in supporting instrumental techniques (such as X-ray diffraction). A good knowledge of electronics is desirable.

MINERAL ASSESSMENT UNIT: to assist in investigating the distribution and occurrence of economically important ‘industrial’ or ‘bulk’ minerals in this country. The work involves the planning and supervision of drilling and sampling surveys on a regional scale, and the preparation of maps and reports for publication. The Unit, which is based in London, is at present engaged on surveys of sand and gravel, limestone and celestite resources.

MINERAL INTELLIGENCE UNIT: to undertake a detailed study of certain economic minerals on a world-wide basis. Specialist advice and information on all aspects of the mineral industry is provided by the Unit to government departments and private inquirers, and the work includes the preparation of internal reports and material for publication. A keen interest in economic minerals and the development of mineral resources is essential and some experience of mineral prospecting or mining would be an advantage. Opportunity exists for visiting mineral deposits, mines or associated plant both at home and overseas.

MARINE GEOPHYSICIST: required in the marine geophysics unit to undertake geophysical exploration at sea using shipborn seismic, magnetic and gravity instruments and the interpretation of geophysical data mainly for the UK Continental Shelf. Experience in automatic data processing equipment and techniques is desirable. The post is based in London but candidates should be prepared to work at sea or from other centres for up to 6 months each year.

FIELD GEOLOGISTS are also required for work overseas.

QUALIFICATIONS
Scientific Officer: Minimum requirements normally degree with 1st or 2nd Class honours or equivalent qualification in appropriate subject. Age normally under 29.
Senior Scientific Officer: As above plus at least 3 years’ post-graduate or other approved experience. (Those who expect to complete 3 years’ such experience in 1971 may also apply.) Age normally between 26 and 32.

SALARIES
Scientific Officer: £1,162 - £1,982 (starting salary may be above the minimum). A special award of £156 per annum is given for two or more years of approved postgraduate experience, subject to maximum of scale not being exceeded.
Senior Scientific Officer: £2,193 - £2,703 (starting salary may be above minimum).
Salaries are supplemented in the London area. Good promotion prospects. Non-contributory pension. The staff of the Council are not Civil Servants, but their pay and conditions of service are similar to those of the Scientific Civil Service.

For fuller details and an application form (to be returned by 24 September 1971) write to Civil Service Commission, Alencon Link, Basingstoke, Hants, or telephone BASINGSTOKE 29222 ext. 500 or LONDON 01-839 1696 (24 hour “Ansafone” service), quoting S/168/71 [767-042 (1971) : 545]
University of Wales
University College of Swansea

**RESEARCH DEMONSTRATOR IN BOTANY**

Applications are invited for the post of Research Demonstrator in Botany. Candidates should have interests in some aspects of Plant Physiology. Duties will include demonstrating and supervision of practical classes but there will be ample time for research. The salary will be on the scale £1,212 - £1,278 per annum, together with F.S.S.U. benefits. The appointments are tenable for one year in the first instance but may be renewed. Application forms may be obtained from the Registrar, University College of Swansea, Singleton Park, Swansea. Glam. SA2 8PP, and should be returned by Tuesday, September 14, 1971.

[767-043 (1971) : 546]

Department of Applied Biology
MICROBIOLOGY TECHNICIAN GRADE T.3.
required to work in modern Microbiology Unit. Duties involve the preparation of practicals and the care
of cultures and equipment in the department. Day release may be given for further study.
Qualifications O.N.C., or H.N.C. in Applied Biology or M.L.S., A.I.S.T. with microbiology as special
subject. Experience in microbiology essential.
Salary £1,194 to £1,395 plus London Weighting £105 and qualification allowance.
Further details and application form from Chief Technician, Department of Applied Biology.
[767-044 (1971) : 546]
UNIVERSITY OF BRISTOL

Graduate required to assist in research project on the respiration of fish and/or reptiles. Persons with qualifications in zoology or physiology will be preferred. The work is supported by research council grants and the post will be for one year in the first instance. Salary £957 - £1,077 per annum according to qualifications. Applications, giving full particulars and names of two referees, to Professor G. M. Hughes, Research Unit for Comparative Animal Respiration, The University, Bristol, BS8 IUG. By 15th September.

[767-045 (1971) : 546]
WYTHENSHAWE HOSPITAL
Manchester 23
Applications invited for post of **basic grade biochemist** from persons with a degree in chemistry or biochemistry. Post offers opportunity to gain wide experience and training in medical biochemistry. Apply naming 2 referees to Consultant Pathologist.
[767-046 (1971) : 546]
LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE (University of London) Keppel Street, London WC1E 7HT. **Graduate Junior Technical Officer** required for Department of Entomology to work on insect tissue culture and virus research. Salary in the range £1,101 - £1,598. Special arrangements for higher degree studies. Applications, with full curriculum vitae, to Assistant Secretary by 27 September.

[767-047 (1971) : 546]
SK&F
Organic Chemistry Research

A vacancy has arisen in our laboratories in Welwyn Garden City for a young Scientific Officer who will be required to synthesise compounds for biological evaluation as potential new drugs.

Applicants, preferably under 26, should have G.R.I.C., B.Sc., H.N.C. or equivalent qualifications. Some experience of working in an organic chemistry laboratory would be desirable.

We offer a competitive salary, and fringe benefits include non-contributory pension and Life Assurance Schemes, annual bonus and staff cafeteria. Day release for further study is given where appropriate and full relocation and removal expenses will be paid in certain circumstances.

In the first instance please write giving brief relevant details of age, qualifications and experience, and quoting reference no. A. 138863. to:

John Ostle, Personnel Officer,
Smith Kline & French Laboratories Limited,
Mundells, Welwyn Garden City, Herts.
Short-listed candidates will be asked to complete an application form.
[767-048 (1971) : 546]
NATIONAL INSTITUTE OF AGRICULTURAL BOTANY

RESEARCH ASSISTANT
Applications are invited for the post of Research Assistant to make a critical appraisal, by statistical methods, of the present system of performance trials for varieties of cauliflowers.
Candidates should possess a degree or diploma in statistics or an equivalent qualification.
Commencing salary between £927 at age 21 to £1,285 at age 26 or over rising to £2,095 per annum.
FSSU.
Application forms and further particulars may be obtained from the Establishment Officer, NIAB, Huntingdon Road, Cambridge, CB3 0LE.
[767-049 (1971) : 546]
North East London Polytechnic
Applications are invited for the following vacancies
Department of Biological Science

**Technicians T3**
For one of the posts some experience in the servicing of physiology laboratories is desirable but not essential. The posts are based at the West Ham Precinct, Romford Road, London, E15. Salary on scale rising to £1,500 inclusive.
Please request application form of
The Staffing Officer, Ref. S/BJ108
North East London Polytechnic
Romford Road London E15 4LZ
for return by 17th September 1971

The Polytechnic’s main precints are Barking, Waltham Forest and West Ham.
[767-050 (1971) : 546]
RESEARCH ASSISTANT IN NEUROENDOCRINOLOGY

Research Assistant required for three years to work on neural control of anterior pituitary function in relation to reproduction. Background in physiology / pharmacology. Salary up to £950 p.a. Opportunity to register for a higher degree.

Further details from the Secretary, The Royal Veterinary College (NS1), Royal College Street, London NW1 0TU, from whom application forms may be obtained.

[767-051 (1971) : 546]
UNIVERSITY OF GLASGOW
Chemistry Department
GAS CHROMATOGRAPHY-MASS SPECTROMETRY UNIT
A **RESEARCH ASSISTANT** (Post doctoral Chemist), preferably with experience and interest in analytical instrumentation, is required for a project (aided by the Medical Research Council) based on biochemical and biomedical application of GC-MS. A suitably qualified applicant would assume considerable responsibility for development of the LKB 9000 facility in the context of this project, which is presently funded up to the end of 1972.
Salary will be within the range £1,500 to £1,800 per annum. Placement according to qualifications.

Applications should be sent to Dr. C. J. W. Brooks, Chemistry Department, The University of Glasgow, Glasgow, W.2. from whom further particulars may be obtained. In reply please quote Ref. No. 5061 N.

[767-052 (1971) : 546]
LA TROBE UNIVERSITY
Melbourne, Australia

SENIOR LECTURER / LECTURER IN BIOCHEMISTRY

Applications are invited from suitably qualified persons for appointments in the Department of Biochemistry, School of Biological Sciences. Teaching in Biochemistry to the second year of the B.Sc. course commenced in 1971 and will be extended to the third year in 1972.

Salaries: Senior Lecturer $A9,540 - $A11,130 p.a. Lecturer $A6,697 - $A9,286 p.a.

F.S.S.U.-type superannuation available.

Further information and application forms are available from the Association of Commonwealth Universities (Appts), 36 Gordon Square, London WC1H 0PF, (Tel. 01-387 8572), or from the Registrar of the University in Australia.

Applications close on 14 October 1971.

[767-053 (1971) : 546]
UNIVERSITY OF HULL
DEPARTMENT OF ELECTRONIC ENGINEERING
Applications are invited for the post of Demonstrator in Electronic Engineering to assist with B.Sc. and Diploma practical classes and with tutoring first-year students. Postgraduate experience in electronics essential. Facilities for research in appropriate fields. Salary scale: £1,023 - £1,221 plus F.S.S.U. benefits. Applications (six copies) giving details of age, qualifications and experience together with the names of two referees should be sent by 20th September to the Registrar of the University.

[767-054 (1971) : 546]
CHELSEA COLLEGE OF SCIENCE AND TECHNOLOGY
(University of London)
Applications are invited from candidates with a 1st or Upper 2nd Class Honours Degree (or equivalent qualification) in Pharmacy or Chemistry, to work on a RESEARCH PROJECT IN MEDICINAL CHEMISTRY. The project is sponsored by the S.R.C., C.A.P.S. (Award) and the co-operating Body to Allen and Hanburys Ltd. Applications to Dr. J. Walker, Pharmacy Department, (NS2), Chelsea College, Manresa Road, London. SW3 6LX as soon as possible.
[767-055 (1971) : 546]
JUNIOR TECHNICIAN required for Biochemistry section of Dept. of Neuropathology. This is a modern well-equipped Dept. and the successful applicant would be working mainly with an automatic amino acid analyser as well as other routine work. Facilities for study for further qualifications. Whitley Council salary scale and conditions. Application forms from The Secretary, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London, SE5 8AF (Ref. NP).
[767-056 (1971) : 546]
MOUNT VERNON HOSPITAL
NORTHWOOD, MIDDLESEX

MEDICAL PHYSICS TECHNICIANS, Grades V and III, are required for duties in the Physics Department of the above hospital. One of these posts is primarily concerned with the clinical applications of radioactive isotopes and the other with radiotherapy physics but there will be opportunities for gaining experience in all aspects of radiation physics work.

Applicants should possess suitable “O” or “A” level qualifications O.N.C. in Applied Physics or M.S.R. (Therapy or Diagnosis).

Salary scales plus London Weighting III £1,356 - £1,764, V £1,035 - £1,335.

Applications should be made in writing to the Hospital Secretary giving experience, qualifications and the names of two referees.

Further particulars of these posts can obtained from the Chief Physicist, telephone Northwood 26111, Ext. 229.

[767-057 (1971) : 547]
Applications invited from graduates with a special interest in experimental plant taxonomy for the post of Research Assistant to work with Dr. C. A. Stace on the origin and characteristics of Juncus hybrids. The post, financed by S.R.C., from October 1st 1971 or as soon as may be arranged, with possible extension for a further two years. Salary: £950 p.a. Particulars and application forms, returnable by September 13th, from the Registrar, The University of Manchester, M13 9PL. Quote ref. 168/71/NS. [767-058 (1971) : 547]
KINGSTON POLYTECHNIC

RESEARCH ASSISTANT

Photochemistry of Pesticides

Applications are invited from Chemistry Graduates for the above post in the School of Chemical Science and Technology. The work will be concerned with the photoreactions of pesticides and will be aimed at determining their fate when exposed to sunlight in the environment.

The successful applicant will have the opportunity to register for a higher degree. Salary £1,050 x 30 to £1,110.

Application forms and further details from Dr. C. H. J. Wells, Kingston Polytechnic, Kingston upon Thames, KT1 2EE. 549 1366.

[767-059 (1971) : 547]
A graduate in chemistry or biochemistry is required to participate in a 2 year research project supported by the S.R.C. on the synthesis and application of fluorescent molecules in the elucidation of the structure of the erythrocyte and myelin membranes. Candidates should hold a good Honours degree. Salary £1,521 - £1,566.

Applications, together with the names and addresses of two referees, should be sent to Dr. D.G. Hoare, Department of Biology, University of York, Heslington, York, YO1 5DD not later than 18th September.

[767-060 (1971) : 547]
TECHNICIAN / JUNIOR TECHNICIAN for
BIOPHYSICS LABORATORY
Work will include either studies of the physical properties of proteins and membranes or of the mechanism of photosynthesis. Applicants should have one or two “A” levels in scientific subjects or equivalent background. Salary in the range £1,136 - £1,535 or £653 - £968. Day release available. Application forms from the Secretary (NS/2), Chelsea College of Science and Technology, Manresa Road, London, SW3 6LX.
[767-061 (1971) : 547]
Engineers and others

How many young applied scientists have proved themselves both as line managers and as business men? And which of them will be qualified to be chief executives of industrial companies within three years or so?

We need such a man for this job in a London merchant bank, at the centre of its diversified group of industrial companies. He ought in due course to run one of them.

Initially he will be handling new investment propositions, rationalisations and expansions, and planning for organic growth throughout the group.

He must be an engineer or technologist with experience in manufacturing industry. He must have run a unit of enterprise at a profit. There is preference for an honours graduate. Some, but not too much, consulting experience will be an asset.

Age 28-35: men now earning up to about £5,000 p.a.

THE FACULTIES PARTNERSHIP
Letters will be handled in confidence by the consultant:
M. J. Graham-Jones 26 Grosvenor Gardens London SW1
[767-062 (1971) : 547]
British Insulated Callender’s Cables Limited have a vacancy in the Chemistry Department of the Central Research and Engineering Division at Shepherd’s Bush for an

**Analytical Chemist**

to assist in the research programme on electrical insulation in which a wide range of natural and synthetic materials is used. The work is non-routine and the use of chemical as well as instrumental methods of analysis is necessary. Candidates should have a degree in Chemistry or equivalent qualification, and preference will be given to applicants with industrial analytical experience.

Applications should be made to: -
Personnel Officer, British Insulated Callender’s Cables Limited, Central Research and Engineering Division.
38 Wood Lane, London W12 7DX

Electronics AND Power?

Certainly! The electrical power engineer must have a thorough understanding of electrical machinery, and must also be competent in the electronics and logic circuit technology of modern instrumentation and control.

The Honours Electrical Engineering Degree and the Ordinary Degree in Electrical and Electronic Engineering at North Staffordshire Polytechnic provide the foundation for worth-while careers in Power Engineering.

For the electronics specialist the department offers a highly successful Honours Degree in Electronic Engineering.

For full details apply to the Head of the Department, Electrical and Electronic Engineering, North Staffordshire Polytechnic, Beaconside, Stafford.

STUDENTSHIPS
THE UNIVERSITY OF HULL
LASER RESEARCH
Applications are invited for two S.R.C. / C.A.P.S. RESEARCH STUDENTSHIPS in the Department of Applied Physics. One involves the study of gas glows using laser scattering in collaboration with Ideal Standard Ltd. The second is a study of laser breakdown in liquids, in collaboration with the Electricity Research Council. Candidates should have a first or upper second class honours degree. Applications, with the names of two referees, should be sent as soon as possible to Dr. B. J. Rye, Department of Applied Physics, The University, Hull, HU6 7RX, from whom further details can be obtained.
[767-071 (1971) : 548]
Applications are invited from suitably qualified candidates under 25 years of age for a Research Studentship sponsored by the Central Electricity Generating Board for the three year period 1971/74 to study ‘Dynamic response of submerged structures to sound in the surrounding fluid’ with application to fast breeder nuclear reactors.

Applicants should possess, or expect to obtain this year, a good honours degree in engineering or physics. Experience in experimental vibration would be of advantage.

The studentship is sponsored by the C.E.G.B. for a period of three years and the successful applicant would be required to register for a higher degree.

Applications giving details of age, qualifications and the names of two referees, should be sent to the Academic Registrar, The University, Highfield, Southampton SO9 5NH, as soon as possible, quoting ref: NS.

APPOINTMENTS AND SITUATIONS VACANT

CARIBBEAN INDUSTRIAL RESEARCH INSTITUTE
(CARIRI)
TRINIDAD, WEST INDIES
invites applications from nationals of Commonwealth Caribbean countries (preference will be given to citizens of Trinidad and Tobago) for the post of 
Information Specialist
with its Technical Information Service.
Applicants should have the following qualifications:
* Bachelors degree in Science or Engineering, or its equivalent
* Qualifications in Information Science.
* A minimum of two years’ experience in technical information work.
These are the minimum qualifications required and the successful candidate will have to be capable of a high standard of professional work.
Cariri has been established by the Government of Trinidad and Tobago, with the assistance of the United Nations Industrial Development Organisation in order to make sponsored-research facilities available to private industries and Government. Included among the facilities is a Technical Information Service which already has a staff of one professional at managerial level, assisted by a technician. The Information Specialist will chiefly search the scientific and technical literature surveys, prepare bibliographies and literature surveys, procure and provide technical information and index and classify technical reports and trade literature.
Applications should be directed to:
The Director, Caribbean Industrial Research Institute,
University Post Office,
St. Augustine,
Trinidad, West Indies
[772-001 (1971) : 52]
ASSISTANT SCIENTIFIC OFFICER (SCIENTIFIC ASSISTANT): Ministry of Agriculture, Fisheries and Food have a vacancy for a man or woman aged at least 16 and under 26 years of age as a temporary Assistant Scientific Officer in the Food Standards and Science Division, Great Westminster House, Horseferry Road, London, SW1P 2AE. Prospect of permanency. DUTIES: To work in a laboratory concerned with general chemical analysis of certain types of food. QUALIFICATIONS: Candidates should preferably have an interest in chemistry and should have a GCE (or equivalent qualification) with passes in four distinct subjects to include English or English Language and a Science or a Mathematical subject. Previous experience is not essential. Further education is encouraged. SALARY: (Inner London) £725 at age 16 to £1,370 at age 25 or over on entry to £1,570. APPLICATION forms from Miss A. S. McEwan, Ministry of Agriculture, Fisheries and Food, Room 626. Great Westminster House, Horseferry Road, London, SW1P 2AE. Closing date 9 December, 1971. [772-002 (1971) : 52]
INVERESK RESEARCH INTERNATIONAL
wish to recruit a
POLYMER SCIENTIST
to work on a variety of projects involving the development of products and processes related to polymeric materials. The required qualifications include an honours degree in chemistry, industrial experience in product development and formulation and/or some familiarity with polymer processing. Inveresk Research International is a contract research laboratory situated in pleasant rural surroundings six miles from the centre of Edinburgh. It carries out research and development projects in a wide range of areas for industry and for Government bodies.
Applications should be made in writing to:
The Personnel Officer,
Inveresk Research International,
Inveresk Gate, MUSSELBURGH, Midlothian.
[772-003 (1971) : 52]
**Assistant Patent Searcher**

An opportunity has arisen for a person to join our Patents Section as an Assistant Patent Searcher based at our London W.C.1 office. The work will entail searching Patent and Technical literature on a wide variety of subject matter connected with the Steel Industry, and preparing reports of results of searches. This will involve periods of work at the Patent Office Library.

The successful applicant should have a technical background in either engineering and/or chemistry and since technical appreciation will be more important than a background of information work the person will also have the ability to methodically read considerable amounts of technical literature and extract relevant details from it.

An added advantage will be a reading knowledge of a major European language.

The right person can expect a competitive salary, excellent long term career prospects and working conditions to match.

For further details write to The Personnel Manager, British Steel Corporation, 33 Grosvenor Place, London S.W.1.

British Steel Corporation
[772-004 (1971) : 52]
UNIVERSITY OF EDINBURGH
DEPARTMENT OF MOLECULAR BIOLOGY

Applications are invited for the post of LECTURER in the above Department, where it is intended that the vacancy will be filled at the latest by 1 October 1972.

The Department, which includes the MRC Molecular Genetics Unit, occupies new laboratories at the King’s Buildings site, and is very well equipped with most modern apparatus needed for basic research into the Macromolecular Biology of bacteria and their viruses. In particular, it is hoped to attract applicants with research interests and experience in (a) the biophysical chemistry of proteins or nucleic acids or (b) the regulation of enzyme function and biosynthesis, who are anxious to apply their knowledge to the integrated biology of living organisms.

Members of staff are expected to take part in the Molecular Biology courses available to 3rd and 4th year undergraduates, to assist in postgraduate training and to help in administration.

Salary Scale: £1,491 - £3,417 per annum. Applications, by letter (six copies), together with the names of two referees, should be sent to the Secretary to the University, Old College, South Bridge, Edinburgh, EH8 9YL, from whom further particulars may be obtained. The closing date for applications is 15th January, 1972. Please quote reference 1080.

UNIVERSITI PULAU PINANG

Academic Appointments
Applications are invited for the following posts:
SCHOOL OF CULTURAL & COMMUNITY STUDIES
Senior Lecturers / Lecturers in the fields of CARTOGRAPHY and Physical Geography, Economic Geography, Agricultural Geography, Settlement Geography,
QUALIFICATIONS REQUIRED:
Senior Lecturers: Must have a doctorate from a well-established and recognised university, with several years of experience in research and teaching at university level, together with publications of recognised academic value.
Lecturers: Should have at least a good Honours degree (preference to candidates with doctorate) with suitable teaching and research experience in addition to the special qualifications where stated for the respective posts.
EMOLUMENTS:
These are fixed in Malaysian dollars (per mensem) and their approximate US dollar equivalent (per mensem) at current exchange rates are shown in brackets.
Salary: (i) Senior Lecturer: Salary within the limits of $1,865/2510 (US$6,222/837) depending on qualifications and experience. (ii) Lecturer: Salary within the limits of $1,400/2215 (US$4,67/738) depending on qualifications and experience.
OTHER BENEFITS:
Provident Fund and medical benefits are also payable.
INITIAL APPOINTMENT:
Successful applicants may be given a three year initial appointment; thereafter, subject to satisfactory service, their appointment may be extended for another three years.
Further information including advice regarding the method of application and on further particulars about terms and conditions of service should be obtained from:
The Registrar, Universiti Pulau Pinang Minden, Penang, Malaysia. The closing date of receipt of applications is 4 January, 1972. The University reserves the right to make appointments by invitation.
[772-009 (1971) : 53]
Post available for SCIENCE GRADUATE for interesting work in the Transfusion Centre. Previous experience desirable but not essential.

Ample opportunities for research.
Whitley Council conditions and salary.
Apply in writing to:
The Director, North London Blood Transfusion Centre, Beansbrooke Road, Edgware, HA8 9BD.
[772-010 (1971) : 53]
HAMMERSMITH HOSPITAL AND THE ROYAL POSTGRADUATE MEDICAL SCHOOL
Du Cane Road, London, W.12
PHYSICIST (BASIC GRADE)
required to join the clinical physics groups concerned with radiotherapy or with the diagnostic use of radio-isotopes. Applicants should preferably hold a good honours degree, but previous hospital experience is not essential. Opportunities exist for study for a higher degree. Salary in the range £1,185-£2,193.
Detailed applications, naming two referees, to Personnel Officer, within two weeks.
[772-011 (1971) : 53]
Established in 1920 the British Launderers’ Research Association has some 900 member organisations throughout the UK. In addition to providing a comprehensive technical service the Association is playing a major role in accelerating the acceptance of mechanisation in this traditionally labour-intensive industry. Reporting to the Director of Research, responsibility will be for the day-to-day administration of the Association through an established team. The Assistant Director will have a particular role in ensuring the effective use of resources; he will also be expected to involve himself in the development and promotion of the Association’s work. Candidates, aged 35 to 45, should ideally be graduates in chemical engineering or engineering although qualifications in chemistry, physics or textiles would be considered. They must have had experience of co-ordinating and leading applied R & D for industrial application. Experience of modern management methods is desirable. Salary negotiable around £4,000; pension. Please write stating how each requirement is met to R. Tomkins reference AQ.24129.
ICI PHARMACEUTICALS DIVISION

Pharmacologist

THE QUEEN’S AWARDS TO INDUSTRY

We are looking for a graduate Pharmacologist to join a team working on the control of gastric secretion. His or her main task will be to study drug-induced effects on this mechanism. Previous experience in this field, in industry, would be an advantage. Facilities are available for such studies in a variety of species and encouragement is given to carry out and publish independent work within a multi-disciplinary project team.

Our modern well-equipped Research Laboratories are conveniently situated in rural North Cheshire within easy reach of main road and rail routes. Career prospects and competitive conditions of service would be discussed at interview. Assistance towards moving house would be available to married men.

Applications, giving brief details of age, qualifications and experience, should be sent to:
P. M. J. Eyre,
Personnel Officer,
Imperial Chemical Industries Limited,
Pharmaceuticals Division,
Mereside, Alderley Park, Nr. Macclesfield, Cheshire
[772-013 (1971) : 53]
AUSTRALIAN NATIONAL UNIVERSITY
Research School of Biological Sciences

FELLOWSHIP OR SENIOR FELLOWSHIP IN ENVIRONMENTAL BIOLOGY

Applications are invited for appointment as Fellow or Senior Fellow in the Department of Environmental Biology (Head of Department - Professor R. O. Slatyer).

The Department is concerned with a wide variety of ecological phenomena associated with organism-environment interactions. In addition, emphasis is given to studies of ecosystems as self-regulating entities, partly with a view to developing principles for long-term ecosystem conservation and management.

Areas of interest include ecosystem and population dynamics, ecological energetics, and nutrient cycling. Natural and modified, aquatic and terrestrial, ecosystems are studied in field and laboratory-created ecological units. There is considerable interest in the mathematical modelling of the processes under study.

It is hoped to make an appointment of a person whose primary interest is in systems analysis or ecological energetics, but this is not essential.

Fellows and Senior Fellows are appointed for an initial period of five years, after which they may be reappointed until retiring age. The salary ranges are: Fellow $A8,062-$A11,113 per annum; Senior Fellow $A11,130-$A13,068 per annum. Fellows are entitled to one year’s study leave on full pay in every seven years’ service, and a Senior Fellows to one year’s study leave in every six years; a contribution towards travel and other expenses of study leave is paid.

Superannuation is on the FSSU pattern with supplementary benefits. Reasonable family travel expenses are paid and assistance with housing is provided for an appointee from outside Canberra.

Further particulars are available from the Association of Commonwealth Universities (Appts), 36 Gordon Square, London WC1H 0PF (Tel: 01-587 8572). Applications close on 15 January, 1972.

[772-014 (1971) : 53]
UNIVERSITY OF BRITISH COLUMBIA
Department of Chemistry

GRADUATE TEACHING ASSISTANTSHIPS
Graduate Teaching Assistantships are available for candidates with high academic records who wish to pursue further studies towards the Ph.D. in Chemistry. Excellent research facilities are available in all areas of modern Chemical Science, ranging from Bio-Organic Chemistry to Chemical Physics. Stipends $3,860 (minimum) per annum.
Application forms and further particulars may be obtained from the undersigned.
Professor C. A McDowell,
Department of Chemistry,
University of British Columbia,
Vancouver 8, British Columbia, Canada.
[772-015 (1971) : 54]
GLASSHOUSE CROPS RESEARCH INSTITUTE
MUSHROOM RESEARCH

Microbiologist required to continue a major research programme on fundamental aspects of nutrition related to growth and fruit-body formation in the cultivated mushroom and on the microbiology of composting. This is part of a collaborative programme directed towards the interest of commercial mushroom production.

Candidates should have a good honours degree and postgraduate experience in an appropriate field of study. Such fields include micro-biology, microbial chemistry & physiology, and mycology.

The appointment will be in the Senior Scientific Officer or Principal Scientific Officer grade (salary scales £2,303/£3,255 & £3,100/ £4,100 respectively, plus 4 ¼ % non-pensionable superannuation allowance to offset contributions under FSSU).

Further details may be obtained from the Secretary to the Institute, Worthing Road, Rustington, Littlehampton, Sussex, to whom applications together with the names and addresses of three referees should be sent by 31st December, 1971.

[772-016 (1971) : 54]
IMPERIAL COLLEGE
(University of London)
Department of Metallurgy
LECTURER / POST-DOCTORAL RESEARCH FELLOW
in Materials Science with particular reference to polymers.
This appointment will be of interest to Polymer Physicists, particularly those with experience in X-ray studies of polymer structure.
The appointment will be made at the lower end of the scale £1,491 x 135/138 - £2,454 per annum, plus £100 London Allowance and FSSU and will date from 1 January, 1971 or as soon as practicable thereafter.
Applications should be made to:
The Head of the Metallurgy Department, Professor J. G. Ball, Imperial College, Prince Consort Road, London, SW7 2BP.
Closing date: 17 December, 1971.
[772-017 (1971) : 54]
The Division of Building Research of the Commonwealth Scientific and Industrial Research Organization, located in Melbourne, Victoria, undertakes research for the Australian building and construction industry, and is concerned with studies related to the total built environment. It is located at two separate sites at Highett and South Melbourne within the Melbourne area. The research program is highly interdisciplinary and the total staff of approximately 300 includes about 130 professional scientists and engineers.

The Division offers opportunities for engineers and scientists to undertake research in a wide variety of topics. These include studies of the intrinsic properties of organic and inorganic materials for use in buildings, their development and application to the relevant Australian industries, the structural design of single and multi storey complexes, the application of electronic computers to structural design, internal environment, building operations, and economics related to the industry.

The Division provides a wide range of research facilities and close liaison with industry for studying full scale applications of research results.

QUALIFICATIONS: Applicants should have a Ph.D. degree or have had postgraduate research experience of equivalent standard and duration, supported by satisfactory evidence of research ability.

SALARY: Upwards from minimum SA7,484 p.a. for a person completing a Ph.D. to substantially higher grades dependent on qualifications and experience.

TENURE: Three years initially, but alternative arrangements for longer terms or indefinite appointments may be mutually negotiated. Further details supplied on application.

Applications, (quoting Appointment No. 390/461 and stating full personal and professional details, together with the names of at least two professional referees) or enquiries concerning the above positions, should be addressed to:—The Deputy Chief Scientific Liaison Officer, Australian Scientific Liaison Office, 64-78, Kingsway, LONDON, WC2B 6BD (Tel.: 01-405 5631) by the 28th January, 1972.

Applications in U.S.A. and Canada should be sent to Professor H. C. Webster, C.M.G., Counsellor (Scientific), Australian Embassy, 1601 Massachusetts Avenue, N.W., WASHINGTON, D.C. 20036, U.S.A.

[772-018 (1971) : 54]
TECHNICIAN required to assist in the preparation and day-to-day running of postgraduate practical courses in Biochemistry. Applicants should have good organising ability and possess ONC or IST qualifications in Biochemistry or Chemistry. Good opportunity for energetic young person to use initiative and learn latest biochemistry techniques in a modern department. Salary in the range £1,216 - £1,585 per annum. 37 ½ hour week. Superannuation scheme, 4 weeks’ annual leave. Apply in writing to Departmental Superintendent, Department of Biochemistry, Imperial College, London, SW7.
Applications are invited for the position of Von Haast Curator of Geology, Canterbury Museum. Duties will be those normally attaching to such a post, but in view of Museum’s Antarctic Centre proposal special opportunities exist for the development of an interest in Antarctic Geology. Commencing salary in the range NZ $5,000 to $5,400; inquiries should be addressed to: The Director, Canterbury Museum, Christchurch, New Zealand.

[772-020 (1971) : 54]
GRADUATE MICROBIOLOGIST
required for work on methods of testing bacteria for sensitivity to antibiotics. Previous experience in this or a related field would be an advantage. Salary will be according to qualifications and experience and will be in the range £1,095-£1,545 plus £90 London Weighting. The successful candidate will be appointed to the staff of the Public Health Laboratory Service but will work in the Division of Hospital Infection at the Clinical Research Centre, Northwick Park Hospital. Applications giving details of age, qualifications and experience to be sent to Dr R. Blowers, Clinical Research Centre, Northwick Park Hospital, Watford Road, Harrow, Middlesex HA1 3UJ.
[772-021 (1971) : 54]
BOROUGH OF BEDFORD COMMITTEE FOR EDUCATION.

Senior Laboratory Technician required at Pilgrim School, Bedford. Applicants should possess the City and Guilds Science Laboratory Technicians Certificate or an alternative equivalent qualification. Salary within range £1,194 to £1,653 per annum or £1,704 if qualified. Point of entry according to qualifications and experience. Assistance with removal expenses in approved cases. Application forms available from the Headmaster, Pilgrim School, Brookhill Drive, Bedford. Tel: Bedford 50612.

[772-022 (1971) : 54]
LOUGHBOROUGH UNIVERSITY OF TECHNOLOGY
Ergonomics Research
The growth of research in the Department of Ergonomics and Cybernetics has made available at least one additional post of Research Associate on a fixed term contract. Applications are invited from graduates in ergonomics or psychology with good training in statistical and experimental methods. The work will relate to such areas as aviation, man-computer interaction, and the design and organisation of automation systems. In the present instance interest and experience in flying and possibly in computer applications, would be an advantage.
Salary scale up to £1,767 for Research Associates.
Further details from Administrative Assistant, Department of Ergonomics and Cybernetics, Loughborough Leicestershire
[772-023 (1971) : 54]
THE UNIVERSITY OF MANCHESTER
An experienced **TECHNICIAN** is required in the Department of Medical Biochemistry. Applicants should have ONC or equivalent and at least five years’ experience in biochemistry or analytical chemistry and be familiar with modern laboratory techniques, preferably in a research laboratory. Applicants with greater experience and possessing HNC or its equivalent will be considered for appointment at the Senior Technician level.
Salaries in accordance with the University’s scales, i.e £1,041 - £1,410 p.a. (Technician) or £1,396 - £1,707 pa (Senior Technician). A supplement of £51 p.a. is paid for HNC equivalent qualification.
Applications stating age, etc., should be sent as soon as possible to the Secretary, Department of Medical Biochemistry, Lapworth Laboratories, Burlington Street, Manchester, M13 9PL.
[772-024 (1971) : 54]
Research Assistant required for investigating biochemical aspects of renal failure under direction of physician actively engaged in research upon this subject. Post tenable for one year in first instance and renewable. Post suitable for experienced Technician or graduate biochemist. Salary in region £1,320 min. to £1,841 max.

Applications to: Clerk to the Governors, quoting ASC/2993.

[772-025 (1971) : 54]
UNIVERSITY OF SOUTHAMPTON

Chair of Theoretical Physics

Applications are invited for the chair of Theoretical Physic. Salary within the University’s professorial range and not less than £4,533 p.a. FSSU. Further particulars may be obtained from the Secretary and Registrar, The University, Southampton, SO9 5NH, to whom applications (15 copies from applicants in the UK and one from others) should be sent before 21 January, 1972, quoting Ref: NSc.

[772-026 (1971) : 54]
CITY OF LONDON POLYTECHNIC
Sir John Cass School of Science and Technology

**READER IN CELL PHYSIOLOGY**

Applications are sought from highly qualified persons for the newly established post of Reader in the Department of Biological Sciences.

The School is a nationally recognised centre both for undergraduate and postgraduate studies and for biomedical teaching, and it is now desirable to develop research in this important field. The successful candidate will be expected to initiate and develop lines of research in Cell Physiology with particular reference to the sciences applied to health and the environment.

The Department organises undergraduate courses for B.Sc. degrees in the University of London and has a first-year intake of about 90 full-time students. In addition, it is hoped that the Department’s first M.Sc. degree course, in Neurophysiology, will be introduced in September 1972. However, the Polytechnic is in the process of organising a new Interdisciplinary degree under the aegis of the CNAA and the Reader will be expected to play a significant part in the design of new courses to meet the changing needs of students and of the modern technological development in the biological sciences. Salary in accordance with the Burnham (FE) Report (subject to formal approval): Four consecutive points in the range £3,095 x £95 to £4,045 (plus £118 London Allowance); starting salary depending upon qualifications and experience.

Application forms (which should be returned by 10 January 1972) and further details may be obtained from the Secretary, City of London Polytechnic, Administrative Headquarters, 117-119 Houndsditch, London EC3A 7BU.

[772-027 (1971) : 55]
LONDON BOROUGH OF BARNET
EDUCATION DEPARTMENT

SENIOR LABORATORY TECHNICIAN required at Hendon Senior High School, Golders Rise, N.W.4. Applicants should have several years’ experience and preferably have passed the City and Guilds Science Laboratory Certificate (or equivalent) for which an additional salary allowance will be made. Excellent laboratory facilities. Five day, 38 hour week. Permanent superannuable post. Commencing salary within Technician Grade 3, range £1,299 - £1,500 per annum, including London Weighting. Application form (s.a.e.) from Chief Education Officer, Town Hall, Friern Barnet, N.11 (Ref. WS/HJ/451).

FLOUR MILLING AND BAKING RESEARCH ASSOCIATION
requires
a Senior Laboratory Animal Technician to run its small animal department which uses rats and mice
in nutritional and toxicological work on bread and cereals.

The unit is soon being transferred to new premises at Chorleywood. I.A.T. qualifications and previous
experience essential. Salary on a scale rising to £1,578 per annum.
Please write giving details to:
The Secretary,
Flour Milling & Baking Research Association, Chorleywood, Rickmansworth, Herts, WD3 5SH.
[772-032 (1971) : 55]
AUSTRALIAN NATIONAL UNIVERSITY
Research School of Biological Sciences

RESEARCH FELLOW OR POSTDOCTORAL FELLOW IN GENETICS

Applications are invited for appointment as Research Fellow or Postdoctoral Fellow in the Department of Genetics (Head of Department: Professor J. Langridge).

The main work of the department is directed towards understanding the processes of population change and organic evolution in terms of molecular genetics. Research in progress includes evolutionary changes in nucleic acid quantity and structure, comparative studies of protein homology, the role of plasmid DNA in bacterial evolution, enzymatic aspects of adaptation and the functional evolution of biosynthetic pathways.

A further appointment is to be made of a person with experience in genetics and biochemistry in the above or related fields. Preference will be given to an applicant interested in the experimental evolution of the genes and enzymes.

Research Fellows are normally appointed for three years, with possible extension to a maximum of five years. Shorter term appointments can also be negotiated. The salary range is $A6,700 - $A9,220 per annum.

Postdoctoral Fellows are appointed for a minimum of one year and a maximum of two years; salary is at a fixed point within the Research Fellow range.

Superannuation is on the FSSU pattern with supplementary benefits. Reasonable family travel expenses are paid, both ways in the case of an overseas appointment. Assistance with housing is provided for an appointee from outside Canberra.

Further particulars are available from the Association of Commonwealth Universities (Appts). 6 Gordon Square, London, WC1H 0PF (Tel: 01-387 8572).

Applications close on 31 December, 1971.

[772-033 (1971) : 55]
Electron Optics

Electronic Engineering

The Technology Division of PA Management Consultants Limited, based in Cambridge, is an expanding source of advanced technological research and advice available to Government and throughout Industry. Rapid growth has created the need for further Consultant Staff as follows:

Electron Optics
Two engineers - probably Ph.D’s - widely experienced in either design and operation of demountable systems or of sealed cathode ray and storage tubes, whether high or low power systems. The more experienced of the two may expect to be a project leader.

Electronic Engineering
Three further engineers, each with a first or upper second in electrical engineering, or physics and electronics, and preferably M.Sc or Ph.D. Industrial experience is desirable, and should extend to research development or design work on electronic circuits - pulse, digital, linear, communications, information processing or control systems.

Applicants for all these posts should be aged 25 - 35.
The salary, prospects and conditions of employment are likely to attract the very best.
Please write briefly to:

WESSEX REGIONAL HOSPITAL BOARD

DEVELOPMENT TECHNICIAN

(Salary: £1,584 per annum)

required for a development project involving electronic design and solution of servo-mechanisms. The post will be orientated towards servo-mechanisms and mechanical and electro-mechanical problems. The appointment will be for twelve months in the first instance and will be based at the Royal South Hants Hospital, Fanshawe Street, Southampton in the Regional Physics Department.

Applicants should preferably hold ONC/HNC or equivalent qualification, suitable experience without qualification would be considered.

Three weeks’ annual leave.

Good working conditions.

Application forms and job description from the Personnel Officer, Highcroft, Romsey Road, Winchester. Closing date for applications quoting Ref: A is 13 December, 1971 [772-040 (1971) : 56]
LONDON BOROUGH OF BARNET
EDUCATION DEPARTMENT

PART-TIME LABORATORY TECHNICIAN required for 32 ½ hours weekly during term time only at Christ Church CE Secondary School, Hilton Avenue, N.12. Duties include assembly, care and maintenance of apparatus, preparation of equipment and use of chemicals, etc. Salary pro rata to full-time Technician Grade 2 Scale £1,142 -£1,299 per annum including London Weighting. Additional payment for recognised qualifications.

Application form (s.a.e.) from
Chief Education Officer, Town Hall,
R. H. WILLIAMS
TOWN CLERK
[772-041 (1971) : 56]
Applications are invited for MSc and Diploma courses in Management Administration beginning in October 1972. They are intended for those who wish to become effective managers, or as a prelude to teaching management subjects. Specialisation is available in a wide range of topics including Operational Research, Finance, Personnel, Marketing and Production.

Entrance requirements: degree or equivalent professional qualification in arts, science and technology. Students graduating in 1972 can be offered provisional places.

The Science and Social Science Research Councils have accepted these courses for the tenure of Advanced and Mature Course Studentships and Bursaries. Sponsored students from industry are particularly welcome.

Further details and application forms are available from the Director, Professor T. Kempner, The Management Centre, University of Bradford, Emm Lane, Bradford, Yorkshire BD9 4JL. (Tel. 0274-42299).

[772-042 (1971) : 57]
EAST MALLING RESEARCH STATION

**Senior Scientific Officer** for Research on Plums and Cherries

An experienced research horticulturist required for studies of alone fruits; the research worker selected will have responsibility for several on-going lines of study, including selection and testing of dwarfing rootstocks in plums and cherries, methods of controlling size and quality of crops, including fruit thinning, and orchard trials of new combinations of varieties of rootstocks. Candidates should have a good honours degree and relevant research experience.

Salary in scale £2,303 to £3,255. FSSU.

Application form and further details from the Secretary, East Malling Research Station, Maidstone, Kent.

[772-043 (1971) : 57]
CAWTHRON INSTITUTE  
Nelson, New Zealand  
Applications are invited from experienced MICROBIOLOGISTS and BIOCHEMISTS at Ph.D. Level for research in the field of water and soil microbiology.  
Emphasis will be on the degradation of organic materials in relation to water and soil quality, with particular regard to pesticides and/or wood (lignin).  
Salary from N.Z.$4,252 to $9,244 depending on qualifications and experience. Four weeks annual leave, superannuation scheme and travel assistance provided. The laboratories are new and well equipped.  
Apply with relevant details to The Director, Cawthron Institute, PO. Box 175, Nelson, New Zealand.  
[772-044 (1971) : 57]
ROTHAMSTED EXPERIMENTAL STATION
Harpenden, Herts
THE SOIL SURVEY OF ENGLAND AND WALES has a vacancy for a Scientific Officer to map soils and study their distribution. Minimum qualifications a good honours degree in chemistry, physics, or the environmental sciences. Starting salary in scale £1,120 - £1,900. Superannuation. Applications, naming two referees and quoting Reference 11213 to the Secretary by 10th December.
[772-045 (1971) : 57]
“A” levels by 1972?
Next Step—Professional Training and Qualifications.
Part of our 5-point plan for tomorrow’s engineers

Joining the Electricity Supply Industry gives you the opportunity to follow up your ‘A’ level studies this school year with a degree course next Autumn. At the same time you can make the first steps on a far-reaching and satisfying engineering career. Our five-point plan tells you much of what you’ll want to know. Our booklet (send the coupon) tells the rest.

1. TRAINING. Wherever you live in England or Wales you’ll follow a sandwich course locally, lasting at least 4 ½ years, combining study for an HND or a degree with practical training. You alternate study with industrial training periods designed to give you experience and a firm grasp of all our engineering techniques and activities.

2. JOB INTEREST. Almost unlimited. Whatever your career interests - researching and promoting new fields of energy utilisation among our industrial clients; operating and developing the distribution networks; or generating and transmitting electricity with the CEGB - challenging opportunities exist.

3. RESPONSIBILITY. We’ll train you for it early. With so many different operations we need people who can take control and make a success of it.

4. THE FUTURE. We’re concerned with tomorrow as much as today. It’s a go-ahead industry and you’ll have the chance to go ahead with it.

5. SECURITY. Last, but by no means least, there is the security of being a trained engineer with an expertise that will stand you in good stead throughout your career.

ELECTRICITY SUPPLY INDUSTRY
a fine career planned on the points that matter
Please send me your booklet on the Industry’s training scheme in electrical or mechanical engineering for ‘A’ level entrants in England and Wales. I expect to have at least 2 ‘A’ levels (Maths and a Science) plus good ‘O’ levels. My nineteenth birthday is in September 1972 or later.

Name
Address
To: Education and Training Officer
The Electricity Council, Box No. 5/NS/1
30 Millbank, London, SW1P 4RD.

[772-046 (1971) : 57]
LIVERPOOL POLYTECHNIC
SCHOOL OF PHARMACY

**Senior Laboratory Technician T.4**
Responsible for the maintenance and repair of electrical and electronic instruments and building small pieces of electronic equipment to specification.

**Laboratory Technician T.3**
Responsible for the maintenance of the medical sciences laboratory, organisation of preparation for practical classes and supervision and training of junior staff.

DEPARTMENT OF BUILDING
PRACTICE AND SUPERVISION

**General Assistant Misc. III**
To assist the Senior Technician in the laboratories and audio visual aids room and maintain teaching aids in classrooms.

SALARIES T.4 - £1,395 - £1,653
T.3 - £1,194 - £1,395
Misc. III - £1,008 - £1,098

Application forms and further particulars available from
Staff Officer, Dept. NS, Liverpool Polytechnic, Clarence Street, Liverpool L3 5TP
[772-047 (1971) : 57]
National Institute of Agricultural Engineering - Scottish Station

PRINCIPAL SCIENTIFIC OFFICER

Applications are invited for the post of Principal Scientific Officer to lead a Section concerned with research into cultivations, farm transport and some aspects of combine harvesting.

A first or good second class honours degree or equivalent, or a higher degree is required in Agricultural Engineering or in some other branch of Engineering, provided the applicant has a good knowledge of agricultural practice. Experience in research and development and the analysis of results and preparation of reports is essential.

Salary is in the range £3,100 to £4,100 per annum plus a 4 ¼ per cent non-pensionable allowance.

Further particulars and application forms from The Secretary, N.I.A.E., Scottish Station, Bush Estate, Penicuik, Midlothian. Closing date for applications 31st December 1971.

[772-048 (1971) : 57]
THE UNITED BIRMINGHAM HOSPITALS
REGIONAL CANCER REGISTRY

STATISTICIAN (£1,461-£1,911) preferably with experience of medical or biological work, required to undertake analysis, under direction of a large corpus of clinical and epidemiological data relating to malignant disease. Familiarity with punch cards and computer programming would be an advantage. The results of the study are for publication in a series of reports over a period of several years. For suitable candidates there may be opportunity of working for a higher qualification.

Applications, together with names of two referees, to Secretary, Board of Governors, Queen Elizabeth Medical Centre, Birmingham B15 2TH.

[772-049 (1971) : 57]
UNIVERSITI PULAU PINANG

ACADEMIC APPOINTMENTS

Applications are invited for the following posts

A. SCHOOL OF APPLIED SCIENCES

Professor in the field of Applied Sciences. Preference will be given to candidates in the fields of Polymer Science and Technology and Chemical Science and Technology, Chemical Science and Technology and Materials Science and Technology.

B. SCHOOL OF BIOLOGICAL SCIENCES

Professors in the fields of Parasitology, Entomology, Hydrobiology or Plant Pathology.

Senior Lecturers in Entomology, Hydrobiology (with special emphasis in Applied Microbiology), Animal Ecology (preferably in Quantitative Ecology), Animal Physiology, Invertebrate Zoology or Cryptogamic Botany (Lower Plants)

C. SCHOOL OF CHEMICAL SCIENCES

Lecturers in the following fields: Inorganic, Organic and Physical Chemistry

D. SCHOOL OF PHARMACY

Professor / Director in the fields of Pharmacy, Pharmaceutics, Pharmaceutical Chemistry, Pharmacology, Physiology and Pharmaceutical Technology.

Lecturers in the fields of Pharmacy, Pharmaceutics, Pharmaceutical Chemistry, Pharmacology, Physiology and Pharmaceutical Technology.

E. SCHOOL OF PHYSICS AND MATHEMATICS

Professor in Theoretical Physics or Geophysics.

Senior Lecturer in Geophysics.

Lecturers in the following fields: Electromagnetic Theory, Theoretical Physics, Geophysics, Biophysics, Atomic and Nuclear Physics, Materials Science (Non-Destructive Testing), Metallurgy, Applied Electronics, Biometrics, Statistics, Pure and Applied Mathematics

QUALIFICATIONS REQUIRED:

I. Professor / Director (D) : Should have a Ph.D for the above-mentioned fields together with relevant teaching experience in institutions of higher learning and also the ability to set up and administration of the facilities pertaining to undergraduate and professional training.

Lecturers (for D only): Should possess a good first degree in Pharmacy together with a higher degree and research experience in one of the following fields related to the teaching of Pharmacy.

2. Professors : Must be outstanding scholars in their field with experience in University teaching and research, with publications of recognized academic value.

3. Senior Lecturers : Must have a doctorate from a well-established and recognized university, with several years of experience in research and teaching at university level, together with publications of recognized academic value.

4. Lecturers : Should have at least a good Honours degree (preference to candidates with doctorates) with suitable teaching and research experience in addition to the special qualifications where stated for the respective posts.

EMOLUMENTS:

These are fixed (in Malaysian dollars (per mensem) and their approximate U.S. dollar equivalent (per mensem) at current exchange rates are shown in brackets

(a) Salary

Professor /Director: An appointee may be offered any one of the following basic salaries per mensem:

$1800 (US$600), $1870 (US$623), $1940 (US$647),

$2010 (US$670), $2080 (US$693), $2150 (US$717),

$2220 (US$740)

Senior Lecturers: Basic salary within the limits of $1405/1800 (US$460-501) depending on qualifications and experience.
Lecturers Basic salary within the limits of $940/1505 (US$313/501) depending on qualifications and experience.

(b) Variable Allowance
35% of basic salary, subject to certain maxima depending on marital status.

OTHER BENEFITS:
Provident Fund, medical and housing benefits are also payable.

INITIAL APPOINTMENT:
Successful applicants may be given a three year initial appointment: thereafter subject to satisfactory service, their appointment may be extended for another three years.

Further information including advice regarding the method of application and on further particulars about terms and conditions of service should be obtained from: The Registrar, Universiti Pulau Pinang, Minden, Penang, Malaysia.

The closing date of receipt of applications is 4th January 1971. The University reserves the right to make appointments by invitation.

[772-050 (1971) : 58]
MINISTRY OF DEFENCE

MEDICAL OFFICER
A full time Medical Officer is needed for the Royal Ordnance Factory at Bridgwater, Somerset. The duties will be to advise on occupational health hazards which include Toxic chemicals and explosives. The duties will also include control of nursing staff. Encouragement is given for carrying out investigations into problems of Occupational Health. Candidates must be fully registered as medical practitioners in the United Kingdom and must have a sound clinical background. Possession of the Diploma of Industrial Health or previous experience of occupational medicine will be an advantage.

Salary from £4,031 to £5,480 p.a.

For application form and further details please write to: Ministry of Defence. CM(S) In, Lacon House, Theobalds Road, London, WC1X 8RY, Closing date 11 December 1971. Telephone: 01-242 0222 Ext. 615/929. Serial No. CM(S)In-71/72/10

[772-051 (1971) : 58]
Applications are invited for the post of Research Assistant to work with Professor J. D. Smyth on the physiology and developmental biology of cystogenic cestodes. Applicants should possess a good degree in a biological science or its equivalent; a background in biochemistry and/or physiology would be an advantage but is not essential. The post is tenable for approximately three years (in the first instance) and carries a commencing salary of £1,110 in an incremental scale (with FSSU).

Applications, which should include the names of two referees, should be sent to: Professor J. D. Smyth, Department of Zoology Imperial College, London. SW7 2BB, before 1 December. Dates of taking up duties by arrangement.

[772-052 (1971) : 58]
DUDLEY ROAD (BIRMINGHAM) HOSPITAL
MANAGEMENT COMMITTEE

SENIOR MEDICAL PHYSICS TECHNICIAN

THE DEPARTMENT in newly commissioned premises at Dudey Road Hospital for Clinical investigation and Research activities

THE TASK to undertake development and maintenance of apparatus and organisation of technical work of the laboratories.

INITIALLY work orientated towards physiological measurement and biochemical laboratory procedures, involvement with training of hospital technicians O.N.C. and H.N.C courses.

QUALIFICATIONS degree or H.NC. in electronics or electrical engineering, physics or chemistry.

MINIMUM EXPERIENCE required in hospital physics department in Grade III post for two years or at least five years previous relevant experience outside the Hospital Service.

SUCCESSFUL applicant must be of outstanding skill and ability and able to undertake exceptionally important and difficult work.

SALARY £1,626 - £2,130 p.a.

INFORMATION telephone Dr. Vickers 021-564 3801 Ext 717.

APPLICATIONS giving full personal details and experience to Group Personnel Manager, Dudley Road Hospital, Birmingham B15 7QH, to be received by 10th December 1971.

[772-053 (1971) : 58]
UNIVERSITY OF THE WEST INDIES
Trinidad
Applications are invited for the post of (a) SENIOR RESEARCH FELLOW OR (b) RESEARCH FELLOW (PLANT BREEDER) IN THE COCOA RESEARCH UNIT (shortly to become the International Cocoa Research Centre). Previous experience with cocoa or another tree crop would be desirable but not essential. The plant breeder will be required to continue the existing programme of breeding for yield and disease resistance in the crop. Salary Scales: (a) £2,700 - £4,200 p.a. (b) £1,850 - £3,285 p.a. Child allowance. F.S.S.U. Family passage; triennial study leave. Detailed applications (6 copies) naming 3 referees by 9 December, 1971, by persons living in the Americas and Caribbean area to Secretary, University of the West Indies, St. Augustine, Trinidad, and by all others to Inter-University Council, 90-91 Tottenhmm Court Road, London, W1P 0DT. Further particulars obtainable similarly.
THE UNIVERSITY OF SHEFFIELD
DEPARTMENT OF CHILD HEALTH

Applications are invited for the post of RESEARCH ASSISTANT in the above Department, tenable from a date to be arranged. The Research Assistant will undertake and develop research projects on the transplantation of muscle in normal and dystrophic animals, in association with Dr Victor Dubowitz, Reader in Child Health and Developmental Neurology. This project forms part of the current neuromuscular research programme in the Department. Comprehensive laboratory and animal house facilities are available within the new departmental building. Graduates in Biology, Zoology or related fields would be suitable candidates. Salary in the range £1,320 - £1,629. Further particulars from the Registrar to whom applications should be sent by 6 December, 1971. Quote ref. R59/NS.

[772-055 (1971) : 58]
UNIVERSITY OF GLASGOW

Research Assistant in

DEPARTMENT OF AERONAUTICS AND FLUID MECHANICS

Applications are invited for a Research Assistantship in the Department of Aeronautics and Fluid Mechanics for work on Filament Wound Shells. An interest in advanced composite structures would be required.

The post, supported by a Scientific Research Council Grant, is tenable for three years. The salary will be within the range £1,150 to £1,400 per annum OR £1,400 to £2,160 per annum, depending on qualifications and experience. FSSU.

Applications, giving details of qualifications and experience, should be sent to Professor T. R. F. Souweiler, Department of Aeronautics and Fluid Mechanics, The University of Glasgow, to arrive not later than 17th December, 1971.

In reply please quote Ref. No. 3066/2N.

[772-056 (1971) : 59]
SHEFFIELD POLYTECHNIC

PRINCIPAL LECTURER

Food Engineering Applied to Catering

This important appointment carries responsibility for applying food engineering to the future needs of the catering industry together with the development of a degree course. Candidates should have a higher degree in food engineering, food technology, food science or chemical engineering and a record of successful research and development. Some experience in the teaching of degree students is desirable but not essential. The person appointed will be encouraged to undertake research and consultancy.

Salary Scale: £3,190 - £3,570 per annum.

Further details and application forms can be obtained from the Staff Officer, Sheffield Polytechnic, Halford House, 14 Fitzalan Square, Sheffield S1 2BB to whom they should be returned within 14 days. [772-057 (1971) : 59]
UNIVERSITY OF EDINBURGH

CAREERS ADVISER

Applications are invited for the post of a Careers Adviser who will have special responsibility for students of mathematics and all branches of engineering.

Salary scale: £1,491 - £3,417 per annum.

Applications, by letter (three copies) together with the names of two referees, should be sent to the Secretary to the University, Old College South Bridge, Edinburgh, EH8 9YL, from whom further particulars may be obtained. The closing date for applications is 22nd December, 1971. Please quote reference 4005.

[772-058 (1971) : 59]
CITY OF SALFORD EDUCATION COMMITTEE

A suitably qualified **TECHNICAL STEWARD** is required to assist in the Physics Laboratory in the Science Department of the SALFORD COLLEGE OF TECHNOLOGY. Salary within scale £1,030 p.a. - £1,194 p.a.

Application form from the Director of Education, Education Office, Chapel Street, Salford, M3 5LT.

[772-059 (1971) : 59]
ICI PHARMACEUTICALS DIVISION

Biologist

Applications in writing, giving brief details of age, experience and qualifications, should be sent to:
P. M. J. Eyre, Personnel Officer, Imperial Chemical Industries Ltd., Pharmaceuticals Division, Mereside, Alderley Park, Nr. Macclesfield, Cheshire.
Tel: Alderley Edge 2828 Ext. 7-655

THE QUEEN’S AWARDS TO INDUSTRY

We have a vacancy for an Experimental Biologist with Ph.D. level research experience to work in the field of Parasitology. Previous experience in this area is desirable but not essential since we are seeking an experimentalist whose interests would not be limited to this field.

Initially the job will be to take full charge of an anthelmintic research programme. This will provide an opportunity for a new look at methods of treating helminth infections through fundamental research and will involve the initial evaluation and development of drugs for the treatment of these diseases in animals and man.

The successful candidate will join a multidisciplinary research project team engaged in work on various aspects of parasitology. The research staff is encouraged to undertake original and fundamental research and much freedom is given to the publication of scientific papers.

Conditions of service, prospects and assistance given to married men in moving home are designed to attract and retain staff of this high calibre and would be discussed in detail at interview.

[772-060 (1971) : 59]
Experienced Chemist
£2,100 – over £2,500 per annum
required at Chiswick, West London to undertake non-routine chemical analysis and conduct investigations into miscellaneous problems covering a wide field, both within and outside the laboratory, including works processes, atmospheric pollution and fire hazards.
Applicants must be experienced in general chemical work and able to examine non-metallic materials in order to recommend their suitability and use in particular applications.
A first or Second Class Honours Degree in Chemistry, or possession of the Associateship of the Royal Institute of Chemistry, is essential.
Valuable free travel facilities and a contributory superannuation fund.
Applications to Appointments and Welfare Officer (Ref. 756), London Transport, 55 Broadway, S.W.1, stating age, qualifications and experience.

London Transport
[772-061 (1971) : 59]
THE OPEN UNIVERSITY
FACULTY OF SCIENCE
TECHNICIAN FOR PSYCHOLOGICAL LABORATORY

Knowledge of electronics plus photographic techniques essential, together with the ability to design and build electronic and mechanical apparatus. Duties may include collection and processing of data. Salary within scale £1,041 - £1,410 per annum.

Further particulars are available from The Personnel Manager (PTI), The Open University, Walton Hall, Walton, Bletchley, Bucks. (Tel.: Bletchley 4066, extension 3068).

Closing date for return of applications: - Friday, 10th December 1971

[772-062 (1971) : 59]
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry. For further details write or telephone: G.K. Bureau, 17 Shaftesbury Avenue, London, W.1. 01-738 7232. Interviews by appointment.
[772-063 (1971) : 59]
ACADEMIC PUBLISHER requires experienced proofreader / copyeditors with knowledge of natural sciences (preferably zoology) for freelance work. Write with details of experience and qualifications to Box D614, New Scientist.
[772-064 (1971) : 59]
ASSISTANT INFORMATION SCIENTIST / LIBRARIAN

An Assistant Information Scientist / Librarian is required in the Scientific Information Unit at the Central Research Laboratories of the Wilkinson Sword Group of Companies.

REQUIREMENTS: the successful candidate, who must be cheerful and flexible in approach, should possess:
- Qualifications at least to H.N.C. or H.N.D in Physics or Chemistry.
- Knowledge of one or more of the languages French, German or Russian.

Research experience in industry is desirable. Previous involvement in information or library work and the ability to type would be added advantages.

DUTIES OF POST: aiding research staff by:
- Screening current scientific literature
- Typing and circulating the current awareness lists
- Searching literature and writing bibliographies on request
- Translating articles from foreign languages
- Day to day running of the library

The Laboratories are situated in modern premises in pleasant surroundings west of London.

Please write to: The Personnel & Administration Manager, Wilkinson Sword (Research) Ltd., Colnbrook, Slough, Bucks.

WILKINSON SWORD
Or telephone:
COLN BROOK 3811 EXT 25
[772-065 (1971) : 60]
RESEARCH CHEMIST

Applications are invited for the post of JUNIOR SCIENTIFIC OFFICER to work on the biophysical aspects of adhesion of polymeric films to tooth substance. This is a joint project between the Dental Materials Section at the Dental School and the Chemistry Department of University College, Cardiff and is sponsored by the MRC.

Applicants should possess a good honours degree or equivalent qualifications in Chemistry. Salary in the range £1,095 - £1,545.

Applications, including the names of two referees, should be forwarded to the Registrar, Welsh National School of Medicine, Heath Park, Cardiff, CF4 4XN, from whom further particulars may be obtained.

[772-066 (1971) : 60]
LIBRARY ASSISTANT
required in the library of the Geology Department for general duties. Good general education and library
experience required. Typing essential. Salary scale £1,080 - £1,320 according to qualifications and
experience.
Applications should be submitted as soon as possible to the Librarian, Watts Library Geology
Department, Imperial College, London, SW7 2BP.
[772-067 (1971) : 60]
Applications are invited for a Postdoctoral Research Assistantship from physicists, chemical engineers and chemists with a good background in experimental work, to work on a fundamental study of radiative heat transfer in flames and combustors, to be financed by a grant from the Science Research Council. The project will involve fast scan infra-red spectroscopy of turbulent flames. Initial salary £1,491 a year rising by increments of £138 to £1,767 a year. The post will be tenable as soon as possible until 30 September, 1974. Applications to Professor J. M. Beer, Department of Chemical Engineering and Fuel Technology, The University, Mappin Street, Sheffield S1 3JD, by 18th December, 1971. Quote ref. R. 58/H.
RESEARCH ASSISTANT
Age 25-35 years, required to assist in a programme of work concerned with development of Total Joint Replacement. Candidate should have B.Sc. or equivalent qualification in mechanical engineering and some drawing office experience. Apply in writing giving details of experience to Secretary to Dept. of Biomedical Engineering, Royal National Orthopaedic Hospital, Stanmore, Middx.
[772-069 (1971) : 60]
STUDENTSHIPS

ROYAL SOCIETY LEVERHULME STUDENTSHIPS
Applications are invited by the Council of the Royal Society for Royal Society Leverhulme Studentships, the intention of which is to enable young graduates of high quality of universities in the United Kingdom and who intend to make a career in scientific research to gain practical experience of scientific problems outside Europe and North America and especially in the developing countries. Each student will be expected to work under the general direction of a senior scientist in the country to which he goes, whose consent must be obtained. Only those who have recently graduated in natural science, or expect to graduate this summer, will be considered.

The studentships will cover the cost of travel to and from the country of choice, as well as local travel within the country, and a maintenance allowance at a rate based on the local cost of living. They will be tenable for a period of between 6 and 12 months.

If the proposed work necessitates the use of a motor vehicle, the Royal Society will conduct negotiations with the proposed overseas supervisor for such a vehicle to be provided, if necessary providing the supervisor with an advance to purchase one, and in addition an allowance will be made for running expenses. A grant may also be made for the purchase of equipment essential to the research.

Applications should be made on forms obtainable from the Executive Secretary (Ref: DJHG/NS), The Royal Society, 6 Canton House Terrace, London, SW1Y 5AG, and should be received as early as possible, in any case not later than 15 January, 1972.

[772-070 (1971) : 60]
LOUGHBOROUGH UNIVERSITY OF TECHNOLOGY
Materials Technology

Two research studentships are immediately available for researches in the new and expanding Department of Materials Technology. These researches are concerned with (a) electroforming processes and (b) the structure and mechanical properties of refractory oxides systems. A knowledge of mass transport and / or electrochemical processes is required for the first of these whilst the second will be of particular interest to candidates with some knowledge of ceramic materials.

In addition to these posts the Department welcomes enquiries from candidates who may be graduating in 1972 and who have interests in research in Powder Technology, Materials Engineering or Materials Finishing. Further studentships will be available as will a number of post-doctoral posts. For the latter, enquiries will be welcomed from candidates who wish to return from North America and other overseas locations as well as those based in the United Kingdom.

Applications for the posts immediately available are invited from candidates who hold good honours degrees (or equivalent professional qualifications) in chemical engineering, materials science, metallurgy, ceramics and glass technology or chemistry. Further information from Professor Ian Menzies, Department of Materials Technology.

[772-071 (1971) : 60]
SYMPOSIA
LIVERPOOL POLYTECHNIC
SYMPOSIUM ON RECENT ADVANCES IN ANTIBIOTICS
2nd and 3rd February 1972
Topics discussed will include Penicillins, Cephalosporins, Tetracyclines and Polypeptide-Antibiotics, Antibiotics-Sugars and Mode of Action of Antibiotics, Affecting Cell-wall Structure.
For full details and application forms write (quoting Ref.: NS) to: - Head of Chemistry Department
Liverpool Polytechnic
Byrom Street
Liverpool, L3 3AF
(Tel.: 051-207 3581. Ext. 27)
[772-072 (1971) : 60]
LECTURES, MEETINGS AND COURSES

EUROPEAN MOLECULAR BIOLOGY ORGANIZATION
Postgraduate Course
in
Experimental Animal Virology
An EMBO study course in Experimental Animal Virology will be held in the Institute of Virology, University of Glasgow, from March 20th to April 7th 1972. It will include lectures and discussion on fundamental aspects of virology with particular emphasis on the genetics and molecular biology of viruses. Laboratory instruction in virological techniques and in genetic and biochemical techniques as applied to animal viruses will complement the lecture course.
The course fee is £45 and the number of places available is limited. A small number of EMBO fellowships will be available for applicants who could not otherwise attend the course.
For further details and application forms write to The Course Director, Professor J. H. Subak-Sharp, Institute of Virology, Church Street, Glasgow, W.1. Scotland. The closing date for applications is 7th January, 1972.
[772-073 (1971) : 61]
THE UNIVERSITY OF SHEFFIELD
POSTGRADUATE SCHOOL OF LIBRARIANSHIP AND INFORMATION SCIENCE
M.Sc. INFORMATION STUDIES
This course prepares suitably qualified graduates in Science and Technology for work in information units and libraries in industry, research organisations and universities, and for research in the information field.
Some OSTI (DES) Information Science studentships are available.
Application forms and further information from Professor W. L. Saunders, Postgraduate School of Librarianship and Information Science, The University, Sheffield S10 2TN. Ref. R48/H.
Closing date for applications: 31st December, 1971.
[772-074 (1971) : 61]
A one year full-time course of advanced study leading to the above degree will be offered in the session beginning October, 1972.

Applicants should have a first or second class honours degree, a Graduate Certificate in Education, and a number of years of teaching experience.

The structure of the course is such that it is possible for candidates to concentrate their studies in the field of science or mathematics education.

Serving members of the staff of schools and colleges may be eligible either for secondment at the full rate of salary appropriate to them, or for grant. In accordance with the provisions of the Department of Education and Science.

Further details are available, on receipt of a stamped addressed foolscap envelope from the Deputy Head, Department of Education, The University, Leeds, LS2 9JT, to whom completed application forms should be returned by December 1st, if possible, and in any event, not later than 31st January, 1972.
UNIVERSITY OF ABERDEEN

POSTGRADUATE STUDY: SOIL SCIENCE

Instructional course: for eight months from October covering soil physics, chemistry, mineralogy, pedology, soil survey, cartography and land use; crop nutrition and protection, soil fertility and microbiology; experimental techniques, instrumentation and statistics.

M.Sc. and Ph.D. degrees: a candidate, who successfully completes or who may be exempted from part or all of the instructional course, may proceed to a personal research project for a higher degree.

Graduates or those expected to graduate in agricultural, biological, earth or physical sciences, who wish further particulars, should apply to the Head of the University Soil Science Department, Aberdeen, AB9 2UE.

[772-076 (1971) : 61]
Teaching is not just another job – it’s a career with a future.

A good technical qualification combined with a course of technical teacher training offers a career with a future.

A one-year free tuition course in SCIENCE AND MATHEMATICS (PHYSICS, CHEMISTRY, BIOLOGY, METALLURGY, ETC.) is offered to men and women aged between 24 and about 45 (Graduates may be accepted under 24) who hold a University Degree; associate or graduate membership of a professional institution; Dip.Tech.; H.N.D. or H.N.C.; Dip.Maths.

Maintenance and travelling grants available. Next course September 1972 to June 1973. For full particulars write to The Director, Room 34 at either of the following colleges -

Technical Teachers’ College,
Compton Road West,
WOLVERHAMPTON.
College of Education (Technical),
Holly Bank Road,
HUDDERSFIELD.
Garnett College,
Downshire House,
Roehampton Lane,
LONDON S.W.15.
College of Education (Technical),
Chadwick Street,
BOLTON.

The University of Aston in Birmingham
Two Short Courses in Modern Optics
I Introduction to Optical Frequency Methods
5th - 14th April 1972. Fee £120 Residence £30
(Closing date 8th February 1972)
II Optical Data Processing
3rd - 14th July 1972 Fee £120 Residence £35
(Closing date 8th May 1972)
Dr. G. L. Rogers. Course Organiser. The University of Aston, Birmingham B4 7ET will be pleased to send further particulars and application forms.
A visiting Lecturer from S.I.R.A. will assist on each course and the long experience of an active Research Group at Aston will be available.
[772-078 (1971) : 61]
A two week course, including practical experience, will be given to the Polytechnic on all aspects of radiological protection. The course is designed for those wishing to become radiological protection officers and for all “designated persons” in industry, government establishments, hospitals, research and teaching institutions.

Further information and application forms (quoting Ref.: NS) can be obtained from the Head of the Chemistry Department, Liverpool Polytechnic, Byrom Street, Liverpool, L3 3AF. Tel.: 051-207 3591.
Two courses designed to give you a fast moving career in Dairy Technology
Now is the time to train for a responsible managerial position in a modern, expanding industry!

Here are two courses tailor-made to equip you for a future in the processing and manufacturing side of the Dairy Industry.
1 If you possess ‘O’ levels in science subjects, write now for details of the ORDINARY NATIONAL DIPLOMA IN FOOD TECHNOLOGY/DAIRY TECHNOLOGY.
2 With science ‘A’ levels you may aim at the HIGHER NATIONAL DIPLOMA IN FOOD TECHNOLOGY / DAIRY TECHNOLOGY.

Both are sandwich courses lasting three years, including periods of paid industrial experience. Will you be eligible for a grant? All students should be eligible for local authority grants. Also, the Dairy Industry supports these courses by offering outstanding students one-year special grants to the value of £600, plus all fees.

For full details of these courses and career opportunities in the Dairy Industry, please write to or telephone:
Mrs Jacqueline Gray,
Department 26,
Dairy Industry Training and Education Committee,
The Joint Committee,
Giggs Hill Green, Thames Ditton, Surrey.
Telephone: 01-3984101. Ext. 436.
[772-080 (1971) : 62]
Licensing

do you really know its full potential?

Licensing is probably one of the most mismanaged and consequently underrated commercial activities in the business world. When handled correctly it can be a highly profitable marketing and selling operation for large or small companies. So just how much do you really know? Your superficial knowledge of the topic is just the tip of a very lucrative iceberg.

Licensing and Know-How Selling is the subject of a Seminar to be held on 17 - 19th January 1972 by the Glacier Institute of Management. Too many costly mistakes have been made through the ignorance of the true situation and lack of preparations for the negotiations. They’re mistakes you can’t afford to make.

Send for further details and application form to
Course Secretary, Glacier Institute of Management Ltd.,
17 King Edward’s Road, Ruislip, Middlesex,
HA4 7AF. Tel.: Ruislip 74158.

GIM
[772-081 (1971) : 62]
UNIVERSITY OF READING
DEPARTMENT OF MATHEMATICS
M.Sc Course in
NUMERICAL SOLUTION OF DIFFERENTIAL EQUATIONS
A course of advanced study leading to the M.Sc. degree which may be taken full-time over twelve
months or part-time over twenty-four months from October 1972. Lectures will cover the analysis of
numerical methods, differential equation theory and a choice of application areas.

Short courses in numerical methods
NUMERICAL FLUID DYNAMICS April 10th - 14th, 1972
FINITE ELEMENT METHODS May 8th - 12th, 1972
ENGINEERING MATHEMATICS March 20th - 24th, 1972
This is an undergraduate-level course designed for non mathematicians working on engineering
problems.
Further details may be obtained from :—
The Secretary, Department of Mathematics,
University of Reading, Whiteknights, Reading.
Tel. Reading 85123 ext. 429.
[772-082 (1971) : 62]
UNIVERSITY OF LEICESTER
Department of Chemistry & School of Education
Ph.D. IN CHEMISTRY WITH GRADUATE CERTIFICATE OF EDUCATION
Applications are invited from persons holding, or expecting to be awarded during 1972, a degree with First or Second Class Honours upper division) in chemistry, or equivalent qualifications, who wish to pursue a 3-year course of research and teacher training.
The course will attract a limited number of Science Research Council quota awards, principally for new graduates, but candidates from industry or teaching will be eligible to apply for awards under other SRC schemes.
For further information and application forms please write to Professor R. D. Peacock, Department of Chemistry, The University, Leicester, LE1 7RH.
The closing date for applications is 31st January, 1972.
[772-083 (1971) : 63]
A part-time course in Digital Electronics will commence on 5 January, 1972. Lectures will begin each Wednesday at 2.30 p.m.
The course gives a general introduction to the techniques of Digital Electronics and assumes an elementary understanding of Electronic circuits and devices. It will provide background to modern electronics based on switching devices logic and computing circuits. The fee is £6.
Application forms and further details may be obtained from the Registrar.
[772-084 (1971) : 63]
FELLOWSHIPS, GRANTS AND SCHOLARSHIPS

THE AUSTRALIAN NATIONAL UNIVERSITY
SCHOLARSHIPS FOR PH.D DEGREE COURSES

The Institute of Advanced Studies, consisting of the John Curtin School of Medical Research and the Research Schools of Physical Sciences, Social Sciences, Pacific Studies, Chemistry and Biological Sciences, and The School of General Studies, consisting of Faculties of Arts, Asian Studies, Economics, Law and Science, offer a limited number of scholarships in the fields listed below to applicants of high scholastic calibre with capacity for research who hold, or expect to hold a good honours degree or equivalent from a recognised university.

A scholarship is awarded initially for two years, subject to satisfactory progress, but normally will be extended for the whole period of the course, usually three years. The Ph.D. degree course of this University requires the submission of a thesis.

Basic allowance: $A2,915 per annum tax free. A married scholar without children whose wife is unemployed may apply for an extra $A630 per annum. Married scholars with dependent children: $A890 per annum for first child, $A260 per annum for each other child. Basic allowance for medically qualified scholars: $A4,200 per annum; child allowances up to $A1,150 per annum only. Return fares are normally paid; help with housing is given to most scholars.

Applications should preferably be made in January, April or September, but those at other times will be considered. An award can usually be taken up at any time.

The fields of research in which scholarships are offered are:
Neurobiology, Developmental Biology, Environmental Biology, Genetics, Human Biology, Molecular Biology, Environmental Biology, Taxonomy, Microbiology, Botany, Forestry, Zoology, Physiology, Neuropharmacology, Clinical Science, Experimental Pathology, Immunology, Medical Chemistry, Biochemistry, Physical Biochemistry; Chemistry: Inorganic, Organic Physical Organic, Theoretical and Physical; Geochemistry, Geology, Geophysics, Aerophysics, Electron and Ion Physics, Engineering Physics, Laser Physics, Nuclear Physics, Solid State Physics, Theoretical Physics, Astronomy, Mathematics, Applied Mathematics, Computer Science, Statistics.

Application forms and further particulars are available from the Academic Registrar, Australian National University, Box 4, P.O., Canberra, A.C.T. 2600, Australia, or from the Secretary-General, The Association of Commonwealth Universities (Appts) 36 Gordon Square, London WCIH 0PF.

Completed applications from overseas should be sent direct to the University and not to the nearest Australian Embassy, High Commission or Consulate. Successful applicants will be notified of any requirements which they will have to satisfy for entry into Australia as private students.

[772-085 (1971) : 63]
FELLOWSHIPS AND ASSISTANTSHIPS for interdisciplinary graduate study in the solid-solid-interface and tribology (the science of friction, wear, and lubrication) are available to qualified applicants with backgrounds in engineering, surface physics, or surface chemistry. Write: Dr Michael Furey, Department of Mechanical Engineering, Virginia Polytechnic Institute and State University, Blacksburg, Virginia 24061.

[772-086 (1971) : 63]
British Steel Corporation

Fellowships
During 1972 the British Steel Corporation is offering a number of Fellowships at Universities and other educational institutions for work in any field of interest common to the Corporation, the Fellow and the institution.

Applicants for Fellowships must be nominated by Heads of Departments, and be capable of formulating and carrying out their own research projects without direct supervision.

The maximum basic award will be at the rate of £5,000 per annum and, in addition, certain other expenses will be paid. In determining the amount of the award, account will be taken of the applicant’s existing remuneration.

Awards will be made in the first instance for one year, or for a shorter period if requested by the applicant. Awards may be extended for a further period of up to one year.

It is not intended that Fellowships should give financial support to those reading for Degrees or further Degrees.

Closing date for application —
28th February, 1972.

Further particulars and application forms can be obtained from:—
The Fellowships Secretary,
British Steel Corporation,
33 Grosvenor Place,
LONDON, S.W.1
[772-087 (1971) : 63]
Applications are invited for a SCIENTIFIC RESEARCH FELLOWSHIP open to women graduates and tenable for three years from 1 October, 1972. The applications should be in the field of Mathematics, Natural Sciences, Geography and allied subjects.

Each Fellowship is of the value of £700 a year, with free residence, pensionable under the FSSU. Particulars are available from the Secretary to the Council, Girton College, Cambridge, to whom applications should be sent by 17 December, 1971.

[772-088 (1971) : 63]
FRENCH GOVERNMENT SCHOLARSHIPS
for further study and research in France in Pure and Applied Science, Technology, Medicine, Social Sciences, Economics, Geography and Agriculture are offered for the academic year 1972-73 to candidates with university degrees or comparable qualifications. Closing date 31st December, 1971. Details from Scientific Department, French Embassy, 41 Parkside, Knightsbridge, London, SW1X 7W. [772-089 (1971) : 63]
Shell Research Fellowships

Shell International Petroleum Company Limited offers three post-doctoral Fellowships annually to assist recipients to pursue research in a subject of their own choice within the following disciplines:

Engineering Mathematics Physics Chemistry
Biochemistry Botany Zoology Microbiology Geology Geophysics

Value The Fellowships will be worth £1,750 per annum. Additionally, certain miscellaneous expenses (e.g. cost of analyses, report typing, attendances at meetings) will be reimbursed up to a total of £200 p.a. The Company will make a further grant equivalent to the employer’s share of F.S.S.U contributions if the Fellow is a member of the Scheme.

Tenure The awards will be tenable for two years at any University, College of Technology or other recognised centre of research in the United Kingdom or the Republic of Ireland.

Eligibility The Fellowships are open to candidates of any nationality. Candidates must hold a Ph.D. degree or equivalent at the time of application and preferably be under the age of 30 on 1st October of the year of appointment.

Reports Fellows will be required to render an annual report on their work not exceeding 1,500 words.

Applications The closing date for applications is 31st January 1972. The Selection Panel hopes to interview shortlisted candidates in the second half of March and the awards will be announced before the end of April. Successful candidates will be expected to start their work in October 1972.

Application forms may be obtained from The Secretary, Shell Grants (Committee (O), Shell International Petroleum Company Limited, Shell Centre, London SE1 7NA.

[772-090 (1971) : 64]
UNIVERSITY OF OXFORD

Turner and Newall Research Fellowships

The Committee on Turner and Newall Research Fellowships proposes to make an election in Hilary Term 1972 to a Fellowship commencing at the beginning of the academic year 1972-3 and tenable for two years in the first instance.

The Fellowship (which is open equally to men and women) is for postdoctoral research in Chemistry, Physics, Geology, Mineralogy, Metallurgy, Applied Mathematics, Engineering, or related technologies. Further particulars may be obtained from the Registrar, University Registry, Clarendon Building, Oxford, to whom applications should be sent, to be received not later than 1 February, 1972.

[772-091 (1971) : 64]
In the past two years the Medical Council on Alcoholism has given substantial grants to workers in the field of alcoholism. It is prepared to promote and finance further research into problems associated with alcoholism whether academic or sociological. It may also be possible to establish fellowships for postgraduate study. Application forms can be procured from the Secretary of the Research Committee, Medical Council on Alcoholism, 8 Bourdon Street, Davies Street, London, W1X 9HY.
NATIONAL RESEARCH COUNCIL OF CANADA
POSTDOCTORATE FELLOWSHIPS
1972-73

An applicant should not have reached his 36th birthday by the 31st of March of the year in which the fellowship is to be taken up and should possess a Ph.D. degree from a recognized university or expect to obtain such a degree before taking up an award. (Candidates having equivalent research experience may be considered.) There are no restrictions regarding nationality of applicants, but successful candidates must meet all Canadian immigration requirements. The competition closes on 15th January, 1972.

The current stipends are $6400 per annum for both single and married Fellows and $7600 per annum for a married Fellow with a child or children. A grant is provided towards the cost of travel.

Inquiries should be addressed to: Postdoctorate Fellowships Office, Personnel Services Branch, National Research Council of Canada, OTTAWA, Canada. K1A OR6
[772-093 (1971) : 64]
THE ROYAL SOCIETY
THE RUTHERFORD SCHOLARSHIP
Applications are invited from graduates of a university within the British Commonwealth who are under 26 years of age, or if holding the degree of Ph.D. under 35 years of age, on 1 May, 1972, for the RUTHERFORD SCHOLARSHIP. This will be awarded for experimental research in any branch of the natural sciences, but if there are candidates of similar merit, preference will be given to experimental physics. The scholarship will be tenable for three years in some part of the British Commonwealth other than that in which the applicant graduated. It will be normally awarded to a graduate who has already held a senior research award.

The value of the scholarship will be adjusted to meet the circumstances of the appointment but will be between £950 and £1,200 per annum (or up to £1,600 per annum for postdoctoral candidates). Additional allowances will be granted for travel, university fees, etc. The appointment will date from 1 October 1972, or such other date as may be arranged.

The appointment will be made by the President and Council of the Royal Society. Applications from university graduates outside the United Kingdom should be made through their universities to the Royal Commission for the Exhibition of 1851 on forms of application for the 1851 Exhibition Science Research Scholarships. Applications from university graduates in the United Kingdom should be made before 15 February, 1972, on forms obtained from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG.

[772-094 (1971) : 64]
ICI Postdoctoral Research Fellowships

Applications are invited for awards under the ICI Research Fellowship Scheme for the academic year 1972/73. Fellowships may be held at the following universities:

University of Aberdeen
University of Aston in Birmingham
Bath University of Technology
The Queen’s University of Belfast
University of Birmingham
University of Bradford
University of Bristol
Brunel University
University of Cambridge
The City University
University of Dublin, Trinity College
University of Dundee
University of Durham
University of East Anglia
University of Edinburgh
University of Essex
University of Exeter
University of Glasgow
Heriot-Watt University
University of Hull
The National University of Ireland (Dublin, Cork, Galway)
University of Keele
University of Kent at Canterbury
University of Lancaster
University of Leeds
University of Leicester
University of Liverpool
University of London
Loughborough University of Technology
University of Manchester (including University of Manchester Institute of Science and Technology)
University of Newcastle upon Tyne
University of Nottingham
University of Oxford
University of Reading
University of St. Andrews
University of Salford
University of Sheffield
University of Southampton
University of Stirling
University of Strathclyde
University of Surrey
University of Sussex
University of Ulster
University of Wales (Aberystwyth, Bangor, Cardiff, Swansea, University of Wales Institute of Science and Technology)
University of Warwick
University of York

The Fellowships, normally tenable for two years, can be held in any field provided it falls within ICI’s general sphere of interest: this includes many branches of chemistry, physics, the biological sciences, applied mathematics, engineering, and technology. Candidates should not be more than 28 years of age.
on taking up their awards, and must hold the Ph.D. degree or have equivalent research experience. Successful candidates will be expected to commence their Fellowships on 1st October, 1972. The stipend will depend upon age, qualifications and experience, but will generally be within the range £1,350 - £1,800 per annum, together with FSSU benefits. Successful candidates will be expected to commence their Fellowships on 1st October, 1972. The stipend will depend upon age, qualifications and experience, but will generally be within the range £1,350 - £1,800 per annum, together with FSSU benefits.

To encourage wider experience, one year of the tenure of an award may be spent at an approved European research centre. In such cases a grant will be made towards travel expenses. To encourage wider experience, one year of the tenure of an award may be spent at an approved European research centre. In such cases a grant will be made towards travel expenses.

Forms of application may be obtained from the Registrar/Secretary of the university at which the candidate wishes to pursue his research, and must be returned duly completed by 8th February, 1972 (except in the case of London University, where inquiries should be directed to the Academic Registrar, and the closing date is 31st January, 1972). Candidates need apply to only one university, but may apply to not more than three if they so wish. In the case of multiple applications, separate forms must be completed in respect of each university. Among other information, candidates will be required to submit a brief curriculum vitae, a clear summary of the research programme proposed, and the names of two referees. Other things being equal, preference will be given to candidates proposing to carry out their research at institutions other than that from which they make application. The final choice of candidates will be made by a National Selection Committee, comprising representatives of the universities and of ICI.

[772-095 (1971) : Cii]
The Guinness Awards for Science and Mathematics.
A total of £1,500 is once again being awarded by the Guinness Awards for significant and original proposals in the teaching of Science and Mathematics.
Entries are now invited and a first prize of £250 is offered in each of the two categories.
1. For teachers in service.
2. For teachers in training and first two years in service.
The judges this year include:
Dr. Cyril Bibby, M.A., MSc., Ph.D.,
Dunstan Adams, B.Sc.,
Brian Jones, B.Sc.,
Miss F. M. Eastwood, B.A., B.Sc.,
E. J. Machin, M.A.
Please write for Entry Forms to:
Closing date for registration is May 1, 1972, and for completed entries December 31, 1972.
[774-001 (1971) : 187]
OF THE SIXTH FORMERS WHO READ THIS, 120 COULD EARN £1,132 A YEAR ON BECOMING UNDERGRADUATES.

That’s how many of you could be awarded Naval University Cadetships this year. Which means that if you’re fortunate enough to gain one, you’ll be one of an exclusive band of students. For, apart from earning £1,132 a year, tuition fees paid, as a college student, you’ll also be a naval officer starting your career. With training during certain vacations, sometimes at sea, to prepare you for your life ahead. For your degree and naval experience will be enough to earn you £1,719 a year on becoming a naval officer full time. And that’s when the big test comes. For you’ll have to face up to early responsibility; from the complex techniques of sea warfare; cope with the ever-present problem of man management. The ability to think quickly, act decisively will be vital. We know it’s a lot to expect. But if you can prove you have the potential qualities a Naval University Cadetship could be yours. What we’ll look for. To be awarded a University Cadetship, you must show us you have the initiative and personality to become a naval officer. And this is something we can assess even before you get to college. You actually receive the award, however, as soon as you’re up at University or on a full-time CNAA degree course at Polytechnic or college of technology. If you’d like the full facts, send the coupon. You won’t be committing yourself.

Captain R. A. Stephens, R.N.,
Officer Entry Section (609 GA3),
Old Admiralty Building,
Whitehall, London, SW1A 2BE.

APPOINTMENTS AND SITUATIONS VACANT

UNIVERSITY OF BRITISH COLUMBIA
Department of Chemistry

GRADUATE TEACHING ASSISTANTSHIPS

Graduate Teaching Assistantships are available for candidates with high academic records who wish to pursue further studies towards the Ph.D. in Chemistry. Excellent research facilities are available in all areas of modern Chemical Science, ranging from Bio-Organic Chemistry to Chemical Physics. Stipends $3,860 (minimum) per annum.

Application forms and further particulars may be obtained from the undersigned.

Professor C. A. McDowell,
Department of Chemistry,
University of British Columbia
Vancouver 8, British Columbia,
Canada.

[774-003 (1971) : 188]
UNIVERSITY OF WESTERN AUSTRALIA
Perth

RESEARCH FELLOWSHIP IN PLANT NUTRITION

Applications for appointment as Research Fellow in Plant Nutrition in the Department of Soil Science and Plant Nutrition, Institute of Agriculture, are invited from graduates in Science or Agricultural Science with postgraduate experience in plant physiology, biophysics or related fields concerned with the transfer of nutrients from soils to plants. The appointee will be expected to undertake research on the mechanisms of ion uptake by plants, in association with Dr. J. F. Loneragan. The Fellowship will be tenable for one year initially and may be renewed for up to two further years. The salary range is $A6,697 – 9,286 pa. with an allowance towards expenses incurred in travelling to Perth. Further information is available from the Registrar.

Applications in duplicate giving full personal particulars, qualifications and experience should reach the Registrar, University of Western Australia, Nedlands, Western Australia, 6009, by 8 January, 1972. Candidates should request three referees to write immediately to the Registrar.

Further particulars and application procedure available from Association of Commonwealth Universities (Appts), 36 Gordon Square, London WC1H 0PF (Tel: 01-387 8872) [774-004 (1971) : 188]
Applications are invited for a range of scientific posts at the Institute of Coastal Oceanography and Tides, Bidston Observatory, Wirral, Cheshire. The posts are:

a. In the Tides, Surges and Earth Tides Division
   i. on experimental work in measurement of sea level elevations and currents, and
   ii. a second post on theoretical studies from analytical and numerical models to understand the physics of tides, surges and shallow water effects on the continental shelf.

b. To head the Marine Operations Section. This post is concerned with techniques for deployment of oceanographic instruments and initiation of design and evaluation of new methods and equipment.

c. A specialist in instrumentation for design of new types of oceanographic instrumentation systems.

Applicants should be conversant with modern electronic theory. Experience in digital techniques, telemetry and data logging would be an advantage.

Appointments will be in the Scientific Officer or Higher Scientific Officer grades in the salary range £1,120 to £2,350 and exceptionally as Senior Scientific Officer, salary £2,303 to £3,255.

Qualifications

Age not more than 32 years, with a Degree, HNC or HND in an appropriate scientific, engineering or mathematical subject, or the equivalent. Applicants for senior posts must also have undertaken appropriate postgraduate research work, or had other relevant experience since qualifying as follows:

Applicants with 1st or 2nd Class Honours – at least two years post-graduate experience (those with 4 years such experience or more may be considered exceptionally for Senior Scientific Officer).

Other applicants - at least five years experience of research or development work since qualifying.

Pension arrangements.

Starting salary according to age and experience.

Requests for application forms and further particulars should be addressed to the Director, Institute of Coastal Oceanography and Tides, Bidston Observatory, Wirral, Cheshire. Telephone 051-652 2396.

EDITORIAL ASSISTANT required. Duties consist mainly in preparing papers for the printer and proofreading. A degree in science is essential, preferably in biochemistry or chemistry. Previous editorial experience, though desirable, is not essential, as training will be given. The commencing salary will be in the incremental range £1,510 - £1,867, according to qualifications and experience. Please write, giving brief curriculum vitae and the names of two referees, to the Editorial Secretary, Biochemical Journal, 7 Warwick Court, London WC1R 5DP.

[774-006 (1971) : 188]
NATIONAL INSTITUTE OF AGRICULTURAL BOTANY

Temporary Assistant required for approximately nine months from January 1972 to continue an investigation into the use of electrophoresis and related methods as an aid in the identification of varieties of cereals and other crops. Degree or NHC preferably with experience in electrophoretic techniques. Salary according to age and qualifications from £943 pa.

Application form and further particulars from the Establishment Officer, NIAB, Huntingdon Road, Cambridge, CR3 0LE.

[774-007 (1971) : 188]
FIELD STATION WARDEN FOR NATURE RESERVE

Warden required for Field Station, Visitor Reception Centre and Nature Reserve at Gibraltar Point, near Skegness. Sound knowledge and experience of natural history, understanding of ecology, ability to talk to and lead groups and administrative ability required. Wife willing to assist with catering and domestic supervision of Field Station an advantage. Salary in range of £800 - £900 plus free accommodation. Details from Administrative Officer Lincolnshire Trust for Nature Conservation, Manor House, Alford, Lincs. Closing date for applications 24 January, 1972.

[774-008 (1971) : 188]
MARIE CURIE MEMORIAL FOUNDATION
RESEARCH DEPARTMENT

**Technician** or **Junior** required for biological research in an expanding Cancer Research Department. Experience in tissue culture, cytogenetics and other biological techniques advantageous.

Apply as soon as possible giving names of two referees to Dr. D. C. Williams, Research Dept., Marie Curie Memorial Foundation, The Chart, Oxted, Surrey. Telephone: Limpsfield Chart 2306.

[774-009 (1971) : 188]
MONASH UNIVERSITY
Melbourne, Australia
Department of Materials Engineering
SENIOR TEACHING FELLOW
Applications are invited for the positions of Senior Teaching Fellow in the Department of Materials Engineering. Successful candidate will contribute to the expanding teaching programme associate with a new degree course in materials engineering that was introduced in 1971, and to service courses to engineering students. They will also be expected to undertake research relating to the secondary aspects of metals, ceramics, polymers or composites. Experience in electrical materials, corrosion and solid-state thermodynamics, mechanical metallurgy or the processing of polymers would be an advantage.
Salary range: $A5,441 - $A6,556 per annum.
Benefits: Travelling expenses for appointee and family, removal allowance, repatriation after three years’ appointment if desired; temporary housing for an initial period.
Further general information and details of application procedure are available from the Acting Academic Registrar, Monash University, Wellington Road, Clayton, Victoria 3150 Australia, or the Secretary-General, Association of Commonwealth Universities (Appts.), 36 Gordon Square, London WC1H 0PF (Tel: 01-387 8572). Enquiries about the Department should be addressed to the Chairman, Professor I. J. Penmear.
Closing date: 7 February 1972.
The University reserves the right to make no appointment or to appoint by invitation.
[774-010 (1971) : 188]
UNIVERSITY OF DAR ES SALAAM
TANZANIA
Applications are invited for a SENIOR LECTURESHP OR LECTURESHP IN PHYSICS. Candidates should possess a higher degree, preferably Ph.D. or the equivalent. Preference given to experimentalists, especially in Geophysics and Electronic Physics. Salary scales: (a) £EA1,950 - £EA2,620 p.a. (b) £EA1,350 - £EA2,230 p.a. (£EA1 = £7 sterling). The British Government may supplement salary to range £612 - £744 p.a. (sterling) and provide children’s education allowances and holiday visit passages. FSSU. Family passages, biennial overseas leave. Detailed applications (6 copies) naming 2 referees by 11 January 1972, to Inter-University Council, 90-91, Tottenham Court Road, London W1P 0DT, from whom particulars are available.

[774-011 (1971) : 188]
UNIVERSITY OF READING, Department of Physics. A vacancy exists in a newly formed Medical Optics Unit for either an Experimental Officer (£1,810 - £2,290 p.a.) or a Senior Experimental Officer (£2,655 - £3,255 p.a.). Candidates should possess HNC, a degree of equivalent and should have considerable experience in the making and teaching of optical instruments. The appointment is for three years in the first instance. Apply in writing to Professor H. H. Hopkins, APS, University of Reading, Whiteknights, Reading RG6 ZAY.

[774-012 (1971) : 188]
UNIVERSITY OF OXFORD

UNIVERSITY LECTURESHIP IN EXPERIMENTAL PATHOLOGY

Applications are invited for a University Lectureship in Experimental Pathology in the Sir William Dunn School of Pathology from 1 October, 1972, on the scale £1,491 (24 and under) to £3,741 (41 and over). Applicants will be considered from any branch of experimental pathology which is taken to include cell biology, immunology and virology. A medical qualification is not essential.

The lectureship may be held jointly with a College Fellowship. The attention of candidates is drawn to the Fellowships at Brasenose and Pembroke College currently being advertised. If the successful applicant is a woman, a fellowship may be available at St. Hugh’s College.

Further particulars may be obtained from Professor H. Harris, FRS, Sir William Dunn School of Pathology, South Parks Road, Oxford OX1 3RE, to whom applications should be submitted by 31 January, 1972.

[774-013 (1971) : 189]
Applications are invited for a **RESEARCH FELLOW** supported by SRC to work in the Polymer Physics Group in the field of the Mechanical Properties and Structure of solid polymers. The project would involve either the study of fracture behaviour or the study of plastic deformation using low angle and wide angle X-ray diffraction. Experience in either fracture, plastic deformation or X-ray diffraction though not necessarily in the field of polymers would be an advantage.

The appointment would be from 3rd January, 1972, or as soon after as possible, until 31st March, 1974. The starting salary will be between £1,491 and £2,040 according to qualifications and experience, with annual increments and FSSU.

Further details may be obtained from Professor K. E. Puttick or Dr. J. G. Rider, Department of Physics, University of Surrey, Guildford, Surrey, Tel. 0483-71281.

[774-014 (1971) : 189]
PEMBROKE COLLEGE Oxford:
FELLOWSHIP IN PHYSIOLOGICAL SCIENCE
Pembroke College proposes to elect an Official Tutorial Fellow to teach for the Honour School of Physiological Sciences.
The Fellowship may be held in conjunction with an established post in a department of Oxford University; the attention of candidates is drawn to the University Lectureships in Physiology and Experimental Pathology currently being advertised. Further particulars may be obtained from the Master, to whom applications should be sent before 1 February, 1972.
[774-015 (1971) : 189]
NORTH MIDDLESEX HOSPITAL
Silver Street, London
N18 1QX
Applications are invited for PHYSICIST / ELECTRONIC ENGINEER (Basic Grade). The person appointed will be expected to assist in the Radioisotope, Radiotherapy and Ultrasonic work of the department as well as develop Electronic services. Salary scale £1,185 to £1,635 per annum including London Weighting. Starting salary according to qualifications and experience. Applications to the Secretary.
[774-016 (1971) : 189]
PRINCIPAL FISHERIES OFFICER
SAUDI ARABIA
£4,145 - 5,875

To head a team of scientists and local counterpart officers; help organise and implement a fisheries research and development programme.

The Government of Saudi Arabia, in conjunction with the University College of North Wales, is embarking on an appraisal of fisheries resources and is establishing a fisheries institute at the port of Jeddah. A new research vessel is being procured for the programme and new laboratories are being constructed. Candidates should be graduates in marine science or a related discipline with considerable experience in the conduct of fisheries research and development work. Emoluments quoted above include a variable tax free overseas allowance of £645 – 1,375 pa. Terms of service include free family passages, paid leave, education grants and free accommodation. Appointment will be on contract for 2 years in first instance.

Candidates should normally be citizens of and permanently resident in the United Kingdom.
For more information about this vacancy write, giving your age and a brief statement of your qualifications and experience to:—

The Appointments Officer,
Room E301NS,
Foreign & Commonwealth Office
OVERSEAS DEVELOPMENT ADMINISTRATION
Eland House, Stag Place
London SW1E 5DH.
[774-017 (1971) : 189]
UNIVERSITY OF SOUTHAMPTON
Department of Aeronautics and Astronautics

RESEARCH ASSISTANT IN AUTOGYRO ROTOR BLADE RESEARCH
A research assistant is required for an investigation into the possible causes of failure of an autogyro rotor blade. The work will involve flight trials, full scale component testing and wind tunnel investigations.
Candidates should preferably have a good honours degree in Aeronautical or Mechanical Engineering and have experience in vibration theory and testing. Salary within the range £630 - £1,400 according to age and experience.
Applications giving a brief curriculum vitae and the names of two referees should be sent to the Deputy Secretary’s Section (Ext. 2400), The University, Highfield, Southampton, SO9 5NH, quoting reference 222/71/T, by 31st December, 1971.
[774-018 (1971) : 189]
JUNIOR TECHNICIAN OR TECHNICIAN required for Department of Anatomy (Histology). Previous experience in histology, biology or general sciences preferable. Opportunities for training in electronmicroscopy and day release for further studies. Applications to Administrative Officer (NS) The Royal Veterinary College, Royal College Street, London NW1 0TU.

[774-019 (1971) : 189]
UNIVERSITY OF SOUTHAMPTON
INSTITUTE OF SOUND AND VIBRATION RESEARCH

The Institute of Sound and Vibration Research has several three to five year vacancies for qualified Engineers, Physicists and Mathematicians to conduct fundamental research in the areas of turbulence, aerodynamic noise, optical flow measurement and silencers for internal combustion engines. The grade of these appointments ranges from experimental officer / research assistant to post-doctoral research fellow. Salaries will normally be in the range £1,500 - £2,500 according to qualifications and experience. We are seeking applicants with experience in at least one of the following: Fluid Mechanics, acoustics or optics.

Applications, detailing qualifications, experience and names of referees should be sent to the Deputy’s Secretary Section (Ext. 2400), The University, Highfield, Southampton, SO9 5NH, quoting reference NS/221/71/T, by 15th January, 1972.

[774-020 (1971) : 189]
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry. For further details write or telephone: G.K. Bureau, 17 Shaftesbury Avenue, London, W.1. 01-738 7232. Interviews by appointment.

[774-021 (1971) : 189]
UNIVERSITY OF CAPE TOWN

SENIOR LECTURESHP AND LECTURESHIP IN PHYSICS

Applications are invited for a senior lectureship and a lectureship in the Department of Physics. The salary scales are:

Senior Lecturer: R6300 x R300 – R8100 p.a
Lecturer: R4800 x R300 – R6900 p.a. The senior lecturer and the lecturer will be expected to take part in research as well as in teaching. For the senior lectureship preference will be given to a candidate who will take an active part in modern undergraduate laboratory work.

At present research is being carried out in the department in the fields of nuclear physics (by means of a CN Van de Graaf accelerator), low-level radioactivity, plasma physics, astrophysics and in several branches of theoretical physics.

Applicants should state their age, experience and qualifications, publications and research work, and should give the names and addresses of two referees (preferably persons with knowledge of the applicant’s academic qualifications and experience) whom the University may consult.

Two copies of the application should reach the Secretary-General, Association of Commonwealth Universities (Appts.), 3e Gordon Square, London. WC1H 0PF (from whom memoranda giving the conditions of service, including transport expenses on appointment and information on the work of the Department may be obtained) not later than 31 January, 1972. A third copy of the application with a medical certificate, should be sent direct by air-mail to the Registrar, University of Cape Town, Private Bag, Rondebosch, Cape Town, South Africa, by the same date.

The senior lectureship will be vacant from the 1st January, 1972, and the lectureship from the 1st July, 1972. Successful candidates will be expected to assume duty as soon as possible after these dates.

The University reserves the right to appoint persons other than applicants or to make no appointments.

[774-022 (1971) : 189]
GRADUATE STUDIES IN CANADA

Assistantships are available for graduate studies in Metallurgy and Materials Science, leading to the award of an MSc., M.Eng., Ph.D degree. Applications are invited from students with bachelor degrees in science or engineering and from students graduating in 1971. Research may be done in many fields of metals or ceramics: phase transformations, diffusion, surfaces, mechanical and electrical properties, radiation damage, and on processes: physical chemistry of iron and steelmaking mass transport and heterogeneous kinetics. Applications stating age, qualifications and experience should be sent to:
The Chairman, Department of Metallurgy and Materials Science.
McMaster University, Hamilton, Ontario, Canada.
[774-023 (1971) : 189]
MOUNT VERNON HOSPITAL.
NORTHWOOD, MIDDLESEX
(Tel: Northwood 26111)
LABORATORY TECHNICIAN required by cancer research laboratory to assist in the preparation and analysis of material for chromosome studies. Whitley Council rates of pay plus London Weighting. Applications to Hospital Secretary, giving details of age, qualification and experience, with names and addresses of two referees.
[774-024 (1971) : 189]
TECHNOLOGIST
(Scientist with statistical skills)
Scott Bader, manufacturers of synthetic resins, have a vacancy in the team engaged in the evaluation of polyester resins and composite behaviour. Applicants should have an interest in the design and analysis of experiments using statistical methods, but will also be expected to become generally involved in evaluation. Some background in one or more of the following subjects will be useful: plastics, composites, test procedures, physics, engineering, chemical engineering, chemistry, material science. Working with us involves sharing the benefits and responsibilities of common ownership, by means of which job security and participation in company affairs are given practical reality. Standard benefits for all staff include seventeen days annual holiday, extra service holidays, good sick pay, pension, life assurance and annual bonus scheme.
For an application form, call, write or phone. Ask for Brian Elgood.
Scott Bader Company Limited, Wollaston, Wellingborough, Northamptonshire NN9 7RL, Phone: Wellingborough 4881.
[774-025 (1971) : 190]
UNIVERSITY OF EDINBURGH
DEPARTMENT OF CHEMISTRY

Applications are invited for a POSTDOCTORAL RESEARCH FELLOWSHIP to be held in this Department. The project is financed by the S.R.C. and will consist of research under the joint direction of Professor C. Kemball and Professor E. A. V. Ebsworth on the catalytic properties of some organometallic compounds of transition metals. Preference will be given to candidates who are experienced in preparative organometallic chemistry and who are prepared to move into catalytic work. The appointment should be taken up as soon as possible after 1st March, 1972.

Salary in the range £1,491 x £138/135 - £2,178 per annum with F.S.S.U.

Applications, by letter (three copies) together with the names of two referees, should be sent to the Secretary to the University of Edinburgh, Old College, South Bridge, Edinburgh, EH8 9YL, not later than 31st January 1972. Please quote reference 5042.

[774-026 (1971) : 190]
KENT AND CANTERBURY HOSPITAL
Canterbury, Kent
NUCLEAR MEDICINE DEPARTMENT
A vacancy exists for a Basic Grade Physicist, for the opening of the new Regional Nuclear Medicine Department. Previous relevant experience desirable. Salary will be in the Basic Grade Scale £1,095 to £2,103.
Applications, giving names of two referees to be sent to the Hospital Secretary.
[774-027 (1971) : 190]
JUNIOR TECHNICIAN. Applications invited for the post of junior technician to work in the pilot plant of the Enzyme Technology Group. Experience in general laboratory work would be advantageous. Application form from Personnel Officer (Technical Staff EB12). University College London, Gower Street, London WC1E 68T.
[774-028 (1971) : 190]
COASTAL OCEANOGRAPHER
Salary: £5,000 -£5,620 per annum.

A Senior Principal Scientific Officer is required to head the Coastal Oceanography Research Division of the Institute.

CORD is one of two research divisions in ICOT and is responsible for the Institute’s research programme in coastal oceanography including (a) the circulation and mixing processes in coastal waters and estuaries, including their physical and chemical properties, and (b) the generation, propagation and distribution of surface waves and associated currents.

The head of the Division will be responsible for its administration and direction. Candidates must be of high scientific standing and capable of directing a group of scientists engaged in an expanding programme of coastal oceanographic research.

The research programme of the Division is of fundamental background importance in problems of coastal pollution and others in which the movement of coastal waters is a controlling factor. The combination of theoretical, numerical and experimental techniques is essential, with the experimental work being carried out both at sea and in the laboratory.

Application Forms and further particulars from the Natural Environment Research Council, Alhambra House, 27-33 Charing Cross Road, London WC2H 0AX, or telephone 01-930 9232 (Ext. 119) quoting reference number E2/6/148.

Closing date: - 7 January, 1972.

NATURAL ENVIRONMENT RESEARCH COUNCIL
[774-029 (1971) : 190]
PENGUIN EDUCATION

ASSISTANT EDITOR

Penguin Education requires an Assistant Editor to work principally on physical science and mathematics textbooks for all levels. The job involves preparation of manuscripts for the printer and liaison with authors, editors, illustrators and designers. Painstaking attention to detail, a clear command of English and the ability to work accurately against deadlines are among the qualities the work demands. Previous publishing experience is not essential. Starting salary will be £1,250 p.a. and there is free company transport to and from West London.

Write, including a brief curriculum vitae, to Robin Kyd, Penguin Education, Horton Road, West Drayton, Middlesex.

[774-030 (1971) : 190]
Applications are invited for the post of Assistant in the Electron Microscopy section. Candidates should have experience in EM techniques as used in biology including ultramicrotomy and routine maintenance of electron microscope. Appointment will be in the grade of Scientific Officer or Higher Scientific Officer according to age, qualifications and experience. Minimum qualification normally required: Pass degree or HNC in an appropriate subject. Salary: SO £1,120 - £1,900; HSO £1,810 -£2,350. Membership of contributory superannuation scheme attracts a non-pensionable allowance. Applications with names of two referees to the Secretary, Animal Research Station, 307 Huntingdon Road, Cambridge CB3 0JQ. [774-031 (1971) : 190]
HUNTINGDON RESEARCH CENTRE

Director
Division of Chemistry

The largest independent laboratory in the medical and biological fields in Western Europe, based in England but with branches or offices in the United States, Singapore, France and Japan, requires a Divisional Director. The person appointed will assume responsibility for the various departments concerned with analytical and synthetic chemistry, biochemistry and metabolic studies, and will liaise with clinical pathology and with the sections responsible for quality control and pharmaceutical problems. An experience of analytical chemistry is essential and a pharmaceutical qualification, although not essential, would be an advantage. The appointed person would be expected also to help maintain contact with the pharmaceutical and chemical industries, Government departments and academic institutions and to organise research projects as well as routine procedures and developmental methodology. Starting salary will be in the region of £4,500 according to age, experience and qualifications. Applications to Mr. A. A. Schofield, Personnel Officer, Huntingdon Research Centre, Huntingdon PE18 6ES.

[774-032 (1971) : 190]
UNIVERSITY OF BRITISH COLUMBIA
Department of Chemistry
FACULTY POSITIONS
Applications are invited for positions at the rank of Assistant Professor or upwards. Applicants should be well-qualified with experience preferably at the post-doctoral level in the fields of Bio-Physical, Bio-Inorganic, or Bio-Organic Chemistry. Salary is negotiable, according to rank, qualifications and experience. Date of appointment is open.
Interested applicants should send full curriculum vitae and names of three referees to:
Professor C. A. McDowell,
Department of Chemistry,
University of British Columbia
Vancouver 9, British Columbia, Canada.
[774-033 (1971) : 190]
GLASSHOUSE CROPS RESEARCH INSTITUTE
VACANCY IN HORTICULTURE DEPARTMENT FOR BOTANIST / HORTICULTURALIST with an interest in hardy ornamental nursery stock. Person appointed will be expected to lead a small team in this field. Candidates should hold as minimum qualification degree in Botany / Biology degree or National Diploma in Horticulture or equivalent qualification. Basic salary scale and superannuation arrangements are: Scientific Officer £1,120 - £1,900 with non-pensionable allowance to offset superannuation contribution. Applications giving full biographic details and names and addresses of two referees should be sent to the Secretary of the Institute, Worthing Road, Littlehampton, Sussex, from whom further particulars may be obtained, before 31 January 1972.
[774-034 (1971) : 190]
UNIVERSITY OF STIRLING

LECTURER IN BIOLOGY

Applications are invited for the above post. Research and teaching interests should be in microbiology and preference may be given to candidates with special interests in aspects of the physiology of whole micro-organisms.

Salary on scale £1,491 - £3,417 plus FSSU.

Further particulars are available from the Deputy Secretary (N.Sc), University of Stirling, to whom applications, together with the names of two referees, should be submitted by 31 January, 1972.

[774-035 (1971) : 190]
RESEARCHER. American consulting firm in international licensing and technology transfer seeks contact with experienced person, male or female, to handle UK and European research assignments. Background in industrial market, research in formation procurement, new technology survey, etc. helpful. Initial ad hoc part time but could develop into a substantial and attractive relationship. Include full details including telephone. Principal visiting London in January. Intercoal, 1219 Howard St., Evanston, Illinois 60202.

[774-036 (1971) : 190]
AUSTRALIAN NATIONAL UNIVERSITY  
Research School of Biological Sciences  

FELLOWSHIP OR SENIOR FELLOWSHIP IN ENVIRONMENTAL BIOLOGY  
Applications are invited for an appointment as Fellow or Senior Fellow in the Department of Environmental Biology (Head of Department – Professor R.O. Slatper). The Department is concerned with a wide variety of ecological phenomena associated with organism-environment interactions. In addition, emphasis is given to studies of ecosystems as self-regulating entities, partly with a view to developing principles for long-term ecosystem conservation and management. 

Areas of interest include ecosystem and population dynamics, ecological energetics, and nutrient cycling. Natural and modified, aquatic and terrestrial, ecosystems are studies in field and laboratory-treated ecological units. There is considerable interest in the mathematical modelling of the processes under study. 

It is hoped to make an appointment of a person whose primary interest is in systems analysis or ecological energetics, but this is not essential. 

Fellows and Senior Fellows are appointed for an initial period of five years, after which they may be reappointed until retiring age. The salary ranges are: Fellow $A8,062 - $A11,113 per annum; Senior Fellow $A11,130 - $A13,068 per annum. Fellows are entitled to one year’s study leave on full pay in every seven years’ service, and a Senior Fellows to one year’s study leave in every six years; a contribution towards travel and other expenses of study leave is paid. Superannuation is on the FSSU pattern with supplementary benefits. Reasonable family travel expenses are paid and assistance with housing is provided for an appointee outside Canberra. 

Further particulars are available from the Association of Commonwealth Universities (Appts.), 36 Gordon Square, London WC1H 0PF (Tel: 01-387 8572). Applications close on 15 January, 1972. 

[774-037 (1971) : 191]
Assistant Editor
Young Scientific Assistant Editor required to process London publisher’s science and mathematics list. Must be capable of editing MSS to a high standard and of dealing with authors and proofs with the minimum of supervision. Salary £1,200 - £1,500 p.a. Please apply to Ron Hawkins at Harrap, 405 9935. [774-038 (1971) : 191]
UNIVERSITY OF SOUTHAMPTON

Chair of Theoretical Physics

Applications are invited for the Chair of Theoretical Physics. Salary within the University’s professorial range and not less than £4,533 p.a. FSSU. Further particulars may be obtained from the Secretary and Registrar, The University, Southampton, SO9 5NH. to whom applications (15 copies from applicants in the UK and one from others) should be sent before 21 January, 1972, quoting Ref: NSc.

[774-039 (1971) : 191]
DEPARTMENT OF EDUCATION
DUBLIN

Post-Doctoral Research Fellowships
Applications are invited for Research Fellowships in Science (excluding Medical and Social Science) and Engineering tenable in any one of the following institutions in Ireland: - University College, Dublin, University College, Cork, University College, Galway, Trinity College, Dublin, An Foras Talútaí (The Agricultural Institute), The Institute for Industrial Research and Standards.

Fellowships, up to 12 of which may be awarded, will be tenable for a period of two years with the possibility of an extension for a third year.

Applicants should hold the degree of Ph.D or have equivalent research experience. Applications will be considered from engineers or technologists with suitable industrial experience. Candidates should not be more than 30 years of age but, preferably, they should be under 28 years of age.

Appointments will be effective from a date not earlier than 1 October, 1972. The initial salary, which will depend upon qualifications and experience, will normally be within the range of £1,400 to £1,640 per annum, but awards of up to £1,990 may be made in the case of engineers and technologists whose industrial experience or other special circumstances warrant it.

Full particulars of the scheme including application forms may be obtained from the Secretary, Department of Education (Headquarters Section), Marlboro' Street, Dublin 1, to whom applications for Fellowships should be forwarded. The latest date for the receipt of applications is 8 February, 1972.

[774-040 (1971) : 191]
Applications are invited for the post of Lecturer in the Department of Genetics from candidates with suitable qualifications and experience in some branch of Genetics. Preference may be given to candidates who are qualified in some branch of Genetics other than microbial. The successful applicant will be expected to initiate and supervise research and conduct classes in the general area of his speciality as well as assisting in the general teaching programme of the Department.

Salary range: Lecturer: $A6,697 - $A9,286 per annum with superannuation based on an endowment assurance scheme, the employee and employer contributing 5% and 10% respectively.

Benefits: Travelling expenses for appointee and family; removal allowance, repatriation after three years’ appointment if desired; temporary housing for an initial period. Study leave entitlement accumulates at the rate of one month’s leave for each six months’ service up to six years, with provision for financial assistance.

Further general information and details of application procedure are available from the Acting Academic Registrar, Monash University, Wellington Road, Clayton, Victoria 3168, Australia, or the Secretary-General, Association of Commonwealth Universities (Appts.), 36 Gordon Square, London WC1H 0PF (Tel: 01-387 8572). Enquiries concerning the research interests and general facilities of the Department, to the Chairman, Professor B. W. Holloway, in the University. Closing Date: 28 February, 1972.

The University reserves the right to make no appointment or to appoint by invitation.
PROFESSIONAL RESEARCHERS IN MATERIALS SCIENCES
The “Centre de Recherche industrielle du Québec” is embarking on a program to develop an integrated Materials Science Division, which includes three technical services: materials testing, materials engineering, materials sciences including extractive metallurgy and analysis. The applications sought are for scientific staff positions.
The Candidates:
University graduates in one of the following fields: mechanical, physical, chemical and industrial engineering; materials sciences; analytical chemistry; ceramics; physical, mechanical and extractive metallurgy.
The Requirements
A few years of industrial experience or a mission oriented research; post graduate degrees would be an asset but not a prerequisite; fluency of spoken French is not a prerequisite, but a good knowledge of written French is essential.
Salary open - liberal fringe benefits. Location: Quebec City, Canada.
Applications, including a summary of qualification, should be sent to the:
Personnel Director, Centre de Recherche industrielle du Québec, Complexe Scientifique. Edifice E, 555 boulevard Henri IV, Case postale 9038, Québec 10, Qué. Canada.
[774-042 (1971) : 191]
APPLICATIONS ARE INVITED for a Post Doctoral Fellowship tenable for 2 years in the Department of Chemistry to investigate the synthesis and properties of polymeric substances carrying chelating groups. Starting salary £1,520 p.a. with FSSU. Apply in writing, quoting Ref. M.121, to Assistant Bursar (Personnel), University of Reading, Whiteknights, Reading, RG6 2AH.
[774-043 (1971) : 191]
CITY OF LONDON POLYTECHNIC
SIR JOHN CASS SCHOOL OF SCIENCE AND TECHNOLOGY

Research Assistant in Metallurgy

Applications are invited from graduates with 1st or 2nd class honours degrees in pure or applied science, or with equivalent qualification, for a vacancy that now exists in the Department of Metallurgy. The person appointed will work under the supervision of Dr. C. Brown, Reader in Physical Metallurgy on an aspect of the relationship between structure and crystallinity of polymers, and must be eligible to register for a higher degree. The salary will be £1,050 p.a. rising by annual increments of £30 to £1,110 p.a.

Applicants should send particulars of education, qualifications and industrial experience to Dr. C. J. Brown, Department of Metallurgy and Materials, City of London Polytechnic, Whitechapel High Street, London E1.

[774-044 (1971) : 191]
NEW COLLEGE Oxford:
FELLOWSHIP IN PHYSIOLOGY
The College proposes to elect to an Official Fellowship in Physiology to be held in conjunction with a University appointment. The person appointed will be expected to take up his duties from 1 October, 1972. Further particulars may be obtained from the Warden, New College to whom applications should be made with a short statement of qualifications and experience and the names of two referees not later than 1 February, 1972.
[774-045 (1971) : 191]
TECHNICIAN required for Department of Geophysics, Whiteknights, to work on meteorological and oceanographic instrumentation. Some electronic experience required. Work will be varied with the opportunity to contribute to design. Good prospects in an expanding department. Starting salary up to £1,410 p.a. Apply in writing, quoting Ref. T.63. to Assistant Bursar (Personnel), University of Reading, Whiteknights, Reading RG6 2AH, (re-advertisement). [774-046 (1971) : 191]
LECTURES, MEETINGS AND COURSES

UNIVERSITY OF WARWICK

POSTGRADUATE RESEARCH IN SOLID STATE PHYSICS

Opportunities exist for research leading to the degree of Ph.D. in a wide range of topics in both experimental and Theoretical Solid State Physics and in the Physics of Materials. Science Research Council studentships (including CAPS awards) are generally available to candidates holding (or expecting to hold) a first or upper second class honours degree in Physics or related subject from a British university. A graduate studies prospectus and further information can be obtained by writing, in the first instance, to the Chairman of the School of Physics, Professor A. J. Forty, School of Physics, University of Warwick. Coventry CV4 7AL. Rf. No. PG/20/71

[774-047 (1971) : 191]
UNIVERSITY OF DURHAM
M.Sc IN ECOLOGY
The Departments of Botany and Zoology jointly offer a one-year course in Production and Population Ecology, approved by the NERC for the award of Advanced Course Studentships. For further details of the 1972-73 course and application forms write to Dr Judith Turner, Botany Department, Science Laboratory, South Road, Durham.
[774-048 (1971) : 191]
Diploma in Plant Taxonomy

UNIVERSITY OF EDINBURGH

The postgraduate course leading to a Diploma in Plant Taxonomy, will be run from October 1, 1972, to the end of June 1973. It will be given in conjunction with the Scientific Staff of the Royal Botanic Garden and will provide a specialised training in the aims and methods of taxonomy. Students who reach a sufficiently high standard in the Diploma Course may be eligible (subject to satisfactory financial arrangements), to proceed to a further period of research leading to a Ph.D. Applicants should have an Honours Degree in Botany or equivalent qualification. British candidates may apply for Advanced Course Studentships awarded by the Science Research Council. Further particulars and forms of application may be obtained from Professor R. Brown, Department of Botany, The King’s Buildings, Mayfield Road, Edinburgh, EH9 3JY. Initial applications should be received not later than mid-February.

[774-049 (1971) : 192]
The University of Aston in Birmingham
INTERDISCIPLINARY RESEARCH PROJECTS AVAILABLE
for first-class honours graduates

Aston’s Interdisciplinary Higher Degree scheme provides the opportunity to research into a genuine problem supplied by a collaborating industrial organisation and, at the same time, earn a Ph.D. The University offers training in the additional disciplines necessary to your research project.

The normal entry is in October, but a small number of projects covering a variety of disciplines will become available from January 1972 onwards. Studentships will be available in April 1972 and may be supplemented by the Company sponsoring your project. In some cases students will be required to provide their own finance until April.

Graduates wishing to suggest new projects will also receive consideration. Write for full details of projects available and an application form to IHD Scheme Office (N-S.), The University of Aston in Birmingham, Birmingham B4 6TE.

[774-050 (1971) : 192]
Applications are invited from graduates in physics or materials science for a Research Studentship tenable at the Oxford Research Unit at the Open University. The person appointed will join a research team concerned with material flow in the solid state due to the modification of diffusion processes by temperature gradients and electric fields.

The minimum qualification for the award is an upper 2\textsuperscript{nd} class honours degree or acceptable equivalent; tenure is for three years. Further details may be obtained from Dr. D. A. Blackburn, Open University, (O2) Oxford Research Unit, 11-12 Bevington Road, Oxford.
Applications are invited for a Research Studentship in the Polymer Group. The work will be concerned with a study of acoustic emissions from polymer matrix composites with the aim of correlating the observed emissions with well defined deformation and fracture processes within the composite. Applicants should possess a good Honours Degree or equivalent qualification in physical science or engineering and experience in any of the following fields will be of value: polymer science, composite materials and acoustics. Applications, stating age, qualifications and experience, together with the names of two referees should be received as soon as possible by the Registrar, The University, PO Box 147, Liverpool L69 3BX. Quote ref. RV/7764/NS.

[774-052 (1971) : 192]
THE SWISS FEDERAL INSTITUTE OF TECHNOLOGY
DEPARTMENT OF METALLURGY
(Lausanne Switzerland)
A research studentship (assistant) is available for a person with graduate or equivalent qualification in metallurgy or physics to undertake work in the field of

DIRECTIONAL SOLIDIFICATION – HIGH TEMPERATURE MATERIALS

The research may eventually be used as doctoral thesis.
As the post necessitates also contacts with students a basic knowledge of French is necessary.
Submit applications with curriculum vitae to: Service du personnel de l’Ecole polytechnique fédérale de Lausanne, 33 av. de Cour.
CH. 1007 Lausanne, Suisse.
[774-053 (1971) : 192]
FELLOWSHIPS, GRANTS AND SCHOLARSHIPS

BRASENOSE COURGE Oxford:
FELLOWSHIP IN CELL BIOLOGY
The College wishes to create a fellowship in Cell Biology which would be held in conjunction with the University Lecturership in Experimental Pathology currently being advertised. The Fellowship offered might be either an Official Fellowship or a Senior Research Fellowship, depending upon the amount of tutorial work the fellow-elect would wish to undertake. Details of the stipend and allowances attached to these Fellowships can be obtained from the Principal of Brasenose College.
Applicants, who must also be applicants for the University Lecturership should write to the Principal of Brasenose College, before 31 January, 1972. Neither curriculum vitae nor names of referees need to supplied to the Principal, since documents received in connection with the University appointment will be made available to the College.
[774-054 (1971) : 192]
RESEARCH ASSISTANT
Applications are invited for a new post of Research Assistant to work on novel aspects of the fatigue of metals. A method of measuring fatigue damage has been developed which enables the life to be predicted from early changes of mechanical properties. This exciting discovery enables the problems of scatter and cumulative damage in fatigue to be systematically studied and might be developed further to measure fatigue damage under service conditions.

The post will normally be of 3 years’ duration, and the successful candidate will be expected to register and submit for a higher degree. Candidates should possess a good honours degree in engineering or an allied subject: industrial experience would be an advantage.

Salary normally within the range £957 - £1,529 depending on qualifications and experience, but exceptionally this could be higher.

Applications, giving details of age, qualifications and experience, should be sent to: Professor C. Andrew, Department of Mechanical Engineering, University of Bristol, Queen’s Building, University Walk, Bristol, BS8 1TR.

[776-001 (1971) : 286]
ROYAL NATIONAL INSTITUTE FOR THE BLIND
Applications invited for the post of DESIGN DRAUGHTSMAN in the Technical Department of the Institute in Great Portland Street.
The Department is actively engaged in developing a wide range of devices and processes for use by, or for the Blind. Applicants must have practical background with experience in light precision mechanical/electro-mechanical engineering, and in competent draughtsmen capable of supervising own designs.
Applications in writing only giving qualifications, and experience, including present post and salary to Personnel Officer, 224 Great Portland Street, London W1N 6AA.
[776-002 (1971) : 286]
JUNIOR TECHNICIAN required for Division of Cytopathology to assist in specimen preparation for biological research with electron microscope. Suitable for school leaver with two science G.C.E. “A” levels or O.N.C. in Applied Biology. Training will be given. Initial salary on scale £750 or £1,152 p.a. Please apply, quoting reference NS/131/CYTO to Mr. J. H. Woodcock, National Institute for Medical Research. The Ridgeway, Mill Hill, London NW7 1AA. Tel: 959 3666.
[776-003 (1971) : 286]
A Technician / Junior Technical Officer is required in the Division of Parasitology. Candidates should preferably have knowledge of biochemical techniques and instrumentation and experience in microbiology, particularly parasitology, would be an advantage. Salary on scale £1,448 to £2,399 p.a. depending on age, qualifications and experience. Please apply, quoting reference NS/131/PARA to Mr P. A. Collingridge.
GUY’S HOSPITAL DENTAL SCHOOL
Postdoctoral Research Associate required in the Department of Oral Immunology and Microbiology to take part in projects on antigenic and enzymatic analysis of streptococci. Microbiological and Biochemical experience desirable. Salary in the range £1,491 - £1,902 plus £100 London Allowance, with superannuation.
Application forms are available from the Dean, Guy’s Hospital Dental School, London Bridge, SE1 9RT.
[776-005 (1971) : 286]
THE ROYAL FREE HOSPITAL

ELECTRONICS TECHNICIAN

to work in Electronics Laboratories which designs, constructs and maintains specialised equipment for treatment and research. Commencing salary according to qualifications and experience, between £1,125 and £1,194, rising to £1,425. Further details and application form (to be returned by 10th January) from Personnel Officer, Royal Free Hospital, Gray’s Inn Road, London. WC1H 8LF.

[776-006 (1971) : 286]
ROTHAMSTED EXPERIMENTAL STATION
Harpenden, Herts
The Soil Survey of England and Wales has a vacancy for a **Scientific Officer** to assist with works on soil micromorphology and mineralogy. Degree in geology, chemistry or soil science or equivalent qualification. Starting salary on scale £1,120 - £1,900. Superannuation.
Applications, naming two referees and quoting reference 153 to: The Secretary by 7 February.
[776-007 (1971) : 286]
Applications are invited for appointment to the Chair of Inorganic Chemistry, which will become vacant on the resignation of Professor R. I. Martin in the middle of 1972 to accept the Foundation Chair of Inorganic Chemistry at the Australian National University.

The three Departments of Organic, Inorganic and Physical Chemistry comprise the School of Chemistry. The two other Chairs in the School are occupied respectively by Professor D. Cameron (Organic Chemistry) and Professor A. S. Buchanan (Physical Chemistry). The Headship of the School is determined by the Council after consultation with the Professors of the University on a three-yearly basis. The present Head of the School is Professor A. S. Buchanan.

Present salary: $A15,264 per annum.

Further information, including details of application procedure, superannuation, travel and removal expenses, housing assistance and conditions of appointment, is available from the Association of Commonwealth Universities (Appts.), 36 Gordon Square, London WC1H 0PF (Tel: 01-387 8572).

Applications close on 31 March 1972.
UNIVERSITY OF EDINBURGH
Computer-Aided Design Project
APPLICATIONS SPECIALIST

Applications are invited from electronics engineers who would like to exploit the interactive computer
techniques already developed by the Project, which makes use of a time-shared PDP-10 computer and
satellite computer display system. Applicants should be well-qualified in both theoretical and practical
aspects of electronic engineering. Detailed knowledge or experience of interactive techniques is not
essential. The successful candidate will be expected to initiate and supervise research in collaboration
with the senior Applications Specialist and other members of the Project staff.
Salary will be in the range £2,040 - £2,592 per annum, or possibly higher for an exceptionally well-
qualified candidate.
Further particulars are available and should be consulted before formal applications are submitted to the
Secretary to the University, Old College, South Bridge, Edinburgh, EH8 9YL. The closing date for
applications is 31st January 1972. Please quote reference 7048/54.
[776-009 (1971) : 287]
BEECHAM GROUP RESEARCH UNIT

BIOLOGICAL TECHNICIAN

for animal and laboratory work.

The successful applicant will work in a small team testing products for the prevention of dental decay and developing methods of biologically testing other oral hygiene products.

This vacancy would be suitable for a young person qualified to H.N.C. or H.N.D. level in Applied Biology.

Please apply to: - The Personnel Officer, Beecham Group Limited, Brockham Park, Betchworth, Surrey.

[776-010 (1971) : 287]
MEDICAL RESEARCH COUNCIL

**Medical Statistician**
A medical statistician or an epidemiologist is required to join a small team investigating the effects of the environment on health. The work includes studies on variations in mortality, morbidity and lung functions in relation to air pollution and weather conditions, and experimental work on the physiological effects of exposure to air pollutants. Applications are invited from statisticians or medical graduates, but in either case familiarity with data processing methods and the design and analysis of experiments is required.

**Programmer**
A computer programmer is needed to assist in the above and in other studies within the Unit. A small computer has recently been installed for laboratory applications and there is access to several large installations, including the University of London’s CDC 6600. Experience in the use of Fortran or Algol is essential. Salaries are on MRC scales, according to age and qualifications.

Apply to Professor P. J. Lawther, Director, MRC Air Pollution Unit, St Bartholomew’s Hospital Medical College, Charterhouse Square, London EC1M 6BQ.

[776-011 (1971) : 287]
UNIVERSITY OF BRISTOL
School of Chemistry require a **Technician** for the Electronics Workshop. Good working conditions, five-day week, day-release scheme (under 21). Salary depending on age and qualifications on scales: Junior Technician £528 to £816; Technician £1,011 to £1,380 with £30/£81 supplementation for recognised qualifications (present salary scales are under review). Apply in writing, giving the names of two referees to Mr A. W. Honey, Administrative Officer in Chemistry, School of Chemistry, University of Bristol, Cantock’s Close, Bristol BS8 1TS.

[776-012 (1971) : 287]
DEPARTMENT OF PHARMACOLOGY
EXPERIENCED TECHNICIAN required to assist in interesting research including a project on the Immunology of cancer. Good holidays and opportunities for further education up to HNC. Salary scale £1,041 to £1,410 plus £175 London Weighting and £51 Qualification allowance if appropriate. Application form from Personnel Officer (Technical Staff FE2), University College London (NS/30) Gower Street, London, WC1E 6BT.
[776-013 (1971) : 287]
FLOUR MILLING AND BAKING RESEARCH ASSOCIATION requires

a **Senior Laboratory Animal Technician** to run its small animal department which uses rats and mice in nutritional and toxicological work on bread and cereals.

The unit has recently been transferred to new premises in Chorleywood.

I.A.T. qualifications and previous experience essential. Salary on a scale rising to £1,578 per annum.

Please write giving details to:

The Secretary,

FMBRA,

Chorleywood,

Herts WD3 5SH.

[776-014 (1971) : 287]
THE SOMERSET RIVER AUTHORITY

Assistant Fishery Officer
Salary Grade IV £1,932 by four annual increments to £2,199.
Applications supported by two referees are invited for this new appointment.
Duties will include:
1. Assessment of fish stocks – coarse and trout – in rivers and enclosed waters.
2. Investigations into increasing fishing potential through fishery management.
3. Liaison with angling associations.
Experience in the first two is essential whilst HNC (Biology) or similar is desirable. Preferred age – 25 to 40 years.
Further particulars on request. Closing date 10 January 1972. Chief Engineer, West Quay, BRIDGWATER, Somerset.
[776-015 (1971) : 287]
GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry. For further details write or telephone: G.K. Bureau, 17 Shaftesbury Avenue, London, W.1. 01-738 7232. Interviews by appointment.
[776-016 (1971) : 287]
UNIVERSITY OF BRITISH COLUMBIA
Department of Chemistry

FACULTY POSITIONS
Applications are invited for positions at the rank of Assistant Professor or upwards. Applicants should be well-qualified with experience preferably at the postdoctoral level in the fields of Bio-Physical, Bio-Inorganic, or Bio-Organic Chemistry. Salary is negotiable according to rank, qualifications and experience. Date of appointment is open.
Interested applicants should send full curriculum vitae and names of three referees to:
Professor C. A. McDowell,
Department of Chemistry, University of British Columbia,
Vancouver 8, British Columbia, Canada.
[776-017 (1971) : 287]
Cranfield
COMPUTING CENTRE

ENGINEER / SCIENTIST / PROGRAMMER

is invited to join an inter-university team working on the design and construction of an incremental computer using D.D.A. techniques. He will be responsible for the design and writing of the system software and should be able to program in a low level language, preferably PLAN. Familiarity with scientific computation is essential and a knowledge of analogue / hybrid / digital simulation would be an advantage.

An extensive hybrid computing facility is installed in the Centre, consisting of an Ad256 analog computer linked to a small process-control digital machine, and an ICL1905 digital computer. The incremental computer will be linked to the two digital machines to form a unique computing system.

Candidates should have a degree and/or professional qualifications. Salary within the range £1,491 - £3,003 with F.S.S.U. The appointment will be limited to 2 years in the first instance.

Application form and further particulars from the Assistant Registrar, Cranfield Institute of Technology, Cranfield, Bedford, quoting reference 356.

[776-018 (1971) : 287]
RESEARCH CHEMIST
A qualified Research Chemist, aged preferably below 30, is required to join a team working on surface chemistry, with special reference to minerals. The well equipped laboratories are situated in Southern England.

The prime requirement for the post is an aptitude for scientific research, and previous research experience, either in industry, or university, is essential.

Pension, Life Assurance, Profit Participation and Long Service Award Schemes operate.

Please reply, giving age and details of previous experience to Box D617, New Scientist.

[776-019 (1971) : 287]
PART-TIME BIOLOGY TEACHER (Thurs. & Fri.) required. Applications to Head Master, Owen’s Boys School, Owen Street, London, EC1.

[776-020 (1971) : 287]
UNIVERSITY OF BRITISH COLUMBIA
Department of Chemistry

GRADUATE TEACHING ASSISTANTSHIPS
Graduate Teaching Assistantships are available for candidates with high academic records who wish to pursue further studies towards the Ph.D. in Chemistry. Excellent research facilities are available in all areas of modern Chemical Science, ranging from Bio-Organic Chemistry to Chemical Physics. Stipends $3,860 (minimum) per annum.
Application forms and further particulars may be obtained from the undersigned.
Professor C. A. McDowell,
Department of Chemistry,
University of British Columbia
Vancouver 8, British Columbia,
Canada.
[776-021 (1971) : 288]
Applications are invited for the post of Research Officer in the Liquid Structure Group in the Department of Crystallography, to help develop experimental and/or theoretical work on the structure and function of water, particularly in macromolecular, interfacial and biological systems. Applicants should have a postdoctoral qualification in a biological science (or physical science with a strong emphasis on biological or biochemical applications), and be interested in developing new ideas in the field. Salary in range £1,491 - £2,454 p.a.; plus London allowance of £100 p.a. Appointment for up to three years. Application forms and further details from the Deputy Secretary. Birkbeck College, (NS/23), Malet Street, London WC1E 7RX. Closing date 14 January, 1972.
CENTRE FOR ENVIRONMENTAL STUDIES
Applications are invited for a research post in the urban systems analysis team. Candidates should be graduates in mathematics, geography, economics, computer science or other numerate discipline. Experience in computer methods is required, preferably in urban research. The appointment will be for two years: salary scale £1,465 to £2,075 (Inclusive of London Allowance). FSSU is payable.
Applications including curriculum vitae should be sent by 14 January 1972 to the Administrative Secretary, CES, 5 Cambridge Terrace, Regent’s Park, London NW1 4TL.
[776-023 (1971) : 288]
UNIVERSITY COLLEGE LONDON

BIOCHEMIST with good honours degree interested in enzyme kinetics required to join multidisciplinary research group. Applications to Secretary (NS/24). Enzyme Technology Group, Biochemical Engineering Section, Department of Chemical Engineering, Torrington Place, London WC1.

[776-024 (1971) : 288]
UNIVERSITY OF STRATHCLYDE
DEPARTMENT OF GEOGRAPHY

LECTURESHIP

Applications are invited from suitably qualified candidates for the post of Lecturer in the Department of Geography.

Salary scale £1,491 - £3,417 per annum with F.S.S.U. benefits.

Placing on scale according to qualifications and experience. Applications forms and further particulars (quoting 65/71) may be obtained from the Registrar, University of Strathclyde, George Street, Glasgow, C.1, with whom applications should be lodged by 31st January, 1972.

[776-025 (1971) : 288]
Applications are invited for 2 Research Technicians in the Department of Obstetrics & Gynaecology. Work will be concerned with Radioimmunoassay of protein and steroid hormones. Salary (according to age) £760 - £909. Further particulars may be obtained from The Secretary of the Medical School. Applications with the names of two referees to the Secretary (NS) of the Medical School not later than 30 March 1972.

[776-026 (1971) : 288]
LECTURES, MEETINGS AND COURSES

THE UNIVERSITY OF MANCHESTER

M.Sc. Course in Structural Engineering

An M.Sc. course is run jointly by the Departments of Civil Engineering in the Faculties of Science and Technology commencing in October of each year. The course takes advantage of the combined teaching and research facilities of the two departments.

Subjects include advanced general structural theory and design, computer applications, and special lectures in either steel, concrete or aircraft structures, or in structural problems of nuclear and chemical engineering (pressure vessels, etc.). Each student will undertake a research project appropriate to his interests.

The course is recognised by the SRC as qualifying for the award of advanced studentships and suitably qualified candidates may apply for Industrial Awards.

Details of the course, with application forms, may be obtained from either the Registrar, U.M.I.S.T., Manchester M60 1QD (Faculty of Technology), or Mr G. L. Elliott, Simon Engineering Laboratories, University of Manchester, Manchester M13 9PL (Faculty of Science).

[776-027 (1971) : 288]
FELLOWSHIPS, GRANTS AND SCHOLARSHIPS

SALTERS’ INSTITUTE OF INDUSTRIAL CHEMISTRY FELLOWSHIPS
Applications are invited for SALTERS’ FELLOWSHIPS, of value in the range £1,600 - £1,800 according to qualifications and experience (plus cost of living allowance when held abroad and 10% as contribution to FSSU).
These Fellowships may be held by Honours graduates, or holders of equivalent qualifications, in Chemistry, Chemical Engineering or other branches of Engineering, Biochemistry or Physics, who desire to obtain further training in research in Chemistry, Chemical Engineering, Chemical Technology or Biochemistry.
Candidates should have obtained a doctor’s degree or have had not less than three years’ postgraduate experience by the time of their taking up the Fellowship.
A high standard will be required. Generally Fellowships will be tenable for one year from 1 September, 1972, and may be renewed for one further year.
Applications should be received by the Clerk of the Salters’ Company, 36 Portland Place, London W1N 4DL, by 21 January, 1972. Forms of application may be had on request.
Applications may also be made at any time during the year but such late applications will only receive consideration if there are vacancies. Intending applicants for 1973-74, who propose to spend an intervening year abroad, may complete forms of application now. These should be returned by 21 January, 1972.
No applicant can be appointed without interview.
[776-028 (1971) : 288]
The University of Manchester Institute of Science and Technology
Research in Chemistry

Research grants are available for British students, at post-graduate, post-Grad.R.I.C., post-Dip.Tech. level for research in the following subjects from October 1972.

1. Heterocyclic and Aromatic Chemistry
2. Organic Reaction Mechanisms
3. Free Radical Chemistry
4. Carbene Chemistry
5. Organic Photochemical Reactions
6. Synthetic Organic Chemistry
7. Organo-sulphur Chemistry
8. Organometallic Chemistry
9. Metal Carbonyls
10. Organosilicon Chemistry
11. Inorganic Polymers
12. Organophosphorus Chemistry
13. Petrochemical Research
14. Polymer Synthesis
15. Combustion and Flame
16. Heterogeneous Catalysis
17. Application of the Woodward Hoffman Rules
18. Valence-bond Isomers

Postgraduate, etc., grants range from £700 - £1,000 per annum depending upon the topic.

M.Sc. Course in Petrochemicals and Hydrocarbon Chemistry

The next course, which leads to the M.Sc. degree of the University of Manchester, starts in October 1, 1972, and is open to graduates in Chemistry or Chemical Engineering and to those with Grad. R.I.C., Dip.Tech. or equivalent qualifications at an appropriate level of achievement. It consists of lectures, seminars, projects, tutorials, practical work, and a short research project, and some of the lectures are given by distinguished speakers from industry. The course, which is designed for those interested in petrochemistry, in the chemistry of petroleum, or in general hydrocarbon chemistry, has received support from the Petroleum and Chemical Industries, and is approved by the Science Research Council. Applications should be sent as soon as possible after the appearance of this advertisement to Professor R. N. Haszeldine, F.R.S., Department of Chemistry, U.M.I.S.T., P.O. Box 88, Manchester, M60 1QD.

[776-029 (1971) : 288]
SCIENCE & TECHNOLOGY

Media FELLOWSHIPS 95
OPPORTUNITIES FOR SCIENTISTS AND ENGINEERS TO WORK IN THE MEDIA.

HAVE YOU EVER...
• wanted to know what it was like on the other side of the media fence?
• wanted to improve your communication skills so you can reach the general public?
• wanted to learn how to make the most of the media and PR facilities within your company or institution?

Up to 10 fellowships will be offered to professional scientists and engineers - in any discipline - to allow them to spend between 4 and 8 weeks working with a media organisation. It is expected that fellows will continue to be paid by their permanent employers during the placement.

The fellowships are not intended for people who wish to become journalists.

For an application form please contact:
Media Fellowships Scheme, British Association, 23 Savile Row, London W1X 2NB. Telephone 0171 494 3326 Fax 0171 734 1658.

British Association
Promoting Science & Technology
Copus
PUBLIC INFORMATION RESEARCH

£30,000 package

The Uranium Institute, the international industrial association for energy from nuclear fuels, requires a self-motivated individual to assist with development and implementation of its worldwide public information initiative.

The successful applicant will conduct research into current nuclear issues and provide technical support for the Head of External Communication. He or she will also be responsible for orchestrating member companies' participation in this public information drive through the Institute’s committee structure.

Above average oral and written communication skills are necessary for this position, as is the ability to work with a minimum of supervision in support of the team effort. Experience and/or formal qualifications in one or more of the following would be a distinct advantage: public affairs, media relations, the nuclear industry.

For an information pack, phone: (0171) 225 0303. Applications in writing by 31 January 1995 to: The Secretary General, The Uranium Institute, 12th floor, Bowater House, 68 Knightsbridge, London SW1X 7LT.

EUROPEAN COMMISSION
The Commission is seeking highly qualified candidates (grade A2)

COM/R/5546/94

DIRECTOR OF THE INSTITUTE FOR SYSTEMS ENGINEERING AND INFORMATION TECHNOLOGY (ISPRA)

To organise, manage and coordinate the activities of the Institute at both a scientific and administrative level.

These activities consist in particular of:
the activities relating to systemics and informatics in support to the JRC Institutes and to other Services of the Commission:
in particular the activities defined at the first indent relating to environmental and safety problems in the framework of institutional research activities and institutional S & T support to be allocated on a competitive basis by Services of the Commission;
the participation in Indirect Action Programmes relevant to the competence of the Institute;
the performance of Third Party Work for outside private and public organisations.

Recognised scientific competence based also on recent research activities, achievements and publications;
established capability to manage research units resulting from actual experience;
comprehensive vision of a systemic approach to complex, multidisciplinary research themes,
involved in the formulation of informatics strategies;
experience in the capture of research markets in the open marketplace.

Nationality: Candidates must be a national of one of the European Union's Member States.
Interested persons should send their applications with a detailed c.v. before 15/02/1995, to: Joint Research Center, Unit "Human Resources", I-21020 Ispra (VA).
The Commission's policy is to ensure equal opportunities for men and women.
[1959-003 (1995) : 45]
BMJ Publishing Group

ELECTRONIC PUBLISHING PROJECT MANAGER

The BMJ Publishing Group is the publishing arm of the BMA and in addition to the weekly BMJ itself, the Group publishes an extensive list of prestigious specialist journals and books.

The BMJ Publishing Group wishes to appoint a project leader to oversee the installation and development of an electronic production and text management system within the Group. Specifically the project manager will advise on the purchase, maintenance and administration of the necessary hardware and software and provide or commission the customisation programming of the system as required.

This is a key appointment within the Group and the successful candidate will have a combination of the following skills and experience:
- extensive and detailed knowledge of electronic publishing technology
- proven project management and team leading skills
- the ability to communicate effectively at widely differing levels of technical literacy
- a service minded approach to internal customers - programming expertise
- sound knowledge of the hardware and software available and operating platforms
- well-developed skills in strategic planning for the new product streams.

Salary negotiable. The project will be for a three year period.
Please apply in writing enclosing CV to Human Resources Department, BMA, BMA House, Tavistock Square, London WC1H 9JP.

[1959-004 (1995) : 45]
PLYMOUTH UNIVERSITY
A leading centre for teaching & research

RESEARCH STUDENTSHIP
£5,130 pa plus expenses

Anthropogenic and Environmental Impacts on Endangered Plant Communities: A Case Study of the Machair Grasslands of the Outer Hebrides'

You should have a good first degree in Biological/Geographical/ Environmental Sciences for the above studentship. This post is tenable for 3 years in the Department of Biological/Geographical Sciences, and is available as soon as possible after January 1995.

Please address informal enquiries to Dr Martin Kent, Department of Geographical Sciences at the address below. Tel: (0752) 233061. Ref: 1451/SCI.
Closing date: Friday 20 January 1995

POSTGRADUATE STUDENTSHIP In Marine Analytical Technology

The University of Plymouth Environmental Research Centre achieved a research rating of 4 in the last Research Assessment Exercise. As a consequence a Ph.D. Studentship will be available in the Department of Environmental Sciences from February 1995. It will involve the analytical development and marine (shipboard) deployment of a flow injection based chemiluminescence detection system for the determination of dissolved iron species in seawater. The project will be supported by the Plymouth Marine Laboratory (PML) via a NERC CASE equivalent studentship as part of their involvement in the Plymouth Marine Network (a research and teaching partnership between the PML and five universities to catalyse collaboration in Marine Science).

The project will be supervised by Professor Paul Worsfold and Fauzi Mantoura and Dr Eric Achterberg as part of their wider Marine Analytical Technology research programme. Ref: 1452/SCI.
Closing date: Thursday 26 January 1995

POSTGRADUATE STUDENTSHIP In Analytical Chemistry

This second Ph.D. Studentship, also available in the Department of Environmental Sciences, will investigate on-line sample pretreatment of environmental samples for use with atomic spectroscopy. Various means of preconcentration, and matrix removal employing anion, cation and chelation exchange resins will be investigated together with sample modification using on-line photolysis, pyrolysis and microwave techniques. The project is supported by Perkin Elmer GmbH Germany. Ref: 1453/SCI.

The project will be supervised by Dr Steve Hill and Dr Phil Jones (University of Plymouth) and Dr Ian Shuttler (Perkin Elmer). Closing date: Thursday 26 January 1995

Further details and application forms available from:

Science Faculty Office, University of Plymouth, Drake Circus, Plymouth, Devon PL4 8AA. Tel: (0752) 232976.

Please quote reference and title when applying. Promoting equal opportunities

ADAS
FOOD, FARMING, LAND & LEISURE
Leicester University

POSTDOCTORAL RESEARCH
MOLECULAR BIOLOGIST/ IMMUNOLOGIST
Recombinant Antibody Engineering
Starting salary £13,025 - £15,378

ADAS is a leading consultancy in Food, Farming, Land and Leisure and is a major agricultural research contractor. We undertake Research and Development of behalf of both Government and industry, through a network of research centres and laboratories covering the whole of England and Wales.

Leicester University's Department of Botany Plant Antibody Group has several years' experience in the development of recombinant antibody technology and in the application of this technology to the study and manipulation of plants.

We require a suitably qualified Molecular Biologist/Immunologist to join an expanding research programme. The successful candidate will be located at Leicester University. The appointment will be for one year initially, with the possibility of an extension for a further three years thereafter.

The aims of the project are to select recombinant antibodies with affinities to pesticides and organic pollutants with the ultimate aim of expression in higher plants.

Experience in the following areas would be advantageous: basic molecular biology, bacterial and plant cell gene expression studies, phage antibody library screening, phage isolation and propagation.

Candidates should possess, or be near to completing, a relevant Ph.D.
For an application form, formal job description and further details please contact Mrs J. Ozakpinar, ADAS Huntingdon, Chequers Court, Huntingdon, Cambs PE18 6LT. Tel: 01480 52161.
Closing date for applications is 1 February 1995.
ADAS is an equal opportunity employer.
A well-organised and motivated scientist is required for a two year Department of Health-funded position to assist with molecular genetic research on Campylobacter bacteria. Candidates should have an Honours degree and postgraduate experience in molecular microbiology, as evidenced by published scientific work. Expertise in nucleic acid manipulation, sequencing and PCR will be advantageous. The candidate will play a key role in the development of PCR assays and DNA probes for enteropathogenic species and genotypes of Campylobacter.

For further information please contact Dr John Stanley on 081-200 4400, ext 3071.

For an application form and job description please apply in writing to the Personnel Department, Central Public Health Laboratory, 61 Colindale Avenue, London NW9 5HT. Please quote Ref: VRD/10. Closing date for applications 16 January 1995. PHLS is an Equal Opportunities Employer.

ASSAY DEVELOPMENT SCIENTIST
- BIOLOGICALS DEVELOPMENT

Harefield, Middlesex            To £23k + benefits

Mallinckrodt Veterinary is one of the world's largest branded animal health and nutrition companies marketing over 1000 quality products worldwide. The company is now poised for further growth and seeks a Senior Scientist as a key member of a team involved in the development of vaccines using both standard and novel technologies.

Responsibilities include the development of immunoassay systems for monitoring both antigen production and potency, testing and validating these systems to GLP standards and liaising closely with colleagues in the USA and Europe.

Probably aged 25/35, you will need at least 3 years post graduate experience in the development and validation of immunoassays, preferably in an industrial environment. Knowledge of biochemical assays and GLP would be advantageous.

To apply please send full CV with current/last salary details, to our Consultant advising on this appointment, Mr Guy Newton, Barnes Kavelle Ltd., Cavendish House, Queen Street, Mirfield, West Yorkshire WF14 8AH. Please quote reference number 8114.

MALLINCKRODT VETERINARY
Business Manager
Daresbury Organics Unit

Acer Laboratories and Sciences are one of the UK’s fastest growing scientific businesses.

Acer is currently seeking a dynamic BUSINESS UNIT MANAGER to join our well equipped Laboratory in Daresbury. The ideal applicant will be a Chartered Chemist who has a working knowledge of QC procedures with reference to drinking water and the requirements of NAMAS. Practical experience of both modern organics analyses techniques is essential, as is at least five years post graduate experience in a water related industry.

Leadership and client liaison skills, a thorough knowledge of systems used in the measurement of organic compounds and the ability to control budgets, recruit and develop staff, are pre-requisites.

We are also seeking ANALYTICAL SCIENTISTS with strong experience in chemistry, microbiology, molecular biology or toxicology for both our Bridgend and Daresbury Laboratories. Previous track record in innovative method development techniques is essential.

To apply, please write with your CV to Anne Keyser, Personnel Department, Acer Consultants Ltd, Chancellor Court, Occam Road, The Surrey Research Park, Guildford, Surrey GU2 5XS.

Acer welcomes applications from all sections of the community.

Acer
Technology shaping your world

Research Assistants (2 Posts)
Two Year Fixed Term Appointments with a Possibility of an Extension
£11,343 - £13,470

Working within the School of Engineering, based in the Electronics and Communications Division, these Brite-EURAM funded posts involve work on a research project into novel substrates for high-power microelectronics. The work will be undertaken by a project team and involve a variety of research related tasks including construction and operation of experimental apparatus, data processing, and theoretical analysis. It is envisaged that each post will specialise the following aspects of the project:

• Materials science; the fabrication of microelectronic substrates; Electro Chemistry.
• Hybrid microelectronics; the processing and characterisation of thick-film components.

Candidates will be expected to have a good first degree in a related science/engineering discipline, or equivalent. There may be an opportunity to register for a higher degree. Ref No: RI/95.

For further details and application forms please telephone the Personnel Department on 0203 838392 or 838451 (24 hour answerphone), or write enclosing a large self-addressed envelope to Personnel Department, Coventry University, Priory Street, Coventry CV1 5FB.

The University wishes to make an appointment to a Chair in Experimental Condensed Matter Physics in the Department of Physics and Astronomy and invites applications. The Department of Physics and Astronomy already undertakes a wide range of research on Condensed Matter Physics using both laboratory based and central facilities. The successful candidate is expected to be the focus of new research interests in the department while providing consolidation and leadership for the existing research programme. A lectureship will also be made available in association with this post.

Applications (one copy suitable for reproduction), giving full details of qualifications and experience, together with the names and addresses of three persons to whom reference may be made, to arrive not later than 15 February 1995, to the Director of Personnel (Academic Staffing), The University of Manchester, Manchester M13 9PL, from whom further particulars may be obtained. Telephone 061 275 2028, fax 061 273 5306. Please quote reference no 443/94. As an Equal Opportunities Employer, the University welcomes applications from suitably qualified people from all sections of the community, regardless of race, religion, gender or disability.

Applications are invited for an MRC funded position, of one year duration in the first instance, to commence as soon as possible. The successful applicant will join the Endothelial Cell Research Laboratory in the Rayne Institute at St Thomas’ and will work on novel adhesion molecules that promote the binding of red blood cells to endothelium in sickle cell disease. Candidates should have a Ph.D. in Immunology or a closely related subject and post-doctoral research experience utilising tissue culture techniques and flow cytometry.

Applications, consisting of a CV, publication list and names of two referees, should be sent to Dr K A Brown, Department of Immunology, The Rayne Institute, St Thomas’ Hospital, London SE1 7EH (Tel: 071 928 9292, ext 3394/3184) from whom further details may be obtained.

Salary range IA £13,941- £20,133 pa plus £2,134 pa LWA.

Closing date 20 January 1995. Ref No: STH/IMM/327A.

Equality of Opportunity is School Policy

A vacancy exists for a postdoctoral Research Assistant to continue ongoing work characterising coherent and incoherent imaging systems in the presence of speckle. The project involves application of appropriate statistical techniques to a range of imaging situations. The applicant will be expected to develop the theoretical framework and also to plan appropriate experiments to test the theory. The applicant should combine good mathematical skills, especially of statistical methods, with sound physical intuition. Postdoctoral applicants in applied mathematics, physics or theoretical aspects of the electronic engineering are encouraged to apply. The position is for one years' duration with an expected extension for a second year.

Applicants should enclose a copy of their CV with the names of two referees, addressed to Jane Buller, Department of Electrical and Electronic Engineering, The University of Nottingham, University Park, Nottingham NG7 2RD. Informal enquiries should be addressed to Dr K. Hoperaft on 0115 9513844 or Dr M. G. Somekh on 0115 9515572.

Lectureship in Environmental Change

Applications are invited for a Lectureship in Environmental Change available from April 1, 1995. The post is linked to the Environmental Change Research Centre. Candidates should reinforce or complement the Centre's current strengths in palaeolimnology and be capable of raising external research contracts.

The appointment can be made on any point of the Lectureship Scale; salary (£14,756 -£25,735) plus London Allowance (£2,134).

Further details are available from Professor Richard Munton, Department of Geography, University College London, 26 Bedford Way, London WC1H 0AP (tel 0171 380 7562; fax 0171 380 7565), to whom letters of application, accompanied by curriculum vitae and the names and addresses of three referees, should be sent by 3 February 1995.

Working toward Equal Opportunity
Applications are invited for a 3-year Temporary Lectureship in Astrophysics to be held in the Astrophysics Group, in the areas of cosmology and extragalactic astrophysics.

The current activities of the Astrophysics Group include cosmology, extragalactic astrophysics, infrared astronomy, experimental particle astrophysics, supernova studies, mass-loss from stars, X- and y-ray astronomy, and cosmic ray acceleration.

Salary in the range £16,890 - £27,869, including London Weighting, depending on age and experience.

Applicants, who should have an outstanding research record, should send a CV, description of research experience, list of publications, and the names of 2 referees, to Prof Michael Rowan-Robinson, Astrophysics Group, Blackett Laboratory, Imperial College of Science and Technology, Prince Consort Rd, London SW7 2BZ (from whom further details can be obtained) by Jan 31st, 1995.

The College is striving towards Equal Opportunities [1959-016 (1995) : 48]
BIOMATERIALS SCIENTISTS - YORK

Smith & Nephew, a British-based healthcare Group has companies in 30 countries around the world. We research, manufacture and sell medical and related consumer products in key healthcare sectors worldwide. Our Group Research Centre located in a modern purpose-built facility on the York Science Park is involved in the study of human healing and repair processes, new polymeric materials and composites, and interactions between these new materials and tissues.

As a result of a new focus within our Group research programme we are seeking two experienced research scientists with specialist expertise in the areas of Bioceramics and Biomechanics. The posts offer an opportunity to develop an expert role, and provide technical leadership within our multi-disciplinary project teams.

BIOCERAMICS SCIENTIST
Applicants are likely to have a first degree in Materials Science or Biological Sciences, and 4-6 years research experience in areas relevant to our core business interests, including biomaterials and the application of ceramics within the healthcare industry.

BIOMECHANICS SCIENTIST
Applicants will be graduates in Mechanical or Materials Engineering with 2-4 years research experience ideally in the application of Biomechanics in healthcare.

Both posts require candidates to have excellent practical laboratory skills and effective planning and organisational ability. To be recognised as a technical expert also requires an ability to present ideas in an enthusiastic and authoritative manner to a variety of audiences.

We can offer a competitive salary supported by an excellent benefits package including 25 days holiday, flexible working hours and contributory pension scheme.

Please apply in writing with a CV stating your current salary to Alison Young, Senior Personnel Officer, Smith & Nephew Group Research Centre, York Science Park Heslington, York YO1 5DF.

The closing date for applications is Friday 20th January 1995.

[1959-017 (1995) : 49]
Lectureship in Optoelectronics

Applications are invited for a post in the Department with secondment to the Optoelectronics Research Centre (ORC) thereby enhancing the holder's research time. The ORC is a UK national research centre with an international reputation with 55 research staff and 30 research students.

The ORC research programme encompasses glasses and other optical materials; fibre and waveguide fabrication; fibre and waveguide lasers; miniature lasers; integrated fibre circuits; photorefractive gratings; short-pulse and soliton circuits; industrial, chemical and biochemical sensors.

Further details and information may be obtained from the Head of Department, Prof A. J. G. Hey, or the Director of the ORC, Prof W. A. Gambling FRS.

Salary will be £14,756 - £25,735 per annum.

The appointment will be for three years in the first instance.

Further particulars are available from the Personnel Department (R) at the address below, tel: 01703 592750, to whom a full curriculum vitae (seven copies from UK applicants and one from overseas), including the names and addresses of three referees should be sent by no later than 2nd February 1995.

Please quote reference number R/162/NS.

Working for Equal Opportunities

University of Southampton
University of Southampton Highfield Southampton SO17 1BJ
Permanent appointment

ENGLISH NATURE
English Nature is the Government body which promotes the conservation of wildlife and natural features of England, employing over 700 people throughout the country.

Forestry officer

This post is based in English Nature's Lowlands Team at Peterborough reporting to the senior woodland ecologist. The postholder will be responsible for developing and promoting English Nature's policies on forestry and woodland, and providing an advice service to the organisation on forestry policy issues. The post holder will also be responsible for the Ancient Woodland Inventory and will be expected to work closely with other staff on scientific aspects of woodland conservation.

The post requires strong presentational, drafting and teamwork skills, as well as an ability to 'self-start' and to cope well under pressure.

Qualifications: A first or second-class degree in a relevant subject is required. Computer and database skills, and a current UK driving licence, are also necessary. A background in policy development, and a knowledge of modern forestry practice and woodland ecology, are desirable.

Salary: The post is graded at 'H' level with a salary range of £13,025 - £18,185. Starting salary is dependent on qualifications and experience, and increments thereafter are performance-related.

To request details and an application forms please telephone 01733 318241 quoting Ref No E23-10-01. For all other enquiries contact Personnel Services, English Nature, Northminster House, Peterborough PE1 1UA.

The closing date for completed application forms is 26 January 1995 and interviews are expected during the week commencing 20 February 1995.

English Nature has a no smoking policy throughout its offices in Peterborough.

English Nature is working towards Equal Opportunities, and welcomes applications from all members of society.
**PRINCIPAL SCIENTIFIC OFFICER**  
Up to £22,227 per annum

Essex County Council Chief Executive's Office  
KEEPING ESSEX STRONG

We are looking for an industrial chemist to become the County Council's Principal Scientific Adviser and to set up a new Scientific Unit. The duties will include giving advice to all County Council Departments on scientific matters and attending major incidents such as fires and spillages of hazardous substances.

You will need to have a Degree in Chemistry or Combined Science, several years experience of working within industry dealing with hazardous substances and preferably have had some management responsibility.

Further details and application forms available from County Personnel Department, County Hall, Chelmsford, CM1 1LX. Telephone (0245) 432101 quoting Post No. C705.

Closing Date: 19 January 1995.  
Most posts are available for job share.  
RESEARCH ASSISTANT

Applications are invited for a three year research assistant position available immediately to join the Host Defence Unit which has an international reputation for studies of bacterial pathogenesis. The successful applicant will investigate the interaction between *Bordetella pertussis* and the human respiratory mucosa, which will involve cell biology and electron microscopy techniques. The starting salary will be £16,075 per annum, inclusive of London Allowance.

Informal enquiries can be made on 071 351 8337, shortlisted candidates will be invited to visit the Unit prior to formal interview.

To apply please forward a CV with the names and addresses of two referees, who may be contacted, to the Personnel Manager, National Heart and Lung Institute, Dovehouse Street, London SW3 6LY quoting reference WEL/344 by 20 January 1995.

Applications are invited for a Technician to join the Department of Clinical Biochemistry. There are three main areas of responsibility. Firstly, ensuring the maintenance of the General Laboratory. Secondly, research work which would incorporate a knowledge of routine experimental procedures and engaging in research projects under supervision. Finally, general administrative duties on an ad hoc basis.

Candidates should have a relevant 'A' level education or BTEC Certificate/Diploma in an appropriate discipline.

Salary will be on University Grade D scale £12,691 - £14,902 per annum (inclusive of London Allowance) according to experience and qualifications.

Further details and an application form from the Personnel Officer, St George's Hospital Medical School, Cranmer Terrace, London SW17 0RE. Telephone 081 725 5020 (24-hour answerphone). Closing date 27 January 1995. Please quote ref: 145/94.

UNIVERSITY OF EDINBURGH  
Department of Geology and Geophysics  
MAST-II:  

**Research Associate/Assistant**  

Applications are invited for the above post, which is immediately tenable, for one year to work on the biogeochemistry of water and sediment trap materials from the Adriatic, Aegean and NW Mediterranean Seas.  

Applications, with C V and names of two referees, should be sent to Dr N. B. Price, Grant Institute, West Mains Road, Edinburgh EH9 3JW. Tel: 031-650 4846. Fax: 031-668 3184.  
DEPARTMENT OF PHYSICS

An EPSRC studentship is available, tenable immediately, for a project in experimental condensed matter physics, with amorphous materials or thin films being the favoured research areas.

Applicants should have a 2.1 honours degree in physics (or a related discipline) and should satisfy the eligibility requirements for being awarded an EPSRC studentship.

For further details contact Dr M. J. L. Sangster, Department of Physics, University of Reading, Reading, RG6 2AF (01734 318535; FAX: 01734 750203; email: spssangt@reading.ac.uk).

A Research Assistant is required for a three year project funded by the ARC to investigate T cell migration in the pathogenesis of rheumatoid arthritis. The successful candidate should have experience in immunology, cell biology or experimental animal models of arthritis. However, a suitable individual without such expertise can be appointed and will receive appropriate training. There is a possibility for the successful candidate to pursue a higher postgraduate degree.

Starting salary £13,941 pa plus £2,134 pa LWA. A job description which contains details of the application procedure is available from 071 922 8049 (24 hrs) quoting ref. no G/MED/356. For further information please contact Dr C Pitzalis on 071 955 4394. Closing date 27 January 1995.

Equality of Opportunity is School Policy.

NATIONAL HEART AND LUNG INSTITUTE
Department of Histopathology

RESEARCH FELLOW

A postdoctoral Molecular Biologist is required to work with an established molecular team in the Department of Histopathology. The research is a collaboration between the Lung Pathology Unit and Glaxo Institute for Molecular Biology (Geneva) and focuses on the mechanisms of inflammatory cell recruitment in asthma. Experience in the techniques of gene probe preparation, cloning, sub-cloning and in situ hybridisation is preferred.

The appointment is for two years in the first instance, and the starting salary will be £19,141 including London Allowance.

To apply please forward a CV with the names and addresses of two referees, who may be contacted, to the Personnel Manager, National Heart and Lung Institute, Dovehouse Street, London SW3 6LY quoting reference GLA/345 by 19 January 1995.

SHORTERM ENGINEERS
require

Degree Qualified Scientists, Technologists and Chemists
for various London based contracts.
Good money. Immediate starts.
For more details call 0895 422252.
**Food Microbiologist**

up to £14k  

Luton

Food is big business to Whitbread. The meals our customers enjoy in Pizza Hut, Beefeater, Brewers Fayre, TGI Friday's or Country Club Hotels bring in revenue of c£1/2 billion, about one quarter of our group turnover.

The Whitbread Research and Development Department assists these operations in carrying out projects to develop safe and efficient systems of food storage, preparation and serving. In addition it investigates state of the art technology to enhance food quality and production.

You will use your scientific and practical skills to manage the work of the food microbiology laboratory, often working on your own, sometimes outside the Technical Centre and in liaison with research institutes and suppliers.

With at least an HNC in Applied Biology (Microbiology), you will have a minimum of two year's practical experience in a busy food microbiology laboratory together with:

- an ability to communicate clearly the scientific results of your projects to others.
- self motivation and creativity in your approach to work. You should be able to use a computer as an everyday scientific tool. A full driving licence would also be advantageous.

Initially the job is for a 2 year contract and in addition to the salary, which will be dependent upon experience, you will be entitled to receive a monthly product allowance and paid holidays.

If you have the background and ability we seek please send a full CV to: Mrs Sally Cockett, Whitbread Technical Centre, Park Street, Luton LU1 3ET.

WHITBREAD  

Applications are invited for about 35 Royal Society University Research Fellowships, tenable in the first instance for five years from 1 October 1995 (or later in the academic year 1995-96). Renewals of three years and then a further two may be possible. The appointments available embrace all branches of science, including agriculture, medicine, mathematics, engineering and technology.

Research Fellows are paid on the academic and academic-related staff (Lecturer A and B) salary scale which currently runs from £14,756 (age 26) to £25,735 (age 39) plus three additional discretionary points up to £28,765. Starting salaries will be on this scale, with London Allowance where appropriate, and will rise incrementally each year. A limited number of merit increments will be awarded each year to reward outstanding performance. Annual research expenses (up to about £11,000 for 1995-96) will be available together with travel expenses and a contribution to baggage costs for successful applicants from overseas and their families.

Applicants must have a Ph.D. or equivalent research experience. They should be at least 26 but not have passed their 40th birthday by 1 October 1995 and have between two and seven years postdoctoral experience. Applicants over 40 may be considered under very exceptional circumstances: they should contact the Research Appointments Department at The Royal Society for advice before submitting an application. Fellowships must be held in a university in the United Kingdom. Those already holding substantive posts in a UK university will not be considered. University Research Fellowships are open only to European Community citizens who are either employed in the UK or who, if not employed, have been resident in the UK for a continuous period of three years other than for the sole purpose of receiving full-time education.

Application forms and further information are available from the Research Appointments Department, The Royal Society, 6 Carlton House Terrace, London, SW1Y 5AG (Fax 0171-930 2170). Closing date 17 February 1995. Application forms are not available after 3 February 1995 and applications arriving after 4 p.m. on 17 February will not be considered.

PRODUCT LEADER IN PHARMACOKINETICS

Servier Research and Development Limited, one of Europe's largest and most successful research based ethical pharmaceutical companies, possesses an enviable record in the development of original compounds, two of which have recently been successfully launched into the OK marketplace.

A vacancy has recently arisen for a Project Leader to take responsibility for several technicians involved in the planning, execution and delivery of toxicokinetic and pre-clinical/clinical pharmacokinetic studies to GLP standard.

The ideal candidate will have a sound grasp of pharmacokinetic concepts with the ability to generate high quality pharmacokinetic reports. Analytical expertise including HPLC and GC, together with supervisory experience, would be added advantages.

Candidates will be life science graduates, qualified to either MSc or Ph.D. level.

In addition to an excellent negotiable basic salary the company offers an outstanding benefits package which includes free BUPA, contributory pension scheme, free life and permanent health assurance and generous holiday entitlement.

To apply, forward a full CV, together with a handwritten letter of application to:

The Director of Personnel and Services, Servier Research and Development Ltd, Fulmer Hall, Windmill Road, Fulmer, Slough SL3 6HH. Tel: 0753 662744.

SERVIER
UWE BRISTOL

Engineering Research
The Faculty of Engineering is a broad based multi-disciplinary faculty which covers the disciplines of Mechanical, Manufacturing, Aeronautical and Electronic and Electrical Engineering. We pride ourselves on our close links with industry and our research spans all of the above engineering disciplines. Following recent success in attracting funding, the following research appointments are now available. We particularly welcome applications from women, members of minority ethnic groups and disabled people who are under-represented in the workforce; all applications are considered on merit.

KNOWLEDGE BASED MONITORING AND CONTROL SYSTEMS
We have obtained a major EU funded project to develop Knowledge Based Monitoring and Control systems for Stone Processing machines manufactured in Italy and Spain. This 2 year project is expected to lead to the development of advanced systems for the optimisation and control of stone processing technology, and two Research Associates are required to join a larger research team. One post will focus on Knowledge Based systems to advise on the process (Ref R/147/NS); the second will focus on the Monitoring and Control system for data acquisition and control of machines (Ref R/148/NS).

You should have a good honours degree in an Engineering discipline, and preferably a higher degree. Knowledge and experience in one or more of the following is desirable: software development; expert systems and database management systems; and data acquisition systems (transducers, computer interfacing and signal processing). You will need high motivation and initiative, and the ability to communicate effectively and work to deadlines. The ability to communicate in Italian would be an advantage.

These posts are fixed term for two years and starting salary will be in the range £13,400 - £17,700 depending on qualifications and experience. The project is consortium based with partners including Italian and Spanish companies; you will therefore be involved in considerable travel between the UK, Italy and Spain.

ELECTRONIC ENGINEERING
The EU funded FRUIT project has been concerned with tracking the quality of fresh fruit and has developed novel electro-chemical sensors which can "sniff" damaged or rotting fruit. This one year extension to the project involves the design of an intelligent monitoring system employing these sensors and able to operate in non-ideal conditions.

You should have a good honours degree in Electronic Engineering and expertise in the design, test and build of analogue interface electronics (between low-level signals and a microprocessor) together with competence in microprocessor applications, data logging and control. The post is fixed term for one year and salary will be in the range £9,900 - £11,300. You will also be offered the opportunity to register for MPhil. (Ref R/149/NS).

RESEARCH STUDENTSHIPS
The following 3 year studentships are available in the Faculty, leading to a Ph.D. and attracting a bursary of c.£5,600 per annum:

Engineering Mathematics
You will have a strong interest in nonlinear structural analysis, particularly with regard to the behaviour of metallic materials at elevated temperature. The project will involve use of finite element methods, knowledge of which would be an advantage, as would a basic understanding of the principles of physical metallurgy. You should have a good first degree in Engineering Mathematics, Mechanical Engineering or a related discipline and be able to demonstrate considerable mathematical ability in the fields of both classical continuum mathematics and numerical algorithms. (Ref R/150/NS).
Intelligent Autonomous Systems
One studentship is available for the project "Theoretical and Experimental Aspects of Behaviour Based Architectures for Autonomous Mobile Robots". Subjects of interest include: the integration of self-sufficiency with task requirements; utility based action selection; learning, and hierarchical architectures. You should ideally have a background in robotics, artificial intelligence, computer science, psychology or a related discipline. Some familiarity with both software and electronics hardware would be an advantage. (Ref R/151/NS).

A second studentship is available for the project "Application of Adaptive Neurocontrol to Nonlinear Control Problems". This will focus on the application of novel adaptive neurocontrol techniques to a range of complex nonlinear control problems including multi-axis manipulators and mobile robots, with an emphasis on the development of practical real-time implementations suitable for industrial application. You should have a good first degree in Electronic Engineering or a related discipline, and will ideally have competence in both classical control and neural networks. (Ref R/152/NS).

For further information and an application form to be returned by 27 January 1995 please ring our 24 hour answer-phone service on 0272 763813 (minicom users please phone 0272 750424) or write to Personnel Services, UWE Bristol, Frenchay Campus, Coldharbour Lane, Bristol BS16 1QY.

Please quote relevant reference number.

University of the West of England, Bristol
Consultants - Regulatory Affairs/Crop Protection

JSC International Ltd, a subsidiary company of Jellinek, Schwartz and Connolly Inc, Washington DC, is a leading consultancy, providing a range of regulatory, scientific and policy services to a substantial number of companies in the crop protection industry. Due to continued growth of our European office we are now looking to recruit a talented individual to provide scientific and regulatory consultancy support to our clients in the European crop protection chemical industry. Applicants should be educated to degree standard in the chemical or biological sciences and preferably have several years experience in regulatory affairs or in a relevant scientific discipline, either in industry or government.

The post will be based in our European office which is located in Guildford. Salary and conditions will be dependent on experience and qualifications. Interested candidates should submit a brief cv and letter outlining why they consider themselves to be suitable candidates to:
Dr L. McMinn, JSC International Ltd, Unit 2, Surrey Technology Centre, 40 Occam Road, Guildford, Surrey GU2 5YH. Tel: 0483 295850. Fax: 0483 451037.
Clin Trials Research Ltd, a worldwide leader in pharmaceutical clinical research management, is rapidly expanding its European operations and is seeking the following personnel to be based in our European Head Office in Maidenhead, UK.

**CLINICAL RESEARCH ASSOCIATES**  
Ref: JM01  
Tasks:  
* The responsibilities will include investigator recruitment, initiation, monitoring and reporting of Phase I, II, III, and IV clinical trials in Europe.

Requirements:  
* Candidates should have a nursing/scientific/medical background.  
* Candidates must have at least one years experience in monitoring clinical trials.  
* Candidates should demonstrate organisational skills and attention to detail.  
* Candidates must be comfortable in a team based working environment.  
* Good computer skills are important (training on specific software packages will be provided).  
* A second European language would be an asset.

We offer an excellent salary and benefits package including life and health insurances, pension plan, car and relocation assistance where appropriate.

Please send your CV including current salary details (quoting the position reference number on the envelope) to arrive no later than 16th January 1995, to:  
Clin Trials Research Ltd, Kings Chase, 107-123 King Street, Maidenhead SL6 1DP Fax: (0628) 789666

ClinTrials Research Ltd.

This course now receives full US-CME accreditation
LABORATORY TECHNICIAN
Orpington, Kent

A growing division of Colorcon, the world's leading provider of tablet coating materials. Pharmalytic provides a specialist contract analytical service to the pharmaceutical industry.

We require a Laboratory Technician to join our small team working on a wide variety of client projects ranging from simple analysis to the operation of complex instrumentation.

Since graduating in Chemistry you will have gained several years analytical / chemical experience preferably within a laboratory. You will have a sound knowledge of HPLC, GC and AA and must be able to work in a GLP/GMP environment.

You should be well presented and self motivated and be able to work as part of a team as well as on your own initiative. Good communication skills, report writing skills and computer literacy are all essential pre-requisites.

We offer a competitive salary and benefits package.

If you are interested in this position, please write with full career details and current remuneration package to: The Human Resources Officer, Colorcon Limited, Murray Road, St Pauls Cray, Orpington, Kent BR5 3QY.

Pharmalytic
A Division of Colorcon Limited
The Food and Agriculture Organization of the United Nations invites applications for the post of

WATER RESOURCES POLICY AND MANAGEMENT SPECIALIST/CHIEF TECHNICAL ADVISER with duty station Entebbe, Uganda

FAO is the executing agency for a regional project "Operational Water Resources Management and Information System in the Nile Basin Countries" (GCP/RAF/286/ITA). The project covers Burundi, Egypt, Ethiopia, Kenya, Rwanda, Sudan, Tanzania, Uganda and Zaire and aims at strengthening regional coordination and the capacity to negotiate joint management and equitable sharing and utilisation of water resources, and at the protection of the environment in the Nile Basin.

Responsibilities: As supervisor of a team, responsible for the development of frameworks and mechanisms for water resources and environment management and the establishment of a regional monitoring information system.

Requirements: A degree in water resources engineering or a related field with extensive experience in river basin management at a policy formulation level. Ten years of field experience, preferably in Africa. An aptitude to communicate and work with people of different backgrounds and interests. Fluency in English plus a working knowledge of French. Willingness to travel extensively in Nile basin countries.

Benefits: 12-month renewable appointment starting as soon as possible at P-5 level which carries a net base salary per year from US$ 51,466 to US$ 62,517 (without dependents) and US$ 55,530 to US$ 68,058 (with dependents) plus a significant post adjustment element and other attractive benefits applicable to the UN/FAO regulations.

Technical Representatives
Food Microbiology
North East
East Anglia

OXOID

Unipath Limited, a Unilever Company, is a leading supplier of dehydrated culture to microbiology laboratories across the world.

As part of our continued commitment to the improvement of customer service we have two new positions concentrating on the sale of the "Oxoid" range of products to food and other industrial laboratories in the North East and East Anglia. This provides an opportunity for microbiologists with experience in the food industry to develop a sales career with the market leader.

Previous sales experience is not necessary, priority being given to the knowledge and skills candidates will already have gained in the four years or more since obtaining a degree or equivalent in microbiology. Our training programme will develop the potential for success in this new and exciting direction.

If you believe that you have the motivation and ability to use your scientific background in this way then telephone now to discuss your future with:

Q-ONE BIOTECH LTD

BIOTECHNOLOGY TECHNICAL SALES

Q-One Biotech Ltd, the leading European company in the safety evaluation of biopharmaceuticals seeks a biological sciences graduate to further strengthen its expanding business in Europe.

The ideal candidate will have a sound technical background in the biological sciences/pharmacy fields. Sales or marketing experience and fluency in French or another European language would be an advantage.

This responsible position will carry an attractive remuneration package and conditions of employment.

Applicants should send their cv and current salary, in confidence to: Mr Malcolm Brattle, Sales & Marketing Director, Q-One Biotech Limited, Todd Campus, West of Scotland Science Park, Glasgow G20 0XA.
[1959-038 (1995) : 54]
Scotia Pharmaceuticals are sponsoring two three-year postgraduate studentships for research to be undertaken at the Research Institute, The Churchill Hospital, Oxford. Successful applicants will be registered for a DPhil with the University of Oxford. The research, which is aimed at improving treatment of cancer with radiation by reducing its adverse effects on healthy normal tissues, will be directed in the following areas:

(a) molecular and cellular mechanisms of radiation injury to the central nervous system, (b) effects of radiation on the skin with specific reference to the problems of reconstructive surgery, and (c) effects of essential fatty acids in modulating radiation injury to normal tissues and their effects on wound healing.

Applicants with a good honours degree in an appropriate discipline should send a CV, with the names of two academic referees, to the Director, Research Institute, The Churchill Hospital, Oxford OX3 7LJ, by 20 January 1995. Telephone enquiries on 0865 225848.
Information Scientist
Develop your scientific knowledge away from the bench

1991
AWARDED TO CENTRAL DIVISION OF PFIZER LIMITED

To discover and develop ground-breaking novel medicines our scientists need information. Join us as an Information Scientist and you'll be part of a small team providing all the scientific, patent and industry information required to support the activities of our business. This is an ideal opportunity for a young scientist to retain and develop their scientific knowledge whilst learning how a world-leading pharmaceutical business operates.

You will have specific responsibility in the areas of chemical literature and biomedical information. Working closely with scientific colleagues, you'll design, execute and report literature searches. The facilities available are excellent, offering you access to a wide range of internal and external electronic databases from your desktop. Where appropriate you'll support other staff in the use of these systems.

You should have a degree or equivalent in chemistry or biological sciences and be familiar with the research process, ideally through experience gained in the pharmaceutical industry. Your experience may include information science and the use of computerised retrieval systems. You will possess good organisational, interpersonal and communication skills and be keen to provide a quality service to your clients.

You take your career seriously and we want you to succeed. You'll be encouraged to attend training courses and conferences enabling you to maintain an awareness of new developments in scientific information systems.

We offer an excellent benefits package including performance-related bonus, health and pension plan and extensive sports and social facilities. Relocation assistance will be offered, if appropriate.

Please send your curriculum vitae and a letter explaining how your skills meet our needs to: Ms Fiona Cox, Personnel Adviser, Pfizer Central Research, Ramsgate Road, Sandwich, Kent CT13 9NJ. Tel: (0304) 618722.

CENTRE FOR MECHANISMS OF HUMAN TOXICITY
Protein and Nucleic Acid Chemistry Laboratory

TECHNICIAN
Three Year Post

The successful candidate will be responsible for the daily running of the automated DNA sequencing and DNA fragment analysis core facilities which serve all University of Leicester life science departments, and will be involved in a number of genome mapping and micro satellite analysis projects. The postholder will also be required to assist with the running of the DNA synthesis core facility.

Previous experience of automated DNA sequencing is desirable but not essential as the successful candidate will receive appropriate training.

Applicants should possess ONC/BTEC Science Certificate, Diploma or equivalent and have at least three years relevant experience (including any training period). Salary is on the Technician Grade C scale £9,871 - £11,069 pa. Recent graduates will also be considered for appointment as Graduate Trainees at an initial salary of £9,576 pa.

Informal enquiries and written applications, including a full CV and the names and addresses of two referees should be made to Dr Kathryn Lilley, Centre for Mechanisms of Human Toxicity, Hodgkin Building, P O Box 138, Lancaster Road, Leicester LE1 9HN. Tel 0116 252 5613.

Closing date for applications is 20 January 1995.

Towards equal opportunities
Applications are invited for the above two posts tenable for two years from date of appointment, to investigate suppression of IgE-mediated hypersensitivity by a chimaeric anti-idiotypic antibody. The project is funded by a grant from the BBSRC and will be conducted in collaboration with Dr M. R. Clark of the Immunology Division, Cambridge University Department of Pathology. Both appointments will be based in Nottingham.

Postdoctoral Research Assistant (IA, starting salary £15,566) Applicants for this post must hold, or about to be awarded, a Ph.D. degree, and should have a strong background in molecular biology and some interest and expertise in immunology or protein chemistry.

Graduate Research Assistant (IB, starting salary £13,941) Applicants for this post will be expected to have a first or upper second class honours degree in either immunology, biochemistry or related subjects. Prior experience and some interest in cellular and molecular immunology is desirable but not essential.

Applicants wishing to discuss these posts should contact Dr F. Shakib on 0602 709123. Applications, including a full curriculum vitae and names and addresses of two academic referees, should be sent to Dr F. Shakib, Division of Immunology, University Hospital, Queen’s Medical Centre, Nottingham NG7 2UH. Applicants should clearly indicate which position they are applying for.

Closing date for applications: 20 January 1995.

Mathematical Biology

The Wellcome Trust operates personal support schemes for individuals wishing to develop careers in research and who would like to apply mathematical disciplines to research questions in biological and medical science. The Trust is anxious to stimulate research in this subject and in particular to promote the flow of well-trained research workers into this field.

**POSTDOCTORAL RESEARCH TRAINING FELLOWSHIPS** are open to both mathematics and biology graduates of UK or Irish universities. Mathematicians completing a Ph.D. degree can be funded to pursue independent studies applying their mathematical skills to an important biological or medical problem. Alternatively, scientists with a doctorate in a biological subject can be funded to develop mathematical skills in relation to their biological interest.

Prospective fellows should apply within four years of completion of their Ph.D. degree. Applicants should note that these fellowships are primarily intended for the acquisition of skills in mathematical biology rather than to sustain the careers of those with an established research background in their discipline.

It should be noted that the Trust's remit is primarily to support research in medicine, veterinary medicine and related biomathematical sciences. The Trust does not support research on cancer. Fellowships may not normally be held in cancer research institutes.

Fellowship support can be requested for up to five years, and can include funding, where appropriate, to attend an MSc course on the subject, or to obtain experience at a suitable centre abroad, or both. Normally, candidates would be expected to have two sponsors, one from each of the biological and mathematical sciences. Applications should be made jointly with the supervisors whose laboratories or departments must be in the UK or Republic of Ireland. The stipend for these fellowships will be on the Trust's own fellowship scales, which are linked to University Lecturer scales, and will be in the range of £13,941 to £25,735 per annum (including enhancement premium), according to age and experience. Project dedicated research costs may be requested as appropriate to the project.

Prospective fellows will be expected to be primarily responsible for writing the application. Short-listed candidates will be invited for interview.

**RESEARCH TRAINING STUDENTSHIPS** are available for graduates, with an upper second or first class degree in any mathematical or biological subject, who wish to study for a Ph.D. degree in the UK or the Republic of Ireland. Overseas students may apply provided that they can demonstrate that their degree is equivalent to at least an upper second class honours degree from a UK or Irish university.

Support will be available for a course lasting up to four years. This is to allow those with mathematical training to apply their knowledge to the study of a biological project, and to allow those who graduated in a biological subject additional time to develop mathematical skills.

It should be noted that the Trust's remit is primarily to support research in medicine, veterinary medicine and related biomathematical sciences. The Trust does not support research on cancer. Studentships may not normally be held in cancer research institutes.

Applications should be made jointly by the intended student and supervisor. Studentships will carry a stipend starting at £10,328 per annum (£11,710 per annum in London) and £4,000 per annum research expenses. All approved university and college fees will be met by the Trust at the home rate only. Applications will be considered in competition with each other.

Application forms are available on written request from:

Miss Sheila Dykes, The Wellcome Trust, 183 Euston Road, London NW1 2BE. Fax: 071 611 8687.
Completed application forms must be returned no later than 24 February 1995. It is anticipated that decisions will be made by the end of May 1995.

THE WELLCOME TRUST
Registered Charity No: 210183
[1959-043 (1995) : 56]
UNIVERSITY OF ST ANDREWS
School of Mathematical and Computational Sciences

Postdoctoral Research Assistant

Applications are invited for the above post which will arise in the Solar Theory Group at this University in the Spring of 1995. The position is for two years and is for theoretical work on MHD Waves, in collaboration with Professor B. Roberts. Experience in theoretical aspects of magnetoacoustic flux tube waves would be an advantage.

Annual salary will be at the appropriate point on the 1A scale for research staff, i.e., £13,941 to £20,953.

Application forms and further particulars are available from the Head of Personnel Services, The University, College Gate, St Andrews, KY16 9AJ. Telephone 0334 462565 (out of hours 0334 462571). Fax 0334 462570, to whom completed forms, accompanied by a letter of application and a CV, should be returned to arrive not later than 31 January 1995. Please quote Ref No VK/AMC1808.

SALFORD AND TRAFFORD HEALTH AUTHORITY
MANCHESTER CHILDREN'S HOSPITALS

Grade A
Clinical Cytogeneticist

To work in this small, busy Cytogenetics Laboratory. This is a training post involving all aspects of Clinical Cytogenetics including molecular cytogenetics. Salary scale £11,437 to £15,048.

For job description and application form contact 061 727 2352 (answerphone) and quote reference RM132/94. For further information regarding the post, please contact Mrs O. Stecko, Acting Head of Cytogenetics Laboratory, 061 727 2330.

Closing date: 28 January 1995.
**Senior CRA**
For major pharmaceutical co, to plan and monitor studies. £25k + benefits.

**Clinical Data Manager**
For CRO. SAS experience essential. Superb prospects. £16-30k depending on experience.

Phone Chris Lloyd now on 0628 29333 or send CV to EF Medical, St Ives House, St Ives Road, Maidenhead SL6 1QS. Fax: 0628 770398.

Applications are invited for a University Lecturership in Physical Geography tenable from 1 October 1995, stipend on the age-related scale £14,756 to £27,473 per annum. The successful candidate may be offered a fellowship by St Catherine's College for which additional emoluments would be available.

Further particulars of the university and college posts may be obtained from Dr A.M. Knowland, Secretary to the Board of the Faculty of Anthropology and Geography, Oriental Institute, Pusey Lane, Oxford, OX1 2LE (telephone: 01865 278200; Fax: 01865 278190) to whom formal applications (ten copies, or one only from overseas) should be sent by 1 February 1995.

The University is an Equal Opportunity Employer.

The Ceramics and Glass Course invites candidates with a Materials Science background to pursue a course of research leading to the award of an MPhil(RCA) or Ph.D.(RCA). Proposals may examine any aspect of ceramics or glass materials or processes providing that the information revealed will have results of potential importance to designers and/or makers of ceramics and glass products. Previous successful projects include:

'The development of low temperature translucent ceramics', 'The development of decorative processes using metal coated glasses' and 'A study of the properties of some Nigerian clays and their potential for the manufacture of ceramic products'.

For further information or an informal discussion regarding your proposal please contact: Professor David Hamilton
Royal College of Art Kensington Gore London SW7 2EU

SCHOOL OF DESIGN FOR INDUSTRY
Industrial Design Engineering:
Joint Course with Imperial College of Science, Technology and Medicine
Applications are invited to this two year postgraduate Course from students or practising designers who already hold a degree in engineering. Successful completion of the Course leads to the award of a Masters degree (MA(RCA)) and the Diploma of Imperial College (DIC). Utilising the extensive combined resources of the RCA and ICSTM, their studies, workshops, laboratories and computer facilities, the Course offers to students a detailed exposition of industrial design skills and knowledge as well as a thorough understanding of industrial design processes and methods. A number of studentships are available to successful applicants for both MA and Research level Courses.

SCHOOL OF HUMANITIES
Conservation: Joint Course with the V&A
Offers exciting opportunities for postgraduate training and research (MA, MPhil, Ph.D.) in a wide variety of conservation disciplines. Applications are particularly welcome from science and engineering graduates with craft skills and an interest in art and design. MA options for 1995/96 include: Ceramics and Glass, Metalwork, Furniture and Sculpture.

MOORFIELDS EYE HOSPITAL
NHS TRUST
Pharmacy Quality Assurance Technician £8,408 - £13,379
Plus £1,952 London Weighting

Moorfields Eye Hospital is a post-graduate teaching hospital of international acclaim devoted to excellence in patient cure, training and research. The Pharmacy Department has a very large manufacturing unit for sterile products.

We currently have a vacancy for a qualified technician who holds a BTEC National Certificate in Science, BTEC HNC in Science (Applied Biology) or equivalent. Typing skills would be advantageous.

The post holder is responsible for the environmental monitoring of all pharmaceutical clean rooms, the quality control of packaging materials and clerical duties pertaining to Quality Control Documents. For further information please contact Gillian Oldham QA Officer, Tel: 071 253 3411 Ext 2364.

For an application form and a job description please contact the Personnel Department, Moorfields Eye Hospital, City Road, EC1V 2PD on 071 253 3411 Ext 2433 or 071 566 2437 124 hour ansaphone).

Closing date for receipt of completed application forms: 19th January 1995.
An Equal Opportunity Employer
THE UNIVERSITY OF EDINBURGH
DEPARTMENT of MATHEMATICS and STATISTICS

LECTURER / COMPUTING OFFICER

Applications are invited for a position as Lecturer / Computing Officer commencing as soon as can be agreed.

The position will entail joint responsibilities for teaching and research and (with other Computing Officers) the management and development of the Department's computer installations. Applicants should have research interests in an area of mathematics or statistics which makes significant use of computation, and have practical experience in the running of computer systems.

The position is tenable for five years in the first instance. Salary will normally be on the Lecturer A Scale: £14,756 - £19,316 per annum, or possibly on the Lecturer B Scale: £20,133 - £25,735 per annum.

Please quote REF: NS 490565.

Informal enquiries may be addressed to Dr. J. Martin, Department of Mathematics and Statistics, The King’s Buildings, Edinburgh EH9 3JZ, Tel: 0131-650 5062, email hod@maths.ed.ac.uk.

Three copies of applications (one copy from overseas candidates), including curriculum vitae and the names and addresses of three academic referees, quoting the reference number, should be sent to:

THE PERSONNEL OFFICE, THE UNIVERSITY OF EDINBURGH, 1 ROXBURGH STREET, EDINBURGH EH8 9TB.

Further particulars may be obtained from this address or from the Internet via the Departmental W W W home page (http://www.maths.ed.ac.uk).

Closing date: 20th January 1995.
Applications are invited for this challenging post in a busy department undergoing major development with pending appointment to a new Chair of Community Genetics, establishment of an academic department and expansion of the DNA Laboratory. There will be an opportunity for career advancement. Candidates must be widely experienced and should have a post graduate qualification. MRC Path would be an advantage.

The Centre provides a comprehensive clinical and laboratory service and occupies modern accommodation in a large NHS Trust Hospital with good facilities and easy access to motorways and to Central London.

For further information or to arrange an informal visit, please contact Elaine Robertson or Mike Ridler on 081422 8577.

An application form and job description can be obtained from the Personnel Department, Northwick Park and St Mark's NHS Trust, Watford Road, Harrow, Middlesex, HA1 3UJ. Tel. 081 869 2184 (24 hour answerphone) quoting ref: OGG707P.

Closing date: 20th January 1995.
Committed to equal opportunities
Nuclear Electric
Nuclear Electric is responsible for all commercial nuclear power generation throughout England and Wales. Our primary concerns are for safety, the environment and the interests of our customers. This means that our top priority is quality - in our plant, in our methods of working and, above all, in our staff.

Chemistry and Radiation Monitoring Technician
c. £18,000

Applications are invited for the post of Technician, within the Chemistry and Radiation Monitoring Section of Sizewell B Power Station.

Your duties will include chemical sampling and analyses on active and non-active systems, including Health Physics activities, and management of the Active Laundry. A multi-disciplined professional, you should have the flexibility to perform other duties including plant work and maintenance of on-line chemistry and radiation monitoring instruments.

Working initially on chemistry based instrumentation, you must have experience of modern analytical techniques including Atomic Absorption, Gamma Spectrometry, Liquid Scintillation counting, Ion Exchange Chromatography and classical analytical techniques. You will receive on and off-site training and be involved in the training of other staff, including the preparation of training documents.

Qualified to a minimum of BTEC National or equivalent in a science subject, you will be expected to pursue extra qualifications to be eligible for career progression. Previous experience within a Power Station Chemistry or Health Physics service would be advantageous, particularly with a practical applications bias.

Further details, reference post profile SZB/PDPP/22 and application forms are available by telephoning the Personnel Section on (0728) 653241 or 653247. These must arrive no later than 27 January 1995. Please mark envelopes with 'Staff in Confidence' and reference number SB3994/PDPP22.

In promoting equal opportunities, Nuclear Electric plc welcomes applications from all sections of the community. We select people according to their abilities and our needs.

Sizewell B Power Station - Operations Division, Leiston, Suffolk, IP16 4UR
RESEARCH CHEMIST
STABLE ISOTOPE ANALYSIS
Chemistry Department

A vacancy exists in the Chemistry Department for a Research Chemist (Band 6) to synthesise and analyse a range of stable isotope labelled triglycerides for clinical studies of lipid metabolism. Techniques for stereospecific synthesis and analysis will be used in a laboratory with extensive experience of lipid and stable isotope analysis. This post is funded until 30 September 1997.

Salary £13,286 - £23,470 (Band 6). Non-contributory superannuation.

Qualifications: Candidates should normally have a first or upper second class honours degree in chemistry or a related science subject, together with at least three years' postgraduate research. Experience of triglyceride synthesis would be preferable and experience of GC and LC methods and lipid chemistry would be an advantage.

The Scottish Crop Research Institute is grant-aided by the Scottish Office Agricultural and Fisheries Department (SOAFD).

Application forms and further particulars are available from Mr I. Paxton, Personnel Officer, and should be returned by Friday 20 January 1995 quoting the appropriate reference CHEM/2/94.

Scottish Crop Research Institute
Invergowrie, Dundee DD2 5DA
Medical Laboratory Scientific Officer (MLS01) £10,405 to £13,693 pa

Applications are invited for the above post in the Leicestershire Pathology Service Histopathology Department, which provides a diagnostic service to the Leicestershire population. The department provides a comprehensive range of services including routine diagnostic and post mortem histology, gynaecological and non-gynaecological cytology, immuno-cytochemistry, molecular pathology and electron microscopy. Applicants should be state registered and experienced in routine diagnostic investigations. The successful applicant will be expected to work in all sections of the Department, and may be given the opportunity to study for a higher degree. For further details regarding this post please contact Dr T. A. Sims, Head MLSO Histopathology on Leicester (0116) 586586.

For an application form and job description please contact the Human Resources Department, Leicester Royal Infirmary NHS Trust, Infirmary Close, Leicester LE1 5WW. Telephone: (0116) 2585790 between 9am and 5pm. Closing date: 16 January 1995.

BirdLife International
CAMEROON

BirdLife is seeking an experienced professional to lead an integrated rural development project.

Experience in natural resource management in a developing country; ability to build teams and work in a remote location; relevant MSc qualification required.

Apply by 3 February to Head of Africa Division, BirdLife International, Wellbrook Court, Girton Road, Cambridge CB3 0NA, UK.

LABORATORY SCIENTIFIC OFFICER
GRADE 1 (or grade 2 with suitable experience)

UMDS GUY’S AND ST THOMAS'S MEDICAL AND DENTAL SCHOOL
(University of London)
Division of Surgery, St Thomas's Campus

required for research into vascular disease. Experience of tissue culture, bio-immunoassays and some histological techniques required. Experience in the use of radioactive isotopes, use of computers (wordprocessing, spreadsheets and statistics) and some physiological measurement techniques would be an advantage. For an informal discussion, please contact Mr D Eastham on 071-928 9292 ext 2338. Salary range £9,775 - £13,379 pa plus LWA £1,952 pa according to age, qualifications and experience. Job descriptions including details of the application procedure are available from 071-922 8049 (24, hours) quoting reference STH/SURG/355. Closing date: 20 January 1995.

Equality of Opportunity is School Policy
SCIENCE POLICY

The Royal Society is establishing within its secretariat a new Section to deal with the function of giving advice about policy for science and about the scientific aspects of public policy, both nationally and internationally. The Science Advice Section has a complement of nine staff and currently has two vacancies.

(i) **Manager**. Three Managers, under the Section Head, form the management team that sets the Section's objectives and ensures they are met. Each Manager has a particular portfolio of responsibilities; these will be rotated periodically among the Managers so that each can gain the widest possible experience. The Manager post now advertised will be concerned in the first instance with substantive policy studies and submissions of evidence, with nurturing the Society's links with other Academies and with information management.

The post-holder will have a lively interest in public affairs, experience of managing projects and people, strong personal motivation and the ability to elicit motivation in others, awareness of customers, and the ability to think analytically and communicate easily both in writing and orally. Experience of research in an academic or industrial setting would be an advantage, as would facility with foreign languages.

(ii) **Executive Officer**. One of two posts at this level, the postholder will be assigned to individual projects or activities as required and, under the relevant Manager, will play a substantive and creative role in carrying through the project/activity. S/he will in time cover the full range of the Section's work. S/he will have particular responsibility for production and distribution of newsletters. Motivation, energy, imagination and organisational skills are essential. The post would suit a graduate with some work experience looking to develop a career in the wider aspects of science.

The manager post commands an initial salary in the range £18,365 to £22,500, and the Executive Officer £14,413 to £16,020. For further details and application forms, please contact Nicketa Davies on 0171-839 5561, ext. 313 (ansaphone). The deadline for receipt of applications for either post is 27 January 1995.

The Royal Society

IGER
INSTITUTE OF GRASSLAND AND ENVIRONMENTAL RESEARCH
ABERYSTWYTH

FORAGE LEGUME BREEDER
£13,286 - £23,470

A plant breeder/geneticist is required to develop and utilise breeding methodology and techniques for the improvement of white clover and other forage legumes. Breeding of improved varieties of white clover for subsequent development by a commercial partner will be a major focus of the post.

Candidates should possess a first or upper second class honours degree in plant biology with at least two years' relevant postgraduate experience. A Ph.D. in a relevant topic is desirable.

Application forms and further particulars are available from the Institute Personnel Officer, Institute of Grassland and Environmental Research, Plas Gogerddan, Aberystwyth, Dyfed SY23 3EB. Please quote reference 94/27. Closing date: 3 February 1995.

IGER is an Equal Opportunities Employer.
Nanotechnology
Call for Proposals

The Nanotechnology Initiative is a six-year funding programme sponsored by the Materials Programme of the EPSRC. The objective of the Nanotechnology Initiative is to develop the UK capability for nanotechnology, in which the control of Nanometre-Scale Structure is central to the performance or properties of a system. This will be achieved by support of research into:

• nanofabrication processes
• the behaviour, modelling and design of nanostructures
and by support for
• the development in collaboration with industry of small-scale demonstration applications that have the potential for commercial application.

Outline research grant proposals are sought from academic researchers - closing date 15 February 1995. This will be the only call for proposals in 1995.

Further information can be obtained from Lesley Thompson, EPSRC, Polaris House, North Star Avenue, Swindon, Wiltshire SN2 1ET.
Tel: 01793 444354.

Before submitting proposals applicants are advised to contact Prof. D Robinson, the coordinator for the Initiative, on 01225 866544.

EPSRC
Engineering and Physical Sciences Research Council
POST DOCTORAL RESEARCH FELLOW
Salary up to £17,472 p.a. (Temporary Two Year Appointment)

The purpose of the job will be to carry out research work on novel smart materials, design and construct the apparatus to measure electrical, optical and thermal coatings made out of the materials.

Applicants should possess a Ph.D. in photochemistry (inorganic or organic), electrochemistry, inorganic synthesis or solid state chemistry with a physics bias. Experience in characterisation of materials using FTIR, NMR, mass spectroscopy and Raman Spectroscopy would be advantageous as would the knowledge of surface analysis techniques. An interest in electronics and devices is essential.

An application form and further details can be obtained from: Human Resources Department, South Bank University, 103 Borough Road, London SE1 0AA. Tel: 071-815 6223 (24 hour answering service).

An Equal Opportunities Employer.

The University of Choice
SOUTH BANK UNIVERSITY LONDON
COUNTRYSIDE DATA OFFICER

We require a person to work at the interface between scientific research and countryside policy formulation, based with the Land Use Section at our Merlewood Research Station.

You will be required to: facilitate access to data derived from DOE/ITE Countryside Surveys for the Department of the Environment and its contractors and collaborators; to service the Department's ad hoc requests for data, simple data analysis and reporting, including the use of the Department's Countryside Information System (CIS); to advise the Department about data characteristics and quality; to provide assistance and advice to CIS users; to provide materials for a CIS User Group Newsletter; and to provide a Secretariat for a CIS Management Team.

You should have knowledge of distributed computing environments (eg using Unix and Novell) and a good understanding of database management and analytical techniques. Experience of working in organisations relevant to countryside management and policy is necessary and knowledge of environmental data, geographical information systems and statistical analysis is important.

The appointment would be for a period of three years in the first instance and will be fixed at the grade of Higher Scientific Officer. Starting salary payable will be dependent on experience and qualifications. The salary is complemented by a generous leave allowance and a non-contributory pension scheme.

Further information and an application form (to be returned by 27 January 1995) are available from the Personnel Section, Institute of Terrestrial Ecology, Merlewood Research Station, Grange-Over-Sands, Cumbria LA11 6JU. Telephone: (015395) 32264. Please quote reference: ITEN 181 on all correspondence.

The Natural Environment Research Council has an equal opportunities policy and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome.
Assistant Editor
Trends in Biotechnology

As a result of an internal transfer, we are seeking to appoint immediately a new Assistant Editor for our monthly review journal Trends in Biotechnology.

The Assistant Editor manages all aspects of the journal production process, from editing manuscripts to supervising the construction of the monthly issues. This involves collaboration with authors, the in-house Editor and production staff to produce clear, accurate material in an appealing magazine format.

We are looking for a graduate with a good understanding of molecular biology and at least one year's postgraduate experience: further study or R&D in biotechnology, or experience in science publishing, would be relevant. We need someone who can express scientific concepts clearly and concisely, has a good eye for detail, is willing to learn a range of skills in science publishing, and is able to organize their work to meet the demands of strict monthly deadlines.

Our offices are located close to the centre of Cambridge and offer an informal, team-based working environment.

Please send a hand-written letter of application plus a full curriculum vitae mentioning current salary (if applicable) to: Dr Clare Robinson, Editor, Trends in Biotechnology, Elsevier Trends Journals, 68 Hills Road, Cambridge, UK CB2 1LA. (Telephone 0223 315961, Fax 0223 464430.)

Closing date for receipt of applications: 20 January 1995.

Elsevier Trends Journals is part of the Reed Elsevier Group.

Closing date for applications 18 January 1995.

Forestry commission
Research Assistant/ Associate in Physiological Ecology

Applications are invited for a postdoctoral or postgraduate researcher to work on a major collaborative project funded for three years by the Scottish Office Agriculture and Fisheries Department. The work aims to investigate spatial and temporal relationships between grassland communities, microbial assemblages and physicochemical soil properties in upland pastures subject to extensification and atmospheric nitrogen deposition.

Applicants should have a good first degree in biology or ecology, with appropriate experience of experimental techniques in plant physiology. The successful candidate will be expected to work closely with a group of researchers in microbiology and soil chemistry at other institutions.

Salary on Research IA/B scale, starting at £13,941 per annum, depending on qualifications and experience.

For further details contact Personnel Services, quoting reference L305, University House, Lancaster University, Bailrigg, Lancaster LA1 4YW. Telephone 0524 846549 (24 hour answering service). Applications (five copies) should be returned to Personnel Services by 25 January 1995.

The University positively welcomes applications from women, people from ethnic minorities and disabled people who are currently under-represented in this area.

UNIVERSITY OF LEEDS

Research Fellowships

DEPARTMENT OF BIOCHEMISTRY AND MOLECULAR BIOLOGY (Ref: 83/163)
IN PROTEIN CRYSTALLOGRAPHY

This post is available immediately for a fixed period of up to 20 months to work in a research group studying the ligand- and receptor-recognition properties of the lipocalin family of ligand-carrying proteins, including retinol-binding proteins, pigment proteins and pheromone transport proteins.

Applicants should have a Ph.D. and research experience in protein crystallography.

Salary will be on the scale for Research Staff Grade IA (£13,941 - £20,953) according to qualifications and relevant experience.

Informal enquiries about the post may be made to Professor A C T North, tel: 0113 2333023 fax: 0113 2333167 e-mail actn@biovax.leeds.ac.uk

DEPARTMENT OF FOOD SCIENCE (Ref: 72/101)
This post is available from May 1995 for a fixed period of 2 years to work on the characterisation of plant oxygenases. Applicants should have a good degree in Chemistry with postdoctoral experience in HPLC, mass spectrometry and NMR required for identification of a range of enzymically generated products, and experience with oxidative enzymes. Salary will be on the scale for Research Staff Grade IA within the range £15,566 - £16,191 according to qualifications and relevant experience. Informal enquiries about the post may be made to Professor David S Robinson tel: 0532 332966, fax: 0532 332982.

Application forms and further particulars for both posts may be obtained from the Personnel Office (Academic Section), the University of Leeds, Leeds LS2 9JT, tel: 0532 335771, e-mail j.m.cox@registry.leeds.ac.uk quoting the appropriate reference number.

Closing date for applications: 4 February 1995.

The University of Leeds promotes an Equal Opportunities Policy.

Applications are invited for the following posts. Closing date for applications: 31 January 1995.

**POSTDOCTORAL POSITION**

Funded by the Wellcome Trust, to work on Alzheimer's disease amyloid precursor protein in human neuronal cell lines with Professor R. C. A. Pearson (Department of Biomedical Science) and Dr D. Parkinson (Sheffield Hallam University). Experience in cell biology and/or molecular biology preferred. Salary on Research 1A scale (£13,941 - £17,813pa).

Further particulars from the Director of Human Resource Management, The University of Sheffield, Western Bank, Sheffield S10 2TN. Tel: 0114 282 4144. Ref: B2342.

**Ph.D. STUDENTSHIP**

For three years, funded by the Mental Health Foundation to study the molecular neuropathology of Alzheimer's disease. A first or Upper Second Class Honours degree in a biomedical science is required. Experience in immunocytochemistry would be an advantage. Stipend £7,000pa.

Potential applicants should contact Professor R. C. A. Pearson, Department of Biomedical Science, University of Sheffield S10 2TN. Tel: 0114 282 4640.

AN EQUAL OPPORTUNITY EMPLOYER
CHARING CROSS AND WESTMINSTER MEDICAL SCHOOL and
NATIONAL HEART AND LUNG INSTITUTE HAREFIELD HOSPITAL
(University of London)

Enteroviral Heart Muscle Disease Research Group

Applications are invited for TWO postdoctoral scientists and ONE technician to join an established, multi-centre research programme funded by the British Heart Foundation. These posts are tenable for two years but may be extended to a maximum of five years.

One postdoctoral post, based in the Department of Biochemistry, Charing Cross and Westminster Medical School, will be concerned with molecular aspects of viral persistence and analysis of cardiovirulence: this post will be supported by a technician who will be a graduate in an appropriate biological discipline.

The second postdoctoral post in the Department of Cardiothoracic Surgery of the National Heart and Lung Institute, based in the Heart Science Centre at Harefield Hospital, will be concerned with the analysis of alterations in cardiac gene expression resulting from enteroviral infection and virus persistence in myocardium.

The postdoctoral post will be on the Research and Analogous 1A scale (£13,941 - £20,953 plus £2,134 London Allowance) and the technical post will be on the MLSO 2 scale (£14,242 - £18,740 plus £1,999 London Allowance), according to age and experience.

For informal discussion applicants should contact either Dr L. C. Archard (081-84G 705 1) or Dr Mike Duan (0895 828 890).

Applications in the form of a curriculum vitae, together with the names and addresses of two referees, should be sent to the Director of Personnel, Charing Cross and Westminster Medical School, The Reynolds Building, St Dunstan's Road, London W6 8RP, within three weeks of the appearance of this advertisement. Quote Ref: 95/03.

CX&WMS is an equal opportunities employer

Graduate Research Assistant

Required to join an inter-disciplinary research group whose objective is development of growth factor antagonists for cancer chemotherapy. The successful candidate will be involved in studies of interaction of the epidermal growth factor receptor with its ligands. Applicants should have a degree in the biological sciences and preferably be experienced in tissue culture, monoclonal antibody production or protein purification.

The post is for 18 months from January 1995 and the salary will be in the range £13,941 - £15,566 per annum on the Research Grade 1B scale, according to age and experience.

Further information may be obtained from Dr D E Davies, on 01703 798795.

Applicants should send a full CV (3 copies from UK applicants, 1 from overseas), including the names and addresses of three referees to the Personnel Department (M), University of Southampton, Highfield, Southampton SO17 1BJ, to arrive no later than 26th January 1995. Please quote ref no M/189. Working for equal opportunities

Fighting cancer on all fronts
Applications are invited for the following posts to join multidisciplinary teams in the Cell Biology, and Plant Sciences, Departments.

**Molecular Plant Pathologist**

An experienced postdoctoral scientist is required with an interest in plant-pathogen interaction to join our molecular Pathology group. The successful candidate will develop an active research programme on molecular mechanisms of pathogenicity and host recognition in fungal plant pathogens.

The successful candidate should have a Ph.D. in a relevant subject with at least 2 years postdoctoral experience and practical skills of molecular genetic, biochemical and cytological techniques. Depending on experience the appointment will either be made as Senior Research Scientist (Band 5) or Research Scientist (Band 6). This post is initially for 4 years. Informal enquiries can be made to Dr John Lucas (ext 228). Ref: LN6078

**Molecular Geneticist**

An experienced postdoctoral scientist is required to develop and apply molecular techniques for screening, classifying and evaluating genetic diversity in plant tissue culture-derived material, in living and preserved germplasm collections and populations of plants and animals. Duties will also include taking responsibility for the day to day running of the laboratory and training of students, postdocs and visitors.

The successful candidate will have a Ph.D. in a relevant subject with at least 2 years postdoctoral experience in PCR-based techniques. The appointment will be made as Research Scientist (Band 6). Informal telephone enquiries can be made to Dr Angela Karp (ext 246). Ref: LC3191

**Molecular Biologist**

An experienced postdoctoral scientist is required to work in collaboration with other members of the Plant Science Department to develop and use molecular and related techniques to study the responses of whole plants to impeded aeration and other environmental stresses. A strong interest in applying molecular techniques to the study of plant adaptation to environmental stresses is essential. The successful candidate should hold or shortly be expecting to hold a Ph.D. in a relevant subject. The appointment will be made as Research Scientist (Band 6). This post is initially for 3 years. Informal enquiries can be made to Dr Mike Jackson (ext 251). Ref: LN6079

Salary scales: Senior Research Scientist (Band 5) £16,492 - £29,700 and Research Scientist (Band 6) £13,286 - £23,470 with a non-contributory superannuation scheme and 25 days annual leave.

Further details and application forms quoting reference number can be obtained from the Personnel Officer, IACR Long Ashton Research Station, Department of Agricultural Sciences, University of Bristol, Long Ashton, Bristol, BS18 9AF (Telephone 01275 392181).

Closing date for applications is 19 January 1995.

An Equal Opportunities Employer

IACR - Long Ashton
Integrated Approach to Crop Research
Cantab Pharmaceuticals

Cantab is developing a number of therapeutic vaccines and wishes to appoint an:

**Assay Development Scientist**

to join the Virus Development group. The post involves establishing and performing a number of *in vitro* assays to demonstrate the safety and efficacy of virus vaccines.

The ideal candidate will hold a degree or equivalent and have experience of some of the following techniques: mammalian cell culture, virus production, virus titration, molecular biology (eg PCR, DNA fingerprinting), ELISA. Experience of working to GLP would be an advantage. Interpersonal skills are important as this post involves working closely within a team.

Cantab offers a generous compensation and benefits package commensurate with qualifications and experience.

Interested applicants should forward their CV, with current salary and citing three referees who may be contacted, to:

The Personnel Officer
Cantab Pharmaceuticals Research Limited
184 Cambridge Science Park, Cambridge CB4 4GN
NATIONAL UNIVERSITY OF SINGAPORE  
BTC  
BIOPROCESSING TECHNOLOGY CENTRE

The Bioprocessing Technology Centre, established in 1990, has research programmes and custom services in Microbial Fermentation; Cell and Tissue Culture; DNA and Peptide Technology and Protein Purification. To strengthen our team, we wish to recruit motivated individuals who will be responsible for developing new and consolidating current research strategies. All positions call for excellent communication skills, initiative and ability to function in a multidisciplinary setting.

BIOCHEMICAL ENGINEERS / CELL CULTURE SCIENTISTS

We are looking for three candidates to work on projects in protein expression in pro- and eu-karyotic systems and the optimisation/scale-up of production and purification processes. These projects are either in collaboration with industry and other university departments or are in-house research programmes involving postgraduate students. We have experience in handling recombinant microbial, mammalian, insect and fish cells for producing and purifying glycosylated and non-glycosylated proteins.

MOLECULAR BIOLOGIST

A molecular biologist is needed to develop molecular techniques for the discovery of novel proteins and to define strategies for cloning and expression in a broad range of vectors/hosts.

SEQUENCING and SYNTHESIS SCIENTIST/ MANAGER

We wish to recruit a scientist to manage the commercialisation of BTC's DNA/peptide synthesis and sequencing services. There will be opportunities for the successful candidate to undertake research DNA and peptide technology. An area of current interest is the development of novel screening methods for peptide epitopes and ligands using peptide libraries.

Applicants are required to have a Ph.D. or Masters degree, preferably with working experience, for all positions. We offer competitive terms of employment. For consideration, please send your curriculum vitae to Director, Bioprocessing Technology Centre, National University of Singapore, 10 Kent Ridge Crescent, Singapore 0511. Tel: 65-7726369. Fax: 65-7754933.
CHARING CROSS AND WESTMINSTER MEDICAL SCHOOL
(University of London)

SENIOR BIOLOGIST

We wish to appoint a biologist as research assistant in gene targeting and transgenic mouse studies. The person appointed will be responsible for transfection and culture of embryonic stem cells, identifying knockouts and producing transgenic mice. The research assistant will work initially with a team in the Department of Medical Oncology investigating the function of fibroblast growth factors and FGF-receptor 4 in the control of growth and differentiation of mammary epithelial cells. A subsequent assignment will be concerned with the investigation of the mechanism of action of anti-inflammatory drugs in the Department of Pharmacology.

The appointee will have a higher degree in an appropriate biological discipline. Experience in tissue culture, gene transfection and molecular biology will be an advantage. Training in embryonic stem cell technology will be available in Edinburgh if required and the appointee should be prepared to spend some time there if required.

The appointment is for three years. Starting salary £21,460 per annum inclusive of London Allowance.

Informal enquiries about the initial research project may be made to Professor Charles Coombes, Department of Medical Oncology (081-846 1418).

Applications, including the names and addresses of two referees, should be sent to the Director of Personnel, Charing Cross and Westminster Medical School, The Reynolds Building, St Dunstan's Road, London W6 8RP, within three weeks of the appearance of this advertisement. (Quote Ref 95/04).

CX&WMS is an equal opportunities employer.
Applications are invited for a Leverhulme Trust supported project to undertake a behavioural and chemical study of the defensive mechanisms of immature sandflies.

This two-year post is available from February 1995 or as soon as possible thereafter. Candidates should preferably have a background in insect behaviour and/or pheromone chemistry. An appointment is likely to be made at the lower end of the salary scale.

Informal enquiries to Professor Richard Ward, telephone 0782 583035.

Please write for application forms and further particulars, quoting the post reference number, to the Personnel Department, Keele University, Keele, Newcastle, Staffs ST5 5BG or fax your request: 0782 583471.

Closing date: 19 January 1995.

An Equal Opportunities Employer
UNIVERSITY OF CAMBRIDGE
Department of Zoology

Research Studentships

Several studentships will be available for British and EU students from Autumn 1995. The particular research interests of the Department are in Cell, Molecular and Developmental Biology, Neurobiology, Behaviour, Behavioural Ecology, Biomechanics, Ecology, Population Biology, Epidemiology, Animal Physiology and Evolutionary Studies.

The Department includes the Sub-Department of Animal Behaviour and is supplemented by the Wellcome Trust/CRC Institute of Cancer and Developmental Biology, the CRC Mammalian Cell DNA Repair Group, and the Babraham Institute Laboratory of Molecular Signalling. Interrelations between all the groups in the Department are designed to allow students to tackle projects with a multidisciplinary approach. In the last UFC Research Assessment exercise the overall research performance of the Department was graded 5.

For further details of the research opportunities and application forms please contact the Graduate Admissions Secretary, Department of Zoology, Downing Street, Cambridge CB2 3EJ, telephone 01223 336647, fax 01223 336676 or email MB135@UK.AC.CAM.PHX.
Please quote ref NS1.

Formal applications will need to be submitted by 10 February 1995.
Southampton Oceanography Centre

The new SOC opens next summer as part of the University of Southampton incorporating the Institute of Oceanographic Sciences (IOS). These vacancies will be based at SOC but will initially work at Wormley, Surrey.

**Software Engineer: Autosub Project** Ref: GD9
£16,191 - £25,735, 3 years initially.
An opportunity for an experienced person to join a small team developing an Autonomous Underwater Vehicle, to help design and implement programs for the Mission Management System and for the sensor and actuator network nodes. This important role will involve developing validation procedures for programs.

2 years’ experience of C programming is essential whilst experience in software testing is desirable.

**Mechanical Engineering Draughtsman** Ref: GD10
£16,191 - £20,953, 3 years initially.
If you are an experienced mechanical engineering draughtsman interested in developing innovative instruments/vehicles for studying the ocean this is your opportunity. It offers a unique chance to follow a design through to implementation, including possibility of sea-time. You will need to have experience in mechanical design, concept studies and engineering analysis including basic hydrodynamics, ideally in a marine environment.

**Chemist for ICP-AES Analysis of Sediments** Ref: R37
£16,191 - £25,735, 3 years initially.
A Chemist, preferably with ICP-AES experience, is needed to join an inter-disciplinary team to carry out analysis of sediments. There is a requirement to go on scientific cruises lasting about 4 weeks. The post will also be at laboratory manager level and will involve scheduling and supervising analysis work.

**Marketing Specialist** Ref: ISSG8
£16,191 - £20,953, 3 years initially.
We offer the opportunity for you to market Marine Sciences & Technology on behalf of IOS prior to our move to Southampton and later as part of SOC. Business training and previous experience of commercial marketing are essential.

All posts have the possibility of extensions. Further details and application forms are available from Mrs Stacey, Institute of Oceanographic Sciences, Brook Road, Wormley, Surrey GU8 5UB. Telephone: (0428) 684141 ext 273 quoting appropriate reference number. Fax (application requests only): (0428) 683066.

Please quote appropriate reference number on envelope. Closing date for all the above vacancies: 26 January 1995.

University of Southampton
University of Southampton
Highfield Southampton SO17 1BJ
Southampton Oceanography Centre
Scientific Manager

Salary £19,326 - £25,735 p.a. with a discretionary range top £28,756 p.a. (Academic-related research staff grade II)

The Biomedical Services Unit (BMSU) at the Oxford Radcliffe Hospital will provide a service for the Clinical School of the University. It has recently been refurbished and extended to provide a transgenic and specific pathogen-free facility in addition to the usual BMSU facilities. The holder of this new and challenging post will be responsible for the overall running of the Unit, including planning, administration and leading a team of seven staff. The scientific manager must have good management skills, extensive experience in most aspects of the work of a biomedical services unit, particularly with respect to breeding and transgenic technology. A Ph.D. or a similar background in genetics is highly desirable, although applicants with other relevant experience and skills (BMSU management, transgenic and SPF work) will also be considered. The post is funded by a grant from the Wellcome Trust for five years in the first instance. Previous applicants need not re-apply.

Further details are available from Mr T.G. Denton, Secretary of the BMSU, Nuffield Department of Surgery, Oxford Radcliffe Hospital, The John Radcliffe, Oxford OX3 9DU, tel: (0865) 221315, to whom written applications (seven copies, or one from overseas applicants) with the names and addresses of three referees, should be sent by 31 January 1995. Informal enquiries may be made to Professor P.J. Morris (Chairman of the BMSU Management Committee) on (0865) 221297, at the same address.

The University is an Equal Opportunity Employer

UNIVERSITY OF THE WEST INDIES
Cave Hill Campus, Barbados
Applications are invited for the following posts:
Faculty of Natural Sciences

SENIOR LECTURER/LECTURER IN PHYSICAL ORGANIC CHEMISTRY

Applicants should be competent to teach physical chemistry (quantum mechanics, thermodynamics, kinetics, electrochemistry, solution phenomena, etc.) and some aspects of organic chemistry.

LECTURER/ASSISTANT LECTURER IN PHYSICAL CHEMISTRY

Applicants should be competent in all aspects of physical chemistry. The appointee will be expected to conduct research in areas of their choice.

Applicants for these posts are expected to assume duties by August 1, 1995 or as soon as possible thereafter.

Salary Scales per annum: (Non-medical) Assistant Lecturer: BDS$37,476 x 1824 - 41,124; Lecturer: BDS$45,372 x 1956 - 57,108 (Bar) x 1956 - 68,844; Senior Lecturer BDS$60,216 x 1956 - 71,952 x 2112 - 78,288 (Bar) x 2112 - 82,512. Up to five full economy class passages plus baggage allowance of US$1800 on appointment and normal termination. Special allowance up to US$600 for shipment of academic books and teaching/research equipment on appointment. Unfurnished accommodation at 10% of basic salary or optional housing allowance of 20% of basic salary to staff making own housing arrangements. UWI contribution of equivalent of 10% of basic salary to Superannuation Scheme. Annual Study and Travel Grant for self, spouse and up to three children. Book Grant up to BDS$935 per annum. Detailed applications (three copies) giving full particulars of qualifications and experience, date of birth, marital status and the names and addresses of three referees should be sent as soon as possible to the Campus Registrar, University of the West Indies, PO Box 64, Bridgetown, Barbados. The University will send further particulars for this post to all applicants. These particulars may also be obtained from the Appointments Department, Association of Commonwealth Universities, 36 Gordon Square, London WC1H 0PF, UK (tel. (0171) 387 8572 Ext. 206; fax (0171) 383 0368; email appts.acu@ucl.ac.uk).

[1959-077 (1995) : 64]
UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Department of Physics

**Physics Area Safety Officer**
Salary: £13,941 to £20,953 with discretionary range to £23,498

The University is enhancing its current system of part-time Departmental Safety Officers by the appointment of full-time Area Safety Officers. This post, solely for the Department of Physics, is the first of several similar new appointments. The successful applicant will be responsible to the Chairman of Physics through the Departmental Safety Officer (Deputy Administrator). The main duties will be to advise on health and safety matters and to monitor and assist in the implementation of the Department's safety policies which, in turn, reflect the policies of the University.

Applicants should hold a good first degree in a Physical Sciences subject. A higher degree and/or membership of the Institute of Occupational Health and Safety would be advantageous. Previous experience of research and an awareness of and interest in safety in a high technology environment is essential. Good communication skills will be necessary and computer literacy desirable.

Letters of application supported by a full cv and the names and addresses of two referees should be forwarded to Mr E E Davies, Administrator, Department of Physics, University of Oxford, Clarendon Laboratory, Parks Road, Oxford, OX1 3PU to arrive no later than 17 February 1995.

The University is an Equal Opportunity Employer

THE UNIVERSITY OF NOTTINGHAM
Department of Materials Engineering & Materials Design

RESEARCH ASSISTANT - MATERIALS SYNTHESIS

A two year position is available immediately in the Department of Materials Engineering and Materials Design, funded by the EPSRC ROPA initiative to look into the self propagating high temperature synthesis of metal matrix composites.

Experience in thermodynamics, high temperature materials processing, electron microscopy and surface chemistry is required. Research will focus on the basic understanding of the mechanisms and products that are obtainable from this series of reactions and will be undertaken in collaboration with industrial partners.

Applications, including a full curriculum vitae and the names of two referees, should be sent to Professor J. V. Wood, Department of Materials Engineering and Materials Design, The University of Nottingham, University Park, Nottingham NG7 2RD.

Informal enquiries should be addressed to Professor J. V. Wood, tel: 0115 9513738, fax: 0115 9513741. [1959-079 (1995) : 64]
RESEARCH ASSOCIATE IN GEOCHEMISTRY/ MINERALOGY

Applications are invited for the above postdoctoral position, tenable for 18 months in the first instance to start no later than 1 April 1995. The appointee will join a small team undertaking a programme of high temperature & pressure experimental research related to an environmental problem. A working knowledge of physical geochemistry / phase equilibria is essential and a background in Feldspar mineralogy, X-ray diffraction, Scanning electron microscopy, Experimental petrology, Granitic systems or Crystal growth would be an advantage. The appointee may also be required to undertake a small amount of teaching within the Department's undergraduate degree courses. Salary within £13,941-£15,566 pa.

Informal enquiries to Dr F. G. F. Gibb (tel 0114 282 4477, fax 0114 282 4207). Applications including a CV and the names / addresses of three referees (two copies of all documents) should be sent by 31 January 1995 to the Director of Human Resource Management, The University of Sheffield, Western Bank, Sheffield S10 2TN. Ref: R505.
[1959-080 (1995) : 64]
UNIVERSITY OF BRISTOL
School of Biological Sciences and Long Ashton Research Station

Postdoctoral Research Assistant

A postdoctoral position funded by a BBSRC-linked Research Grant is available to study cloned DNA-binding proteins implicated in hormonal regulation of gene expression in the aleurone of wild oat. Experience in cell and molecular biology is preferred. The salary for this three-year position is on the RA1A scale (£13,941 to £20,953 per annum). The appointee will be assisted by a fulltime technician also funded by the grant.

Informal enquiries to Dr Colin Lazarus on 0272 288268 or Dr Alison Huttly on 0275 392181.

For further details telephone 0272 256450 (answerphone after 5pm), or minicom 0272 288894, or write to the Personnel Office (EO), University of Bristol, Senate House, Bristol BS8 1TH. Applications, in the form of a CV, including the names and addresses of two or more referees. Please quote reference D45R.

Closing date for applications: 2 February 1995.

An Equal Opportunities Employer
"An International Centre for Education and Research"
[1959-081 (1995) : 64]
The Geochem Group is seeking applications from qualified specialists with six years min. experience to head and organise the day-to-day running of our Thin Section Unit, providing conventional and polished rock thin sections, with necessary impregnation and staining for our geological, environmental and analytical staff. Based at our head office in Chester, the successful applicant will receive a competitive remuneration package based on experience and qualifications, including relocation allowance.

Contact the Office & Personnel Manager on (0244) 671121 for an application form, for completion and return by 13th January 1995.
SCIENTIFIC PROGRAMMERS

An established software consultancy is seeking a number of Scientists to develop technical applications for highly prestigious customers. Successful candidates will be deployed in small teams on projects such as advanced graphics systems, mathematical modelling or data analysis.

Applicants should have a good honours degree in a numerate subject. Programming experience in C or Fortran or Visual Basic is essential. Salaries range from £13 - 20k. Excellent training will be provided. (Ref NSJAN95).

FOOD MICROBIOLOGY

Senior Research Officer

Aplin & Barrett Ltd, the UK division of Applied Microbiology Inc, produce antimicrobial food preservatives for use in the food and dairy industries.

A Senior Research Officer is now required to join our Technical and Research Department in Beaminster, Dorset.

Reporting to the Technical Services and Research Manager, the Senior Research Officer will carry out and supervise planned research and development projects.

Applicants should be qualified to Ph.D. level in food microbiology, and have had three to four years' experience as a food microbiologist.

Please apply in writing, enclosing full CV, to Mrs E. Cromwell, Aplin & Barrett Ltd, Clarks Mill, Stallard Street, Trowbridge, Wilts BA14 8HH.

NPL
National Physical Laboratory

MATERIALS METROLOGY RESEARCHERS

The Division of Materials Metrology at NPL is working closely with industry to improve and develop traceable measurement methods for properties across a wide range of advanced materials and processes. This involves research on the relationship between structure, properties, processing and performance.

Two vacancies exist in the following areas.
1 THERMOPHYSICAL PROPERTIES: a materials scientist/physicist is required to join a research team involved in the development of measurement methods for thermophysical properties, primarily at high temperatures. The job will involve the development of apparatus for thermal conductivity and electrical resistivity measurements of liquid and solid metals.

2 ADHESIVES: a materials scientist/physicist is required to develop and use methods for measuring industrially significant properties of materials, in particular of adhesives and also to develop testing and modelling methodologies for thermoplastics and polymer composites.

You will need a good honours degree in physics or materials science, plus relevant experience.

The salary range is £13,651 to £19,669. Both posts are initially for a period of 2 years, with the possibility of extension or permanent appointment.

We have excellent working conditions, enhanced by a flexible working hours scheme, a high quality creche and a sports and social club.

For further details and an application form (to be returned by 20 January 1995) write to Miss Kerry Tottman, Personnel Section, National Physical Laboratory, Queens Road, Teddington, Middlesex TW11 0LW or telephone 0181-943 6068. Please quote NPL/DMM/4 and state which post you wish to apply for.

SILSOE RESEARCH INSTITUTE

RESEARCH SCIENTISTS

Silsoe Research Institute is supported by the Biotechnology & Biological Sciences Research Council. It is the national centre for research in engineering and the physical sciences applied to agriculture and other biologically-based industries.

MATHEMATICIAN
(3 Year Appointment)

The postholder will conduct research into mathematical models and decision analysis techniques to underpin improvement in decision making under the complex interactions occurring in agricultural systems. Goals will include prediction of the effect of externally imposed changes and development of decision support systems to advise farmers.

A typical candidate will have a First or Upper Second Class Honours degree in mathematics plus at least 1 years experience or MSc, for example in Operational Research.

This is a 3 year appointment as a Fixed Graded Band 7 Research Scientist. The salary on appointment is £11,361 per annum to £15,712 per annum, with further progression available via Performance Related Pay up to the maximum of Band 7, £20,063 per annum. Ref 12/64.

PROCESS ENGINEER
(3 Year Appointment)

An engineer or physicist is required to develop mathematical models of the movements of gases during the storage of foodstuffs in modified atmospheres. CFD approaches will be used to model the interactions between porous bulks and external environments. The applicant will join an expanding research team engaged in the development and application of CFD models. Experience in the use and programming of computers is essential.

Ideal candidates should have a First or Upper Second Class Honours degree in Mechanical or Chemical Engineering or Physics, plus at least 3 years relevant post graduate experience or Ph.D.

This 3 year appointment is as a Fixed Graded Band 6 Research Scientist. The salary on appointment is £13,286 per annum to £18,378 per annum, with further progression available via Performance Related Pay up to the maximum of Band 6, £23,470 per annum. Ref 12/68.

There is a subsidised workplace nursery on site.

For further particulars and an application form please contact: The Personnel Office, Silsoe Research Institute, Wrest Park, Silsoe, Beds, MK45 4HS, Tel: 0525 860000, quoting the relevant reference number. The closing date for receipt of applications is 20 January 1995.

SMOKING IS ACTIVELY DISCOURAGED
Imperial Cancer Research Fund
University Lecturership in Engineering Applications of High Performance Materials

Applications are invited for the above post, tenable from 1 October 1995. Stipend according to age on the scale £14,756 to £27,473 per annum. Candidates should be able to teach widely within a broad 4-year Engineering Science syllabus (in particular on relevant aspects of production engineering) and have a specialised research interest in one or more of composites engineering, polymer engineering, fracture mechanics, or orthopaedic engineering. The successful candidate may be offered a tutorial fellowship by Hertford College for which additional emoluments would be available.

Further particulars of the lecturership and the associated college fellowship may be obtained from Professor D W Clarke F.Eng, Department of Engineering Science, Parks Road, Oxford OX1 3PJ (Fax 01885 283310): details are also available on the World Wide Web at http://www.eng.ox.ac.uk/jobs/hpmats.html. Applications should be sent to Professor Clarke, together with the names and addresses of three referees, to arrive no later than Wednesday, 8 February 1995.

The University is an Equal Opportunity Employer.

UNIVERSITY OF GLASGOW
Department of Electronics and Electrical Engineering

POSTDOCTORAL RESEARCH ASSISTANT IN SURFACE PLASMON RESONANCE BIOSENSORS

Under BBRSC funding a new research post is available to join an interdisciplinary research group on the applications of Surface Plasmon Resonance to immunosensing. Expertise in SPR is essential, preferably with some experience in biosensors or the biosciences. You will be required to interact with industry during the project.

Applicants will be expected to have completed a Ph.D., although those with a suitable industrial background will also be considered. The post will be for two years with salary on the RA1A scale £13,941 - £20,953. Applications (two copies), including CV and the names and addresses of three referees should be sent to Professor P. Laybourn, Department of Electronics and Electrical Engineering, University of Glasgow, Glasgow G12 8LT by 27 January 1995. For further information please contact either Dr J. Cooper (tel: 041 -339 8855, ext 4931) or Dr H. Morgan (ext 5237). Ref: NS/8574.

An Equal Opportunities Employer.

The University of Glasgow is an exempt charity dedicated to excellence in teaching and research.
COURSES & EVENTS

LANCASTER UNIVERSITY
SHORT COURSES OFFICER

A temporary vacancy exists in the Institute of Environmental & Biological Sciences (Division of Biological Sciences), Continuing Vocational Education for a short course development officer to work with Dr Sarah Andrew in the academic and practical development, marketing and administration of short courses in Molecular Biology.

Applicants should have a degree in Biochemistry or related subject, and preferably have experience of molecular biology techniques. However good interpersonal skills and initiative are of prime importance as necessary techniques will be taught. Initially, the appointment will be for three days per week for a period of six months from 1 February 1995 or as soon as possible thereafter. The successful candidate will have the opportunity to expand the position by increasing demand for short courses.

Salary on the Other Related Grade I Scale: £13,941 to £15,566 pa.

For further details contact Personnel Services, quoting reference L308, University House, Lancaster University, Bailrigg, Lancaster LA1 4YW. Telephone: 0524 846549, 24 hour answering service. Applications (five copies) should be returned to Personnel Services by 27 January 1995.

The University positively welcomes applications from women, people from ethnic minorities and disabled people who are currently under-represented in this area.

STATISTICS COURSES FOR NON-STATISTICIANS

Scientists and Technologists Week
A Review of Basic Statistics 3 - 4 April
Regression Analysis: An Introduction 5 April
The Statistics of Statistical Process Control 5 April
Sampling for Scientists 6 - 7 April

Introduction to Analysis of Variance 10 - 12 May
Investigating Relationships in Data 5 - 9 June

Social Scientists Week
A Review of Basic Statistics 12 - 13 June
Survey Data Management & Analysis 14 - 16 June

Dept of Dartington Hall Trust, a registered Charity
The above posts are available immediately for a fixed period of 2 years, in a joint programme with Bridon International to work on a continuous process for the controlled, economic manufacture of polymer cores for high performance wire ropes to be operated at the company. The Associates will work with IRC researchers at Leeds and Bradford Universities.

Post 1 - to work mainly with polymer solid phase deformation aspects (Ref: TCI-/NS)
Post 2 - to work mainly with controlled polymer melt processing aspects of the total process (Ref: TCB/NS)

Applicants should have a good degree in Physics or an Engineering discipline.

Salary will be in the range of £13,000 -£16,000 pa. Superannuable.

Further details and application forms (quoting ref.) available from the Director of Personnel, University of Bradford, Bradford, West Yorkshire BD7 1DE Tel: 0274 353091. Closing date: 20 January 1995.
Applications are invited for a Chair in Physical Chemistry available from 1 October 1995.

The Department, graded 4 in the last UFC research selectivity exercise, has particular research strengths in the areas of protein crystallography, molecular graphics and modelling, time-resolved spectroscopy and transient intermediates, biomolecular spectroscopy, supported reagents, reaction mechanisms and synthetic organic chemistry, as well as aspects of analytical, surface, and materials chemistry. It has an extremely successful record in attracting external funding (over £2 million per annum) and well developed industrial collaboration; there are very strong links with the Departments of Biology, Electronics and Physics at York.

The Department seeks to build on its existing strengths in physical chemistry and the appointment is open to all areas within this field. Applicants should have an established international research reputation. They should include in their application outline proposals for furthering their research and, where relevant, for establishing links with existing groups. The new Professor will be expected to show special leadership and commitment to teaching physical chemistry, via lectures, tutorials and workshops, in core chemistry and advanced modules.

Salary will be on the Professorial scale (minimum £31,158 per annum).

Informal enquiries may be directed to the Head of Department, Professor B C Gilbert (tel: 01904 432500).

For further particulars and details of how to apply, please contact the Personnel Office, University of York, Heslington, YORK YO1 5DD (tel: 01904 434032), quoting reference number 6/1049. The closing date for applications is 24 March 1995.

THE UNIVERSITY of York
Applications are invited for a Chair of Inorganic Chemistry in the Department of Chemistry which is available from 1 October 1995. Applicants with a proven record of research achievement in any branch of inorganic chemistry will be considered.

It is recognised that substantial resources, both financial and human, may be required by the appointee.

Salary will be on the agreed Professorial range: minimum £31,158 p.a.

Information from Personnel, University of Exeter, Exeter EX4 4OJ; (0392) 263100 or e.mail Personnel@exeter.ac.uk, quoting reference no.3958. Closing date: 1 March 1995.
We are an established In-Vitro Diagnostics company located in the North West and are forming a separate division to produce a new range of test kits. We therefore seek to recruit the following experienced personnel:
QUALITY SYSTEMS/REGULATORY AFFAIRS MANAGER
QUALITY CONTROL MANAGER
PRODUCTION MANAGER
ENGINEERING/FACILITY MANAGER

Remuneration will naturally be tailored to the skills and experience of the applicant but for each of these key positions a complete benefits package, including relocation expenses where appropriate, will be provided. If you are interested in working in an innovative, expanding and challenging Medical Diagnostics company send a CV to:
Box No 735, New Scientist, Recruitment Advertising 1st Floor Low Rise, King’s Reach Tower, Stamford Street, London SE1 9LS.
UNIVERSITY OF CAMBRIDGE
Department of Materials Science and Metallurgy

Postdoctoral Research Associate

Applications are invited for a post doctoral position with Prof. Sir John Meurig Thomas and Dr. CJD Hetherington to investigate the microstructure and composition of novel zeolitic materials. Candidates should have worked in Materials Science, Solid State Chemistry or Geochemistry and experience in transmission electron microscopy is essential.

The post is available immediately for a period of up to two years. The salary will be on the University Research Associate Scale from £13,941 to £19,326 according to age.

Informal enquiries can be made by contacting Dr. CJD Hetherington (telephone: 01223 334469, Fax: 01223 334567 or e-mail: cjdh100@phx.cam.ac.uk)

Applications (with a CV and the names of two referees) should be sent to Dr. CJD Hetherington, Dept of Materials Science and Metallurgy, University of Cambridge, Pembroke Street, Cambridge CB2 3QZ. Closing date for applications is 28 February 1995.

The University is an Equal Opportunities Employer.

IMPERIAL COLLEGE
University of London

POSTDOCTORAL ELECTROCHEMIST/ ENGINEER

A PDRA post and project on bubbles in electrochemical reactors is available for 3 years from 1.4.95.

Applicants should send a CV with details of 2/3 referees, by 24th February, to:
G. H. Kelsall, Department of Earth Resources Engineering, Imperial College, London SW7 2BP. Tel: 0171-594 7325. Fax: 0171-594 7444, e-mail g.kelsall@c.ac.uk
KENYA

Library and Information Services Specialist

ODA is providing significant support to Kenya’s National Agricultural Research Project, which aims to produce technologies appropriate to the needs of rural people on low incomes. Based at the Kenya Agricultural Research Institute (KARI), Nairobi, you and your team will play a key role in helping to strengthen the capacity of KARI scientists and policy makers for research planning and the implementation of proposals, by increasing the effectiveness of their organisation’s library and information services. Reporting to the Project Manager and acting as ODA Field Manager, you will manage both ODA personnel and project-funded consultants whilst providing technical liaison between the project and any link institute/co-ordinator in the UK. Close liaison with the ODA/KARI Coordinator on administrative, general management and financial issues will be a major feature of the role. Coordination of other donor support for relevant services; involvement in the establishment of KARI’s role as the national information focal point; the development of information services in electronic format, and the provision of in-service training for library staff will all fall within your sphere of responsibility.

QUALIFICATIONS
The role demands either a Chartered Librarian or full membership of the Institute of Information Scientists. Preferably with a Science degree to Masters level, you must be experienced in managing networks of libraries and in working with biological or agricultural literature. Some overseas experience, whilst not essentially in Kenya, is very strongly preferred. Applicants should either be nationals of a Member State of the European Union, nationals of a European Economic Area Member State (i.e. Austria, Finland, Iceland, Norway or Sweden) or Commonwealth citizens who have an established right of abode and right to work in the United Kingdom.

TERMS OF APPOINTMENT
You will be on contract to the British Government for 2 years, in service to the Government of Kenya. Salary will be c. £27,800 p.a. (UK taxable). Additional benefits will normally include variable tax-free overseas allowances, children’s education allowances, free accommodation and passages. Closing date for receipt of completed applications is 3 March 1995. For further details and application form, please write to Appointments Officer, Ref No AH303/FC/NS, Abercrombie House, Eaglesham Road, East Kilbride, Glasgow G75 8EA, or telephone 0355 843597 (24hr answerphone). ODA is committed to a policy of equal opportunities and applications for this pose are sought from both men and women.
An uncompromising commitment to quality and standards of excellence throughout our entire organisation has provided the foundation on which we continue to grow and develop our business. The manufacturing company for the Estée Lauder Group of Companies, our impressive portfolio of branded products includes Aramis, Clinique and Estée Lauder.

QUALITY ASSURANCE CHEMIST
Petersfield

Quality Assurance is a major aspect of our business and this key role will carry responsibility for ensuring that raw materials received and products manufactured on site meet our stringent quality standards. You will make certain that tests are accurately performed and records maintained accordingly. Liaising with colleagues throughout the organisation, you must be committed to providing a first class support service.

Degree qualified, your minimum 3 years industrial experience, gained from within the fine chemical, pharmaceutical or related industries, will have given you an in-depth knowledge of testing procedures and principles. Experience of manufacturing processes will be essential. Analytical, methodical and with a keen eye for detail, you will have first class interpersonal skills combined with the ability to write clear, concise reports.

In return, we can offer a competitive salary and a comprehensive range of benefits including bonus scheme, free life assurance, subsidised canteen and generous discounts on our products.

Move your career forward and in the first instance please send your letter of application, including current salary details and full CV to: Sandra Campbell, Personnel Officer, Whitman Laboratories Limited, Bedford Road, Petersfield, Hants GIJ32 3DD.
Closing date: 17th February 1995.

WHITMAN LABORATORIES
A Member of the worldwide
ESTÉE LAUDER GROUP
**Electronic Dossier Manager**
Competitive Salary Harlow

Smithkline Beecham is a large multinational healthcare company. As a forerunner in pioneering research its activities include the approval, manufacture and marketing of an extensive range of life-saving pharmaceutical products.

Working for the IT Manager, Transnational Regulatory Affairs and Compliance, your role will be to manage and support the provision of electronic regulatory submissions, develop the future strategy of electronic based dossiers, and negotiate recommendations to both internal and external customers. There will be some overseas travel.

With 5 years’ relevant experience, preferably in a regulatory role, you will have an understanding and appreciation of Information Technology backed up by strong project management, planning and organisation skills. Both innovative and self reliant, at ease negotiating and communicating, you will be eager to develop both yourself and your role in a forward looking environment.

For the right person a comprehensive range of competitive benefits is available - as appropriate for a challenging role in a blue chip company.

If interested, please submit CV, including details of current package, to David Jones, Human Resources, Smithkline Beecham, NFSP (S), Third Avenue, Harlow, Essex CM19 5AG. Closing date: 24th February 1995.

Our commitment to research is quite simply breathtaking.

At Bayer, our Research and Development is a cornerstone of our business. Our commitment to research into new and effective medicines, in particular in the field of respiratory diseases such as Asthma, Chronic Bronchitis and Cystic Fibrosis is recognised world-wide and is second to none.

Now building on identification of new therapeutic opportunities we are able to dedicate further resources to our R&D programme, helping us to extend the understanding of respiratory disease and molecular medicine to new frontiers.

Frontiers which we are inviting you to help us explore, developing both your career and your professional expertise in the process, while taking advantage of our culture which encourages personal responsibility and the acceptance of greater challenges.

**Electrophysiologist - Stoke Poges**

Working as a Principal Research Scientist within our pre-clinical Research Department you'll have a challenging role which will require skills of leadership and responsibility and the ability to interact effectively and successfully with colleagues and research professionals world-wide to achieve our goals.

A Ph.D. with at least 10 years’ research experience and a productive track record in Electrophysiology, you will relish the challenge to establish and run a new electrophysiology laboratory and also have the intellectual capacity to become a dedicated expert in the field of respiratory disease.

Equally important is your ability to motivate others and lead by example, demonstrating commitment, enthusiasm and sound judgement.

**In Vivo Pharmacologist - Stoke Poges**

In this challenging and demanding role, you’ll be working as a Senior Research Scientist, leading a small team and applying the latest technology to develop disease models and identify new medicines.

A Ph.D. with at least 5 years’ original research experience including at least 3 years’ spent in *in vivo* Pharmacology, preferably in respiratory or inflammation research, you will have the ambition and commitment to innovate in new areas.

Apart from a truly rewarding professional career, both positions offer a competitive salary together with a wide range of benefits which include flexible working hours, a generous relocation package and private healthcare.

The Centre is based at Stoke Poges, Bucks - a rural setting close to London.

For more information and to apply, please write for an application form to Edwina Cooper, Human Resources Dept - Healthcare, Bayer plc. Bayer House, Strawberry Hill, Newbury. Berks RG13 1JA. Tel: Newbury (0635) 563236 (answerphone outside office hours (0635) 563639).

Closing date 1st March 1995.

Bayer
BAYER
Improving the quality of Life

INVESTOR IN PEOPLE
EARTH SCIENTISTS

The British Geological Survey is seeking a limited number of outstanding graduates in earth sciences to participate in its programmes, which include geological mapping (both onshore and offshore), petroleum geology geophysics, mineral deposit studies, geochemistry remote sensing, engineering geology/geotechnics, hydrogeology and geoscience databasing.

If you have, or expect to have, a good honours degree, an MSc or a Ph.D. in earth sciences or a related field and you are computer literate, adaptable and eager to learn new skills, the British Geological Survey would like to hear from you.

Appointments will be for five years in the first instance and will be based in Nottingham, Edinburgh or Exeter. You may be required to work overseas after initial training.

We offer a salary in the range of £11,138 to £18,185; new graduates without experience would start at £11,138. There are various benefits including excellent training and the opportunity to participate in first-class research and development. There is also a generous leave allowance and a non-contributory pension scheme.

For further details and an application form, write to Establishments (Recruitment), British Geological Survey, Keyworth, Nottingham NG12 5GG.

The closing date for receipt of completed applications is 24 February 1995.

Please quote reference NB/168/95.

The British Geological Survey has an equal opportunities policy and welcomes applications from all sections of the community. The Nottingham site has a no smoking policy in all of its buildings.

Lecturer

This post is available from 1 April 1995 to join a rapidly developing and expanding department with interests in (i) ion channels and (ii) the kidney. Applicants should have proven research ability at postdoctoral level and experience in pharmacology, biochemistry or related sciences. Experience in molecular biology/modelling or electrophysiology would be an advantage.

Salary will be on the scale for Lecturer Grade A (£14,756 - £19,326) or Grade B (20,133 - £25,735) according to qualifications and relevant experience. There will be a generous start-up allowance for new equipment.

Informal enquiries about the post may be made to Professor D Wray, tel: 01132334310.

Application forms and further particulars may be obtained from the Personnel Office (Academic Section), The University of Leeds, Leeds LS2 9JT, Tel: 0113 2335771, e-mail e.f.moran@registry.leeds.ac.uk quoting the reference number 103/21.

Closing date for applications: 2 March 1995.

MLSO-2

This is a new post which has been established to perform the laboratory aspects of a large screening study utilising tumour marker assays. The project is a randomised controlled study of screening which will involve 120,000 women nationwide under the direction of the Ovarian Cancer Screening Unit in The Royal Hospitals Trust. The successful candidate will be expected to organise the administrative and technical work involved in the laboratory aspects of the project. The project will be fully integrated within the laboratory under supervision of the senior scientific staff and, once the assays and infrastructure required for the project have been established satisfactorily, the post holder will be able to rotate throughout all the service assays. The department will encourage appropriate further professional development. This post is only for one year in the first instance, but the project is scheduled for seven years. Applicants must be State Registered with the FIBMS or equivalent and relevant experience.

For informal enquiries please contact Mr M. Self, MLSO 4, on 0171 601 7438.

Application form and job description for this post available from the Personnel Department, 2nd Floor, Queen Mary’s Wing, St Bartholomew’s Hospital, West Smithfield, London EC1A 7BE or telephone 0171 601 8954 (24 hour answerphone). Please quote reference number CL/JW/193.

Closing date: 17 February 1995.

Committed to Equal Opportunities.
RESEARCH ASSISTANT

A research assistant is required for a project studying the role of T cells in human ocular inflammation disease. The project will involve cellular assays, flow cytometry and molecular techniques including PCR. Experience in tissue culture would be preferred but is not essential as training can be provided on site. The post is for two years in the first instance.

Starting salary £16,075 pa (including LA).

Informal enquiries to Dr V. Calder Tel. 0171 60 6858. For further information and an application form please contact the Personnel Officer at the above address, quoting reference 42773. Closing date for receipt of completed application forms: 3 March 1995.

The Institute operates a no-smoking policy.

Our client is a well established pharmaceutical and scientific marketing company with many prestigious international clients. The business is profitable and growing and now requires an additional senior medical writer for its in-house editorial team.

**Medical Writer**  
NORTH WEST • PACKAGE CIRCA £25,000

This is a role which gives scope for creativity plus the opportunity of working directly with clients and opinion leaders on publications, marketing and educational materials. It requires absolute accuracy and attention to detail, working to strict deadlines. You will need to acquire and maintain a significant and up to date knowledge of the various therapeutic areas in which you will work. Candidates should be graduates in a biological science or pharmacology, preferably with a couple of years experience within a medical/ healthcare publications field, either commercial or academic.

Interested applicants should send a detailed CV or ring for an application form on 01625 533364 (24 hours) quoting reference 2323/NS

WICKLAND WESTCOTT  
HUMAN RESOURCE CONSULTANTS  
Emerson Court, Alderley Road.  
Wilmslow Cheshire SK9 1NX  
Telephone (01625) 532446  
This Readership is offered from 1 September 1995 to candidates with a proven research record in any branch of organic chemistry; an interest in medicinal and/or bio-organic chemistry would be particularly welcome.

The Department currently has 23 academic staff and over 70 research staff and students together with a total undergraduate population of over 250. Five honours degree courses in various aspects of Chemistry are taught and the successful applicant would be closely associated with the course in Chemistry with Medicinal Chemistry. Good facilities to support research are available and the Department is particularly well-equipped in nmr spectrometry, mass spectrometry, X-ray crystallography and HPLC techniques.

Salary on the Readership Scale: £27,018 – 33,007 pa.

Informal enquiries can be made to Professor K. R. Jennings. Tel: 01203 523232. E-mail: MSRHY@SNOW.CSV.WARWICK.AC.UK

Further particulars are available from the Personnel Office, University of Warwick, Coventry CV4 7AL (telephone 01203 523627) quoting Ref 26/3A194 (please mark clearly on envelope).

Closing date for applications: 10 March 1995.
An Equal Opportunities Employer.
Opportunities in recombinant product development

Celltech Group plc is one of the largest emerging pharmaceutical companies in Europe. Celltech Biologics - the world’s leading manufacturer of monoclonal antibodies and therapeutic-grade recombinant proteins for the biotechnology and pharmaceutical industries - continues to expand, with new plant in the US complementing our UK production capability.

We are now looking for two scientists to join our Purification Development and Assay Department, which supports our contract manufacturing operations.

**Molecular Biologist**

You will be involved in the development and evaluation of novel mammalian expression systems - including the glutamine synthetase expression system - which will be used for the production of recombinant proteins. In addition, you will contribute to the development of analytical methods required for the characterisation of cell line genetic stability.

Qualified to BSc/Ph.D., you should have 2-3 years’ experience in molecular biology (including PCR, Southern blotting and cloning techniques) and, preferably, mammalian cell culture. You should also be highly motivated, combining a versatile approach with good communication skills. Ref: 830.

**Purification Scientist**

Primarily lab-based, you will develop, scale-up and validate purification processes for therapeutic products, and transfer them to full-scale production.

You should have a strong background in protein chemistry together with several years’ experience of protein purification and analysis, preferably gained in the pharmaceutical industry. You must also demonstrate a meticulous approach to laboratory work and an ability to operate within demanding project deadlines. Ref: 832.

Salaries and benefits for both positions are highly competitive. To apply, please write - enclosing your detailed cv, and quoting the appropriate reference number - to the Recruitment Officer, Celltech Group plc, 216 Bath Road, Slough, Berkshire SL1 4EN.

CELLTECH OPERATES A RESTRICTED SMOKING ENVIRONMENT

CELLTECH
Biologics
2 POSTS – A RESEARCH PROJECT MANAGER and AN ADVISORY TOXICOLOGIST

The Medical Research Council’s Institute for Environment and Health requires two full time staff to join the core team.

The Institute’s primary role is to provide a central co-ordinating function for UK Government Departments on research and information relating to links between environmental quality and health. The Institute is instrumental in identifying and investigating new issues in this field and publishes authoritative documents on topics of major interest.

A Research Project Manager is required to take responsibility for the management of research and consultancy projects undertaken at the Institute on behalf of Government Departments and other clients.

The post holder will also be required to prepare contract tender documents and progress reports; and to assist with researching new issues for the Institute. The successful applicant will have a good understanding of current issues in environmental toxicology, including effects of chemicals on human health and well-being and on the natural environment.

Applicants should have a first or second class degree in the biological sciences, and preferably a postgraduate qualification in toxicology. Sound management skills and several years experience in project/contract management are required.

This position attracts a starting salary of £19,215 pa, plus a superannuation scheme applies.

An Advisory Toxicologist is required to join the Institute’s Toxicology Advisory Group. The post holder will undertake toxicological assessment work, including the production of critical literature reviews and other reports. Applicants should be specialists in mammalian toxicology with a good understanding of ecotoxicology and a broad appreciation of current issues relating to environmental quality and health.

Applicants should have a first or second class degree in biomedical sciences, and preferably a postgraduate qualification in toxicology. Experience in toxicological assessment work is essential.

This position carries a starting salary in the range of £13,025 - £15,220 pa, according to age and experience, plus a superannuation scheme applies.

Both these positions are for a three year period in the first instance and will cover 37 hours per week.

The ability to work on a wide range of tasks and to deliver outputs to a strict schedule are necessary attributes for both posts.

For an application form for either post, please write to:
The Senior Administrator, MRC Institute for Environment and Health, University of Leicester, PO Box 138, Lancaster Road, Leicester LE1 9HN or telephone 0533 525581.

Closing date for applications is Friday 17th February 1995.
The Institute operates a no-smoking policy.

The MRC is an equal opportunities employer.
Applications are invited from UK/EEC citizens who have graduated with a good honours degree (and those expecting to graduate) in Pharmacy, Biochemistry, Biology, Chemistry, Pharmacology and related sciences, for research studentships tenable from 1 October 1995.

The Welsh School of Pharmacy has a research school of approximately 50 postgraduates, with facilities and research programmes established in Experimental Cancer Chemotherapy, Airways Hyper-reactivity, Neuropharmacology, Medicinal Chemistry, Pharmaceutical Microbiology, Drug Delivery, with emphasis on the respiratory tract and skin, and Clinical Pharmacy. Many of the individual projects are interdisciplinary, while the majority are supported by, or are connected with, similar programmes in the pharmaceutical industry.

Enquiries, by 27 February, stating area of interest, should be made to Professor I. W. Kellaway, Welsh School of Pharmacy, University of Wales College of Cardiff, Cardiff CF1 3XF. Telephone 0222 874159.

Rentokil Ltd

ENGINEERING SERVICES MANAGER
North West

Rentokil Limited, an established and successful company, has an important position to fill in its UK Timber Preserving Division.

The successful applicant will probably be a recently graduated Chemical Engineer seeking a varied role that will encompass both commercial field work with development and maintenance of customer treatment facilities, and responsibility for the engineering development of the division’s manufacturing site in Liverpool. He/she will be responsible for all new project work at this site and ensuring, in conjunction with the maintenance manager, that the site operates effectively within the framework of current and projected legislative requirements.

The role will appeal to someone who is able to demonstrate the ability to lead a team of qualified service engineers, to communicate effectively with customers and enjoys also the challenge of working closely with a small management team.

To apply please write, enclosing full CV to Mr M. V. Roscow, General Manager, Rentokil Limited, Bradman Road, Kirkby Industrial Estate, Kirkby, Liverpool L33 7UR.

PUBLIC HEALTH LABORATORY SERVICE
Communicable Disease Surveillance Centre

SENIOR SCIENTIST
(EPIDEMIOLOGY)
Salary range: £17,605-19,042
One year fixed term contract in the first instance
Grade B11-13

Applications are invited for this new, full-time post primarily concerned with investigating links between tuberculosis and poverty in Liverpool City.

Based at Liverpool Public Health Laboratory you will be part of a team consisting of clinical scientists and medical consultants in epidemiology, tropical medicine, chest medicine and infectious disease. Under the day to day supervision of the principal scientist, you will be expected to play a lead role in researching links between poverty and tuberculosis as well as contributing to other studies within the research team. Regular duties will include questionnaire and database design, case-control matching, data collection, data analysis and report writing.

Although this post is on a clinical scientist grade, applications are welcomed from individuals with a good honours degree in a scientific or social scientific discipline. The successful candidate will possess both an ability to work in a multi-disciplinary team and a good understanding of computer based data analysis.

A job description and application form may be obtained from:
Mrs Maureen H. Cable, Communicable Disease surveillance Centre, 61 Colindale Avenue, London NW9 5EQ. Tel: 0181-200 6868, ext 4440.

Informal enquiries may be made to Dr Mark A. Bellis, Public Health Laboratory, Liverpool, Fazakerley Hospital, Lower Lane, Liverpool L9 7AL Tel: 0151-525 2323, ext 156.

Closing date: February 23 1995.

National Health Service terms and conditions of service apply.

The Public Health Laboratory Service is an Equal Opportunities Employer.
AXESS TO A CAREER...

AXESS is one of the UK’s most dynamic and successful CROs, providing services to many major pharmaceutical companies. We currently have exciting opportunities for the following:

**Statisticians/Programmers**
You will have a good mathematics, statistics or computer science degree, and be keen to apply your knowledge in a medical environment.

**Clinical Data Coordinators**
A physiology/pharmacology/pharmacy graduate or research nurse, you will have an interest in reviewing and coordinating data from clinical trials. Previous experience an advantage.

All candidates must be committed, self motivated, and be able to liaise confidently with clients at all levels. You will also be keen to work with many different companies on challenging studies. In return, we offer top-level salaries, excellent training, and after a qualifying period, contributory pension and private health insurance.

...IN CLINICAL RESEARCH

AXESS
Write enclosing a CV to Personnel, AXESS Ltd, AXESS House, Forest Road, Kew, Richmond, Surrey TW9 3BY quoting reference SDM/02/95.
UNIVERSITY OF SOUTHAMPTON  
Ph.D. STUDENTSHIPS IN BIOLOGY

Applications are invited for three-year research studentships in the following areas, tenable from October 1995 in the Department of Biology, part of the modern, well-equipped, Research School of Biological Sciences:

Biochemistry and molecular biology of defence responses in higher plants.

Physiology and molecular biology of membrane transport in plants, especially of calcium, sugars and growth regulators.

Molecular and cellular mechanisms controlling epithelial differentiation in the mouse preimplantation embryo.

Characterisation of genes controlling the growth of sensory neurons in Drosophila melanogaster.

Species diversity, taxonomy and computer-assisted identification of invertebrates used as indicators of soil biodiversity.

Experimental and modelling studies of grassland plant competition.

Applicants should have or expect to gain a relevant 1st or 2i honours degree and should normally be resident in the UK or EC. Details and application form from Mrs E. Scappaticci, Department of Biology, University of Southampton, Bassett Crescent East, Southampton SO16 7PX. Tel: 01703 594397 or Fax: 01703 594269.

Working for Equal Opportunities.
Applications are invited for a research technician to join an MRC-funded project investigating the molecular and cellular biology of a recently isolated herpesvirus, human herpesvirus 6 (HHV-6). The project will investigate the site and nature of viral persistence and will also focus on molecular events during DNA replication and encapsidation. Previous experience of tissue culture and molecular biological techniques, including PCR would be an advantage, but is not essential. It is anticipated that the project will be of eighteen months duration.

Prospective candidates are invited to contact Dr Brian Thomson on 0223 336860. Applications, quoting reference MKC 17699 and including a full CV and the names and addresses of two academic referees should be sent to Mr John Holden. Laboratory Manager, Department of Medicine, Level 5, Addenbrooke’s Hospital. Hills Road, Cambridge CB2 2QQ. Applications should be received within 2 weeks of the appearance of this advert.

We regret only short listed candidates will be acknowledged.

Cambridge University is an Equal Opportunities Employer and Addenbrooke’s Hospital is a no-smoking area.

Postdoctoral position
(Salary range £13,941 - £20,953)

A postdoctoral research post is available for a three-year project designed to produce numerical models of the solidification microstructure formed in multicomponent alloys. The object of the project will be to produce software suitable for use in industry and for teaching purposes. Experiments will be carried out to verify predictions and a technician will be available to assist with experimental work. The work is supported by the Casting Initiative. (ref: JDH)

Applications including a curriculum vitae and the names and addresses of two referees, should be sent to the Administrator, Department of Materials, Parks Road, Oxford OX1 3PH. Closing date 17 February 1995.

The University is an Equal Opportunity Employer.
For all Scientists & Technicians

Looking for a job or a change of job? Whatever your level of qualification or experience we have a wide range of both temporary and permanent positions throughout the UK.

POSTDOCTORAL FELLOW (LEVEL A)

Department of Nuclear Physics. Applications are invited for a postdoctoral position in Accelerator Mass Spectrometry (AMS) in the Department of Nuclear Physics of the Research School of Physical Sciences and Engineering. The Department operates a 14UD tandem accelerator and has an active program of AMS research in a number of different areas including hydrology, exposure-age dating and biomedicine. A scientist with experience in accelerator-based research is being sought to augment the AMS group which presently consists of two academic staff members and a Ph.D. student. The successful applicant will be expected to participate in all facets of the AMS program, and to accept responsibility for some aspects of the day-to-day operation such as sample curation, ion-source maintenance and report preparation. He or she would also be expected to liaise closely with earth scientists, geomorphologists, hydrologists, archaeologists and biochemists, and a strong interest in one or more of these fields would be an advantage. There would be ample opportunity for the successful applicant to develop his or her own research interests. A Ph.D. in experimental science is essential. For further information about the position, please contact Dr Keith Fifield, Department of Nuclear Physics, telephone +61 6 249 2095, fax +61 6 249 0748 or email lkefl03@phys.anu.edu.au. SALARY: Postdoctoral Fellow $A32,914 to $A40,087 p.a. CLOSING DATE: 17 March 1995. REFERENCE: PSE17.I.1. APPOINTMENT: The position is available immediately for two years in the first instance with a possible extension to three years. Further particulars and selection criteria are available from the School Secretary, Research School of Physical Sciences and Engineering, telephone: +61 6 249 5195, fax: +61 6 249 1884, email sec050@rsphysse.anu.edu.au, or at the address below. APPLICATIONS: Applications must quote the reference number above, and should be submitted in duplicate to The Secretary, Australian National University, Canberra ACT 0200 Australia, including curriculum vitae, list of publications and names of at least three referees. Applications by email are welcome, but should also be sent by mail. Addresses, email and fax numbers of referees, if available would be useful. There is a smoke free policy effective in all university buildings and vehicles. THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER.

Applications are invited, for immediate appointment, for post-doctoral researchers (or equivalent) for the U.C.D. Interfaculty Food Research Programme.

Specific Areas of research are listed below.
1) Chilling of beef: modelling and quality changes
2) Sensor development for food process automation
3) Chemical changes in packaged meats

Curriculum vitae should be sent to the address below before Friday 24th February 1995, from where further information can also be obtained:
Food Science Centre, University College Dublin, Belfield, Dublin 4, Ireland.
Telephone: (+353 1) 706 7708. Fax: (+353 1) 706 1147.

UCD IS AN EQUAL OPPORTUNITIES EMPLOYER
GRESHAM COLLEGE

The Gresham Professorship of Physic

The Council of Gresham College invites applications from both women and men, or nominations of persons of appropriate standing, for the Gresham Professorship of Physic. The appointment will take effect in September 1995.

The appointment is part-time and the principal obligation is to offer six lectures a year, in pursuance of Sir Thomas Gresham’s wish to provide free public lectures, in a number of specified disciplines. There are altogether eight Gresham Professorships. The College seeks to interpret the New Learning of Gresham’s time in contemporary terms and to provide insights and commentaries that will be of current interest to an informed, but general, audience as well as to members of the range of medical and biological professions. The College is particularly interested on this occasion in candidates with a particular interest in gerontology or human behaviour.

Further particulars are available from The Provost, Ref NS, Gresham College, Barnard’s Inn Hall, Holborn, London EC1N 2HH. Tel: 071 831 0575. Fax: 071 831 5208.

The closing date for applications is Wednesday, 1 March 1995.
UNIVERSITY OF NEWCASTLE UPON TYNE  
Department of Agriculture

RESEARCH ASSOCIATE  
Cereal Physiology/Nutrition

Applications are invited for the post of Research Associate to work on an HGCA-funded collaborative programme to evaluate the influence of sulphur on the yield and the breadmaking quality of wheat. The post is tenable for three years and starting salary will be at an appropriate point on the Grade 1A scale: £13,941 to £20,953 per annum, according to qualifications and experience.

Further particulars are available from Dr E. J. Evans, Department of Agriculture, King George VI Building, University of Newcastle upon Tyne, Newcastle upon Tyne NE1 7RU, with whom applications (three copies), together with CV and the names and addresses of three referees, should be lodged not later than 18 February 1995. Please quote Ref 1462/ N.

Committed to Equal Opportunities
UNIVERSITY OF BATH
School of Pharmacy and Pharmacology

POSTDOCTORAL RESEARCH OFFICER
Medicinal Chemistry

Applications are invited for a position of Postdoctoral Research Officer to work in a multi-disciplinary group which is active in new approaches to treatment and diagnosis of cancer. The project focuses on synthesis of new nitroheterocycles. These compounds will then be evaluated in a chemical model as novel bioreductively-activated pro-drug systems to deliver drugs and imaging agents to tumours.

The post is funded by the BBSRC and is available for one year to start during or before May 1995. Applicant should have a Ph.D. in organic or medicinal chemistry or related discipline or should be about to submit their thesis.

Starling salary up to £15,566 per annum.

Closing date for applications is 23 February 1995.

Informal enquiries may be made to Dr Michael Threadgill; telephone (01225) 826826, ext 5090; Fax: (01225)826114; e-mail prsmdt@bath.ac.uk.

Application forms may be obtained from the Personnel Department, University of Bath, Claverton Down, Bath BA2 7AY or phone Bath (0225) 826092 (e-mail A.J.Witcombe@bath.ac.uk) quoting Ref 95/18.

Working towards Equal Opportunities.
King’s Healthcare NHS Trust

Post Doctoral Research Associate
£13,389 - £17,000 p.a. inc. (pay award pending)

We wish to recruit a Research Associate for two years to take part in two projects in the Department of Clinical Biochemistry, King’s College Hospital. One of the projects will require someone with expertise in quantitative TLC for sugar analysis. This will involve developing tests on intestinal permeability. The second project will undertake to carry out biochemical tests of NSAID induced damage to the GI tract. Experience with mitochondrial work would be an advantage

Please contact Dr I Bjarnason or Mrs Jacqui De Groote on 0171 346 3008/3726 for an application form and for further details.

Closing date: 16th February 1995.

KING’S HEALTHCARE

WORKING TOWARDS EQUAL OPPORTUNITIES
Cardiff University of Wales

RESEARCH ASSOCIATE
Optoelectronics

The Department of Physics and Astronomy seeks a fixed-term postgraduate post concerned with an investigation of charge transport in visible emitting laser diodes. Knowledge of optoelectronic devices is desirable. Previous applicants need not apply.

Salary £13,941 - £20,953 p.a.

For details please write to Personnel Division, 50 Park Place, Cardiff CF1 3AT or ring (01222) 874452 quoting reference number 95/12. E Mail: Persad@Cardiff.ac.uk

Closing Date: 23/2/95.
The Laboratory is the UK’s principal centre for research into the dynamics of coastal and shelf seas and sea level trends and variability worldwide. It hosts the British Oceanographic Data Centre and is located at Bidston Observatory, Wirral, Merseyside, in an attractive wooded hill-top location.

We now have vacancies for three Scientists:

**Post 1: British Oceanographic Data Centre (BODC)**
BODC has an international reputation for managing data from large scale oceanographic field experiments and for developing innovative data products. A vacancy has arisen to assemble a high quality compilation of the deep sea physical oceanographic data collected by UK laboratories in the World Ocean Circulation Experiment (WOCE), a ten-year experiment which started in 1990. This will require liaison with originating scientists, working up data as necessary, exchanging data with the international community and preparing data sets for electronic publication.

**Post 2: Marine Physics**
As part of the Laboratory’s interest in Marine Physics an important component is the development of an understanding of coastal dynamics, and in particular, sediment transport. Such measurements are required to predict coastal evolution and the migration of absorbed contaminants. Novel technologies are being applied to the measurements and multifrequency acoustic imaging is being employed to determine suspension parameters. The work will include the analysis, interpretation and formulation of sediment process with ample scope for innovation and creative ideas.

**Post 3: Numerical Modeller**
To develop numerical models to simulate waves, currents and sediment transport processes in shallow water including mutual interactions. A major field experiment off the Holderness coast will provide a comprehensive data set of waves, currents, turbulence and sediment concentrations and this post offers a unique opportunity for model development linked to these observations. The work contributes to the Natural Environment Research Councils Land-Ocean interaction Study (LOIS), and will involve collaboration with modellers and other scientists within POL and in other organisations.

Qualifications: You must have a first degree in mathematics or physical sciences with computing experience. Postgraduate experience is desirable. For Post 3, numerical modelling experience is desirable.

Posts 1 and 2 are at Scientific Officer / Higher Scientific Officer level. Post 3 is at Higher Scientific Officer level.

All three posts are 3-year fixed term appointments and there is a generous leave allowance.

For an application form and further details for the above three posts, please contact P Sprigings, Establishments Section Proudman Oceanographic Laboratory, Bidston Observatory Birkenhead, Merseyside L43 7RA. Telephone: 0151 653 8633 ext. 214, fax: 0151 652 3950. Closing date for completed applications: 17th February 1995
GEOPHYSICS DATA MANAGER
British Antarctic Survey requires a geophysicist to join the Geoscience Division and take responsibility for the operation of the marine geophysics database (comprised of navigation, bathymetry, magnetics and gravity data) and associated software for reduction, retrieval, processing and display of data. A prime duty will be to ensure that all new data is correctly reduced and subjected to stringent quality control before loading into the database. In addition, you will manage databases of shotpoint navigation for seismic reflection profiles, satellite gravity sidescan sonar imagery land and airborne geophysics and oceanographic information. You will be expected to maintain and develop a large suite of existing Fortran programs under the Unix operating system, and to develop new techniques of data manipulation by creating programs in both Fortran and C.

The post is for three years with a possible extension to five.

To qualify you must have a good first degree in an area of earth science, including a significant computing element. A minimum of one year’s experience in programming in Fortran and / or C. preferably using Unix workstations, is required. Knowledge of geophysical data processing procedures would be an advantage. You must be physically fit as the post could involve participating in research cruises.

Salary will be in the range £11,138 to £23,932 pa, depending on qualifications and experience. Please quote ref: BAS 9/95.

Closing date for completed application forms: 23rd February 1995.

PALAEOLIMNOLOGICAL RESEARCH ASSISTANT
The British Antarctic Surveys Terrestrial and Freshwater Life Sciences Division requires a palaeolimnologist to undertake research on climate change as evidenced in sediment cores from freshwater lakes. Duties will be to analyse existing cores from maritime and continental Antarctica in collaboration with the Environmental Change Research Centre, extend the techniques currently used and apply them to new cores taken during two Antarctic summer seasons.

The post is based in Cambridge for a period of five years.

To qualify you will have research experience in palaeolimnology at the Master or Doctoral level, although a good honours degree and relevant experience will also be considered.

You must be physically fit as the post will involve Antarctic field work in remote locations. During such work you may be required to share tented accommodation with a member of the opposite sex.

Salary will be in the range £11,138 to 18,911 pa, depending on qualifications and experience. Please quote ref: BAS 10/95.

Closing date for completed application forms: 23rd February 1995.

For further details and an application form for the above two BAS posts, please contact the Personnel Section, British Antarctic Survey High Cross, Madingley Road, Cambridge CB3 0ET. Tel: Cambridge (01223) 251508/507.

The Natural Environment Research Council has an equal opportunities policy and welcomes applications from all sections of the community.

THE UNIVERSITY of York
DEPARTMENT OF BIOLOGY

Research Studentship in Biofilm Analysis Using Dielectrophoresis

Applications are invited for a D.Phil Research Studentship sponsored jointly by Yorkshire Water plc and The University of York. The three year project is available immediately and is to investigate the dielectrophoretic response of biofilms and how this changes as a response to environmental factors.

There is increasing interest in the effects that microbial biofilms in water distribution mains have on the quality of water passing through them. It is thought that bacteria can alter their physiological state as a response to environmental factors but very few methods are available to identify these effects. Dielectrophoresis, the motion of neutral or charged particles (such as cells) in non-uniform electric fields, could be useful for the analysis of changes in biofilms.

The successful applicant will join an active multidisciplinary team, an interest in computing and bioelectronics would be an advantage. Candidates with a 1st or 2(i) Honours degree in an appropriate biological subject should apply to.

Dr W B Betts, Institute for Applied Biology, Department of Biology, University of York, PO Box 373, York YO1 5YW. Telephone (01904) 432918.
institute of food research

MOLECULAR GENETICIST

To join an established team working on the genetics of lactic acid bacteria. The project, funded by the Cell Engineering Link scheme, is to contribute to an ongoing analysis of nisin biosynthesis by *Lactococcus lactis*. The project is funded to 31 March 1998.

Applicants should have a first or upper second class honours degree in a biological subject and at least 2 years postgraduate experience. Experience of DNA manipulation techniques would be desirable.

Starting salary will be in the range £13,286 - £14,675 p.a. depending on qualifications and experience.

Please apply using an application form obtainable from the Laboratory Personnel Office, Institute of Food Research, Norwich Laboratory, Norwich Research Park, Colney, Norwich NR4 7UA or telephone (01603) 255348 quoting ref: N87/94. Closing date 15 February 1995.

ifr
An equal opportunities employer
THE NORWICH LABORATORY IS PART OF THE NORWICH RESEARCH PARK
Institute of Sound and Vibration Research

**Postdoctoral Fellowship in Structural Dynamics**

The ISVR is seeking a Postdoctoral Fellow with experience in structural dynamics to carry out a three-year programme of EPSRC-funded research on the vibration of pipework systems. The objective is to develop a design / assessment method, based upon Statistical Energy Analysis, for relating stress concentrations to vibration levels in industrial piping systems for fatigue life prediction.

Salary within the range £13,941 to £17,813 per annum. Informal enquiries should be addressed to Dr R. J. Pinnington, telephone 01703 592278.

Applicants should send a full curriculum vitae (three copies from UK applicants and one from overseas), including the names and addresses of three referees, to the Personnel Department (R) at the address below, telephone 01703 592750, by no later than 17 February 1995. Please quote reference number R/24S/TIHI.

Working for Equal Opportunities

University of Southampton
University of Southampton Highfield Southampton SO17 1BJ.

Applications are invited for the post of Postdoctoral Research Associate supported by a three year project grant from the BBSRC for work on the mechanism of replication of Newcastle disease virus (NDV). This paramyxovirus causes the economically important fowl pest of poultry. The research will involve expression of the NDV NP, P and L genes using baculovirus, vaccina virus in transcription and replication of the viral RNA. Applicants should have a Ph.D. and, ideally, experience in recombinant DNA techniques, virology and enzymology.

The starting salary will be up to £16,191 per annum on the 1A salary scale (£13,941 - £20,953 per annum) depending upon qualifications and experience.

Applications together with a complete CV and the names and addresses of three referees should be sent to Professor P. T Emmerson, Department of Biochemistry & Genetics, The Medical School, University of Newcastle upon Tyne, Newcastle upon Tyne NE2 4HH (tel: 0191-222 7434; fax: 0191-222 7424).

Closing date for applications is 15 February 1995.

Committed to Equal Opportunities. Please quote Ref 1450/NS.
[1963-043 (1995) : 60]
Implant Design Engineer

Applications are invited for the position of Implant Design Engineer in the Department of Biomedical Engineering, UCL, based at the Royal National Orthopaedic Hospital Trust at Stanmore, Middx.

This interdisciplinary department specialises in research, design, evaluation and manufacturing of novel custom built joint replacement devices.

Applicants should have a first degree in a major engineering discipline and a postgraduate qualification and/or a minimum of 2 years’ experience in the field of Biomedical Engineering. Knowledge of Orthopaedic Biomechanics is essential.

Applications with curriculum vitae and the names of two referees should be sent to Jay Meswania, Biomedical Engineering Department, Institute of Orthopaedics, Royal National Orthopaedic Hospital Trust, Brockley Hill, Stanmore, Middlesex HA7 4LP. Closing date for the applications is 17 February 1995. Salary in accordance with age and experience.

Working toward Equal Opportunity
Ph.D. STUDENTSHIPS
Two studentships are available, tenable October 1995. (1) ‘Photoperiodic control of the pituitary gland: cellular mechanisms of melatonin action’ - Supervisor: Dr G. A. Lincoln and (2) ‘Neuroendocrine organization of the reproductive hypothalamus during fetal development’ - Supervisor: Dr A. N. Brooks. For further information telephone 031 229 2575.

Applications, including full CV and names of two referees, to Ena McKay, Centre for Reproductive Biology, 37 Chalmers Street, Edinburgh EH3 9EW. Closing date 28 February 1995.
NOTTINGHAM HEALTH AUTHORITY UNIVERSITY HOSPITAL

MLSO1/ TRAINEE MLSO
Trainee £6,884 – 8,627 pa
MLSO 1 £10,405 – 13,693 pa

To work full time in a large Immunology department. You should be state registered MLSOs or possess an accredited biological degree. Training will be given for state registration.

An MSc Biomedical Science course which includes a Clinical Immunology option is established locally.

For application documents telephone 0115 9709284 (24 hour answerphone) quoting Ref 527/94.

Closing date 16 February 1995.
Mr David Hunt, Cabinet Minister for Science, recently announced the new, expanded ROPA (Realising Our Potential Awards) scheme. All six Research Councils, and all their research areas, come within the scope of the new scheme. The scheme aims to enhance collaboration of the science and engineering base with UK industry and commerce by:

* Rewarding researchers who have close ties with UK industry and commerce, through the award of grants with which they can carry out curiosity-driven research of their own choosing;

* Catalysing future opportunities for collaboration.

The scheme will use the distribution of industrial and commercial support as an indicator of which areas industry and commerce consider to be strategically important.

The scheme is open to researchers in Universities and in Research Council institutes, units and establishments. Other researchers may apply only if their establishments are currently eligible to receive Research Councils’ responsive-mode grants and are also eligible to receive the 40% indirect cost addition to staffing under dual-funding arrangements.

Applicants must have current cash support from UK industry or commerce, or support agreed to start in 1995, usually of at least £25,000 per year. The industrial/commercial support should be for basic/strategic research of industrial/commercial relevance: not contract research related to a particular company’s immediate needs. Other conditions also apply.

Application forms, and full information on the scheme, including eligibility requirements, will be available shortly from the usual sources for grant application forms at eligible institutions and universities. Specific queries relating to the ROPA activities of individual Research Councils should be addressed to:

BBSRC: Mrs Pat Fry 0793 413378
ESRC: Ms Angie Dailey 0793 413138
EPSRC: Dr Geoff Richards 0793 444304
MRC: Mr Aris Mariner 071 636 5422, ext 6274
NERC: Dr Tom Huntingdon 0793411684
PPARC: Dr Guy Rickett 0793 442082

The closing date for receipt of applications is 15 March 1995.
Science graduates, undergraduates and post doctoral candidates are invited to apply for a variety of training vacancies within the NHS, starting in September 1995, in the following disciplines:

- Audiology Sciences
- Medical Physics
- Clinical Biochemistry
- Clinical Microbiology
- Clinical Cytogenetics
- Molecular Genetics
- Clinical Immunology
- Histocompatibility

(* higher degree an advantage),
(* some centres accept applications from individuals holding higher degrees).

Each training programme provides an excellent opportunity for comprehensive training in the chosen discipline by combining, in some cases, formal teaching at a University (on a part-time MSc course. In the case of the MSc in Audiology this is full-time) with practical training in hospital laboratories or departments. The training programmes lead to a formal qualification within two or three years.

Applicants should have, or expect to obtain, a first or upper second class honours degree in an appropriate subject. Most posts are either on a Grade A scale, a generous bursary or a combination of the two. The current rate of pay for a Grade A scale is £11,437 - £15,048 per annum, depending upon experience.

For further details and an application form contact Ms Sally Pearce, Clearing House Administrator, National Clearing House for Clinical Scientists, The Oxford Consortium, Old Road, Headington, Oxford, OX3 7LF. Telephone: Oxford 0865 226640 - 24 hour answerphone.

Closing date: Friday 17 February 1995.
Postdoctoral Research Assistant
in Photon Imaging Detector Technology

Applicants are sought for a one-year post funded under the PPARC Industrial Programme Support Scheme, the aim of which is to facilitate transfer of novel technologies to industry.

The project will involve development of photon counting detector systems using microchannel plate intensifiers in association with electronic image readouts, and will be undertaken in collaboration with an industrial partner.

Suitable candidates will have a Ph.D. in a Physics or Electronics related discipline, and will have experimental skills relevant to intensifiers or analogue signal processing. A knowledge of ‘C’ programming is desirable. Salary in range £13,941 to £17,007.

Written applications, including CV and the names of three referees should be sent to J S Lapington, MSSL, Holmbury St Mary, Dorking, Surrey RH5 6NT.

Working toward Equal Opportunity
THE GAME CONSERVANCY TRUST

SENIOR RESEARCH SCIENTIST HEAD
OF FARM LAND GAMEBIRD UNIT

The Game Conservancy Trust is an independent research charity working to restore game and game habitats in the British countryside. The Trust employs directly or on secondment over 50 research biologists on an annual budget approaching £2 million. We seek a greater understanding of the environmental needs of game species - gamebirds, hares, deer and fish and to promote their conservation through wise use.

Through staff promotion we have a vacancy for a Senior Research Scientist to lead a group of five scientists researching pheasant behaviour, parasitology, sustainable harvesting, habitat management and feeding ecology.

The candidate should have a Ph.D. or equivalent, at least three years’ experience of applied ornithology and ecology, with a proven track record of applied field research, scientific publications and supervision of students.

The post is permanent and based in Hampshire. Competitive salary and a package of benefits is also available, including company car. Please send a CV, with the names of three referees, to Dr N. W. Sotherton, Research Director - Lowlands, The Game Conservancy Trust, Fordingbridge, Hampshire SP6 1EF. Telephone 01425 652381. Fax 01425 655848.

Closing date: 6 March 1995.
Technician C/D
Salary within the range £9,871 - £14,873 pa depending on qualifications and experience.

To work in the fields of Geochemistry which includes ICP analysis, isotope analysis, X-ray analysis, separation of minerals for analysis. Previous experience of this work is not essential as full training can be given.

For Grade C, you should have a minimum of three years’ experience and be qualified to BTEC National level or equivalent and preferably have an interest in mineralogy, physics or chemistry. Grade D requires seven years’ experience. Applications will also be welcome from graduates with a relevant degree.

Quote Ref: B/361/NS. Closing Date: 17 February, 1995.

Application forms are available from the Director of Personnel (B), The University of Liverpool, Liverpool L69 3BX. Tel: 051 794 2210.

WORKING TOWARDS EQUAL OPPORTUNITIES
Cardiff University of Wales

**LECTURER**
Applied Molecular Biology/ Molecular Ecology

Applicants must have a strong research record in molecular biology and its application to fundamental ecological, agricultural or biological problems. You must be willing to carry out research on one of the following group of organisms: terrestrial or aquatic invertebrates, fish, birds, plants or microorganisms.

Salary: £14,756 - £25,735 p.a.

For details please write to Personnel Division, 50 Park Place, Cardiff OE1 3AT or ring (01222) 874452 quoting reference number 95/11. EMail: Persad@Cardiff.ac.uk

Closing Date: 23/295.
Research Assistant in Molecular Genetics

Applications are invited for the post of Postgraduate Research Assistant. The successful candidate will join an ongoing research programme studying the genetic mechanisms underlying several developmental birth defects. The appointee will participate in a project aiming to physically map and clone a gene responsible for x-linked cleft palate. Knowledge of molecular biology would be an advantage.

The position is funded for two years by a project grant from the Medical Research Council. Starting salary will be £13,984 (inc. LA.). Further enquiries or applications including CV and names of two referees should be sent to: Dr Philip Stanier, Institute of Obstetrics and Gynaecology, Queen Charlotte’s and Chelsea Hospital. Telephone 0181 748-4666 ext 5307 (Ref: AGMA4). Closing date for applications: 17th February 1995.

 EPSRC Postdoctoral Research Assistant
Microstructure/Property Relationships in Single Crystal Superalloys

Research will focus on the microstructural consequences of high temperature deformation with a view to further understanding of the mechanisms operating and to advance a current predictive model of creep response.

Applications are invited from candidates who have a background in physical metallurgy and electron microscopy, some experience of mechanical testing would be advantageous. The applicant should hold a Ph.D.

Salary on a scale of £16,075 - £23,087 per annum inclusive of London allowance.

Applications including a curriculum vitae and the names of two referees should be sent to Dr B A Shollock (PDRA/ basmm), Department of Materials, Imperial College, Prince Consort Road, London SW7 28P to arrive before 28 February 1995.

The College is striving towards Equal Opportunities
The BBSRC and EPSRC jointly announce a new interdisciplinary co-ordinated programme in bioinformatics, which is intended to consolidate the previous bioinformatics activities of SERC and AFRC.

Advances in the technology employed in biological sciences have given rise to huge amounts of data. Making a broad range of biological data easily available is essential if it is to be of use to the wide community. For accessing and interlinking these data, advanced software tools, together with user interfaces, will be essential to make the best use of this wealth of information.

Outline proposals for research grants are sought from all areas of bioinformatics, especially in the following general areas:

- Analysis of sequences and genomes
- Biomolecular structure prediction and modelling
- Novel approaches to the storage, integration and exploitation of evolving biological data collections
- Novel applications of systems engineering techniques to biological problems

Proposals which bring together specialists in biology and IT are particularly encouraged. The BBSRC/EPSRC co-ordinated programme will be open to scientists in universities and BBSRC institutes as well as scientists from Government Research Establishments and Agencies, and Institutes and Units of other Research Councils. Funds will be allocated through open competition.

Applications should be submitted on outline proposal forms. Forms and further details can be obtained from Debbie Harding, Science and Technology 2, BBSRC, Polaris House, North Star Avenue, Swindon SN2 1UH.
Tel: 01793 413341, Email: debbie.harding@bbsrc.ac.uk.

The closing date for outline proposals is 28 February 1995.
FACULTY OF SCIENCE
DEPARTMENT OF CHEMISTRY

Course Co-ordinator (Temporary)

This full-time post is available for a period of three years in the first instance, with the possibility of renewal. Applicants should hold a first degree (or equivalent) in Chemistry or a related subject. They should also have good organisational skills and an eye for detail, as well as a keen interest in, or experience of, the development of distance-teaching materials. Experience of administration would be an advantage.

Course Co-ordinator play a central role in the production and presentation of Open University Multimedia courses. The postholder will be responsible for providing administrative and academic support for up to two chemistry courses. The appointment will be made at an appropriate point on the Academic Related staff scale Grade 1 £13,941 - £15,566 per annum depending on qualifications and experience. For an exceptionally experienced candidate appointment may be made at the Grade 2 level £16,191 - £20,953 per annum. Application forms and further particulars (and access details for disabled applicants) can be obtained from Madeline Johnson, Faculty of Science, The Open University, Milton Keynes, MK7 6M e-mail m.johnson@open.ac.uk, telephone Milton Keynes (01908) 653184. Closing date for applications: 24th February.

The Open University

Disabled applicants whose skills and experience meet the requirements of the job will be interviewed. Please let us know if you need your copy of the further particulars in large print, on computer disk, or on audio cassette tape.

Equal Opportunity is University Policy.

Applications are invited for the above post to work on a research project concerned with the development of techniques for the preservation of living tissues for transplantation. The post is initially for 2 years and is funded by the Wellcome Trust in Dr David Pegg’s research group.

The person appointed will join an integrated research group and will use tissue culture techniques to study the effects of cryoprotective agents upon endothelial cells and fibroblasts, concentrating upon effects on cell adhesion mechanisms. The techniques will include tissue culture, cell sizing by Coulter counter, radioactive tracer methods for measuring metabolic activity and a wide range of cryobiological methods. Previous experience in tissue culture is desirable, but training will be given as necessary.

The appointment will be made in Grades C or D according to experience. For appointment to Grade C, candidates should have at least BTEC or an equivalent qualification, although higher qualifications would be desirable, and more than 3 years’ relevant experience. For Grade D, candidates should have at least HNC, HTEC or equivalent qualifications and more than 7 years’ relevant experience.

Salary will be in the range £9,871 - £11,069 (Grade C) or £11,399 - £13,410 (Grade D) per annum.

Informal enquiries may be directed to Dr David Pegg on (01904) 434080.

For an application form for the above post please write on a postcard to the Personnel Office, University of York, Heslington, YORK, YO1 5DD. Please quote the reference number. The closing date for applications is Wednesday 15 February 1995.

THE UNIVERSITY of York
Applications are invited for a two year post-doctoral appointment to carry out research on molecular genetic and biochemical aspects of interactions between cereal roots, pathogenic root-infecting fungi and rhizosphere bacteria. The project is funded by the Commission of the European Union and involves collaboration with laboratories in Cordoba, Cork and Oxford. Information about the project may be obtained from Professor M. J. Daniels or D. A. E. Osbourn (Tel: +44(0)1603 452571. Fax: +44(0)1603 250024).

Applicants should possess an Honours degree in a relevant subject such as molecular biology, microbiology or plant science and have postgraduate research experience.

The appointment will be to the R&AIA grade and the salary will be on the scale £13,941 to £20,953 per annum according to qualifications and experience. A contributory superannuation scheme is in operation. Equal Opportunities Employer.

Applications with full CV, together with the names of three referees should be sent to the Personnel Officer, John Innes Centre, Colney Lane, Norwich NR4 7UH quoting reference SL/940 by 24 February 1995.

RESEARCH TECHNICIAN

A Technician is required to join a small group headed by Dr Tom Salt investigating the pharmacology of the Central Nervous System. The work will involve a wide range of techniques including neurohistology, electrophysiology and computing. The post is for 22 months in the first instance and is funded by the Wellcome Trust.

Starting salary up to £14,173 pa (including LA) according to experience and qualifications.

Informal enquiries to Dr T. Salt. Tel: 0171 608 6843. For further information and an application form please contact the Personnel Officer at the above address, quoting reference 42772. Closing date for receipt of completed application forms: 20 February 1995.

The Institute operates a no-smoking policy.
[1963-059 (1995) : 64]
THE LONDON HOSPITAL MEDICAL COLLEGE
(University of London)
Academic Surgical Unit

CLINICAL RESEARCH AND SERVICES CO-ORDINATOR

A highly-motivated individual with good interpersonal and organisational skills is required for this active Clinical Research Unit. The individual should either have physiological measurement background or nursing qualifications, and be prepared to work in a flexible manner. The principal role will be to co-ordinate and develop clinical research projects in the field of gastrointestinal disease and to perform physiological measurements. The appointee will also be required to act as chaperone for female patients.

The salary scale is the equivalent of Nursing Grade F or Clinical Scientist.

A job description may be obtained from Miss J. E. Mutch. Tel: 0171-377 7079 (direct line).

Applications with three copies of curriculum vitae and the names and addresses of three referees should be sent to: Miss J. L. Mutch, Professor N. S. William’s Secretary, Academic Surgical Unit. The Royal London Hospital, Whitechapel, London E1 1BB.

Closing date: 9 February 1995.
[1963-060 (1995) : 64]
the
EPILEPSY RESEARCH FOUNDATION
bringing research to life

A national body which promotes and supports medical and scientific research into epilepsy

The Epilepsy Research Foundation invites applications for Research Grant(s) preferably in the areas of genetics or neurotransmitters to a maximum of £50,000.

ERF will also consider applications for specific items of equipment relating to epilepsy research up to £20,000.

If you wish to be kept informed of ERF’s activities please contact the Administrator to register your interest in epilepsy research and in what fields.

Application forms from the Administrator, ERF, PO Box 3004, London W4 1XT. Tel/Fax: 0181 995 4781.
UNIVERSITY OF BRISTOL
School of Biological Sciences

POSTDOCTORAL RESEARCH ASSISTANT
Required for a project jointly with the University of York to study the impact of fox predation. This will largely be a computer-modelling study, and so you must have well-developed computer skills. Experience with bird ecology would be an asset. The post is funded by the International Fund for Animal Welfare (IFAW). Applications will only be considered from candidates who have already submitted their theses. The appointment will be for two years, from 1 April 1995, with a starting salary of £13,941, and is to be based in Bristol.

Informal enquiries should be made to Dr Piran White at EEEM, University of York on 0904 434062.

For further details telephone 0117 925 6450 (answerphone after 5pm), or minicom 0117928 8894, or write to the Personnel Office (EO), University of Bristol, Senate House, Tyndall Avenue, Bristol BS8 1TH. Please quote reference D160.

Closing date for applications is 10 February 1995.

An Equal Opportunities Employer
“An International Centre for Education and Research”
UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Inorganic Chemistry Laboratory

Postdoctoral Research Assistant

There is a vacancy from 1 April 1995, or as soon as possible thereafter, for a postdoctoral research assistant to work with Dr P D Beer on the coordination chemistry of novel calixarene based ligands. Expertise in both synthetic organic and inorganic chemistry would be an advantage. Informal enquiries about the position may be made to Dr Beer (telephone 01865-272632). The appointment, which is for one year in the first instance, is on Research Staff Grade 1A £13,941 - £20,953 per annum.

Applications with curriculum vitae and the names and addresses of two referees should be made to the Administrator, Inorganic Chemistry Laboratory, South Parks Road, Oxford OX1 3QR. The closing date is 24 February 1995.

The University is an Equal Opportunity Employer.
ROYAL FREE HOSPITAL SCHOOL OF MEDICINE  
(University of London)  
Department of Histopathology  
Osteoarticular Research Group

**Technician Grade I**  
£10,405 to £13,693 plus £1,999 London Allowance

Applications are invited from suitably qualified candidates for this post which is available immediately. Applicants should have a good general knowledge of histological techniques. An interest in immunohistochemistry and/or molecular biology is desirable. The Research Group is studying the cellular reactions in bone, mainly in relation to biomaterials. Part-time applicants would be considered. Informal enquiries to Professor P. A. Revell, telephone 0171 794 0500, ext 4604 or Mr C.J. Pirie, ext 3972.

Job details available from the School Office, RFHSM, Rowland Hill Street, London NW3 2PF (telephone 0171 794 0500, ext 4262). Applicants should send three copies of their CV (please include three copies of any covering letter), together with full details of two referees, to the above address by 16 February 1995. Please quote reference no: HIS/TEC/084. 

UNIVERSITY OF CAMBRIDGE
Department of Haematology
Laboratory of Molecular Cytogenetics

Post-Doctoral Research Associate

A post-doctoral position is available to carry out research on the application of fluorescence in situ hybridisation (FISH) and comparative genomic hybridisation (CGH) to the analysis of haematological malignancies. The position is funded by the Kay Kendall Leukaemia Fund for three years.

Experience of cytogenetics; and/or molecular biology would be an advantage. The position is available immediately and salary will be according to age and experience. Please forward curriculum vitae together with names and addresses of two referees to Dr. E. Nacheva, Addenbrooke’s NHS Trust Hospital, PO Box 234, Hills Road, Cambridge CB2 2QQ: Fax: 01223 217017. Tel: 01223 216290.

The University of Cambridge is an Equal Opportunities Employer.
A WORLD OF OPPORTUNITY

Senior Cell Biologist

AN IMPORTANT ROLE WITHIN VASCULAR BIOLOGY

As one of the world’s leading pharmaceutical companies we operate in a progressive, innovative and highly-competitive environment in which individual performance is recognised and rewarded. We currently need an enthusiastic and creative cell biologist to join highly-skilled scientific professionals within the Vascular Biology unit at our Dagenham Research Centre.

Utilising your experience in experimental cell biology you will form a key part of a team researching into vascular disease. We are looking for someone with a strong scientific background and who has the ability to provide input and ideas into research projects.

You should be educated to at least degree level with a minimum of 3 years’ experience or, possibly, a recently-qualified Ph.D. A good working knowledge of molecular biology is required and well-developed communication skills are vital.

We offer a competitive salary plus an extensive range of benefits including pension scheme, private health insurance and relocation assistance where appropriate.

If you have the ambition to make a real contribution to drug discovery, please send your cv to Margaret Hooper, Human Resources Department, Dagenham Research Centre, Rhône-Poulenc Rorer, Rainham Road South, Dagenham, Essex RM10 7XS. Closing date: 17th February 1995.

rpr
RHÔNE-POULENC RORER
Realise your potential...

Recruitment Consultant
Excellent salary and benefits

Scientech is the foremost recruitment consultancy for scientists in the UK. We specialise in permanent positions within the pharmaceutical, chemical and related industries.

We have an opportunity for a dynamic consultant who is prepared to work hard for high rewards. Previous experience in a scientific and/or recruitment role is essential, ideally in consultancy.

You must have the maturity and personal qualities to operate at all levels with clients, creating lasting relationships with key people and handling them intelligently, with tact and skill.

Our Group is growing fast. If you want to be part of it, call me, send or fax your CV, quoting Ref. NS/993/IC, to Dr. Ian Collins, Managing Director, Scientech, Salisbury House, 15-17 The Broadway, Old Hatfield, Herts AL9 5HZ Tel: 01707 264311 or Fax: 01707 275402.

SCIENTECH

A Division of The Salisbury Consulting Group

RECRUITING KEY PEOPLE IN SCIENCE
SCG
**Trainee Clinical Biochemists**
in the NHS in Scotland
Salary range: £11,437 to £15,048 per annum (depending on experience)

Applications are invited from undergraduates, graduates and postdoctoral candidates in biochemistry or chemistry for two Grade A Trainee Clinical Biochemist posts in the NHS in Scotland. Applicants should hold, or expect to obtain, a first or upper second class honours degree; a higher degree may be an advantage.

Successful candidates will follow an approved training scheme over three years in a Scottish tertiary care teaching hospital and will be funded to attend the MSc in Clinical Biochemistry and Molecular Biology Course in the University of Surrey at Guildford on a part-time basis over two years. Attendance at training courses and conferences will also be supported.

Trainees will be eligible to apply for career Clinical Scientist post in the NHS on successful completion of the training.

The posts can be discussed with Dr C. G. Fraser, Directorate of Biochemical Medicine, Ninewells Hospital and Medical School, Dundee DD1 9SY. Telephone 0382 660111, ext 2512, or fax 0382 645333. Further information can be obtained from, and applications, along with a CV and the names of two referees, should be sent to Mrs Irene Henderson, Personnel Department, Level 9, Ninewells Hospital, Dundee DD1 9SY. Telephone 0382 632547, quoting reference IH/08/95.

Closing date for completed applications: 24 February 1995.
Research Assistant in Neuroimmunology

A position is available at the post-doctoral level to work on human autoantibody cloning in autoimmune disease of the peripheral nervous system. The project will focus on the production and screening of phage display libraries to isolate pathogenic antibodies specific for neural ganglioside antigens. Candidates will be expected to be molecular biologists, ideally with experience in a relevant immunological field. The position is funded through a grant from The Scottish Hospital Endowments Research Trust (SHERT) for two years on the RA1A/B scale. You will join a well-funded team studying the pathogenesis of autoimmune neuropathy using a variety of immunological, cell culture and electrophysiological techniques. Glasgow is a major centre for immunological and neurosciences research and extensive collaborations exist with other groups.

The group’s laboratories are sited within the institute of Neurological Sciences at the Southern General Hospital. Applications comprising a CV bibliography and the names and contact details of two referees should be sent to Dr Hugh Willison, Glasgow University Department of Neurology, Institute of Neurological Sciences, Southern General Hospital NHS Trust, Glasgow G51 4TF (Tel: 0141 201 1100, ext 2464/ 2474; Fax: 0141 201 29931, to whom informal enquiries can also be made. Closing date 24 February 1995. Ref: NS/8628.

An Equal Opportunities Employer.

The University of Glasgow is an exempt charity dedicated to excellence in teaching and research.

Malvern Instruments is a world leader in the design and development of optical laser instrumentation for both industrial and research applications. Based in Malvern, the Company is currently involved in a major investment programme and as a result wishes to strengthen its team working on new applications of its products.

**Applications Engineer**

Responsible for providing technical support to the sales team, devising solutions for client needs, client training and the development of novel applications. The position will demand some travel, extensive client contact and, in addition, you will be expected to control your own development projects.

You will have gained three years’ laboratory experience since graduation and have a good understanding of physical chemistry. Specific knowledge of colloid chemistry and “BASIC” as a software language would be an advantage. It would also be an advantage if you could demonstrate an understanding of sound customer relations.

This position offers excellent salary benefits and the opportunity to join a company which offers excellent career opportunities.

Please apply, quoting reference 1369, to Marc Woolmer at: Marc Woolmer Search & Selection, Claverton House, Love Lane, Cirencester, Gloucestershire, GL7 1YG. Fax: 0285 659369.

MALVERN INSTRUMENTS
INFORMATION SCIENTIST / LIBRARIAN

Cookson Group is an international group of companies with a strong interest in new technologies. Principal activities include the production of specialist materials for the electronics, plastics, ceramics and metals industries. At the Cookson Technology Centre we carry out research and development in support of this wide range of activities.

The Library / Information Services Section serves both the research and commercial activities of the Group, making extensive use of on-line searching, inter-library loans and other external sources, as well as the library stock.

We now have a vacancy for a graduate, with experience in the field of scientific and technological information, to be responsible for the management of the library and to contribute to our search activities, particularly in the techno-commercial and business areas. Organisational skills and an interest in library computer systems are essential and a background in materials science, physics, electronics or engineering would be an advantage.

We offer an attractive salary commensurate with qualifications and experience, together with other benefits associated with a progressive organisation. Cookson Technology Centre is located just to the north of Oxford and assistance with relocation will be given where appropriate.

To apply, please write enclosing a full CV to: Mrs M Brearley, Cookson Technology Centre, Sandy Lane, Yarnton, Oxford OX5 1PF.

Cookson
C
Cookson Group plc
MATHEMATICIAN/ PHYSICIST
RESEARCH SCIENTIST

The Silsoe Research Institute is the national centre for engineering and physical sciences research within the new Biotechnology and Biological Sciences Research Council.

A mathematician/physicist with an interest in animal welfare is required to model the thermal environment and ventilation flows within animal transport systems. The objective of the work is to control and improve the thermal environment for animals in transit and the postholder will be expected to develop novel ventilation systems to meet this objective. The work will involve measurements in animal transport systems so the postholder must be prepared to work with the full range of agricultural livestock.

A degree in mathematics or physics, with at least two years relevant postgraduate experience in fluid dynamics or thermal modelling is desirable. Computing skills are required, preferably with a knowledge of Fortran or Pascal, and familiarity with PC-based logging equipment would also be an advantage.

This is a Band 6 fixed graded 3 year appointment. The salary scale for Band 6 is £13,286 to £23,470. Pay on appointment will normally be between the Band minimum and Intermediate Pay Point £18,378.

For further particulars and an application form please contact: The Personnel Office, Silsoe Research Institute, Wrest Park, Silsoe, Beds MK45 4HS, Tel: 0525 860000, quoting ref 14/43. The closing date for receipt of completed applications is 16 February 1995.

We are equal opportunities employers.
Major personal development opportunity in the South of France as:

**Clinical Projects Manager**
c £30,000 Nice

- pan-European role co-ordinating subsidiary and CRO resources
- powerful team /project / results orientation in a $ billion turnover US multinational pharmaceutical company
- a role for a progressive professional, probably 5 years-plus experience in international clinical development

Please fax or mail your CV in confidence by 13 February 1995, quoting reference 94101.

Scientific Officer
Molecular and Cell Biology

The Wellcome Trust requires an additional Scientific Officer to join the Molecular and Cell Biology Section.

Working as part of a team, you will be responsible for the management of grant applications. You will assist with the general operation of the Molecular and Cell Panel and also be involved in the administration of major awards that include provision for construction or refurbishment of laboratory facilities. Initially at least, panel work will take priority. This will include choosing referees, preparing papers and providing advice on the Trusts programmes of support to the scientific community.

You should have a Ph.D. with a sound track record of research and at least three years’ post-doctoral experience in one of the following areas: biochemistry, molecular biology, molecular genetics, cell biology or developmental biology. Excellent communication skills are necessary and some administrative experience although not essential, would be advantageous, as would some experience of managing units.

Salary will be on a scale from £23,825 per annum plus benefits.

Written applications, including a full CV, a daytime telephone number and the names of two referees should be sent to Mrs Julie Farrell, Personnel Department, 183 Euston Road, London NW1 2BE by Friday 17 February 1995.

To receive further written information please telephone 0171-611 8593.

THE WELLCOME TRUST
Registered Charity No: 210183
Bidwells is a major Partnership of Chartered Surveyors, managing over 1 million acres of land within the UK.

Our Scottish business is based in Perth with branch offices at Inverness and Dunoon. Our Scotland interests reflect a strong emphasis on Highland Sporting Estates, commercial forestry and fishing. A significant element of our service deals with the assessment and acquisition of such properties for investing clients.

In response to changing demands from our clients we have created the new post of Ecologist to work on environmental audits, assessments on sustainability and the preparation and implementation of schemes for improving upland bio-diversity.

The successful candidate will be a full member of the Institute of Ecology and Environmental Management and will have at least seven years experience in upland forestry and agricultural ecology in Scotland. A further prerequisite is the ability to work with other land management specialists to generate new business.

We recognise that this opportunity may prove attractive to teams of two or more individuals operating in formal association with Bidwells. Applications on this basis will be seriously considered.

Initial contacts will be treated in strict confidence and should be made in the first instance to:
N D H Sanders FRICS
Bidwells, 5 Atholl Place, Perth PH1 5NE
EPPING FOREST

Ecologist

Salary £21,000 p.a. subject to review and according to qualifications and experience

A new post has been created at Epping Forest for an experienced ecologist.

The main purpose of the post is to provide the Conservators with advice, research and monitoring relating to the Forest and other land managed by the Epping Forest Department.

The total land holding of the Department is approximately 7,800 acres of which some 4,200 acres is designated as a Site of Special Scientific Interest.

Habitats range from ancient wood pasture through lowland heath, unimproved acid and neutral grassland acid bogs, ponds and lakes. In addition there are over 1500 acres of arable land. Principal requirements for the post are:

- A good honours degree in biology, botany, ecology or closely related subject;
- An ability to communicate effectively at all levels, both verbally and in written form;
- An enthusiasm and commitment for, and understanding of, all aspects of the natural environment.

An essential car user allowance is payable.

A generous removal package is available in appropriate circumstances.

To apply send a stamped addressed envelope minimum size 6 ½ x 9 ½” to Superintendent of Epping Forest, The Warren, Loughton, Essex IG10 4RW. Closing date for receipt of completed application forms is Friday 24th February 1995.

SERVING THE SQUARE MILE
DIRIGE
CORPORATION OF LONDON
cancer research campaign
Institute of Cancer Research
CRC Centre for Cancer Therapeutics, Sutton, Surrey

Mass Spectroscopist
£14,387 - £23,745 p.a. inclusive plus non-contributory pension scheme.

Required to work in a multidisciplinary team on the analysis of drug metabolites, proteins and biopolymers by either GC-MS, LC-MS or MS-MS methodologies. Duties will also include instrument maintenance on the Finnigan TSQ 700 mass spectrometer. Practical experience in mass spectrometric and chromatographic techniques is essential. Candidates must have at least degree level Chemistry plus a minimum of three publications.

Informal enquiries to Dr Grace Poon, tel 081 643 8901 ext 4606. To apply, please send your C. V in duplicate, with the names and addresses of two referees, to the Personnel Officer, The Institute of Cancer Research, 17a Onslow Gardens, London SW7 3AL quoting reference 55.

The Institute operates a no-smoking policy.

Fighting cancer on all fronts
DEPARTMENT OF OBSTETRICS & Gynaecology
Nurture Unit

Two Medical School Technicians

A Semenology Technician (MST1) is required to assist in the preparation of sperm for use in insemination. The work includes performing detailed semen analyses, assessing sperm antibodies and preparation of samples for insemination. Training will be given, however previous experience of semen analyses would be an advantage.

A Technician (MST1) is required to run automated hormone assays within the Department. The successful applicant will have the opportunity to do research and could register for a part-time higher degree. Previous experience of radioimmunoassay or ELISA techniques would be advantageous, but is not essential.

Current salary scale within the range £10,405 - £13,693 pa for a 5 day, 37 hour working week. Both posts are available for one year in the first instance.

Apply in writing, enclosing a full CV and the names of two referees to: Dr D J Craven, Chief Experimental Officer, Department of Obstetrics & Gynaecology, Medical School, Queen’s Medical Centre, Nottingham NG7 2UH.

Closing date: 13 February 1995.

The University of Nottingham
KEELE UNIVERSITY
School of Postgraduate Medicine

Project Support Officer
Post Ref: RE95/03
Salary: Circa £14,000

Applications are invited for the post of Project Support Officer within the School of Postgraduate Medicine Centre for Maternal, Fetal and Child Health Research. The appointee to this newly established post will provide advice and assistance to Research Centre staff including literature searches and data management in research. He/she will also advise on the design of research projects and provide assistance in putting together grant applications, publication of papers and the active identification and development of new sources of grand funding.

The successful applicant will probably already have had some research experience and may have recently completed their doctorate, although candidates with their relevant skills may also be considered. It is felt that this post will offer an excellent grounding in all issues related to the conduct of successful medical research.

The post will initially be for one year with the possibility of a further year based on an assessment of progress made during the year.

The post will be based at the School of Postgraduate Medicine at the North Staffordshire Hospital Centre.

Interested persons should contact Dr A. Spencer, Academic Department of Paediatrics, City General Hospital, Stoke on Trent. Tel: (0782) 718450/1.

For application forms and further particulars please write quoting the post reference number to the Personnel Department, Keele University, Keele, Newcastle, Staffs ST5 5BG or Fax your request: (0782) 583471.

Closing date 17 February 1995.

The world famous Castrol brand is the core of Burmah Castrol’s Lubricants business.

Advanced product research and development at the Castrol International Technology Centre assures the future of the Castrol range, renowned for high performance and premium quality.

**DEVELOPMENT CHEMIST**
c.17,500 + attractive benefits  
Pangbourne, Berks

Our Technology Centre at Pangbourne is the central research and development facility for Castrol International’s worldwide operations. A large, multi-purpose complex, employing 240 staff, it is set in 36 acres of landscaped grounds.

Following a promotional move, we seek a Development Chemist in the Passenger Car Engine Oil section of our Automotive Technology Product Development Department.

Reporting to the Section Manager, you would initiate and manage a wide range of product development and product support projects. This will involve the production of concise development history and test reports, the evaluation of alternative raw materials, the provision of technical advice and support to Operating Units, and close liaison with suppliers.

Qualified to degree level in Chemistry, or GRSC II, you must offer at least two years’ similar experience and a basic understanding of car engine lubrication. Excellent communication, prioritising and problem-solving skills should be matched by an enthusiastic, self-motivated approach and the ability to develop good internal and external working relationships.

We offer an attractive package of benefits including flexible working hours, 25 days annual holiday, and relocation assistance where appropriate.

To apply, please write with full cv to the Personnel Department, Castrol International Technology Centre, Whitchurch Hill, Pangbourne, Berkshire RG8 7QR. Tel: (0734) 843311.

**THE LEADING LUBRICANT SPECIALIST**
CITY University
SCHOOL OF ENGINEERING

Research Assistant
£16,075 - £17,700 p.a. inc.

Applications are invited from suitably qualified persons to work on a project funded by the EPSRC involving imaging, mathematical modelling and visualisation of experimental data. This opportunity is for one year initially with a probable extension for a second year.

The project is concerned with the application of electronic imaging and photogrammetry to the measurement of displacement and strain in geotechnical models. The person appointed will be required to work as a member of an interdisciplinary team and should have expertise in imaging, mathematical modelling and visualisation of experimental data. An ability to program in C for these purposes is required. Familiarity with digital image processing in an experimental environment is an advantage.

Benefits include generous holiday allowance, season ticket loan, pension scheme and excellent sports and social facilities.

Engineering Surveying Research Centre

For further particulars and an application form, please write to the Personnel Department, Northampton Square, London, ECIV 0HB or telephone 071 477 8081 (24 hour answering service) quoting reference number RA/N5. Closing date for applications: 28th February 1995.

We are committed to equal opportunities.
CORE TECHNOLOGIES LIMITED

Core Technologies Limited is an emerging pharmaceutical company specialising in the development of new drug delivery technologies. The company is now entering a phase of expansion and to strengthen our existing team we wish to appoint the following positions.

Manager of Analytical Development

Candidates should have a proven track record in analytical research and currently be in a management or supervisory position within the pharmaceutical industry. Areas of responsibility will include method development (drugs, products, plasma, etc). using HPLC, GC, stability studies and product development support. The company is seeking an innovative, research-orientated scientist, probably with a Ph.D. who is motivated by the challenge of working with an emerging company.

Manager of Product and Process Development

The successful applicant will already be working in a management or supervisory position with an industrial background in pharmaceutical research and development. He / she will be involved in product design and formulation as well as development and scale-up of new production processes. Ideally candidates should have a Ph.D. or equivalent, be ambitious, enthusiastic and keen to contribute to the future development of the Company.

Candidates can anticipate a competitive salary and benefits package which will include pension, disability insurance, employee share option scheme, relocation assistance and genuine career potential.

These are key positions and represent an opportunity to be involved in the expansion of the company, selection of equipment, instrumentation, etc and to create his / her team of research graduates and technicians.

Applications in writing, including a comprehensive CV, should in the first instance be sent to: Mrs Nan Dallas.
Core Technologies Limited
Block 8, Unit 2, Moorfield Industrial Estate
Kilmarnock KA2 0BA
DEPARTMENT OF LIFE SCIENCE

Research Fellowship in Molecular Microbiology

The Department of Life Science is seeking to appoint a suitably qualified postdoctoral scientist to a newly created position of Research Fellow. Applications from those with interests in the biochemistry/molecular genetics of either bacteria or fungi are welcome.

Applicants will be expected to have a proven track record in research as exemplified by their publications and will be expected to develop and seek funding for their own research programme. Interactions with Microbiologists currently in the Department will be encouraged.

The appointment will commence from 1 October 1995 and will be for five years. Salary will be within the range £19,326 - £25,735 pa. Potential applicants are invited to visit the Department.

Applications in writing, with a CV and the names of two referees, to Professor J Peberdy, Department of Life Science, The University of Nottingham, University Park, Nottingham, NG7 2RD. For further details tel: 0115 951 3231. Fax: 0115 951 3253 or Email: plzjfp@plnl.life.nottingham.ac.uk

Closing date: 27 February 1995.

The University of Nottingham
[1963-084 (1995) : 70]
**Plant Virologist**  
HRI - East Mailing

A temporary Plant Virologist is required for 2 years in the Plant Pathology and Weed Science Department to develop diagnostic assays to discriminate strains of raspberry bushy dwarf virus and to collaborate in on-going soft fruit virus research.

Qualifications: Applicants should have a degree in a relevant subject and at least 3 years research experience. Experience in virology and the use of molecular biology techniques would be an advantage. Some field work will be involved.

Salary: £13,286 - £23,470 (Pay Band 6), initial salary determined by qualifications and experience.

For further details and an application form please write to the Personnel Office, Horticulture Research International, East Mailing, West Mailing, Kent ME19 6BJ, quoting ref 638/EM. The closing date for this post is 16 February 1995.

HRI is an Equal Opportunities Employer.

HORTICULTURE RESEARCH INTERNATIONAL  
SAC
The National College for Food Land and Environmental Studies

**LECTURER / ADVISER IN POULTRY PRODUCTION**

Applicants are invited for the above post in the Poultry Science Department, Auchincruive, Ayr from holders of a suitable degree or equivalent qualification preferably with postgraduate qualifications and/or relevant experience in Poultry Science. The post is to cover a period of maternity leave and will be to 24 December 1995 in the first instance.

Duties will include formal teaching to students and postgraduates and advisory work and related research / development work in Poultry Science.

The starting salary (depending on qualifications and experience) will be between £11,138 - £22,125.

Further particulars and application forms may be obtained from the Personnel Unit, The Scottish Agricultural College, Auchincruive, Ayr KA6 5HW by quoting reference number 95/01. Applications should be lodged not later than 20 February 1995.

SAC receives funding from the Scottish Office Agriculture and Fisheries Department [1963-086 (1995) : 70]
SENIOR LECTURER IN HUMAN NUTRITION AND FOOD
£23,412 - £30,264

Queen Margaret College is a growing university-sector institution located in Edinburgh.

Applications are invited for the above post, primarily to offer leadership in research in the Department of Dietetics and Nutrition and to teach at undergraduate and postgraduate levels. Applicants should have a postgraduate qualification, a substantial research portfolio (preferably related to food choice behaviour and its nutritional consequences) and teaching experience in the area of human nutrition and food.

The appointment will be offered on an initial fixed term (of up to three years) basis. Exceptionally, a longer or open-ended appointment may be considered. The title of Reader may be available to the holder of this post, if suitably qualified.

Further particulars and an application form can be obtained quoting reference no. DN12/94/23/NS from Gary Campbell, Personnel Officer, Queen Margaret College, Clerwood Terrace, Edinburgh EH12 8TS (031-317 3291 - 24 hour answering service), to whom completed application forms should be returned by Friday 24 February 1995.

Queen Margaret College provides higher education to students.

Queen Margaret College
EDINBURGH established 1875
UNIVERSITY OF CAMBRIDGE

Technical Officer in the Department of Engineering

A vacancy exists for a Technical Officer in the Department of Engineering’s Electronics Development Group. An enthusiastic electronics design engineer is required to support the work of the Department’s Electronics Development Group. The Group provides an electronics design/development/advisory service for the Department, and designs and builds many of the electronic systems used in research and teaching applications. Many such systems have an instrumentation element, and are computer-based. The successful applicant will have proven electronic design skills, and will report to the Senior Electronics Design Engineer. He or she will also have good interpersonal skills, and be able to relate well to academic staff, students, and technicians. Duties may include an element of laboratory teaching. Candidates should be qualified to at least first degree level in a relevant subject area.

The pensionable scale of stipends for a Technical Officer is £15,566 a year, rising by five annual increments to £19,326.

Further particulars may be obtained from the Acting Secretary of the Appointments Committee for Technical Officers, Dr M F Hunt, General Board Office, The Old Schools, Trinity Lane, Cambridge, CB2 1TT, to whom applications (two copies), including a full curriculum vitae and the names and addresses of three referees, should be sent so as to reach her by 28 February 1995.

The University is an equal opportunities employer.

University of Warwick/Rover Group
Department of Engineering

TEACHING COMPANY ASSOCIATE

To assist in the development of an alternative catalytic system for the control of exhaust emissions from internal combustion engines. An excellent opportunity for a high calibre individual to work within industry on a programme of catalyst preparation, coating of monolithic supports and testing. Aged up to 28, you should be self-motivated, ambitious and hold at least an upper second class degree. Experience of inorganic/colloidal chemistry or chemical engineering preferred. Opportunities available for registration for a higher degree.

The post is available for two years and salary will be on the Research Grade 1A scale: £13,941 – 20,953 pa.

Application forms (returnable by 22 March 1995) from the Personnel Office, University of Warwick, Coventry CV4 7AL (telephone 01203 523627) quoting Ref 26/4A/94 (please mark clearly on envelope).

An Equal Opportunities Employer.
UNIVERSITY COLLEGE LONDON MEDICAL SCHOOL  
Department of Epidemiology and Public Health  

Whitehall II Study - Researcher  

The Whitehall II study requires a researcher with an interest in social variations in cardiovascular disease. Applicants will ideally have a postgraduate degree, 2 years experience in clinical chemistry/endocrinology, and skills in research methods and computing. The Whitehall II cohort, set up in 1985, consists of 10,308 men and women working in the Civil Service from whom extensive biomedical data has been collected. The individual appointed will assist with both practical and academic tasks, involving biomedical aspects of the study. She / he will assist with the coordination of the next follow-up of the cohort in 1996-97.

Starting salary, according to age and experience, in the range £16,191 - £18,486 (RA1A Scale) + LA £2,134. Please apply for a job description to the Department (071-391-1268). Applications in writing with CV and 2 referees should be sent to Ms D. Marks, Department of Epidemiology and Public Health, UCL, 1-19 Torrington Place, London WC1E 6BT by Friday, 17 February 1995.

Working toward Equal Opportunity  
Ph.D. Studentship in Organic/ Polymer Chemistry

Research into Polymer Based Amino Acid Synthesis

This research will involve the creation of novel polymers functionalised with organometallic reagents for the asymmetric synthesis of enantiomerically pure un-natural amino acids. The project will involve both organic synthesis and polymer chemistry. The studentship is funded by the EPSRC through its Clean Technology Unit.

Potential candidates should have either a First or Upper Second Class degree in Chemistry, or a related subject.

Informal enquiries and requests for further details may be addressed to Dr Neil Thomas who can be contacted on (01225) 826143.

Applicants should submit a current curriculum vitae, and the names and addresses of two academic referees. These should be sent to Dr Neil R. Thomas, School of Chemistry, University of Bath, Claverton Down, Bath BA2 7AY.

Ph.D. Studentship in Inorganic Computational Chemistry

Applications are invited for a EPSRC Quota studentship on a research project involving computational studies on the properties and catalytic activity of heterosiloxanes containing transition metals. There will be an opportunity for some related synthesis and structural studies. The studentship is immediately available. Potential candidates should have a 1st or 2(i) Honours Degree in Chemistry, or a related discipline. Experience in computer modelling would be advantageous but is not essential.

Applicants should submit a CV with the names and addresses of two referees to Drs R. J. Deeth and B. J. Brisdon, School of Chemistry, University of Bath, Bath BA2 7AY. Informal enquiries may be made by telephone on Bath (01225) 826529, or by e-mail on R. J. Deeth@bath.ac.uk

Research Studentship in Polymer Science

Applications are invited for a Research Studentship in the School of Chemistry involving the study of recycling of polymers using high intensity ultrasound. Previous experience in the characterisation of polymeric materials would be an advantage.

The studentship is industrially funded and carries a stipend equivalent to that of an EPSRC ‘CASE’ studentship. It is available immediately.

Applications in the form of a CV with names of two referees should be sent to Dr Gareth J. Price at the School of Chemistry, University of Bath, Claverton Down, Bath BA2 7AY. Informal enquiries can be made by telephone (01225) 826504 or by e-mail G.J.Price@bath.ac.uk

NORWICH RESEARCH PARK

POSTGRADUATE STUDENTSHIPS IN SCIENCE
UNIVERSITY OF EAST ANGLIA GRADUATE SCHOOL

JOHN INNES CENTRE
The John Innes Centre was formed following the fusion of the John Innes Institute, the Cambridge Laboratory and the Nitrogen Fixation Laboratory. The Sainsbury Laboratory is also located at the Centre. The Centre is one of the leading plant and microbial research Centres in UK and Europe. Located on the Norwich Research Park and associated with the University of East Anglia it provides a stimulating and friendly environment for research. Students from the Centre are registered for their degree through the UEA Graduate School. Many aspects of plant and microbial genetics, molecular biology, biochemistry, physiology, protein structure, computing applied to biology, and cell biology are currently under investigation.

The Centre has funding for the following Ph.D. studentships starting in October 1995.
Biochemical compartmentation in lipid biosynthesis (S Rawsthorne & M J Hills)
Chemistry & molecular biology of fatty acid desaturases in plants (D J Murphy)
Isolation of ESD4, a gene that delays flowering in Ambidopsis (G Coupland)
Do homologues of the Arabidopsis co gene control photoperiod response in barley? (D Laurie & G Coupland)
Cloning an Arabidopsis gene involved in the control of flowering (C Dean)
Cell-density dependent regulation of gene expression in Rhizobium leguminosarum during legume modulation (JA Downie)
Molecular genetic control of inflorescence development (E Coen & R Carpenter)
Inhibition of plant gene expression associated with virus replication (A Manle)
Resistance transition in plants: investigation of a novel host – a virus molecular interaction (S Cowey)
Analysis of the expression of homeotic genes during compound leaf development (T H N Ellis)
Transcriptional organisation during epidermal development in Arabidopsis (P Shaw & L Dolan)

Sainsbury Laboratory
Analysis of resistance to plant viruses (D Baulcombe)
Molecular biology of saponin-detoxifying enzymes & their role in fungal pathogenicity to plants (A Osbourn & M J Daniels)
Induction of resistance in plants by bacterial pathogens (J M Dow & M J Daniels)

For further details and application procedure, contact Mrs Anne Williams, John Innes Centre, Norwich Research Park, Colney, Norwich NR4 7UH (Fax: 01603 456844)

UNIVERSITY OF EAST ANGLIA
Graduate study in: Biological Sciences, Chemical Sciences, Computing Sciences, Environmental Sciences, Mathematics, Physics.

Applications are invited from well qualified candidates for Ph.D., MPhil and MSc degrees in a wide variety of topics within the above subject areas. University and Research Council Studentships are available in many areas.

For further information, including a Postgraduate Prospectus please write, indicating your particular interests, to the Graduate School Office (Ref NS01), the Registry, University of East Anglia, Norwich, NR4 7TJ. E-mail: GRADUATE.ENQUIRIES@uea.ac.uk.

School of Biological Sciences
Ph.D. Studentships
A 3-year Ph.D. studentship funded by Bryan Gunn’s Leukaemia Appeal is available in the Francesca Gunn Laboratory in the School of Biological Sciences to start as soon as possible. The project is to work on the inhibition of the activity of certain oncogenes active in various common childhood leukaemias.

Closing date for applications: 23 February 1995.

Applications are invited for Ph.D. studentships associated with each of the listed projects, and other projects in the area of molecular biology, cell biology and population biology, to start in October 1995. The successful applicants will join research groups led by their supervisor and receive research training in disciplines appropriate to the subject.

Molecular Biology / Microbiology
- Molybdenum iron-sulphur proteins (B Berks)
- Inositol tetrakisphosphate binding proteins (A Dawson)
- Drought response genes from Arabidopsis (J G Turner)
- Role of mannitol dehydrogenase in plant disease (R P Oliver)
- Molecular studies of aerobic nitrate respiration (S Spiro)
- Mechanistic studies of a cytochrome cbb3 oxidase (C Greenwood)
- Structure function studies of plan saponinases (A Hemmings)
- Characterisation of ammonia monooxygenase (D Richardson)

Cell Biology
- Interaction of growth factor signalling pathways (R Warn)
- Lens epithelial growth and cataracts (G Duncan)

Population Biology
- Climate limitation in saltmarsh plants (A J Davy)
- Predicting the consequences of disturbance and predation on bird populations (W J Sutherland)
- Structure and dynamics of annual plant communities (A Watkinson)

Letters of application (together with a cv giving the names of three academic referees) and requests for further details of the projects listed above, and other projects, should be addressed to the School Clerk, School of Biological Sciences, University of East Anglia, Norwich NR4 7T3, UK Tel: (01603) 592254; fax: (01603) 592250.

School of Chemical Sciences
Applications are invited for Research Council and industry-sponsored research grants in support of Ph.D. degrees in the following areas:

- atmospheric chemistry, bioinorganic chemistry, colloid chemistry, molecular spectroscopy, organometallic chemistry, physical aspects of interfacial chemistry, synthetic inorganic chemistry, synthetic and physical chemical aspects of materials, synthetic medicinal chemistry, theoretical chemistry.

Applicants should hold or expect to be awarded First Class or Upper Second degrees. Research Council and ESF grants are available for applicants holding Lower Second Class, or better, degrees for taught MSc degrees in Biocolloid Chemistry and in Spectroscopic and Physical Methods of Chemical Analysis.

Further information can be obtained from Mrs D Pearce, Graduate Admissions Clerk (Ref GS/C01, School of Chemical Sciences, University of East Anglia (Tel: 01603 592017).

School of Environmental Sciences
The School of Environmental Sciences invites applications for the following research studentships. Applicants should have a good Honours degree in Physics, Chemistry, Biology, Geology, Geography, Environmental Sciences, Economics or a relevant Social Science discipline.
Cyclone development in the Mediterranean Basin (G Bigg & T Davies)
Asymmetric trends of maximum and minimum temperatures reconciling observational evidence with models (P Jones)
Desiccation in the Sahel (M Hulme & M Kelly)
Aerosol nitrate behaviour in the marine environment (T Jickells)
Concentrated electrolyte solutions in the atmosphere (P Brimblecombe & S Clegg)
Water mass formation in the northern North Atlantic (K Heywood)
Acoustics of cohesive sediments in estuaries (C Vincent)
Tolerant and non-tolerant estuarine polychaetes (A Grant)
Population dynamics of macrodecomposers (M Hassall)
Sediment distribution in high managed river channels (R Boar & R Hey)
Significance of groundwater flux/sea level rise in coastal aquifers (K Hiscock)
Calibration of palaeo-rainfall reconstructions (B Maher)
Diagenesis beneath major unconformities (A Kendall & G Harwood)
Geochemical tracing within Scottish Jurassic mudrocks (J Andrews & P Dennis)
Seismotectonics, Central Ionian Islands Triple Junction (P Burton & C Davenport)

Applications are also invited for one year MSc programmes in:
Atmospheric Sciences
Climate Change Environmental Sciences
Environmental Impact Assessment and Auditing
Hydrogeology

The School is the largest interdisciplinary institution in the UK devoted to environmental sciences. Rated Grade 5 in the HEFC research review, the School includes the Climatic Research Unit, the Centre for Social and Economic Research in Global Environment (CSERGE) and the Centre for Environmental and Risk Management.

For further details contact the Supervisor concerned or the School Clerk (Ref NS1), School of Environmental Sciences. Tel: (01603) 592544.

School of Physics

Research studentships are available in the following EPSRC and EU-supported areas:
Positron studies of condensed matter: sub-surface and interface phenomena (P G Coleman).
Laser spectroscopy of semiconductors: Raman spectroscopy and magneto-optical studies of advanced epitaxial semiconductors and quantum well structures (J J Davies & D Wolverson)

For further details, please contact Professor J J Davies (Tel 01603-592570, Fax 01603.259515, E-Mail J.J.Davies@uea.ac.uk). and World-wide Web http://www.uea.ac.uk/menu/acad-depts/phy/phy_welc.html.

The UEA Graduate School, promotes excellence in postgraduate research and training and includes all the Schools of Studies of the University and the John Innes Centre, the Sainsbury Laboratory and the Institute for Food Research (Norwich Laboratory).
The Norwich Research Park was established to promote and enhance the study of plant, microbial and food science, nutrition and health care. Collaborative links exist between the University of East Anglia, the John Innes Centre (which incorporates the John Innes Institute, the Nitrogen Fixation Laboratory and the Cambridge Laboratory), the Sainsbury Laboratory, the Institute of Food Research (Norwich Laboratory), the Ministry of Agriculture, Fisheries and Food CSL Food Laboratory and the British Sugar Technical Centre. With more than 1000 researchers and technicians the Park constitutes one of Europe’s largest centres in plant and food science. Some 300 full and part-time students in the organisations of the Park are registered with UEA for postgraduate degrees.

The Institute’s Clinical Division is seeking an experienced clinical trials manager for a number of its clinical studies, being undertaken in both the UK and abroad, investigating the prevention and treatment of thromboembolic diseases. The clinical trials manager will be responsible for the initiation, monitoring and reporting of phase II - IV clinical studies in accordance with EC-GCP guidelines. The successful candidate will have a life science or medical degree and a minimum of four years’ experience in clinical research. Previous experience of collaborating with pharmaceutical companies will be an advantage as will knowledge of a second European language. We require someone who is able to demonstrate excellent organisational and communication skills and who can work both as a team player and on their own initiative when necessary.

The position will be on a rolling contract basis and salary will be in the range £26,511 - £30,190. A contributory pension scheme is available.

Applications in the form of a c.v. stating current salary details and the names of two referees should be sent to the Institute Secretary, Thrombosis Research Institute, Manresa Road, London SW3 6LR by no later than 16 February 1995.

ANIMAL HEALTH TRUST

MRI PHYSICIST

Applications are invited for the above post at the Animal Health Trust, a veterinary clinical referral centre and research establishment. The successful applicant will have responsibility for further development of the clinical MRI facility, in particular the design of suitable RF coils for a variety of veterinary patients. He/she will also be encouraged to pursue their own research interest, working with scientists from Surrey Medical Imaging Systems Limited (Guildford).

Candidates should possess a suitable degree; a Ph.D. is preferable but not essential.

Salary is commensurate with age and experience and is based on Research Council pay scales. Further information from Ruth Dennis MRCVS. Application forms available from The Personnel Manager, PO Box 5, Newmarket, Suffolk CB8 7DW. Tel: 01638 661111 (Ref: 88/94). [1963-094 (1995) : 73]
THE BRITISH JOURNAL OF NUTRITION

EDITORIAL ASSISTANT

Candidates should have at least a BSc in Nutrition with a wide background knowledge of the subject and a good command of written English. Experience in computing and word processing would be an advantage.

The successful candidate will be largely responsible for the smooth operation of the Editorial Office publication procedures, including dealing with authors and referees, and liaising with printers to ensure that publication schedules are met.

Starting salary, depending on experience, will be in the range £14,500 - £16,500.

Applications, with a full CV and names and addresses of two referees, should be sent to Dr I. E. Sambrook, Executive Editor, British Journal of Nutrition, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ.

The Editorial Office operates a no-smoking policy.
Assistant Freshwater Biologist

For the Tweed Foundation (the fisheries research and advisory body for the Tweed Fisheries District).

Should have a sound background in freshwater biology with some specialisation or experience in freshwater fisheries research or management. A thorough knowledge of the natural history and identification of freshwater and bankside plants and animals is also required as is a good standard of literacy.
Familiarity with computers is expected.

Expertise in any of the following would be an advantage: Genetics, Statistics, Soil Science, Catchment Management, Geomorphology/Hydrology, GIS, Radio-tracking.

For further information and an application form, apply to the Tweed Foundation, Drygrange Steading, By Melrose, Roxburghshire TD6 9DJ. Telephone 01896 848271.
Leicester University
Department of Pathology

RESEARCH TECHNICIAN
One Year Post

Applications are invited for this temporary MRC funded post to commence as soon as possible. The successful applicant will join the Molecular Pathology Research Group at Leicester University and will work on the measurement of extracellular matrix mRNA levels in single human renal glomeruli. Candidates should preferably have experience of RNA extraction and RT-PCR. Salary Grade D £11,399 to £13,610 pa.

Written applications a CV and the names and addresses of two referees should be sent to: Dr P Furness, Department of Pathology, University of Leicester, Robert Kilpatrick Clinical Sciences Building, PO Box 65, Leicester Royal Infirmary, Leicester LE2 7LX. Further information can be obtained by telephoning Dr Furness or Dr J Shaw on 0116 252 3220. Fax: (0116) 252 3274. Closing date for applications is 23rd February 1995.

COURSES & EVENTS

UNIVERSITY OF KENT
AT CANTERBURY
RESEARCH SCHOOL OF BIOSCIENCES

Postgraduate Training Opportunities
The Research School of Biosciences at the University of Kent has over 160 research staff including more than 75 postgraduate students currently in training. It offers a lively and stimulating research environment within internationally recognised research programmes, well equipped laboratories and a broad programme of graduate training.

MSc IN BIOTECHNOLOGY
Provides an up-to-the-minute training by building on the research expertise in the Research School of Biosciences. Students follow a core programme in Biotechnology in the first term focusing on both theoretical and practical aspects of molecular biology, microbial physiology, biochemical engineering and research skills. In the second term students specialise in one of three areas:

• Environmental Biotechnology
• Fungal Technology (taught in conjunction with the International Mycological Institute)
• Pharmaceutical Biotechnology

The final six months is devoted to a full time research project - examples of research areas are shown under Ph.D. Research Projects.
Five Research School bursaries are available. Applicants should have, or expect to obtain, at least a lower second class honours degree. Further details and application forms from the address below.
Closing date 17 March 1995.

MRes IN BIOTECHNOLOGY
The Research School of Biosciences has been selected as one of the institutes which will pilot this new and prestigious route for postgraduate training. Five BBSRC studentships are available from October 1995. The course provides a training in research techniques and equips students with the transferable skills and knowledge needed for a research career in academia or industry. It provides teaching in the core elements of Biotechnology, and gives students an opportunity to complete an in-depth 36-week research project. See Ph.D. Research Projects for details of topics and supervisors.

The MRes degree will serve as a basis for direct entry into a career which involves a working knowledge of scientific research or as a ‘value added’ qualification for a further three-year studentship leading to a Ph.D. Candidates for Ph.D. studentships who possess an MRes degree will have demonstrated their ability in conduct research. The MRes pathway thus offers the bonus of a structured programme of research, an organised set of taught courses, and the opportunity of a 12-month period to gain the MRes degree before becoming finally committed in a full Ph.D. programme. Students who successfully complete the MRes programme will be given priority when we award our numerous Quota studentships for Ph.D. study. Further details from the address below. Closing date 17 March 1995.

Ph.D. RESEARCH PROJECTS
The Research School is generally awarded about 20 three-year Ph.D. studentships each year including 10-15 CASE studentships which carry an extra stipend from the collaborating company.

Applications are invited for Ph.D. study in the following areas:

Dr AJ Baines Control of plasma membrane structure by the cytoskeleton in neurons.
Dr PJ Blower Novel cancer-targeting radiopharmaceuticals for imaging and therapy.
Prof A T Bull Discovery of deep sea microorganisms for biotechnology.
Dr A W Bunch Regulatory factors controlling antibiotic production in bacteria.
Prof R G Burns Environmental microbiology-microbial activity in biofilms & bioremediation.
Dr M J Carden Cell and molecular biology of cytoplasmic chaperonins in neurons.
Dr J C Dodd Mycorrhizal fungi in global ecosystems.
Prof R B Freedman Molecular chaperones & protein folding by protein disulphide-isomerase.
Dr DJ Hardman Applied and fundamental aspects of microbial dehalogenation.
Dr T R Hirst Folding, assembly & secretion of proteins by bacteria; bacterial vaccines.
Dr S M Jarvis Mammalian and parasitic purine membrane transporters.
Dr P Jeffries Environmental mycology & plant-fungal interactions.
Prof C J Knowles Biotransformations to form chiral lactones or nitriles; biodegradation of PCBs.
Dr L H Naylor Molecular analysis of neuroendocrine gene regulation/brain receptor function.
Dr G K Robinson Monitoring genotoxicity of chloroorganics in the environment.
Dr B C Rooney Exploring the role of pregnancy-specific β1 glycoproteins in cancer.
Dr I Salmon Intensification of animal cell growth.
Prof P G Strange Molecular biology of brain receptors for neurotransmitters.
Dr H M Thomas Mammalian facilitative glucose transporters.
Dr M F Tuite Prion-like proteins in yeast; regulation of translation termination in yeast.
Dr C Wilson Molecular and genetic analysis of photoreceptor axon guidance in Drosophila.

APPLICATIONS
Applicants for MRes or Ph.D. should have, or expect to obtain by July 1995, a first or upper second class degree in a relevant subject.

Applications (including a brief CV and the names and addresses of two academic referees) to Dr A N MacGregor, Research School of Biosciences, Biological Laboratory, The University, Canterbury, Kent CT2 7NJ, Tel 01227 764000, ext 3025, email: A.N.MacGregor@ukc.ac.uk, from whom further details may be obtained.

[1963-100 (1995) : 74]
MSc Course in Environmental Analysis and Assessment

This exciting new intercollegiate course is offered at the neighbouring campuses of Imperial College at Silwood Park, Ascot, and Royal Holloway College, Egham.

The assessment and regulation of environmental contaminants depends upon analysis and physical understanding of pathways. The important techniques for measuring trace elements, organics and radioactivity are covered in depth, with practical case studies. Pathways of contaminants will be traced, with their interactions and effects, and case studies will relate monitoring needs to legislative needs. Between them the two Colleges offer a uniquely wide range of analytical and field facilities. The course consists of two terms of taught units followed by a five month project and can be taken full-time in 12 months or part-time over two or three years.

For further information write to: Student Admissions Officer, Registry, Imperial College of Science, Technology & Medicine, Exhibition Road, London SW7 2AZ.

The BBSRC interdisciplinary Research Centre at UCL offers a route tailored to biological scientists who wish to help the biotechnological-based industries harness new discoveries in biology.

The MSc in Bioprocessing is an excellent preparation for entry to the bioindustry or to doctoral training. In a new enhanced form it has recently received a special Research Council award of studentships. Half the calendar year is committed to courses on bioprocessing and training in transferable skills and the remainder to research.

As the UK’s interdisciplinary Research Centre, UCL is superbly equipped and the last phase of an additional £12m facility has recently been completed. Project work is done with the multidisciplinary IRC research team, whose current targets include virus-like particles for vaccines, protein engineered enzymes for industrial catalysis and gene production for therapy.

Applications, with a CV, should be sent to the Director, Professor Peter Dunnhil, The Advanced Centre for Biochemical Engineering, Department of Chemical and Biochemical Engineering, University College London, Torrington Place, London WC1E 7JE.

UCL
UNIVERSITY COLLEGE LONDON

Will again offer the following one-year courses:
MSc in Conservation
MSc in General and Medical Microbiology

Closing dates are 15 February 1995 and 30 June 1995 respectively. For further information please contact the Department of Biology, Darwin Building, University College London, Gower Street, London WC1E 6BT. Tel: 0171-380 7098, fax: 0171-380 7096.
THE UNIVERSITY OF NOTTINGHAM
MSc in Environmental Science

The University of Nottingham offers a one year MSc course in Environmental Science. The course is designed to provide the quantitative, analytical and numerical skills necessary to tackle multidisciplinary environmental problems encountered by consultancies and national bodies.

The taught element of the course (60%) is organised on a modular basis whilst the remainder is taken up by seminars, a syndicate exercise and a project. A wide range of modules is available including: Air Pollution, Soil & Water Pollution and Reclamation. Environmental Measurement, Management of Energy Resources, Contaminated Land and Environmental Assessment.

The course will involve students from a wide range of relevant subjects in order to encourage multi-disciplinary cooperation. Some grants are available.

For a prospectus and an application form, write to The Admissions Tutor. MSc in Environmental Science. The University of Nottingham. Sutton Bonington Campus. Loughbouroughs. Leicestershire LE1 2 SRD, UK. Tel: 0115 951 6259 or 951 6260. Fax: 0115951 6261.

The University of Nottingham aims to provide high quality teaching and research [1963-104 (1995) : 75]
MSc Degree Course in Practical Medical Microbiology
A course leading to the degree of Master of Science will commence in October 1995.

The one-year course of full-time study will cover: bacteriology, virology, parasitology, mycology and immunology and teaching will comprise of lectures, tutorials and practical classes.

It is envisaged that a course will commence in October each year.

Applicants should have a university degree in any one of the following subjects: medicine, dentistry, veterinary medicine, microbiology, medical laboratory sciences or pharmacy.

There is no internal funding for this course and all applicants must be self-financing or supported by international or national government agencies.

Those interested should write to the Head of Department, Department of Medical Microbiology, University of Wales, College of Medicine, Heath Park; Cardiff CF4 4XN. Wales, UK.

UNIVERSITY OF LEEDS
Research Opportunities
DEPARTMENT OF EARTH SCIENCES

Sediment Geochemist  Ref: 49/59
This post is available from 1 April 1995 for a fixed period of up to 2 years to work on a project concerned
with the chemical composition and origin of fine grained sediments in UK coastal waters, in
collaboration with SOAFD Marine Laboratory, Aberdeen. The duties will include planning and
execution of field programmes, laboratory analytical work primarily for trace metals and supporting
parameters, and the presentation of results in reports/publications.

Applicants should have a Ph.D. in a relevant field, experience of field and laboratory techniques
including AAS and preferably ICP-AES with a proven ability to meet deadlines. A good research and
publication record would be an advantage.

Salary will be on the scale for Research Staff Grade 1A (£13,941 - £20,953) according to qualifications
and relevant experience.

Informal enquiries about the post may be made to Dr Michael Krom, tel: 0113 233 5213 e-mail
m.d.krom@earth.leeds.ac.uk

DEPARTMENT OF PURE AND APPLIED BIOLOGY AND DEPARTMENT OF GENETICS

Two Postdoctoral Research Fellows
These posts are available in two related projects examining developmental gene expression in
Caenorhabditis elegans. This species is an important model system for the study of animal development
and for genome sequencing.

Post One - (Ref: 50/44) funded by the EC under the Human Capital and Mobility scheme, spending one
year in Leeds and one year in the Max-Planck-Institut für Biochemie, Martinsried, Germany. The
scheme is open to applicants from the 15 European Member States, plus Norway and Iceland, however
because the programme supports mobility of researchers between European Countries, applicants from
Germany and UK where the post is being held are not eligible to apply. Salary will be 26184 ECU pa.

Post Two - (Ref: 50/45) funded by the MRC and based at Leeds, this is a fixed term post for a period of
2.5 years. Salary will be on the scale for Research Staff Grade 1A within the range £15,566 - £17,007p.a.
Applicants for both posts should have a relevant Ph.D.

Informal enquiries about the posts may be made to Dr I A Hope, Department of Pure and Applied
Biology and Department of Genetics, The University of Leeds, Leeds LS2 9JT, UK tel: 44 (0) 113 233
2889, e-mail i.a.hope@leeds.ac.uk

DEPARTMENT OF BIOCHEMISTRY AND MOLECULAR BIOLOGY

Research Assistant  Ref: 83/164
This post, funded by the Wellcome Trust, is available immediately for a fixed period of 4 years to
investigate the structure and function of a class of proton-translocating membrane proteins. The project
will use techniques in mutagenesis, protein expression \textit{in vitro} and \textit{in vivo}, coupled to functional
measurement, protein chemistry and electron microscopy, in order to refine our appreciation of the 3-D
structure and mechanism of the 16 kDa proteolipid.

Applicants should have a good honours degree in biochemistry, molecular biology or related subjects.
Experience in molecular biology and a strong interest in membrane protein biochemistry would be an advantage.

Salary will be on the scale for Research Staff Grade 1B (£13,941 - £15,566) according to qualifications and relevant experience.

**Postgraduate Student**

This post, funded by Unilever is available immediately for 3 years to investigate the structure, organisation and modification of components of the hair fibre surface. The project will use advanced techniques in protein chemistry and analysis (sequencing, modification, mass spectrometry) to further our understanding of hair structure at the molecular level with a view to the development of advanced hair treatment.

Applicants should have a good honours degree in biochemistry, molecular biology or related subjects. An interest in modern techniques in protein chemistry would be an advantage.

Payment will be via non-taxable stipend starting at £6,800.

Informal enquiries can be made to Dr M Harrison, Dr J Keen or Professor J Findlay tel: 0113 233 3029 and application forms and further particulars for the studentship only may be obtained from Professor Findlay's Office, Department of Biochemistry and Molecular Biology, The University of Leeds, Leeds LS2 9JT.

Application forms and further particulars for all posts (except the studentship) may be obtained from the Personnel Office (Academic Section), The University of Leeds, Leeds LS2 9JT, tel: 0113 233 5771, e-mail e.f.moran@registry.leeds.ac.uk quoting the appropriate reference number.

Closing date for applications: 30 March 1995.

The University of Leeds promotes an Equal Opportunities Policy. Promoting excellence in teaching, learning and research.

AIRCRAFT RESEARCH ASSOCIATION LIMITED

ARA is a leader in the field of aerodynamic research and wind tunnel testing, located on the northern side of Bedford.

PROJECT SUPERVISOR IN COMPUTATIONAL FLUID DYNAMICS

The Research Group at ARA has an international reputation for pioneering work in Computational Fluid Dynamics and we are looking for highly motivated staff who can maintain this standing.

Applicants should possess a degree or equivalent in Mathematics, Aeronautical Engineering or Computer Science with appropriate experience in CFD methods and aerodynamics.

Experience in unstructured mesh generation or parallelisation techniques would be of particular interest.

The Company offers competitive salaries, profit related pay scheme, generous leave entitlement, a contributory pension scheme, subsidised dining room facilities and a medical scheme.

Applications in writing enclosing CV to:
Company Secretary Aircraft Research Association Limited Manton Lane Bedford MK41 7PF
NEW DEVELOPMENTS . . . NEW OPPORTUNITIES!

Already a world leader in the supply of offset plates and other specialised products to the printing industry Horsell Graphic Industries is a highly successful Company, who enjoy a deserved reputation for quality and innovation.

Using state-of-the-art equipment in a modern laboratory, we undertake extensive R & D on printing plate products, processing chemicals and equipment and also on the electrochemical and web coating processes used in their manufacture.

Continuing research initiatives, backed by substantial investment in order to meet the growing developments in computer-to-plate imaging, means we're now looking for additional technical/scientific staff to join our talented and expanding R & D team here in Leeds.

**Formulation Scientist**

A key role in product development, leading improvements in the process formulation of existing and new lithographic plate coating solutions (organic and aqueous), emulsions and aqueous based developing solutions. We're looking for a good Honours Degree, preferably a Ph.D. in chemistry/applied chemistry or physics and research based experience in the physical chemistry of colloids. Experience in the dissolution and solution behaviour of polymers/phase control of polymer dispersions would be an advantage.

**Analytical Chemist**

Involved in the application of instrumental analytical methods in research investigations and the development of methods for improvement of raw material quality assurance and manufacturing process control, we expect you to possess a good Honours Degree/MSc and preferably have relevant experience. Knowledge of separation techniques such as HPLC and GPC would be an added advantage.

**Process Development Chemist**

As a well qualified graduate, with a good Honours Degree in chemistry/applied chemistry, ideally supported by 1-2 years relevant industry experience, you'll be a key member of a mixed discipline team responsible for establishing process improvements - requiring a good understanding of the interaction of the product and the process from the chemical viewpoint.

**Graduate Scientist**

Working in the areas of product design and manufacturing process development, using chemical analytical methods, you will either be a new/recently qualified graduate in a relevant chemistry or applied chemistry discipline, or alternatively have a HND, backed by practical experience in a related environment, such as analytical chemistry, surfactant, colloids, surface engineering, adhesives or coating technology.

For all positions we offer excellent rewards, which include a first class salary, excellent working conditions and the type of environment that encourages real personal development.

So, if you're a first class scientist, currently looking for a long term career within a progressive and forward looking industry, then we'd like to hear from you.

To apply, please write with full CV stating position of interest to: Caroline Stephenson, Human Resources Department, Horsell Graphic Industries Limited, Nepshaw Lane South, Gildersome, Morley, Leeds, West Yorkshire LS27 7JQ. Closing date Monday 13th March, 1995.

Horsell

INTERNATIONAL PAPER IMAGING PRODUCTS DIVISION
JANSSEN-CILAG Ltd

MEDICAL INFORMATION OFFICER
A high-profile technical support role.
Janssen-Cilag Ltd, one of the UK’s fastest growing pharmaceutical companies, is an innovative research-based organisation with products covering a wide and expanding range of therapeutic areas. Promotion creates this opportunity for a Medical Information Officer within the Medical Affairs Department of the Company. Dealing mainly with doctors, pharmacists and representatives, you will handle medical and technical enquiries from both inside and outside the company, fulfil a drug awareness function, prepare technical summaries and assist with drug safety monitoring.

You should have a degree in pharmacy, life sciences or a paramedical qualification and some experience of working in the pharmaceutical industry or healthcare sectors. Experience of patient care, computer systems and on-line searching would be an advantage, but full training will be provided, if necessary. You will need first-class verbal and written communication skills and the ability to work with complex data in a demanding environment.

Join us and you will be working as part of a highly professional team in a particularly interesting and challenging area of the industry. In return, we offer a competitive salary, and all the benefits associated with a major healthcare company based in a pleasant site in rural Buckinghamshire.

For further information please contact Alan Jones, Medical Information Manager on 01494 567581 or send you cv to Jaque Mackinson, Human Resources Manager, Janssen-Cilag Ltd, PO Box 79, Saunderton, High Wycombe, Buckinghamshire HP14 4HJ. Telephone: 01494 567459. Closing date for receipt of applications 17 March 1995.

INNOVATIVE PRODUCTS, EXCELLENT OPPORTUNITIES

JANSSEN-CILAG Ltd
AUSTRALIAN NUCLEAR SCIENCE & TECHNOLOGY ORGANISATION

Executive Director

ANSTO wishes to appoint an Executive Director to give leadership to and manage Australia's national nuclear science organisation at Lucas Heights Research Laboratories in Sydney, Australia.

The Executive Director will provide the vision for ANSTO and will plan and manage the overall direction for research, operations, financial and human resource management and communications.

ANSTO has important relationships with international safety and regulatory agencies. It is a frequent source of information and advice to government on nuclear matters. As the manager of several national facilities ANSTO provides resources to and often collaborates with universities and other science organisations.

The Executive Director is a member of the Board of Directors and is accountable to the Board for ANSTO’s performance.

A well established record of achievement in executive management is required. Extensive experience in nuclear science management, research and technology will be highly regarded. The Executive Director will also be responsible and accountable for the safe operation of all nuclear plant and other complex facilities.

The ability to develop appropriate strategies within budgetary contexts to balance national interests and short/long term perspectives is necessary. A high level of interpersonal skills and an ability to communicate at all levels will be evident. An understanding of the use of nuclear science in industry and the structure of Australian industry would be desirable.

ANSTO operates under a continual change management process and highly developed skills to achieve culture change are essential. Demonstrated skills and experience in negotiation/conflict resolution and an ability to be adaptable and flexible in approach are required. The Executive Director undertakes a lead role in negotiating and liaising at all levels of executive government.

The remuneration for the position is set by the Remuneration Tribunal. The salary is A$120,000 pa and a performance based payment of up to A$20,000 may be payable depending upon the achievement of agreed performance criteria. Other benefits include a fully maintained car and contributory superannuation.

Enquiries in the first instance may be made to: Mr Rodney Watson, Director Personnel and Services, ANSTO on telephone 61 2 717 3815, fax 612 543 7908.

Written applications are to be made to: Mr R. Ward-Ambler, Chairman, ANSTO, Private Mail Bag 1, Menai, NSW 2234, Australia, by 24 March, 1995.

ANSTO is an equal opportunity employer.

AUSTRALIAN NUCLEAR SCIENCE & TECHNOLOGY ORGANISATION
Smoking is prohibited in the workplace.
An endeavour of magnitude in an era of revelation.

Modern medicine stands on the threshold of a new era of insight into the molecular pathology of disease, catalysed by the dramatic pace of progress in genomics. At SmithKline Beecham, advanced genomics research joins the myriad of other disciplines needed to discover pioneering drugs, vaccines and diagnostic tests.

Pharmaceutical research has made profound contributions to global health and quality of life over the past century. The quest for tomorrow's medicines will require the resolution of problems of daunting complexity. However, this challenge can be faced in an environment of unprecedented scientific progress and the prospect of elucidation of the fundamental regulatory biological processes responsible for health and disease.

If you believe that your skills will enable you to contribute to the challenging endeavour of the discovery and development of 21st-century healthcare, please write to: SmithKline Beecham Pharmaceuticals, Divisional Personnel, Dept. NS3/4, New Frontiers Science Park (NO.) Cold Harbour Road, The Pinnacles, Fourth Avenue, Harlow Essex CM 19 5AD.

Challenging the natural limits.
Ralph Mercer, Photo Illustration, 1990.
institute of food research

The Institute of Food Research has been successful in winning MAFF support for new projects in several scientific areas. As a consequence applications are invited for the following posts:

**MOLECULAR GENETICIST** (N12/95)

To join an established team working on the genetics of lactic acid bacteria. The project is to conduct a quantitative investigation of the horizontal spread of DNA from genetically engineered micro-organisms in the gastro-intestinal tract. The project is funded until 31.03.96.

Applicants should have a first or upper class honours degree in a biological subject and at least 2 years post-graduate experience.

Starting salary will be in the range £13,286 - £18,378 p.a. depending on qualifications and experience.

**NUTRITIONIST/DIETICIAN** (N19/95)

To join a new research team working on the effects of dietary fatty acids on human lipoprotein metabolism. This project will contribute towards the team's work on the relationship between dietary lipids and human health. The project is funded until 31.03.98.

Applicants should have a first or upper second class honours degree in nutrition and a state registration in dietetics. Previous experience in running human feeding trials would be an advantage.

Starting salary will be in the range £13,286 - £18,378 p.a. depending on qualifications and experience.

**CELL BIOLOGIST** (N20/95)

To join a new team working on the effects of dietary fatty acids on the human monocyte LDL receptor. This project will contribute towards the team's work on the relationship between dietary lipids and human health. The project is funded until 31.03.98.

Applicants should have a first or upper second class honours degree in Biochemistry or a related subject. Previous experience in cell culture techniques would be an advantage.

Starting salary will be in the range £11,361 - £15,712 p.a. depending on qualifications and experience.

**BIOCHEMIST/CHEMIST** (N21/95)

A Research Scientist is required to join the Cell Structure and Function Group to work on a project concerned with the development and application of stable isotope techniques to study folate absorption and metabolism in humans. Experience in the use of high performance liquid chromatography procedures for the separation and quantification of folates in foods and/or biological samples is required. Additional experience in stable isotope techniques would also be a benefit but not essential as training will be provided in mass spectrometry and combined LC-MS procedures. A willingness to take a leading role in the recruitment of human subjects is essential. Close collaboration with the Cell Structure and Mass Spectrometry Groups at Norwich, St Thomas's Hospital, London and the Department of Chemistry, Exeter University, is planned. The successful candidate will be expected to spend some time at St Thomas's Hospital where part of the work will be undertaken. The project is funded to 31.03.98.

Applicants should have a first or upper class honours degree in Biochemistry, Chemistry or Nutritional Sciences and at least two years relevant post-graduate experience.

Starting salary will be in the range £11,361 - £15,712 p.a. depending on qualifications and experience.
POLYMER CHEMIST (R5/95)

A Polymer Chemist is required to work on the development of new polymeric materials with the aim to improve/facilitate the analysis of dioxins in food samples. The current method has been designed around a highly specific chromatographic procedure, the medium for which is no longer commercially available. More specifically, the work will involve the synthesis and vigorous testing of polymers in close collaboration with the MAFF Central Science Laboratory at Norwich. The work is funded until 31.03.97.

A Ph.D. in organic polymer synthesis is required together with at least two years of relevant postdoctoral experience.

Starting salary will be in the range £13,286 - £18,378 p.a. according to qualifications and experience.

ANALYTICAL CHEMIST (R6/95)

An Analytical Chemist is required to work for 11 hours per week to provide technical support for a project on the development of polymeric materials for the analysis for chemical contaminants in foods. The work will mainly involve the characterisation of binding properties of the polymeric materials obtained using HPLC and GC. The post will be based at the MAFF Central Science Laboratory in Norwich. The work is funded until 31.03.96.

Starting salary will be in the range £3,377 - £4,671 p.a. according to qualifications and experience.

For posts N 12/95, N 19/95, N20/95 and N21/95 please apply using an application form obtainable from the Laboratory Personnel Office, Institute of Food Research, Norwich Laboratory, Norwich Research Park, Colney, Norwich NR4 7UA or telephone (01603) 255348. For posts R5/95 and R6/95 please apply to the Laboratory Personnel Office, Institute of Food Research, Reading Laboratory, Earley Gate, Whiteknights Road, Reading RG6 2EF or telephone (01734) 357260. Please quote the relevant reference number. Closing date 17 March 1995.

ifr
An equal opportunities employer

The Norwich Laboratory is part of the Norwich Research Park, and the Reading Laboratory is situated on the University of Reading campus.

[1967-007 (1995) : 64]
"The strength of an organisation can be measured by the scope of its products. At Genzyme we are developing a range of innovative health care products and services that are enabling us to achieve success on a global scale.” Due to continuing investment and expansion at our West Malling and Maidstone sites, we have vacancies for the following positions.

**PRODUCTION TECHNICIANS (SHIFT)**
Based at our production facilities at Maidstone and West Malling, you will be involved in manufacturing Diagnostic Enzymes and Therapeutic products to cGMP/ISO9001 standards. Working within a small but dedicated team, you will be highly motivated to achieve these results.

**FERMENTATION TECHNICIANS** Ref: 2806
To assist in all operational aspects of running fermenters from 5 Lt to 6000 Lt with some involvement in primary downstream processing tasks. Suitable applicants will be educated to degree level or equivalent in Microbiology or a related subject. Previous experience of operating large scale fermenters is desirable.

**CHROMATOGRAPHY TECHNICIANS** Ref: 2807
Your role will be to support the chromatography Technician in Chromatographic Separation from 10 Lt to 300 Lt scale with some involvement in secondary downstream processing tasks. Applicants will be educated to degree level or equivalent in Biochemistry or a related subject. Previous experience of operating large scale Chromatography columns is desirable.

**PLANT TECHNICIANS** Ref: 2808
You will be involved in supervising downstream processing activities. Previous experience of large scale centrifugation, ultra filtration and batch chromatography are desirable.

We are seeking candidates educated to degree level or equivalent with a minimum of three years' relevant manufacturing experience.

**PROCESS TECHNICIANS** Ref: 2809
You will be involved in all aspects of downstream processing. Previous experience of large scale centrifugation, ultra filtration and batch chromatography are desirable.

Educated to at least HND/HNC level in a life science with a minimum of two years' relevant manufacturing experience.

**QUALITY ASSURANCE**
The Quality Assurance Department is a key component in the evaluation of all products produced by this organisation. Genzyme Biochemicals is currently working towards their ISO9001 accreditation to enhance cGMP.

Working within a disciplined team you will have to work accurately with minimum supervision and possess good documentation and communication skills.

**QUALITY ASSURANCE SCIENTIST** Ref: 2810
This position would suit a new graduate in Biochemistry or a similar discipline, some experience in the use of Spectrophotometers HPLC and Electrophoresis would be an advantage. Duties will include the analysis of a wide range of finished products some raw materials and intermediates and blending of final batches.

**QUALITY ASSURANCE TECHNICIAN** Ref: 2811
Providing analytical support to therapeutic processes, you will be required to perform chemical and micro biological monitoring of the purified water system as well as assisting in their environmental monitoring programs within the fermentation facility.

Suitable candidates will be qualified to BTEC HND/HNC level in a science subject and have some experience of microbiological techniques. Knowledge of a cGMP within a pharmaceutical environment would be a distinct advantage.

KELLY SERVICES

All the above positions carry competitive salaries and benefits which include holiday equivalent to 25 days, pension scheme, employee share purchase scheme, prime health care and relocation assistance.

Kelly Services are co-ordinating these positions on behalf of Genzyme Biochemicals. Please send a C.V. indicating the appropriate reference number to: Emma Comber, Senior Manager, Kelly Services, 16 Earl Street, Maidstone, Kent ME14 1PP.

Application forms can be obtained by phoning 01622 686333, quoting Genzyme.

Closing date: 17th March 1995.

THE MEDICAL COLLEGE OF ST BARTHOLOMEW'S HOSPITAL
(University of London)
West Smithfield, London EC1A 7BE
DEPARTMENT OF TOXICOLOGY

POSTDOCTORAL RESEARCH ASSISTANT IN MOLECULAR AND CELL BIOLOGY
Salary: £16,075-£18,325 pa inc

A two year postdoctoral position, funded by Unilever Research, is available immediately within an established molecular toxicology research group. The successful applicant should have expertise in the techniques of culturing and characterising primary cells particularly for their drug metabolising capabilities. Experience of cell immortalisation techniques is highly desirable. In addition to a high degree of technical competence good communication skills are essential as close liaison with medical staff within several hospital departments will be necessary.

The main aim of the project is to isolate, characterise and immortalise human epithelial cells for use in studies of pulmonary and colonic xenobiotic metabolism and toxicity.

It is anticipated that the appointee will have the opportunity to spend three months at the Environmental Safety Laboratory at Unilever Research near Bedford.

Informal enquiries can be addressed to Dr Colin Bingle on 0171601 8616. Applications in the form of a CV with the names of three referees should be submitted by 16 March 1995 to the Personnel Department, The Medical College of St Bartholomew's Hospital at the above address.

Working towards Equal Opportunities.
MOLECULAR BIOLOGIST

The goal of this EU funded BIOTECH project is to design and produce enzymes with modified specificity by manipulation of the catalytic and starch binding domains of barley a-amylase and Aspergillus niger glucoamylase using site directed mutagenesis. The resulting protein will be analysed by a variety of physical and biochemical techniques. The post will require the successful candidate to liaise closely with partners in France, Denmark and Germany including regular review meetings. Some supervision of staff in molecular biology will also be involved. This is a 2 year term appointment.

Applicants should have a first or upper second class honours degree in biochemistry with at least 2 years' post-graduate experience and preferably a Ph.D. Experience in molecular biology is highly desirable.

Starting salary will be in the range £13,286 - £18,378 p.a. depending on qualifications and experience.

Please apply using an application form obtainable from the Laboratory Personnel Officer, Institute of Food Research, Norwich Laboratory, Norwich Research Park, Colney, Norwich NR4 7UA or telephone (01603) 255348 quoting ref: N42/94. Closing date 15 February 1995.

ifr

The IFR is an equal opportunities employer
THE NORWICH LABORATORY IS PART OF THE NORWICH RESEARCH PARK
Based in Harrogate, Hazleton Europe is a major subsidiary of the world's largest provider of contract research to the chemical, agrochemical and pharmaceutical industries and is a leader in the field of product safety evaluation. As we continue to expand, new opportunities have arisen within our Metabolism and Environmental Chemistry division for experienced personnel.

**STUDY DIRECTORS**
Our Study Directors have a key role with responsibility for the initiation, conduct and reporting of studies, leading teams of graduate scientists and technical personnel. The posts involve close liaison with external clients and regulatory authorities demanding a high level of interpersonal skills.

Specialist knowledge required for each department is outlined below, but applicants will have relevant graduate/post-graduate qualifications and around 5 years appropriate industrial experience, preferably of managing studies in a GLP compliant environment.

- **Pharmaceutical Metabolism (Ref 95/011):** running ADME studies. Demands sound knowledge of analytical techniques and data interpretation, including pharmacokinetics.

- **Animal Health Products (Ref 95/024):** managing residue studies in livestock. Requires several years analytical chemistry experience and previous involvement with animal studies would be advantageous.

- **Environmental Fate (Ref 94/115):** managing studies which determine the fate of agrochemicals in the environment. Experience of HPLC, TLC and radioanalytical methods is essential and knowledge of regulatory guidelines would be beneficial.

**STUDY SUPERVISORS**
Study Supervisors organise and perform the day to day aspects of studies. Candidates will have relevant graduate qualifications and approximately 2 years industrial experience, preferably in a GLP compliant environment.

- **Physical and Product Chemistry (Ref 94/110):** developing and validating analytical methods for novel compounds for the determination of physical properties, analysis of aqueous test media and measurement of product chemistry parameters.

- **In-vitro Metabolism (Ref 95/026):** predicting in-vivo effects using animal and human tissues.

**MASS SPECTROSCOPY REF 95/MS**
We are also expanding our Mass Spectroscopy capability and are interested in hearing from applicants with appropriate experience for vacancies planned for the near future.

For all the above posts, relocation assistance is offered where appropriate and the Company offers a competitive benefits package, including pension scheme.

If you are interested in joining us then please send a comprehensive c.v. stating current salary, quoting the appropriate reference to: The Human Resources Department, Hazleton Europe, Otley Road, Harrogate, North Yorkshire HG3 1PY. Telephone (01423) 500011.

HAZLETON EUROPE
INVESTOR IN PEOPLE
The International Centre for Research in Agroforestry (ICRAF) is an international research organisation supported by the Consultative Group on International Agricultural Research (CGIAR). Its ultimate purpose is to help mitigate tropical deforestation, land depletion and rural poverty through the better use of trees and shrubs in crop and livestock production systems in humid, sub-humid and semi-arid tropics.

ICRAF is seeking to fill an internationally-recruited senior position of Germplasm Specialist for Multipurpose Tree Germplasm Resource Unit (MPT-GRU). He/She will develop an annual programme of work and budget for the following activities: exploration, germplasm collection, documentation, establishment of seed multiplication sites and living gene banks, supervision of the development of the MPT information database activities and seed distribution activities. The incumbent should also develop effective collaborative networks with NARS National Gene Banks, especially in exploration and collection of germplasm with appropriate training and prepare appropriate protocols for all collection expeditions. He/She will liaise with other international groups; promote the orderly development of the MPT-GRU laboratories and offices in the new research building scheduled for completion in 1996 and participate in ICRAF training activities for NARS collaborative counterparts and supervise MPT-GRU staff.

The successful candidate must have a Ph.D. degree or equivalent in some aspect of forest genetic resources with at least five years of international research experience. The candidate should have excellent command of English, while knowledge of French or Spanish would also be highly desirable. He/She should have field experience in several tropical countries with a flair for strategic thinking in addressing worldwide strategic issues in forest genetic resources also with successful management experience. Ability to work in a cross-cultural and multidisciplinary environment is essential.

An internationally competitive salary and benefits package will be provided. ICRAF offers a collegial and gender-sensitive working environment. Initial appointment is for two years, renewable upon satisfactory performance.

The position will be based at ICRAF headquarters, Nairobi, Kenya.

Applicants are invited to send a detailed curriculum vitae, salary details and the names and addresses of three referees (including telephone and fax numbers and E-Mail address if available). All correspondence should be addressed to the Head of Human Resources, International Centre for Research in Agroforestry, PO Box 30677, Nairobi, Kenya. Tel: (254-2) 521450; E-Mail: R.Lécuyer@CGNET.COM Fax: (254-2) 521001.

Applications will be considered until 30 April 1995, or until a suitable candidate is found.

Women are particularly encouraged to apply.

EXPERIENCED CLINICAL RESEARCH PROFESSIONALS

A strong business growth creates an immediate need for us to recruit highly motivated, results orientated individuals.

A career with Innovex can offer you:
• Experience in working within a variety of therapy areas.
• Career development opportunities in: Training, Project co-ordination, Man-management.
• Future possibilities to work in Europe and beyond due to our world-wide expansion.

If you are looking for a work environment that is constantly stimulating, offers variety, a comprehensive training programme and you have a life science or nursing degree plus a minimum of six months monitoring or study site co-ordination experience, then telephone the Clinical Research Hotline now on 01628 491590 between 8.30am - 6.00pm, or alternatively fax (01628 491555) or send your cv to us.

Innovex is an equal opportunities employer.
Cranfield UNIVERSITY
GIVE YOUR CAREER A BOOST

The following MSc Programmes at the School of Industrial and Manufacturing Science are established and well known within British Industry. For people with a 1st or 2nd Class Honours degree they can enhance your career potential.

- Aerospace Materials
- Polymer Engineering
- Subsea Engineering
- Offshore Engineering
- Quality Management
- Welding Technology
- Water Pollution Control Technology
- Underwater Technology

Full-time and part-time research programmes are also available for those candidates with a minimum of 2:i in an appropriate discipline.

For full course information send this coupon or phone: Mrs Shirley Hyde, School of Industrial and Manufacturing Science (SIMS), Cranfield University, Cranfield, Bedford MK43 0AL. Tel: (01234) 754086. Fax: (01234) 750875.

TECHNICAL SALES

L.O.T. - Oriel Ltd supplies a range of state-of-the-art scientific instrumentation from the world's leading manufacturers.

Huge expansion of business in the area of surface analysis means we are looking for a high calibre science graduate to work alongside the Product Manager.

Initially you will be involved in administration, analysing test samples, supporting the Product Manager and getting involved in the day-to-day sales process. As your product knowledge grows it is intended that you become directly involved in technical selling, from product demonstrations to technical discussions with customers.

The successful candidate will probably have:
* drive
* a desire to get into sales and marketing
* a good scientific degree
* laboratory experimental experience
* good personal skills
* keyboard skills and some word-processor experience

For the right individual we can offer an attractive remuneration package.

In the first instance, please send an up-to-date CV and a letter telling us why you are the best person for the job, to:

Eileen Urwin L.O.T. - Oriel Ltd
1 Mole Business Park Leatherhead
Surrey KT22 7AU
Tel: 01372 378822
Fax: 01372 375353

L.O.T. – Oriel Ltd is part of the European L.O.T. - Oriel organisation
NAMAS
TECHNICAL OFFICERS

The National Measurement Accreditation Service (NAMAS) is the UK body responsible for the accreditation of calibration and test laboratories. It is currently part of the National Physical Laboratory, but is expected to merge with the National Accreditation Council for Certification Bodies (NACCB) during 1995. The merged body will operate as a company limited by guarantee.

Two vacancies exist as follows:
1 CHEMIST: a Technical Officer is required to manage the accreditation process for laboratories in the chemical area. The work involves a significant amount of UK travel including some overnight stays.

You will require a qualification at degree level and/or membership of an appropriate professional body and several years' practical experience in a relevant field of testing, such as water, environmental and/or general chemical analysis with particular emphasis on instrumental techniques.

2 MICROBIOLOGIST: a Technical Officer is required to manage the accreditation process for laboratories in the microbiological area. The work involves a significant amount of UK travel including some overnight stays.

You will require a qualification at degree level and/or membership of an appropriate professional body and several years' practical experience in a relevant field of testing, such as food, water, clinical and/or general microbiological analysis.

Salary for both posts will be in the range £13,651 - £19,669.

We have excellent working conditions, enhanced by a flexible working hours scheme, a high quality creche and a sports and social club.

For further details and an application form (to be returned by 17 March 1995) write to Mrs Dolores Appleby, Personnel Section, National Physical Laboratory, Queens Road, Teddington, Middlesex TW11 0LW or telephone 0181-943 6903. Please quote NPUNAMAS/10 and state which post you wish to apply for.

The Civil Service is an equal opportunity employer

School of Chemical Sciences Postdoctoral Research Fellowship
UEA NORWICH

Postdoctoral Research Fellowship

Applications are invited for a 1-year EPSRC Research Fellowship to examine the structure and dynamics of amphiphilic metal-ion extractants as used in liquid membrane separation, to start as soon as possible. The project involves characterisation of the state of aggregation of carrier molecules (and their salts) in reversed micelles, and related effects on kinetics of extraction in supported liquid membranes.

Applicants should have a first degree in Chemistry or related subject and a Ph.D. training, preferably in Physical Chemistry. Preference will be given to candidates with previous research experience in the application of physical techniques to study aggregation and dynamics in surfactant systems.

Salary will be on the Research and Analogous IA scale, £13,941 to £20,953 per annum.

Further details can be obtained from Dr David Steytler (01603) 592033 or Professor Brian Robinson (01603) 592007. Applications to Professor Robinson, School of Chemical Sciences, University of East Anglia, Norwich NR4 7IJ, by 16 March 1995.

UEA is an Equal Opportunities Employer
UNIVERSITY OF SURREY
Department of Physics

MSc IN RADIATION AND ENVIRONMENTAL PROTECTION

This full-time/part-time course provides a thorough grounding in the science of Radiation Protection and its relationship to the broader field of Environmental Protection. It provides a bridge between the physical sciences and the life sciences and covers certain aspects of public health. Many excellent career opportunities exist for course graduates. Advanced Course Studentships are available.

MSc IN MEDICAL PHYSICS
The course provides graduates with a solid foundation and a broad appreciation of the application of physics, computing and electronics to medicine. There is a good basis in biological sciences and a period of hospital experience. It offers instruction and training for work in the health service, in research, the medical equipment industry and other related fields.

The course is modular, can be taken full-time (one year) or part-time (two years block-release) and is accredited by the Institute of Physical Sciences in Medicine (IPSM). It is supported by the MRC through Advanced Course Studentships (full-time) and by Regional Health Authorities for medical physics trainees through block-release study.

For further details contact Sue Jenner, MSc Secretary, Department of Physics, University of Surrey, Guildford, Surrey GU2 5XH. Telephone 01483 259324. E-mail: S.Jenner@phy.surrey.ac.uk

ARIZONA STATE UNIVERSITY

Graduate Assistantships

Chemistry and Biochemistry Ph.D. program has graduate assistantships available beginning fall 1995 for highly qualified students. Excellent research facilities located in the metropolitan Phoenix area.

Stipends of $11125-$15360/12 months plus out-of-state tuition waivers.

Send inquiries to Graduate Office, Department of Chemistry and Biochemistry, Arizona State University, Box 871604, Tempe, AZ 85287-1604. Fax: 602-965-2747. E-mail: CHMGRAD@ASU.EDU.

LCG Laboratory of the Government Chemist

**Fire Investigations Manager**

Forensic Science + Business Development
To £35,000 p.a. Teddington, Middlesex

This is an exceptionally challenging new role, combining practical forensic science with a commitment to business development at the Laboratory of the Government Chemist.

With the intended establishment of the Laboratory in the private sector by April 1996, a major programme of change is aimed at creating a more progressive, efficient and commercially run organisation which will preserve its reputation for scientific excellence, objectivity, independence and quality.

Our establishment forensic science service is currently centred mainly on chemistry and document examination. As part of our ambitious expansion plan for our forensic services, we now plan to add a fire investigation team to provide a new service to law enforcement agencies and the private sector.

As Manager of this Fire Investigation Group, your role will be to establish, train and lead a team of Fire Investigators. At the same time, you will be responsible for marketing the service, in conjunction with other members of the Laboratory's business development team.

Ideally, you will have a good honours degree (or equivalent), preferably in chemistry or a related physical science. We are looking for at least 10 years practical experience at a senior level in fire investigation, backed by a sound knowledge of forensic science. You should have a proven record of preparing witness statements and giving evidence in court.

Starting salary will be up to £35,000 p.a. and will reflect qualifications and experience. A higher salary may be offered to an exceptionally well qualified candidate. A comprehensive benefits package includes non-contributory pension scheme, performance related pay and assistance with relocation expenses if applicable.

The appointment is for a fixed term of 3 years with the possibility of extension or of conversion to permanent status.

For further information about this post, please contact Dr Terry Gough on 0181-943 7310.

Application form and more details from Janice Ward, Personnel Section, Laboratory of the Government Chemist, Queens Road, Teddington, Middlesex TW11 0LY. Telephone 0181-943 7632/7568. (Answering service outside office hours, 0181-943 7445). Fax 0181-977 0269. Please quote ref: FIT/95/1. Closing date for return of completed application forms is 27 March 1995. CVs will be welcomed.

LGC is an equal opportunity employer and an executive agency of the Department of Trade and Industry. [1967-020 (1995) : 69]

RESEARCH ASSISTANT

Eisai London Research Laboratories was founded on the University College London campus with the goal of carrying out basic research concerning molecular mechanisms underlying various neurodegenerative diseases. Our new laboratory building opened in 1992 and currently has a scientific staff of approximately 30 people. All positions are funded permanently by Eisai Company Ltd, a major Japanese pharmaceutical company.

Applications are invited for a research assistant to work on molecular aspects of the blood-brain barrier. This post is particularly suited for a motivated individual with expertise in cell culture techniques (preferably neurons and endothelial cells) and a background in cellular and molecular biology.

We offer a starting salary in the range of £14,250+ according to age and experience, together with an excellent benefits package, including annual bonus, free travel, private medical insurance and pension scheme. All interested parties should send their Curriculum Vitae and names of two professional referees to Professor Lee Rubin, Eisai London Research Laboratories, Bernard Katz Building, University College London, Gower Street, London WC1E 6BT.

Postgraduate / Postdoctoral Research Post

Applications are invited for a Nuffield Foundation (Oliver Bird Fund) funded post, tenable from 1 April 1995 for two years, to work on the construction and expression of site directed mutants of the Tissue Inhibitor of Metalloproteinases-3 (TIMP-3) and to study its role as a potential growth factor. The work will involve the use of molecular biological and cell biological methodology.

Salary in the range of £13,941 - £15,566 pa.

Informal enquiries to Dr N. McKie (Telephone) 0 114 271 2605; Fax: 0 114 272 6938).

Further particulars from the Director of Human Resource Management, The University of Sheffield, Western Bank, Sheffield S10 2TN. Telephone 0114 282 4144. Closing date for applications 21 March 1995, Ref: R538.

Founded in 1905, The University of Sheffield provides higher education within a research led environment. We encourage equality of opportunity for all [1967-023 (1995) : 69]
SILSOE RESEARCH INSTITUTE
RESEARCH SCIENTISTS

Silsoe Research Institute is supported by the Biotechnology & Biological Sciences Research Council. It is the national centre for research in engineering and the physical sciences applied to agriculture and other biologically-based industries.

RESEARCH SCIENTIST

An information technology graduate is required to join a group developing mathematically sophisticated decision support systems for agriculture and related industries. The work involves eliciting the decision framework and knowledge base and creating decision systems. The decision systems are constructed by combining data and knowledge, converted into suitable form, with solution and optimisation techniques that have been developed by other mathematical scientists. This involves considerable computer programming utilising a wide range of tools ranging from expert system shells and GIS Systems to bespoke programming in C++, Pascal, etc. in an iterative cycle of implementation, testing, revision and validation. The work involves liaising with experts covering the whole range of agriculture and with experts in mathematical decision methods. The successful applicant will join the Mathematics & Decision System Group which conducts research into mathematical models and decision analysis techniques for decision making under the complex interactions occurring in agricultural systems. These methods are implemented within decision support systems eg for arable and vegetable crops, waste treatment and optimising grassland management on dairy farms.

Candidates must have at least an upper second class honours degree with two years' postgraduate experience. A typical candidate might have an information technology degree. The ideal candidate would also have agricultural knowledge. Ref. 12/69

APPLIED MATHEMATICIAN/NUMERICAL ANALYST

An Applied Mathematician/Numerical Analyst is required to develop, implement and evaluate mathematical methods for optimal control of non-linear biological systems in the field of agricultural, food and biochemical engineering. The work will concentrate on dealing with model and disturbance uncertainties, multi-time scale problems and with multi-extremal problems. The work will also involve studying the controllability and observability of non-linear biological systems.

Candidates must have at least an upper second class honours degree in mathematics or other discipline with a strong mathematical content with at least 2 years' experience. A typical candidate must have a mathematics degree including optimisation/optimal control theory and a postgraduate qualification. The ideal candidate would also have a working knowledge of computational mathematics and biological systems. Ref. 12/71

These are Fluid graded appointments as Band 6 Research Scientists. The salary on appointment is £13,286 per annum to £18,378 per annum with further progression available via Performance Related Pay up to maximum of Band 6 £23,470 per annum.

There is a subsidised work place Nursery on site.

For further particulars and an application form please contact The Personnel Office, Silsoe Research Institute, Wrest Park, Silsoe, Beds MK45 4HS. Tel: 01525 860000, quoting the relevant reference number. The closing date for receipt of applications is 16th March 1995.

We are Equal Opportunity Employers
Department of Physiology

**Research Assistant**
Initial salary within the range £13,941 - £14,756 pa.

Financed by the M.R.C. to investigate the relation between calcium and contraction in uterine smooth muscle cells. The effects of gestation and hypoxia on the $\text{Ca}^{2+}$-force relationship will also be examined, along with role of any changes in $\text{Ca}^{2+}$-sensitivity, (see Wray, S.1993, *Am.J.Physiol.* 264, C1-C18, for further details). The work will involve measurement of intracellular $\text{Ca}^{2+}$ using fluorescent indicators in strips of myometrium. The Department has a U.F.C. grade 5 rating and provides excellent support for research in a friendly atmosphere.

Tenable for one year. Informal enquiries to Dr. S. Wray. Tel: 0151 794 5306. Fax: 0151 794 5321.

Quote Ref: A/749/NS
Closing Date: 24 March 1995

Applications by c.v with the names of three referees, should be received by the Director of Personnel (A), The University of Liverpool, Liverpool L69 3BX. Further particulars may also be requested from this address or via email: jobs@uk.ac.liv

WORKING TOWARDS EQUAL OPPORTUNITIES
REC
Rock Engineering Consultants

Post-Doctoral R & D Engineer

Applications are invited to develop and implement the Rock Engineering Systems (RES) methodology. Our consultancy requires expertise to apply the approach for rock engineering design and review projects. The work will be primarily computer-based. The successful applicant will have a Ph.D. and have worked on site. A knowledge of rock mechanics, RES, and the associated Fully-Coupled Model (FCM) are essential for the post. The appointment will commence in the summer 1995 for 18 months. Salary is in the range £20 - 25k/year.

Closing application date: 7 April 1995. Please send CV with letter to: Professor J A Hudson, 7 The Quadrangle, Welwyn Garden City, Herts AL8 6SG, U.K.
Lecturer in Physical Geography

Applications are invited from suitably qualified candidates for an established Lectureship in Physical Geography, tenable from October 1995. Candidates should have research interests in geomorphology and experience of research in fluvial environments would be an advantage. We would expect the successful candidate to have a commitment to teaching at both undergraduate and postgraduate levels.

Salary will be at an appropriate point on either the Lecturer Grade A scale: £14,756 to £19,326 per annum, or Lecturer Grade B scale: £20,133 to £25,735 per annum, according to qualifications and experience.

Interested candidates are invited to discuss the position informally by telephoning the Head of Department, Dr A. C. Stevenson, on 0191 222 7600. Please quote Ref 04702/N.

No forms of application are issued. Further particulars may be obtained from the Director of Personnel, Registrar's Office, University of Newcastle, 1 Park Terrace, Newcastle upon Tyne NE1 7RU, with whom three copies of applications, including a full CV with present salary and the names and addresses of three referees, should be lodged not later than 17 March 1995.

Committed to Equal Opportunities
Dedicated to excellence in teaching and research
METEOROLOGICAL OFFICE

A Brighter Outlook

Information Management and Information Technology Specialists
(Bracknell) Salary up to £27,998

The internationally renowned Meteorological Office runs one of the most advanced computing systems in the world for numerical weather prediction and climate modelling. These systems are complemented by workstations, mainframes, minicomputers and PCs.

A number of graduates with computer science or computer skills are now sought to act as IT Specialists in the Met. Office Information Management Team. The responsibilities can be divided into three major areas:

- Developing automated Systems (for acquisition and reprocessing of data, numerical weather prediction, delivery of products to weather forecasters and improving the processes of weather forecasting).

- Setting standards and establishing strategies for the whole of the Met. Office.

- Exploring new opportunities for IT exploitation, including distributed memory massively parallel systems, local and wide area networks, multimedia and geographic information systems.

Apart from being (or about to become this summer) a science graduate with considerable exposure to computing or a computer science graduate, you must also have excellent communication skills allied with a genuine interest in developing IT systems for meteorological use. This is an excellent opportunity to develop your skills in an unusual and exciting field. Your starting salary will depend on the extent and quality of your experience, and will be within a range of £11,138 to £27,998.

For further details and an application form (to be returned by 24th March 1995), write to Recruitment & Assessment Services, Alencon Link, Basingstoke, Hampshire RG21 1JB or telephone (01256) 468551 or fax (01256) 846374/846660. Please quote Ref: B/2458.

An equal opportunities employer.

The Met.Office

RAS
Rhône Poulenc Brewing and Enzymes Group supply industrial enzymes. We are part of Rhône Poulenc Chemicals Ltd which is one of the top six chemical companies worldwide. We now have the following opportunity at our site in Stockport, Cheshire:

**Senior Technical Services Scientist**

You will have responsibility for progressing the practical aspects of projects and the development of new and existing products. This would initially be lab based with opportunities to make customer visits. You will contribute to the analysis of existing products and play a full role in ensuring the laboratory practice complies with all health, safety and quality requirements.

A self-motivated individual, you will be keen to provide an excellent customer service. You will be of graduate calibre in a quantitative biological science or chemistry with 2 years' experience, preferably in food or enzyme development. Excellent verbal and written communication skills are essential. A postgraduate qualification (MSc) would be an advantage.

We can offer an attractive salary and benefits package together with the career development opportunities expected of a large multi-national company.

Interested? Then write enclosing your CV and indicating current salary to: Miss S H Gorton, Rhône Poulenc Chemicals Ltd, Ashton New Road, Clayton, Manchester M11 4AT. Closing date for receipt of applications is 16 March 1995.
WARDEN/DIRECTOR OF STUDIES required for Dale Fort, the FSC’s pioneering Marine Centre, to take the Centre into the 21st century as the lead provider of marine/coastal education in the UK.

Preference will be given to candidates with a background in marine ecology, in the fields of education, research or commerce, and to those who have demonstrated their ability to manage people, resources and market services.

As this is a residential post, full board and lodging will be provided with a salary ranging from £17,075 to £21,154 dependent on relevant experience and expertise.

Closing date for applications will be Friday 31st March 1995. Further details and application forms from the Director, Head Office, Field Studies Council, Montford Bridge, Shrewsbury SY4 1HW.

Appointment preferably 1st October 1995 but at the latest 1st January 1996. The FSC is an educational charity and pursues a policy of equal opportunity.

Environmental Understanding for All
The Building Research Establishment is an executive agency of the Department of the Environment. Leading UK research into building and construction and the prevention and control of fire, it has a key role in advising government.

Prevention rather than cure

**Research Biologist**
Timber Division

The Timber Division carries out research and provides technical advice and information principally to DOE but also to industry and the public on the properties and behaviour in service of wood and wood products with special reference to durability.

The successful candidate will undertake laboratory studies on the mechanisms of biodeterioration of wood and wood products, developing and validating models that will be used to predict durability in service and the effectiveness of preservative systems. The scope of the work also includes the supervision of extra-mural contracts and there will be a special emphasis on the biology and significance of wood attacking insects.

With a good degree in the biological sciences and preferably post-graduate qualifications in some aspects of wood science or materials biodeterioration, you will be computer literate and able to work equally well unsupervised, or as part of a team. The outcome of the studies may lead to BRE publications for industry; every encouragement is given to staff to publish their work through conference papers and in technical journals.

This position is a three year period appointment and, subject to review, may be extended or lead to permanent status.

Starting salary ranges from £11,766 to £19,669 (depending on qualifications and experience). Further progression occurs within a performance related pay scheme.

If you can meet our criteria and are enthusiastic, with the ability to work as part of a team, we would like to hear from you. BRE is a family-friendly employer offering a pleasant working environment set in 30 hectares of parkland, only 20 miles from London. Benefits include sports and childcare facilities, a restaurant on site and a non-contributory pension scheme.

Closing date for applications: Friday 17th March 1995. For further details and an application pack, please ring our 24-hour answerphone on 0923 664274.

If you have any queries regarding this vacancy, contact Claire Fisher, Tel: 0923 664064 or Fax: 0923 664784, quoting reference number BRE 205.

BRE is an equal opportunity employer.

3 Research Posts in Molecular Pharmacology

Applications are invited for the following research vacancies investigating the pharmacology of cytotoxic drugs

1. Research Assistant
(Grade 1A) - Salary up to £17,000 pa, inc.
A three year research position to further investigate the activity of drugs which act via topoisomerase II, differences in activity of these drugs between different cell types and mechanisms of resistance which influence activity. This will involve both laboratory and clinical studies.

2. Research Assistant
(Grad 1B) - Salary £16,075 pa, inc.
To investigate the molecular pharmacology of drugs which inhibit thymidylate synthase, with particular reference to gene expression and enzyme activity, in clinical samples. This post is available for up to three years, renewable on an annual basis subject to availability of funds.

3. Ph.D. Studentships
To investigate the pharmacology of drugs acting via topoisomerase I a nuclear enzyme involved in DNA transcription and replication, with reference to molecular factors which influence their activity. Interactions between topoisomerase I and II inhibiting drugs will also be investigated. This post is available for up to three years, renewable on an annual basis subject to availability of funds.

All three posts will involve tissue culture and molecular biology techniques. A good degree in Biology is required and for the Research Assistant 1A post previous relevant experience is essential.

Further application on all three posts can be obtained from Simon Joel on 0171 601 8924. Applications in the form of a covering letter and CV indicating the post for which you wish to apply and including the names of three referees should be forwarded to The Personnel Officer, The Medical College of St Bartholomew's Hospital at the above address.

Closing date 16 March 1995.

Working towards Equal Opportunities
University of Durham

INFORMATION TECHNOLOGY SERVICE Systems Programmer (Ref: A410)
Required to join the small Technical Support and Development Group who provide the systems support for an extensive distributed Unix and Novell network around the University. This is a new post and the holder will concentrate on the core IT provision and development of a particular Unix service, namely the NOMIS (National Online Manpower Information System) service run by the University for the Department of Employment.

It is expected that the applicant will be a self-reliant and well motivated person, with a relevant degree or equivalent, good knowledge of the Unix operating system (including working knowledge of C language), and some Unix system administration experience, knowledge of networking and databases would be an advantage.

The post is full time, initially for three years but with the possibility of some extension, available as soon as possible after 1 April 1995.

Appointment will be on Scale 2 for Administrative, Library and Computing staff (£16,191-£20,953 pa).

Closing date for completed applications: 24 March 1995.

DEPARTMENT OF PHYSICS
Senior Research Assistants in Astronomical Instrumentation (Ref A403)
The Department of Physics is seeking two creative instrumentalists for our PPARC supported programme of astronomical instrumentation. Experience in the applications of liquid crystals as spatial light modulators or in the optical design and testing of astronomical spectrographs would be an advantage. These appointments will be for an initial period of two years with a possible extension to a third.

The group currently has research staff working in the fields of adaptive optics, faint object spectroscopy and multi-fibre spectroscopy, and has provided a number of very successful astronomical instruments for CTK telescopes including AUTOFIB, LDSS and MARTINI. Durham is also closely involved with both UK Gemini and UK Adaptive Optics programmes and hosts the Project Scientists for these two projects. Informal enquiries may be made to Dr R M Sharples, Dept of Physics Tel: 44-91-374 2109, e-mail: R.M.Sharples@Durham.ac.uk

Salary will be £13,941-£20,953 per annum on the RA1A scale for Research and Analogous Staff.

Closing date for completed applications: 14 April 1995.

For both positions, further details and an application form may be obtained from the Director of Personnel University of Durham, Old Shire Hall, Durham DH1 3HP, tel 0191 374 3158. Please quote appropriate reference number.

Investing in Excellence in Teaching and Research.
THE LEVERHULME TRUST

ACADEMIC ASSISTANT (Temporary)

Candidates are invited to apply for the post of Academic Assistant to the Director and Assistant Director of the Leverhulme Trust. The main content of the work will be to assist with the procedures for handling applications for research grants with particular reference to science subjects. In addition, the successful candidate will be expected to provide administrative assistance with new schemes initiated by the Trustees.

Candidates should have obtained a first degree from a UK university in a science subject within the last six years. They should have a responsible and flexible attitude, an adaptable and helpful personality, an eye for detail, and be willing to undertake a varied range of tasks as required. Skills required: computer literacy, word-processing, an ability to draft clear and accurate English prose. The post is available immediately, and will be for at least four months and up to eight. Salary in the range of £1,190 to £1,310 per calendar month, depending on age and experience. Working hours: 8.45am to 5pm with an hour for lunch. Pro rata holiday entitlement.

Hand-written application letters with a cv and the names of two referees should be sent to The Director, The Leverhulme Trust, 15-19 New Fetter Lane, London EC4A 1NR, by 13 March 1995.

Oxford Radcliffe Hospital is the new NHS Trust formed from the merger of the Churchill and John Radcliffe Hospitals, to develop and expand on quality services for the benefit of both patients and staff. Now one of the largest teaching hospitals in the UK, it is acclaimed both nationally and internationally for its clinical services and academic departments.

THE JOHN RADCLIFFE
THE NUFFIELD DEPARTMENT OF SURGERY - VASCULAR LABORATORY

Vascular Technologist
MT02/3 £10,573-£14,472

The post is primarily concerned with venous Duplex imaging, non-invasive techniques using a doppler and with other clinical measuring techniques such as ankle pressure measurements. This work entails contact with patients both in the wards and the outpatient clinics. It will also involve some associated clerical work such as the production of reports, filing etc.

You should have a qualification in Nursing or in Science with a biological/physics content. Some experience in Duplex scanning would be an advantage.

The post is for twelve months in the first instance extendable for a further year. Salary and conditions of service will be under the Whitley Council PT(B) for Medical Technical Officers grade 2/3.

Further details may be obtained by telephoning Miss A Kolesnikowicz on 01865 741166 bleep 1467.

For an application form and job description contact the Personnel Department, THE JOHN RADCLIFFE, Headley Way, Headington, Oxford OX3 9DU, or telephone Oxford (01565) 221175 (24 hour jobline), quoting reference NDS 02.

Closing date for completed applications: Friday 17 March 1995.

Equality of opportunity is assured and our no smoking policy advances a healthier environment.

POSITIVE ABOUT DISABLED PEOPLE
Applications are invited for a Senior Clinical Virologist post (Clin Sci B 17-19) Candidates should have a postgraduate qualification in microbiology; experience in diagnostic virology would be an advantage. The successful candidate will develop a range of national quality control reagents and contribute to other programmes in the newly formed Diagnostics Unit.

This post is a permanent appointment. Starting salary will be £22,799 plus £1,189 London Weighting per annum subject to experience and qualifications.

Closing date 16 March, 1995.

The job description and application forms are available from Mrs Manjula Mistry, HQ Personnel Department, 61 Colindale Avenue, London NW9 5DF.

Further information can be obtained by telephoning Dr John Parry or Dr Philip Mortimer on 081-200-4400, ext 3237/3208.

The PHLS is an equal opportunities employer.

We need two graduates/postgraduates. One will work on the journal *Structure*, and be especially involved in obtaining and editing mini-reviews. For this post preference will be given to candidates with some knowledge of structural biology and/or experience of editing. The other will work as an editorial assistant on a challenging database project, and should have a biological sciences degree.

Apply with a hand-written letter, saying when you could start, to Mary Devane, Current Biology Ltd, 34-42 Cleveland Street, London W1P 6L8

UNIVERSITY OF WESTMINSTER

Research Posts
Salary: £11,088 - £20,304

The Centre for Parallel Computing requires a team of researchers to develop a computer-aided development environment to assist programmers in the design and performance evaluation of portable parallel software. The proposed environment will combine elements of formal design, program modelling and simulation, and performance visualisation. The project is in collaboration with other industrial and academic partners, based in the UK and Europe, and is funded by the Engineering and Physical Sciences Research Council and the European Union.

Research Fellow
Two years in the first instance from April 1995.
Candidates will have strong analytical skills and a Ph.D. relevant to at least one of the specific disciplines mentioned above. REF: 563/ES.

Research Assistant
Two years in the first instance from April 1995.
For this post software engineering skills in a Unix environment are vital. REF: 564/ES

Both the above posts require applicants with a good degree or equivalent in computer science, or a related subject and should in addition have practical experience of parallel/distributed systems engineering.

Research Officer
18 months in the first instance - immediate start
Candidates should have a strong technical background in parallel/distributed computer systems engineering and an aptitude for technically-oriented administration. REF: 565/ES

For an application form and further details send an A4 sized stamped self addressed envelope clearly marked with the appropriate reference number to the Recruitment Section, Personnel Department, 115 New Cavendish Street, London W1M 8JS. Closing date: 16 March 1995.

An equal opportunities employer
UNIVERSITY OF KENT  
AT CANTERBURY  
GRADUATE SCHOOL OF PHYSICS  

STUDENTSHIPS FOR 1995/6

The Physics Laboratory is pleased to offer approximately twelve full or co-funded studentships for suitably qualified graduates. Awards will be tenable from October 1995 for the following graduate programmes: Ph.D./MSc by research in

Space Sciences - planetary exploration (Cassini & Rosetta), space debris, hypervelocity impacts, comets & asteroids.

Applied Optics - fibre optic sensors, optoelectronics, adaptive optics, advanced optical materials.

Condensed Matter Physics - which is particularly targeted this year, with research projects available in NMR (solid state, imaging, microdynamics), neutron & X-ray scattering (the microstructure of novel materials using experimental and computer-based methods) and theory & computer simulation.

MSc by coursework in Optoelectronic Technology.

For further details and application forms please write to: Dr R J Newport, Director of Graduate Studies, Physics Laboratory, The University, Kent, CT2 7NR, UK. (E-mail: r.j.newport@ukc.ac.uk)  
(WWW entry soon on http://www.ukc.ac.uk/homepage.html)

Excellence in higher education at Britain's European University  
Renowned throughout the world for quality and innovation, Ciba Pharmaceuticals operates in over 60 countries around the globe. Research driven, our teams of scientists have a fundamental commitment to excellence undertaken at three strategic locations including our facility in Horsham.

**Scientist**  
Early Compound Evaluation

Joining Pharmaceutical and Analytical Development at an exciting time in our continued development, you will bring a high level of pre-formulation expertise to the Early Compound Evaluation Group. In this newly formed team which sits at the interface between Research and Pre-clinical Development, a major aspect of your work will be to assist the Group Leader in establishing and developing its position within a global framework. As an experienced bench scientist, you will play a key role in the process of compound progression, through the physico-chemical and biopharmaceutical assessment of new chemical entities, where attention to detail and a highly organised approach is desirable.

A graduate in Chemistry, Pharmacy/Pharmaceutical sciences or other related discipline - ideally complemented with a Ph.D., you must have at least 5/6 years practical bench experience in a wide range of pre-formulation science techniques and instrumental methods. A sound knowledge of physico-chemical principles and their application, will ideally be combined with an understanding of biopharmaceutics. Enthusiastic, highly motivated and a strong team player, you must also demonstrate the maturity and interpersonal skills to represent the team on international project work - requiring some international travel.

In return, we offer a competitive salary and a benefits package commensurate with a leading pharmaceutical company including relocation assistance where appropriate.

Please forward your full CV, including current salary details and quoting reference R1 to: The Personnel Department, Ciba Pharmaceuticals, Wimblehurst Road, Horsham, West Sussex RH12 4AB. Tel: 0403 272827 ext 3136.

Ciba  
MAFF FOOD RESEARCH REQUIREMENTS 1996/97: STRATEGIC RESEARCH

Proposals are now invited for funding in 1996/97.

The Ministry funds research in many scientific disciplines across a wide range of food-related topics. The specific topics for which resources are likely to be available next year are detailed in the MAFF Food Research Requirements Document 1996/97: Strategic Research, which has recently been published.

Applications for support should be for a maximum of three years in the first instance with the possibility of renewal for a further two years if outstanding progress has been made.

Proposals should contain clear testable objectives which are likely to result in measurable benefits within the lifetime of the research.

To apply for support, applicants should obtain a copy of the research requirements document which contains the necessary information, proposal form and guidance notes.

The MAFF Strategic Food Research Requirements Document can be obtained by writing to Dr D. Rugg,
Chief Scientist's Group (Food), MAFF, Room 211, Nobel House, 17 Smith Square, London SW1P 3JR.
or e-mail: d.rugg@csgfood.maff.gov.uk

Closing date for applications will be 9 May 1995.

MAFF
Ministry of Agriculture, Fisheries and Food
Postdoctoral Research Assistantship in Surface Chemistry
Novel Thin-film Structures based on Self-assembled Monolayers

The research, which is funded by the Leverhulme Trust, will involve the preparation of novel thin-film materials based on self-assembled monolayers formed by the chemisorption of alkylthiol molecules onto gold surfaces, and their characterisation using x-ray photoelectron spectroscopy, atomic force microscopy and secondary ion mass spectrometry. Biological interactions of these materials will be investigated in collaboration with researchers in the University of Nottingham Medical School. An ability to address demanding interdisciplinary challenges is essential, and previous experience in one or more of the areas of biophysical chemistry, experimental surface science and physical organic chemistry would be advantageous.

The post is available from 1 May 1995 or as soon as possible thereafter and is tenable for a period of 3 years.

Enquiries and formal applications (which should include a CV and the names of two referees) may be made to Dr G J Leggett, Department of Materials Engineering and Materials Design, The University of Nottingham, University Park, Nottingham NG7 2RD. Tel: 0115 951 3748. Fax: 0115 951 3741. Email: emzgjl@emn1.nott.ac.uk. Closing date: 15 March 1995.

The University of Nottingham is a research-led institution which provides the highest quality learning environment and is committed to equal opportunities in employment.

The University of Nottingham
Scientific Officer
33 Month Fixed Term Appointment at Wakehurst Place, West Sussex

A Research Assistant is required to join a project aimed at improving the conservation of rattan species in South-east Asia. The work will involve the quality assessment, physiological manipulation and cryopreservation of seeds. The project is funded by the Commission of the European Union and involves collaboration with CIRAD (France) and forestry institutes in Malaysia.

Applicants should possess an Honours degree in plant or biological science. Experience of seed storage methods and/or embryo culture would be an advantage.

Starting salary for a 37 hour week is dependent upon qualifications and experience, but will be in the range £11,766 -£12,707.

For an application form and further information about this post please telephone 081 332 5150/5153 or write to David Green, Personnel Section, Royal Botanic Gardens, Kew, Richmond, Surrey TW9 3AB.

The closing date for the return of completed application forms is 16th March 1995.

An equal opportunities employer.

Leicester University
Department of Cell Physiology & Pharmacology

POST DOCTORAL RESEARCH ASSOCIATE

Applications are invited for a 1 year, MRC funded post to investigate the sensory feedback from tendon organs during muscle contraction. The post is to start on 1 April 1995, or as soon afterwards as possible. The successful applicant will join an active research group studying the structure and function of muscle receptors and the role of sensory feedback in the control of movement. The project forms part of an ongoing collaboration with the Collège de France, Paris. Applicants should have a Ph.D. in neurophysiology with experience of electrophysiological techniques and data analysis.

Salary will be on the R&AIA scale (£13,941 - £20,953 pa). Informal enquiries and applications, in the form of a CV, with names and addresses of two referees, should be addressed to Dr J Scott, Department of Cell Physiology & Pharmacology, University of Leicester, P O Box 138, Leicester LE1 9HN. Tel: (0116) 252 3083. Fax: (0116) 252 5045. Email: js50@le.ac.uk. Closing date: 16 March 1995.

Promoting excellence in University teaching and research
NORWICH RESEARCH PARK
ifr
UEA NORWICH

Norwich Research Park Lectureships
School of Biological Sciences, UEA and
Institute of Food Research Norwich Laboratory

TWO LECTURESHIPS IN CELL BIOLOGY AND PHYSIOLOGY

Applications are invited for two 5 year Lectureships in the field of cell biology and physiology with particular interest in aspects of the gastrointestinal tract. The postholders will have research facilities in the University of East Anglia and in the nearby Norwich Laboratory of the Institute of Food Research, and will interact with teams studying the molecular regulation of epithelial transport of micronutrients, and the influence of the human diet on intestinal mucosal cell proliferation. The work will be jointly led by Professor Peter Aggett (IFRN), Dr Ian Johnson (IFRN) and Dr Ian Gibson (UEA). There will be opportunities for collaboration with clinicians in the Norwich Hospitals. The postholders will teach in the School of Biological Sciences at UEA.

Enquiries of an academic nature concerning these posts can be directed to Ian Gibson (tel: 01603 592184, Fax: 01603 592250, e-mail i.gibson@uea.ac.uk) or Ian Johnson (tel: 01603 255000, fax 01603 507723).

Salary for the above posts will be on the Lecturer A Scale £14,756 to £19,326 per annum or the Lecturer B Scale £20,133 to £25,735 per annum, according to experience.

Further details and an application form should be obtained from the Director of Personnel and Registry Services, University of East Anglia, Norwich, NR4 7TJ (answerphone: 01603 593493), to be returned by 24 March 1995. Please quote reference AC49.

UEA is an Equal Opportunities Employer.
Data Co-ordinator
Boehringer Ingelheim Limited is a highly successful and innovative international pharmaceutical company located in Bracknell, Berkshire.

A new position has been created in the Clinical Data Management Department (CDMD) for a Data Co-ordinator. The CDMD is responsible for the data entry, data handling, management, analysis and reporting of clinical trial databases to support our products in license applications. The computer environment is a PC network with OS/2 workstations (486 and pentium machines) running SAS and various Windows packages. The data manager's role is facilitated by the use of an award winning Database Management System developed in-house.

Responsibilities will be:
• Reviewing Protocol and Case Report Form design
• Specification/design of SAS databases
• Specifying quality standards
• Reviewing data and management of trial databases
• Reporting to the clinical project team
• Liaison with Boehringer units in other countries

Ideally you will be qualified to degree standard with experience in SAS and databases. Additionally, experience in data management and/or life sciences would be beneficial. You should be highly motivated, well organised and possess excellent problem solving skills.

Our Company offers:
• Competitive Salaries plus annual bonus
• Non-contributory pension and life assurance scheme
• Free Medical Insurance
• Subsidised restaurant
• Active Sports and Social Club (we have our own sports facilities on site).

Applications complete with detailed C.V. and covering letter should be sent to: Paul Newman, Personnel & Training Manager, Boehringer Ingelheim Limited, Ellesfield Avenue, Bracknell, Berkshire RG12 8YS.

Closing date for applications: 30th March 1995

BOEHRINGER INGELHEIM
Boehringer Ingelheim
Lectureship in Numerical Analysis or Scientific Computation

Active researchers in scientific computation or numerical analysis are invited to apply. Applicants who would augment our thriving research group in applied mathematics and numerical analysis, enhancing the group's co-operation with other research groups in the University and elsewhere, are especially welcome. The Department encourages developments of both undergraduate and postgraduate teaching.

For informal information please e-mail to D.H.Peregrine@bristol.ac.uk or telephone Professor Peregrine on (0117) 928 7971.

For further details, telephone (0117) 925 6450 (answerphone after 5pm), or minicom (0117) 928 8894, or write to the Personnel Office (EO), University of Bristol, Senate House, Bristol BS8 1TH, quoting reference D146.

Closing date for receipt of applications: 3 April 1995.

An Equal Opportunities Employer
"An International Centre for Education and Research"
Applications are invited for the above posts available immediately in the Department of Pure and Applied Biology. Applicants should have achieved research excellence by scientific publications in any area of the above subjects. The appointees will join strong research groups in these areas.

Salary will be on the scale for Lecturers Grade A (£14,756 - £19,326) or Grade B (£20,133 - £25,735) according to qualifications and relevant experience.

Informal enquiries about the posts may be made to Professor Bryan Shorrocks, tel: 01 13 233 2842, e-mail pab6bs@west-01.novell.leeds.ac.uk. Application forms and further particulars may be obtained from the Personnel Office (Academic Section), The University of Leeds, Leeds, LS2 9JT, tel: 0113 233 5771, e-mail e.f.moran@registry.leeds.ac.uk quoting the reference number 56/57.

Closing date for applications: 17 March 1995.

The University of Leeds promotes an Equal Opportunities Policy.

Promoting excellence in teaching, learning and research.

COMBUSTION
Call for Outline Proposals

EPSRC has launched a Managed Programme in Combustion Research. Led jointly by the Mechanical and Process Engineering Groups, and involving other areas including the Clean Technology Unit, the Programme aims to stimulate high quality engineering and scientific research at UK higher education institutions to address fundamental and generic combustion issues.

• promotion of high quality engineering and scientific research studies of an interdisciplinary nature, which reflect the longer term needs of British industry;
• rationalisation of the Research Council's support in this key area by maximising collaboration and interdisciplinarity between the relevant research communities within a co-ordinated programme environment, leading to increased effectiveness and value for research funding;
• maximisation of industrial support and collaboration within the context of a co-ordinated programme;
• improvement of the interaction with other related programmes, including those within the EU, to eliminate overlaps, to ensure that added value is obtained from the interfaces;
• provision of a national focus for interdisciplinary debate on the subject.

For this, the first call from the Programme, outline proposals are invited from the academic community covering the entire area of Combustion. Outlines should be received in Swindon Office by 30 April 1995.

For further information please contact:
Hugh Thurbon, Combustion Programme Manager, EPSRC, Polaris House, North Star Avenue, Swindon Wiltshire SN2 1ET Tel: 01793 444358.
EPSRC
Engineering and Physical Sciences Research Council
Applications are invited for the following short-term appointments funded by MAFF from April 1995 at the North Wyke Research Station, Nr Okehampton, Devon.

**Modeller (Band 6) - 2 year appointment**
To develop the application of predictive models to support the government nitrate policy. First or upper second class honours degree in a mathematical or relevant scientific subject with a minimum of two years' experience. Ref: 95/10.

**Soil Scientist (Band 6) - 3 year appointment**
To establish a new basis for fertilizer recommendations for grassland. First or upper second class honours degree in soil science with a minimum of two years' experience. Ref: 95/06.

**Soil Scientist (Band 7) - 5 year appointment**
To help establish an integrated farmlet approach to understanding N Flows in mixed farming systems. First or upper second class honours degree in soil science. Ref: 95/12.

**Soil Scientist (Band 7) - 3 year appointment**
To support a project to develop new fertilizer recommendations. Degree or equivalent in soil science or appropriate science subject. Ref: 95/07.

Starting salary within the following scales:
Band 6 £13,286 - £18,378 Band 7 £11,361 - £15,712

Application forms and further particulars from the Personnel Officer, IGER, Plas Gogerddan, Aberystwyth, Dyfed SY23 3EB. Please quote the relevant reference No. Closing date: 24 March 1995.

An Equal Opportunities Employer.

FIELD MARSHAL

Do you have the proverbial field Marshal's baron in your knapsack with the commitment to progress your career? Are you proactive with the confidence to take the initiative and lead?

Graduate Chemist

A blue chip multi-national requires a high potential graduate chemist min BSc hons plus min three years industrial experience. Clear management and career potential is essential.

Sound knowledge of analytical techniques FTIR, GG / GCMS, DSC, HPLC, will be a considerable advantage.

Excellent salary and benefits package.

Please forward CV to John Gower, Principal, MPT Recruitment, Tylers Wood, Cheniston Grove, Maidenhead, Berks SL6 4LN. Tel/Fax 01628-785475.
Opportunities for Postdoctoral and graduate fellowships in Physical Oceanography, Climate Dynamics and Carbon Cycle Dynamics at the School of Earth and Ocean Sciences, University of Victoria, Canada. Current work includes observational, theoretical and modelling of ocean mixing, air sea interaction and gas exchange, and ocean circulation, role of the oceans in climate, and the global carbon cycle. Faculty involved include David Farmer (based at the nearby Institute of Ocean Sciences), Inez Fung, Chris Garrett, Rolf Lueck and Andrew Weaver.

Ridley Fellowship
(Faculties of Science or Engineering)

Strang Studentship (any Faculty except Medicine)

Applications are invited from graduates, or prospective graduates, or the holders of equivalent qualifications, for the above awards tenable from October 1995. The awards will be maintained at the same level as Research Council Studentships (but with no entitlement to any of the additional allowances). The current value is £4,910 per annum, with remission of fees. The successful candidates will be expected to register for a higher degree by research. The Fellowships will be for three years, subject to confirmation at the end of the first and second years. Further details and application forms, which must be returned by not later than 31 March 1995, may be obtained from the Registrar (Fellowships), University of Newcastle, 6 Kensington Terrace, Newcastle upon Tyne NE 1 7RU.

Committed to Equal Opportunities
Dedicated to excellence in teaching and research
GLASGOW CALEDONIAN UNIVERSITY
POST-DOCTORAL RESEARCH ASSISTANT
ELECTRODEPOSITION OF CHROMIUM UP TO £ 15.5k
Join our internationally renowned team in their pioneering research to find a more environmentally friendly process to produce chromium deposits using high speed plating. Applicants should hold a Ph.D. in a science or engineering discipline that equips them with the interdisciplinary knowledge and skills required to chemically modify electrolytes, analyse and characterise resulting deposits. Informal enquiries can be made to Dr M. El-Sharif on 0141-331 3538.

This post is temporary for three years.

Further information and an application form can be obtained from the Personnel Department, Glasgow Caledonian University, Park Campus, 1 Park Drive. Glasgow G3 6LP (tel: 0141-337 4043, fax: 0141 337 4046) to be returned by Thursday 30 March 1995.
London or Swindon up to £33,000

New Technology Specialist

Royal Mail is one of the UK's great success stories. Collecting, sorting and delivering something in the region of 60 million items every day, we serve every household in the country and every one of the UK's 1.5 million businesses. In the face of increasing competition from all forms of communication, we continue our tradition of adapting our skills and experience to meeting the challenges today brings.

With around one third of our revenues coming from franked mail, we are looking for an IT expert with a substantial background in networking and comms to combine the available technologies with our vision of the way organisations will use franked mail in the future. As we are talking of a market currently worth £1.3 billion, with tremendous scope for expansion, you'll understand that this is a major role.

It is probable that you will have an engineering background - ideally supported by an electronics degree - and knowledge of printing and coding systems will be highly valued. Just as important, you must have the confidence, experience and stature to conduct high level technical discussions, and the all round communications skills to play a major role in helping Royal Mail realise its technological vision.

In return we offer attractive packages of pay and benefits to the right people.

To apply, please send your full CV to Heather Martin, Personnel Manager, Royal Mail National, 22 Finsbury Square, London EC2A 1NL by Friday 17th March 1995.

Royal Mail is an Equal Opportunities Employer.
Suitably qualified applicants with disabilities will be shortlisted.

Closing date: 27.3.95.

Only shortlisted candidates will be contacted.
THE NUFFIELD FOUNDATION
One Year Science Research Fellowships

The Nuffield Foundation is offering to University Lecturers in Science and Applied Science Departments a number of one-year science research fellowships to be awarded competitively at the end of February 1996 and to be held during the academic year 1996-97. The objective is to enable younger university lecturers to be freed from teaching and administrative duties for one academic year. Preference will be given to applicants under the age of 40. Awards will cover the cost of replacement teaching (up to the sixth point on the new university lecturer scale £15,566 at 1 March 1994) and a negotiable allowance of £5,000 for research expenses.

The closing date for applications is 1 October 1995. Further details and application forms are available from The Nuffield Foundation, 28 Bedford Square, London WC1B 3EG. Telephone 0171-580-7434 (24 hour answerphone). Ref: SRF.

The scheme is only open to applicants from institutions within the United Kingdom.
MANAGER - CHEMISTRY

“An Outstanding Opportunity to Play a Key Role in the Advancement of Food Services Technology.”
Attractive Salary + Benefits - Wigan, Lancashire

HJ Heinz has built a world class reputation in the marketplace, with our excellent products being at the centre of all our success. Quality and innovation are vital to our future progression and we are now seeking an enthusiastic Science professional to become a key member of the Quality Assurance/Research and Development Team at our Wigan manufacturing site. Reporting to the Company Chemist, your role will encompass the provision of a range of expert chemistry and shelf life services to all aspects of our business, from Manufacturing to Customer Service, to ensure HJ Heinz remains at the forefront of technological advancement in the highly competitive food industry.

Possessing a good Honours Degree in Food Science/Chemistry, you will need a demonstrable track record of experience gained within the food, or a related, industry. Complementing your technical expertise will be first-class communication and organisational skills, with some knowledge of computers also being a distinct advantage. Due to the nature of the experience we are seeking, it is envisaged that ideal candidates will be aged in their early-mid 30's.

In addition to an attractive salary and benefits package, we can offer exceptional career development opportunities with one of the UK's premier companies.

To apply, please send a full CV to: David Fairhurst, Recruitment Manager, HJ Heinz Company Ltd., Kitt Green, Wigan, Lancashire WN5 0JL.
Closing date: 13 March, 1995.

Max-Planck-Institut
für neuropsycholog. Forschung in Leipzig

The newly founded Max-Planck-Institut for Cognitive Neuroscience in Leipzig (Directors: Prof. A. Friedrici, Prof. D. Y. von Cramon) is looking for a

**NMR-Physicist**

with experience in biomedical NMR. The position will be available from 1st June 1995, with a maximum duration of 5 years. The Physicist is expected to assist in building up the group and run research projects.

The successful candidate should have obtained a Ph.D. in the field of Magnetic Resonance Imaging/Spectroscopy, and have a proven track-record in scientific research. Experience in fast imaging methods and clinical practice are especially desirable.

The Institute will take delivery of a 3 T/1 m Bruker Medspec system in late 1995.

The Max-Planck-Society offers a generous salary and relocation assistance.

Disabled persons with the same qualifications will be given preference.

For an informal discussion please call David Norris on FRG(0)421-218-3106/3452.

Candidates should send a cv together with two reprints of their own work by 15 March to Max-Planck-Gesellschaft, Anschubverwaltung Postfach 101062, 80084 München, Germany [1967-062 (1995) : 80]
Sultan Qaboos University - Sultanate of Oman
Department of Biology, College of Science

Assistant Professor
Sultan Qaboos University, the National University of the Sultanate of Oman, urgently invites applications for the post of an Assistant Professor in Zoology with specialisation in animal structure and function. Experimental zoologists with an ability to teach a wide range of subjects at the undergraduate levels will be given preference. The successful candidate will hold a Ph.D. degree with a minimum of four years postdoctoral teaching experience and must have potential for high quality research.

Apart from a very attractive tax free base salary, the University offers free furnished accommodation, two years renewable employment contract with end of service gratuity, annual leave with return air tickets, free medical treatment in Government Hospitals.

Interested candidates are requested to submit their full CV, along with copies of academic and experience certificates, quoting our Ref: ADV/SCU01/95, to:

The Director, Personnel Affairs, Sultan Qaboos University, PO Box 50, Al-Khod-123, Sultanate of Oman.
UNIPACK is the largest specialist contractor of pharmaceutical services in Europe.

We are proud of our excellent reputation for providing "right first time" solutions to the packaging requirements of the world's foremost pharmaceutical manufacturers.

**GRADUATE OPPORTUNITY**

This position is the ideal answer for a new graduate considering a career in management.

It offers the opportunity to supervise and develop a team of people whose role is to provide a comprehensive pharmaceutical packaging service. You will also participate in projects specifically directed at improving overall company performance.

The successful applicant will have a degree or equivalent in Chemistry, Biology or Pharmacy, and will be able to demonstrate good communication and team building skills. You will be expected to participate fully in a training programme designed to meet identified training needs.

UNIPACK
VIROLOGY DEPARTMENT
MEDICAL LABORATORY ASSISTANT

THE ROYAL FREE HAMPSTEAD NHS TRUST
Salary: £8,804 to £10,626 pa inclusive

THE ROYAL FREE HAMPSTEAD NHS TRUST

The Royal Free Hospital, situated close to picturesque Hampstead Heath, is one of the most successful NHS Trusts in London. We are well served by public transport links and there is an excellent sports and social club available to staff.

Our expanding and progressive Virology Department offers a comprehensive diagnostic service. We are looking for a Medical Laboratory Assistant to assist the Clinical Scientists in the department, duties will include the separation of serum samples, white cell counts and DNA extraction from blood, the receipt of specimens and ordering of tests on the Pathology computer and to assist in the running of the departmental autoclave and store room.

Applicants should be educated to GCSE standard and it would be desirable if you had previous experience of working in a laboratory environment and handling clinical specimens. You must be able to demonstrate a practical and pragmatic approach, be numerate and literate and be able to follow defined procedures. This post is initially offered for a fixed term of one year.

Application packages are available from the Human Resources Department, Lower Ground Floor, Royal Free Hospital, Pond Street, Hampstead, London NW3 2QG. Tel: 0171 830 2064. Please quote Ref: VIR/MLA.

Closing date: 16th March 1995.

Committed to Equal Opportunities
SOFTWARE DEVELOPMENT FOR MICROANALYSIS

The Software team at Oxford Instruments Microanalysis Group develop high quality instrumentation products to satisfy customers in an international marketplace. Currently we have a number of vacancies for individuals who would enjoy the challenge of solving complex problems to generate leading-edge products. If you are competent in Visual Basic, C++ or C, have a basic understanding of electronics and computer interfacing and feel you could make a strong contribution in any or all of the following areas please contact us.

• Practical applications experience using an SEM or microprobe.
• Knowledge of x-ray microanalysis and familiarity with operation of WD spectrometers.
• Experience in project management and identifying the "voice of the customer".
• Practical use of applied mathematics, numerical methods, chemometrics.
• Experience with real time control and hardware automation.

Successful applicants will receive an attractive benefits package and salary commensurate with capability. Please send a copy of your CV, and a telephone contact number to Peter Statham at: Oxford Instruments Microanalysis Group Halifax Road, High Wycombe, Bucks HP12 3SE England Telephone (01494) 442255. Fax: (01494) 461033 Email: software@oimag.win-uk.net

OXFORD
THE ONLY BORING THING YOU’LL EVER HAVE TO DO AS AN ARMY ENGINEER, APPLY FOR THE JOB

As an engineer in the British Army you can expect to be faced with a fresh and exciting challenge for your skills every single day of your career.

You can expect to be setting up vital communications networks, resettling refugees, neutralising underwater mines; keeping helicopters operational, rebuilding hospitals and providing disaster relief to overseas countries.

You can expect to obtain Chartered Engineer status by your late twenties. And you can expect never to be bored. Can we expect to hear from you?

Sorry. This is the boring bit. For more details post the coupon to Army Officer Entry, Freepost 4335, Dept. 2330, Bristol BS1 3YX or telephone 0345 300 111 quoting ref 2330. The Army is an Equal Opportunity Employer.

NAME
ADDRESS
POSTCODE
AGE

ARMY OFFICER
BE THE BEST
THE ROBERT GORDON UNIVERSITY
ABERDEEN

As a result of participation in the SHEFC 'New Blood' Initiative, the following posts are now available. Applications would be particularly welcomed from recently qualified graduates or those with 2-5 years' post-qualifying experience in industry or commerce.

School of Applied Studies

LECTURERS
Required in the following areas
Ref. 443N: Physical/Materials Science. Ref. 444N: Applied Bioscience

These posts provide an exciting opportunity for suitably qualified and motivated candidates to make significant contributions to the growth and development of the school.

Applicants should have a successful research record and/or recent industrial experience.

Salary scale: £14,223 - £25,527 per annum

Assistance with removal expenses.

Informal enquiries to Professor J Harper, Head of School. Tel. (01224) 262801

Closing date: 17 March 1995
UNIVERSITY OF WARWICK
Department of Biological Sciences

RESEARCH TECHNICIAN

To provide technical support, under the direction of the Chief Technician, for hospital doctors undertaking research.

You will have experience in either a research or hospital laboratory environment with flexibility to cope with a wide range of techniques in cell and molecular biology (appropriate training and support will be given). The ability to liaise with several hospital doctors will also be an important asset. You should have a degree in biology, or appropriate MLSO qualifications.

Salary on the Technician Grade C/D scale: £10,157 - £12,093 pa. The post is available for one year in the first instance.

Application forms (returnable by 16 March 1995) from the Personnel Office, University of Warwick, Coventry CV4 7AL (telephone 01203 523685) quoting Ref 30/T/94 (please mark clearly on envelope).

The University of Warwick is an exempt charity dedicated to excellence in teaching and research and is an Equal Opportunities Employer.
COHERENT

Scientific Sales Engineer
Southern UK

Coherent is the world leader in the design, manufacture and marketing of lasers.

Our UK subsidiary is seeking to recruit a graduate/post graduate to take responsibility for laser sales into the scientific and industrial R&D community in the Southern UK. Good communications skills, enthusiasm, motivation and the ability to work independently are essential. Some previous sales experience and knowledge of lasers/electro-optics are desirable.

A competitive salary will reflect the level of competence and experience. Benefits package includes health care and contributory pension. Driving licence essential.

For further details send CV or contact Mrs Jackie Hitt, Coherent (UK) Ltd, Cambridge Science Park, Milton Road, Cambridge CB4 4FR. Tel: 01223 424065 by 15th March 1995.
THE ROYAL INSTITUTION

Ph.D. Studentships
Solid State and Computational Chemistry

Applications are invited for both EPSRC and industrially funded research studentships at The Royal Institution. Projects are available on synthesis, structure, physical or chemical properties and computational modelling of complex inorganic and organic solids including superconductors, catalysts, ceramics and magnetic materials. Students are registered for the Ph.D. degree in the University of London.

Applicants, who should have (or expect to have shortly) a degree in a relevant scientific discipline, should write to The Director, The Royal Institution, 21 Albemarle Street, London W1X 4BS, enclosing a CV and the names of two referees.

RESEARCH TECHNICIAN

An experienced histology technician is required to join Professor Ray Lund's Neural Transplant Research Group in the Department of Pathology investigating approaches to repair of the damaged visual system. The work will involve neurohistology, Immunocytochemistry and possible electron microscopy. The appointment will be for four years funded by the Medical Research Council.

Starting salary up to £16,811 pa including LA according to qualifications and experience.

For further information and an application form please contact the Personnel Officer at the above address, quoting reference 42774. Closing date for receipt of completed application forms 17 March 1995.

The Institute operates a no-smoking policy.

Division of Microbiology
St Thomas's Campus

UMDS
GUY'S AND ST THOMAS'S MEDICAL AND DENTAL SCHOOL
(University of London)

LABORATORY SCIENTIFIC OFFICER
(GRADE 1 or 2)

required for 6 months to work with a team investigating the antibiotic sensitivity of clinical isolates to
new and established antimicrobial agents. Applicants must have a HNC/D in medical laboratory science
or BSc in microbiology or related subject (or equivalent). Experience in clinical microbiology and in
research including molecular microbiology are also essential. Salary in the range £10,005 - £13,693 pa
on the LSO1 scale or £14,242 - £18,740 pa on the LSO2 scale plus £1,952 pa LW according to age,
qualifications and experience.

Equality of Opportunity is School Policy
OPPORTUNITIES WITHIN CLINICAL RESEARCH

Inveresk Clinical Research (ICR) is a contract clinical research organisation offering a quality service to the Pharmaceutical industry in the conduct, management and registration of clinical studies. The Company is based in well-equipped, modern premises at Riccarton, Edinburgh. As a result of continued expansion, the following vacancies now exist within this dynamically growing Company.

CLINICAL RESEARCH ASSOCIATE

An experienced Clinical Research Associate is required to assist in the project management and conduct of Phase II and Phase III trials. The successful candidate will be responsible for the day to day management of Phase II and III activities contributing to the successful development and conduct of patient studies. This will include the development of protocols, case report forms and necessary documentation for Phase II-III clinical studies, in conjunction with other staff, both medical and scientific. Interested candidates will have a relevant degree together with demonstrable experience in monitoring clinical studies to GCP standards, or other appropriate experience in the health care industry. (Ref No 5415)

BUSINESS DEVELOPMENT OFFICER/ CLINICAL RESEARCH ASSOCIATE

An experienced individual is required to undertake this interesting dual role. In addition to the tasks outlined for the position above, the successful candidate will be required to visit clinical research and medical departments for major pharmaceutical companies to identify new business opportunities for ICR. This role will be based at our new office in Camberley, Surrey, and the post holder will be expected to live within commuting distance of this office. Interested candidates are likely to be science graduates with pharmaceutical industry experience, either in clinical research or sales. (Ref No 5497)

Salary for these positions will be dependent upon qualifications and relevant experience. A car will also be provided. Other benefits include membership of the Pension and Life Assurance Plan, participation in bonus scheme arrangements, free private medical cover and assistance with relocation (where appropriate). Full details in writing should be forwarded to the Personnel Department, Inveresk Research International Limited, Tranent EH33 1NE, quoting reference number.

INVERESK CLINICAL RESEARCH

Inveresk Clinical Research Limited
Riccarton, Edinburgh EH14 4AP.

ICR
Fazakerley Hospital Obstetrics & Gynaecology Directorate

**PART-TIME IVF/ET EMBRYOLOGIST**
25 hours per week
£20,270 - £21,923 pro rata per annum

To work in an established IVF Unit, hours will be flexible and will include some weekends.

Duties will cover all laboratory aspects of IVF including embryo cryopreservation and ICSI. Previous IVF experience is preferred although training will be available.

You should possess a life sciences or related degree and have some relevant experience with tissue culture and/or fine manipulative techniques. Good communication skills are essential, as is the ability to work competently alone or as part of a team.

For further information contact Dr M Smedley, Embryologist, on 0151 529 3800. Application form and job description available from the Human Resources Department, Aintree House, Fazakerley Hospital, Longmoor Lane, Liverpool L9 7AL. Tel. 0151 529 3905 quoting ref 374. Closing date 16 March 1995.
**Project Officer**  
Findhorn Bay Local Nature Reserve  
£11,898 - £12,915

Findhorn Bay has been identified as a potential Local Nature Reserve by Moray District Council and Scottish Natural Heritage. These bodies along with the Local Enterprise Company have agreed to appoint a Project Officer.

The aim of the Reserve is to promote management of Findhorn Bay taking into account all relevant interests, including nature conservation, recreation, access and local business and the community. The post will be initially for one year, with a possible extension of one further year subject to satisfactory performance. You will be required to formally designate the Reserve following final negotiations in respect of agreements with landowners. A Local Management Committee has been formed together with a Draft Management Plan. You will assist this Committee in implementing the Management Plan, including development of provision for Education and Interpretation.

You should have a degree in Natural Sciences and experience in setting up and running a major project, preferably involving management of a Local Nature Reserve. You will be required to use your initiative and to have good negotiation and communication skills.

MORAY  
DISTRICT COUNCIL  
SUB SPE

Moray will become a unitary authority at Local Government Reorganisation.

Further details are available from the Director of Planning and Development, District Headquarters, High Street, Elgin, IV30 1BX, or telephone (01343) 553037. Closing date for applications is 24 March 1995.

ST GEORGE'S HOSPITAL MEDICAL SCHOOL  
(University of London)

TWO RESEARCH TECHNICIANS

DEPARTMENTS OF MEDICINE AND CELLULAR AND MOLECULAR SCIENCES

Technician (Ref: 26/95) required to work on projects involving Helicobacter pylori infection in patients with peptic ulcers. The work involves carrying out immunological, microbiological and biochemical laboratory techniques, eg, bacterial culture, ELISA and Western blotting.

Technician (Ref: 27/95) required to work on projects examining the role of bile acids in liver disease, colorectal cancer and gallstones. The work involves carrying out biochemical, immunological and cytological laboratory techniques, eg, ELISA and enzyme assays, TLC and GLC.

Candidates should possess a degree in Biochemistry or Microbiology and a knowledge of molecular biology would be an advantage. Both posts will be for two years in the first instance.

Salaries will be in the range C/D for University Technicians £11,163 - £14,902 inclusive of London Allowance and according to experience and qualifications.

Further details and an application form from the Personnel Officer, St George's Hospital Medical School, Cranmer Terrace, London SW17 0RE, 0181-725 5020 (24-hour answerphone). Closing date 16 March 1995.

Please quote appropriate reference as listed above.
Wexham Park Hospital, Slough
Biochemistry Department

**BioMedical Scientist**
£10,405 per annum

**Trainee BioMedical Scientist**
£8,055 per annum

Plus Fringe London Weighting and the opportunity of Performance Related Pay

Two vacancies exist for state registered BioMedical Scientists and Trainees within the Biochemistry Department at Wexham Park Hospital.

Trainee applicants should hold a degree acceptable to the Council for Professions Supplementary to Medicine. The department is well equipped and fully computerised throughout the routine, advanced and endocrinology sections and serves the population of East Berkshire with a current workload of 175,000 patient requests per annum. You will have the opportunity to gain experience in all sections of the department, and, if suitably qualified, would be invited to participate in the voluntary single-discipline out of hours service.

For further details or to arrange an informal visit, please contact Mr Geoff Bell on 01753 633419, or Mr John Gaughan on 01753 633403. Application form and job description available from the Personnel Department on 01753 633498 (24 hour answerphone).

Closing date: 17th March 1995.

HEATHERWOOD WEXHAM PARK

MEDICAL STATISTICIAN (LECTURER)

UMDS GUY’S AND ST THOMAS’S MEDICAL AND DENTAL SCHOOL
(University of London)

required in the Division of Public Health Sciences, St Thomas's Campus, to carry out an analysis of a large mixed-longitudinal data set to estimate trends in child growth from 1972 to 1994. The statistician will join a senior statistician and epidemiologist on the National Study of Health and Growth team, and will also participate in the teaching of statistics to medical and dental students, and share the consultancy work. The post, funded by the Department of Health, is available from 1st July 1995 for two years. The successful applicant will hold an MSc or equivalent in statistics, and should have some relevant experience. For an informal discussion please contact Miss Sue Chinn on 0171 620 2893.

Applications in the form of a CV (8 copies) and covering letter (with names and addresses of two referees) should be sent to Professor PGJ Burney, Department of Public Health Medicine, St Thomas's Hospital, London SE1 7EH. Closing date 23rd March 1995.

Equality of Opportunity is School Policy
THE UNIVERSITY OF BIRMINGHAM  
School of Metallurgy and Materials  

RESEARCH FELLOW  

Required for one year in first instance to work on the creep and TEM microstructure of single crystal intermetallic compounds. A Ph.D. and publications evidencing previous experience of creep testing and TEM analysis of defects in intermetallic compounds are essential.  

Maximum starting salary £13,941.  

Application forms (returnable by 23 March 1995) and further particulars available from the Director of Staffing Services, The University of Birmingham, Edgbaston, Birmingham B15 2TT. Telephone 0121 414 6483 (24 hours), quoting reference G 19036/95.  

Working towards equal opportunities  

The University is an exempt Charity which exists to advance learning to the highest level for the benefit of its students and society at large.  
UNIVERSITY OF MANCHESTER

Ph.D. RESEARCH OPPORTUNITIES
PHARMACEUTICAL SCIENCES

A strong well funded multidisciplinary department seeks research students from a wide variety of biological, chemical and physical sciences. Projects are in the main research themes of DRUG ACTION AND DESIGN and DRUG DELIVERY AND PHARMACOKINETICS. Research activities include organic synthesis, molecular graphics, genetic engineering, enzymology, drug absorption, metabolism, disposition, mathematical modelling, controlled drug delivery, biodegradable polymers, bacterial biofilms and disease, antibiotic therapy/ resistance.

STUDENTSHIPS: Research Council (normally restricted to UK citizens) and Industrial studentships are available, with scope for further financial supplementation. Successful applicants will have a 2.1 or higher degree.

Contact the Postgraduate Admissions Officer, Department of Pharmacy, University of Manchester, Manchester M13 9PL, or see our WWW server at http://www.mc.ac.uk/pharmaweb/

PROMOTING QUALITY TEACHING AND RESEARCH
BIBRA

Post-Doctoral Fellowship

Applications are invited for a Post-Doctoral Fellowship to conduct research into the relationship between diet and colon cancer.

BIBRA is an internationally-recognised, independent research institute, funded and supported by Government, industry and the EC, and is engaged in research into diet and health. We are seeking a Post-Doctoral scientist to conduct research into the aetiology of colon cancer, utilising novel, short-term methodologies. The research is multidisciplinary and will involve collaborating with scientists within BIBRA and in Europe. Experience in cell culture techniques would be an advantage but is not essential. The post is tenable for two years with the possibility of renewal for a further year, and is available immediately. Salary in the region of £15,000 to £16,000 per annum.

Applications including a CV and the names of two referees should be sent to: Personnel Officer, BIBRA International, Woodmansterne Road, Carshalton, Surrey SM5 4DS. Closing date: 17 March 1995.

Information Scientist/Editor

Pira Database

Pira International is the leading independent centre for research, consultancy, training, publishing and information services for the paper, packaging, printing and publishing industries.

We are looking for an enthusiastic and well organised information professional with a scientific background to join our production team for an exciting new project involving the expansion of the pulp and paper section of the Pira Abstracts database.

Duties will involve scanning of journals, editing, indexing and proofreading of abstracts. In addition, enquiry work and involvement in the marketing of the Pira database will form part of this varied and interesting position. The ability to work well under pressure and meet deadlines is essential.

Please apply in writing with CV to:

Marie Rushton
Business Manager
Publishing and Information Services
Pira International
Randalls Road
Leatherhead, Surrey KT22 7RU
Fax: 01372 360104
Pira

Medical Research Council Studentships

Two studentships are available from October 1995. One studentship will be available to work in any of the following projects: enteroviral infectivity (Prof. J.W. Almond); vertebrate genome evolution (Prof. P.W.H. Holland); corticotrophin releasing factor binding proteins (Prof. P.J. Lowry); picornovirus encapsidation (Dr D.J. Evans); human immunodeficiency virus (HIV) tropism determinants (Dr J.A. McKeating); transport in coronary arteries (Dr P.D. Weinberg; fertilisation promoting peptide control (Dr S.M. Cockle); use of Toxoplasma gondii in immunosuppression assessment (Dr D. Savva); birth effects in neonatal thermoregulation and growth (Dr M.E. Symonds); ontogeny of growth hormone receptors (Dr M.A. Lomax); bacterial protein secretion (Dr S. Maclntyre).

A second studentship held in collaboration with SmithKline Beecham Pharmaceuticals is available to work with Dr D. S. Leake on the biochemistry of low density lipoprotein oxidation. The normal stipend will be enhanced by £2,200pa and the successful applicant would join an active group of 11 working on atherosclerosis and coronary heart disease.

Applicants wishing to be considered for these studentships should write to Prof. R.L. Robson, The Research Office, School of Animal and Microbial Sciences, University of Reading, Reading RG6 2AJ and include a curriculum vitae, potential project interests, and the names of two referees.

A centre of excellence for university teaching and research
EPSRC PROGRAMME CO-ORDINATOR

Combustion Research Programme

The EPSRC has recently launched a managed programme in Combustion Research. Tenders are now invited for the role of Co-ordinator within this Programme.

The Co-ordinator will be expected to promote, co-ordinate and monitor research within the Programme and encourage collaboration both between industry and academia, and, within academia, between sciences and engineering disciplines.

The successful applicant will have a good knowledge of both the subject matter and the relevant research and user communities, demonstrate strong communication and organisational skills, and be an enthusiastic ambassador for the Programme.

The post will be part-time at approximately 100 days per annum, with renewable contract periods of 12 months.

Applicants should register their interest in writing, including a CV, details of relevant experience and three independent referees, by 1 April 1995. Further information on the Combustion Research Programme will also be available from:

Hugh Thurbon, Combustion Programme Manager, EPSRC, Polaris House, North Star Avenue, Swindon, Wiltshire SN2 1ET.
Tel: 01793 444358

EPSRC
Engineering and Physical Sciences Research Council
GUY'S AND ST THOMAS' HOSPITAL TRUST
ST THOMAS' HOSPITAL DEPARTMENT OF MICROBIOLOGY

**MLSO 1**
£12,404 - £15,692pa inclusive

To work in this large progressive department. The successful applicants will be involved in a wide range of microbiology investigations, and the post is ideally suited for those MLSO's who wish to broaden their experience.

Encouragement will be given to undertake further studies and opportunities to participate in the out of hours service exist.

Candidates should be state registered and hold an HNC or appropriate science degree.

For an application form and job description, please contact Group 5 and 6 Directorate Personnel, First Floor, North Wing, on 0171 928 9292, ext 2792 (answerphone 9-5 during working hours) quoting ref 945. Requests for applications should be made by 14 March and closing date for completed forms is 17 March 1995.

AIMING TO BE AN EQUAL OPPORTUNITIES EMPLOYER
Oxford Radcliffe Hospital is the new NHS Trust formed from the merger of the Churchill and John Radcliffe Hospitals, to develop and expand on quality services for the benefit of both patients and staff. Now one of the largest teaching hospitals in the UK, it is acclaimed both nationally and internationally for its clinical services and academic departments.

THE CHURCHILL DEPARTMENT OF MEDICAL PHYSICS

Senior Medical Physicists / Engineers

Post 1: Imaging Group (re-advertisement)
Grade B: 14 -16 £19,085 - £21,240 and potential for advancement to Grade B: 17 -19 £22,276-£24,094 (pay award pending)

A senior physicist/engineer is required in the Imaging Group of the department to provide scientific support and first line maintenance for diagnostic ultrasound and some non-ionising radiation equipment. Travel will be necessary to other hospitals up to 45 miles distance and a lease car will be available.

Applicants should have several years experience, preferably recent, in ultrasound and be graduates in physical sciences or engineering and/or hold a relevant postgraduate degree.

Post 2: Radiotherapy Physics Group
Grade B: 8-10 £15,651-£16,928 (pay award pending)

A senior radiotherapy physicist is required in the Radiotherapy Physics Group of the department to participate in the provision of a physics service to the Radiotherapy and Oncology department, Churchill Hospital, which treats nearly 3,000 new patients per year.

Applicants should have experience, preferably recent in radiotherapy physics and be graduates in physical sciences and/or hold a relevant postgraduate degree.

For an application form and job description contact the Personnel Department, CHURCHILL HOSPITAL, Headington, Oxford OX3 7LJ or telephone the 24 Hour Jobline on (01865) 225077 and should be submitted by 20 March 1995, with a CV and names of two referees included.

Equality of opportunity is assured and our no smoking policy advances a healthier environment.

POSITIVE ABOUT DISABLED PEOPLE
MRC/Wellcome Foundation Ph.D. Studentship

Applications are invited from candidates who have or expect to receive a first or good second class honours degree in biological sciences for the following Ph.D. Studentship tenable from 1 September 1995.

To work within the Department of Experimental Dermatology on the identification and biology of keratinocyte stem-cells and their role in skin disease.

The studentship covers tuition fees at the UK/EC rates and a stipend at current MRC rates.

Candidates should apply in writing including a full CV and two referees.

Applications should be sent to Mrs Valerie Brame, Department of Experimental Dermatology, London Hospital Medical College, 56 Ashfield Street, London E1 2BL. Telephone 0171-377 7724/7749, Fax: 0171-247 6509.

Project description available on request.

The closing date for receipt of applications is 15 March 1995.

ANALYTICAL CHEMIST
3 Year Fixed Term Contract
£27,740-£30,004 per annum

The Public Health Laboratory Service is a unique resource working closely with the NHS in the vital areas of diagnosing and preventing infection and communicable diseases. One of our 53 Area and Regional Health Laboratories is at Chester where we offer a range of virological, clinical, microbiological and environmental analysis and consultancy services to the local community.

We are currently seeking an Analytical Chemist to manage and develop the Chemistry Department and its staff. In addition to ensuring the efficient day-to-day running of the department, you will work to increase consultancy and other business for the laboratory and act as client advisor on all issues relating to analytical chemistry. Customer liaison, maintenance of quality systems and NAMAS certification, staff education and training will also form part of your remit.

The ideal candidate will be a Chartered Chemist, or at least someone with an HNC or Degree in Chemistry, whose background includes a minimum of four years in the chemical analysis of environmental samples. The ability to manage staff effectively is essential and some experience in promotional activity desirable.

In return for your professional and business development skills, we offer an excellent remuneration package to include 30 days' holiday, pension scheme and other benefits.

Informal enquiries are encouraged by contacting Dr Paul Hunter, Director on 0244 366770.

Application forms and further details are available from: The Personnel Department, PHLS Headquarters, 61 Colindale Avenue, Colindale, London NW9 5DF. Tel: 0181 200 1295, ext 3690.

Closing date: 24th March 1995.

The PHLS is an Equal Opportunity Employer.
Astra Pharmaceuticals Limited is the fastest growing ethical pharmaceutical company in the UK, with an exciting and enviable product range.

Astra Clinical Research Unit, based in Edinburgh, principally undertakes phase II and III clinical trials. Due to reorganisation and expansion we invite applications for three new positions for the following:

**CLINICAL TRIAL SCIENTISTS**

The successful candidates will be responsible for running and monitoring clinical trials both "in house" and at trial sites mainly in the United Kingdom and Ireland. Therefore candidates must be prepared to spend a considerable amount of time travelling away from the office.

The ideal applicants must have a relevant science degree and previous experience of trial monitoring would be preferred. A positive attitude to detail and working in a team based environment are essential.

Astra offers a competitive salary and benefits package in relation to previous experience and skills. If you can demonstrate drive, enthusiasm and determination to succeed, Astra would like to hear from you.

Please apply in writing only, enclosing a CV to:

Mrs Susan Whale Astra Clinical Research Unit 10 Logie Mill Beaverbank Office Park Logie Green Road Edinburgh EH7 4HG

**EPSRC PROGRAMME CO-ORDINATOR**

“Towards Sustainable Cities” Programme

The EPSRC Clean Technology and Built Environment Groups wish to invite tenders for the role of coordinator within this programme. Urban sustainable development is a highly interdisciplinary activity, with a remit across the engineering, physical and social sciences and we need a coordinator with experience of user needs and an enthusiasm for urban sustainable development. Applications are invited from firms or individuals with an established consultancy business.

The coordinator will provide expert advice on sustainable development, identify user-relevant research priorities, monitor and review the progress of the current portfolio of research projects, advise on new research directions, and provide reports and publicity material to promulgate research results more widely.

A coordinator who understands the needs of the broad and disparate urban sustainability community will be essential, and the establishment of research networks between academic research groups, industry, commerce and local authorities who need sustainability data and models will be a key issue for the ultimate success of the programme. The coordinator will provide a key link between the research community and the EPSRC Programme Manager.

Initially the contract will be for one year, but with an option to renew for up to three years. In the first instance, potential applicants should register their interest in writing, including a brief CV and relevant experience by 17 March 1995, and posted to: Head of Procurement Group, EPSRC, Polaris House, North Star Avenue, Swindon SN2 1ET. Contractual enquiries should be directed to Mr Chris Moulsley (Tel: 01793 444250).

Technical enquiries and an information pack can be obtained from Dr Steve Milsom (the "Towards Sustainable Cities" Programme Manager, Tel: 01793 444237).

EPSRC
Engineering and Physical Sciences Research Council
Ph.D. STUDENTSHP

GUY’S AND ST THOMAS’S MEDICAL AND DENTAL SCHOOL
(University of London)

Applications are invited for a 3 year studentship available immediately to work on the role of cortical cytoskeleton in the growth and differentiation of oral keratinocytes. The project will involve the use of cell and molecular biology and protein chemistry techniques.

Applicants should have a first or upper second class degree in biochemistry or cell and molecular biology and those with an MSc are also encouraged to apply. Previous laboratory experience in molecular cloning or gene expression will be an advantage. Salary is £10,000 per annum (fixed and inclusive).

Informal enquiries should be directed to Dr A Waseem (0171 955 4992) or Professor Mark McGurk (0171 955 4342). To apply, please send three copies of your CV and the names and addresses of two referees to: Dr A Waseem, Craniofacial Development Unit, Floor 28, Guy's Tower, Guy's Hospital, London Bridge, London SE1 9RT by 23 March 1995.

The Scottish Office Agriculture and Fisheries Department intends to commission by competitive tender, through its Flexible Fund, projects in the areas listed below:

- FF/95/1 New approaches in statistical methods for research.
- FF/95/2 Improved reproductive technologies in sheep.
- FF/95/3 Generic, non-culture methods for the detection and identification of viable microorganisms.
- FF/95/4 Genetic transfer of anti-nutritional factors in crop plants to confer pest resistance, and its nutritional and environmental consequences.

Contractors are invited to express interest in tendering for these projects, and should provide details of their capability, together with a brief outline proposal. In each case, a short list of selected candidates will be invited to submit full project proposals for appraisal. Where more than one project in any area is eventually selected for funding, successful contractors may be asked to modify their proposals if it appears to the Department that collaborative research will yield better value for money than projects conducted in isolation.

INVITATION TO TENDER
The Scottish Office Agriculture and Fisheries Department invites tenders for the following research projects.

1. EVALUATION OF THE FARM WOODLAND PREMIUM SCHEME (FWPS): FARM SURVEY - a research project intended to evaluate and review the FWPS in order to decide whether, or in what form, the scheme should continue after 31 MARCH 1997, and to inform the review Farm Woodland Scheme (FWS) and FWPS payment rates which must be undertaken and reported to Parliament by July 1996.

The project should be completed and the report prepared by 31 December 1995. The project is expected to cost no more than £100,000.

2. LEVEL AND EFFECTIVENESS OF PUBLIC SUPPORT TO AGRICULTURE IN DIFFERENT PARTS OF SCOTLAND - a research project to obtain a clearer and more up-to-date picture of the level of overall public support to agriculture in different parts of Scotland and to develop the methodology and improve previous estimates of the impact of agricultural support on regional income and employment.

The project should be completed and the report prepared no later than 31 March 1996. The project is expected to cost in the region of £20 - 30,000.

3. IMPACT OF QUALITY FOOD SCHEMES - a research project to obtain a more quantified assessment of the impact of quality food schemes on variables such as sales, outputs, prices and market penetration; and the scope for increased sales in particular markets. The project will be expected to be completed within 6 months of the agreed start date. The cost of the work is expected to be in the region of £50 - 75,000.

4. DEVELOPMENT OF TESTS TO DISTINGUISH POTATO CULTIVARS AND THEIR TRANSGENIC VARIANTS - a research project to develop procedures which identify by molecular means 1) the cultivar of a sample of potatoes, the origin of which may be unknown, and 2) whether or not a cultivar, which may have been identified using the test described in 1), has also been genetically modified.

The project will be expected to be completed within two years. Further details are available from Mrs B McGee, The Scottish Office Agriculture and Fisheries Department, Room 316, Pentland House, 47
Robb's Loan, Edinburgh, EH14 1TW (Tel 0131 244 6050; Fax 0131 244 6001). The latest date for receipt of tenders and outline proposals is 12.00 hours on 24 March 1995.
Ph.D. STUDENTSHP
(Ornithology)

The role of agricultural intensification in the decline of the Corn Bunting

The Game Conservancy Trust invites applications for this collaborative three-year studentship, tenable from April 1995 at the University of Sussex and sponsored jointly by the RSPB and English Nature. Candidates should have (or expect) a 1st or 2.1 degree and a full driving licence. A ringing licence and an ability to find nests would be advantageous. For further information on the project telephone 0425 652381.

Apply with full CV and names.addresses of two referees to: Dr N. Aebischer, The Game Conservancy Trust, Fordingbridge, Hants SP6 1EF. Closing date: 17 March 1995.
Senior Researcher - PO1
(Fixed term contract - 2 years)
£20,532 - £21,966 pa incl.

The London Research Centre provides information, research and consultancy services on a wide range of urban issues, working primarily for the London local authorities, but also for many other public and private organisations.

We are seeking a researcher to join our Environment and Transport Studies Department. As part of a small team, you will undertake research on environment and transport issues in London and other urban areas, particularly relating to air pollution. You will assist in the compilation and analysis of databases, undertake research and produce reports on environmental problems. You will also be involved in developing the London Research Centre as a centre of expertise on urban air pollution.

You should have a degree (or equivalent) in a numerate subject involving the study of human-environment issues such as Geography, Biology or Environmental Science. Some work experience involving the collection and analysis of data related to the environment is essential.

London Research Centre

Further details and an application form can be obtained from the Personnel Assistant, London Research Centre, 81 Black Prince Road, London SE7 7SZ. Telephone 0171 627 9612 (24 hour ansaphone).

Please quote reference ETS/127/SR and where you saw the advertisement.

Completed applications should be returned to the above address by Friday 17th March 1995.

Our jobs are open to all races, both sexes; people with disabilities, lesbians and gay men.
INSTITUTE OF MOLECULAR AND BIOMOLECULAR ELECTRONICS

Postdoctoral Research Assistant
Capacitive Biosensors

A postdoctoral research assistantship sponsored by BNFL is available in the Institute of Molecular and Biomolecular Electronics to work on the development of a novel molecular sensor system employing enzyme electrodes in conjunction with capacitive measurement techniques. A major part of the programme will be concerned with the characterisation of the frequency-dependent capacitive properties of polymeric immobilising matrices and active enzyme electrodes over a wide spectrum of frequencies.

Salary will be £15,566 per annum.

Informal enquiries can be made by contacting Dr Steve Rone on (01248) 382706.

Application forms and further details may be obtained by contacting Personnel Services, University of Wales, Bangor, Gwynedd LL57 2DG. Tel: (01248) 382926. Please quote reference number 95/28 when applying.

Closing date for applications: Friday 24 March 1995.

An Equal Opportunities Employer
UNIVERSITY OF ABERDEEN

RESEARCH FELLOW
£13,941 - £17,813 pa

Required in the Department of Molecular and Cell Biology to work on the construction of a genome map of the pathogenic fungus, *candida albicans*, using cosmid cloning. You should have a Ph.D. in a relevant area and preferably experience in molecular genetics. The post is available for three years. Informal enquiries may be directed to Professor Duncan Shaw on tel (01224) 273191 or email: d.shaw@aberdeen.ac.uk (fax 01224 273144).

Application forms and further particulars are available from Personnel Services, University of Aberdeen, Regent Walk, Aberdeen AB9 1FX, telephone (01224) 272727 quoting reference number ZMC 444R. A 24-hour answering service is in operation. Closing date: 23 March 1995.

The University of Aberdeen is established to provide Higher Education and to carry our related research

AN EQUAL OPPORTUNITIES EMPLOYER

Applications are invited for a full-time post-graduate (M.Phil.) studentship funded by Brunel University. The successful applicant will carry out research on the synthesis of ceramic composites from polymeric precursors with Dr. M.J. Edirisinghe and Dr. M.J. Folkes.

Fees and a stipend of £5,000 will be paid for one year. Highly motivated candidates with at least a 2.ii degree in Materials Science or Chemistry are encouraged to apply. Additional qualifications or experience in Materials Chemistry or Polymer Chemistry will be an advantage.

Apply by sending a C.V. to the Department of Materials Technology, Brunel University, Uxbridge, Middlesex UB8 3PH, United Kingdom. Quote reference CCR/ studentship.

If you require further information telephone 01895 274000 Ext. 2981.

Closing date: 30th March 1995.
UNIVERSITY OF READING
SCHOOL OF ANIMAL AND MICROBIAL SCIENCE

Medical Research Council Studentships

Two studentships are available from October 1995. One studentship will be available to work in any of the following projects: enteroviral infectivity (Prof. J.W. Almond); vertebrate genome evolution (Prof. P.W.H. Holland); corticotrophin releasing factor binding proteins (Prof. P.J. Lowry); picornovirus encapsidation (Dr D.J. Evans); human immunodeficiency virus (HIV) tropism determinants (Dr J.A. McKeating); transport in coronary arteries (Dr P.D. Weinberg; fertilisation promoting peptide control (Dr S.M. Cockle); use of Toxoplasma gondii in immunosuppression assessment (Dr D. Savva); birth effects in neonatal thermoregulation and growth (Dr M.E. Symonds); ontogeny of growth hormone receptors (Dr M.A. Lomax); bacterial protein secretion (Dr S. Maclntyre).

A second studentship held in collaboration with SmithKline Beecham Pharmaceuticals is available to work with Dr D. S. Leake on the biochemistry of low density lipoprotein oxidation. The normal stipend will be enhanced by £2,200pa and the successful applicant would join an active group of 11 working on atherosclerosis and coronary heart disease.

Applicants wishing to be considered for these studentships should write to Prof. R.L. Robson, The Research Office, School of Animal and Microbial Sciences, University of Reading, Reading RG6 2AJ and include a curriculum vitae, potential project interests, and the names of two referees.

A centre of excellence for university teaching and research
St George's Hospital Medical School
University of London

4 YEAR POSTGRADUATE RESEARCH SCIENTIST
(with view to higher degree)
Department of Physiology

Postgraduate sought under Wellcome Programme Grant to study macromolecular and fluid transport across synovial lining of joints. Candidates should possess (or attain soon) a good university degree in Physiology or related area. Programme combines physiological, biochemical and ultrastructural techniques, supervised jointly by Prof. Levick and Prof. Mason (Dept. Biochemistry, Charing Cross).

Salary in the range £16,075 - £17,700 inc. London weighting (Grade 1B) plus £500 p.a. meetings allowance. Starts Autumn 1995.

Informal enquiries to Prof. R Levick on 0181 725 5554. Further details and an application form from the Personnel Officer, St George's Hospital Medical School, Cranmer Terrace, London SW17 0RE, 0181 725 5020 (24-hour answerphone). Closing date 30 March 1995.
Please quote reference 22/95.
[1967-100 (1995) : 89]
THE LONDON HOSPITAL MEDICAL COLLEGE  
(University of London)

Research Fellowship in Neuroscience

Applications are invited for a Research Fellowship (renewable annually for up to three years) based at the Royal Hospitals Trust (Royal London Hospital and St Bartholomew's Hospital) and the London Hospital Medical College. Funded by the Migraine Trust, the project is part of a programme to study the cerebral innervation, and will focus on the role of Nerve Growth Factor in vascular head pain. The post is suitable for either a training neurologist or neurosurgeon aiming to an MD, or a scientist seeking a postdoctoral Fellowship.

The salary will support a clinical registrar or research scientist.

Copies of the job description are available on written request from the College Secretary's Office, The London Hospital College, Turner Street, London E1 2AD, where applications in the form of CV (3 copies), together with the names and addresses of two referees, should be sent.

For details of the project contact Dr P. Anand, Department of Neurology, Royal London Hospital. Telephone: 0171 377 7234, or Mr P. Hamlyn, Department of Neurosurgery, St Bartholomew's Hospital. Telephone: 0171 601 7131.

Closing date 24 March 1995.
The Queen's University of Belfast  
Faculty of Agriculture and Food Science  
POSTGRADUATE SCHOLARSHIPS

Scholarships are tenable for three years commencing 1 September 1995. Applications are invited from graduates with an upper second class honours degree or equivalent in agriculture/agriculture economics, veterinary or food-related subjects.

Further details and application forms are available from the Dean, Faculty of Agriculture and Food Science, The Queen's University of Belfast, Newforge Lane, Belfast BT9 5PX. Tel: 01232 661166, ext 2202. Closing date: 1 May 1995.
Applications are invited for the following positions at the MRC Toxicology Unit at the Centre for Mechanisms of Human Toxicity at Leicester University.

**Postdoctoral Scientist** (Ref: GP/951)
Required to join a new group studying mechanisms of particle retention in the respiratory tract. Work will focus on pulmonary macrophage function and cytotoxicity. Applicants should have a background in cell biology and experience of cell culture techniques.

This position is tenable for three years with a starting salary in the range of £16,191-£19,326 according to experience, plus superannuation scheme.

**Higher Scientific Officer** (Ref: GP/952)
Also required to join the above group. Work will include novel ways of investigating particle clearance. Applicants must have a degree or equivalent in biological science plus a minimum of two years research experience.
This is a permanent position and carries a starting salary in the range of £13,025-£16,813 according to experience, plus superannuation scheme.

**Scientific Officer** (Ref: LLS/95)
Required to carry out a wide range of biochemical techniques. Applicants must have a degree or equivalent, a knowledge of kinetics and metabolism together with experience in Pharmacology would be an advantage.

This position is tenable for two years with a starting salary in the range of £11,138 - £12,707 according to experience, plus superannuation scheme.

Letters of application for the above posts, including a CV and the names of two referees, should be sent to the Unit Administrator, MRC Toxicology Unit, Hodgkin Building, University of Leicester, PO Box 138, Lancaster Road, Leicester LE1 9HN, quoting the appropriate reference number.

The closing date for applications is 16 March 1995.

The Council is an equal opportunities employer
DEPARTMENT OF CHEMISTRY

LECTURESHIPS IN CHEMISTRY

Applications are invited for two Lectureships in Chemistry at the University of York, available from 1 October 1995.

The Department offers a range of Chemistry courses, including Chemistry, Management and Industry and Chemistry, Resources and the Environment. The Lecturers will be expected to make innovative and significant contributions to the teaching of these highly successful courses which cover such topics as economics and management in the chemical industry, atmospheric chemistry, geochemistry, and applications of clean technology and analytical chemistry.

The Lecturers will be expected to develop their own research programmes; while the areas of research are open, programmes which make links with existing research projects within the Department would be particularly welcomed.

The Department, which has 32 full-time academic staff, over 300 undergraduate students and 160 research students and fellows, was graded 4 in the last UFC research selectivity exercise. It has a particularly successful record in attracting external funding (over £2 million per annum) and well developed links with industry. Salaries will be within Lecturer Grade A (£14,756 - £19,326 pa) or Lecturer Grade B (£20,133 - £25,735 pa).

Informal enquiries may be made to Professor B.C. Gilbert, tel: 01904 432500. For further information and details of how to apply, please contact the Personnel Office, University of York, Heslington, YORK YO1 5DD, quoting reference number 6/3402. The closing date for receipt of applications is Thursday 13 April 1995.

THE UNIVERSITY of York
COURSES & EVENTS
PROVISION OF TRAINING SERVICES

TENDER OPPORTUNITY

The Health and Safety Executive is seeking expressions of interest from potential bidders for contracts to provide a range of training services for staff currently numbering around 4,500.

This training will take place at HSE's own training centres in Bootle, London and Sheffield as well as a variety of locations throughout Great Britain, and the categories of training are shown below. Organisations who express an interest in delivering any of these categories will be sent more detailed information about HSE and the training required.

You will also receive an appraisal questionnaire which seeks background information on your company, details of its accounts, trading history, previous track record, and qualifications and experience of staff. This information will form the basis for the selection of a shortlist of companies who may be invited to tender.

Please tick those categories for which you wish to receive further information and return the form (by 31st March 1995) to: Ms C Longden, Health and Safety Executive, Room 1304 Daniel House, Stanley Precinct, Bootle, Merseyside L20 3TW.

ONLY WRITTEN REQUESTS USING THIS FORM WILL BE CONSIDERED.

DO NOT SEND ANY OTHER INFORMATION AT THIS STAGE.

Translate your skills into a rewarding new career

GRADUATE SCIENTISTS WITH EXCELLENT LANGUAGES
Performance-related earnings to over £30K

RWS Group plc is the largest European translation company, with a staff of around 220 and clients in over 30 countries. Our reputation continues to generate increasing demand for our services. Accordingly we need the following additional high calibre graduates to join our team of over 50 professional STAFF TRANSLATORS:

ELECTRONICS or PHYSICS graduates with experience in telecommunications and/or semiconductors, to translate into German. You must be of German mother tongue and possess a thorough knowledge of English. A knowledge of French would be an advantage but is not essential.

ELECTRONICS or PHYSICS graduates, to translate into English. You must be of English mother tongue and possess a thorough knowledge of Dutch. A knowledge of other languages would be an advantage but is not essential.

CHEMICAL ENGINEERING graduates with industrial experience, to translate into German. You must be of German mother tongue and possess a thorough knowledge of English. A knowledge of French would be an advantage but is not essential.

CHEMISTRY and CHEMICAL ENGINEERING graduates with experience in Plastics technology, to translate into English. You must be of English mother tongue and possess a thorough knowledge of German and/or French.

As well as a stimulating career, we offer a very generous performance-related salary package, with potential earnings well in excess of £30K. You would work in a modern, highly professional environment and would be aided by over 100 first-class support staff, excellent electronic facilities and an extensive library.

If you are interested in any one of these opportunities, please write in full confidence to the Personnel Manager, enclosing your cv and details of your current remuneration.

12 Months **M.Sc. Course** by Advanced Study and Research are offered in the following subjects:

- Surface Chemistry and Colloids (Physical Chemistry)*
- Foundations of Mathematics and Theory of Computation (Mathematics)*
- Fluid Mechanics (Mathematics)*
- Advanced Neuro- and Molecular-Pharmacology (Pharmacology)
- Nonlinear Mathematics (Mathematics/ Engineering Maths)

The courses in Chemistry and Mathematics marked with an asterisk normally qualify for EPSRC studentships; confirmation of support for Nonlinear Mathematics is being sought. Early application is desirable.

Details of the individual courses may be obtained from the Head of Department concerned, University of Bristol, Senate House, Bristol BS8 1TH.

Enquiries are also invited for details of opportunities for research leading to the degree of Ph.D.

**AN EQUAL OPPORTUNITIES EMPLOYER**

UNIVERSITY OF BRISTOL
AN INTERNATIONAL CENTRE FOR EDUCATION & RESEARCH
LEICESTER UNIVERSITY
Department of Surgery

RESEARCH ASSISTANT AND Ph.D. STUDENTSHP IN CELL AND MOLECULAR BIOLOGY

Applications are invited for two research positions in vascular cell and molecular biology. A BHF funded Research Assistant post is available immediately to work on transcriptional regulation of growth factor gene expression. Salary on the R&AIB scale £13,941 to £15,566 pa. A Ph.D. studentship is available from October 1995 for studies involving cloning and functional analysis of novel genes in endothelial cells. Both positions are for three years.

Applications in writing, including CV and names of two referees, should be addressed to Dr Nick Brindle, Department of Surgery, University of Leicester, Clinical Sciences Building, PO Box 65, Leicester Royal Infirmary NHS Trust, Leicester LE2 7LX. Informal enquiries to Dr Brindle on (0116) 252 5802, e-mail: npjbl@leicester.ac.uk. The closing date for applications is 21 April 1995.

Rutherford Appleton Laboratory

Research posts in radiowave propagation

A number of applied research scientists and engineers are required by the Radio Communications Research Unit in the following areas:

1) Development of numerical models and prediction methods for the scatter and diffraction of millimetre waves by buildings and vegetation. Ray-based methods are currently used, and channel and system models will be developed for use in communications simulation packages. Computing is based on workstations and PCs. Some experience of computer modelling and communications systems or electromagnetic theory would be an advantage.

2) Scientific analysis of experimental data and development of prediction methods associated with studies of millimetre wave propagation. Prior knowledge of radiowave propagation is not required. However, some experience in scientific data analysis using FORTRAN on PCs would be an advantage.

3) Investigation of tropospheric radiowave propagation on transhorizon paths involving the development, commissioning and operation of an experimental system operating at several frequencies in the microwave millimetre wave part of the spectrum. The project will also require analysis of data and development of transhorizon prediction models. Some experience in developing microwave systems and prototype electronics would be an advantage.

Applicants should indicate their preferred areas. A good honours degree in science, mathematics or engineering with some experience in related fields of research is necessary. The three areas involve collaboration with other groups in the UK and abroad. Publication of results is encouraged. Starting salary ranges from £11,138 to £16,168 and from £13,025 to £18,911 with over two years relevant experience.

DRAL offers a unique research environment, where more than 1,000 scientists and engineers conduct a very broad based programme in close association with UK Universities, Industry, Government Departments and International Partners.

Potential applicants should contact Prof J R Norbury for more details. Telephone 01235 445508.

For an application form please contact the Recruitment Office, Personnel Division, Rutherford Appleton Laboratory, Chilton, Didcot, Oxon OX11 0QX. Telephone 01235 445435, quoting reference VN 1287.

Applications must be received by 21st April 1995.

DRAL is working towards equal opportunities and operates a non-smoking policy.

We are looking for CRAs throughout the UK

INNOVEX
DOE No. SE 7426 RR3018 Innovex is an equal opportunities employer.

If you have a strong desire to succeed and a flexible approach to your work - If you seek variety of experience with different companies, in different therapeutic areas and in all four phases of research - We can offer you:
• Opportunities to work within client companies and CRO environment.
• Competitive salary package.
• First class training programme.
• Career development opportunities.

So, if you're seeking work in a challenging and dynamic environment and have at least 6 months experience as a CRA, call us now on the Clinical - Research Hotline - 01628 491590 or alternatively fax or send your CV to: Clinical Resourcing Dept., Innovex (UK) Ltd, Innovex House, Marlow Park, Marlow, Bucks SL7 1TB. Fax 01628 491555

We look forward to hearing from you!
Glaxo Research and Development is initiating a new program to study the linking of mammalian 7 transmembrane receptors to yeast signalling pathways. Led by an academic scientist on sabbatical at Glaxo, the team will be made up of talented individuals with a commitment to both solving the practical problem and understanding the basic mechanisms. The work will require imagination and enthusiasm from all team members.

Glaxo provides state-of-the-art facilities for the work beginning at Greenford, West London and continuing in June 1995 at our brand new purpose-built research campus at Stevenage, Hertfordshire, some 30 miles north of London. As a major health care company, we are committed to a no smoking environment.

If you are a science graduate with an interest in yeast research and a desire to participate in this important work, please write enclosing your CV to the Assistant HR Adviser (Research), Glaxo Research and Development Limited, Gunnels Wood Road, Stevenage, Herts SG1 2NY. Fax: (0) 1438 763055. Please quote reference VT/MS/T23.

Ph.D. STUDENTSHIPS 1995

A total of eight studentships (four NERC and four BBSRC) will be available in the academic year 1995/96.

Projects for the NERC studentships have already been allocated and are: Professor G A. Codd (cyanobacterial toxins), Dr D. W. Hopkins (soil microbiology), Dr A. M. Johnston (freshwater phytoplankton: CASE with IFE Windermere) and Professor J. A. Raven (ammonia exchange/physiology: CASE with ITE Edinburgh).

The BBSRC studentships are open to competition but at least two must be CASE awards, possible topics are: Professor G. M. Gadd (fungal metabolism), Professor R. A. Herbert (microbiology of extremophiles), Dr S. F Hubbard (insect populations/genetics), Dr C. J. Hutchison (control of cell division), Dr R. Parsons (plant nitrogen nutrition), Dr P. Rowell (cyanobacterial differentiation), Professor J. I. Sprent (nitrogen fixing legumes), Dr J. D. B. Weyers (stomatal physiology), Dr W. G. F. Whitfield (insect developmental biology).

Biological Sciences is a well funded department with established commitment to research having achieved Grade 4A and in both the previous research selectivity/assessment exercises. Dundee is situated in an area of unrivaled natural beauty and benefits both from some of the cheapest accommodation costs in the country and access to a wide range of outdoor pursuits.

Applications are invited from EC citizens who hold or who expect to obtain a first or upper second class degree in an appropriate scientific discipline. An outline of all available topics (NERC and BBSRC) can be obtained by writing to, telephone or faxing Miss Angela Nicoll, Department of Biological Sciences, University of Dundee, Dundee DD1 4HN. Tel: (01382) 344765. Fax: (01382) 322318.

INVESTING FOR TOMORROW - for you, for us, for agriculture worldwide.

DowElanco is a worldwide research based plant protection company facing a programme of significant growth throughout the 1990s. We are dedicated to continuous improvements in crop protection while safeguarding the interests of the user, consumer and the environment. We're now looking for an outstanding person who shares our ambitions and will make a significant contribution to our future success.

STUDY DIRECTOR FOR RESIDUE CHEMISTRY

DowElanco currently has an opportunity for an experienced Study Director in Residue Chemistry to Join the Environmental Chemistry Laboratories based at Letcombe, near Wantage, Oxon.

Set in the pleasant Oxfordshire countryside, the Letcombe Laboratory has all the modern equipment and facilities needed to carry out Research and Development programs to today's high standards.

Reporting to the group technical leader, you will be responsible for providing data on new and existing molecules in support of global regulatory requirements. A minimum of 5 years experience in a comparable organisation is a prerequisite to joining this dynamic and growing business.

Ideally you will have a good honours degree or Ph.D. and experience in analysis of a wide variety of crops, soil and water. Experience in gas and liquid chromatography is essential, and a knowledge of residue field operations would be an advantage as you will be involved in the planning and implementation of supervised residue field trials, subsequent analysis and reporting of data to G.L.F.

You should have good planning and project management skills, and be able to work both independently and as part of a team within a demanding goal oriented environment. You will be required to work closely with colleagues throughout Europe, and so knowledge of a second European language would be a considerable advantage.

Joining the DowElanco team represents an excellent opportunity to develop a career with a top global plant protection business. Naturally the rewards are attractive and include competitive salary, pension, life and private health insurance schemes and relocation assistance where appropriate.

Please apply in writing with full CV and career details to: Glyn Jones, Human Resources Manager, DowElanco Limited, Letcombe Regis, Wantage, Oxon, OX12 9JT.

TM DowElanco
The Pelagic Ecosystem Studies Programme of the Survey’s Marine Life Sciences Division requires a Biological Oceanographer to undertake research and work on aspects of the flux of material through Antarctic Krill.

The post will build on previous work on the characterisation of biomarker compounds, and on the role of lipids in the carbon budget of Krill, combining aspects of both previous studies to develop our understanding of the role of Krill in the South Ocean Ecosystem. It will involve biochemical analysis of particulate matter, using modern analytical techniques, and physiological work on the zooplankton.

Candidates should be physically fit as the post will involve participation on oceanographic cruises in Antarctica.

The grading of the post is HSO/SSO.

Qualifications: Ph.D. in either marine biology, organic chemistry or oceanography with experience in analytical chemistry or marine biology respectively. A knowledge of modern analytical techniques (gas chromatography, GC/MS, HPLC) is required.

Salary in the range of £13,025 to £23,932 depending on qualifications and experience.

For further details and an application form please contact the Personnel Section, British Antarctic Survey, High Cross, Madingley Road, Cambridge CB3 0ET. Telephone: Cambridge (01223) 251508/7.

Please quote reference: BAS 14/95.

Closing date for completed application forms is 21 April 1995.

We require two soil ecologists at our Merlewood Research Station in an expanding programme on biological aspects of carbon and nutrient cycling:

SOIL BIOLOGIST/ZOOLOGIST Ref : ITE 185

The Soil Biologist / Zoologist will carry out existing contract-based research, in addition to initiating new research projects in this field. Research experience in the role of fauna in soil processes would be a particular advantage.

MICROBIAL ECOLOGIST Ref: ITE 187

The Microbial Ecologist will develop the application of molecular techniques in studies of soil processes. In addition to developing an active research programme, you will be responsible for developing the necessary laboratory facilities and protocols. Research experience in the use of microbial molecular techniques is essential.

To qualify you will need a degree or equivalent in a related subject plus 2 years’ postgraduate experience or a Ph.D.

The above two posts are 3-year fixed term appointments.
Salary in the range £13,025 - £18,911 depending on qualifications and experience.

Application forms are available from Suzanne Stefanelli, Institute of Terrestrial Ecology, Monks Wood, Huntingdon, Cambs PE17 2LS. Closing date for applications is 21 April 1995.

Please quote appropriate reference number.

The Natural Environment Research Council has an equal opportunities policy and welcomes applications from all sections of the community.

Scientific Officer  
Division of Endocrinology

The position involves the assay of bacterial endotoxin, the development of improved tests for endotoxin and the study of novel therapeutics for treating endotoxaemia/septic shock. Additional duties will include the development of in vitro assays for growth factors using predominantly cell-based bioassays and immunoassays.

Applicants should possess a degree in a relevant biological science. Laboratory experience and a good aseptic technique would be advantageous.

Salary will be on the scale up to £21,072 inclusive per annum, dependent on experience.

For an application form and further details please write to the Personnel Office, National Institute for Biological Standards and Control, Blanche Lane, South Mimms, Potters Bar, Herts EN6 3QG.

Please quote reference number: HO/066

Closing date for applications is: 21 April 1995.

NIBSC  
Assuring the quality of biological medicines  
RESEARCH SCIENTIST

Required for an EC project lasting approximately 16 months: Colloid Facilitated Leaching of Groundwater Contaminants through Soils. Work involves lysimeter studies and measuring colloids and pollutants in drainage waters. Candidates should preferably have a Ph.D. in soil science or related subject, experience of colloid chemistry an advantage. Full driving licence essential. Salary within Band 6: £13,286 - £23,470.

Apply by application form only, available with further particulars from Personnel Department, IACR Rothamsted, Harpenden, Herts, AL5 2JQ.
Ref 181. Closing date 13 April 1995.

HEAD OF RESEARCH & DEVELOPMENT

A rapidly expanding UK based multinational producer and supplier of conducting hydrogel devices, for a wide range of bio-medical applications, requires a suitable candidate to take responsibility for our emerging hydrogel synthesis activity.

The position will involve heading our R&D operation as well as overseeing our new production facility located on Warwick Science Park. The role involves communication across all business interfaces ensuring that customer needs are translated into successful products efficiently and effectively.

The post is an exciting opportunity for a highly motivated, dynamic individual who will be expected to show a great deal of initiative whilst working as an active team member.

The successful applicant will have a good honours degree, probably a Ph.D. and industrial experience in hydrogels, polymer synthesis or surface coatings industries. An extremely attractive remuneration package is available.

Please write with full details of your qualifications and experience to: Dr D. M. Haddleton, Department of Chemistry, University of Warwick, Coventry CV4 7AL or for further information telephone: (01203) 523256 / email msrgs@csv.warwick.ac.uk

Senior Registration Project Manager

A pivotal role influencing early development strategy

Buckinghamshire Excellent salary

This fast-growing research-based pharmaceutical company has built a fine reputation for developing an enviable portfolio across a wide therapeutic range spanning ethical, biotechnology, pharmacy and animal products.

Recognised for its scientific innovation and marketing success, this is a particularly exciting time to join the high-quality regulatory team as a large number of new compounds progress rapidly to development.

On a day-to-day basis, you will be responsible to the Regulatory Affairs Head for planning and managing regulatory submissions for marketing and clinical trials for a specific product range, which will involve substantial liaison with research and marketing colleagues and health authorities. Working on a project basis, your proactive contribution from early development will be vital in influencing strategic direction for the products.

For this challenging role, your desire and determination to implement projects with discernible success will demand communication and interpersonal skills of the highest order. You will, therefore, have at least 3 - 5 years' regulatory experience within a UK and European environment.

If you are a truly professional regulatory specialist looking to join an experienced team in a pivotal role, send your cv to Ann Judge, Eames • Jones • Judge • Hawkings, 29 High Street, Welwyn, Herts AL6 9EE. Telephone: 01438 840984.
This year, this company will be expanding by this much
Pre-Sales Support Analysts - £25K - £40K plus attractive benefits package

In less than fifteen years, Silicon Graphics is on track to exceed sales of $2 billion this year. We have pioneered the development of Visual Computing for technical, scientific and creative professionals in every area of industry and commerce. From desktop RISC Personal Computers, through outrageously fast Database & File Servers, to Supercomputing-class systems; our full range of systems is capable of blending seamlessly with existing environments - a key factor in our success.

Wherever we're active, we're seeking to redefine the boundaries of technology - which is why we're now intent on recruiting high-quality, committed and ambitious professionals to every area of our operation. Starting with degree-qualified pre-sales support staff with the following experience:

READING, RDBMS/ MEDIA SERVER BIAS
You will have at least four years’ experience in System Analysis, Design, or implementation. Using UNIX and a leading RDBMS and associated tools, you have been able to optimise system performance understanding both application and UNIX system parameters. C language skills coupled with experience of OSI communications in heterogeneous environments is an added advantage. Ref: NS/01.

READING/MIDLANDS, IMAGE PROCESSING BIAS
You will have a Science/Engineering degree together with four or more years in image Analysis, Signal Processing or high performance display subsystems. You should demonstrate skills in one or more of the following: C & UNIX System programming, Video processing, UNIX device drivers, or 3D image manipulations & rendering. Ref: NS/02.

READING, CHEMISTRY/BIOLOGICAL SCIENCES BIAS
Your 1st or higher degree in Chemistry or Biological Sciences will have taken you into four years of Research. You will have migrated into a systems and application support role, perhaps with a supplier. You will have an excellent understanding of the software in Chemical or BioSciences marketplace, and an interest in emerging computer technologies and their application into your area of expertise. Ref: NS/03.

READING, OIL & GAS EXPLORATION / ENGINEERING BIAS
You will have a degree or higher qualification in a geophysics or science related discipline. You will have worked in one of the Majors or a leading supplier of services / software to the industry for at least five years. Later migrating into a systems and application support role. In addition to applications knowledge you will demonstrate solid UNIX, C and networking skills as applied in heterogeneous environments. Ref: NS/04.

MANCHESTER/ - BIRMINGHAM/READING, MCAD BIAS
You will have put your Engineering degree to good use in design for a manufacturer for three to five years. More recently you will have been in a support role either with a manufacturer or software supplier. You will have good UNIX abilities, with a passionate interest in workstation technologies and how they are applied in the CIM marketplace. Ref: NS/05.

Pre-Sales Support Analysts are pivotal to Silicon Graphics success. You will be key in relating our technology lead into demonstrable benefits to our customers. It’s a role which is critical to the sales cycle, so a genuine and total commitment to customer requirements is essential, as is your ability to present proposals up to and including Board level.

You’ll be joining a young company with an open culture, which couples hard work with a strong belief in offering every encouragement in fulfilling career-potential. If you have the ability, we’ll give you the
scope. A substantial benefits package is offered including a company car and, where appropriate, relocation assistance.

To apply, please send your CV to The Personnel Department, Silicon Graphics, 1530 Arlington Business Park, Theale, Reading, Berkshire RG7 4SB.

Please quote the appropriate reference.

Computer Systems
Novel ideas for new clean technology

Call for Outline Proposals for Exploratory Studies

The Engineering and Physical Sciences Research Council has earmarked £1 million to fund exploratory studies of novel and unconventional ideas that could lead to a new clean technology. 'Clean technology' means avoiding waste and pollution, not clearing it up after the event.

Anyone can make an outline proposal - in particular, if you now work in industry, and your employer is willing to second you to a university for a while to enable you to do some long-range thinking about clean technology. Ideas from people already in a university are of course also welcome. All grants will have to be administered by a university.

For a copy of the call for proposals, please write to: Nick Lawrence, EPSRC, North Star Avenue, Swindon SN2 1ET.

E-mail: snjl0@lib.rl.ac.uk

You will have to get your outline proposal to EPSRC by 15 May 1995.

EPSRC

ADHESIVES DEVELOPMENT CHEMIST
Cambridge

Ciba Composites is Europe's leading supplier of composite materials to aerospace, marine, automotive, railway and sports markets, and is part of the international Ciba group.

We recognise that Research and Development of the highest quality is essential and are seeking to strengthen our development team, devoted to high performance thermosetting adhesives.

The successful applicant should be an ambitious professional who possesses a degree or doctorate in organic or polymer chemistry. Several years' experience in adhesives development is an essential requirement. The ability to manage project teams, abundant initiative and effective interpersonal skills are also important.

In return we offer real opportunities for career progression and a competitive benefits package including relocation assistance where applicable.

To apply, please write enclosing a full CV to: Miss R.L. Mason, Employee Resources Manager, Ciba Composites, Duxford, Cambridge C82 4QD.

Ciba
The following MRC-funded Ph.D. studentships will be available in October 1995:

Structure and dynamics of complexes of calmodulin with biological target sequences Dr P. M. Bayley
The biochemical activity of muscle cells at rest and during contraction Dr M. Ferenczi
The biochemical role of the ras switch in cell signalling pathways Dr M. Webb
Intracellular calcium signalling at fertilisation Dr A. Lai
The role of isoforms of 14-3-3 Protein in signal transduction Dr A. Aitken
The crystal structure and mechanistic studies of metallo-b lactamases Dr S. Gamblin
The influence of heat shock protein on antigen presentation within the MHC class II presentation pathway Dr B. Stockinger
The role of the CD86 polypeptide during T cell differentiation and mature T cell function Dr R. Zamoyska
Ion channel activity of the NB protein of influenza B viruses Dr A. J. Hay
Molecular mechanism of energy transduction by motor proteins Dr M. Anson
The origins of agonist efficacy and selectivity of muscarinic acetylcholine receptors probed by site-directed mutagenesis Dr E. C. Hulme
Interactions of ras and rho proteins with their effector proteins Dr J. Eccleston
Allosteric Interactions of G protein coupled receptors Dr N. J. M. Birdsall

Please note that these studentships can only be awarded to British Nationals, or in a few highly restricted cases, other citizens of the European Union.

For full details, including brochure and application form, please write to Dr R. W. King, Director of Postgraduate Studies, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA, or telephone 0181-959 3666, ext 2479 or fax 0181-906 4477, or e-mail r-king@uk.ac.mrc.nimr
[1971-017 (1995) : 61]
UNIVERSITY OF BATH  
School of Chemical Engineering

RESEARCH OFFICER  
(Ref No. 95/66)

Applications are invited for a Research Officer to work on a project studying gel filtration separations using commercial CFD packages to investigate changes in fluid flow patterns associated with scale-up. The successful candidate will be responsible for model development and co-ordination of an experimental programme aimed at obtaining validation data, and will be expected to have a background in chemical engineering together with experience in computer based modelling techniques.

The appointment is for 21 months. Starting salary up to £17,813 per annum.

TECHNICIAN  
(Ref No. 95/67)

A Technician is also required on this project for a period of 18 months. The work will involve the operation of a number of gel filtration columns which are incorporated into a computer controlled rig, together with the preparation of the necessary buffer solutions and test samples. The work will require chemical or biochemical laboratory expertise preferably with some direct experience of chromatographic separations. Some familiarity with the use of computer based laboratory data capture systems would also be advantageous.

Starting salary up to £12,456 per annum according to qualifications and experience.

Closing date for applications is 13 April 1995.

Application forms and further details may be obtained from the Personnel Department, University of Bath, Claverton Down, Bath BA2 7AY or telephone Bath (01225) 826092. E-mail: A.J.Whitcombe@bath.ac.uk. Quote the appropriate reference number.

Working towards Equal Opportunities  
FACULTY OF SCIENCE
DEPARTMENT: ZOOLOGY

Lecturer/Senior Lecturer

Requirements: At least an M.Sc in Zoology with appropriate university lecturing experience, research and publications. Preference will be given to appropriately qualified Namibian citizens.

Job description: Chiefly responsible for the lecturing of Vertebrate Biology, with Fisheries/Marine Biology as specialisation serving as recommendation. In addition, duties will include the organisation of practical field trips, setting and marking of tests and assisting with study projects.

Closing date: 7 April 1995.

Date of assumption of duties: As soon as possible.

Contact persons: Ms D Nashandih-Endjambi at (061) 207-2295 or Mr I Nowaseb at (061) 207-2002.

Fringe benefits: The University of Namibia offers competitive salaries and the following fringe benefits: a pension fund medical aid scheme annual bonus home-ownership scheme generous leave privileges relocation expenses.

Application procedure: Applications in writing accompanied by a curriculum vitae, giving full details of present salary notch, increment date, the earliest available date on which duty can be assumed and the names and telephone numbers of three work referees should be submitted to: The Head, Recruitment and Selection, University of Namibia, Private Bag 13301, Windhoek, Namibia. Preliminary telegraphic applications may be made via telex 56-727 or fax to (061) 207-2444/207-2227. (International dialling code where applicable).

Attractive remuneration applies.

UNIVERSITY OF NAMIBIA
The Department of Electronics will be offering over 15 studentships and scholarships to enable well-qualified students to read for a higher degree in Electronics. These will include:
• QUOTA and CASE Research Council Awards
• University Research Studentships
• Awards Sponsored by Industry

Major areas of departmental research include:
• Imaging Systems and Neural Computing
• Parallel and Fault Tolerant Computer Systems
• Radio, Microwaves, mm waves and Optoelectronics
• Mobile, Personal and Satellite Communications
• Electromagnetic Compatibility
• Numerical Electromagnetics
• Archaeological Remote Sensing
• Robust Control Theory and Applications
• Speech and Music Technology
• Device Modelling, Fabrication, Characterisation and Micromachining

Further details on new projects can be obtained on the World Wide Webb at "http://www.york.ac.uk/depts/elec/", or by writing to Prof. J Everard, Department of Electronics, University of York, YORK, YO1 5DD or by telephoning 01904 433024.

THE UNIVERSITY OF YORK -DEDICATED TO EXCELLENCE IN TEACHING AND RESEARCH.
University of Cambridge  
Department of Materials Science and Metallurgy

Postdoctoral Research Position

Applications are invited for the post of Postdoctoral Research Assistant, to join a new small innovative group setting up a UHV deposition system to laser ablate epitaxial oxides onto sputtered epitaxial metal films. A novel oxygen source will be used to minimise surface contamination of the metal base layer. The work will involve commissioning the system and evaluating the structure and properties of the novel oxide-metal heterostructures produced.

Candidates should have a Ph.D. in Materials Science or Applied Physics or substantial experience working with thin film and laser ablation, additionally experience with microfabrication processes would be an advantage. The post is funded by EPSRC for two years on the Cambridge Research Assistant and Research Associate scales, ranging from £13,149 to £19,326.

Applications including a curriculum vitae and the names of two referees should be sent by April 14th, to Dr R. E. Somekh, Department of Materials Science and Metallurgy, Pembroke Street, Cambridge CB2 3QZ. Enquiries can also be made by phone to Dr Somekh 01223 334374 or Simon Turner 01223 334364. [1971-021 (1995) : 62]
RESEARCH TECHNICIAN

£11,706

One year post to work on candidate Genes for Dementia. Send CV and names of two referees to Personnel Department, Addenbrooke's NHS Trust, Hills Road, Cambridge CB2 2QQ by 4 April 1995. Ref: PATHSP/963.

Enquiries to Dr David Rubinsztein, 01223 216063.
Institute of Sound & Vibration Research

Research Fellow

A Research Fellow is required for a European Community-funded project on the active control of structural vibration. You should have experience in vibration analysis and/or active control, ideally to post-doctoral level. This is a collaborative project with research laboratories and industry in France, Italy and Denmark, and the post would involve coordination and travel between the partners.

Salary will be £16,191 - £20,953 per annum.

Applicants should send a full curriculum vitae (3 copies from UK applicants and 1 from overseas), including the names and addresses of three referees to the Personnel Department (R), at the address below, telephone number 01703 592750 by no later than 24 April 1995. Please quote reference number R/296/NS

Working for Equal Opportunities

University of Southampton
University of Southampton
Highfield Southampton SO17 1BJ
If only humans were this simple.

**MEDICAL INFORMATION SCIENTIST (CARDIOVASCULAR)**
Newbury, Berkshire

The development of robots capable of copying human behaviour has long been the fantasy of science fiction writers and film makers alike. But no matter how complex the technology, any robot can be but a mere toy in comparison with the mechanics of the human body. A body which, although remarkably resilient and capable of considerable self-repair and damage limitation, nevertheless often needs the helping hand of science. Which is why Research and Development is a major cornerstone of our business, with significant success in the cardiovascular market and genuine progress in the fields of anti-infective and metabolic medicine. And now, against a background of changes to the healthcare system and the increasing sophistication in the treatment of disease, our input needs to be greater than ever. All of which means that as the Medical Information Scientist (Cardiovascular) for our Pharma Division, you’ll certainly have plenty of challenges and opportunities ahead of you.

Using your knowledge gained from a Life Science or Pharmacy degree and possibly from previous Pharmaceutical industry or NHS experience, you’ll be responding to public /healthcare professionals' enquiries about our products.

You will use and develop databases and information systems to create a wealth of relevant medical and scientific information including competitors' activities. You'll also write various technical reports and bulletins and work closely with other departments such as Sales and Marketing. It almost goes without saying that you'll need excellent communication skills - written, verbal and interpersonal, and the ability to work as part of a dedicated team. Additionally, self-motivation and attention to detail are essential and knowledge of, the industry Codes of Practice would be an advantage.

Apart from a rewarding and challenging role which will enable you to expand your knowledge, there is considerable potential for career development and you will enjoy an excellent salary and benefits package.

For more information and to apply, please write or telephone for an application form to Emma Colsell, Human Resources Department - Healthcare, Bayer plc, Bayer House, Strawberry Hill, Newbury, Berks RG13 1JA. Tel: Newbury (01635) 563236 (answerphone outside office hours (01635) 563639).

The closing date for applications is 28th April 1995.

We are an equal opportunities employer.

**INVESTOR IN PEOPLE**
Bayer
BAYER
BAYER
Caring for Life
SILSOE RESEARCH INSTITUTE

DECISION MODELLER

£23,000 plus benefits

Silsoe Research Institute is the national centre for research in engineering and physical sciences within agriculture and other biologically based industries, and has an international reputation as a centre of excellence. Within the Institute, the Process Engineering Division studies the scientific basis of process systems that are important in agriculture.

We are now seeking an experienced decision modeller to work within the Mathematics and Decision Systems Group which investigates problems in mathematical systems modelling, particularly related to decision making and control in agriculture. As Project Leader, responsible for developing, promoting and encouraging the optimisation techniques in real on-farm situations, you will have considerable liaison with farmers and agricultural experts to determine the need for, and benefits resulting from, decision support systems. You will actively develop decision analysis tools combining AI techniques and mathematical models to solve specific problems.

You must have at least an upper second class honours degree in a mathematical science supported by at least six years post-graduate experience with a strong IT content. Experience of leading projects and developing decision systems is essential, whilst a knowledge of agriculture and specific problems faced in agricultural decision-making would be an advantage.

The position offers a comprehensive benefits package which includes non-contributory pension scheme, life assurance, subsidised work place nursery & staff restaurant, sports & social club, gymnasium and excellent working conditions. Relocation assistance will also be provided where appropriate.

For further details and an application form, please call (01525) 860000, quoting Ref 12/70, or write to: Personnel Department, Silsoe Research Institute, Wrest Park, Silsoe, Beds MK45 4HS. Closing date for applications is 21 April 1995.

ENGINEERING for Life

We are Equal Opportunity Employers

Pharmaceutical Assessors
• The Medicines Control Agency requires suitably qualified and experienced pharmaceutical assessors to evaluate the quality aspects of applications for product licences and variations. These positions provide a unique opportunity to work with various aspects of drug registration and to gain experience in these areas at a time of major change and implementation of the European single market in pharmaceuticals.

WE ARE LOOKING FOR:
• graduates in pharmaceutical sciences;
• a broad pharmaceutical background;
• special expertise in the development, manufacture and quality control of products;
• good interpersonal skills and the ability to work effectively as a member of a multi-disciplinary team.

IN RETURN WE CAN OFFER:
• unparalleled experience in challenging areas of drug regulation;
• training and development opportunities;
• flexible working hours;
• comfortable offices in Vauxhall, London;
• the full range of Civil Service benefits including a non-contributory pension;
• appointment for a fixed term of 3 years with the possibility of extension;
• salaries in the range £21,445 to £38,515 depending on relevant experience. This includes a recruitment and retention allowance of £1,776. Relocation assistance may be available.

For an application form and further details please telephone Yvonne Gwam on 0171-273 0516 or write to Mr M.J. Gosling, Head of Personnel, Room 1606, Market Towers, 1 Nine Elms Lane, London SW8 5NQ, quoting reference PA/3/18/95 on the envelope.

Applications should be returned by 18th April 1995.

MCA is an Executive Agency of the Department of Health, an equal opportunities employer

MCA
MEDICINE CONTROL AGENCY
SCIENTIFIC OFFICER/HIGHER SCIENTIFIC OFFICERS

required for two separate research projects. One project, funded for three years by the UK Home Office Forensic Science Service, needs SO and HSO with strong technical background in enzyme linked immunoassays or monoclonal antibody production to develop low cost immunodetection methods for forensic application. The other project, funded for one year in the first instance by the EU, needs experienced SO or new post doc to work on the genetic and physical map of human chromosome 6 and the identification of tumour suppressor genes. Starting salary between £13,542 and £15,898.

Applications (including full CV and two referees), to Prof D. A. Hopkinson, MRC Human Biochemical Genetics Unit, The Galton Laboratory, University College London, Wolfson House, 4 Stephenson Way, London NW1 2HE.

ASSOCIATE CLINICAL SCIENTIST
REF: 433/PNS

An Associate Clinical Scientist is required to join our stem cell/cell culture section of this busy and expanding department which at present supports the clinical activities for bone marrow transplantation and peripheral blood stem cell harvesting for several hospitals within the area.

The successful applicant will join a research project involved in the phenotyping and structural characterisation of CD34 cells. The applicant will be responsible for performing colony-forming cell assays, CD34 enumeration and phenotyping, and other cellular assays required for marrow transplantation, including CTLp and HTLp assays.

Applicants should possess a relevant science degree. Previous experience in cell culture techniques is desirable but training will be provided in this specialised field.

This post is offered initially on a one year fixed term contract.

Salary: £12,895 - £16,951 per annum inclusive of London Weighting

If you would like to discuss the post on an informal basis please contact us on 0181200 7777 ext. 2325.

CLINICAL SCIENTIST REF: 432/PNS

We also require a Clinical Scientist Grade ‘B’ to work in the Molecular Section of this busy expanding department. The person appointed will use PCR-SSO and PCR-SSP techniques to HLA type volunteer bone marrow donors and patients.

Applicants should have a B.Sc in an appropriate subject. Experience in the HLA field would be an advantage.

This post is offered initially on a two year fixed term contract.

Salary: £17,208 - £18,515 per annum inclusive of London Weighting.

If you would like to discuss this post on an informal basis please contact us on 0181200 7777 ext. 2288.

For an application form and job description for either post, please contact us on 0181 905 9642 (24 hour answering service) or write to the Personnel Department, NLBTC Colindale Avenue, London NW9 5BG. Please quote the relevant reference number.

Closing date for completed applications: 13 April 1995

POSITIVE ABOUT DISABLED PEOPLE

OPPORTUNITIES AT CAB INTERNATIONAL

We have the following vacancies which offer an excellent opportunity to work for an international organisation which is seeking recognition as an Investor in People.

Salaries in the range £14,004 - £18,750 pa

DATA SHEET EDITOR
(2 posts)
Crop Protection Compendium
(1 year contract, initially) Ref: 30/31/95

CAB INTERNATIONAL, supported by the Australian Centre for International Agricultural Research is developing new methods to access information on crop protection through personal computers. The primary purpose is to improve the availability of information, particularly in developing countries.

Based in South Oxfordshire, we are looking for 2 graduates to work as Data Sheet Editors for the Crop Protection Compendium for SE Asia, acting as in-house editors for this novel electronic product. Duties will include working with electronic copy, to ensure consistency and accuracy of scientific content, carrying out research to generate core data and product testing. All aspects will require liaison with experts, authors and the Project Co-ordinator.

The successful candidates will have a degree in an appropriate subject and general knowledge of crop protection/agriculture/environmental sciences. Experience of scientific editorial work, on screen editing, excellent written English and an eye for consistency and detail are essential.

AIDS INFORMATION OFFICER
Bureau of Hygiene and Tropical Diseases
(2 year contract, initially) Ref: 29/95

CAB INTERNATIONAL is a leading supplier of information on AIDS/HIV. Two main products are AIDS Newsletter providing an authoritative, accurate and up-to-date synopsis of global developments on HIV/AIDS, and Current AIDS Literature, a bibliographic information service on all aspects of AIDS.

Working as part of the Human Health Division based in South Oxfordshire, the successful applicant will work initially in London but be expected to move with the BHTD unit when it relocates. The duties involve assisting editing of the two publications, including commissioning editorial commentaries and supervising the production process. He/she will also undertake appropriate project work on AIDS/HIV information.

The successful candidate will have an appropriate degree, knowledge of AIDS/HIV and the issues surrounding the subject, the ability to write clearly and succinctly, and meet deadlines, and possess good communication skills (with the ability to field technical questions). Due to the nature of this work, the post holder will need to have high motivation, be a self starter and innovative. Computer literacy, a foreign language and publishing experience would be desirable.

In addition to the salary scale quoted, we offer flexi-time, 26 days leave initially and an index-linked pension scheme.

Please apply in writing with full cv quoting the relevant reference number to Shaun Todd, Personnel, CAB INTERNATIONAL, Wallingford, Oxon OX10 8DE.

Closing date: 11th April 1995.
An intergovernmental organization providing services worldwide to agriculture, forestry, human health and the management of natural resources
UNIVERSITY OF LEEDS  
CENTRE FOR PLANT BIOCHEMISTRY AND BIOTECHNOLOGY  

6 BBSRC Studentships  

The Centre is a rapidly expanding and highly active research environment founded by the Department of Biochemistry and Molecular Biology and the Department of Pure and Applied Biology. Applications are invited for quota and CASE studentships from highly motivated individuals possessing or expecting to gain a 1 or 2i Honours degree in a relevant subject such as Biochemistry, Biology, Chemistry, Molecular biology or Biotechnology. Offers will be made within the next two months. Current research areas include: Protein engineering; Plant cell wall biology; Gene targeting; DNA methylation and gene silencing; Light-regulated gene expression; Gene function analysis in vivo; Sex determination in plants; Transgenic crop resistance; Molecular farming. Please provide (i) a brief statement of research interests, (ii) a cv naming three academic referees and (iii) both term and vacation address & phone number, to: Postgraduate admissions, Centre for Plant Biochemistry and Biotechnology, The University of Leeds, Leeds LS2 9JT; fax: 0113 233 3144; e-mail gen6mj@uk.ac.leeds.biovax

DEPARTMENT OF BIOCHEMISTRY & MOLECULAR BIOLOGY  

Ph.D. Research Opportunities  

Centre for Photobiology and Photodynamic Therapy This multidisciplinary Centre comprises research staff from the departments of: Colour Chemistry, Biochemistry and Molecular Biology, Medical Physics and the Regional Centre for Cancer Treatment at Cookridge Hospital at Leeds, and is funded by the Yorkshire Cancer Research Campaign to develop a new form of treatment for cancer patients using tumour photosensitising agents and laser light. Three studentships are available starting September/October 1995. Candidates must have (or expect to attain) a good honours degree in a suitable subject area. We are particularly interested in developing the following aspects of our research programme:  
(a) The study of programmed cell death (apoptosis). (b) The use of aminolaevulinic acid, for the photodynamic treatment of cancer. (c) A study of m-Tetra hydroxyphenyl chlorin (m-THPC), a new sensitisitising agents and laser light. A non-taxable stipend of £6,391 (subject to increase) will be paid. Informal enquiries can be made to Professor S B Brown, telephone number 0113 233 3166 and further particulars and application forms can be obtained from Professor Brown's office, Department of Biochemistry and Molecular Biology, The University of Leeds, Leeds LS2 9JT.  
Closing date for applications: 13 April 1995.

DEPARTMENT OF PURE AND APPLIED BIOLOGY  

Research Studentships  

Research Council studentships are available, tenable or three years from October 1995 for study for the degree of Ph.D. on each of the following topics:  
• Viral load and transmission efficiency of BYDV in cereal aphids (Dr D Coates)  
• Slugs and their natural enemies: coping with problems generated by set-aside land (Drs L Incoll & S Compton)  
• Spatial processes and local diversity (Prof B Shorrocks & Dr R K Butlin)  
• Biochemical and molecular analysis of the role of melatonin in ageing in the nematode Caenorhabditis elegans (Drs R E Isaac and D Coates) There is also a quota studentship which is available in one of the following study areas:  
• Biomechanics (Prof R McN Alexander, Dr J Altringham)
- Plant-animal interactions (Dr S Compton)
- Biogeography systematics and speciation (Drs J W Grahame & P J MM)
- Plant nutrition, physiology & ecophysiology (Dr L D Incoll)
- Parasites and Pathogens and Invertebrate neuroendocrinology (Prof Donald Lee. Dr R E Isaac. Dr J E Smith)
- Animal development using Caenorhabditis elegans (Dr I Hope)
- Sewage, heavy metals, mycorrhizas, and plant growth (Dr F E Sanders)

Enquiries should indicate potential project interests and should include a CV and the names of three academic referees. They should be addressed to Dr C R Fletcher, Postgraduate Tutor, Department of Pure and Applied Biology, The University of Leeds, Leeds LS2 9JT, tel: 0113 233 2828; fax: 0113 233 2835; e-mail c.r.fletcher@leeds.ac.uk

Promoting excellence in teaching, learning and research.
Applications are invited for Ph.D. Studentships for three years to be held at the MRC Toxicology Unit in the Centre for Mechanisms for Human Toxicity at Leicester University, for the following projects.

Detection of DNA Adduct Sites and Consequences for Gene Regulation and Duplication Ref: TGEM
The purpose of this project is to investigate the type and position of adducts in DNA. Some chemicals adduct DNA on specific bases within defined sequences, and the repair rate of these lesions is different. Molecular biological methods will be developed to detect DNA adduct sites. These assays will then be used in conjunction with other molecular biological techniques to examine the biochemical consequence of adduct formation.

Influence of Anti-hormones on Cell Cycle and Apoptosis in Epithelial Cells Ref: FOGC
This project will evaluate why the parenchymal liver cell (hepatocyte) is primed to undergo apoptosis after treatment with an anti-androgen (cyproterone acetate, CPA). Preliminary studies have shown that hepatocytes are shifted before S-phase after treatment with CPA. Thus hepatocytes will be analysed for synthesis of cyclins and activities of cdks specific for G1-phase after treatment with CPA. This will lead to a molecular description of the point in G1-phase an epithelial cell is shifted to after treatment with an anti-hormone.

Investigation of the Metabolism of Quercetin in Cancer Patients Ref: AGCL
This project is designed to aid the development of new anticancer drugs. Its aim is to provide information which will help the optimisation of the further evaluation of quercetin as an antineoplastic drug or as a chemo-modulating agent.

Applicants holding, or expecting to obtain, a good honours degree with a strong grounding in Biochemistry, should apply in writing, including a CV and the names of two referees, to the Unit Administrator, MRC Toxicology Unit, Hodgkin Building, University of Leicester, PO Box 138, Lancaster Road, Leicester LE19HN, quoting the appropriate reference number. Enquiries 0116 2525581.

The closing date for applications is 21 April 1995.

The Council is an Equal Opportunities Employer
CITY HOSPITAL NHS TRUST  
Dudley Road  
Department of Medical Microbiology

**Research Scientist in Molecular Biology**

To work in Hospital Infection Research Laboratory and Antibiotic Research Laboratory.

Applicants should have experience in a wide range of molecular biology techniques and be able to apply them to a number of projects on mechanisms of antimicrobial / disinfectant resistance in bacteria and the application of "antisense" to antimicrobial therapy.

The applicant will be expected to have a relevant 2:1 (or higher class).

Salary: Clinical Scientist Grade AB (starting points £11,706 and £16,019, respectively). Starting point depends on experience.

This appointment is for one year and then subject to annual review.

Further information from Drs R. Wise and A. Fraise, 0121 554 3801.

Application forms from Personnel Department, City Hospital NHS Trust, Dudley Road, Birmingham B18 7QH. Telephone 0121 507 4670. Closing date: 13 April 1995.

The Trust is working towards Equal Opportunities in Employment and welcomes applications from all sections of the community and also applications are welcome from people wishing to job share. The Trust is in the process of prohibiting smoking for staff and patients within all its buildings and grounds. [1971-032 (1995) : 66]
LECTURESHIPS IN PHYSICS

In addition to a commitment in excellence in undergraduate teaching, candidates should be able to demonstrate their ability to conduct and attract funding for high quality research, preferably in an area allied to the present research interests of the School. These include fundamental and applied aspects of electronic and structural properties of solids and surfaces, ultrasonic properties and phase transitions, effects of high pressures and temperatures, magnetism and its applications, quantum-well physics, micro- and mm-wave physics, terahertz devices and micromachining, optoelectronics, and their applications in communications and remote sensing, ocean acoustics and medical applications of physics.

Three posts are available: (i) a permanent lectureship; (ii) a three-year replacement lectureship while Dr N. G. Pace is on secondment as Senior Principal Scientist at the SACLANT Undersea Research Centre; (iii) a one-year replacement lectureship.

Salary: Lecturer Grade A £14,756 - £19,326 Lecturer Grade B £20,133 - £25,735

The appointment level will depend on qualifications and experience.

Application forms and further particulars are available from Peter J. Hill, Director of Personnel, University of Bath, Claverton Down, Bath BA2 7AY. (Tel: 01225 826026; fax: 01225 826559; p.j.hill@bath.ac.uk), quoting reference 95/64.

Closing date for applications 2 May 1995.

Working towards Equal Opportunities

THE UNIVERSITY OF SHEFFIELD
Department of Biomedical Science

POSTDOCTORAL RESEARCH ASSOCIATE

Applications are invited for the above post, tenable for two years, to investigate the cellular basis of defective intestinal transport in cystic fibrosis. The post will form part of an ongoing joint research project into the intestinal effects of cystic fibrosis by the Departments of Biomedical Science and Paediatrics. Applicants should have, or be about to be awarded, a Ph.D. in a relevant discipline. Experience of single cell microfluorimetry would be an advantage.

Further particulars from the Director of Human Resource Management, The University of Sheffield, Western Bank, Sheffield S10 2TN. Tel: 0114-282 4144. Closing date for applications 14 April 1995. Ref: R569.

Founded in 1905, the University of Sheffield provides higher education within a research-led environment. We encourage equality for all.
UNIVERSITY OF NEWCASTLE UPON TYNE  
DEPARTMENT OF PHARMACOLOGICAL SCIENCES

Ph.D. STUDENTSHIP

Applications are invited for a Ph.D. studentship to investigate polymorphic metabolism of benzo[a]pyrene and its relationship to lung cancer susceptibility. The project will involve the identification and characterisation of novel polymorphisms. Candidates should hold, or expect to obtain, a first or upper second class honours degree in Biochemistry, Genetics, Molecular Biology or a related subject.

The studentship is funded by the North of England Cancer Research Campaign and provides a stipend of £6,500 for the first year and £7,000 for each of two subsequent years.

Applications including a full CV and the names and addresses of two referees should be sent as soon as possible to Dr Ann K. Daly, Department of Pharmacological Sciences, Medical School, University of Newcastle upon Tyne, Framlington Place, Newcastle upon Tyne NE2 4HH. Telephone 01912227031.

Dedicated to excellence in teaching and research.  
PHARMACOKINETICIST

Eli Lilly and Company has a long history of commitment to therapeutic research. The current research and development annual expenditure of approximately $1 billion is providing an exceptionally rich product pipeline, with exciting new drug candidates entering clinical research.

Lilly Research needs to increase capacity and critical skills in clinical pharmacology in Europe to take up the challenge of early evaluation and complete development of new drug substances, and now seeks a scientist to provide expertise in pharmacokinetics as part of the clinical pharmacology team.

This role will interact extensively with a team of pharmacokinetic scientists in the USA and will provide pharmacokinetics expertise primarily for European projects. There will be involvement in planning and design of study protocols through to the analyses and reporting of data. As well as close interaction with clinical pharmacologists there will be strong links to drug metabolism and bioanalytical scientists. The successful candidate will probably have a Ph.D. or MSc with experience of the design and analysis of pharmacokinetic studies as well as familiarity with the commonly used computer software in this area. Strong communication skills are particularly important given the location of other members of the pharmacokinetics team.

This post is based at the Company's attractive research facility in Surrey and an excellent salary will be supported by a comprehensive benefits package.

Candidates should apply by sending a current CV to the Personnel Department, Lilly Research Centre Limited, Erl Wood Manor, Windlesham, Surrey GU20 6PH. Tel: (01276) 853571. Please apply by 28th April, quoting reference 95/6/841.

Lilly
Graduate Research Opportunities at The University of Manchester

A worldwide reputation for high quality research and teaching
Six Research & Graduate Schools: Arts; Economic, Social & Legal Studies; Science and Engineering; Biological Sciences; Medicine; Education
Highly rated in national research quality assessment
A range of courses and facilities amongst the best in the UK
Training in research methods and techniques
More than 4,000 graduate students from all over the world
Consistently one of the most popular centres for graduate studies in the UK

In addition to its numerous externally-funded research studentships, the University is offering about a hundred University-funded Research Studentships and Research Scholarships. Applications for these University Research Studentships and Research Scholarships are invited from high-quality UK, European and Overseas graduates wishing to study for a Ph.D. degree.

40 University Research Studentships
40 Studentships providing payment of the UK tuition fee plus maintenance at the rate offered by UK research councils (approx. £5,000), available for doctoral research in all disciplines. These awards are highly competitive. Applicants should hold at least a 2:1 degree or equivalent. Awards are initially for one year and may be renewed for up to two succeeding years.

60 University Research Scholarships
Up to 60 Scholarships of varying value rising from a minimum of £1,000 per year for up to three years.

The University of Manchester welcomes applications from graduate students worldwide. Successful overseas applicants will be encouraged to apply for an Overseas Research Student (ORS) Award. Candidates should indicate their wish to be considered for the above awards when application for admission to the appropriate Research & Graduate School is made.

TAYSIDE POLICE

We are committed to the provision of a comprehensive Forensic Science Service to Tayside, Fife and Central Scotland Police, as well as to external Police Forces, HM Customs and Excise and others where specialist Analyses are required, particularly in the field of DNA Profiling.

Forensic Science Laboratory, Police HQ, West Bell St, Dundee

FORENSIC SCIENTIST
DNA LABORATORY, BIOLOGY SECTION £17,325-£22,245 Ref NS1096

The laboratory's DNA Section is currently preparing to bring on line PCR based DNA Profiling. It is our aim to achieve NAMAS accreditation, initially in DNA related analyses.

We now require someone with minimum 3 years' experience, of the PCR process and DNA fragment analysis, preferably in the context of forensic science. Familiarity with semi-automated system will be a distinct advantage.

In addition to carrying out DNA profiling, you will work with the laboratory Quality Manager in the preparation of the documentation required for NAMAS accreditation, so you will need a good Honours degree or equivalent in a Biological Science, ideally with knowledge of NAMAS procedures.

This post, which is not open to job share, is for a fixed term of one year with the possibility of extension or conversion to permanent status, depending on requirements at that time. Applicants with lesser experience may be considered with an appropriately adjusted commencing salary.

Application forms and job descriptions are available from and returnable to Dawn or Jackie, Recruitment, Personnel and Management Services Department, 93 Commercial Street, Dundee DD1 2AF, tel 01382 303881(answering service)/303276, 8.45am-5.00pm, Monday to Friday.

Closing date for receipt of applications is 13 April 1995.

GUARANTEED JOB INTERVIEW SCHEME FOR PEOPLE WITH DISABILITIES

Tayside Regional Council
Working towards equality
POSITIVE ABOUT DISABLED PEOPLE
Two Research Assistants

The Energy and Electromagnetics Section requires two research assistants to work on an advanced project on magnetics in an ocean environment.

Applications are sought from candidates with several years' experience in two or more of the following areas:
• Finite element analysis
• Fundamental Physics
• Electro Chemistry
• Hydrodynamics
• Acoustics
• Magnetics/electromagnetics

The appointments will be for three years and the starting salary will be in the range £16,075 to £23,067 p.a. including London Allowance. Applications (two copies of CV and the names of two referees) should be sent to Prof. E.M. Freeman, Department of Electrical and Electronic Engineering, Imperial College, Exhibition Road, London SW7 2BT. Further information may be obtained from Prof. E.M. Freeman (0171 594 6169 or Email e.freeman@ic.ac.uk). The closing date for applications is Friday 5 May 1995.

The College is striving towards Equal Opportunities.
THE ROYAL FREE HAMPSTEAD NHS TRUST
DEPARTMENT OF MEDICAL MICROBIOLOGY

The Royal Free Hampstead NHS Trust is situated close to picturesque Hampstead Heath and is one of the most successful Trusts in London.

The Department of Medical Microbiology presently have two vacancies for individuals who are committed to excellence in health care

The Microbiology Department is a progressive, well equipped, fully computerised laboratory, which handles over 160,000 specimens a year - providing a comprehensive diagnostic service in Bacteriology, Mycology and Parasitology for the Trust and the local community.

CLINICAL SCIENTIST
GRADE B
Salary: £18,660 to £20,018 pa inclusive

This post has been established to assist in the introduction of molecular techniques to clinical microbiology diagnosis. The post holder will be responsible for developing and performing molecular techniques for the rapid diagnosis of Mycobacterial diseases including M. tuberculosis and M. avium infections. Applicants must have relevant experience in the development and use of these techniques in a clinical setting. Candidates must hold a relevant first or upper second class honours degree, a post graduate qualification would be an advantage.

This position is offered on a contract basis for a period of 3 years. Ref: 16717a

MLSO I
(Parasitology)
Salary: £12,404 to £15,692 pa inclusive

The post holder will perform diagnostic procedures for Microsporidium spp, and other parasitic infections. Applicants for this position must be state registered and have experience in a wide range of diagnostic techniques. The successful candidate may work in any section of the laboratory, and will be eligible to join the voluntary on call service Ref: 16717b

Application packages for both positions are available from the Human Resources Department, Lower Ground Floor, Royal Free Hospital, Pond Street, Hampstead, London NW3 2QG. Tel: 0171 830 2064. Please quote the relevant reference number. Closing date for both posts: 14th April 1995 Committed to Equal Opportunities

THE ROYAL FREE HAMPSTEAD NHS TRUST
Quality Systems

Imutran is a rapidly developing Cambridge based biotechnology company that leads the world in the development of transgenic pigs as organ donors (see New Scientist 18 June 1994, 24-29)

In preparation for clinical trials and product regulatory clearance Imutran is looking to recruit an enthusiastic science graduate to drive the design and implementation of Company-wide quality systems. The successful candidate will have an exciting opportunity to design and implement the quality system for Imutran's research and production environment. This will require working closely with a creative and motivated R&D team and playing a key role in the company's development.

The post would suit a Natural Sciences graduate with experience of working in a commercially driven research based company. Experience of Quality Systems in the healthcare industry would be an advantage, but enthusiasm, drive and energy will be of prime importance. Salary will depend on experience and age, but will be competitive and supported by a generous benefits package.

Apply in writing to: Gill Little, Imutran Ltd, Douglas House, 18 Trumpington Road, Cambridge CB2 2AH.

Imutran is an equal opportunities employer.
ANALYST

AN OPPORTUNITY TO LEARN MODERN ANALYTICAL CHEMISTRY WITH A WORLD LEADER
Swindon Competitive salary + benefits

The joining of Hoechst and Roussel last Autumn created a powerful new force in the highly competitive pharmaceutical industry. For an ambitious young science graduate who is looking to start their career or an HNC qualified analyst with chromatography experience, Hoechst Roussel offers unrivalled training to develop and expand your skills.

As part of a close-knit team, you will be responsible for the analysis of actives and other constituents in various pharmaceutical formulations. You will therefore assist in the design, development and validation of suitable analytical methods, ensuring your work is fully documented and complies with departmental standards and operating procedures.
Precise, detailed and methodical, you will be computer literate and able to work well under pressure. Excellent communication skills, especially written, will be essential, together with the flexibility and organisational ability to manage a wide range of short to long term studies.

Enthusiastic, willing to learn and keen to develop your role, we offer a competitive salary and benefits package including performance related-pay, private medical insurance and life cover.

To apply, please send your CV with current salary details to Margaret Porte Associates, Human Resource Consultants, 46 Statham Court, Binfield, Berkshire, RG12 1FS.

Hoechst Roussel
Applications are invited for the above post in the Immunodiagnostics Group. The successful candidate will, following appropriate training, be expected to perform all aspects of hybridoma generation, selection and maintenance, help in the purification of antigens and antibodies and assist in the despatch of cells for virus identification. Accurate record keeping is required.

The applicant will work under the supervision of an MTO3 and should have relevant laboratory experience, expertise in cell culture is a specific requirement, and flexible approach is required in that this post will be required to be transferred within Cell Resources as income generation demands.

The successful candidate will be appointed to the Medical Technical Officer Grade 2 on the salary scale of £10,821 - £13,693, depending upon qualifications and experience.

National Health Service terms and conditions apply.

Application forms and job description can be obtained from the Personnel Department. Closing date for applications 13 April 1995. Post No 1256.

CAMR is an Equal Opportunities Employer, and is working towards a healthy smoke free environment. The Centre has a day nursery facility for children from birth to five years.

OCCUPATIONAL HEALTH AND SAFETY

ASBESTOS SPECIALISTS WANTED

Analysts, Surveyors, Consultants

As part of its ongoing expansion programme, OHS Ltd is looking to recruit experienced staff to work with its Asbestos Project Management Team.

Applicants should have a proven track record in similar consultancy work and an ability to develop business over a broad client base.

We offer competitive salary, company car, pension scheme for right candidates.

Applications, with CV, to Steve Wright, Commercial Manager, OHS Ltd, Listerhills Science Park, 15-17 Campus Road, Bradford BD7 1HR, or telephone 0274 735848 for more information.

OHS is an Equal Opportunities Employer

CLINICAL RESEARCH ASSOCIATE

The Medical Department of Searle, located at our head-office in High Wycombe, Buckinghamshire, is responsible for the design and conduct of clinical studies carried out in the UK and Republic of Ireland.

Due to recent expansion of our clinical trial programmes, we now have a requirement for a Clinical Research Associate to join our small team of experienced clinical research professionals. This position is initially being offered as a one-year fixed-term contract.

Reporting to one of our Clinical Project Managers, you will be responsible for the initiation and monitoring of Phase III and IV analgesic studies, in hospital and general practice, around the UK. You will also be involved in the preparation of clinical protocols, case report forms and reports.

We are looking for someone who can make an immediate contribution to the operation of the group. Applicants should therefore have a degree in the Life Sciences or a nursing qualification, together with a minimum of two years' experience of monitoring studies to GCP requirements, working either in the pharmaceutical industry or with a CRO. In return we offer a pleasant working environment, attractive salary and company car.

Please send your CV to: Mrs Doris Horton, Searle, PO Box 53, Lane End Road, High Wycombe, Bucks HP12 4HL.
SEARLE
INVESTOR IN PEOPLE
Research Studentship
Enhanced flood flow modelling using remote sensing techniques.
A research studentship in Earth Observation is available offering excellent career prospects. The studentship is joint between NUTIS, NRSCL and the University of Bristol Department of Geography. The student will be registered at Reading University. This studentship is funded by NRSCL with a stipend of £7,000 p.a. plus fees and will seek to develop remote sensing parameterization and validation for state-of-the-art river flood flow models. Applicants should have a background in physics, mathematics or a quantitative environmental science and have or expect to have at least an upper second class degree. Further details and an application form are available from Professor R.J. Gurney, NUTIS, University of Reading, Whiteknights, PO Box 227, Reading RG6 2AB, Tel: 01734 318741.

A centre of excellence for university teaching and research.
Applications are invited for a lecturer in the mineral nutrition of agricultural, horticultural and native plants. The appointment will be offered on a five year fixed-term basis with good prospects for re-appointment. The appointee will be required to contribute to undergraduate and postgraduate courses in the Faculties of Agriculture and Science and to teach the fundamental principles and processes of nutrient uptake, utilisation and response as well as the application of these principles within agricultural, horticultural and natural ecosystems. A Ph.D. or substantial research experience in some aspects of the mineral nutrition of agricultural and/or horticultural plants is required and the appointee will be expected to develop an active research programme and supervise postgraduate students. An interest in the wider aspects of soil fertility, including the ability to cooperate with ecologists, soil microbiologists, soil physicists and soil chemists is desirable. Degrees in Agricultural Science, Horticultural Science and Natural Resource Management within the Faculty of Agriculture as well as within the Faculty of Science are offered, and the successful applicant will be expected to participate in teaching for all degrees. Applicants with teaching experience are requested to submit a teaching portfolio as part of their application. For further information and copies of the selection criteria please contact Ms B Facoory (tel. [61 9] 380 2513 or facsimile [61 9] 380 1050, or Email bfacoory@uniwa.uwa.edu.au).

SALARY RANGE: Lecturer Level B A$42,198 - A$50,111 p.a.

Benefits include superannuation, fares to Perth (if applicable) for appointee and dependent family, removal allowance (if applicable), study leave and long service leave. Conditions of appointment will be specified in any offer of appointment which may be made as a result of this advertisement. A salary loading may be available in some circumstances.

Written applications including a statement addressing the criteria and quoting reference number, telephone number, qualifications and experience and the names, addresses (including Email) and fax/telephone numbers of three referees should reach the Director, Human Resources, The University of Western Australia, Nedlands WA 6907, Australia by 2 June 1995.

The University reserves the right to make no appointment from this advertisement.

The University is an equal opportunity employer and promotes a smoke-free work environment.
RESEARCH ASSISTANT
(Part-time)
Department of Applied Plant Science

This part-time post, funded by the Natural Resources Institute, is available for ten months, to carry out research into the strain-type of the fungal pathogen *Colletotrichum gloeosporioides* and to develop a method for detection of the pathogen in mango stem tissues. Applicants must have a BSc in a Microbiological subject or Plant Pathology. A Ph.D. in the same area is desirable. Experience in the maintenance of fungal cultures and the extraction and molecular analysis of DNA from fungal mycelium is essential. Salary £15,567 pro rata.

Applicants, quoting Ref 95/X, may obtain further particulars from the Personnel Officer, The Queen's University of Belfast, BT7 1NN, Northern Ireland. Tel: (01232) 245133, ext 3044/3246 or Fax: (01232) 324944/310629. Closing date 13 April 1995.

The University is a charity, established in 1845 to advance education. Committed to an Equal Opportunities policy and selection on merit, it welcomes applications from all sections of the community.
Not All Statisticians feel truly valued........

Pfizer has long been recognised and respected as one of the world’s innovative developers of pharmaceutical products. It is a reputation of which we are proud and which continues to provide us with exciting challenges for the future.

With an impressive portfolio of products in clinical development and a research budget which consistently exceeds 1 billion US dollars per annum, our future is strong. Join us as a Statistician in one of two new positions and you will be recognised for the valuable contribution you make to the process.

Whichever clinical phase you support, you will be joining a Biometrics Department with over 90 professional staff supported by excellent computing facilities. You will find that variety, responsibility, total involvement in the project and real decision making authority are the key characteristics.

**STATISTICIAN**  
Early Clinical Research Group (Ref SEC)  
ECRG conducts a wide variety of Phase I and early Phase II studies in both volunteers and patients involving a combination of safety, pharmacokinetic and pharmacodynamic endpoints.

As part of the biometrics team supporting ECRG you will provide valuable input to the design, and take responsibility for the analysis and reporting of studies to meet regulatory standards.

You will also have the opportunity to develop your statistical knowledge in this interesting area of clinical research.

**STATISTICIAN PHASE II/III**  
International Development (Ref: SPI)  
You will be a member of a global team providing statistical support and expertise within one of our numerous phase II or III clinical projects. Your key role will be to liaise with colleagues on the design and analysis of clinical studies for the international development of a product.

Both positions require self-starters with a breadth of experience in applying statistical techniques in a medical environment and good programming skills (preferably in SAS). You will, of course, have a BSc, MSc or equivalent in Statistics together with good interpersonal skills.

We offer a good salary and benefits package but more importantly, actively encourage you to develop your career and significantly enhance your skills, in an environment dedicated to innovation and excellence.

If you are interested in either position, please send a curriculum vitae to Fiona Cox, Senior Personnel Adviser Pfizer Central Research, Ramsgate Road, Sandwich, Kent C13 9NJ. Tel: (01304) 618722.

........But then, not all Statisticians work for Pfizer

1991
AWARDED TO CENTRAL RESEARCH DIVISION OF PFIZER LIMITED

Pfizer  
Central Research  
Lecturer in Animal Biology

This post is available immediately to applicants with a proven track record in research who will join a successful research group headed by Prof. R. McN. Alexander, FRS. Current research interests centre on skeletal and cardiac muscle physiology and mechanics, animal locomotion, and animal mechanics. The emphasis is on comparative and evolutionary aspects, but the group is active in a number of applied areas, and is part of an interdepartmental Cellular Cardiology Group.

Ideally applicants should have interests which complement or extend those of the group, but emphasis will be on scientific excellence, and applicants working in other areas will be seriously considered.

Salary will be on the scale for Lecturer Grade A (£14,756 - £19,326) or Grade B (£20,133 - £25,735) according to qualifications and relevant experience.

Informal enquiries about the post may be made to Professor Neill Alexander tel: 0113 233 2911 or Dr John Altringham tel: 0113 233 2832 e-mail j.d.altringham@leeds.ac.uk

Application forms and further particulars may be obtained from the Personnel Office (Academic Section), The University of Leeds, Leeds LS2 9JT, tel: 0113 233 5771, e-mail e.f.moran@leeds.ac.uk quoting the reference number 56/58.

Closing date for applications: 6 May 1995

The University of Leeds promotes an Equal Opportunities Policy.
Promoting excellence in teaching, learning and research.
ROYAL FREE HOSPITAL SCHOOL OF MEDICINE
(University of London)
Haemophilia Centres & Haemostasis Unit

POSTDOCTORAL RESEARCH FELLOW
IN GENE THERAPY FOR HAEMOPHILIA

A postdoctoral research position is available in a small group working on the development and applications of gene therapy for the haemophilias. The post, funded by the Katharine Dormandy Trust, is initially for three years, but additional funding may be available.

Applicants should have had a broad exposure to molecular genetics and be committed to the applications of gene therapy to the treatment of human disease. Experience in cell culture and in protein analysis is desirable.

Further details available from the School Office, RFHSM, Rowland Hill Street, London NW3 2PF (Tel: 0171-794 0500, ext 4262). Applicants should send three copies of their CV (please include three copies of any covering letter) together with full details of two referees to the above address by 13 April 1995. Please quote reference no: HAE/PDR/098.

UNIVERSITY OF SOUTHAMPTON  
Department of Oceanography

POSTDOCTORAL RESEARCH POSITIONS

Research Fellow to join a team researching lobster behaviour on artificial and natural reefs. Applicants will hold BASC Advanced Diver (or equivalent) or HSE Pt.IV diving qualifications.

The salary will be in the range £13,941 - £17,007 per annum and the appointment will be for two years in the first instance. (Reference No A/330/NESC).

Research Fellow in the general area of sediment dynamics to assist Professor Michael Collins in nearshore and shallow offshore programmes.

The salary will be in the range £13,941 - £17,813 per annum and the appointment will be for 6-12 months in the first instance. (Reference No A/331/NESC)

Application forms and further particulars are available from the Personnel Department (A), University of Southampton, Highfield, Southampton SO17 1BJ (telephone 01703 592750). Please quote the appropriate reference number. Closing date: 20 April 1995.
Rushmoor is committed to the key principle of 'Sustainable Development' enshrined within Local Agenda 21 and has created a new post for an exceptional person to act as a focus and driver for positive and effective action to take us forward.

Working directly to the Chief Executive, with full Corporate support, you will play a vital role in advising the Council on the development of a Local Agenda 21 strategy, including the formation and promotion of effective partnerships within the community. Above all, you will take the emerging concept of Sustainable Development and turn it into practical applications and solutions.

You will also further develop and coordinate the Council's Environmental Strategy and act as a focus for initiatives to improve our environmental performance.

The successful candidate must be able to demonstrate:
• an understanding of and commitment to the aims and objectives of Local Agenda 21
• a high level of technical understanding of current environmental issues
• proven managerial and leadership skills, and the ability to work across disciplines
• the desire and ability to turn complex concepts into practical solutions.

Candidates will need to be educated to at least degree level in a related field and/or have a proven record of achievement. Salary will be dependent on experience. An Essential User Allowance for transport is also payable. A valid driving licence is essential. Candidates will be asked to provide short written submissions on specified themes to accompany their formal application.

For an informal discussion please contact Mark Reed on (01252) 398130. For an application form and information pack contact the Personnel Section, Council Offices, Farnborough Road, Farnborough, Hampshire GU14 7JU. Telephone (01252) 398099 (24 hour answering service).

Closing date: 21st April 1995. Interviews will be held on 11th May 1995.
The NRA is the foremost environmental protection agency in Europe. We have statutory responsibilities for water quality, water resources, flood defence, salmon and freshwater fisheries, conservation, navigation and recreation. We now have two opportunities for R&D Co-ordinators to join either our Anglian or Southern Regions and be responsible for all R&D activities within the Region providing technical management support for projects managed by Regional staff.

Providing advice on research issues including timescales and management procedures, you'll be responsible for ensuring expenditure and quality targets are achieved and that projects progress efficiently. You'll also maintain accurate records, updating the R&D database where required, and provide a variety of reports on expenditure and project progress. You must be able to establish relationships with important research contractors and identify specialist skills and experience.

A graduate in a relevant scientific discipline, you should have a good understanding of managing applied research and be able to deal with a large number of projects at various stages of development. Excellent interpersonal, communication and negotiating skills and the ability to support project leaders is essential as is a proactive approach.

These posts are offered on a 12-month contract which may be renewable. We offer a benefits package which includes a generous holiday allowance, contributory pension scheme and sports and social club.

To apply for the Peterborough position please telephone the 24-hour answerphone on 01733 464464 for an application form quoting reference WC001.

To apply for the Worthing position please telephone 01903 217572 for an application form or write to the Personnel Department, National Rivers Authority, Southern Region, Guildbourne House, Chatsworth Road, Worthing, West Sussex BN11 1LD.

If you want to be considered for both positions then contact our Worthing Office making this clear. The closing date for both positions is 13 April 1995.

The NRA is committed to achieving Equal Opportunities.

CAMBRIDGE

Graduate/Postgraduate Research Assistant
Protein and Nucleic Acid Chemistry Division

A vacancy exists for a Research Assistant to be responsible for providing a central facility for flow cytometry analysis and cell sorting. The successful candidate will have a science degree in a relevant subject. Experience of instrumentation, flow cytometry or mammalian cell culture is desirable but not essential as full training will be given.

A starting salary between £13,941 and £25,735 is envisaged, depending on age and experience. The post is available for three years in the first instance and the successful applicant will be expected to start work before the end of July 1995.

Further information on this post can be obtained from Dr Michael Neuberger, telephone: (01223) 402245 or fax: (01223) 412178.

Application in writing including two copies of a full CV and the names and addresses of two professional referees should be sent by 28 April 1995 quoting reference PNAC/2309, to Dr Rosie Ward, Personnel Manager, MRC Centre, Hills Road, Cambridge CB2 2QH.

The Medical Research Council is an Equal Opportunities Employer.
The Royal College of Radiologists
Clinical Oncology Information Network
COIN PROJECT

Department of Clinical Oncology
North Middlesex Hospital

Research Assistants (2 posts)
£13,605 - £16,293 per annum inc. L/W - depending on experience.

The Royal College of Radiologists is setting up the Clinical Oncology Information Network (COIN). COIN is a new, clinically led, project that is expected to make a significant contribution to improving cancer care in a short time scale.

An important component of the project's work is the creation of evidence-based guidelines of best clinical practice in Cancer Medicine. Speciality working groups coveting the main cancer sites and processes of care are being created to critically appraise the scientific literature and create the guidelines. Data sets for use in comparative audit will be derived from the guidelines and incorporated into information systems.

The role of the research assistant will be to support the Specialty Working Groups and liaise between collaborating parties as required. This support will involve attending meetings, conducting literature searches and coordinating the work of the Specialty groups. The posts will be based in the COIN Project Office, in the Clinical Oncology Centre at North Middlesex Hospital, but will require some travel within the UK. The posts are available immediately and the appointments will be for one year in the first instance.

For an informal discussion and/or visit about the post please contact Dr S Karp, COIN Project Director 0181887 2136 (direct line).

Application forms and job descriptions are available from: The Personnel Services Department, North Middlesex Hospital NHS Trust, Sterling Way, London N1 8 1QX. Tel. 01818872996 (24 hour Answerphone) quoting reference number. AC/356

Closing date: 13th April 1995.

We care about Equal Opportunities
The University invites applications for one permanent and two temporary lectureships in the Department of Computing Science. This Department is top-rated for both teaching and research.

Applicants should possess the enthusiasm and ability to fit into a dynamic academic environment, and should show considerable promise in both teaching and research. Applicants for the permanent lectureship should also have substantial experience in both teaching and research.

In 1995-96 the Department will launch a new MSc course in Advanced Information Systems, covering databases, information retrieval, and multimedia. For two of the appointments, preference will be given to applicants who can demonstrate expertise in at least one of these areas. Strong applications in other areas that match departmental interests are also welcomed.

The permanent lecturer will be appointed on the Lecturer A or B scale (£14,756 - £25,735 pa), at a point determined by age, experience, and ability. The temporary lecturers will be appointed on the Lecturer A scale (£14,756 - £19,326 pa). One temporary appointment will be tenable for three years in the first instance, the other for one year in the first instance. If the applicants are strong enough, consideration will be given to increasing the number and length of these appointments.

Informal enquiries may be made to the Head of Department, Dr David Watt, e-mail daw@dcs.gla.ac.uk. Information about the Department may be found from its WWW page http://www.dcs.gla.ac.uk/.

Further particulars may be obtained from the Academic Personnel Office, University of Glasgow, Glasgow G12 8QQ, Scotland. Tel: 0141 330 5161. Fax: 0141 330 4921. Applications (three copies from UK applicants, one copy from overseas applicants) must be sent to this address by 21 April, 1995. Each application must be accompanied by a curriculum vitae, list of publications, and names and addresses of three referees. In all correspondence please quote reference number NS/8675. An equal opportunities employer.

The University of Glasgow is an exempt charity dedicated to excellence in teaching and research.
Research Fellow in the De Novo Design of Proteins

This BBSRC-funded post is available immediately for a fixed period of 2 years to work on biochemical research involving the construction of artificial genes to encode de novo designed proteins using recombinant DNA technology, and their expression and purification. Characterisation of the proteins will then make use of a wide range of biophysical techniques including CD, fluorescence and NMR spectroscopy.

Applicants should have a Ph.D. in Biochemistry or related area. Experience in molecular biology or biophysical techniques would be an advantage.

Salary will be on the scale for Research Staff Grade 1A within the range £13,941 - £17,007 according to qualifications and relevant experience.

Informal enquiries about the post may be made to Dr Alan Berry, Department of Biochemistry and Molecular Biology. Telephone 0113 233 3158, e-mail, a.berry@leeds.ac.uk

Application forms and further particulars may be obtained from the Personnel Office (Academic Section), The University of Leeds, Leeds LS2 9JT. Telephone 0113 233 5771, e-mail e.f.moran@registry.leeds.ac.uk quoting the reference number 83/167.

Closing date for applications 27 April 1995.

The University of Leeds promotes an equal opportunities policy.

Promoting excellence in teaching, learning and research
MATERIALS TECHNOLOGY DIVISION
PRECIOUS METAL REFINERY - ROYSTON

TECHNICAL SUPPORT CHEMIST

Johnson Matthey is a world leader in the refining of precious metals. The Precious Metals Refinery at Royston requires a Technical Support Chemist to work in one of the production teams. The work involves providing technical support in the operation and control of a modern complex plant for refining platinum group metals.

Applicants must be qualified to at least degree level in chemistry. A previous working knowledge of precious metal chemistry or inorganic chemical production experience would be helpful. The applicant must be able to work as a member of a team and be able to communicate effectively at all levels.

Applicants should be non-smokers as we operate a nonsmoking site.

The normal hours of work will be 38 per week but, as the position will be supporting a 24 hour 7 day shift operation from July, some working outside the normal working week will be required.

Other benefits include 25 days annual leave, free lunches, a contributory pension scheme and an employee share scheme.

For an application form telephone Royston (01763) 244819 - 24 hour answerphone - or write to: Mrs S Salter, Chemicals Personnel Department, Johnson Matthey plc, Orchard Road, Royston, Herts. SG8 5HE.

Closing date for applications: 21st April 1995.

JM
Johnson Matthey
UNIVERSITY OF LUTON
WASTE MANAGEMENT
FUNDED POSTGRADUATE PLACES
Are you a GRADUATE UNDER 25 and not yet working?

The European Social Fund is funding places on our one year MSc and Postgraduate Diplomas in Waste Management.

• Accredited by the Institute of Wastes Management.
• Two courses starting April and July 1995.
• Develop higher level skills in environmental law, monitoring, management, landfill, regulation and recycling for the PGDip and for the MSc study research methods and complete a dissertation.
• Applicants with relevant experience may be considered for the Postgraduate Diploma.
• Course fees paid. Training allowances may be available.

Application forms from: Mrs S Gillard, Faculty of Applied Sciences, University of Luton, Park Square, Luton, Beds LU1 3JU
Tel: 0 1582 489264
Research Studentship
Intracellular Signalling

The Institute, which conducts basic research in inflammation is funded by Yamanouchi Pharmaceutical Company Ltd, one of Japan's largest pharmaceutical companies. The Institute has excellent facilities for molecular cell biology and with state-of-the-art equipment.

A Studentship will be available from 1st October, 1995 with Dr Stuart Kellie, to study the molecular basis for intracellular signalling in inflammatory cells.

The stipend will be £9,000 net in the first year and registration fees will be paid at the E.C. national rate.

The successful applicant will have, or expect to gain, a First or Upper Second Class degree in molecular biology, biochemistry or a related subject.

Please send a curriculum vitae including the names of two academic referees to: Mr. N. Wild, Administrator, Yamanouchi Research Institute, Littlemore Hospital, Oxford OX4 4XN, by Friday, 28th April 1995.

Yamanouchi Research Institute
DEPARTMENT OF ELECTRONICS
LECTURESHIPS IN: APPLIED ELECTROMAGNETICS and RADIO FREQUENCY COMMUNICATIONS

We are pleased to announce these two new posts, falling in areas of established research strength within the Department of Electronics, and made possible by a grant award under the EPSRC Integrated Graduate Development Scheme for MSc. courses in Electromagnetic Compatibility and Radio Frequency Communications. Both posts will be initially for three years.

Those appointed will be expected to undertake research and to contribute to teaching in applied electromagnetics and radio frequency communications. Persons with experience in the following areas would be of particular interest:

- Electromagnetic modelling
- Electromagnetic metrology
- Antenna measurement and design
- Simulation of radio communications systems
- Personal and mobile communications systems
- Radio propagation and spectrum management

Salary will be at an appropriate point on the Lecturer Grade A or Grade B scales (£14,756 - £19,326 pa or £20,133 - £25,735 pa), depending on qualifications and experience.

For further information and details of how to apply, please contact the Personnel Office, University of York, Heslington, YORK YO1 5DD, quoting reference number 6/3407. The closing date for applications is 28 April 1995.

PROMOTING EXCELLENCE IN TEACHING AND RESEARCH.

THE UNIVERSITY of York
VCH is a major international scientific publisher with subsidiaries in the USA, the UK, Japan, and Switzerland.

In order to expand the editorial team of ANGEWANDTE CHEMIE and CHEMISTRY - A EUROPEAN JOURNAL we are looking for an

**Editorial Assistant**

This permanent, full-time post will be based in Weinheim, a pleasant small town near Heidelberg in the southwest of Germany.

The candidate must have English as mother tongue and a sound working knowledge of German. Other requirements are a BSc in chemistry and a keen eye for detail.

The work will primarily involve editing of manuscripts on disk, proofreading, and assisting the associate editors in their daily work.

If you enjoy the challenge of using the full range of your knowledge to produce high quality work to tight schedules and wish to contribute to the success of two of the world's top chemistry journals while staying in permanent contact with the forefront of chemical research please apply in writing and send full career details to:

VCH
Scientists and engineers for product innovation
Atherstone, Warwickshire

The real challenge of the future lies in anticipating and responding to the demands of constant change. Success in meeting that challenge will depend on your ability to take the initiative in developing new products, new processes and new career directions.

At 3M we recognise that, in order to satisfy customer needs and reach our business targets, we have to provide rewarding career challenges for talented, enthusiastic people. We back this commitment with significant annual investment in research and development - currently more than $1 billion worldwide - as we endeavour to achieve the highest levels of innovation.

At our Atherstone facility we develop and manufacture abrasives, chemicals and related products for global markets. These apparently straightforward products involve a complex mix of science and technology including surface-coating, chemistry, physics, engineering and materials science. Now, our ongoing investment in product development has created the need for further results-oriented people to join our team.

Our laboratory scientists and engineers are constantly inquisitive about the needs of the customer and the marketplace. Through innovative product development, they lead the search for our next generation of commercial successes. The challenge involves harnessing new technologies, novel raw materials and unique processes to produce prototypes, test them and scale up their production to deliver the products our customers need.

This means we're looking for highly motivated, experienced scientists and engineers with honours degrees in polymer science, physics, chemistry, ceramics, materials science and related disciplines. Given our strong European locus, the ability to speak French, German or another European language would be an advantage.

Our success depends on the achievements of our multifunctional new product teams. This means we're just as interested in your resourcefulness, commitment, problem-solving abilities and interpersonal skills as we are in your specialist degree discipline. In short, if you can back a wide range of interests with a willingness to broaden your knowledge, we can offer you an exciting career challenge in a diverse international business. Naturally, our salaries and benefits are competitive.

Please write briefly stating how you meet our requirements, enclosing your cv and details of present remuneration, to Malcolm Cuninghame, Personnel Manager, 3M United Kingdom plc, Ratcliffe Road, Atherstone, Warwickshire CV9 1PJ. Closing date 28th April 1995.

3M Innovation
University of Cambridge

Professorship of Inorganic Chemistry

Applications are invited for the above Chair from candidates able to take up office by 31 March 1996. The University follows an equal opportunities policy.

Pensionable stipend £37,968.

Further information from the Secretary General of the Faculties, General Board Office, The Old Schools, Cambridge CB2 1TT. Applications (10 copies), marked 'confidential', with names of two referees by 24 April 1995.

The University aims to achieve the highest quality in teaching and research.
Head of Wetland and Coastal Ecology Unit

The BTO requires an experienced ecologist to lead and develop its research on bird populations of wetlands. The Unit undertakes a wide range of projects with the emphasis on wintering waders. The Head of Unit will manage the BTO’s contribution to the Wetland Bird Survey which is a collaborative scheme with, WWT, RSPB and JNCC.

Candidates should have a Ph.D., a proven research record and a background in waterfowl ecology. Management experience is desirable.

This is a permanent post on Senior Scientific Officer grade (£16,168 - £23,009). Write to A. Elvin, BTO, The Nunnery, Thetford, Norfolk, IP24 2PU for an application form and further details. Closing date 14 April.

British Trust for Ornithology
THE ZOOLOGICAL SOCIETY OF LONDON
International Zoo Yearbook

ASSISTANT EDITOR
£14,807 - £17,703

Required for the International Zoo Yearbook, an annual volume of research papers and data collection from zoos, universities and research institutions throughout the world.

Essential qualifications are proficiency in typing/word processing and good English. Preference will be given to those with publishing experience and a background in biology; a graduate would be preferred.

Salary will be in the range £14,807 - £17,703 (including London Weighting) according to qualifications and experience.

ECOSURVEYS LTD.

BOTANICAL SURVEYORS

Experienced botanical surveyors required for river corridor, Phase I and NVC surveys in 1995. Please contact Andrew Baker or Chris Birkinshaw at Ecosurveys for an application form. Candidates should preferably qualify for IEEM membership. Applicants will be tested on botanical survey skills.

Ecosurveys Ltd, Priory Lodge, Hagnaby, Spilsby, Lincolnshire PE23 4BP. Tel: 01790 763665 (4 lines). Fax: 01790 763417. E-mail: tcoles@ecosurveys.win-uk.net

DYNAMCO LTD is the highly successful Environmental Consultancy and Project Management Company within SAUR UK which provides water supplies to 1.4 million customers in the UK. The SAUR Group provides water and other environmental services in many countries worldwide.

SAUR UK has centralised its Scientific Services in a new laboratory constructed at Frimley Green, Surrey and managed by Dynamco. The new laboratory provides a comprehensive service for the Group and external clients in the field of water analysis and wider environmental activities.

At present there is a vacancy in the Organic Analysis Section of the laboratory for a Technician. The position would suit a young graduate (consideration would be given to those expecting to graduate in 1995) seeking a challenging role in the field of water and environmental analysis. We aim to appoint a person who is keen and enthusiastic with potential to progress.

The work primarily involves the analysis of water for pesticides, herbicides and other contaminants at trace levels in the parts per billion range. Other duties also include analytical method development, method validation and the related aspects of analytical quality control.

It would be advantageous for candidates to have knowledge of Gas Chromatography and/or HPLC together with solid phase extraction techniques, undertaking trace level analytical work in a quality assured environment.

The above position offers a competitive salary with an excellent benefits package. Please send full details and telephone number to:
Miss Jackie Travis Human Resources Manager Dynamco Limited 1-3, Church Road Haywards Heath West Sussex RH16 3DX Tel: 01444 441134 Fax: 01444 441137 Deadline: 15th February 1995

DYNAMCO
ENGINEERING & ENVIRONMENTAL CONSULTING
UNIVERSITY OF BRISTOL
POSTDOCTORAL RESEARCH ASSISTANT
Chemistry/Biochemistry

Required for two years in the Department of Biochemistry, for a kinetic study of the reactions by which timber decay fungi such as dry rot produce hydroxyl radicals, with the longer term aim of designing selective inhibitors. Fe(III) reduction by cellobiose dehydrogenase and Fe(II) autoxidation will be studied as a source of Fenton's reagent (Fe(II)/H_2O_2). Close collaboration with the Department of Chemistry, University of York, will enable an EPR spectrometer to be used for Fenton reaction kinetics and for probing radical production by growing fungi.

Funded by BBSRC at £13,941 to £16,191 pa. Informal enquiries to Dr P. M. Wood, Department of Biochemistry, University of Bristol, University Walk, Bristol BS8 1TD. Tel: (0117) 9288594.

For further details Tel: (0117) 9256450 or minicom (0117) 9288894, or write to Personnel Office (EO), University of Bristol, Senate House, BS8 1TH, quoting Ref: D238.

Closing date 28 April 1995.

An Equal Opportunities Employer
"An International Centre for Education and Research"
University of Cambridge

**Professorship of Non-Linear Dynamics**

Applications are invited for the above Chair in the Department of Applied Mathematics and Theoretical Physics from candidates able to take up office by 31 March 1996. The University follows an equal opportunities policy.

Pensionable stipend £37,968.

Further information from the Secretary General of the Faculties, General Board Office, The Old Schools, Cambridge CB2 1TT. Applications (10 copies), marked 'confidential', with names of two referees by 24 April 1995.

The University aims to achieve the highest quality in teaching and research.

ARC RESEARCH ASSOCIATE  
(Fixed-Term)  
A$29,539 - A$40,087 pa

Ref 95060N. Available from 1 July 1995 for a period of eighteen months in the Plant Membrane Transport Group, to work on a project involving ion transport and salinity tolerance. The research will mainly be using electrophysiological techniques in particular patch clamping for which the group has had considerable success with plant cells. The group is part of The Centre for Plant Membrane Biology in Adelaide and there will be considerable scope for collaboration with other researchers in this area.

Essential criteria include a Ph.D. or submission of thesis prior to the commencement of employment; experience in membrane electrophysiology or membrane transport research; a keen interest in salinity tolerance in plants, and demonstrated ability to work in a team and to actively collaborate.

Further information, including position documentation, must be obtained from Dr S Tyerman, phone (618) 201 2893/2450 or fax (618) 2013015. The selection process will be based upon the selection criteria specified in the documentation.

Applications, addressing the selection criteria, quoting the reference number, and giving details of qualifications and experience together with the names, addresses and facsimile numbers of three referees of whom confidential enquiries may be made, should be lodged with the Manager, Human Resources, Flinders University, GPO Box 21011, Adelaide SA 5001, Australia, or fax (618) 2013131, by 28 April 1995.

The University reserves the right not to make an appointment or to invite applications.

Equal Opportunity is University Policy.

FLINDERS UNIVERSITY  
ADELAIDE • AUSTRALIA  
RESEARCH TECHNICIAN(S)

1. Available until 31 December 1998 to join a group studying the structure and function of human papillomavirus E4 proteins. You should have a good degree in a biological subject; experience of molecular biology and/or protein purification techniques an advantage. Salary up to £11,801. Reference M9349/95.

2. Available until 31 December 1997 to join a group studying the biology and genetics of the cancer predisposing disorder ataxia telangiectasia. Duties will be to provide tissue culture services to the group and to undertake some experimental work involving cells from these patients. You should have a good degree in biology; some experience of tissue culture an advantage but training will be given. Salary up to £11,129. Reference M9232/95.

Application forms (returnable by 19 April 1995) and further particulars available from the Director of Staffing Services, The University of Birmingham, Edgbaston, Birmingham B15 2TT. Telephone 0121 414 6483 (24 hours). Quote the appropriate reference number.

Working towards Equal Opportunities.

The University is an exempt Charity which exists to advance learning to the highest level for the benefit of its students and society at large.

EUROPEAN COMMUNITY RESEARCH FELLOWSHIPS
AWARDED UNDER THE HUMAN CAPITAL AND MOBILITY PROGRAMME

Two Postdoctoral Fellowships
are available to the
Department of Veterinary Science,
The Queen's University of Belfast

The fellowships are for periods of up to two years for research on bovine cellular immunity to bacterial pathogens and are based at the Veterinary Sciences Division, Stormont, Department of Agriculture for Northern Ireland.

Comprehensive programmes of multidisciplinary research on *Leptospira hardjo* and *Mycobacterium bovis* are currently ongoing at the above institute. These include studies on immune responses in the natural host, vaccine development and molecular bacteriology. The two research fellows will be integrated into the existing programmes and will be involved in either:

- characterising major T-cell antigens recognised in bovine *L. hardjo* infection, or
- determining T-cell subpopulations responsible for the evolution of cellular immune responses to *M. bovis* infection and establishing the kinetics of their involvement.

Additional information can be obtained by fax (441232 761662) from Dr J. Pollock, Immunology Department.

Candidates, who are nationals of a member state of the European Union (other than the UK) and hold a Ph.D. or equivalent qualification, should submit a curriculum vitae, together with a brief outline of their research interests and accomplishments. Candidates should also send the names of two academic referees to support their application. Submissions should be sent to Professor W. A. Ellis, Department of Veterinary Science, The Queen's University of Belfast, Stoney Road, Belfast BT4 3SD, Northern Ireland.

Locum Clinical Physicist Grade B

Due to maternity leave, expected to begin in May 1995, we are looking for someone to provide locum cover in this international centre of excellence. You will contribute to the delivery of the routine clinical service, though some participation in research activities may also be possible. In view of the nature of post we have considerable flexibility in how it is filled, but some previous experience in radiotherapy physics is essential. The grade of the post and the exact duties assigned would be commensurate with experience. Part time working could also be considered.

The Radiotherapy Department is equipped with three computer controlled SL series linear accelerators (one with multi-leaf collimator), a 6 MV linear accelerator, a cobalt 60 unit, a simulator and a specialist Total Body Irradiation facility. Treatment planning is performed using a GE TARGET II system with two workstations. The department has a major programme of research with projects on conformal therapy, megavoltage imaging, MRI planning, breast dosimetry, and 3D planning.

For further information please contact Glyn Shental on 0181 642 6011 bleep 366.

For an application package please contact the Human Resources Department, The Royal Marsden NHS Trust, Downs Road, Sutton, Surrey SM2 SPT or telephone 0181 643 4824 (24 hour answerphone) quoting reference 1342.

Closing date for applications 18 April 1995.

Committed to equal opportunities in employment
Stoke Mandeville HOSPITAL NHS TRUST
DEPARTMENT OF HISTOPATHOLOGY

Trainee MLSO Ref. T864

This Trainee MLSO post will be of interest to graduates with a science degree which has been accepted by the State Registration Board as suitable for registration. Salary range £8,055 - £8,627.

Applications to be returned by 21.4.1995.

Application forms available from: Halina Simm, Personnel Department, Stoke Mandeville Hospital NHS Trust, Mandeville Road, Aylesbury, Bucks HP21 8AL. Tel: 01296 316772 or answerphone 316786.

"Working towards equality of opportunity"
SM H
RESEARCH SCIENTISTS

Two posts are available for a new MAFF-funded research into nitrogen cycling in soil for approximately 3 years.

Band 6: To initiate research into the measurement of nitrogen mineralization in collaboration with the ADAS and the Institute for Grassland and Environment Research. Candidates will use stable isotope techniques to test and develop methods for measuring nitrogen mineralization. A relevant Ph.D. is preferred, but three years postgraduate research experience in this area may be considered. Ref. 183.

Band 7: To join the same team using stable isotopes and other techniques to study nitrogen cycling and nitrate losses. Candidates should have a degree in a relevant subject. Ref 184.

Salary: Band 6: with a range of £13,286 - £23,470. Band 7: with a range of £11,361 - £20,063, both with additional bonus payments available beyond that level. Apply by application form only, available with further particulars from Personnel Department, IACR-Rothamsted, Harpenden, Herts, AL5 2JQ. Quoting appropriate ref number. Closing date 20 April 1995.

UNIVERSITY OF ABERDEEN

Research Assistant
£13,941 to £15,566 per annum

Required in the Department of Molecular and Cell Biology to assist in work on the construction of a genome map of the pathogenic fungus, Candida albicans, using cosmid cloning. You should have a degree or equivalent qualification in a relevant subject and ideally some laboratory experience in molecular genetics. The post is available for a fixed period of three years. Informal enquiries may be directed to Professor Duncan Shaw on 01224 273191, fax 01224 273144, email d.shaw@aberdeen.ac.uk

Application forms and further particulars are available from Personnel Services, University of Aberdeen, Regent Walk, Aberdeen AB9 1FX, telephone 01224 272727, quoting reference number ZMC829R. A 24-hour answering service is in operation.

Closing date: 21 April 1995.

The University of Aberdeen is established to provide Higher Education and to carry out related research.

An Equal Opportunities Employer

ROYAL MANCHESTER CHILDREN'S HOSPITAL

RESEARCH ASSISTANT
Department of Diagnostic & Molecular Pathology

A position is available for a Scientific Officer to assist in work on the Molecular Genetics of childhood solid tumours. Molecular techniques used will include nucleic acid extraction from tumour samples, PCR, RT-PCR, and DNA sequencing. Experience in any of these techniques is desirable but not essential. You should possess an appropriate science degree. Salary will be in the range of £12,865 - £15,048. The appointment will be made for an initial period of one year. Informal enquiries should be made to Dr A. Kelsey. Tel: 0161 727 2247.

For an application form contact 0161727 2352 (answerphone). Quote Ref No: RM 63/95. Closing date 14 April 1995.
PLANT SCIENTIST
Targeting and function of peroxidase in transgenic tobacco plants

A Postdoctoral position is available immediately, for 15 months, to complete a project funded under the EU Human Capital and Mobility Programme.

A bank of transgenic tobacco plants has been generated, expressing a synthetic horseradish peroxidase gene, under control of several promoters and with different C- and N- terminal targeting sequences. The appointee will analyse the patterns of over-expression of peroxidase at tissue and cellular levels, and assess their impact on developmental and stress responses thought to be influenced by peroxidases.

The position is open to EU nationals other than those from Ireland and the newly joined member states. The salary is IR£15,000 pa and applicants should be in a position to take up the post at short notice. Please send CV and names and fax numbers of two referees to: Dr P. J. Dix, Biology Dept, St Patrick's College, Maynooth, Co. Kildare, Ireland. Fax: 353 17083845.
RESEARCH POSITIONS
in Nonlinear Dynamics in Electronic Systems

Applications are invited for the position of Postdoctoral Research Fellow. The position deals with the modelling of nonlinear effects, including chaos, in electronic systems. Applicants should have appropriate qualifications in Applied Mathematics, Physics or Engineering. A background in dynamical systems and electronics would be an advantage. The appointment will start from a mutually agreeable date and will be available for two years. Initial salary will be in the range £13,941 - £20,953 per annum, and superannuation under USS or continuation of FSSU.

Prospective applicants may contact Dr P. D. Smith, tel: (01382) 344482, e-mail: pdsmith@mcs.dundee.ac.uk, on an informal basis.

CV (two copies), together with the names and addresses of two referees, should be sent to Personnel Services, The University, Dundee DD1 4HN. Further particulars are available for this post, tel: (01382) 344015. Please quote Reference: EST/449/45NS.

Closing date 21 April 1995.

The University is an Equal Opportunities Employer.
Applications are invited for Ph.D. studentships in organic, organometallic, inorganic, bioinorganic, analytical and physical chemistry, including the following projects.

- Electronic Interactions in Inorganic Materials and Mixed-Valence Complexes using Neutron Scattering, ESR, Infrared and Electronic Spectroscopy, EPSRC Earmarked Studentship (Dr R. D. Cannon).
- Development and Study of Zeolite-supported Catalysts for Reactions of Peroxides. CASE project under negotiation (with Drs R. D. Cannon and U. A. Jayasooriya).
- Organometallic Chemistry Directed Towards Polymerisation Catalysis: New Initiator Systems for the Synthesis of Elastomers, Industrially funded project sponsored by BAYER Leverkusen (Professor M. Bochmann).
- Zwitterionic Complexes of Group V Metals as Alkene Polymerisation Catalysts. CASE project under negotiation (Professor M. Bochmann).
- Mechanisms of Action and Effect of Inhibitors on the Enzyme Neuronal Nitric Oxide Synthase (NOS). Industrially funded project sponsored by SmithKline Beecham (Professor A. J. Thomson and Dr M. R. Cheesman).
- NMR Studies of Proteins (Professor G. R. Moore).
- The Development of New Free Radical-Based Methodologies for the Synthesis of Natural Products. CASE project with Zeneca Pharmaceuticals (Dr K. I. Booker-Milburn).
- The Use and Development of New Photochemical Cycloaddition and Rearrangement Reactions for Organic Synthesis (Dr K. I. Booker-Milburn).
- Organoiron/Biotechnology Routes for Hippeastrine Synthesis (Dr G. R. Stephenson).
- Development of Novel Glycosidase Inhibitors for Anti-HIV Testing (Dr A. H. Haines).
- Synthesis of Novel Phthalocyanine Ionophores for Ion Sensing (Professor M. J. Cook).
- Novel Chiral Liquid Crystals for Display Applications (Dr A. N. Cammidge).
- Synthetic Approaches to Novel Chroman-based Analgesics (Professor A. McKillop).
- Analysis of Complex Mixtures by a Combination of NMR Spectroscopy and Chemometrics. CASE project under negotiation (Dr N. J. Clayden).
- Polymer Morphology by $^2$H NMR and Selective $^3$C NMR Spectroscopy. CASE project under negotiation (Dr N. J. Clayden).
- Clean Synthesis of CdS Particles Dispersed in Sol-Gel Reactors. EPSRC Clean Technology Studentship (Drs J. R. Sodeau, D. A. Russell and D. J. Richardson).
- Halogen Species and the Oxidation Capacity of the Troposphere. NERC Atmospheric Chemistry studentship (Drs J. R. Sodeau and A. B. Horn).
- Atomic Force Microscopy of Polysaccharides. Project funded by the Institute of Food Research (Dr V. J. Morris (IFRN) and Professor B. H. Robinson).
- Transport Through Membranes and Vesicles. Project funded by the Max Planck Society (German) (Professor B. H. Robinson).

Applicants should possess or expect to obtain a First or Upper Second Class Degree in relevant disciplines. Applications should be sent as soon as possible to Dawn Pearce, Graduate Admissions, School of Chemical Sciences, University of East Anglia, Norwich NR4 7TJ. Tel: (01603) 593017. Fax: (01603) 259396. Informal enquiries should be addressed to the individual research supervisors named above.

University of Cambridge

**Professorship of Materials Chemistry**

Applications are invited for the above Chair in the Department of Materials Science and Metallurgy from candidates able to take up office by 31 March 1996. The University follows an equal opportunities policy.

Pensionable stipend £37,968.

Further information from the Secretary General of the Faculties, General Board Office, The Old Schools, Cambridge CB2 1TT.

Applications (10 copies), marked ‘confidential’, with names of two referees by 24 April 1995.

The University aims to achieve the highest quality in teaching and research.

PRINCIPAL SCIENTIFIC OFFICER
Up to £23,991 per annum
Essex County Council
Chief Executive's Office
KEEPING ESSEX STRONG

We are looking for an industrial chemist to become the County Council's Principal Scientific Adviser and to set up a new Scientific Unit. The duties will include giving advice to all County Council Departments on scientific matters, attending major incidents such as fires and spillages of hazardous substances.

You will need to have a Degree in Chemistry or Combined Science, several years experience of working within industry dealing with hazardous substances and preferably had some management responsibility.

Further details and application forms available from: County Personnel Department, County Hall, Chelmsford, CM1 1LX. Telephone (01245) 432101. Please quote post reference number C705.

Closing Date: 14 April 1995.

Most of our posts are available for job share.
A postgraduate research assistantship is available to carry out research, possibly leading to a higher degree, on the determination of the permeability of solidifying metals and alloys. A first degree in metallurgy or materials will be required, as will be an aptitude for practical experimentation and instrumentation will be useful. The successful candidate will have to develop experience and skill in experimental techniques in solidification and casting. In addition it would be an advantage to possess some skill in computing. The contract is funded by EPSRC and qualifies for up to grade spine point 5 (£14,396 pa, to be reviewed 1st October 1995) depending on the quality of the applicant.

The post is available from 22nd May 1995. Applications by 19th April 1995 to Professor John Campbell, IRC in Materials, The University of Birmingham, B15 2TT. Telephone enquiries to 0121 414 5246.

The University is an exempt Charity which exists to advance learning to the highest level for the benefit of its students and society at large.
NIAB
"Better Seeds : Better Crops"

**Technical Officer**

To assist in the co-ordination of cereal, oilseeds and pulse variety trials and research. Requires a good honours degree, trials experience and the ability to carry out and report research. Salary £11,249 to £16,330 p.a.

Further details and an application form may be obtained from the Personnel Office, NIAB, Huntingdon Road, Cambridge, CB3 0LE, telephone (01223) 342234, quoting reference SV/A466. Closing date for applications 14th April 1995.

THE UNIVERSITY OF SHEFFIELD
Department of Molecular Biology and Biotechnology

POSTDOCTORAL RESEARCH ASSOCIATE

Applications are invited for the above BBSRC funded post, tenable for three years from or before September 1995, to investigate the mechanism of a novel group of bacterial periplasmic solute transport systems. The research will include the overexpression and mutagenesis of genes enclosing bacterial membrane proteins, and experience in the areas of molecular genetics or membrane transport would be an advantage.

Salary in the range £13,941 - £15,566 pa. Informal enquiries to Dr D. J. Kelly (Tel: 0114-282 4414. Fax: 0114-272 8697. E-mail: d.kelly@sheffield.ac.uk).

Further particulars from the Director of Human Resource Management, The University of Sheffield, Western Bank, Sheffield S10 2TN. Tel: 0114-282 4144. Closing date for applications 5 May 1995. Ref: R573.

Founded in 1905, the University of Sheffield provides higher education within a research-led environment.

We encourage equality for all.
MARIE CURIE RESEARCH INSTITUTE

GRADUATE RESEARCH ASSISTANT

A position is available for a graduate research assistant to work in the Eukaryotic Transcription Laboratory. Current research is focused on two main areas: identification of the molecular mechanisms controlling the melanocyte-specific gene expression, differentiation and development; and transcriptional regulation by a novel class of cyclins.

The successful applicant will undertake a research project related to our current interests and in addition will be expected to play a key role in organising and maintaining core facilities essential to the smooth running of the laboratory. Applicants should be highly motivated, enthusiastic and well organised and should ideally have experience of molecular biology and/or protein purification.

Candidates should send a full CV to Dr C. R, Goding, Eukaryotic Transcription Laboratory, Marie Curie Research Institute, The Chart, Oxted, Surrey RH8 0TL, UK. Tel: 01883 722306. Fax: 01883 714375. [1971-090 (1995) : 80]
Applications are invited for the following studentships. Applicants should have or expect to obtain a First or Upper Second Class Honours Degree in an appropriate subject area and submit a full CV together with the names of two academic referees. Closing date for applications 6 May 1995.

**DEPARTMENT OF BIOLOGICAL AND NUTRITIONAL SCIENCES (BBSRC/MAFF Studentships)**

1. Uptake and tissue metabolism of low molecular weight peptides in ruminants (Dr D. S. Parker in collaboration with the Rowett Research Institute).
2. Protein engineering of xylanases (Professor H. J. Gilbert).
3. Either: Optimising amino acid supply across the tissue of the ruminant gut (Dr D. S. Parker).
   Or: Intramuscular fat deposition in sheep (Dr H. J. Finlayson / Dr T. E. C. Weekes).
4. Blunting of cell proliferation by dietary cholesterol (Dr J. C. Mathers).

Further details available from the project supervisor(s). Applications to: Dr D. S. Parker, Department of Biological and Nutritional Sciences, University of Newcastle, Newcastle upon Tyne NE1 7RU. General office phone number for informal enquiries 0191 222 6609.

**DEPARTMENT OF AGRICULTURAL AND ENVIRONMENTAL SCIENCE (MAFF CASE Studentship)**

Project: A counter measure strategy for the fixation of radiocaesium by clay minerals naturally present in organic soils.

Further details available from Dr D. Rimmer, Department of Agricultural and Environmental Science, University of Newcastle, Newcastle upon Tyne NE1 7RU. Tel: 0191 222 6916, and Dr Anne Nisbet, National Radiological Protection Board, Didcot, Oxon. Applications to Dr D. Rimmer.

**DEPARTMENT OF AGRICULTURE (MAFF Studentship)**

Project: Environmental influences on the yield and quality of autumn sown white lupins (*Lupinus albus*).

This is a collaborative project between IACR Rothamsted and the Department of Agriculture. Applications to Dr E. J. Evans, Department of Agriculture, King George VI Building, University of Newcastle, Newcastle upon Tyne NE1 7RU. Tel: 0191 222 6925 from whom further details may be obtained.

Applications are invited for the post of Head of Radiation Protection and Radiodiagnostic Physics Section. The section has been formed from the merger of two separate divisions.

This new Agency, a corporate body within the NHS, is pioneering a unique arrangement for providing medical physics and clinical engineering services to health bodies in Northern Ireland.

This is an exciting opportunity to meet the challenge of managerially and scientifically leading and developing a vital service to the health service in Northern Ireland. A particular emphasis is placed on furthering the R&D activities of the Section.

Applicants must hold a first or second class honours degree (or equivalent) in Physics or another physical science and have had ten years in Medical Physics, including substantial experience in radiation protection and radiation physics.

Closing date for receipt of applications is 21 April 1995.

Full details and application forms can be obtained from: The Personnel Department, Central Services Agency, 25/27 Adelaide Street, Belfast BT2 8FH. Telephone (01232) 324431.

School of Health Sciences

DEMONSTRATOR IN I.T FOR HEALTH AND NURSING DIVISION
£10,632 - £12,048 pro rata Ref. A7662
(Temporary 2 year contract working 40 weeks per year)

To contribute towards the teaching of introductory statistics and methods in Information Technology at Certificate, Diploma and Degree level as appropriate, including running workshops and tutorials on the use of computers in statistical analysis. You should have a good honours degree and demonstrate good communication skills together with a good working knowledge of computers (IBM and Macintosh).

For detailed further particulars and an application form (returnable by 13th April 1995) contact the Personnel Services Department, University of Wolverhampton, Molineux Street, Wolverhampton WV1 1SB. Tel. 01902321049 (ansaphone).

The University is eager to attract larger numbers of applications from groups of people currently under-represented in the staff population - especially from women and people from ethnic minority groups.

The University is an exempt charity which exists to provide higher education services to meet the needs of individuals and of society at all levels.

UNIVERSITY OF WOLVERHAMPTON
Gosport Hampshire

With an international reputation for quality and innovation, Cyanamid UK's increasing presence in the Crop Protection arena contributes to the success of this world-class organisation.

**Product Development Manager - CROP PROTECTION**

Reporting to the Technical Manager, you will be the focal point for managing the team working on trials at three strategic UK locations. The brief will centre on the coordination of the development programme and all trials activities from our Head Office in Gosport. Your primary objective is ensuring that new products reach the market on time, within budget and to satisfy identified market needs.

With a degree in an agriculturally related subject, you will have a minimum 4/5 years' trials development experience, of which at least 2 years must have been spent in a coordination role. A lateral thinker, with a creative approach to problem solving, you must have excellent project and people management skills, with the tenacity to take projects from conception to completion.

We can offer a highly competitive salary, company car and a first class range of benefits.

Please write or telephone for an application form to: The Personnel Officer, Cyanamid (UK), Cyanamid House, Fareham Road, Gosport, Hants PO13 0AS. Tel: 01329 230941 (answerphone). Please quote reference 858 on all correspondence.

CLINICAL MICROBIOLOGY DEPARTMENT
CHLAMYDIA LABORATORY

BIO-MEDICAL SCIENTIST – GRADE 1
REF: PAD/08

The laboratory is involved in the diagnosis of Chlamydial infections and is used as a reference centre for diagnosis and research. Techniques used include tissue culture, immunodiagnostic and molecular techniques. The successful applicant will join the laboratory team and will take an active part in the laboratory diagnosis of Chlamydia infection.

Applicants should hold IBMS / BSc or equivalent and be State Registered. Salary will be in the range of £10,405 - £13,693 plus £1,999 London Weighting.

Informal visits for the above post may be made by arrangement (phone either Mike Wren on 0171380 9519, or Caroline Carder on 0171387 9300, ext. 8400).

BIO-MEDICAL SCIENTIST – GRADE 1
REF: PAD/09

A vacancy has arisen for a Bio-Medical Scientist Grade 1 in this busy department. The laboratory serves the "Bloomsbury district" which comprises University College Hospital, The Middlesex Hospital, together with a number of Specialist Hospitals and Health Centres.

The department provides a suitable environment for those wishing to progress with further study in medical microbiology. Some departments provide regional special services.

The successful applicant will have the opportunity to work in all sections of the department thereby gaining more specialist knowledge. Both an early evening and an on call rota are in operation.

All jobs open to job sharing with or without a partner

An Employer Committed to Equal Opportunities
We actively discourage smoking at work

After a qualifying period, applicants may take advantage of a season ticket loan scheme. Social club facilities are also available.

For application forms and job descriptions for both posts, please contact the Personnel Department, The Middlesex Hospital, Mortimer Street, London W1N 8AA. Telephone: 0171380 9170 (daytime) or 0171380 9166 (24 hour answerphone).

Please quote the appropriate reference number.

Closing date for both posts: 21st April 1995.
THE UNIVERSITY OF SHEFFIELD
Department of Chemistry

POSTDOCTORAL FELLOWSHIP

Applications are invited for the above post tenable as soon as possible for one year to work with Professor D. A. Dunmur and Dr C. M. Marson on the synthesis of organic carbocyclic liquid crystals. Applicants must have a Ph.D. in organic synthesis. Salary in the range £13,941 - £16,191 pa.

Further particulars from the Director of Human Resource Management, The University of Sheffield, Western Bank, Sheffield S10 2TN. Tel: 0114-282 4144. Closing date for applications 14 April 1995. Ref: R570.

WORKING TOWARDS EQUAL OPPORTUNITIES
COURSES & EVENTS
A School of the University of London
Royal Postgraduate Medical School

**MSc in Toxicology**
(Experimental Pathology and Biochemical Mechanisms)

Applications are invited for a full-time, one calendar year postgraduate course, commencing in October 1995, leading to the University of London MSc degree in Toxicology (Experimental Pathology and Biochemical Mechanisms).

This course provides a broad background in general pathology and mechanistic toxicology, and is jointly organised by the Departments of Histopathology and Clinical Pharmacology. Theoretical and practical based tuition covers a wide range of topics fundamental to toxicology: cell and tissue biology, molecular biology techniques, cell damage, inflammation, healing, vascular disease, neoplasia, diagnostic histopathology, chemical analysis, pharmacokinetics, mechanisms of toxicity, teratogenesis, clinical toxicology, epidemiology, toxicity testing. Successful graduates can expect career opportunities in biomedical research, histopathology or in the regulatory authorities.

The course is open to graduates or applicants with an equivalent qualification in medicine, veterinary medicine or science. The current course is attended by 9 students, and a limited number of MRC studentships are available.

**MSc in Histopathology**

Applications are invited for a new full-time postgraduate course in Histopathology, lasting one calendar year, leading to the University of London MSc degree in Histopathology. It will provide comprehensive coverage of both diagnostic and experimental pathology including cellular and molecular pathology. The aim of the course is to encourage interest in pathological research, whilst also giving a training in basic principles of diagnostic histopathology and cytopathology.

There will be a 22 week formal taught course, followed by a research project which will be designed to allow the student to make an original contribution in the chosen area of research.

The course will be suitable for students with a background in medicine, dentistry, veterinary science or basic science, but previous experience in histopathology would be an advantage. It will be offered biennially, beginning in September 1995.

Application forms and further particulars are available from: The School Registry, Royal Postgraduate Medical School, Du Cane Road, London W12 0NN. Tel: 0181 740 3118 Fax: 0181 743 6764.

UNIVERSITY OF SURREY
Department of Physics

Ph.D. Research in Nuclear Physics

Applications are invited to pursue fundamental research in nuclear physics. Research projects include experimental and theoretical studies of the structure and reactions of exotic states of nuclei, hadron-nucleus, and hadron-hadron systems. EPSRC funded studentships are available.

For further information contact The Postgraduate Admissions Secretary, Department of Physics, University of Surrey, Guildford GU2 5XH. Tel: (01483) 259323. Fax: (01483) 259501.
UNIVERSITY OF SURREY
International Centre of Excellence in Toxicology

MSc COURSE IN TOXICOLOGY

This full-time course prepares suitable graduate for both employment and further study in all aspects of toxicology by providing a broad coverage of the subject whilst focusing on the molecular mechanisms of toxicity. It is taught in collaboration with leading industrial and governmental organisations and is supported by industrial scholarships and research council studentships. Further information about this and other full- and part-time postgraduate taught courses may be obtained from Mrs C. B. Fitzgerald, School of Biological Sciences, University of Surrey GU2 5XH, UK. Tel: 01483 259730.
MSc in Renewable Energy Systems Technology

Senior Development Technologists

Inhalation Technology

North West

A major international force in the pharmaceuticals industry, our client's mission is to strive for excellence through continuous improvement. In order to move its business forward, the company is seeking to strengthen its Technology Development team. This has created several exciting career opportunities for experienced and well qualified Senior Development Technologists.

Working to achieve technology transfer and process development, you will be responsible for organising and supervising the scale-up and validation activities necessary to bring new products and major process improvements into production.

You will make an important contribution either as a team leader or key member of a multi-disciplinary group, establishing and building strong relationships at all levels across a wide range of UK functions and European manufacturing facilities.

To succeed, candidates must be degree qualified with at least three years' substantive experience in the development of pharmaceutical products or processes. Confident, with good interpersonal and leadership skills, you should have the ability to operate autonomously when required.

In return, you can expect an attractive package, including a very competitive salary, excellent benefits and relocation assistance, where appropriate, to our client's pleasant rural location.

If you believe you can bring the necessary technical skills and personal attributes to these demanding and rewarding technology development roles, please write with full CV and current salary details to: The Advising Consultant, Moxon Dolphin Kerby, Mansion House, Manchester Road, Altrincham, Cheshire WA14 4RW.

MOXON DOLPHIN KERBY
EXECUTIVE SEARCH & SELECTION
Applications are invited for a position as **Full Professor** of Natural Resource Management, open from January 1, 1997. The subject of the Chair has been defined as: Natural Resource Management deals with the sustainable use and development of natural resources, using a problem definition based on natural science, but including also social, political, legal and technical aspects. Applicants should have an **outstanding** record of research and teaching achievements in this field.

The position is located in the Department of Systems Ecology. Salary is negotiable. The salary range for full professors within the Faculty of Mathematics and Natural Sciences is 330,000 – 420,000 Swedish Crowns/year. Applications from women are encouraged, since most professors in the Faculty are men.

Informal enquiries may be made to Professor Ragnar Elmgren, tel +46-8164016, fax +46-8158417. The University attaches great importance to excellence in teaching, and applicants are recommended to order instructions on how to document teaching experience from Mr Ulf Lindgren of the Staff Management Division, fax +46-86125960.

Applications, quoting reference number 611-0764/95, should reach the Registrar, Staff Management Division, Stockholm University, S-10691, Stockholm, Sweden, no later than 16 June, 1995.

Application should include four copies of the following:

1. Curriculum vitae, with photocopies of relevant graduation diplomas
2. The applicant's full publication list
3. A brief (5-10 pages) description of the applicant's scientific achievements and teaching and leadership experience
4. The applicant's 20 most relevant scientific publications, numbered as in 2 above.

Items 1 and 2 should reach the University before the end of the application period, Item 3 and one copy of item 4 should arrive no later than 7 July.

Three additional copies of item 4 are to be sent later, on request, directly to the three expert members of the search committee.

The University invites applications for the Crum Brown Chair of Chemistry, to be available from 1st October 1995. Candidates should have an outstanding research record, with strong interests in Synthetic Inorganic Chemistry.

In addition to outstanding strength in research and scholarship, the successful candidate should provide leadership and inspiration for fundamental research, encourage the integration of his/her own research with that of others, and play an active role in teaching and departmental administration.

The salary will be within the normal Professorial salary range.

Please quote REF: NS/590185.

Further particulars may be obtained by writing to the Head of Department, Department of Chemistry, The University of Edinburgh, King's Buildings, West Mains Road, Edinburgh EH9 3JJ or from The Personnel Office, The University of Edinburgh, 1 Roxburgh Street, Edinburgh EH8 9TB.

Letters of application (15 copies/1 from overseas candidates) should include a curriculum vitae, and the names and addresses of three referees - please include fax numbers for referees if possible. Applications should be addressed to:

THE SECRETARY TO THE UNIVERSITY
THE UNIVERSITY of EDINBURGH,
1 ROXBURGH STREET EDINBURGH EHS 9TB, FAX: +44 131 650 6509
Closing date: 24th May 1995. Interviews will take place on Monday 26th June 1995.

Promoting Excellence in Teaching and Research
Chair in Ecology

UEA Norwich wishes to raise further the profile of ecology at the University by appointing an outstanding ecologist to a professorial position to be held jointly in the Schools of Biological Sciences and Environmental Sciences which have research ratings of 4 and 5 respectively. The successful applicant will be expected to give academic leadership to the whole group of ecologists, particularly in research, and to develop collaborative research links between the Schools and between the University and its associated institutes such as the adjacent John Innes Centre and the MAFF Fisheries Laboratory at Lowestoft.

The post is available from 1 September 1995. Salary will be negotiable within the professorial salary range, minimum £31,158 per annum.

Further details and an application form should be obtained from Mr M.G.E. Paulson-Ellis, Registrar and Secretary, University of East Anglia, Norwich, NR4 7TJ (telephone 01603 593648), to be returned by 22 May 1995. Reference AC55.

UEA is committed to excellence in education and research and to equality of opportunity for all.

Chair in Information Systems Engineering

The University invites applications for the above position in the Department of Electrical and Electronic Engineering. This is a senior position; one of three established chairs in a Department of 23 academic staff. The minimum qualification on appointment is the Ph.D. degree. The Department offers Bachelors, Masters and Doctoral degrees in Electrical and Electronic Engineering. The appointee will be committed to excellence in teaching and should have an outstanding and continuing research record in one or more areas related to Computer Engineering and/or Information Systems Engineering. He or she will be required to provide focus and leadership over a broad range of research activities in related fields and will be expected to participate actively in a variety of courses and teaching activities within the Department's undergraduate programme.

Academic enquiries may be directed to the Head of Department, Associate Professor P T Gough (fax 164 3] 364 2761 or email: p.gough@canterbury.ac.nz).

The salary for Professors is within the range NZ$80,000 to NZ$100,000 per annum.

Applications close on 31 August 1995.

Further particulars and Conditions of Appointment may be obtained from Appointments (43900), Association of Commonwealth Universities, 36 Gordon Square, London WC1H 0PF, UK (tel. 0171 387 8572 ext. 206; fax 0171 383 0368; email: appts.acu@ucl.ac.uk) Applications, quoting Position No. EE46, must be addressed to: Mr A W Hayward, Registrar, University of Canterbury, Private Bag 4800, Christchurch, New Zealand.

The University has a policy of equality of opportunity in employment.

Postdoctoral Position

This position is available immediately to study Apolipoprotein B mRNA editing in the Molecular Medicine Group headed by Professor James Scott. Candidates must have a Ph.D. with postdoctoral experience and demonstrated ability to work independently. Individuals with research experience in protein purification, construction of cDNA libraries, cloning and tissue culture expertise are encouraged to apply.

The appointment is for two years, and salary will be at an appropriate point on the non-clinical academic pay scales.

Informal enquiries may be made to Dr Nareenan Navaratnam (0181-740 3985). Application forms are available from the Personnel Department 0181-740 3446/7, quoting ref PD/MM. Closing date for completed applications is 19th May 1995.

The Medical Research Council is an Equal Opportunity Employer.

Medical Information Manager
Up to £35k plus car Thames Valley

My client is an exciting and highly successful International Pharmaceutical Company.

This success has created a new opportunity to lead a small team of medical information professionals. The main purpose of the role is to co-ordinate and develop the medical information services, with the aim of meeting business objectives. A key responsibility will be the development and implementation of new innovative systems. The co-ordination of pharmacovigilance activities for the UK and Ireland will be another facet of the role.

As a highly motivated life science graduate or pharmacist, you will have at least 5 years medical information experience gained within the pharmaceutical industry. This should mean a full understanding of all aspects of medical information, and associated technological issues, plus a good working knowledge of the ABPI Code of Practice. You will have a proven track record of leadership and success in project management. Effective interpersonal and communication skills are essential to achieve the business goals.

If you are proactive, have a desire to succeed and are looking for a management role, please send/fax your CV to Sharon Carter-Jones, quoting Ref. NS/1017/SCJ at Executive & Scientific Appointments Ltd., Salisbury House, 15-17 The Broadway, Old Hatfield, Hertfordshire AL9 5HZ. Tel: 01707 264311 or Fax: 01707 2754-02.

RESEARCH STUDENTSHIP
Surface Chemistry

Applications are invited for a research studentship, commencing 1st October 1995, to undertake doctoral research on the surface chemistry of thin film semiconductor growth. The programme will involve the use of a wide range of surface science techniques to study reaction mechanisms on a molecular level.

Candidates should possess or expect to obtain a good honours degree in chemistry, physics or materials science.

Applications, comprising CV and names/contact points of two referees, should be sent as soon as possible to: Dr J. S. Foord, University of Oxford, Physical Chemistry Lab, South Parks Road, Oxford OX1 3QZ.

UNIVERSITY OF OXFORD
Nuffield Department of Clinical Medicine

Research Assistant RS1B
Salary scale £13,941 to £17,813

Applications are invited for a graduate research assistant to work on factors involved in the alternative splicing of RNA transcripts. The successful candidate will assist in the expression and characterisation of proteins involved in pre-mRNA splicing using both in-vitro and in-vivo assays. The research programme will be carried out in the Molecular Immunology Group in the Department of Clinical Medicine. The position is funded for two years with the possibility of further extension.

Please apply in writing quoting ref PB/GS/RS1B/95, requesting an application form and job description to Mrs J Roast, Room 5802, Nuffield Department of Clinical Medicine, John Radcliffe Hospital, Headington, Oxford OX3 9DU. The closing date for applications is 18 May 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer
MARKETING CONSULTANT
Swindon

The Natural Environment Research Council is seeking to appoint a Marketing Consultant, within the Technology Interaction Group; part of the Council's new Science and Technology Directorate, which is responsible for drawing up and implementing the strategy of NERC’s science and technology. This post is key to encouraging increased levels of exploitation of NERC intellectual property. Responsibilities include:

- help review current interaction with user communities and the levels of exploitation realised;
- undertake research for, and help draft, new policies;
- advise and help the initial exploitation efforts at Board, Centre or Survey level or in the wider NERC research community

Applicants should have a good understanding of science and its application through the creation of partnerships with users.

Qualifications in both science and a relevant business discipline (MBA or marketing MCIM) would be a distinct advantage as would experience in marketing of a professional discipline or with the management of intellectual property. Good analytical and communication skills are essential.

Salary will be in the range of £19,215 - £24,780 pa depending on relevant experience.

A non-contributory pension scheme is available along with a generous leave allowance. The post will be located at NERC’s Swindon Office and is likely to involve some travelling to NERC sites throughout the UK.

PUBLICATIONS AND SCHOOLS PROGRAMME OFFICER
Swindon
Five year fixed-term appointment.

The Natural Environment Research Council has a challenging opportunity in their Communications Section, Swindon Office, for a scientist with communication skills to contribute to NERC’s programme on the Public Understanding of Science.

The work involves writing and editing publications such as the NERC Annual Report; developing the NERC Schools Programme and contributing to the general press and PR activities of the Section.

Good writing, particularly for non-specialist audiences, and communication skills, along with the ability to use electronic media and work to deadlines are essential.

Applicants should have a good scientific degree in one of the fields covered by NERC, at least two years’ relevant postgraduate experience, together with a strong interest in the sciences relevant to environmental research.

Salary will be in the range of £13,025 to £23,009 pa depending on relevant experience.

Conditions of service include a non-contributory pension scheme and a generous annual leave allowance.

For further information and an application form for either of the above posts, please contact Alison Fisher, Personnel Section, Natural Environment Research Council, Polaris House, North Star Avenue, Swindon SN2 1EU. Telephone (01793) 411695. Closing date for receipt of application forms for both posts is 25 May 1995.
The Natural Environment Research Council has an equal opportunities policy and welcomes applications from all sections of the community.

Natural Environment Research Council
Lilly Research Centre is part of a leading international pharmaceutical organisation with a continuing commitment to innovative research and development of ethical pharmaceutical products.

Due to expansion of the Company's pharmaceutical development programmes in Europe, we are seeking top quality scientists to fill the following vacancies in our Product Development and Quality Control areas.

Within our pharmaceutical development group we have opportunities for two formulation scientists and an analytical chemist to join our multi-disciplinary teams.

As a Formulation Scientist you will be working within the early development phase of new chemical entities. Good interactive skills are essential to fulfil the needs of a proactive team member. Both positions require technical knowledge of formulation development.

**TEAM LEADER, FORMULATION**
For this position we are seeking a Pharmacist, perhaps qualified to Ph.D. level, with experience in pharmaceutical formulation. You will be involved in the co-ordination of projects, which require close liaison with cross-functional scientists within Europe and the United States. Proven communication and interpersonal skills are essential for this challenging and exciting position. As a Team Leader, you will have responsibility for the personal development of team members and previous supervisory experience is desirable.

In addition, you should be able to lead the formulation development efforts of the team. Ref: 95/8/825.

**TEAM MEMBER, FORMULATION**
The second vacancy exists for a graduate formulation scientist to join one of the teams. Ideally you will have up to two years' experience, post-graduation, of pharmaceutical formulation.

You will contribute to the design, evaluation and implementation of formulations for assigned projects. The role encourages an interest in technology development. Ref: 95/9/825.

**ANALYTICAL CHEMIST, STABILITY GROUP**
An opportunity has arisen for an analytical chemist, with two years' experience in method development, to join our Clinical Trials Support and Stability group. As part of the Pharmaceutical Development department you will be working as a member of a motivated team, dealing with a high project workload. The group is responsible for the running of routine stability analysis and method development for Clinical Trials studies. In addition to your proven analytical abilities, you will possess excellent communication and interpersonal skills to ensure effective liaison with your customers. Ref: 95/10/825.

There are currently two vacancies for qualified pharmacists or chemists in our Quality Control Department, which is responsible for the release of product for clinical trials throughout the world. The department supports the manufacture of clinical trial products, which is carried out in dedicated suites in our Basingstoke factory, and the packing and assembly operations located at our research and development centre near Bagshot.

**HEAD, QUALITY CONTROL**
We are seeking an experienced person to head up the group of graduate and non-graduate QC staff. The successful candidate will have had several years experience of applying the principles of GMP, preferably in a clinical trial supplies unit and have the skills to thrive on the challenges of a leadership role within a quality function. Ref: 95/11/820.

**QUALITY CONTROL OFFICER**
The other vacancy is for a QC Officer whose primary responsibilities will relate to the manufacturing operation and the release of product for packing. The successful candidate will have up to three years' experience in a GMP regulated environment. Ref: 95/12/820.

The Lilly Research Centre offers a highly competitive salary and benefits which include a non-contributory pension scheme, flexible working hours, 25 days' annual holiday and an extremely attractive working environment.

To apply for any of these positions, please send your CV to the Personnel Department, Lilly Research Centre Limited, Erl Wood Manor, Windlesham, Surrey GU20 6PH. Tel: (01276) 853571. Please apply by 26th May, quoting the appropriate reference number.

Here at Reckitt & Colman, we understand that change is natural and instinctive to success in a naturally competitive environment. Which is why we're concentrating both significant investment and major research talent at our worldwide R&D Centre in Hull.

Working closely with both Marketing and Production, our R&D scientists will meet consumer needs precisely, continuing a tradition of innovation responsible for an extensive portfolio of leading brands with global appeal including: Lemsip, Disprin, Fybogel, Gaviscon and Dettol.

With current opportunities extending across the function, now is the ideal time to join Reckitt & Colman, if you too are ready and willing to change.

TECHNOLOGY
RESEARCH HEALTHCARE SCIENTISTS

Good honours graduates in Biology, Biochemistry, Chemistry or a related discipline, plus 2-4 years' postgraduate experience in the pharmaceutical industry, are needed to identify and develop innovative healthcare products. We'd also like to hear from recent Ph.D.s. Experience in products for skincare would be an advantage for one of these positions.

SCIENTIST - MICROBIOLOGY

We need a good honours graduate in Microbiology or Applied Biology with at least 1 year's experience in a clinical or pharmaceutical environment. A good knowledge of antimicrobial agents and susceptibility testing would be an advantage.

FORMULATION DEVELOPMENT
TEAM LEADER

You will lead the team responsible for developing new products and supporting existing products in the gastrointestinal category and be accountable for all formulation issues. A graduate in a scientific discipline, you will have over 5 years' relevant experience, showing an innovative approach plus the ability to take calculated risks and produce results to tight deadlines.

SENIOR SCIENTISTS

A good science degree with up to 4 years' experience, developing a range of pharmaceutical product presentations from concept to full manufacture, should mean you're ready for one of these roles. You will be involved in formulating products for both OTC and prescription markets across the world.

ANALYTICAL SCIENCES
SENIOR SCIENTISTS

At least 3 years' postgraduate experience in modern methods of instrumental analysis, both chromatographic and spectroscopic, is essential for this 'hands on' role producing globally successful new products. You will need excellent communication skills, flexibility, and familiarity with computerised Data Acquisition Systems would be advantageous.

LICENSING
LICENSING MANAGER

You will be responsible for identifying and procuring new product opportunities for short and medium term growth. Your relevant experience will demonstrate that you have a sound understanding of the healthcare industry, can identify gaps in the market, and can negotiate the best agreements with potential licensors.
PRODUCT REGISTRATION

TEAM LEADER

This is a new role, leading the team responsible for ensuring that our gastrointestinal therapeutic products meet worldwide regulatory requirements and are registered effectively and efficiently. To succeed, you'll need a good honours degree in a scientific discipline and at least 5 years' experience in pharmaceutical regulatory affairs. Ideally, we'd also like you to be a member of an appropriate professional body and have first hand experience of the gastrointestinal therapeutic business.

SENIOR REGISTRATION SCIENTIST

We're looking for a Regulatory Affairs professional with a good science honours degree. You will have some 3 years' experience of pharmaceutical regulatory affairs, preferably of OTC medicines, and a proven track record of achievement. You will be responsible for advising on regulatory requirements worldwide and ensuring product registration is achieved effectively and efficiently.

INFORMATION SCIENTIST

Here is another new opportunity, this time offering you the opportunity to provide value adding information to facilitate our worldwide pharmaceutical product development programme. A life sciences graduate with a postgraduate qualification in Information Science, you will have at least 3 years' experience recommending and implementing change in a similar role.

CLINICAL AFFAIRS

CLINICAL RESEARCH ASSOCIATE

You'll be responsible for developing protocols and preparing and monitoring studies in all phases of clinical research and a variety of therapeutic areas. A life sciences graduate with over 2 years' relevant experience in clinical research, you will have excellent communication skills and a thorough knowledge of current Good Clinical Practice requirements.

STATISTICIAN

This opportunity will suit a statistics graduate with over 2 years' experience in clinical research, including the design and analysis of clinical studies and a good knowledge of SAS. You'll be responsible for the design and definition of analysis requirements, monitoring and reviewing statistical analyses performed by external personnel for all phases of clinical research. Your work will cover a variety of therapeutic areas and you will provide statistical support for smaller scale studies within R&D.

Naturally, the salary will fully reflect the experience and expertise you bring to the role and will include a comprehensive package of competitive benefits.

If you are interested in any of the above positions and are ready to act as a focus and catalyst for market leading change, please apply to Trevor Clark, HR Department, Reckitt & Colman Products, Dansom Lane, Hull HU8 7DS. Telephone: 01482 326151.

RECKITT & COLMAN PRODUCTS

Senior Lectureship/ Associate Professorship in Science Education
Department of Education Vacancy UAC.575

The University seeks applications from persons with advanced qualifications in both Education and Science and the experience and ability to provide strong leadership in the field of Science Education.

Possession of a Ph.D. or equivalent in some aspect of Science Education, a substantial publication record, an established record of research and teaching and knowledge of international developments in Science Education are essential for appointment. Some school science teaching experience is also very desirable.

The University of Auckland has recently established a Centre for Science, Mathematics and Technology Education and the successful applicant would be expected to play a leadership role in the activities of the Centre

Closing date: 14 July 1995

Joint Lectureship in Education and Science
Faculties of Arts and Science Vacancy UAC.580

Applications are invited for a joint lectureship in Science Education and a Science department Applicants should have a first and/or second degree in science preferably with a major in the biological sciences, chemistry or geosciences and advanced qualifications (Ph.D. or equivalent) in education or science. An established record of research and teaching in science education will be required. The successful applicant will be expected to contribute to teaching in a science department appropriate to their background as well as to teaching in science education (approximately 50% of their time in each department).

Closing date, 14 July 1995.

Lectureship (non medical) in Toxicology
(Limited Term - 5 Years)
Department of Pharmacology and Clinical Pharmacology
School of Medicine
Vacancy UAC.583

Current research in the Department of Pharmacology and Clinical Pharmacology includes toxicological and pharmacological investigations involving cardiovascular pharmacology, neuropharmacology, drug metabolism and disposition, anticancer drugs, reproduction and pregnancy complications, pharmacodynamics and kinetics, acute and chronic pain management and regional anaesthesia. The successful applicant will be required to develop either a related or an independent field of research. The Department is closely linked with other Medical School and Science Departments and also the Cancer Research Laboratories.

Applicants should hold a Ph.D. or equivalent preferably related to Toxicology. Experience in teaching would be an advantage. The successful candidate would be expected to have a proven research ability and leadership or the post-doctoral level.

Closing date: 5 July 1995

Lectureship in Biological Anthropology
Department of Anthropology
Vacancy UAC.574

The University of Auckland seeks a biological anthropologist for a tenurable Lectureship in the Department of Anthropology. Applicants should have a Ph.D. at the time of appointment and a demonstrated capacity for research and publication. They should have research interests in one or more areas of human biology including ecology, genetics and behaviour, should have skills in a variety of contemporary perspectives and be able to participate in a general teaching programme. The successful candidate must be willing to make a research commitment to the Pacific.

Closing date 19 June 1995

Conditions & Procedures for All Vacancies
Commencing salary (per annum) will be established within the ranges, NZ$71,000 - NZ$77,000 (Associate-Professors); NZ$53,000 - NZ$61,000 (Senior Lecturers); NZ$39,500 - NZ$50,000 (Lecturers).

Further information, Conditions of Appointment and Method of Application should be obtained from the Appointments Department, Association of Commonwealth Universities, 36 Gordon Square, London WC1H 0PF (tel. 0171 387 8572 en 206; fax 0171 813 3055; email appts.acu@ucl.ac.uk); or from the Academic Appointments Office, University of Auckland, Private Bag 92019, Auckland, New Zealand (tel. [64 9] 373 7599; fax [64 9] 373 7023). Three copies of applications should be forwarded to reach the Registrar by the closing date.

Please quota relevant Vacancy Number in all correspondence

W B NICOLL, REGISTRAR

The University of Auckland

The University has an equal opportunities policy and welcomes applications from all qualified persons [1976-014 (1995) : 66]
PLANT MOLECULAR BIOLOGIST

Required to undertake a project aimed at the modification of nitrogen use in wheat by genetic transformation. Work will involve the tissue-specific over-expression or down-regulation of glutamine synthetase. Candidates should have a Ph.D. in plant biology and experience of molecular and plant transformation. The post will last for approximately 3 years.

Salary within Band 6: £13,286 - £23,470 with additional bonus payments available beyond that level. Apply by application form only, available with further particulars from Personnel Department, IACR Rothamsted, Harpenden, Herts, AL5 2JQ. Ref: 192. Closing date 25 May 1995. Informal enquiries welcome to Prof Roger Leigh (01582 763133 ext 2636).

Opportunities for **Ph.D. Organic Chemists** in Pharmaceutical Development

Zeneca Pharmaceuticals is a successful British company with R&D in the UK and the USA. At our Cheshire headquarters, talent and technology together produce world class medicines. We have a full development portfolio.

We seek new Ph.D.s for careers in pharmaceutical development in our Analytical Development Group - individuals with a flexible and innovative approach and a team spirit to become key contributors to the development of new medicines.

You should be graduating with a Ph.D. in organic chemistry, or with up to 2 years' experience and able to apply your intuitive grasp of organic chemistry to drug development challenges. Good communication and influencing skills are essential. We will train and develop you. You will be self motivated, focused and results orientated.

Zeneca Pharmaceuticals is an equal opportunities employer, offering competitive salaries and employee benefits.

To apply, please send a comprehensive CV or telephone 01625 512290 for an application form quoting Ref KJA/PH64 to the Personnel Department, Zeneca Pharmaceuticals, Hurdsfield Industrial Estate, Macclesfield, Cheshire SK10 2NA.

All applications to be received, by 26.5.95.

RECORDS MANAGER/ARCHIVIST

Sanofi Research Division is the worldwide R & D organisation for a leading healthcare company, with research centres in France, UK and USA. It has a strong product pipeline with a number of exciting development candidates.

Following a review of Alnwick Research Centre's needs to manage and control scientific data in compliance with applicable regulatory requirements a vacancy for a Records Manager/Archivist has arisen in the Records Management Section.

This position will be responsible for the management and operation of the Research Centre's archives, as well as the development and coordination of a department-based records retention and management programme.

The main responsibilities will be in maintaining the Drug Safety Evaluation archives, and establishing appropriate archives for all other scientific and support data, in compliance with applicable GLP and GMP regulations.

Additional responsibilities will require the successful applicant to maintain an acute awareness of modern trends and technologies in records management and scientific archives practice, in order that they can advise management of the most effective method for storing and retrieving information.

A first degree in life sciences and a post graduate diploma in information sciences/records management, or prior experience as a scientific archivist is desirable.

Our modern research facilities are located at Alnwick, Northumberland and provide a pleasant working environment, ready access to an unspoiled rural location, whilst still within easy reach of both Newcastle and Edinburgh.

To apply, please send a detailed C.V. to:
Senior Personnel Advisor, Human Resources, Sanofi Research Division, Alnwick Research Centre, Willowburn Avenue, Alnwick, Northumberland NE66 2JH.

sanofi & WINTHROP
Teagasc - The National agency for food and agricultural research is, with the support of EU Structural Funds, expanding its Food Research Programme in cheese, meats, food ingredients, prepared consumer foods and fresh foods.

Applications are invited from graduates in CHEMISTRY, BIOCHEMISTRY, MICROBIOLOGY, FOOD TECHNOLOGY, ENGINEERING or related disciplines.

Essential: An honours university degree or equivalent in a relevant discipline together with appropriate experience in research or industry and/or a relevant postgraduate qualification.

Appointments may be on a permanent and pensionable or on a fixed-term contract basis. The posts will be located at The National Dairy Products Research Centre, Moorepark, Fermoy, Co. Cork or The National Food Centre, Dunsinea, Castleknock, Dublin 15.

Further details and application form may be obtained by phoning or writing to: Ms. Muriel O'Hagan Personnel Department Teagasc Head Office 19 Sandymount Avenue, Dublin 4, Ireland. Telephone: (00 353 1) 6688188 Fax: (00 353 1) 6688023 E mail: Personnel@HQ.Teagasc.ie

Latest date for receipt of completed application forms is Friday 19th May 1995. Teagasc is an equal opportunities employer. Canvassing will disqualify.

A technician with immunological experience is needed to join a team working on T cell epitopes of various antigens/allergens. The person should have experience and practical skills in cell culture, T cell cloning and lymphocyte activation. Other techniques such as FACScan, Western blotting and ELISA would be an advantage.

The Department of Immunology at University College London currently has approximately 50 members, spanning many areas of basic and clinical Immunology. There are two to three seminars each week and a strong teaching and Ph.D. programme.

Because of the techniques involved, especially the T cell cloning, some weekend work will be required. Holidays must be arranged to take into account the care of the long term cell lines and the availability of patients who are only suitable for study during the months of May to October.

Finance is available for one year with a possibility for a second year.

Salary scale Technician grade C spine point 15. Total £16,530 to include Superannuation, National Insurance and London Weighting.

Applications, including CV should be sent to: Dr. Jonathan Brostoff, Department of Immunology, Middlesex Hospital, London W1P 9PG. Tel: 0171 380 9359.

Working toward Equal Opportunity
TECHNICIAN
Menopause Research Unit
(Two Year Post)

Applications are invited for the post of Research Technician Grade D to join the rapidly expanding Menopause Research Unit which was established in the Department of Obstetrics and Gynaecology in 1990.

The postholder will provide support for a research project investigating the effect of hormone therapies on various morphological and biochemical aspects of the endometrium. Experience in the following techniques is essential: tissue blocking, microtomy, histological staining, immunohistochemistry. In addition, experience in in situ hybridisation and gel electrophoresis would be advantageous.

Applicants should possess BTEC/HNC or Diploma, or equivalent, and have at least 7 years relevant experience (including any training period).

Salary Grade D - £11,399 to £13,610 pa.

Written applications, a CV and the names and addresses of two referees to: Mrs J Jackson, Chief Technician, Department of Obstetrics and Gynaecology, Clinical Sciences Building, Leicester Royal Infirmary, PO Box 65, Leicester, LE2 7LX. Informal enquiries may be made to Dr M Habiba on 0116 252 3158. Closing date for applications is 18th May 1995.

Towards equal opportunities

Promoting excellence in University teaching and research
SCHOOL OF HOSPITALITY, FOOD AND PRODUCT MANAGEMENT - NUTRITION RESEARCH CENTRE

RESEARCH SCHOLARSHIPS IN NUTRITION (2 Posts)
Bursary £6,600 p.a.

Two new Research Scholarships sponsored by a leading Pharmaceutical company have just been released. It is expected that the appointments will be taken up in July 1995. The areas of research focus on diet and lifestyle in relation to healthy bowels and irritable bowel syndrome.

Applications are invited from graduates who have obtained a good degree in Nutrition, Physiology or Biomedical Science and can demonstrate the ability to work independently.

An application form and further details are available from the Human Resources Department, South Bank University, 103 Borough Road, London SE1 0AA. Tel: 0171-815 6223 (24 hour answering service).

Reference number: RS/HFPM. Closing date for applications: 26 May 1995.

An Equal Opportunities Employer.

The University of Choice
SOUTH BANK UNIVERSITY LONDON

A charity serving the community through excellence in teaching and research.
We are seeking a Physicist with enterprise and enthusiasm who can combine a major role in managing the training of Clinical Scientists with making an important pro-active contribution to research and development in imaging.

Based at the Department's Newcastle General Hospital Unit, the post will involve travel from time to time to the Department's other Units/Sub-Units in the geographical area of the former Northern Region, both to ensure the effectiveness of training and to promote collaborative research and development. A current driving licence is therefore essential.

The post offers the opportunity to join a progressive regionally organised and managed Department and to live within very easy reach of beautiful countryside and coastline.

Applicants should hold a first or second class honours degree (or equivalent) in Physics or a related subject and have at least seven years experience in Medical Physics including substantial experience in one or more imaging modalities. Teaching/training experience and a demonstrable record of achievement (or the potential for its attainment) in research and development are also important.

Prospective applicants wishing to discuss the post informally may contact Dr. Roger Harrison on Tyneside (0191) 273 8811 ext. 22512.

Application form and job description are obtainable by telephoning Tyneside (0191) 273 5184 (24 hour answerphone service) quoting ref. 9/95.

Closing date: 19th May 1995.

HORTICULTURE RESEARCH INTERNATIONAL
THE DOCUMENT COMPANY
RANK XEROX

Post in: Applications of Mobile and Ubiquitous Computing

The Rank Xerox Research Centre, Cambridge Laboratory, was founded in 1987. Originally known as EuroPARC, it is now part of an expanding European based research centre which includes a second laboratory opened in Grenoble in 1993. RXRC Cambridge carries out interdisciplinary research in the development and use of technologies for supporting distributed organisations, with a strong emphasis on the human and organisational aspects of technology in use. The laboratory has close links with a number of divisions of Xerox and Rank Xerox, and also collaborates with other research groups in the UK, continental Europe and the US.

We are exploring a new frontier-applications for tiny, portable, wireless computers. To help with this exciting and demanding work, we are seeking a computer science researcher with a strong background in distributed systems and user-interface design to join our multi-disciplinary team. The successful candidate will have substantial practical experience designing, building and evaluating interactive applications for non-technical users.

Please send your CV and details of two referees to: Sian Wicklow-Scott, Rank Xerox Research Centre, 61 Regent Street, Cambridge CB1 2AB, England.

Closing date for applications is 31 May 1995.
MediSense is a rapidly expanding Biotechnology Company with an International presence and reputation for innovation. We have combined advanced biosensor and instrumentation technology to produce personal health care products that enhance the quality of life.

MediSense is a recent winner of the Queens Award for Technological achievement and our purpose is to continuously strive for better personal Health Care Management.

**Development Scientists**

We currently have a requirement for 4 scientists to join our talented and expanding R & D team. As part of a small, highly skilled multi-disciplinary team, you will be involved in all aspects of biosensor development, from project inception right through to product launch.

Candidates for the position should be qualified to degree level in a science related subject and will either be a recent graduate or have 1-2 years' research and development experience. The product development teams draw skills from engineering, chemistry, electrochemistry, haematology and material science as required.

We offer a competitive salary for the positions as well as a contributory Company Pension scheme, an annual bonus, Stock Purchase scheme, 25 days' holiday and an on-site subsidised restaurant.

If you are interested in the positions and would like to apply please send a detailed CV to: Miss T Casbon, Personnel Assistant, MediSense Contract Manufacturing Limited, Units 3/4, 14/15 Eyston Way, Abingdon, Oxon OX14 1TR or telephone for an application form on (01235) 555440 ext. 2099.

MEDISENSE ®
DEDICATED TO PERSONAL HEALTH MANAGEMENT
University Lecturers and University Assistant Lecturers

Vacancies exist for University Lecturers or University Assistant Lecturers in the following fields to take up appointment on 1 October 1995, or as soon as possible thereafter. Those appointed will be expected to play their part in the general teaching of the recently introduced four-year course leading to the B.A. and M.Eng degrees.

1. Electrical Drives / Communications Electronics: preference will be given to a person with a record of excellence in research in one of these fields and an ability to teach with enthusiasm in the general area of electrical and electronic engineering. The person appointed will be expected to teach in the four years of the undergraduate course.

2. Information Engineering: to join the Information Engineering Division. Preference will be given to candidates who have general expertise in computing, and specialist skills in one of the following areas: Computer vision, speech processing, robotics, neural networks, software engineering and computer communications. The person appointed will be expected to develop a significant research activity and to contribute strongly to undergraduate teaching.

3. Nuclear Engineering: preference will be given to a person with an active research record in the general field of thermodynamics and fluid mechanics and who is able to offer specialist lectures on engineering topics relevant to the nuclear industry. The person appointed will be expected to maintain contacts between the Department and the nuclear industry.

4. Structural Engineering: candidates should possess expertise in some part of this field and should have experience in research and/or engineering practice. The person appointed will be expected to be active in research and to teach and give lectures in any of the four years of the Engineering Tripos, to assist in laboratory classes, design exercises and research projects. Ability to teach in other areas such as surveying, soil mechanics, civil engineering fluid mechanics offshore engineering would be an advantage.

5. Manufacturing Engineering: to join a group engaged in teaching an innovative course in manufacturing engineering. Preference will be given to candidates with expertise in one of the following fields: automation and computer integrated manufacture, production processes, manufacturing systems. The person or persons appointed will have a strong academic background and an enthusiasm for working in a manufacturing environment as distinct from specialist engineering or management field.

The pensionable scales of annual stipends for a University Lecturer are £17,813 rising by eleven annual increments to £27,473, and for a University Assistant Lecturer £14,756 rising by seven annual increments to £19,326.

Further information and application forms may be obtained from the Secretary of the Appointments Committee for the Faculty of Engineering, Faculty Board Office, Department of Engineering, Trumpington Street, Cambridge CB2 1PZ, to whom completed application forms and a curriculum vitae should be sent so as to reach him not later than 31 May 1995. In any enquiry or correspondence it should be made clear to which vacancy it applies.

The University follows an equal opportunities policy. The University aims to achieve the highest quality in teaching and research.
MSc IN BIOSENSORS

The Department of Medicine (Clinical Biochemistry) invites applications for an MSc in Biosensors. This one year full-time modular course provides a background in the principles and technological/medical applications of biosensors and is taught by Departments from both the University and UMIST. Topics include biotransduction with enzymes, antibodies and receptors; microelectronic devices and signal processing; biocompatibility and interfacing of biosensors for applications to, eg, medicine and the food industry. A 25 week full-time research project is a key part of the course which is suitable for candidates with a degree in the biological, biomedical or physical sciences and is open to British, EEC and overseas students. Three EPSRC studentships are available and the Training and Enterprise Council has allocated four awards for graduates who have been unemployed for greater than six months.

Further details and application forms are available from Dr W. R. Robertson, Department of Medicine (Clinical Biochemistry), University of Manchester, Hope Hospital, Eccles Old Road, Salford M6 8HD, UK. Fax: 0181 787 7432. Closing date Monday July 3 1995, expected interview date July 17 1995.
Commissioning Editor
Educational Publishing

Cambridge University Press is a leading educational science publisher. We are looking for a high calibre Commissioning Editor to further develop our list of science textbooks for the primary, secondary, and F.E. markets.

The ideal candidate will be a self-starter, able to commission new rides and manage large scale publishing projects, and will be required to deliver quickly and to budget. This person will be expected to maintain the highest standards, working with and motivating a wide range of people.

The qualifications and experience required are a degree in a scientific subject, at least two years' experience of commissioning and a proven track record of project management.

Terms and conditions are excellent and include a competitive salary, flexitime and non-smoking environment. Interviews will be held in Cambridge. Please write with a full c.v. quoting current salary to Christine Lawless, Press Personnel Director, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU.

CAMBRIDGE UNIVERSITY PRESS
UNIVERSITY OF GLASGOW

Engineering Research Scholarships

Applications are invited for 11 Research Scholarships in Engineering. These scholarships will support outstanding individuals for three years. To qualify for a scholarship, applicants should possess a First or Upper Second Class Honours degree in an appropriate subject. The scholarships provide a maintenance allowance of £5,500 per annum along with payment of tuition fees at the home student rate and will be available for all areas of research in the departments listed below:

Aerospace Engineering
Civil Engineering
Electronics & Electrical Engineering
Mechanical Engineering
Naval Architecture & Ocean Engineering

Application forms are available from, and should be returned to, Clerk of the Faculty of Engineering, University of Glasgow, Glasgow G12 8QQ. Email: J.Simpson@eng.gla.ac.uk  Telephone: 0141 330 4362 not later than 31 May 1995.

TRAIN AS A MEDICAL PHYSICIST

We offer:

- A one year M.Sc. in Medical Physics at the University of Aberdeen, supported by a bursary of £6,500.
- 15 months attachment as a Trainee Physicist in the Regional Medical Physics Department with a starting salary of £12,174 (award pending).
- A nationally recognised scheme of training accredited by the Institute of Physical Sciences in Medicine.
- The opportunity to train in a Department which has an outstanding reputation as a provider of first-class comprehensive services in Medical Physics and Bioengineering.

You will need

- A good honours degree in Physics or in another relevant physical science/engineering subject (or the expectation of obtaining one this summer).
- The desire to make a career in the exciting field of physical sciences applied to medicine.
- The commitment and energy to make a success of training which will combine academic and practical elements to stretch you to the full.

Interested? If so an application form and further information is obtainable by telephoning Tyneside (0191) 273 5184 (24 hour answerphone) quoting ref. 7/95.

Closing date: 16th June 1995.

NHS
Northern and Yorkshire Regional Health Authority
PHYSICS AND ELECTRONICS TECHNICIAN

We are seeking to appoint for September 1995 an experienced technician to work in this prestigious and exceptionally well-resourced secondary school in Dubai.

The post will involve preparing equipment within the science department and the maintenance and repair of electronic equipment throughout the school.

Candidates would be expected to have had experience of preparing materials for students up to A-level physics and hold an appropriate BTEC, HNC or City and Guilds qualification. Experience of working with Apple Macintosh or PC's will be an advantage.

FINANCIAL PACKAGE
Exceptional financial package includes tax-free salary, annual gratuity, excellent standard of accommodation, medical care, life insurance, annual return air fare and children's school fees.

HOW TO APPLY
Please apply by 21 May by fax or airmail, with CV and details of two professional referees. Selected applicants will receive further information and will be invited to submit a letter of application prior to short-listing.

RASHID SCHOOL FOR BOYS
(Under the aegis of the Government of Dubai) Headmaster: John Heney
Telephone: (9714) 361300, Telefax: (9714) 361407
PO Box 2861, Dubai, United Arab Emirates
THE ONLY BORING THING YOU’LL EVER HAVE TO DO AS AN ARMY ENGINEER, APPLY FOR THE JOB

As an engineer in the British Army you can expect to be faced with a fresh and exciting challenge for your skills every single day of your career.

You can expect to be setting up vital communications networks, resettling refugees, neutralising underwater mines; keeping helicopters operational, rebuilding hospitals and providing disaster relief to overseas countries.

You can expect to obtain Chartered Engineer status by your late twenties. And you can expect never to be bored. Can we expect to hear from you?

Sorry. This is the boring bit. For more details post the coupon to Army Officer Entry, Freepost 4335, Dept. 2330, Bristol BS1 3YX or telephone 0345 300 111 quoting ref 2330. The Army is an Equal Opportunity Employer.

**Research Assistant**
(18 month fixed term appointment)

We have a vacancy for a Research Assistant as part of the Human Capital and Mobility (HCM) Programme on "Development of Infrared Synchrotron Radiation and Applications to Condensed Matter Studies".

The successful candidate, who must be a non-UK citizen, will play a vital role in the research programme of several of the UK and EU users on our Synchrotron Radiation Source for reflection-absorption infrared spectroscopy and other experiments, necessitating regular visits to other Laboratories in the HCM network (in particular Italy and France). This is the only such facility in the UK and one of only a few similar facilities world-wide.

**QUALIFICATIONS AND EXPERIENCE** Candidates should have a degree (or equivalent) preferably to Ph.D. level with 2 years experience of work in some or all of the following activities: infrared spectroscopy; surface science and the use of synchrotron radiation. The Laboratory offers excellent working conditions.

**APPLICATIONS**
Further information is available from Dr P Hollins (fax 01734 311610 or e-mail P.Hollins@reading.ac.uk). Application forms may be obtained quoting reference DL317 from: The Personnel Office, Daresbury Laboratory, Warrington, WA4 4AD or tel 01925 603467 (24 hour answering service).

Closing Date: 18 May 1995

The Council is working towards equal opportunities and operates a non-smoking policy.

COUNCIL FOR THE CENTRAL LABORATORY OF THE RESEARCH COUNCILS.
THE LEICESTER ROYAL INFIRMARY NHS TRUST
Medical Physics Department

CLINICAL SCIENTIST
Grade B 8-10 £16,019 to £17,326 pa

We are seeking an enthusiastic physicist to join the Radiation Services Division of the Department of Medical Physics. The department is a joint NHS/University department, based at the Leicester Royal Infirmary, which is a major teaching hospital. Part of the continuing development currently includes the construction of a new Oncology Centre.

The successful candidate will be based in the radiotherapy physics section of the division, and the duties of the post will involve dosimetry, treatment planning and quality control. In addition, the post holder will also be expected to participate in the nuclear medicine service. There will also be opportunities to contribute to the research and development activities of the division, which also includes MRI physics, image analysis and radiation protection. Opportunities exist for registration for a higher research degree.

Prospective candidates are encouraged to discuss the post with Dr David Bonnett, Head of Radiation Service. Tel: (0116) 258 6750. Informal visits are also welcomed.

For an application form and job description, please contact the Human Resources Department, The Leicester Royal Infirmary NHS Trust, Infirmary Square, Leicester LE1 5WW. Tel: (0116) 258 5790. Closing date: 18 May 1995.

Working towards equal opportunities
An MRC-Funded Ph.D. Studentship

Applications are invited for a studentship in the field of asthma and immunology of the lung mucosa, under the supervision of Dr Kevan Roberts and Professor Stephen Holgate.

The student will join an established group in the newly refurbished Howell immunology laboratory. The project aims to characterize mouse models of allergen-induced airway inflammation. The cellular interactions and lymphokines that are required for the induction and perpetuation of lung inflammatory responses will be investigated. The detailed analysis of the role of T cells in the model is of particular interest.

For informal enquiries please telephone Dr Kevan Roberts on (01703) 794430.

Applications, including CV with names and addresses of two referees should be sent to Dr Kevan Roberts, University Medicine, Level D, Centre Block, Southampton General Hospital, Tremona Road, Southampton SO16 6YD.

Working for Equal Opportunities

A centre of excellence for university research and teaching
RESEARCH ASSISTANT

This MAFF-funded post is available from July 1995 for a fixed period of two years, nine months, to use diet selection by cattle as a tool to investigate their nutrient requirements, and will include automatic monitoring of feeding behaviour.

Applicants should have a degree in Animal Science or a similar subject, a desire to work with cattle and an aptitude for computer collection and analysis of data.

Salary will be on the scale for Research Staff Grade 1B (£13,941 - £15,566) according to qualifications and relevant experience.

Informal enquiries about the post may be made to Professor J. M. Forbes, tel 0113 233 3053, fax 0113 233 3072, e-mail j.m.forbes@leeds.ac.uk

Application forms and further particulars may be obtained from the Personnel Office (Academic Section), The University of Leeds, Leeds LS2 9JT, tel 0113 233 5771, e-mail e.f.moran@registry.leeds.ac.uk, quoting the reference number 61/21.

Closing date for applications: 1 June 1995.

The University of Leeds promotes an equal opportunities policy. Promoting excellence in teaching, learning and research.

PAPUA NEW GUINEA
OIL PALM RESEARCH ASSOCIATION
PAPUA NEW GUINEA
UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Department of Zoology

Entomologist
Salary range: US$35,000 - 44,000

The Papua New Guinea Oil Palm Research Association is responsible for all agricultural research, other than plant breeding, associated with Papua New Guinea's oil palm industry.

The PNGOPRA working in association with Oxford University, has a vacancy for an Entomologist to head the small Entomology Section. The main areas of work include the development and establishment of biological control systems which form the basis of an integrated pest management program, and the study of the insect pollination of oil palm. One of the main functions of the Entomologist will be the training of a Papua New Guinean counterpart.

Applicants should be able to show that they have the necessary experience and qualifications to lead a small entomology research unit and train Papua New Guinean scientists and technicians. Research experience with biological control systems would be an advantage.

Salary will be in the range of US$35,000 to 44,000 and paid in PNG Kina. The contract will be for three years, to start as soon as possible. Free housing and a vehicle will be provided.

Applications, including CV and the names and addresses of three referees should be sent to: Dr J Kathirithamby, Department of Zoology, University of Oxford, South Parks Road, Oxford OX1 3PS, England. Closing date is 12 June 1995.

Aston Molecules

Aston Molecules provides drug development services to the pharmaceutical industry. These services encompass drug discovery chemistry, analytical chemistry and formulation development and evaluation. In response to increased demand for our services we are interested in strengthening and enlarging our chemistry and analytical teams. We currently have vacancies for the following positions:

**Graduate Synthetic Organic Chemists.** We are looking for graduate organic chemists who wish to pursue a career in medicinal chemistry.

**Combinatorial Chemistry Research Studentship.** Aston Molecules is extending its research activities in combinatorial and matrix chemistry. We are currently collaborating with Professor David Billington; at Aston University, and there is an opportunity for a first class synthetic chemistry graduate to undertake research in this area. The position will be one of Graduate Synthetic Organic Chemist and will register for a Ph.D. under the supervision of Professor Billington.

**Experienced Analytical Chemists.** We are looking for analytical chemists who have had previous experience of HPLC in a pharmaceutical environment.

If you are interested in any of the above positions please send a full CV to: Mrs Sylvia Whitfield, Aston Molecules Ltd, 10 Holt Court South, Aston Science Park, Birmingham B7 4EJ, UK.

The University of Reading
Insecticide Resistance Action Committee funded

**Insect Toxicologist**

A research assistant (1B scale) is required in our School of Animal & Microbial Sciences for a period of eight months to work on the establishment of base-line data for a range of insecticides against pest lepidoptera using bioassay types. You should ideally have toxicological, entomological or pest management experience. The salary rate is £13,941 p.a. and the post is available immediately. Further details and application forms may be obtained from Personnel Officer, The University of Reading, Whiteknights, P.O. Box 217, Reading RG6 2AH, telephone (01734 318754). Informal enquiries to Dr. A R McCaffery (Tel: 01734 318464; Fax 01734 310180; email: a.r.mccaffery@reading.ac.uk). Please quote Ref. No. R9527.

A centre of excellence for University teaching and research.
Applications are invited for the post of Professor of Physics, for appointment from September/October 1995. Salary will be on the Professorial scale (not less than £37,300), and will be commensurate with the successful candidate's qualifications, experience and achievements. Preference will be given to candidates with proven records of successful research in nonlinear optics, quantum optics and optoelectronics, with an emphasis on devices and systems, but candidates working in the fields of laser-plasma physics, semiconductors, or solid state and surface spectroscopy will also be considered.

Applications (12 copies), including a curriculum vitae and the names and addresses of three referees, should reach the Personnel Officer (C1886), University of Essex, Wivenhoe Park, Colchester CO4 3SQ by 31st May 1995. Further particulars may be obtained by telephoning Colchester (01206) 872462 (24 hours).

Working Towards Equal Opportunities
MAFF POSTGRADUATE STUDENTS

Studentships in the following areas of research are available for 3 years from Autumn 1995 at SAC's centres of study at Aberdeen, Auchincruive and Edinburgh.

ABERDEEN
1. The effect of cultural conditions on the ability of embryos to withstand cryopreservation and their subsequent development (Dr P J Broadbent). Ref: 25/95.
OR Detection of a pregnancy associated glycoprotein fluids of domestic livestock by radioimmunoassay or enzyme techniques for the diagnosis of pregnancy and foetal number (Dr F E Gebbie). Ref: 26/95.

3. The determinants of farmed salmon price developments in the EU. (Dr B J Revell). Ref: 28/95.
OR Hedonic pricing and the quality of foodstuffs (Dr B J Revell). Ref: 29/95.

Tel. No: (01224) 480291 for the above.

AUCHINCRIUVE
1. Propensity to fatness in poultry: a development approach (Dr B Speake). Ref: 30/95.

2. Control of cereal leaf diseases using film-forming polymers (Dr D R Walters). Ref: 31/95.

Tel. No: (01292) 520331 for the above.

EDINBURGH
1. Enhancing the effectiveness of invertebrate predators in arable crops by the use of semiochemicals (Dr K A Evans). Ref: 32/95.

2. Analysis of pathogenesis and parasitism in the eyespot fungus (Dr M Hocart). Ref: 33/95.
OR Optimising nitrogenous fertiliser inputs: the implications of crop variability (Dr P van Gardingen). Ref: 34/95.

Tel. No: (0131) 667 1041 for the above.

If you are interested in the above Studentships you must have, or expect to gain, a first or upper second class honours degree in an appropriate scientific discipline and would register for a higher degree.

You are welcome to contact the sponsor at the relevant telephone number for more information.

Application forms and further particulars may be obtained from the Personnel Unit, Scottish Agricultural College, West Mains Road, Edinburgh EH9 3JG. Telephone: (0131) 535 4343 (24 hour answering machine). The closing date for applications is 18 May 1995. Please quote reference of studentship you are interested in.

DEPT OF COMPUTER SCIENCE & APPLIED MATHEMATICS

LECTURESHIPS (TWO POSTS)

Applications are invited from candidates with excellent academic qualifications and a proven record of research. Successful candidates will be expected to make a substantial contribution to the research activities of the Neural Computing Research Group, in the area of neural computing, or a related area concerned with advanced information processing, and to contribute to the teaching activities of the Department.

Terms of appointment
Appointments will be for an initial period of three years with the possibility of renewal or subsequent transfer to continuing appointments. Salaries within and up to the maximum of the range: £14,756 - £25,735 per annum, and exceptionally to £28,756 per annum (Lecturer Grades A and B).

Application forms and further particulars may be obtained from the Personnel Officer (Academic Staff), quoting Ref.9508/32, Aston University, Aston Triangle, Birmingham B4 7ET.
Tel: 0121359 0870 (24 hour answerphone); Fax: 0 121359 6470; EMAIL: b.a.power@aston.ac.uk.
Closing date for the receipt of applications is 19th May 1995.

ASTON UNIVERSITY
CLINICAL RESEARCH ASSOCIATE
Part-Time (3 days per week)

Pasteur Mérieux MSD is a European market leader in the field of vaccines. The UK Medical Department located in Maidenhead, Berkshire is expanding its activities and has a requirement for a part-time Clinical Research Associate.

The position will report to the Head of Clinical Research and Pharmacovigilance and will work within a small team.

Main responsibilities will include the day to day management and monitoring of clinical studies of Phases II to IV to GCP standards.

Applicants should have a minimum of 2 years' experience of monitoring studies to GCP requirements working either in the pharmaceutical industry or with a CRO. We are looking for someone who is willing to travel within the UK and to France. In return we offer a competitive salary and full use of a company car.

Pasteur Mérieux MSD

Please send your CV to Mrs Lis Thompson, Pasteur Mérieux MSD Ltd, Clivemont House, Clivemont Road, Maidenhead, Berkshire SL6 78U
Applications are invited from graduates with a good Honours degree and an interest in immunology/virology to join a group working on cytotoxic T cell responses to Epstein-Barr virus infection. The project, funded for three years by MRC, will involve the molecular analysis of effector T cell-target interactions. The successful candidate will have the opportunity to register for a Ph.D.

Salary range up to £13,941 a year.

Informal enquiries to Professor A. B. Rickinson, Institute for Cancer Studies, The University of Birmingham, Edgbaston, Birmingham B15 2TJ. Tel: 0121414 4492.

Application forms (returnable by 26 May 1995) and further particulars available from the Director of Staffing Services, The University of Birmingham, Edgbaston, Birmingham B15 2TT, telephone 0121 414 6483 (24 hours), E-mail: M.W.Jones@bham.ac.uk quoting reference M12791/95.

Working towards equal opportunities.

UMDS
GUY’S AND ST THOMAS’S MEDICAL AND DENTAL SCHOOL
(University of London)

Division of Immunology Guy's Campus

**SENIOR CHIEF LABORATORY SCIENTIFIC OFFICER (GRADE 4)**

required for an administrative and senior technical role associated with the research and teaching activities within the Division. The postholder is expected to advise and oversee matters related to laboratory management and the provision, operation and maintenance of equipment for immunological and molecular biology research. The appointee will also assist with the supervision of LSO, Research Assistant and secretarial staff, process incoming invoices and monitor departmental budgets. Applicants should hold an HNC/D or degree (or equivalent) and have laboratory or comparable industrial experience. Salary range £22,799 - £25,648 pa + £1,952 pa LWA.

For a job description which contains details about the application procedure, please call 0171-922 8049 (24 hours) quoting reference G/IMM/439. Closing date for receipt of applications: 26 May 1995.

Equality of Opportunity is School Policy
UNIVERSITY OF CAMBRIDGE
Institute of Biotechnology

CHIEF LABORATORY TECHNICIAN

The Institute of Biotechnology is an internationally renowned centre of excellence and comprises a young, enthusiastic group of scientists with expertise in the physical, chemical and biological sciences.

Applications are invited from individuals with the skills, initiative and foresight to lead the development of technical services in the Institute. The ideal candidate will be qualified to degree level or equivalent with a background in an appropriate science or technology, and will be expected to develop a knowledge of instrumentation and the day-to-day management of the Institute’s computer network. Experience of working in a modern research environment is essential.

This is an Assistant Staff post of the University with 33 days annual leave on the following salary scale: £14,308 - 16,107.

Please send applications in duplicate, with a full CV, the names, addresses and phone numbers of 3 referees to Dr Geraldine Rodgers. Closing date for applications is 17 May 1995.

The University is an equal opportunities employer and aims to achieve the highest quality of teaching and research

CSL
CENTRAL SCIENCE LABORATORY

FIELD ECOLOGIST
Starting salary from £11,138 Ref: CSP 1360

The Central Science Laboratory (CSL) is a Science based Executive Agency of the Ministry of Agriculture, Fisheries and Food (MAFF) and is concerned with environmental and food safety. In 1996 we will be relocating to a purpose built complex near York. Until then we have a vacancy for a Field Ecologist within CSL's Conservation and Environmental Protection Group based at Worplesdon, Surrey. This is a fixed term appointment for 12 months with the possibility that it could subsequently be extended or made permanent.

The successful applicant will be a member of an interdisciplinary team investigating the problems of establishing new woodlands under the Farm Woodland Premium Scheme. He or she will undertake field and laboratory experiments to determine means of reducing damage to young trees by rabbits and other mammals. This will entail assessing damage to trees, monitoring mammal activity in plantations by live trapping, evaluating the efficacy of tree mulches and tree protectors, and sampling bark for biochemical analysis. The post holder will be required to supervise staff and liaise effectively with scientists from other disciplines.

CSL is looking for applicants who are well motivated, and used to working in the field either alone or as part of a team. Candidates should hold a degree in ecology, forestry or related discipline and, ideally, have recent research experience in one or more of the following fields: British mammals, silviculture and botanical monitoring. The possession of data handling and presentation skills would be an advantage. A clean driving licence is essential.

For an application form and job description please telephone (01753) 534626, ext 516. This is an answer phone service for which you must quote the reference No and clearly state your name and address. Should you require further details, please contact Angela Hutchinson or Lynn Bucknell on (01753) 534626, ext 302 or write to CSL, London Road, Slough SL3 7HJ.

Closing date for all applications will be 19 May 1995.

CSL is an Equal Opportunities Employer.
The University is enhancing its current system of part-time Departmental Safety Officers by the appointment of a full-time Area Safety Officer for the Clinical School. The appointment will be for a period of three years. The Clinical School includes 17 academic departments located on several sites. The holder of this new post, who will report to the Clinical Medicine Board through the Clinical School's Director of Planning and Development, will be responsible for advising on health and safety matters and monitoring and assisting in the implementation of the individual departments' safety policies which, in turn, reflect the policies of the University.

The successful candidate will have a good first degree in a biosciences subject. A higher degree and/or membership of the Institute of Occupational Safety and Health would be advantageous. Previous experience of research and an awareness of and interest in safety in a research environment is essential. Good communication skills will be necessary and computer literacy is desirable.

Further details may be obtained from Dr Gary G. Fox, Medical School Offices, University of Oxford, John Radcliffe Hospital, Headington, Oxford OX3 9DU, tel 01865 221690, fax 01865 750750. Applications (6 copies), in the form of a letter including a CV and the names and addresses of three referees, should reach the Medical School Offices by 16 June 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

POSITIVE ABOUT DISABLED PEOPLE

OPPORTUNITIES WITH THE INTERNATIONAL INSTITUTE OF BIOLOGICAL CONTROL

The International Institute of Biological Control (IIBC) is an Institute of CAB INTERNATIONAL, an intergovernmental organisation that provides scientific services and information for agricultural and environmental protection throughout the world.

The Institute is a leading centre for research, training, information and policy support in the development of biologically-based pest management. Headquartered in Ascot, Berkshire, UK, and with Stations in Trinidad, Kenya, Pakistan, Malaysia and Switzerland, IIBC staff presently help national programmes in over 50 countries in the biological control of insects, weeds and disease, and in the development of sustainable integrated pest management (IPM) systems: IIBC's activities depend on obtaining funding from a wide range of governments, NGOs, development assistance agencies and private institutions.

As part of our expanding activities, we are seeking candidates from an international field with relevant experience for the following two positions:

ASSISTANT DIRECTOR
PROGRAMME DEVELOPMENT
(based in Ascot)
Salary in the region of £30 - £35k per annum

Identifying needs, seeing out new ideas and opportunities and developing strong, production links with collaborators and sponsors is vital to our future. We are seeking a talented scientist with an entrepreneurial flair and a sympathy for the problems faced by developing countries.

The candidate should have a background in pest management, conservation biology or population ecology and experience in biological control research and application. She/he should have a successful record of developing and attracting funds for imaginative projects, international experience (particularly in developing countries), and talent for managing people and science in a multicultural setting.

SCIENTIST IN CHARGE - KENYA STATION
Salary in the region of £25 - £30k per annum

We are seeking a person with commitment to science and development and a record of achievement in both. She/he will be responsible for the management of the research station and its scientific programme. The candidate should have: a strong background in pest management, experience in research and application of biological control, demonstrated ability for management of scientific programmes, and at least 7 years' experience in relevant applied science in developing countries.

Based at the National Agricultural Research Centre, near Nairobi, the person appointed will be expected to travel within Kenya and the region for project management, and the establishment and maintenance of links with national programmes and funding agencies. She/he will work closely with CABI's Regional Office for Africa in Nairobi.

As well as the salaries quoted, both appointments will attract a package of benefits commensurate with CABI's status as an international organisation.

Applications in the form of a full CV with a covering letter should be sent to Larry Poole, Personnel Department, CAB INTERNATIONAL, Wallingford, Oxon OX10 8DE, United Kingdom. Fax +(0149133508) no later than 30 June 1995.

CAB INTERNATIONAL
CENTRE FOR AGRICULTURE AND BIOSCIENCES INTERNATIONAL

An intergovernmental organization providing services worldwide to agriculture, forestry, human health and the management of natural resources
THE UNIVERSITIES OF BIRMINGHAM AND WOLVERHAMPTON

RESEARCHERS IN THE DESIGN OF HIGH PERFORMANCE MACHINE SYSTEMS

Two three year posts are available on a DTI / EPSRC Link programme relating to rapidly developing areas of motion control technology, which is the enabling technology for a new generation of manufacturing systems for the 21st Century.

The programme is a collaborative venture between the Universities and the industrial companies of Brintons Ltd, Electrocraft Ltd, Robotec Ltd and Trio Motion Technology Ltd.

The posts are appropriate to either Science or Engineering graduates or postgraduates with a high level of computer literacy and with interest in the development of software design aids. Modelling and simulation of dynamic systems will form a key role in the programme. There is a possibility of further employment with the participating companies at the end of the programme and the initial salary will be between £13,941 and £17,813 depending upon qualifications and experience.

Application forms (returnable by 23rd May 1995) and further particulars available from the Director of Staffing Services, The University of Birmingham, Edgbaston, Birmingham B15 2TT, telephone 0121 414 6483 (24 hours), E-mail: M.W.Jones@bham.ac.uk quoting reference G19062/95.

Working towards equal opportunities.

The University is an exempt Charity which exists to advance learning to the highest level for the benefit of its students and society at large.

Part-Time Teaching Opportunities

The Open University is the largest University in Britain, with over 140,000 students. The Science Faculty offers courses within and across the disciplines of Biology, Chemistry, Earth Sciences and Physics and Science Education, of which the two so far covered in the HEFCE Quality Assessment exercise - Chemistry and Earth Sciences - have both received 'excellent' ratings.

Our courses are tutored by over 1,500 local tutorial and counselling Staff who work within the University's 13 regions. These tutors teach by correspondence, face-to-face tutorials and day schools, some laboratory-based; other means of distance teaching using new technology methods are under development.

To accommodate increasing student numbers, the Science Faculty is seeking new part-time tutors for 1996 and beyond. If you have a good honours degree or equivalent in a scientific discipline, and preferably some experience of teaching science in higher education, we would be very interested to hear from you.

For details please send your name and address on a postcard to: The Tutors' Office (Ref: NS), The Open University, PO Box 47, Milton Keynes, MK7 6BJ.

Are you interested in tutoring for a week or two at a summer residential school?

Appointments for 1996 are not made until the end of this year, but your name can be put on a mailing list for information if you write to the Residential Schools Tutors' Office (Ref NS), The Open University, PO Box 82, Milton Keynes MK7 6AU

THE QUEEN'S UNIVERSITY OF BELFAST  
School of Chemistry

LECTURESHIP IN ANALYTICAL CHEMISTRY

This new post has been established from 1 August 1995 or such other date as may be arranged to strengthen research and teaching in analytical chemistry and in the application of analytical techniques to environmental chemistry in the widest sense.

Applicants must have an honours degree or equivalent in a chemistry-related subject, a Ph.D. or equivalent with a significant chemical content, research publications and must provide evidence of ability to conduct a high quality, independent experimental research programme in an area of analytical chemistry. They must also have some teaching experience at degree level. A minimum 2.1 honours degree or equivalent in a chemistry-related subject, a Ph.D. with a significant content of analytical chemistry, teaching experience in chromatography and other separation techniques, several years post Ph.D. experience, a substantial number of research publications and an established high quality, independent research programme in analytical chemistry are desirable.

Informal enquiries to Dr Malone, Director of School (ext 5418).

Salary scale: Lecturer Grade A: £14,756 - £19,326, or Grade B: £20,133 - £25,735 with eligibility for USS. Assistance with relocation as appropriate. Further particulars (please quote ref: 95/NS) are available from the Personnel Officer, The Queen's University of Belfast BT7 1NN, Northern Ireland. Tel: (01232) 245133, ext 3044/3246. Fax: (01232) 324944/ 310629. Closing date: 26 May 1995.

The University is a charity, established in 1845 to advance education. Committed to an Equal Opportunities policy and selection on merit, it welcomes applications from all sections of the community. Under its affirmative action programme it particularly welcomes applications from women for academic posts. [1976-056 (1995) : 76]
Molecular Biologist
HRI - Wellesbourne

Molecular Biologist required to assist in the development of molecular genetic analysis of nutrition and morphogenesis in the cultivated mushroom *Agaricus bisporus*. Postholder will be involved in the production and use of cDNA libraries and the identification of agronomically significant genes in this economically important crop species.

Qualifications: BSc in Microbiology, Genetics or related subject. Experience in fungal genetics and/or molecular cloning techniques would be advantageous.

Salary: £11,361 - £20,063 per annum; initial salary determined by qualifications and experience.

hri
HRI is an Equal Opportunities Employer.

HORTICULTURE RESEARCH INTERNATIONAL
Wealth Creating Products of Plants

Call For Research Proposals

In recognition of the potential contribution to UK wealth creation from producing raw materials for industry from plants, both for the agricultural sector in the profitable use of land surplus to current food production needs, and for end-user industries of potential raw materials, the BBSRC announces a new co-ordinated research initiative - Wealth Creating Products of Plants (WCPOP).

WCPOP will support research to overcome generic technological and scientific knowledge barriers to the economically viable production of industrial products from plants, eg carbohydrates, lipids, biodegradable polymers eg polyhydroxybutyrate, fibres, proteins, secondary products etc. Research on all classes of such products will be considered although the potential for significant wealth creation will be a key criterion for selection.

This BBSRC co-ordinated initiative will be open to scientists from Government Research Establishments and Agencies, and Institutes and Units of other Research Councils on the same basis as scientists in universities and BBSRC Institutes. Funds will be allocated through open competition.

The Council is seeking applications for funding in the above areas; proposals for interdisciplinary teams are particularly encouraged where appropriate. Proposals should be submitted on the standard BBSRC application form (RGA 1) which can be obtained, along with further particulars from Mr Robert Munn, Tel: 01793 414655 or E-mail: robert.munn@bbsrc.ac.uk.

The closing date for receipt of full applications is: 12 June 1995.

AH MARKS

Investing in people, plant and products while emphasising quality, safety and environmental matters is key to our continuing improvement in efficiency and competitiveness.

**Registration Specialist** - Agrochemicals
£ attractive + benefits

Reporting to the Regulatory Affairs Manager, your responsibility will be to maintain existing registrations and obtain new registrations of the Company's products in specified territories. Working closely with technical and commercial personnel within both the Company and its customers, you will prepare detailed product dossiers for submission to government agencies worldwide.

Ideally a science graduate, you will have a knowledge of information technology, an ability to work as a member of a team and a working knowledge of one or more foreign languages. The job will involve a certain amount of overseas travel.

Your starting salary will reflect depth of relevant experience and will not be a limiting factor for the exceptional candidates. The generous benefits package includes the equivalent of twenty eight days' annual leave plus statutory holidays, profit related bonus scheme and pension plan. Please apply in writing (quoting salary) to: Ted Johnson, Human Resources Manager, A H Marks and Company Limited, Wyke, Bradford BD12 9EJ.
LECTURESHIP IN CIVIL ENGINEERING

Applications are invited for the above post to strengthen an internationally recognised research group in the field of computer simulation of particulate materials. The current activities of the group are focused on the micromechanics of many-bodied particle systems and there is interest in extending the scope of the research to embrace problems of mass transport involving diffusion and fluid flow in porous and particulate media.

Candidates should have an outstanding record of research in a relevant field of engineering or science. The person appointed will be expected to contribute to the teaching of geotechnics, fluid mechanics or civil engineering materials.

Informal enquiries may be directed to Professor C.L. Page or Dr C. Thornton (Tel: 0121359 3611 Ext. 4371).

Terms of appointment
Appointment will be for an initial period of three years with the possibility of renewal or subsequent transfer to continuing appointments. Salary within and up to the maximum of the range: £14,756 - £25,735 per annum, and exceptionally to £28,756 per annum (Lecturer Grades A and B).

Application forms and further particulars may be obtained from the Personnel Officer (Academic Staff), quoting Ref: 9509/32, Aston University, Aston Triangle, Birmingham B4 7ET.

Tel: 0121359 0870
(24 hour answerphone); Fax: 0121359 6470;
EMAIL: b.a.power@aston.ac.uk.

Closing date for the receipt of applications: 9th June 1995.

ASTON UNIVERSITY
DEVELOPMENT TECHNOLOGIST

BFF Nonwovens is a leading manufacturer of nonwoven fabrics. From automotive components to filtration media, the extraordinary versatility of nonwoven materials means that new applications are constantly being identified by our Technical Nonwoven Division. Their ingenuity and imagination has resulted in major new developments which confirm our position as a leading innovator in nonwoven applications.

This position offers an excellent opportunity for a young chemistry graduate with industrial experience, not necessarily in textiles, seeking to broaden their technical skills in a commercial environment.

Reporting to the technical manager, you will work closely with sales and marketing to define customer requirements within the UK and Europe, develop suitable nonwoven products to meet these requirements and to develop specific products for specialist markets. You will also be responsible for the development and modification of new and existing products within short time scales and rigid quality standards.

To succeed you'll need an inquisitive mind and be willing to question the way in which things are done, offering practical and sensible solutions to technical problems either with the customer or within the Company.

In return you can expect excellent career opportunities, a competitive salary, comprehensive benefits package and relocation assistance if required.

Please write with full career and salary details to Andrew Savage, Personnel Manager, BFF Nonwovens, Bath Road, Bridgwater, Somerset TA6 4NZ. Telephone 01278 428500.

BFF Nonwovens
BFF NONWOVENS IS A MEMBER OF LAMONT HOLDINGS PLC.

Andaris Limited is a pharmaceutical research and development company located in Nottingham.

Andaris's business is the development of diagnostic imaging products and novel drug and gene delivery systems based on a unique microcapsule technology which has been developed in-house over the past four years.

On-site facilities include purpose-designed R&D and QC laboratories, pilot plant/process development units and a clinical production plant.

**Research Scientist** - Process Technology

Applicants are required to join a team working on microencapsulation processes. Experience of drug delivery systems, pharmaceutical formulation or pharmacy is of particular interest. The successful candidate is likely to have a Ph.D. or a degree with several years relevant experience in the pharmaceutical industry.

**Research Assistant** - Process Technology

A science graduate with at least two years experience of inhalation product testing using impingers with associated skills in analytical chemistry is required to investigate the behaviour of novel formulations of pharmaceuticals.

In return Andaris can offer a stimulating environment with attractive salaries commensurate with qualifications and experience.

Please send your C.V. in confidence to: Sandra Wood  
Administration Director Andaris Limited  
3 College Street Nottingham, NG1 5AQ  
ANDARIS  
INK CHEMIST  Avon  £14-20k
BSc / HND with 2-5 yrs exp. needed for R&D into coatings for PCBs and ink jets.

CHEMICAL ENGINEER  Essex  £20-25k
Chartered Engineer with 4 yrs+ exp. in pharmaceuticals needed for batch & continuous process plant projects.

RESEARCH CHEMIST  Surrey  £12-16k
BSc/HNC with 2-3 yrs exp. to develop a wide range of fire protective coatings.

PRODUCTION TECHNICIAN  Surrey  £10-13k
HND/C with 1-3 yrs exp. to assist in the production of immunological products.

The above vacancies are with TOP MULTINATIONAL COMPANIES and offer additional benefits. As a specialist employment agency for industry, we would also be keen to hear from industrially experienced chemists, polymer scientists and technicians who are keen to obtain top jobs in the pharmaceutical, chemical, toiletries and polymer industries.

Please send full cvs with a covering letter to:
YOUNG SCIENTIST, Westmead House,
123 Westmead Road,
Sutton, Surrey SM1 4JH

Our services to candidates are FREE and CONFIDENTIAL.
**Earmarked BBSRC Studentship In Molecular Parasitology**

An earmarked studentship is available from October 1995. The successful applicant will be registered for a DPhil degree and will undertake a three year research programme. The project is aimed at understanding how the protozoan cow parasite, *Theileria annulata*, induces the host leucocyte to express matrix metalloproteinase 9 (MMP9). We have previously shown that *T. annulata* induces a range of metalloproteinase (MP) activities when it infects and transforms bovine leucocytes (Baylis et al, 1992, *Parasitology* 105, 417-423). One of these proteinases is the bovine homologue of MMP9 (Baylis et al 1995 *Molec. Biochem. Parasitol.* 69, 211-222). Expression of MMP9 and other MPs may explain the metastatic behaviour of *T. annulata* infected cells.

The successful applicant will study the transcription factors interacting with the MMP9 gene promoter in both parasitised and non-parasitised cells. A range of molecular techniques will be employed in this study including 'bandshifts' to assay for specific DNA: protein interactions and transient transfection assays to monitor promoter activity. The student will learn practical and scientific skills in molecular biology, parasitology and tissue culture in a supportive and well funded team environment.

Applications should be sent to Dr Roger Hall, Department of Biology, PO Box No. 373, York, YO1 5YW and informal enquiries are welcome on 01904 432864.

THE UNIVERSITY OF YORK - DEDICATED TO EXCELLENCE IN TEACHING AND RESEARCH.

Hastings and Rother NHS Trust  
SCIENTIFIC SERVICES DIRECTORATE  
ST ANNE'S HOUSE  

GRADE 'B' SCIENTIST  
(£17,326 - £20,270) Full time 37 hours per week  

The Scientific Services Directorate is looking for a Grade B Scientist, with a good knowledge, and appropriate qualifications in Medical Physics in order to be able to assist the Head of Scientific Services in various of the Directorate's activities.  

The successful applicant will need to be able to work, on their own initiative and as part of a team. Activities will take them into external Trusts and organisations, as well as within Hastings and Rother.  

An understanding and knowledge of the following systems/equipment is advantageous: MRI; CT Ultrasound; Nuclear Medicine; Angiography; Mammography; Fluoroscopy and PACs / IMACs. A working knowledge of Computer Networking systems and its applications in clinical use is preferred.  

For more details and a job description, please contact Jolene Stevens, Scientific Services Directorate, St Anne's House, 729 The Ridge, St Leonards on Sea, East Sussex TN37 7PT Tel: (01424) 755255 ext 2286.  

Closing date: 1 June 1995.  

We are an Equal Opportunities Employer.  

HASTINGS & ROTHER  
NHS TRUST  
Commissioning Editors - Drug Development

If you have:
• experience of commissioning articles
• knowledge of the drug development process
• good interpersonal skills
• an ability to set and keep to tight deadlines
we want to hear from you now!

Current Drugs is expanding its range of publications. We require highly motivated editors to commission articles from scientists engaged in research and development of new drugs. A science background, experience within the pharmaceutical industry and knowledge of foreign languages would be advantageous.

Apply in writing enclosing a full CV and stating salary expectations to:
Anne Harland, Current Drugs Ltd, Middlesex House, 34-42 Cleveland Street, London W7P 6LB
Applications are invited for this newly established post, commencing as soon as possible, funded by the Migraine Trust, to help establish a Neuropharmacological Migraine Research Laboratory, associated with the Princess Margaret Migraine Clinic which is located in the Hospital. The Fellow will be expected to carry out experimental work on material obtained at post-mortem. Applicants should have had experience in recording neurogenically and pharmacologically evoked smooth muscle activity in vitro. The duration of the post is for 20 months, but is anticipated that further funding will become available.

Commencing salary £17,000 per annum inclusive of London Allowance.

For an informal discussion contact Professor Julia Buckingham (0181 846 29).

Further details available from the Director of Personnel, Charing Cross and Westminster Medical School, The Reynolds Building, St Dunstan's Road, London WG 8RP, to whom application with full curriculum vitae and the names and addresses of two referees should be sent within three weeks of the appearance of this advertisement. (Quote ref: 95/42).

CX&WMS is an equal opportunities employer and is a charity promoting medical education and research.

UWE BRISTOL

**Research Associate in Electrochemical Immuno-Biosensors**

Based within the Faculty of Applied Sciences you will join a team involved in the development of a range of disposable amperometric electrochemical biosensors fabricated by screen-printing technology. You should hold a Ph.D. in immunology and have experience in the production and purification of monoclonal antibodies and their application in analytical immunology. A detailed working knowledge of antibody/antigen binding reactions is desirable.

The post is fixed term for 18 months. We would particularly welcome applications from women, black people and members of other minority ethnic groups and disabled groups as these groups are under represented in the workforce. All applications will be considered on merit. Salary will be in the range of £13,400 - £17,700 per annum.

For further information and an application form to be returned by 25 May 1995 please ring our answerphone service on (0117) 9763 813 (Minicom users please phone (0117) 9750 424), or write to Personnel Services, UWE Bristol, Frenchay Campus, Coldharbour Lane, Bristol BS16 1QY.

INTERNATIONAL CENTRE FOR RESEARCH IN AGROFORESTRY
(NAIROBI)

NERC CASE Studentship
Resource utilisation by indigenous trees in tropical agroforestry systems

Applications are invited for an NERC CASE Studentship, leading to a Ph.D. degree, available from 1 October 1995. The project will be jointly supervised by Dr C R Black (Nottingham) and Professor C K Ong (International Centre for Research in Agroforestry, Kenya).

Candidates should be UK or EC citizens, must be prepared to spend extended periods in Kenya conducting fieldwork and should have a good honours degree (2:1 or better) in soil, plant, environmental or agricultural science. Experience of living and working in developing countries is desirable.

Applicants should send a detailed CV, together with the names of two academic referees, to Dr C R Black, Department of Physiology and Environmental Science, The University of Nottingham, Sutton Bonington Campus, Loughborough, Leicester LE12 5RD. For further information please contact Dr Black. Tel: 0115 9516337. Fax: 0115 9516334.

DEPARTMENT OF APPLIED BIOCHEMISTRY & FOOD SCIENCE

MAFF Research Studentship

Applications are invited for the above Ph.D. Studentship tenable from October 1995 to investigate the interaction of the calpain/calpastatin proteinase system with protein components of the excitation/contraction coupling mechanism in muscle from pigs of different genotype.

Applicants should have, or expect to obtain, a 1st or 2.1 Honours degree in biochemistry, molecular biology or animal science.

Applications in writing, together with a detailed CV and the names of two referees, to Ms Rosemary Reid, Secretary, Department of Applied Biochemistry and Food Science, The University of Nottingham, Sutton Bonington Campus, Loughborough, Leicester LE12 5RD. Further details can be obtained from Dr R G Bardsley. Tel: 0115 9516127. Fax: 0115 9516122. Email: Ronald.Bardsley@nottingham.ac.uk. Closing date: 26 May 1995.

DEPARTMENT OF CLINICAL LABORATORY SCIENCES

Research Assistant

A vacancy exists for a suitably qualified graduate to work on an MRC-funded research project, concerned with the characterisation of host and virological factors involved in the sexual transmission of HIV-1. The project will utilise various techniques including virus culture, EIA, PCR and sequence analysis. Experience of one or more of the above techniques would be an advantage, but is not essential, as suitable training will be given.

This post is available immediately and is funded until July 1997. Salary will be £13,941 pa, and the successful applicant may be able to register for a higher degree.

Informal enquiries may be addressed to Dr J K Ball, tel: 0115 924 9924, ext: 42332 or Dr W L Irving, tel: 0115 924 9924, ext: 44914.

Applicants should send a detailed CV, together with the names of two referees, to Louise Spry, Department of Clinical Laboratory Sciences, Division of Microbiology, Medical School, Queen's
Medical Centre, Nottingham NG7 2UH, from whom further details may be obtained. Closing date: 26 May 1995.

The University of Nottingham is a research-led institution which provides the highest quality learning environment and is committed to equal opportunities in employment.

The University of Nottingham
Lecturers/Senior Lecturers (Two posts)

Post 1 Permanent appointment - Ref JW/153
Post 2 One Year fixed term - Ref JW/154

To teach environmental and geographical sciences on the various undergraduate and postgraduate courses within the Department. Candidates will be expected to offer expertise in one or more of the following areas:- atmospheric science and pollution, pure and applied ecology, earth sciences, economic and social development, environmental policy, legislation and management, spatial information technology.

Applicants requiring further information are encouraged to contact Professor Steve Dalton, Head of Department of Environmental and Geographical Sciences on 0161-247 1600 or fax 0161-247 6318.

Salary Scale SL £19,845 - £26,223 (Bar at £23,385) L £12,756 - £21,264

For an application form and further particulars returnable by 19 May 1995 please send a self addressed envelope marked with the relevant reference number to the Area Personnel Team, The Manchester Metropolitan University, Faculty of Science and Engineering, Room EG, John Dalton Extension Building, Oxford Road, Manchester M1 5GD.

Taunton & Somerset NHS Trust
Medical Physics Department

MEDICAL TECHNICAL OFFICER
(Ref C244)
MTO 3 £14,242 to £16,661

Applications are invited from an experienced technician to work in Nuclear Medicine and Radiation Protection. Duties will include gamma camera imaging and x-ray equipment safety testing.

Minimum qualifications are HTEC/HNC or equivalent in a relevant subject. A driving licence and own transport will be an advantage.

Applications with insufficient experience may be considered for the lower grade of MTO2 (£10,821 to £13,693) with a corresponding reduction in responsibility.

The department works as a small team, delivering throughout the rural county, of Somerset.

For further information/informal discussion call Mr R. Bovill, Head of department, on 01823 342257.

Application and job description from: Personnel Department, Taunton and Somerset Hospital, Musgrove Park, Taunton TA1 5DA. Tel: 01823 342261.

Closing date for application is 19th May 1995.
Our client is a research based pharmaceutical company with its headquarters in Copenhagen. The Company, one of the pharmaceutical world leaders in its therapeutic field, is growing rapidly. Its clinical trial capacity is currently being expanded and to assist a team of clinical researchers in Copenhagen we are looking for a full time

MEDICAL WRITER

The successful candidate should have: An academic background in a life science; English mother-tongue, born in the UK or the US; A fluent pen and the ability to write quality English; Experience in report/manuscript writing and word processing.

The Medical Writer is expected to work without secretarial assistance. In principle the job is located in Copenhagen, but it might be performed from another location, from home or from one of the Company's European subsidiary offices. In such case, the candidate should be prepared to spend considerable time in Copenhagen in close cooperation with clinical study directors and other customers. The Company offers an attractive salary, commensurate with age and experience. Other benefits available according to circumstances.

If you are interested to learn more about this opportunity, please mail or fax your CV plus one or two non-confidential manuscripts prepared, to Carl Metzdorff, Management + Resources//Health Care, Avenue Louise 148, B-5, B-1050 Brussels. Tel +323-647.90.92. Fax +32-2-647.11.22.

Management + Resources//Health Care is an International Executive Search Consultancy. We have several other pharmaceutical vacancies with international research based companies: Managing Director, Benelux; International Product Manager, Scandinavian base; European Clinical Monitoring Manager, Scandinavian base; Regulatory Affairs Manager, Benelux; World Wide Product Safety Director, Scandinavian base; Pharmaco-Vigilance Manager, Scandinavian base.
PROGRAM MANAGER, DRUG MANUFACTURING OPERATION

APLIN & BARRETT LTD, an established international pharmaceutical and medical foods company who produces and sells worldwide a range of antimicrobial and other fermentation products, requires a Program Manager for drug manufacturing operations at its Beaminster facilities in Dorset.

Reporting to the Senior Manager of Manufacturing Operations, the successful candidate should fulfil the following criteria: A Ph.D. degree in biotechnology/chemical engineering, biochemistry or chemistry, at least 4-6 years management experience in manufacturing and process development for a pharmaceutical or biotechnology company, and have prior experience with regulatory compliance issues for the manufacture of bulk pharmaceuticals, especially proteins, and recombinant products.

In return for your qualifications, we offer a competitive compensation package, including company car with private mileage, private healthcare, stock options and an annual bonus.

For consideration of your achievements, please send your career details with two professional references to:

The Personnel Manager, Aplin & Barrett Ltd Clarks Mill, Stallard Street, Trowbridge, Wiltshire BA14 8HH

WHOLE BODY AUTORADIOGRAPHY SPECIALIST

Inveresk Research International (IRI) Limited, part of the SGS Group, is a major international contract research organisation providing comprehensive services to the pharmaceutical, agrochemical, industrial chemical and consumer product industries worldwide. We are located in East Lothian, close to Edinburgh, Scotland's capital city. We are leaders in Metabolism and Pharmacokinetics and have GLP validated phosphor imaging as the technique of choice for quantitative whole body autoradiography (QWBA).

We now wish to appoint an experienced WBA specialist who can maintain our impetus in development as a Study Director. The appointee will be expected to develop and expand their group into a substantial commercially viable unit and will also represent Inveresk Research at international scientific meetings.

There are not likely to be many suitable applicants for this specialist position as it requires:
- Substantial experience of WBA as a technique
- A responsible scientist with commercial and scientific drive
- Enthusiasm to succeed

Salary for this position will be dependent upon qualifications and relevant experience. Other benefits include bonus scheme arrangements, private medical cover, pension and life assurance plan membership and assistance with relocation (if applicable). If you have the expertise and personal qualities required for the above position, please apply in writing to the Personnel Department quoting reference number 0224.

IRI INVERESK RESEARCH INTERNATIONAL
Inveresk Research International Limited Tranent EH33 2NE.
THE ROYAL BOURNEMOUTH HOSPITAL
Molecular Biology Department

RESEARCH TECHNICIAN

Applications are invited from life science graduates to assist in research concerning the characterisation of the genetic lesion involved in chronic lymphocytic leukaemia. Experience of basic techniques in molecular biology is essential.

The contract is for one year to commence as soon as possible. The grade and salary will be dependent on qualifications and experience.

Informal enquiries to Mr R. Chapman on (01202) 303626, ext 4805.

Application form from The Personnel Department, Royal Bournemouth Hospital, Castle Lane East, Bournemouth BH7 7DW. Tel: (01202) 704251/704414.

Closing date: 18 May 1995.

The Royal Bournemouth Hospital forms part of the Royal Bournemouth & Christchurch Hospitals NHS Trust which is committed to equal opportunities.

Applications are invited for the post of MLSO 1 in the Department of Pathology. The Department undertakes the routine and research laboratory services for Moorfields Eye Hospital NHS Trust with which the Institute is closely associated. The postholder will be expected to carry out a wide range of histological procedures on clinical and research material. Applicants must hold State Registration in Histology and be an Associate or Fellow of the Institute of Biomedical Sciences.

Salary on scale £12,404 - £15,692 pa including LA.

For further information and an application form please contact the Personnel Officer at the above address, quoting reference 42788. Closing date for receipt of completed application forms 30 May 1995.

The Institute operates a no-smoking policy
MATERIALS SCIENCE GRADUATE
Northamptonshire

SATRA has a vacancy for a graduate with a materials science or similar degree to join a team within its Materials, PPE and Apparel Business Area carrying out research on shoe materials, especially underfoot components such as solings and insoles. Work will involve the use of a variety of physical and chemical techniques together with practical wearer trials and assessments.

The position would suit a recently qualified graduate with practical skills, who likes working with others. Good communication skills; especially written, would be an advantage as would experience of computer-based word and data processing.

SATRA, based in Kettering, Northamptonshire, is the world's leading research organisation for the footwear industry with over 1,000 members in 50 countries.

Salary will be based on age, qualifications and experience. Benefits include a non-contributory pension scheme, flexible working hours and a subsidised dining room.

SATRA is an equal opportunities employer working towards the Investors in People Standard.

Please write with full CV to: Lesley Smith, Personnel and Training Co-ordinator. Closing date for applications: 12th May 1995.

FOOTWEAR TECHNOLOGY CENTRE
SATRA House, Rockingham Road, Kettering, Northants, NN16 9JH
THE NORMAN BORLAUG INSTITUTE FOR PLANT SCIENCE RESEARCH

MAFF Research Studentship

Study for a higher degree in the exciting research environment of the Norman Borlaug Institute, by investigating one of the following topics:
1. Root specific expression vectors for sugar beet. 2. Production of low nitrogen input wheat plants by gene manipulation.

You should have, or expect to obtain, a good Honours degree in a relevant biological discipline. The award is available for 36 months from 1/10/95. The maintenance allowance is £5,638p.a. (tax free).

Application forms and further details are available from: Professor M C Elliott, The Norman Borlaug Institute for Plant Science Research, The David Attenborough Laboratories, De Montfort University, Scraptoft, Leicester LE7 9SU.
Telephone: 0116 257 7715
Facsimile: 0116 257 7752

Please identify two appropriate referees.

Closing date: 19 May 1995.

DE MONTFORT UNIVERSITY LEICESTER

WE ARE AN EQUAL OPPORTUNITIES EMPLOYER
NEW DEVELOPMENTS .... NEW OPPORTUNITIES

Already a world leader in the supply of offset plates and other specialised products to the printing industry, Horsell Graphics Industries is a highly successful Company who enjoy a deserved reputation for quality and innovation.

Using state of the art equipment in a modern laboratory, we undertake extensive R&D on printing plate products, processing chemicals and equipment and also on the electrochemical and web coating processes used in their manufacture.

Continuing research initiatives, backed by substantial investment in order to meet the growing developments in computer-to-plate imaging, means we're now looking for additional technical/scientific staff to join our talented and expanding R&D team here in Leeds.

**Senior Technician - Imaging Systems/Optical Physics**

The successful candidate will be responsible for the maintenance and upkeep of existing optical instrumentation such as computer controlled image setter systems, together with commissioning of new laser/optic systems in a new laboratory environment.

We expect you to possess at least 3 years relevant industrial/academic experience. You must also have good communication skills as forging relationships with suppliers is essential.

We offer excellent rewards which include a competitive salary, excellent working conditions and the type of environment that encourages real personal development.

To apply please write with full CV to: Caroline Stephenson, Human Resources Administrator, Horsell Graphic Industries Limited, Nepshaw Lane South, Gildersome, Leeds LS27 7JQ or telephone (0113) 252 2177 ext 205 for an application form. Closing date 19th May 1995.

INTERNATIONAL PAPER IMAGING PRODUCTS DIVISION
UNIVERSITY OF NEWCASTLE UPON TYNE
Cancer Research Unit

**Zeneca Pharmaceuticals-Funded Ph.D. studentship** to study resistance mechanisms in ADEPT-based therapies

Antibody directed enzyme prodrug therapy (ADEPT) is an exciting new approach to selective cancer treatment in which antibody-enzyme conjugates are used to selectively activate cytotoxic drugs in tumour tissue. Clinical trials of ADEPT are ongoing and to complement these a Ph.D. studentship is available to study potential intrinsic and acquired resistance mechanisms to ADEPT-based therapies. The project will involve mammalian cell culture and the use of a range of contemporary methods to evaluate mechanisms of resistance including HPLC, enzymatic assays and molecular techniques such as Western blotting. The Cancer Research Unit has an active post-graduate programme and, in addition, the student will spend time at Zeneca Pharmaceuticals, Alderly Park, Cheshire. Applicants should hold, or expect to obtain, a first or upper second class honours degree in a biological science and should submit a CV to Dr D. R. Newell, Cancer Research Unit, Medical School, Framlington Place, Newcastle NE2 4HH by no later than 9 June 1995.

UNIVERSITY COLLEGE LONDON

Graduate Research Assistant or Lab Technician

We are seeking an enthusiastic and dedicated individual to join our research team working on molecular neurobiology in the new laboratory for Molecular Pharmacology.

The successful candidate would be involved in establishing tissue culture techniques and/or using standard recombinant DNA techniques already in use. An individual with knowledge in ES cell cultures and confident in managing tasks is preferred.

We offer state of the art facilities. We have a young and dynamic work atmosphere in which we anticipate the new team member to occupy a key position. Salary depending on experience up to £17,000 per annum.

Application to Dr R Schoepfer, Dept. Pharmacology, University College London, Gower Street, London WC1E 6BT, fax: (0171) 380 7245.

Pursuing excellence in education and research Working toward Equal Opportunity

NATIONAL UNIVERSITY OF SINGAPORE  
Founded 1905  
MATERIALS SCIENCE PROGRAMME

Applications are invited for Faculty positions/appointments under the Materials Science Programme from candidates who possess a Ph.D. degree or its equivalent in any of the following areas:  
Electrical and Magnetic Materials  
Electronic Materials  
Composite Materials  
Corrosion and Protection

Duties include teaching, research and some administrative work.

Besides appointments on normal three-year contracts, visiting appointments for one or two years will also be considered.

Materials Science is an interdisciplinary undergraduate programme in the Faculty of Science. There are eight faculties in the National University of Singapore with a current student enrolment of some 17,500. All departments are well equipped with a wide range of facilities for teaching and research.

Gross annual emoluments range as follows:  
Lecturer S$55,910 – 71,400  
Senior Lecturer S$65,200 – 122,820  
Associate Professor S$108,820 – 151,480 (STG 1.00 = S$2.21 approximately)

The commencing salary will depend on the candidate's qualifications, experience and the level of appointment offered. In addition, a 13th month Annual Allowance (of one month's salary) and an Annual Variable Component (of normally two months' salary) are payable at year end, under the flexible wage system, to staff on normal contracts.

Leave and medical benefits will be provided. Depending on the type of contract offered, other benefits may include: provident fund benefits or an end-of-contract gratuity, a settling-in allowance, subsidised housing or a housing allowance, education allowance for up to three children subject to a maximum of S$16,425 per annum per child, passage assistance and baggage allowance for the transportation of personal effects to Singapore. Staff members may undertake consultation work, subject to the approval of the University, and retain consultation fees up to a maximum of 60% of their gross annual emoluments in a calendar year.

All academic staff will be given a networked personal computer (Pentium or Macintosh Power PC) with access to a Cray supercomputer, UNIX hosts, departmental laser printers, a wide spectrum of software, on-line library catalogue, CD-ROM databases, Teleview, INtv and Internet.

Application forms and further information on terms and conditions of service may be obtained from:

Research Scientist
Natural Resource Management (Regional Planning)
Salary: $44K - $59K pa

CSIRO Division of Tropical Crops and Pastures, St Lucia, Brisbane, Qld

The Division of Tropical Crops and Pastures conducts research for the crop and livestock industries of northern Australia. We are particularly interested in strengthening our research focus on integrated regional resource use planning and evaluation for the northern Australian rural environments.

We are seeking to appoint a highly motivated and innovative research scientist with conceptual and analytical ability relating to natural resource and environmental assessment and regional land use planning to our Brisbane laboratory. The successful appointee will have experience with land evaluation and environmental and social impact assessment techniques for regional resource planning. Experience with the application of advanced information technology to the complex problems of natural resource and environmental planning and management would be highly advantageous.

You will need a Ph.D. or equivalent research experience in a relevant discipline. You will need to demonstrate the capability to initiate, plan and implement original research, to work effectively within a team environment, and have good interpersonal and well developed written and oral communication skills.

Applicants wishing to discuss the position should contact Jenny Bellamy on 61 7 377 0345 or by fax 61 7 377 0328; email: jenny.bellamy.tcp@csiro.au. An information package including the selection criteria and duty statement for the position is available from Kathy Mitchell on 61 7 377 0378 or by fax 61 7 371 3946.

Please send your application addressing the selection criteria, including details of your qualifications, experience and the names of at least three professional referees, and marked confidential, quoting reference No. PG/111/275 to: The Recruitment Officer, CSIRO Division of Tropical Crops and Pastures, 306 Carmody Road, St Lucia, Q 4067, by 19 May 1995.

CSIRO IS AN EQUAL OPPORTUNITY EMPLOYER
CSIRO AUSTRALIA
23075
National Heart and Lung Institute  
Department of Cardiac Medicine

**RESEARCH ASSISTANT**

A graduate is required to undertake a BBSRC funded project to investigate the functional consequences of the interaction of ryania alkaloids with the sarcoplasmic reticulum calcium-release channel (ryanodine receptor). Single-channel gating and conduction will be monitored following the incorporation of channel proteins into planar phospholipid bilayers. The post would be suitable for a graduate in any of the biological sciences who has an interest in ion channel function.

The post is available for three years to start before 1 September 1995 and the starting salary will be £16,075 including London Allowance. Additionally, the post offers five weeks annual leave, a season ticket loan scheme and contributory pension scheme.

To apply please forward a CV with the names and addresses of two referees, who may be contacted, to the Personnel Manager, National Heart and Lung Institute, Dovehouse, Street, London SW3 6LY quoting reference BBS/361 by 19 May 1995.

The National Heart and Lung Institute operates a NO SMOKING policy
SOIL BIOLOGIST

This post will be located in the Soil Biology Unit of the Land Resources Department. The appointee will join a team investigating arbuscular mycorrhizal fungi and will be expected to lead the application of molecular biology techniques to these studies. The post also involves teaching undergraduate and postgraduate courses. The appointment will commence on 1 August 1995 and is for two years in the first instance.

Applicants should have a Ph.D. in a relevant area and experience of applying molecular biology techniques.

Salary scale: £11,138 to £22,125, depending on qualifications and experience. Requests for application forms and further particulars should be sent to The Personnel Officer, SAC, 581 King Street, Aberdeen AB9 1UD, quoting Reference No 5/95.

Closing date for applications is 2 June 1995.

SAC receives funding from the Scottish Office Agriculture & Fisheries Department.

ENTOMOLOGIST

Required to investigate insecticide resistance in whiteflies attacking cotton and other crops in Pakistan for approximately 1 year. Honours Degree in biology required, previous experience of insect rearing and insecticide bioassays an advantage. Candidates must be self-motivated and capable of working independently in a busy research environment.

Salary: Band 7: £11,361 - £20,063 with additional bonus payments available beyond that level.

Apply by application form only, available with further particulars from Personnel Department, IACR Rothamsted, Harpenden, Herts, AL5 2JQ. Ref: 193. Closing date 17 May 1995.

UNIVERSITY OF WALES
COLLEGE OF MEDICINE
Departments of Psychological Medicine and Medical Genetics

GRADUATE RESEARCH TECHNICIAN

A Graduate Research Technician (Grade C) is required immediately in the Departments of Psychological Medicine and Medical Genetics to provide general laboratory assistance with projects aimed at locating the genes responsible for schizophrenia. A background in DNA work would be an advantage but is not essential. Funded by the Medical Research Council, the post is tenable until 30 November 1998. The successful applicant will work in Professor M. Owen's laboratory in the Department of Medical Genetics.

Salary will be paid on the scale £9,871 - £11,069 per annum for University Technical Staff Grade C, starting point thereon dependent upon qualifications and experience.

Application forms and further particulars (quoting ref no: P39/72) available from the Personnel Office, University of Wales College of Medicine, Heath Park, Cardiff CP4 4XN. Tel: 01222 743692/742296.

Informal enquiries may be made to Professor Michael Owen (tel 01222 743058). Closing date for applications: Friday, 19 May 1995.

CSM Associates Limited
CSMA

CSM Associates Limited provides contracting, consultancy and R&D services to the oil and gas, minerals, geothermal and radwaste industries. The Earth Sciences group specialises in fracture reservoir characterisation, log processing, microearthquake monitoring and borehole seismics. Applications are invited for the following posts;

**Earth Scientist**
Adaptable, numerate earth scientist, with UNIX/Fortran/C skills. Wireline log processing/analysis, fractured systems evaluation, sedimentary/petroleum geology, borehole seismics, petrophysics, AI or geostatistical methods expertise an advantage.

**Numerical/Reservoir Modeller**
Must have experience of numerical methods and demonstrate proficiency in UNIX/Fortran/C. Hydraulic fracture simulation, well test analysis, geomechanics, fractured reservoir simulation expertise an advantage.

Postgraduate degree required or suitable work experience and strong mathematical background, preferably in the hydrocarbons industry. Applicants must be prepared to take an active role in CSMA's business development activities. Candidates should apply in writing, sending a full CV and the names of two referees by 12 May 1995 to:

Dr A. J. Jupe, Earth Sciences Manager, CSM Associates Limited, Rosemanowes, Hemiss, PENRYN, Cornwall TR10 9DU. Tel: +44 (0)1209 860141. Fax: +44 (0)1209 861013 e-mail: a jupe@csm.exac.uk

Lecturers Computing Science
£14,603 - £23,111

Following recent restructuring, the School of Computing Science is continuing major expansion of its teaching and research base. As part of this process five permanent post-doctoral lectureships have been created. All roles offer the chance to develop and implement innovative teaching and assessment strategies and to carry out research.

The main interests of the School include: advanced databases, business information systems, computer architecture, computer graphics, human-computer interaction, multimedia, systems analysis and design.

• good first degree in computing science or a computing science postgraduate qualification required
• demonstrated research capability
• effective communicator
• good team worker

Maximum starting salary: £18,146

For an informal discussion please email either Professor Norman Revell (norman@mdx.ac.uk) or Professor Harold Thimbleby (harold@mdx.ac.uk), or see our Web pages (http://www.cs.mdx.ac.uk/).

Closing Date: 19 May 1995

Middlesex University is working towards equality of opportunity

For an application form and further details contact
Recruitment Office, Middlesex University, Bounds Green Road, London N11 2NQ. Telephone: 0181 362 6110 quote reference D5730.
HYDRO-ECOLOGIST

The Institute has a vacancy for an innovative, numerate research scientist in a team working on ecological projects. The objective of the research is to develop models to assess the impacts of changing river flow regimes, or channel geometry, upon fluvial habitat. Key projects include:

• The development of hydro-ecological modelling procedures for setting ecologically acceptable flows in rivers and for innovative application to operational water resource management issues.
• The assessment of faunal and floral response to reduced river flows using an experimental modelling approach.
• Combining hydraulic design and environmental impact assessment for flood defence schemes.

The successful candidate will be a numerate research scientist with skills in modelling hydrological / ecological systems and the potential to take a leading role in the habitat modelling carried out by the group. The candidate will be a competent FORTRAN programmer, familiar with PCs and Unix workstations. A knowledge of the development of visualisation software and statistical estimation procedures would be of benefit, as would an interest in field survey work.

Applicants should have a good honours degree with at least 2 years’ postgraduate experience and preferably a postgraduate qualification.

Salary will be in the range of £13,025 to £23,009 pa, depending on qualifications and experience. The post is initially for 3 years. Interviews will be held 7 June 1995. Application forms for the above post are available from Sue Fenton, Institute of Hydrology, Wallingford, Oxon OX10 8BB. Telephone (01491) 838800. Closing date for receipt of application forms is 19 May 1995.

The Natural Environment Research Council has an equal opportunities policy and welcomes applications from all sections of the community.

Moredun Animal Health Ltd, part of The Moredun Foundation, is internationally known and respected in the scientific and commercial world of animal health. The Company will shortly enter an exciting phase in its development as it relocates to purpose built facilities at Pentlands Science Park, a short distance from the present site.

Applications are invited for the post of Contracts Manager to head a versatile team responsible for conducting a wide range of veterinary and scientific studies on behalf of sponsors from the wider animal health industry. All studies are conducted in accordance with the principles of GLP (full accreditation achieved in January 1995) and the appointee will also assume the role of Senior Study Director.

The successful applicant should possess a sound scientific background with a working knowledge of the veterinary field. Proven management capability is required, and commercial experience, although not essential, would be an advantage. The position would suit an enthusiastic person with drive and commitment, good communication and organisational skills, and who would enjoy working within a small expanding company to high quality standards.

Please write enclosing a CV, and the names and addresses of two referees to: Miss Irene Hunter, Moredun Animal Health Limited, 408 Gilmerton Road, Edinburgh EH17 7JH.

Applications are invited for two post-doctoral research associateships funded for three years by the Wellcome Trust and commencing 1 July 1995 or as soon as possible thereafter. The projects concern the transcriptional regulation of citric acid cycle genes and regulatory responses to anaerobiosis and nutritional conditions. Applicants should preferably have experience in molecular genetics or protein purification.

Salaries within £17,007 - £20,133 pa.

Closing date for applications: 2 June 1995. (Ref: R602).

Further particulars from the Director of Human Resource Management, The University of Sheffield, Western Bank, Sheffield S10 2TN, Tel: 0114-282 4144.

Founded in 1905, the University of Sheffield provides higher education within a research-led environment. We encourage equality of opportunity for all.
COURSES & EVENTS

GRADUATE PROGRAMME FOR THE ENVIRONMENT

• MSc/Diploma in Environmental Policy and Management
  Provides training in the economic, political and legal dimensions of environmental policy, and offers specialisms in rural policy or pollution management. The course has been awarded an ESRC taught course studentship.

• MSc/Diploma in Environmental Analysis and Dynamics
  Provides an understanding of the nature and processes of environmental change over different time scales, together with training in the monitoring, modelling and assessment of dynamic environmental systems.

• MSc/Diploma in Estuarine and Coastal Science and Management
  Provides knowledge of the biological, physical, chemical, socioeconomic, administrative and legal aspects of coasts and estuaries.

• MSc/Diploma/Certificate in Global Biodiversity: monitoring and conservation
  Provides an understanding of the issues and management of biodiversity in a 12-week intensive taught course. This is followed by 5 weeks developing practical skills and the equivalent of 5 months research.

• LLM International Environmental Law
  Provides a detailed examination of the international law of the environment, emphasising the evolution of new legal principles on issues such as the protection of wildlife, eco-systems and biodiversity, transboundary impacts of pollution and Antarctica.

• MPhil, Ph.D.
  The programme also offers supervision for higher degrees by research and studentships may be awarded by the ESRC, NERC or BBSRC.

For application forms and other information contact
The Postgraduate Office, The University of Hull, Hull HU6 7RX. Telephone: 01482 465568, Fax: 01482 465936.

Promoting excellence in Education and Research.

THE UNIVERSITY OF HULL
COURSES & EVENTS

MSc in Cellular and Molecular Biology as Applied to Human Disease

Rapid advances in clinical research have led to a demand for graduates who can apply modern cellular and molecular technology to the investigation of disease processes.

The Faculty of Medicine offers this training in a new modular course, aimed at scientists or medical graduates. It is an excellent introduction to research at Ph.D. or MD level.

Applications are now invited for this course, which begins in Autumn 1995, from graduates with a first degree in Science, preferably Biosciences, Medicine or related subjects. Some financial assistance may be available. The course would be PME accredited.

UNIVERSITY COLLEGE LONDON
Training in the Molecular Biology of Endocrine Disease

The Department of Molecular Pathology, UCL, offers a new two-year part-time day-release course leading to the degree of MSc in Molecular Endocrinology commencing in September 1995 which will be taught by Faculty members of the Department of Molecular Pathology and the UCL/Royal Free Hospital Medical School joint Department of Medicine, all of whom are distinguished teachers and researchers.

The course is open to all science and medical graduates and should be of interest to those wishing to gain experience in both the theory and practical techniques of molecular biology and will focus on how these techniques can be applied to the understanding, diagnosis and therapy of endocrine disease. The programme of lectures, tutorials and practical classes will place particular emphasis on the technical skills needed for scientific and medical investigations at the molecular level and will be supplemented by an original research project which may be carried out either at UCL or (if appropriate) at a laboratory at the student's place of work. Students will also be encouraged to develop skills in written and spoken scientific communication.

Enquiries and requests for application forms should be addressed to: MSc Molecular Endocrinology Course Administrator, Department of Molecular Pathology, UCL Medical School, Windeyer Building, 46 Cleveland Street, London W1P 6DB. Tel: (0171) 380 9343. Closing date for applications: 1 August 1995.

THE UNIVERSITY OF BIRMINGHAM
SCHOOL OF BIOCHEMISTRY

MSc AND MODULAR COURSES IN TOXICOLOGY

Toxicology is an expanding field with good career prospects. The MSc course covers all major aspects of toxicology and comprises five specific modules and a research project. Students based in industry may take the modules separately. Teaching is by members of various university departments, hospitals, industrial and government research institutes.

Entrance Requirements:

Good honours degree

MSc 1 year or 2 years part-time
Modules (5 weeks) as follows:
1) Metabolism and excretion of xenobiotics
2) Pharmacological and clinical aspects of toxicology
3) Molecular and cellular mechanisms of chemical-induced toxicity and carcinogenesis
4) Recognition and detection of acute and chronic toxicity
5) (a) Specific target organ toxicity
(b) Occupational and environmental toxicology

Enquiries to Mrs L Ford, School of Biochemistry, The University of Birmingham, Edgbaston, Birmingham B15 2TT. Tel. 0121 414 3386.

The University is an exempt Charity which exists to advance learning to the highest level for the benefit of its students and society at large.
THE WELLCOME TRUST

MILLENNIAL SCIENCE ESSAY COMPETITION 1995

Are you a postgraduate student in science, engineering or technology and busily writing up your doctoral thesis? Do you yearn to tell the world about your work? Here’s your chance to step into the limelight - and win a cash prize of £1000. There will also be a second prize of £500 and two third prizes of £250. All winners and the 10 best essays will receive a year’s subscription to New Scientist.

The challenge is to write an entertaining essay in English about your research, in no more than 800 words, suitable for publication in the Forum section of New Scientist.

The entries will be assessed by a panel of judges selected by the Wellcome Centre for Medical Science and New Scientist. The judges will be looking for interesting research topics, scientific accuracy, clarity of expression and a lively writing style. The names of the winners will be published in the 21 October issue of New Scientist.

An entry form for the competition and further details can be obtained from Dr Paul Wymer, The Wellcome Centre for Medical Science, 270 Euston Road, London NW7 2BE, to whom you should subsequently send your entry.

THE COMPETITION CLOSES FOR ENTRIES ON 19 JUNE 1995.

The organisers cannot undertake to return manuscripts, illustrative matter or floppy discs.

COMPETITION RULES
1. Entrants must be currently registered for a Ph.D. at an internationally recognised university. There are no age limits.
2. Entries must be typed, or legibly written, in English, using only one side of the paper. Give your full name and home address on the entry form and your surname in the top right-hand corner of all subsequent pages.
3. Entries of more than 800 words in length (not including description of any graphic illustration or photographs) will be disqualified.
4. The judges' decision is final and no correspondence will be entered into the nature of assessment or the final results.

At the Chemical and Biological Defence Establishment in Wiltshire, our fundamental concern is the protection of British Service Personnel.

CHEMICAL DETECTION PROGRAMME

Project Manager

A high level role in the management of chemical systems research for the protection of British Service personnel
£24,724 to £38,290 - CBDE, Porton Down, Wiltshire

The Detection Centre at CBDE is actively engaged in research into the detection of chemical warfare agents under a wide range of conditions. Much of this work is concerned with Ion Mobility Spectrometry (IMS) where research spans basic studies of the chemistry and physics of IMS to applied studies involving the optimisation and evaluation of breadboard and prototype IMS variants. Research into other detection technologies, such as solid state sensors (SAWS, resistive films, etc.), infra-red lidar and vapour pre-concentrators form an important part of the programme. These activities take advantage of extra-mural expertise and involve collaborative work with DRA (Malvern).

As well as research, CBDE also provides day-to-day technical support to the Armed Forces for their in-Service and developmental chemical detection equipment. This work involves the Centre in close collaboration with the military user and industrial manufacturers of detection equipment and frequently involves field trailing in military scenarios.

A Project Manager is now required to take responsibility for the planning and day-to-day running of these research and support activities. This will involve close contact with the various customers to agree future work packages; the management and control of resources, including a team of 15 to 20 scientists and technicians; the maintenance of the general quality of the scientific programme and delivering to the customers agreed reports and detection hardware, to time, quality and cost.

A further, growing element of the chemical detection programme is aimed at civil applications where a strong emphasis on environmental monitoring is evident. The Project Manager will be expected to play an appropriate role in developing this part of the Detection Centre's future business.

Such a multi-faceted challenge calls for a professional with first-class knowledge of analytical methods for gas or liquid detection and an understanding of the difficulties inherent in field detection. Experience of IMS is particularly relevant, and a broad awareness of other detection techniques would be valuable. Experience of project/budget management is essential, as is the ability to lead a multi-disciplinary team. Good inter-personal skills are required, especially for dealing with customers and industrial partners. Evidence of good writing skills is also particularly important.

The CBDE welcomes applications from suitably qualified people regardless of sex, marital status, race or disability.

We also have vacancies in a range of disciplines in our other divisions. Anyone who reaches a suitable standard in this competition but is not appointed may be considered for other specialist vacancies. Alternatively, we shall be happy to consider applications for such posts from those eligible for the continuous central recruitment scheme.
Please contact us for an application form quoting reference TM/DET/I. Personnel, CBDE Porton Down, Salisbury, Wiltshire SP4 0JQ. Tel, (01980) 613260. Closing date for receipt of completed applications 16th June 1995.

CBDE
CBDE is a division of the Defence Evaluation and Research Agency of the MoD
GUYANA
Underpinning sustainable Forestry management overseas

Project Manager / Adviser: Forestry

ODA is to support a five year British Aid Programme to strengthen the Guyana Forestry Commission in its efforts to guide, service, regulate and monitor the country's forest industry. Its aims are to ensure the sustainable management of national forest resources and to optimise the economic and environmental benefits from them. Assistance is being provided in the form of long-term technical expertise; short-term specialist advice; training at all levels; renovation and construction of facilities, and the provision of transport and equipment.

As Adviser to the Chief Commissioner of Forests, you will act as Project Manager for Phase I ODA inputs with responsibility for liaison, administrative and financial control. You will assist in the management of specialist consultancies/studies and implementation of their recommendations; provide technical advice eg. on forest management plans, and terms/conditions of logging licences; and assist in the detailed planning of Phase II of the project.

QUALIFICATIONS
The role demands a BSc/MSc in Forestry, with at least 15 years' experience in forestry. You must be able to demonstrate a proven track record in forestry management and planning, backed by sound knowledge of forest institutions, their organisation and operation. Applicants should either be nationals of the European Union (EU) Member State, or Commonwealth citizens who have an established right of abode and right to work in the United Kingdom.

TERMS OF APPOINTMENT
You will be on contract to the British Government for 18 months, in service to the Government of Guyana. Salary will be in the range of £30,000 - £35,000 p.a. (UK taxable). Additional benefits will normally include variable tax-free overseas allowances, children's education allowances and free accommodation.

Closing date for receipt of completed applications is 23 June 1995.

For further details and application form, please write to Appointments Officer, Ref No AH304/PS/NS, Abercrombie House, Eaglesham Road, East Kilbride, Glasgow G75 8EA, or telephone 01355 843629 (24hr answer phone).

ODA is committed to a policy of equal opportunities and applications for this post are sought from both men and women.

ODA
OVERSEAS DEVELOPMENT ADMINISTRATION BRITAIN HELPING NATIONS TO HELP THEMSELVES
Central Research
TWO IMPORTANT OPPORTUNITIES AT PFIZER

HEAD OF PILOT PLANT OPERATIONS  
SENIOR SCIENTIST  

Process R & D  
SANDWICH, KENT

At over 1,200 staff, our Central Research Division at Sandwich is a vital part of Pfizer's international pharmaceutical R&D effort, and is part of an integrated site employing more than 2,500 people. With R&D spending set to top a billion dollars worldwide this year, and an excellent portfolio of new and existing medicines, Pfizer faces the challenges of the future with confidence.

The impending retirement of the two most senior staff (including the current head) from our Pilot Plant Operation means that we are eager to recruit two senior staff to replace them.

Part of our Process R&D Department, which numbers some 65 staff in total, the plant has a dedicated workforce of 16 technicians and scientists and has a capacity of 23 vessels, ranging from 50 to 1,500 litres; it is solely used for Process R&D in the development and scale up of processes from laboratory to Pilot Plant scale and beyond into production, and for the production of bulk supplies of new medicines for use in Clinical Trials.

We're looking for staff with a Degree, or higher qualification, in Chemistry, and with several years' Process R&D experience in the pharmaceutical or fine chemicals industries, preferably in Pilot Plant operation.

You should be an accomplished supervisor, team leader or manager, able to demonstrate a record of leadership and achievement, for example in the introduction of new technologies, or the design, expansion or improvement of facilities and their usage.

Pfizer offers the salary, career structure and benefits you would expect of a leading and successful company, including flexible working hours and merit based bonus and progression. We offer relocation assistance where appropriate.

Pfizer

Please send a CV to Mr S. Rhodes, Senior Personnel Adviser, Pfizer Central Research, Ramsgate Road, Sandwich, Kent CT 13 9NJ. Fax: 01304 618749.

Applications are invited for a position as Full Professor of Natural Resource Management, open from January 1, 1997. The subject of the Chair has been defined as: Natural Resource Management deals with the sustainable use and development of natural resources, using a problem definition based on natural science, but including also social, political, legal and technical aspects. Applicants should have an outstanding record of research and teaching achievements in this field.

The position is located in the Department of Systems Ecology. Salary is negotiable. The salary range for full professors within the Faculty of Mathematics and Natural Sciences is 330,000 – 420,000 Swedish Crowns/year. Applications from women are encouraged, since most professors in the Faculty are men.

Informal enquiries may be made to Professor Ragnar Elmgren, tel +46-8164016, fax +46-8158417. The University attaches great importance to excellence in teaching, and applicants are recommended to order instructions on how to document teaching experience from Mr Ulf Lindgren of the Staff Management Division, fax +46-86125960.

Applications, quoting reference number 611-0764/95, should reach the Registrar, Staff Management Division, Stockholm University, S-10691, Stockholm, Sweden, no later than 16 June, 1995.

Application should include four copies of the following:

1. Curriculum vitae, with photocopies of relevant graduation diplomas
2. The applicant's full publication list
3. A brief (5-10 pages) description of the applicant's scientific achievements and teaching and leadership experience
4. The applicant's 20 most relevant scientific publications, numbered as in 2 above.

Items 1 and 2 should reach the University before the end of the application period, Item 3 and one copy of item 4 should arrive no later than 7 July. Three additional copies of item 4 are to be sent later, on request, directly to the three expert members of the search committee.

Bringing your chemistry to life
Neil Harris

BIOCHEMISTS enjoy the enviable position of being able to pick and choose between numerous areas in which their skills and knowledge are in demand. Biological research, clinical research and the hunt for new drugs all offer opportunities for employment. Vacancies often arise in the food industry and can involve work to detect changes in the chemistry of plant and animal material during food processing, transport and storage. Graduate biochemists are also needed in the preparation of a wide range of beverages, in water treatment, in the disposal of effluent and in various aspects of the oil industry.

The Medical Research Council is a major employer of graduates in its research units investigating specific diseases. And the cancer research campaigns need many biochemists, as do the university biochemistry departments. Hospital laboratories in the NHS also want large numbers of people with biochemical skills to analyse body fluids and tissues in the diagnosis of disease. A few, usually graduates with a good honours degree or a Ph.D., become trainee clinical biochemists, posts that lead to the most senior jobs in these laboratories.

Another route for the would-be hospital biomedical scientist, is via a masters degree in the subject. The universities of Leeds, London, Surrey and Trinity College Dublin all offer MSc courses in clinical biochemistry. Most are part-time over two years, and people already working in the field may be given time off to attend.

The progression from a trainee post to a senior one in clinical biochemistry involves yet more study. The senior posts tend to go to those who have gained a professional qualification, such as Mastership in Clinical Biochemistry or Membership of the Royal College of Pathologists. In the pharmaceuticals industry, biochemists are needed to investigate the cause of a range of diseases and to seek out new compounds as prospective drugs. Another task involves seeing a drug through the biological screening processes which it must pass during development. Toxicology also attracts some biochemists to work out what happens when a drug is ingested. Production and quality control are other important areas of employment for biochemists, especially when manufacturing a drug involves several intermediate reactions.

Chris Britten, who completed a Ph.D. in plant biochemistry before he joined the Biology Division at Glaxo Wellcome Research as a biochemist, says he works in a team of about 15 including biochemists, molecular and cell biologists and organic chemists.

"Our research centres on the causes of chronic inflammation, particularly in an asthma attack. It entails looking at what's causing the disease from a biochemical point of view. We know the physiological events which occur, such as wheezing, but we need to go into the cells to find out why. Analyses of enzymes, proteins, RNA and DNA are all important tools in our search for compounds worth developing into pharmaceutical products," he says. "In our industry you work to a goal that benefits society and you become involved with pharmacologists, physiologists, geneticists, toxicologists and microbiologists."

Food supply is another highly varied area, offering employment at many stages in the chain. The work concerns the biochemistry of plants, researching disease, reproduction and ways to increase the yield of a crop. Some biochemists are employed by agrochemicals manufacturers and seek novel herbicides, insecticides or fungicides. Food manufacturers, the laboratories of retailers and contract research organisations - for example, the Leatherhead Food Research Association - are major recruiters of biochemists.

Andrew Scott is a Ph.D. biochemist with Lyons Tetley, where he manages the development of new tea products and supervises an analytical laboratory of 15 scientists. "The job includes managing projects,
the laboratory and external consultants to meet business requirements. Our laboratory provides a range of biochemical and other techniques to back up new product development, production and market research," Scott says. At Lyons Tetley, Tom Donovan, the tea factory manager and Ian Pruton, the international buying director, are also qualified biochemists. Naturally enough, biochemistry is a laboratory-based subject where you begin as a bench scientist and gradually progress into management. More than 40 per cent of new graduates in biochemistry study for a postgraduate degree, which gives them a better chance of competing for jobs in research and development. Master's and diploma courses also give postgraduates an opportunity to specialise in a particular area of biochemistry.

The University of Newcastle upon Tyne, for example, offers a course in biochemistry and genetics, and Wye College an MSc in plant biochemistry. The University of Swansea runs a molecular biology course, and at the University of Central Lancashire you can study cell and enzyme technology. And there are numerous opportunities to study for a Ph.D. or master's degree by research. The Biotechnology and Biological Sciences Research Council provides about 750 postgraduate grants of £6520 in London and £5260 outside.

Biochemists may start in the laboratory, but they often progress to posts in senior management. Of course, there are many options, for biochemists who prefer to avoid a laboratory-based career from the start, and many graduates turn to teaching, information science, technical sales (such as selling pharmaceuticals or hospital equipment), regulator affairs or patent work.

SILS OE RESEARCH INSTITUTE

RESEARCH STUDENTSHIPS

Silsoe Research Institute is the national centre for research in engineering and physical sciences within agriculture and other biologically based industries, and has an international reputation as a centre of excellence. Funded by BBSRC and industry, we are now offering studentships, to commence in October 1995, in the following disciplines:

Process Engineering
- Solid-liquid mixture flow (Institute supervisor: Dr D L O Smith. University supervisor: Dr R B Thorpe, Chemical Engineering Dept, University of Cambridge). Ref: RS/1.
- Nitrogen transformations and distributions in stored livestock slurries (Institute supervisors: Dr T R Cumby and Dr A G Williams. University supervisor: Professor A J Biddlestone, School of Chemical Engineering, University of Birmingham). Ref. RS/2.
- Biochemical and physical process effects on the nitrogen component in aerobically treated pig slurry (Institute supervisor: Mr C H Burton. University supervisor: Professor A J Biddlestone, School of Chemical Engineering, University of Birmingham). Ref RS/3.
- Modelling of microwave processing (Institute supervisor: Dr D Burfoot. University supervisor: Dr C Railton, Electronic Engineering Dept, Bristol University. RS/4.

Environmental Physics
- Natural ventilation of greenhouses (Institute supervisor: Dr B J Bailey University supervisor: Dr P Linden, Department of Applied Mathematics & Theoretical Physics, University of Cambridge). Ref. RS/5.
- Tunnelling in soil by earthworms (Institute supervisor: Professor A R Dexter. University supervisor: Dr P J Harris, Dept of Soil Science, University of Reading. Ref RS/7.
- Modelling the atmospheric boundary layer close to the ground (Institute supervisor: Dr R Hoxey. University supervisor: Mr R I Harris, College of Aeronautics, Cranfield University). Ref RS/8.

Vision and Robotics
- Robotic Sheepdogs (2) - Adoptive responses of animals to mobile herding robots (Institute supervisors: Professor C M Wathes and Dr J A Lines, University supervisor: Dr C F Nicol, Clinical Veterinary Science, Bristol University). Ref: RS/12.
- Robotic Sheepdogs (3) - Strategies for automatic animal control and herding (Institute supervisors: Mr A R Frost and Mr N D Tillett. University supervisor: Dr S Cameron. Computing Laboratory, Oxford University). Ref RS/13.

You should have, or expect to obtain, a first or upper second class honours degree in an appropriate discipline. You will register with the appropriate university and will be supervised jointly by a member of the university and by an experienced research scientist at the Institute.
In addition to a generous living allowance, we offer a comprehensive benefits package including affordable housing, subsidised staff restaurant and workplace nursery, sports & social club, gymnasium and excellent working conditions.

For further details and an application form, please call (01525) 860000, quoting the appropriate reference, or write to: Personnel Department, Silsoe Research Institute, Wrest Park, Silsoe, Beds MK45 4HS. Closing date for applications is Wednesday, 5th July 1995.

It is anticipated that interviews will be held during weeks commencing 10th July and 17th July 1995.

We are Equal Opportunity Employers.

ENGINEERING for Life
Join a World Leader in Clinical Research.

Quintiles is one of the fastest growing Contract Research Organisations in the world. With 22 offices in 12 countries and £10 million invested in advanced technology, it's not surprising that we're respected for our expertise in such areas as Strategic Programme Design, Data Management and Clinical Research, as well as our ability to deliver results anywhere and everywhere. Now you can join one of our international and local project teams with openings in both Bracknell and Edinburgh.

**CLINICAL RESEARCH ASSOCIATES**

We are seeking Clinical Research Associates with Science or Nursing qualifications and 1 - 4 years relevant experience, which will have included monitoring and co-ordination. In addition, you will be familiar with both FDA & EEC-GCP. Initiative, drive and flexibility are vital, as are your interpersonal and communication skills. You must also be prepared to travel.

In return we’ll offer you a competitive salary and benefits package, including a company car, lots of challenging projects and healthy career prospects.

So, if your experience matches our needs, please send your cv and current salary details to Debbie Sampson, Quintiles (UK) Limited, Ringside, 79 High Street, Bracknell RG12 1DZ. Tel: 01344 749200. Fax: 01344 749300, or Bert Smith, Quintiles Scotland Limited, Research Avenue South, Heriot-Watt University, Research Park, Riccarton, Edinburgh, EH14 4AP. Tel: 0131 451 5511. Fax: 01314512062.

Inexperienced candidates need not apply on this occasion.

**QUINTILES**
The Difference is Significant

STATISTICIAN
Salary up to £30,000 + benefits

Unilever’s Research & Engineering Division delivers advanced innovation in science and technology to help Unilever businesses to grow. At Port Sunlight we research into detergents, personal products and speciality chemicals. Already the world's second largest consumer goods company, our future success will be driven by highly intelligent specialists working together as effective teams, focused on building and delivering business results worldwide.

To this aim, you will work in close collaboration with our researchers in the design and analysis of experiments, ranging from bench top formulations to large scale consumer studies. You will also be involved in the design and specification of applications to meet the statistical needs of research - including evaluation of critical test methods and validation of procedures, data supported modelling and decision-making activities utilising a wide range of statistical methods. IT skills and a willingness to learn SAS are therefore essential.

An MSc in Statistics, with a 2:1 minimum in a Mathematics/Science discipline, you will have relevant experience working as a consulting Statistician within industry or have a proven record of success as an external consultant.

Exceptional communication skills are also necessary as you will be required to discuss and explain technical statistical issues to people not familiar with your specialist area.

In return, you can anticipate a salary and range of benefits expected of a major international organisation. Relocation to this attractive part of the North West will also be available where appropriate.

Please write with full details quoting reference number DB JUNE 1 to: Debbie Smith, Personnel Department, Unilever Research, Port Sunlight Laboratory, Quarry Road East, Bebington, Wirral L63 3JW.

A recruitment event will be held at the above address on 28th June.

U
Unilever

SCIENCE FOR THE REAL WORLD
RESEARCH STUDENTSHIP

Applications are invited for an EPSRC Research Studentship award at the University of Bradford commencing in October, 1995 and leading to the Ph.D.

There are several possible research topics for this award:
(i) natural product chemistry and nmr spectroscopy
(ii) Raman spectroscopy and co-ordination chemistry
(iii) mass spectrometry of novel organic ions
(iv) synthetic polymer chemistry or
(v) photocatalysis

Candidates for the studentship should have or expect a good Honours degree or equivalent in Chemistry.

Further details of these projects are available on request, preference for one or more of the research topics should be stated in the application.

Applications, including a full CV with names and addresses of two academic referees should be sent to Dr H G M Edwards, Chemistry and Chemical Technology, University of Bradford, Bradford BD7 1DP, tel: 01274 383787, fax: 01274 385350.

Closing date: 23 June.

UNIVERSITY OF BRADFORD

MAKING KNOWLEDGE WORK
A postgraduate studentship is available for the study of exocytosis and the control of antifungal protein (AFP) secretion from plant cells. The project aims to identify the factors controlling the secretion of AFPs, and to provide basic information on the mechanisms regulating the targeting and fusion of vesicles that transport AFPs to the plasma membrane. Applicants should have or expect to achieve at least a 2:1 in a biological, biochemical or molecular science, and should have an interest in plant cell & molecular biology and its application in the biotechnology industry.

The successful applicant will work at Reading and at Zeneca's research centre at Jealott's Hill located about 12 miles from the University. Zeneca will also provide a wider business related training and a generous enhancement of the basic student stipend.

The project will be supervised at Reading by Dr N H Battey and at Zeneca by Dr A J Greenland. Applications including a CV and the names of 2 academic referees should be sent to Dr Battey at the School of Plant Sciences, The University of Reading, Whiteknights, Reading, RG6 2AS from whom further details can be obtained. The closing date for applications is 23rd June 1995.

We are an equal opportunity employer.

HELPING FARMERS FEED THE WORLD
PETERBOROUGH CITY COUNCIL
CITY OF EUROPE
PETERBOROUGH CITY COUNCIL
DEPARTMENT OF PLANNING AND ENVIRONMENTAL HEALTH
ENVIRONMENT SECTION

COMMUNITY WILDLIFE OFFICER
(Fixed Term Contract until 31.3.97)
Salary Scale 6: £14,943 - £15,942 (wef 1 June 1995)
Casual User Car Allowance

As an Environment City, the public, private and voluntary organisations in Peterborough have made a joint commitment to work towards a more sustainable future.

This job is a unique opportunity to take forward the pioneering work on the Peterborough Natural Environment Audit jointly developed by English Nature, Peterborough City Council and the Peterborough Wildlife Trust. The successful applicant will take the lead role in translating the Audit into practical projects and formal planning policies.

You must hold a degree in an appropriate environmental discipline, have at least two years' experience in project based wildlife work, possess excellent communication skills and demonstrate an ability to work as part of a team.

You must have a full driving licence.

This position is not suitable for job share.

The closing date is 10am on Friday, 16 June 1995.

For your Application Form and Job Description please contact Peterborough City Council, Department of Planning and Environmental Health, Administration and Staffing Officer, Bridge House, Town Bridge, Peterborough PE1 1HQ. Telephone (01733) 317214.

Childcare Provision. For further details on childcare provision contact the Assistant Equal Opportunities Officer. Tel: 01733 63141, ext 2304.

THE QUEEN'S UNIVERSITY OF BELFAST

POSTGRADUATE STUDENTSHIPS

The Questor Centre
The Queen's University Environmental Science and Technology Research Centre is an industry-University co-operative research centre with a membership currently of nineteen companies supporting interdisciplinary research programmes. Four three-year postgraduate studentships are available from October 1995, working under the researchers named, open to graduates with 2.1 honours or equivalent qualification in the subjects indicated:

1. Electrical oxidation of organic molecules (Professor Seddon, Chemistry): Two Studentships for graduates in chemistry or equivalent, preferably with a background in applied electrochemistry or synthetic co-ordination chemistry.

2. Removal of ammonia from effluent (Professor Weatherley, Chemical Engineering): For a graduate in chemical engineering or equivalent, preferably with an interest in separation processes. CAST award.

3. Modelling of odours (Mr D. Fay/Mr J. Stewart, Computer Science): For a graduate in computer science, applied mathematics or equivalent, preferably with an interest in environmental modelling. CAST award.

In addition to fees a maintenance grant of £5050 per annum is payable, and Students with first class honours receive a further £2000 per annum. CAST award projects also carry an additional £2250 per annum and the opportunity to spend time in industry. In addition to the usual academic content of the work Students gain invaluable industrial experience by working in close collaboration with the member companies. The work is confidential and may lead to patentable results.

Applications (two copies) including full CV and the names of at least two referees to The Director, Questor Centre, Stranmillis Road, Belfast BT9 5AG (or Fax 01232 661462).

Closing date: 15 June 1995.

The University is a charity, established in 1845 to advance education.

THE EUROPEAN COMMISSION

is carrying out a selection procedure with a view to drawing up a reserve list from which to appoint staff
(8 agents) in career D4/D3 for activities concerning the European Union's scientific and technological
policy and the Framework Programme.

SURVEILLANCE STAFF
COM/R/D/3

DUTIES: Checking people entering and leaving the Ispra Joint Research Centre (Varese Province, Italy)
and monitoring entrances on the basis of information on video display units.

QUALIFICATIONS: Proof of completion of compulsory education.

PROFILE: Experience in surveillance activities of the kind described above. Applicants who have
worked in public or private international surveillance and/or guarding organizations will be given
preference.

Requests for application forms must be made in writing before 30/6/1995 from:
E.C., Secretariat for Selection Committees Research (COM/R/D/3),
SDME R2/51, rue Montoyer 75, B-1049 Brussels, Belgium (fax: +322 296.22.39).

These application forms, duly completed and signed, must be returned to the above address postmarked
not later than 13/7/1995.

GENERAL CONDITIONS: Contracts: Temporary contracts of unlimited duration.
Nationality: Candidates must be a national of one of the European Union Member States. Place of
Employment: Commission staff must be available to work in any of the Commissions places of activity
and in many cases outside their country of origin. Age: Candidates must have been born after
14/10/1957. The age limit may be waived for temporary agents of European Union institutions,
compulsory military or other service, education of children and physical handicap. Details are set out in
the documents sent to candidates. Knowledge of languages: Candidates must have a thorough
knowledge of one official European Union language (Danish, Dutch, English, Finnish, French, German,
Greek, Italian, Portuguese, Spanish or Swedish) and a satisfactory knowledge of a second European
Union language.
Applications from officials of European Union institutions will not be accepted. The Commission policy
is to ensure equal opportunities for men and women.
SYNTHETIC ORGANIC CHEMIST
INTERESTED IN DRUG DISCOVERY?
LOOKING FOR A NEW CHALLENGE?

Merck Sharp & Dohme, one of the world's most successful multinational pharmaceutical companies, is famous as a pioneer in drug research and development. Our achievements are based on the application of innovative fundamental research in pursuit of novel medicines.

From our unique, purpose-built Research Centre at Terlings Park on the Herts/Essex borders, we are totally committed to Neuroscience Research and to the discovery of novel therapies for the treatment of central nervous system disorders.

Within Medicinal Chemistry our strategy focuses on the synthesis of selective agonists and antagonists of important neurotransmitter receptors, including the application of novel combinatorial chemistry methodology to generate and optimise lead molecules. We're now looking for an experienced postgraduate chemist to join us and contribute to challenging synthetic projects.

You will have an honours degree, combined with 2-5 years' post-graduate experience of organic synthesis, ideally gained in medicinal chemistry within the pharmaceutical industry. You will also be able to demonstrate a working knowledge of modern synthetic methods along with flair and enthusiasm for practical organic synthesis.

In return we offer a highly competitive salary and benefits package including on-site childcare facilities.

Please write with full CV to the Personnel Manager, Merck Sharp & Dohme Research Laboratories, Terlings Park, Eastwick Road, Harlow, Essex CM20 2QR.

MERCK SHARP&DOHME
NEUROSCIENCE RESEARCH CENTRE DEDICATED TO INNOVATION
ISO/LWS RESEARCH ASSISTANTS

Applications are invited for 2 Research Assistants in the Department of Physics to assist with the reduction and analysis of ISO/LWS data.

The Long-Wavelength Spectrometer (LWS) is one of four scientific instruments comprising the Infrared Space Observatory (ISO), which will be launched by the European Space Agency (ESA) in September 1995 and whose operational life is expected to be more than 18 months. The scientific programme to be carried out in the LWS’ guaranteed and open time includes studies of the solar system, inter- and circum-stellar material, star formation and galaxies.

The successful applicants must have a Ph.D. in Astronomy or Astrophysics and ideally have experience of planetary physics, star-formation or extragalactic astrophysics. The successful applicant for one of the posts must be available to take up post before launch.

Informal enquiries about the posts may be made to Professor Peter Clegg, the Principal Investigator for the LWS on 0171-975-5038 or email p.e.clegg@qmw.ac.uk

The posts are funded by the PPARC for 2 years in the first instance with salaries in the range £16,075 - £17,700 pa inclusive depending on age and experience.

Only official application forms will be accepted and these along with further details can be obtained by telephoning our 24 hour Recruitment Line on 0171-975-5171 quoting Reference 95068. Completed application Forms should be returned by 30 June 1995 to the Recruitment Coordinator, Personnel Office, Queen Mary and Westfield College, Mile End Road, London E1 4NS.

UNIVERSITY OF LONDON
WORKING TOWARDS EQUAL OPPORTUNITIES
The World-Class University in the World Heritage City  
The University of Bath, School of Chemistry

Opportunities for Postgraduate Research

The School of Chemistry of the University of Bath offers research programmes leading to Ph.D. degrees in a wide range of subjects. These include electrochemistry, polymer chemistry, organometallic, bioinorganic, synthetic and biological chemistry as well as molecular modelling and computational chemistry projects. The School has a high research profile, is the largest postgraduate School in the University, and was recently awarded a grade 4 in the latest research selectivity exercise.

Bath and the University

Bath University is situated on a 200 acre green-field site within two miles of the historical city of Bath, famous for its well preserved roman baths and Georgian architecture. The School of chemistry is equipped with a wide range of state of the art research facilities. Further major updating of research facilities is planned to take place within the next three years.

List of projects:

Applications are invited for the following projects, starting in October 1995. In addition to those listed, financial support may become available for other projects, and therefore general enquiries are also welcomed:

“Electrochemical and spectroscopic studies of mixed oxide electrocatalysts”, Professor L. M. Peter.
"Theoretical modelling of mechanisms for glycoside hydrolysis", Professor I. H. Williams.
"Studies in natural product synthesis", Dr A. Armstrong.
"Molecular modelling of biological systems", Dr D. J. Osguthorpe.
"Polymer synthesis and characterisation", Dr G. J. Price.
"Synthesis of enzyme inhibitors or generation of new antibody caralysts", Dr N. R. Thomas.
"Transition metal carboxylate chemistry", Dr D. A. Edwards.
"Studies in medical chemistry", Professor M. M. Campbel.
"Organometallic synthesis", Professor M. Green.
"Synthesis of organised colloidal structures", Dr P. Bartlett.
"Total synthesis of marine natural products via a novel cyclisation reaction", Dr M. Wills.

Requests for further details and a prospectus should be addressed directly to members of staff or to Dr M. Wills, School of Chemistry, University of Bath, Claverton Down, Bath BA2 7AY, UK. Tel: (01225) 826142, Fax: (01225) 826231, email chsmw@bath.ac.uk
Postgraduate Research Studentships

We are the largest supporter of cancer research in British universities and medical schools and we are committed to training the next generation of cancer research scientists. The Studentships will be available from 1 October 1995 and applicants are now invited from recent graduates or final year undergraduates. Applicants should hold or expect to gain a first or upper second class honours degree. In 1994/5 the CRC stipend started at £7,065 outside London and £8,000 within London.

University of Dundee
CRC Cell Transformation Research Group
Characterisation of the murine xenopus and drosophila homologues of the human Ki67 gene - Professor D P Lane and Professor P A Hall.

University of Glasgow
CRC Research Group, Division of Biochemistry & Molecular Biology
Functional analysis of E2F during the mammalian cell cycle - Professor N La Thangue.

To apply, please write indicating the project you are interested in. Your letter accompanied by a CV (written in black ink or typed and not stapled) should be sent to: Ms Sharon Vanloo, Scientific Department, Cancer Research Campaign, 10 Cambridge Terrace, London NW1 4JL. The closing date for applications is Friday 30th June 1995.

Fighting cancer on all fronts
INSTITUTE OF NEUROLOGY
QUEEN SQUARE

Chief Technician/ Laboratory Manager

Experienced technician required to take charge of the technical activities of the Gough-Cooper Department of Neurological Surgery. Applicants should have a degree or equivalent in a biological subject and substantial technical experience in cell or molecular biology including mammalian cell culture. Duties will embrace departmental administrative and managerial matters including health and safety; and the organisation and running of a cell culture laboratory, and participation in departmental research projects. The post is available from 1 August 1995 for 3 years in the first instance. Salary on the University Technician Grade F scale (£18,514 - £20,020 pa inclusive), superannuable.

Further particulars should be obtained from Miss E Bertram, Assistant Secretary (Personnel), Institute of Neurology, The National Hospital for Neurology & Neurosurgery, Queen Square, London WC1 N 3BG (tel: 0171 837 3611, ext 4136, fax 0171 278 5069), to whom applications (CV and names of 3 referees) should be sent by 23 June 1995; informal enquiries to Dr John Darling (ext 4172; email J.Darling@ion.bpmf.ac.uk).

The Institute of Neurology promotes teaching and research of the highest quality in neurology and the neurosciences.

UNIVERSITY OF LONDON
You could be a Master of Research

The M.Res in Advanced Instrumentation Systems at University College London aims to equip you with the skills expected of those going into academic or industrial research.

An industrially relevant or academically-based project complements technical and management subjects, and there are opportunities to gain hands-on workstation experience.

This is a one-year full-time course with an EPSRC grant (at least £6890 plus allowable expenses).

If you want to know more - and have (or will soon have) a good honours degree, contact Dr Mike Dewar, Centre for Advanced Instrumentation Systems, University College London, Gower Street, London WC1E 6BT. Telephone 0171 380 7838. Fax 0171 380 7145. E-mail cais@ucl.ac.uk

The University of Auckland

**Director, Nuclear Resonance Facility**  
Department of Chemistry  
Vacancy UAC.614

The Department of Chemistry is seeking to appoint a Director for its Nuclear Magnetic Resonance (NMR) Facility. The successful applicant will be required to direct operations in the NMR Facility, to manage the facility and to participate in projects with other Universities and external agencies. This will involve supervision of a research technician, organisation of training in instrument operation, planning (both financial and equipment) for current and future operation. A suitable candidate will have a Ph.D. degree, preferably with postdoctoral experience in the area of NMR spectroscopy.

Closing date: 10 July 1995.

**Lectureship in Environmental Chemistry**  
School of Environmental & Marine Science  
Tamaki Campus  
Vacancy UAC.599

The University wishes to appoint a Lecturer in Environmental Chemistry at its new Tamaki Campus, some 12km from the University's City Campus, to be involved in the development of teaching and research here. Currently there are three undergraduate chemistry courses taught at Tamaki with a strong environmental component and further courses are planned. Research facilities are being established and the facilities of the Chemistry Department (including NMR, spectroscopic surface analysis, x-ray diffraction and thermal analysis instrumentation) are available. Applicants should have a Ph.D. and research and teaching experience. Candidates with an interest in any aspect of environmental chemistry will be considered.

Closing date: 20 July 1995.

**Conditions & Procedures for All Vacancies**

Commencing salary per annum will be established within the range NZ$41,000 - NZ$55,000 (Director) or NZ$39,500 - NZ$50,000 (Lecturer).

Further information, Conditions of Appointment and Method of Application should be obtained from the Appointments Department, Association of Commonwealth Universities, 36 Gordon Square, London WC1H 0PF (tel. 0 171 387 8572 ext. 206; fax 0171 813 3055; email appts.acu@ucl.ac.uk); or from the Academic Appointments Office, University of Auckland, Private Bag 92019, Auckland, New Zealand (tel. [64 9] 373 7599, extn 5097; fax [64 9] 373 7023). Three copies of applications (two copies only for the post of Director) should be forwarded to reach the Registrar by the appropriate closing date.

Please quote the relevant Vacancy Number in all correspondence.

**WB NICOLL REGISTER**

The University of Auckland  
The University has an equal opportunities policy and welcomes applications from all qualified persons [1980-022 (1995) : 60]
National Rivers Authority

SENIOR PLANNER
WATER QUALITY MODELLING
Reading c. £24,075 including Regional Allowance

We are looking for an enthusiastic, self-motivated person with an enquiring mind to join quality planning team in Reading.

You will be responsible for predicting the effects of industrial and water resource developments on water quality, determining discharge consent standards, and devising plans for achieving river and estuarial water quality improvements. The work involves the use and development of water quality models, data analysis and interpretation, and some statistics. You will also liaise with other NRA teams within the region, nationally, and with external organisations.

A numerate scientific graduate with an appropriate post-graduate qualification, you should have a working knowledge of a programming language, preferably Fortran, and ideally some research experience. Several years’ experience of scientific modelling, some knowledge of water quality and an interest in solving complex water problems are essential.

If you would like to join us, please telephone 0173 4 535666 or write to the Personnel Department, National Rivers Authority, Thames Region, Kings Meadow House, Kings Meadow Road, Reading, Berks RG1 8DQ. Please quote reference 5160. The closing date for receipt of applications is 16 June 1995.

The NRA is committed to achieving Equal Opportunities.

NRA
Thames Region
THE EUROPEAN COMMISSION

is carrying out a selection procedure with a view to drawing up a reserve list from which to appoint two agents in career C3-B5/B3 for activities concerning the European Union's scientific and technological policy and the Framework Programme.

TECHNICAL STAFF IN THE REMOTE SENSING FIELD

COM/R/B/26

DUTIES: One of the following fields: identification of crop types in sites across the EU; cartographic and photogrammetric surveys of sites across the EU; input of derived data into geographical information systems.

QUALIFICATIONS: Degree or diploma in computer science.

PROFILE: A five years experience is required in the field of agronomy with particular reference to one or more of the following: crop identification, surveying, aerial photographic interpretation, analysis of remote sensing data, computer science with particular reference to GIS.

Requests for application forms must be made in writing before 30/6/1995 from:
E.C., Secretariat for Selection Committees Research (COM/R/B/26), SDME R2/51, rue Montoyer 75, B-1049 Brussels, Belgium (fax: + 32 2 296.22.39).

These application forms, duly completed and signed, must be returned to the above address postmarked not later than 13/7/1995.

REPUBLICATION: Applications with the same reference number submitted at the previous publication will be taken into account.

GENERAL CONDITIONS: Contracts: Temporary contracts (fixed term, renewable). Nationality: Candidates must be a national of one of the European Union Member States. Place of Employment: Commission staff must be available to work in any of the Commission's places of activity and in many cases outside their country of origin. Age: Candidates must have been born after 29/8/1953. The age limit may be waived for temporary agents of European Union institutions, compulsory military or other service, education of children and physical handicap. Details are set out in the documents sent to candidates. Knowledge of languages: Candidates must have a thorough knowledge of one official European Union language (Danish, Dutch, English, Finnish, French, German, Greek, Italian, Portuguese, Spanish or Swedish) and a satisfactory knowledge of a second European Union language.

Applications from officials of European Union institutions will not be accepted. The Commission policy is to ensure equal opportunities for men and women.

T&N TECHNOLOGY LTD
is part of T&N Plc

The company, based in pleasant surroundings at Cawston House, near Rugby, is the research centre for the development of advanced materials and technology for the international group T&N Plc, which manufactures automotive, engineering and aerospace components.

As a result of an internal group transfer a vacancy has arisen for a

**SCIENTIST**

To work on the development of new surfacing materials and processes for advanced coatings for internal combustion engine components.

Applicants for this position should possess a good first degree in metallurgy/materials science/chemistry. A good practical as well as theoretical knowledge of electroplating processes would be advantageous.

Please forward details (quoting Ref SMC/5/12 on the envelope) to:
Mrs S. M. Clarke Personnel Administrator T&N Technology Ltd Cawston House, Cawston, Rugby Warwickshire CV22 7SA
PPL THERAPEUTICS LTD

QUALITY ASSURANCE OFFICER
(Ref: PPL/QA/002)

PPL Therapeutics Ltd requires an experienced Quality Assurance Officer to become involved in the validation and monitoring of PPL's new manufacturing facility in Ormiston, East Lothian. PPL is a successful biotechnology company specialising in the manufacture of recombinant proteins in the milk of transgenic animals. The Company is moving to the establishment of pilot plant and manufacturing facilities and requires a suitable QA Officer to monitor PPL's facilities and processes to ensure compliance with current Good Manufacturing Practice (cGMP), and assist in the development of systems and training of staff to meet GMP requirements. The position will report to the QA Manager.

The successful candidate will probably be qualified to degree level or equivalent and have experience of GMP Quality Assurance. Experience of the production of biologicals within a GMP environment would be an advantage. Good written and verbal communication skills are essential, as is the ability to sustain a policy of meticulous attention to detail and to work with staff at all levels of the organisation.

The Company will offer an attractive remuneration package commensurate with age and experience, including life insurance, private medical cover, share options and 23 (rising to 25) days paid holiday.

SECRETARY/ ADMINISTRATOR (Ref: PPL/QA/003)

PPL Therapeutics Ltd requires a secretary for the departments of Regulatory Affairs and Quality Assurance based at our facilities in Roslin. The person is required to maintain the Master-file of Standard Operation Procedures (SOPs), Study Protocols, and other documents as necessary to meet regulatory requirements; control the issue and distribution of SOPs, maintain the SOP and project databases and deal with the typing of SOPs and protocols; collate and format information for sponsor's submission to Regulatory Authorities; and offer secretarial support to both the Director of Regulatory Affairs and the Quality Assurance Manager.

The successful candidate will be an experienced, well organised, computer-literate secretary. Experience of database systems (especially Foxpro) would be an advantage, as would shorthand and audio typing skills. Accuracy and an eye for attention to detail are essential.

The Company will offer an attractive remuneration package commensurate with age and experience, including life insurance, private medical cover, share options and 23 (rising to 25) days paid holiday.

If you have the relevant experience and wish to be considered, please write with CV including the name and addresses of two referees and your current salary quoting reference number.

Amanda Fraser
PPL Therapeutics Ltd
Roslin Nr Edinburgh Scotland EH25 9PP
Biomedical Scientist/Engineer

A fixed term vacancy, two year period, has arisen for a Biomedical Engineer to design and develop suitable optical instrumentation for non-invasively monitoring tissue and blood oxygenation. You will need to have experience in this specialised field of study, conversant with software writing (Pascal) and experience in developing electronic instrumentation for Biomedical use. You should have a degree in a relevant field, CEng status or a higher degree.

For informal enquiries please contact: Mr Wickramasinghe, tel: 01782 716603.

For further details / application form please contact: Carol Burgess, Department of Biomedical Engineering and Medical Physics. Thornburrow Drive, Hartshill, Stoke-on-Trent. ST4 7QB, tel: 01782 716603. Closing date: 16 June 1995.

North Staffordshire Hospital treat all applications equally and all appointments are made purely on merit.

We operate a No Smoking policy.

THE UNIVERSITY OF HUDDERSFIELD  
Department of Chemical & Biological Sciences

Ph.D. STUDENTSHIPS

The Department of Chemical and Biological Sciences is currently offering a number of research studentships to undertake work in the following areas:

1. Preparation of chiral organic synthons  
2. Use of enzymes in organic asymmetric synthesis  
3. Drug design and synthesis  
4. Chemical and bio-sensors using luminescence for trace analysis  
5. Preparation and application of chiral liquid crystals  
6. Biotechnology  
7. STM studies of self-assembled monolayers  
8. Solid state chemistry

The studentships (£5,750 p.a.) will be for three years and candidates are expected to register for a Ph.D. The studentships are open to all candidates though candidates will be expected to show a record of academic achievement and be highly motivated.

The Department is one of the most research active in the new University sector and currently has over fifty postgraduate students registered for higher degrees and the work is supported by very well equipped laboratories.

Informal enquiries relating to any aspects of the above posts should be directed to Professor M. I. Page (01484 472169) or Dr. A.P. Laws (01484 472182). Application forms are available from Mrs. A. Heslop, Department of Chemical and Biological Sciences, The University of Huddersfield, Queensgate, Huddersfield HD1 3DH (01484 472169) to whom the completed forms should be returned by 5 July 1995.

AXESS TO A CAREER...

AXESS is a dynamic and successful Clinical Research Organisation, providing services to many major pharmaceutical companies. We currently have exciting opportunities for:

**Statisticians/Programmers**
You will have a good mathematics, statistics or computer science degree, and/or MSc in Statistics, and be keen to apply your knowledge in a medical environment.

**Clinical Data Coordinators**
A physiology/pharmacology/pharmacy graduate or research nurse, you will have an interest in reviewing and coordinating data from clinical trials.

Relevant previous experience is an advantage for all positions. Candidates must be committed, self motivated, and be able to liaise confidently with clients at all levels. You will also be keen to work with many different companies on challenging studies. In return, we offer top-level salaries, excellent training, sports and social club, and after a qualifying period, contributory pension and private health insurance.

Axess...
... IN CLINICAL RESEARCH

Write enclosing a CV to Personnel, AXESS Ltd., AXESS House, Forest Road, Kew, Richmond, Surrey TW9 3BY quoting reference SDM/06/95.

London International Group has a worldwide reputation as a leading innovator and manufacturer in medical healthcare products. Our market leading products include Durex, Regent Surgical Gloves, Marigold Household and Industrial Gloves and Woodwards Gripewater.

We currently have four vacancies at our R&D centre in Cambridge, within our Polymer and Analytical Chemistry Laboratories.

POLYMER SYNTHESIS CHEMIST - TEAM LEADER
Reporting to the Laboratory Manager you will play a key role in a dynamic laboratory handling a wide range of research and development projects. You will be responsible for leading a team of scientists synthesising and evaluating elastomers and other materials for the manufacture of thin-film products.

You will ideally have a higher degree in polymer synthesis with at least 4 years experience of working within a commercial R&D environment. You will be a creative, self-starter with excellent verbal and written communication skills. Supervisory experience is essential, as is the ability to motivate a team to meet tight deadlines. Experience of working to the ISO 9000 quality system would be an advantage.

POLYMER SYNTHESIS CHEMIST
Working in the Polymer Synthesis Team you will be responsible for synthesising and developing elastomers and other materials for use within the Healthcare industry. As a synthesis chemist you will be expected to contribute to a wide range of projects within the R&D project portfolio.

Qualified to degree level in chemistry or a related subject you will have several years experience in polymer synthesis within a commercial R&D environment. You will have good communication skills and the ability to work effectively within a team environment to meet tight deadlines.

ANALYTICAL CHEMISTS
Both positions are graded internally at the Scientific Officer level. The first position requires a good honours degree in chemistry with a minimum of two years industrial experience using a broad range of analytical techniques including AA, FTIR, GC-MS, HPLC and UV/Vis.

The second position requires a good honours degree in chemistry with a minimum of two years industrial experience. Extensive experience of method development and method validation as applied to liquid chromatography is essential.

Enthusiastic and dedicated team players the successful candidates will enjoy the challenge of working to tight deadlines.

All the above positions are based at our well equipped modern laboratories on the Cambridge Science Park, which provide excellent working conditions and scope for career progression and development.

Write enclosing full CV to:

ICI Lectureship in Catalysis

Applicants must be suitably qualified chemists or chemical engineers for an ICI-funded lectureship in heterogeneous catalysis within the Department of Chemistry. Preference may be given to candidates with some experience in the use of physical methods of catalyst characterisation, in particular, experience in the use of high resolution electron microscopy and/or electron probe microscopy. The appointment will be made on the lecturer grade A scale with a commencing salary in the range of £14,756 - £17,007.

Informal enquiries should be addressed to either Professor G. Webb (Tel: 0141 330 4374, E-mail gwebb@chem.gla.ac.uk) or Dr J. M. Winfield (Tel: 0141 330 5134).

Further particulars may be obtained from the Academic Personnel Office, University of Glasgow, Glasgow G12 8QQ, where applications (eight copies, one from overseas applicants), giving the names and addresses of three referees should be lodged on or before 26 June 1995.

In reply, please quote Ref No NS/8745.

Division of Molecular and Cellular Biology
(Institute of Biomedical and life Sciences) and the Department of Chemistry

Research Assistant

You will work on the structure and hydrophobic ligand binding properties of a protein allergen which is produced by parasitic nematodes. The project is supported by a grant from the Wellcome Trust held jointly by Drs Malcolm Kennedy (IBLS) and Alan Cooper (Chemistry) and will be based in new laboratories in the Chemistry/Life Sciences Building of the University. Candidates should have, or expect to receive, a good honours degree in Biochemistry, Chemistry or related discipline and be interested in the biophysical chemistry of protein structure and function. The salary will be at the university RA1B range, currently £13,941 to £15,566 per annum. You will be encouraged to register for a higher degree.

Applications including a CV and the names, addresses, telephone and fax numbers of at least two academic referees, to be sent to Dr A. Cooper, Department of Chemistry, University of Glasgow, Glasgow G12 8QQ by 21 June 1995.

For further information, contact Malcolm Kennedy or Alan Cooper on 0141 330 5278, e-mail: alanc@chem.gla.ac.uk, Ref: NS/8739.

An equal opportunity employer.

The University of Glasgow is an exempt charity dedicated to excellence in teaching and research.

THE UNIVERSITY OF HUDDERSFIELD
Limestone Research Group

Ph.D. STUDENTSHIPS
CAVE AND KARST SCIENCE

Two University bursaries (£5,750 p.a.) are available for students to undertake research on karst hydrology/geomorphology. Full funding is available for fieldwork which will be undertaken in Ireland, Yorkshire and the Peak District. Applicants should have a good honours degree or postgraduate qualification in Geography, Geology or an Environmental Science.

Further particulars from Professor J. Gunn, The Department of Geographical and Environmental Sciences, The University of Huddersfield. Telephone, direct line: 01484 472813. Fax: 01484 472347. e-mail: j.gunn@hud.ac.uk.
UNIVERSITY OF NEWCASTLE UPON TYNE
BBSRC Industrial CASE Research Studentships
with Westlakes Research Institute

ENVIRONMENTAL MICROBIOLOGY

Two studentships are available from 1 October 1995:
1. The role of microbial processes in metal transport and immobilisation in soil polluted with toxic metals.
2. The biochemistry of microbial uptake and resistance to toxic metal ions in soil polluted with toxic metals.

Applications with CV and names and addresses of two referees, or requests for further information, should be sent to:
Project 1: Dr D. Rimmer or Dr A. O'Donnell, Department of Agricultural and Environmental Sciences, University of Newcastle upon Tyne NE1 7RU. Tel: 0191222 6916/6920. Fax: 0191222 5228.
Project 2: Dr I. C. Hancock, Department of Microbiology, The Medical School, Framlington Place, Newcastle upon Tyne NE2 4HH. Tel: 0191 222 7704. Fax: 0191222 7736.

The studentships are only available to UK nationals, who must have, or expect to obtain this year, at least an upper second class honours degree in an appropriate discipline.

Closing date: 16 June 1995.

Dedicated to excellence in teaching and research.
An experienced Technician is required to assist in the purification of prion proteins from recombinant expression systems for biophysical studies. The Prion Disease Group is a leading international centre for study of the prion diseases. Previous experience in recombinant expression work, protein purification techniques and/or working within a microbiological contaminant facility is preferred. This post is funded by the Wellcome Trust and is available for two years in the first instance. Salary will be on the scale £11,399 - £13,610 pa according to qualifications and experience plus £2262 pa London Allowance.

Applications in the form of a full CV with names, addresses and telephone/fax numbers of two referees should be sent to the Personnel Department, St Mary's Hospital Medical School, Norfolk Place, London W2 1PG. Closing date: 11 June 1995. Please quote Ref: 25221/JC4. Applications may also be faxed to: 0171-706 7094. Striving towards Equal Opportunities. [1980-034 (1995) : 64]
THE ROYAL VETERINARY COLLEGE  
(University of London)

**Research Assistant in Reproductive Endocrinology**

Applications are invited for a post funded by Wellbeing for two years to study regulation of oxytocin and vasopressin receptors in the human uterus during normal and preterm labour. The work is in collaboration with the Department of Obstetrics and Gynaecology, University of Cambridge, and will be based at our Hawkshead Campus near Potters Bar. Expertise in *in situ* hybridisation, immunocytochemistry and/or binding techniques with a background in reproductive physiology would be advantageous.

Further information can be obtained from Professor D. C. Wathes on 01707 666243 or Fax 01707 647085.

Salary will be at the appropriate point of Research Grade 1B/1A: £16,075 - £18,325 per annum inclusive of London allowance.

Application forms available from the Assistant Personnel Officer, The Royal Veterinary College, Royal College Street, London NW1 0TU. Telephone 0171 468 5107.

Wain Fellowship Awards

bbsrc
biotechnology and biological sciences research council

By the generous benefaction of Professor R L Wain, CBE, FRS, money from the patents on his discoveries in the field of selective herbicides has been made available to the Biotechnology and Biological Sciences Research Council (BBSRC) and has been used to establish the Wain Trust Fund.

One of the aims of the Wain Trust Fund is to award up to six Wain Fellowships each year to enable younger research scientists to work or study abroad at a specified academic or industrial institution for a period of up to three months.

Fellowships are primarily awarded to researchers who are currently pursuing or have recently completed a course of research training leading to a higher degree and expect to enter a research career. Applications from junior academic staff of UK universities and similar research institutions (but not government or government financed laboratories) will also be considered.

Wain Fellowships may be awarded (following an interview) in any area of science relevant to the remit of BBSRC.

Awards will provide for travelling and living costs of the Fellow during the period abroad. Successful candidates will be expected to take up their Fellowship within a year of it being awarded.

Fellows will also be required to submit a report to the BBSRC on their work and experience under the Fellowship within three months after the end of the visit.

Application forms and further details can be obtained from: Avril Iles, Biotechnology and Biological Sciences Research Council, Science and Technology Liaison, Polaris House, North Star Avenue, Swindon SN2 1UH.
Tel: 01793 413345. Fax: 01793 413234. Email: Avril.Iles@BBSRC.AC.UK

The closing date for receipt of applications is: Friday 14 July 1995.
LECTURESHP

Applications are invited for the above Lectureship which is available from 1st October, 1995. The successful candidate will contribute to the teaching of courses at undergraduate level and will carry out research. The appointment will be made in the first instance on a fixed term basis for a period of two years.

The Department offers Honours degrees in Physics, Physical Science for Microelectronics and contributes to the Honours Programme in Environmental Science and Technology.

Applications are particularly welcome from candidates with a research interest in laser physics or relevant industrial experience. Applicants should have a good Honours Degree in Physics, a Ph.D. in a relevant area, a strong commitment to teaching and the potential to carry out independent research.

Salary Scale: £14,223 to £21,150 (bar) to £25,527 pa (under review).

Application forms and further details may be obtained from the Personnel Office, University of Paisley, High Street, Paisley PA1 2BE (Tel: 0141-848 3692 - 24 hour answering service) to which completed applications should be returned by Friday 23rd June, 1995. Informal enquiries may be made to Professor R. Chapman (rc@uk.ac.paisley.cs or 0141-848 3600).

The University of Paisley is a provider of Higher Education committed to achieving excellence in teaching and research.

CHARING CROSS AND WESTMINSTER MEDICAL SCHOOL  
(University of London)  

GENE TARGETING  

We wish to appoint a Biologist to assist in the establishment and running of a new transgenic/embryonic stem cell facility at the Charing Cross site. The person appointed will be expected to act as day to day manager of the transgenic facility, to assist in transgenic techniques and to undertake other related research work. Applicants should have experience in one or more of the following areas: transgenic biology, mouse developmental biology, molecular biology. IAT qualified candidates are also encouraged to apply.

The appointment will be for three years as a Research Assistant 1B or 1A depending on qualifications and experience. Salary will be on the 1B (£16,075 - £17,700) or 1A scales (£16,075 - £23,087) per annum inclusive of London Allowance.

Informal enquiries should be directed to Dr Dominic Wells, the Senior Lecturer in Gene Targeting (0171-468 5245).

Applications with full CV including the names and addresses of two referees should be sent to the Director of Personnel, Charing Cross and Westminster Medical School, The Reynolds Building, St Dunstan's Road, London W6 8RP, within three weeks of the appearance of this advertisement. 
Quote Ref: 95/49.

CW&WMS is an equal opportunities employer and is a charity promoting medical education and research.  
The University of Reading

Postgraduate Research Institute for Sedimentology
Research Fellowship - Hydrogeochemistry

In the last month the University has appointed two research fellows to new posts in the Institute in the fields of geomicrobiology and physical modelling of surficial processes, respectively. As part of its commitment to research in environmental geosciences, the University offers a further post for a period of up to four years, in the hope of converting it to a permanent position after that time. Salaries will be on the usual University research scales.

The PRIS was founded in 1988 to undertake advanced teaching and research in the broad field of sedimentology, including geochemical, hydrogeological, geophysical and geobiological aspects. There are currently about 70 students registered for higher degrees in these fields, and they are supported by highly qualified technical staff and an excellent equipment base for analytical and experimental work.

The ideal candidate will already have some post-doctoral experience and a burning ambition to understand how natural processes operate, with the skill to undertake appropriate research to partially satisfy that ambition. Although we would be particularly interested in seeing research done in some of the many fundamental geochemical processes relevant to contaminant hydrogeology, this is not a necessary qualification. He/she will be able to collaborate with equally dedicated researchers in a number of associated fields (among others: noble-gas and stable isotope geochemistry, physical hydrogeology, those of the two new appointees).

Further details and application forms may be obtained from the Personnel Office, The University of Reading, Whiteknights, P.O. Box 217, Reading RG6 6AH telephone (01734) 318754.

Informal enquiries may be made to the Head of PRIS, Dr. A. Parker, Tel: (01734) 318944. Please quote Ref. R9533.

A centre of excellence for university teaching and research.
RESEARCH ASSISTANT IN GENE TARGETING

A Research Assistant is required to work in the newly established Gene Targeting Unit on the development of mouse knockouts for genes involved in the regulation of hypothalamo-pituitary-adrenal (HPA) function and inflammation. Experience in targeting embryonic stem cells would be an advantage.

For further details contact Professor J. C. Buckingham (0181 846 7279) or Dr D. J. Wells (0171-468 5245). The post is for three years; Salary within range £13,941 - £18,486 (under review) plus £2134 London Allowance per annum, dependent on age, qualifications and experience.

Applications in the form of a full cv together with the names and addresses of two academic referees to The Director of Personnel, Charing Cross and Westminster Medical School, The Reynolds Building, St Dunstan's Road, London W6 8RP, to be submitted within three weeks of the appearance of this advertisement. (Quote Ref: 95/51).

CX& WMS is an equal opportunities employer and is a charity promoting medical education and research.

THE UNIVERSITY OF HUDDERSFIELD

Lecturer/Senior Lecturer

Environmental Science
School of Applied Sciences
Post Ref: 2261
Lecturer Scale:....................................................................................£12,756 - £21,264
Senior Lecturer Scale:................................................ £20,553 - £24,102 (bar) - £26,223

The School of Applied Sciences wishes to appoint an enthusiastic environmental scientist to play a major role in the research and teaching in this area. Duties will include involvement in the delivery of the BSc Environmental Analysis and other relevant courses, developing research and industrial links and contributing to future developments across the School.

The successful applicant should have a higher degree and broad interests in environmental sciences. Specialist knowledge of waste management / landfill or data analysis and modelling may be advantageous.

Informal enquiries may be made to the Dean of School, Professor Michael Page, on 01484 472169, (fax: 01484 472182; Email: m.i.page@hud.ac.uk)

Closing date: 19th June 1995.

Application forms and further particulars from the Personnel Office, The University of Huddersfield, Queensgate, Huddersfield HD1 3DH Tel: (01484) 472845.

TRIVIUM
QUADRIVIUM
UNITED BRISTOL HEALTHCARE NHS TRUST
Department of Medical Physics and Bioengineering

Medical Imaging Physicist
Five years initially, reviewed for possible extension at the end of the period
Grade B14 to B16 (Salary Scale: £20,270 to £21,923)

We are looking for a medical imaging physicist with a special interest in MRI physics. The postholder's
task will be to investigate the application of MRI to radiotherapy computer treatment planning in Bristol
Oncology Centre.

A novel, open-access MRI scanner will be acquired shortly by Bristol Oncology Centre. The aim is to
use the MRI images in treatment planning, using an in-house 3-D treatment planning system which runs
on a network of Suns. At a later stage, this may be extended to a commercial system (Philips SLP/CMS
FOCUS).

The post holder will be expected to tackle the problems in such a task, with regard, for example, to
registering MRI and CT images and to removing scanner-induced and patient-induced distortion on the
MRI images. The postholder will have a good background in medical image processing and will be
familiar with UNIX.

Enquiries and visits are welcomed - please contact Dr Alan McKenzie, Bristol Oncology Centre,
telephone 0117 923 0000 and ask for bleep no 2199.

Application form and job description available from Mrs S. Cornwell, Personnel Department, Specialty
Services, Bristol Royal Infirmary, Terrel Street, Bristol BS2 8HW. Closing date: 29 June 1995.

All UBHT vacancies are suitable for Job Share arrangements unless otherwise indicated. The Trust has
a policy for promoting equal opportunity and therefore welcomes applications from all sections of the
community.

SENSITISERS RESEARCH LTD

LABORATORY CHEMIST
required for research and development of surface coated products.

The suitable applicant would probably be in their 20s and starting, or working towards, a Higher National qualification. An interest in industrial coating technology is essential with perhaps some knowledge of polymers, dyes, adhesives and their test equipment.

If you have an enquiring mind and seek a long term involvement in industrial coating technology, then apply to the address below. Salary commensurate with age and experience.

Applications in writing to: Mr H. Coulson, Sensitisers Research Ltd, 1 Blackdown Road, Deepcut, Camberley, Surrey GU16 6SH.
The newly founded Max-Planck-Institut for Cognitive Neuroscience in Leipzig (Directors: Prof. A. Friedrici, Prof. D. Y. von Cramon) is looking for a postdoctoral

**NMR-Physicist**

with experience in biomedical NMR. The position will be available from 1 August 1995, with a maximum duration of three years.

The successful candidate should have obtained a Ph.D. in the field of Magnetic Resonance Imaging/Spectroscopy. Experience in fast imaging methods is especially desirable.

The Institute will take delivery of a 3 T/1m Bruker Medspec system in late 1995.

The Max-Planck-Society offers a generous salary and relocation assistance.

Preference will be given to disabled persons of the same qualification.

For an informal discussion please call David Norris on FRG-(0)421-218-3106/3452.

Candidates should send a CV by 15th June to:

Max-Planck-Institut für neuropsychologische Forschung Verwaltung
Inselstr. 22-26, 04103 Leipzig, Germany

RESEARCH TECHNICIAN

Applications are invited for a two year post within the Interstitial Lung Disease Unit to investigate the genetic predisposition to the development of sarcoidosis.

The successful applicant will have a good first degree in relevant biological science and wish to develop their molecular biology skills further. Some familiarity with laboratory techniques is essential. It is possible that this study may be extended to form the basis of a Ph.D. thesis. The starting salary will be £12,357 per annum, inclusive of London Allowance.

Informal enquiries may be made to Dr P. Lympancy on 0171 352 8121, ext 3388.

To apply, please forward a CV with the names and addresses of two referees, who may be contacted, to the Personnel Manager, National Heart and Lung Institute, Dovehouse Street, London SW3 6LY quoting reference STJ/369 by 15 June 1995.

UNIVERSITY OF LEEDS

Lectureships

SCHOOL OF COMPUTER STUDIES
Lecturer in Multimedia Networking and Systems Ref:48/118

The above post is available immediately for a fixed period of 2 years to teach primarily multimedia networking and systems and contribute to the School's research programme in these areas. The appointee will assume day-to-day responsibility for the School's European teaching programme. Applicants should have a first degree in computing or a related discipline with a relevant postgraduate qualification, ideally a Ph.D., and prior experience in teaching, preferably in higher education. Experience in primarily multimedia networking and systems is essential. Fluency in a major European language in addition to English is also essential.

Informal enquiries may be made to Prof. Peter Dew (tel: 0113 233 5449; fax: 0113 233 5468; email dew@scs.leeds.ac.uk) The School's World Wide Web home page is at: http://agora.leeds.ac.uk/WWW/welcome.html

Closing date for applications: 29 June 1995.

SCHOOL OF CHEMISTRY - 3 POSTS
Applications are invited for the following posts which are available from 1 August 1995. Candidates should have a proven record of research strength. The appointees will establish a strong research programme and teach at both undergraduate and postgraduate levels.

Lecturer in Organic Chemistry
Ref: 43/66.
Applicants with an interest and/or experience in medicinal chemistry or combinatorial chemistry will be particularly welcome.
Informal enquiries may be made to Professor F Grigg tel/fax: 0113 233 6501 e-mail r.grigg@chem.leeds.ac.uk

Lecturer in Physical Chemistry
Ref: 43/67.
Preference will be given to applicants who are interested in complex molecular systems and are willing to contribute to the University's new multidisciplinary Centre for Self-Organising Molecular Systems. Applicants with experience in one or more of the following techniques: X-ray/neutron scattering, laser spectroscopy, NMR, electrochemistry, computer simulation, will be particularly welcome.
Informal enquiries may be made to Professor N Boden tel: 0113 233 6454 e-mail n.boden@chem.leeds.ac.uk or Professor M J Pilling tel: 0113 233 6451 e-mail m.j.pilling@chem.leeds.ac.uk

Lecturer in either Inorganic Chemistry
Ref: 43/68
No restriction is placed on the area of inorganic chemistry.
Informal enquiries may be made to Professor B L Shaw tel: 0113 233 6401 e-mail b.l.shaw@chem.leeds.ac.uk

or Analytical Chemistry
Preference will be given to applicants who have an interest in electrochemistry.
Informal enquiries may be made to Professor K D Bartle tel/fax: 0113 233 6490.
Closing date for applications: 30 June 1995.

Salary for all the above posts will be on the scale for Lecturer Grade A (£14,756 - £19,326) or Grade B (£20,133 - £25,735) (pay award pending) according to qualifications and relevant experience.

Application forms and further particulars may be obtained from the Personnel Office (Academic Section), The University of Leeds, Leeds LS2 9JT, tel: 0113 233 5771, e-mail e.f.moran@registry.leeds.ac.uk World Wide Web address http://www.admin.leeds.ac.uk/jobadverts/index.html quoting the appropriate reference number.

The University of Leeds promotes an Equal Opportunities Policy.

IT SPECIALIST /HEAD OF IT
We seek an enthusiastic and progressive IT Specialist to operate in a multi-disciplinary scientific environment. Applicants should have experience in software development and networking using a range of machines (PC, Macintosh, HP and Vax) and be familiar with UNIX and current WAN & LAN (currently Pathworks) systems. You will be responsible for end-user and state-of-the-art on-line information services and be expected to interact with both scientific and administrative staff. You should have some experience in writing applications software. Apply quoting reference BV/1NS.

BIOLOGIST
We have an excellent opportunity for a Research Officer to join the Experimental Oncology Group, a team concerned with identifying and developing new anti-cancer treatments to be given in conjunction with radiation and studying the biological basis for their mechanisms of action. You should have a good degree in a biological science, preferably in biochemistry. Ideally with laboratory experience, you must be a proven team worker willing to learn new techniques and adapt to work on different projects, both in vivo and with cells in vitro. Previous experience with cell culture, molecular biology and data analysis would be an advantage. Apply quoting reference MCJ/1NS.

PHYSICIST
We have a career opportunity for an enthusiastic individual to join the Cell and Molecular Biophysics Group investigating mechanisms of the biological effects of radiation using cell and DNA systems. You will join a multi-disciplinary environment, using an extensive range of radiation facilities and assisting in the development and application of a novel charged-particle microbeam that uses state-of-the-art micropositioning and imaging techniques to probe sub-cellular targets. Applicants should have a good degree or equivalent in physics or a related discipline, with a high level of competence in computing and instrumentation. Experience in radiation physics and an interest in biology would be an advantage. Apply quoting reference BDM/1NS.

The appointments are initially for three years, of which the first is probationary, at salaries dependent on qualifications and relevant experience. The IT Specialist is on the Scientific Civil Service Computer Officer scales (£13,091 - £27,895) and the Biologist and Physicist are on the Scientific Civil Service SO scale (£13,189 - £18,001). All salary figures include London weighting and a superannuation supplement.

The Gray Laboratory operates a no-smoking policy. Applications, including a full CV and the names and addresses of two referees should be sent to: The Administrator, Gray Laboratory Cancer Research Trust, PO Box 100, Mount Vernon Hospital, Northwood, Middlesex HA6 2JR, quoting the appropriate reference.

Gray Laboratory Cancer Research Trust
EPSRC Ph.D. Studentship in Bio-organic Chemistry

Applications are invited from recent or prospective graduates with a strong background in Organic or Biological Chemistry (minimum 2i honours) for a 3 year EPSRC funded Ph.D. studentship tenable from October 1st 1995. Projects available include: Synthesis of Oligonucleotide Mimics. Those mimics with high affinity for DNA and RNA will be tested as potential antiviral and antibacterial agents. Biosynthesis of Biliproteins. The biliprotein pigments (linear tetrapyrroles) will be synthesised and used to investigate the biosynthesis of biliproteins. The successful candidate will gain extensive expertise in organic synthesis as well as 'state of the art' spectroscopic and biochemical techniques.

Applicants should send a full CV and the names of two academic referees by 1 July 1995, to Dr Jason Micklefield, Department of Chemistry, Birkbeck Collage, University of London, Gordon House, 29 Gordon Square, London WC1H 0PP. (Tel: 0171380 7476 or 380 7486, email: ubca532@ucl.ac.uk)
CHARING CROSS AND WESTMINSTER MEDICAL SCHOOL
(University of London)

TECHNICIAN
Department of Haematology

Applications are invited for the above post, the holder of which will join an established research team working in a fast-moving, clinically relevant field investigating immunoglobulin gene rearrangements in multiple myeloma, in collaboration with the Royal Postgraduate Medical School. Experience preferred in PCR, RT-PCR, cloning and/or sequencing, but training will be provided. Post is for one year.

Informal enquiries to Dr Alison Bybee, telephone 0181-846 7244.

Job description and application form obtainable from the Director of Personnel, Charing Cross and Westminster Medical School. The Reynolds Building, St Dunstan's Road, London W6 8RP, to be submitted within two weeks of the appearance of this advertisement.

Quote Ref: 95/50.

CX& WMS is an equal opportunities employer and is a charity promoting medical education and research.

School of Biological Sciences

POSTDOCTORAL RESEARCH FELLOW
Applications are invited for a postdoctoral research fellowship funded by the Schering Research Foundation to work on a project investigating the effects of gonadal hormones on cognitive function and mood in the elderly. The project will apply ideas from sexual dimorphism in cognition and develop methodology to study sexual dimorphism in cognitive impairments during ageing. Mood changes and their correlation to cognitive functions will also be an important part of the project.

The successful applicant will work in a highly interactive research environment. Applicants should have a strong research record and practical experience in animal or human cognition psychopharmacology and the ability to assume day to day responsibility for the experiments.

The appointment will be for up to three years from 1 September 1995. Salary will be on the Grade 1A salary scale for Research and Analogous Faculty £14,317 to £21,519 per annum (recently revised).

Further details may be obtained from Dr T. Duka. Tel: 01273 678879. Email: dorad@epunix.susx.ac.uk

Applications, including cv and the names, addresses and telephone numbers of two referees should be sent to Dr T. Duka, School of Biological Sciences, University of Sussex, Falmer, Brighton BN1 9QG. Closing date: 30 June 1995.
The Scottish Association for Marine Science (SAMS)

POSTDOCTORAL RESEARCH ASSOCIATE
Applications are invited for a three-year research post, based at the Dunstaffnage Marine Laboratory, investigating the molecular phylogeny of symbiotic bacteria present in echinoderms. Funded by NERC as part of its ROPA scheme, the research will address topics of symbiont diversity, transmission and co-evolution. Applicants should be experienced molecular biologists, with a working knowledge of PCR and sequencing. Experience of in situ hybridisation techniques would be advantageous.

The post is fixed term for three years. Salary will be on the University 1A "Research and Analogous" scale (£13,941 - £20,953 according to age and experience). For further details and application forms contact: The Secretary (ROPA Associate), Scottish Association for Marine Science, PO Box 3, Oban, Scotland PA34 4AD. Tel: 01631-562244. Fax: 01631-565518.

Closing date for applications is 21 June 1995.

SAMS has an equal opportunities policy and welcomes applications from all sections of the community.

THE EUROPEAN COMMISSION
is carrying out a selection procedure with a view to drawing up a reserve list from which to appoint staff in career AB/A5 for activities concerning the European Union's scientific and technological policy and the Framework Programme.

SCIENTIFIC TECHNICAL STAFF IN THE REMOTE SENSING FIELD
COM/R/A/137
in the following areas:

1. Remote Sensing Specialists
2. Agriculturalists, Agronomists and Agrometeorologists
3. Computer Scientists
4. Tropical Vegetation Specialists
5. Ecologists
6. Theoretical Modellers
7. Earth Observation Ground Segment Specialists

Candidates must hold an UNIVERSITY DEGREE in a relevant subject with a post-graduate qualification and at least 5 years relevant post-graduate experience.

A description of the duties and qualifications required for the different positions and compulsory application form must be requested in writing (making reference to the number of the area considered) before 30/6/1995 from:
E.C., Secretariat for Selection Committees Research (COM/R/A/137), SDME R2/51, rue Montoyer 75, B-1049 Brussels, Belgium (fax: + 32 2 296.22.39).

These application forms, duly completed and signed, must be returned to the above address postmarked not later than 13/7/1995.

REPUBLICATION: Applications with the same reference number submitted at the previous publication will be taken into account.

GENERAL CONDITIONS: Contracts: Temporary contracts (fixed term, renewable). Nationality: Candidates must be a national of one of the European Union Member States. Place of Employment: Commission staff must be available to work in any of the Commission's places of activity and in many cases outside their country of origin. Age: Candidates must have been born after 29/6/1953. The age limit may be waived for temporary agents of European Union institutions, compulsory military or other service, education of children and physical handicap. Details are set out in the documents sent to candidates. Knowledge of languages: Candidates must have a thorough knowledge of one official European Union language (Danish, Dutch, English, Finnish, French, German, Greek, Italian, Portuguese, Spanish or Swedish) and a satisfactory knowledge of a second European Union language.

Applications from officials of European Union institutions will not be accepted. The Commission policy is to ensure equal opportunities for men and women.

RESEARCH STUDENTSHIPS
Applications for the following studentships are invited from candidates who hold (or expect to hold) an upper second or first class honours degree in an appropriate subject

Department of Agricultural and Environmental Science
• Water and ion uptake by epiphytes: active and passive processes (NERC Studentship) Dr H. Griffiths (0191 222 7893).
• An information system for precision farming (MAFF Studentship) Mr I. Yule (0191 222 6268).
• A countermeasure strategy for the fixation of radiocaesium by clay minerals naturally present in organic soils (MAFF CASE Studentship with National Radiological Protection Board) Dr D. L. Rimmer (0191 222 6916).

Use of carbon isotope discrimination to select for drought tolerance in brassicas. BBSRC joint award to Horticultural Research International, Wellesbourne (contact Professor Lyn Jones, 01789 470382) or Dr Howard Griffiths (0191 222 7893).

Plant communities in upland agriculture. Contact Dr Steve Rushton (0191 222 8577) or Dr Andy Young (0191 222 7879).

Departments of Biological and Nutritional Sciences
• Heterotrophic degradation of xenobiotic pollutants by freshwater green algae (NERC Studentship) Professor R. B. Cain (0191 222 6890).

Departments of Geography and Electrical & Electronic Engineering

Further information and application forms may be obtained from the contact phone numbers given above. All applications must be received by Friday 23 June 1995.

Dedicated to excellence in teaching and research.
The University of Reading
School of Plant Sciences

Applications are invited from candidates who hold or expect to hold a First or Upper Second Class Honours Degree in a relevant subject for the following Higher Degree studentships tenable for three years from 1st October 1995.

1. 2 year Taught Course MPhil Plant Breeding & Crop ImprovementJointly with the University of Birmingham
   (Professor P.D.S. Caligari (01 734 318091)/ Professor N.L. Brown - MAFF)
2. Maximising Disease Suppression by Natural Microflora Under Different Agronomic Regimes
   (Dr. M.W. Shaw (01734 318093) - MAFF)
   or
   Varietal Selection for Enhanced Weed Suppression
   (Dr. R.J. Froud-Williams (01734 318329) - MAFF)
3. Regulation of Plant Pathogen Populations by Turn-Over of Host Tissues
   (Dr. M.W. Shaw (01734 318093) - NERC)
4. Selection of Resistance to Triazole Fungicides
   (Dr. M.W. Shaw (01734 318093) - BBSRC/AgrEvo CASE)
5. Dormancy in Woody Plants
   (Dr. S. Pearson (01734 318071) - Research Endowment Trust Fund, The University of Reading)
6. Supplementary Lighting of Pot and Bedding Plants
   (DR. S. Pearson (01734 318071) - MAFF/EA. Technology Ltd./CASE)

A letter of application, including a full CV and naming two academic referees should be sent to: Mrs A Bassett, School of Plant Sciences, The University of Reading, P. O. Box 221, Reading RG6 6AS. (Fax No. 01734 750630). Further information may be obtained by telephoning the individual member of staff.

A centre of excellence for university teaching and research.
DEPARTMENT OF CHEMISTRY

Lecturer in Organic Chemistry
The new Lecturer, who should be excellent in teaching, will join an active and well-equipped department with established lines of research in organic synthesis, natural products and bio-organic chemistry. It is hoped that applicants will have strong interests in one of these areas and be capable of developing an independent and dynamic research portfolio as rapidly as possible.

Salary will be within Lecturer Grade A/B £14,756 - £25,735 pa, depending on qualifications and experience. The post is available from 1 September 1995 or as soon as possible thereafter.

Informal enquiries may be addressed to Professor G Pattenden, Department of Chemistry, tel: 0115 951 3530.

Further details and application forms are available from the Personnel Office, Highfield House, The University of Nottingham, University Park, Nottingham NG7 2RD. Tel: 0115 951 5778. Fax: 0115 951 5205. Please quote ref. DCH/028.

Closing date: 14 July 1995.

The University of Nottingham is a research-led institution which provides the highest quality learning environment and is committed to equal opportunities in employment.

The University of Nottingham
DEVELOPMENT CHEMIST
Attractive Salary Package

Reckitt & Colman's portfolio contains many of the world's most popular household & toiletry brands and that's how we intend to stay. For this reason we're pursuing an energetic product development programme which is constantly yielding exciting new innovations.

Brand leaders in many household & toiletry product categories. Brand names include Haze, Harpic, Glassex, Dettox, Jex, Immac, Mr Sheen and many more. Committed to excellence, the European household development laboratory plays a key role in the development of products for the UK, European and International Markets. As a result of growing responsibilities there is an exciting opportunity for a Development Chemist to join the laboratory team based in Hull.

Working closely with the UK and European Marketing departments, you will develop new innovative products and enhance existing products. The position will involve laboratory work and some project co-ordination as well as advising on the technical aspects of products.

The positions call for enthusiastic self starters with innovative enquiring minds who are good communicators, enjoy team work and have a readiness to travel throughout Europe. A good honours degree in chemistry or equivalent, coupled with some relevant practical experience gained in an fmcg laboratory is desirable.

To apply please send career details to Mrs Julie Downs, Human Resources Department, Reckitt & Colman Products, Dansom Lane, Hull, HU8 7DS. Tel: 01482 326151.

RECKITT & COLMAN PRODUCTS
BBSRC Industrial CASE Ph.D. Studentship

Primarily based in the Department of Biology, UCL this project centres on the cell biology of the parasitic protozoan Eimeria - the causative agent of coccidiosis in chickens. The gliding motility of Eimeria sporozoites and its role in target cell invasion is the subject of this investigation.

Applicants should have, or expect to obtain, a first or upper second class honours degree in an appropriate area of life sciences. The studentship, starting on October 1 1995, is partly funded by Pfizer Central Research and has a stipend of £8,770 per annum.

Applications, including a current CV and the names and addresses of two academic referees should be sent to Dr Conrad King, Box N350, Department of Biology, UCL, Gower Street, London WC1E 6BT. Further details by phoning 0171380 7098 or fax 0171380 7096.

Working toward Equal opportunity
PURSUING EXCELLENCE IN EDUCATION AND RESEARCH
PUBLIC HEALTH LABORATORY SERVICE

Trainee (Grade A) Clinical Scientists (Microbiology)

Salary: £11,706 - £15,402 According to qualifications and experience
The Public Health Laboratory Service (PHLS) consists of 53 area and regional laboratories together with the major UK reference laboratory for Medical Microbiology (the Central Public Health Laboratory, in North London) and the UK major centre for epidemiology (the Communicable Disease Surveillance Centre, in North London).

There are vacancies in the current year for two Trainee Clinical Scientists who will spend three years undergoing training in various PHLS laboratories. During this time they will be expected to attend an MSc course in Medical Microbiology in London or Manchester.

This is a fixed term appointment for a period of three years in the first instance.

Applications are invited from candidates who have 1st or 2nd class honours degrees in an appropriate science, or who expect to obtain such degrees in 1995.

For an informal discussion please contact Dr Roger Gross on 0181-2001295, ext 3921.

An information pack is available from the Personnel Department, Public Health Laboratory Service Board Headquarters, 61 Colindale Avenue, London NW9 SDF. Tel: 0181 200 1295, ext 3690.

Closing date: 23 June 1995.

The PHLS is an Equal Opportunities Employer.
UNIVERSITY OF STRATHCLYDE
Strathclyde Institute for Drug Research

Postdoctoral Appointments in Medicinal Chemistry
Funded by Proteus Molecular Design Limited

Proteus is an international group of companies specialising in the rational design of new drugs for pharmaceutical and veterinary applications. Owing to continued expansion, positions in synthetic chemistry are available immediately to contribute to an exciting continuing project funded by Proteus. These will be based in the Departments of Pure and Applied Chemistry and Pharmaceutical Sciences, tenable until 31 August 1996, under the supervision of Professors C. J. Suckling and R. D. Waigh.

Guided by state-of-the-art molecular design techniques the chemists will synthesise a wide variety of structures presenting a stimulating challenge to practical and theoretical abilities in synthetic organic chemistry.

Salary range: £13,941 - £20,953 per annum.

Applications (Ref R10/95) with full CV and names and addresses of two referees should be sent to Professor C. J. Suckling, Dean of Science, University of Strathclyde, Glasgow G1 1XQ.

Closing date: 15 June 1995.

The University is a 'Place of useful learning' and committed to equal opportunities.
GRADUATES IN CHEMISTRY, PHARMACOLOGY OR ANY OF THE OTHER SCIENCES RELEVANT TO MEDICAL RESEARCH ARE NEEDED BY AD-EX TRANSLATIONS LTD

A good reading knowledge of at least two of the following languages is essential - French, German, Italian and Spanish. The posts we need to fill involve working from those languages in the preparation of reports for drug registration or papers for publication in English.

Pleasant working conditions, a generous salary, bonus and pension schemes and excellent prospects await the right individuals.

Please apply in writing with full CV to Dr A. M. A. Mincer, AD-EX (Translations) Ltd, PO Box 428, 296 Kingston Road, Wimbledon, London SW20 8LZ.

ADAS
FOOD, FARMING, LAND & LEISURE

VACANCIES FOR CONSULTANTS
Resource Planning Team, Reading

ADAS is a leading consultancy to the land-based industries of England and Wales. We provide consultancy, research and development services to the agricultural, horticultural and related industries, to Government, individuals and Corporate groups.

We have two vacancies for consultants in our Resource Planning Team at ADAS Reading. Our team of consultants and cartographers are involved wholly in the delivery of work to MAFF. The work mostly involves carrying out Agricultural Land Classification surveys throughout the South East and the preparation of statements of physical characteristics for mineral sites to be restored to agriculture.

You should have a degree, preferably at 2i level, and have an academic background in soil science, geography or environmental science. Ideally you should be physically fit and have working knowledge of Ordnance Survey maps, Geological Survey information and Soil Survey data. A current, clean driving licence is an essential requirement.

The positions are for a fixed term of employment, initially up until the end of March 1997, with the potential for extension.

Salary will be in the range of £10,509 to £18,911 but, for particularly highly qualified and experienced candidates, the salary could rise to £24,000.

For further information and an application form, please contact Jean Taylor, ADAS Preston, Penwortham, Preston PR1 0SP (tel 01772 744123). Please quote reference HRD 2. Closing date for receipt of completed applications: 22 June 1995.

For an informal discussion please contact Edgar Black, ADAS Reading on 01734 392243. These posts are open to UK, Commonwealth and EC Citizens.

ADAS is an equal opportunity employer.
THE UNIVERSITY OF BIRMINGHAM
SCHOOL OF CHEMICAL ENGINEERING

A Ph.D. research studentship is available, funded by D.S.M., tenable for 3 years. Applicants should have a good honours degree, preferably in Chemical Engineering, but one in Physics or Chemistry may also be suitable. The work is concerned with establishing a bench-scale technique for characterising the behaviour of gas-liquid systems in gas-driven and agitated reactors. To date, any classification has done little more than define such systems as coalescing or non-coalescing. There is, therefore, great scope for advances. Modern video techniques for size analysis and bubble coalescence studies and equipment for the characterisation of the rheology and interfacial properties of the solutions will be available.

The student will be part of the large research group working on mixing problems under the leadership of Professor A W Nienow, F.Eng, from whom further particulars can be obtained. (Ref.AWN/DSM/5/95)

Professor A.W. Nienow, School of Chemical Engineering, The University of Birmingham, Edgbaston, Birmingham B15 2TT. Tel. 0121 414 5325/5326, Email A.W.Nienow@bham.ac.uk Fax. 0121 414 5324.

The University is an exempt Charity which exists to advance learning to the highest level students and society at large.
ANALYTICAL CHEMIST
Huddersfield

Born out of demerger from ICI, Zeneca is a vibrant international bioscience company comprised of Pharmaceuticals, Agrochemicals and Specialty Chemicals businesses. The Process Technology Department at Huddersfield Works is focused on the research and development of chemical routes and processes for the manufacture of high added-value synthetic organic chemicals.

A high calibre Analytical Chemist is required to work within the multidisciplinary process analysis group. The group is engaged in developing and implementing on-line and at-line analytical solutions to business problems. Longer term R & D programmes, including academic collaborations in the UK and US, are also undertaken.

Applicants should have a sound background in analytical chemistry together with a Ph.D. and/or proven track record in analytical R & D. Expertise in chemometrics would be highly advantageous although applications from any numerate, computer literate analytical chemists are invited.

An attractive salary and benefits package is offered together with excellent opportunities for career development.

Please write with a full CV to Tracey Tyreman, Zeneca Huddersfield Works, PO Box A38, Leeds Road, Huddersfield, HD2 1FF. Closing date: 22nd June 1995.

ZENECA
THE SCHOOL OF PHARMACY
(University of London)
Department of Toxicology

Ph.D. Studentship

Applications are invited for a BBSRC CASE studentship, in collaboration with Glaxo Research and Development Ltd, to investigate the skeletal and cardiac muscle toxicity of p-phenylenediamines. The project will involve histopathological investigations and the development of biochemical and cell culture techniques. The successful candidate will work mainly at the School of Pharmacy, but also in the Pathology Department. Glaxo Research and Development, Ware. Applicants should possess, or expect to obtain, a first or an upper second class honours degree in a relevant biological science, but candidates with a strong background in both histology and biochemistry would be particularly suitable. A non-taxable stipend of £8970 per annum will be paid.

Written applications, a full curriculum vitae and the names of two academic referees should be sent to: Dr J. Turton or Dr C. Waterfield Department of Toxicology, School of Pharmacy 29/39 Brunswick Square, London WC1N 1AX Telephone 0171753 5832 Fax 0171753 5811

Further details of the project are available

Closing date for applications is 21 June 1995
Assistant Waste Regulation Officers (2 posts)
County Engineer's Department
Up to £15,942 (dependent upon qualifications and experience)

You must:
• have a working knowledge of EPA 1990 and COPA 1974;
• have a minimum of one year's Waste Management or other relevant environmental work experience;
• Possess good communication and computer skills including use of word processors/databases/spreadsheets;
• be able to work on own initiative;
• possess an HNC or recognised equivalent in Chemistry, Environmental Science, Chemical Engineering or other relevant subject.

A current driving licence and use of a car is essential.

Car allowance, car loan facilities and private driver contract purchase scheme available. A generous relocation package of up to £5,400 payable in appropriate cases.

Closing date 16 June 1995.

Application forms and further details are available from the County Engineer's Department, Speedwell House, Speedwell Street, Oxford OX1 1NE or telephone Lydia Jewell/Paul Ashby on Oxford (01865) 815702.

DEPARTMENT OF CHEMISTRY

Postdoctoral Research Assistant in Inorganic Chemistry

A postdoctoral Research Assistant is required to work on the project "The Synthesis and Characterisation of Di- and Tri-nuclear Copper Protein Analogues" in collaboration with Dr P Hubberstey. Candidates should have a strong background in organic ligand synthesis and transition metal co-ordination chemistry.

Salary will be within Research Assistant Grade 1A, starting point depending on qualifications and experience.

Applicants should send a detailed CV, together with the names of two referees, to Dr P Hubberstey, Department of Chemistry, The University of Nottingham, University Park, Nottingham NG7 2RD. Informal enquiries may be addressed to Dr Hubberstey, tel: 0115 951 3509.

The University of Nottingham is a research-led institution which provides the highest quality learning environment and is committed to equal opportunities in employment.

The University of Nottingham
CITY OF LONDON SCHOOL

**Physics Laboratory Technician**

£14,196 - £16,383 pa inc

Applicants with City & Guilds/ONC or equivalent plus two years relevant experience, are invited to apply for the post of Physics Technician.

The successful applicant will be responsible to the Head of Department and Senior Physics Technician, and will be expected to organise the day to day practical requirements in a very busy department. The hours of work will be 8.30 am - 4.30 pm.

The Corporation of London is working towards Equal Opportunity.

Application forms and further details can be obtained from: The Bursar, City of London School, Queen Victoria Street, London EC4V 3AL. Tel: 0171-489 0291, Closing date: 23rd June 1995.

SERVING THE SQUARE MILE
DIRIGE
CORPORATION OF LONDON
THE UNIVERSITY OF MANCHESTER  
SCHOOL OF BIOLOGICAL SCIENCES  
Westlakes Research Institute

**BBSRC Industrial Research Studentship**

A research studentship has been awarded to Dr P. McDonald (Westlakes) and Dr K. N. White (Manchester) available on the topic entitled "The distribution of polonium in marine biota", from 20 September 1995. The project is to examine and quantify the uptake, distribution in the tissues and excretion of this naturally occurring radioisotope in marine benthic invertebrates. This is an industrial case award and the student will have access to the wide range of facilities within the School of Biological Sciences and Westlakes Research Institute. Candidates should have, or anticipate obtaining a first or 2(i) degree in an appropriate area of environmental science/ biology. Your application (CV plus names of two referees) should be sent to Dr K. N. White, School of Biological Sciences, 3.614 Stopford Building, University of Manchester, Manchester M13 9PT. Informal enquiries can be made by telephoning 0161 275 3873/3898 or 019946 514 012.

Promoting quality teaching and research  
The World’s first

Master of Medical Sciences (M.Med.Sci) in Assisted Reproduction Technology (A.R.T.)

run by NURTURE (Nottingham University Research and Treatment Unit in Reproduction) is now accepting applications for its fourth year.

For further information please contact: Yasmin Awan, quoting reference NS1, Postgraduate Course Office, Dept of Obstetrics & Gynaecology, University Hospital, Nottingham NG7 2UH, UK. Tel: (44) 0115 970 9451. Fax:(44) 0115 970 9234.

Closing date for applications is 25th August 1995.

MEDICAL PHYSICS AGENCY
MEDICAL PHYSICS

Principal Clinical Engineer
Salary Range: £22,799 - £24,660

The Agency is developing its activities in clinical engineering and applications are invited for this new post based at the Royal Victoria Hospital.

Closing date for receipt of applications is 23 June 1995.

Further details and application forms may be obtained by sending a stamped addressed envelope (10"x7") to:
The Personnel Department Central Services Agency 25/27 Adelaide Street Belfast BT2 8FH Telephone (01232) 324431

AN EQUAL OPPORTUNITIES EMPLOYER
T & N TECHNOLOGY LTD
is part of T&N Plc

The company, based in pleasant surroundings at Cawston House, near Rugby, is the research centre for the development of advanced materials and technology for the international group T&N Plc, which manufacturers automotive, engineering and aerospace components.

The vacancy has arisen within the Surface Technology Department, which is responsible for the development of surface engineering processes employed within the T&N group of companies, for a

MATERIALS / VACUUM TECHNOLOGY SCIENTIST

with a good honours degree in materials science / vacuum technology, to undertake long term development in the field of advanced coatings for internal combustion engine components. A higher degree and the ability to speak French/German would be beneficial.

The successful candidate will have developed an active working knowledge of vacuum coating processes such as sputtering and ion plating, and should have experience of technology transfer from laboratory to production.

Please forward details (quoting Ref SMC/5113 on the envelope) to: Mrs S. M. Clarke Personnel Administrator T&N Technology Ltd
Cawston House, Cawston, Rugby, Warwickshire CV22 7SA
Whatman International Ltd is a world leader in the supply of specialist filtration, separation and purification products for industry and the laboratory, with a well established reputation for quality.

Due to continuing growth in our global business, we now require a

DEVELOPMENT TECHNOLOGIST

You will be a recent graduate chemist with an interest in the chemical modification of substrate materials/membranes. Ideally you will have some practical laboratory experience with substrate modification and/or chromatographic processes, and a knowledge of biochemical / biological systems would be desirable.

You will also be a flexible, innovative person with good problem solving capabilities and a genuine desire to develop a laboratory based career in industry.

We offer competitive salaries and an excellent range of benefits.

Whatman

Please send your CV, or telephone for an application form: Elaine Kelly, Human Resources Department, Whatman International Ltd, Springfield Mill, James Whatman Way, Maidstone, Kent ME14 2LE. Tel: (01522) 692022. Please indicate your salary expectations.

THE EUROPEAN COMMISSION
is carrying out a selection procedure with a view to drawing up a reserve list from which to appoint one agent in career A4 for activities concerning the European Union's scientific and technological policy and the Framework Programme.

SENIOR SCIENTIFIC TECHNICAL STAFF IN THE REMOTE SENSING FIELD
in the following area:

Manager registers and controls of agricultural surfaces group
COM/R/A/136

Candidates must hold an UNIVERSITY DEGREE in a relevant subject with post-graduate qualification and at least 15 years relevant post-graduate experience.

A description of the duties and qualifications required for the announced position and compulsory application form must be requested in writing before 30/6/1995 from:

These application forms, duly completed and signed, must be returned to the above address postmarked not later than 13/7/1995.

REPUBLICATION: Applications with the same reference number submitted at the previous publication will be taken into account.

GENERAL CONDITIONS: Contracts: Temporary contracts (fixed term, renewable). Nationality: Candidates must be a national of one of the European Union Member States. Place of Employment: Commission staff must be available to work in any of the Commission's places of activity and in many cases outside their country of origin. Age: Candidates must have been born after 29/6/1943. The age limit may be waived for temporary agents of European Union institutions, compulsory military or other service, education of children and physical handicap. Details are set out in the documents sent to candidates. Knowledge of languages: Candidates must have a thorough knowledge of one official European Union language (Danish, Dutch, English, Finnish, French, German, Greek, Italian, Portuguese, Spanish or Swedish) and a satisfactory knowledge of a second European Union language.

Applications from officials of European Union institutions will not be accepted. The Commission policy is to ensure equal opportunities for men and women.

Applications are invited for the following posts to study the role of endothelium in diabetic syndromes.

**Senior Scientist** (Research Staff Grade 1A): Salary range £14,317 - £21,519 plus inner London Weighting - starting salary according to experience. A three year project which will involve leading a project on the role of endothelium and endothelial mediators in insulin resistance. The project is part of an academic collaboration between groups in London, Cambridge and Europe. The successful candidate will be responsible for the day to day supervision of a research group of three people and will be part of a larger team. Applicants should ideally have experience of working with animal models as well as cell biology in the field of diabetes. Experience of endothelial cell biology would be an advantage.

**Research Technician** (MLSO Grade 1): Salary range £10,405 - £15,402 plus inner London Weighting. A one year position with a possible extension to three years. The successful applicant will be working in collaboration with Dr C Camacho-Hubner and Dr A Cotterill on aspects of the IGF-1 system in insulin resistance. Experience needed in cell culture techniques, standard radio-immunoassays and molecular biological techniques.

**Research Technician** (MLSO Grade 1): Salary range £10,405 - £15,402 plus inner London Weighting. A one year position with a possible extension to three years. The project involves the use of advanced analytical instrumentation such as gas chromatography mass spectrometry to analyse isoprostanes and related lipid oxidation products in diabetes. Also development of methods for measuring endothelial mediators such as nitric oxide and endothelin.

Applications for all three posts should be in the form of C.V. including the names of two referees and sent to: Professor Erik Anggard, The William Harvey Research Institute, St Bartholomew's Hospital Medical College, Charterhouse Square, London EC1M 6BQ. Informal enquiries can be addressed to Professor Erick Anggard or Dr Martin Carrier (0171-982 6024) and to Dr Camacho-Hubner (0171 601 7443).

Closing date: 15th June 1995.

Working Towards Equal Opportunities.
POSTDOCTORAL POSITIONS IN CONDENSED MATTER THEORY

Applications are invited for two EPSRC funded postdoctoral positions, starting 1 October 1995 and tenable for two or three years. Research (with Professors A. J. Bray and M. A. Moore) will be on the theory of Growth and Ageing in Pure and Disordered Systems. The successful applicants will be expected to work on problems in one or more of the following areas: the kinetics of phase ordering, kinetic roughening, spin glasses and glassy phases generally. A background in relevant theoretical (eg field-theoretic) techniques and/or numerical (eg Monte Carlo) methods will be an advantage. Initial salary will be in the range £13,941 - £15,566 pa on the RA1A Scale.

Application forms (returnable by June 30, 1995) and further particulars are available from the Director of Personnel (Academic Staffing), The University of Manchester, Manchester M13 9PL. Tel: 0161 275 2028 (or apply by e-mail to alan.bray@man.ac.uk). Quote ref: 154/95.

As an equal opportunities Employer, the University welcomes applications from suitably qualified people from all sections of the community, regardless of race, religion, gender or disability. Promoting quality teaching and research.

Analyst
Drug Control Centre - Chelsea

We require an Analyst to join our team in the Centre to analyse samples as part of its role in the control of drug abuse in sport. The Centre is well equipped with the modern instruments necessary to meet the stringent scientific requirements of the internationally important work. The techniques used routinely include immunoassay, high resolution gas chromatography, HPLC and GC-MS. A training programme is in operation for staff. Although relevant experience would be an advantage, we welcome applications from enthusiastic and motivated graduates who are newly qualified. The Centre operates to standards of good laboratory practice and the requirements specified by NAMAS.

Initial appointments are for one year but are renewable with the opportunity for permanent employment.

Salary range £10,509 to £14,909 per annum plus £1,776 London Allowance (starting salary dependent upon age, experience and relevant skills).

For further information and an application form contact Mrs Sarah Wilson, Administrative Group, Drug Control Centre, King's College London, Manresa Road, London SW3 6LX. Telephone: 0171 333 4880 or 0171 333 4870. Ref no: ASO/KP/25/95

Closing date: 16 June 1995.

EASTMAN DENTAL INSTITUTE FOR ORAL HEALTH CARE SCIENCES

BIOMATERIALS LECTURER
BIOMATERIALS TECHNICIAN

The Eastman has focused future research and service efforts and committed additional resource to the prevention, diagnosis and management of the important oral and dental diseases, in the context of the wider local, national and international communities.

This is part of an initiative to complement the activity in relation to Biomaterials. The major research areas are glass polyalkenoate cements, laser application and hard tissue removal, polymeric systems as release devices, and ceramics.

LECTURER (Non Clinical)
BM132
This full-time post would ideally suit a postdoctoral scientist. The successful applicant would be expected to be active in research and teaching/supervision of postgraduates, both for clinical MSc courses and Ph.D. The post is available for three years and the salary is £14,79 - £25,735pa plus £2134pa London Weighting.

RESEARCH TECHNICIAN
BM232
This full-time post would be expected to assist and support research activities. Good time management and organisational skills are required. Experience in a research laboratory will be an advantage. The post is available for one year in the first instance at a salary of £9,871 - £11,069pa plus £2262pa London Weighting.

For further information contact Dr Gavin Pearson (0171-915 1019). For a job description and application form please quote the reference number and contact Personnel Department on 0171-915 1110/1096 (answerphone), Eastman Dental Institute, 256 Gray's Inn Road, London WC1X 8LD.

Closing date: 16 June 1995.
KCH

KENT AND CANTERBURY HOSPITALS NHS TRUST
Haemophilia Centre

**M.L.S.O.** 3 £19,489 - £21,923 p.a.

Following the transfer of the Haemophilia Centre to a purpose built facility at Kent and Canterbury Hospital, the laboratory has been re-equipped with state of the art equipment and is fully computerised.

The laboratory provides a specialist diagnostic service for the East Kent area and has on-going clinical and scientific research programmes in which the successful candidate will be expected to participate. The post is ideal for a person who would like to contribute to the expansion and development of the laboratory service within the Centre.

Applicants should be State Registered and hold the Fellowship of the Institute of Biomedical Sciences or equivalent, as well as having gained a wide range of experience in the field of haemostasis and thrombosis. A post graduate qualification or demonstrable research experience would be an advantage.

Informal enquiries or visits may be arranged by contacting Wynne Jones on 01227 783168. Application forms and job description are available from the Haemophilia Centre, Kent and Canterbury Hospitals NHS Trust, Ethelbert Road, Canterbury, Kent CT1 3NG, tel: 01227 783157 (direct line).

Closing date: 25th June 1995.

Taking Care Ahead
The Trust is Committed to Equal Opportunities and Operates a No Smoking Policy
WESTLAKES
RESEARCH INSTITUTE
GENETICS UNIT

CLINICAL CYTOGENETICIST/ MOLECULAR GENETICIST

The Genetics Unit, Westlakes Research Institute, situated on the fringe of the Lake District, undertakes a programme of research in the areas of population monitoring and radiation genetics, and provides a clinical cytogenetics service for West Cumbria.

We now require a scientist primarily to undertake diagnostic analysis, but the successful candidate will have the opportunity to participate in the research programme. Candidates should have a science degree and appropriate experience. Conditions of employment include 25 days' annual leave, bonus scheme and flexible working.

To apply please forward a full CV and covering letter to: Miss A. Gallagher, Westlakes Research Institute, The Princess Royal Building, Westlakes Science & Technology Park, Moor Row, Cumbria CA24 3LN. For further details: Telephone (01946) 514060. Fax: (01946) 514056. Closing date: 16 June 1995.

UNIVERSITY OF LEEDS

Ph.D. Studentships

ICRF CANCER MEDICINE RESEARCH UNIT AND CENTRE FOR CANCER RESEARCH

A three year studentship is available in the Candlelighters Research Laboratory, Cancer Research Unit within the Research School of Medicine. The project available for study is

The role of growth factors and their receptors in the development of neurally derived tumours in children.

The project will utilise molecular cell biology techniques. The successful applicant will have, or expect to gain, at least an upper second degree in a biological science. The award is to the value £8,300 per annum, available from October 1995.

Informal enquiries and applications should be made directly to Dr Sue Burchill, Cancer Research Unit, St James University Hospital, Leeds LS9 7TF, tel: 0113 283 7034, fax: 0113 242 9886. Closing date for applications: 30 June 1995.

DEPARTMENT OF BIOCHEMISTRY AND MOLECULAR BIOLOGY

BBSRC Special Studentship

To use biochemical and molecular biological approaches to characterise the enzyme that adds the preformed glycosyl-phosphatidylinositol (GPI) anchor onto eukaryotic cell-surface proteins.

MRC Collaborative Studentship

To investigate the processing of the amyloid precursor protein in the context of Alzheimer's disease in collaboration with SmithKline Beecham Pharmaceuticals.

Both studentships for the Department of Biochemistry and Molecular Biology are available from October 1995. Enquiries and applications (including a full CV and the names and addresses of two academic referees) to Dr N M Hooper (BBSRC and MRC studentships; tel: 0113 233 3163; email n.m.hooper@leeds.ac.uk), or Prof A J Turner (MRC Studentship; tel: 0113 233 3131; email a.j.turner@leeds.ac.uk), Department of Biochemistry and Molecular Biology, The University of Leeds, Leeds LS2 9JT, fax: 0 113 233 3167.

Closing date for applications: 19 June 1995.

The University of Leeds promotes an Equal Opportunities Policy.
Promoting excellence in teaching, learning and research.
Optoelectronics Research Centre

Ph.D. STUDENTSHIPS

Exciting opportunities for postgraduate research leading to a Ph.D. exist in the Optoelectronics Research Centre (ORC) at Southampton University. The ORC is a large interdisciplinary research centre with an international pioneering reputation in lasers, guided-wave and fibre optics, optical communications, optical sensor technology, optical physics and solid state laser technology. The present openings are for experimental and theoretical work in the following areas:

Research in:
• Distributed Fibre Optic Sensors
• Fibre Fabrication
• Planar Waveguides
• Fibre Sensors
• Non-Linear Optics
• Optical Materials Growth

These studentships are available to UK applicants only with a degree of 2(i) or higher in engineering materials science, chemistry, physics, or related subjects. Application forms and further information may be obtained from Heather Spencer, Optoelectronics Research Centre at the address below. Tel: (01703) 593150 or email hjs@orc.soton.ac.uk. Closing date: 30 June 1995. Ref No R/428.

Working for Equal Opportunities

University of Southampton
University of Southampton Highfield Southampton SO17 1BJ
ENVIRONMENTAL INFORMATION SYSTEMS - PROGRAMMER

A programmer is required to support the work of the Environmental Information Systems section at the Institute of Hydrology. The objectives of the section are to design and develop advanced environmental databases and to operate a major data centre (LOIS).

The post will support both of these activities which will require data format and retrieval skills. In addition the post-holder will support the design and development of the IH geographically based environmental information system (WIS).

Skills required include C and Visual Basic programming, RDBMS table design, data modelling, SQL data format translation and dictionary creation, and an interest in cross platform development.

To qualify you should have a good first degree in computing science or considerable programming experience after a relevant degree. An appreciation of hydrology, including water chemistry, and GIS tools would be an advantage, as would familiarity with both PC and UNIX operations.

The post is initially for a period of 3 years and salary will be in the range £11,138 to £19,669 or £13,025 to £23,009 depending on qualifications and experience. Application forms are available from Sue Fenton, Institute of Hydrology, Wallingford, Oxon OX10 8BB. Telephone: (01491) 838800. Closing date: 23 June 1995.

The Natural Environment Research Council has an equal opportunities policy and welcomes applications from all sections of the community.

THE BINDING SITE LIMITED

ELISA TECHNOLOGIST

The Binding Site Limited is a rapidly expanding manufacturer of diagnostic kits and reagents marketed world-wide.

To help expand the range of ELISA kits we manufacture, we wish to recruit an individual experienced in ELISA kit development and manufacture in a commercial environment.

The role of the successful candidate will be structured to take into account the degree of relevant past experience in ELISA, other immunoassays and managerial/supervisory duties. The position is one that should be viewed as having good career prospects.

Please apply in writing, with full CV and clearly stating salary requirements to Terri Malcolm, Personnel Department, The Binding Site Ltd, PO Box 4073, Birmingham B29 6AT, quoting reference EL14 to arrive by Wednesday 7 June.

The National Hospital for Neurology and Neurosurgery

Clinical Scientist

A Clinical Scientist is required for a six month maternity cover for the Autonomic Investigation Unit. This national unit provides an investigative clinical service and research for a variety of autonomic disorders. A life sciences degree or nursing background is advantageous.

For information and an application form please contact the Personnel Department on 0171 837 3611, ext 3125. Closing date for applications: 16 June 1995.

Working Towards Equal Opportunities.
EPSRC Earmarked Ph.D. Studentship
Lyotropic liquid-crystalline cubic phases

Applications are invited for an EPSRC Earmarked Ph.D. Studentship to work on a project concerned with the structure and phase behaviour of surfactant and amphiphile systems forming novel inverse micellar cubic liquid crystals. The project involves the study of these novel phases by Xray and neutron diffraction, electron microscopy, pulsed field gradient NMR and conductivity.

For further details please contact:
Dr John Seddon, Department of Chemistry, Imperial College, London SW7 2AY. Tel: 0171-594 5797; Fax: 0171-594 5801; Email: J.Seddon@ic.ac.uk
Aston University
Pharmaceutical & Biological Sciences

6 Ph.D. Studentships
October 1995

to support research in the following areas.

Medicinal Chemistry; Combinatorial Chemistry; Natural product synthesis; Drug Delivery; Molecular Biology; Microbiology.

Contact Dr P. A. Lambert for further details and informal discussion: Aston Triangle, Birmingham B4 7ET. Tel: 0121 359 3611, ext 4471 or 4170.
ENGLISH NATURE

Fixed term appointment
For two years with possible extension

English Nature is the Government body which promotes the conservation of wildlife and natural features of England, employing over 700 people throughout the country.

Assistant Conservation Officers
English Nature currently has two vacancies for Scientific Officers based at the Taunton office.

Post 1 - Avon
The postholder will be required to assist the Conservation Officer for Avon with the full range of scientific and other duties including planning related matters and Estuarine issues, needed to implement English Nature's work in the county.

Post 2 - Somerset Levels and Moors
The postholder will assist the Conservation Officer for the Levels and Moors. One of their principal roles will concentrate on developing and consolidating links with other organisations and individuals, and creating a balance between nature conservation goals and a viable agricultural system.

The successful candidates will be highly motivated and work well within a team.

Qualifications: Both posts require a degree in a relevant scientific subject and a current UK driving licence.

Salary: Starting salary will be dependent upon qualifications and experience, but will be in the Scientific Officer range £11,138 to £14,900. Increments thereafter will be performance related.

For an application form and further details, please contact Personnel Services, English Nature, Northminster House, Peterborough PE11 1UA. Telephone 01733 318219 quoting reference number E23-10-08, and the post number you are applying for.

The closing date for completed application forms is 15 June 1995.

Interviews will be in Taunton in the week commencing 10 July 1995.

English Nature is working towards Equal Opportunities and welcomes applications from all members of society.

Research Instruments, part of Oxford Instruments plc, is a world leader in the design and manufacture of equipment for research into the physical sciences. Profitable, innovative and successful worldwide, we offer excellent career prospects to bright self-motivated applicants, and are currently looking to fill the following vacancy:

**Project Engineer – SPM/STM**

Reporting directly to the Engineering Manager, we are looking for a project engineer to work on the design and application of Scanning Probe Microscopy products. Initially based in Cambridge, it is expected that the successful candidate would move to the Oxford area to work at the Research Instruments site in Eynsham.

Applicants should possess a Ph.D. involving SPM or associated technologies, and be either newly qualified, or working as a Research Fellow or in industry. The successful candidate will be strongly self-motivated and 'hands-on', having designed and built an SPM as well as having used the instrument. Candidates should also be able to work on their own initiative, be able to demonstrate competent communication skills, and be able to work within a team environment. Although not essential some experience in cryogenics would be advantageous.

For the right person we can offer a highly attractive salary, excellent large company benefits, good prospects for career progression and relocation assistance where appropriate.

For further details and an application form for the above post, contact Rose Woodward on Tel. (01865) 882855, or write to her at:
Oxford Instruments (UK) Ltd Research Instruments
Old Station Way Eynsham WITNEY OX8 1TL

Closing date for applications: Friday 16th June 1995.
A subsidiary of Oxford Instruments plc

OXFORD
Research Fellow

As part of a recently awarded Department of Health research project involving collaboration with the School of Animal and Microbial Sciences, the University is looking to appoint a Research Fellow for a period of up to 2 years. The research will be aimed at investigating the effect of thermal processing on the colour of meat (and relate this to microbiological safety). The appointee will work as part of a team under the direction of Professor D. A. Ledward and Dr. R. W. A. Park. Informal enquiries to Professor D. A. Ledward on (01734) 318715. Apply for Application Form and further particulars to Personnel Officer, The University of Reading, Whiteknights, P.O. Box 217, Reading RG6 6AH telephone (01734) 318754. Closing date 21 June 1995. Please quote Ref. R9534.

A centre of excellence for university teaching and research.
THE DURRELL INSTITUTE OF CONSERVATION AND ECOLOGY

LECTURESHIP IN BIODIVERSITY CONSERVATION

Applications are invited for this newly-established Lectureship to take up appointment by September 1995 or as soon as possible thereafter in a highly-regarded and expanding research Institute with existing strengths in the natural and social sciences relevant to biodiversity conservation, environmental management and sustainable solutions for development.

The successful applicant will have an excellent publication record of original research, international experience in biodiversity conservation, evidence of an innovatory and entrepreneurial flair attracting support for their work, and demonstrable success in teaching. He/she will be expected to provide R&D, consultancy and postgraduate training leadership in the development of the natural sciences underpinning conservation and should be able to interact effectively with the other research and training programmes within The Institute and with our partners worldwide.

Established R&D scientists in any branch of the natural sciences pertaining to biodiversity conservation can apply but we are particularly interested in those who can focus much of their research and consultancy on areas relevant to organismal conservation, information systems, biodiversity databases, and/or population conservation. We expect to hold the interviews week beginning 3 July.

Salary on the grade A/B scale for Lecturers (£14,756 - £25,735 p.a)

Further particulars are available from The Personnel Office, The Registry, The University, Canterbury, Kent, CT2 7NZ. Telephone (44) 1227 764000 extension 3674 or (44) 1227 475482 (24 hour answerphone), email: M.A.Knapp@ukc.ac.uk Please quote reference number A95/105.

Informal enquiries concerning the post may be addressed to the Institute Founder Professor L. R. Swingland or the Executive Director, Dr. Mike Walkey (Tel: (44) 1227 47480; Fax: (44) 1227 475481).

POSITIVE ABOUT DISABLED PEOPLE

The University is committed to implementing its Equal Opportunities Policy.
Closing date for applications: 19 June 1995.

UNIVERSITY OF KENT
AT CANTERBURY

Excellence in Higher Education at Britain's European University
THE UNIVERSITY OF MANCHESTER

TWO RESEARCH TECHNICIANS are required for different projects in the Department of Orthopaedic Surgery.

A. A one year study comparing plasma protein profiles in normal healing and slow healing fractures. Candidates should have experience of one and two dimensional electrophoresis (not necessarily in a medical context). Experience of image analysis and statistical packages an advantage.

B. A two year study examining the role of chemical and physical stimuli on tendon repair. Candidates should ideally have experience of tissue culture. An understanding of biomechanics or experience of small scale experimental equipment an advantage.

Application form and further particulars (please specify A or B or both) from Dr Carol Evans, Department of Orthopaedic Surgery, Clinical Sciences Building, Hope Hospital, Eccles Old Road, Salford M6 8HD.

Closing date 20 June 1995.

As an equal opportunities employer, the University of Manchester welcomes applications from suitably qualified people from all sections of the community regardless of race, religion, gender or disability.

Promoting quality teaching and research

**Divisional Safety Adviser**

CAMR is seeking a Divisional Safety Adviser to provide direct support and guidance to its Divisions of Production, Research and Quality, Safety and Scientific Resources.

**Experience of Microbiology and Containment**

A good appreciation of the Biotech Industry

**Excellent communication skills, including training competencies**

Candidates may not necessarily at present be employed full-time in safety, but will have had sufficient exposure to the areas above. The successful candidate will be responsible to the Head of Safety and will be provided with an ongoing Personal Development programme.

Further information, job description and application form can be obtained from the Personnel Department (Post No 1203). Closing date for applications is 16th June 1995.

CAMR is an Equal Opportunities Employer and is a healthy smoke free environment. The Centre has a day nursery facility for children from birth to 5 years.

Previous applicants need not re-apply.

**Salary £17,326 - £20,270**

EMBRYOLOGIST - IVF UNIT
Department of Obstetrics and Gynaecology

Applicants are invited for the post of embryologist to work in the IVF Unit. Experience in microassisted reproduction would be advantageous but not essential.

The successful candidate will be appointed at the appropriate grade on the University Technician scales, depending on experience and qualifications. The post is full-time and the contract will be issued on an annually renewable basis.

Further details and an application form from the Personnel Officer, St George's Hospital Medical School, Cranmer Terrace, London SW17 0RE, 0181-725 5020 (24-hour answerphone).

UNIVERSITY COLLEGE LONDON
Department of Electronic & Electrical Engineering

**Technician**

A position is available for a Technician to support laboratory research in the above department. Candidate must have experience in the following: Vacuum techniques, Machining, Optical Engineering and Thin Films Growth and to provide administrative support when required.

Applicants must be well motivated, flexible and have the ability to work on their own initiative and in a team. Computer skills are an advantage but not essential. Salary on Technician Grade E £16,282 - £18,040 inclusive of London Weighting.

CV including the names and addresses of two referees and dates when you will be unable to attend interview to Jessica Amrouni, Department of Electronic & Electrical Engineering, UCL, Gower Street, London WC1E 6BT.

Closing date is 15 June 1995.

Working towards Equal Opportunity
Pursuing excellence in education and research
UNIVERSITY OF LEICESTER

MSc in Molecular Pathology and Toxicology

This is a one-year full-time course, commencing January 1996, providing a thorough training in the rapidly advancing fields of molecular biology and mechanistic toxicology. A five-month project placement with a participating industrial enterprise is an integral part of the course.

The course gives emphasis to the development of personal skills, including information technology, and provides practical experience in the latest molecular techniques. It is particularly relevant for those wishing to pursue a career in pharmaceutical biotechnology, health care and environmental control industries, as well as academic research.

The MSc course has a modular design and may be undertaken on a part-time basis in certain circumstances.

Funding for eligible candidates is available from the Training For Work Programme, and places are also available for self funding, sponsored and overseas students.

Write for further details and an application form (enclosing an A4, stamped, addressed, envelope) to Mrs W. A. Pitts, Department of Pathology, Level 3, Clinical Sciences Building, Leicester Royal Infirmary, PO Box 65, Leicester LE2 7LX.

Closing date for applications: 29 September 1995.

We operate an Equal Opportunity Policy
UNIVERSITY OF WESTMINSTER

Post Doctoral Researcher
Visualisation of Air Flow (2 years in the first instance)
Salary £15,345 - £18,174

The Research in Building Group is seeking a physicist, electrical engineer or similarly qualified post-doctor, to work with Professor J Littler on the use of laser light sheets to visualise air flows in buildings.

S/he will assist in the design and testing of equipment and should therefore be capable of exercising initiative and working to deadlines.

For an application form and further details send an A4 sized stamped self addressed envelope clearly marked Ref 561 /ENV to the Recruitment Section, 115 New Cavendish Street, London W1M 8JS.

Closing date: 20 June 1995.

An equal opportunities employer
Ph.D. STUDENTSHP

An Industrial Collaborative Studentship, supported by the Medical Research Council and Cruachem Ltd, is available from 1 October 1995 in the laboratory of Professor Barklie Clements FRSE. Dr Vaman Rao, Cruachem Ltd, will be the industrial supervisor. The research will aim to define the location of viral and cellular transcription, transcripts and RNA processing in relation to the host cell nuclear matrix, in cells infected with herpes simplex virus. A wide range of molecular techniques, electron microscopy and *in situ* hybridisation using substituted oligonucleotides will be important for this project. Informal enquiries may be made to Professor Clements (0141 330 4027; CLEMOIB@vir.gla.ac.uk) and further details are available from Miss M. Campbell (0141 330 4029; M.Campbell@vir.gla.ac.uk).

The studentship will carry the usual MRC studentship stipend of £6,551 (with increments) plus Cruachem's supplement of £2,500 per year. Applicants should have or expect to graduate this summer with at least an upper second class honours degree in virology, molecular biology or a related field.

Applications, including a full CV and names and addresses of at least two academic referees should be sent by 23 June 1995 to Miss M. Campbell, Institute of Virology, Church Street, Glasgow G11 5JR. Ref: NS/8748.

An equal opportunities employer.

The University of Glasgow is an exempt charity dedicated to excellence in teaching and research.

THE UNIVERSITY OF SHEFFIELD

Ph.D. STUDENTSHIP

Applications are invited for a research studentship funded by a BBSRC Industrial award in conjunction with SmithKline Beecham working on gastrointestinal control mechanisms. The successful candidate will work with Drs D. Grundy and P. Hardcastle using a range of techniques to study intestinal motor and secretory function and, in particular, will apply in neurophysiological techniques to the study of the autonomic nervous innervation. The successful candidate will be expected to start as soon as possible after September 1995. A stipend of £7460 per annum will be paid, together with postgraduate tuition fees. Applicants should have, or expect to obtain, at least a 2.1 in an appropriate biological science.

Written applications with CV and names/addresses of two referees should be sent to Dr D. Grundy, Department of Biomedical Science, The University of Sheffield, Western Bank, Sheffield S10 2TN by 12 June. Informal enquiries phone 0114 282 4657 or E-mail: d.grundy@sheffield.ac.uk

Founded in 1905, the University of Sheffield provides higher education within a research-led environment. We encourage equality of opportunity for all.
Could you manage our biochemistry quality control activities?

Celltech Group plc is one of the largest emerging pharmaceutical companies in Europe. Celltech Biologics is the world's leading independent manufacturer of monoclonal antibodies and recombinant proteins for the biotechnology and pharmaceutical industries.

We are now looking for a biochemistry or life science graduate with at least 5 years' QC experience (including managerial/supervisory responsibilities) in pharmaceutical manufacturing to oversee our QC biochemistry activities.

These include raw material, in-process, final product and validation sample testing, as well as stability and investigational studies. Reporting to the Quality Control Manager, you will be responsible for leading a team of 12 in a GMP-regulated laboratory environment, and will interact extensively with our production, QA and sales and marketing functions.

A competitive salary will be supported by attractive large-company benefits and excellent conditions of employment. If you meet our requirements and combine a responsible, enthusiastic approach with an ability to operate to tight deadlines, send your detailed cv - quoting ref: 907 - to the Recruitment Officer, Celltech Group plc, 216 Bath Road, Slough, Berkshire SL1 4EN.

RESEARCH FELLOWSHIP IN NEURAL MECHANISMS OF LEARNING

Applications are invited for a two-year postdoctoral fellowship, which may be renewed at the Interdisciplinary Research Centre at the University of Sussex, to work on a multidisciplinary research project to investigate learning in a model molluscan system. The project is suitable for applicants whose interests are mainly neurophysiological but strong interactions will occur with related projects involving behavioural analysis, neuropeptides and NO signalling, in vitro circuit reconstruction and computer modelling of neural networks.

Applicants should have practical experience of intracellular recording techniques with an interest in synaptic pharmacology. Salary will be on the Grade 1A or Grade II scale for Research and Analogous Faculty £14,317 to £21,519 or £19,848 to £26,430 per annum (recently revised). The level of appointment will be based on the experience of the candidate. The successful applicant will be expected to oversee appropriate DPhil projects.

Further details may be obtained from Professor P. R. Benjamin. Tel: 01273 678506. Email: baff5@sussex.ac.uk Professor R. J. Andrew. Tel: 01273 678504. Email: R.J.Andrews@sussex.ac.uk or Professor M. O'Shea. Tel: 01273 678508. Email: bafu7@central.sussex.ac.uk

Applications, including a CV and the names, addresses and telephone numbers of two referees, should be sent to The Administrator, Sussex Centre for Neuroscience, School of Biological Sciences, University of Sussex, Falmer, Brighton BN1 9QG. Fax: 01273 678535. Tel: 01273 678743. Email: A.Fincham@sussex.ac.uk Closing date: 30 June 1995.

Promoting Excellence in Teaching, Learning and Research

An Equal Opportunity Employer
UNIVERSITY OF OXFORD
Department of Biochemistry
Medical Research Council Biochemical and Clinical Magnetic Resonance Unit

Research Studentship

An MRC Research Studentship is available from October 1995 for three years. The Unit studies the biochemical basis of human disease and aims to link clinical investigations using MRS with an understanding of the underlying cellular processes.

Applications are invited from candidates who are interested in any area of the Unit's work and who have, (or who will shortly have), a first or upper second class degree in a relevant subject. Written applications should include a full curriculum vitae together with the names of two professional referees and should be sent to Mrs A Roche, Department of Biochemistry, South Parks Road, Oxford OX1 3QU or faxed on (01865) 515059 by the 16th June 1995.

The University and the MRC exist to promote excellence in education and research, and are equal opportunities employers.
Required by leading and progressive independent boarding school as soon as possible after August 1st to manage and support the subject throughout the curriculum. The applicant is likely to be a graduate, with some experience of Apple Systems and Ethernet Networking, and should be knowledgeable and enthusiastic about supporting both hardware and software in a lively and hardworking school environment. Familiarity with at least some of the major applications packages and an ability to solve problems under pressure are essential. Ring or write for further details from: The Director of Studies, Bradfield College, Berkshire RG7 6AR. Tel: 0 1734 744203.

Closing date: June 12th, 1995.

UNIVERSITY OF SURREY
Promoting Excellence in Education and Research

TEACHING LABORATORY SUPERINTENDENT
Department of Physics

Following the restructuring of our undergraduate and MSc teaching laboratories we are looking for a Technician Grade F to be responsible for the operation of these laboratories. The successful candidate, who should have a background in physics and/or electronics and with a knowledge of computing, will be expected to take an active role in the development and supervision of new experiments as well as the day to day running of the laboratories and their associated staff.

Salary in the range £16,252 to £17,755.

Further particulars and an application form please contact the Personnel Office, (GMJH) University of Surrey, Guildford GU2 5XH or telephone (01483) 259370. Closing date 22nd June 1995.

The University is committed to an Equal Opportunities Policy.
The South West Thames Regional Genetic Service is based at St George's Hospital and provides an integrated clinic and laboratory service to the South West Thames Region.

Applications are invited for the post of Clinical Molecular Geneticist Grade B to join our expanding team in the provision of an effective and high quality service to patients.

A good degree and a minimum of two years relevant experience in a molecular genetics laboratory is required for this post. The post holder will be expected to contribute the full range of procedures carried out in a busy diagnostic laboratory, although training may be given where necessary.

For further information or to arrange an informal visit, please contact Rohan Taylor on 0181725 5964/5965. For an application form and a job description, please contact Human Resources Directorate, Recruitment Bureau, Level 1, Grosvenor Wing, St George's Hospital, Blackshaw Road.

Closing date for applications is: 15 June 1995.

King's College School of Medicine and Dentistry of King's College London

**Medical Technical Officer**  
Academic Department of Medicine

We need a Medical Technical Officer to carry out analysis of serum and tissue samples by radioimmunoassay, western blotting, immunohistochemistry and northern analysis. There will also be the opportunity to work on other ongoing projects within the Department. The post is available immediately and would suit a postgraduate, ideally with experience in techniques of immunohistochemistry and/or molecular biology.

The appointment is funded by the Lindbury Trust for two years (annually renewable) in the first instance. Salary will be within the range £12,975 - £13,840 (inclusive of London Weighting Allowance) per annum. Interested applicants are invited to contact Dr. John Miell on 0171 737 4000, extension 4216 to discuss the post.

For further details and an application form please telephone the Personnel Department, on 0171346 3011.

The closing date will be 16 June 1995.

Promoting excellence in teaching, learning and research

Equality of opportunity is college policy

For all Scientists & Technicians

Looking for a job or a change of job? Whatever your level of qualification or experience we have a wide range of both temporary and permanent positions throughout the UK.

Registration is easy:

First call your nearest Lab Staff Ltd office or send them your C.V. and a list of your laboratory skills.

POSTDOCTORAL RESEARCH ASSISTANT

To develop molecular epidemiology methods to study virus transmission, a Postdoctoral Research Fellow is required for at least a 12 month period. Experience in the polymerase chain reaction, sequencing, cloning and/or related techniques is desirable and individuals without a Ph.D. but with appropriate experience are encouraged to apply. Salary will be dependent upon qualifications and experience. The successful applicant will join a research team working in the Department of Medical Microbiology, University of Edinburgh.

For further information contact Dr P. Simmonds, Department of Medical Microbiology. University of Edinburgh. Tel: 0131 650 3138 or Fax 0131 650 6531 or Dr P. L. Yap, Blood Transfusion Service. Tel: 0131 536 5302 or Fax: 0 131 536 5301.

For a job description and application form, contact the Personnel Department, Blood Donor Centre, 41 Lauriston Place, Edinburgh or telephone 0131 536 5300 during office hours.

The closing date for this post is Friday 16 June 1995.

The World Conservation Monitoring Centre (WCMC), an independent charity founded in 1987 by IUCN, WWF and UNEP, provides information services on the conservation and sustainable use of species and ecosystems, and supports others in the development of their own information systems.

Applications are invited for the post of European Officer to co-ordinate the Centre's activities in Europe, particularly with respect to the European Environment Agency. Essential qualifications include:

- MSc or Ph.D. in a biological, geographical or socio-economic science.
- At least five years' experience working with European institutions and initiatives concerned with biodiversity conservation.
- Fluency in English and at least two other European languages.

Persons seeking a secondment to WCMC are encouraged to apply.

The appointment will be made initially for two years, with a salary up to £19,431 per annum.

An excellent pension and insurance package is offered. Full post description is available on request. Applications, with full CV and the names of two referees, should be sent by 20 June to: Personnel Officer, WCMC, 219 Huntingdon Road, Cambridge CB3 ODL, UK. Fax: +44 1223 277 314. Email: personnel@wcmc.org.uk. Interviews will be held on 29 June.

Renewable Natural Resources Research Strategy
Natural Resources Systems Programme (NRSP)

Invitation to Submit Capability Statements

1. The aim of the Overseas Development Administration (ODA) is to help people in countries poorer than our own to improve their lives. To achieve this, ODA will take actions which promote sustainable economic and social development. One way that ODA seeks to promote development is through the provision of aid to Developing Countries in the Renewable Natural Resources sector (agriculture, livestock, forestry, fisheries and environment). One component of this aid is support to research through the Renewable Natural Resources Research Strategy (RNRRS), which is administered by ODA's Natural Resources Research Department.

2. An important aspect of the RNRRS is that the research which ODA supports should be demand-led. This means that research is targeted at problems which have been identified in Developing Countries as significant constraints to progress and productivity in the NR sector, particularly amongst poorer peoples. One programme within the RNRRS which particularly addresses this aspect is the Natural Resources Systems Programme (NRSP). Six types of Production System have been identified within the NRSP; these are: High Potential, Semi-Arid, Peri-Urban, Hillsides, Land/Water Interface, and Forest/Agriculture Interface. The aim of the NRSP is to increase productivity and productive potential within these respective Production Systems through application of systems-based research in specified developing countries. The NRSP is managed by the Systems Management Office (SYMO) located within ODA.

3. The ODA now invites UK organisations and institutes with a proven track record in systems-based research and related fields, particularly from those with working experience in developing countries, to submit a capability statement of research experience and capabilities in the systems areas specified. At this stage we are not seeking invitations to bid for projects but responding organisations may be invited, on the basis of their expertise and experience, to tender at a later stage for research in defined areas.

4. A background document on the NRSP is available by contacting Sandra McGuire on 01355 843435.

Capability Statements should be submitted by 23 June 1995 to ODA, Contracts Branch, Ref AH369/McG/NS, Abercrombie House, Eaglesham Road, East Kilbride, Glasgow G75 8EA.

ODA
OVERSEAS DEVELOPMENT ADMINISTRATION
BRITAIN HELPING NATIONS TO HELP THEMSELVES
Ecosurveys Ltd is one of Britain's foremost specialist ecological consultancies and has a range of projects in the UK and overseas. We are expanding and require an experienced botanist, vertebrate zoologist and eco-management and audit specialist, one of whom will be appointed at a senior level. The successful applicants will:

• have a minimum qualification of a degree and preferably a doctorate;
• have experience in project and people management;
• produce high quality work, even under pressure;
• communicate effectively in both speech and writing; and
• be enthusiastic, imaginative and willing to contribute to a diverse range of projects.

The botanist should be highly competent in plant identification and have several years experience in assessing the ecological impacts of projects and producing conservation management plans. The zoologist should be experienced in the survey of birds and protected species, in particular, badgers, bats and amphibians. The eco-management and audit specialist should have experience of BS7750, EMAS or site environmental auditing and be prepared to work overseas.

Pay and conditions are negotiable according to abilities and qualifications. For an informal discussion contact Dr Tim Coles or Chris Birkinshaw.

Apply by sending your CV to:
Ecosurveys Ltd. Priory Lodge, Hagnaby, Spilsby, Lincolnshire PE23 4BP. Tel: 01790 763665- Fax: 01790 763417 E-mail: tcoles@ecosurveys.win.uk.net
Up to three postgraduate research studentships are available starting in October 1995. The areas of study are:

Project 1 - The use of VA mycorrhizal fungi in the establishment, growth and disease resistance of turf grasses.

Project 2 - Water quality management for golf course irrigation.

Project 3 - Respiration monitoring of potatoes in store with relation to storage life and store design.

Project 4 - The effect of elevated winter temperatures on the growth, development and yield of overwintering temperate crops.

Appointees will be expected to register for a MPhil/Ph.D. degree. Candidates should have at least a 2.1 degree or equivalent in an appropriate subject. Further enquiries and applications, including a full CV with the names and addresses of two academic referees, to Personnel Officer, Writtle College, Chelmsford, Essex CM1 3RR, UK. Tel: 01245 420705.

Please mark envelope with the Project No you are interested in.

Ph.D. Scholarship in Australia

For a project in porphyrin supramolecular chemistry and molecular architecture. Stipend A$16,000 per year for 3 years (tax free), plus waiver of overseas student fees. Available immediately. Contact A/Prof M J Gunter, Department of Chemistry, University of New England, Armidale NSW 2351, Australia. Fax 61 67 71 1563; telephone 61 67 73 2767; email mgunter@metz.une.edu.au

Closing date: 30 June, 1995.
Trainee MTO £6371 to £7785 + LWA

Recent graduates in Biological or Biomedical Science degrees are invited to apply for a training post as a Medical Technical Officer on this busy diagnostic unit. The unit is a new six-bedded ward dedicated to monitoring patients with epilepsy and sleep disorders using equipment developed "in-house". The job will involve direct patient contact and the opportunity to work with up-to-date physiological monitoring equipment in a joint clinical / academic setting. Full training in the techniques required will be given, and the post offers excellent career prospects.

For further details and to arrange an informal visit, contact Catherine Scott on 0171 829 8746.

Application forms are available from the Personnel Department, The National Hospital for Neurology and Neurosurgery, Queen Square, London WC1N 3BG. Closing date: 16 June 1995.
MAFF

AGRICULTURAL RESEARCH REQUIREMENTS 1996/97
OPEN CONTRACTING SCHEME
Proposals for research projects, to begin in 1996/97, are invited for consideration under the above scheme in the following areas:

VETERINARY SCIENCE
OCS967A Alternatives to the Chemotherapeutic control of sheep scab.
OCS967B Isolation and improved diagnosis of Bovine *Neospora*.
OCS967C An economic study of important non notifiable diseases of farm animals.

ANIMAL SCIENCE & BIOTECHNOLOGY
OCS967D Can the introduction of stress-tolerance genes into crop plants lead to increased weediness?
OCS967E Sources of n-3 polyunsaturated fatty acids, additional to fish oil, for livestock feeds.

HORTICULTURE SCIENCE
OCS967F Epidemiology of apple canker.
OCS967G Propagation of woody ornamental species.

PESTICIDES SAFETY & ARABLE CROPS
OCS967H Slug Population Dynamics.
OCS967J Pesticide adjuvants from vegetable oils.

ENVIRONMENTAL RESEARCH
OCS967K Pilot study to develop a whole farm environment project.
OCS967L Development of robust methodologies for measurement of ammonia from animal housing and waste stores.
OCS967M Waste minimisation on farms (This project will be jointly funded with The BOC Foundation).
OCS967N Impacts of agriculture on soil biodiversity.

PHYSICAL SCIENCES
OCS967P Artificial neural networks for flood forecasting.
OCS967Q The use of satellite-based radar for environmental monitoring in lowlands.

OPEN COMPETITION
The Ministry also intends to commission research through open competition to start in 1995 in the following areas:

ENVIRONMENTAL RESEARCH
CTE9513 The landscape value of farm woodlands.
CTE9514 The establishment and management of farm hedges.
CTE9515 The development of improved inventories of methane emissions from livestock systems.

HORTICULTURE SCIENCE
CTC9506 Fungal pathogens of edible horticultural crops grown under protection.
CTC9507 Sclerotinia on field lettuce.
CTC9508 Integrated pest management on edible horticultural crops grown under protection.
CTC9509 Supervised control of aphid pests on horticultural field brassicas.
CTC9510 Pest thresholds for the treatment of carrot fly.
For further details and application form write to Science Division, Divisional Secretariat, Ministry of Agriculture, Fisheries and Food, Room G15, Nobel House, 17 Smith Square, London SW1P 3JR (Tel: 0171238 5770, Fax: 0171238 6321, or Email: s.p.lannon@sed.maff.gov.uk).

Closing date 7 July 1995.

A major player in the pharmaceutical market, SmithKline Beecham enjoys continued success in the
development of a superb product portfolio and international renown for innovation in research and
development. A vital part of this success is our Statistical Sciences Department which provides
leadership, training and consultancy in the use of statistical tools, making a key contribution to our non-
clinical drug discovery and development processes.

As part of our policy of training and enabling scientists to perform the analysis of more efficiently
designed experiments themselves, we currently have two vacancies in statistical computing:

Statistician - Statistical Computing
We need a statistical computing professional to lead the development of appropriate applications written
in SAS. Ideally, you will have:
• knowledge of SAS, SAS programming and application development (knowledge of SAS/AF is
  particularly desirable)
• the ability to develop end-user applications to strict deadlines
• the ability to work as part of a team supporting the SAS computing environment throughout R&D.
  Ref: AP/35.

Part-Time SAS Programmer
We also require a part-time programmer to work a flexible 20-hour week and assist in the development
of appropriate applications. To succeed in this role, you will have:
• experience of SAS programming
• the ability to develop small applications to deadlines. Ref: AP/36.

Both roles require a strong customer focus with the ability to translate requirements into finished
applications which meet their needs. You should also have a working knowledge of statistics,
mathematics and numerical methods and a BSc or MSc ideally in statistics or computer science is preferred.

Our superb package guarantees you a highly competitive salary and comprehensive benefits which, for
the full-time position, include bonus, pension and medical plans, share-matching scheme and profit-
related pay.

To apply, please send your full career details, quoting the appropriate reference, to the Human Resources
Adviser (SCS), SmithKline Beecham Pharmaceuticals, New Frontiers Science Park, Third Avenue,
Harlow, Essex CM19 5AW.

COMPUTER PROGRAMMER
Computer Vision Systems

The Imaging Division of ME Electronics specialise in the design and supply of computer vision systems for science and industry. We are looking for a self-motivated enthusiastic programmer to join our busy and successful team, preferably a graduate or 1-2 years commercial experience.

- Programming experience - preferably LABVIEW and/or C
- General scientific background
- Knowledge of image processing, mathematics or data acquisition
- Proven system design and project work
- Good communication skills
- Keen to work with and apply new technology

Salary range £10 - £13K.

Please send or fax CVs for the attention of: Vicki Jay, ME Electronics Ltd, 4 Weighbridge Row, Cardiff Road, Reading RG1 8LX. Tel: 01734 500551. Fax: 01734 509455.

RESEARCH ASSISTANTS IN RADIOECOLOGY AND ATMOSPHERIC CHEMISTRY

The Westlakes Research Institute is an established centre for research and consultancy in earth and environmental science, biotechnology, molecular genetics and medical statistics.

The Environmental Science Group focuses on measuring, understanding and modelling processes in atmospheric, marine and terrestrial environments with particular reference to anthropogenic pollution and its effect on the biosphere.

Research assistant posts are available in the following areas to commence in October 1995.

The role of microfauna in the uptake of radionuclides from organic matter
95/ES/33

This work, funded by British Nuclear Fuels plc, will look at the ecology of some representative sub-surface environments and evaluate them in respect of their microbiology. The role of the specific microfauna (including any interactions between them) in the degradation of organic matter would then be studied with a particular emphasis on establishing any radionuclide specific mechanisms that might be important in binding and root uptake. Results would then be included in environmental impact methodology.

Kr-85 in the environment
95/ES/34

Methods will be developed in order to give a useful technique for measuring Krypton-85 at environmental levels over a variety of timescales. This will be used to conform average levels plus fluctuations around an industrial point source. The radiological impact on a local population will then be calculated. Future applications of Krypton as a general tracer for environmental processes will be considered.

The speciation of Iodine-129 in the vicinity of a nuclear reprocessing plant
95/ES/35

Current work on I-129 leads to discrepancies between atmospheric deposition rates and the chemical form in which the iodine is present based on current thinking. This work (funded by British Nuclear Fuels plc) aims to determine I-129 speciation at the point of emission and in the air beyond the site perimeter, and to relate this to uptake in important food pathways. Results must be reconciled with current models of atmospheric chemistry and existing environmental assessment procedures revised, if appropriate.

We are seeking recent graduates or postgraduates with a minimum qualification of an upper second in an appropriate subject plus a genuine interest in applying their knowledge to real problems in a research consultancy. Candidates will be encouraged to publish their work in the open literature, and register for a Ph.D. at an external university, if appropriate.

WRI offers competitive salaries and is in a pleasant location close to the Lake District.

Research Assistantship appointments are tenable for three years.

Successful candidates will be required to register for a Ph.D. at a British University; registration and tuition fees will be paid by the Institute.
To apply please forward a CV and covering letter, quoting relevant vacancy number(s) to Miss A. Gallagher, Personnel Officer, Westlakes Research Institute, The Princess Royal Building, Westlakes Science & Technology Park, Moor Row, Cumbria CA24 3LN. Tel: 01946 514060. Fax: 01946 514056.

Closing date 16 June 1995.

MICROBIOLOGY

Two MRC Ph.D. Studentships

Two Medical Research Council (MRC) Studentships are available from 1 October 1995. Both students would become part of well funded multidisciplinary research teams specialising in microbial infection. A structured short course on Infections and Immunity is available to students.

Salary will be the current MRC stipend of £6,551 pa, rising to £7,324 pa in the third year.

Subversion of Host Cell Signalling by Bacterial Pathogens

A Studentship is available within the Institute of Infections and Immunity as part of the joint MRC and University Clinical Research Initiative in Bacterial Infections. The Institute is funded primarily by two MRC Programme Grants and has active programmes of research on *Clostridium difficile*, *Neisseria meningitidis*, *staphylococci* and *Helicobacter pylori*. The successful candidate will work on host cell signalling in response to interaction with the above pathogens and/or their products (e.g. toxins).

Applicants should send a detailed CV, together with the names of two referees, to Professor S P Borriello, Director, Institute of Infections and Immunity, University Hospital, Queen's Medical Centre, Nottingham NG7 2UH. Informal enquiries may be addressed to Professor Borriello, tel: 0115 970 9907 or Dr P Williams, Department of Pharmaceutical Sciences, tel: 0115 951 5047.

The Immune Response to HIV Infection

The Academic Virology Unit within the Division of Microbiology has ongoing research programmes concerning the clinical virology of HIV, HCV and HSV. This project is designed to explore in detail the specificity of B and T cell responses to the gp120 protein of HIV.

Applicants should send a detailed CV, together with the names of two referees, to Dr W L Irving, Division of Microbiology, University Hospital, Queen's Medical Centre, Nottingham NG7 2UH. Informal enquiries may be addressed to Dr Irving, tel: 0115 924 9924, ext: 44914.

Closing date for both posts: 15 June 1995.

The University of Nottingham is a research-led institution which provides the highest quality learning environment and is committed to equal opportunities in employment.

The University of Nottingham
Ph.D. STUDENTSHIPS

Applications are invited for three-year studentships in the following subject areas:
Atomic and Molecular Physics
Liquid Crystal Physics
Laser Photonics
Experimental Condensed Matter Physics
Theoretical Condensed Matter Physics

Further details are available from Professor F. H. Read FRS, Department of Physics and Astronomy, University of Manchester, Manchester M13 9PL. Tel: (0161) 275 4141. Fax: (0161) 275 4259. Email: Frank.Read@man.ac.uk
RESEARCH STUDENTSHIPS IN MILLIMETRE-WAVE RADIO ASTRONOMY

Three PPARC research studentships are available from October 1995 for research in molecular line astronomy in the following areas:

1. Observational studies of star formation regions and interstellar molecular clouds. Observations are made primarily with the James Clerk Maxwell Telescope on Mauna Kea, Hawaii.
2. The development of a low noise heterodyne receiver for submillimetre molecular line astronomy at 800-900 GHz (CASE studentship with Matra Marconi Space UK Ltd).

Applicants should have or expect to obtain a good honours degree in an appropriate discipline.

Further details are available on www (http://www.star.ukc.ac.uk/) or from Dr LT Little (01227-764000 ext 3258, email ltl@ukc.ac.uk).

UNIVERSITY OF KENT
AT CANTERBURY

Excellence in Higher Education at Britain's European University
Department of Biological Sciences

RESEARCH STUDENTSHIPS

Applications are invited for the following studentships from candidates who have (or expect to gain) a first class or an upper second honours degree in an appropriate subject:

Cell biology - RNA translocation along microtubules (BBSRC, Dr H Stebbings)
Fish physiology - Gill toxicity of aluminium in trout (NERC, Dr Anne Brown)
Biotransformations - Pharmacologically important molecules (CASE BBSRC, Dr A Willetts)
Molecular plant pathology - Appressorial action in Magnaporthe grisea (Earmarked BBSRC, Dr N Talbot)

Please contact, as soon as possible, Mrs Julia Davey, Department of Biological Sciences, Washington Singer Laboratories, Perry Road, Exeter EX4 4QG. Tel: 01392 264672; Fax: 01392 264668.

Promoting Excellence in Education & Research
UNIVERSITY of EXETER
UNIVERSITY DIAGNOSTICS LIMITED

OPERATIONS MANAGER

University Diagnostics Ltd specialises in DNA profiling and PCR-based diagnostic testing. The post holder will be responsible for all laboratory aspects of the DNA diagnostic services including the statistical analysis of results and the issuing of reports. The successful candidate will have a Ph.D. in a relevant subject and at least two years post-doctoral laboratory experience. The candidate must be able to demonstrate good management skills and technical awareness of the DNA profiling and PCR operations. An understanding of the statistics relevant to the genetics of DNA profiling and an interest in the forensic application of DNA tests would be an advantage.

Our laboratories are located in new facilities at South Bank Technopark in central London.

Please write for an application form to: Application form request (OM), University Diagnostics Ltd, 90 London Road, London SE1 6LN.

Closing date: 23rd June 1995.
STUDENTSHIPS FOR RESEARCH

A total of 10 Research Studentships funded by EPSRC and BBSRC are available to eligible and well-qualified applicants to our Ph.D. programme. The Department adopts an interdisciplinary approach to research with broadly-based interests ranging from the fundamental to the applied. Applications are therefore encouraged from graduates of any scientific, mathematical or engineering subject. Research activities in all areas of chemical engineering, biotechnology and related scientific disciplines are organised into eight Research Programmes as follows:

- Applied Catalysis and Reaction Engineering
- Biotechnology, Separations and their Environmental Applications
- Combustion
- Fluids
- Multiphase Flow
- Particle Technology
- Polymers
- Process Systems Engineering

ADVANCED COURSE STUDENTSHIPS

A total of eight EPSRC Advanced Course Studentships are available to support eligible and well-qualified applicants to our one-year MSc courses in Advanced Chemical Engineering and Process Systems Engineering. The latter is offered jointly with the Interdisciplinary Research Centre for Process Systems Engineering and is open to graduates of any scientific or engineering subject. Each course comprises a selection of taught modules, assessed by examination and a major research project, assessed by means of a dissertation.

For further information on postgraduate courses and studentships please contact Dr J. P. M. Trusler, Department of Chemical Engineering and Chemical Technology, Imperial College. London SW7 2BY.
Tel: 0171-594 5592. Fax: 0171-594 5604. Email: m.trusler@ic.ac.uk
SENIOR SCIENTIST

Virotest UK is seeking a post-doctoral scientist with experience in the immunology of Infectious Disease to develop diagnostic assays that can be applied to de-centralised testing situations. Ideally candidates will have experience in the development of diagnostic assays for infectious disease preferably applied to HIV or other blood-borne infections but candidates with other relevant experience will also be considered.

The position will be attractive to anyone who wants to be involved in the challenge of moving diagnostic testing out of the laboratory environment. The successful candidate will be self-motivated and will relish the responsibility of completing a project to a tight timetable. Initially there will be a requirement to travel and to co-ordinate the work of a number of groups which will require organisational skills and the ability to interact with people. Ultimately the work will be centralised in the London area.

An attractive package of salary and other benefits will be offered to the successful candidate.

Virotest UK is based in London with subsidiaries in Mexico and the US and is dedicated to the development of saliva-based diagnostic assays.

All applications should be addressed to Dr Peter Highfield, Box Number 370, Room 135, New Scientist, King's Reach Tower, Stamford Street, London SE1 9LS. The closing date for applications is 21st June 1995.

ECOSYSTEMS LTD

Ecosystems LTD is a Brussels based firm specialising in EU nature conservation policy and funding.

We are currently assisting the European Commission in monitoring nature conservation projects funded under the LIFE instrument and are looking for an ecologist to complete the team in Brussels.

ECOLOGIST

The successful candidate will be principally responsible for monitoring projects funded in the UK. You should have practical experience of conservation management and of working with UK government bodies and NGOs involved in conservation. Good communications skills will also be important as will the ability to work in a team and to tight deadlines.

Knowledge of EU policy and structure (eg, Habitats and Birds Directive) and of another language will be a major advantage.

The post is available immediately for an initial period of nine months with the possibility of renewal for a further year. The starting salary will depend on experience.

Please reply in writing, enclosing a CV, by 11 June 1995, to Ms K. Sundseth, Ecosystems LTD, 11 Rue Beckers, 1040 Brussels, Belgium (Fax: +32 2 646 6950).

Leicester University
Graduate School of Biological Sciences and Medicine

MRC APPROVED RESEARCH MASTERS PILOT COURSE

Five individually supervised MRC Research Masters studentships, to be taken up in October 1995, are currently available in Leicester for candidates with a first or upper second class honours degree in an appropriate biological science. Students will receive a stipend of £6,551 pa. The course will provide a firm foundation in research skills and will include a highly flexible taught element which will be designed by student and supervisor (40%) and a research project. Available areas of study include biochemistry, genetics, immunology, microbiology, pharmacology, physiology and toxicology. The course would provide a good grounding for a subsequent Ph.D. programme, or could lead directly to employment.

Interested candidates should contact Professor R Camp immediately on (0116 252 3061), and will be supplied with detailed written information including the names of available supervisors and their specific areas of study. Final applications will be required by 30 June 1995.

UNIVERSITY OF NEWCASTLE
Senior Veterinary Assessor
Veterinary Medicine Licensing £30,800 to £40,000 Addlestone, Surrey

The Veterinary Medicines Directorate is an Executive Agency of the Ministry of Agriculture, Fisheries and Food and is responsible for ensuring the safety, quality and efficacy of veterinary medicines in the UK. Our multidisciplinary teams assess licence applications and evaluate manufacturing premises and quality control laboratories concerned with veterinary immunological products.

You will be managing an inspection unit of two inspectors/assessors charged with the task of inspecting UK and overseas batch testing sites. Other specific tasks will include the validation and assessment of dossiers submitted in support of immunological products, the preparation of reports and the presentation of recommendations to expert committees.

You will also provide advice to industry and government departments on regulatory matters, take responsibility for official batch release procedures, and contribute to the achievement of the Directorate's business plan.

Experience of the testing of immunological products is essential for this role, along with a degree or postgraduate qualification in microbiology or veterinary microbiology. Some knowledge of the UK licensing system and of the animal health and livestock industry will also be required.

For an informal discussion about the work please telephone Dr Aileen Lee on 01932 336911 extension 3041.

For further details and an application form (to be returned by 21st July 1995), please telephone Recruitment & Assessment Services on Basingstoke (01256) 468551 (24 hours) or fax 01256 846374/846660. Please quote reference B2586.

An equal opportunity employer
Veterinary medicines directorate
VMD

RAS
Applications are invited for the highly prestigious position of

**Lien Ying Chow Professor**

in Medicine.

The appointment is for a period of one year, in the first instance. Candidates must be distinguished professors who have established themselves in any area of Internal Medicine. The successful candidate is expected to teach and conduct research in his or her area of interest.

Gross annual emoluments will be in the range of S$133,480 - S$180,140. In addition, a specialist allowance of 40% of gross monthly salary is payable. Depending upon the length of appointment, other benefits generally include provident fund benefits or an end-of-contract gratuity, leave and medical benefits, passages for appointee and family, settling-in allowance, subsidised accommodation, children's education and an allowance for transportation of personal effects to Singapore.

The Department of Medicine is a department in the Faculty of Medicine. The department has a teaching staff of 32 full-time academic staff members, together with supporting technical and secretarial/office staff. Departmental staff are involved in service, teaching (both undergraduate and postgraduate) and research in the following areas: Cardiology, Clinical Pharmacology, Dermatology, Endocrinology/Metabolism, Gastroenterology, Haematology-Oncology, Nephrology, Neurology and Respiratory Medicine. The annual report of the Department is obtainable on request.

All academic staff will be given a networked personal computer (Pentium or Macintosh Power PC) with access to a Cray supercomputer, UNIX hosts, department laser printers, a wide spectrum of software, on-line library catalogue, CD-ROM databases, Teleview, INtv and Internet.

Application forms and further information on terms and conditions of service may be obtained from The Director, Personnel Department, National University of Singapore, 10 Kent Ridge Crescent, Singapore 0511.

Enquiries may also be sent through Internet to PERJL@LEONIS.NUS.SG, or through telefax (65) 7783948.

LANCASTER UNIVERSITY
School of Physics and Chemistry

Lectureships in Physics and Chemistry

Applications are invited for three permanent posts in the School to enhance our excellent research profile and also to strengthen our teaching of degree courses in Physics and in Chemistry. These positions have arisen in part from the recent appointment of Professor George Pickett to an EPSRC Senior Fellowship. The successful applicants will be expected to establish an internationally competitive, independent research programme in an area which coheres with existing strengths at Lancaster. The appointments will be in the following areas:

1. Polymer Chemistry
   from 1 October 1995 Ref: L356
   Polymer Science is a major research activity in the School and creation of this post demonstrates our intention to strengthen and further expand in this area. The successful applicant will also be involved in the teaching of chemistry at both undergraduate (BSc and MChem) and postgraduate levels. Informal enquiries to Professor Ian Soutar (01524 593656 or i.soutar@lancaster.ac.uk).

2. Physics
   from 1 October 1995 Ref: L357
   The School has major strengths in the following areas: Theoretical Physics, Advanced Materials, Mesoscopics and Photonics, Non-Linear and Stochastic Physics. The successful candidate will contribute to one of these areas, as well as to undergraduate and graduate teaching. Informal enquiries to the Head of School, Professor Tony Guenault (01524 593076 or a.guenault@lancaster.ac.uk) for this or any other post.

3. Particle Physics
   from 1 March 1996 Ref: L358
   The particle physics group has a substantial research programme involving projects at CERN and at DESY. The person appointed will be expected to be an active researcher in particle physics and to teach at undergraduate and postgraduate levels. Informal enquiries to Professor Terry Sloan (01524 593615 or t.sloan@lancaster.ac.uk).

Salaries
posts 1 and 2 on Lecturer A Scale: £15,154 to £19,848 p.a. Post 3 Lecturer A Scale as above or Lecturer B Scale: £20,677 to £26,430 p.a. dependent upon qualifications and experience.

Further details from Personnel Services, quoting appropriate reference, University House, Lancaster University, Lancaster LA1 4YW Tel: 01524 846549 - 24 hour answering service.

The University welcomes applications from suitably qualified people regardless of race, religion, gender or disability.

A campus university dedicated to excellence through teaching and research. [1984-004 (1995) : 52]
Applications are invited for the Chair of Experimental Cancer Research and Deputy Director of the Imperial Cancer Research Fund Cancer Medicine Research Unit. The post will be held within the ICRF Cancer Medicine Research Unit on the St James's University Hospital campus of the University of Leeds School of Medicine. Applications are welcome from professional scientists with an established track record of high quality cancer research. Teaching and administrative duties will be very light. The salary will be within the non-clinical professorial range.

Informal enquiries may be made to Professor Peter Selby (Tel: 01 13 244 2007). The University of Leeds is an equal opportunities employer. Women, members of ethnic minorities and disabled people are under-represented in the University in posts at this level and the University would therefore welcome applicants from members of such groups whilst, however, affirming that the appointment will be made entirely on merit.

Further particulars may be obtained from Mrs S M D Wheeler, Personnel Director, The University of Leeds, Leeds, LS2 9JT. Tel: 0113 233 5775; Facsimile 0113 233 4127, quoting reference number 89/24.

The closing date for applications is Friday, 21 July 1995.

Promoting excellence in teaching, learning and research.
[1984-005 (1995) : 52]
THE UNIVERSITY OF BIRMINGHAM

CHAIR IN THE SCHOOL OF EARTH SCIENCES

A new Chair has been established for the strategic purpose of further strengthening the research profile of the School. The new Professor will be expected to lead a research team to national and international status. Although the field of research is open, especial consideration will be given to established research workers in 'basin and sediment studies' or 'fluid rock interaction and fluid processes' or 'geo-microbiology'.

Further particulars may be obtained from Mr. P.J.F. Scott, Director of Staffing Services, The University of Birmingham, Edgbaston, Birmingham B15 2TT. Tel: 0121 414 3842 or FAX 0121 414 7043. E-mail: c.j.wilkie@bham.ac.uk

Closing date for applications: Friday 8th September 1995.

Working towards equal opportunities

The University is an exempt Charity which exists to advance learning to the highest level for the benefit of its students and society at large.

CLINICAL SCIENTIST Grade B12-B14
£20,739 - £22,269 per annum inc. Ref CP/S/62

A degree qualified electronic engineer, with a minimum of two years experience in servicing radiotherapy equipment, is required to join a team servicing high technology X-Ray clinical equipment in radiotherapy and imaging. A keen interest in science applied to medicine, software skills and an excellent standard of electronics are required for this interesting and varied post.

For an informal discussion/visit on this post, please contact Malcolm Birch or Johanna Alexander on 0171377 7101.

CLINICAL SCIENTIST Grade B8-B10
£18,018 - £19,325 per annum inc. Ref CPISI02

Applications are invited from graduates in Engineering or Physics to join a team of Scientists involved in the provision of comprehensive scientific support for a wide range of radiation and imaging technology.

You must have proven ability in electronics, practical engineering skills and a keen interest in the application of physical science to clinical practice. The section is currently providing services in the fields of megavoltage therapy X-ray, CT scanning, ultrasound imaging and various paramedical disciplines.

This lead Teaching Hospital is well equipped in modern facilities requiring a wide range of scientific support. The post offers interesting career prospects and further studies are encouraged.

Applications from 3rd year undergraduates who are interested in medical work would also be welcome. In-service training will be given. Interest in computing is essential.

For application forms and job descriptions for both posts, please contact the Personnel Department, The Royal Hospitals NHS Trust, St Bartholomew's Hospital, West Smithfield, London EC1A 7BE. Tel: 0171 601 8954. Please quote the appropriate reference number.

Closing date for both posts: 12 July 1995.

Committed to equal opportunities.

Cranfield UNIVERSITY

**Research Studentships** in Engineering and Applied Science

Cranfield University are offering up to 10 research studentships at the Royal Military College of Science, Shrivenham. These studentships will involve industrial collaboration and will attract a stipend of up to £7,600 pa. The research will be based in a multi-disciplinary School which is currently active in the following areas:

- **Aerodynamics and Fluid Mechanics** (including high speed jet flows, aerodynamics of guided and unguided projectiles, turbulence and boundary layer phenomena, open channel flows).
- **Control and Guidance** (including robust control techniques, realtime parallel processing, artificial neural networks, neuro-fuzzy approaches in guidance, control and target tracking, active control, simulation, radar).
- **Civil and Mechanical Systems** (including structural and vehicle dynamics, tribology, mechantronics, blast effects on buildings, structural applications of composites, repair and strengthening of concrete bridges).
- **Communications** (including communications signal processing, imaging neural networks).
- **Design** (including impact studies for armour design, computer aided design and manufacture, numerical modelling of impact).
- **Environmental Chemistry** (including activated carbon, waste recycling and vapour detection, aqueous oxidation of pollutants).
- **Applied Chemistry** (including energetic materials, fuels and lubricants).
- **Materials Science and Engineering** (including development of advanced metallic, ceramic, polymeric and functionally "smart" materials, high strain-rate phenomena in engineering materials, development of analytical / sensing techniques).
- **Power Systems** (including power sources and drives for hybrid electric vehicles, IC engine condition monitoring and fault prediction, heat transfer in engines and internal flow systems).
- **Software Engineering** including distributed computing; formal methods; human-computer interaction; knowledge-based systems; medical informatics; modelling and simulation; numerical software; requirements modelling; software quality assurance; software testing; verification and validation.

Applications are invited from candidates who have, or expect to have a First or Upper Second Class honours degree in an appropriate science or engineering discipline. Further information can be obtained from the Head of School, Professor A. Brown on 01793 785365 or by writing to Professor A. Brown, Cranfield University, Royal Military College of Science, Shrivenham, Swindon, Wilts SN6 8LA. Royal Military College Science.

In addition to the qualifications required for entry, applicants must also have undertaken postgraduate research work, or had other relevant experience since qualifying, the minimum periods being as follows:

a) At least two years postgraduate research or development experience for applicants with 1st or 2nd class honours degrees or equivalent qualifications;
b) At least five years of appropriate scientific (including engineering) experience after qualifying for other applicants.

Salary: £13,651 - £22,562 Basic, plus £1776 London Weighting Allowance, plus a 4.5% non-superannuable supplement to salary.

A full job description and an application form are available by telephoning Maura/John on 0171 982 8200.

Closing date for receipt of completed forms is 17 July 1995. The MRC is an Equal Opportunities Employer.

Cranfield University is an exempt charity offering a centre of excellence for research and education. [1984-008 (1995) : 53]
Conclusive proof we’re a World Leader

28 offices in 16 countries, £11 million invested in advanced technology and over 1700 employees.

The facts speak for themselves.

**MANAGER OF DATA MANAGEMENT**

One of the largest Contract Research Organisations in the world, we need an enthusiastic and experienced Manager of the highest calibre for our Data Management Group at Quintiles in Bracknell.

We make it our business to deliver results on time. With hundreds of projects in progress and the expertise that is well respected, our world-wide growth will continue. As we develop so will the careers of the people who join us.

Possessing excellent interpersonal skills and leadership qualities, you'll know how to motivate and develop a team. You'll also oversee on-going projects, adhering to budgets and timescales. You will need to understand the drug development process and be well versed with data management procedures and practices.

In both areas of responsibility, managerial and technical, you will need to display relevant experience, as well as the enthusiasm to contribute to a rapidly expanding business.

If you want to develop with a developing organisation please send your CV to Debbie Sampson, Quintiles (UK) Limited, Ringside, 79 High Street, Bracknell, Berkshire RG12 1DZ. Tel: 01344 749200, Fax: 01344 749300.

CHALLENGING JOB IN PROFESSIONAL SURROUNDINGS

NOTOX B.V. is an independent, privately owned, contract research laboratory, based in 's-Hertogenbosch, The Netherlands. We are specialised in safety and environmental research for the registration of industrial chemicals, agrochemicals, pharmaceuticals and medical devices.

Vacancy exists for the following position:

**Head of Department for General and Industrial Toxicology**

The departmental head is responsible for:
- day-to-day management of the department
- management of the department at budget
- coordination and reporting of toxicological research
- client liaison and acquisition activities

The successful candidates should have:
- a relevant university degree
- 5 to 10 years industrial / CRO experience in toxicological research
- proven management ability
- excellent organisational skills
- good verbal and written communications skills
- willingness to follow courses in Dutch

Experience in carcinogenicity studies and/or reproduction toxicology would be an advantage.

Interested candidates should forward an application in writing with a curriculum vitae to Notox B.V., attn: Mrs Dr I. C. Enninga, Technical Director, PO Box 3476, 5203 DL 's-Hertogenbosch, The Netherlands.

[1984-010 (1995) : 54]
RSPB
Working for conservation

MANAGER
Coastal, Marine and Freshwater Policy Unit
Starting Salary Range: £17,781 - £25,401

The RSPB is Europe's largest wildlife conservation charity taking action for birds and their environment and is supported by 890,000 subscribing members.

Based at RSPB headquarters in Bedfordshire, this is a key position managing the development and implementation of the RSPB's policy in coastal, marine and freshwater habitats. Particular areas of concern include fisheries, coastal zone planning, shipping, land drainage and water resources.

As manager of a team involved in a very active area of policy in both the UK and Europe, the successful candidate will demonstrate evidence of experience in team leadership, project management, conservation legislation and should be a skilful advocate. A European foreign language would be an advantage.

For further details and an application form please send a large SAE to the Human Resources Department, The Lodge, Sandy, Bedfordshire SG19 2DL.

Closing date for completed applications: 21 July 1995.

Registered Charity Number 207076
[1984-011 (1995) : 54]
Take your mind on a military exercise
c£15,000 to c£30,000+ & benefits.
Farnborough- Sevenoaks Portsmouth - Chertsey - London
West Byfleet - High Wycombe

The growing costs of technology and the increasing complexities of strategy in today's military environment bring the work of the Centre for Defence Analysis (CDA) into ever sharper focus.

It is our business to provide objective advice to the policy makers of the MOD to assist with decision making at the very highest levels. We undertake operational analysis studies which have far-reaching strategic and operational importance. They cover policy formulation, military operational capabilities, resource allocation, equipment procurement, force structures, potential warfare tactics and the security of our strategic deterrent. In times of crisis, such as the Falklands and Gulf Wars, we support planners and commanders faced with immediate operational problems.

Operational analysis requires a judicious mix of skills and methods. For some problems, complex computer-based models supported by wargaming are essential. For others, the emphasis is on the structuring of the problem and the identification of the main issues to which judgement must be applied. Whether we're assessing the contribution of the Attack Helicopter in anti-armour warfare, or conducting an historical analysis of the effects of shock and surprise in land battle, our work exercises the minds of over 600 scientific and military staff encompassing a wide range of disciplines and skills. In addition, our specialist Anti Submarine Warfare (ASW) centre analyses sonar and tactical data from naval and maritime air operations.

We're now expanding our teams every level across all our locations. Our needs range from operational analysts, physical scientists and mathematicians to experts in defence systems technologies, software engineers and specialists in wargaming. Whether you're a recent graduate with an interest in this challenging field, or an experienced professional with an appropriate track record, your intellectual, analytical and problem-solving abilities will need to be complemented by communication skills and a real awareness of customer needs.

In return, we can promise the broadest spectrum of innovative projects, the finest facilities, exceptional scope for technical and personal development and highly competitive rewards including relocation assistance and generous holidays.

CDA welcomes applications from suitably qualified people regardless of sex, marital status, race or disability.

To apply please send a detailed CV to: Kirsti MacKenzie, CDA, R200 Building, DERA Farnborough, Hants GU14 6TD.

CDA
CDA is a division of the Defence Evaluation and Research Agency of the MOD
The Central Science Laboratory (CSL), an Executive Agency of the Ministry of Agriculture Fisheries and Food, is a research based centre of scientific excellence providing quality R & D, scientific and technical advice and services to its customers, in order to promote the safe and efficient production of food and protect the environment. In 1996 we will be relocating to a new purpose built complex near York. All successful candidates will be appointed to York but will work at the sites indicated until relocation. Lodging and travel expenses may be reimbursable.

ANIMAL WELFARE SCIENTIST
Worplesdon from £16,168

We have a permanent senior scientific vacancy in our Conservation and Environmental Protection Group. You must be an innovative scientist with a good publication record in the field of animal welfare and have the skills to manage the staff and resources of our animal care services.

The candidate will initiate, manage and conduct research in laboratory animal welfare and undertake the improvement of wild life management techniques. This will include ensuring that the highest standards of animal welfare are maintained, managing animal care technicians and some financial management covering budget preparation and expenditure monitoring. You will be able to liaise with scientific staff on resource requirements and provide advice and guidance on animal welfare matters.

You should have a first degree in Zoology, Animal Physiology or related subject, a relevant higher degree or at least 5 years relevant experience, a Home Office Personal Licence and a current driving licence.
Ref. CSP 1416

BEHAVIOURAL ECOLOGIST
Worplesdon from £11,138

We also require someone with maturity and animal handling skills to join our Pest Management Strategies Group. This post concerns the development of novel, humane and environmentally sensitive solutions to problems posed by vertebrate wildlife.

You will be concerned with designing and performing studies of the behaviour of a range of wild mammal species, including rodents, rabbits and foxes, preparing scientific reports, presentations and managing databases.

A good honours degree in Zoology or related subject is required together with a particular interest in animal behaviour. Experience in the use of databases (e.g. DBASE generic languages) and statistical tools (e.g. SPSS/PC) on IBM pc compatible computers is required together with a full driving licence.
Ref. CSP 1454

IMMUNOLOGIST
Slough from £11,138

Our Plant Health Group require an enthusiastic team member to carry out R & D and contract report writing on a variety of projects concerning the development of immunoassays for the detection of pesticides, and if possible viruses and other microorganisms.
You will have experience of developing immunoassays for pesticides and other micro-organisms and be prepared to work with chemical reagents including solvents. The ability to work to short deadlines and to write contract reports with minimal editing is essential.

You should have a degree or equivalent qualification in Chemistry, Biochemistry or Biological Science and have basic computer skills in document preparation and graph work.
Ref. CSP 1453

MYCOLOGIST fixed term appointment
Harpenden  from £11,138

We also have an opportunity within our Plant Disease Diagnosis Team. This will be for a fixed term of 3 years, however there is a possibility that this post may be extended or made permanent.

You will join our Mycology Diagnosis Sub-Team and undertake research to develop new and rapid procedures for the identification of fungi of statutory significance. Immunological and molecular techniques will be used and the ultra structure of fungi studied using the scanning electron microscope.

You should have a degree in an appropriate biological subject and some experience of research in microbial diagnosis. Familiarity with molecular techniques for microbial identification is particularly desirable. You should also be competent in the use of computers for data handling.
Ref. CSP 1406

For application forms and job descriptions please telephone (01753 534626 ext. 516) This is an answerphone service for which you must quote the appropriate reference number and clearly state your name and address. Alternatively, please write to Lynn Bucknell or Angela Hutchinson, CSL, London Road, Slough, Berks SL3 7H1, or Fax 01753 531829.

Completed applications should be returned by 14 July 1995.
CSL is an Equal Opportunities Employer
Johnson & Johnson LIMITED  
R&D Centre, NW Germany

Product & Process Development

Johnson & Johnson is a worldwide, world-class corporation with a portfolio of leading brands throughout the healthcare and consumer markets. We are now wishing to consolidate our established position in the increasingly competitive field of feminine hygiene products, by expanding our European R&D Centre.

The Centre, based in Wuppertal, near Düsseldorf, employs a workforce drawn from throughout Europe. We are now seeking to recruit a number of high-calibre young professionals to work on new product and process development.

You should either be completing your studies this year and have a good first degree in a scientific or engineering discipline, or, in addition you should have from 1-3 years of technical/research experience with a consumer-oriented, blue-chip organisation, in sectors such as; fmcg, food, pharmaceuticals, paper, medical products or toiletries. Knowledge of the feminine hygiene market is not required. You should have an appreciation of consumer markets and will have the technical skills and confidence to identify new product and process opportunities, evaluate risks and thus turn concepts and ideas into commercially successful products.

Personal qualities are at least as important as previous experience and you should possess excellent written and verbal communication skills (the Centre's operating language is English), be practical, pragmatic and business-aware, hungry for intellectual challenge and seeking the opportunity to succeed.

Salaries for these permanent career opportunities are payable in Deutschmarks and will be competitive. Additionally there are comprehensive benefits including relocation assistance. Future career prospects with this world-class organisation are excellent.

If you feel you have the above qualities and experience and are keen to progress your career within a top flight consumer products company we would be interested to discuss this opportunity with you. Please write indicating current salary, to: Human Resources Department, Foundation Park, Roxborough Way, Maidenhead, Berkshire SL6 3UG. [1984-014 (1995) : 57]
SILSOE RESEARCH INSTITUTE

PROCESS ENGINEER

C.£12,000 plus benefits

Silsoe Research Institute is the national centre for research in engineering and physical sciences within agriculture and other biologically based industries. It has an international reputation as a centre of excellence and gained the Queen’s Award for Industry in 1992. Within the Institute, the Process Engineering Division studies the scientific basis of process systems that are important in these industries.

We are now seeking an engineer/physicist to join the Heat and Mass Flow Group. In this role, you will develop, implement, improve and apply computer programs to simulate heat and mass transfer processes, and airflows, in the drying and storage of biological materials. Input to pilot-scale and off-site experiments will also be a key part of the role. You will be expected to develop a range of skills including the use of computational fluid dynamics software and other in-house codes.

You must have at least an upper second class honours degree in chemical/process/mechanical engineering or physics, and have a working knowledge of FORTRAN. You should have the ability to pick up ideas quickly and be able to interact within a multidisciplinary team.

The position offers a comprehensive benefits package which includes non-contributory pension scheme, life assurance, subsidised workplace nursery & staff restaurant, sports & social club, gymnasium and excellent working conditions.

For further details and an application form, please call (01525) 860000, quoting Ref 12/74, or write to: Personnel Department, Silsoe Research Institute, Wrest Park, Silsoe, Bedford MK45 4HS. Closing date for applications is 14 July 1995. Interviews will be held on 26 July 1995.

We are Equal Opportunity Employers

ENGINEERING for Life

T
1992
Three Assistant Posts
Environmental and Scientific Services
Gloucester £12,000 to £17,500

Applications are invited for three technical posts within British Waterways Environmental & Scientific Services Department. The unit provides environmental policy and consultancy support to British Waterways in its task of managing and developing the 2000 mile network of canals and river navigations for leisure and tourism and as an environmental and heritage asset.

All three posts will have a role in:
• providing technical support to Waterway Managers within their area of specialism,
• site assessment and management planning in connection with waterway operation and maintenance and waterside development,
• development of standards, specifications and technical support documentation,
• collection storage and dissemination of environmental management data,
• appraisal of consultation documents on planning, legislation and other environmental matters.

Assistant Conservation Ecologist
Ecological assessment and evaluation, species/habitat conservation and management.

Assistant Environmental Scientist
Contaminated land assessment, disposal of dredgings, vegetation management in and near water.

Assistant Water Quality Scientist
Water quality assessment and management, recreational water quality, pollution prevention.

The successful applicants should have:
• a relevant degree,
• two to three years relevant experience,
• a practical approach and the ability to work within a multi-disciplinary team,
• good interpersonal skills,
• an enthusiasm for their subject and a desire to develop their contribution
• a current UK driving licence, all three posts will involve travel,
• an appropriate grade of membership within a relevant professional body.

Starting salary will be dependent on qualifications and experience.

Letter of application (specifying which post is being applied for) and Curriculum Vitae to be sent to Mrs Sue Band, British Waterways, Willow Grange, Church Road, Watford Herts WD1 3QA. Closing date: 14th July 1995. For further information telephone Roger Hanbury on 01452 318040.

British Waterways
UNIVERSITY COLLEGE LONDON

Research Assistant

Required in the Department of Haematology, University College London for a period of 2 years.

The post will involve work associated with the gene therapy programme and would suit a newly qualified graduate in genetics, cell or molecular biology who wishes to pursue a career in laboratory research.

Salary will be within the technical grade C scale.

Enquiries to Dr Stephen Devereux, Dept of Haematology, UCL, 98 Chenies Mews, London WC1E 6HX. Telephone: 0171 209 6232. Email s.devereux@ucl.ac.uk

Working toward Equal Opportunity
PURSUING EXCELLENCE IN EDUCATION AND RESEARCH
[1984-017 (1995) : 58]
Leicester University
Department of Medicine & Therapeutics
Division of Nephrology

TWO RESEARCH POSTS

Applications are invited for two research posts, funded by the National Kidney Research Fund in the Division of Nephrology at the Leicester General Hospital NHS Trust.

Research Associate - tenable for 24 months

The postholder will work in a research group investigating immune mechanisms in human renal disease. The particular project involves study of abnormal glycosylation of IgA. Cell culture, protein chemistry and molecular techniques will be involved; experience in some of these areas would be an advantage. Salary will be on the R&A 1A scale £14,317 to £21,519 pa.

Research Assistant - tenable for 12 months

The postholder will work in a research group on the identification of histone as marker of cell proliferation in human and experimental renal disease. Some previous experience in molecular biology, particularly in situ hybridisation would be an advantage. Salary will be on the R&A 1B scale £14,317 to £15,986 pa.

Informal enquiries and further information from Dr John Feehally, Department of Nephrology, Leicester General Hospital, Gwendolen Road, Leicester LE5 4PW. Tel: (0116) 249 0490 ext 4132. Closing date for applications: 13 July 1995.

Towards equal opportunities

Promoting excellence in University teaching and research
FERDINAND MUELLER FELLOWSHIP

THE ROYAL BOTANIC GARDENS, Melbourne invites applications for this research fellowship honouring Australia's greatest nineteenth century botanist, Baron Ferdinand von Mueller. Funds are available to cover one return economy airfare, living expenses for a period of up to four months at AUD125 a day in Melbourne, and a small operating budget.

The first Fellowship is available between March and December 1996.

FOR FURTHER INFORMATION CONTACT DR TIM ENTWISLE. PH: (613) 655 2300 FAX: (613) 655 23 i0
email: entwisle@botany.unimelb.edu.au

Applicants should send a proposed research program, curriculum vitae and the names of three referees to the Personnel Manager, Royal Botanic Gardens, Melbourne, Birdwood Ave, South Yarra VIC: 3141 Australia by 28 July 1995.

Do your AMBITIONS match those of our client?

One of the world's largest global Contract Research Organisations, based in Berkshire, is continuing to grow and further establish itself as the market leader. Due to this continued expansion, our client seeks individuals who are keen to develop their careers within a professional, customer-orientated company with the emphasis firmly on quality.

Working within project teams on multi-centre, international projects we require:

**Senior Clinical Research Associates**: You must be an experienced clinical scientist with international project management experience. You will have considerable study responsibility and be expected to supervise project teams. At least five years' clinical experience is required plus a flexible approach and excellent communication skills.

**Clinical Research Associates**: With at least two years' monitoring experience, you will be responsible for the management (selection, initiation and running) of investigator sites. A flexible team member, you are comfortable working to tight timelines and prioritising your workload.

**Clinical Data Manager**: With extensive project and line management experience in the pharmaceutical industry, developed over at least seven years, you will be expected to lead a group of data coordinators at all levels. Working as a project manager within specific projects, you will need to be experienced within a variety of therapeutic areas and have a knowledge of SAS and database management.

**Principal Data Coordinators**: Must have at least five years' pharmaceutical industry experience and be familiar with project management techniques. You will be responsible for the supervision and encouragement of more junior colleagues with the aim of producing clinical data of the highest quality.

All positions require individuals with a nursing background or a life sciences degree and who are dedicated to the pursuit of excellence and team performance. They carry highly, competitive salaries and excellent benefit packages, including a bonus and non-contributory pension scheme. Previous experience is vital and language skills would be attractive. Please apply, in strictest confidence, to Dr Grant R Coren, Managing Director

PharmaSearch Limited
PharmaSearch Ltd, 52 Upper Brook Street, London W1Y 1PG Tel: 0171 493 3747 Fax: 0171 493 3038
QC MANAGER/ SENIOR SCIENTIST

Sanofi Research Division is the worldwide R&D organisation of Sanofi Winthrop, a leading healthcare company with HQ in Paris and research centres in France, UK and USA. It has a strong product pipeline with a number of exciting development candidates.

To help achieve continuing success, we seek an experienced pharmaceutical analyst for the key post of QC Manager within the Analytical Sciences Department.

Supported by a 16-strong team, your responsibilities will include analytical and microbiological quality control coupled with other departmental activities, such as LIMS and planning, depending on experience.

You should be academically well qualified, preferably to Ph.D. level, and possess a minimum of 3 years management experience in Pharmaceutical Quality Control. Additionally, candidates should either be Qualified Persons or able to achieve this status within 2 years.

You should have proven leadership ability and be a first class communicator. You will be expected to contribute to scientific innovation as well as to the development of the QC function. Participation in professional activities and publication of scientific work are encouraged.

We offer a competitive salary and benefits package, including a contributory pension scheme.

Our modern research facilities provide a pleasant working environment within ready access to an unspoiled rural location whilst still within easy reach of both Newcastle and Edinburgh.

To apply, please send a detailed CV to:
Manager, Human Resources, Sanofi Research Division, Alnwick Research Centre, Willowburn Avenue, Alnwick, Northumberland NE66 2JH.

Closing date for applications 21st July 1995

sanofi & Winthrop
Continuing the quest for innovation and excellence

**c£18k + benefits and exceptional future prospects**

Menstrie, near Stirling, Scotland

Quest International, part of the Unilever group, is one of the world's leading producers of fragrances, flavours and food ingredients.

At Menstrie, near Stirling, our commitment to innovation in the development and manufacture of yeast products is reflected in a multimillion pound investment in new plant and equipment. Our mission is to deliver new products, processes and technologies which will benefit our customers in the intensely competitive food processing industry. To play key roles in this continuous quest, we're now seeking some highly talented and ambitious technical graduates.

**Process Development Engineers**

Degree-qualified in Chemical Engineering, and with at least two years' relevant experience in a process development environment (not necessarily the food industry), you must have the ability to work within both operational and project team structures and bring a significant creative contribution. It is essential that you forge effective relationships with internal customers and develop a complete understanding of their technical and commercial needs.

**Development Scientists**

Along with a degree in a Bioscience or Chemistry discipline, you should have spent a minimum of two years in a food and drink, fermentation or pharmacology environment. A strong team player, you'll be able to make a significant creative and practical contribution to the work of our in-house project teams, translating sound ideas into commercial reality. We'll be looking to you to develop strong working relationships with internal customers while gaining a clear insight into both their technical and commercial needs.

In return for your considerable talents, we can promise a broad spectrum of challenge and scope for your future career, with options encompassing process, production, manufacturing, project management or quality assurance. Whichever route you follow, you can be sure of exceptional rewards (including relocation assistance where appropriate) and the kind of benefits you would expect from a leading international company.

Please write with your CV to: Jill Chapman, Personnel Manager, Quest International, Menstrie, Clacks, Scotland FK11 7ES.

Quest INTERNATIONAL
Fragrances, Flavours, Food Ingredients.

[1984-022 (1995) : 60]
RESEARCH STUDENTSHP

The Status and Ecology of the Ring-necked Parakeet in the UK

A three year studentship, funded by CSL/MAFF, leading to a Ph.D./DPhil is available to study feral populations of Psittacula krameri in Britain. The project is expected to start in October 1995 and will include extensive field work and ringing studies.

For further details contact Dr Calvin Dytham, Department of Biology, University of York, PO Box 373, York, YO1 5YW UK. Email cd9@york.ac.uk, tel. 01904 432853, fax. 01904 432860.
Applications are invited for the post of Research Technician Grade D to provide support for a research project on tenascin isoform expression in human fetal membranes. The post is funded by Wellbeing, and will be based in the Departments of Obstetrics and Gynaecology and Molecular Pathology. Experience of techniques in some of the following areas is required: protein biochemistry, characterisation of monoclonal antibodies, in situ hybridisation, northern blots, immuno-cytochemistry, RT-PCR. Training will be provided where necessary.

Applicants should possess BTEC/HNC or Diploma, or equivalent and have at least 7 years laboratory experience (including any training period). Salary Grade D £11,399 to £13,610 pa.

Written applications, a CV and the names and addresses of two referees to: Mrs J Jackson, Chief Technician, Department of Obstetrics and Gynaecology, Clinical Sciences Building, Leicester Royal Infirmary, PO Box 65, Leicester LE2 7LX. Informal enquiries may be made to Dr S Bell (0116 252 3164) or Dr H Pringle (0116 252 3227).

Closing date for applications is 13 July 1995.

Towards equal opportunities Promoting excellence in University teaching and research [1984-024 (1995) : 60]
Quantitative Ecologist

BTO requires an experienced ecologist to work on a range of applied ornithological projects. Candidates should have a Ph.D. or similar experience together with considerable analytical and computing expertise. Experience in avian population dynamics would be an advantage.

The post will be at HSO level, Salary from £13,025 to £18,165. Application forms are available from Andy Elvin, BTO, The Nunnery, Thetford, Norfolk IP24 2PU. Closing date 21 July 1995.

British Trust for Ornithology
Quality is the vital component in our success

**QUALITY SPECIALIST**

Clitheroe

highly attractive salary - negotiable

3M Health Care

With your energy, experience and expertise, you will be an inspiration in the achievement of Quality as part of a leading international organisation in the development and manufacture of metered dose inhalers for the health care market.

Based at our 3M Neotechnic site in Clitheroe, your role will be to manage the valve assembly quality control and engineering function, providing an effective service to manufacturing and developing projects to support the Company's business objectives.

Continuous improvement will be your goal and you will be active in evaluating new technology and automation to improve productivity within this Centre of Excellence, as well as ensuring quality systems conform to ISO 9002 and GMP.

You will also have a key role to play in deputising for the Quality Manager when required, as well as liaising with customers to ensure complete product and service satisfaction.

A graduate in Chemistry, Chemical Engineering or Pharmacy, you will have at least five years experience in a senior Quality role within the pharmaceutical industry. Analytical and highly self-motivated, your expertise will include a good knowledge of statistical techniques and the ability to lead and inspire.

We will reward you with a highly attractive salary which will be dependent upon your experience and track record to date. We can also promise you a first class benefits package, which includes relocation expenses, together with a clean and progressive working environment in which to advance your career as part of a major organisation.

Please send your current C.V. and salary details to: Mr Brian Fox; Quality Manager, 3M Neotechnic Ltd, Upbrooks, Clitheroe, Lancs, BB7 1NX

SCHOOL OF ELECTRICAL, ELECTRONIC
& INFORMATION ENGINEERING

3 YEAR Ph.D. RESEARCH STUDENTSHPs

1. Bio-medical Optics: The development of new optical methods of measuring human skin properties, including skin moisture and trans-dermal diffusion. CASE award with SKB.
2. Transient Grating Research: The development of new non-linear optical methods of non-destructive testing, especially of thin films and semiconductors. Supported by EPSRC and NPL.

Applicants should have a good first degree in a relevant area and an interest in measurement science. Contact Professor R. E. Imhof, School of EE&IE, South Bank University, 103 Borough Road, London SE1 0AA. Telephone: 0171-815 7564. Fax: 0171-815 7567, e-mail bob.imhof@sbu.ac.uk

SOUTH BANK UNIVERSITY LONDON
A charity serving the community through excellence in teaching and research.
The University of Reading
Applied Optics and Image Processing
Department of Physics

Postdoctoral Research Fellow

The University wishes to appoint a Research Fellow for a period of three years to work in conjunction with Alan Lettington, Professor of Applied Optics. Applicants should have a proven research record in digital image processing related to image enhancement and restoration, with particular reference to non-linear methods. The Fellow is expected to contribute to the MSc course in Applied and Modern Optics. Salary up to £18,294 p.a.

Apply for Application Form to Personnel Officer, The University of Reading, Whiteknights, P.O. Box 217, Reading RG6 6AH telephone (01734 318754). Closing date 21 July 1995. Please quote Ref. R9540.

A centre of excellence for university teaching and research
The University of Liverpool
Oceanography Laboratories

**Ph.D. Studentship**

To work on physical controls of biological uptake of CO$_2$ in the Antarctic Circumpolar Current. Data from the Southern Ocean will be analysed to quantify the degree to which local upwelling associated with eddies and fronts is enhancing primary productivity there. Candidates with or expecting a good degree in Oceanography, Meteorology, Physics or Mathematics should contact: Dr H Leach, Oceanography Laboratories, The University of Liverpool, Liverpool L69 3BX, providing c.v. and names of two referees. Previous knowledge of the ocean is not essential.

**Ph.D. Studentship**

Three years funding is available to investigate contractility, innervation and control of Ca$^{2+}$ and intracellular pH in gastric smooth muscle. As well as increasing our understanding of the normal physiology of gastric function and smooth muscle, the project will also determine if there are factors which predispose to gastric dilation-volvulus. This is an often fatal syndrome in dogs of which the pathophysiology is little understood. The project is a result of collaboration between the Departments of Physiology (Dr. S Wray, Ext. 5306) Veterinary Preclinical Sciences (Dr. C Vaillant, Ext. 4224) and the Small Animal Hospital (Mr J Williams Ext. 4298). The studentship is funded by the British Small Animal Veterinary Association and is suitable for a good veterinary or science graduate (1$^{st}$ or 2.1), and will be £10,000 p.a. For informal enquiries and further details phone 0151 794 5306/4224/4298.

Applications, letters and c.v. should be sent to Miss Colette McNerney, Department of Physiology, The University of Liverpool, Liverpool L69 3BX as soon as possible.

Working Towards Equal Opportunities

FOR THE ADVANCEMENT OF LEARNING
We are Europe's largest biological research organisation. Located in East Anglia, we carry out essential work evaluating the safety of pharmaceutical products.

HRC

METABOLISM AND PHARMACOKINETICS

**Bioanalysts** - Mass Spectrometry
As part of continued and extensive expansion, several bioanalysts are required to work in the Mass Spectrometry Department.

The work involves developing and validating sophisticated bioanalytical assays, and analysing samples of clinical or non-clinical origin often as part of new drug development programmes. The department is equipped with a wide range of state-of-the-art GC/LC-MS/MS instruments.

The ideal candidate should be qualified to degree or equivalent level with an interest in developing a career in bioanalytical mass spectrometry. Previous experience in mass spectrometry, chromatography or robotics operation would be advantageous. Ref: JC/27.

**Bioanalysts** - HPLC
As part of our continued planned expansion, experienced scientists (BSc, GRSC or Ph.D.) are required for the HPLC Bioanalytical Sections of the Department of Bioanalysis. Previous experience in method development, validation and working in a GLP regulated environment is necessary.

The work involves developing and validating bioanalytical methods which will be utilised for the measurement of drug concentrations in biological samples of non-clinical and clinical origin. Duties would also include method troubleshooting and optimisation. Many of the compounds studied are new chemical entities undergoing development. Ref: JC/26.

ANALYTICAL CHEMISTRY AND PHARMACY

**Team Leader** - Stability Testing
Our stability testing area undertakes the setting up, running and associated analytical work for short and long term test programmes on drug substances and finished pharmaceuticals. The work is undertaken to enable assessment of shelf life specification in support of both clinical trials and product licences.

We are seeking a graduate who has several years' experience of stability testing, gained either in the pharmaceutical industry or with a contract research organisation, to take charge of a scientific team of between six and eight people.

The successful applicant will be highly motivated, have an innovative approach to problem solving, good communication skills and be fully conversant with GLP. Ref: JC128.

These vacancies provide an ideal opportunity for suitably qualified scientific staff to join the leading UK contract research and development group in the UK, located in modern, laboratories equipped with state-of-the-art instrumentation and automated data capture and computer data processing facilities.

The Centre is located in pleasant countryside with excellent road and rail links to Cambridge, London and the Midlands.

We offer competitive salaries based on qualifications and experience as well as the usual benefits you would expect from a successful and expanding organisation, including assistance and relocation. Attractive career opportunities based on merit exist.
Please send a full CV, including details of current remuneration to: The Personnel Officer, Huntingdon Research Centre Ltd, Huntingdon, Cambs. PE18 6ES, quoting the appropriate reference number.

Closing date for receipt of completed applications is: 13th July, 1995.

CRAs

a small reminder from Britain's largest provider
We can offer CRAs with at least six months experience opportunities throughout the UK. All the major pharmaceutical companies know Innovex: isn't it time you did?
Phone us now on 01 628 491590, or send/fax your c.v. to Louise Woolfenden, Innovex House, Marlow Park, Marlow, Bucks SL7 1TB.
Fax 01628 491555.
Leicester University  
Department of Geology  

**EXPERIMENTAL OFFICER (COMPUTING)**

Applications are invited for a post of Experimental Officer (Computing) in Geophysics and Borehole Research in the Department of Geology. The post is for a fixed period of three years.

The principal duties of the post will be to manage and trouble-shoot the computer systems currently comprising VAX/VMS networked SUNs, Silicon Graphics, PC and Macintosh Computers; to write and maintain programs in support of research and teaching in the Geophysics Group and Borehole Research; and to support the departmental undergraduate teaching and use of computers. There will be occasional participation in undergraduate and/or research geophysical fieldwork.

Applicants should be familiar with UNIX and VMS, preferably having experience of programming in both Fortran and C, and have some experience in the interfacing of varied hardware configurations. Some knowledge of Geophysics would be advantageous. Applicants must be graduates in Geophysics, Physics, Engineering, or Computing, preferably with subsequent experience in IT.

Salary will be on the other Related Grade 1 Scale £14,317 to £15,986 per annum according to qualifications and experience.

Further particulars and application forms are available from the Staffing Office, (EO Post), University of Leicester, University Road, Leicester LE1 7RH. Tel (0116) 252 2438. Closing date for applications is 13 July 1995.

Towards equal opportunities

Promoting excellence in University teaching and research.
A vacancy for a

**FORENSIC BIOLOGIST**

with at least five years experience in the examination of body fluids, fibres, hair etc. Practical experience in DNA profiling will be an essential qualification.

Generous remuneration with bonus and company car. Applications with a brief CV to be received by 8 July.

CRYSTALOX

A small company supplying crystal growth systems to export markets requires a Materials Science Graduate to carry out hands-on assignments in crystal growth system developments.

Ability to work as a member of a small team of mixed talent and still retain individual responsibility is paramount, together with verbal and written communication skills.

Please remit CV and brief details to Mr R. Greaves, Managing Director, Crystalox Limited, 1 Limborough Road, Wantage, Oxon OX12 9AJ.

DEPARTMENT OF THEORETICAL MECHANICS

Postdoctoral Research Assistantship in Applied Mathematics
The Department of Theoretical Mechanics has been awarded funding by the EPSRC Mathematics Programme for the following postdoctoral research project:

Thermal effects in semiconductor laser operation (in collaboration with the Department of Electrical & Electronic Engineering, funded under the EPSRC Applied Nonlinear Mathematics programme)

The project will start on 1 October 1995 or possibly at a later date to be mutually agreed. Applicants should hold, or expect to obtain in the near future, a Ph.D. in an applied mathematical discipline.

Informal enquiries may be addressed to: Professor J R King. Tel: 0115 951 3854, e-mail: John.King@nottingham.ac.uk.

Applicants should send a detailed CV, together with the names of two academic referees, to Professor J R King, Department of Theoretical Mechanics, The University of Nottingham, University Park, Nottingham NG7 2RD. Closing date: 28 July 1995.

IACR-Long Ashton Research Station
Applications are invited for two postdoctoral positions to work on a 3 year MAFF-supported contract involving the dwarfing of ornamental plants through genetics manipulation.

The first position comprises a Research Assistantship with Dr M R Davey, The University of Nottingham. The second position involves a Brand 6 (Research Scientist) post with Dr P Hedden, IACR-Long Ashton.

Applicants should have experience in molecular biology and in the case of the Nottingham position, also in plant transformation.

Current salary scale for the Nottingham position is within range £14,317 - £21,519 pa.

Applications, together with a detailed CV and the names of three referees, for the first position, should be sent to Dr M R Davey, Department of Life Science, The University of Nottingham, University Park, Nottingham NG7 2RD. Applications for the second position to Ms F Goddard, Personnel Officer, IACR-Long Ashton Research Station, Bristol B18 9AF. Closing date: 12 July 1995.

DEPARTMENT OF PHYSIOLOGY & ENVIRONMENTAL SCIENCE

Postdoctoral Research Assistant in Plant Molecular Biology
Required to join a research group studying the Regulation of Pod Development in Oilseed Rape, in the above Department based at the Sutton Bonington Campus. Individuals with experience in the isolation and characterisation of gene promoters are particularly encouraged to apply. The post is available for four years and is part of a project funded under the LINK Cell Engineering Scheme in collaboration with BBSRC, MAFF, SOAFD and Nickerson BIOCEM Ltd.

Salary will be within Research Assistant Grade 1A £14,317 - £21,519 pa

Applicant should send a detailed CV, together with the names of two referees, to Dr Jeremy A Roberts, Department of Physiology and Environmental Science, Faculty of Agricultural and Food Sciences, The University of Nottingham, Sutton Bonington Campus, Loughborough, Leicestershire LE12 5RD. Further details may be obtained from Dr Roberts, tel: 0115 9516339 or Email: Jeremy.Roberts@Nottingham.ac.uk. Closing date: 23 July 1995.

DEPARTMENT OF MEDICINE
Division of Renal & Inflammatory Disease

Medical School Technician
The successful applicant will work in a research group that offers wide experience in molecular cell biology in newly refurbished laboratories. Minimum qualifications required are HNC, MLSO or equivalent. Experience in molecular biology, protein chemistry, cell culture and the use of radioactive isotopes would be an advantage, but training will be provided. Interested candidates will be encouraged to study part-time for a higher degree.

Salary will be within MST1 £10,821 - £11,706 pa. The post is available for a period of three years.

Applications in writing, together with a detailed CV and the names of two referees, to Dr Eleni Stylianou, Division of Renal and Inflammatory Disease, University Hospital, Queen's Medical Centre, Nottingham NG7 2UH. Closing date: 10 July 1995.

The University of Nottingham is a research-led institution which provides the highest quality learning environment and is committed to equal opportunities in employment.

The University of Nottingham
Research Opportunities in Metabolic Modelling and Dosimetry

Research Scientist -
Radiological, Protection £25,000 - £36,000

AWE plc is renowned throughout the world as a high technology leader making a vital contribution to the UK’s defence capabilities.

We have opportunities in our Dosimetry Group for research scientists to help further our knowledge of radiation and its effects. The successful applicants will lead part of a team which provides the HSE Approved Dosimetry Service for the AWE. The scope of the work will involve research in areas such as radioelement metabolism, internal dosimetry and epidemiology. The successful applicants will also assist in the development of protocols for the interpretation of dosimetry data. The work will involve liaison with dosimetry professionals from the UK nuclear industry.

Applicants should hold a good science degree and be experienced in computing.

A post-graduate qualification in a related subject would be advantageous. The ability to work as part of a multi-disciplinary team is essential.

In return for your expertise, you can expect an attractive salary which will reflect your experience together with a benefits package which includes a generous leave allowance, nominal contributory pension, excellent sports and social facilities and assistance with relocation costs where appropriate.

For an application form, please write or telephone Jackie Vaux, at AWE plc, in SRW Personnel, Room 1077, Building F6.1, Aldermaston, Berks RG7 4PR. Tel: (01734) 824341. Closing date for return of application forms 20th July 1995.

We are an equal opportunities employer.

POSITIVE ABOUT DISABLED PEOPLE

AWE

IMPERIAL COLLEGE
University of London
THE CENTRE FOR ENVIRONMENTAL TECHNOLOGY
invites applications for the following

Ph.D. Case Studentships starting in October 1995:

- Development of airborne tunable-diode-laser instrumentation for tropospheric and stratospheric measurements of trace atmospheric species (NERC/National Physical Laboratory).
- Security of supply of energy in Western Europe (ESRC/Scottish Nuclear).
- Chemical speciation techniques: Their application to the identification, economic evaluation and regulation of the impacts of mining wastes on the environment (ESRC/RTZ Technical Services Ltd).

Closing date 12 July 1995. Further details can be obtained from the Centre for Environmental Technology, 48 Prince's Gardens, London, SW7 2PE tel 0171 594 9283/5.

The College is striving towards Equal Opportunities

At the leading edge of research, innovation and learning
[1984-037 (1995) : 64]
HELIX RECRUITMENT
specialises in placing technically skilled people with commercial aspirations in exciting sales oriented roles.

Sales Vacancies
Sales experience not essential for
- a wide range of laboratory plastics aimed mainly at life science research
- UV/vis and fluorescence spectroscopy

Sales experience a must, combined with
- radiation monitoring or similar skills for sophisticated instruments to major industrial accounts
- hygiene / microbiology expertise for monitoring equipment to consumer production sites

Technical Support
fantastic job for molecular biology Ph.D. in mammalian systems- south coast.

Whatever your technical expertise call 01323 440 842
to talk about your plans for the future

Department of Medicine

Research Technician/ Graduate Research Assistant
With an interest in Biochemistry or Physiology for a project funded by the National Kidney Research Fund on the role of glucocorticoid hormones in the kidney. Work will involve microdissection of kidney tubules and enzymatic assay of corticosteroid metabolism in the kidney. Salary £11,069 plus London Weighting.

Telephone Mary Walker on 0171 209 6183, email runwin@med.ucl.ac.uk, for application form/further information. Closing date 21 July 1995.

Pursuing Excellence in Education and Research

Working Toward Equal Opportunity
[1984-039 (1995) : 64]
A vacancy exists for a **Research Fellow** to work in the Rope Research Group at The University of Reading in connection with an industrially funded set of projects related primarily to offshore and deep mining applications. The work will involve assessing the influence of degradation on rope fatigue, simulating the service loading of crane rope, and investigating the performance of alternative NDT concepts.

The successful candidate will have a good honours degree in Mechanical Engineering or a related discipline, have relevant postgraduate experience, and a proven ability to work on applied materials mechanics problems.

Apply for Application Form and further particulars to Personnel Officer, The University of Reading, Whiteknights, P.O. Box 217, Reading RG6 6AH telephone (01734 318754). Starting salary in the range £14,317 to £18,294 p.a. according to age, qualifications and experience (Research & Analogous scale 1A). Closing date 21 July 1995. Please quote Ref: R 9539.

A centre of excellence for university teaching and research.
[1984-040 (1995) : 64]
The Defence Research Agency is a dynamic research agency of international renown. Our scientific teams work alongside many leading industries, developing and delivering innovative solutions to meet customers needs.

World class research in Materials Science
£11,000 to £18,000 & benefits (salaries according to experience)
Poole, Dorset - Relocating to Farnborough 1996

The Structural Materials Centre was the first Dual-Use technology centre within DRA. As the finest 'centre of excellence' in structural materials research in Europe, our world class facilities make a key contribution to defence and industry. We are also able to provide a critical mass, cross fertilisation and combinations of expertise which individual companies cannot sustain internally.

In the following areas, we are seeking ambitious physicists, engineers and scientists with relevant expertise and a keen desire to be at the forefront of their particular field.

Magnetic Materials
This post will undertake research on ferromagnetic materials, in particular steels and steel structures.

Transducer Materials/Ceramics
The post will involve research on the relationship between chemistry, microstructure and the electromechanical properties of ferroelectric ceramics/composites and ferromagnetic alloys.

Acoustics
The post holder will investigate the influence of organics and bubbles on the control of underwater sound and the influence of ultrasonics on a variety of physical and chemical processes.

Candidates should have or expect to obtain a good Honours degree or Ph.D. The magnetics and acoustics posts would particularly suit graduates in physics or engineering. For the transducer materials post, Physicists, Chemists or Material Scientists would be considered.

Starting salaries are dependent upon experience and qualifications. We offer a comprehensive benefits package including a non-contributory pension scheme, up to 6 weeks annual holiday plus Bank holidays, training and opportunities for promotion. Relocation assistance may be available.

DRA welcomes applications from suitably qualified people regardless of sex, marital status, race or disability.

We also have vacancies in a range of disciplines in our other divisions. Anyone who reaches a suitable standard in this competition but is not appointed may be considered for other specialist vacancies. Alternatively, we shall be happy to consider applications for such posts from those eligible for the continuous central recruitment scheme.

Please contact us for an application form quoting reference E/95/SMC/20. SMC (HRI) P161 Building, DRA Farnborough, Hants GU14 6TD. Telephone: (01252) 392526 Closing date for receipt of completed applications 21th July 1995

DRA
DRA is a division of the Defence Evaluation and Research Agency of the MOD.
[1984-041 (1995) : 64]
Assistant Laboratory Manager

We wish to appoint a Higher Scientific Officer (HSO) as assistant to our Laboratory Manager. The appointee will be expected to assist in all aspects of the day to day work of a large and modern research/coagulation laboratory. The laboratory is mainly involved in work on the coagulation and fibrinolytic systems but also undertakes studies on the plasma lipoprotein system. Its activities are:

1. Applied Research Support for a number of large prospective population surveys, clinical trials and case-control studies concerned with cardiovascular disease, coagulation and fibrinolysis.
2. Clinical Servicing the thrombophilia clinic of the Royal Hospitals Trust.
3. Basic The Laboratory undertakes developmental work as needed, sometimes in collaboration with other coagulation laboratories.

This is a responsible position requiring the appointee to combine practical research with the administrative business of the laboratory. They will be expected to deputise for the Laboratory Manager in all roles including staff management, purchasing and safety.

The successful applicant should have either
A degree in scientific, engineering or mathematical subject/or Degree-standard membership of a Professional Institution/or BTEC Higher/SCOTVEC (HNC) in scientific engineering or mathematical subject or an equivalent qualification.

University of Warwick
Department of Physics

POSTDOCTORAL RESEARCH FELLOWSHIP IN MAGNETISM

Applications are invited for a three year postdoctoral fellowship starting 1 October 1995 to study 'Correlated Magnetic Systems'. This work is supported by a grant from EPSRC and will involve investigations of the magnetic properties of frustrated magnetic systems, magnetic ordering in heavy fermion materials and the properties of cuprate magnets such as CuGeO. This project will involve single crystal growth using an IR furnace, bulk property measurements and extensive neutron scattering studies in Europe and the USA. Experience in any of the above techniques would be an advantage. Starting salary on the Research RA1A scale: £14,317 - £21,519 pa.

Enquiries to Professor Don McKenzie Paul: tel: 01203 523603 or email phrie@cvs.warwick.ac.uk

Application forms (returnable by 20 July 1995) from the Personnel Office, University of Warwick, Coventry CV4 7AL (01203 523627) quoting ref 47/3A/94 (please mark clearly on envelope).

The University of Warwick is an exempt charity dedicated to excellence in teaching and research and is an Equal Opportunities Employer.

Anglian Water is geographically the largest of the water companies providing water and sewage services to more than 5 million customers over some 27,000 square kilometres.

Provision of Water Quality statistics and information to our customers and regulators is critical to the continued success of Anglian Water. If you want to play a leading role in preparing information, maintaining and developing computer programmes and converting existing systems to our new format then we'd like to hear from you.

A degree or equivalent, experience in BULL or VAX programming (FORTRAN preferably) and knowledge of statistics are desirable.

To apply please send a current CV and covering letter to Joanne Darby, HR Assistant, Compass House, Chivers Way, Histon, Cambs CB4 4ZY quoting reference number S104. Closing date: 13 July 1995.
CSL
CENTRAL SCIENCE LABORATORY
Food Science Laboratory, Norwich Research Park Colney, Norwich NR4 7UQ

The Central Science Laboratory is a science-based Executive Agency of the Ministry of Agriculture, Fisheries and Food (MAFF) concerned with food and environmental safety.

**SCIENTIFIC OFFICER £11,138 - £19,669**

We have a vacancy in our Biomarkers of Intake and Trace Element Studies team which is involved in nutritional and safety issues relating to trace element levels in food, the food chain and in clinical samples. The team is part of the Chemical Safety of Food Group located at our laboratory in Norwich. The postholder will be required to work on a range of surveillance projects: duties will include sample acquisition, preparation and analysis for trace elements using inductively coupled plasma mass spectrometry and atomic absorption spectrometry. Candidates must have experience in chemical analysis, and experience in instrumental analysis is desirable. A degree or equivalent in Chemistry or a related discipline is required.

Appointment to the post will be on a three year fixed term contract. However, there is a possibility that the contract may be extended and/or converted to permanent status. Starting salary will be in the range £11,138 to £16,168, dependent upon qualifications and experience. Further progression through the scale, and up to the maximum, will be performance related.

Application forms and further details are available from Christine Utting on Norwich (01603) 590299 – please quote reference CSFS/S02(FLN 4161).

Completed applications must be returned to Christine Utting at the address above by 13 July 1995.

CSL IS AN EQUAL OPPORTUNITIES EMPLOYER
UNIVERSITY OF OXFORD
Nuffield Department of Clinical Medicine

Research Assistant
Salary scale RS1 B: £14,317 - £18,294 per annum

Applications are invited for a graduate research assistant to work in the Molecular Sciences Division of the Department of Clinical Medicine at the John Radcliffe Hospital. The post is funded by the Wellcome Trust for 3 years in the first instance with the possibility of further extension and for the starting salary range £14,317 to £15,154.

The successful applicant will work on the structures and interactions of key cell recognition molecules of the immune system. The post holder will have the opportunity to learn new skills, including the latest methods for expression and purification of recombinant forms of proteins, in this large and dynamic department.

Please apply in writing or by telephone for an application form to Mrs J Roast, Room 5802, Nuffield Department of Clinical Medicine, Oxford OX3 9DU quoting reference PDB/SD/RS1B/95. The closing date for completed applications is 21 July 1995.

The University exists to promote excellence in education and research and is an equal opportunities employer.
Applications are invited for 2 Post-Doctoral Research Fellows and a Research Studentship to join an inter-disciplinary research team working in the area of optical-based sensors for chemical and in-situ health monitoring of materials and structures.

(i) **Post-Doctoral Research Fellow - Photochemistry/Dye Chemistry (Ref. MAT. 1)**
Applicants should have a Ph.D. and relevant qualifications and experience in one of the following areas: (a) synthetic dye chemistry; (b) photochemistry; (c) photophysics. Knowledge of printing technology is desirable but not essential. The project is funded by an industrial organisation and involves the use of colour chemistry for vision-based sensor technology. The project is for a period of two years and the salary will be in the range of £15,000 - £20,000 per annum. Applicants should be highly self-motivated and creative with good communication skills.

(ii) **Post-Doctoral Research Fellow - Optical Fibre Sensors (Ref. MAT.2)**
This project involves the development of a novel class of self-sensing advanced fibre reinforced composites using optical fibre based sensing techniques. Applicants must have relevant qualifications and experience in optoelectronics or optical fibre technology. This project is initially for one year and is funded by a ROPA grant. The salary will be in the 1A range up to £18,000 per annum depending on qualifications and publications record.

(iii) **Research Studentship (Ref. MAT.3)**
Applicants must have a minimum of a 2i BSc degree in Chemistry with a strong interest in synthetic chemistry. This project is in collaboration with Kingston University (Dr A Bandara).

Informal enquiries to Dr Gerard Fernando (Tel: 01895 274000 ext. 2365). E-mail: G.Fernando@brunel.ac.uk

For an application form please send a self-addressed envelope to the Personnel Department, Brunel University, Uxbridge, Middlesex, UB8 3PH, quoting the relevant reference numbers. The closing date for applications is 14 July 1996.

ClinTrials Research Ltd, a worldwide leader in pharmaceutical clinical research management, is rapidly expanding its European operations and is seeking the following personnel to be based in our European Head Office in Maidenhead, UK.

**Senior Clinical Data Co-ordinator** Ref: SV01
Minimum of four years data management experience
- Manage team of 3-5 data management staff
- Project manage assigned studies, including taking an active part in Data Processing
- Lead and/or participate in project teams
- Liaise with client companies
- Communication with ClinTrials Research USA offices

**Clinical Data Co-ordinators** Ref: SV02
Minimum of two years data management experience
- Pre-review of clinical data generated from clinical trials prior to data entry
- Determination and resolution of data problems
- Utilisation of database software
- Participation in project teams

**Clinical Data Assistants** Ref: SV03
- Pre-review of clinical data
- Log and track data
- Track Data queries
- Utilise database software
- Resolve data entry discrepancies

Requirements for all posts are a life science degree, a nursing or laboratory background. In addition an aptitude for computing is essential together with attention to detail and good organisation skills. We offer an excellent salary and benefits package.

Closing date: 27 July 1995

Please send your CV including current salary details (and quote reference number on the envelope) to, ClinTrials Research Ltd, Kings Chase, 107-123 King Street, Maidenhead SL6 1DP. Fax: (01628) 789666

ClinTrials Research Ltd
ON TARGET ON TIME ON BUDGET
**Metallurgist/Materials Scientist** for Microelectronic Interconnection Research

A research role in one of the fastest developing fields in Europe.

Philips is the major partner in a consortium dedicated to the development and commercial production of LCDs in Europe, a market which is growing by 30% p.a.

Scientists working in a multi-disciplinary environment at Philips Research Laboratories in Redhill, Surrey have the vital task of providing the product and technology innovations which will continue to give this activity its competitive technical edge.

This research role is no exception! You'll join a small specialist team, within our Engineering Group, which is investigating new interconnection technologies, for LC Displays, and providing support for development and production in the Netherlands.

There will also be an element of general materials/metallurgical support and "consultancy" to the laboratory programme, as well as to our product divisions within the UK. Team working and communication skills are therefore essential to interact effectively with both other specialists and general management.

We need a graduate with at least a 2.1 in Metallurgy/Materials Science, and a minimum of 3 years' R&D experience in electronic device assembly and packaging. You will need to demonstrate an innovative approach to problem solving combined with a 'hands-on' ability to make your ideas work in practice.

We offer a starting salary of £19,000 - £23,000 pa, plus a benefits package including contributory pension scheme, and assistance with removal expenses - where appropriate.

Interested? Then write, enclosing your C.V., with a covering letter highlighting your most relevant experience, to our recruitment adviser: Peter Richardson, Ref. 1841/B, Lansdowne, Rosedale House, Rosedale Road, Richmond, Surrey TW9 2SZ

Philips Research Laboratories

PHILIPS

PHILIPS

THE QUEEN’S UNIVERSITY OF BELFAST
School of Clinical Medicine

Fixed-Term Non-Clinical Lectureship in Molecular Pharmacology

This is a three year fixed-term appointment, tenable from 1 August 1995, to join the Cardiovascular Research Group within the Department of Therapeutics and Pharmacology to carry out high quality independent research in molecular pharmacology and to enhance the present interests of the group, particularly with a view to developing the application of molecular biological techniques.

Applicants must have an honours degree or equivalent in pharmacology, biochemistry, physiology or other related scientific subject; a Ph.D. or equivalent, with specialisation in cardiovascular pharmacology; evidence of research ability, particularly a good publication record commensurate with age/experience and a record of significant academic achievement, and cell isolation and culture experience.

Informal enquiries to Dr B. McDermott (01232) 3356770.

Salary scale: Lecturer Grade A: £15,154 - £19,848 or Grade B: £20,677 - £26,430 with eligibility for USS. Assistance with relocation as appropriate.

Further particulars are available from the Personnel Officer, The Queen's University of Belfast, Belfast BT7 1NN (01232) 245133, ext 3044/3246 or Fax: (01232 324944/310629)

Closing date: 21 July 1995.

The University is a charity, established in 1845 to advance education. Committed to an equal opportunities policy and selection on merit, it welcomes applications from all sections of the community. Under its affirmative action programme it particularly welcomes applications from women for academic posts. [1984-050 (1995) : 68]
UNIVERSITY OF LONDON

Manager of ULIRS Solid State NMR Service

Applications are invited for the post of Manager of the University of London Intercollegiate Research Service (ULIRS) unit in solid-state NMR spectroscopy. The service is based on a Bruker MSL300 dedicated instrument which is housed in excellent accommodation at University College London.

It is the responsibility of the manager, with the assistance of a technician, to provide all aspects of the service including advising potential users, running spectra, assisting in interpretation, any necessary training, and the development of the service. There is also considerable scope for initiating and executing new research projects and for participating in collaborative research.

Applicants should preferably have had experience in the technique at Ph.D. or post-doctoral level. The appointment will be on the Academic Related Grade 1 scale, at a level commensurate with age and experience.

Further details can be obtained from Professor R J H Clark FRS, tel: 0171 380 7457.

Applications, including a c.v., details of experience, and the names and addresses of three referees, should be sent to Professor R J H Clark, Department of Chemistry, University College London, 20 Gordon Street, London WC1H 0AJ by 14 July 1995.

Working toward Equal Opportunity

PURSUING EXCELLENCE IN TEACHING AND RESEARCH
NON-CLINICAL LECTURER IN PHYSIOLOGY/EXERCISE PHYSIOLOGY

Applications are invited for the above post in the newly formed Sheffield Institute of Sports Medicine and Exercise Science within the Faculty of Medicine and Dentistry of the University of Sheffield. The appointee will have duties in teaching, administration and research and will be expected to become expert in the field of human performance, thus opening up the possibility for consultancy work in this rapidly developing area.

Initial teaching responsibilities will be focused on the exercise physiology, exercise biochemistry and human performance modules on the existing Masters courses. There is much scope for developing into other areas and the appointee will be expected to contribute fully to the expansion of the Institute's teaching portfolio.

Applicants should have a good record in one or more fields relating to exercise physiology or sports science, be able to demonstrate success in attracting funding, and have a positive enthusiastic character who can drive high quality research, run stimulating courses and contribute fully in devising policies and activities of the Institute. A good list of relevant publications would be an advantage.

Closing date for applications: 21 July 1995. (Ref: R663)

BUILDING SCIENCE RESEARCH UNIT
SCHOOL OF ARCHITECTURAL STUDIES
RESEARCH ASSISTANT: AIR FLOW IN BUILDINGS

This EPSRC funded post is tenable for six months, from 1 August 1995, to investigate the influence of fluctuating pressures on air flow through building cracks. The post builds upon a previous thirteen month study, and most of the experimental equipment is in place. Candidates should have a Ph.D. and relevant building air flow experience, preferably in experimental and CFD techniques.

Salary in the range £14,317 - £15,986 pa. Informal enquiries to Dr S Sharples (Tel: 0114-282 4713; e-mail: s.sharples@sheffield.ac.uk).

Closing date for applications: 7 July 1995. (Ref: R661)

Further particulars from the Director of Human Resource Management, The University of Sheffield, Western Bank, Sheffield S10 2TN, Tel: 0114-282 4144.

Founded in 1905, the University of Sheffield provides higher education within a research-led environment. We encourage equality of opportunity for all.
A College of the University of London
Royal Postgraduate Medical School

Department of Infectious Diseases & Bacteriology, and Department of Histochemistry

Postdoctoral Scientist (Senior Research Officer (1A))

During the last 3 years our two departments have developed a successful collaboration in the field of sepsis and septic shock, and applications are now invited for this new position which is designed to consolidate and develop this programme. The project, which is funded by the MRC for 2 years, is specifically to evaluate the role of lymphotoxin β, (a recently recognised member of the TNF family) in sepsis. Experience in a wide range of molecular techniques is essential. The successful candidate will also have an opportunity to work with a variety of methods developed to localise molecules at the cellular level, including quantitative immunocytochemistry and in situ hybridisation. For further details please contact Professor J Cohen (Infectious Diseases 0181-740 3243) or Professor J Polak (Histochemistry, 0181-740 3231).

Application forms and job description are available from the Personnel and Payroll Division, Royal Postgraduate Medical School, Du Cane Road, London W12 0NN (Tel: 0181-740 3204) quoting ref ABCC7.

Closing date: 14 July 1995.

The RPMS is an exempt charity and a national centre of excellence in medical research and postgraduate teaching

DEPARTMENT OF BIOLOGY
YCRC P53 RESEARCH GROUP

SENIOR TECHNICIAN REF: 95/B10

The post is initially for 3 years, with possible extension, and is funded by the Yorkshire Cancer Research Campaign. You will be a member of a small integrated research group concerned with the molecular structure and function of p53 protein and will have responsibility for the day-to-day running and general organisation of the cell culture and molecular biology laboratories.

Duties will include assisting in experiments involving cell culture and transfection studies; collation of results, presentation of results at laboratory and scientific meetings; the development of new experimental protocols and specialised techniques; general maintenance and supervision of the laboratory/ equipment/ chemicals and stocks.

You should have a Higher National Certificate or equivalent qualification and more than seven years' relevant experience. Salary within the range £11,399 - £13,610.

For an application form please write on a postcard to the Personnel Office, University of York, Heslington, YORK YO1 5DD. Please quote the reference number. The closing date for applications is Thursday 13 July 1995.

PROMOTING EXCELLENCE IN TEACHING AND RESEARCH.

THE UNIVERSITY of York
MANAGER, CLINICAL RESEARCH  
London Based  

My client, a small research based pharmaceutical company is seeking an individual with clinical research monitoring and management experience who wishes to broaden their responsibilities to include management of a small clinical research group, with responsibility for revenue and expenditure for the group, and development of existing and new business. The position will suit those whose flexibility will enable them to cope with the interesting and varied challenges that they will face in this unique role.

If you are interested in applying for this position, or want more information, please send your CV, (applications strictly in writing only) to Ian Fogg, Executive Search, (Ref ZB/2), Wyeth House, Hyde Street, Winchester, Hants 5023 7DR, who will handle your application in strict confidence.

UNIVERSITY OF LEEDS
SCHOOL OF MATERIALS

Lecturer/Senior Lecturer/Reader in Ceramics

This post is available immediately and will be held within the Division of Ceramics. The ability (or potential) to lead and fund a viable research activity should be demonstrated. Applications are particularly welcomed from candidates who can show strengths in ceramic processing, ceramic microstructural characterisation or microstructure-property relationships in electroceramics. The appointee will make significant contributions to the teaching of Materials generally at both undergraduate and postgraduate levels.

Salary will be on the scale for Lecturer Grade A (£15,154 - £19,848) Grade B (£20,677 - £26,430) or Senior Lecturer / Reader (£27,747 - £31,357) according to qualifications and relevant experience.

Informal enquiries about the post may be made to Professor B Rand. Head of the Ceramics Division, tel: 0113 233 2536 fax: 01 13 242 2531 email, cerbr@lucs.mac.novel.leeds.ac.uk

Application forms and further particulars may be obtained from the Personnel Office (Academic Section), The University of Leeds, Leeds LS2 9JT, tel: 0113 233 5771, e-mail: e.f.moran@registry.leeds.ac.uk

World Wide Web address http://www.admin.leeds.ac.uk/jobadverts/index.html quoting the reference number 62/52

Closing date for applications: 28 July 1995.
The University of Leeds promotes an Equal Opportunities Policy.

Promoting excellence in teaching, learning and research.
Scientists & Technicians

Looking for a job or a change of job? Whatever your level of qualification or experience we have a wide range of both temporary and permanent positions throughout the UK.

Registration is easy:

First call your nearest Lab Staff Ltd office or send them your C.V. and a list of your laboratory skills.

Tel: 041 353 5078.

Applications are invited for the following bursaries, leading to Ph.D. degrees:
1. Microdeformation of cellular tissue
2. Mass transfer in polymeric membrane
3. Dissolution of food products
4. Protein interactions

Applications should possess at least an Upper Second degree or equivalent. Applications should include a CV and should be forwarded to Mrs Joyce Burberry, Department of Chemical Engineering and Chemical Technology, Imperial College, London SW7 2BY.

POSTDOCTORAL SCIENTIST

Applications are invited for this new position in our programme of research into individualising treatment for cancer and leukaemia patients. The successful applicant, working with Dr Andrew Bosanquet and using in vitro chemosensitivity assays and molecular biology techniques, will spearhead the work in cancer using fresh tumour cells. She/he will be conversant with cell culture and have a proven publication record. Knowledge of statistical analysis of data and experience in molecular biological techniques would be advantageous.

The appointment would be for three years. Salary in the range £15,986 - £21,519 per annum depending on qualifications and experience.

Informal enquiries can be made to Dr A. Bosanquet, Director, 01225 825425.

Application forms and further information may be obtained from the Personnel Department, University of Bath, Claverton Down, Bath BA2 7AY or telephone Bath (01225) 826092 (e-mail A.J.Witcombe@bath.ac.uk) quoting Ref No 95/142.

Closing date for applications is 17 July 1995.

Working towards equal opportunities.

Advancing learning and knowledge in association with business and industry [1984-059 (1995) : 70]
UNIVERSITY OF CAMBRIDGE  
Department of Geography  
University Lectureship in Physical Geography  

Applications are invited for a University Lectureship in physical geography, to be filled from 1 January 1996. Preference may be given to applicants with interests in environmental change, pollution, or environmental chemistry. Appointment is likely to be at University Lecturer level for those over 30, but younger scientists eligible for appointment as University Assistant Lecturers may also apply. The successful applicant will contribute to the Department's high level of research output, and will teach at undergraduate, Masters and Ph.D. levels. The University Lecturer scale, is from £17,813 for those aged 30, to £27,473 at age 41. The University Assistant Lecturer scale ranges from £14,756 at age 26 to £19,326 at age 32.

Further particulars may be obtained from Dr K.S. Richards, Head of Department, Department of Geography, University of Cambridge, Cambridge CB2 3EN, to whom applications (8 copies) should also be sent by 31 July, 1995.

The University is an equal opportunities employer, and aims to achieve the highest quality in teaching and research.

[1984-060 (1995) : 70]
APPLICATIONS are invited for a research studentship, to begin in October 1995 for a period of 3 years, to
study the effects of carbohydrate feeding on physical and mental fatigue in man. The studies to be carried
out will investigate the effects of different carbohydrate feeding regimens on performance in a variety
of tests of cognitive function and fine motor control at rest and during exercise. These effects will be
related to changes in the circulating concentration of substrates known to affect serotonin synthesis and
release. Changes in plasma neuroendocrine markers of serotonin activity will also be assessed.

Applications, including a CV and names of two referees should reach Dr R. J. Maughan, University
Medical School, Foresterhill, Aberdeen AB9 2ZD by 10 July. Candidates should possess or expect to
obtain at least a 2.i Honours Degree in a relevant science.

This Studentship is supported by a BBSRC CASE award from SmithKline Beecham.
[1984-061 (1995) : 70]
Applications are invited for three research studentships available from October 1 1995, which involve the use of X-ray and neutron diffraction techniques to study the structure and properties of materials.

**Organic Polymers - Two CASE studentships funded by EPSRC and ICI Plc.** This programme is supervised jointly by Dr A. Mahendrasingam and Professor W. Fuller (Keele) and Dr J. Harvie and Dr D. MacKerron (ICI, Wilton).

**Structural Phase Transitions - An Earmarked EPSRC studentship to study transitions in framework crystal structures.** This project is supervised by Dr M. Hagen (Keele) and Dr M. T. Dove (Cambridge).

These projects will utilise the state of the art X-ray facilities at Keele University, the X-ray synchrotron sources at SRS Daresbury, UK and ESRF, Grenoble, France and the neutron sources at the ISIS Facility, UK and the Institut Laue-Langevin, Grenoble, France.

For information from Department of Physics, Keele University, Keele, Staffs ST5 5BG. Tel: 01782 583330, Fax: 01782 711093, e-mail: pha70@cc.keele.ac.uk

[1984-062 (1995) : 70]
Department of Medicine, Unit of Ophthalmology

**Postdoctoral Research Assistant**
Initial salary within the range £14,317 - £15,986 p.a.

Applications are invited for a 2 year post funded by the North West Region R and D. The appointee will join a small research team under the direction of Dr Paul Hiscott (Senior Lecturer in Ophthalmic Pathology) investigating the interaction of ocular cells with their extracellular matrix. Applicants should have a background in molecular biology, tissue culture or immunohistochemistry. Familiarity with *in situ* hybridization and Western blotting would be advantageous.

Informal enquiries to Professor I. Grierson Tel: 0151 706 4912 or Fax: 0151 706 5802.

Quote Ref: A/841/NS Closing Date: 20 July 1995

Applications by c.v. with the names of three referees, should be received by the Director of Personnel (A), The University of Liverpool, Liverpool L69 3BX. Further particulars may be requested from this address or via email: jobs@liv.ac.uk

Working Towards Equal Opportunities

FOR THE ADVANCEMENT OF LEARNING
[1984-063 (1995) : 70]
UNIVERSITY OF WALES
CARDIFF
Department of Optometry and Vision Sciences University of Wales, Cardiff

LECTURER

Applications are invited for a lectureship to initiate, develop, and lead contact lens research in the Department. The post represents an exceptional career opportunity for an energetic person interested in creating an internationally recognised contact lens laboratory in a spacious, well equipped and research orientated environment. Clinically qualified candidates will have preference.

Application forms and further details from Professor Stuart Hodson, Head, Department of Optometry and Vision Sciences, University of Wales, Cardiff, PO Box 905, Cardiff CF1 3XF. Telephone 01222 874374. Fax: 01222 874859.

Closing date: August 1. Post to be filled at earliest convenient date.
[1984-064 (1995) : 70]
INTERESTED IN NEUROSCIENCE?
LOOKING FOR A NEW CHALLENGE?

Our purpose-built research laboratory at Terlings Park, near Harlow, is the centre of our drive to advance the frontiers of neuroscience. Responsible for MSD's neurobiological research world-wide, the laboratories are the most technically advanced of their kind and are dedicated to the discovery of novel therapies for the treatment of the nervous system disorders.

The Department of Pharmacology now invites applications from either recently qualified graduates in pharmacology, physiology, neuroscience and related subjects or those with two/three years' experience for a position within the molecular neuropathology group. You will have the opportunity to join a team of experts studying the dynamic changes in gene expression in brain and other tissues in response to novel drugs, injury and disease. The group has state-of-the-art technology including DNA synthesisers, PCR, and in-situ hybridisation techniques computerised image analysis and confocal microscopy systems.

Innovative basic research and the publication of results are encouraged. Salaries are extremely competitive and are dependent upon age and experience. Benefits include on site nursery, private health insurance, company pension scheme, full life assurance and relocation assistance where appropriate.

Please write with full CV to the Principal Personnel Officer, Merck Sharp & Dohme Research Laboratories, Terlings Park, Eastwick Road, Harlow, Essex CM20 2QR.

MERCK SHARP & DOHME
Commitment and determination: Early events in cellular development
Call for research proposals.

The BBSRC announces a second call for proposals to a co-ordinated research initiative aimed at understanding the molecular and cellular events in the early stages of cell differentiation of microbes, plants and animals.

Every organism, whether animal, plant or microbe, has its own characteristic form, reflecting the variety of differentiated cell types possible. Each cell type is characterised by its own specific pattern of gene expression and is the product of a particular pathway of development. A key feature of development is the process whereby lineages of cells are specifically committed to a given pathway. Generally as development proceeds along a particular pathway, cells progressively lose their developmental potential and their fate is increasingly determined. Thus, at various stages in a development lineage, precursor/stem cells are present which have a greater developmental capacity than the cells to which they give rise. Although cells may be thus committed, the overt demonstration of their fate, ie differentiation, may not be apparent until a later stage.

This BBSRC initiative builds on existing strengths at BBSRC institutes and universities and will complement work being carried out by the Medical Research Council. Funds will be allocated through open competition between BBSRC institutes, universities, UK GRE and agencies. Applications are now sought from the scientific community for basic work on the early stage of cell commitment and determination in microbial, plant and animal cells. The programme aims:

- to identify and understand the molecular mechanisms controlling the commitment and determination of cells;
- to understand the nature of the determined/committed state at the molecular and cellular level.

Proposals that demonstrate a comparative approach, exploit new methodologies, adopt an integrated approach or involve collaboration between different laboratories are particularly encouraged. Grants will normally be for three or four years. Applications to this initiative must be submitted by 1 September 1995.

Application forms and further details can be obtained from Dr. Christine Thompson, SEBG, BBSRC, Polaris House, North Star Avenue, Swindon, SN2 1UH. Tel: 01793 414 667 (E Mail: Chris.Thompson@BBSRC.ac.uk) Alternatively contact Mr Keith Iles on 01793 413 226.

University of Wales, Cardiff
Welsh School of Pharmacy
CARDIFF

2 Ph.D. STUDENTSHIPS

One is to study the properties and modulation of neuronal Ca-activated K-channels. Transmitter modulation and the role of phosphorylation - dephosphorylation events will be studied using both single channel and whole cell recording in cultured cells. The second is to study the effects of high pressure and general anaesthetics on neurotransmitter-gated ion channels. Channels are isolated for study by expression in Xenopus oocytes of mammalian messenger-RNA and channel function is measured using voltage-clamp techniques. There is excellent scope for collaboration with Molecular Biologists and Medicinal Chemists.

Both studentships are funded by the School at a level equivalent to the BBSRC. Candidates must have or expect to gain a 1st Class or Upper 2nd Class degree in a relevant subject. For further details contact Dr S. Daniels, Welsh School of Pharmacy, Redwood Building, Cardiff CF1 3XF.

The closing date for applications is Monday 17 July 1995. [1984-067 (1995) : 72]
Scientific Officer

Applications are invited for a Scientific Officer to work in a research group focusing on signal transduction in lymphocytes using genetic approaches. The work will involve the use of transgenic and gene targeting techniques to create genetic mutants and the use of cell culture, flow cytometry and protein biochemistry to characterise the phenotypes. Ideally candidates should have some experience in one of molecular biology or transgenic techniques or flow cytometry; however this is not essential as training can be given.

Applicants should possess a degree, BTEC higher certificate or equivalent qualification in an appropriate scientific discipline.

The starting salary for this position will be on the Civil Service Scientific Officer scale (up to a maximum of £18,630 per annum inclusive of London Weighting and Pension Supplement. A performance related pay scheme is in operation.

Please telephone for an application form, quoting reference number ICI/0666 on 0181 913 8544, or write to Mr Graeme Liddle, Assistant Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA. The closing date for completed applications is 21 July 1995.

The Medical Research Council is an Equal Opportunities Employer

Smoking is actively discouraged
UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Nuffield Department of Pathology & Bacteriology

**MRC Studentship**

Applications from recent graduates with good honours degrees (or who expect to obtain such a degree) are invited for a MRC studentship to be held in the Nuffield Department of Pathology & Bacteriology, University of Oxford. The student will work under the supervision of Dr. K. A. Fleming, Clinical Reader in Pathology and will register for a D.Phil at the University of Oxford. The student will study cell-mediated immunity in primary sclerosing cholangitis, a chronic disease of the human biliary system.

The successful applicant will be expected to start on 1st October 1995. The salary will be £6,551 per annum rising to £7,324 per annum in the third year.

Further details can be obtained from Dr K. A. Fleming, Nuffield Department of Pathology & Bacteriology, John Radcliffe Hospital, Headington, Oxford OX3 9DU. Applications consisting of a curriculum vitae and the names of two referees should be sent to Mrs S. Woodward, Departmental Administrator, Nuffield Department of Pathology & Bacteriology, John Radcliffe Hospital, Headington, Oxford OX3 9DU, by 13 July 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

We are now seeking graduates to study for a Ph.D. by research in the following areas where we shortly expect to have a number of funded places available:

- On-line industrial process monitoring
- Immunosensors
- Interfacial bioadhesion
- Optical biosensors
- Environmental monitoring
- Thermotolerant enzymes
- Molecular biology of lactic acid bacteria

Our intimate relationship with industry gives our graduates a unique advantage throughout and following their time at the Centre.

For further information and application forms please contact: Alison Bass, Student Admissions Secretary, Cranfield Biotechnology Centre, Cranfield University, Cranfield, Bedford MK43 0AL. Tel: 01234754339, Fax: 01234750907.

Cranfield University is an exempt charity offering a centre of excellence for research and education. [1984-070 (1995) : 72]
A departmental assistant is required to engage in the total synthesis of biologically active natural products and the application of synthesis towards the study of mechanism of action of enzymic processes. The duties will include the day-to-day direction of a group of synthetic chemists under Professor J. E. Baldwin as well as actual experimental work. Salary is on the RS1A scale £13,941 - £19,644 (under review) and according to age and experience. The appointment is for three years.

Applications for this pensionable post, including c.v., and the names of two referees should be sent to the Administrator, Dyson Perrins Laboratory, South Parks Road, Oxford OX1 3QY. The closing date for applications is 15 August 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

POSTGRADUATE STUDENTS:
SCHOOL OF ENVIRONMENTAL SCIENCES
ATMOSPHERIC CHEMISTRY
UEA
NORWICH -

The School of Environmental Sciences invites applications for the following studentships. Applicants should have a good Honours degree in Physics, Chemistry or Mathematics.

* A study of the metallic layers in the upper atmosphere produced by meteor ablation.
* Air-sea exchange, chemical processing and aerosol formation in the marine boundary layer.

The School is the largest interdisciplinary institution in the UK devoted to environmental sciences. Rated Grade 5 in the HEFC research review, the School has 44 members of faculty (research and teaching), 110 research staff, 80 research students and 330 undergraduate and MSc students. The School includes the Climatic Research Unit, the Centre for Social and Economic Research in Global Environment (CSERGE) and the Centre for Environmental and Risk Management. Further information and application forms can be obtained from Mrs Elly Reynokis, School Clerk, School of Environmental Sciences, University of East Anglia, Norwich NR4 7TJ. Telephone 01603 592544, Fax 01603 507719 or E-Mail E.Reynolds@uea.ac.uk

UEA is committed to Excellence in Education & Research.
Applications are invited from computer scientists with an interest in image analysis and mathematics as applied to biology to work on a project supported by two years funding from the Medical Research Council. The project involves developing geometric analyses of conducting networks in the human vasculature, refining methods of image analysis and devising new techniques of computer automated data interpretation. This approach promises wide application for medical diagnostics in the fields of hypertension, diabetes and cardiovascular medicine. The successful applicant will join a team of scientists, epidemiologists and clinicians actively involved in developing the program. Experience with Unix operating system, system administration and C programming would be an advantage.

Informal enquiries to Dr Alun Hughes or Dr Simon Thom, telephone 0171 725 1117 and Dr Anil Bharath, telephone 0171594 5183.

Applications in the form of a full CV and covering letter quoting the names, addresses and telephone/fax numbers of two referees should be sent to the Personnel Department, St Mary's Hospital Medical School, Norfolk Place, London W2 1PG.

Closing date: 14 July 1995. Please quote Ref 25230.

Applications may also be faxed to 0171706 3620.

Striving towards equal opportunities.

UNIVERSITY OF ST ANDREWS
School of Biological and Medical Sciences

RESEARCH TECHNICIAN

A vacancy exists for a Research Technician, funded by the British Heart Foundation, to work on dynamic responses of intermediate filaments in endothelial cells subjected to controlled fluid shear stresses. Applicants should be trained in either physiology, Cell Biology or Biochemistry and have two to three years laboratory experience in one or more of the following: cell culture management; immunocytochemistry and fluorescence microscopy; protein separation methods and immunoblotting.

The appointment is for three years and salary will be at the appropriate point on the Grade D scale for technical staff, i.e., £11,399 - £13,610 per annum (under review).

Application forms and further particulars from The Head of Personnel Services, The University, College Gate, St Andrews KY16 9AJ. Tel: 01334 462564 (out of hours - 01334 462571), Fax: 01334 462570, E-mail: vck@st-andrews.ac.uk, to whom completed forms accompanied by a letter of application, and a CV should be returned not later than Tuesday 25 July, 1995. Please quote ref: VK/ABM1702.

If further information is required please contact Dr F. W. Flitney (Tel: 01334 476161, ext 3490).

The University's mission is the expansion of knowledge through excellence in research, teaching and learning

The University operates Equal Opportunities and No Smoking Policies

THE ROYAL OBSERVATORIES

PROJECT COORDINATOR
JOINT ASTRONOMY CENTRE, HAWAII

The Royal Observatories have a vacancy for an experienced scientist or engineer to work as a Projects Coordinator for the James Clerk Maxwell Telescope (JCMT) at the Joint Astronomy Centre at Hilo on Hawaii.

The JCMT is a world class 15m sub-mm telescope operating in the major sub-millimetre bands, it is supported by a suite of heterodyne receivers coupled to a 2 GHz band-width auto correlation spectrometer. The Projector Coordinator will exercise day to day responsibility for the coordination, management, administration, technical assessment and detailed monitoring of all Instrumentation Programme projects. Detailed understanding and experience of project management in engineering/astronomical instrumentation will enable the postholder to identify potential project problems and take effective action when appropriate.

Applicants must have a degree (or equivalent) in a relevant subject, and must have at least 5 years experience in a scientific, research or engineering environment in a design or development capacity. A proven track record in successful project management and experience of managing budgets is required. Applicants must hold a full driving licence, and the successful applicant will be required to pass a high altitude medical examination as some duties may be carried out at an altitude of 14,000 ft.

The appointment will be on a starting salary between £13,651 and £23,932 depending on qualifications and experience. Further movement up the salary scale to a possible £29,117 will be dependent on performance. Overseas allowances are payable dependent on domestic circumstances.

For further information and an application form please contact Miss J Adams, The Royal Greenwich Observatory, Madingley Road, Cambridge CB3 0EZ Tel. 01223 374000 ext. 4865. Please quote reference number 12/95.

The PPARC has an equal opportunities policy.

The University is an exempt Charity which exists to advance learning to the highest level for the benefit of its students and society at large
Ph.D. Studentship in Protein Folding

A studentship is available: under the supervision of Dr S. E. Radford and Dr C. V. Robinson, concerned with *in vitro* folding mechanisms and chaperone-assisted folding of proteins with particular emphasis on techniques of mass spectrometry. (Ref. CVR)

Applicants should have (or expect to have) a first or upper second in chemistry, biochemistry or another related subject. An interest in protein biochemistry, mass spectrometry and/or biophysical methods would be an advantage. These awards are only available to candidates from the UK or EU and are funded by the Medical Research Council. Successful candidates will be expected to start by 1 October 1995.

A full C.V. including the names and addresses of two academic referees, should be sent to: The OCMS Administrator, New Chemistry Laboratory, South Parks Road, Oxford OX1 3QT, quoting reference number __. The closing date is 7 July 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

SCHOOL OF ENVIRONMENTAL SCIENCES
UEA NORWICH

SENIOR RESEARCH ASSOCIATE
IN GLOBAL WARMING MODELLING AND POLICY

Applicants are sought for the post of Senior Research Associate to work in the Centre for Social and Economic Research on the Global Environment (CSERGE), at the University of East Anglia's School of Environmental Sciences. CSERGE is a very active ESRC-sponsored research centre. The work will have particular reference to greenhouse gas sources, sinks and burden-sharing issues. The post is available for 1 October 1995 for one year. Applicants should have a good relevant first degree and preferably post-doctoral experience. Appointment will be on the Research and Analogous 1A scale with a starting salary in the range £14,317 to £18,294 per annum depending on age and experience.

A letter of application, current curriculum vitae and the names and addresses of three academic referees should be sent to Dr J. P. Darch, Research Administrator, School of Environmental Sciences, University of East Anglia, Norwich, NR4 7TJ, by 14 July 1995. Further particulars can be obtained from Dr Darch by telephoning 01603 592994.

UEA is committed to excellence in education and research and to equality of opportunity for all.
UNIVERSITY OF NEWCASTLE UPON TYNE  
Department of Engineering Mathematics

Temporary Lectureship in Engineering Mathematics

Available from one year from 1 September 1995, this post will coincide with the imminent arrival of Professor Y. A. Sergeev to take up the Chair in Engineering Mathematics following the retirement of Professor Alan Jeffrey.

The person appointed may be either a mathematician or an engineer with a strong mathematical background who will be expected to contribute to the wide range of courses in Engineering Mathematics provided for students in the Faculty of Engineering, from foundation year to postgraduate. Opportunities for research include involvement with other departments in the Faculty, either in the form of collaborative projects or in the joint supervision of research students. The Department includes engineers, mathematicians and applied statisticians on its staff.

Salary will be at an appropriate point on the Lecturer Grade A scale: £15,154 - £19,848 per annum, according to qualifications and experience.

No forms of application are issued.

Further particulars may be obtained from the Director of Personnel, Registrar's Office, University of Newcastle, 1 Park Terrace, Newcastle upon Tyne NE1 7RU with whom three complete copies of applications, including a full CV with present salary and the names and addresses of three referees, should be lodged not later than 21 July 1995.

Committed to equal opportunities

Dedicated to excellence in teaching and research

UNIVERSITY OF NEWCASTLE UPON TYNE
Department of Geography

LECTURER IN PHYSICAL GEOGRAPHY

Candidates will need to have research interests or the potential to develop a strong research profile in either process geomorphology or hydrology; experience of research in fluvial environments would be an advantage. A commitment to teaching will be required as the successful candidate will also be expected to teach at undergraduate level in these areas and at postgraduate level in appropriate topics.

The post is available for two years from October 1995.

Salary will be at an appropriate point on the Lecturer Grade A scale: £15,154 - £19,848 per annum, according to qualifications and experience.

Interested candidates are invited to discuss the position informally by telephoning the Head of Department, Professor A. C. Stevenson on 0191 222 7600 or Professor M. D. Newson on 0191 222 6425.

No forms of application are issued. Further particulars may be obtained from the Director of Personnel, Registrar's Office, University of Newcastle, 1 Park Terrace, Newcastle upon Tyne NE1 7RU with whom three complete copies of applications, including a full CV with present salary and the names and addresses of three referees, should be lodged not later than 21 July 1995.

Committed to equal opportunities.

Dedicated to excellence in teaching and research.
Medical Laboratory Scientific Officer (Ref: DRL/11)

Applications are invited for an MLSO to join an active clinical research group investigating the prevention and treatment of diabetes and pre-diabetes. Assay techniques used in the department include RIA, ELISA and HPLC.

The initial appointment is for 2 years and the salary will be on the MLSO 1 scale £10,405 - £13,693 pa.

Applications including a CV and the names of two referees should be sent to Jennifer Darnley, Diabetes Research Laboratories, Radcliffe Infirmary, Woodstock Road, Oxford OX2 6HE. The closing date for applications is Friday 14 July.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

UNIVERSITY COLLEGE LONDON

Research Assistants in Dept of Electronic & Electrical Engineering
Photoprocessing of Thin Films

Post-doctoral Research Fellow to work within an active and well equipped multi-disciplinary group researching into photoprocessing of thin films and surfaces directed by Professor I W Boyd. Postholder will undertake research into the application of new ultraviolet and VUV lamps in microelectronics, specifically for low temperature processing of Si, SiGe, and metallic layers. Experience in vacuum technology, optics, thin film characterisation, microelectronic processing, or equipment design would be an advantage. Applicants should possess Ph.D. in Physics, Chemistry, Electronic Engineering or related subject. This appointment is EPSRC funded and will be for approximately two years in the first instance.
Salary scale RA1A (£16,451 - £19,600 incl London Allowance)

Applications, which must include a full CV and publication list and the names of two referees who may be contacted immediately, should be sent to Jessica Amrouni, Dept Electronic & Electrical Engineering, UCL, Torrington Place, London WC1E 7JE and should arrive before 20 July 1995.

Telecommunications Research

Research openings available:
- Digital / optical communications
- Signal processing and coding
- Microwave techniques in optical fibre systems

Ph.D. or equivalent experience is generally required, although there are also opportunities for postgraduate research workers. These appointments are EPSRC funded and will be on fixed term contracts.

Salary at an appropriate point on the RA1A scale (£16,451 - £23,653 incl London Allowance). For information, contact Prof O'Reilly (Tel: 0171 380 7303, Fax 0171 388 9307, email: j.oreilly@eleceng.ucl.ac.uk). Applications should be sent to Jill Curley, Department of Electronic & Electrical Engineering, UCL, Torrington Place, London WC1E 7JE by 13 July 1996.

Working toward Equal Opportunity
PURSUING EXCELLENCE IN EDUCATION AND RESEARCH
Engineering Research Studentships

These studentships are funded by EPSRC and may attract an additional supplement from industrial sources. They will be held in one of the following research areas.

- **Measurement and Instrumentation**: Fibre-optics, optical sensors and photonic devices modelling, image processing, ultrasonics, design theory and methods, CAD of instruments and water and environmental instrumentation.

- **Information Engineering**: Computer vision, computer interfacing, highspeed networks and data mobility, and parallel architectures.

- **Control Engineering and Control Theory**: Hierarchical control, integrated system optimisation, intelligent control systems, multivariable control theory and design, mathematical system theory, and energy systems.

Candidates should have or expect to have at least an Upper Second Class Honours Degree in a relevant subject.

Further details and application form may be obtained from: Dr B M A Rahman, EEIE, City University, Northampton Square, London EC1V 0HB. Tel: 0171 477 8123, email: B.M.A.Rahman@city.ac.uk

Teaching and Research Excellence in London

The Countryside Council for Wales (CCW) is responsible for statutory conservation and other countryside matters within Wales. In conjunction with the Joint Nature Conservation Committee (JNCC), we have selected a number of rivers as possible Special Areas of Conservation (SAC). Some of these do not have SSSI status yet, and we are now undertaking a programme of river SSSI notification.

You will be involved in every aspect of this project. This includes visiting owners and occupiers, the collection and analysis of biological data, and the preparation of SSSI notification packages.

You must have a degree or equivalent in a relevant scientific subject. Previous experience of nature conservation is desirable (essential for the Senior Officer): especially in SSSI notification procedures: and liaison with land owners and the public. There will be some travelling, and a valid clean driving licence and your own vehicle are essential. Welsh language skills would be an advantage.

Starting salary will depend on qualifications and experience. These are pensionable fixed-term appointments of three years for the Higher Scientific Officer, and two years for the two Scientific Officers.

For further details and an application form, please contact Jill McGriele, Countryside Council for Wales. First Floor, Ladywell House, Park Street, Newtown. Powys. SY15 1RD. Telephone: (01686) 626799.

The closing date for completed applications is 28 July 1995. interviews will be held in Llandrindod Wells during the week commencing 21 August 1995.

The Countryside Council for Wales is an Equal Opportunities Employer. [1984-084 (1995) : 75]
Announcement of Opportunity for NERC Thematic Programme

MARINE BIOFOULING

The UK Natural Environment Research Council has approved funding of £1.4 m for a 3-year interdisciplinary Special Topic on marine biofouling, to address surface properties, attachment processes and other interactions between organisms and marine substrata. Collaborative work, the use of new technologies, and links with industry are all encouraged.

The closing date for proposals is 16 October 1995. Further details and grant application forms are available from:

Mrs N Stevens, NERC Awards & Training, Polaris House, North Star Avenue, Swindon SN2 1EU. Tel: (01793) 411546, fax: (01793) 411616, e-mail: NMS@mail.nerc-swindon.ac.uk

Natural Environment Research Council
Applications are invited for two Postdoctoral Fellows (Senior Research and Research Assistant, to join an established group in the Department of Haematology, RPMS, investigating the biology and potential therapeutic use of gene transfer in malignant haematological disorders, with major emphasis on chronic myeloid leukaemia and multiple myeloma. All positions are available for 3 years in the first instance.

**Postdoctoral Research Fellows** (Two posts)
(Senior Research Officer (IA))

The two research fellows will be involved in the preparation of retroviral and adeno-associated virus (AAV) vectors, transfection into normal and malignant cells, and analysis of infected cells by specialised culture assays, immunological and molecular biology methods. Previous experience in cell culture and molecular biology techniques is essential and practical familiarity with transfection of mammalian cells will be an advantage.

Salary in the range of £14,317 - £16,628 (according to age and experience) plus £2,134 London Allowance.
Ref JM/JA

**Research Assistant**

The applicant should have a first degree in biology. He/she will be responsible for ordering and maintenance of equipment and supplies, preparation of reagents and solutions, cryopreservation of cells, maintenance of cell lines in culture and the analysis of material by molecular biology methods. Preference will be given to candidates with significant laboratory experience in cell culture and/or molecular biology techniques.

Salary in the range £9,621 - £11,517 plus £1,999 London Allowance.

Ref. AFGW3

Informal enquiries can be made to Dr Junia V Melo (Tel: 0181-743 2030 ext 2169) or Dr Jane Apperley (Tel: 0181-740 3237).

Application forms and job description are available from the Personnel and Payroll Division, Royal Postgraduate Medical School, Du Cane Road, London W12 0NN (Tel: 0181-740 3204).

Closing date: 31st July 1995.

The RPMS is an exempt charity and a national centre of excellence in medical research and postgraduate teaching.
Novel Polymeric Membranes for Minimising Wastes from Organic Synthesis This project will develop novel polymeric membranes for preferential removal of organic compounds from aqueous wastes generated in industrial organic synthesis reactions, and will be undertaken in conjunction with Dow Corning UK Ltd.

Extractive Membrane Bioreactors for Treating Chemical Industry Wastes This project will focus on process engineering and design aspects, such as module configuration, and the interrelationships between microbial kinetics and membrane extraction rates. This CASE award will be supported by AH Marks Ltd.

Membrane Bioreactor for Biotransformations This project will develop membrane bioreactors for biotransformations which produce high value added chiral epoxides.

CVs from well qualified engineers/scientists are welcome. Contact Dr Andrew Livingston, Department of Chemical Engineering and Chemical Technology, Imperial College, London SW7 2BY. Fax: 0171 594604. Tel: 0171 5945582; email: a.livingston@ic.ac.uk

THE UNIVERSITY OF MANCHESTER

RESEARCH TECHNICIAN
Salary scale Grade C: £9,871 to £11,068 pa; D: £11,399 to £13,610 pa

Required to support a project in the Immunogenetics Laboratory of the Department of Medical Genetics investigating development of lymphoma in childhood, using molecular techniques.

Applications from recent graduates for appointment on grade C and from candidates with experience appropriate for grade D are welcome.

Application form and further details from Dr O. M. Taylor, Immunogenetics Laboratory, Research Floor, St Mary's Hospital, Hathersage Road, Manchester M13 0JH. Closing date 12 July.

RESEARCH TECHNICIAN
Salary scale Grade C: £9,871 to £11,068 pa; D: £11,399 to £13,610pa (under review) according to experience

Required to support a three year project investigating the Natural History of Cervical HPV Infection. The work will be undertaken on material accumulated during an eight year prospective study of cervical epithelial neoplasia. Candidates should have previous laboratory experience in virology and/or molecular biology, and a working knowledge of PCR would be an advantage.

Application forms and further particulars from Dr G. Corbitt, Director, Clinical Virology, Manchester Royal Infirmary, Oxford Road, Manchester M13 9W. Closing date 12 July.

As an Equal Opportunities employer, the University of Manchester welcomes applications from suitably qualified people from all sections of the community regardless of race, religion, gender or disability.

Promoting quality teaching and research.
INSTITUTE OF BIOLOGY
ACCREDITATION OFFICER
(0.75 part-time)

The post holder will be responsible for the management of the Institute's accreditation schemes for specialist laboratory-based training programmes and awards.

Applicants should have a degree in a biological subject, experience of educational administration and good communication and keyboard skills.

Salary 0.75 of £14,477 to £19,689 plus London Weighting. No smoking office.

Ph.D. RESEARCH STUDENTS

Applications are invited in the following areas.
1. Theory of vortex line phases of high temperature superconductors.
2. Experimental studies of magnetic materials.
3. Comets and cosmic dust in the solar system.
4. Optical properties of transition metals in silicate glasses for solar control.
5. Neutron scattering and muon spin rotation studies of amorphous materials.

Enquiries to the Graduate Admissions Tutor, telephone 0114 282 4351.

The studentships are either Research Council or University funded. II/1 or First class degree required.

Founded in 1905, the University of Sheffield provides higher education within a research-led environment.

We encourage equality of opportunity for all.

Applications are invited for a three year postgraduate studentship beginning 1st October 1995 to research the mechanisms for enhanced oil biodegradation in a foam-microbe system and leading to a D.Phil. degree.

Research at the University of York has indicated that concentrating and immobilising oil-degrading micro-organisms with nutrients in a foam carrier enhances degradation considerably. The project available aims to develop a suitable foam carrier, to establish an optimum foam-microbe system for oil degradation and to determine the mechanisms by which such an enhancement occurs.

This forms part of a BBSRC "Realising Our Potential" grant and exploits synergy between biologists and biochemists at York and Loughborough, working on applications of foam technology and biodegradation. The research team will also include a newly appointed postdoctoral microbiologist with experience in oil biodegradation. The position is based at York, although there will be some travel to Loughborough.

Candidates should be well qualified graduates with a minimum 2.1 honours degree that includes a substantial microbiology component. Applicants should be prepared to take a multidisciplinary approach and experience in analytical science and/or electron microscopy would be an advantage.

The current BBSRC grant is £5260 per annum.

Applicants should request an application form by writing to the Graduate Office, University of York, Heslington, York, YO1 5DD. Further details can be obtained from Dr Ashley Wilson or Dr Bernard Betts on 01904 432935 or 432810. The closing date for applications is 14th July 1995.

THE UNIVERSITY OF YORK –DEDICATED TO EXCELLENCE IN TEACHING AND RESEARCH.
National Heart and Lung Institute  
Department of Cardiothoracic Surgery  
(based at Harefield Hospital)

RESEARCH ASSISTANT

Applications are invited for the above post, available immediately, to join a molecular virology team investigating viral infections in transplant patients at Harefield Hospital.

The position will involve developing strategies for the molecular detection of a broad range of viral agents with a view to improving the clinical management of patients. There will be close liaison with clinical staff.

Applicants should be graduates with a background in virology and molecular biology and preferably with experience in PCR technology, sequencing and tissue culture.

The post will be available for one year in the first instance and salary will be based on the 1B scale, according to age and experience.

To apply, please forward a CV with the names and addresses of two referees, who may be contacted, to the Personnel Manager, National Heart and Lung Institute, Dovehouse Street, London SW3 6LY, quoting reference hAR/376 by 14 July 1995.

The National Heart and Lung Institute operates a non-smoking policy.

Research Council studentships and one fully funded industrial studentship are available to work on the physical properties of synthetic and natural polymer systems. Funding will be above the level of a basic EPSRC grant. Applicants should have, or expect to have a first or 2.1 class (or equivalent) degree in Physics, Chemistry, Materials Science or a related subject.
Open to British and other students.

Please send as soon as possible a CV with the names of two referees to
Mrs M. A. Staff, Cavendish Laboratory, Madingley Road, Cambridge CB3 0HE.
Tel. 01223 337007. Fax. 01223 337000.

The University aims to achieve the highest quality in teaching and research.
institute of food research

**Ph.D. STUDENTSHIP**
*(UNILEVER/BBSRC INDUSTRIAL CASE AWARD)*

**MOLECULAR IMPRINTING OF SURFACES**

Molecular imprinting is a means of creating selective recognition sites within highly cross-linked polymeric matrixes. Applications are invited for a Ph.D. studentship to undertake a project aimed at the development of an imprinting methodology for the preparation of surface specific polymers and/or oligomers. The project would suit a person with an interest in molecular recognition, polymer/organic chemistry or material science.

Applicants are expected to have a first or upper second class degree in one of the relevant disciplines and should send their CV, together with the names and addresses of two academic referees, to the Laboratory Personnel Officer, Institute of Food Research, Earley Gate, Whiteknights Road, Reading, Berks RG6 6BZ quoting ref: R20/95. The successful candidate will be expected to start on the 1st October 1995 and spend some time at Unilever as part of the project.

For further information, telephone Dr. Michael Whitcombe on Reading (01734) 357212. Closing date 14th July 1995.

ifr
The IFR is an equal opportunities employer

cancer research campaign
CRC Laboratories
Department of Medical Oncology
Charing Cross and Westminster Medical School

Ph.D. Studentship

Individuals holding or expecting to obtain a first or upper second class degree in a biological or related science are invited to apply for a Ph.D. studentship in this Cancer Research Campaign funded unit. The successful candidate will join a large group working on mechanisms of action of growth factor and steroid hormone receptors in breast cancer.

For further details contact Dr S Ali on 0181 846 1234 ext 3293, Department of Medical Oncology, Charing Cross & Westminster Medical School, St Dunstan's Road, London W6 8RP. Closing date for applications: 24th July 1995.

Fighting cancer on all fronts
POSTDOCTORAL RESEARCHER
Post Ref RE95/23

A Postdoctoral researcher is needed to study the Atomic Force Microscopy of ceramic materials with Professor K. Kendall FRS. A Digital Nanoscope instrument is operating in the Chemistry Department and a ROPA award from EPSRC has been awarded to use it to investigate the adhesive forces acting between small ceramic grains. The research will start in October and run for two years with the objective of understanding the benefits of AFM in the ceramic field. Support from CERAM Ltd has been obtained. Applicants should have worked on AFM, preferably with the Nanoscope.

For application forms and further particulars please write, quoting the post reference number, to the Personnel Department, Keele University, Keele, Newcastle, Staffs ST5 5BG or Fax your request 01782 583471.

Closing date: 14 July 1995.

An equal opportunities employer.
SCIENCE IN SOCIETY PROGRAM
MASTER'S DEGREE BY COURSEWORK
The Department of History and Philosophy of Science has places available for the mid-July intake in 1995.

• Part-time study
• Evening lectures, one or two evenings per week

Our postgraduate coursework studies are designed for those interested in the place of science and technology in contemporary society. Students come from the public and private sectors: administrators, lab scientists, educators and health workers.

For further information contact Dr Helen Verran or Mrs Renae Stoneham, telephone (03) 9344 6556, fax (03) 9344 7959 or email r.stoneham@hps.unimelb.edu.au

POSTERA CRESCAM LAUDE
THE UNIVERSITY OF MELBOURNE
MORE THAN A DEGREE
Two opportunities exist to undertake statistical research within BioSS leading to a Ph.D. degree.

Project 1: Investigation and control of carryover effects in observer perception and bias. Based at University of Edinburgh, this will involve development of methodology for design and analysis of experiments in sensory perception, in collaboration with the Department of Psychology and Hannah Research Institute. Maintenance grant £7520 per annum.

Project 2: Modelling spatial trends and local competition effects in field trials, using generalised additive models. Research assistantship based at Scottish Crop Research Institute, Dundee to explore methods for increasing precision of yield and disease assessment in field trials. A 3-year post, starting salary up to £13,000. The postholder will be expected to register for a Ph.D. at Heriot Watt University.

Candidates should hold a 1st or 2.1 honours degree, or an MSc, in Statistics, with an interest in applications in the biosciences. Further details can be obtained from The Administrative Officer, Biomathematics and Statistics Scotland, University of Edinburgh, The King's Buildings (JCMB), Edinburgh EH9 3JZ. Tel: 0131 650 4900, Fax: 0131 650 4901 or from Rob Kempton (e-mail: rob@bioss.saro.ac.uk) for project 1, and Chris Hackett (e-mail: Christine@bioss.sari.ac.uk) for project 2.

Closing date for applications 24 July 1995.

BioSS is funded by the Scottish Office Agriculture and Fisheries Department and is administered by the Scottish Crop Research Institute, Dundee.

An equal opportunities employer

An exciting opportunity for two experienced ornithologists/ ecologists to undertake research work into the feeding behaviour of fish-eating birds in Great Britain, including habitat selection, behavioural time budgets and feeding dispersal using satellite tracking. Both posts are Slimbridge-based contracts (SRO 3-year, RO minimum 1 year) with the possibility of extension.

The SRO will be responsible for the planning and organisation of the project and should have a Ph.D. in a biological science, an excellent publications record, and strong computing, analytical and statistical skills. The RO will provide support to the SRO, and should have a relevant degree.

For a job description and application form, contact Vicky Beard Personnel Officer, WWT Slimbridge, Glas. GL2 7BT or Tel- (01453) 890333. Casing date for receipt of applications is Friday 21st July, 1995

An innovative Soil Scientist is required in the Soil Science Group to initiate and develop a research programme to study organic matter in grassland soils and its impact on processes regulating available carbon and nitrogen and their potential for transmissions as pollutants to water or the atmosphere. The appointment will be for a fixed term of four years. The postholder will be based at North Wyke Research Station near Okehampton, Devon.

Candidates should possess a first or upper second class honours degree in soil science or its equivalent plus a minimum of two years’ postgraduate experience. An up-to-date understanding of the role of soil organic matter, spatial and temperate variations in the distributions of available nutrient pools and the effects of changes in soil conditions and architecture in relation to microbial activities and nitrogen transformations will be required.

Application forms and further particulars are available from the Institute Personnel Officer, Institute of Grassland and Environmental Research, Plas Gogerddan, Aberystwyth SY23 3EB. Please quote Ref 95/24. Closing date 21 July 1995.

IGER is an Equal Opportunities Employer
[1984-100 (1995) : 78]
Scientific Officer

A Scientific Officer is required to work on an analysis of patient anti-melanoma cytotoxic T cells in response to genetically modified tumour cells. Experience in cell culture is essential and some knowledge of immunology is desirable.

Informal enquiries can be made to Dr Mary Collins, Team Leader on 0171 352 8133 ext 5149/5152.

To apply, please send your CV in duplicate, with the names and addresses of two referees to the Personnel Office, The Institute of Cancer Research, 17a Onslow Gardens, London SW7 3AL quoting reference No. 88.

Fighting cancer on all fronts
Your Partners in the Pharmaceutical Industry

We are a clinical research organisation specialising in providing clinical trial development, management and monitoring services to the pharmaceutical industry. We are expanding our European operations and now seek clinical research professionals for various projects.

**Clinical Research Associates**

We are looking for a number of personnel to join our growing team of head office and field based CRAs. Successful candidates will need to combine excellent interpersonal and communication skills with attention to detail, integrity and professionalism. You must be an enthusiastic and committed team player with a thirst for new challenges. Applications are invited from candidates with experience in clinical research, although consideration will also be given to new graduates and those with a nursing background, as training will be given.

**The Benefits**

We provide an excellent working environment and a competitive remuneration package with car. If you want to be part of "our team" and are up to a demanding role in a progressive organisation, send your CV with a brief letter, including your current salary details, to Mrs Nemone North.

EXPERIENCED MEDICAL WRITER

Adelphi Communications, based in rural Cheshire, is a blue chip international agency working with the pharmaceutical industry. We need an experienced writer to join a team producing medical publications including clinical research papers (both clinical trials and reviews), product monographs, and training materials.

It is important that you:
- have a medical or pharmacological background
- have at least two years' experience in medical writing in an agency environment or in a pharmaceutical company
- are flexible, a self-starter, and able to work with determination under pressure, both under your own initiative and as a team member
- can empathise with communication objectives and win the cooperation of authors and clients
- can find and select source materials, interpret data, highlight appropriate information and write creatively
- can manage projects to deadlines and within budget
- bring efficiency, innovation and quality to the company

Adelphi Communications operates life insurance, pension, bonus and private health schemes. Where necessary, relocation expenses will be negotiated. We work in a no smoking environment.

Please write with full CV giving an indication of salary expectations to the Editorial Director, Adelphi Communications Ltd. Adelphi Mill, Bollington, Macclesfield, Cheshire. SK10 5JB

ADELPHI COMMUNICATIONS LIMITED
Cranfield UNIVERSITY

RESEARCH IN FERROELECTRIC MATERIALS AND NANOTECHNOLOGY

One Research Assistantship and two Research Studentships are available to work with Professor Roger Whatmore at Cranfield University. The projects will involve research into the growth of ferroelectric materials and their use in the area of Nanotechnology, particularly in:
• Growth of Ferroelectric Thin Films using Sol Gel Techniques
• Synthesis and Characterisation of Nanophase/Low Temperature Sintering PZT Powders

The Research Assistantship, suitable for someone at the Post-Doctoral level (or equivalent experience) is to study novel techniques for physically characterising metal-organic sols for ferroelectric thin film growth, with the twin objectives of understanding the chemical processes taking place and developing industrially useful methods for process control during thin film oxide deposition. Experience with NMR, dielectric spectroscopy, X-ray diffraction or the handling of metal-organic compounds, particularly alkoxides, would be an advantage. The post, which will involve close interaction with industry and the DRA, will be for 2 years, initially, on the RA1A scale (£14,427 - £21,683, depending on qualifications and experience). Ref: 5059A.

The research studentships are available for the degrees of Ph.D. (under the CASE scheme) or MRes and are suitable for chemists and materials scientists. The projects will involve the use of novel nano-phase synthesis techniques for powders and/or thin films to enhance the properties of ferroelectric materials for a diverse range of applications. They are closely associated with various UK industries. If you have, or expect to obtain, a good honours degree (first or upper second class) and are interested in being considered for a Funded Research Studentship, please quote CIT/3/73

For an informal discussion on any of these posts, Professor Roger Whatmore may be contacted directly. (Tel: 01234 754057, Fax: 01234 752473, e-mail: R.W.Whatmore@cranfield.ac.uk).

Application forms are available from the Personnel Department, Cranfield University, Cranfield, Bedfordshire MK43 0AL. Tel: 01234 750111 ext. 2000 (answerphone).

Cranfield University is an exempt charity offering a centre of excellence for research and education. [1984-104 (1995) : 79]
BRITTEN PEA RS POSTGRADUATE STUDENTSHP IN THE SCHOOL OF ENVIRONMENTAL SCIENCES
UEA NORWICH

The School of Environmental Sciences invites applications for the following studentships. Applicants should have a good Honours degree in Biology, Geology, Geography, Environmental Sciences, Economics or a relevant Social Science discipline.

The studentship is awarded by the Trustees of the Britten-Pears Foundation in memory of Isador Caplan, for many years the Foundation's Senior Trustee and a close personal friend of Benjamin Britten and Peter Pears. The purpose of the studentship is to create an opportunity to research an interdisciplinary, applied environmental sciences Ph.D. in some aspect of land use change, coastal management or rural sustainability in the East Anglia region generally, but most especially in the area around Aldeburgh in East Suffolk. The subject matter could be based on agriculture in transition, conservation of threatened ecosystems, managing coastal retreat in the face of the sea level changes, or rural renaissance through Local Agenda 21 sustainable development schemes. Ideally the successful candidate should be able to tackle the research in an interdisciplinary manner.

The School is the largest interdisciplinary institution in the UK devoted to environmental sciences. Rated Grade 5 in the HEFC research review, the School has 44 members of faculty (research and teaching), 110 research staff, 80 research students and 330 undergraduate and MSc students. The School includes the Climatic Research Unit, the Centre for Social and Economic Research in Global Environment (CSERGE) and the Centre for Environmental and Risk Management.

Further information and application forms can be obtained from Mrs Elly Reynolds, School Clerk, School of Environmental Sciences, University of East Anglia, Norwich NR4 7TJ Telephone 01603 592544, fax 01603 507719 or E-Mail E.Reynolds@uea.ac.uk.

UEA is committed to excellence in education and research
CAREER OPPORTUNITY FOR GRADUATE CHEMIST

An excellent opportunity for a newly qualified graduate chemist to take up this research and development-teaching company associate position. The project involves a collaboration between Alchemie Ltd – an expanding UK based polyurethane and epoxy resin manufacturer, that serves the prototyping and tooling industries and Dr D. M. Haddleton of the Chemistry Department in the University of Warwick.

The position which is based at Kineton, Warwickshire will provide the springboard for an exciting career. The successful candidate should be highly motivated, innovative with a commercial outlook and hold (or expect to obtain) at least a second class degree.

Informal enquiries can be made to Dr D. M. Haddleton, Department of Chemistry on 01203 523256/01203 522214. Salary on the Research 1B Scale: £14,317 - £15,986 pa.

Application forms (returnable by 20 July 1995) and further particulars from the Personnel Office, University of Warwick, Coventry CV4 7AL (01203 523627) quoting ref 47/2A/94 (please mark clearly on envelope).

The University of Warwick is an exempt charity dedicated to excellence in teaching and research and is an Equal Opportunities Employer.

UNIVERSITY OF BATH

EPSRC CASE STUDENTSHP IN MEDICAL PHYSICS

Applications are invited for an EPSRC industrial case studentship with Microsulis Ltd, commencing in October 1995. The project, which will be in collaboration with the medical physics department of the Royal United Hospital, Bath, will be to investigate the design and use of a novel microwave applicator for medical therapy. The work will involve microwave measurements, computer modelling, microwave component design and actual clinical trials at the hospital.

Applicants should have, or expect to obtain a 2:1 or 1st class honours degree in Physics, Electrical Engineering or a related subject. Please send a CV and the names of two academic referees to Dr Nigel Cronin, School of Physics, Bath University, Claverton Down, Bath BA2 7AY (e-mail: pysnjc@bath.ac.uk, Tel: 01225 826583).

A two year postdoctoral position in the Manchester Materials Science Centre is immediately available to work on this challenging and innovative project. The aim of the work is to investigate the effects of fluid flow during the solidification of potassium-sodium alloys using transmission ultraviolet light microscopy. This will include contributing to the design and construction of the ultraviolet light microscope. Candidates should possess, or be nearing completion of, a Ph.D. in an area of Physics or Materials Science. Some knowledge or experience of solidification, microscopy and/or spectroscopy would be an advantage. Salary will be £14,317 - £17,466 per annum on the RA1A Scale. Informal enquiries may be made to Dr Griffiths, T and N Senior Research Fellow (tel 0161 200 3609).

Application forms (returnable by July 31, 1995) and further particulars are available from the Director of Personnel (Academic Staffing), The University of Manchester, Oxford Road, Manchester M13 9PL (tel 0161275 2028). Quote Ref 171/95. Promoting quality teaching and research.

As an equal opportunities employer, the University welcomes applications from suitably qualified people from all sections of the community, regardless of race, religion, gender or disability.

Promoting quality teaching and research.
UMIST

Ph.D./EngD RESEARCH STUDENTSHIPS WITH INDUSTRIAL SUPPORT IN LASER PROCESSING OF MATERIALS AND DEFORMATION OF CASTINGS

Applications are invited for EPSRC studentships leading to Ph.D. and EngD degrees in the above areas of research. The successful candidates will be awarded, in addition to their fees, bursaries worth between £7,500 and £10,000 per annum. One of the successful candidates is expected to perform laser processing experiments, materials characterisation and modelling of the solidification process. The other project involves developing a mathematical model to predict deformation occurring in pressure the cast components during and after solidification. A minimum of an upper second class honours degree in engineering or science is required for these awards. Informal enquiries on the laser project should be made to Dr L Li on 0161 200 3816 and for casting deformation to Dr K Davey on 0161 200 3834.

Curriculum vitae, together with the names of two referees, should be sent to the above mentioned persons at the following address: Department of Mechanical Engineering, UMIST, P O Box 88, Manchester, M60 1QD. The closing date is 15 July 1995.

A Centre of Excellence in education and research.
UNIVERSITY OF READING
Department of Chemistry
Department of Food Science and Technology

**Four Graduate Scholarships**

leading to the Ph.D. are available for studies on the effects of high pressure on food materials, food chemistry and model food systems.

Stipend £7,000 pa for three years

Applicants should possess a good degree in chemistry, biochemistry, food science or similar subject. Further information may be obtained from Professor D. A. Ledward, Department of Food Science and Technology (Tel: 0 1734 318715) or Dr N. S. Isaacs. Department of Chemistry (Tel: 0 1734 875123, ext 7421).

Application forms are available from Caroline Archer, The University of Reading, Faculty of Agriculture and Food, 2 Earley Gate, Whiteknights, PO Box 217, Reading RG6 2AU. Please quote Ref. ??

Unilever Research, Bedford

**Senior Trace Analyst**
Salary up to £30,000

Unilever Research, Colworth Laboratory, located 9 miles north of Bedford, is a major food and biotechnology research centre supporting the worldwide business interests of the Unilever organisation.

The Job:
- Developing and applying methodology for determining a wide range of organic analytes at ppm and sub-ppm levels in foodstuffs and other matrices
- Dealing with emergencies involving possible chemical contamination at low levels

The Person:
- An expert trace analyst able to resolve complex analytical problems, and able to lead and co-ordinate a team of analysts
- Ph.D. or MSc in analytical chemistry or related area, or MChemA, with in-depth understanding of analytical chemistry applied to organic analytes, experience of GC and HPLC, and a good knowledge of mass spectrometry are essential.

The Benefits:
- Salary reviews based on merit
- Company pension and life insurance scheme
- Private health insurance and five weeks annual holiday
- Subsidised workplace nursery, excellent sports and social facilities.
- Excellent opportunities for personal development

We are an Investors in People company.

To apply, send a cv. to: Maria Negus, Personnel Department, Unilever Research, Colworth Laboratory, Sharnbrook, Bedford, MK44 1LQ. OR Telephone for an application form on 01234 222281 (24 hour answerphone). Phone Maria on 01234 222731 daytime with any queries

Unilever
UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Department of Materials in association with Trinity College or St Hilda's College

University Lecturership in Materials

Applications are invited for the above post, tenable from 1 January 1996. Stipend according to age on the scale of £15,154 - £28,215 per annum. The successful candidate may be offered a tutorial fellowship, for which additional emoluments would be available, by either Trinity College or St Hilda's College under arrangements described in the further particulars.

Candidates should be able to teach widely within a broad four-year Materials Science syllabus and to carry out a programme of research into the mechanical properties of materials.

Further particulars (containing details of the duties and full range of emoluments and allowances attaching to both the university and college posts) may be obtained from The Head of Department, Department of Materials, Parks Road, Oxford OX1 3PH, UK (Fax: 01865 273738, Tel: 01865 273737). The closing date for applications is 31 July 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

The University of Huddersfield, Recruiting Chemistry Products

**MSc in Analytical Chemistry**

Now recruiting for September and offering EPSRC funded places and ESF funded places. The course follows a modular format and features an industrial placement in the UK or Europe. Last year's Graduates all found employment in Analytical Chemistry.

For further information on the course and funding contact Dr Roger Jewsbury on 01484 472169 [1984-113 (1995) : 81]
CASE Studentship in Vision Research
Birmingham University & British Aerospace

Applications are invited for a 3-year EPSRC CASE research studentship, to be held at the School of Psychology, University of Birmingham, in collaboration with British Aerospace Sowerby Research Centre, from October 1995. The work will study fundamental properties of threshold and supra-threshold perception of aperiodic objects, and will form part of a long term project to develop advanced display evaluation and optimization techniques. Of particular interest are visual factors such as blur and contrast that affect edge strength and spatial summation. Candidates should possess or expect to obtain at least a 2.1 degree or M.Sc. in Science, Computer Science, Psychology, Optometry or related subjects. A high level of numeracy and a knowledge of PC programming would be a distinct advantage.

For more information, contact (a.s.ap., before 7 July): Mark Georgeson, Vision Sciences, Aston University, Birmingham B4 7ET U.K. 0121-359-3611 ext 5152/5182.

LAFARGE PLASTERBOARD
First Choice in Drywall

As part of the Lafarge Group, a world leader in building materials, we are seeking to expand our technical resources at our Bristol Plasterboard factory.

We currently require a

PLASTER TECHNOLOGIST

to work as a member of a small team working on product quality and process improvement projects in the areas of gypsum calcining and building plaster production. The Plaster Technologist will report to the Quality Assurance Manager.

The successful candidate will have a degree in chemistry or similar qualification with an inorganic speciality, good interpersonal skills and ideally should have some industrial experience. This position can lead to further advancement for an ambitious person. A working knowledge of French and/or another European language could be a plus.

The successful candidate will benefit from 25 days annual holiday, an excellent contributory pension scheme, non-contributory employee protection schemes and a rate of pay that reflects the qualifications and experience. Please reply before the 20 July, in confidence with a full CV to Mrs J. E. Maycock, Personnel Officer Lafarge Plasterboard Ltd, Royal Portbury Dock Bristol BS20 0NF.

Promoting quality teaching and research
[1984-121 (1995) : 82]
Why not study for a first or higher degree in the Sciences at Birkbeck College?

We offer the following part-time courses (some full-time postgraduate places are available)

BSc courses in: Analytical Chemistry, Biological Science, Chemistry, Geography, Geology and Physics

Combined Sciences Degrees (BSc): Biochemical Sciences, Environmental Science/Conservation, Molecular Biology, Physical Geography and Geology or select 2 subjects from a choice of Biology, Chemistry, Geography, Geology, Physics. Four years part-time by evening study. Normal entry qualifications may not apply if you are over 21.

MSc courses in: Analytical Chemistry, Applied Biology, Chemical Research, Comparative Physiology, Crystallography, Microbiology, Molecular Modelling and Bioinformatics, Sedimentology. MPhil and Ph.D. research opportunities are also available.

For further details please contact the Registry, Birkbeck College, London WC1 7HX. Telephone: 0171 631 6390/6307 quoting ref. NS7. NB Payment of fees cent be spread over an 8-month period.

UNIVERSITY OF WARWICK  
Department of Engineering  

RESEARCH MASTERS DEGREE IN ENGINEERING

The new Master of Research (MRes) one year degree by research announced by the government in October 1994 is available for the first time from October 1995. Its purpose is to prepare students to undertake research and development in advanced engineering either in industry or by proceeding to further research study (Ph.D.) and to enable people already working in industry to deepen their knowledge in certain key areas while undertaking a suitable research project. It is a one year, full time modular course comprising three elements: a Research Project; selected modules in Advanced Mechanical Engineering, Electronic Instrumentation or Precision Engineering and Nanotechnology; compulsory components on 'Research Methods in Engineering' and 'Industrial Decision Making'. The course is open to graduates in a Science or Engineering subject. The entry requirement is a first or upper second class Honours degree. The EPSRC is sponsoring 10 places on the MRes course.

For further details and application forms please contact: Postgraduate Admissions Tutor for Advanced Engineering, Department of Engineering, University of Warwick, Coventry CV4 7AL. Tel: (01203) 523523, ext 2046. Fax: (01203) 418922.

Institute of Cryogenics

STUDENTSHIPS IN APPLIED SUPERCONDUCTIVITY

Applications are invited for research studentships (I CASE with Merck plc) in applied superconductivity at the Institute of Cryogenics. The successful candidate is expected to work on the development and characterisation of high temperature superconducting wire/tapes. The Institute of Cryogenics has an integrated HTS programme involving materials processing, property characterisation and engineering applications.

Application forms may be obtained from Dr C. Beduz, Institute of Cryogenics at the address below, telephone 01703 594760. Closing date: 29 July 1995. Reference number R/472.

Working for Equal Opportunities

University of Southampton
University of Southampton
Highfield Southampton SO17 1BJ
A centre of excellence for university research and teaching
Industry in the 1990s is under increased pressure from both legislators and the general public to monitor and control the environmental impact of their activities. This had resulted in a demand for trained graduates to fulfil the roles of environmental protection officers, advisors and consultants within both the commercial and the public sectors. Our established course has been designed to meet this demand. The course offers:

* Excellent employment prospects  
* Hands-on experience - research project  
* An applied atmosphere  
* Flexibility (part-time options)

For further details and application forms please contact Alison Bass, Cranfield Biotechnology Centre, Cranfield University, Cranfield, Beds MK43 0AL. Tel: 01234 754339, Fax: 01234 750907.

Cranfield University is a registered charity offering a centre of excellence for research and education.

DEUTSCHE MESSE AG, HANNOVER/GERMANY
GRADUATE LIFE SCIENTISTS
Creative, motivated individuals needed for unique career opportunities

Unipath, part of the Unilever Group is the world leader in home and laboratory diagnostics related to Women's Reproductive Health (Clearblue & Clearplan) and Microbiology (Clearview & Oxoid). Later this year, Unipath's Personal Contraceptive System, hailed by family planning experts as "the most significant breakthrough of the last decade" will be launched.

Our commitment to continued innovation and growth is matched by our commitment to recruiting, developing and rewarding talent in Research & Development. Graduate scientists straight from University or with work experience are offered the opportunity of making a real difference to the design and development of simple home and professional diagnostics within a fast-moving, commercial environment.

As part of the Women's Reproductive Health Assay Development Team you will require an understanding of Endocrinology and an interest in Reproductive Physiology and Biochemistry - immunoassay experience would also be an advantage. You will need a sound knowledge of bacterial and viral infections and be familiar with serum-based immunoassays to work within the Microbiology Assay Development Team.

All positions will involve learning new skills quickly, cross-functional project team working and importantly creativity and a logical approach to problem-solving. The ability to work on your own initiative and to tight deadlines will be expected. There is considerable scope for career development in both Unipath and Unilever.

Appointment salary will depend upon experience and is expected to be c.£14,000 - £16,500 p.a. We also offer a worthwhile range of benefits including Private Health Insurance & Pension.

Write 200 words telling us what contribution you can make to Unipath, and send with your CV to Dr Fiona McNae, Research & Development Manager, Unipath Ltd, Norse Road, Bedford MK41 0QG. Closing date : Friday 18th August 1995.
Leatherhead Food RA

INFORMATION SCIENTIST

The Leatherhead Food Research Association is the foremost independent food research facility in Europe, providing research and information services to the food industry throughout the world.

We wish to appoint an Information Scientist to join our Scientific and Technical Information Section, which provides a range of services to an international membership base. As well as offering a technical enquiry service, the Section produces a wide variety of tailored publications and organises regular topical conferences on food issues of current concern.

The post will involve assisting in the general section activities, with particular responsibility for the production of certain bulletins and the maintenance of a databank related to food allergy and intolerance.

Applicants should have a food science degree and have at least 1-2 years' experience in the food industry, preferably in confectionery. The successful candidate will be self-motivated but also have the ability to work well as part of a team. Good communication skills are essential.

Please apply in writing, enclosing full CV to Mrs Joan Cox, Personnel Administrator, Leatherhead Food RA, Randalls Road, Leatherhead, Surrey KT22 7RY.

UNIVERSITY OF WARWICK
Centre for Nanotechnology and Microengineering

RESEARCH ASSISTANTSHIPS IN MATERIALS CHARACTERISATION

Two opportunities are offered to work on the final phase of a major LINK Nanotechnology Project on characterisation of surface roughness and sub-surface damage in brittle materials. This is a £1.6m collaborative programme between four universities and four industrial companies, led by Professor D. K. Bowen at Warwick.

The duties will involve the analysis of semiconductor, ceramic and glass surfaces by X-ray fluorescence, diffraction and scattering and optical reflectivity.

You should ideally hold a first or upper second class degree in materials science, engineering or physics. Registration for an MSc by research will be possible for suitably qualified candidates.

Salary will be in the Research Range 1 B: £14,317 - £15,986 pa. The appointments will be for 12 months in the first instance.

Application forms (returnable by 18 August 1995) and further particulars from the Personnel Office, University of Warwick, Coventry CV4 7AL (telephone 01203 523627) quoting ref: 52/3A/94 (please mark clearly on envelope).

The University of Warwick is an exempt charity dedicated to excellence in teaching and research and is an Equal Opportunities Employer.

SOFTWARE / EMBEDDED SYSTEMS ENGINEER
Sea Mammal Research Unit is seeking a key member of a team of scientists studying the physiology and behaviour of marine mammals at sea. One of the first challenges of the post will be the design and construction of low-power embedded systems and associated software to collect, summarise and transmit information about an animal and its environment. Candidates should have experience in low and high level (C) software design, signal processing and knowledge of state-of-the-art design and fabrication of low power, microminiature embedded systems.

This is a 5 year fixed-term appointment at HSO/SSO grade, salary £13,025 - £23,009 and £16,168 - £29,117 p.a. respectively, depending on qualifications and experience. The Unit is currently in Cambridge but will be moving to new facilities at the Gatty Marine Laboratory, University of St. Andrews, around October 1996. This post will either be based at St. Andrews, with the successful applicant on detached duty expenses at Cambridge until the Unit moves, or it will initially be based in Cambridge with removal expenses paid for the move to St. Andrews.

For further information and an application form, please contact Mrs Pat Grassick, Sea Mammal Research Unit, High Cross, Madingley Road, Cambridge CB3 0ET Tel: Cambridge (01223) 311354. Closing date: 25 August 1995.

GEOGRAPHIC DATA ANALYST
The Survey has a vacancy in its Mapping and Geographic Information Centre for a graduate to be responsible for the research and analysis of geographical data for Antarctic map compilation, and to organise topographic surveys and aerial photography sorties in Antarctica during two seasons within the contract period. Duties will include the research of raw data and the compilation of new maps, implementation of innovative cartographic techniques and the development of menu systems to simplify map compilation procedures. Other duties will include quality assurance of digital geographical data, merging new maps with the Antarctic Digital Database as a framework for GIS applications, and collaborative R&D of digital generalisation techniques.

This is a full-time appointment for a period of five years, based in Cambridge but with two work periods in Antarctica.

Applicants must be physically fit. The post is fixed graded at the Higher Scientific Officer level.

To qualify you should have a good honours degree in Topographic Sciences, Geography or Cartography, a postgraduate diploma or MSc in digital cartography or remote sensing and at least five years' relevant experience. Experience of ARC/INFO software and photogrammetric and image-analysis techniques is essential. Familiarity with the collection of aerial photography and GPS data in the field would be an advantage.

Salary in the range £13,025 p.a. to £18,911 p.a. depending on qualifications and experience. The appointment will commence in March 1996. Please quote ref: HAS 25/95. Closing date for completed application forms: 24 August 1995. For application details please see following post.
The Survey has a vacancy in its Mapping and Geographic Information Centre for a graduate to assist with the research and analysis of geographical data for the compilation of new Antarctic topographic maps. Duties will include the digital compilation of new maps from raw data and the development of innovative cartographic techniques. Other duties will be the provision of an in-house customised topographic map service, and sub-editorial assistance with topographic and thematic map production. Assistance with the acquisition of GPS data and aerial photography in Antarctica will be required during two seasons within the contract period.

This is a full-time appointment for a period of five years, based in Cambridge but with two work periods in Antarctica. Applicants must be physically fit. It is a limited fluid post, graded Scientific Officer through to Higher Scientific Officer level.

To qualify you should have a good honours degree in Topographic Sciences, Geography or Cartography and a postgraduate diploma or MSc in digital cartography or remote sensing. A knowledge of map design and map production processes would be an advantage, and writing skills and a familiarity with ARC/INFO software would be valuable.

For further details and an application form on either of the above posts, please contact: The Personnel Section, British Antarctic Survey, High Cross, Madingley Road, Cambridge CB3 0ET. Telephone: Cambridge (01223) 251508/507.

Head Office Swindon

**SCIENTIFIC ADMINISTRATOR**

Are you interested in a role in scientific administration? The Natural Environment Research Council has a challenging opportunity at its Swindon Office in Wiltshire.

The post holder will have responsibility for the work of committees awarding research grants and studentships in the field of Freshwater Sciences and their subsequent administration. The work also involves the formulation and implementation of the Council’s policy for supporting work in the universities. This is an excellent opportunity to gain experience in the administration of science and the development of scientific policy.

Good drafting and communication skills and the ability to work successfully with senior staff will also be an asset.

Applicants should have a good degree in a Freshwater Science or a related discipline, plus two years' relevant postgraduate experience. Salary will be in the range of £13,025 p.a. (minimum) to £23,009 p.a. (maximum) depending on relevant experience. This is a two year fixed-term appointment at HSO grade.

Conditions of service include a non-contributory pension scheme, and a generous annual leave allowance.

For further information and an application form, please contact Alison Fisher, Personnel Section, Natural Environment Research Council, Polaris House, North Star Avenue, Swindon SN2 1EU. Telephone: (01793) 411695, Closing date for receipt of application forms is 31 August 1995.
The Natural Environment Research Council has an equal opportunities policy and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently under represented and their applications are particularly welcome.
CSIRO AUSTRALIA

**Crop Adaptation Scientist**
Salary $44 - $59K
CSIRO Division of Tropical Crops and Pastures, Townsville, Qld, AUSTRALIA

The Division's Tropical Crops Program is a major provider of strategic research to assist development of internationally competitive cropping industries in northern Australia. It has a substantial research thrust in sugarcane and collaborates closely with CSR Ltd. in a sugarcane breeding program in north Queensland. We are seeking a scientist to operate in a dynamic environment to conduct research on crop physiology of sugarcane in the context of a crop improvement program to develop improved varieties. You will integrate physiological principles with plant breeding to interpret and exploit genotype x environment interactions for improved crop adaptation. While the position is focussed on sugarcane, you may also become involved in similar research for cereal grains improvement.

You will have a Ph.D. or equivalent in crop physiology, a sound knowledge of plant breeding and a demonstrated capacity for innovative research. Experience with the development and application of crop simulation models would be relevant. You must have well developed inter-personal and team skills, be able to form collaborative alliances with scientists in your own and other organisations, and be able to communicate effectively with the scientific community and industry.

Appointment is for an indefinite period. Appointment at higher levels in the range will be conditional on demonstrated leadership and experience.

Dr Ray Shorter phone 617 3377 0239, fax 617 3377 0410, email: ray.shorter@tcp.csiro.au or Dr Phillip Jackson phone 6177 53 8592, fax 6177 53 8600 can provide more details of the position. The duty statement and selection criteria can be obtained from Roslyn Gaydon on phone 617 3377 0209 and fax 617 3371 3946.

Please send your application (+ 3 copies), including details of your skills, qualifications and work achievements, with the names of at least two referees quoting reference number PG/112/77 to: The Recruitment Officer, CSIRO Division of Tropical Crops and Pastures, 306 Carmody Road, St Lucia Qld, 4067 AUSTRALIA by 25 August 1995.

25044
Staffordshire UNIVERSITY
School of Sciences

Research Scholarship in Experimental Nuclear Structure Physics
£5,500 pa

A three year postgraduate research scholarship in Nuclear Structure Physics leading to the award of Ph.D. is available at Staffordshire University starting in October 1995. The research project will be in the area of gamma-ray spectroscopy of nuclear states associated with high angular momentum.

Applications are invited from graduates with a good Honours degree in Physics and a keen interest in nuclear physics.

Application forms and further details are available from Personnel Services (Appointments), Staffordshire University, PO Box 662, College Road, Stoke-on-Trent, ST4 2XP. Tel: 01782 292762.

Closing date for completed applications: 17 August 1995.

As an Equal Opportunity Employer, we welcome applications from all sections of the community. A job sharing scheme is also in operation.

Oxford Radcliffe Hospital
Oxford Radcliffe Hospital is the new NHS Trust formed from the merger of the Churchill and John Radcliffe Hospitals, to develop and expand on quality services for the benefit of both patients and staff. Now one of the largest teaching hospitals in the UK, it is acclaimed both nationally and internationally for its clinical services and academic departments.

THE JOHN RADCLIFFE
NATIONAL HAEMOGLOBINOPATHY REFERENCE LABORATORY
INSTITUTE OF MOLECULAR MEDICINE

Clinical Scientist
Grade B (11-16) £18,019 - £21,923

A post is available in the National Haemoglobinopathy Reference Laboratory for a Grade B Clinical Molecular Geneticist. The laboratory provides a national service for the identification of inherited haemoglobin disorders.

The successful applicant will assist with the DNA analysis workload of the laboratory as a senior member of a small team. The appointment will be made on a three point scale within the above range depending upon experience.

Applicants should hold an honours degree or equivalent in a related subject and have at least five years experience in a broad range of molecular genetic techniques. Experience of molecular diagnostics or haematological disorders would be an advantage.

Application forms and job descriptions are available from the Personnel Department, THE JOHN RADCLIFFE, Headley Way, Headington, Oxford OX3 9DU, or telephone Oxford (01865) 221175 (24 hour Jobline), quoting reference IMM 04.

Closing date for completed applications: Thursday, 31st August 1995.

Equality of opportunity is assured and our no smoking policy advances a healthier environment.

POSITIVE ABOUT DISABLED PEOPLE
CSIRO Division of Tropical Crops and Pastures has an international reputation for its research on the agronomy and sustainability of sugarcane and dryland grain/grazing systems. Being a partner in both the Co-operative Research Centre (CRC) for Sustainable Sugar Production and the joint Queensland Department of Primary Industry/CSIRO Agricultural Production Systems Research Unit (APSRU), the Division has in place established research teams closely linked to its stakeholder industries.

A major thrust of the Division's research has been the development of a cropping systems simulation capability and its application to issues of concern to farmers, land use planners and policy makers. The Division is seeking to appoint two research scientists to strengthen our existing multi-disciplinary research teams. Both positions require individuals who can work at the level of the production system, which includes an integration of crop, soil, climate and management issues from bio-physical and economic perspectives, with those of clients in industry.

**Research Scientist/Senior Research Scientist**
Reference No: PG/ 111/283
Salary $44 - $60K pa Brisbane

We wish to appoint a scientist to research more profitable and sustainable production in sugarcane systems. Management strategies for water and nitrogen that have both production and environmental benefits will be an initial focus of the work Over time, you will be expected to interact closely with industry and resource management agencies to help shape the research program in relation to emerging priorities.

The successful applicant will have a Ph.D. or equivalent in an area related to crop or soil management. Experience in the development and application of crop and soil simulation models is essential. Experience in nitrogen cycling in relation to fertiliser and crop residue management would be an advantage.

You must have excellent communication and interpersonal skills to be effective in operating in a dynamic research environment, where major collaborative opportunities are possible with groups such as the newly formed CRC for Sustainable Sugar Production and APSRU.

Appointment at the senior level within the range indicated will be conditional on demonstrated leadership and project management experience. This includes an ability to identify strategic opportunities, initiate innovative research, secure financial support from stakeholder groups, and to direct and supervise project staff. Appointment is for an indefinite period.

For further information, contact Dr Brian Keating on phone 617 3377 0373, fax 617 3371 3946 and email brian.keating@tcp.csiro.au

**Research Scientist**
Reference No: PG/ 142/5
Salary $44 - $52K pa Toowoomba

We are seeking to appoint a scientist to undertake research aimed at more profitable and sustainable production in the dryland grain/grazing systems of northern Australia. The initial focus of the work includes (1) the further development of our systems modelling capability for dryland cereals, grain
legumes and ley pastures grown in the Australian sub-tropics, and (2) the application of this simulation capability to issues of importance to industry. This latter area will be conducted using a participatory approach in which farmers and advisers are part of the research team.

The successful applicant will have a Ph.D. or equivalent in an area related to crop physiology or agronomy. You will need practical experience in field crop agronomy as well as experience in the development and application of simulation models. You will need to be able to demonstrate excellent communication and interpersonal skills. Over time, you will be expected to help shape the research project in relation to emerging priorities and funding opportunities.

The position will be located within the DPI/CSIRO Agricultural Production Systems Research Unit (APSRU), based at DPI's regional office in Toowoomba in south-east Queensland. You will be operating a multi-organisational, multi-disciplinary team in close association with industry. The appointment is for an indefinite period.

For further information, contact Dr Peter Carberry on phone 6176 31 4377, fax 6176 33 2678 and email peterca@apsrusg.sth.dpi.qld.gov.au

To obtain copies of the duty statements and selection criteria for these two positions please contact Roslyn Gaydon on phone 617 3377 0209, fax 617 3371 3946 or email roslyn.gaydon@tcp.csiro.au

Please send your application (+ 3 copies) including details of your skills, qualifications and work achievements, with the names of at least two referees, quoting the appropriate reference number to: The Recruitment Officer, CSIRO Division of Tropical Crops and Pastures, 306 Carmody Road, St Lucia Qld, 4067 AUSTRALIA, by 25 August 1995.

CSIRO IS AN EQUAL OPPORTUNITY EMPLOYER
Biomedical Scientists
Fixed term contract for 1 year
MLSO 1 or Trainee
Ref: PAD/45

Applications are invited from suitably qualified state registered biomedical scientists for 2 fixed term posts for 1 year each. In the absence of state registration, applicants with appropriate experience in diagnostic virology will be considered for appointment at trainee level.

The successful applicant will be expected to work in some or all of the following sections of the laboratory: - hepatitis, HIV, serology and virus detection. These posts offer the opportunity for individuals with virological experience to benefit from working in a laboratory that offers a very comprehensive range of assays for diagnostic and reference use. For further information/informal visit, please contact Mr Steve Rice, Principal Virologist or Mr B Newman MLSO 3, on 0171 3809315.

Diagnostic and Support Services Directorate
Department of Medical Physics & Bioengineering
Instrumentation & Computing Group

UCLH is a leading centre for medical care, teaching, and research. The site is adjacent to University College London and there is substantial academic collaboration. The Department of Medical Physics & Bioengineering is one of the foremost in the UK, providing multi-disciplinary support and development services to a wide range of hospital departments. The Instrumentation & Computing Group develops and supports devices and measurement systems for clinical applications. There are now two posts vacant within this group:

Physicist/Engineer
Cochlear Implants
Ref: RC/39

Clinical Scientist Grade 'B' scale, points 14-16 (Salary range £20,270 - £21,923) + £1,999 London Weighting.

The UCLH Cochlear Implant Centre is the longest established in the UK and a leader in quality and innovation. The Centre runs a development programme alongside its routine cochlear implant service, covering both the technological and clinical aspects of Cochlear implants applications.

We require an enthusiastic and motivated engineer/physicist to provide scientific and technical support to the Centre. You will possess a strong scientific or engineering background, and will hold a good honours degree or equivalent in a physical science field. You will be experienced in the application of technology in a medical setting and will be interested in working with patients and be able to work well on your own and as part of a multi-disciplinary team. Informal enquiries to Mike Conway 0171 380 9700 ext 8895.

email: m.conway@medphys.ucl.ac.uk

Physicist/Programmer
Computing
Ref: RC/40
Clinical Scientist Grade 'B' scale, points 11-13 (Salary range £18,019 - £19,489) + £1,999 London Weighting.

A programmer is required to work within a team developing and supporting hardware and software systems for scientific clinical application. You will provide user and system support and will develop new applications under DOS, Windows, and UNIX systems. You will be familiar with scientific data processing and with common desktop applications. Firstly you will take responsibility for installing updates, helping to identify problems, and providing basic advice on using the Department's computing resources. Secondly you will be involved in specific development projects producing software for use in the Department and for clinical applications. You should hold a degree in a physical science or equivalent and preferably have experience of DOS, Windows, 'C' and UNIX. Some familiarity with computer hardware and electronics will be an advantage.

Informal enquiries to Dave Plummer 0171 380 9773. email: d.plummer@medphys.ud.ac.uk

For application forms and job packs on any of the above posts, please contact the Personnel Department, University College London Hospitals NHS Trust, Mortimer Street, London W1N 8AA or tel: 0171 380 9170 (daytime) or 0171 380 9166, (24 hour answerphone).

Please quote the appropriate reference.
Closing date for all posts: 17th August 1995.

An employer committed to equal opportunities. Staff benefits include: pension scheme, nursery, playscheme flexible working and subsidised catering. All jobs are open to job sharing with or without a partner. We actively discourage smoking at work. [1989-010 (1995) : 60]
Applications are invited for a post of Lecturer in the Department of Geology, tenable from 1 January 1996 for a fixed term of three years. The University is seeking an outstanding Earth Scientist who will teach part of its undergraduate degree course in Geology, and complement its existing research teams. The Lecturer will be expected to contribute to a core course covering basin evolution and stratigraphy within the British Isles and NW Europe, and to develop courses related to his/her research expertise. Participation in field courses in Britain and overseas will be an important part of the post. Research activities may be in any relevant area of Geology. The successful candidate will be chosen on the basis of his or her research record and potential, as well as teaching ability.

The Department has strengths in several relevant research fields, including Lower Palaeozoic biostratigraphy, sedimentary geochemistry, palaeontology, and crustal evolution. It is developing close links with the NERC Isotope Geoscience Laboratories at Keyworth.

Initial salary, dependent on qualifications and experience, will be on the lecturer Grade A scale £15,154 to £19,848 or the Lecturer Grade B scale £20,677 to £26,430 pa.

Further particulars and an application form are available from the Personnel and Planning Office (Academic Appointments), University of Leicester, University Road, Leicester LE1 7RH, telephone (0116) 252 2758. The closing date for applications is 16 August 1995. Please quote ref: A5025.

Towards equal opportunities
FORMULATION MANAGERS
£18,000 - £30,000

Young Scientist is looking for managers with extensive experience in pharmaceutical and toiletries formulation to fill several vacancies within top multinational companies.

As a specialist employment agency we are also keen to hear from industrially experienced chemical and biochemical scientists and technicians who are keen to obtain top positions in the pharmaceutical, chemical, toiletries and polymer industries.

Please send a full CV and covering letter to Young Scientist. Westmead House, 123 Westmead Road, Sutton, Surrey, SM1 4JH.

Our services are free & confidential.
London International Group has a worldwide reputation as a leading innovator and manufacturer in medical healthcare products. Our market leading products include Durex, Regent Surgical Gloves, Marigold Household and Industrial Gloves, and Woodwards Gripewater.

We currently have a vacancy at our R&D centre in Cambridge

POLYMER APPLICATIONS – TEAM LEADER

Reporting to the Laboratory Manager you will play a key role in a dynamic laboratory handling a wide range of research & development projects. You will be responsible for leading a team of experienced technicians and scientists, developing processes for the manufacture of innovative thin film products from custom made commercially available polymers.

You should have a good degree in chemistry/applied chemistry and at least 4 years experience in polymer processing within an R&D environment. Experience of running a pilot plant complying with the ISO9000 quality system would be desirable. You are a creative, self starter with the ability to communicate at all levels. You must have supervisory experience and be able to lead and motivate a team to meet tight deadlines.

This position is based at our well equipped, modern laboratories on the Cambridge Science Park, which provide excellent working conditions and scope for career progression and development.

Write enclosing full CV to:
Miss Michele Waller Personnel Manager
London International Group, Research & Development Unit 205

PROGRAMME CONSULTANT SiGe

The EPSRC IT and Computer Science Programme invites requests to tender from firms or individuals to undertake a study with the aim of producing a technical specification for a research programme in Silicon Germanium (SiGe).

The consultant will identify a focused and costed programme for devices and circuits in SiGe tailored closely to the UK's current skills base and the ability of industry in the UK to exploit the results of such research.

It is expected that the appointment will be for up to 12 weeks on a part time basis, commencing in September 1995.

In the first instance, potential applicants should register their interest in writing, including a brief CV and relevant experience by 21 August 1995, and posted to: Head of Procurement Group, EPSRC, Polaris House, North Star Avenue, Swindon SN2 1ET.
Contractual enquiries should be directed to Mr Chris Moulsley (Tel: 01793 444250, Fax: 01793 444013, E-mail: scmo@ib.rl.ac.uk).
Technical enquiries should be directed to Mr Phil Burnell the Programme Manager for Electronics, IT and Computer Science (Tel: 01793 444158, Fax: 01793 444006, E-mail: spnb@ib.rl.ac.uk).

EPSRC
Engineering and Physical Sciences Research Council
Opportunities in Analytical Instrumentation

VG Organic designs and manufactures mass spectrometers for the analysis of organic chemicals. Our products are widely used in the pharmaceutical, biotechnology and organic chemical industries around the world. Opportunities now exist for Development Scientists and Systems Test and Installation Engineers to work in this rapidly growing market sector.

Development Scientists

Applicants should possess a good degree/Ph.D. in physics or chemistry with a minimum of two years' experience in instrument development. The ideal candidate would also have experience in mass spectrometry, ion optics, vacuum technology and liquid chromatography. The work will involve some overseas travel and participation in international conferences.

Systems Test and Installation Engineers

Applicants should have a degree/HND in physics/electronics with an interest in chemistry and instrumentation. The work involves testing systems in-house followed by installation worldwide. Installation periods are typically one or two weeks per system, including physical installation, demonstrating specifications and providing customer training. Applicants should be willing to travel anywhere in the world at short notice, possibly for several weeks at a time.

All candidates should be capable of problem solving using their own initiative as well as being able to work in a team. The ability to communicate is essential, both with customers and within the company itself. VG Organic offers excellent salaries and benefits, commensurate with qualifications and experience.

To apply, please send your CV to:

Stuart Jarvis (Development Scientists) or Neil Hanlon (Systems Test and Installation Engineers), VG Organic, Tudor Road, Altrincham, Cheshire WA14 5RZ.
VG ORGANIC
MODES OF SEDIMENTATION IN EXTENSIONAL SETTINGS: CONTROLS ON MID AND LATE JURASSIC SUBTLE TRAP DISTRIBUTION AND HYDROCARBON PROSPECTIVITY, NORTHERN NORTH SEA

Applications are invited from candidates wishing to undertake a three year, full-time, NERC-supported PDRA position in collaboration with Dr J R Underhill at The University of Edinburgh. The research forms part of a concerted effort to understand the effects of fault scarp degradation and the controls on sediment dispersal in extensional basins.

The aim of the research is to utilise an extensive well and seismic database from the UK and Norwegian sectors of the Brent Province in the Northern North Sea with a view to understanding the controls on the following three poorly-documented, potential subtle reservoir levels within the Middle or Late Jurassic stratigraphic succession of the area:

1. Nature and extent of fault scarp degradation complexes
2. Controls on Late Jurassic sandstone dispersal
3. Distribution of the discontinuous Tarbert Formation.

The position would suit a Postdoctoral student with experience in one or more of the disciplines of structural geology, elastic sedimentology, stratigraphy and petroleum geology.

The three-year full-time position is available from 1 September 1995 and runs until 30 September 1998. Please quote REF: NS 590341

MODES OF SEDIMENTATION IN EXTENSIONAL SETTINGS: OLIGO-MIOCENE SYN-RIFT SEQUENCES OF SINAI, GULF OF SUEZ

Applications are invited from candidates wishing to undertake an industry-sponsored, one year PDRA position based at The University of Edinburgh as part of a larger research effort into modes of sedimentation in extensional settings. The aim of the project is to investigate the sequence stratigraphy of Oligo-Miocene syn-rift sediments in the Gulf of Suez, Egypt with particular emphasis on the temporal and spatial variation in their bounding stratal geometrics and stratigraphic stacking patterns around a well exposed relay ramp between two extensional fault segments.

Applicants should be in possession of a Ph.D. or be nearing the completion of their Ph.D. studies. They should also have a working knowledge of structural geometries in extensional settings, tectonic controls on sedimentation and the concepts of seismic and sequence stratigraphy.

Although the student will be based at The University of Edinburgh and under the direction of Dr J R Underhill, the Project is collaborative with Dr R L Gawthorpe at The University of Manchester. As the study is sponsored by two major oil companies, the successful candidate will be able to obtain first-hand experience of the hydrocarbon industry.

The project will commence in the Autumn of 1995 with fieldwork being undertaken in November-December 1995. Please quote REF: NS 590342.
Further particulars for both posts including details of the application procedure should be obtained from THE PERSONNEL OFFICE, THE UNIVERSITY OF EDINBURGH, 1 ROXBURGH STREET, EDINBURGH EH8 9TB OR TEL: 0131-650-2511 (24 hour answering service).

Closing date: 24 August 1995.

Promoting Excellence in Teaching and Research
REVERTEX CHEMICALS LIMITED

Revertex Chemicals Limited is a member of Yule Catto Plc, an international chemicals group of companies. Following the recent acquisitions of Oxford Chemicals Limited we are to relocate the company head office and laboratories from Harlow, Essex to the Teesside site which will be used for future business expansion. Our Oxford Chemicals division specialises in fine chemicals, especially for the flavour and fragrance industry, and we now have a vacancy within this division for a

SYNTHETIC ORGANIC CHEMIST

to work on new products and processes, from initial laboratory studies to production trials. Candidates should have a Ph.D. in organic chemistry and, ideally, up to two years’ experience in the fine chemicals sector.

Please apply with comprehensive CV and salary expectations to Mrs M. Morrill, Revertex Chemicals Limited, Unit 18D/E, Manor Way, Belasis Technology Park, Billingham, Cleveland TS23 4AZ.

UNIVERSITY OF CAMBRIDGE
Melville Laboratory for Polymer Synthesis

Research Studentship

Applications are invited for a research studentship supported by BFNL on the synthesis and characterisation of novel organic conducting polymers.

The successful applicant will have a strong background in organic synthesis and a first or 2.1 degree in chemistry.

To apply, please send a CV and the names of two referees, to Dr S. C. Moratti, Melville Laboratory, Pembroke Street, New Museums Site, Cambridge CB2 3RA, telephone 01223 331508:
ASSISTANT EDITOR
- Trends in Neurosciences

Elsevier Trends Journals is the Cambridge-based division of the international Elsevier Science group, one of the world's largest scientific, technical and medical publishers. We are seeking to appoint a new Assistant Editor for our monthly magazine Trends in Neurosciences.

The Assistant Editor manages all aspects of the overall production process, from editing manuscripts to overseeing the construction of the monthly issues. This involves collaboration with authors, the in-house Editor and production staff to produce clear, accurate material in an appealing magazine format. We are looking for a graduate with a good understanding of at least one area of neurosciences and at least one year's postgraduate experience; further experience in research or scientific editing and an interest in electronic media would be an advantage. We need someone who can express written and illustrated scientific concepts clearly and concisely, has a good eye for detail and is able to organize their work to meet the demands of strict monthly deadlines.

Please send a full curriculum vitae plus a hand-written letter of application mentioning current salary (if applicable) to: Dr Gavin Swanson, Editor, Trends in Neurosciences, Elsevier Trends Journals, 68 Hills Road, Cambridge, UK, CB2 1LA. (Telephone 01223 315961, Fax 01223 464430). Closing date for receipt of applications: 18 August 1995.

ELSEVIER SCIENCES
Pergamon
Elsevier Advanced Technology
Elsevier Applied Science
Elsevier/Geo Abstracts
Elsevier Trends Journals
Applications are invited for a three-year EPSRC-funded postdoctoral research fellow in the area of heterogeneous catalysis and fuel cell research, in collaboration with UMIST. The project is in a highly technologically and environmentally relevant research area, with the objectives of gaining an increased understanding of the catalytic chemistry which is occurring in Solid Oxide Fuel Cells (SOFCs) and the problems associated with running SOFCs on natural gas.

Applicants should preferably have a background in catalysis, surface science or a related area of physical chemistry, inorganic chemistry or materials science.

Informal enquiries should be made to Dr Mark Ormerod, tel 01782 583475 or Professor Kevin Kendall, tel 01782 583467.

Salary in the range £14,317 to £21,519 (according to age and experience).

Please write for application forms and further particulars, quoting the post reference number, to the Personnel Department, Keele University, Keele, Staffs ST5 5BG, or fax your request on 01782 583471.

Closing date: 17 August 1995.

An Equal Opportunities Employer

Molecular Carcinogenesis Section,  
Sutton, Surrey  

Postgraduate Research Studentship

A three year Ph.D. studentship will be available from October 1995 in the Institute's Molecular Carcinogenesis Section at Sutton, Surrey. The project "Genotoxicity of tamoxifen and analogues" (supervisors: Dr D H Phillips and Dr S Venitt) would suit graduates with a First or 2.1 Honours degree in Biochemistry, Pharmacology or Medicinal Chemistry.

The first year stipend will be £8,000 in 1995. Applicants should send a full CV and the names and addresses of two academic referees to the Student Registrar, Institute of Cancer Research, McElwain Laboratories, 15 Cotswold Road, Sutton, Surrey SM2 5NG, as soon as possible.

Enquiries can be made on 0181 643 8901: Dr Venitt ext 4264, (e-mail: s.venitt@icr.ac.uk) about the project; Student Registrar ext 4643, about the studentship.

The Institute operates a no smoking policy.
Johnson & Johnson LIMITED

**Product Development Scientist**  
Portsmouth  
Attractive Salary

We are the highly successful, autonomous UK consumer products division of the world's largest and most diverse healthcare company. With our unique decentralised management style and flat organisational structure, this role offers a real opportunity to make a significant impact to the business.

We are looking for a scientist to join our R&D team working on the development of mild skin and hair care formulations, therapeutic skin care products and baby toiletries.

Ideally aged in your mid-twenties, you will have gained a first class degree in a relevant science based subject. While preference may be given to candidates with previous experience in the development of skin care formulations, consideration will also be given to new graduates with an outstanding academic record. You must be a high achiever, and have excellent communication and interpersonal skills, with the ability to work in a team.

If you feel you have the above qualities and experience and are keen to progress your career within a top flight consumer products company, we would be interested to discuss this opportunity with you.

To apply, please send a full CV and covering letter, indicating your current salary, to Alison Yates, Personnel Officer, Johnson & Johnson Limited, Southampton Road, Cosham, Portsmouth PO6 4RL.

Post-Doctoral Research Fellowships

Applications are invited for two research posts funded by EPSRC. The first project (in collaboration with Prof. J. P. Simons ERS) is focused on spectroscopic probing of conformational structure using picosecond and nanosecond laser techniques. The second (in collaboration with Dr M. Brouard and Prof. Simons) is focused on the dynamics of laser photo-initiated reactions; in particular those of importance in combustion and in atmospheric chemistry.

The posts are tenable for up to 18 months (post 1) and 3 years (post 2) at a starting salary in the range £12,828 - £20,442 per annum, depending on age and experience.

Applicants should submit a CV, identifying two referees, to Prof J. P. Simons, Physical and Theoretical Chemistry Laboratory, South Parks Road, Oxford OX1 3QZ by 1st September.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

INFORMATION SCIENTIST
Supplying an essential service to a world-leading R&D team
Harlow, Essex

With a continued success based upon constant innovation and product strength, SmithKline Beecham maintains its enviable reputation as a world leader in healthcare. Our Information Management Department is one of the foremost in the pharmaceutical industry and develops leading-edge practices in the provision of high-quality, evaluated information for our R&D scientists.

At our superb facilities in Harlow we now need an experienced, talented Information Scientist to become an integral team member, taking a leading role in major projects to provide information to the Anti-infectives Therapeutic team and to Clinical R&D. Your range of activities will include evaluative literature searches and reviews, and contributing to alerting services for senior R&D personnel.

Qualified to BSc level in pharmacology, biological sciences, pharmacy or a related field, you will have an MSc, or equivalent in information science or at least three years' experience of information work within the pharmaceutical or similar industry. Your success in this role will also depend on your comprehensive understanding of clinical issues, a good knowledge of the anti-infectives (including antivirals) area, and an ability to interact effectively with senior clinical staff.

Our superb remuneration package includes attractive salary and full range of benefits comprising bonus, pension and medical plans, share-matching scheme, profit-related pay, 25 days' holiday, flexible working hours, subsidised restaurant and extensive sports and social activities.

Please send your full career details, quoting Ref: AP/38, to the Human Resources Adviser (SCS), SmithKline Beecham Pharmaceuticals, New Frontiers Science Park, Third Avenue, Harlow, Essex CM19 5AW. Closing date: 18th August 1995.

Cantab pharmaceuticals

Cantab is a fast-paced biopharmaceutical company with expertise in therapeutic and prophylactic vaccine development using specialised and proprietary antigen delivery systems which harness the power of the patient's own immune system.

Virologist/Cell Culture Scientist

We're looking for an enthusiastic scientist to work in a small team working within Development, with the rapid progression of new biologicals into clinical trials as its main objective. With a stimulating and productive working environment in purpose-built laboratories, Cantab is offering a generous compensation and benefits package commensurate with qualifications and experience, on a permanent contract.

The ideal candidate will be qualified to HNC or degree level and will have practical knowledge of virology and cell culture. Experience of work in the pharmaceutical industry or public health sector would be an advantage, as would experience of one or all of the following techniques: viral titrations, culture of mammalian cells, molecular biology, immunological assays, protein biochemistry.

Interested applicants should forward their c.v., detailing their experience, with current salary and citing two contactable referees to:
The Personnel Officer
Cantab Pharmaceuticals Research Limited
184 Cambridge Science Park, Cambridge CB4 4GN
Opportunities in State of the Art Technology

Eli Lilly and Company has been a major manufacturer of ethical pharmaceuticals and animal health products for over 100 years. Our reputation for excellence, innovation, ethics, integrity and our commitment to Research and Development and Manufacturing has maintained our position as a world leader. Our global business success is reflected in sales which last year exceeded $5.7 billion.

Our manufacturing affiliate, Dista Products Limited, based in the North West, has a series a key process development positions. Our process development teams work with a variety of challenging projects involving new and existing products. If you enjoy an atmosphere of team work, challenge and a chance to guide state of the art pharmaceutical manufacturing technologies, you already meet most of the important requirements.

**Fermentation Development Group Leader**
The Fermentation Development Group carries out recombinant and antibiotic fermentations using pilot plant and production scale equipment. You will lead a team of 20 scientists, laboratory and operations personnel in the development of new and existing products. Creativity, initiative and an entrepreneurial style are essential to success in this role.

You will possess a minimum of a good honours degree in Biochemistry, Chemistry or Biochemical/Chemical Engineering with 5+ years relevant fermentation experience and ideally a post-graduate qualification. You should be skilled in project management, communications and have a proven track record in a technical leadership position.

**Fermentation Engineer**
You will work in the Fermentation Development Group developing existing and new recombinant and antibiotic fermentation processes. In addition, you will provide technical advice on fermentation design, sterility control, energy management, modelling in scale-up and environmental control to the manufacturing teams. You will be an excellent communicator and capable project manager. You also must be able to demonstrate initiative, leadership and the ability to work well within a team.

The successful candidate will possess a good honours degree in Biochemical/Chemical Engineering with 4-5 years fermentation experience and ideally a post-graduate qualification.

**Protein Chemist**
The Process Development Group requires a Protein Chemist to provide innovative improvements to the purification processes of recombinant, therapeutic proteins. You will be involved in all stages of process development from fermentation through purification to sterile processing utilising laboratory, pilot plant and full scale manufacturing facilities. In addition to development work on new and existing products, this role requires strong communication and technical leadership skills, mentoring technical personnel in manufacturing and development.

Candidates should possess a good honours degree in Biochemistry or a similar discipline, have a strong knowledge of Protein Chemistry gained through several years of post-graduate study or industrial experience. The successful candidate will work well within teams and will be innovative, self-motivated and have an aptitude and interest in problem solving.

All the positions offer a competitive salary supported by a comprehensive benefits package including a non-contributory pension scheme, free life assurance, membership of BUPA, 25 days’ holiday entitlement and relocation assistance, where appropriate, to the North West.

To apply please send c.v., giving details of qualifications, employment history and current salary to: HR Team Leader, Dista Products Limited, Fleming Road, Speke, Liverpool L24 9LN.

Wellcome International 
Prize Travelling Research Fellowships 1995/96

Applications are invited from postdoctoral research workers for the award of Wellcome International Prize Travelling Research Fellowships to start in 1996. Applicants should note that this programme now includes fellowships previously considered under the Trust's scheme for Travelling Fellowships to Europe.

Objective: These fellowships are intended to provide further research experience for postdoctoral scientists in leading laboratories overseas. Fellowships will be awarded for a three year period, with two years spent in a host country and a third year in a laboratory in either the UK or the Republic of Ireland. Research proposals may be in any branch of the natural or clinical sciences, which has a bearing upon human or animal medicine, with the exception of cancer.

Eligibility: Candidates should have received their doctoral training in the UK or the Republic of Ireland and have been engaged in postdoctoral research in either country for not more than five years. Predoctoral candidates may also apply, but would not be able to commence their fellowship until their doctorate has been awarded. Candidates who hold, or have held, a postdoctoral research position overseas are not eligible to apply.

Candidates must make their own arrangements with the departments in which they propose to work and written evidence must be submitted confirming these arrangements. Candidates should only nominate a laboratory to which they wish to return if there are sound scientific reasons for doing so. Lack of such a nomination will not prejudice the appraisal of an application.

Stipend: This will vary according to age and experience and will be within the range £13,941 to £25,735 per annum. A special cost of living allowance applicable to the country in which the candidate wishes to work is given where necessary. Travelling and research expenses are also provided.

Deadlines: Applications will be considered in March 1996. Fellowships awarded at this time may be taken up after the beginning of the following May. Completed application forms must be returned by 20th November 1995. Late applications will not be considered.

Requests for application forms should include a brief curriculum vitae, an outline of the proposed research of not more than two pages and details of the host laboratory, including a letter of intent from the proposed sponsor. Such requests must be received by 23rd October 1995. Requests should be addressed to: Dr J M Wilkinson, The Wellcome Trust, 183 Euston Road, London NW1 2BE. Tel: 0171-6118428.

THE WELLCOME TRUST

The Wellcome Trust is a Registered Charity (No: 210183) and seeks to support research in biomedical sciences and the history of medicine by means of grants and other activities.

THE ROYAL VICTORIA INFIRMARY & ASSOCIATED HOSPITALS NHS TRUST
THE ROYAL VICTORIA INFIRMARY & ASSOCIATED HOSPITALS NHS TRUST
NORTHERN GENETICS SERVICE
TEESSIDE DIVISION
MIDDLESBROUGH GENERAL HOSPITAL
Grade B or Grade A
Clinical Cytogeneticist

The Northern Genetics Service has responsibility for the provision of a comprehensive Cytogenetic, Molecular Genetic and Clinical Genetic service to the Northern Regional Health Authority. It operates as an integrated unit within the Department of Human Genetics of the University of Newcastle upon Tyne, and has Cytogenetic Laboratories both in Newcastle, adjacent to the Royal Victoria Infirmary, and in Teesside, at Middlesbrough General Hospital.

A post for an experienced cytogeneticist is available in the Teesside Laboratory. Applicants should have at least a 2ii Honours degree in Genetics or a related biological science. An experienced cytogeneticist would be appointed on the B grade, points 8-10 (£16,019 - £17,326) or 11-13 (£18,019 - £19,489). New graduates or persons with other laboratory experience would be appointed on the A grade (£11,706 - £15,402), in the first instance, and appropriate training given. (1994/95 salaries).

Application forms and further details can be obtained upon receipt of a SAE and quoting Ref No RV/95/336 from the Personnel Department, Royal Victoria Infirmary, Queen Victoria Road, Newcastle upon Tyne, NE1 4LP (0191) 232 5131 to whom all applications should be returned. The Head of Laboratory, Dr Connie Clarke, can be contacted directly on (01642) 854321.

Closing date for applications is 25 August 1995.

The RVI & Associated Hospitals NHS Trust is actively working towards equal opportunities and operates a no smoking policy.

Head of Terrestrial Ecology Unit

The BTO requires an ecologist to lead its research into effects of land-use and habitat change on birds. The current emphasis of the Unit is on agriculture and bird populations. The postholder will manage a small team and will personally conduct a MAFF-funded project on temporal relationships between changes in bird numbers and farming practices.

Candidates should have a Ph.D., a proven research record and a background in conservation science.

This is a permanent post on Higher Scientific Officer grade (£13,025 - £18,165). Write to A. Elvin, BTO, The Nunnery, Thetford, Norfolk IP2A 2PU for an application form and further details. Closing date 25th August 1995.

British Trust for Ornithology
Research Associate

Required for a period of one year to work in the field of natural antitumour antibodies. Experience of Western blotting, immuno-absorption and other purification and isolation techniques essential.

Salary £18K.

For further details, please contact Dr D. G. Wells, The William Harvey Hospital, Ashford, Kent. Tel: 01233 633331, ext 8060.

Software Engineers

We are currently seeking two Software Engineers to support the development of PC based, real-time, medical systems. The positions will involve analysis, design and programming and experience of Windows programming, OOD or C++ is desirable.

The successful applicants will work within tightly integrated teams, responsible for taking new products from marketing concept through to customer ready solutions.

We are looking for enthusiastic, motivated people educated to degree level or equivalent in either engineering, maths, science or biomedical engineering. In return we offer an attractive package, with a salary in the range of £16 - 20 K.

If you are interested in these vacancies and would like further details or an application form please contact Katie Wond on Ext. 2402 at the address below:

OXFORD
Announcement: New MRC-led LINK Programmes in
INTEGRATED APPROACHES TO HEALTHY AGEING AND GENETIC & ENVIRONMENTAL INTERACTIONS IN HEALTH

The Medical Research Council is launching two new LINK Programmes designed to address key recommendations arising from Technology Foresight*. The LINK scheme aims to promote high-quality, pre-competitive research collaborations between academia and industry in the cause of innovation and increased UK industrial competitiveness. Applications for project grant support are invited which successfully address the scientific themes of one or other of the two Programmes and the generic LINK objectives.

The scientific themes of the Programmes are as follows:

Integrated Approaches to Healthy Ageing:
• to improve understanding of molecular, cellular, physiological, immunological, psychological and social mechanisms contributing significantly to healthy ageing, or to cognitive decline and neurodegeneration, or to decline in physiological function;
• to develop integrated and deliverable biological, psychological and sociological approaches to support healthy ageing and independent living;
• to develop new, effective, rationally-based approaches to prevention, management and rehabilitation in disorders of major clinical and health service burden in the elderly – with an emphasis on effectiveness within defined systems of care.

Genetic & Environmental Interactions in Health:
• to identify the key genetic, developmental, behavioural, sociological and environmental risk factors that lead to the major multifactorial diseases;
• to identify genetic factors that mediate susceptibility to the beneficial or harmful effects of drugs and environmental toxicants;
• to identify diagnostic biomarkers of risk and exposure that can be used in population screening;
• to underpin the development of novel methods for complex risk assessment in large populations and in genetically defined subpopulations;
• to contribute to the development of rapid, "smart" automated screening systems.

All LINK projects must involve at least one company and one research base organisation. UK companies large or small may take part. In addition, multinational companies are able to participate provided they have a significant manufacturing or research base in the UK contributing to UK or EU wealth creation. Eligible research base partners include Universities, Research Council establishments, Governments research agencies and NHS Trusts.

The MRC is willing to consider outline proposals and to advise prospective grant applicants on the match between their outline proposals and the programme objectives. In some instances, appraisal, funding and management of a project (if approved) by a sponsor other than the MRC will be appropriate.

Final proposals will need to be submitted with research base and industrial partners in place, a commitment from the industrial partner to contribute at least 50% of the costs of the research, and a clear project-management plan with defined objectives, timetable and deliverables, including plans for exploitation.

Proposals to the MRC will be assessed by the relevant Research Board or Committee and prioritised for funding on the basis of their (i) scientific and technical merit; (ii) potential for innovation and exploitation; and (iii) strategic merit in addressing Technology Foresight and Programme Objectives.

To obtain further details of the Programmes and application forms, you are welcome to contact: Dr Peter Dukes at the MRC, 20 Park Crescent, London W1N 4AL; 0171-636-5422 (e-mail: peter.dukes@mrc.hq.ac.uk)

MRC
Medical Research Council
Senior Product Research Chemist
Speciality Cleaners Team
for US multi-national European HQ - Surrey

SC Johnson is a leading consumer goods company with annual sales exceeding $3.7 million. It intends to remain in the top 10 of world consumer goods companies with a strong portfolio, including such brands as Toilet Duck, Mr Muscle and Pledge and with a policy aimed at continuously providing a supply of innovative products for the market place.

The company is currently looking for an experienced and enthusiastic Senior Product Research Chemist to assist the Team Leader with the running of the laboratory. The successful applicant will develop innovative new products for the Mr Muscle range and working closely with UK and European Marketing departments reformulate existing products, supervise and assist junior staff and help in the promotion of better communications within the Corporation.

The successful post holder will have the potential to progress to Team Leader, demonstrating initiative, influence, tenacity and judgement as well as the necessary technical skills. Being a graduate in either a physical science or in chemical engineering and possessing at least five years' postgraduate experience in the FMCG R&D sector, applicants must also have expertise of hard surface cleaners and a broad knowledge of one of the following technologies: emulsions, polymers, aerosols or surfactants.

The successful applicant will receive a competitive salary, annual profit-sharing, subsidised private medical and dental care, non-contributory pension and life-assurance.

Applications with full CV and details of current salary should be sent by mail to: Patricia Allen, SC Johnson Wax Limited, RD G E Centre, Eurolabs, Milton Park, Stroude Road, Egham, Surrey TW20 9UH.

TRAINEE/MLSO 1
£7,773 - £9,816 P.A. INC.

We have a vacancy for a Trainee MLSO. You will receive a good grounding in all aspects of the work carried out in a routine department of a large District General Hospital.

For further information, telephone Mr Barr on 0181 869 2122.

For application forms and job descriptions please contact the Personnel Department, Northwick Park and St Mark's NHS Trust, Watford Road, Harrow, Middlesex, HA1 3UJ. Tel 0181 869 2184 (24 hour answerphone) quoting ref. no. INV104SP.

Closing date: 16th August 1995.

Committed to Equal Opportunities
Environmental Scholarship

Unipart, Britain's largest independent supplier of automotive parts and accessories, who are based in Oxford, are looking to offer a sponsored scholarship for the MSc course in Environmental Change and Management for the academic year 1995-96.

Unipart International, the division responsible for the Unipart brand, are offering a full costs of a home or overseas student to undertake The MSc course. The scholarship is the association with Linacre College where the student will be based.

The one year MSc course is run by the Environmental Change Unit, University of Oxford. The 1995-96 course begins on 28 September.

The student will be expected to research their dissertation in an area of relevance to the Company, that is, the broad area of the automotive industry and the environment.

Prospective scholarship holders should apply for admission to the course immediately through the Graduate Admissions Office, University Offices, Wellington Square, Oxford OX1 2JO and make clear their interest in the scholarship when submitting their application.

Further details about the course can be obtained from the Environmental Change Unit, 1A Mansfield Road, Oxford OX1 3TB.
Inveresk Research International Limited is a highly successful international contract research organisation with a strong record of growth and a reputation for quality, integrity and innovation. Comprehensive research services are provided to the pharmaceutical, agrochemical, industrial chemical and consumer product industries from our purpose-built, state-of-the-art facility in East Lothian, close to the city of Edinburgh.

Ongoing development and expansion of our activities has resulted in a number of key opportunities within our Commercial Group.

**SALES MANAGER**
You will lead and manage a highly motivated sales team - strengthening relationships with existing customers and generating new business contacts. Working closely with the Company's Commercial Planning Group, you will develop and implement a corporate sales plan that will drive the Company forward into the next millennium.

You will need an impressive track record of leading a winning team within a dynamic scientific sales environment. Proven organisational, interpersonal and team-building skills are essential. You will also play a role in marketing our services which will require both UK and overseas travel. (Ref No 9107)

**BUSINESS DEVELOPMENT OFFICERS**
You will be dynamic, highly motivated achievers, probably with a degree in Biological or Chemical Sciences linked with sales/marketing/business development experience in a scientific environment. You will be strong team players with good communication skills and sound commercial acumen. Extensive UK and overseas travel is involved in these roles.

Particular areas of focus for development and expansion are:

**Clinical Sciences**
You will need a working knowledge of both preclinical and clinical development of pharmaceuticals, and an understanding of the roles of bioanalytical chemistry, clinical chemistry, statistics and data management and regulatory affairs in the pharmaceutical registration process. (Ref 9110)

**Biopharmaceuticals**
You will need a working knowledge of the preclinical development of biopharmaceuticals/pharmaceuticals and an understanding of biotechnology processes and techniques, as well as regulatory requirements governing safety testing. (Ref 9109)

All posts carry an excellent salary and benefits package for the right individuals. This includes membership of our Pension and Life Assurance Plan, free medical cover, participation in bonus scheme arrangements and assistance with relocation where appropriate. Quality of life in the area is exceptional, with excellent housing, leisure, sporting and cultural facilities.

Please forward a comprehensive CV to the Personnel Department, stating clearly for which post you are applying and quoting the appropriate reference number.
DEPARTMENT OF AGRICULTURE
WESTERN AUSTRALIA

PLANT BREEDER
Position No: P0010560

THE ORGANISATION: From 1 July 1995 the Department of Agriculture, the Rural Adjustment and Finance Corporation and the Agriculture Protection Board will operate as a single organisation responsible for the Government's involvement in agriculture in Western Australia. Consistent with the new organisation's more commercial approach and explicit locus on market requirements, we are now seeking to appoint a Plant Breeder responsible for delivering barley breeding program outcomes.

THE POSITION: The Plant Breeder will conduct a barley breeding program to develop barley varieties that are suited to the agro-climatic zones of the agricultural area of Western Australia in a research team with relevant agronomists, chemists, bio-technologists and other crop breeders. They will liaise with the barley industry, including growers, marketers, marketers and brewers, to ensure that the breeding objectives of the program remain relevant to industry needs; supervise staff directly responsible to the position and collaborate effectively with other team members.

THE PERSON: The successful applicant will possess a university degree in Agricultural Science, or approved equivalent and relevant work experience ranging from nine to twenty years in accordance with the criteria specified in the job Description Form. In addition, they will demonstrate a sound knowledge of Plant Breeding methodology and practice, knowledge and understanding of the principles of data analysis and summary applicable to plant breeding and crop variety testing, and an understanding of the techniques of field experimentation including planning, conducting trials, assessing, interpreting and reporting results.

LOCATION: South Perth, however appointee may be required to serve for extended periods in country/regional locations.

SALARY PACKAGE: A salary package in the range of A$51,622 - A$73,937 per annum including superannuation, annual leave loading and a salary component of A$45,543 - A$65,467 per annum will be negotiated dependent on the appointee's qualifications and experience. Appointee is entitled to four weeks annual leave.

APPOINTMENT: Appointment will initially be on a five year contract. Conditions shall be in accordance with those applicable to employees covered by the Public Service Award.

JOB DESCRIPTION & APPLICATION FORMS: (61 9) 368 3996 (24 hour answering machine).

FOR FURTHER INFORMATION: Peter Portmann on (61 9) 368 3509. Email: pportmann@infotech.agric.wa.gov.au.

APPLICATIONS: Applicants are requested to demonstrate how they satisfy the Selection Criteria by addressing each point in their application. Applications quoting position number P0010560 to be forwarded to:

Recruitment Officer Department of Agriculture 3 Baron-Hay Court SOUTHPERTH WESTERN AUSTRALIA 6151 Fax: (61 9) 474 3749

CLOSING DATE: 5.00pm Thursday, 31 August 1995.
The Minister for Primary Industry is an equal opportunity employer. [1989-042 (1995) : 69]
The Department of Agriculture, Energy and Minerals is committed to improving the economic growth and sustainability of agriculture, energy and minerals industries in Victoria through effective science-based programs.

**Soil and Water Management Sub Program Leader**  
Salary: A$40,170 - A$56,650 per annum.

The Person: The person will have demonstrated ability to manage and provide scientific leadership to a multidisciplinary research and development group; demonstrated excellence in hydrologic or soil physics research relevant to irrigated agriculture with effective information transfer; demonstrated ability to apply scientific principles of soil and water management to sustainable irrigation farming systems; demonstrated ability to communicate effectively with professional peers, clients and funding bodies; and demonstrated ability to obtain resources to support research and development programs.

The position: The successful applicant will lead the Soil and Water Sub-Program of ISIA - Tatura; provide scientific leadership to a hydrologic research team of four scientists; maintain a high quality research program in an area of hydrology relevant to sustainable irrigated agriculture systems; identify irrigation industry needs and priorities for sustainable management of soil and water resources; obtain resources to support personal and sub-program projects, contribute to sustainable agriculture program at all levels within Agriculture Victoria; and maintain effective communication with professional peers, funding bodies and clients.

Qualifications: An approved degree or diploma in Agricultural Science, Science, Engineering or equivalent is essential, preferably with additional formal post graduate qualifications in hydrology or soil physics, to Ph.D. level.

Package: The salary range is between A$40,170 - A$56,650 (VSP-4 Scientist)

Position No: 05/40/0347/6.

Applications: Written applications quoting the position number with details of qualifications, experience and a business hours contact telephone number should be forwarded to the Personnel Officer, ISIA Tatura, Private Bag, Ferguson Road, Tatura, Victoria Australia 3616 or by facsimile 61-3-058 335 299 by close of business Wednesday 23rd August 1995.

Further Information: For a copy of the duty statement please contact Mr Robert Wildes on 61-3-058 335 222

The successful applicant will be required to enter into an employment contract. Recipients of VPS departure packages should note that re-employment restrictions apply. The Department is an equal opportunity employer and has a smoke-Free workplace policy.
COMPUTATIONAL FLUID DYNAMACIST

East Midlands

Already a highly successful business with an enviable record of innovation in the design and development of industrial, heavy duty and aircraft gas turbines, our Client is now on the threshold of significant expansion. As a result they are embarking on a drive to recruit specialist Engineers throughout 1995. As a Computational Fluid Dynamacist, you should have 3 years or more experience of modelling in gas turbines. Familiarity with Star-CD CFD code, ICEM and IDEAS would be an advantage. In addition candidates should ideally have experience of:

• Combustion and Radiation models
• Turbulence models and highly swirling flows
• Using a general purpose CFD code
• Complex mesh generation

The comprehensive remuneration package includes negotiable salary, profit related pay, company pension scheme and relocation assistance where appropriate.

If you could benefit from and fully contribute to this challenging role, please forward your CV to our retained consultant Trevor Dunne, at JED Consultants, 166 Upper New Walk, Leicester LE1 7QA. Tel: (0116) 233 8866. Fax: (0116) 233 8867.

J.E.D. CONSULTANTS

UNIVERSITY OF STIRLING
Department of Biological and Molecular Sciences

Research Fellow (1A)

Applications are invited for a three-year postdoctoral position to investigate RubisCO gene expression in marine phytoplankton. Candidates should have experience or an interest in molecular biology and be willing to participate in oceanographic cruises.

Further particulars are available from Dr M. Wyman, DBMS, University of Stirling, Stirling FK9 4LA, where applications, in the form of a CV, together with the names of two referees, should be sent as soon as possible. Informal enquiries should be made by telephone on 01786 467784 or by email to michael.wyman@stir.ac.uk

The Anthony Nolan Bone Marrow Trust has one of the busiest tissue typing laboratories in the world, testing patient and volunteer donor samples, using state of the art molecular and cellular techniques. Vacancies exist for

**CLINICAL SCIENTISTS**

to join the tissue typing team and a Supervisor to oversee the day-to-day running of a section. Previous relevant experience is required for the supervisory position, but full training will be given to graduates of molecular or biological sciences.

Salary will be commensurate with qualifications and experience.

CV’s should be sent to: Mrs. Carol Yapp, The Anthony Nolan Bone Marrow Trust, The Royal Free Hospital, Pond Street, London NW3 2QG. Closing date for applications 18 August 1995.

THE ANTHONY NOLAN BONE MARROW TRUST

RESTEC LABORATORIES LTD provides contract analytical services to the food industry and the agrochemicals development sector.

**ANALYTICAL CHEMIST**
A vacancy exists for a graduate with a minimum of 3 years experience in pesticide residues analysis.

Candidates should have practical knowledge of extraction and purification techniques as well as GC and HPLC gained within a GLP or NAMAS environment.

Experience of GC-MS would be an advantage.

Applications enclosing a current CV to John Edmunds, Restec Laboratories, Birlingham, Pershore, Wores WR10 3AA.
Closing date 11 August 1995.
BPL
Bio Products Laboratory

OPPORTUNITIES IN RESEARCH & DEVELOPMENT
£12,661 - £16,846 INCLUSIVE OF LONDON WEIGHTING, DEPENDING ON QUALIFICATIONS AND EXPERIENCE.

BPL is the main supplier of plasma-derived therapeutic products to the NHS. The R&D Department has four vacancies in its Product Development, Pilot Plant and Virus Safety Units. These Units are teams of 6-10 Scientists and Research Assistants with responsibilities for process and product development, manufacturing support and virus safety across a range of protein therapeutics.

Albumin and Immunoglobulin Product Development
A Research Assistant vacancy exists for a graduate in life sciences to work on the characterisation and stability of human monoclonal antibodies. Applicants should have experience of protein chemistry and analytical techniques. (Please quote reference RA/09).

A graduate biochemical/process engineer is required to work on the development and validation of precipitation and filtration processes. Other duties include support for Manufacturing operations and the evaluation of downstream processing operations, such as chromatographic and ultrafiltration systems. (Please quote reference RA/25).

Pilot Plant
A vacancy exists for a biological or physical science graduate to work in the R&D Pilot Plant. The work involves scaling-up new processes and providing trouble-shooting support to Manufacturing. (Please quote reference PPT/03)

Virus Safety Unit
Due to a recent promotion we are looking to recruit a biological science graduate to evaluate and validate methods for the inactivation and removal of viruses from a growing range of therapeutic products. Some practical experience in basic virological techniques is desirable. (Please quote reference RA/01)

For all the above posts, a meticulous approach to documentation and an ability to work effectively in a team environment are essential attributes. Evidence of success in applied research will be an advantage.

For an application form please telephone 0181 207 641 15 (24 hour answerphone) quoting the appropriate reference number or write to the Personnel Office at the address below

Dagger Lane, Elstree, Herts. WD6 3BX
Tel: 0181 905 1818 Fax: 0181 207 4824

NATIONAL BLOOD SERVICE

A unit of the National Blood Authority within the NHS
CHARING CROSS AND WESTMINSTER MEDICAL SCHOOL  
(University of London)  

**Ph.D. STUDENTSHIP**  

Applications are invited for a Livingston Scholarship in the Department of Pharmacology to work on methods of modifying the immune response to exogenous genes introduced by somatic gene therapy. Candidates should hold a 1st class or 2nd (1) honours degree in Biological Sciences and have a strong interest in molecular biology.  

The appointment, which is subject to annual review, is available for up to three years with a starting stipend of £9844.  

Informal enquiries should be directed to Dr Dominic Wells (0181 846 7038).  

Applications with full CV, together with the names and addresses of two referees, should be sent to the Director of Personnel, Charing Cross and Westminster Medical School, The Reynolds Building, St Dunstan's Road, London W6 8RP, within three weeks of the appearance of this advertisement. (Quote Ref 95/72).  

CX&WMS is an equal opportunities employer and is a charity promoting medical education and research.  
NORTHERN AND YORKSHIRE REGIONAL HEALTH AUTHORITY
REGIONAL MEDICAL PHYSICS DEPARTMENT

**Physicist/Senior Physicist** (Ultrasonics)
Ref: 14/95
Salary scale will be in the range B8-10 - £16,019 - £17,326 to B14-16 - £20,270 - £21,923 (a pay award is pending).

The post is established at Grade B14-16 but an appointment may be made initially at a grade from B8-10 upwards depending upon experience.

Based at the Department's Newcastle General Hospital Unit, the post represents an outstanding opportunity to join a team of scientists and technologists committed to providing high quality services in medical ultrasound. The post will involve direct patient services, quality assurance, and research and development. The successful candidate must be able to demonstrate the potential to manage projects successfully.

Candidates should possess a good honours degree in Physics, Electronic Engineering or other relevant Physical Science. For appointment to the established B14-16 grade of the post, candidates should have five years relevant experience since graduating. We will also welcome applicants with less experience including those who have just completed their two years basic IPSM training with experience preferably, but not necessarily, in ultrasound.

Candidates wishing to discuss the post informally should contact Dr. Tony Whittingham, Head of Ultrasonics, Tel. Tyneside (0191) 273 8811 ext. 22946.

**Associate Physicist**
Ref: 15/95
Salary £11,706 p.a. (award pending).

Required to play an important part in R & D projects in the fields of Respiratory Medicine (especially Sleep Studies) and EMG analysis.

The projects will involve the development of computer based data acquisition and analysis programs using Lab View and Visual Basic.

The post is based at South Cleveland Hospital, Middlesbrough and will be of one year's duration.

Applicants should possess a first or second class honours degree in a relevant subject.

Prospective applicants wishing to discuss the post informally should contact Dr. John Haywood or Mr Robert Royall on Middlesbrough (01642) 854778. Application forms and job descriptions obtainable by telephoning Tyneside (0191) 273 5184 (24 hour answerphone service), quoting the relevant reference number.

Closing date: 11 September 1995

NHS Executive
Northern and Yorkshire
UNIVERSITY OF SURREY  
Department of Chemical and Process Engineering

RESEARCH IN PARTICLE TECHNOLOGY  
The award of a grant from the EPSRC under the prestigious ROPA scheme, has provided an opportunity for exciting research in Particle Technology. The attrition of fine porous catalyst particles, as used in fluid catalytic cracking units in the oil refineries, is the subject of investigation here. Abrasive and erosive wear and fragmentation of such particles can cause serious operational problems. A fundamental understanding of what the mechanisms involved is the aim of this research programme. The outcome will provide a predictive capability of the likely processing problems and will help the design of particles that are attrition resistant.

A Research Fellowship is available for the above work, which is particularly suited to applicants with postgraduate qualifications in a scientific or engineering discipline who have preferably some experience in particle technology. The appointment will be for a period of 30 months on the RA1A scale with a starting salary of up to £18,985 depending on age and experience.

Applications in the form of a curriculum vitae and covering letter (2 copies) including the names and addresses of two referees should be sent to the Personnel Office (sab), University of Surrey, Guildford GU2 5XH, by 29 August 1995, quoting reference 390.

The University is committed to an Equal Opportunities policy.  
Promoting excellence in education and research.  
FRESHWATER BIOLOGICAL ASSOCIATION

Ambleside Cumbria

POST-DOCTORAL FELLOWSHIP
2 POSTGRADUATE STUDENTS

The Freshwater Biological Association is offering the above positions, for a three year duration. All applicants will be required to submit an outline research proposal; there is a particular but not exclusive interest in microbial phytoplankton, invertebrate and fish ecology.

Good Honours degrees are essential and ideally candidates should be members of the Association. The positions will be awarded in open competition with maintenance grants analogous to those of the Natural Environment Research Council (NERC).

Further details and application forms are available from the Director, Freshwater Biological Association, The Ferry House, Ambleside, Cumbria LA22 0LP The closing date for receipt of completed applications is 4 September 1995.

The Freshwater Biological Association has an equal opportunities policy and welcomes applications from all sections of the community
RESEARCH/TECHNICAL OFFICER

Applications are invited for a fixed term, four year post of Research Technical Officer to work in the newly established Molecular Structure Centre at the School of Chemical Sciences, University of East Anglia. The person appointed will be responsible for operating and maintaining facilities in the X-ray diffraction laboratory, and to interact with research and academic staff, developing an active involvement in research projects. The facilities will include three X-ray generators (two rotating anode) plus three detectors (including an arcs detector) and associated low temperature and computational devices.

Candidates must have experience of working with X-ray diffraction equipment and be familiar with current data-collection software.

Salary will be on the Research and Analogous 1B scale, £14,317 to £15,986 per annum.

An application form should be obtained from the Director of Personnel and Registry Services, University of East Anglia, Norwich, NR4 7TJ (answerphone: 01603 593493), to be returned with a CV and names of three referees, by 15 August 1995. Please quote reference TC8.

UEA is committed to excellence in education and research and to equality of opportunity for all.

GIRTON COLLEGE

Research Fellowships

Applications are invited for Research Fellowships tenable from 1 October 1996 for three years, to be held in any subject. The College normally awards two Fellowships each year, one in the Arts and one in the Sciences. These are open to graduates of any University with no age limit, but are intended to support those at a very early stage in their academic careers, and will normally be awarded to candidates who have recently completed their Ph.D. or are close to completion. The competition involves assessment of selected candidates submitted work and, for those shortlisted, an interview. Those interested should note that the standard needed to progress to the later stages of the competition is extremely high. Overseas candidates should also note that the College will not be responsible for payment of airfares should they be shortlisted for interview.

The emoluments of a Fellowship are within the range of £9,245 – 11,605 per annum (rising by two annual increments to £12,220 pa).

The closing date for applications is Friday 29 September 1995 for those applying in an Arts subject and Wednesday 4 October 1995 for those applying in a Science subject. Selected candidates will be invited to submit work in mid-October, and final interviews will take place in late November.

Further particulars and application forms are available from the Secretary to the Research Fellowships, Girton College, Cambridge CB3 0JG or Science candidates may e-mail to (chkl@esc.cam.ac.uk).

Girton College is a charity for the promotion of teaching, learning and research. [1989-054 (1995) : 72]

Research Studentships in Molecular Microbiology

Live Multivalent Recombinant Vaccines. We have recently constructed a trivalent typhoid-tetanus-schistosome vaccine (PNAS 91;11261, 1994; J Immunol 153; 5634, 1994). The candidate would apply these systems to recombinant antigens from the red blood cell stages of *Plasmodium spp.* with a view to construction of a malaria vaccine. (Dr C. M. Anjam Khan/Prof C. E. Hormaeche, Dept of Microbiology. Tel (0191) 222 7066/7704: Fax (0191) 222 7736; Email anjam.khan@ncl.ac.uk).

Genetic Variability in Streptococci. The novel *msm* binding-protein dependent sugar transport system of *Streptococcus mutans* (*J Biol Chem* 267: 4631, 1992) is genetically unstable and the project will involve characterisation of chromosomal deletion events. (Prof R. R. B. Russell, Dept of Oral Biology. Tel (0191) 222 7859; Fax (0191) 222 6137; Email r.r.russell@ncl.ac.uk).

Applications are invited from candidates with a first or upper second class degree and an interest in molecular biology/immunology/parasitology, preferably with some experience of genetic manipulation. The studentships are available for three years from 1 October 1995. Applications including full CV and names of two referees should be sent (by 31 August 1995) to the respective supervisors, Faculty of Medicine, University of Newcastle, Newcastle upon Tyne NE2 4BW. Informal enquiries will be welcomed by telephone.

Dedicated to excellence in teaching and research.

LECTURER

This is a new post in the Department of Civil Engineering which holds a Grade 5A research rating and is one of the United Kingdom's leading University centres for water resources and environmental engineering.

The successful candidate will be expected to carry out research in the fields of experimental and/or computational hydraulics and secure funding for this research. Expertise in hydrodynamics and numerical modelling would be advantageous. The individual appointed must be committed to teaching at undergraduate and postgraduate level and will be encouraged to maintain appropriate professional and industrial contacts.

Salary will be at an appropriate point, according to qualifications and experience, on the Lecturer Grade A scale (£15,154 - £19,848 pa). Progression to Lecturer B scale (£20,677 - £26,430) will depend on satisfactory performance.

No forms of application are issued. Further particulars are available from the Director of Personnel, Registrar's Office, University of Newcastle, 1 Park Terrace, Newcastle upon Tyne NE1 7RU with whom three complete copies of applications, including a full cv with present salary and the names and addresses of three referees, should be lodged not later than 8th September 1995.

Informal enquiries about the post can be made in the first instance to Professor P. E. O'Connell, Department of Civil Engineering (tel: 0191 222 6405). Please quote Ref: 2573/NCE. Committed to equal opportunities.

Dedicated to excellence in teaching and research.

Van den Bergh Foods Ltd
London Road, Purfleet, Essex RM19 1SD

Starting Salary £17,000

Van den Bergh Foods Ltd., one of the major operating companies of Unilever plc, and a market leader in branded food products; Flora, PG Tips, Chicken Tonight, Peperami, etc., have a vacancy for a

**PROJECT ASSISTANT**
Development Department

to work as part of a team in the Company's Development Department which is a key innovation centre for margarines and spreads within Unilever's worldwide business. The role will be based at our factory site in Purfleet, Essex.

The successful candidate will be responsible for planning and carrying out project trial programmes on pilot plant and factory production scale, assessing products against agreed standards and reporting results. Liaison with other functions within The Company, especially Marketing and Production, also with other Unilever Companies, including Unilever Research, will be an essential part of the job.

Applicants should be qualified to degree level or equivalent. Experience within the food industry would be valuable but is not essential. Candidates must have a hands on, positive attitude and be capable of working within a team.

Please send a letter of application together with full CV to: Miss Sally Oakerbee, Personnel Assistant, by 18 August 1995.

Please note: Applicants who have not received an acknowledgement by Friday 1 September 1995 should assume that we will not be pursuing their candidature further.

An equal opportunity employer
ICRISAT

**PRINCIPAL GERMPLASM SCIENTIST AND DIRECTOR, GENETIC RESOURCES DIVISION**
(Code no: IAC-05-P)

The International Crops Research Institute for the Semi-Arid Tropics (ICRISAT) is a nonprofit, autonomous, scientific research and training institute with regional centres and teams in Asia and Africa. ICRISAT is recognised for its work on plant genetic resource collection, characterisation, conservation, and distribution and holds in trust major ex situ collections of its mandate crops and related species. ICRISAT is seeking a Principal Germplasm Scientist and Director of the Genetic Resources Division.

The Germplasm Scientist will be located at the ICRISAT Asia Center, near Hyderabad, India, and will be expected to provide scientific and administrative leadership in genetic resources within ICRISAT and to advise the management of ICRISAT on related matters. The appointee will be active in expanding and strengthening research activities within the Genetic Resources Division, in expanding the scope of collaboration with NARS, and in representing the Institute within the CGIAR's system-wide Genetic Resources Program and other regional and global fora for genetic resources and biodiversity issues.

Close collaboration of the Genetic Resources Division, with the other Research Division of ICRISAT, the International Agricultural Research Centers, and the national agricultural research systems including community groups and industry, is essential. Current activities include collection, characterisation and evaluation, conservation and distribution of ICRISAT's mandate crops. Research will be enhanced in a range of areas including spatial analyses of biodiversity, molecular characterisation of germplasm, ex situ and in situ conservation methodologies, and development of core collections.

Applicants should have a Ph.D. degree or equivalent qualification in genetic resources or other fields closely related to germplasm conservation, management and utilisation. Experience in national, regional, or international genetic resources programs is essential. Knowledge and experience of one or more relevant topics, such as the use of molecular methods in characterisation of germplasm, GIS analyses of biodiversity, computer applications and database development for genetic resources and in situ conservation would be particularly advantageous. Proficiency in written and spoken English is essential, and a command of French desirable. Strong skills in communication and presentation are necessary.

The appointment will be initially for two years with the possibility of further contracts. An internationally competitive salary and benefits package will be provided. ICRISAT is an equal opportunity employer, and is especially interested in increasing the participation of women on its staff. ICRISAT is responsive to the needs of dual career couples. A Fact Sheet on employment possibility for spouses is available on request. ICRISAT has a flexible approach to international appointments and welcomes enquiries from persons interested in working at ICRISAT while on secondment. Applications, referring to the code number, may be submitted to Dr C. Renard, Chairperson of the Search Committee, ICRISAT Asia Center, Patancheru, Andhra Pradesh 502 324, India [phone: +91(40)596161; fax: +91(40)2 41239] by 30 September 1995. The application should include a current curriculum vitae, the names and addresses (including fax/telex/e-mail) of three referees, the date of availability, and a statement on the special qualifications of the candidate for this position.

GEOGRAPHICAL INFORMATION SYSTEMS SPECIALIST IN THE ODA MALARIA PROGRAMME

We have a vacancy for a specialist in Geographical Information Systems (GIS) and statistics to work as a member of an interdisciplinary team carrying out applied research on the control of malaria and funded by the Overseas Development Administration: the ODA Malaria Programme. The initial aim is to explore the use of GIS in the management of control programmes and in the reduction of suffering due to malaria through primary health care. The research programme will be developed in detail with the active participation of new staff.

The post which is currently half-time would be appropriate for a statistician or geographer at postdoctoral level who already has GIS skills. A Sun workstation with Arcinfo is currently available. GIS is likely to become of increasing importance in the work of the School and the Department.

The appointment will be for three years and the salary, half time, in the full time equivalent range of £16,451 - £22,811 inclusive.

Please contact the Personnel Office (telephone 0171 927 2203, fax 0171 636 4771, e-mail personnel@lshtm.ac.uk) for further particulars and details of how to apply quoting ref DB1.

Interested applicants are invited to contact Professor David Bradley (telephone 0171 927 2216, fax 0171 580 9075, e-mail: dbradley@lshtm.ac.uk) for an informal discussion about the post.

The closing date for applications is 15 August 1995.

The School is an exempt charity dedicated to providing excellence in teaching, learning and research for the benefit of health world-wide, and is an equal opportunities employer.
**Technician**  
Speciality Cleaners Team  

SC Johnson is a leading consumer goods company with annual sales exceeding $3.7 million. It intends to remain in the top 10 of world consumer goods companies with a strong portfolio, including such brands as Toilet Duck, Mr Muscle and Pledge and with a policy aimed at continuously providing a supply of innovative products for the market place.

The post holder will work closely with a Senior Product Research Chemist to develop new innovative products for the Mr Muscle range. The position involves laboratory work and possibly travel within Europe.

Applicants will need to have chemistry to at least A level standard and will be keen to improve knowledge in this key subject area. Good laboratory skills and a willingness to improve such skills with day release studies and on-the-job training are essential and strong communication skills and the ability to function as part of a team are desirable. Ideally applicants should have some experience in the FMCG R&D sector & knowledge of analytical chemistry may be desirable.

The successful applicant will receive a competitive salary, annual profit-sharing, subsidised private medical and dental care, non-contributory pension and life-assurance.

Applications with full CV and details of current salary should be posted to: Patricia Allen, SC Johnson Wax, RD&E Centre, Eurolabs, Milton Park, Stroude Road, Egham, Surrey TW20 9UH

Closing date for applications is 25 August 1995.

SC Johnson wax
Loughborough University of Technology
Department of Mechanical Engineering

RESEARCH ASSISTANT
Real-time analysis of interferograms

A 3 year EPSRC funded position for development of a system to measure optical interference phase distributions in real-time. Applications include measurement of strain maps for automated non-destructive testing of composites. Experience in the areas of interferometry and DSP applications development is required.

Salary will be on the 1B (£14,317 - £15,986 pa) or the 1A (£14,317 - £21,519 pa) Scale for research staff depending on qualifications and experience. Informal enquiries to Dr. J. M. Huntley, telephone 01509 223639, e-mail J.M. Huntley@lut.ac.uk. Further details available from Ms. G. Kirton, telephone 01509 223231, Department of Mechanical Engineering, Loughborough University of Technology, Loughborough, Leics, LE11 3TU. Quote reference: 95/95/MC. Closing date: 31 August 1995.

Advancing knowledge through teaching, learning and research.

We are committed to equal opportunities
DEPARTMENT OF CHEMISTRY

INORGANIC CHEMISTRY TEACHING FELLOWSHIP

A Teaching Fellowship is available in the Department of Chemistry for one year from 1 October 1995. The Fellow will be expected to give workshops and tutorials in inorganic chemistry and to demonstrate in the undergraduate degree course. The Fellow will also be expected to possess appropriate research expertise and to contribute to one of the Department's inorganic research programmes.

The salary will be in the range: £14,317 - £15,986 per annum on Grade 1 of the Other Related Salary Scales.

For further information and details of how to apply, please contact the Personnel Office, University of York, Heslington, YORK, YO1 5DD quoting reference number 3/5147. The closing date for applications is 29th August 1995.

PROMOTING EXCELLENCE IN TEACHING AND RESEARCH.

THE UNIVERSITY of York
MERRIST WOOD COLLEGE

Lecturer in Animal Care

Applications are invited from MRCVS or degree qualified/ experienced candidates to develop new course modules/ facilities in wildlife rehabilitation, physiology and other animal disciplines, to national diploma level.

Post commences September 1995.

For further details and application form, please contact Rosemary Todd (Personnel) on Guildford 01483 232424.

Merrist Wood College is an exempt charity providing further and higher education.
Cardiff University of Wales

RESEARCH ASSOCIATE IN PHYSICAL CHEMISTRY

For this fixed-term 1 year post in the first instance, you will have experience of research using experimental techniques in the areas of surface science and solid state chemistry.

Salary: £14,317 - £21,519 per annum

For details please write to Personnel Division, 50 Park Place, Cardiff CF1 3AT or ring (01222) 874017, Email: Persad@Cardiff.ac.uk, quoting reference number 95/104.

Closing Date: 31st August 1995.

Excelling in Research and Teaching
Applications are invited for the post of Research Technician in the biological spectroscopy lab of the Crystallography Department. The successful candidate will take responsibility for operation and maintenance of the departmental CD and UV/VIS spectrophotometers and for teaching new investigators how to use the equipment. Experience in spectroscopic instrumentation is desirable but not essential. Some familiarity with computing (DOS, Mac, Vax systems) necessary. The postholder will also have the opportunity to participate in an ongoing research project in spectroscopy of proteins. This post is for a one year period starting as soon as possible. Salary in the range £12,133 to £13,331 (depending on the level of skills and experience) inclusive of £2,262 London allowance in Grade C for Technicians.

For details and application forms please send a large (A4) sae to the Personnel Officer, REF: T22NS, Birkbeck College, Malet Street, London WC1E 7HX. Closing date for receipt of completed applications: 21st August 1995.

Economy & Environment
Waste Regulation Unit

**Licensing and Enforcement Officer**
£13,197 - £17,667 (Scale 5/6/S01)
Based at Cockermouth.

The Council's Waste Regulation Unit is part of Economy & Environment. It operates from three locations throughout the County, regulating and monitoring the disposal of household, commercial and industrial wastes in accordance with the Control of Pollution Act 1974/Environmental Protection Act 1990 and associated legislation. Your duties will include the licensing and inspection of waste management/disposal facilities and operators, investigation into unlicensed activities, monitoring of landfill gas, sampling and extensive liaison with waste producers, carriers and site operators.

You should demonstrate a strong outgoing personality and be able to communicate effectively. A current clean driving licence is essential, and an essential car user allowance will be paid. A voluntary car lease scheme is in operation, or a car loan facility is available. Occasional early morning, evening and weekend work is required.

Working as part of a multi-disciplinary team, you should be qualified to degree level or equivalent in Chemistry, Geology, Civil Engineering, Environmental Science or other relevant discipline (with Chemistry studied to at least "A" level standard, or as part of a subsequent qualification). Industrial or waste disposal/regulation experience would be advantageous. Membership of the Institute of Wastes Management or other relevant professional body is preferred.

A bar operated within the salary scale, and progression beyond scale 6 onto SO1 is dependent on obtaining Corporate Membership of the Institute of Wastes Management or equivalent professional qualifications.

Application form and further details are available from Susan Kennedy, Economy & Environment, Cumbria County Council, Citadel Chambers, Carlisle CA3 8SG Telephone (01228) 812333.

Closing date 18 August 1995.

Cumbria

All applicants will be considered on the basis of suitability regardless of sex, race, marital status or disability.

DO NOT send Curriculum Vitae (CV) as only completed application forms will be considered.

Cumbria County Council
CLYDE RIVER PURIFICATION BOARD

TEMPORARY MARINE TECHNICAL ASSISTANT
(ECOTOXICOLOGY)
Salary range (Tech 4-5 - £15,438 - £19,284

The successful candidate will join a scientific team undertaking environmental assessments and providing advice on water quality matters throughout the Board's area.

The postholder will assist in the development and application of toxicity test and bioassay procedures for use in the biological assessment of effluents and receiving waters and sediments. The post will involve practical work; both in the laboratory and in the field, and also desk studies on various ecotoxicological matters.

Applicants must have a minimum of an HND or equivalent in biological or environmental science. Practical experience in conducting aquatic toxicity tests and bioassays will be an advantage.

This is a temporary post in the first instance with the possibility of extension following the creation of the Scottish Environmental Protection Agency in April 1996.

Letters of application, stating age, qualifications and experience together with the names and addresses of two referees should reach the Director, Clyde River Purification Board, Rivers House, Murray Road, East Kilbride, Glasgow G75 0LA by Friday 18th August 1995.

THE PAPUA NEW GUINEA UNIVERSITY OF TECHNOLOGY
Lae

Applications are invited from suitably qualified persons for these positions in the Department of Agriculture:

SENIOR LECTURER OR LECTURER IN AGRICULTURAL ECONOMICS

The Department provides agricultural education and training at undergraduate and postgraduate degree levels to Papua New Guineans and South Pacific Islanders. Our research priority is in the area of food crops and small animals. The staff of the Department have a multi-disciplinary team approach to teaching and research, and promote the concept of sustainable agricultural activity and the quality of the environment.

Candidates should have at least a Masters degree (preferably a Ph.D.) in Agricultural Extension/Agricultural Economics, plus experience in teaching and research in Agricultural Economics and Agricultural Extension at the tertiary level. Familiarity with the use of computer packages in teaching and research work would also be an advantage.

SENIOR LECTURER OR LECTURER IN CROP PESTS

Candidates should have at least a Masters degree (or preferably a Ph.D.) in the area of Crop Pests, plus experience in teaching and research in Agricultural Economics and Agricultural Extension at the tertiary level. The candidate will be expected to teach undergraduate and postgraduate courses in crop pests and weed science.

Experience in working with pests of tropical crops and a proven record of applied research is an advantage. The candidate is expected to become part of a multi-disciplinary team whose research priority is in the area of tropical food crops and the sustainability of agriculture in Papua New Guinea and the Pacific region.

Salary per annum: Senior Lecturer K38,517 - K40,476; Lecturer II K33,458 - K35,836; Lecturer I K30,212 - K32,393. (Level of appointment depends upon qualifications and experience). Initial contract period is normally for three years but shorter periods can be negotiated. Other benefits include a gratuity of 30% in the first year, 35% in the second year and 40% in the third year taxed at 35%; support for approved research; appointment and repatriation fares; leave fares for staff member and family after 18 months of service; settling-in and settling-out allowances; six weeks’ paid leave per year; education fares and assistance towards school fees; free housing, salary protection plan and medical benefit schemes are available. Staff members are also permitted to earn from consultancy up to 50% of earnings annually.

Detailed applications (two copies) with curriculum vitae, including certified copies of qualifications obtained, names, addresses and fax/phone numbers of three referees and an indication of the earliest availability to take up the appointment should be received by: The Registrar, PNG University of Technology, Private Mail Bag, LAE, Papua New Guinea by 25 August 1995. Applicants resident in the United Kingdom should also send one copy to the Appointments Department, Association of Commonwealth Universities, 36 Gordon Square, London WC1H 0PF (tel. 0171 387 8572 ext. 206; fax 0171 813 3055; email: appts.acu@ucl.ac.uk) from whom further information may be obtained.

PUBLIC HEALTH LABORATORY SERVICE BOARD
Communicable Disease Surveillance Centre (Welsh Unit)

Senior Scientist (Epidemiology)

A senior scientist is required to join a small energetic team of public health professionals based in Cardiff. Responsibilities will include the management and analysis of infectious disease data, assisting in the detection and control of outbreaks, and producing surveillance data for public health use in Wales.

Applicants should have a science degree, be experienced and confident in the use of micro computers and proficient in handling large databases (including the use of proprietary software and a working knowledge of basic statistics). A higher degree would be an advantage.

Grade: Clinical Scientist B11-13.
Salary Scale: £18,019 to £19,489.
Hours: Full-time.

National Health Service terms and conditions of service apply.

A job description and application form may be obtained from Mrs Maureen Cable, PHLS Communicable Disease Surveillance Centre, 61 Colindale Avenue, London NW9 5EQ. Telephone 0181200 6868, ext 4440.

Closing date: 17 August 1995.

The PHLS is an Equal Opportunities Employer
UNIVERSITY OF NEWCASTLE UPON TYNE
Department of Pathology and Medicine

POSTDOCTORAL RESEARCH ASSOCIATE

We are looking for a research scientist to join a group investigating alkylation DNA damage and repair in human carcinogenesis. This post would ideally suit a recent Ph.D. both with an interest in this area and training in both recombinant protein expression/purification and antibody production and utilisation. Antibodies will be used for (i) the development of ultra sensitive immunodetection of DNA damage in tissues by immuno-PCR and (ii) immunolocalisation of DNA repair enzymes in tissues using confocal scanning laser microscopy. This post is to be held jointly between the Departments of Pathology and Medicine (graded 4 in HEFC research assessment exercise).

The post is available immediately for a period of two years. Starting salary up to £16,628 on the RA1A scale, depending upon qualifications and experience.

Informal enquiries to either Dr A. D. Burt (0191 232 5131, exts 24445/464) or Dr G. N. Major (0191 222 6000, exts 8123/9). Applications, including a full curriculum vitae, covering letter and the names and addresses of two referees should be sent to Dr G. N. Major, Medical Molecular Biology Group, Department of Medicine, the Medical School, Framlington Place, Newcastle upon Tyne NE2 4HH.

Closing date: 24 August 1995. Please quote Ref: 2579.

Committed to equal opportunities.

Dedicated to excellence in teaching and research
RESEARCH FELLOW

Applications are invited for this post in the newly formed multi-disciplinary Polymer Research Centre based in the Department of Chemistry. The post is available from 1 October 1995 for two years in the first instance and will involve research on a variety of polymer science and technology projects, many of which are industrially linked or funded. Applicants should have a Ph.D. or a good first degree and research experience in a relevant discipline. Salary will be on the RA1A salary scales up to £15,986 per annum.

Applications in the form of a curriculum vitae and covering letter (2 copies) including the names and addresses of two research referees should be sent to the Personnel Office (sab), University of Surrey, Guildford GU2 5XH, by 25 August 1995, quoting reference 389. Informal enquiries may be made to Dr G C Stevens Tel: 01483 259599, Fax: 01483 259514.

The University is committed to an Equal Opportunities policy.

Promoting excellence in education and research.

DEPARTMENT OF BIOLOGY
THE JACK BIRCH UNIT FOR ENVIRONMENTAL CARCINOGENESIS

RESEARCH TECHNICIAN Ref: 95/B13

We require a research technician to assist a small team investigating a novel method for detecting DNA damage. The work will involve analysis of damaged DNA from a variety of sources, using polyacrylamide gel electrophoresis method and a novel ELISA method, treatment of cells in culture with various carcinogens, purification of DNA, and immunoaffinity concentration of damaged DNA.

The post, which is full-time and for one year, may suit a recently qualified graduate, but training will be given. Candidates should have at least a BTEC certificate in Biology or equivalent qualification and more than 3 years relevant experience.

Salary within the range: £9,871 - £11,069 per annum (currently under review).

For an application form please write on a postcard to the Personnel Office, University of York, Heslington, YORK YO1 5DD. Please quote the reference number. The closing date for applications is Thursday 17th August 1995.

PROMOTING EXCELLENCE IN TEACHING AND RESEARCH.

THE UNIVERSITY of York
Two Post-Doctoral Research Assistants

These posts will be available in the group from 1 October 1995. The first will support the scientific exploitation of the magnetic field measurements to be made on the European Space Agency's four-spacecraft Cluster mission. The second post will support research in planetary magnetospheres. The group is participating in the Ulysses, Galileo, Mars 96 and Cassini missions.

Familiarity with space plasma physics and data analysis techniques would be a significant advantage in both posts. Appointments will be made, in the first instance, for one year, at a salary of £16,451 (which includes London Allowance of £2,134). Appointments at higher salary levels may be considered, depending on age and experience. Further funding for both posts is already assured.

Please send your application, CV and the names of two referees, before 31 August 1995 to: Professor S.W.H. Cowley, The Blackett Laboratory, Imperial College, Prince Consort Road, London SW7 2BZ.

The College is striving towards equal opportunities At the leading edge of research, innovation and learning

BASC
THE BRITISH ASSOCIATION FOR SHOOTING AND CONSERVATION

SENIOR CONSERVATION OFFICER

The post of Senior Conservation Officer involves working as part of a dedicated team, developing and promoting the integration of shooting and wildlife conservation on a wide range of habitats throughout the UK.

There will be particular responsibility for maintaining BASC’s role in mainstream conservation programmes at regional and local level, working on topical conservation issues and communicating these to members, other organisations, politicians and the press.

The successful applicant will have an appropriate biological degree with proven experience in the above areas. Salary dependent on qualifications and experience.

Further details and application form from: Director of Administration, BASC, Marford Mill, Rossett, Wrexham, Clwyd LL12 0HL. Tel: 01244 570881. Closing date for applications 25th August 1995.

Applications are invited for a new post in the field of functional programming systems, funded by an EPSRC research grant. The aim is to develop and implement novel methods for tracing lazy functional computations.

The successful applicant will have a Ph.D. (or equivalent research experience) in Computer Science. They will be an experienced functional programmer who has a proven ability to work in the field of programming language implementation. Research experience in compiled graph reduction and/or computational tracing would be a distinct advantage.

The job requires a high degree of self-motivation and the ability to pursue research goals with initiative. The person appointed should also enjoy being part of a team working on different aspects of novel programming languages and systems, taking an active interest in other lines of work.

Informal enquiries should be directed to the grant-holder and research supervisor, Dr Colin Runciman (e-mail: colin@minster.york.ac.uk or telephone 01904 432740).

The appointment will be for 18 months. It will be available from 1 October 1995, and the starting salary will be in the range: £14,317 - £15,986 per annum.

For further information and details of how to apply, please write to the Personnel Office, University of York, Heslington, YORK YO1 5DD, quoting reference number 2/6599. The closing date for applications is Friday, 25th August 1995.
RESEARCH SCIENTIST

£15,000 p.a.
18 Month Fixed Term Appointment

The Natural History Museum invites applications for a Research Scientist to investigate the cathodoluminescence properties of minerals which will contribute to research on carbonatites, alkaline rocks, meteorites and ore minerals.

You should have a BSc in a physical science (including Earth Sciences) and have knowledge of mineralogy and petrology or spectroscopy. A Ph.D. would be desirable. Some practical experience with scientific instrumentation is essential as is the ability to write scientific papers and give technical lectures. Experience of microbeam techniques and the application of spectroscopy to mineralogy would be an advantage.

For further details please send an A5 S.A.E. to: Clare Atkins, Personnel Section, The Natural History Museum, Cromwell Road, London SW7 5BD. Application is by CV and covering letter including the names of two referees.

Closing date for receipt of CVs is Friday 1 September, 1995.

The Natural History Museum is working towards Equal Opportunities.

THE NATURAL HISTORY MUSEUM
ICLARM
INTERNATIONAL CENTER FOR LIVING AQUATIC RESOURCES MANAGEMENT

A member of the Consultative Group on International Agricultural Research (CGIAR), ICLARM is an international non-government, non-profit organisation conducting research on aquaculture and fisheries resources management in developing countries. The Center requires highly competent and motivated individuals to fill the following positions:

SENIOR SOCIAL SCIENTIST

The Senior Social Scientist will be expected to lead social science research at ICLARM, ensuring multi-disciplinary collaboration both internally and externally. She/he will develop and undertake social science research in priority aspects of fisheries and aquaculture in developing countries. She/he will also oversee the conduct of ICLARM studies on the impacts of its research and collaborate with CGIAR, NARS and ASI partner institutions in developing and developed countries, to deliver the most effective social science.

The person we require must hold a Ph.D. in economics, sociology, or anthropology and have at least ten (10) years research experience with an established track record. Experience in research in the developing world will definitely be an advantage. She/he must be able to demonstrate the ability to work in collaboration with other researchers and must possess high-level research management skills.

INTERNATIONAL RELATIONS COORDINATOR

The International Relations Coordinator will be responsible for promoting productive and mutually beneficial linkages between ICLARM and its institutional partners in national research systems (NARS), advanced scientific institutes, other CGIAR centers, government organisations and NGOs. She/he will manage the coordination of international projects and networks supported by ICLARM. She/he will also help establish ICLARM's strategic directions in research and related external partnerships and advise the Director General and other Board of Trustees on priorities and initiatives to enhance ICLARM's partnership arrangements. She/he will be expected to maintain an ICLARM register of key NARS and other partners and act as a focal point within ICLARM for international liaison activities.

The person we require must hold a Ph.D. with proven track record in research obtained from a range of developing countries. She/he must have demonstrated the ability to work with a diverse range of organisations and individuals in developing and developed world institutions as seen from her/his previous experiences. She/he must also possess excellent written and oral communications skills in English. Fluency in one or more additional major languages would be advantageous.

PROJECT LEADER, INTEGRATED RESOURCES MANAGEMENT PROJECT

The Project Leader will be responsible for the management of this research project which examines, through participatory research procedures, methods to improve the manner in which farmers manage their land and water resources through the integration of agriculture and aquaculture. The project also plans to develop participatory research procedures as well as an analytical framework for monitoring the impact of integration on rural households. She/he will also coordinate with other projects on the verification of research procedures and methodologies.

The person we are looking for must hold a Ph.D. in the social or biological sciences or in farming systems with significant field experience in managing relevant research projects in a developing country setting. She/he must be able to demonstrate the ability to work in collaboration with other researchers and must possess strong scientific leadership and management skills.

Duty Station: All the above positions will be based at ICLARM Headquarters in Manila, Philippines.
Remuneration: ICLARM offers internationally competitive conditions of service. All cash benefits will be paid in US dollars.

ICLARM is an equal opportunity employer and welcomes all applications regardless of gender, nationality, ethnic origin, religious persuasion or political beliefs. Applications from women are especially encouraged.

Applicants should send current curriculum vitae, photocopies of supporting documents and names of three professional referees (including telephone, fax and telex numbers, if available) before September 15, 1995 in confidence to: The Human Resource Manager, ICLARM, MCPO Box 2631, 0718 Makati City, Philippines. Telefax +63-2 816-3183 and E-mail (CGNET) iclarm@cgnet.com [1989-079 (1995) : 77]
Development Chemist / Biochemist

Oxoid

Unipath Limited, a Unilever company, is a leading manufacturer of diagnostic products for the healthcare market. Our "Clearblue One Step" pregnancy test is the world leader and our "Oxoid" brand of culture media is sold to hospitals and laboratories in over 100 countries.

We have a vacancy at our Basingstoke site for a Development Chemist/Biochemist who will be predominantly involved in ongoing product development of our culture media product range.

Applicants with an understanding of enzyme and protein systems as well as analytical techniques (HPLC) should also possess good communication skills and the ability to function effectively in a multi-disciplinary environment.

The position will suit a recently qualified graduate who will be given full training. In addition to an attractive salary, other benefits offered by the Company include an excellent pension scheme, 25 days holiday per year and private medical insurance.

If you are interested, please call Val Osborne, Personnel Officer for an application form on Basingstoke (01256) 841144.

UNIPATH

NS12614
LABORATORY SCIENTIFIC OFFICER (GRADE 2)
UMDS
GUY’S AND ST THOMAS’S MEDICAL AND DENTAL SCHOOL
(University of London)

Surgery, Guy's Campus

Required for a British Heart Foundation funded study, investigating the early cellular and molecular changes that precede venous thrombosis in man. The work is directed at finding more specific targets for the prevention of venous thrombosis. Substantial experience in histology and immunohistochemistry are essential. A working knowledge of immunoassay, flow cytometry and situ hybridisation would be desirable, but training is available.

Salary in the range of £16,291 pa inclusive and is dependent on experience.

Interested candidates may discuss the position informally by telephoning Dr A Smith on 0171-928 9292 ext 2314/2424 or Mr D Eastham (CMLSO) on ext 2338.

To obtain a job description which details the application procedure, call 0171 922 8049 (24 hours) and quote reference STH/SURG/501.

Closing date is 23 August 1995.

Equality of Opportunity is School Policy
Analytical Chemist
Agricultural and Environmental Services

An exciting opportunity has been created for a suitably qualified and experienced Chemist to join an expanding Analytical Laboratory. Cotswold Analytical Services has been established for 18 years as a laboratory serving the Agricultural and Environmental industry. Following its recent acquisition by a dynamic Agricultural Business Group, substantial investment is being made in new premises, equipment and I.T. Applicants must have operating experience of AAS and ICP-AES equipment, preferably to NAMAS standards, and be prepared to undertake routine analysis work. The laboratory is located in new premises in a pleasant rural location near Ross-on-Wye, Herefordshire. Salary negotiable according to experience.

Please apply in writing, with full CV, to Sarah Whittal, Cotswold Analytical Services, Phoele Green, Ross-on-Wye, Herefordshire HR9 7XU. Fax: 01989 780577.

ICLARM INTERNATIONAL CENTER FOR LIVING AQUATIC RESOURCES MANAGEMENT

A member of the Consultative Group on International Agricultural Research (CGIAR), ICLARM is an international non-government, non-profit organisation conducting research on aquaculture and fisheries resources management in developing countries. The Center requires highly competent and motivated individuals to fill the following positions and expected vacancies for its Bangladesh Office:

OFFICER-IN-CHARGE, ICLARM BANGLADESH OFFICE/ SENIOR AQUACULTURE SPECIALIST
(Expected Vacancy)

The Officer-in-Charge will manage ICLARM's Bangladesh Office, including liaising between ICLARM's Head Office and various Bangladesh agencies, as well as overseeing administrative and management support to various ICLARM projects in Bangladesh. She/he will implement a collaborative inland aquaculture research program with the Fisheries Research Institute of Bangladesh and other agencies. She/he will likewise assist in the preparation of research plans and methodologies and implementation of research programs to assist the development of integrated agriculture-aquaculture farming systems in line with ICLARM's approved Medium-Term Plan of work.

The person we are looking for must hold a Ph.D. in a biological science (eg; aquaculture, fisheries, etc) with a proven track record in research and research management. She/he must have had significant experience in working with developing country research institutions. Administrative and communication skills are required.

SOCIAL SCIENTIST

The Social Scientist will be primarily responsible to the Officer-in-Charge, ICLARM's Bangladesh Office and maintain professional liaison with related social science research programs in ICLARM through the Senior Scientist and the Project Leader, Fisheries Co-Management Project. She/he will implement research projects concerned with socio-economic aspects of the uptake of small-scale aquaculture enterprises and with the co-management of open water fisheries. She/he will also handle the maintenance of well-informed and productive working relationships with relevant national agencies (government organisations and non-government organisations).

The person we are looking for must hold a Ph.D. in economics, sociology, anthropology or other appropriate social science discipline. She/he must have a proven track record in research. Field experience in developing countries (especially South Asia) will definitely be an advantage. She/he must be able to manage project resources (financial, human and capital) with minimal supervision and must possess strong oral and written communication skills.

Remuneration: ICLARM offers internationally competitive conditions of service. All cash benefits will be paid in US dollars.

ICLARM is an equal opportunity employer and welcomes all applications regardless of gender, nationality, ethnic origin, religious persuasion or political beliefs. Applications from women are especially encouraged.

Applicants should send current curriculum vitae, photocopies of supporting documents and names of three professional referees (including telephone, fax and telex numbers, if available) before August 31, 1995 in confidence to: The Human Resource Manager, ICLARM, MCPO Box 2631, 0718 Makati City, Philippines. Telefax +63-2 816-3183 and E-mail (CGNET) iclarm@cgnet.com
Sultan Qaboos University – Sultanate of Oman
College of Medicine

Sultan Qaboos University, the National University of the Sultanate of Oman, invites applications for an active

Scientist/Clinician
for its Surgery Department, College of Medicine, to join a dynamic team involved in clinical service, research and development and teaching.

Current laboratory facilities include well equipped transplant immunology laboratories (supporting a renal transplant and bone marrow transplant programme) and immunochemistry (protein chemistry) laboratories. The department also has access to excellent small animal facilities.

Research interests include immunogenetics and disease, biological monitoring or immunosuppression, neutrophil function, the immunological consequences of splenectomy, organ preservation, cytokines and growth factors, recurrent spontaneous abortion, gastric cancer etc.

Applicants should be medically qualified and have a postgraduate qualification - Ph.D., MRCPath, etc, and have active research interests, teaching experience and significant publications in referred journals. An interest in molecular immunology would be an advantage. The position ideally combines laboratory work with clinical commitments.

The appointment level in the University Faculty will depend upon qualification and past experience and may be at lecturer, assistant or associate professor levels or their equivalent.

Apart from a very attractive tax free base salary, the University offers free furnished accommodation, two years renewable employment contract with end of service gratuity, annual leave with return air tickets, free medical treatment in Government Hospitals. There is no tax in the Sultanate.

Interested candidates are requested to submit their full CV, along with copies of academic and experience certificates, quoting our Ref ADV/MED/05/95, to:
The Director, Personnel Affairs Sultan Qaboos University PO Box 50, Al-Khod -123 Sultanate of Oman

UNIVERSITY OF PLYMOUTH
a leading centre for teaching & research

RESEARCH ASSISTANT/FELLOW
Coastal Engineering £13,470 to £17,718 pa

This post is for up to 2 years in the first instance, and is based in the School of Civil and Structural Engineering, within the Faculty of Technology. The School's coastal research team is currently making a significant contribution to a nationally coordinated research programme concerning coastal engineering. Projects include major field studies, numerical modelling and using the Coastal Research Facility at H R Wallingford. This post is attached to an EPSRC funded project concerning analytical and field studies of wave transformation and attenuation processes around rock island breakwaters, which will extend work on current field projects and contribute to the CRF study.

Applications are invited from candidates with or expecting to obtain a Ph.D. or MSc in an appropriate branch of engineering, physical science or mathematics with an interest in both field work and analysis of wave data.

You will be encouraged to register for a Ph.D., if appropriate, and some part-time teaching may be available.

For further details and an application form call 01752 232168 or write (quoting post reference 1622/TECH and title) to:
The Personnel Department, University of Plymouth, Drake Circus, Plymouth PL4 8AA.

Closing date: Friday 8 September 1995.

UNIVERSITY OF PLYMOUTH POSTGRADUATE MEDICAL SCHOOL / ENVIRONMENTAL RESEARCH CENTRE (Dr A Demaine, Professor M H Depledge, Dr J Braven)

Ph.D. STUDENTSHIP
Characterisation of Cellular Damage using Invertebrate and Vertebrate Model Systems

Applications are invited from graduates with a good background in cellular metabolism, biochemistry or environmental toxicology for the above Ph.D. Studentship. The project will investigate models of tissue damage and mechanisms to combat oxidative stress in-vivo and in-vitro. Informal enquiries should be made to Dr Demaine on 01752 232965.

Applications in the form of a full CV should be sent to Mrs M Martin, Finance Department, University of Plymouth, Drake Circus, Plymouth PL4 8AA. Tel: 01752 232122.

Closing date: Thursday 31 August 1995.

FUNDAMENTAL STUDIES OF INTERFENCES IN INDUCTIVELY COUPLED PLASMA MASS SPECTROMETRY

EPSRC CASE QUOTA Ph.D. STUDENTSHIP
Dr Hywel Evans and Prof Les Ebdon, University of Plymouth & Fisons Instruments Elemental Analysis

This three year studentship, available within the Analytical Chemistry Research Unit, University of Plymouth, from 1 October 1995, is open to students who hold a first or upper second class degree with Chemistry or Physics as the sole or major component. The project will focus on the origin of molecular ions in high temperature plasmas and gases extracted from them, and the design of the ion sampling interface for ICP-MS.
For further details please contact Prof L Ebdon on 01752 232002, to whom full CV's should be sent.

Closing date: Friday 18 August 1995.

Promoting equal opportunities
The Sanger Centre

PHYSICAL MAPPING AND SEQUENCE ANALYSIS OF THE HUMAN GENOME

Fluorescence In Situ Hybridisation, Gene Mapping, Physical Mapping, DNA Sequencing

The Sanger Centre is a research organisation jointly funded by The Wellcome Trust and The Medical Research Council to provide a major focus in the UK for mapping and sequencing the human genome and genomes of other organisms.

We are currently expanding teams working on the mapping and sequencing of the human genome as part of our continuing programme of research.

Applications are invited for Research Assistants (BSc or equivalent degree) and Research Technicians to work on the following projects:

TRANSCRIPT MAPPING - REF TM 1

To construct a transcript map of the genome by radiation hybrid mapping as part of an international consortium. This work involves large scale PCR analysis, typing by gel electrophoresis, and computer analysis.

GENE ISOLATION - REF GI2

To evaluate the use of CpG islands and expressed sequence tags (ESTs) to characterise genes on specific chromosomes, involving mapping and isolation of full length cDNAs by both PCR and hybridisation.

CLONE RESOURCES AND DEVELOPMENT - REF CRD3

To assist with the routine management and screening of genomic and cDNA libraries to support ongoing mapping projects.

PHYSICAL MAPPING - REF PM4

To construct high resolution maps using overlapping Yeast Artificial Chromosomes and bacterial clones for sequence analysis and gene identification on chromosomes X, 6 and 20.

FLUORESCENT IN SITU HYBRIDISATION - REF FISH6

To use fluorescent in situ hybridisation and digital imaging techniques for the direct mapping and ordering of clones. This appointment will be made at the level of Research Assistant and candidates should have previous experience with FISH.

SEQUENCING - REF SEQ7

To undertake final assembly of sequence data generated through the large scale sequencing of human chromosomes using computing and biochemical techniques.

Please send your curriculum vitae including the names and addresses of two referees, quoting the Reference of the project you are applying for to:
Mrs Mary Morgan, The Sanger Centre, Hinxton Hall, Hinxton, Cambridge, CB10 1RQ. Closing date is 31 August 1995.
CONSUMER AND ENVIRONMENTAL SERVICES

Strategic Pollution Officer
£22,509 - £23,390
The sky's the limit

Hounslow is a varied, interesting Borough which adjoins Heathrow - the world's busiest airport. This is a challenging, influential role for a highly motivated and resourceful environmental scientist with a genuine interest in pollution arising from airport activity. Reporting to the Environment Manager, you will lead our response on pollution and environmental matters specifically relating to airport and aircraft issues such as noise, development and night flights. You will also design and co-ordinate general pollution monitoring surveys and contribute to developing effective policies and strategies. You will need:

• a proven track record of achievement in pollution control;
• a full knowledge of background issues as well as government and airport operators' future proposals;
• experience of environmental assessment, working in a multidisciplinary project team and giving evidence at public enquiries;
• excellent communication and organisational skills;
• enthusiasm and flexibility.

We offer an outstanding benefits package which includes essential user car allowance or loan and flexible hours. Your real reward, however, will be helping to improve the quality of life for our residents.

For details (no CVs please) telephone 0181 862 5624 (24 hour answer service) quoting reference CE/31/01. Consumer and Environmental Services Department, Personnel Section, 26 Glenhurst Road, Brentford, Middlesex TW8 9BX. Closing date: 25th August 1995.

Job sharers welcome.

We operate a no smoking policy

Hounslow
An Equal Opportunity Employer
T.R. Oil Services Ltd is a leading company in the supply and service of speciality chemicals to the oil industry. In order to improve our technical capabilities we are seeking chemists with experience in either an academic or industrial environment for the following positions:

1. A Development Chemist to work in our mineral scale control group. This work involves studying the effects of polymeric or phosphonate based scale inhibitors on oilfield waters. Candidates should be degree qualified, competent in analytical or polymer chemistry and preferably have experience of scaling mechanisms or inhibitor chemistry.

2. A Development Chemist to be part of a team working on corrosion inhibitors for oil-field applications and novel applications for surface active chemicals. Candidates should have a strong background in physical or electrochemistry.

Both positions are based in our laboratory facility in Aberdeen. There are good possibilities for personal development and enhancement within the company which has active marketing groups within the UK and many international locations.

We offer a comprehensive compensation package with competitive salaries within our industry which will reflect age, ability and experience. Relocation allowances are also available.

Candidates should reply in writing to Kay Searle, T.R. Oil Services, Howe Moss Place, Aberdeen AB2 0GL.

TR OIL SERVICES
TROS
T.R. Oil Services is a wholly owned subsidiary of Hoechst (UK) Ltd.
DEPARTMENT OF HAEMATOLOGY
MLSO 1
THE ROYAL FREE HAMPSTEAD NHS TRUST
Salary: £12,404 to £15,692 pa inclusive

THE ROYAL FREE HAMPSTEAD NHS TRUST

The Royal Free Hospital is situated close to Hampstead Heath, and is one of the most successful Trusts in London. We are well served by public transport links and there is an excellent sports and social club available to staff.

The Department of Haematology at the Royal Free Hospital is one of the largest and most active in the UK. It offers a very wide range of services and has a particular interest in Leukaemia. It also provides Haematological support for many specialist groups working in the Hospital. This post offers the suitable applicant the opportunity to broaden his/her experience in Laboratory Haematology.

Applicants for this post will need to be State Registered in Haematology.

The post is rotational which involves working in all areas of Haematology including the Diagnostic, Specials and Blood Transfusion Laboratories. Applicants for this post will, if suitable, be expected to participate in a busy after hours on-call service.

For informal enquiries please contact Mr Parsonson on 0171 794 0500 ext 3417.

Application packages are available from the Human Resources Department, Lower Ground Floor, Royal Free Hospital, Pond Street, Hampstead, London NW3 2QG. Tel: 0171 830 2064. Please quote Ref: 19859.

Closing date: 17th August 1995

Committed to Equal Opportunities
The University Hospital of Wales Healthcare NHS Trust was established on 1st April 1995 and is one of the largest Trusts in the United Kingdom. We have established a reputation as a teaching centre of excellence in many specialist areas.

The Trust wishes to appoint a cytogeneticist to join the Cytogenetic Service for Leukaemia and Oncology. You will participate in the provision of a comprehensive cytogenetic and molecular cytogenetic service for haematology and oncology patients in South Wales, as well as contributing towards research activities for the future development of the service.

You must have a first or second class honours degree in an appropriate science and experience in clinical cytogenetics.

The Trust is based in and around the busy city of Cardiff, the capital of Wales. A rich and varied lifestyle is complemented by excellent communication links and attractive housing prices in the area.

We would welcome visits or informal discussions. Please contact Dr Denise White on 01222 742372.

For an application form and job description please contact Personnel Department, Clinical Support Services Group, Lansdowne Hospital, Sanatorium Road, Canton, Cardiff CF1 8UL, tel. 01222 372335 ext 2971.

Closing date: 18th August 1995.

UNIVERSITY HOSPITAL OF WALES HEALTHCARE NHS TRUST

DEPARTMENT OF CHEMISTRY

Postdoctoral Fellowship in Chemistry

Applications are invited for a Postdoctoral Fellowship to work on the development of "Clean Processes in Chemistry" in collaboration with Professor Martyn Poliakoff and colleagues. This project is sponsored by Thomas Swan & Co Ltd, an innovative chemical manufacturing company based in Consett, Co Durham. The aim is to develop new chemical processes, which avoid the use of toxic solvents by exploiting the properties of environmentally acceptable supercritical fluids.

The project combines aspects of Organic Chemistry, Catalysis and Inorganic Chemistry. Candidates should have a strong background in at least one of these areas and a desire to broaden their experience. The project will be based at Nottingham, but will involve working part of the time in Consett. Candidates must be available to start work at the latest in October 1995.

Salary will be within Research Assistant Grade 1A £14,317 - £21,519 pa.

Informal enquiries may be addressed to Professor M Poliakoff, tel: 0115 951 3520. Email: Martyn.poliakoff@nottingham.ac.uk

Applicants should send a detailed CV, together with the names of two referees, to Professor Poliakoff, Department of Chemistry, The University of Nottingham, University Park, Nottingham NG7 2RD. Closing date: 1 September 1995.

DEPARTMENT OF LIFE SCIENCE

Ph.D. Studentship in Microbiology

Microbial Utilisation of Wastes for the Production of Novel Enzymes and Biologically Active Metabolites

Applications are invited from suitably qualified candidates for a Ph.D. Studentship to take part in an international project on the "Biotechnological Approaches to the Total Use of Crustacean Shellfish and Shellfish Waste" funded by an EC Grant. Candidates should have a degree in Microbiology or Biological Sciences.

Applicants should send a detailed CV, together with the names of two referees, to Miss K Lyon, Department of Life Science, The University of Nottingham, University Park, Nottingham NG7 2RD. Closing date: 21 August 1995.

The University of Nottingham is a research-led institution which provides the highest quality learning environment and is committed to equal opportunities in employment.

The University of Nottingham
DE MONTFORT UNIVERSITY
School of Applied Science

EPSRC CASE Award Studentship
Dielectric Investigations into the Freeze-Drying of Pharmaceuticals

Applications are invited from graduates in either chemistry, physics, engineering, material science or pharmaceutical science for a three-year project, in collaboration with Smithkline Beecham.

Recently qualified in a relevant area should write, enclosing a curriculum vitae, to Dr G. Smith, Senior Lecturer, School of Applied Science, De Montfort University, The Gateway, Leicester LE1 9BH. Further details supplied on request, telephone 0116 255 1551, ext 8298, fax 0116 257 7135.

Closing date for applications: Thursday 10 August 1995.
The Authority is dedicated to the protection of the environment and community by encouraging environmentally sound waste management practice through effective regulation, promotion of awareness among members of the community and liaison with other regulatory bodies.

Greater Manchester Waste Regulation Authority

GMWRA is a high profile Regulation Authority covering a large conurbation of ten Metropolitan districts with a significant industrial, commercial and population base.

Following a major establishment review, the GMWRA is undertaking a phased recruitment of technical and professional staff in the run-up to the creation of the new Environment Agency. Most of the posts will be based in central Manchester and the Authority operates a career grade structure within its Scientific Support and Operations Division which offers a good opportunity for career development.

SENIOR WASTE REGULATION AND SCIENTIFIC OFFICERS
Salary range: £16,575 to £20,181 per annum (SCP 29 to SCP 36)

You will have a degree or equivalent in either environmental sciences, biology, chemistry, geology, hydrogeology, civil / geotechnical / chemical engineering or other relevant scientific subject. A minimum of two years’ Waste Regulation, Waste Management or other relevant experience is required for these senior positions, along with a firm commitment to regulation and an understanding of the issues facing the Authority in the period leading up to and into the Environment Agency. You will have to demonstrate your skills as an effective negotiator and show a high degree of technical competence (including competence to perform the duties of an Appointed Inspector under section 69-70 of the EPA 1990). You will have the strength of character which will enable you to perform in potentially confrontational situations. A history of successful task or project management is important, while experience of staff training and supervision would be advantageous. A full driving licence is required.

WASTE REGULATION AND SCIENTIFIC OFFICERS
Salary range: £9,906 to £15,942 per annum (SCP 10/11 to SCP 28)

A qualification in either environmental sciences, biology, chemistry, geology, hydrogeology, civil / geotechnical / chemical engineering or a related scientific subject is required, and the minimum entry level qualification is GCSE. Experience in Waste Management, Waste Regulation or other relevant experience would be an advantage. You must be able to demonstrate an understanding of environmental issues, particularly those relating to Part 2 of the Environmental Protection Act 1990, and will have a commitment to regulation, along with the necessary self-confidence to carry out a regulatory role. Entry level into the Career Grade Pool will be dependent upon qualification, experience and technical competence. A full driving licence is required.

GMWRA operates a 'no smoking' policy.

For an information package and application form, please write to Cath Johnson/Annelle Bernsmeier, GMWRA, 6th Floor, Blackfriars House, Parsonage, Manchester M3 2JA, or telephone 0161 829 7927. The closing date for applications for this phase of recruitment is 28 August 1995, but earlier applications would be welcome.

GREATER MANCHESTER WASTE REGULATION AUTHORITY
THE MIDDLESEX HOSPITAL
Vascular Laboratory, London W1

LIFE SCIENCE GRADUATE

This busy vascular department is looking for a Life Science Graduate who wishes to gain experience in the field of Vascular Technology. Complete training will be given in noninvasive vascular investigations used in the diagnosis of venous and arterial disease.

The laboratory is active in research, and provides investigations, for a wide range of clinical and medico-legal problems offering opportunities to further interests in a variety of projects.

Attractive remuneration will be offered commensurate with experience. Additional benefits include private health insurance.

For informal visits and enquiries please contact Miss Kate Sommerville, Senior Vascular Technologist, on 0171-638 8333, ext 4022.

Copy of curriculum vitae and covering letter to Mr Philip Coleridge Smith, Director of Vascular Laboratory, Department of Surgery, Jules Thorn Building, Middlesex Hospital, Mortimer Street, London W1N 8AA.

Closing date for applications 31 August 1995
Duncan of Jordanstone College
a faculty of the University of Dundee

School of Food and Accommodation Management

**Research Professor in Food Choice**
Salary commences at £31,999 per annum

This is a new post created to augment and further develop the research profile of the School where the strategy is to consolidate research areas where there is already staff activity and output. The School also has a broad interest in this field which links with its two honours programmes - MA in Food & Welfare Studies & MA in Hotel & Catering Management.

The person appointed will be responsible for working with research active staff to focus efforts for the Research Assessment Exercise in 2000. Ideally, the appointee will be a specialist in nutrition, health science or psychology but will have an appreciation of the wider social and ethical issues which influence food choice and intake. The appointee must be an active researcher with a record of high quality published output and proven success in the attraction of external funding.

CV (10 copies), or one copy if posted from abroad, complete with the names and addresses of three referees, should be sent to:
Personnel Services
Duncan of Jordanstone College 13 Perth Road
Dundee DD1 4HT
Tel: (01382) 345350 Fax: (01382) 227304

Further particulars are available for this post. Please quote reference RPFC95.

Closing Date: 25 August 1995

The University exists to promote higher education and research and is an equal opportunities employer.
THE UNIVERSITY OF BIRMINGHAM
Institute for Cancer Studies

**Laboratory Research Officer**

To join a team investigating the phospholipid signal transduction pathways in human breast cancer in relation to tumour invasion, metastasis and drug resistance. The techniques to be used will include tissue culture, cell and tissue extract preparation, electrophoresis, Western blotting, lipid analysis and phospholipase assays. Previous lab experience is essential, and a degree in biological/medical sciences desirable.

Starting salary £14,317 per annum.

Informal enquiries to Dr P. de Takats/Dr A. Martin, telephone 0121 414 3292.

The post is available from September 1995 and is for two years initially.

Application forms (returnable by 18 August 1995) and further particulars available from the Director of Staffing Services, The University of Birmingham, Edgbaston, Birmingham B15 2TT, telephone 0121 414 6483 (24 hours), email: **STAFFING@BHAM.AC.UK**, quoting reference M12887/95.

Working towards Equal Opportunities

The University is an exempt Charity which exists to advance learning to the highest level for the benefit of its students and society at large

UNIVERSITY OF BATH
School of Biology & Biochemistry

RESEARCH TECHNICIAN

Applications are invited for a post for up to two years in a large multidisciplinary team working on fungal pathogens of insects. The successful applicant will work on the molecular biology and biochemistry of cyclic peptide toxins. Applicants should possess a degree or equivalent qualification in an appropriate subject and ideally have some relevant practical experience.

Salary will be on the scale £9,871 - £11,069 per annum.

Closing date: 17 August 1995.

Application forms and further particulars are available from the Personnel Department, University of Bath, Claverton Down, Bath BA2 7AY or phone (01225) 826096 quoting reference 95/165.

Working towards Equal Opportunities

Department of Chemistry

Postdoctoral Research Fellowship in Electrochemical AFM/STM

Applications are invited for this post to work with Professor P. N. Bartlett on in situ electrochemical STM and AFM studies of conducting crystalline organic salts. Experience in surface electrochemistry and/or scanning probe techniques is essential. The appointment will be for one year in the first instance, renewable for a further two years, and is available from October 1995. Salary will be on Research Grade 1A (£14,317 to £19,848 per annum).

Application forms can be obtained from the Personnel Department (E), University of Southampton, Highfield, Southampton SO17 1BJ, tel 01703 592750, and should be returned no later than 14 August 1995. Please quote ref no: E/556.

Working for Equal Opportunities

University of Southampton
University of Southampton Highfield
Southampton SO17 1BJ

A centre of excellence for university research and teaching
BioCure Ltd

HEAD OF BIOCHEMISTRY LABORATORY

The position of Head of Biochemistry has recently arisen with the company and will provide a challenging and rewarding career with a small but active Biotechnology Company involved in the development of glycopharmaceuticals derived from naturally occurring compounds. You will be responsible for all biochemical techniques currently in line in the areas of wound healing, inflammation and cancer, these including, protein separation techniques, HPLC of carbohydrate derived molecules, use of ELISA techniques in the identification of cell-surface markers. You will be responsible for developing new methodologies related to cellular signalling and specifically to direct research in mRNA fingerprinting. You will also be expected to liaise with clinical colleagues and organise work programmes in association with the Departmental Heads and Research Directors.

You should possess an honours degree in a suitable scientific discipline from a UK University of equivalent. In addition you should have a higher degree (Ph.D. desirable) and at least three years post-doctoral experience preferably in cellular signalling/ receptor biochemistry and have some experience in rPCR techniques.

Salary is negotiable and a company pension scheme is in operation.

Further information can be obtained from:
Dr R. H. Hardie, Chief Executive, Biocure Limited, Balgownie Technology Centre, Campus Three, Aberdeen Science & Technology Park, Balgownie Drive, Bridge of Don, Aberdeen AB22 8GW. Tel: 01224 703649.
LECTURER IN PLANT BIOCHEMISTRY AND PHYSIOLOGY
£12,756 - £21,264
(Pay Award Pending)

Based within the Department of Applied Biology this is a fixed term post from 1 October, 1995 to 30 June, 1996 due to secondment and involves the teaching, tutorial guidance and assessment of students within a range of Honours degree programmes.

Educated to degree level in a relevant discipline and possessing a postgraduate qualification in the field of plant biochemistry and/or physiology, you should have relevant research experience in a plant biology laboratory and must be a flexible, cooperative team player with good communication skills. A Ph.D. in either disciplines would be an advantage.

Starting salary unlikely to exceed £17,013.

Quote ref: AA/90B

Application forms and further details are obtainable, quoting the appropriate reference and enclosing a large stamped addressed envelope from Personnel Services, University of Central Lancashire, Preston PR1 2HE.

Closing date: 18th August, 1995.

PROMOTING EXCELLENCE AND OPPORTUNITY IN EDUCATION AND RESEARCH

POSITIVE ABOUT DISABLED PEOPLE

The University offers flexible patterns of work including job sharing, part-time and short term contracts and is working towards equality of opportunity for all.

UNIVERSITY OF CENTRAL LANCASHIRE
Applications are invited for a Research Assistant to investigate the problems of using neural networks in safety critical systems. The aim of the work is to find out what the limitations are when using neural networks in such systems and to suggest ways in which they may be overcome. The work will be of interest to people who wish to study the way in which neural networks learn and their subsequent behaviour.

The post is open to individuals who have a good theoretical knowledge of neural networks or experience in safety and certification issues. Because some simulation work will be undertaken, knowledge of C and UNIX would be an advantage. Preference will be given to candidates who hold a Ph.D. which involved neural networks.

The candidate will join a major group of researchers working in the area of neural networks. The group is supported by high quality computing resources and technical personnel.

The post is supported by the EPSRC and is funded, in the first instance, for a period of eight months. The salary will be in the range: £14,317 - £18,294 per annum.

More information can be obtained from Dr Jim Austin (01904 432734, Austin@minster.york.ac.uk) or Dr Gary Morgan (01904 432739, gary@minster.york.ac.uk).

For further information and details of how to apply, please contact the Personnel Office, University of York, Heslington, YORK Y01 5DD, quoting reference number 4/6600. The closing date for applications is 21 August 1995.
Due to the promotion of the current holder of this post, a vacancy has occurred for a Research Fellow in the area of Microwave Properties and Applications of High Temperature Superconductors. The Superconductivity Group in the School of Electronic and Electrical Engineering is part of a large EPSRC funded rolling programme at the University of Birmingham and enjoys a worldwide reputation. The post is for 3 years in the first instance.

Applications are invited from suitably qualified candidates who have completed a Ph.D or possess substantial experience in Electrical, Electronic Engineering or Physics. The applicant should be able to demonstrate competency in both experimental and analysis work.

Salary range £15,986 - £21,519.

Application forms (returnable by 22nd August 1995) and further particulars available from the Director of Staffing Services, The University of Birmingham, Edgbaston, Birmingham B15 2TT, E-mail: STAFFING@BHAM.AC.UK telephone 0121 414 6483 (24 hours), quoting reference G10256/95A.

Working towards equal opportunities

The University is an exempt Charity which exists to advance learning to the highest level for the benefit of its students and society at large.
UNIVERSITY OF WARWICK

RESEARCH FELLOWSHIP
at the Centre for Catalytic Systems and Materials Engineering

Applications are invited for a research postdoctoral appointment, which is available from 1 October 1995, initially for one year with a possible extension for a further year. You will undertake an investigation at the fundamental level of catalysed oxygen transfer from nitric oxide and molecular oxygen to carbon monoxide and unsaturated hydrocarbons which are relevant to clean process technologies. The research will involve a range of electron spectroscopies, FT-IR, in-situ reactive-scattering reaction rates together with reactor studies. Previous experience in the physics and chemistry of surfaces is essential.

Salary on the Research 1A Grade: £14,317 - £21,519 per annum.

Application forms (returnable by 24 August 1995) from the Personnel Office, University of Warwick, Coventry CV4 7AL (telephone 01203 523627) quoting ref: 51/5A/94 (please mark clearly on envelope).

The University of Warwick is an exempt charity dedicated to excellence in teaching and research and is an Equal Opportunities Employer.
Applications are invited for a Molecular Geneticist to undertake a series of investigations into aspects of genome organisation in the Lolium/Festuca complex. The project is a joint programme of IGER and University of Wales Aberystwyth which forms part of the BBSRC Plant and Animal Genome Analysis programme and is funded for three years from 2 October 1995.

Candidates should hold a first or upper second class honours degree in genetics or a related biological subject with at least two years’ experience in molecular genetics. Practical experience of DNA marker technologies is highly desirable together with a knowledge of plant hybridisation and cytogenetic procedures.

The salary scale is £13,951 to £24,174, and benefits include non-contributory pension scheme.

Application forms and further particulars are available from the Institute Personnel Officer, Institute of Grassland and Environmental Research, Plas Gogerddan, Aberystwyth, Dyfed SY23 3EB. Closing date: 25 August 1995. Please quote Ref 95/28.

IGER is an Equal Opportunities Employer.

CHARING CROSS AND WESTMINSTER MEDICAL SCHOOL
(University of London)

HISTOLOGIST

We wish to appoint an experienced histologist to join our gene targeting group working with transgenic mice and muscle gene therapy. This appointment in the Department of Pharmacology, funded by an MRC programme grant, will involve both paraffin sectioning and cryosectioning, histochemistry and immunohistochemistry, in-situ hybridisation and some routine molecular biology. MLSO-trained candidates are encouraged to apply.

The appointment will be for three years as a Research Assistant 1B, salary £18,120 per annum, inclusive of London Allowance.

Informal enquiries should be directed to Dr. Dominic Wells (0181 846 7038).

Applications, with full CV, together with the names and addresses of two referees, should be sent to the Director of Personnel, Charing Cross and Westminster Medical School, The Reynolds Building, St Dunstan's Road, London W6 8RP, by 25 August 1995. Please quote ref 95/73.

CX & WMS is an Equal Opportunities Employer and is a charity promoting medical education and research.

Division of Immunology  
Guy's Campus  

UMDS  
GUY’S AND ST THOMAS’S MEDICAL AND DENTAL SCHOOL  
(University of London)  

RESEARCH FELLOW/ ASSOCIATE (IA)  

required to undertake research on the cellular and humoral immune responses to simian immunodeficiency virus. Applicants should possess a BSc or equivalent and have several years' experience in lymphocyte culture, cytotoxic cell assay and ELISA techniques. A Ph.D. or a working knowledge of the immunology of AIDS is desirable. Salary in the range £14,317 - £16,628 pa plus £2,134 pa LW.

For a job description which contains details about the application procedure, please call 0171-922 8049 (24 hours) quoting reference G/IMM/497.

Closing date for receipt of applications: 18 August 1995.

Equality of Opportunity is School Policy  
Lecturer/ Senior Lecturer in Marine Zoology
School of Biological Sciences
Salary: £13,470 - £26,223
Closing date: 21 August 1995
Ref: SCI 1017N

The successful candidate will be an active researcher in the area of ecophysiology and will be based within the Marine Environment Group. The person appointed will make a full contribution to the teaching programmes of the School. Applications from candidates able to teach animal physiology and invertebrate diversity and with an interest in impact assessment and monitoring polluted environments will be particularly welcome.

Further particulars are available from: The Personnel Office, University of Portsmouth, University House, Winston Churchill Avenue, Portsmouth PO1 2UP. (01705)843421 24-hour answerphone

University of Portsmouth

Aiming for equal opportunities

A Centre of Excellence for University Teaching and Research
We have a vacancy for a Medical Laboratory Scientific Officer (MLSO1) in the busy and active department at the North London Blood Transfusion Centre which collects over 230,000 donations a year. The successful candidate will gain experience in red cell serology by working in all sections of the department; donor grouping, reagent preparation, cell typing and the Reference Laboratory; and will be involved in new developments currently being undertaken.

The Centre, which has a programme of lectures and tutorials, a good library and a policy for staff development, has been designated the Administrative Centre for the London and South East Zone.

Salary range: £11,594 - £14,882 inclusive per annum

For an application form and job description please contact us on 0181 905 9642 (24 hour answering service) or write to the Personnel Department, NLBTC, Colindale Avenue, London NW9 5BG quoting reference number:448/PNS.

Closing date for completed applications: 18 August 1995

NLBTC operates a No Smoking Policy

Renal Unit Division of Medicine

GUY'S AND ST THOMAS'S MEDICAL AND DENTAL SCHOOL
(University of London)

Required to analyse factors involved in MHC restricted antigen presentation. This project will involve the generation and analysis of mutant cells defective in aspects of antigen presentation. The project is funded for 3 years by the Wellcome Trust. Applicants must have a first degree in a related scientific discipline and be familiar with basic laboratory practice gained in a molecular biology environment. Experience in Molecular Biology/Immunology and cell culture is highly desirable as is the ability to work independently and communicate effectively. Salary is in the range £14,317 - £15,986 pa plus £2,134 LWA. For a job description and details about the application procedure please call 0171-922 8049 (24 hours) quoting reference number G/MED/389a. Closing date for all applications is 24th August 1995.

Equality of Opportunity is School Policy
Research Scientist

The Department of Drug Metabolism within the Health Care Development function has an immediate opening for a Research Scientist. The Department is responsible for ADME studies using radiolabelled drug candidates which are both biotechnology products and traditional pharmaceuticals. The main areas of research and development are diabetes, hormone replacement therapy and growth hormone substitution.

We are seeking a Ph.D. level scientist who as a Study Director will be responsible for planning and execution of in vitro and in vivo drug metabolism studies partly in collaboration with contract laboratories and actively assist the discovery laboratories in drug candidate finding and optimization.

We require a strong background in analytical chemistry with special emphasis in chromatographic methods (HPLC) and spectroscopy (MS and NMR). A candidate with experience in working with radioisotopes like $^3$H, $^{14}$C, and $^{125}$I and knowledge of current GLP regulations is preferred.

The laboratory is equipped with state-of-the-art HPLC and LC-MS and is located in a new research facility in Maaloev, some 20 km outside of Copenhagen.

For further information, please contact Dr. Kristian T. Hansen, telephone 4444 8888, ext. 34838.

Written applications should be marked "Research Scientist. 7203" and sent to the Personnel Department D&D, Krogshoejvej 31, DK-2880 Bagsvaerd, Denmark.

Novo Nordisk is one of the world's leading biotechnology companies. It is a major force in insulin manufacture and diabetes treatment and is the world's largest producer of industrial enzymes. The company also manufactures and markets a variety of other pharmaceuticals and bioindustrial products. Headquartered in Denmark, Novo Nordisk employs more than 10,700 people in 47 countries.

THE INSTITUTE OF PHYSICS

Desk Editor

Institute of Physics Publishing, the scientific and technical publishing division of the Institute of Physics, has a vacancy in its Production Department for a Desk Editor to work, under the supervision of a Production Editor, on a range of physics and physics-related international research journals, books and electronic products.

The work will involve managing the production of a group of publications, and will include copy editing and proofreading, processing authors’ manuscripts supplied in electronic format and carrying out the technical processes required to prepare material for publication via electronic networks.

The successful candidate will ideally have a degree in a physical science, and must possess good communications and organizational skills and an eye for detail. Previous publishing experience together with a familiarity with TEX would be useful, although full training will be given. Since much of the work will be PC-based, a high degree of computer literacy is essential.

The starting salary will be in the range £12,500 - £14,350. Institute of Physics Publishing is located in central Bristol, and staff benefits include flexible working hours, a contributory pension scheme, optional private medical insurance and Luncheon Vouchers.

For further details and an application form, please contact:
Mrs Margaret Williams
Personnel Administration Supervisor Institute of Physics Publishing Techno House Redcliffe Way Bristol B51 6NX Telephone 0117 929 7481 Closing date for the receipt of applications: 30 August 1995

1995
As one of Britain's largest water companies, the need to maintain our high quality standards is as clear as the fresh drinking water we supply to over 5 million customers.

Reporting to our Quality Standards Manager, you'll provide information to management and customers on the quality of our product. Day to day responsibilities will include maintenance of public registers, preparation of reports and certification of new plant.

A knowledge of the scientific aspects of water supply and experience of the associated regulations is essential. You'll need to be familiar with the use of Windows packages, and the customer contact aspects of the role make sound communication skills a must. Flexibility and good team-working ability are essential, as is a Science degree.

CHARTER MARK

ROYAL BOTANIC GARDENS KEW

Botanist
Gymnosperm Section of the Herbarium

Higher/Senior Scientific Officer

The Royal Botanic Gardens has internationally important collections of preserved herbarium specimens of gymnosperms at Kew and the living collections at Kew and Wakehurst Place.

An opportunity has arisen for the appointment of a conifer taxonomist in the Herbarium to curate and research the collections. You will be responsible for the curation of herbarium collections and for their specialist naming. You will also be expected to participate fully in a collaborative project with the Royal Botanic Gardens, Edinburgh on monographic studies of the conifers. The duties will encompass both herbarium and field-based research.

You should have herbarium curatorial experience and a good understanding of gymnosperms, particularly conifers, and their taxonomy. A knowledge of databasing and analytical methods appropriate to taxonomy is desirable and foreign language skills would be an asset.

You will be part of a team working on non-flowering plants and will be expected to take a full and active part in the work of Kew, particularly in fund-raising with the Kew Foundation for selected Gymnosperm projects. You will be expected to work closely with staff of the Jodrell Laboratory and Living Collections Departments where appropriate.

Starting salary for a 36 hour week is dependent upon qualifications and experience, but will be in the range £13,651 - £23,932.

For an application form and further information please telephone 081-332 5150/5153 or write to David Green, Personnel Section, Royal Botanic Gardens, Kew, Richmond, Surrey TW9 3AB. The closing date for the return of completed applications is 24 August 1995.

An equal opportunities employer.
Applications are invited from recent graduates with a 1st class or 2 (i) honours degree in Biophysics, Physics, Physical Chemistry or Electronics for a BBSRC studentship (£5260 p.a.) to conduct research into the fabrication and characterisation of novel electrode structures for sensing sub-micron size microbiological particles by combined electrophoretic techniques. The project will contribute to wider inter-disciplinary research funded by a Realising Our Potential Award (ROPA) gained by the University of York.

Application forms are available from the Graduate Office, Heslington Hall, University of York, York YO1 5DD (tel: 01904 432142).

Informal enquiries should be directed to Dr W B Betts (tel: 01904 432810) or Dr D W E Allsopp (tel: 01904 432353).

Completed forms should be returned to the Graduate Office by 4 August 1995.
UNIVERSITY OF SURREY  
Centre for Environmental Strategy  

PROGRAMME DIRECTOR  
Continuing and Postgraduate Programmes in Environmental Management and Technology  

Applications are invited for a demanding opportunity to develop Continuing Education programmes in Environmental Management and Technology, building on and expanding the courses already offered by the University of Surrey and its Associated Institutions. The Director will need to develop a network of external contacts to define needs for education and training in this area. He/she will also need to develop working relationships across the University.  

The Programme Director will therefore need good personal skills, in addition to a good academic background in engineering or science or social science. The post will be based in the Centre for Environmental Strategy, a cross-disciplinary group providing a focus for environmental research and postgraduate education and training at Surrey.  

The appointment will be for three years in the first instance (subject to satisfactory performance), and will be on the Lecturer B salary scale (£20,677 - £26,430 per annum). The Programme Director will have the dedicated support of an experienced secretary. This is a full-time academic appointment and therefore the Director will also be expected to make his/her contribution to research in an area of environmental management and technology.  

Further particulars are available from the Personnel Office (CVC/mah), University of Surrey, Guildford, GU2 5XH, Telephone 01483 259279. Applications in the form of a CV (2 copies), which should include the names and addresses of three referees, should be sent to the same address by 29 August 1995 quoting reference number 382.  

The University is committed to an Equal Opportunities Policy.  

Promoting excellence in education and research.  
The society wishes to appoint a **Co-ordinator** to improve the flow of records from its voluntary recorders to the national databases and to facilitate the supply of reliable information on the current status of plants to the Countryside Commission for Wales, English Nature, Scottish Natural Heritage and other bodies.

The post will be for three years, with a probationary period, and will be based at home. The applicant must have a working computer knowledge, be able to deal with those who have not, and be prepared to travel extensively. The salary will be in the range £16,000 to £19,000.

Applications, with a full cv, to David Pearman, The Old Rectory, Frome St Quintin, Dorchester, Dorset DT2 0HF, from whom further details may be obtained. Closing date: 18 August 1995.

COURSES & EVENTS

A College of the University of London
Royal Postgraduate Medical School

MSc in Histopathology

Applications are invited for a new full-time postgraduate course in Histopathology, leading to the University of London MSc degree in Histopathology. The course will commence on 25 September 1995, and will last one calendar year. It will provide comprehensive coverage of both diagnostic and experimental pathology including cellular and molecular pathology. The aim of the course is to encourage interest in pathological research, whilst also giving a training in basic principles of diagnostic histopathology and cytopathology.

There will be a 22 week formal taught course, followed by a research project which will be designed to allow the student to make an original contribution in the chosen area of research.

The course will be suitable for students with a background in medicine, dentistry, veterinary science or basic science, but previous experience in histopathology would be an advantage.

Application forms and further particulars are available from: The School Registry, Royal Postgraduate Medical School, Du Cane Road, London W12 0NN.
Tel: 0181 740 3118 Fax: 0181 743 6764.

The RPMS is an exempt charity and a national centre of excellence in medical research and postgraduate teaching
COURSES & EVENTS
THE NOTTINGHAM TRENT UNIVERSITY

Faculty of Science and Mathematics

**European MSc in Biotechnology**

The Department of Life Sciences is seeking to enrol able candidates for the above Masters course starting in October 1995. Suitable candidates will have an honours degree in a Biological Science and commitment to a career in Biotechnology.

The course is of 12 months duration and includes a 6 month research project. A number of grants are available from the European Social Fund for suitably qualified European Community students who are unemployed and under 25 years.

For further details and an application form, please contact: The Faculty Office, Science and Mathematics, The Nottingham Trent University, Clifton Lane, Nottingham, NG11 8NS. Tel: (0115) 948 6638 Fax: (0115) 948 6636

DEUTSCHE MESSE AG, HANNOVER/GERMANY
**Institute of Terrestrial Ecology**

**Bush Research Station, Edinburgh**

**ATMOSPHERIC POLLUTION AND TRACE GAS RESEARCH**

The work will focus on the air concentrations and fluxes of atmospheric ammonia. You will take part in field measurements of ammonia in the UK and be responsible for laboratory analyses and the synthesis of results.

The post is a 3 year fixed-term appointment

Salary in the range of £11,138 - £19,669 p.a. depending on qualifications and experience. A relevant degree or equivalent in a physical or biological science and a full driving licence are required.

For further details and an application form please contact Mr B Bushell, Institute of Terrestrial Ecology, Bush Estate, Penicuik, Midlothian EH26 0QB Telephone: (0131) 445 4343, Please quote reference number ITE 16 when applying. Closing date for applications is 15th September 1995.

**Proudman Oceanographic Laboratory**

**Centre for Coastal and Marine Science**

Salary to £29,000

**PARALLEL SOFTWARE DEVELOPMENT**

The Laboratory is the UK's principal centre for research into the dynamics of coastal and shelf seas and sea level trends and variability worldwide.

We now need a computer scientist to work on the implementation of a number of existing computer models on high performance parallel systems. The models use the finite difference method to simulate the three-dimensional hydrodynamics within shelf sea regions. Additional equations may be added as required to follow the evolution of temperature, salinity turbulence, surface waves, sediment transport and biological and chemical variables.

The work will involve: developing highly vectorised and parallel implementations of existing Fortran 77 and F00 codes suitable to a Cray type computer; the use of common programming practices and standards, to ensure portability and reusability of code, optimisation of codes with respect to single node performance, interprocessor communications, load balancing, and input/output, etc; and collaboration with scientists on algorithmic development, visualisation needs and design of new projects.

Candidates should have a degree (or equivalent) in computer science or mathematical / physical sciences with a strong computing background. Familiarity with the Unix operating system, Fortran programming language, parallel processing techniques and optimisation of codes for high performance systems would be an advantage. Experience with visualisation methods would be useful.

The post, at Higher Scientific Officer/Senior Scientific Officer level, is a two-year fixed-term appointment with a generous leave allowance.

We offer a salary between £13,000 and £29,000 depending on qualifications and experience plus generous holidays, flexible working hours and an attractive hill top location.
For an application form and further details, please contact P Sprigings, Establishments Section, Proudman Oceanographic Laboratory, Bidston Observatory Birkenhead, Merseyside L43 7RA Tel: (0151) 653 8633 ext. 214, fax: (0151) 653 9011.

Closing date for applications: 15th September 1995

The Natural Environment Research Council has an equal opportunities policy and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently underrepresented and their applications are particularly welcome.

Natural Environment Research Council
BRITISH JOURNAL OF CANCER

EDITORIAL ASSISTANT
(MRC Radiobiology Unit, Oxon)

The BJC is the official journal of the Cancer Research Campaign. It is a high-profile international journal published bi-monthly by Stockton Press, A Division of the Macmillan Group.

Assistant to the Editor in Chief (Prof Ged Adams)
Salary £ 12-13k per annum.

You will be expected to be well-organised, working to deadlines with minimal supervision, handling the administration of manuscript submissions and the co-ordination of issues. The work includes use of manuscript tracking software and Word for Windows (some training available) and close liaison with authors, referees and publishers. This position would particularly suit a science graduate (or someone with a research background) with office experience, who is interested in developing a career in publishing. Post currently available until June 1997.

Please submit your CV and referee details to Miss C. L. Bannatyne, BJC, Editorial Office, MRC Radiobiology Unit, Chilton, Didcot, Oxon OX11 0RD, or telephone 01235 832141 for further information.
Closing date: 15 September 1995.
GEORGE ELIOT HOSPITAL NHS TRUST

An applicant with a University Degree (minimum MSc) is required for a post as

**Clinical Scientist (Grade B)**
in a Diagnostic Microbiology Laboratory

The candidate should have broad experience of diagnostic bacteriology, parasitology and mycology, and should also have particular experience in diagnostic virology.

Application forms and job description are available from The Personnel Department, George Eliot Hospital NHS Trust, Lewes House, College Street, Nuneaton, Warwickshire CV10 7DJ. Telephone 01203 351351, ext 5996.

Closing date: 12 September 1995.

ECOTOXICOLOGIST
For Pesticides Registration
York £16,800 - £24,800

The Pesticides Safety Directorate is an executive agency of the Ministry of Agriculture, Fisheries and Food responsible for the registration in the UK of pesticides intended for use in agriculture, horticulture, forestry, home, gardens and other areas.

Working in our Ecotoxicology Branch as part of a multi-disciplinary team, you will be responsible for evaluating data contained in reports on the toxicity of pesticides to a variety of species, ranging from birds and wild mammals to earthworms and soil micro-organisms. As part of the evaluation process, you will write detailed submissions for UK committees and the EC, making recommendations with respect to conditions of approval for new pesticide ingredients.

The job also involves producing and/or co-ordinating written submissions to the Environmental Panel of the Advisory Committee on Pesticides, providing advice to the agrochemical industry on the generation of data and data requirements, as well as answering general enquiries on matters related to the ecotoxicological risk assessment of pesticides.

You will have a degree or equivalent qualification in a biological or other life science, but we shall also be looking for several years’ post-graduate experience of relevance to ecotoxicology. Previous involvement in ecotoxicological risk assessment with particular reference to pesticides would be an advantage, as would an appropriate postgraduate qualification.

For further details and an application form (to be returned by 22nd September 1995), please telephone Recruitment & Assessment Services on Basingstoke (01256) 468551 (24 hours) or fax 01256 846374 / 846660.

Please quote reference B2652.

Astra is one of the fastest growing pharmaceutical companies in the world. As part of its global expansion and long term commitment to the future, it has recently acquired substantial R&D resources in the UK, based in Loughborough, Leicestershire.

Astra is dedicated to growth through innovative science and has positive plans for these new, purpose built and rapidly expanding R&D facilities in the UK.

ASTRA
ASTRA CHARNWOOD

We are offering a career opportunity to develop your interest and abilities in the application of computer technology in chemistry. Our Analytical Chemistry Department is expanding the team supporting and developing Chromatography Data Capture, Automation and LIMS computer systems.

We seek a graduate chemist with an interest in computing, preferably with experience of developing and supporting computer systems in the pharmaceutical industry. The applicant should have ability and long term commitment in applying information technology to enhancing laboratory efficiency.

Our location is pleasantly rural and in a relatively inexpensive part of the country. We offer excellent conditions of employment which include flexitime, pension scheme, 25 days' holiday and a generous relocation package, where appropriate.

Please send a full C.V. with current salary to Mrs Olive Jones, Senior Personnel Officer, Astra Charnwood, Bakewell Road, Loughborough, Leicestershire LE11 0RH, quoting reference number 5097/NS on all correspondence.

Deputy Executive Director – Australia
An Executive Position in Research

ANSTO is seeking a manager of science who is a scientist of international standing to be appointed Deputy to the Chief Executive. The appointee will, in carrying out the functions of chief research director, be responsible for the selection and evaluation of major scientific projects undertaken by ANSTO; for ensuring that these projects are carried out effectively and completed in a timely manner; and that the planned outputs are achieved and are of a high quality.

The successful applicant should have demonstrated:
• experience in the selection and ongoing evaluation of major interdisciplinary research projects
• extensive negotiating skills which have been illustrated in cementing research alliances with industry, academia and/or other scientific laboratories, both in Australia and overseas
• leadership ability to inspire scientists and support staff to be creative and output-oriented.
• interpersonal skills for successful management of a multi-disciplined scientific environment.
• significant scientific achievement in a field relevant to work conducted at ANSTO

Experience in the development/implementation of science policy at the national or international level is desirable.

The Deputy to the Chief Executive is also required to
• represent ANSTO in science and technology groups, including national councils and committees
• liaise with universities and other scientific research organisations
• supervise the management of research projects at ANSTO
• contribute to the evaluation of research managers

As the Deputy to the Chief Executive, the appointee must have achieved the scientific status to enable him/her to exert a major influence on the success of the scientific work carried out at Australia's national nuclear science organisation.

The remuneration package is appropriate to the status of this position. In addition to salary, a fully maintained car, contributory superannuation and attractive conditions of employment apply.

Ansto

ANSTO is an equal opportunity employer located at Lucas Heights, a suburb of Sydney located about 40 km south east of the City Centre. Selection criteria are available from Robyn Hopkins who can be contacted by telephone at (612) 717 9015 or by email rjh@nucleus.ansto.gov.au. Further details about this position can be obtained from Peter Nixon by telephone at (612) 717 3288 or by email pmn@nucleus.ansto.gov.au

AUSTRALIAN NUCLEAR SCIENCE & TECHNOLOGY ORGANISATION

Applications close 2 October, 1995.
[1993-008 (1995) : 54]
RESEARCH FELLOW IN MOLECULAR BIOLOGY

The University has recently approved a Research Fellowship in Molecular Biology to be held in the Department of Biological Sciences. Applications are now invited from postdoctoral level molecular biologists with expertise in the molecular biology of bacteria, yeasts or cereals. Informal enquiries, and requests to visit the Department, should be made to Professor B Austin, telephone 0131-451 3452.

The post is tenable for five years and the starting salary will be in the range £20 - £30,000 per annum.

Further particulars may be obtained from the Personnel Office, Heriot-Watt University, Riccarton, Edinburgh, EH14 4AS, telephone 0131 - 451 3475 (24 hours). To apply, please forward your CV with the names and addresses of two referees, quoting Reference Number 114/95/NS to arrive by 30 September 1995.

HERIOT-WATT UNIVERSITY EDINBURGH

Heriot-Watt University aims to enhance further its reputation for quality and flexibility in teaching and distinction and relevance in research.

Ph.D. studentship: "Macrophyte-invertebrate-flow relationship in Scottish rivers' available from October 1995 for 3 years, covering fees and maintenance grant at standard research studentship rate. A 2.1 Hons degree, or MSc in ecology or a related subject is the minimum qualification.

Contact Dr K. Murphy (0141 330 6632; gbfa10@udcf.gla.ac.uk); IBLS DEEB, Brian Lab. (Garscube), University of Glasgow, Glasgow G12 8QQ. Ref: NS/ 8874.

The University of Glasgow is an exempt charity dedicated to excellence in Teaching and Research. [1993-010 (1995) : 54]

SANDOZ
Sandoz Pharma Ltd
has a vacancy for a

LABORATORY HEAD
in the Analytical R&D Department at its headquarters in Basle, Switzerland.

The successful candidate's duties will include:
- Development and validation of analytical methods for new drug substances and dosage forms:
- Providing support for these methods in an interdisciplinary team up to the point of handover to Quality Control;
- Performing control and stability tests;
- Preparing registration dossiers and analytical documents.

All work is carried out in accordance with the principles of Good Manufacturing Practice.

Applicants should have a background (Ph.D.) in analytical chemistry and at least two years' experience in the pharmaceutical industry.

Sandoz offers excellent career opportunities as group leaders or project leaders in international teams to associates with experience in pharmaceutical development and a proven record of success. As an international company we are able also to offer outstanding associates opportunities in the USA and Japan.

Applications, including a full curriculum vitae, should be sent to Sandoz Pharma Ltd, Personnel Department, Ref 5417, Mrs S. Brunnschweiler, CH-4002 Basle, Switzerland.
[1993-012 (1995) : 54]
fulfil your research potential

**NEUROSCIENTIST**

The Central Toxicology Laboratory in Cheshire enjoys an international reputation for innovative research. Current major research programmes are focused on neurobiology, mechanisms of carcinogenesis and immunology with extensive and active links with universities and research institutes worldwide.

A key feature of our organisation is the positive encouragement given to scientists to publish and present their work.

It is within this centre of excellence that we now wish to recruit an experienced graduate or Ph.D. who has experience of molecular neurobiology and/or neurochemistry.

Essentially we want you to bring your neuroscience knowledge, enthusiasm innovation to the world of neurotoxicology.

Working in a multi-disciplinary team you will be focusing on the cellular and molecular biological aspects of the mechanistic basis for adverse affects resulting from the interaction of chemicals with the nervous system.

**HIGHLY COMPETITIVE SALARY AND BENEFITS PACKAGE • ATTRACTIVE RURAL LOCATION • HIGH QUALITY OF LIFE • EXCELLENT CAREER OPPORTUNITIES**

Please write with cv, quoting reference CTL/RTS1, to: The Personnel and Training Section, Zeneca Central Toxicology Laboratory, Alderley Park, Macclesfield, Cheshire, SK10 4TJ. Closing date: 21st September 1995.

ZENECA Central Toxicology Laboratory
Micro Engineering

**Technical Director**
Novel Micro Mechanical Development
Cambridge
Excellent Package

With sound financial backing from a number of major organisations this appointment represents a rare opportunity to create a team, establish the facilities and develop a product destined to transform established approaches in both commercial and office printing environments.

We are seeking a highly qualified (possibly Ph.D. - physics, materials science or engineering) and experienced manager capable of taking innovative concepts and turning them into practical reality.

To be successful in this role will require a comprehensive knowledge of micro engineering coupled with financial, commercial and project management skills. Some appreciation of fluid flow would be an advantage.

Salary is negotiable. A comprehensive range of benefits is provided including a performance related bonus and a company car.

Hales & Hindmarsh
SELECTION AND SEARCH

Please write enclosing a full CV quoting Ref: 1412 to Michael Salter, Director, Hales & Hindmarsh Associates Limited, 34A Jewry Street, Winchester, Hampshire SO23 8RY. Tel: 01962 841851. Fax: 01962 840436.
The Reuter Foundation

THE REUTER FOUNDATION invites applications for a

Reuter Fellowship in Medical Journalism

in the Reuter Foundation Fellowship Programme

at Green College, University of Oxford

This is a new award for professional journalists who specialise in writing or broadcasting about medical issues. It is intended to offer an opportunity for individual study and research into medical developments and trends, using the resources of Oxford University. Successful candidates are likely to have at least five years' specialist writing experience.

The Reuter Foundation will initially offer one fully-funded Fellowship for one term (three months), starting in January, April or October 1996. The winner will be a member of the Reuter Foundation Fellowship Programme for international Journalists at Green College, Oxford.

Further information and application forms may be obtained from the Director, The Reuter Foundation, 85 Fleet Street, London EC4P 4AJ. Telephone 0171 542 7015. Fax 0171 542 8599.

The deadline for applications for 1996 is 30 October 1996.

DEPARTMENT OF CHEMISTRY

Teaching Fellow in Organic Chemistry
Applications are invited for a University Teaching Fellowship from candidates who have recently obtained, or expect to shortly obtain, a Ph.D. Degree. The person appointed will be required to help with the teaching of organic chemistry and will also be expected to contribute to the existing research activities in the Department.

Salary will be within the range £15,154 - £16,628 pa. The post is available for a period of one year.

Informal enquiries may be addressed to Professor G Pattenden, tel: 0115 951 3530.

Application forms are available from the Personnel Office, Highfield House, The University of Nottingham, University Park, Nottingham NG7 2RD. Tel: 0115 951 5778. Fax: 0115 951 5205. Please quote ref. DCH/065. Closing date: 22 September 1995.

Postdoctoral Fellowship in Organic Chemistry
Applications are invited from candidates with a strong background in synthetic organic chemistry for the above position funded by the EPSRC to work with Dr J S Clark. The project will be directed towards the synthesis of the marine alkaloid manzamine A and related anti-tumour compounds.

The post is available from January 1996 for an initial period of one year, with the possibility of renewal for a further year. Remuneration will be in accordance with EPSRC scales.

Informal enquiries may be addressed to Dr Clark, tel: 0115 951 3542, Email: J.S.Clark@nott.ac.uk.

Applicants should send a detailed CV, together with the names of two referees, to Dr J S Clark, Department of Chemistry, The University of Nottingham, University Park, Nottingham NG7 2RD. Closing date: 15 November 1995.

MAGNETIC RESONANCE CENTRE
(Department Of Physics)

Research Assistant
Responsible for patient care and image analysis

This is a varied and challenging position in a stimulating research environment. The successful candidate will be responsible and self-motivated and will be prepared to become highly proficient in the use of computers.

The post would suit a radiographer keen to get experience of MRI, a science graduate with an interest in patient care or possibly a nurse with a strong interest in computing. (Newly qualified radiographers would be considered).

The Magnetic Resonance Centre is a major centre for the development of MRI in the UK. This post is associated with research projects into the application of MRI to the foetus, gastrointestinal system and brain.

Salary will be £14,317 per annum on the Research Assistant Grade 1B scale. The post is available for a period of one year.

Informal enquiries may be addressed to Penny Gowland, tel: 0115 951 4754.
Applicants should send a detailed CV, together with the names of two referees, to Dr P Gowland, MR Centre, Department of Physics, The University of Nottingham, University Park, Nottingham, NG7 2RD. Closing date: 15 September 1995.

DEPARTMENT OF GEOGRAPHY

Postgraduate Research Assistant in Remote Sensing
Applications are invited for a suitably qualified researcher to work on a BNSC funded project on "Satellite monitoring for farm decision support systems", supervised by Dr M D Steven. Applicants should be familiar with remote sensing, image processing and GIS.

Salary will be within Research Assistant Grade 1B £14,317 - £15,986 pa, depending on qualifications and experience. The post is available for a period of two years.

Postdoctoral Research Assistant in Remote Sensing
A suitably qualified researcher is required to work on a project funded by NERC on the development of spectral indices of biophysical characteristics of the land surface for use with data from the ATSR-2 remote sensing system, recently launched on the ERS-2 satellite. The research will be supervised by Dr M D Steven (Geography) and Dr J A Clark (Environmental Science). Applicants should be adept in computing and should have a background in remote sensing and/or vegetation modelling.

Salary will be on the Research Assistant Grade 1A scale, within the range £14,317 - £18,985 pa, depending on qualifications and experience. The post is available for a period of one year. Informal enquiries may be addressed to Dr Steven, tel: 0115 951 5442, fax: 0115 951 5249.

Applicants should send a detailed CV, together with the names of two referees, to Dr M D Steven, Department of Geography, The University of Nottingham, University Park, Nottingham NG7 2RD. Closing date: 15 September 1995.

The University of Nottingham is a research-led institution which provides the highest quality learning environment and is committed to equal opportunities in employment.

The University of Nottingham
Scientific Officer
AIDS Collaborating Centre

We are seeking to recruit a Scientific Officer to work in the AIDS Collaborating Centre. The post holder will be involved in work to test and ensure the safety of blood products, particularly freedom from contamination by HIV or other retroviruses using antibody assays and gene amplification techniques.

Applicants should have a degree in microbiology or a related subject. Preference will be given to candidates with experience in immunochemistry, PCR, and of working with category 3 pathogens.

Salary will be on the scale up to £21,072 inclusive per annum, dependent on experience.

For further information and an application form please write to the Personnel Office, National Institute for Biological Standards and Control, Blanche Lane, South Mimms, Porters Bar, Hertfordshire EN6 3QG.

Closing date for applications 14 September 1995.

Please quote reference number AL/358.

MAINTAINING EXCELLENCE IN DATA INTERPRETATION

Wyeth Lederle

It's an exciting time at Wyeth Lederle. A radical programme of change, development and acquisition has firmly positioned us as a leading worldwide developer, manufacturer and marketer of quality pharmaceuticals.

CLINICAL DATA ASSOCIATE
Gosport, Hampshire

Working in a data management team within our Medical Department, your brief will involve you in the design and management of a number of clinical trial databases for single and multi-centre clinical trials - including data coding, verification, validation and manipulation to produce reports and tables. Additionally, you will contribute to advice given on the content of protocol and Case Record Forms with regard to their suitability for data collection and management.

You should be a life science graduate who can demonstrate at least 2 years experience in a broad based data management role preferably gained from within the pharmaceutical or related industries. Analytical, methodical and with an exceptional eye for detail, you must be able to interpret and manage large amounts of technical/medical information. First class communication skills will enable you to liaise with all levels of staff throughout the company and will be combined with a high level of professional credibility.

This position will initially be based in our Gosport office, with a possible opportunity to relocate to the Slough area in the future.

In return, we can offer an attractive salary and the range of benefits you would expect from a world leading organisation, including relocation assistance where appropriate. A job share partnership could be considered for this vacancy.

If you have the skills and experience we require, in the first instance please forward your full CV to: The Personnel Officer, Cyanamid (UK), Cyanamid House, Fareham Road, Gosport, Hampshire PO13 0AS, quoting reference: 911.
NOTTINGHAM CITY HOSPITAL NHS TRUST  
MOLECULAR DIAGNOSTIC LABORATORY  

MLSO2/CLINICAL SCIENTIST Grade B  
Salary MLSO2 = £14,242 - £18,740 / Clinical Scientist Grade B (8-10) £16,019 – 17,3326 per annum (Pay Award Pending).

A suitably experienced and qualified candidate (a Biomedical Science degree, with CPSM State Registration for the MLSO 2 post) is required to work in the newly developed Molecular Diagnostics facility in this large teaching hospital. An ability to work accurately and communicate at the appropriate level is essential together with the ability to work within a small multidisciplinary team. Previous experience in a biomedical laboratory is essential. Experience in Molecular Biology techniques is desirable. Opportunities for further study research are available.

For further information contact Dr A. Haynes, Haematology, telephone (0115) 969 1169, ext 45564, Dr I. O. Ellis, Histopathology, telephone ext 46875 or Janet M. White, Histopathology Services Manager, telephone ext 46343.

Application forms and job descriptions are available from the Recruitment Section, Department of Human Resources, Nottingham City Hospital NHS Trust, Hucknall Road, Nottingham NG5 1PB. Telephone: (0115) 962 7672 (24 hour answerphone).

Closing date: September 15, 1995.

Interview date: Week Commencing October 2 1995,

Announcement of Opportunity LINK Programme: Earth Observation

The Department of Trade and Industry, the Natural Environment Research Council and the Department of the Environment, as partners within the British National Space Centre (BNSC), have launched the BNSC Earth Observation LINK programme. Applications for the first round are now invited.

The overall objective of this programme is the support of innovative pre-competitive Earth Observation applications research on a collaborative basis (industry and academia) targeted on end-user needs emerging from the Technology Foresight Programme. In particular, the LINK programme will seek to address the priority areas identified by the Agriculture, Natural Resources and the Environment (ANRE) sector panel. It is anticipated that proposals will incorporate the development of new techniques and applications for exploiting existing data sources as well as preparing for the exploitation of data from future missions.

LINK programmes are jointly funded by government and industry. Up to £2.5m will be available from BNSC over five years to be matched by funds from industrial participants. Approximately eight projects will be funded each year. Applications for project support must come from a partnership which includes at least one industrial partner (in association with an end-user) and at least one science partner (university or government funded research lab). At least one of the partners must be able to exploit the results of the research to bring the work closer to market.

Further information and a set of essential guidance notes and application form are available from the Programme Co-ordinator, to whom completed applications should be returned by Friday, 6 October 1995 to Dr Jackie Hinton, RSADU, Monks Wood, Abbots Ripton, Huntingdon, Cambs PE17 2LS. Telephone 01487 773381. Fax 01487 773277. Email j.hinton@nerc.ac.uk

TOWER HAMLETS COLLEGE

Tower Hamlets College is a Further Education College committed to providing quality education and training in a stimulating and friendly environment.

Full-Time Science Technician - Grade C
(£12,133 to £14,003 inc.)

The successful applicant will be part of a technician team providing a service to the Science section, with Biology as a specialist area of work. Reporting to the Chief Science Technician. You will possess one of the following qualifications, or equivalent, in appropriate subjects relevant to the duties of the post: ONG, OND, BTEC/TEC Certificate, 2 'A' Levels. Ordinary or Part 1 City & Guilds. In addition you will have three years' experience (including the training period) relevant to the duties of the post.

Tower Hamlets College is committed to the effective implementation of its Equal Opportunities Policy and welcomes applications from members of the local ethnic communities who are currently under-represented among the College staff.

For further details and an application form, please contact Nikki Keogh, Human Resources Department, Tower Hamlets College, Poplar High Street, Poplar, London E14 0AF. Telephone: 0171-538 4882. Closing date for the receipt of applications is 17:00 hours on 15 September 1995.

CVs will not be accepted.
ASSISTANT EDITOR
(PHYSICS WORLD)

Physics World magazine has a six-month opening for an assistant editor starting in October. Physics World has a reputation for producing lively, accurate and up-to-date coverage of all areas of physics and science policy for an international readership every month. The assistant editor will write and edit news, and contribute to other sections of the magazine.

The post would suit a physics graduate keen to establish a career in scientific journalism and publishing. The successful candidate will need to demonstrate a wide-ranging interest in physics and related policy areas, and an ability to convey complex ideas with clarity and flair.

This will be a fixed-term contract; it is possible there may be a full-time position available at the end of the contract depending on circumstances. The salary will be in the range £13,000-15,000 pa. The post will be based in Bristol.

Please send a covering letter, CV and, if available, samples of publishing writing to:
Dr Peter Rodgers
Acting Editor, Physics World Institute of Physics Publishing Techno House
Redcliffe Way Bristol B51 6NX

1995
RESEARCH MANAGER/ CO-ORDINATOR
c £21,500 p.a.

Do you have a keen interest in research and development? Are you able to gain the respect and support of senior clinical and managerial staff?

Leicester General Hospital NHS Trust is a large acute teaching hospital with an increasing research profile. We are now seeking an individual who can work closely with senior staff to maximise the quality and quantity of research within the Trust. Your role will be to identify, promote and organise research activity throughout the Trust and with external agencies.

You will be a science graduate with previous experience of research and development and its application, ideally within the Health Service. You will possess excellent organisational and facilitation skills together with a genuine enthusiasm for this kind of work. Previous experience of budget management would be an advantage.

For an informal discussion please contact Dr John Feehally, lead clinician for research and development on 0116 249 0490 extension 4131.

For an application form and job description please contact the Recruitment Section, Leicester General Hospital NHS Trust, Gwendolen Road, Leicester, LE5 4PW, Tel: 0116 273 4493 (24 hour answerphone service).

Closing Date: Friday 15th September 1995.

Leicester General Hospital NHS Trust has a range of staff facilities including a Day Nursery, and operates a non smoking policy. To ensure that our workforce is representative of the population we serve, we welcome applications from all sections of the community.

Working towards equal opportunities.

LEICESTER GENERAL HOSPITAL NHS TRUST
LGH
SEMPER AD SUPREMA
PLANT METABOLISM CHEMIST
ENVIRONMENTAL SCIENCES

AgrEvo UK Limited is the highly successful joint venture company of Hoechst and Schering. We are now looking for an enthusiastic and energetic plant metabolism chemist to join a small team within Environmental Chemistry. In this challenging role, you will conduct plant metabolism and environmental fate studies to support the registration of AgrEvo products worldwide. There may also be the opportunity to investigate and implement new methodology.

With a Ph.D. in either plant chemistry, plant biochemistry or a related discipline, you will have an aptitude for practical work and be conversant with either chromatographic techniques and/or the use of enzymes in catabolic work. Familiarity with tissue culture techniques would also be beneficial.

Of vital importance will be a pro-active and assertive approach plus a real commitment to teamwork. In addition, you must have excellent record keeping skills and meticulous attention to detail, as you will have, or will develop on the job, the ability to design, direct and report studies within a GLP environment. The nature of the role means that familiarity with Microsoft Office software would also be an advantage.

In return, we offer a competitive salary and first-class benefits which include flexible working hours, contributory pension, subsidised BUPA and staff restaurant.

Closing date: 15th September 1995. All applicants will be contacted after 2nd October 1995.

Please send a full CV with details of salary requirement to: Personnel Department, AgrEvo UK Limited, Chesterford Park, Saffron Walden, Essex CB10 1XL.
Applications are invited for the post of Research Technician to work on a project on computer-assisted analysis of dog spermatozoa based in the Reproduction Unit of the Department of Farm Animal and Equine Medicine and Surgery, at the College's Hawkshead Campus near Potters Bar.

Duties will include collecting samples and performing analysis in a variety of experimental models. The aims of the project are to evaluate factors involved in hyperactivation of spermatozoa prior to IVF as well as sperm damage during cryopreservation. Ideally applicants should have a degree in biological or biomedical sciences, some experience in semen evaluation and the use of computer software would be preferred.

Salary is on Universities' Technician Grade C, £10,808 - £11,389 per annum including London Allowance (under review).

Application forms are available from the Personnel Office, The Royal Veterinary College, Royal College Street, London NW1 0TU. Tel: 0171 468 5000.

Closing date for application is 18 September 1995. Ref: RVC/47/95.

Posford Duvivier Environment
Posford Duvivier Environment, Britain's leading environmental consultancy dealing with the land-water interface, is looking to expand its professional team, by employing a

**Project Manager**
(Ref EE60)

A minimum of five years project management experience in an environmental consultancy is essential. The successful candidate will have a technical background in pollution, pollution control and chemistry. Overseas experience is preferred.

Posford Duvivier, part of the HASKONING Group, offers a pleasant working environment in an excellent location at their head office in Peterborough, Cambridgeshire. The post will offer a salary and benefits package to reflect the experience and capabilities of the successful candidate.

Please apply in writing giving full personal and career details and quoting the appropriate reference to: Personnel Manager, Posford Duvivier, Rightwell House, Bretton, Peterborough PE3 8DW. Closing date for applications Monday 18th September 1995.

**POSFORD DUVIVIER**
**ENVIRONMENT**

An equal opportunities employer
As part of the Inspec Group plc, we are one of the UK’s largest speciality Chemical companies exporting 85% of our £70m plus turnover. Due to continued expansion we now require a:

**DEVELOPMENT CHEMIST**

to work on product and process development within our research and development team. You would be required to work in both laboratory and pilot plants and liaise with marketing, quality control, production, suppliers etc.

Ideal candidates will have:
* An honours degree in Chemistry or applied Chemistry (upper second or higher);
* 2-3 years experience in a process development role or as a production support Chemist;
* An interest in Chemical Engineering and Production;
* Enthusiasm, self-motivation, lateral thinking and good communication skills.

A competitive salary package is offered.

If you feel you have the qualifications and experience we require please forward a comprehensive CV to Miss S Clark, Personnel Officer, International Speciality Chemicals Limited, Charleston Industrial Estate, Hardley, Hythe, Southampton SO45 3ZG.

Closing date: 30th September 1995.

Working Towards Equal Opportunities

FOR THE ADVANCEMENT OF LEARNING
CARLISLE HOSPITALS NHS TRUST

Chief Clinical Technician (MTO 4)

The Location
Carlisle is based in North Cumbria which is near the border with Scotland and next to the Lake District. The city has easy access to the M6 and excellent rail links with the South and Scotland.

The Department
With the forthcoming appointment of a second Consultant in Cardiology, the Department is currently being developed and expanded, in order to enhance the services provided.

The job
The job will include the following techniques:
- Pacemaker follow up
- Echocardiography and Doppler with interpretation
- Stress testing with interpretation
- Lung function testing including helium dilution and flow volume loops
- 24 hour ECG analysis
- Use of Cardimemos and heartwatch
- 24 hour blood pressure monitoring and interpretation

The Postholder
The successful applicant will:
- have experience of the techniques highlighted
- possess HTEC experience in MPPM or equivalent
- possess good communication skills
- preferably have experience of managing others

For an informal discussion, please contact Dr R H Robson, Clinical Director, General Medicine on (01228) 23444 extension 3742.

If you are committed to providing and supporting a quality service, in a friendly but professional department and possess the necessary experience, please contact the Human Resources Dept., Cumberland Infirmary, Carlisle CA2 7HI: Telephone (01228) 814805 (24hrs) for an application form.

Closing date 11 September 1995.

WE ARE COMMITTED TO EQUAL OPPORTUNITIES IN EMPLOYMENT & OPERATE A NO SMOKING POLICY

Carlisle Hospitals
The University is enhancing its current system of part-time Departmental Safety Officers by the appointment of a full-time Area Safety Officer for the Clinical School. The appointment will be for a period of three years. The Clinical School includes 17 academic departments located on several sites. The holder of this new post, who will report to the Clinical Medicine Board through the Clinical School's Director of Planning and Development, will be responsible for advising on health and safety matters and monitoring and assisting in the implementation of the individual departments' safety policies which, in turn, reflect the policies of the University.

The successful candidate will have a good first degree in a biosciences subject. A higher degree and/or membership of the Institute of Occupational Safety and Health would be advantageous. Previous experience of research and an awareness of and interest in safety in a research environment is essential. Good communication skills will be necessary and computer literacy is desirable.

Further details may be obtained from Dr Gary Fox, Medical School Offices, University of Oxford, John Radcliffe Hospital, Headington, Oxford OX3 9DU, tel 01865 221690, fax 01865 750750. Applications (6 copies), in the form of a letter including a CV and the names and addresses of three referees, should reach the Medical School Offices by 29 September 1995.

The University exists to promote excellence in education and research, and is an equal opportunities policy.

SUBMARINE ATMOSPHERE TECHNOLOGY

Will you enhance the chemistry of our research teams?

The Defence Research Agency is an agency of the Ministry of Defence with the mission to be the prime provider of technical advice to the MOD. As the prime research and development source to the MOD, DRA is renowned for scientific innovation and impartiality. By also collaborating in civil research projects, DRA forms strong commercial partnerships with industry.

The Sea Systems sector of DRA provides the Royal Navy and commercial customers with expert advice on warship and submarine technologies ranging from future ship capability to materials countermeasure systems and sensor integration.

The Submarine Atmosphere Technologies Team undertakes a wide range of strategic and applied research relating to the monitoring and purification of air. We now have two opportunities within this programme for graduates with chemistry or similarly relevant degrees,

Life Support Systems

SENIOR/HIGHER SCIENTIFIC OFFICER
£13,000 - £23,000 Ref: AW/REC/41
Holton Heath, moving to Haslar 1996

This is a senior role in a novel research project to assess the feasibility of life support systems based on the removal of carbon dioxide and production of oxygen by photosynthetic algae, and is centred on a laboratory scale determination of power and size requirements for such a system.

You will develop laboratory apparatus where appropriate and conduct experimental trials, leading a team of junior staff and fronting presentations to the customer.

A graduate in chemistry, biochemistry or chemical engineering with a proven track record in experimental, research, you will ideally have knowledge in some of the following
Algal physiology
Design and operation of fermentation systems
Sensing, control and downstream processing for biotechnology systems
PC usage for instrument control, datalogging and data interpretation.

The nature of the research programme is highly cross-disciplinary, so the flexibility to operate effectively in areas outside your specialist discipline is essential.

Gas Chromatography Monitoring Systems

SCIENTIFIC OFFICER
£11,000 - £16,000 Ref: AW/REC/42
Holton Heath, moving to Winfrith October 1995

Part of our work is aimed at providing an automated pseudo real-time analysis system for monitoring outboard contaminants. This role will support a project utilising advanced gas chromatograph techniques aimed at developing a prototype system. It is an opportunity for an ambitious graduate with practical experience in gas chromatographic techniques - in particular column and detection technology - and ideally experience in other analytical chemistry areas for future programmes

Both positions will commence at our existing location at Holton Heath before relocating to two new purpose-built facilities. The prospects for career development are excellent, and an attractive rewards package includes relocation assistance where appropriate.
DRA welcomes applications from suitably qualified people regardless of sex, marital status, race or disability.

Please contact Penny Searson for an application form quoting the appropriate reference. Sea Systems Personnel, DRA Portsdown, Portsmouth, Hampshire PO6 4AA. Tel: 01705 332699. Closing date for receipt of completed applications 15th September 1995.

DRA is a division of DERA an Agency of the MOD.
**JUNIOR RESEARCH FELLOW**
£14,801 - £21,445pa

Internationally renowned for its collections and associated research, The Natural History Museum currently has a vacancy for a Junior Research Fellow in the Insect-Plant Division of the Entomology Department to undertake original research on the coevolutionary relationships between insects and their hosts.

You must have a Ph.D. in a biological science and a strong record in relevant research, ideally in evolutionary biology and systematics. There will be excellent opportunities for collaboration with research groups within the Department as well as other institutions, therefore good interpersonal and presentation skills are required.

The appointment will be for 3 years with the possibility of extension to 5 years. Starting salary is dependent upon experience and qualifications. We offer a comprehensive benefits package, including a non contributory pension scheme, generous leave entitlement and an interest free season ticket loan.

Apply by CV and covering letter. For further details please send an A5 SAE to: Collette Hayes, Personnel Section, The Natural History Museum, Cromwell Road, London SW7 58D.

Informal enquiries can be made to
Dr Richard Lane, Head of Entomology on 0171 938 9474, e-mail r.lane@nhm.ac.uk, or Dr Malcolm Scoble on 0171 938 9200, e-mail m.scoble@nhm.ac.uk

Closing date for receipt of CV's is Friday 15 September 1995.

The Natural History Museum is working towards Equal Opportunities.

THE NATURAL HISTORY MUSEUM
The John Innes Centre has recently opened a new purpose-built £7 million laboratory dedicated to protein structure/function studies as part of a wider Biomolecular Structure and Function Centre at the Norwich Research Park (also involving the University of East Anglia and the Institute of Food Research, Norwich).

Applications are invited for an experienced protein biochemist to manage a new protein sequencing/peptide synthesis facility in the new laboratory.

The post-holder should have a degree in biochemistry or chemistry, plus at least five years relevant postgraduate experience. It is desirable that they have managed or operated an automated protein sequencer and are familiar with peptide synthesis. They should also be able to assist/collaborate with other colleagues in the John Innes Centre in the purification and preparation of proteins and peptides.

The post-holder will interact with and advise researchers from a variety of backgrounds, ranging from genetics and physiology, to molecular biology and chemistry and the appropriate communication skills will be important.

The appointment will be at Band 5 and the starting salary will be in the range of £17,317 - £23,954 per annum with a non-contributory superannuation scheme. The John Innes Centre is an Equal Opportunities Employer.

Application forms can be obtained by writing to the Personnel Officer, John Innes Centre, Colney Lane, Norwich NR4 7UH, quoting ref NFL/990.

The closing date for completed applications will be 18 September 1995.

Informal enquiries may be directed to Dr Denis J. Murphy, tel: + 44 1603 452571, ext 2572/1581; fax: + 44 1603 259882, e-mail: MURPHY@BBSRC.AC.UK
BOSTON

MEDICAL LABORATORY SCIENTIFIC OFFICER (Grade 1 + 1)
Department of Bacteriology
Temporary for one year initially

This is a basic grade post in a busy District General Hospital for those holding State Registration.

The Department is well equipped and computerised.

The post offers interesting and varied work to the successful applicant.

Salary Scale: £10,821 per annum rising by annual increments to £14,242 per annum

For further details please contact Mr J Webb, Chief Medical Laboratory Scientific Officer, Department of Bacteriology on ext 3321.

Application forms and job description are available from The Personnel Department, Pilgrim Hospital, Sibsey Road, Boston, Lincolnshire.
Telephone No: (01205) 364801 ext 3581 (24 hour answerphone service).

We operate a no smoking policy
Do YOU have the ISIS experience we need?

MDL Information System is the world's leading supplier of chemical information management systems. Our clients include many of the largest international pharmaceutical, agrochemical and chemical companies.

To address the expanding needs of our customers, we are seeking an additional Technical Support Specialist to provide end-user support and training for ISIS.

The ideal candidate would have a degree in Chemistry, end-user experience of ISIS and the strong communication skills necessary to support and train our customers' scientists. Practical experience of Windows and PC software applications essential. A working knowledge of chemical software packages would be a distinct advantage.

Self motivation, flexibility and a desire to help customers get the very best from MDL products are vital qualities for this active and varied role, which involves a mix of office-based customer support and frequent travel to customers' sites to deliver training.

Reporting to our Technical Support Manager, the chosen candidate will join our enthusiastic and friendly UK team, based in Camberley, Surrey. Benefits include a competitive salary, performance related bonus, a company car, private healthcare insurance, pension scheme and 25 days annual leave.

We enjoy what we do and have an excellent reputation for high quality customer support and training. If you believe you have the experience, skills and personality to help us maintain that tradition, send your CV to:

Julie Page,
Technical Support Manager,
MDL Information Systems UK Limited, Building 4,
Archipelago,
Lyon Way, Camberley GU16 5ER

MDL Information System (UK) Limited
CLINICAL RESEARCH MANAGER

The Astra Group is a pharmaceutical company in a phase of rapid growth. Its operations, which have a strong international bias, are characterised by research, production and marketing in the area of pharmaceutical products through subsidiaries and agents world-wide. It has about 15,500 employees, of whom 5,300 work in Sweden. Its sales in 1994 amounted to SEK 28 billion (USD 3.65 billion).

ASTRA PAIN CONTROL AB
Astra Pain Control AB in Södertälje is a research company belonging to the Astra Group, with about 250 employees. Our products dominate the world market for local anaesthetics. Through research and development we create local anaesthetic and analgesic agents.

Our expanding team has an opening for an experienced CRM/CRA for the coordination of international clinical studies of topical local anaesthetics. This will include all aspects of clinical research from study design, protocol writing, monitoring of study sites, liaison with local monitors and CRO personnel to report writing and participation in project team activity.

Your qualifications should include a life sciences degree and ideally a minimum of 2-3 years' site-monitoring experience. You should have an excellent command of English, good written and verbal communication skills and good attention to detail. Experience in the areas of pain control, dentistry or dermatology would be an advantage.

Our headquarters are attractively located in Södertälje, on the shore of Lake Mälaren and the Baltic Sea and within easy reach of the busy city of Stockholm. We offer assistance with relocation and housing, an active sports club and a progressive working environment.

For further information, please call Stefan Lillieborg tel. +46 8553 26968, Annette Rotstein, tel. +46 8553 26044 or Marianne Bergqvist, tel. +46 8553 28231. Please write, enclosing your CV, to Marianne Bergqvist, Human Resources, Astra Pain Control AB, S-151 85 Södertälje, Sweden. The closing date for the receipt of applications is September 15.

ASTRA
ASTRA PAIN CONTROL
National Rivers Authority

AREA CONSERVATION AND RECREATION OFFICER
Winchester
from £14,148 - £17,685 (performance related)

The National Rivers Authority is Europe's strongest environmental protection agency. We now have an opportunity for a Conservation and Recreation Officer to ensure that we meet our statutory duties for Water Quality, Water Resources, Flood Defence, Fisheries, Conservation, Recreation and Navigation. This key role has direct influence on our schemes and requires a technical understanding of our functions and their constraints, and an ability to develop solutions to complex operational problems.

Providing professional conservation and recreation advice you will establish and implement an area strategy and evaluate consent applications, environmental impact assessments and county plans with particular reference to river SSSI/SAC designations. Skilled in environmental and aquatic management you will identify and promote opportunities for external organisations to achieve environmental improvements. You will also develop and propose schemes for damaged rivers, PR materials, consultation documents/articles and represent the NRA at talks and exhibitions.

With a degree in ecology or a related subject, you should have considerable experience of environmental management, a detailed knowledge of statutory and voluntary conservation and recreation organisations and the legislative and political context within which the NRA fulfils its role.

Excellent verbal and written communication skills combined with a flair for negotiating and achieving widespread support through liaison and consultation, you will be responsible for a range of environmental projects. You will manage a substantial budget employing various contractors and NRA services. Computer literacy and a driving licence are required.

Benefits include an essential car user allowance, generous holidays, sports and social club and a contributory pension. Initially, this post is offered on a 12-month contract with the possibility of renewal.

If this sounds like the challenge you are looking for please contact Ms A Vigor, for an application form, on 01962 713267. Applications should be returned to the address shown below. Closing date for applications is 14 September 1995.

National Rivers Authority Southern Region, Sarum Court, Sarum Road, Winchester, Hants SO22 5DP.

The NRA is committed to achieving Equal Opportunities.

NRA
Southern Region
Inspectors
Medicines Inspectorate
£18,911 to £30,282 negotiable at one of our offices at York, Chester, Hitchin or East Grinstead

Our job in the Medicines Inspectorate of the Medicines Control Agency is to ensure that medicines used within the UK are produced in accordance with licensing requirements to high quality standards and in line with Good Pharmaceutical Manufacturing Practice. As an inspector based at one of our regional offices, you'll find the job extremely demanding but intellectually and professionally satisfying. You'll travel widely, visiting pharmaceutical companies, manufacturing hospitals, analytical laboratories and wholesalers in the UK. You will also inspect companies abroad that export medicines to the UK in order to assess and investigate all aspects of manufacture and control.

As a minimum, you must have a degree in pharmacy, chemistry or the biological sciences and at least five years' experience in a responsible position in pharmaceutical production or pharmaceutical quality control. You must have good interpersonal and reporting skills and a lively enquiring mind. In addition to the above you should be listed by your professional society as eligible to be a Qualified Person under EC Directive 75/319 and also be eligible to be a Lead Assessor under BS5750, or be prepared to train for this.

A full valid UK driving licence is essential. Familiarity with commonly used software packages such as Word and Excel would be an advantage, but computer training will be given.

These positions are for a period of three years' in the first instance but renewable on review. Relocation assistance may be available.

For an information pack and application form, please ring Yvonne Gwam on 0171 273 0516 or write to Mike Gosling, Head of Personnel, Room 1606, Market Towers, 1 Nine Elms Lane, London SW8 5NQ quoting reference INS/9/15/95.

Applications should be received by 15th September 1995.

As an Equal Opportunity Employer the Department welcomes applicants regardless of gender, race, disability or sexuality. We operate flexible working patterns within a non-smoking environment.

MEDICINES CONTROL AGENCY
Leicester University  
Department of Cell Physiology and Pharmacology  

**RESEARCH TECHNICIANS**  
Fixed Term Posts

Applications are invited for three temporary research technician posts.  
1. **Technician** Grade C or D  
   Working with Dr I D Forsythe to support research into synaptic transmission in the auditory pathway using immunohistochemical and electrophysiological methods. Experience in either immunohistochemistry, molecular biology or patch-clamping would be considered an advantage. The post is available for three years and is supported by the Wellcome Trust.  

2. **Technician** Grade C or Graduate Trainee  
   Working with Dr J L Blank to support research involving the study of the function and regulation of mitogen activated protein (MAP) kinases. Experience in cell culture and/or molecular biology methods would be considered an advantage. The post is available for three years and is supported by the MRC.  

3. **Technician** Grade C or Graduate Trainee  
   Working with Dr J D Cavieres to support research involving the study of the mechanism of purified multi-drug resistance. ATPase (MDR or P-170) and of the mode of action of several inhibitors of the transport of anti-cancer drugs by MDR. Experience in cell culture/molecular biology and enzyme purification would be considered advantageous. The post is for one year and is supported by the MRC.  

For all posts at Grade C or Graduate Trainee level appropriate training will be given.  
For appointment to Grade D a minimum of seven years experience and a BTEC HNC or equivalent are required. For Grade C a minimum of three years experience and a BTEC National Certificate or equivalent are required. The experience requirements include any period of training. Recent or inexperienced graduates may be appointed as Graduate Trainees at an initial salary of £9,835 pa.  

Salaries Grade D - £11,707 to £13,977 pa. Salaries Grade C - £10,138 to £11,368 pa.  

Written applications a CV and the names and addresses of two referees, indicating post(s) applied for, should be sent to: Departmental Superintendent, Department of Cell Physiology and Pharmacology, Faculty of Medicine, University of Leicester, University Road, Leicester LE1 9HN from whom further details can be obtained by telephoning 0116 252 2925.  

Closing date for applications is 15 September 1995.

POTATO MARKETING BOARD

1995 Postgraduate Studentships
The Potato Marketing Board is offering the following Postgraduate Studentships:

Application of strategies to modify starch structure in potato tubers Supervisor: Dr Howard V Davies, Scottish Crop Research Institute, Invergowrie, Dundee, DD2 5DA. Tel: (01382) 562731 Fax: (01382) 562426.

The role of an aspartic protease in the metabolism and processing potential of stored potato tubers
Supervisor: Professor Andy H Cobb, Dept of Life Sciences, Nottingham Trent University, Clifton Lane, Nottingham, NG11 8NS. Tel: (0115) 9486692 Fax: (0115) 9486636.

The exploitation of the Electronic NOSE for the screening and characterisation of potato varieties with respect to their aroma and flavour
Supervisors: Dr Jean A McEwan, Campden and Chorleywood Food Research Association, Chipping Campden, Gloucester, GL55 6LD Tel: (01386) 840319 Fax: (01386) 841306 and Dr Paul Davies, School of Mathematics and Statistics, The University of Birmingham, Birmingham, B14 2TT. Tel: (0121) 4146194 Fax: (0121) 4143389.

Determinants of potato crop 'maturity' to predict storage quality Supervisor: Dr Howard V Davies, Scottish Crop Research Institute, Invergowrie, Dundee, DD2 5DA. Tel: (01382) 562731 Fax: (01382) 562426

Applicants should have a first or upper second class honours degree in a relevant subject.

Enquiries and requests for additional information on the projects and conditions of the Awards should be directed, in the first instance, to the named supervisor. The current value of the Awards is £6,500 per annum plus fees.

Please submit written applications with curriculum vitae and names of two academic referees to the appropriate supervisor.

Closing date for receipt of applications is: Friday 15 September 1995.

ASRU LIMITED
APPLIED STATISTICS RESEARCH UNIT

ASRU Ltd is a highly successful company providing statistical and data management services to industry and commerce. Due to the increasing demand for our services from the pharmaceutical industry, we currently have several opportunities for well-motivated statisticians of varying experience.

STATISTICIAN
You will be working on the statistical analysis and reporting of the clinical trials of some of the world's leading pharmaceutical companies in teams of other ASRU Ltd statisticians and data managers. You will bring with you excellent communication skills, a keen attention to detail and a creative bent to solving problems. You will also have a post-graduate qualification in Statistics or 2 or more years' relevant work experience in the pharmaceutical (or allied) industry. A working knowledge of SAS will be a definite advantage.

SENIOR STATISTICIAN
You will be leading teams of ASRU Ltd statisticians and data managers involved in the statistical analysis and reporting of clinical trials from all phases of drug development. You will also be contributing to the development of the statistics and reporting group of ASRU Ltd. You will bring with you a natural ability for organisation and leadership, as well as excellent communication skills, a keen attention to detail and creative bent to solving problems. You will ideally have a post-graduate qualification in Statistics and 3-5 years' relevant work experience in the pharmaceutical (or allied) industry. An extensive knowledge of SAS will be essential.

We can offer a competitive salary with pension scheme for statisticians looking to develop their careers in a challenging environment.

Application forms and further details may be obtained from the Personnel Office, Registry, University of Kent, Canterbury, Kent, CT2 7NZ, telephone (01227) 475482 (24hr answerphone) or (01227) 764000 extension 3915, quoting reference number A95/110 for Statistician and A95/111 for Senior Statistician. Closing date for applications is 15 September 1995.

POSITIVE ABOUT DISABLED PEOPLE

The University is committed to implementing its Equal Opportunities Policy.

UNIVERSITY OF KENT
AT CANTERBURY

Excellence in Higher Education at Britain's European University
Pharmakopius International is a leading provider of product development services to the Pharmaceutical Industry worldwide and has an established reputation for excellence. Continuing growth of the company has led to the following opportunities.

**Senior Statistician**
Working closely with our clients, your role will involve the planning and analysis of statistical data from Phase I-IV clinical trials. With experience gained in pharmaceutical research your ability to advise on the design of clinical trial studies will be of paramount importance. Further knowledge of research methodologies and effective communication skills will enable you to take responsibility for client liaison and provide a professional contribution to our organisation from the outset.

With a degree in statistics and preferably an MSc in medical statistics or biometry you should bring to this position at least three years experience gained in contract research or a similar pharmaceutical environment.

**Medical Writer**
Professional interpretation of clinical trial data (Phase I-IV) and effective presentation of written reports are essential to the achievement of our clients regulatory objectives. Your background in life sciences should include at least two years' clinical trial report writing. Further experience of preparing protocols and drafting manuscripts for publication will enable you to satisfy our sponsors requirements for high-quality, detailed texts.

Highly motivated and well organised with sound commercial acumen, you should be an effective communicator at all levels as this role offers the opportunity for full project responsibility and liaison with our international clients.

We offer a competitive salary and benefits package for both these positions and welcome applications from suitably qualified, enthusiastic professionals. If the prospect of contributing to the success and expansion of our organisation appeals, please apply in writing, enclosing a comprehensive career résumé and stating which position is of interest, to:
Mrs S. J. Smith, Director of Human Resources, Pharmakopius International, Alexander House, Gatehampton Road, Goring-on-Thames, Berkshire, RG8 0EN.

Pharmakopius International
PUBLIC HEALTH LABORATORY SERVICE  
Respiratory and Systemic Infection Laboratory

**Clinical Scientist** Grade B 8-10:  
12 month grant funded contract

An experienced scientist with expertise in both microbiological and immunological procedures is required to work on a Home Office funded study for the development and evaluation of methodologies for detection of toxigenic *Corynebacterium diphtheriae*. The research is primarily focused upon the development of a novel method for detection of the diphtheria toxin that will be useful in diagnostic laboratories both in the UK and overseas. Experience in immunology, microbiology and molecular techniques is preferable. The postholder will also be trained in all procedures relating to the microbiological diagnosis of diphtheria within the PHLS/WHO Streptococcus and Diphtheria Reference Unit. For further information contact Dr Androulla Efstratiou on 0181 200 4400, ext 4270.

Salary scale: £16,019 - £17,326 plus £1,189 London Weighting.

Please write with full CV and covering letter including the names of two referees to CPHL Personnel, 61 Colindale Avenue, London NW9 5HT and quote reference RSIL/5.

Unfortunately, due to costs, only short-listed candidates will be notified further and so if you do not hear from us within four weeks; please assume that you have been unsuccessful on this occasion.

The PHLS is an equal opportunities employer.

The University of Reading  
Department of Food Science and Technology

**Postdoctoral Research Fellow**  
Flavour Chemistry

To investigate flavour formation and flavour binding in novel food products, using chromatographic and mass spectrometric techniques in conjunction with sensory analysis. Applicants are likely to have a postgraduate qualification in chemistry, food science or biological science, and experience of the above techniques would be an advantage.

Appointment will be on the Research 1A scale, and is for 18 months with the possibility of extension for a further one or two years.

Informal enquiries to Dr. D. S. Mottram on (01734) 316519. Application form and further particulars from Personnel Officer, The University of Reading, Whiteknights, P.O. Box 217, Reading RG6 6AH, telephone (01734) 318754. Closing date 21 September 1995. Please quote Ref. R9555.

A centre of excellence for university teaching and research.  
UNIVERSITY OF BRISTOL
Rheumatology Unit

Postdoctoral Research Assistant

Applications are invited for a Postdoctoral Research Assistant, funded for 3 years, to study the mechanisms by which bone formation is regulated by sex steroids. You will join the Rheumatology Unit, which is part of the Department of Medicine of the University of Bristol.

Salary will be on the RA1A scale up to £17,466 per annum.

Informal enquiries should be made to Dr Jon Tobias on 0117 928 2907.

For further details telephone 0117 925 6450 (answerphone after 5pm), or minicom 0117 928 8894, or write to the Personnel Office (EO), University of Bristol, Senate House, Bristol BS8 1TH, quoting reference D514.

Interviews will be held during week commencing 9th October 1995. Closing date: 22 September 1995.

An equal opportunities employer
An International Centre for Education and Research
POSTDOCTORAL RESEARCH FELLOW

This post is available immediately for two years, to carry out research and apply new molecular techniques in the study of gene regulation in microvascular cells, with particular reference to the endothelium-derived vasomodulatory agents, to contribute to the enhancing of the research profile and develop new research themes in the department. Applicants must hold a primary degree in biological sciences, biochemistry, molecular biology, pharmacology or other relevant scientific subject, hold a Ph.D. and have two years postdoctoral experience and a good publication record commensurate with experience.

Salary range: £14,319 - £18,985 per annum, placing depending on age, experience and qualifications.

Applicants, quoting ref 95/B2 may obtain further particulars from the Personnel Officer, The Queen's University of Belfast; Belfast BT7 1NN, Northern Ireland. Telephone (01232) 245133, ext 3044/3246 or fax (01232) 324944/310629.

Closing date: 15 September 1995.

The University is a charity, established in 1845 to advance education. Committed to an Equal Opportunities policy and selection on merit, it welcomes applications from all sections of the community.

Applications are invited for a postdoctoral assistantship on the chemoenzymatic synthesis of carbohydrates. Applicants should have a background in synthetic organic chemistry. Experience in carbohydrate chemistry and/or biotransformations would be an advantage. The position is available immediately. The salary will be on the Research Grade 1A Scale £14,317-£21,519 per annum.

Enquiries to Professor D. H. G. Crout, Department of Chemistry, University of Warwick, Coventry CV4 7AL, UK. Telephone 01203 523961; Fax: 01203 524429; e-mail: msryy@csv.warwick.ac.uk

Application forms (returnable by 23 October 1995) from the Personnel Office, University of Warwick, Coventry CV4 7AL (telephone 01203 523627) quoting ref: 3/4A/95 (please mark clearly on envelope).

The University of Warwick is an exempt charity dedicated to excellence in teaching and research and is an Equal Opportunities Employer.

LABORATORY SCIENTIFIC OFFICER 1
Division of Immunology

required to provide technical scientific support based primarily in the Malaria laboratory in the Division of Immunology in this busy Medical School. You will be required to assist in research, in teaching preparation and especially the supervision of students' practical work. Applicants should have a HNC/D or degree (or equivalent) in a biological science and two years' laboratory work experience. Expertise in protein electrophoretic techniques, microscopy and maintenance of cell cultures is desirable.

Salary range £12,004 - £15,692 pa inclusive. For a job description which contains details of the application procedure call 0171-922 8049 (24 hours) quoting reference G/IMM/518.

Closing date for receipt of applications: 22 September 1995.

GUY'S AND ST THOMAS'S MEDICAL AND DENTAL SCHOOL
(University of London)
Clinical Research Associate
Set-up and manage multi-centre studies for a unique osteoporosis product
M3
attractive package + car

In its quest for true scientific innovation, this top-ten, research-based pharmaceutical company has underlined its commitment by targeting specific disease areas. A major focus is on advancing endocrinology drug discoveries, including osteoporosis and diabetes. Osteoporosis is the biggest research programme undertaken by the company which has resulted in an excellent, high-profile product that is unique in the marketplace. The growth of the clinical research project has created this exciting new role for an experienced Clinical Research Associate to join the business team. There are a number of projects in Phase III for which you'll either take sole responsibility or work closely with the enthusiastic and high-calibre team to set up and manage the multi-centre studies, ensuring all the monitoring, reporting and pre-marketing activities are progressed swiftly to support impressive product launches.

A life science or nursing graduate with at least one year's experience as a CRA, ideally including some exposure to bone physiology, your excellent planning, organising, analytical and report-writing strengths must be complemented by strong interpersonal and team-working skills.

If you're looking to make a significant contribution to a fast-paced, dynamic and expanding team, send your cv to Ann Judge, Eames • Jones • Judge • Hawkinings, 29 High Street, Welwyn, Herts AL6 9EE. Telephone: 01438 840984. Fax: 01438 840429.

biotechnology and biological sciences research council

Shaping Research to Meet the Needs of Industry - Technical Expert Required

The aim of the BBSRC Food Directorate is to develop and support high-quality strategic research and training and technology programmes which promote the international competitiveness of the food industries, underpin innovation in the food chain and enhance consumer confidence and the quality of life.

The BBSRC Food Directorate is seeking a technical consultant to assist in the future development and implementation of one of its programmes: Microbiological Aspects of Food Safety and Preservation. This will include: liaising with industry to identify where additional research is needed and to foster close collaboration with academics; encouraging and assisting academics to submit research grant applications; monitoring the progress of funded research projects; and developing mechanisms to ensure effective technology transfer.

We require an individual with a detailed knowledge of the science involved and sufficient commercial awareness to give credibility in discussion with both academia and industry. Candidates should therefore have recent relevant experience and we will consider applications from professionals who can be released from their present employer to undertake this work on a part time basis.

Remuneration is negotiable and will include full reimbursement of all travelling and subsistence expenses. The position will involve working a total of approximately 60 days p.a.

The closing date for applications is 29 September 1995. For further details and an application form, please contact Joanne Allman: Tel: (01793) 413263. Fax: (01793) 414674. E-mail: JO.ALLMAN@BBSRC.AC.UK.
WWF UK (World Wide Fund For Nature)
the leading international conservation organisation has a vacancy for an

**AID & ECONOMICS POLICY OFFICER**

To promote conservation of biodiversity and sustainable use of natural resources through influence over aid programmes and UK economic decision making.

The main responsibilities of this position will include:

- Policy research and lobbying to influence the ODA and other aid institutions such as the EBRD.
- Promoting economics for sustainable development, particularly ecological tax reform and green GNP.
- Promoting the development and use of indicators of environmental quality and sustainable development.

The successful applicant will probably have a first and second degree in Economics, Management and/or Natural Resources, and a minimum of 5 years experience either in developing countries or in policy work on development issues. Experience in managing policy research studies and lobbying both national and international institutions would be an advantage.

For an application form and job description, please send a large SAE to Lynne Dare, WWF UK, Panda House, Weyside Park, Godalming, Surrey, GU7 1XR. Applications will not be accepted after 13th September 1995. Interviews will be held on 11th & 12th October 1995.

WWF UK is striving towards Equal Opportunities
BROWNE
RESEARCH TECHNOLOGIST

Albert Browne Ltd is a progressive healthcare company whose product range includes the most comprehensive and commercially successful array of chemical indicators for sterilisation monitoring in Europe.

A scientist is required to fulfil an R&D function which will aim to ensure the product range stays ahead of the ever-increasing sophistication of sterilisation systems, while looking to expand the product range into related healthcare technologies.

The successful candidate will have chemistry/biochemistry to Ph.D. level (or equivalent research experience). Relevant industrial experience is preferable but not essential.

To apply, send full CV to the Managing Director, Albert Browne Ltd, Chancery House, Rosebery Road, Anstey, Leicester LE7 7EL.
Postdoctoral Research in the Dyson Perrins Laboratory

Applications are invited for up to four postdoctoral posts to work with Dr. John M. Brown on catalysis projects in a broad-based research programme funded by EPSRC and LINK Asymmetric Synthesis. Successful applicants will have a background in organic, organometallic or physical organic chemistry.

Further details of individual projects, which embrace (a) the synthesis of novel ligands, (b) asymmetric catalysis (c) mechanistic studies (d) combinatorial approaches to catalysis and (e) organic reactions at the solid-solid interface, can be obtained from the above at: The Dyson Perrins Laboratory, South Park Road, Oxford OX1 3QY, UK. Fax (01865) 275674; e-Mail bjm@wax.ox.ac.uk. Appointment will be made on the RS1A scale commencing at £14,317 (age 25) plus USS according to age and experience. Candidates should apply to Mr. G. M. Hurst in the Dyson Perrins Laboratory within fifteen days of the appearance of this advertisement and must arrange for two referees to send letters of support at the time of making their application.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

**Embryologist**

We are seeking to appoint an experienced and motivated embryologist to extend our services within our rapidly expanding and busy Unit. The Unit is exceptionally well equipped and is located within a private hospital setting.

The successful candidate needs to be experienced in all laboratory aspects of gamete handling, cryopreservation and semen preparation. ICSI experience is desirable but not essential as training will be provided.

The position will appeal to applicants who enjoy contact with patients and working in a team environment. Rostered weekend and occasional evening work will be required. Salary is dependent on experience.

Candidates should apply by sending a current CV with a covering letter indicating present salary, to Mrs P. Glanville, Northamptonshire Fertility Service, Three Shires Hospital, The Avenue, Northampton NN1 5DR.

RESEARCH FELLOW
Free Radical Research Group,
Division of Biochemistry, Guy’s Campus

The above position is available in one of the leading Free Radical Research Groups in Europe directed by Professor Catherine Rice-Evans and Professor A Diplock. The post is funded by the Ministry of Agriculture, Fisheries and Food for three years and involves studies on the antioxidant properties of constituents of higher plants in vitro and in vivo. The project will be in collaboration with Professor Barry Halliwell (King’s) and Dr Peter Bruni (Royal Holloway). Applicants should have hplc and computer skills, and ideally two years' postdoctoral experience. Knowledge of free radical techniques is desirable.

For a Job Description which includes details of application procedure please phone 0171 922 8049 (24 hours) quoting Reference G/BIO/519.

Closing date for applications: Friday 22 September 1995.

INNOVEX
An interactive-management and business development opportunity as

Clinical Contract Hire Account Manager

Innovex is the leading provider of support services to the Pharmaceutical industry from the earliest phases of drug development through to marketing and beyond. The key to its success is its flexibility in meeting the needs of its clients, many of whom are blue chip companies, and in the development of its growing number of talented people.

In your new role you'll advise, support and assist your own clients in developing and implementing solutions to their human resourcing problems. You'll interact with them in the recruitment, selection and on-going management of contract CRAs. In addition, you'll expand and develop new business with new clients. To be successful in this high profile client liaison role, you'll have:

• a sound background in clinical research and CRA management
• good commercial awareness
• a penchant for growing and developing business

You're a communicator with strong persuasive presentation skills and above all you are a mature and skilful manager.

If you would like to apply for this position, please send your CV to Mrs Catriona Shuba, or telephone for a brief discussion first, quoting the reference number 9575.
