77. The position is a strategic one, and the lecturer will be expected to interact with established groups in allied areas which include marine geochemistry, experimental fluid-rock interactions under in situ conditions, and near-surface geophysical methods. [1998-043 (1995) : 86]

78. Applicants for this post will need to possess a First or Upper Second Class honours degree covering one of the following areas: Pharmacology, Pharmacy, Toxicology or Physiology. [1998-045 (1995) : 87]

79. Arising from a further expansion of the Faculty's Research Centre, applications are invited from graduates with a minimum of an upper second class honours degree in an appropriate discipline and with appropriate experience for research posts in the following areas: The extent and mechanisms of cross contamination in domestic food preparation; Techniques and strategies for assessing the effect of educational hygiene intervention on consumer food hygiene practices; Modelling effect of modified atmosphere packaging on microbial growth/survival characteristics; Authenticating the protein composition of heated foods; Mechanisms of death and recovery of micro-organisms following the application of combined food preservation treatments; Bacterial contamination of surfaces and the survival and growth of pathogens in microbial films associated with food production [1998-048 (1995) : 88]

80. Physics research on acoustical and electromagnetic materials, the interaction of wave propagations with materials, and associated measurement techniques are key capabilities and we are expanding our research in these areas for a wide range of Defence, Civilian and Medical applications. [1998-087 (1995) : 98]

81. The successful candidate will be expected to have good laboratory practise and expertise in at least one of the following areas: soil biology, feeding-trials and plant bioassays. [1998-093 (1995) : 99]

82. A wide knowledge of health related aspects of water microbiology and other areas such as environmental health, biotechnology or molecular biology is also required. [1998-099 (1995) : 102]

83. The successful candidate will become part of a team working on areas such as the application of CFD models to problems of smoke movement and control, the development of existing models to include fire development and suppression, the development of user-friendly interfaces for the input and output from CFD models (including the possibility of using virtual reality techniques) and the development of a consolidated approach to fire safety design in buildings. [2002-018 (1995) : 60]
84. Following the recent appointment of G M Megson to a Chair in Computer Science applications are invited for a four year fellowship in the area of parallel and distributed architectures with an emphasis on emergent computing structures for algorithm specific design techniques. [2002-032 (1995) : 64]

85. You will be working closely with Professor Megson in one of the following areas: Regular Algorithm Design, High Level Array Design tools, Algorithm Engineering and Hardware Compilation and must be able to link effectively with other members of the Parallel, Emergent and Distributed Architectures Laboratory (PEDAL) at Reading. [2002-032 (1995) : 64]

86. In addition to a good degree in civil engineering, materials science or physics, you should have at least five years’ experience in two or more of the following areas: • asphalt research • asphalt road design and construction • bitumen rheology • polymer modification of bitumen. [2002-059 (1995) : 64]

87. In recent years Bullard Fellows have been associated with the Harvard Forest, Department of Organismic and Evolutionary Biology and Kennedy School of Government and have worked in areas of ecology, forest management, policy and conservation. [2002-085 (1995) : 79]

88. The present positions prefer people specialising in one or more of the areas: database, real time, software engineering operating systems or applicable mathematics. [2006-013 (1995) : 64]

89. Research interests of members of the Division include areas of anatomy, molecular biology, biophysics, pharmacology, physiology, human biology and physiotherapy, with particular emphasis on neurobiology and neuropharmacology, cell biology, human biology and physiology, receptors and intracellular signalling, cellular and molecular endocrinology and reproduction. [2006-029 (1995) : 69]

90. We wish to recruit research staff for projects in the following areas: Functional Imaging in Neuroscience; Quantitative Interpretation of Biomedical Images [2006-030 (1995) : 69]

91. Expansion of our research programme has created opportunities in the following areas. Plastics; Electronics; Experimental and mathematical modeling; Joining Technology [2006-041 (1995) : 73]

92. and is especially keen to fund high quality applications in the following areas: Sequence to function: making sense of sequence data; Comparative genome analysis; Understanding how computer science and IT techniques can aid biological research; Methods to create biological databases from uncomputerised or unstructured data; Tools for handling images of biological material; New approaches to the integrity and maintenance of biological databases [2006-065 (1995) : 79]

93. Each of the five successful applicants will undertake research in one of the following areas: Communications and Electro Optics; Large eddy simulation in fluids; Control of flexible structures; Boundary-layer stability; Heat transfer in internal combustion engines using advanced instrumentation; Modelling and control of multi-wheel skid-steer hybrid vehicles; Development of armour systems for ballistic protection of personnel; Hydrocode modelling of fibre reinforced composite materials; The optimisation of a novel form of sandwich construction; Optimisation of hull design for inland waterway craft; Verification, validation and accreditation of networked simulations [2006-067 (1995) : 79]

94. Vacancies currently exist in the following areas: Marine pelagic and demersal fisheries; Shellfisheries; Salmonid and freshwater fisheries; Ecological and fisheries modelling [2006-068 (1995) : 80]

95. In recent years Bullard Fellows have been associated with the Harvard Forest, Department of Organismic and Evolutionary Biology and Kennedy School of Government and have worked in areas of ecology, forest management, policy and conservation. [2006-070 (1995) : 80]
96. Research topics should relate clearly to one of the following research areas of the UNU/IAS for the initial 1996-97 years: (i) eco-restructuring for sustainable development; (ii) mega-cities and urban development (iii) policy aspects of science, technology, and society in relation to sustainable development; and (iv) peace, multilateralism, and governance. [2006-075 (1995): 82]

97. Applicants who will probably hold a higher degree must demonstrate: [...] Training and skills in areas of research methods, experimental design or statistics. [2006-077 (1995): 82]

98. Queen's University is pleased to announce a new and attractive post, tenable from 1 February 1996 or such other date as may be agreed, to strengthen research in archaeology; establish and oversee an archaeological field unit capable of bidding for contracts in areas such as archaeological excavation, archaeological building or underwater survey, and to teach within a proposed new MSc programme in Archaeological Field Studies. [2006-096 (1995): 87]

2005

1. To strengthen our team we are seeking graduate trainee patent attorneys with knowledge and experience in one or more of the following areas: Electronic engineering; Optical communication and devices; Software engineering [2481-014 (2005): 57]

2. SNH is now looking for a number of new members who have expertise in one or more of the following five areas: 1) Coastal ecology/ornithology, 2) Field botany/plant ecology, 3) Geology/earth Sciences, 4) Landuse systems/modelling, 5) Marine ecology. [2481-036 (2005): 64]

3. You should have a MSc in an appropriate area such as environmental science, land contamination, chemistry etc with a minimum of 2 years' relevant post graduate work experience. [2481-041 (2005): 66]

4. Based in the Health Protection, Toxicology and Radiation Branch, you will undertake chemical risk assessments of a variety of areas including pesticides, biocides and consumer products. [2481-051 (2005): 69]

5. Post-graduate experience is desirable in such areas as GIS, database development or groundwater modelling. [2481-058 (2005): 71]

6. The Analytical Sciences Team conducts world-leading research in a diverse range of areas including nanotechnology, electrochemistry, environmental measurements, and remote sensing. [2481-062 (2005): 72]

7. Research areas include: • advanced materials • cost engineering • water sciences • manufacturing • welding • nanotechnology • biomedical engineering • microsystems engineering • water sciences [2481-080 (2005): 78]

8. Specifically in the areas: • Host bacteria interactions • Fermentation/Processing • Molecular methods for identification • Therapeutic effects [2481-084 (2005): 79]

9. Applications are invited for studentships in the following areas: [Role of Dectin-1 in dendritic cell function; A novel role for HLA-827 in the inflammatory disorder Ankylosing Spondylitis; Control of Gene Expression by Induced Protein Folding; Gene nutrient interactions and bone health; Regulatory circuits that control the responses of a fungal pathogen to its host; Cell-cell adhesion and
mechanotransduction in bone; Novel genetic systems to study brain circuits; Cell cycle, hyphal growth and pathogenesis of Candida albicans; Cancer as a developmental disease; TNF life/death switching as a means of controlling human cancer cell fate; Neuromuscular adaptations to vibration; The involvement of PrLZ in human prostate cancer; Functional genomics of alpha-catenin function: understanding the role of an important tumour suppressor; Species differences in substrate specificity and induction of hepatic drug transporters [2485-008 (2005) : 59]

10. In 2005, SNH will fund three Ph.D studentships drawn from one or more of the following areas within the SNH Corporate Plan: Access and nature conservation; Impacts of renewable energy development; Biodiversity; Climate change and the natural heritage; Largescale ecology, especially in relation to ecological networks and catchment management; Coastal dynamics and sediment regimes [2485-021 (2005) : 62]

11. An understanding of crop traceability, quality assurance and registration issues for pharmaceutical products would be beneficial, as would experience in one or more of the following areas: cereal chemistry; plant volatile emissions; post-harvest physiology. [2485-042 (2005) : 72]

12. A well-funded drug discovery company, we are using our proprietary ion channel capabilities to develop a pipeline of ion channel drug molecules across a number of indications - focusing on the cardiovascular, neurology and metabolic disease areas. [2485-066 (2005) : 80]

13. We are offering 3 Post Doctoral Fellowships in the areas of X-Ray Science, Imbedded Intelligence and Biomedical Endovascular Research. [2485-067 (2005) : 80]

14. Applicants for post-doctoral positions should have a Ph.D. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline. [2485-083 (2005) : 85]

15. Applicants for post-doctoral positions should have a Ph.D. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline. [2485-083 (2005) : 85]

16. It is essential that you have specialist knowledge of one or more of the following areas: drugs and toxicology, the examination of marks and traces (tool marks, glass, paint etc), hairs and fibres or analytical chemistry experience applicable within the forensic science arena. [2485-101 (2005) : 90]

17. Projects are available in the following areas: Adhesives and Composites; Laser Diagnostics; Chemistry of Advanced Fuels; Catalytic Oxidation; Distributed Power Systems; Carbon Capture; Environmental Engineering; Multiphase Flows; Non-destructive Evaluation; Mechanics of Soft Solids; Nano-particles and Materials; Medical Robotics; Renewable Fuel Technologies; Railway Technology; Thermal Barrier Coatings; Turbulent Reacting Flows [2485-107 (2005) : 92]

18. The next 3 years are devoted to the PhD project, subject areas and supervisors for which are: Role of stroma in T cell development; Role of stroma in leukocyte survival; Epstein-Barr virus & B cell transformation; Leukocyte recruitment and inflammation [2485-110 (2005) : 92]

19. Applications are invited for suitably qualified UK or other EU nationals for studentships in the following areas. • Behaviour and ecology of fish and freshwater invertebrates. • Ecology of soils, plants and fungi. • Functional and genetic diversity in marine and freshwaters. • Interactions between viruses and bacteria in aquatic ecosystems. • Intercellular signaling and communication in microbes. • Unraveling host-parasite interactions. • Why have sex? The evolution of sex and recombination. • Physiology of defective luteal function: a proteomics approach. • Proteomics of oocyte maturation in Welsh breeds of sheep. • Mechanisms of invasion of bovine mammary epithelial cells by Staphylococcus aureus. • Role of the Somatotropic Axis on Mammary Epithelial Cell Function. • The effect of yeast on microbial numbers and activity in the rumen and the hindgut of equines. [2485-111 (2005) : 93]
20. Our modern well-equipped research facility in Alnwick is engaged in the development of a wide range of new pharmaceutical products, and is helping us develop leading positions in seven major therapeutic areas; cardiovascular disease, thrombosis, oncology, diabetes, central nervous system, internal medicine and vaccines. [2489-019 (2005) : 68]

22. The School of Pharmacy is seeking a postgraduate research associate to conduct and supervise research in the area of clinical pharmaceutics, including formulation and stability studies. [2489-060 (2005) : 79]

23. Applicants should have a 1st or 2.1 degree in any area of the mathematical, physical, computer, engineering or life sciences. [2489-067 (2005) : 80]

24. Successful candidates will have a degree/MSc/PhD or equivalent in the area of life sciences or organic/medicinal chemistry. [2493-001 (2005) : 54]

25. Experience in any of the areas of immuno-magnetic separation, propagating and purification of bacteriophages and of antibody production is highly desirable as is direct experience of dealing with AOAC and AFNOR. [2493-006 (2005) : 56]

26. Other areas of interest to the Division include the molecular mechanisms of synaptic transmission, circadian rhythms and neurodegenerative diseases. [2493-017 (2005) : 59]

27. Applicants should be State Registered Biomedical Scientists (Grade 1) or Research Technicians with a relevant first degree and at least 2-3 years experience in at least one of the following areas: immunology, biochemistry and infectious agents. [2493-034 (2005) : 67]

28. Applications are invited for PhD fellowships, plus 3-month and 6-month stays, under the EU FP6 Marie Curie program for Early Stage Training, Areas of interest include, but are not limited to, nickel superalloy design, lightweight aluminium alloys, novel low cost or superelastic titanium alloys, new oxide ceramic based composites and substrate stainless steel development for fuel cells. [2493-038 (2005) : 67]

29. Opportunities currently exist in the following areas: Medical; Materials; Engineering design; Sensors; Non-linear dynamics [2493-061 (2005) : 73]

30. We are an RAE grade 5 department undertaking research in a wide number of areas: Astronomy and astrophysics; Astroparticle theory and cosmology; Organic opto-electronic materials and devices; Particle physics; Polymer physics and soft nanotechnology; Semiconductor physics and devices; Theoretical condensed matter physics [2493-062 (2005) : 73]

31. Working in the Pedestrian Safety team your work will be varied and could encompass the following areas: assessment of the slip potential of footwear and flooring research into the prevention of slip and trip accidents; root causes of accidents and behavioural change; accident characteristics of stairs, walkways, ramps and ergonomics issues in prevention of low falls. [2498-016 (2005) : 56]

32. However applications from candidates with experience in other areas of soil science (e.g. nutrient cycling and/or microbial biomass) are also invited. [2498-024 (2005) : 58]

33. Fellowships tenable from 1st August 2005 are available in the following subject areas: Biomathematics; Motivations and Means of Global Migration; Chromosomes and Development; (Tephrochronology) [2498-049 (2005) : 68]
34. You should have a PhD and two years’ post-doctoral experience in one or more relevant areas (cell signalling, adipogenesis, micro-array analysis, proteomics). [2498-057 (2005) : 70]

35. Experience in cancer cell biology with expertise in one or more of the following areas: enzymology, HPLC analysis, cell culture, molecular biology, cell signalling, fluorescent microscopy, FACS analysis would be an advantage but it is not a pre-requisite. [2498-059 (2005) : 71]

36. Expertise in one or more of the following areas is essential: • Microfluidics / Lab-on-a-chip systems • Integrated analytical systems consisting of optical, (electro-)chemical, mechanical, or biological components • Biochips / Bio-MEMS devices • Polymer device fabrication [2498-061 (2005) : 71]

37. Areas of expertise relevant to the five posts include: development and application of materials to biological/medical systems theoretical or experimental analysis of human body systems, implants and prostheses, drug delivery systems, applications of engineering to surgery applications of micro-engineering to biological and medical systems and analysis of fluid flows in the human body. [2498-066 (2005) : 73]

38. We undertake research in the areas of oncology, biomaterials, drug delivery, molecular design, pharmacology, physiology, molecular medicine, natural products and pharmacy practice. [2498-067 (2005) : 73]

39. PhD studentships in Exeter and Cornwall funded by NERC, BBSRC, EPSRC (including CASE awards), industry and charities are available in the following areas: • Understanding the causes of urban house sparrow population decline • Genetic status of stocked Atlantic salmon populations • Integrative mechanisms controlling gender-assignment in fish • In silico modelling of insect-mediated gene escape from GM crops • Integrating transcriptomics and metabolomics to study plant adaptation • Evolutionary/behavioural ecology of risk and information use by animals • Exploring the plant growth promotion and biocontrol attributes of fungi • Chemical genetics - novel molecular components of plant infection by fungi • Estuarine habitat modifications and their impact on shorebirds • Two NERC projects on environmental/ecological/ecophysiological topics. [2498-068 (2005) : 74]

40. Six further PhD projects (funded by 4-year graduate teaching assistantships) are available in the areas of molecular biology, plant sciences, microbiology, chemical biology, environmental biology and ecology. [2498-068 (2005) : 74]

41. In particular, we are looking individuals to help us develop business in the following areas: Environmental Microbiology; Occupational Health Services; Other Specialist Services [2502-010 (2005) : 58]

42. The Council is seeking applications for new Council members in the following areas: • Philosophy • Cell biology/neuroscience • Clinical epidemiology • Immunology • The media [2502-029 (2005) : 64]

43. The Group develops products in three targeted therapeutic areas: oncology, endocrinology, and neuromuscular disorders and is also engaged in developing certain biological derived products. [2502-034 (2005) : 66]

44. You will be capable of providing high quality research and organisational support for the groups working in areas that include yeast cell culture, molecular biology and biochemical analysis of proteins. [2502-047 (2005) : 71]

45. Bursaries and travel funding are currently available for studentships in the following areas: • Synthesis of materials for nanoscale devices • Molecular self-assembly • AFM/STM studies of molecular scale devices • Molecular electronics • Sensors [2502-064 (2005) : 75]
Within the School’s extensive Industrial Collaborative Programme, there is an opportunity for the successful students to work closely with companies (e.g. Baxi, E.ON, Gifford, Hoare Lea and Thermacore) in research areas including energy efficiency, renewable energy, energy conservation, and architecture technology. [2502-067 (2005) : 77]

WestCHEM offers opportunities for research in all areas of modern chemistry, including functional materials chemistry, medicinal chemistry, organic and inorganic synthesis, structural chemistry, analytical chemistry, biological chemistry, chemical proteomics and heterogeneous catalysis.[2502-068 (2005) : 77]

Highlighted research areas include: • analytical and environmental chemistry • combinatorial chemistry • e-science - medicinal chemistry • chemical biology • electrochemistry • organic synthesis • organometallic and co-ordination chemistry • solid-state chemistry • supramolecular chemistry • theoretical chemistry and molecular modelling • surface and interfacial science [2502-069 (2005) : 77]

Specific subject areas are aerodynamics, lightweight composite structures, energy-saving and electrical systems, and stability and control. [2506-060 (2005) : 75]

Areas of research include the development of novel insecticides and the design and evaluation of physical methods of insect detection and control. [2506-063 (2005) : 75]

Applications are invited from UK and international organisations for research and surveys in the following areas: • Chemical contaminants from food contact materials, articles and food production • Reduction of campylobacter and salmonella in poultry • Post-market monitoring strategies for consumption of Novel Foods [2506-075 (2005) : 78]

You will have at least 2 years’ full-time experience in at least one of the following areas: Process Control Equipment, Laboratory Equipment or Instrumentation. [2511-011 (2005) : 55]

Experience in one or more of the following areas would be advantageous: mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming, database design. [2511-036 (2005) : 63]

Our foremost requirement is for scientists with expertise in the following areas: * Reproductive Toxicology * Inhalation Toxicology * Intravenous Infusion Closing * Chronic Toxicology [2511-037 (2005) : 63]

General areas of research carried out by the BPSRG are: Biomedical Sciences: haematology, oncology, immunology, nutrition, microbiology, parasitology and vector biology medical physics and sports science. Pharmaceutical Sciences/Pharmacy: organic synthesis of bioactive molecules, medicinal chemistry, drug action and drug delivery, and pharmacology. [2511-068 (2005) : 75]

In the context of its Environment programme, Cefic-LRI is requesting grant applications from research institutes in the areas of: Evaluation of fish embryo and fish cell line tests for their potential use as alternatives to fish acute studies; Establishing a bio-concentration factor (BCF) gold standard database [2511-075 (2005) : 77]

Recognised globally for our multi-disciplinary approach to research in the three key areas of manufacturing, materials and sustainable systems, our focus is on fundamental research and its application to meet the needs of industry and society. [2511-076 (2005) : 78]

MSc or PhD and 5 years experience in the following areas: • Catchment modelling • Flooding and low flow assessments • Integrated assessment of hydrology and ecology [2515-004 (2005) : 54]
59. MSc or PhD and 5 years experience in one or more of the following areas: • Freshwater ecology for flooding and low flow assessments • Terrestrial ecology (particularly botany) and habitat management [2515-004 (2005) : 54]

60. BSc and/or MSc and 1-3 years experience in one or more of the following areas: • River or coastal development studies • Ecology (terrestrial/aquatic) • Environmental impact assessment [2515-004 (2005) : 54]

61. Your relevant tertiary qualifications or equivalent professional expertise is required in both of the following areas: [Research Physicists/Engineers; Textile Technologists] [2515-041 (2005) : 70]

62. NIAB is engaging in a major new activity in the area of pre-breeding for food, non-food and ornamental plants. [2515-042 (2005) : 70]

63. These posts are in the areas of chemistry/residues, operator exposure and project management. [2515-061 (2005) : 76]

64. In particular we would welcome applications from individuals who have experience in one or more of the following areas: • Human biology, anatomy or physical anthropology, forensic applications of DNA • Forensic palynology or forensic entomology and their relation to environmental profiling • Drugs of abuse related to analytical chemistry or toxicology • Materials, particularly related to fibres, documents, arson and firearms. [2515-062 (2005) : 76]

65. Specific research areas of interest include, but are not limited in, treatment adherence, motivation toward behavioural rehabilitation, and the study of interactions between patients and health-care professionals. [2515-067 (2005) : 78]

66. Applications are invited from candidates with expertise in any area of Molecular and Cell Biology but applicants with additional expertise in either molecular genetics or bioinformatics would be particularly welcomed. [2515-077 (2005) : 80]

67. We are expanding our research and development in the area of gene therapy for neurodegenerative diseases, particularly Parkinson's disease and motor neurone disease. [2519-011 (2005) : 58]

68. The posts require expertise in one of the following areas: ecotoxicology; environmental chemistry; fate and behaviour of nano-materials in the environment; hazard and risk assessment of nano-materials. [2519-027 (2005) : 63]

69. We are offering 3 Post Doctoral Fellowships in the areas of Mapping Underground Infrastructure, Biodegradable Composites and Functional Composites. [2519-029 (2005) : 64]

70. The Bioinformatics and BioStatistics Service provides support to Cancer Research UK-funded scientists primarily in the areas of expression data analysis, sequence analysis, genomics and biostatistics. [2519-036 (2005) : 66]

71. We require a postdoctoral researcher to carry out research in mathematical modelling of functional MRI data, in the areas of timeseries analysis, spatial processes, independent component analysis and Bayesian methods. [2519-066 (2005) : 75]

72. Specific areas of interest are: physics of new electronic and magnetic materials; oxide film growth by pulsed laser deposition; ionic (oxide and proton) and mixed conducting materials; synthesis of new fulleride materials; synthetic oxide chemistry; high pressure synthesis; polymer synthesis; surfactants; chemometrics; organic synthesis; supercritical fluids; nanoparticles and colloids as "building blocks" for higher-order structures; metal-organic and inorganic nanoporous materials. [2519-071 (2005) : 76]
73. Applications are invited from UK and international organisations for research in the following areas: • Chemical contaminants from food contact materials and food production • Microbiological risk management • Foodborne diseases • Food law enforcement • Food authenticity [2519-082 (2005) : 79]

74. A well-funded drug discovery company, we are using our proprietary ion channel capabilities to develop a pipeline of ion channel drugs molecules across a number of indications - focusing on the cardiovascular, neurology and metabolic disease areas. [2524-002 (2005) : 52]

75. A PhD with several years' postdoctoral experience, preferably in industry you will have good electrophysiology skills and, preferably a background in a cardiovascular, endocrine or CNS area. [2524-002 (2005) : 52]

76. Potential areas of study include comparison of the methods of science and religion, neuroscience, quantum uncertainty, and spirituality and health. [2524-010 (2005) : 55]

77. The Initiative, which is to be carried out in partnership with industry, governments, scientists and communities, is focused on delivering bycatch conservation outcomes in three areas: technology/gear innovation, policy frameworks and conservation zoning. [2524-019 (2005) : 59]

78. We are seeking candidates with expertise in one or more of the following areas: • Science Education or Science Communication • Lecturing experience in Biomedical Diagnostics • Development & coordination of Masters Degree programmes [2524-053 (2005) : 71]

79. Programmes include Foundation, Honours and Masters degrees in the areas or Agriculture, Animal Science, Equine, Sports Sciences and Management. [2524-058 (2005) : 73]

80. Areas of specialism include: Animal production (livestock/poultry), behavioural scientist (general behaviour/companion animal), avian science, aquatic science and wildlife management. [2524-058 (2005) : 73]

81. Applications are welcomed from candidates in any area of Medicinal Chemistry/Drug Design/Chemical Biology/Biological Chemistry, or those with chemistry or pharmacy training, an appropriate PhD and a strong background in synthetic organic/medicinal chemistry. [2524-064 (2005) : 75]

82. The successful candidate will have demonstrable skills in the following areas: • Leadership in Research • Research Excellence • Communication • Management and Organisational • Strategic Vision • Commercialisation [2528-009 (2005) : 63]

83. If you have experience in any area of molecular biology, cellular biology or immunology, and would like to work in an exciting and challenging environment, please send us your CV for consideration. [2528-031 (2005) : 72]

84. We'll have opportunities in the following areas: Zoological Field Assistant; Electronic Field Engineers; Physicists / Antarctic Meteorologists [2528-050 (2005) : 80]

85. In particular we would welcome applications from individuals who had experience in one or more of the following areas: 1. Forensic archaeology, anatomy or physical anthropology. 2. Forensic palynology or forensic entomology and their relation to environmental profiling. 3. Drugs of abuse related to analytical chemistry or toxicology 4. Materials, particularly related to fibres, documents, arson and firearms. [2528-055 (2005) : 82]

86. Relevant research areas include synthetic polymer chemistry, polymer nanocomposites and organic-inorganic hybrids. [2528-060 (2005) : 85]
87. Key research areas within the BPSRG include: Biomedical Sciences: haematology, oncology, immunology, nutrition, microbiology, parasitology and vector biology, medical physics and exercise physiology. [2528-070 (2005) : 88]

88. We invite applications from outstanding students who wish to study for a doctorate, commencing October 2006, in any of the following areas: • Asymmetric synthesis methodologies, both catalytic and stoichiometric • Bio-organic and bio-inorganic chemistry • Biocatalysis and biotechnology • Biophysical chemistry • Carbohydrate science • Chemical biology • Chemical genetics and combinatorial chemistry • Co-ordination and supramolecular chemistry • Electrochemistry • Electronic liquids • Electronic structures of inorganic and organometallic molecules • Hydrogen storage • Molecular imaging • Nanotechnology • Natural product synthesis • Organic synthesis of new materials possessing new optical and conducting properties • Organic synthetic methodology • Organometallic chemistry and catalysis • Photochemistry and reaction dynamics • Protein structure, dynamics and engineering • Single molecule chemistry • Spectroscopy and molecular structure • Structure at interfaces • Surface chemistry • Synthetic and structural solid-state chemistry • Theoretical chemistry • Total synthesis. [2528-085 (2005) : 91]

2006

1. Our modern well-equipped research facility in Alnwick is engaged in the development of a wide range of new pharmaceutical products and is helping us develop leading positions in seven major therapeutic areas: cardiovascular disease, thrombosis, oncology, diabetes, central nervous system, internal medicine and vaccines. [2533-026 (2006) : 54]

2. Specifically in the areas of: Probiotics; Molecular methods for identification; Immune modulation; Biomarkers to show health benefits [2533-038 (2006) : 57]

3. Opportunities exist to join NPL as a Higher Research Scientist in the following areas: [Primary Electrical Measurement; Thermophysical Properties; Acoustics [2537-002 (2006) : 57]

4. Relevant scientific areas include physics, materials science or chemistry. [2537-038 (2006) : 70]

5. The applicant must have at least five years post-doctoral experience in areas such as nanocomposites, bionanotechnology or nanostructured materials. [2537-038 (2006) : 70]

6. Relevant scientific areas include laser physics, materials science, engineering or electronics. [2537-038 (2006) : 70]

7. The applicant must have at least five years post-doctoral experience in areas such as solid state light sources, fibre optic sensors, electro-optic materials or laser design (especially femto-second lasers). [2537-038 (2006) : 70]

8. There is an exciting opportunity for a highly motivated self starter to contribute to and initiate research and development activity for our industrial clients in the areas of new product development, process development and food packaging. [2537-057 (2006) : 77]

9. The Assistant will, after discussion with the project supervisors, select a research project for studies leading to the degree of PhD from one of the following areas: • Predictive microbiology and bioinformatics • Survival of foodborne pathogens • Probiotic microorganisms and human intestinal microbiology • Natural fermentations. [2537-058 (2006) : 78]
Applications are invited within the broad areas of Medicinal and Biological Chemistry, Synthesis, Photonics, Materials and Catalysis and Chemical Nanoscience. [2537-067 (2006) : 81]

We welcome applications from students with interests throughout the School's research areas: Power Electronics, Drives and Machines; Communications and Signal Processing; Microelectronics Technology; Microelectronics Design. [2537-067 (2006) : 81]

The Department of Health and Human Sciences is looking for enthusiastic and student-focused part-time professionals to help in the delivery of a range of undergraduate and postgraduate courses in the areas of Biology, Molecular Biology, Biochemistry, Chemistry and Nutrition commencing in February 2006. [2537-069 (2006) : 82]

The Division of Molecular Biosciences is well equipped with international leading expertise in the following research areas: structural biology, biochemistry, bioinformatics, enzymology, glycobiology and membrane proteins. [2537-086 (2006) : 87]

They have active research programmes in support of that advice; current areas of interest include taxonomy and biology of honey fungus, Phytophthora, powdery mildews and box blight. [2541-003 (2006) : 56]

We’re looking to build our team in the following areas: Toxicology; Microbiology; Environmental Science; Occupational Safety [2541-004 (2006) : 57]

Keeping these brands at the very top of their respective trees, of course, also represents a big challenge. That's why we're looking to build our team in the following areas: Toxicology; Microbiology; Environmental Science; Occupational Safety [2541-007 (2006) : 59]

Now, we are looking to build our team in the following areas: Toxicology; Microbiology; Environmental Science; Occupational Safety [2541-011 (2006) : 61]

Vacancies exist in the following areas: [Water Efficiency; Acoustics; Wind Tunnel Research & Environmental Assessment; Environmental Impact Assessment; Wind Tunnel Research & Environmental Assessment [2541-022 (2006) : 67]

They offer exceptional customer support in key areas, including: regulatory issues, application techniques, interpretation of scientific studies, product logistics, product certification, consistent product delivery. [2541-027 (2006) : 68]

Lipid Nutrition is focusing on the following three health areas: Body Weight Management, Heart Health and Natural Defense. [2541-027 (2006) : 68]

We are specifically seeking expertise for the vacancies in the following areas: Ecology/Ecotoxicology; Environmental Fate and Behaviour [2541-047 (2006) : 77]

Based in the internationally-recognised Animal Behaviour and Welfare Research Group within the School of Clinical Veterinary Science at Langford, this role will involve developing an active research programme in one of the following broad areas: 1) vertebrate behavioural or stress physiology, 2) vertebrate sensory or biology, or 3) decision making and animal motivation. [2541-068 (2006) : 83]

You should have a PhD in any area of Chemistry, Physics, Biological or Medical Sciences related to experimental studies involving MRI and have at least 2 years' experience with MRI. [2541-070 (2006) : 83]
24. The Department has an active clinical, translational and basic research programme with a number of specific areas of focus, including cell cycle regulation and epigenetics, functional genomics, gene therapy and leukaemia immunobiology. [2541-085 (2006) : 88]

25. Projects are available across a range of modern and interdisciplinary research areas including structural biology, biochemistry, virology, biological chemistry, enzymology, neurobiology, cell biology, physiology, computational biology and biophotonics. [2541-094 (2006) : 91]

26. We are currently recruiting in the following research areas: Medicinal & Biological Chemistry; Pharmaceutical Biology; Pharmaceutical Technology; Pharmacology; Regenerative Medicine; Pharmacy Practice [2541-099 (2006) : 94]

28. Areas include the measurement of reliability of electronic materials systems (solder or conductive interconnects, substrate structures), electrochemical reactions of new solder materials, and performance of protective coatings for electronics. [2545-031 (2006) : 71]

29. The School is the largest grouping of marine scientists and technologists in Europe, with internationally recognised expertise in areas that include tropical coastal management, chemical ecology and marine biofouling. [2545-069 (2006) : 86]

30. and ideally have specialist expertise in the area of data analysis/modelling of biological processes and biostatistics. [2545-080 (2006) : 89]

31. The School's research covers the whole range of bioscience with focus in the following areas: • Biodiversity and Ecological Processes • Connective Tissue Biology • Genetics • Microbiology • Molecular Cell Biology • Neuroscience [2545-080 (2006) : 89]

32. We are currently recruiting in the following research areas: Medicinal & Biological Chemistry, Pharmaceutical Biology, Pharmaceutical Technology, Pharmacology, Regenerative Medicine, Pharmacy Practice. [2545-088 (2006) : 92]

33. The areas of expertise that we are looking to recruit for are: Biopharmaceutical products; Validation, Compliance; Quality Management Systems; Advocacy & Regulatory Intelligence; Risk Assessment; Operational Quality Assurance; Microbiology [2550-017 (2006) : 65]

34. As the Environment & Hazards Director, you will be responsible for delivering the BGS's contribution to the NERC's key science objectives in the areas of groundwater; soils, environmental risks and hazards; pollution and waste; and global climate change. [2550-026 (2006) : 69]

35. Take a lead role in ensuring smooth engineering operations of the FESF in areas covering safety management, maintenance, procurement, planning & facility enhancement. [2550-043 (2006) : 76]

36. Consultants, Energy In the Built Environment (2 posts). In these roles you will be aiding in the acquisition and delivery of projects in the area of energy efficiency and renewable energy in buildings and in low energy building design or zero carbon strategies. [2550-051 (2006) : 79]

37. Specialist knowledge in the areas of Histology, Cytology and Cellular Pathology is essential. [2550-063 (2006) : 84]

38. These include part-time MScs for those working in the sector, or full time MScs for those looking to embark on a career in the following areas: • Environment; • Land; • Soil; • Waste; • Water [2554-003 (2006) : 60]
39. This will include broad knowledge of the issues associated with Knowledge Transfer, Commercialisation and Science into Policy and in-depth knowledge of at least one of these areas. [2554-005 (2006) : 61]

40. MRes, MPhil and PhD opportunities in Physical and Environmental Geography research areas include remote sensing, hydrology, fluvial geomorphology, fluid dynamics, sedimentology, environmental change, glaciology and public policy. [2554-011 (2006) : 63]

41. It will be your role to offer far-reaching practical support to the Group Leader in areas such as cell biology, molecular biology and immunohistochemistry. [2554-025 (2006) : 67]

42. The successful postholder should possess a PhD or an equivalent qualification in any area of chemistry, materials, biological science, engineering or dentistry. [2554-062 (2006) : 83]

43. The ideal candidate will have experience in technical support within a biological environment and experience in the use or support of techniques within some of the following areas: molecular biology, tissue culture, pharmacology, microbiology or physiology. [2554-063 (2006) : 83]

44. The appointee should have qualifications within the following areas: • Research qualifications within Advanced Chemometrics, Multiway Analysis, Experimental Design, Process Analytical Technology and Visualization of Data and Algorithms • Leadership and management of research in the field of advanced chemometrics, with special reference to multiway chemometrics and process analytical technology • Teaching in the field of advanced chemometrics with special emphasis on multiway chemometrics and process analytical technology [2554-064 (2006) : 84]

45. KVL carries out technically advanced research and education within the veterinary agricultural and human nutrition areas - as well as related fields of natural science. [2554-064 (2006) : 84]

46. The successful candidate will be trained to PhD level in a relevant topic and, ideally, will have experience in one or more of the following areas: device fabrication and characterisation, device physics, surface analysis, microfabrication and clean room practices. [2554-072 (2006) : 86]

47. You will develop your own research programme in the area of high-resolution palaeoceanography / palaeoclimatology and/or novel ocean tracers of past environmental change. [2558-005 (2006) : 60-61]

48. Our modern well-equipped research facility in Alnwick is engaged in the development of a wide range of new pharmaceutical products and is helping develop leading positions in seven major therapeutic areas: cardiovascular disease, thrombosis, oncology, diabetes, central nervous system, internal medicine and vaccines. [2558-021 (2006) : 66]

49. A PhD with a well-established reputation in at least one area of biopharmaceutics - absorption pharmacokinetics, in vivo relevant dissolution, permeability or delivery route/system specific biopharmaceutics – [2558-025 (2006) : 68-71]

50. The scope of this position is extensive. The candidate would be expected to contribute his/her expertise in one or more of the following areas: molecular cloning, development and validation of assays, screening for drug candidates through binding interactions, recombinant protein purification, preparative and analytical liquid chromatography, high throughput nucleotide sequencing. [2558-031 (2006) : 74]

51. Due to increased business demand and significant new product development activity, we are now seeking to recruit the following high calibre candidates within Research and Development area: [Formulation Development Manager; Formulation Scientist; Analytical Scientist] [2558-062 (2006) : 85]
52. Ideally applicants should have direct experience in this field or in a related area such as Haematology, Blood Transfusion or Immunology. [2558-071 (2006) : 88]

53. The appointee should have qualifications within the following areas: Biophysical characterisation of biological structures and macromolecular aggregates in solution e.g. using scattering techniques (SANS, SAXS, SLS, DLS). Structural and dynamical studies of self-organisation and self-organisation processes for biological macromolecules, in particular self-organisation of amphiphiles/lipids, (bio)polymers and proteins in solution. [2558-072 (2006) : 89]

54. KVL carries out technically advanced research and education within the veterinary, agricultural and human nutrition areas - as well as related fields of natural science. [2558-072 (2006) : 89]

55. Subject areas in this one-year full-time MSc include: Multiphoton Laser Microscopy; Cell and Tissue Imaging; Optical Biosensors; Quantum Dots as Bio-labels; Optical Tweezers; Ablation and Laser Surgery; Photo-activation of drugs and Optical Bio-chips. [2558-094 (2006) : 96]

56. The MRes programme provides experience of real research in the rapidly developing interdisciplinary areas of Biophotonics, Nanomaterials, Nanophotonics and X-Ray Physics. [2558-099 (2006) : 98]

57. Experience in one or more of the following areas would be advantageous; mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming, database design. [2563-007 (2006) : 52]

58. The research link can be in any area of science, engineering and technology, including social sciences and humanities. [2563-017 (2006) : 56]

59. CCFRA is offering exciting opportunities in the Food Manufacturing Technologies Department for highly motivated self starters to contribute to and initiate research and development activity for our industrial clients in the areas of new product development, process development and food packaging. [2563-027 (2006) : 59]

60. You will have a teaching, research or publication record in any one of the following areas: Biochemistry/Molecular Biology, Environmental Biology, Evolutionary Psychology, Genetics, Microbiology or Zoology and will make a major contribution to the teaching of first and second year undergraduates. [2563-073 (2006) : 75]

61. PhD opportunities are also available in areas listed [Applied Bioinformatics; Clinical Research; Medical Diagnostics; Molecular Medicine; Medical Technology Regulatory Affairs; Translational Medicine [2563-087 (2006) : 79]

62. Experience in a forensic laboratory in the area of forensic biology, forensic chemistry or drugs analysis, report writing and giving evidence in Court is particularly desirable. [2567-010 (2006) : 54]

63. The postholder will supervise colleagues in the Facility and interact with a wide range of researchers of the Institute interested in diverse areas of biology (immunology, infectious disease, developmental biology, neurobiology, structural biology). [2567-022 (2006) : 59]

64. We are currently recruiting in the following scientific areas: [Flavour Generation & Delivery; Product & supply Chain Microbiology; Cardiovascular Health; Process Engineering] [2567-036 (2006) : 66]

65. The research link can be in any area of science, engineering and technology, including social sciences and humanities. [2567-044 (2006) : 68]
We have an opportunity for someone who can demonstrate experience of project management within the areas of chemistry, engineering and/or mechanical testing who can effectively develop and implement project plans that result in product approvals. [2567-053 (2006) : 71]

The role will work with colleagues in the Research Development and Collaborations team comprising of three Research and Innovation Managers responsible for marketing and supporting the knowledge transfer strategies in three University defined areas: (i) Advanced Engineering, Physical Sciences and ICT (ii) Life Sciences and Health, and (iii) Humanities and Social Sciences. [2567-077 (2006) : 81]

The UCD School of Agriculture, Food Science and Veterinary Medicine is a research leader in the areas of sustainability and competitiveness of agriculture, the health and welfare of animals, the quality and security of food and improving consumer well-being. [2572-007 (2006) : 62]

In 2006, the School has secured substantial research funding and is currently recruiting up to 60 researchers (at postgraduate and postdoctoral level) in these areas: • Agribusiness • Pathobiology of Disease • Animal Science • Sustainable Agriculture • Food and Health • Veterinary Clinical Sciences [2572-007 (2006) : 62]

Proposals are now being sought from the following research areas: • Electronics • Nanotechnology • Compound Semiconductors • Photonics • ICT for Life Sciences • Silicon Fabrication • Device Design • Materials Characterisation • MEMS / Microsystems • Simulation & Modelling [2572-017 (2006) : 66]

Expressions of interest are invited for the following thematic areas in the College of Engineering, Mathematical and Physical Sciences: [Bioengineering, Bioprocessing and Materials Science; Computer Engineering, Embedded Systems and Wireless Communications; Mathematical Sciences; Mathematics and Computational Modelling of Complex Systems; Sustainable Energy, Resources and Development; Physics and Imaging Sciences [2572-019 (2006) : 67]

Our broad range of project areas includes the manipulation of productivity and carcass composition, enhancing reproductive performance, and improving the management of infectious and metabolic disease. [2572-023 (2006) : 69]

The Group develops products in three targeted therapeutic areas: oncology, endocrinology, and neuromuscular disorders and is also engaged in developing certain biological-derived products. [2572-032 (2006) : 74]

The TMRC laboratory will be devoted to innovative biomarker identification and development in areas of Cardiovascular & Metabolic Disease, Inflammation, Musculoskeletal Biology, Neuroscience, Oncology and Reproductive Health. [2572-072 (2006) : 91]

Though preference may be given to applicants who are able to offer teaching and research expertise in one or more of the following areas: Visualisation, Spatial analysis and GIS modelling, GIS programming, Internet GIS or mobile GIS. [2572-085 (2006) : 96]

With a firm grasp of the software development lifecycle and design methodologies such as UML, you’ll show proven ability in one or more of the following areas: web service development; distributed simulation interoperability; parallel processing; [2576-017 (2006) : 67]

To strengthen our team we are seeking to recruit several graduate trainee Patent Attorneys for our Southampton office with relevant knowledge in one or more of the following areas: • Software Engineering • Physics-based Technologies • Electronic, Electrical or Mechanical Engineering • Audio and Video Systems [2576-033 (2006) : 73]
We are seeking a candidate with experience in the water industry, working in one or more of the following areas: - Water operations - Principles of supply / demand balance - Regulatory returns / reporting - Abstraction Licensing - Communications / management at senior management level - Experience of dealing with key stakeholders [2576-036 (2006) : 74]

Ideally you should have a good understanding in the following areas: - Water resource planning - Current Legislative Requirements - Climate Change - Habitats Directive [2576-037 (2006) : 74]

Based in our UK hub site in Slough, you will play a crucial part in ensuring a regulatory environment that is supportive of our business strategies, particularly in the areas of food safety, and nutrition and health. [2576-039 (2006) : 75]

The ideal candidate should have a PhD in a relevant area (e.g. chemical, biological or physical sciences), and experience in molecular simulations packages (e.g. AMBER), docking programs, bioinformatics software and commonly used molecular modeling interfaces. [2576-045 (2006) : 77]

The Department is also active in a number of areas of research including human embryo development, embryo selection and embryo culture biotechnology. [2576-072 (2006) : 85]

Each Graduate Assistant will, after discussion with the Project supervisors, select a research project for studies leading to the degree of PhD from one of the following areas: [• Human complement system • Human molecular genetics in health and disease] [2576-075 (2006) : 86]

The successful candidate will have a PhD or equivalent experience in a quantitative science, preferably in an area related to climate, meteorology or hydrology, together with proven statistical and computer programming skills. [2576-093 (2006) : 91]

We are particularly interested in candidates with an interest in developing their own portfolio, particularly in the regulatory (e.g. REACH), risk analysis or molecular areas.

The Centre works within the following areas: new network structures, wireless networks included, multimedia signal processing, dependability, traffic and security as applied to multiparty communication between stationary and mobile users. [2580-010 (2006) : 57]

This post is also part of a Centre of Excellence funded by the Scottish Executive Environment and Rural Affairs Department in the area of Epidemiology, Population health and Infectious disease Control (EPIC). [2580-027 (2006) : 63]

Potential research areas can be quite broad but might include: quantum estimation, quantum open systems, quantum multi-party protocols, quantum games, quantum control, and quantum algorithms. [2580-068 (2006) : 78]

Six BBSRC/Charity funded PhD studentships are available in the following areas: [• Developing biocatalysts for enhanced selenate bioremediation • Role of metacaspases in the apoptotic cell death response of Candida albicans • Control of cell shape in the human fungal pathogen Candida albicans • Investigating eukaryotic cell evolution using comparative genomics • Investigating the role of glutathione-S-transferase in cancer • The role of pyroglutamyl modification of peptides in Alzheimer's] [2580-077 (2006) : 81]

2009
1. Philips Research creates innovations in the areas of healthcare, lifestyle and enabling technologies. [2689-010 (2009) : 49]

2. Focused on the development and commercialisation of products that address medical needs in areas such as infectious disease, oncology, and respiratory and autoimmune disease, MedImmune primarily employs antibody and vaccine technologies in its product development. [2689-021 (2009) : 54]

3. The School of Engineering and the Institute of Bioengineering offer strength in areas that include bioMEMS/NEMS, bioelectronics, robotics and learning, integrated systems, biomaterials, biophotonics, molecular and computational systems biology, and stem cell biotechnology. [2689-023 (2009) : 55]

4. Research and development areas encompass novel targets in psychiatric and neurologic disorders, pain, oncology, infectious disease, diabetes, haematology, metabolic disorders, immunological disorders, and reproductive medicine. [2689-025 (2009) : 56]

5. Applications are invited for Associate Professors and Lecturers with research interests in the following areas: • Host Pathogen Interactions • Bioinformatics • Molecular and Cellular Biology • Molecular and Quantitative Genetics • Developmental Biology [2689-026 (2009) : 57]

6. Experience in one or more of the following areas would be advantageous: mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming or database design. [2694-014 (2009) : 57]

7. We are now seeking to appoint a further 6 permanent academic staff in the areas of: Graphene-related research, Electromagnetic materials, Metamaterials and Nanoscale materials. [2694-042 (2009) : 69]

8. The research of the Centre will focus on three main areas: methods of producing graphene and nanostructured graphene systems; experimental and theoretical studies of graphene structures and devices; development of new graphene-based electronic devices and sensors. [2694-042 (2009) : 69]

9. Potential supervisors are drawn from the faculties of Biomedical and Life sciences, Medicine and Veterinary Medicine within the research areas of neuroscience, cardiovascular science and immunology. [2694-057 (2009) : 75]

10. You can select your own area of specialisation by taking one of our three streams: [• Medical Physics stream; • Biomechanics stream • Neurotechnology stream] [2698-005 (2009) : 50]

11. But there are also plenty of other options in areas like Project Management, IT and Business that enable you to transfer your skills and take your career in a whole new direction. [2698-010 (2009) : 52]

12. We are particularly looking for individuals familiar with at least one of the following therapy areas: oncology, cardiology, diabetes, psychiatric disorders and viral infection. [2698-042 (2009) : 65]

13. Areas of scientific expertise required are: [Deposition of thin films by CVD and ALD; Physical property characterisation of thin films, particularly by probe microscopy and related methods; Polymer synthesis and characterisation; Organic synthetic and catalytic chemistry with experience in high-throughput methods; Oxide materials discovery and electroceramic property measurement] [2698-051 (2009) : 69]

14. The JIC has recently been awarded priority studentships from the Biotechnology and Biological Sciences Research Council (BBSRC) to support this collaboration and we are offering 4 studentships in the following areas: Crop breeding, Plant biology, Population genetics, Microbial ecology, Rhizosphere biology, Bioinformatics, Climate change, Elemental cycles, Greenhouse gases [2698-065 (2009) : 74]
15. Applications are invited for six Fellowships in the following areas: Bioinformatics, Biotechnology, Particle Physics, Marine Software and Systems Engineering, Alternative Energy and Science and Technology Transfer. [2698-069 (2009) : 75]

16. We have 9, exciting 3 year research training opportunities across the following areas: Field Instrumentation, Environmental Data Science, Environmental Statistics, Ecology and Analytical Chemistry. [2702-026 (2009) : 59]

17. The regulatory areas which Exponent undertakes for clients include dietary intake assessments; health claims; food & feed additives; novel foods and food safety assessments. [2706-005 (2009) : 48]

18. The successful candidate will also be a recognised technical expert in the area of food regulation/safety and or nutrition and will continue to apply this knowledge to clients' problems. [2706-005 (2009) : 48]

19. Areas of education and research include technology, science, law, social sciences, economics, medicine, humanities, theology and performing arts. [2706-034 (2009) : 60]

20. We are looking for an outstanding young scientist whose research areas concern the sustainable use of renewable natural resources relating to agriculture, forestry, fisheries, use of biodiversity (animal and plant genomic resources) and water. [2706-038 (2009) : 61]

21. This post relates to the areas of pesticide residues and metabolism, MRLs/import tolerances and consumer exposure assessment. [2711-014 (2009) : 55]

22. You will contribute to batch release, standardisation and research in the area of typhoid, anthrax and cholera vaccines under the guidance of the study director. [2711-017 (2009) : 56]

23. We invite applications from internationally recognised researchers in the area of diet, human health and risk of chronic disease to complement and enhance research strengths within the Hugh Sinclair Human Nutrition Group [2711-042 (2009) : 64]

24. We will particularly welcome applications from researchers with experience in the area of nutrient-gene interactions in relation to obesity, CVD, metabolic disease, cancer or neurodegenerative disease. [2711-042 (2009) : 64]

25. Subject areas covered include: • Ecological Conservation • Economics for Natural Resource and Environmental Management • Environmental Management for Business • Geographical Information Management • Natural Resource Management • Land Reclamation and Restoration • Soil Management • Water and Wastewater Engineering • Water Management [2711-047 (2009) : 66]

26. The Veterinary Laboratories Agency - Weybridge, is an internationally recognised centre of excellence, delivering research for animal and public health. In conjunction with top rank academic partners, VLA is now offering two Ph.D. studentships in the following subject areas: Characterisation of proteomic biomarkers of host response to lyssavirus infection with particular focus on rabies virus. Probing the host response secretome of vaccinated and TB infected cattle to define biomarkers of protection. [2711-051 (2009) : 67]

27. To be considered for the role of panel member, you must possess an impressive track record in one or more of the following four areas of expertise: • UK Marine Ecology • Marine ecosystem processes and the ecosystem approach • Marine conservation tools and conservation planning • Marine Protected Areas and network design [2715-016 (2009) : 57]

6859
28. The business is experiencing rapid growth and we now need professionals who can contribute to our expansion in the following key areas: Chemistry (which includes PWR primary water chemistry, AGR gas chemistry, ion exchange technology, analytical chemistry and radiochemistry); Metallurgy (including pressure vessel steels and their welding together with high temperature properties, fatigue/creep and fracture mechanics) and Waste Technology (materials engineering, radioactive waste treatment and immobilisation technologies, cement / geological chemistry). [2715-026 (2009) : 60]

29. Duties will involve maintaining all medical equipment within these increasingly high-tech areas, including testing, calibration of equipment, performing physiological measurements, assisting in diagnostic procedures and supporting an extensive research programme. [2719-004 (2009) : 48]

30. The British Trust for Ornithology is currently reviewing its project development team and seeking the right individual to take on a portfolio of responsibilities in the areas of project management, system development, quality assurance, project proposals and contract management. [2724-008 (2009) : 53]

31. We divide our operations into three distinct business areas: Fuel Specialties, Active Chemicals and Octane Additives. [2724-010 (2009) : 54]

32. The company is focused on the areas of infection, respiratory and inflammatory disease, oncology and neuroscience, with two marketed-products and a robust pipeline of promising new product candidates. [2724-024 (2009) : 61]

33. You will have a maths or science degree (2.1 or above) or equivalent and either have or be working towards a Ph.D., or have equivalent work experience in one or more of the areas of medical data / image analysis, informatics and statistical evaluations. [2724-043 (2009) : 68]

34. "It is very multidisciplinary, the whole area of global health research, drug access, delivery and quality assurance," says Shummay Yeung, who also works on malaria at LSHTM. [2728-004 (2009) : 52-53]

35. Candidates should have international knowledge of drug development in key areas of research, such as CNS, cardiovascular and oncology. [2728-005 (2009) : 54]

36. Project areas on offer include: DNA Damage Response, Cell Cycle, Cell Division, Stem Cell Haematopoiesis, Computational Biology, Inosotides and Cell Signalling. [2728-023 (2009) : 62]

37. The professorship comprises research and teaching in Plant Nutrients within one or more of the following areas: • Methods for diagnosis of plant nutritional status and characterisation of bio-active nutrient pools in plants • Plant nutritional metabolomics, including high-throughput elemental analysis technologies and their integration with tools in bioinformatics and molecular genetics • Stable isotopes as indicators for tracing authenticity and nutritional sources of vegetable food products • New methods for assessment of soil pools of bioavailable nutrients. [2728-037 (2009) : 69]

38. The Faculty of Life Sciences is one of Europe's leading university environments in the areas of food, health, plants, biotechnology, natural resources, the environment [2728-037 (2009) : 69]

39. Applicants should have a Ph.D. in a relevant subject and have substantial expertise in one or more of the following areas: in vivo murine cardiac surgical models, cardiac ultrasound, hemodynamic monitoring, and in myocardial pathology. Ideally they should have a UK Home Office Licence. [2728-038 (2009) : 69]

40. You will receive focused, on-the-job editorial training from experienced staff and will also be made familiar with the related areas of publishing, including production, marketing and finance. [2733-029 (2009) : 71]
41. Graduate students are accepted into one of the following areas, but are encouraged to take part in courses and seminars from all three disciplines: Comparative and Molecular Primatology, Evolutionary and Functional Genomics, Ancient DNA, Molecular Anthropology and Genome Bioinformatics, Human Paleontology, Prehistoric Archaeology and Archaeological Science [2733-035 (2009) : 73]

42. This is a multi-disciplinary project concerned with quantifying and reducing uncertainty in the predictions of complex models across a wide range of application areas, including basic science, environmental science, engineering, technology, biosciences and economics. [2733-041 (2009) : 75]

43. The main technical areas to be covered are: rural socioeconomics, community liaison and dynamics; West African cultural issues; botany and zoology of the Guinea region rainforest types and the West African coast; tropical soils; geotechnics; hydrology; hydrogeology; marine geomorphology; air quality and emissions control; noise and vibrations; urban water supply, sanitation and wastewater management; landscape and visual amenity. [2733-054 (2009) : 79]

44. You will initially undertake Earth observation research for quantification of ocean biogeochemistry and carbon fluxes, with the areas of inherent optical property model development; phytoplankton functional type and primary production algorithm development; biogeochemical time series analysis and ocean provinces. [2737-010 (2009) : 57]

45. It will encompass areas of molecular biology, cell biology and biochemistry. [2737-013 (2009) : 57]

46. The successful candidate will carry out research using molecular cloning, site-directed mutagenesis, library construction, protein expression and purification, molecular modelling and directed molecular evolution technologies so experience in any of these areas would be an advantage. [2737-015 (2009) : 59]

47. You will have a biomedical degree (2:1 or above) (or equivalent), a Ph.D. (or equivalent) and experience in one or more of the areas of PET imaging, experimental tumour models, preclinical therapeutics, radiochemistry and/ or imaging data analysis. [2737-022 (2009) : 64]

48. health services research including large-scale multicentre randomised trials cohort studies, health economic research, health services research, and health technology assessment in a range of clinical areas e.g. pain, cancer, CHD, drug misuse. [2737-031 (2009) : 67]

Annexe 9-6-4 Occurrences de AREA dans BNC

En rouge les occurrences qui renvoient au discours des ressources humaines

Here is a random selection of 50 solutions from the 34824 found.

A0G 1493 This provided a totally separate area to the levelled lawn in front of the house.

A16 178 Traditional varnishes should always be applied in a warm, dry atmosphere and, when used inside, in a well-ventilated area.

AMH 487 Within the Laganside area the Commissioners are the largest landowners and they fully endorse the strategy, recognising the need for a high quality interface between the City and the Port.

ANB 763 The next road to the right, Via Montenapoleone, is by common consent the finest shopping street in Milan, the main thoroughfare of an area of ‘high class’ shopping.

APP 214 A Catholic family who had squatted in the house was evicted to make room for her, and a number of other Catholic families in the area were also denied houses.

ARH 991 The earliest symptom is a slight itching in the genital area, which within twenty-four hours gives way to discrete irritating vesicles one or two millimetres in diameter.

B1D 570 In the following year, the elder Barry exhibited a large rebuilding scheme for the whole Whitehall area at the Royal Academy which was a development of the competition entry.

B2B 79 Karnival, another high profile area of the Students' Union, concentrates its work on fund raising and in the last year raised over £100,000 for various charities.

C8E 1779 But West Kensington was an area in between, where people stayed before moving up, or remained only because they were stuck.

CF9 249 Cutts did the grand slam of all four events in last season's area finals, but following two eliminations in the last round, will have to fight hard to qualify for just one in the current campaign.

CFW 911 Despite the presence of gold and minor base-metal sulphides in the drillcore from this zone, it is believed that this is not the main source of gold and there may be a more fertile source elsewhere in the area.

CG2 778 The most popular crags in the area are those on Great Gable.

CH2 1327 Champion was a friend of two youngsters who died on a stolen police motorbike in July, sparking three nights of rioting in the Hartcliffe area.

CLK 1815 They fire clusters of fungal spores, and each attack has a 10% chance of also liberating Red Mould into the area, so that characters are subjected to two attacks.

CMD 1831 Radial Baffling: A patented design involving a ‘sunburst’ pattern of baffles over the chest area.

CMU 1652 In their recent survey, Goacher et al (1988) showed that 76 per cent of LEAs recorded a ‘substantial increase’ in the number of welfare assistants/non-teaching auxiliaries and 65 per cent indicated that this was an area attracting priority finding.
The shape of the core and associated corona from the STIM image is consistent with the optical images in stained sections; (2) the core is more dense than the corona, which in turn is more dense than the surrounding tissue; (3) the elemental distribution of the plaque as measured by PIXE and RBS shows similar minor and major elemental composition to those analysed in stained plaques, that is, increased levels of elemental sulphur, phosphorus and nitrogen; and (4) examination of stained serial sections shows similar plaque density per area of tissue, and the plaques are located in a similar position with respect to more obvious common features such as blood vessels.

Unfortunately, presentations in this area were more pathetic than professional.

Information about the actual place is sparse, but an Orangutan Foundation representative told BBC WILDLIFE that there are no facilities and no expertise there to care for the orangs, and that the surrounding primary forest has been destroyed by fire and so is unsuitable as a release area.

Another area is that of foregrounding, where we draw on the terminology of traditional poetics ("metaphor", "metonymy", onomatopoeia", etc).

This is the area of greatest conflict in my subject at present.

A huge black shadow passed over the area.

This may not always be in the best interests of the company but as, on the whole, the Press acts in this area with reasonable restraint, it generally is in the best interests of investors and the public.

This fine-grained limestone is only developed over a very small area, usually thought of as a lagoonal deposit behind sponge reefs, though recently interpreted as deposits in offshore sediment traps.

The backhaul cargo was comprised of junked vehicles, buildings, pipe, tanks and drilling rig components from Deadhorse, an oil field service area in the Prudhoe Bay field.

This theory appears true in the Belfast area for loyalists but not for republicans.

The Transport Ministers had further agreed on July 4 to establish a centralized air traffic control system for the EC area, in an effort to end the existing dislocations caused by the inadequate interaction of separate national systems.

The report also stated that the Indian army had repulsed a Pakistani encroachment in the Kirni area of Punch sector.

An area in which much research on the effects of emotional stress or arousal on memory has been conducted is that of eyewitness testimony.
In order to classify the pixels it is necessary to know in advance the number and spectral characteristics of the land-cover classes that are present in the area covered by the image.

Although many of the teachers who qualified from the Bournemouth training course have since deserted the area, Audrey Archer (a founder member in the Sidcup group) and her daughter Sandra Williams keep our name to the fore in DORSET.

At London's new Lanesborough Hotel, public area lighting is linked by a timer to an outdoor sensor which controls the lights according to the time or cloud cover.

The UN Intergovernmental Panel on Climate Change has suggested that an area the size of Europe would have to be planted every year to balance emissions of carbon dioxide.

That's in the area.

I do feel on the question of whether we are bringing people into the Harrogate area or catering for the needs of the residential population.

She got out and looked about to see that there across the road, in an area where buildings were few and far between, stood the welcoming sight of a small hotel and restaurant.

We've introduced new features to the house which has enlarged the area on public view

Home beat police constable Patrick Dunn didn't have to deal with the reported disturbance last night, at twenty eight Cato Road Clapham, but knowing the area, he said he'd go, on his bicycle as ever.

‘That's a lot of players needed from a small area and the net needs to be cast wider.

He's back in the area next week with a gig at the Adelphi on Thursday 19 November.

It probably was Swansea area.

Cos it's er it's weird really, it's like a good ar good area and bad areas.

Here is a random selection of 50 solutions from the 23256 found.

In spite of higher volumes of traffic in urban as compared with other areas, the fatality and serious injury rate is lower.

The decision to put the technology division up for sale marks an about-turn for Chrysler which has spent more than $1billion in the last four years on its policy of diversifying out of cars into related areas.

And peasants in areas prone to drought are good at surviving.

When it comes to the most sensitive and important areas of journalism, like Northern Ireland or official secrecy, British broadcasters are less free to report than a camera team arriving from Perugia or Poughkeepsie.

By the age of ten he had taken to dreamily wandering around areas of Stretford and Hulme not normally reserved for the vision of one so young.

You can brush where the skin is healthy, but avoid any areas where you have bad varicose veins.
More recent evidence suggests, however, that while it lives in woodland it actually hunts over nearby open areas (Glue & Hammond, 1974; Yalden, 1985).

Within the parish, on countless occasions, churches have identified areas which are relatively unevangelised and taken several members and planted them out there.

Within parish churches the use of coffin stools were, in some areas, being overtaken by the bier and the custom of issuing mourners with wax ta pers — slender candles some two or three feet in length and between half and 1&1/2 inches in diameter — was already in decline, not to be reintroduced until the late sixteenth century when they reappeared in their new capacity as flambeaus for night-time funerals; in the eighteenth century a more elaborate form of triple candle, twisted to resemble a three-branched candlestick and very much like the Candelmas candle once used in the Roman Rite, was carried by one of the undertaker's men proceeding the cortège.

It has no less than nine conservation areas designated as being outstanding.

As with other subject areas of the course, electronic publishing is taught through theory and practice.

The proportion of the population screened was higher in rural areas (1.1%) than in urban areas (0.6%) and this may be because urban diabetic patients were more likely to attend a hospital diabetic clinic.

I would contend that government thinking is flawed in a number of areas.

On the whole the scene is quiet, quieter at least than you would expect considering that this is one of the most important wholesale fruit and vegetable markets in France, the great distributing centre for the primeurs of the astonishingly fertile and productive areas of the Vaucluse and the Comtat Venaissin. — areas which less than a hundred years ago were desperately poor, inadequately irrigated, isolated for lack of roads and transport, earthquake-stricken, devastated by blights which destroyed the cereal crops and the vines.

Other objectives include "promotion of correct library behaviour" , coordinating the library's work with that of county providers and ensuring "that staff are helped to relate Dewey Decimal Classification Numbers to those subject areas which they might require pupils to research or refer to" (Proposal document).

However, with their emphasis on rehabilitation of stock and on area-wide environmental improvements, GIAs had a relatively limited impact, and only about 5 per cent of grants since 1969 have been issued within these areas.

This was confined to areas where more than half the non-white population lived, and where all the areas had more than 10 per cent.

There is no justification in economic analysis for giving different institutional treatment to different competition policy areas.

It is not, of course, easy to identify areas where spillovers are likely to be large a priori , but neither initiative calls for participants to make the case that the potential gains from their particular venture are likely to be large.

We cut that section, we stained it and then looked at it under low power and selected out from that block the three most vascular areas.
First, there were districts containing special areas: these were the partnership areas in Birmingham, London (seven Boroughs: Greenwich, Hackney, Islington, Lambeth, Lewisham, Newham, Southwark and Tower Hamlets), Liverpool, Manchester, Salford, Newcastle upon Tyne and Gateshead.

Although the students had few problems in discerning a variety of viable strategies for presenting new lexis in such a way that learners might be thought to be able to perceive its meaning without the intervention of English, the areas of structure and discourse proved less tractable.

Wild red deer are perceived as having a special place in Highland culture — as a symbol of Scottish wilderness, as revenue-earners in sparsely populated areas, and as part of the fabric of Highland society.

The main village is away to the west, with areas of shrinkage on its south side.

The areas of Astrology and Biorhythms are of interest to people from across the world.

DUAL-PURPOSE DINING AREAS

But when we left the capital with its taxis playing Strauss over Beijing Radio and travelled on the diesel train through the countryside, we found that in the rural areas change comes more slowly.

Costa Rica and Panama agreed on ecological protection measures for their joint border areas.

Listed below are some of the important areas of activity in which Johnson Matthey holds a pre-eminent position built on unrivalled specialist knowledge and technical excellence.

Therefore, a biopsy specimen from macroscopically intact areas of the gastric corpus (full thickness, 100–200 mg wet weight) was excised at the end of a 30 minute perfusion of the stomach with ethanol.

In 1913 France broke new ground with the appointment to some of its missions abroad of technical counsellors, officials seconded from the ministry of public works to help French industry gain orders in areas such as the Chinese and Ottoman empires in the building of railways and port facilities; but this initiative was immediately overtaken by the outbreak of war.

CONDITIONS OF ENROLMENT ONTO A PROGRAMME OF STUDY LEADING TO THE AWARD OF A PROFESSIONAL CERTIFICATE OR TO INDIVIDUAL AREAS OF STUDY WITHIN THE CERTIFICATE PROGRAMME.

"Some areas just shouldn't be developed", according to Ian White of CSIRO.

Five new "Environmentally Sensitive Areas" (ESAs) have been designated in Scotland.

The landscape is flat and open, these factors have reduced inter-visibility, long distance views are possible over extensive areas.

These high volumes of traffic pass through densely built up areas often of high environmental quality and this results in congestion, delay and road safety problems.

Due to the pilot nature of the scheme it is only operating in a few selected areas initially, which is why your parish has not been contacted.

They encourage access by walks, picnic areas, car parks etc.
About six weeks after infection, chronic bronchitis and emphysema are established and small greyish nodules may be found in the posterior part of the diaphragmatic lobes; these may aggregate to form larger areas and are slow to resolve.

Work here will concentrate in areas like information technology, and further liquid crystal research which will eventually make 3-dimensional and high definition television widely available.

'We have a better level of funding than many areas, but it is still discretionary and could be taken away.'

He also dismissed the Borders NFU claim that the differential premium for hill and upland farmers, in Less Favoured Areas, had been eroded.

Mr Mandela, who is on a three-day tour of powderkeg areas around the Natal provincial capital Pietermaritzburg, said earlier he planned to attend tomorrow's funeral.

Classes have continued over the breadth, if not the length, of Scotland and members from many areas met in Newton Steward in March, when Valerie Archibald organised another Medau weekend with classes given by Beryl Smith and Peggy Sigall.

She said, I don't care whether you are at university, there are certain areas that you need to know a lot more background before you can do it at this level.
Annexe 9-6-5 Proposition de traduction du terme AREA – feedback

Objet : FE: Fiche terminologique incomplète
De : Maude Beauchoesne (Maude.Beauchoesne@tpsgc-pwgsc.gc.ca)
À : mireasilut@yahoo.com;
Date : Jeudi 3 juillet 2014 17h42

Bonjour,

Dans le corpus que vous nous avez transmis, il y a plusieurs façons de traduire en français le terme anglais area.

Voici quelques façons de traduire le terme anglais area, trouvé dans votre corpus :

to work in other areas : travailler dans d'autres secteurs, travailler dans d'autres domaines
to work in other areas of science : travailler dans d'autres secteurs scientifiques
to work in the areas of health promotion : expérience dans les domaines de la promotion de la santé
experience in the areas of test development : expérience en matière d'élaboration des examens
test areas of suicide prevention : expérience en prévention du suicide
area of management : domaine de la gestion, composante de gestion
research area = domaine de recherche
area of work = domaine de travail, domaine d'activité, secteur de travail
areas of work (communications, documents, tools, etc.): aspects du travail (dans les communications, documents, outils de travail, etc.)
area of mathematics : domaine des mathématiques
business area : secteur d'activité
subject area : sujet, domaine

Comme on peut le constater, on retrouve souvent les termes français suivants comme traduction du terme anglais area : domaine, composante, secteur, aspect. Le choix de ces équivalents français dépend du contexte ainsi que des termes qui précèdent ou suivent celui de area. Par exemple, domaine d'étude correspond à area of study, field of study etc.; domaine de recherche correspond à area of research, research area, research field etc.; area of management correspond à domaine de la gestion, composante de gestion etc.

Nous avons donc créé une fiche dans TERMINUM reflétant ces réflexions. Vous pourrez la voir lors de la prochaine mise à jour de TERMINUM.

N'hésitez pas à communiquer avec moi pour toute question ou commentaire.

Annexe 9-7 Occurrences de FIELD dans CAEMS

1971

1. The East Malling Research Station Association offers a postgraduate Studentship of £750 per annum (tax free) tenable for three years, for study in one of the following fields: crop physiology, the water relations of plants, mycology (soil-borne pathogens), virology, biometrical statistics. [733-013 (1971) : 39]

2. However, the scientific discipline of the successful applicant is relatively unimportant, provided he has demonstrated his ability in his chosen field and has an appreciation of work in other areas. [733-019 (1971) : 40]

3. Applications are invited for the post of Lecturer in Mathematical Statistics or Operational Research. Applicants should have research interests, and have or expect to obtain appropriate postgraduate qualifications, in one of these or related fields. [733-028 (1971) : 41]

4. Preference will be given to candidates with experience in one of the following fields - Cytogenetics, Developmental Genetics, Molecular Cytology or Population Genetics. [733-030 (1971) : 41]

5. Appointee will be expected to teach mainly analytical chemistry (but initially some teaching in other fields of chemistry, preferably organic chemistry will be necessary) [733-036 (1971) : 42]

6. and to undertake research in a field of interest to the Department. [733-036 (1971) : 42]

7. Appointee will be expected to be responsible for teaching mainly physical/analytical chemistry and to undertake research in a field of interest of the Department. [733-036 (1971) : 42]

8. Applications are invited for Lectureships within the School of Biological and Environmental Studies, in the following fields of interest: [Taxonomy; Economic Geography; Meteorology; Systems Analysis] [733-039 (1971) : 42]

9. The successful candidates will probably have about three years’ experience in at least one of the following fields: information systems statistical data processing survey analysis commercial programming [733-048 (1971) : 43]

10. Applicants should have research interests in either laboratory Plasma Physics, or the Physics of the Ionosphere and Magnetosphere, or preferably in both fields. [733-058 (1971) : 44]

11. GKN companies are leaders in many fields in terms of sheer size of output and in the application of technology. [733-059 (1971) : 45]

12. Applicants should preferably have had two years research experience in the field of animal biochemistry and physiology. [733-060 (1971) : 45]

13. Applicants should be able to show an aptitude for practical tasks and the ability to learn new techniques, and it would be an advantage to have experience in one or more of the following fields: vacuum technology, semiconductor device technology, chemical analysis, metallurgical sample handling, electronics, instrument mechanics. [733-072 (1971) : 47]

14. Applicants should have experience in the appropriate field. [733-076 (1971) : 47]
15. The Trustees are looking for a scientist and administrator with an interest in the educational and social aspects of museum and art gallery activities and preferably with experience in these fields. [733-086 (1971) : 49]

16. To develop and apply radiation measurement methods to the evaluation of materials and components to support work in the fields of nuclear industry and defence. [733-087 (1971) : 49]

17. An interest in radiation physics coupled with a careful experimental technique is required. Previous experience in this field is desirable but not essential. [733-087 (1971) : 49]

18. Technical staff for research centres, industry and hospitals urgently required in the following fields: Chemistry, Biochemistry, Microbiology, Toxicology, Bacteriology; Haematology [737-002 (1971) : 277]

19. Vacancies exist for qualified staff in the fields of glass technology, glass science and furnace technology. [737-006 (1971) : 277]

20. Preference will be given to a candidate whose chief interests are in the field of either materials or machines. [737-008 (1971) : 277]

21. The successful candidate will be expected to undertake research within the broad field of interest of the Company under the direction of the head of the department. [737-035 (1971) : 279]

22. Applicants should be graduate or equivalent in microbiology and preferably have experience in micro biological assay methods or industrial work in biological fields. [741-002 (1971) : 519]

23. Previous experience in the field, and suitable academic qualifications and / or industrial experience required. [741-012 (1971) : 520]

24. Research in the department has been mainly in the fields of elasticity, plasticity, heat transfer, decision theory and optimal control and the theory of minimum weight structures. [741-015 (1971) : 521]

25. He will take charge of a research and product development team, the main emphasis of whose work will be on the development of new products, utilising the company’s technical experience in the fields of silicates, glass, resin cement and the like. [741-020 (1971) : 521]

26. Candidates should have a Ph. D. or equivalent degree from a university in Britain or higher research qualification in the field of Plant Breeding. [741-025 (1971) : 522]

27. Their research experience should be in a broad field of electrical networks, so as to complement the work of a group concerned with circuit theory, computer-aided design and device modelling. [741-030 (1971) : 522]

28. The work of this Division is varied and interesting and concerned with a wide field of biological and medical research. [741-033 (1971) : 523]

29. The successful candidate will be expected to undertake some undergraduate teaching responsibilities in the School of Physics, but will be able to devote his major efforts to research in his chosen field. [741-034 (1971) : 523]

30. Candidates for the post should have specialist interests in the field of the structure / property relationship in materials and of its industrial applications, and broad interests in the role of technology in the man-made world. [745-001 (1971) : 57]
31. Technical Information Officer to maintain and develop further its Programme Information Retrieval System, train staff, and follow up developments in this field for application to the Organization’s information retrieval work. [745-004 (1971) : 57]

32. Candidates would normally hold a University degree, preferably at Masters’ level and have formal training and practical experience in the field of information science. [745-004 (1971) : 57]

33. The existing programmes include fractionation and investigation of snake venoms and work in the field of blood coagulation. [745-015 (1971) : 58]

34. Successful applicants will be expected to contribute to teaching and research in these fields. [745-019 (1971) : 58]

35. Equivalent experience in the fields of fluid mechanics or acoustics would be advantageous. [745-020 (1971) : 59]

36. Applications are invited from candidates who have a good Honours Degree in an appropriate subject and preferably some industrial or research experience, to work in the field of fatigue crack propagation in high strength Naval steels. [745-021 (1971) : 59]

37. Applications are invited from persons with qualifications in any field of Zoology for a Lectureship in Zoology from 1 October 1971 or such other date as may be arranged. [745-025 (1971) : 59]

38. Experience in these fields will be advantageous. [745-026 (1971) : 59]

39. The appointment is primarily in the Production Engineering field, but experience in either Control and Systems Engineering or Tribology would be valuable. [745-032 (1971) : 60]

40. Engineer, Physicist or Chemist to participate in the planning and execution of work required for radiation safety. He will carry out studies and development work in the following fields: beam loss, shielding for radiation protection, material damage dosimetry, methods of evaluating the lifetime of materials around accelerators. [745-035 (1971) : 60]

41. Experience in this field an advantage as diagnostic work is just starting. [745-036 (1971) : 60]

42. Experience in the relevant field of photographic or coating technology would be a major consideration. [745-037 (1971) : 60]

44. Applications are invited for a number of University Postgraduate Studentships to be held within the following fields of interest: Physiological ecology of Lough Neagh particularly zooplantation and chironomids. Eco-behavioural studies of freshwater fish. Physiology, structure and growth of higher plants and microorganisms. Functional aspects of ecosystems including soil biology. Plant ecotype studies. Simulation models of ecosystems. Predatory and reproductive behaviour of selected animals including insects, spiders and mammals. Palaeo-ecology / Palaeo-Limnology. Pollen analysis, plant macrofossils, diatoms, sediment chemistry. Hydrogeology / fluvial geomorphology. Settlement and agrarian history in Ireland [745-071 (1971) : 63]

45. A wide range of interesting topics are being investigated in the fields of Powder Technology, Materials Engineering and Materials Protection and vacancies will exist in all research groups. [745-072 (1971) : 63]

46. The course leading to the degree of M.Sc. by examination, will provide instruction in the branches of chemistry or particular concern to those whose interests lie in the field of colour. [745-080 (1971) : 63]
47. These courses are in the general field of ENGINEERING MECHANICS with emphasis on the use of FINITE ELEMENT METHODS and other ADVANCED NUMERICAL PROCESSES. It will be possible to specialise in three main branches of study: SOLID AND STRUCTURAL MECHANICS, FLUID MECHANICS; GEO MECHANICS. [745-084 (1971) : 64]

48. Applications are also invited from those wishing to study for the degree of Ph.D. in the same general fields. [745-084 (1971) : 64]

49. This is a key post in a new and challenging field of activity and there is considerable development potential for a suitable applicant. [750-003 (1971) : 354]

50. Applications for appointment to two positions of LECTURER OR SENIOR LECTURER in the Department of Agronomy are invited from persons with interest and suitable qualifications in any of the following fields: [Agricultural Systems; Genetics / Plant Breeding; Ecology] [750-008 (1971) : 354]

51. Although not essential previous experience in the field would be desirable. [750-015 (1971) : 355]

52. The research posts are to support Professor J. H. Collings in a substantial industrially supported research programme in the field of acoustoelectronic integrated circuits and their applications to telecommunication systems. [750-025 (1971) : 356]

53. An Foras Forbartha, the national institute for physical planning and construction research in Ireland, is responsible for research and advisory services in the field of environmental ecology with special reference to the Local Government (Planning and Development) Act, 1963. [750-046 (1971) : 358]

54. It is likely that the successful candidate will also have a post-graduate qualification in the field of ecology or conservation. [750-046 (1971) : 358]

55. The course is suitable for postgraduate personnel and others who have had extensive laboratory experience in biochemical and relevant fields. [750-058 (1971) : 359]

56. A number of S.R.C. research studentships and similar grants are available in the following fields: Cosmic Ray Physics, Low Temperature Solid State Physics, Polymer Physics [754-001 (1971) : 598]

57. Applications are invited for a Research Studentship to undertake research in one of the following fields: plant or animal biochemistry; microbiology; nematology. [754-006 (1971) : 598]

58. A limited number of Studentships will be available in the above Department for research in the fields of microbiology, applied biochemistry, water pollution and animal physiology. [754-007 (1971) : 598]

59. The applications of nuclear techniques to various fields, e.g. activation analysis or medical physics and specialised techniques, e.g. accelerator design and nuclear electronics are covered in optional modules. [754-012 (1971) : 599]

60. Previous experience in the field not necessary. [754-017 (1971) : 599]

61. Candidates should be over 30 years of age and have a university degree with either technical or non-technical background and experience in more than one field of graduate employment. [754-030 (1971) : 600]

62. The field of study will depend primarily on the interests of the person appointed. [754-037 (1971) : 601]
Applications are invited for the post of research assistant in the Palaeoecology Laboratory from graduates with some biological training and interests in one or more of the following fields: biology, chemistry, geography or archaeology. [754-052 (1971) : 602]

There is no restriction as to field, but there is less likelihood of a mechanical engineer being chosen. [754-053 (1971) : 602]

Experience in these fields an advantage, but not essential. [754-060 (1971) : 602]

In addition, it has strong links with the headquarters of the Division in Canberra A.C.T. which is engaged in several fields of crop research. [754-061 (1971) : 603]

Applicants should have a Ph.D. degree in an appropriate field, or postgraduate research experience of equivalent standard and duration, supported by satisfactory evidence of research ability. [754-061 (1971) : 603]

This post would be suitable for a mathematician, physicist, electrical engineer or physical chemist interested in this field. [754-062 (1971) : 603]

Junior Technical Officer required in Chester Beatty Research Institute, Fulham Road, S.W.3 to assist with work in the field of gene control, with particular reference to the chemistry of nuclear proteins. [754-066 (1971) : 603]

Requirements: An Honours University degree in one of the above fields with at least 8 years experience in Research and Development or in comparable activity. [754-070 (1971) : 604]

Would suit a technician (A.I.M.L.T. preferred but not essential) with experience in biochemistry or a related field. [754-072 (1971) : 604]

We have a vacancy for SENIOR SCIENTIFIC ASSISTANTS holding H.N.C. and having experience in one of the following fields: Metallography Crystal growing Microstructural studies with modern electronic equipment Operation of autoclaves Mechanical testing Electrical measurements Low temperature techniques [754-078 (1971) : Ciii]

Applicants should have a Ph.D. degree in an appropriate field or postgraduate research experience of equivalent standard and duration, supported by satisfactory evidence of research ability. [754-081 (1971) : Ciii]

In the case of an applicant having outstanding qualities of leadership in research and eminence in the broad field of study, appointment at a higher salary would be considered. [754-081 (1971) : Ciii]

The successful applicant will be the leader of this section and therefore must have experience in separation techniques, such as liquid-liquid extraction, ion exchange and chromatography and have the ability to direct research projects in those fields. [758-001 (1971) : 50]

The analytical chemistry of the noble metals has been under investigation for three years and will continue to be the main project in the future. Hence preference will be given to applicants who have a special interest in that field. [758-001 (1971) : 50]

It is hoped in particular to attract those with experience in the physical chemistry of proteins and/or nucleic acids, and are interested in applying their knowledge to the integrated biology of living organisms; but no specific limitations of research field is envisaged. [758-006 (1971) : 50]

This post is in a group led by Professor R. N. Haszeldine, F.R.S., and industrial experience in the fields of Petroleum, Chemistry and Petrochemicals is required. [758-011 (1971) : 51]

80. Applications are invited from holders of an Honours Degree in a Biological subject or those expecting to qualify this year, for a Research Assistantship in the field of: Freshwater Pollution, and Applied Fungal Genetics. [758-029 (1971) : 52]

81. It is proposed to appoint a specialist either in the field of cell biology or in that of ecology. [758-030 (1971) : 52]

82. Applications are invited for this post in the Department of Computer Science. Applicants must have experience in one or more of the following fields: Operating Systems, High Level Languages, Numerical Analysis. [758-036 (1971) : 52]

83. Medical Physics Technician, Grade III, required to assist in the work of this new Department, with special responsibility in the fields of Radioisotope and Ultrasonic Scanning, Radiation measurement and Diagnostic Radioisotope procedures. [758-044 (1971) : 53]

84. Preference will be given to a candidate whose chief interests are in the field of either materials or machines. [758-046 (1971) : 53]

85. Applicants must have experience in this field and have a sound knowledge of Ultramicrotomy. [758-055 (1971) : 54]

86. Applications are invited for research studentships leading to Ph.D. degrees in the following fields. (i) Carbanion chemistry involving fluorocarbon systems. (ii) Infrared studies of high pressure reactions or organometallic compounds. (iii) Inorganic cyclic sulphur-nitrogen chemistry. (iv) Organofluorine chemistry which may include work on polymers. (v) Inorganic Chemistry in non-aqueous solvents. [758-071 (1971) : 55]

87. The Institute has a large scientific staff and the current research programme covers the following fields: Virus-specified nucleic acids and proteins; physiology and genetics of mammalian virus; tumour virology; electron microscopy of cells, viruses and nucleic acids; genetics of mammalian cells. [758-074 (1971) : 55]

88. A Ph.D. student is required to research into applications of radiation technology in the fields of either medicine or archaeology. [758-075 (1971) : 55]

89. Postgraduate Studies Opportunities exist in the following fields: Research for the degree of M.Phil or Ph.D. in Combustion Control, Fluid Mechanics, Heat Transfer, Metal Forming, Stress Analysis and Tribology. [758-084 (1971) : 56]

90. Applicants must be interested in the development of basic research in relevant fields and must contribute to undergraduate teaching in Chemical Engineering. [763-004 (1971) : 343]

91. The chemistry of immobilisation is a large and rapidly growing field and the successful applicant would be called upon to assist in the preparation of immobilised derivatives and their use in reactor systems. [763-014 (1971) : 344]

92. The Structure Unit provides a service to scientists both within ERA and in industry, and thus the person appointed will be working with a variety of people in several fields. [763-016 (1971) : 345]

93. A new electronics Laboratory is being fitted out, and the post provides an opportunity for interesting work in a worth-while field. [763-019 (1971) : 345]
94. Technician (with A.I.M.L.T. or equivalent qualification) required to assist in clinical and laboratory research in the cardiopulmonary field in the Department of Anaesthetics. [763-025 (1971) : 345]

95. Research experience in fields associated with medicine – including social science – and a research degree would be an advantage. [763-033 (1971) : 346]

96. The work will include liaison with members of the Council’s scientific staff and others active in the relevant research field, participation in scientific committee and conference activities, and provision of general assistance and advice within the Council’s administrative organisation. [763-033 (1971) : 346]

97. The appointed persons will work under Dr. S. Lewin in fields concerned with the effects of heavy water on the reactions of nucleic acids, of histones and of protein biosynthesis, or on problems concerned with insulin-antibody reaction in relation to diabetes. [763-041 (1971) : 347]

98. There are also research opportunities in the following fields: Engineering properties of plastics. Welding Technology; Superplasticity and sheet metal deformation problems. [763-050 (1971) : 348]

99. A Research Studentship is available for study leading to a higher degree in the field of Flow Induced Vibrations in Tube Bundles. [763-052 (1971) : 348]

100. Beecham Research Laboratories, part of the Beecham Group, is a leading company in the field of antibiotic research with laboratories situated in a pleasant area of Surrey within easy reach of London. [767-017 (1971) : 543]

101. The problems arising involve linear algebra and real and complex analysis, and the person appointed should have some familiarity with these fields, although a degree is not essential. [767-018 (1971) : 543]

102. A research degree or a degree and equivalent experience in Mineralogy and Petrology and knowledge of and aptitude in the use of modern techniques in this field. [767-030 (1971) : 544]

103. The Curator is responsible for the curation of the mineral, rock and meteorite collections; expected to carry out good quality research within this broad field. [767-030 (1971) : 544]

104. CHEMICAL TECHNICIANS are sought for the Chemotherapeutic Research Centre, Brockham Park, Betchworth, Surrey to work as a member of a multi-disciplinary team engaged upon research in the field of anti-bacterials. [767-032 (1971) : 544]

105. Candidates should have a good Honours degree and experience in the general field of protein biosynthesis in mammalian and avian systems; and the appointment is to the Principal Scientific Officer grade. [767-036 (1971) : 545]

106. The successful applicant is expected to develop an interest in medical physics and its clinical applications but previous experience in this field is not necessary. [767-037 (1971) : 545]

107. The successful applicant will be required to work in one of the following fields: Chemistry of development; Holography; Gelatin in photographic emulsions. [767-038 (1971) : 545]

108. A knowledge or interest in the field of mineralogy and microscopy will be an advantage in this post. [767-041 (1971) : 545]

109. Facilities for research in appropriate fields. [767-054 (1971) : 546]

110. Senior Lecturers / Lecturers in the fields of CARTOGRAPHY and Physical Geography, Economic Geography, Agricultural Geography, Settlement Geography, [772-009 (1971) : 53]
111. Previous experience in this **field**, in industry, would be an advantage. [772-013 (1971) : 53]

112. Candidates should have a good honours degree and postgraduate experience in an appropriate **field** of study. [772-016 (1971) : 54]

113. Such **fields** include micro-biology, microbial chemistry & physiology, and mycology. [772-016 (1971) : 54]

114. Previous experience in this or a related **field** would be an advantage. [772-021 (1971) : 54]

115. The School is a nationally recognised centre both for undergraduate and postgraduate studies and for biomedical teaching, and it is now desirable to develop research in this important **field**. [772-027 (1971) : 55]

116. Practical ability more relevant than experience in these **fields**. [772-029 (1971) : 55]

117. Company in the **field** of low energy medical ultrasonic equipment – requires Physicist or Senior Electronics Development Engineer [772-031 (1971) : 55]

118. A further appointment is to be made of a person with experience in genetics and biochemistry in the above or related **fields**. [772-033 (1971) : 55]

119. Applications from candidates with interests in the **field** of engineering plasticity (including dynamic loading, fracture mechanics and metal forming) will be especially welcome. [772-035 (1971) : 56]

120. Applicants should be well-qualified with experience preferably at the post-doctoral level in the **fields** of Bio-Physical, Bio-Inorganic, or Bio-Organic Chemistry. [772-039 (1971) : 56]

121. Applications are invited from experienced MICROBIOLOGISTS and BIOCHEMISTS at Ph.D. Level for research in the **field** of water and soil microbiology. [772-044 (1971) : 57]

122. Whatever your career interests - researching and promoting new **fields** of energy utilisation among our industrial clients; operating and developing the distribution networks; or generating and transmitting electricity with the CEGB - challenging opportunities exist. [772-046 (1971) : 57]

123. Professor in the **field** of Applied Sciences. [772-050 (1971) : 58]

124. Preference will be given to candidates in the **fields** of Polymer Science and Technology and Chemical Science and Technology, Chemical Science and Technology and Materials Science and Technology. [772-050 (1971) : 58]

125. Professors in the **fields** of Parasitology, Entomology, Hydrobiology or Plant Pathology. [772-050 (1971) : 58]

126. Lecturers in the following **fields** : Inorganic, Organic and Physical Chemistry [772-050 (1971) : 58]

127. Professor / Director in the **fields** of Pharmacy, Pharmaceutics, Pharmaceutical Chemistry, Pharmacology, Physiology and Pharmaceutical Technology. [772-050 (1971) : 58]

128. Lecturers in the **fields** of Pharmacy, Pharmaceutics, Pharmaceutical Chemistry, Pharmacology, Physiology and Pharmaceutical Technology. [772-050 (1971) : 58]

130. Professor / Director (D) : Should have a Ph.D for the above-mentioned fields together with relevant teaching experience in institutions of higher learning and also the ability to set up and administration of the facilities pertaining to undergraduate and professional training. [772-050 (1971) : 58]

131. Lecturers (for D only): Should possess a good first degree in Pharmacy together with a higher degree and research experience in one of the following fields related to the teaching of Pharmacy. [772-050 (1971) : 58]

132. Must be outstanding scholars in their field with experience in University teaching and research, with publications of recognized academic value. [772-050 (1971) : 58]

133. Graduates in Biology, Zoology or related fields would be suitable candidates. [772-055 (1971) : 58]

134. We have a vacancy for an Experimental Biologist with Ph.D. level research experience to work in the field of Parasitology. [772-060 (1971) : 59]

135. Previous experience in this area is desirable but not essential since we are seeking an experimentalist whose interests would not be limited to this field. [772-060 (1971) : 59]

136. Experienced Chemist […] required at Chiswick, West London to undertake non-routine chemical analysis and conduct investigations into miscellaneous problems covering a wide field, both within and outside the laboratory, including works processes, atmospheric pollution and fire hazards. [772-061 (1971) : 59]

137. This course prepares suitably qualified graduates in Science and Technology for work in information units and libraries in industry, research organisations and universities, and for research in the information field. [772-074 (1971) : 61]

138. The structure of the course is such that it is possible for candidates to concentrate their studies in the field of science or mathematics education. [772-075 (1971) : 61]

139. The Institute of Advanced Studies, consisting of the John Curtin School of Medical Research and the Research Schools of Physical Sciences, Social Sciences, Pacific Studies, Chemistry and Biological Sciences, and The School of General Studies, consisting of Faculties of Arts, Asian Studies, Economics, Law and Science, offer a limited number of scholarships in the fields listed below to applicants of high scholastic calibre with capacity for research who hold, or expect to hold a good honours degree or equivalent from a recognised university. [772-085 (1971) : 63]

140. The fields of research in which scholarships are offered are: Neurobiology, Developmental Biology, Environmental Biology, Genetics, Human Biology, Molecular Biology, Environmental Biology, Taxonomy, Microbiology, Botany, Forestry, Zoology, Physiology, Neupharmacology, Clinical Science, Experimental Pathology, Immunology, Medical Chemistry, Biochemistry, Physical Biochemistry; Chemistry: Inorganic, Organic Physical Organic, Theoretical and Physical; Geochemistry, Geology, Geophysics, Aerophysics, Electron and Ion Physics, Engineering Physics, Laser Physics, Nuclear Physics, Solid State Physics, Theoretical Physics, Astronomy, Mathematics, Applied Mathematics, Computer Science, Statistics. [772-085 (1971) : 63]

141. During 1972 the British Steel Corporation is offering a number of Fellowships at Universities and other educational institutions for work in any field of interest common to the Corporation, the Fellow and the institution. [772-087 (1971) : 63]
142. The applications should be in the **field** of Mathematics, Natural Sciences, Geography and allied subjects. [772-088 (1971) : 63]

143. In the past two years the Medical Council on Alcoholism has given substantial grants to workers in the **field** of alcoholism. [772-092 (1971) : 64]

144. The Fellowships, normally tenable for two years, can be held in any **field** provided it falls within ICI’s general sphere of interest: this includes many branches of chemistry, physics, the biological sciences, applied mathematics, engineering, and technology. [772-095 (1971) : Ciii]

145. Applications for appointment as Research Fellow in Plant Nutrition in the Department of Soil Science and Plant Nutrition, Institute of Agriculture, are invited from graduates in Science or Agricultural Science with postgraduate experience in plant physiology, biophysics or related **fields** concerned with the transfer of nutrients from soils to plants. [774-004 (1971) : 188]

146. Research Fellow supported by SRC to work in the Polymer Physics Group in the **field** of the Mechanical Properties and Structure of solid polymers. [774-014 (1971) : 189]

147. Experience in either fracture, plastic deformation or X-ray diffraction though not necessarily in the **field** of polymers would be an advantage. [774-014 (1971) : 189]

148. At present research is being carried out in the department in the **fields** of nuclear physics (by means of a CN Van de Graaf accelerator), low-level radioactivity, plasma physics, astrophysics and in several branches of theoretical physics. [774-022 (1971) : 189]

149. Research may be done in many **fields** of metals or ceramics: phase transformations, diffusion, surfaces, mechanical and electrical properties, radiation damage, and on processes: physical chemistry of iron and steelmaking mass transport and heterogeneous kinetics. [774-023 (1971) : 189]

150. The largest independent laboratory in the medical and biological **fields** in Western Europe, based in England but with branches or offices in the United States, Singapore, France and Japan, requires a Divisional Director. [774-032 (1971) : 190]

151. Applicants should be well-qualified with experience preferably at the post-doctoral level in the **fields** of Bio-Physical, Bio-Inorganic, or Bio-Organic Chemistry. [774-033 (1971) : 190]

152. Person appointed will be expected to lead a small team in this **field**. [774-034 (1971) : 190]

153. University graduates in one of the **following fields**: mechanical, physical, chemical and industrial engineering; materials sciences; analytical chemistry; ceramics; physical, mechanical and extractive metallurgy. [774-042 (1971) : 191]

154. Applicants should possess a good Honours Degree or equivalent qualification in physical science or engineering and experience in any of the **following fields** will be of value: polymer science, composite materials and acoustics. [774-052 (1971) : 192]

155. A research studentship (assistant) is available for a person with graduate or equivalent qualification in metallurgy or physics to undertake work in the **field** of Directional Solidification – High Temperature Materials [774-053 (1971) : 192]

156. Applicants should be well-qualified with experience preferably at the postdoctoral level in the **fields** of Bio-Physical, Bio-Inorganic, or Bio-Organic Chemistry. [776-017 (1971) : 287]
Applicants should have a postdoctoral qualification in a biological science (or physical science with a strong emphasis on biological or biochemical applications), and be interested in developing new ideas in the field. [776-022 (1971) : 288]

1995

1. You should have a good first degree in Engineering Mathematics, Mechanical Engineering or a related discipline and be able to demonstrate considerable mathematical ability in the fields of both classical continuum mathematics and numerical algorithms. [1959-031 (1995) : 52]

2. Requirements: A degree in water resources engineering or a related field with extensive experience in river basin management at a policy formulation level. [1959-036 (1995) : 54]

3. The ideal candidate will have a sound technical background in the biological sciences/pharmacy fields. [1959-038 (1995) : 54]

4. The Trust is anxious to stimulate research in this subject and in particular to promote the flow of well-trained research workers into this field. [1959-043 (1995) : 56]

5. At Bayer, our Research and Development is a cornerstone of our business. Our commitment to research into new and effective medicines, in particular in the field of respiratory diseases such as Asthma, Chronic Bronchitis and Cystic Fibrosis is recognised world-wide and is second to none. [1963-012 (1995) : 53]

6. A Ph.D. with at least 10 years’ research experience and a productive track record in Electrophysiology, you will relish the challenge to establish and run a new electrophysiology laboratory and also have the intellectual capacity to become a dedicated expert in the field of respiratory disease. [1963-012 (1995) : 53]

7. If you have, or expect to have, a good honours degree, an MSc or a Ph.D. in earth sciences or a related field and you are computer literate, adaptable and eager to learn new skills, the British Geological Survey would like to hear from you. [1963-013 (1995) : 54]

8. Candidates should be graduates in a biological science or pharmacology, preferably with a couple of years experience within a medical/ healthcare publications field, either commercial or academic. [1963-020 (1995) : 55]

9. The Institute is instrumental in identifying and investigating new issues in this field and publishes authoritative documents on topics of major interest. [1963-023 (1995) : 56]

10. He or she would also be expected to liaise closely with earth scientists, geomorphologists, hydrologists, archaeologists and biochemists, and a strong interest in one or more of these fields would be an advantage. [1963-032 (1995) : 57]

11. Applicants should have a first degree in a major engineering discipline and a postgraduate qualification and/or a minimum of 2 years’ experience in the field of Biomedical Engineering. [1963-044 (1995) : 60]

12. The candidate should have a Ph.D. or equivalent, at least three years’ experience of applied ornithology and ecology, with a proven track record of applied field research, scientific publications and supervision of students. [1963-050 (1995) : 62]

14. The principal role will be to co-ordinate and develop clinical research projects in the **field** of gastrointestinal disease and to perform physiological measurements. [1963-060 (1995) : 64]

15. If you wish to be kept informed of ERF’s activities please contact the Administrator to register your interest in epilepsy research and in what **fields**. [1963-061 (1995) : 64]

16. Candidates will be expected to be molecular biologists, ideally with experience in a relevant immunological **field**. [1963-069 (1995) : 66]

17. We now have a vacancy for a graduate, with experience in the **field** of scientific and technological information, to be responsible for the management of the library and to contribute to our search activities, particularly in the techno-commercial and business areas. [1963-071 (1995) : 66]

18. Applicants should have a Ph.D. in a relevant **field**, experience of field and laboratory techniques including AAS and preferably ICP-AES with a proven ability to meet deadlines. [1967-001 (1995) : 60]

19. ARA is a leader in the **field** of aerodynamic research and wind tunnel testing, located on the northern side of Bedford. [1967-002 (1995) : 60]

20. Based in Harrogate, Hazleton Europe is a major subsidiary of the world's largest provider of contract research to the chemical, agrochemical and pharmaceutical industries and is a leader in the **field** of product safety evaluation. [1967-011 (1995) : 66]

21. This full-time/part-time course provides a thorough grounding in the science of Radiation Protection and its relationship to the broader **field** of Environmental Protection. [1967-018 (1995) : 68]

22. It offers instruction and training for work in the health service, in research, the medical equipment industry and other related **fields**. [1967-018 (1995) : 68]

24. This is an excellent opportunity to develop your skills in an unusual and exciting **field**. [1967-028 (1995) : 71]

25. Preference will be given to candidates with a background in marine ecology, in the **fields** of education, research or commerce, and to those who have demonstrated their ability to manage people, resources and market services. [1967-030 (1995) : 71]

27. The group currently has research staff working in the **fields** of adaptive optics, faint object spectroscopy and multi-fibre spectroscopy, and has provided a number of very successful astronomical instruments for CTK telescopes including AUTOFIB, LDSS and MARTINI. [1967-036 (1995) : 73]

28. Applications are invited for two 5 year Lectureships in the **field** of cell biology and physiology with particular interest in aspects of the gastrointestinal tract. [1967-048 (1995) : 76]

29. The successful candidate should have obtained a Ph.D. in the **field** of Magnetic Resonance Imaging/Spectroscopy, and have a proven track-record in scientific research. [1967-062 (1995) : 80]

30. Applicants should indicate their preferred areas. A good honours degree in science, mathematics or engineering with some experience in related **fields** of research is necessary. [1971-003 (1995) : 55]
31. The Soil Biologist / Zoologist will carry out existing contract-based research, in addition to initiating new research projects in this field. [1971-008 (1995) : 58]

32. Which is why Research and Development is a major cornerstone of our business, with significant success in the cardiovascular market and genuine progress in the fields of anti-infective and metabolic medicine. [1971-024 (1995) : 63]

33. Previous experience in cell culture techniques is desirable but training will be provided in this specialised field. [1971-028 (1995) : 64]

34. Experience in the HLA field would be an advantage. [1971-028 (1995) : 64]

35. We are committed to the provision of a comprehensive Forensic Science Service to Tayside, Fife and Central Scotland Police, as well as to external Police Forces, HM Customs and Excise and others where specialist Analyses are required, particularly in the field of DNA Profiling. [1971-038 (1995) : 68]

36. Candidates will need to be educated to at least degree level in a related field and/or have a proven record of achievement. [1971-053 (1995) : 72]

37. The new laboratory provides a comprehensive service for the Group and external clients in the field of water analysis and wider environmental activities. [1971-069 (1995) : 77]

38. The position would suit a young graduate (consideration would be given to those expecting to graduate in 1995) seeking a challenging role in the field of water and environmental analysis. [1971-069 (1995) : 77]

39. Applicants should have an outstanding record of research and teaching achievements in this field. [1976-002 (1995) : 59]

40. He or she will be required to provide focus and leadership over a broad range of research activities in related fields and will be expected to participate actively in a variety of courses and teaching activities within the Department's undergraduate programme. [1976-005 (1995) : 60]

41. Applicants should have a good scientific degree in one of the fields covered by NERC, at least two years' relevant postgraduate experience, together with a strong interest in the sciences relevant to environmental research. [1976-011 (1995) : 62]

42. The University seeks applications from persons with advanced qualifications in both Education and Science and the experience and ability to provide strong leadership in the field of Science Education. [1976-014 (1995) : 66]

43. The successful applicant will be required to develop either a related or an independent field of research. [1976-014 (1995) : 66]

44. Vacancies exist for University Lecturers or University Assistant Lecturers in the following fields to take up appointment on 1 October 1995, or as soon as possible thereafter. [Electrical Drives / Communications Electronics; Information Engineering; Nuclear Engineering; Structural Engineering; Manufacturing Engineering] [1976-029 (1995) : 70]

45. Electrical Drives / Communications Electronics: preference will be given to a person with a record of excellence in research in one of these fields and an ability to teach with enthusiasm in the general area of electrical and electronic engineering. [1976-029 (1995) : 70]
46. Nuclear Engineering: preference will be given to a person with an active research record in the general field of thermodynamics and fluid mechanics and who is able to offer specialist lectures on engineering topics relevant to the nuclear industry. [1976-029 (1995) : 70]

47. Structural Engineering: candidates should possess expertise in some part of this field and should have experience in research and/or engineering practice. [1976-029 (1995) : 70]

48. Preference will be given to candidates with expertise in one of the following fields: automation and computer integrated manufacture, production processes, manufacturing systems. [1976-029 (1995) : 70]

49. The person or persons appointed will have a strong academic background and an enthusiasm for working in a manufacturing environment as distinct from specialist engineering or management field. [1976-029 (1995) : 70]

50. You will need […] The desire to make a career in the exciting field of physical sciences applied to medicine. [1976-034 (1995) : 71]

51. Applications are invited for a studentship in the field of asthma and immunology of the lung mucosa, under the supervision of Dr Kevan Roberts and Professor Stephen Holgate. [1976-039 (1995) : 72]

52. Preference will be given to candidates with proven records of successful research in nonlinear optics, quantum optics and opto-electronics, with an emphasis on devices and systems, but candidates working in the fields of laser-plasma physics, semiconductors, or solid state and surface spectroscopy will also be considered. [1976-044 (1995) : 73]

53.Pasteur Mérieux MSD is a European market leader in the field of vaccines. [1976-047 (1995) : 74]

54. Candidates should hold a degree in ecology, forestry or related discipline and, ideally, have recent research experience in one or more of the following fields: British mammals, silviculture and botanical monitoring. [1976-051 (1995) : 75]

55. As part of our expanding activities, we are seeking candidates from an international field with relevant experience for the following two positions: [1976-053 (1995) : 75]

56. Applications are invited for the above post to strengthen an internationally recognised research group in the field of computer simulation of particulate materials. [1976-060 (1995) : 77]

57. Candidates should have an outstanding record of research in a relevant field of engineering or science. [1976-060 (1995) : 77]

58. The Company, one of the pharmaceutical world leaders in its therapeutic field, is growing rapidly. [1976-072 (1995) : 80]

59. The successful applicant should possess a sound scientific background with a working knowledge of the veterinary field. [1976-096 (1995) : 86]

60. Toxicology is an expanding field with good career prospects. [1976-101 (1995) : 87]

61. Applicants should have an outstanding record of research and teaching achievements in this field. [1980-005 (1995) : 53]

62. Another route for the would-be hospital biomedical scientist, is via a masters degree in the subject. The universities of Leeds, London, Surrey and Trinity College Dublin all offer MSc courses in clinical biochemistry. Most are part-time over two years, and people already working in the field may be given time off to attend. [1980-006 (1995) : 54]

64. **DUTIES:** One of the **following fields:** identification of crop types in sites across the EU; cartographic and photogrammetric surveys of sites across the EU; input of derived data into geographical information systems. [1980-024 (1995) : 61]

65. **PROFILE:** A five years experience is required in the **field** of agronomy with particular reference to one or more of the following: crop identification, surveying, aerial photographic interpretation, analysis of remote sensing data, computer science with particular reference to GIS. [1980-024 (1995) : 61]

66. You will need to have experience in this specialised **field** of study, conversant with software writing (Pascal) and experience in developing electronic instrumentation for Biomedical use. [1980-027 (1995) : 62]

67. You should have a degree in a relevant **field**, CEng status or a higher degree. [1980-027 (1995) : 62]

68. By the generous benefaction of Professor R L Wain, CBE, FRS, money from the patents on his discoveries in the **field** of selective herbicides has been made available to the Biotechnology and Biological Sciences Research Council (BBSRC) and has been used to establish the Wain Trust Fund. [1980-036 (1995) : 65]

69. In the last month the University has appointed two research fellows to new posts in the Institute in the **fields** of geomicrobiology and physical modelling of surficial processes, respectively. [1980-039 (1995) : 66]

70. The PRIS was founded in 1988 to undertake advanced teaching and research in the broad **field** of sedimentology, including geochemical, hydrogeological, geophysical and geobiological aspects. [1980-039 (1995) : 66]

71. There are currently about 70 students registered for higher degrees in these **fields**, and they are supported by highly qualified technical staff and an excellent equipment base for analytical and experimental work. [1980-039 (1995) : 66]

72. He/she will be able to collaborate with equally dedicated researchers in a number of associated **fields** (among others: noble-gas and stable isotope geochemistry, physical hydrogeology, those of the two new appointees). [1980-039 (1995) : 66]

73. The successful candidate should have obtained a Ph.D. in the **field** of Magnetic Resonance Imaging/Spectroscopy. [1980-044 (1995) : 67]

74. Applications are invited for the above post, the holder of which will join an established research team working in a fast-moving, clinically relevant **field** investigating immunoglobulin gene rearrangements in multiple myeloma, in collaboration with the Royal Postgraduate Medical School. [1980-049 (1995) : 68]

75. **Materials / Vacuum Technology Scientist** with a good honours degree in materials science / vacuum technology, to undertake long term development in the **field** of advanced coatings for internal combustion engine components. [1980-071 (1995) : 73]

76. Applicants should ideally have experience of working with animal models as well as cell biology in the **field** of diabetes. [1980-074 (1995) : 74]
77. Applicants should be State Registered and hold the Fellowship of the Institute of Biomedical Sciences or equivalent, as well as having gained a wide range of experience in the field of haemostasis and thrombosis. [1980-078 (1995) : 75]

78. This is a one-year full-time course, commencing January 1996, providing a thorough training in the rapidly advancing fields of molecular biology and mechanistic toxicology. [1980-095 (1995) : 78]

79. Applicants should have or expect to graduate this summer with at least an upper second class honours degree in virology, molecular biology or a related field. [1980-097 (1995) : 79]

80. The ODA now invites UK organisations and institutes with a proven track record in systems-based research and related fields, particularly from those with working experience in developing countries, to submit a capability statement of research experience and capabilities in the systems areas specified. [1980-112 (1995) : 82]

81. Although the field of research is open, especial consideration will be given to established researchers in 'basin and sediment studies' or 'fluid rock interaction and fluid processes' or 'geo-microbiology'. [1984-006 (1995) : 52]

82. The section is currently providing services in the fields of megavoltage therapy X-ray, CT scanning, ultrasound imaging and various paramedical disciplines. [1984-007 (1995) : 53]

83. Whether you're a recent graduate with an interest in this challenging field, or an experienced professional with an appropriate track record, your intellectual, analytical and problem-solving abilities will need to be complemented by communication skills and a real awareness of customer needs. [1984-012 (1995) : 55]

84. You must be an innovative scientist with a good publication record in the field of animal welfare and have the skills to manage the staff and resources of our animal care services. [1984-013 (1995) : 56]

85. We are now wishing to consolidate our established position in the increasingly competitive field of feminine hygiene products, by expanding our European R&D Centre. [1984-014 (1995) : 57]

86. In the following areas, we are seeking ambitious physicists, engineers and scientists with relevant expertise and a keen desire to be at the forefront of their particular field. [1984-041 (1995) : 64]

87. A research role in one of the fastest developing fields in Europe. [1984-049 (1995) : 67]

88. The appointee will have duties in teaching, administration and research and will be expected to become expert in the field of human performance, thus opening up the possibility for consultancy work in this rapidly developing area. [1984-052 (1995) : 68]

89. Applicants should have a good record in one or more fields relating to exercise physiology or sports science, be able to demonstrate success in attracting funding, and have a positive enthusiastic character who can drive high quality research, run stimulating courses and contribute fully in devising policies and activities of the Institute. [1984-052 (1995) : 68]

90. During the last 3 years our two departments have developed a successful collaboration in the field of sepsis and septic shock, and applications are now invited for this new position which is designed to consolidate and develop this programme. [1984-053 (1995) : 69]

91. This approach promises wide application for medical diagnostics in the fields of hypertension, diabetes and cardiovascular medicine. [1984-073 (1995) : 73]
92. The research will start in October and run for two years with the objective of understanding the benefits of AFM in the ceramic field. [1984-096 (1995) : 77]

93. The post holder will have responsibility for the work of committees awarding research grants and studentships in the field of Freshwater Sciences and their subsequent administration. [1989-005 (1995) : 57]

94. You will possess a strong scientific or engineering background, and will hold a good honours degree or equivalent in a physical science field. [1989-010 (1995) : 60]

95. The Department has strengths in several relevant research fields, including Lower Palaeozoic biostratigraphy, sedimentary geochemistry, palaeontology, and crustal evolution. [1989-011 (1995) : 60]

96. Qualified to BSc level in pharmacology, biological sciences, pharmacy or a related field, you will have an MSc, or equivalent in information science or at least three years' experience of information work within the pharmaceutical or similar industry. [1989-024 (1995) : 64]

97. Research Associate Required for a period of one year to work in the field of natural antitumour antibodies. [1989-032 (1995) : 66]

98. Associate Physicist […] Required to play an important part in R & D projects in the fields of Respiratory Medicine (especially Sleep Studies) and EMG analysis. [1989-050 (1995) : 71]

99. The successful candidate will be expected to carry out research in the fields of experimental and/or computational hydraulics and secure funding for this research. [1989-058 (1995) : 72]

100. Applicants should have a Ph.D. degree or equivalent qualification in genetic resources or other fields closely related to germplasm conservation, management and utilisation. [1989-060 (1995) : 73]

101. Applications are invited for a new post in the field of functional programming systems, funded by an EPSRC research grant. [1989-077 (1995) : 77]

102. They will be an experienced functional programmer who has a proven ability to work in the field of programming language implementation. [1989-077 (1995) : 77]

103. This busy vascular department is looking for a Life Science Graduate who wishes to gain experience in the field of Vascular Technology. [1989-094 (1995) : 81]

104. The School also has a broad interest in this field which links with its two honours programmes - MA in Food & Welfare Studies & MA in Hotel & Catering Management. [1989-095 (1995) : 82]

105. Educated to degree level in a relevant discipline and possessing a postgraduate qualification in the field of plant biochemistry and/or physiology, you should have relevant research experience in a plant biology laboratory and must be a flexible, cooperative team player with good communication skills. [1989-100 (1995) : 83]

106. Are you a Graduate Scientist (eg, Chemist, Biochemist, Biologist, Environmental Scientist), or a person of similar standing seeking a secure yet challenging future in the field of Chemical Analysis? [1989-121 (1995) : 87]

107. The successful applicant should have demonstrated […] significant scientific achievement in a field relevant to work conducted at ANSTO [1993-008 (1995) : 54]
108. Applicants should have a Ph.D. degree or equivalent, in one or more of the fields of agronomy / agroclimatology / soil chemistry / soil physics / resource economics. [1993-069 (1995) : 71]

109. and extensive experience in natural resource management or a related field of research. [1993-069 (1995) : 71]

110. Evidence of active, sustained research and professional standing in the field of specialisation is essential, as is experience in multi-disciplinary research team leadership. [1993-069 (1995) : 71]

111. MSc Applied Neuroscience joint MSc with London Guildhall University. Provides specialist training for those interested in broad field of neuroscience. [1993-081 (1995) : 73]

112. Applicants should have a Ph.D. degree or equivalent qualification in genetic resources or other fields closely related to germplasm conservation, management and utilisation. [1993-084 (1995) : 74]

113. In addition to a Ph.D., applicants are expected to have […] international scientific contacts in the fields of systematics, taxonomy, and phylogeny. [1993-089 (1995) : 76]

114. Abbott is a leading healthcare organisation with a turnover in excess of $9 billion and a large market presence in antibiotic, cardiovascular and anaesthesia fields. [1998-005 (1995) : 73]

115. Kuwait Institute for Scientific Research (KISR) is a nonprofit organisation actively engaged in applied research in the fields of environmental and earth sciences; water resources; food resources; engineering; petroleum, petrochemicals and materials and techno-economics. [1998-013 (1995) : 76]

116. Professor Klaus Müller-Dethlefs has been appointed to a new Chair in Physical Chemistry and the Department seeks to develop its existing strengths in physical chemistry, especially in the fields of gas-phase high resolution laser spectroscopy and ZEKE photoelectron spectroscopy of molecular systems. [1998-018 (1995) : 78]

117. The successful candidate will be joining Europe's leading contract research laboratory in this field. [1998-029 (1995) : 82]

118. He or she will have an active research record within the general field of thermodynamics and fluid mechanics and a special interest in heat transfer under conditions relevant to industrial processes. [1998-058 (1995) : 90]

119. Encouragement is given to pursue further qualifications in the relevant field. [1998-061 (1995) : 91]

120. The Royal National Orthopaedic Hospital Trust is a world renowned centre of excellence in the field of orthopaedics and spinal injuries. [1998-073 (1995) : 94]

121. Wyeth Research (UK) is part of a world leading pharmaceutical company with an impressive record of growth in the field of medicine and nutrition, founded upon a commitment to research. [1998-080 (1995) : 95]

122. If you have a Ph.D. in the wood technology field and are driven by achievement and results; [1998-091 (1995) : 99]

123. These appointments would suit graduates (probably in Applied Physics) who have up to 2 years' experience of optical work or who have obtained some experience in this field during their studies. [1998-095 (1995) : 100]

124. In addition, you can expect a comprehensive range of benefits from a market leading player in its field. [1998-095 (1995) : 100]
125. At least a Master's level education (Doctorate preferred) in a biomedical field related to clinical research such as pharmacy; medicine or life science. [2002-010 (1995) : 57]

126. You should have a degree or similar in a physics, materials science or similar field and relevant experience would be an advantage. [2002-012 (1995) : 57]

128. To be successful in this position you may have come from a clinical trials or economics role and will have: [...] an understanding of pharmacoeconomic strategy and modelling and knowledge of the key players in the field. [2002-017 (1995) : 59]

129. Candidates should have a good honours degree (or equivalent) in mathematics, physics or engineering and preference will be shown to those candidates with experience in numerical techniques, especially in the field of computational fluid dynamics as applied to combustion and/or building aerodynamics. [2002-018 (1995) : 60]

130. The Department of Physics comprises faculty and research staff of 250 and covers a broad spectrum of research and education, ranging from fundamental elementary particle physics to the more applied field of combustion physics. [2002-022 (1995) : 61]

131. There is ongoing collaboration and conditions are good for further interdisciplinary interactions with related research groups at the Department of Physics, e.g. with surface science at the Division of Synchrotron Radiation Physics and MAX lab (Prof I. Lindau), with optical research at the Division of Atomic Physics (Prof S. Svanberg), with condensed matter theory at the Dept of Theoretical Physics (Prof L. Hedin, retiring in 1995) and with various subfields at the Chemical Center in Lund, e.g. high-resolution electron microscopy (Prof J-O. Bovin). [2002-022 (1995) : 61]

132. Applicants without specific analgesic experience but who have full scale Project Development experience within another field would also be of interest. [2002-024 (1995) : 62]

133. Applicants should ideally be graduates who have at least two years' experience working in the field of protein purification. [2002-046 (1995) : 68]

134. The role will provide you with the opportunity to make a significant contribution to the CSG's work, specifically in the fields of LINK programmes and technology transfer. [2002-054 (1995) : 71]

135. You should be trained in research to Ph.D. level, or have at least two years' postgraduate experience in a relevant field of ecology, and must hold a full, clean driving licence. [2002-069 (1995) : 75]

136. The main activities will involve research and development work in all areas of this field, from preformulation through production of clinical samples to the manufacture of finished product. [2002-070 (1995) : 75]

137. HALLSWORTH FELLOWSHIPS for advanced work in the field of Political Economy (including Public Administration), tenable for up to one year commencing October 1st 1996. [2002-074 (1995) : 76]

138. Our research covers the fields of computational fluid dynamics, heat transfer and aerodynamics applied to studies arising in the general areas of ballistics and energetic materials. [2002-081 (1995) : 78]

139. The successful candidate would also develop a nutritionally-based research programme in either a related or independent field of research. [2006-016 (1995) : 65]
Applicants should hold a Ph.D. or equivalent in a **field** of nutritional science or a related area [2006-016 (1995) : 65]

and also have substantive experience in a **field** related to clinical nutrition. [2006-016 (1995) : 65]

Pasteur Mérieux MSD is a European market leader in the specialist **field** of vaccines. [2006-021 (1995) : 67]

A versatile technician is required to work for the Head of Centre of Prevention Medicine in the **field** of equine infectious diseases. [2006-025 (1995) : 68]

We would be interested to receive applications from a wide range of candidates from the Educational, Medical and Biomedical **fields**. [2006-027 (1995) : 68]

Two research assistants are required to work on a rolling programme supported by the EPSRC in the **field** of multi-GHz integrated optoelectronics. [2006-035 (1995) : 70]

Due to the interdisciplinary nature of the project, previous experience in the **field** is not a prerequisite [2006-042 (1995) : 73]

and applicants with a background in physics, chemistry, engineering and other related **fields** will be considered. [2006-042 (1995) : 73]

Applicants should have a Ph.D. in the **field** of antennas or electromagnetic theory and experience in programming in FORTRAN. [2006-071 (1995) : 80]

Candidates must be post-doctoral in the bio-medical **field** and aged under 34 years, with evidence of independent research, including at least two years' post-doctoral research, and with an interest in a scientific aspect of preventive medicine. [2006-074 (1995) : 81]

Highly knowledgeable of your **field**, but still an avid information seeker, you must also be able to communicate effectively with people at all levels. [2006-079 (1995) : 83]

2005

1. Experienced scientists preferred but we are willing to provide training to someone wishing to enter this ultrasound **field**. [2481-002 (2005) : 52]

2. Tridend Technologies, a division of Oxford Gene Technology (OGT), created to develop novel molecular tools for file sciences and nanotechnology, is seeking to recruit a Postdoctoral Research Scientist to work in the **field** of Mass-spectrometry for Genomics and Proteomics [2481-019 (2005) : 58]

3. The successful candidate will have a degree in molecular biology, biochemistry, bioconjugate chemistry or a similar **field**. [2481-019 (2005) : 58]

4. Candidates should have an MSc or PhD in medical physics or a related **field**. [2481-034 (2005) : 64]

5. Research experience in the **fields** of nuclear medicine and medical physics; experience with the SunOs and Solaris operating system and experience in software development would be advantageous. [2481-034 (2005) : 64]

6. Applicants interested in working in this new and fast-developing **field** should have a PhD with experience in biochemistry and cell biology; experience with protein purification from bacteria or
eukaryotic cells, as well as possessing nuclear protein characterisation and general molecular/cell biology skills, is a plus. [2481-039 (2005) : 66]

7. With a postgraduate qualification in a relevant field, you will have at least five years' relevant experience and specialist knowledge of the behaviour of chemicals in the environment. [2481-055 (2005) : 70]

8. Tridend Technologies, a division of Oxford Gene Technology (OGT), created to develop novel molecular tools for file sciences and nanotechnology, is seeking to recruit a Postdoctoral Research Scientist to work in the field of Mass-spectrometry for Genomics and Proteomics [2481-059 (2005) : 71]

9. The successful candidate will have a degree in molecular biology, biochemistry, bioconjugate chemistry or a similar field. [2481-059 (2005) : 71]

10. The expectation is that the successful candidates will become international research leaders in their fields. [2481-070 (2005) : 75]

11. Applications are invited for a two-year Research Fellowship for research and training in hypertension and related fields. [2481-083 (2005) : 79]

12. Applications are invited for a three-year Research Studentship for research and training in hypertension and related fields leading to a PhD. [2481-083 (2005) : 79]

13. Applications are invited from individuals working in the field of microbiology, gastroenterology, food safety, nutrition and food science in the UK and Ireland. [2481-084 (2005) : 79]

14. As part of ongoing recruitment, we are inviting applications for Group Leader positions from outstanding scientists with an interest in cancer research, a commitment to excellence, and a strong record in and command of their field. [2485-003 (2005) : 58]

15. This is an administrative post; however, applicants should hold a PhD and have at least two years' experience as a research scientist in a field of biomedical research. [2485-003 (2005) : 58]

16. Applications are encouraged from people who are competent programmers in Java, C++, C or Fortran, and are graduates in science, engineering, computer science and mathematics or are currently working in a relevant field. [2485-007 (2005) : 59]

17. The ideal candidate will have a successful track-record of developing desktop applications in a scientific field e.g. geology / geophysics or the oil industry [2485-009 (2005) : 59]

18. The successful applicant will hold at least a Higher National Certificate in a related field. [2485-011 (2005) : 60]

19. Leading independent schools in the field of junior and senior education [2485-011 (2005) : 60]

20. You will have either a relevant postgraduate degree and a degree in ecology or similar discipline and at least two years' experience in a professional ecological field or a degree in ecology or similar discipline plus three years professional ecological experience. [2485-012 (2005) : 60]

21. Research papers published by University of Dundee scientists in the fields of Biology, Biochemistry and Molecular Biology were more highly cited over the past 10 years than any other University in Europe. [2485-020 (2005) : 62]

22. Joining our Portsmouth Medical Physics Service, you'll provide scientific and technical support in the field of MRI, and secondly in Bone Densitometry. [2485-022 (2005) : 63]
23. Physical, life sciences or engineering experience is an advantage and a PhD. in a scientific field is required. [2485-024 (2005) : 64]

24. Together with a good relevant degree, you must have three years' experience in either acoustics or a related field that demonstrates the ability to apply your technical knowledge across associated domains. [2485-025 (2005) : 65]

25. Ideally a graduate in Economics or a closely relevant technical field, you'll certainly have an in-depth understanding of industrial business economics and trading dynamics. [2485-026 (2005) : 66]

26. The successful candidate will ideally have experience in the field of catalysis and preferably industrial experience also. [2485-037 (2005) : 70]

27. You will have at least six years practical experience at an engineering level, two years being within the Metrology and Calibration field. [2485-044 (2005) : 73]

28. You will have at least five years practical experience within the Metrology and Calibration field including at least two years in the performance of diagnostic and rectification work to component level. [2485-044 (2005) : 73]

29. You should have established yourself as an expert in your field. [2485-072 (2005) : 81]

30. You will have research experience in one or more of the following fields: data analysis and manipulation, programming preferably C/C++ under UNIX/Linux, the running or application of existing numerical models, collection and use of disease datasets. [2485-081 (2005) : 84]

31. Applicants for the Chair must possess: [...] A distinguished record of international peer-reviewed publications in the field of soil science. [2485-089 (2005) : 87]

32. The Department of Mechanical Engineering (rated 5 in the 2001 RAE) has international standing in the fields of materials evaluation, computational engineering, internal combustion engines, fundamental aspects of fluid mechanics, and naval architecture and marine engineering. [2485-090 (2005) : 87]

33. One objective of this group is to generate scientific information on the aetiology and prognosis of bladder and prostate cancer, although new studies in the field of paediatrics are at hand. [2485-092 (2005) : 88]

34. The new postholder will work to conduct and supervise ongoing research projects in these fields. [2485-092 (2005) : 88]

35. The TTM will focus on evaluating, protecting and commercialising opportunities developed at King's College London in the fields of physical sciences, engineering and IT, including bioinformatics and biomedical devices. [2485-093 (2005) : 88]

36. NTT Basic Research Laboratory (BRL) and Oxford University invite applications for the post of NTT Fellow for a period of up to three years in the field of bionanoscience starting on 4th April 2005 or as soon as possible thereafter. [2485-097 (2005) : 89]

37. At the Department of Manufacturing Engineering and Management (IPL), Technical University of Denmark we are looking for a professor in operations management to play a key role in research and education within the field including development of production systems, planning and control covering physical products as well as knowledge and service. [2485-102 (2005) : 90]
38. A significant number of Ph.D studentships will be available from October 2005 for postgraduate research and training in the following fields: Cancer Biology and Cell Signalling, Cell and Developmental Biology, Control of Gene Expression, Functional Genomics, Molecular Enzymology, Structural Biology, and Bioinformatics. Molecular Pathogenesis, Antibiotic Resistance, and Biosynthesis.

39. Active implantable medical devices are one of the most intellectually stimulating fields of medical science.

40. You will have state registration, experience in Nuclear Medicine, and a higher degree in medical physics or related field.

41. This is an exciting opportunity to join a group of scientists, expert in a wide variety of fields, providing scientific know-how throughout the Unilever business.

42. Certainly with a PhD in materials science, mechanical engineering, biomimetics or a related field, you’ll have a proven track record of research delivery and materials science.

43. Applicants should have considerable postgraduate experience and have gained recognition in the scientific community in their field.

44. We seek either a Clinical Cytogeneticist or a Medical Technical Officer to join our small team of clinical cytogeneticists in the field of cancer genetics.

45. This is a field that is constantly changing and evolving in the light of scientific and medical advances, and the posts represent an exciting and challenging opportunity.

46. The successful applicant will have a good honours degree (or equivalent) with experience of research, development, and commercialisation in the medical, health or clinical field, ideally in both an academic and industrial environment.

47. Research papers published by University of Dundee scientists in the fields of Biology, Biochemistry, and Molecular Biology were more highly cited over the past 10 years than any other University in Europe.

48. There is no specific requirement regarding field of research but you will be expected to make a contribution to the teaching activities of the Department across a wide range of materials topics.

49. You should have relevant experience in the field of human functional brain imaging and experience in methodological research involving experimental or clinical - pain would be advantageous.

50. This exciting and developing field, supporting regenerative medicine, will provide a strong basis for future career development of suitable individuals.

51. This is an exciting and developing field supporting regenerative medicine, likely to form a strong basis for future career development of suitable individuals.

52. There is no specific requirement regarding field of research but you will be expected to make a contribution to the teaching activities of the Department across a wide range of materials topics.

53. Chemoinformatics is a high profile, developing field in the pharmaceutical and agrochemical sectors.
54. The state-of-the-art controlled environment facilities, specialised laboratories and cutting-edge equipment will put you at the forefront of your chosen field. [2489-075 (2005) : 82]

55. Leading course in environmental field [2489-080 (2005) : 83]

56. Alaska Food Diagnostics Plc is a joint venture created between Dstl Porton Down and investors to apply a highly sensitive and specific diagnostic technique, originally developed during the Gulf War, to the field of food and beverage pathogen testing. [2493-006 (2005) : 56]

57. Successful candidates will play a critical role in the next stage of the Company's evolution while expanding their field of scientific expertise. [2493-008 (2005) : 57]

58. As well as a comprehensive salary, the opportunity to work for a global leader in its field and with some of the most well respected people in the industry, [2493-029 (2005) : 64]

59. Stiefel Laboratories is an International Pharmaceutical Organisation renowned in the field of Dermatology and committed to the Research and Development of Dermatological preparations. [2493-032 (2005) : 66]

60. Applicants should hold a PhD in an area of chemistry relevant to the position and have a proven track record of excellence, flair and productivity in their field of research. [2493-039 (2005) : 68]

61. The Max Planck Institute for Demographic Research is seeking to expand further its activities in the field of Evolutionary Biodemography and is recruiting to PhD, Post-Doc, and Research Scientist level vacancies involving the Mathematical Modeling of Life History Evolution. [2493-052 (2005) : 71]

62. Leading course in environmental field [2493-070 (2005) : 75]

63. You will have, or will be prepared to develop, a solid understanding of complementary therapies towards identifying gaps and opportunities for research in the field. [2498-003 (2005) : 50]

64. This is an exciting position, with opportunities for development and scientific leadership within the field of STI and blood borne viruses. [2498-004 (2005) : 50]

65. Finally, we have Process Advisor, Process Technical Officer and Policy Support Officer roles in our Asset Management team, for geography, biology or engineering graduates with a keen interest in this field. [2498-028 (2005) : 60]

66. Previous experience in the Pharmaceutical or fine chemical, QA or Technical field would be advantageous. [2498-038 (2005) : 64]

67. If you have a good degree and an interest in physical sciences or engineering, together with several years’ experience in a science related field or a PhD, we would like to hear from you. [2498-042 (2005) : 65]

68. Applicants should have a science degree (preferably in the equine or veterinary science fields), and excellent communication skills, since the project will involve work with veterinarians and racehorse trainers. [2498-050 (2005) : 68]

69. The Department has world-class research in the fields of structural materials evaluation, computational engineering, internal combustion engines, fundamental aspects of fluid mechanics, naval architecture and marine engineering. [2498-066 (2005) : 73]
70. Nine specialist options comprehensively covering the **field** of environment and business, economics, energy, health, water and ecological management, global issues and analysis and assessment. [2498-070 (2005) : 74]

71. With a 90-year history of technology and knowledge transfer in this **field**, East Mailing Research is a registered charity, operates from two sites in Kent and employs 100 staff. [2502-007 (2005) : 56]

72. You will lead a technical team in the development of combination drug-device products in the cardiovascular **field**, applying your technical, academic and leadership skills to identify opportunities and pursue them through to development. [2502-028 (2005) : 64]

73. Experience in the **field** of Mass Spectrometry and related techniques, such as vacuum technology or other scientific instrumentation, would be an advantage although not essential. [2502-036 (2005) : 67]

74. [The Institute of Psychiatry] has an outstanding international reputation in the **field** of research and in the most recent HEFCE Research Assessment Exercise was awarded the highest (5*) rating. [2502-043 (2005) : 70]

75. You will have a PhD in microbiology, immunology or a similar **field** and enjoy the challenge of participating with the PIs on a series of projects focussing on breakthrough research with direct clinical relevance as well as ensuring communication within the consortium. [2502-055 (2005) : 73]

76. The second phase of the project, 2005-2007 will involve astronomers working in these **fields** and you will work closely with teams at Jodrell Bank Observatory and the Gravitational Astronomy group at the University of Cardiff. [2502-060 (2005) : 74]

77. Students should possess a first degree (minimum 2.1 or 2.2 with a MSc qualification) in the **fields** of mechanical engineering, building services engineering, chemical engineering, physics or other technical disciplines. [2502-067 (2005) : 77]

78. **Field** of study (sponsoring organisation) [2502-071 (2005) : 78]

79. You will act as a recognised scientific expert in the **field** of human health and the environment, providing support to staff throughout SEPA and representing SEPA in an official capacity externally. [2506-002 (2005) : 54]

80. An understanding of environmental protection and legislation and a minimum of 5 years' experience working in the **field** of human health and environment are essential. [2506-002 (2005) : 54]

81. As experts in your **field** you will have at least four years' experience and be able to work on your own initiative to meet challenging objectives. [2506-010 (2005) : 58]

82. You will be at the forefront of processing Adverse Drug Reaction reports, thus safeguarding the public, whilst gaining invaluable experience of working within the drug safety **field**. [2506-021 (2005) : 62]

83. Our R&D team is at the forefront of innovative developments in this **field**. [2506-025 (2005) : 64]

84. Project Supervisor, Midlands £28k (PhD with a years experience in the **field** of molecular biology) [2506-027 (2005) : 66]

85. Advance Environmental Ltd work in the **field** of water and air quality in the built environment and our core business is the prevention or Legionnaires’ disease in buildings. [2506-034 (2005) : 68]

86. You will gain: [...] the opportunity to work with academics who are international experts in their **field**; [2506-040 (2005) : 69]
87. The posts are in, but not exclusive to, the following fields: [VLSI design and integration with microsystem technologies, biomedical systems and/or bioMEMS, sensor systems and applications. Millimetre wave and microwave integrated circuits and subsystems. Sub-circuit to system modelling with deep sub-micron technologies liaising with semiconductor device modelling and electromagnetic theory and modelling] [2506-043 (2005) : 70]

88. As Assistant Professor, you will be responsible for carrying out research, theoretical and experimental, in the field of controlled kites and their application. [2506-060 (2005) : 75]

89. In addition, you will be tasked with supervising PhD students in the relevant research areas and giving lectures in the field of sustainable development based on ASSET projects. [2506-060 (2005) : 75]

90. PhD or its research equivalent and broad knowledge and experience in the field of aerodynamics in lightweight, flexible structures (e.g. kites, parapentes, etc.). [2506-060 (2005) : 75]

91. Research is conducted in the field within the context of which aerospace technologies are used for sustainable development in energy and transport. [2506-060 (2005) : 75]

92. Experience in the field of vaccines and/or Q/C would be advantageous. [2511-014 (2005) : 56]

93. In addition to your analytical ability, integrity and experience of working in a multi-disciplinary environment, you will also be able to demonstrate your expertise in one of the following fields: • Ethics • Finance and financial management • Psychology or other social science • Human clinical genetics [2511-015 (2005) : 56]

94. For almost two decades, we have driven innovation in DNA testing across the fields of forensic science, paternity testing, agricultural genotyping, now you will build on our success and spearhead the next phase of our growth. [2511-017 (2005) : 57]

95. The awards provide the opportunity for up to 3 years (salary and consumables) to train in research techniques and methodology, in subjects relevant to the overall objectives of the Charity, including the field of bioengineering. [2511-021 (2005) : 58]

96. By discovering new molecular diagnostics in the fields of nuclear medicine, MRI and X-ray, we are making possible the diagnosis and characterisation of disease at an earlier stage than ever before. [2511-038 (2005) : 64]

97. Duties within the section involve guiding scientific output including both routine surveillance outputs and novel scientific analyses prepared for peer-reviewed publication; taking a strategic overview of surveillance developments to keep pace with the changing epidemic and ensuring that information collected remains relevant; making sure that section activities integrate within the wider HIV and STI department and the Centre for Infections, and liaising with external collaborators such as the institute of child health, academic researchers and NGOs working in the field of HIV. [2511-043 (2005) : 67]

98. Whatever your specific field of expertise, you owe it to yourself to put your hard-earned skills to work in an environment where they can make a real difference. [2511-044 (2005) : 68]

99. It'll be a great start to your microbiology career; where you'll get a broad grounding, and fantastic opportunities to expand your knowledge in the field of water microbiology. [2511-045 (2005) : 69]

100. [Candidates] will already have demonstrated outstanding promise in their chosen field. [2511-053 (2005) : 71]

101. Ideally you will possess a PhD or equivalent qualification in a related field. [2511-065 (2005) : 74]
102. For many companies in the broader environmental field, the solution is to buy in trained staff from abroad, says Nick Reeves, executive director of the Chartered Institution of Water and Environmental Management, one of the main professional associations. [2515-002 (2005) : 52-53]

103. Some will leave the field after graduation, but many are highly motivated students who want to do something positive for the environment. [2515-002 (2005) : 52-53]

104. Many consider changing fields because of this catch-22. [2515-002 (2005) : 52-53]

105. Pratt points out that the field is highly competitive, and small firms are surviving on narrow profit margins. [2515-002 (2005) : 52-53]

106. So it is up to the employers in the field to make their jobs much more attractive,” argues Reeves. [2515-002 (2005) : 52-53]

107. Equally, employers must maximise the career opportunities and salaries of their junior employees, so graduates are persuaded to pursue the environmental science career they are trained in rather than drift to other fields with stronger incentives like teaching or computing. [2515-002 (2005) : 52-53]

108. Experience in this field of materials science necessary. [2515-014 (2005) : 59]

109. Experience in this field of materials science necessary. [2515-014 (2005) : 59]

110. You will have practical laboratory experience in molecular biology or a related field and be skilled in keeping accurate records. [2515-025 (2005) : 64]

111. The aim of the three-year project is to build an ultra sensitive molecule/particle force measurement instrument to address key questions in the growing field of proteomic science. [2515-029 (2005) : 66]

112. With substantial academic and practical experience (ideally five years or more) in a good practice environment, you're already something of an authority in your chosen field. [2515-034 (2005) : 68]

113. The successful candidate is likely to be educated to degree level or equivalent in an appropriate subject, and this will be coupled with at least five years' practical experience in the field of immunoassay/diagnostic development or manufacture. [2515-036 (2005) : 68]

114. Laboratory research will be required to identify effective solutions, as well as the investigation and resolution of customers' problems in the field. [2515-037 (2005) : 69]

115. Further expansion in this important analytical field has resulted in exciting opportunities for bioanalysts to join the Immunoassay group and build on its international reputation for excellence. [2515-038 (2005) : 69]

116. Exciting developments are occurring in fields of nanotechnology, polymer science and biomimetics. [2515-041 (2005) : 70]

117. With at least five years in-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2515-045 (2005) : 71]

118. The successful applicant will have a minimum of a BSc in chemistry, biology or closely related field together with experience of working in a regulatory environment in industry or government. [2515-048 (2005) : 72]
Successful candidates will have obtained a BSc in chemistry or a closely related field and must be enthusiastic with a desire to learn. [2515-048 (2005) : 72]

You will be expected to underpin and lead further developments in the Field which would allow the courses to diversify, particularly through the creation of more specialised Level 2 and 3 modules within the candidates own research areas and through the supervision of student projects and dissertations. [2515-062 (2005) : 76]

Applications are invited for a research studentship in the field of Tribology (friction, lubrication and wear), leading to the award of a PhD degree. [2515-082 (2005) : 82]

You will have a background in Chemistry, Chemical Engineering, Mechanical Engineering or a related field and an enquiring and rigorous approach to research together with a strong intellect and disciplined work habits. [2515-082 (2005) : 82]

Whatever your specific field of expertise, you owe it to yourself to put your hard-earned skills to work in an environment where they can make a real difference. [2519-006 (2005) : 55]

If you are a Scientist, Planner or Modeller with an interest and expertise in the flood forecasting and flood hydrology field you can find out more at www.fluidfacts.com [2519-007 (2005) : 56]

You will have at least five years' practical experience with the Metrology and Calibration field, two years' being within a Type I (Primary Standards) Laboratory. [2519-010 (2005) : 57]

You will have at least five years' practical experience within the Metrology and Calibration field including at least two years' in the performance of diagnostic and rectification work to component level. [2519-010 (2005) : 57]

Successful candidates for membership will be experts in their field and able to contribute to the formulation and delivery of advice. [2519-027 (2005) : 63]

You will concentrate on explosions and hydrogen/alternative fuel related work whilst working alongside some of the most respected and experienced scientists in their field. [2519-040 (2005) : 68]

Due to the expansion of our non-HSE customer base, an interesting and challenging opportunity has arisen for a Fire Safety Scientist to undertake a varied portfolio of work alongside some of the most respected and experienced scientists in their field. [2519-040 (2005) : 68]

Previous experience in the Pharmaceutical or fine chemical, QA or Technical field would be advantageous. [2519-058 (2005) : 72]

In this position you will manage a group of approx. 35 academic and technical staff with the objective to conduct and manage global research biology programs in international project teams in the field of insecticides. [2519-059 (2005) : 72]

The fellowship includes three weeks of seminars at the University of Cambridge in the U.K. featuring eminent authorities in the field. [2524-010 (2005) : 55]

Applicants must demonstrate an interest in the field, originality of thought displayed in previous writings, and a superior record of journalistic achievement. [2524-010 (2005) : 55]

You may have been working within Theatres, Critical Care or Anaesthetics or be a science/technology graduate with experience in the healthcare field. [2524-013 (2005) : 56]
135. When does a breakthrough in defence science lead to benefits in the field of public health? [2524-015 (2005) : 57]

136. We are looking for a highly motivated and independent scientist, who will play a key role in our world-leading scientific, instrument design and instrument-operation programme within the ISIS Crystallography/Engineering group in the field of Engineering and Materials Science. [2524-021 (2005) : 60]

137. You must have a good degree or equivalent in a Marine related field, supported by a higher degree, together with an interest in the management and administration of science. [2524-022 (2005) : 60]

138. The ideal candidate is likely to be a recent graduate in molecular biology, human genetics or a related field. [2524-038 (2005) : 64]

139. Key to this is developing our scientific and engineering expertise in these fields as well as maintaining a Forensic Explosives Laboratory. [2524-045 (2005) : 66-67]

140. At our modern drug discovery facility, situated midway between Edinburgh and Glasgow, we carry out innovative research in the fields of Psychiatry, Cardiovascular disease and Analgesia. [2524-047 (2005) : 68]

141. Applicants should have a PhD and a proven track record of research and publications in a relevant field. [2524-050 (2005) : 69]

142. The Max Planck Society invites applications from outstanding young scientists in all fields of research pursued by the Max Planck Society (Biology and Medicine; Chemistry, Physics and Technology; Human Sciences). [2524-059 (2005) : 73]

143. The University of Southampton ORC is the largest Photonics Centre in the UK and provides a stimulating interdisciplinary research environment spanning diverse fields including: optics, lasers, chemistry and biology. [2524-074 (2005) : 78]

144. At the forefront of your field, you will provide academic and scientific leadership in areas of research that complement the current ORC portfolio (see www.orc.soton.ac.uk). [2524-074 (2005) : 78]

145. Fields considered this year will be: History since c. 1500, English Literature since c. 1500, Materials Science, Sociology and Social Anthropology. [2524-075 (2005) : 78]

146. Bachem is an independent, technology based company specializing in the field of peptides and proteins. [2528-015 (2005) : 64]

147. PhD and Postdoctoral opportunities in the field of Materials Science [2528-024 (2005) : 69]

148. NIMR is a world-class institute for applied research in the fields of structural and functional materials. [2528-024 (2005) : 69]

149. Teamwork and performance under pressure are vital; an understanding of peer review and current issues in the field would be an advantage. [2528-026 (2005) : 70]

150. A vital question – and at Dstl, the Defence Science and Technology Laboratory, some 3,000 of the first minds in their fields, are actively finding the answer. [2528-029 (2005) : 71]

151. The appropriate candidate will have relevant academic achievement (BSc., MSc., PhD, or equivalent) supported by a substantial peer-reviewed publication record in the field of clinical
microbiology/molecular biology, and demonstrable familiarity with state-of-the-art, computer-based data analysis techniques. [2528-032 (2005) : 72]

152. With a 90-year history of technology and knowledge transfer in this field, East Malling Research is a registered charity, operates from two sites in Kent and employs 100 staff. [2528-033 (2005) : 72]

153. In the field of chemical analysis, what are you made of? [2528-036 (2005) : 73]

154. Among a range of rapidly developing technology projects, the Centre for Process Innovation anticipates rapid progress with its initiatives in the fields of Bio-technology and Bio-processing. [2528-039 (2005) : 75]

155. The post is tenable for an initial period of up to two years, responsible to the Director of Bio manufacturing for research and funding in the field of biocatalysis, for liaison with the Managing Director and industrial members of CoEBio3 and for maintaining professional relationships with project partners. [2528-039 (2005) : 75]

156. With at least five years' in-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2528-047 (2005) : 79]

157. Qualified to degree or equivalent in Microbiology and trained and experienced in the routine control and validation of sterilization and microbiological testing you will have a minimum of three years' experience in the medical device or pharmaceutical field. [2528-047 (2005) : 79]

158. You would be expected to support developments in the Field which would allow the courses to diversify, particularly through the creation of more specialised Level 2 and 3 modules within your own research areas and through the supervision of student projects and dissertations. [2528-055 (2005) : 82]

159. A postdoctoral scientist with at least 5 years' experience in ligand/drug discovery in pharmaceutical or biotechnology fields and with expert knowledge and practical experience of highthroughput screening and protein biochemistry. [2528-069 (2005) : 87]

160. You will be involved in a range of research projects in the fields of molecular biology, epidemiology and bacterial biofilm biology and will also be expected to contribute to the day-to-day running of the laboratories as required. [2528-073 (2005) : 88]

161. With related research/consultancy interests which complement existing work on microbial pathogens of food, food safety and textile microbiology, you will need demonstrable expertise in the field of Clinical Microbiology, evidenced by a first degree in a relevant discipline and a PhD or equivalent professional and research experience. [2528-075 (2005) : 89]

2006

1. Your main responsibility will be to personally conduct and support innovative research in the field of seed germination physiology and ecology, which will include experimental work as well as data recording, evaluation and written and oral presentations. [2533-001 (2006) : 44]

2. Working particularly within the Life Sciences and Instrumentation fields. [2533-006 (2006) : 46]

3. We operate 7 days per week, providing a range of specialist analytical services to the animal feed, grain, milling and food industries in all fields of microbiology, nutrition and chemistry. [2533-009 (2006) : 48]
4. The laboratories are large, modern and well equipped, reflecting the pre-eminent position they have in their field. [2533-009 (2006) : 48]

5. Domantis was founded in December 2000 and has established more than a dozen proprietary dAb therapeutic programmes, primarily in the fields of inflammation and oncology. [2533-013 (2006) : 49]

6. This £100,000 award will be presented to a European-based scientist with less than ten years of post-doctoral experience for the proposal of a novel interdisciplinary research project in the field of toxicology. [2533-016 (2006) : 50]

7. The competition covers the broad field of toxicology, including but not limited to: [2533-016 (2006) : 50]

8. Either way, you will have a passion for your work and a demonstrable interest in the field of radiation measurement. [2533-018 (2006) : 51]

9. With 3,000 & the most brilliant minds in their fields, our thinking is ahead of its time. [2533-024 (2006) : 53]

10. A minimum of seven years policy related or academic experience in a suitable field is required. [2533-028 (2006) : 54]

11. Research for both roles is undertaken using internet searches, information databases, telephone conversations, and consultations with field experts. [2533-031 (2006) : 55]

12. A leader of the international scientific recruitment industry, with over 60 offices worldwide, we are the only company in our field run by scientists for scientists. [2533-035 (2006) : 56]

13. Now we need you to lead the design and execution of in vivo safety pharmacology studies; and the development of novel safety models, primarily in the neurofunctional/behavioural, pulmonary and cardiovascular fields. [2533-036 (2006) : 57]

14. Applications are invited from individuals working in the field of microbiology, gastroenterology, food safety, nutrition and food science in the UK and Ireland. [2533-038 (2006) : 57]

15. The field of research may be broadly defined as materials characterization by means of electron beams. [2533-039 (2006) : 58]

16. The quality of this method is revealed by our leading score in the top-5 of the worldwide citation indexes in our specialised field. [2533-053 (2006) : 61]

17. Applicants should have qualifications and/or experience in the field of radiation protection and have a degree in a relevant subject eg science or engineering. [2533-054 (2006) : 62]

19. Applications are invited for a two-year Research Fellowship for research and training in hypertension and related fields. [2533-072 (2006) : 67]

20. Applications are invited for a three-year Research Studentship for research and training in hypertension and related fields leading to a PhD. [2533-072 (2006) : 67]
21. As part of a plan to strengthen its science base and to support new research fields, the CSIR will be establishing a number of Emerging Research Areas (ERAs) over the next three years. [2537-038 (2006) : 70]

22. Headquartered in Basel, Switzerland, Roche is one of the world's leading research-focused healthcare groups in the fields of pharmaceuticals and diagnostics. [2537-046 (2006) : 73]

23. We are an exciting, vibrant Medical Education company with a rapidly growing reputation for excellence in all aspects of medical communications, particularly in the fields of oncology and other specialist disciplines. [2537-052 (2006) : 75]

24. These opportunities are ideally suited to graduates with relevant industrial experience seeking to develop their career within the fields. [2537-057 (2006) : 77]

25. The successful candidate will be expected to: [...] Contribute to MSc options in the field of soils and environmental pollution [2537-063 (2006) : 80]

26. The successful candidate will be expected to: [...] Contribute to research in the Department of Soil Science in one or more of the following fields: soil organic matter dynamics; risk assessment; soil remediation; biogeochemistry; and soil respiration, particularly in relation to climate change [2537-063 (2006) : 80]

27. Research papers published by University of Dundee scientists in the fields of Biology, Biochemistry and Molecular Biology were more highly cited over the past 10 years than any other University in Europe. [2537-064 (2006) : 80]

28. In addition, the School also offers a range of NERC and EPSRC supported MSc programmes in the environmental, geoscience and civil engineering fields. [2537-067 (2006) : 81]

29. Two-three fully funded NERC PhD studentships are expected to be available in the fields of Marine Biology and Oceanography to commence 1 October 2006 [2537-067 (2006) : 81]

30. You will develop a significant research programme in interactions between the environment and aquaculture focusing on aspects of molecular toxicology, GIS applications, environmental chemistry or other related fields. [2537-072 (2006) : 83]

31. Just one field in which our inventive scientists are challenging the previously unchallenged, thinking the unthinkable and taking knowledge to a new level. [2541-001 (2006) : 56]

32. Our Safety and Environmental Assurance Centre (SEAC) is home to a huge range of experts – from toxicologists and mathematical modelers to analytical chemists – many of them recognised throughout the world in their field. [2541-004 (2006) : 57]

33. Ferring Pharmaceuticals is a speciality, research-driven bio-pharmaceutical company active in the global market. The company identifies, develops and markets innovative products in the fields of urology, gynaecology, gastroenterology and endocrinology. [2541-009 (2006) : 60]

34. You have a minimum of a BSc in a life-science field and two years research experience using antibodies in Immunohistochemistry on formalin fixed paraffin sections plus at least one other application from Flow Cytometry/ FACS, Western Blotting and Immunoprecipitation. [2541-021 (2006) : 66]

35. With at least five years in-depth medical device experience, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/ she has worked. [2541-026 (2006) : 68]
36. Domantis was founded in December 2000 and has established more than a dozen proprietary dAb therapeutic programmes, primarily in the fields of inflammation and oncology. [2541-030 (2006) : 69]

37. An indispensable reference tool, whether you are considering your next career move, or want to keep up with the latest developments in your field. [2541-033 (2006) : 72]

38. A Postdoctoral Scientist with experience in Molecular Nanotechnology and Multi-Modality Imaging or related field is required to join the Radiochemical Targeting and Imaging Group (http://www.paterson.man.ac.uk/groups/rti.jsp) to drive a project seeking to develop Molecular Nanotechnology Multi-Modality Imaging to study cancer biology and therapeutics. [2541-034 (2006) : 72]

39. Scientific applicants should have considerable postgraduate experience and have gained recognition in the scientific community in their field. [2541-047 (2006) : 77]

40. To be successful you must possess a relevant degree in a fisheries science, marine science or a related field, with a minimum of three years' work experience in conducting scientific projects which included people and budgetary management. [2541-048 (2006) : 78]

41. You can expect significant opportunities for career development, by leading collaborative research in application and development of bioinformatics in the field of biological medicines. [2541-050 (2006) : 78]

42. Ideally, you will hold or be completing an MSc in statistics or a related field and have an awareness and interest in the application of statistics in the biological/medical areas. [2541-050 (2006) : 78]

43. However, new graduates with a good honours degree in statistics or a related field will be considered. You will need to demonstrate an aptitude to develop your statistical knowledge and expertise. [2541-050 (2006) : 78]

44. At least one year's work experience in a life sciences-related field is essential. [2541-059 (2006) : 81]

45. Additionally for Band 5 level, relevant postgraduate or possibly post-doctoral experience, which could be applied with appropriate training to the field of accelerator physics, is required. [2541-062 (2006) : 81]

46. At Band 4 level the candidate should be an established physicist with a successful track record of innovative research in the field of accelerator physics, including a proven ability to lead such research. [2541-062 (2006) : 81]

47. You will work under the guidance of an experienced postdoctoral researcher, gaining valuable research skills in an exciting field of research. [2541-067 (2006) : 83]

48. The successful applicant should be recognised internationally as a leading scientist in their field and have an exceptional research and publication record. [2541-088 (2006) : 89]

49. With a reputation for innovative basic science, the UK has always punched above its weight in terms of Nobel prizes, but has a poor record when it comes to cancer death rates. Policy-makers and researchers are hoping this will change with a major shake-up of the field. [2545-004 (2006) : 56-59]

50. "This shows that we're funding incredibly fundamental and important research, which is often of major importance to other fields of medicine." [2545-004 (2006) : 56-59]

51. But if we learn how to switch on a particular gene it could turn out to be as important in other fields of medicine. [2545-004 (2006) : 56-59]
52. Cancer Research UK has begun a review of the research that we fund - and some fields that we don't – to identify "orphan" areas. [2545-004 (2006) : 56-59]

53. For example, we have identified weaknesses in medicinal chemistry and molecular pathology, and as a result we have set up training programmes to encourage more scientists into these fields. [2545-004 (2006) : 56-59]

54. We are currently seeking to recruit scientists with interests in imaging in vivo and in DNA damage signalling, but scientists specialising in any field related to radiation biology are encouraged to apply. [2545-006 (2006) : 60]

55. Keeping up to date with the latest developments in the field of nutrition and cancer is vital and you will need to attend and present at national and international conferences. [2545-008 (2006) : 60]

56. Part of the European Molecular Biology Laboratory (EMBL), the European Bioinformatics Institute (EBI) is located on the Wellcome Trust Genome Campus at Hinxton, near Cambridge, UK, and provides cutting-edge research, service and training in the field of bioinformatics. [2545-013 (2006) : 63]

57. A PhD or MSc in Molecular Biology, Biochemistry, or a related field. [2545-013 (2006) : 63]

58. To be eligible for this role you must hold a qualification in Forensic Science to BSc level. You will be part of the centre of excellence and best practice in this field within the organisation. [2545-020 (2006) : 66]

59. A PhD in Physics or a related discipline, you will have managed complex research and customer support programs in the field of organic electronics. [2545-026 (2006) : 68]

60. A post graduate in physics or relevant discipline, you will have a proven record of customer technical support and innovation within the organic electronics field. [2545-026 (2006) : 68]

61. You will be a post graduate in physics or equivalent with several years' experience in the field of electro-optic Liquid Crystal Display (LCD) modes. [2545-026 (2006) : 68]

62. Experience in the field of materials science is essential as is a BSc/Masters in Physics or Materials Science. [2545-031 (2006) : 71]

63. Headquartered in Basel, Switzerland, Roche is one of the world's leading research-focused healthcare groups in the fields of pharmaceuticals and diagnostics. [2545-036 (2006) : 73]

64. If you’re an innovative and inquisitive scientist or technologist keen to push back the frontiers of knowledge in your field within a world-class government organisation, find out more about current openings at www.dstl.gov.uk/careers [2545-042 (2006) : 77]

65. Training other staff as required, you will maintain an in-depth knowledge of current and future technologies, and will advise us on the possible implications of developments in this field. [2545-061 (2006) : 83]

66. It should be noted that these posts are designed as career development posts for someone who is newly qualified and wishes to gain experience in this field. [2545-066 (2006) : 85]

67. You should have a doctorate in any fields of biological or medical sciences. [2545-068 (2006) : 86]
69. The project builds upon one of the most surprising recent findings in the field of vision research, that the mammalian inner retina contains a class of photoreceptors quite distinct from the rods and cones. [2545-072 (2006) : 87]

69. It is initially supporting the development of six Topic Specific Research Networks in the fields of cancer, dementias and neurodegenerative diseases, diabetes, medicines for children, mental health and stroke and, over time, will hopefully enable research to be conducted across the full spectrum of disease and clinical need. [2545-077 (2006) : 89]

70. Pharmaceutical companies worldwide are keeping an eye on the emerging field of systems biology because of its potential for finding safer, more effective drugs. [2550-006 (2006) : 56-57]

71. Two of Switzerland's biggest pharmaceutical firms, Roche and Novartis, along with the universities of Basel and Zurich and ETHZ, are backing a new network to coordinate Swiss research and teaching in the field. [2550-006 (2006) : 56-57]

72. Chancellor Angela Merkel plans to pour new money into the IT sector in an effort to restore Germany as a world leader in the field. [2550-007 (2006) : 58-59]

73. Ideal candidates will have a PhD in theoretical biology, computational population genetics or a related field, and will have extensive modelling experience in metapopulation ecology and/or evolutionary genetics. [2550-010 (2006) : 60]

74. At least four years' experience in drug development, drug safety or a related medical field. [2550-021 (2006) : 67]

75. You should hold a degree in Marine Biology or very closely related discipline and have a minimum of one year's postgraduate experience in a related field, specifically including taxonomic identification of benthic macrofauna. [2550-030 (2006) : 70]

76. Candidates need be graduate level or above in a relative field. [2550-037 (2006) : 74]

77. If you’re an innovative and inquisitive scientist or technologist keen to push back the frontiers of knowledge in your field within a world-class government organisation, find out more about current openings at www.dstl.gov.uk/careers [2550-044 (2006) : 77]

78. Knowledge of European regulatory requirements is important, and you must be prepared to become an expert in this field. [2550-045 (2006) : 77]

79. Experience with animal models in the field of bone and joint disease would be an advantage. [2550-049 (2006) : 79]

80. The Voxar Product Group, based in Edinburgh, Scotland, was founded in 1995 and is a pioneer and market leader in the field of 3D medical imaging and integration with PACS. [2550-050 (2006) : 79]

81. You will be responsible for our existing portfolio of projects, and for expanding activities in the field of energy and climate policies and markets. [2550-051 (2006) : 79]

82. Applications are invited for a NERC studentship starting in October 2006 that will involve observation and modelling research in the one of the fields of: Mesoscale convective systems and easterly waves; New observations to estimate the radiation balance of the atmosphere; Remote sensing to improve flood prediction; Radar measurements of deforming volcanoes. [2554-014 (2006) : 64]
83. If you’re an innovative and inquisitive scientist or technologist keen to push back the frontiers of knowledge in your field within a world-class government organisation, find out more about current openings at www.dstl.gov.uk/careers [2554-026 (2006) : 68]

84. Drawing on a proven ability to network across the scientific community - among whom you’ve gained deserved recognition as an expert in your field - you’ll hold a degree in Chemistry Toxicology (or a related subject). [2554-033 (2006) : 71]

85. To contribute to this vital field of work, you'll need a strong scientific background that includes a degree in Chemistry, Chemical Engineering or similar, along with two to three years' relevant lab or industry-based experience. [2554-035 (2006) : 72]

86. You will need a good knowledge of medical terms, ideally gained through experience in the medical/pharma field. [2554-036 (2006) : 73]

87. Headquartered in Basel, Switzerland, Roche is one of the world's leading research-focused healthcare groups in the fields of pharmaceuticals and diagnostics. [2554-036 (2006) : 73]

88. Outstanding record of research accomplishments in a relevant field and a reputation in the relevant external scientific and technological communities commensurate with the position of scientific leader of the Institute. [2554-048 (2006) : 77]

89. The appointee should have qualifications within the following areas: […] Leadership and management of research in the field of advanced chemometrics, with special reference to multiway chemometrics and process analytical technology [2554-064 (2006) : 84]

90. The appointee should have qualifications within the following areas: […] Teaching in the field of advanced chemometrics with special emphasis on multiway chemometrics and process analytical technology [2554-064 (2006) : 84]

91. KVL carries out technically advanced research and education within the veterinary agricultural and human nutrition areas - as well as related fields of natural science. [2554-064 (2006) : 84]

92. The Fellowship is tenable for 5 years and is directed towards expanding the School's research in polymer electronics with a specific remit to develop the field of Organic Nanoelectronics. [2554-072 (2006) : 86]

93. A highly motivated postdoctoral research officer is sought to work on an EPSRC-funded grant in the field of Polymer Electronics. [2554-072 (2006) : 86]

94. Petroleum extraction or process safety are fields of particular interest to us. [2554-076 (2006) : 87]

95. Imperial has been a pioneer in this field, and the project is part of a major BSN collaboration involving a large multi-disciplinary team. [2554-082 (2006) : 88]

96. Igor A. Shiklomanov is recognized world wide as an international authority in the field of hydrology and water resources and for the development of methods for the assessment and forecasting of human impacts on river runoff, the dynamics of water use and water availability and the linkages between humanity and the world's freshwater resources. [2558-002 (2006) : 19]

97. In fact, by this measure the UK is ranked in the top three in the world for seven out of nine fields of research. [2558-004 (2006) : 58-59]

98. Lead citation share by research field*[2558-004 (2006) : 58-59]
99. This is a measure of the frequency in top three for rank of world citation share in nine research fields. [2558-004 (2006) : 58-59]

100. The field of specialisation for this Chair is biophysical modelling, specifically in soil microhabitats. [2558-005 (2006) : 60-61]

101. You should have a degree in either Biochemistry or Cell Biology or a related field, and experience in molecular biology, biochemistry and cell biology (at least three years), with an interest in the molecular mechanisms underlying neurodegeneration and cellular responses to abnormal protein accumulation. [2558-019 (2006) : 65]

102. You will be expected to maintain an up-to-date knowledge of the field of drug metabolism, particularly technical aspects, taking charge of the selection, installation and running of laboratory equipment or computer systems. [2558-021 (2006) : 66]

103. You will be educated to degree level (or equivalent) in biomedical sciences, chemistry, biochemistry or a related field, with about three years' experience of drug metabolism and pharmacokinetics, ideally gained in a GLP environment, performing HPLC, radio-analysis and LC-MS, and applying this experience to help in drug development. [2558-021 (2006) : 66]

104. With in-depth technical and scientific knowledge of automation/robotics in drug development projects, you'll relish the opportunity here to drive the establishment and implementation of new methods, practices and ways of working in this field. [2558-025 (2006) : 68-71]

105. Challenging the status quo and promoting the establishment and implementation of new mass spectrometry techniques, above all you'll be a tenacious problem solver who enjoys pushing frontiers within the field. [2558-025 (2006) : 68-71]

106. With wide ranging experience in this field, both technical and scientific, you'll initiate and lead investigations in collaboration with PAR&D colleagues and other AZ functions. [2558-025 (2006) : 68-71]

107. Educated to degree level with at least four years’ related experience - or with a PhD and at least two years experience - you'll be looking to extend your influence in this exciting field. [2558-025 (2006) : 68-71]

108. Candidates should possess a degree in either of the following: Chemistry, Biological Science or Pharmacy. Previous experience in the Pharmaceutical or fine chemical, QA or Technical field would be advantageous. [2558-032 (2006) : 74]

109. Our R & D team is at the forefront of innovative developments in this field. [2558-037 (2006) : 76]

110. With substantial experience in a research environment, you will be well informed of the latest developments in the field and will strive to keep yourself up-to-date at all times. [2558-045 (2006) : 79]

111. The new researcher would be expected to conduct their own research activities in the field of short pulse interactions [2558-047 (2006) : 80]

112. and develop new and novel science in collaboration with our user community in this rapidly expanding field. [2558-047 (2006) : 80]

113. As part of a multidisciplinary team, you will use fluid flow analysis as a tool to help improve workplace health and safety in fields such as occupational hygiene, biological and chemical exposure and major hazards. [2558-053 (2006) : 82]
Already a world leader in conformity assessment and performance evaluation, Bureau Veritas is one of the UK's leading environmental consultancies in the asbestos related field. [2558-063 (2006) : 85]

This is an excellent opportunity to utilise your talents gained through a PhD degree in Organic Chemistry and at least five years' work experience in this field, to contribute to our success. [2558-070 (2006) : 88]

Applicants must hold HPC Registration and an appropriate MSc and/or FIBMS. Ideally applicants should have direct experience in this field or in a related area such as Haematology, Blood Transfusion or Immunology. [2558-071 (2006) : 88]

KVL carries out technically advanced research and education within the veterinary, agricultural and human nutrition areas - as well as related fields of natural science. [2558-072 (2006) : 89]

The Leibniz Institute for Natural Product Research and Infection Biology - Hans Knoell Institute - and the Friedrich-Schiller-University Jena, Institute of Microbiology, plan to establish a joint Junior Research Group in the field of Microbiology and invite applications for the Group leader position [2558-075 (2006) : 90]

You would be expected to support developments in the Field which would allow the courses to diversify particularly through the creation of more specialised Level 2 and 3 modules within your own research areas and through the supervision of student projects and dissertations. [2558-079 (2006) : 92]

Specifically, you should be able to contribute to teaching of Growth and Development, Physical Activity and Health Promotion, Exercise Prescription and Research Methods within the Sports and Exercise field. [2558-085 (2006) : 94]

University College London (UCL) is a leading international provider of research and training in the field of bioprocessing especially in collaboration with the industrial sector. [2558-087 (2006) : 95]

To that end we are seeking a scientist specialized in one of the following fields of pathogen/host-interactions: FISH (cell/tissue), immunohistochemistry, apoptosis, necrosis; or of gene expression: ChIP, siRNA libraries. [2558-090 (2006) : 95]

Whether you are an emerging researcher or plan a future in a biophotonics-related industry, we can provide the fundamental understanding and hands-on experience necessary for work in this rapidly developing inter-disciplinary field. [2558-094 (2006) : 96]

We encourage close collaboration between our researchers in our Research Network and promote the dissemination of research in this field through our Annual Network Meeting and publication of our Research Review. [2563-016 (2006) : 56]

We require consultants who will train to be multi-skilled in both of the fields below but ideally you will fit into one category already [2563-022 (2006) : 58]

Candidate Profile: […] Interest/previous experience in the biosensors field [2563-026 (2006) : 59]

You will work, under supervision, with patients of all ages and abilities and have the advantage of working within the field of Clinical Neurophysiology and studying for a science degree in Clinical Physiology (Neurophysiology). [2563-043 (2006) : 64]
129. Want to find out what is happening in your **field**? [2563-050 (2006) : 66]

130. If you'd like to develop your professional skills, think about joining us specialising in the interesting and challenging **field** of radiation safety. [2563-052 (2006) : 67]

131. [Candidates] will already have demonstrated outstanding promise in their chosen **field**. [2563-061 (2006) : 71]

132. You will have a PhD or equivalent experience in a relevant **field** and excellent organisational, communication and team-working skills. [2563-067 (2006) : 73]

133. Joining our Animal Studies team, you'll use your industry experience in the **field** of Animal Management and behaviour to lecture and lead practical activities. [2563-068 (2006) : 73]

134. Next week: where are the big ideas in chemistry? The Insider asks some of the leading players in the **field** [2567-002 (2006) : 50-51]

135. The post of Chair of the ACMSF will require a person of national or, ideally, international standing, preferably in the **field** of medicine or science. [2567-003 (2006) : 52]

136. Our remit of research, education and commercialisation will create a knowledge base in the Highlands and Islands of Scotland that is a respected global leader in these **fields**. [2567-005 (2006) : 52]

137. [the Freshwater Laboratory] has strong links with a number of universities in the **fields** of population modelling and fish ecology. [2567-008 (2006) : 53]

138. You should be able to demonstrate: A proven track record of excellence in a related scientific **field**, with a PhD or other post graduate degree and a strong publication record; [2567-008 (2006) : 53]

139. This is an exciting role with overall responsibility for the journal's content and coverage of the **field**. [2567-018 (2006) : 58]

140. Excellent communication skills, and willingness and ability to learn new **fields** are essential. [2567-019 (2006) : 58]

141. The successful candidate will actively follow the latest developments in the **field** of microscopy and image analysis and will be responsible for ensuring that the facility remains at the cutting-edge. [2567-022 (2006) : 59]

142. PhD projects are available in the following **fields**: genetic epidemiology, dietary and nutritional epidemiology, physical activity epidemiology, the genetic or environmental determinants of infancy and childhood growth and the determinants of type 2 diabetes, screening and prevention. [2567-023 (2006) : 60]

143. With a PhD in Epidemiology (or a closely-related **field**), or a Masters and five years’ experience, you’ll have a thorough knowledge of epidemiology methodology in relation to pharmaceuticals. [2567-027 (2006) : 61]

144. For both roles we’re looking for an MSc or PhD in an imaging **field** or extensive experience of using imaging in clinical trials. [2567-027 (2006) : 61]

145. As well as a first degree in Life Sciences or a related subject and an MSc/PhD in an applicable informatics **field**, you’ll have at least three years’ experience in a pharmaceutical or biotechnology organisation. [2567-027 (2006) : 61]
You will be seen as an expert in your product field as well as in all aspects of the ABPI Code of Practice. [2567-031 (2006) : 64]

For this post you will have obtained a PhD in a bio-medically-related area or other appropriate field and will have completed a period of postdoctoral research of at least one year. [2567-034 (2006) : 64]

A vacancy has become available for a researcher in Agri-environmental systems to help realise the potential of the Centre's resources in this field. [2567-035 (2006) : 65]

We are seeking the brightest graduates who can make a rapid impact in a demanding field. [2567-040 (2006) : 67]

No previous experience in this field is necessary but you must be able to demonstrate a diligent work ethic and exceptional communication skills. [2567-040 (2006) : 67]

Train and mentor colleagues in their specialist field, ensuring an effective transfer of knowledge and skills into the quality team. [2567-051 (2006) : 70]

By joining this thriving pacesetter you'll work with inventive technologies, progressive management and alongside the talented professionals who have helped make us a global leader in our field. [2567-055 (2006) : 72]

Want to find out what is happening in your field? [2567-061 (2006) : 76]

This position presents an opportunity for a scientist to enter the rapidly developing field of research management and administration. [2567-066 (2006) : 78]

They will already have demonstrated outstanding promise in their chosen field. [2567-083 (2006) : 83]

A background in Engineering, Materials, Physical or Biophysical Sciences is required, together with a demonstrated level of experience or inter-disciplinarity in a relevant biological or clinically based field. [2572-011 (2006) : 64]

The successful candidate will have: a primary degree (or equivalent) in a relevant science, environmental or engineering field, at least 5 years relevant post-qualification experience, [2572-014 (2006) : 65]

The candidate should have a Master's degree or PhD in an appropriate field [2572-015 (2006) : 66]

with significant experience in the required field of specialization. [2572-015 (2006) : 66]

NTERA Limited requires a Senior Physicist/Chemist to undertake a four month contract to develop solutions in the field of modelling of semiconductor materials. [2572-015 (2006) : 66]

Our current academic leaders are recognised, nationally and internationally, as innovative and creative contributors to their specialist fields. [2572-019 (2006) : 67]

The successful candidate will be responsible for commissioning reviews and mini-reviews from experts in the field, and will take charge of the peer-review process. [2572-024 (2006) : 70]

The Editor will also work to research and identify the next protein-based topics for coverage in the database, and then take the lead in developing and building the Editorial Boards and content for these new fields. [2572-024 (2006) : 70]
164. Candidates will need to hold a PhD (or equivalent post-graduate degree) in a life science, ideally in molecular biology or biochemistry or a related field, and an understanding of the general drug discovery process would be an advantage. [2572-024 (2006) : 70]

165. Specialising in parasitology, companion animal vaccines or swine medicine and husbandry production, you'll manage clinical research and call on your extensive technical knowledge within your field to advise scientists and project teams. [2572-027 (2006) : 71]

166. Your proven ability to network across the scientific community will drive the development and delivery of our Food Safety Strategy and can only add gravitas to your external recognition as an expert in your field. [2572-031 (2006) : 73]

167. Ideally, you should be educated to degree level in the field of chemical engineering or a related science based discipline. [2572-042 (2006) : 78]

168. Our impact is felt not just in England and Wales - where we're the lead government agency in the field – but right around the world. [2572-044 (2006) : 79]

169. A scientific specialist who's respected in your field, you may currently be working in government, a regulatory body, academia or industry. [2572-044 (2006) : 79]

170. You will be a graduate or equivalent with experience of business planning, innovation and IP management, preferably in a healthcare technology related field. [2572-058 (2006) : 84]

171. As well as a relevant degree or equivalent, you must also have some experience of innovation and IP management, preferably in a healthcare technology-related field. [2572-058 (2006) : 84]

172. The aim is to combine frontier femtosecond optical and synchrotron technologies and enable new science in the emerging field of ultrafast x-rays. [2572-061 (2006) : 86]

173. Candidates must have an advanced degree (or equivalent experience), and have at least 5 years' relevant experience in a medical research field. [2572-066 (2006) : 89]

174. Candidates must have an advanced degree (or equivalent experience), and have at least 5 years' relevant experience in a medical research field. [2572-075 (2006) : 92]

175. You will also be expected to pursue your own research in the general field of electron microscopy of materials. [2572-080 (2006) : 94]

176. The department has an excellent record in training research staff in this field. [2572-081 (2006) : 94]

177. "Not every company will succeed, not every technology will work, but the skills that you get working for a good company in the biotech field will be very transferable." [2576-003 (2006) : 58-61]

178. We support ambitious young scientists working in the biotechnology field with the funds for training activities, including attendance at conferences and courses such as the MBA or MSc, which relate to their personal development. [2576-005 (2006) : 63]

179. In-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2576-020 (2006) : 69]

180. If you have a creative mindset, associated to strong communication skills for working with several departments you will find in this position a real opportunity for developing your capabilities in the attractive
field of data mining and implementation of robust and new predictive chemoinformatic tools. [2576-021 (2006) : 69]

181. The search is focused on experimental physicists (Junior or Senior) with strong research accomplishments in the field of quantum information (although exceptional theorists will also be considered). [2576-025 (2006) : 70]

182. The following qualifications are essential: [...] a genuine interest in the field of alternatives research; [2576-065 (2006) : 81]

183. We seek to appoint two Graduate Assistants in the field of Biomedical Sciences. [2576-075 (2006) : 86]

184. Fields available for study are that of obesity, diabetes and contributory conditions, congenital heart defects in Down Syndrome or foetal growth and health as determined by maternal genes [2576-075 (2006) : 86]

185. This post would particularly suit applicants who have an interest in the practical application of clinical research data and will provide the opportunity to work within a large and vibrant multi-disciplinary clinical research group and for international collaboration with experts in the field. [2576-078 (2006) : 87]

186. You must be able to demonstrate experience of working in the field of Protein expression. [2576-078 (2006) : 87]

187. The NSI Group is internationally recognised as a centre of excellence in the field of nanostructured materials and optoelectronic devices. [2576-085 (2006) : 89]

188. You must have an advanced degree (or equivalent experience), and have at least 5 years' relevant experience in a medical research field. [2576-091 (2006) : 91]

189. ECTS promotes excellence in research into the field of calcified tissues within Europe, and ensures the findings are disseminated to enable benefit to patients with bone disease. [2580-008 (2006) : 57]

190. The Alliance for Better Bone Health lain T Boyle award is open to young scientists who are within 10 years of completing their PhD and have made significant contribution to the field of bone and calcified tissue. [2580-008 (2006) : 57]

191. The ideal person will have a minimum of ten years research or policy related experience in a suitable field. [2580-012 (2006) : 58]

192. The company identifies, develops and markets innovative products in the fields of urology, gynaecology, gastroenterology and endocrinology. [2580-021 (2006) : 61]

193. The R&D department of BPB undertakes the research necessary to ensure we remain No 1 in our field. [2580-026 (2006) : 63]

194. You will have worked in the field of analytical biochemistry and its application in medical diagnostics, or with electrochemical biosensors. [2580-028 (2006) : 64]

195. We are currently seeking to recruit a Post Doctoral Researcher in the field of Applied Mathematics or Engineering, to work on projects solving Oil and Gas production problems. [2580-034 (2006) : 65]

196. You will have a Ph.D. in the field of mathematics or engineering with expertise in rock and solid mechanics. [2580-034 (2006) : 65]
197. The Max Planck Society invites applications from outstanding young scientists in all fields of research pursued by the Max Planck Society (Biology and Medicine; Chemistry, Physics and Technology; Human Sciences). [2580-042 (2006) : 67]

198. An opportunity exists for an enthusiastic Chemist to join our team of experts in this field. [2580-045 (2006) : 68]

199. It will be a key resource for both UK and international scientists working in the field of magnetism in low dimensional systems. [2580-053 (2006) : 71]

200. Teva is a truly global pharmaceutical business with a presence in the field of generics, respiratory and innovative medicines. [2580-057 (2006) : 73]

201. The School seeks a leader for the subdiscipline of parasitology, who will contribute actively to research, curriculum development and teaching in the field. [2580-062 (2006) : 77]

202. This is an exciting opportunity to develop considerable skills and experience in the field of air pollution modelling, emissions inventory development and health based research. [2580-071 (2006) : 79]

2009

1. Diamond Light Source is a new synchrotron and a leading scientific facility of its type in the world. Located on the Harwell Science and Innovation Campus in South Oxfordshire, we host research facilities supporting cutting-edge research in all fields of science. [2689-003 (2009) : 46]

2. You should have a Ph.D. in physics, physical chemistry, materials science or related fields with synchrotron research experience. [2689-003 (2009) : 46]

3. Typically a geneticist or genomicist who has worked as part of a multi-disciplinary sequencing team encompassing the whole experimental cycle from sample collection through to high quality publication, the ideal candidate needs to be an innovative thought-leader and scientific risk taker, probably also having links to other key people in the field. [2689-005 (2009) : 47]

4. Ideally you have proven experience in this field, are an Accredited Independent Practitioner with the Association of GI Physiologists, and will be eligible for State Registration with the Registration Council for Clinical Physiologists. [2689-006 (2009) : 48]

5. Prospective candidates should have a strong background in physics or a related field and educated to at least degree level or higher with 3+ years experience in IVD medical devices or biosensor systems development. [2689-019 (2009) : 52]

6. The open faculty positions are offered in an environment of both theoretical and experimental research, rich for the development of novel enabling technologies as well as for seeking deeper understanding of fundamental mechanisms underlying the field of neuroprosthetics. [2689-023 (2009) : 55]

7. Studentships cover the field of radiation damage in image sensors, sensor development, detector development for X-ray astronomy and planetary science and semiconductor device modelling. [2689-044 (2009) : 62]

8. With a degree and, ideally, a Ph.D. in a field of study relevant to ADME, you'll have substantial relevant experience, expertise in pharmacokinetics and a sound grasp of mammalian toxicology. [2694-003 (2009) : 52]
9. UCB is a leading biopharmaceutical company, dedicated to the discovery, development and commercialisation of innovative pharmaceutical and biotechnology products in the fields of CNS, immunology and oncology. [2694-005 (2009) : 53]

10. With a degree and postgraduate level knowledge and experience within the field of psychology, you will have a thorough understanding of current scientific agendas and methodological issues in social sciences. [2694-017 (2009) : 58]

11. Committee members will be appointed by the HPA Board Chairman on the basis of their expertise in the field of biological medicines and regulatory experience. [2694-020 (2009) : 60]

12. Experience in the bio-energy field is desirable, as is use of website development and maintenance. [2694-024 (2009) : 61]

13. All of which makes us one of the most rewarding employers in our field. [2694-024 (2009) : 61]

14. Along with a BSc. (or equivalent) in Chemistry/Biochemistry or related field, you will need at least three years' experience in quantitative analysis using LC-MS/MS in support of ADME studies. [2694-024 (2009) : 61]

15. Educated to BSc level (or equivalent) in Chemistry/Biochemistry or related field, you will be a quick learner, with good communication and IT skills and ability to work accurately. [2694-024 (2009) : 61]

16. To succeed in this demanding role, you will need a Ph.D. and experience in a similar role in restoration ecology or a related field. [2694-033 (2009) : 64]

17. You will have experience working in pesticide efficacy ideally with fungicides, or in a closely related scientific/regulatory field. [2694-038 (2009) : 66]

18. The role demands an excellent track record in your field. [2694-047 (2009) : 71]

19. In today’s increasingly competitive environment a Cranfield MSc provides you with the relevant knowledge, skills and practical experience required to pursue or enhance a successful career in your chosen field. [2694-054 (2009) : 74]

20. Students will also have the opportunity to design and undertake a research project in a field of their own choice. [2694-056 (2009) : 74]

21. Changes are made to the syllabus on a continuing basis to take new developments in the field into account. [2698-005 (2009) : 50]

22. Many are closely aligned to roles within the Forces - particularly those in the engineering field. [2698-010 (2009) : 52]

23. A formal qualification in an environmental-related subject and/or experience in an environmental field are essential. [2698-036 (2009) : 63]

24. UCB is a leading biopharmaceutical company, dedicated to the discovery, development and commercialisation of innovative pharmaceutical and biotechnology products in the fields of CNS, immunology and oncology. [2698-039 (2009) : 64]

25. The length of the funding associated with this post will allow you to establish a reputation in the field. [2698-047 (2009) : 68]
26. You should have a relevant Ph.D. and a track record of publication and outstanding achievement in Space Systems Engineering or a related field. [2698-052 (2009) : 70]

27. The University has selected a few high priority scientific focus areas in order to achieve international excellence in these fields. [2698-056 (2009) : 71]

28. Karolinska Institutet offers 20 study programmes in the medical and healthcare field and conducts more than 40 per cent of all academic medical research in Sweden. [2698-057 (2009) : 72]

29. We are seeking highly motivated candidates with a Ph.D. and training in biochemistry, cell biology, molecular biology or related fields. [2698-058 (2009) : 72]

30. Despite a bleak outlook for many sectors of biotechnology, there seems to be a consensus that people with certain skills in this field will be in high demand. [2702-005 (2009) : 46-47]

31. As a Ph.D. or Masters or other related degrees with more than 5 years in industry experience in pharmacokinetic you will work in the field of lead structure optimization and selection of preclinical development candidates [2702-010 (2009) : 50]

32. As a Ph.D. or Masters or other related degrees with more than 2 years in industry experience in pharmacokinetic you will work in the field of lead structure optimization and selection of preclinical development candidates [2702-011 (2009) : 51]

33. We are now seeking high-calibre Commercial R&D Specialists in the fields of: Low Carbon and Sustainable Energy, IT Electronics and Communications ideally with knowledge of Homeland Security; and the Pharmaceuticals Sector ideally with knowledge of medical electronics. [2702-020 (2009) : 55]

34. Provide knowledge and experience in the bio-pharmaceutical, medical technology and healthcare fields to supplement existing expertise within UKTI, the Department of Health, the Department for Business Enterprise and Regulatory Reform (BERR) and UK regions [2702-023 (2009) : 57]

35. Graduate in a relevant field, independent self-starter with several years' experience in export sales and distribution networks [2702-023 (2009) : 57]

36. What's more, you'll have an impressive track record in the field of groundwater resources assessment. [2702-027 (2009) : 60]

37. We are seeking to appoint a professional scientist in our Environmental Chemistry Unit to strengthen our work in this field. [2702-033 (2009) : 63]

38. Located on the Harwell Science and Innovation Campus in South Oxfordshire, we host research facilities supporting cutting-edge research in all fields of science. [2702-037 (2009) : 64]

39. We are looking for a new strategic advisor to act as an advocate in the exciting field of nanoscience. [2702-039 (2009) : 65]

40. Nanoscience is a rapidly maturing field with the potential to revolutionise society. [2702-039 (2009) : 65]

41. The City of Westminster College is one of the largest providers of training in the UK for the NHS in the field of Clinical Physiology, with an intake of about 100 students per year. [2702-053 (2009) : 69]

42. In addition to a relevant degree, you will have substantial post-qualification professional experience working in the field of Technical Cardiology. [2702-053 (2009) : 69]
43. This important role will demand considerable experience in the **field** of ecotoxicology, environmental biology or ecology. [2706-007 (2009) : 49]

44. The Person: Should have a commitment to serve the poor, a Ph.D. degree in basic or applied agricultural or biological sciences in one or more of the **fields** - soil and water management, soil fertility management, agronomy or agro-climatology. [2706-016 (2009) : 53]

45. We also regulate organ and bone marrow donations from living people. The HTA is widely recognised as a class leader in the regulatory **field**. [2706-019 (2009) : 54]

46. We really would like to hear from you if you have a background in a scientific, medical or clinical **field** and you feel you have the creativity and adaptability to turn this into good regulation. [2706-019 (2009) : 54]

47. Ideally able to lecture in several **fields**, you will contribute to the School's existing Computational Biology courses as well as a range of other Computing Science courses. [2706-033 (2009) : 60]

48. NST is a National Centre of Telemedicine Expertise in Norway and an international leader in the **field** of Telemedicine. [2706-036 (2009) : 61]

49. The successful candidate will have a Ph.D. or equivalent experience in a relevant **field**, experience in running one or more of vegetation atmosphere models, biogeochemical models, and dynamic vegetation models and experience in programming or model development. [2706-037 (2009) : 61]

50. Applicants must show that their planned research is a confident and genuinely innovative step into new areas in their **field**. [2706-038 (2009) : 61]

51. Candidate profile [...] potential to obtain a leading position in his/her research **field** [2706-038 (2009) : 61]

52. The successful candidate will have a Ph.D. or equivalent experience in a relevant **field**, experience in running one or more of vegetation atmosphere models, biogeochemical models, and dynamic vegetation models and experience in programming or model development. [2706-042 (2009) : 62]

53. You will collaborate with related **fields** such as catchment science, in-stream chemical processes, sediment dynamics and ecological response. [2711-004 (2009) : 51]

54. The successful candidate will have an undergraduate degree, probably in the **fields** of Chemical Engineering, Materials Science, Pharmacy, or equivalent discipline, which will be augmented by a higher degree (Ph.D., EngD) [2711-005 (2009) : 52]

55. or significant recent experience (>4 years) in the **field**. [2711-005 (2009) : 52]

56. Candidates who expect to receive a higher degree soon in these **fields** are encouraged to apply. [2711-005 (2009) : 52]

57. Your microbiology or related bioscience degree will be complemented by at least five years' postgraduate experience in a relevant **field**. [2711-008 (2009) : 53]

58. You must be able to bring either scientific expertise or equivalent professional experience in a **field** related to biodiversity, conservation or the environment. [2711-010 (2009) : 53]

59. The successful applicants will have a minimum of a BSc. in chemistry, biology or closely related **field** together but, more importantly, experience of working in a regulatory environment. [2711-014 (2009) : 55]
60. Routinely working with Government, NGOs, user groups and numerous academic and industrial partners from all over the world, we are pushing the frontiers of scientific, intellectual and practical knowledge in this rapidly developing **field** and we expect this appointment to help us push these boundaries even further. [2711-034 (2009) : 62]

61. You should have an Honours and higher degree qualification in Physiology/Cell Pathology or in an appropriate **field** of the Life Sciences. [2711-037 (2009) : 63]

62. Routinely working with NASA, the European Space Agency, the Ordnance Survey and numerous academic and industrial partners, we are pushing the frontiers of scientific, intellectual and practical knowledge in this rapidly developing **field** and we expect this appointment to help us push these boundaries even further. [2711-038 (2009) : 63]

63. The Centre is one of the leading international research groupings working on the genetics of common human diseases, and this appointment comes at a time of considerable excitement and progress in the **field** including our developments in high-throughput sequencing. [2711-040 (2009) : 64]

64. The main purpose of the post is to advance cardiovascular research in the University of Glasgow and in particular to develop research in the **field** of cardiovascular genomics, proteomics, metabolomics and systems medicine. [2711-046 (2009) : 65]

65. We’re looking for experienced people like you to move into further education and pass on what you know to the next generation of workers in your **field**. [2715-002 (2009) : 21]

66. A wealth of biotech knowledge will be essential - you’ll bring a substantial and extensive background in the **field** of biological medicines, gained within industry, academia or a government agency, an international reputation of your own, proven management skills and clear ability to provide vision and leadership to the biologicals team. [2715-013 (2009) : 56]

67. Successful candidates will have an interest in the wider implications of assisted reproduction and embryo research, a high level of analytical skills, be a good team player with excellent communication skills and will be specialised in one of the **following fields**: [• clinical embryology; • biological sciences ; • faith ministry or theology] [2715-025 (2009) : 60]

68. To be part of our team, you’ll need to have a significant and relevant track record in your chosen **field**. [2715-026 (2009) : 60]

69. Applications are also invited for two associated lectureships, to work closely with the Director and establish leading research programmes in the **fields** of the geospheric, engineering and (or) materials/corrosion science. [2715-032 (2009) : 62]

70. The Alexander von Humboldt Foundation enables highly-qualified scientists and scholars of all nationalities and **fields** to conduct extended periods of research in Germany in cooperation with academic hosts at German institutions. [2715-034 (2009) : 63]

71. The position comes with pump priming research funding and the Leadership Fellow will build an independent research programme in one of the **following fields** based in either Kenya or Thailand: • Tropical Pharmacology • Medical Informatics • Tropical Environmental Health [2715-037 (2009) : 64]

72. In today’s increasingly competitive marketplace, a Cranfield MSc can help you stand out from the crowd – providing you with the knowledge, skills and practical experience required to pursue or enhance a successful career in your chosen **field**. [2715-045 (2009) : 66]
73. £6 million project to train 50 Ph.D. students to work in the exciting, emerging field of Regenerative Medicine [2715-049 (2009) : 67]

74. Ideally, you have post-doctoral, or equivalent, experience in a field related to ADME or DMPK with a background in pharmacy, pharmacology, biological or medicinal chemistry. [2719-007 (2009) : 49]

75. Candidates with a degree or equivalent in a relevant field and/or IAT qualifications are invited to apply. [2719-010 (2009) : 52]

77. You will be a Business Manager educated to post-doctoral fellowship level with post-doctoral research experience in the field of genetics, biochemistry or cell biology. [2719-033 (2009) : 61]

78. In particular, we are looking for a highly qualified and motivated candidate with a Ph.D. degree in microbial ecology or a closely related field, with at least 4 years of post-doctoral research experience. [2719-035 (2009) : 62]

79. The applicant is expected to create an internationally highly visible focal point of marine microbiology at NIOZ and initiate new projects in this field by acquiring external funding. [2719-035 (2009) : 62]

80. You will be a technical expert within the field of Polymer science, with the expertise and knowledge to discover new polymers and take them from concept through to manufacture, and to develop and improve existing products; in line with current and future business opportunities. [2724-010 (2009) : 54]

81. You will be a standalone expert within the company and externally, with the ability to liaise with academics and universities in the field of polymer science. [2724-010 (2009) : 54]

82. The successful applicant will have a minimum of a BSc. in biology, chemistry, or a closely related field together with experience of working in a regulatory environment. [2724-013 (2009) : 55]

83. Leading the work we do within the highly specialised field of pharmacokinetics, you’ll use your thorough understanding to assess applications for new medicines across the spectrum of therapeutic indications and to guide your fellow professionals. [2724-017 (2009) : 58]

84. Specialising in the research, development and manufacture of innovative, high quality, immunodiagnostic assays in the fields of multiple myeloma (and other B cell disorders) and investigation of the immune response. [2724-022 (2009) : 60]

85. You will have a Ph.D. or equivalent in a relevant field and have demonstrable experience in antibody or other protein engineering, phage or ribosome display. [2724-024 (2009) : 61]

86. With stand-out experience in the field of human toxicology, you’ll have membership of a professional body and a good scientific reputation among your peers. [2724-027 (2009) : 62]

87. With a Ph.D. in Molecular Biology, Virology or a related field, you will look into identifying foot-and-mouth disease viral epitopes contributing to FMD vaccine induced protection. [2724-029 (2009) : 62]

88. He/she is asked to teach comparative animal physiology, histology and cytology at the bachelor level, plus specialized courses in his/her research field of the master in Biology of Parasites and Ecoethology. [2724-030 (2009) : 63]
89. [The NIHR Coordinating Centre for Research Capacity Development] is responsible for making research training awards to individuals who show the potential to become research leaders in their particular field. [2724-032 (2009) : 63]

90. The group is one of the world's leading centres for research in solution-processed semiconductors, and has recently been awarded a Programme Grant from the EPSRC to develop this field of research across several project areas. [2724-039 (2009) : 67]

91. The candidate is expected to supervise and further develop the current CWTS R&D program, in science-technology linkages and science-innovation relationships, into one of the world's leading groups in this field, with an emphasis on quantitative measurements and large-scale bibliometric studies. [2724-045 (2009) : 69]

92. The teaching duties involve the development of courses at graduate or post graduate levels (in Dutch and English) both in this area and interrelated issues in the field of science policy and research evaluation. [2724-045 (2009) : 69]

93. We expect the candidate to hold a Doctorate degree in science studies, science and technology studies, or in relevant fields such as innovation-oriented economics. [2724-045 (2009) : 69]

94. [Candidates] will already have demonstrated outstanding promise in their chosen field. [2724-052 (2009) : 71]

95. We are now seeking three high-calibre Commercial R&D Specialists in the fields of: [Pharmaceuticals; Food and drink research; R&D in electronic-based products and services] [2728-005 (2009) : 54]

96. This exciting role within the Trust’s Science Funding Division, involves keeping abreast of relevant scientific fields, liaising with internal and external stakeholders and developing and managing defined aspects of the Trust’s funding portfolio. [2728-017 (2009) : 60]

97. Candidates should have 3-6 years research and/or development experience in a relevant field and ideally an understanding of ophthalmic diseases including retinal dystrophy, macular degeneration and corneal graft rejection. [2728-022 (2009) : 62]

98. You will contribute both to the laboratory research, the research and clinical strategy and support liaising with key opinion leaders in the field both in the academic and clinical setting. [2728-022 (2009) : 62]

99. The Max Planck Society invites applications from outstanding young scientists in all fields of research pursued by the Max Planck Society (Biology and Medicine; Chemistry, Physics and Technology; Humanities, Social Sciences and Law). [2728-026 (2009) : 64]

100. We now require a number of outstanding individuals to join our dynamic team in Guildford, Surrey and make a significant contribution in this rapidly expanding field. [2728-030 (2009) : 66]

101. An established network of contacts in the field, a track record in academic and industrial research and good management ability are all essential. [2728-034 (2009) : 67]

102. Applicants will preferably have academic experience in a School of Pharmacy or similar, and will have a strong interest in teaching and research in their specialist field within Pharmaceutics or Medicinal/Pharmaceutical Chemistry as appropriate. [2728-035 (2009) : 68]

103. The successful applicant will, in addition to being the field leader for pharmaceutics and setting the tone and direction of future teaching, lead research and development in the subject. [2728-035 (2009) : 68]
104. Within ERG there is an exciting opportunity to develop considerable skills and experience in the field of air quality monitoring and analysis. [2728-036 (2009) : 68]

105. It is expected that the new head will be an active researcher in these or related fields. [2728-039 (2009) : 69]

106. Topical academic networks ensure that the best people in major fields work together and these centres of competence act as useful gateways for scientists interested in a particular area of research. [2733-007 (2009) : 62]

107. Candidates with outstanding scientific track records in any related field will be considered, but preference may be given to applicants working on animal population biology and/or natural host-parasite systems. [2733-009 (2009) : 63]

108. The candidate is expected to establish a world-class research group and to integrate into research activities in related fields at ETH Zurich. [2733-009 (2009) : 63]

109. Candidates with outstanding scientific track record in the general field of plant ecology will be considered, but preference may be given to candidates working on plant population or community ecology. [2733-009 (2009) : 63]

110. The future professor is expected to establish a world-class research group and to integrate into research activities in related fields at ETH Zurich. [2733-009 (2009) : 63]

111. Our Client, the SIB Swiss Institute of Bioinformatics, is an academic non-profit foundation whose mission is to provide core bioinformatics resources to the national and international life science research community and to coordinate the field of bioinformatics in Switzerland. [2733-012 (2009) : 64]

112. These exciting roles, within the Trust’s Science Funding Division, involve keeping abreast of relevant scientific fields, liaising with internal and external stakeholders and developing and managing defined aspects of the Trust’s funding portfolio. [2733-025 (2009) : 70]

113. Candidates will have a Ph.D., and post doctoral experience in a relevant field within the broad remit of the molecular and physiological sciences. [2733-025 (2009) : 70]

114. An opportunity exists for an agriculture/veterinary/other animal science graduate, or suitably qualified person to join the HSA (Registered in England Charity No 209563) in promoting humane methods of slaughter, welfare improvements in livestock transport and in markets, and further developments through education and research in these fields in the UK and overseas. [2733-032 (2009) : 72]

115. You should have a Ph.D. (or should expect to submit a thesis for Ph.D. before 31st December 2010), preferably in Statistics or a related field. [2733-041 (2009) : 75]

116. You will work across a range of commercial sectors and technical fields with academics from across the University. [2733-045 (2009) : 76]

117. The post will be in the field of Homogeneous Catalysis. [2733-047 (2009) : 76]

118. Applicants should be able to demonstrate ESIA expertise in these technical fields, as well as in the sector and region. [2733-054 (2009) : 79]

119. Candidates should have at least five years post-doctoral experience, a strong publications record in a relevant ecological field, experience of developing research programmes and a desire to work collaboratively to tackle complex research issues. [2737-008 (2009) : 56]
120. With a Doctoral degree (Ph.D.) or equivalent in biology, chemistry or a related field, you will have excellent laboratory skills and relevant experience. [2737-013 (2009) : 57]

121. Graduate in a relevant field, independent self starter with several years' experience; [2737-021 (2009) : 63]

122. You will work with academic investigators and the Preclinical Team Leader to establish clinically applicable PET imaging biomarkers for use with novel therapeutics. You will contribute to the creative effort of the group, to understand subject background in the specific subject area and the wider field. [2737-022 (2009) : 64]

123. Applicants should have a Ph.D. (or be close to completing) (or equivalent) in a related field. [2737-022 (2009) : 64]

124. Building on eight strategically identified areas of advance, we are now seeking ambitious women and men for Assistant Professorships in fields that will further our vision of sustainability. [2737-024 (2009) : 65]

125. We are looking to recruit a high calibre international leader in the field and an attractive package will be negotiated with you including research support and facilities. [2737-028 (2009) : 66]

126. The Quantum, Light and Matter group in Southampton's School of Physics and Astronomy conducts world-class research in the fields of quantum, atomic and semiconductor physics, photonics, magnetism and nanomaterials. [2737-029 (2009) : 67]

127. We have an extensive network of expertise including: molecular and cell biology research in a variety of fields with particular strengths in Bone and Musculoskeletal Biology, Cell and Developmental Biology, Immunology, Microbiology, Neuroscience and Systems Biology; [2737-031 (2009) : 67]
1. The East Malling Research Station Association offers a postgraduate Studentship of £750 per annum (tax free) tenable for three years, for study in one of the following fields: crop physiology, the water relations of plants, mycology (soil-borne pathogens), virology, biometrical statistics. [733-013 (1971) : 39]

2. Preference will be given to candidates with experience in one of the following fields - Cytogenetics, Developmental Genetics, Molecular Cytology or Population Genetics. [733-030 (1971) : 41]

3. Applications are invited for Lectureships within the School of Biological and Environmental Studies, in the following fields of interest: [Taxonomy; Economic Geography; Meteorology; Systems Analysis] [733-039 (1971) : 42]

4. The successful candidates will probably have about three years’ experience in at least one of the following fields: information systems statistical data processing survey analysis commercial programming [733-048 (1971) : 43]

5. Applicants should be able to show an aptitude for practical tasks and the ability to learn new techniques, and it would be an advantage to have experience in one or more of the following fields: vacuum technology, semiconductor device technology, chemical analysis, metallurgical sample handling, electronics, instrument mechanics. [733-072 (1971) : 47]

6. Technical staff for research centres, industry and hospitals urgently required in the following fields: Chemistry, Biochemistry, Microbiology, Toxicology, Bacteriology; Haematology [737-002 (1971) : 277]

7. Vacancies exist for qualified staff in the fields of glass technology, glass science and furnace technology. [737-006 (1971) : 277]

8. Research in the department has been mainly in the fields of elasticity, plasticity, heat transfer, decision theory and optimal control and the theory of minimum weight structures. [741-015 (1971) : 521]

9. He will take charge of a research and product development team, the main emphasis of whose work will be on the development of new products, utilising the company’s technical experience in the fields of silicates, glass, resin cement and the like. [741-020 (1971) : 521]

10. Engineer, Physicist or Chemist to participate in the planning and execution of work required for radiation safety. He will carry out studies and development work in the following fields: beam loss, shielding for radiation protection, material damage dosimetry, methods of evaluating the lifetime of materials around accelerators. [745-035 (1971) : 60]

12. A wide range of interesting topics are being investigated in the fields of Powder Technology, Materials Engineering and Materials Protection and vacancies will exist in all research groups. [745-072 (1971) : 63]

13. Applications for appointment to two positions of LECTURER OR SENIOR LECTURER in the Department of Agronomy are invited from persons with interest and suitable qualifications in any of the following fields: [Agricultural Systems; Genetics / Plant Breeding ; Ecology] [750-008 (1971) : 354]

14. The research posts are to support Professor J. H. Collings in a substantial industrially supported research programme in the field of acoustoelectronic integrated circuits and their applications to telecommunication systems. [750-025 (1971) : 356]

15. A number of S.R.C. research studentships and similar grants are available in the following fields: Cosmic Ray Physics, Low Temperature Solid State Physics, Polymer Physics [754-001 (1971) : 598]

16. Applications are invited for a Research Studentship to undertake research in one of the following fields: plant or animal biochemistry; microbiology; nematology. [754-006 (1971) : 598]

17. A limited number of Studentships will be available in the above Department for research in the fields of microbiology, applied biochemistry, water pollution and animal physiology. [754-007 (1971) : 598]

18. The applications of nuclear techniques to various fields, e.g. activation analysis or medical physics and specialised techniques, e.g. accelerator design and nuclear electronics are covered in optional modules. [754-012 (1971) : 599]

19. Applications are invited for the post of research assistant in the Palaeoecology Laboratory from graduates with some biological training and interests in one or more of the following fields: biology, chemistry, geography or archaeology. [754-052 (1971) : 602]

20. We have a vacancy for SENIOR SCIENTIFIC ASSISTANTS holding H.N.C. and having experience in one of the following fields Metallography Crystal growing Microstructural studies with modern electronic equipment Operation of autoclaves Mechanical testing Electrical measurements Low temperature techniques [754-078 (1971) : Ciii]

21. This post is in a group led by Professor R. N. Haszeldine, F.R.S., and industrial experience in the fields of Petroleum, Chemistry and Petrochemicals is required. [758-011 (1971) : 51]

22. Applications are invited for this post in the Department of Computer Science. Applicants must have experience in one or more of the following fields: Operating Systems, High Level Languages, Numerical Analysis. [758-036 (1971) : 52]

23. Medical Physics Technician, Grade III, required to assist in the work of this new Department, with special responsibility in the fields of Radioisotope and Ultrasonic Scanning, Radiation measurement and Diagnostic Radioisotope procedures. [758-044 (1971) : 53]

24. Applications are invited for research studentships leading to Ph.D. degrees in the following fields: (i) Carbanion chemistry involving fluorocarbon systems. (ii) Infrared studies of high pressure reactions or organometallic compounds. (iii) Inorganic cyclic sulphur-nitrogen chemistry. (iv) Organofluorine chemistry which may include work on polymers. (v) Inorganic Chemistry in non-aqueous solvents. [758-071 (1971) : 55]

25. Postgraduate Studies Opportunities exist in the following fields: Research for the degree of M.Phil or Ph.D. in Combustion Control, Fluid Mechanics, Heat Transfer, Metal Forming, Stress Analysis and Tribology. [758-084 (1971) : 56]
26. The appointed persons will work under Dr. S. Lewin in fields concerned with the effects of heavy water on the reactions of nucleic acids, of histones and of protein biosynthesis, or on problems concerned with insulin-antibody reaction in relation in diabetes. [763-041 (1971) : 347]

27. There are also research opportunities in the following fields: Engineering properties of plastics Welding Technology; Superplasticity and sheet metal deformation problems [763-050 (1971) : 348]

28. The successful applicant will be required to work in one of the following fields: Chemistry of development; Holography; Gelatin in photographic emulsions. [767-038 (1971) : 545]

29. Senior Lecturers / Lecturers in the fields of CARTOGRAPHY and Physical Geography, Economic Geography, Agricultural Geography, Settlement Geography, [772-009 (1971) : 53]

30. Such fields include micro-biology, microbial chemistry & physiology, and mycology. [772-016 (1971) : 54]

31. Applicants should be well-qualified with experience preferably at the post-doctoral level in the fields of Bio-Physical, Bio-Inorganic, or Bio-Organic Chemistry. [772-039 (1971) : 56]

32. Preference will be given to candidates in the fields of Polymer Science and Technology and Chemical Science and Technology, Chemical Science and Technology and Materials Science and Technology. [772-050 (1971) : 58]

33. Lecturers in the following fields: Inorganic, Organic and Physical Chemistry [772-050 (1971) : 58]

35. Lecturers (for D only): Should possess a good first degree in Pharmacy together with a higher degree and research experience in one of the following fields related to the teaching of Pharmacy. [772-050 (1971) : 58]

36. Professors in the fields of Parasitology, Entomology, Hydrobiology or Plant Pathology. [772-050 (1971) : 58]

37. Professor / Director in the fields of Pharmacy, Pharmaceutics, Pharmaceutical Chemistry, Pharmacology, Physiology and Pharmaceutical Technology. [772-050 (1971) : 58]

39. The Institute of Advanced Studies, consisting of the John Curtin School of Medical Research and the Research Schools of Physical Sciences, Social Sciences, Pacific Studies, Chemistry and Biological Sciences, and The School of General Studies, consisting of Faculties of Arts, Asian Studies, Economics, Law and Science, offer a limited number of scholarships in the fields listed below to applicants of high scholastic calibre with capacity for research who hold, or expect to hold a good honours degree or equivalent from a recognised university. [772-085 (1971) : 63]

40. The fields of research in which scholarships are offered are: Neurobiology, Developmental Biology, Environmental Biology, Genetics, Human Biology, Molecular Biology, Environmental Biology, Taxonomy, Microbiology, Botany, Forestry, Zoology, Physiology, Neuropharmacology, Clinical Science, Experimental Pathology, Immunology, Medical Chemistry, Biochemistry, Physical Biochemistry; Chemistry: Inorganic, Organic Physical Organic, Theoretical and Physical; Geochemistry, Geology, Geophysics, Aerophysics, Electron and Ion Physics, Engineering Physics, Laser Physics, Nuclear Physics,

41. The applications should be in the **field** of Mathematics, Natural Sciences, Geography and allied subjects. [772-088 (1971) : 63]

42. The Fellowships, normally tenable for two years, can be held in any **field** provided it falls within ICI’s general sphere of interest: this includes many branches of chemistry, physics, the biological sciences, applied mathematics, engineering, and technology. [772-095 (1971) : Ciii]

43. At present research is being carried out in the **fields** of nuclear physics (by means of a CN Van de Graaf accelerator), low-level radioactivity, plasma physics, astrophysics and in several branches of theoretical physics. [774-022 (1971) : 189]

44. Research may be done in many **fields** of metals or ceramics: phase transformations, diffusion, surfaces, mechanical and electrical properties, radiation damage, and on processes: physical chemistry of iron and steelmaking mass transport and heterogeneous kinetics. [774-023 (1971) : 189]

45. Applicants should be well-qualified with experience preferably at the post-doctoral level in the **fields** of Bio-Physical, Bio-Inorganic, or Bio-Organic Chemistry. [774-033 (1971) : 190]

46. University graduates in one of the **following fields**: mechanical, physical, chemical and industrial engineering; materials sciences; analytical chemistry; ceramics; physical, mechanical and extractive metallurgy. [774-042 (1971) : 191]

47. Applicants should possess a good Honours Degree or equivalent qualification in physical science or engineering and experience in any of the **following fields** will be of value: polymer science, composite materials and acoustics. [774-052 (1971) : 192]

48. Applicants should be well-qualified with experience preferably at the postdoctoral level in the **fields** of Bio-Physical, Bio-Inorganic, or Bio-Organic Chemistry. [776-017 (1971) : 287]

1995

1. He or she would also be expected to liaise closely with earth scientists, geomorphologists, hydrologists, archaeologists and biochemists, and a strong interest in one or more of these **fields** would be an advantage. [1963-032 (1995) : 57]

3. Preference will be given to candidates with a background in marine ecology, in the **fields** of education, research or commerce, and to those who have demonstrated their ability to manage people, resources and market services. [1967-030 (1995) : 71]

4. The group currently has research staff working in the **fields** of adaptive optics, faint object spectroscopy and multi-fibre spectroscopy, and has provided a number of very successful astronomical instruments for CTK telescopes including AUTOFIB, LDSS and MARTINI. [1967-036 (1995) : 73]

5. Vacancies exist for University Lecturers or University Assistant Lecturers in the **following fields** to take up appointment on 1 October 1995, or as soon as possible thereafter. [Electrical Drives / Communications Electronics; Information Engineering; Nuclear Engineering; Structural Engineering; Manufacturing Engineering] [1976-029 (1995) : 70]
6. Preference will be given to candidates with expertise in one of the following fields: automation and computer integrated manufacture, production processes, manufacturing systems. [1976-029 (1995) : 70]

7. Preference will be given to candidates with proven records of successful research in nonlinear optics, quantum optics and opto-electronics, with an emphasis on devices and systems, but candidates working in the fields of laser-plasma physics, semiconductors, or solid state and surface spectroscopy will also be considered. [1976-044 (1995) : 73]

8. Candidates should hold a degree in ecology, forestry or related discipline and, ideally, have recent research experience in one or more of the following fields: British mammals, silviculture and botanical monitoring. [1976-051 (1995) : 75]

9. PROFILE: A five years experience is required in the field of agronomy with particular reference to one or more of the following: crop identification, surveying, aerial photographic interpretation, analysis of remote sensing data, computer science with particular reference to GIS. [1980-024 (1995) : 61]

10. DUTIES: One of the following fields: identification of crop types in sites across the EU; cartographic and photogrammetric surveys of sites across the EU; input of derived data into geographical information systems. [1980-024 (1995) : 61]

11. The PRIS was founded in 1988 to undertake advanced teaching and research in the broad field of sedimentology, including geochemical, hydrogeological, geophysical and geobiological aspects. [1980-039 (1995) : 66]

12. He/she will be able to collaborate with equally dedicated researchers in a number of associated fields (among others: noble-gas and stable isotope geochemistry, physical hydrogeology, those of the two new appointees). [1980-039 (1995) : 66]

13. The section is currently providing services in the fields of megavoltage therapy X-ray, CT scanning, ultrasound imaging and various paramedical disciplines. [1984-007 (1995) : 53]

15. The Department has strengths in several relevant research fields, including Lower Palaeozoic biostratigraphy, sedimentary geochemistry, palaeontology, and crustal evolution. [1989-011 (1995) : 60]

16. Applicants should have a Ph.D. degree or equivalent, in one or more of the fields of agronomy / agroclimatology / soil chemistry / soil physics / resource economics [1993-069 (1995) : 71]

17. In addition to a Ph.D., applicants are expected to have […] international scientific contacts in the fields of systematics, taxonomy, and phylogeny [1993-089 (1995) : 76]

18. Kuwait Institute for Scientific Research (KISR) is a nonprofit organisation actively engaged in applied research in the fields of environmental and earth sciences; water resources; food resources; engineering; petroleum, petrochemicals and materials and techno-economics. [1998-013 (1995) : 76]

19. At least a Master's level education (Doctorate preferred) in a biomedical field related to clinical research such as pharmacy; medicine or life science. [2002-010 (1995) : 57]

20. Our research covers the fields of computational fluid dynamics, heat transfer and aerodynamics applied to studies arising in the general areas of ballistics and energetic materials. [2002-081 (1995) : 78]
2005

1. Applications are invited from individuals working in the field of microbiology, gastroenterology, food safety, nutrition and food science in the UK and Ireland. [2481-084 (2005) : 79]

2. The ideal candidate will have a successful track-record of developing desktop applications in a scientific field e.g. geology / geophysics or the oil industry [2485-009 (2005) : 59]

3. Research papers published by University of Dundee scientists in the fields of Biology, Biochemistry and Molecular Biology were more highly cited over the past 10 years than any other University in Europe. [2485-020 (2005) : 62]

4. You will have research experience in one or more of the following fields: data analysis and manipulation, programming preferably C/C++ under UNIX/Linux, the running or application of existing numerical models, collection and use of disease datasets. [2485-081 (2005) : 84]

5. The Department of Mechanical Engineering (rated 5 in the 2001 RAE) has international standing in the fields of materials evaluation, computational engineering, internal combustion engines, fundamental aspects of fluid mechanics, and naval architecture and marine engineering. [2485-090 (2005) : 87]

6. The TTM will focus on evaluating, protecting and commercialising opportunities developed at King's College London in the fields of physical sciences, engineering and IT, including bioinformatics and biomedical devices. [2485-093 (2005) : 88]

7. A significant number of Ph.D studentships will be available from October 2005 for postgraduate research and training in the following fields: Cancer Biology and Cell Signalling Cell and Developmental Biology Control of Gene Expression Functional Genomics Molecular Enzymology Structural Biology and Bioinformatics Molecular Pathogenesis Antibiotic Resistance and Biosynthesis [2485-117 (2005) : 94]

8. Research papers published by University of Dundee scientists in the fields of Biology, Biochemistry and Molecular Biology were more highly cited over the past 10 years than any other University in Europe. [2489-044 (2005) : 75]

9. The Department has world-class research in the fields of structural materials evaluation, computational engineering, internal combustion engines, fundamental aspects of fluid mechanics, naval architecture and marine engineering. [2498-066 (2005) : 73]

11. Students should possess a first degree (minimum 2.1 or 2.2 with a MSc qualification) in the fields of mechanical engineering, building services engineering, chemical engineering, physics or other technical disciplines. [2502-067 (2005) : 77]

12. The posts are in, but not exclusive to, the following fields: [VLSI design and integration with microsystem technologies, biomedical systems and/or bioMEMS, sensor systems and applications. Millimetre wave and microwave integrated circuits and subsystems. Sub-circuit to system modelling with deep sub-micron technologies liaising with semiconductor device modelling and electromagnetic theory and modelling] [2506-043 (2005) : 70]
13. As Assistant Professor, you will be responsible for carrying out research, theoretical and experimental, in the field of controlled kites and their application. [2506-060 (2005) : 75]

14. In addition to your analytical ability, integrity and experience of working in a multi-disciplinary environment, you will also be able to demonstrate your expertise in one of the following fields: • Ethics • Finance and financial management • Psychology or other social science • Human clinical genetics [2511-015 (2005) : 56]

15. For almost two decades, we have driven innovation in DNA testing across the fields of forensic science, paternity testing, agricultural genotyping, - now you will build on our success and spearhead the next phase of our growth. [2511-017 (2005) : 57]

16. By discovering new molecular diagnostics in the fields of nuclear medicine, MRI and X-ray, we are making possible the diagnosis and characterisation of disease at an earlier stage than ever before. [2511-038 (2005) : 64]

17. The successful candidate is likely to be educated to degree level or equivalent in an appropriate subject, and this will be coupled with at least five years' practical experience in the field of immunoassay/diagnostic development or manufacture. [2515-036 (2005) : 68]

18. Exciting developments are occurring in fields of nanotechnology, polymer science and biomimetics. [2515-041 (2005) : 70]

19. At our modern drug discovery facility, situated midway between Edinburgh and Glasgow, we carry out innovative research in the fields of Psychiatry, Cardiovascular disease and Analgesia. [2524-047 (2005) : 68]

20. The University of Southampton ORC is the largest Photonics Centre in the UK and provides a stimulating interdisciplinary research environment spanning diverse fields including: optics, lasers, chemistry and biology. [2524-074 (2005) : 78]

21. The fields considered this year will be: History since c. 1500, English Literature since c. 1500, Materials Science, Sociology and Social Anthropology. [2524-075 (2005) : 78]

22. You will be involved in a range of research projects in the fields of molecular biology, epidemiology and bacterial biofilm biology and will also be expected to contribute to the day-to-day running of the laboratories as required. [2528-073 (2005) : 88]

2006

1. We operate 7 days per week, providing a range of specialist analytical services to the animal feed, grain, milling and food industries in all fields of microbiology, nutrition and chemistry. [2533-009 (2006) : 48]

3. The successful candidate will be expected to: […] Contribute to research in the Department of Soil Science in one or more of the following fields: soil organic matter dynamics; risk assessment; soil remediation; biogeochemistry; and soil respiration, particularly in relation to climate change [2537-063 (2006) : 80]
4. Research papers published by University of Dundee scientists in the fields of Biology, Biochemistry and Molecular Biology were more highly cited over the past 10 years than any other University in Europe. [2537-064 (2006) : 80]

5. Ferring Pharmaceuticals is a speciality, research-driven bio-pharmaceutical company active in the global market. The company identifies, develops and markets innovative products in the fields of urology, gynaecology, gastroenterology and endocrinology. [2541-009 (2006) : 60]

6. It is initially supporting the development of six Topic Specific Research Networks in the fields of cancer, dementias and neurodegenerative diseases, diabetes, medicines for children, mental health and stroke and, over time, will hopefully enable research to be conducted across the full spectrum of disease and clinical need. of benthic macrofauna. [2550-030 (2006) : 70]

7. Applications are invited for a NERC studentship starting in October 2006 that will involve observation and modelling research in the one of the fields of: Mesoscale convective systems and easterly waves; New observations to estimate the radiation balance of the atmosphere; Remote sensing to improve flood prediction; Radar measurements of deforming volcanoes. [2554-014 (2006) : 64]

8. Candidates should possess a degree in either of the following: Chemistry, Biological Science or Pharmacy. Previous experience in the Pharmaceutical or fine chemical, QA or Technical field would be advantageous. [2558-032 (2006) : 74]

9. As part of a multidisciplinary team, you will use fluid flow analysis as a tool to help improve workplace health and safety in fields such as occupational hygiene, biological and chemical exposure and major hazards. [2558-053 (2006) : 82]

11. To that end we are seeking a scientist specialized in one of the following fields of pathogen/host-interactions: FISH (cell/tissue), immunohistochemistry, apoptosis, necrosis; or of gene expression: ChIP, siRNA libraries. [2558-090 (2006) : 95]

12. PhD projects are available in the following fields: genetic epidemiology, dietary and nutritional epidemiology, physical activity epidemiology, the genetic or environmental determinants of infancy and childhood growth and the determinants of type 2 diabetes, screening and prevention. [2567-023 (2006) : 60]

13. Fields available for study are that of obesity, diabetes and contributory conditions, congenital heart defects in Down Syndrome or foetal growth and health as determined by maternal genes [2576-075 (2006) : 86]

15. Teva is a truly global pharmaceutical business with a presence in the field of generics, respiratory and innovative medicines. [2580-057 (2006) : 73]

16. This is an exciting opportunity to develop considerable skills and experience in the field of air pollution modelling, emissions inventory development and health based research. [2580-071 (2006) : 79]

2009
1. UCB is a leading biopharmaceutical company, dedicated to the discovery, development and commercialisation of innovative pharmaceutical and biotechnology products in the fields of CNS, immunology and oncology. [2694-005 (2009) : 53]

2. UCB is a leading biopharmaceutical company, dedicated to the discovery, development and commercialisation of innovative pharmaceutical and biotechnology products in the fields of CNS, immunology and oncology. [2698-039 (2009) : 64]

3. This important role will demand considerable experience in the field of ecotoxicology, environmental biology or ecology. [2706-007 (2009) : 49]

4. The Person: Should have a commitment to serve the poor, a Ph.D. degree in basic or applied agricultural or biological sciences in one or more of the fields - soil and water management, soil fertility management, agronomy or agro-climatology. [2706-016 (2009) : 53]

5. We really would like to hear from you if you have a background in a scientific, medical or clinical field and you feel you have the creativity and adaptability to turn this into good regulation. [2706-019 (2009) : 54]

6. The successful candidate will have an undergraduate degree, probably in the fields of Chemical Engineering, Materials Science, Pharmacy, or equivalent discipline, which will be augmented by a higher degree (Ph.D., EngD) [2711-005 (2009) : 52]

7. You must be able to bring either scientific expertise or equivalent professional experience in a field related to biodiversity, conservation or the environment. [2711-010 (2009) : 53]

8. The main purpose of the post is to advance cardiovascular research in the University of Glasgow and in particular to develop research in the field of cardiovascular genomics, proteomics, metabolomics and systems medicine. [2711-046 (2009) : 65]

9. Successful candidates will have an interest in the wider implications of assisted reproduction and embryo research, a high level of analytical skills, be a good team player with excellent communication skills and will be specialised in one of the following fields: [ • clinical embryology; • biological sciences ; • faith ministry or theology] [2715-025 (2009) : 60]

10. The position comes with pump priming research funding and the Leadership Fellow will build an independent research programme in one of the following fields based in either Kenya or Thailand: • Tropical Pharmacology • Medical Informatics • Tropical Environmental Health [2715-037 (2009) : 64]

12. You will be a Business Manager educated to post-doctoral fellowship level with post-doctoral research experience in the field of genetics, biochemistry or cell biology. [2719-033 (2009) : 61]

13. Specialising in the research, development and manufacture of innovative, high quality, immunodiagnostic assays in the fields of multiple myeloma (and other B cell disorders) and investigation of the immune response. [2724-022 (2009) : 60]

14. We are now seeking three high-calibre Commercial R&D Specialists in the fields of: [Pharmaceuticals; Food and drink research; R&D in electronic-based products and services] [2728-005 (2009) : 54]
15. The Quantum, Light and Matter group in Southampton's School of Physics and Astronomy conducts world-class research in the fields of quantum, atomic and semiconductor physics, photonics, magnetism and nanomaterials. [2737-029 (2009) : 67]

16. We have an extensive network of expertise including: molecular and cell biology research in a variety of fields with particular strengths in Bone and Musculoskeletal Biology, Cell and Developmental Biology, Immunology, Microbiology, Neuroscience and Systems Biology; [2737-031 (2009) : 67]

Annexe 9-7-4 Occurrences de FIELD dans BNC

Les occurrences en rouge renvoient au discours des ressources humaines

Here is a random selection of 50 solutions from the 15035 found.

A77 1712 The Sergeant Ammunition Technician RAOC working in the depot was first on the scene, and managed to evacuate the driver and passenger of the vehicle by German Fluey helicopter to the AMF(L) Italian Field Hospital.

A77 1745 It was just another day in the life of 3rd Armoured Field Ambulance.

ABX 3885 Philip ran down the ride towards the field, shouting for Lee.

AHC 229 He is fit and there won't be a healthier-looking horse in the field.

AJV 251 A sports writer who might previously have written ‘a live wire mid field man’ (one who shows much sports man ship, presumably) actually took the trouble to put ‘livewire midfieldman’.

ARX 426 The Nazis also pioneered in the field of book destruction in their self-imposed task of reducing the multi-cultural nature of German society by the elimination of that quintessentially literate people whom Stalin referred to as ‘cosmopolitan elements’.

B06 123 As a matter of interest, Dr Jean Valnet and other doctors in the field of clinical aromatherapy have discovered that blends of certain essential oils are not only more powerful than when used singly, but that the mysterious factor of synergy is at work — the whole becoming greater than the sum of its equal parts.

B0L 1012 Chapman's absolute authority over the team and his concern for their performance on the field was highlighted by the firm rule he laid down for match days.

B0U 992 I looked out of the window at the sun flashing on a field of snow.

B1X 2170 ‘Why, I can reap a field with the best of them.

C8L 67 In his concern, Jesus pleads for workers to be sent out into the harvest field.

CD8 1990 The agreement was to yield if not relieved, or the English beaten in the field.

CGL 1411 They land in a field among crop circles (they bought crop circle footage off National Geographic, and when they watched it the only car you could see in it was — synchronicity! — a red station wagon...) and then pick up a hitch-hiking alien.

CHE 1053 This stage of the training took place in the field beyond our back garden.

CHH 1349 Follow the track which leads downstream and when it divides, turn right into a field.

CM1 999 The Dwarfs retreated from the field claiming that honour was satisfied and refused to answer any Elf petitions for the return of the crown.
The filtering occurs because the effectiveness of a stimulus varies with its location, being normally distributed around the centre of the receptive field of the device.

He was a shrewd analyst of players' strengths and weaknesses and a master of the unexpected bowling change or field placing.

John Field, the town centre manager, said the Cloisters development would fill the extra need identified in the survey for more shopping facilities.

One method is for the sequence field of the micro-instruction to specify all but the least significant few bits of the next micro-instruction address.

The Stranger in the Field

Wh what I mean to say is I couldn't in advance guess which field it was that you were going to want at any particular moment.

The Sister Constance, who was the then the principal sister there she let us have the field so we got entertainment laid on we invited a celebrity, I think our first celebrity was erm I think it was Lord and Lady and then each time we had a different one, we had entertainment the whole time we started, about half past two and then we had entertainment until six then we had an interval then we had entertainment till twelve o'clock I even took my piano down onto the field so that we could have music.

In general it is likely that builders will prefer the additional green field land to the substantive existing provision within the built-up area.

In summer, field men cannot afford to be too tolerant of pollution, especially with watercourses exposed to the greater scrutiny that comes with recreational use.

If a fish was receptive enough to electricity to pick up any tiny currents induced in its body, they would provide an additional guide to the Earth's magnetic field.

In its capacity as spokesman the BDDA was particularly active in the educational field, where it never ceased to act as a pressure group in favour of the combined system.

A break during the middle of the day and a return to the stables — apart from the question of distance from the field where the work was being done — would have meant unyoking and yoking up a second time for another stint in the afternoon; and this would have lengthened the day without appreciably lengthening the working time.

that most of the present range of home-school links was already to be found in local primary schools well before PNP, and that activity in this field since 1985 has involved the further development and dissemination of existing practice rather than the devising of innovative techniques.

In the meantime, I made inquiries with the old-folk of the village to see if they remembered any house or cottage ever standing on that particular field.

And yet these institutions are concerned only marginally with working-class adult education, and still less with the specific field of adult education for the unemployed.

Pavlov, Thorndike and Skinner are particularly well known for their research in this field of psychology, though Pavlov himself was a physiologist.

He commented ‘Advanced computer software plays an important part in helping oil and gas reservoir engineers both to assess and devise exploitation strategies for oil field reserves.'
Jon Pack took advantage of the five-minute interview to explain how BP had conducted a widespread consultation exercise before developing the oilfield and how it now operated the field to the highest environmental and safety standards.

On the same day another polar bear was captured and removed from the Prudhoe Bay field.

Javier, from the Systems department, took his picture, titled ‘Our Shadow’, some four years ago on a field trip to Sochagota lake in the province of Boyac.

More field work studies of systems analysts and how they relate to managers should illuminate this little known area of managerial work.

Many of the developments in taxonomy in the recent past have involved the use of computers, but staff in RBG have been limited by the inadequate facilities previously available, which have made it extremely difficult for them to become involved in work in this field.

I hope, when Siward comes with his army, that you find the field as easy to quit as it has been to enter.’

I declare a bias immediately; I am a practitioner, and I do have large grants in this field.

Name of file to scan (Mandatory Input Field)

Are you sure (Y/N)(Mandatory Input Field)

This field will be blank if the SPR has not yet been submitted.

At its official relaunch, the new party leadership promised to field at least 250 candidates, and to concentrate on "politically interesting" seats, although it admitted that it could not win any.

The Swindon success story isn't just on the field…off the field they've been rebuilding too…the overdraft is below a million…but the world of football the town of Swindon still wonders if the County Ground could cope could afford the premier league…

—OULTON Park hosts the Rapid Fit Open Formula Ford Championship for Formula Ford 1600cc motors next Saturday with an international field of drivers lining up to prove that they can make the leap into Formula 1 status.

Here is a random selection of 50 solutions from the 5705 found.

General branches offering all services over the one counter will be replaced by cluster branches, containing specialists in different fields.

Some of the wealthier peasants would probably have held some enclosed freehold fields.

The scratching of poultry in fields and the value of their droppings add an unmeasured profit.

In a thousand remote little farmhouses and cottages, islanded beneath wind-shriven willows or leaning poplars, the racing floods covered the black fields, overflowed the straight dykes…and leaping upon those lonely homes with all the relentless force of wind and gales, burst open the doors, shattered the ground floor windows…and rushed gurgling and swirling up the narrow staircase.
The amount of silt that the Huanghe brings to the China Sea (1.6 × 10 t per year) represents a 25 per cent increase over the last 30 years and is due mainly to the conversion of grasslands to arable fields (Smil 1987b).

They keep fewer beef cattle and many of these are stall-fed rather than grazing in the fields.

Generally, gas fields are absent (with the exceptions of Amethyst and Ann) from the zones of anomalous Bunter Shale uplift.

A geographer, Alfred Siemens of the University of British Columbia, has found rectilinear remains of canals and planting platforms (raised fields) in central Veracruz, which, he claims, are distinctly oriented about 15° east of north (American Antiquity, vol 48, p 85).

He acted as the intellectual cavalry, seeking out new fields, harrying the enemy with his pen and probing unknown territory.

However, workers in the main fields covered, viz oil field applications, heating and cooling systems, stream raising and lubrication, will find this monograph valuable.

Think of all those Syrian cane fields.

The sinking sun had appeared again, gilding the wheat fields and splodging inky shadows in the rain-soaked trees.

Thus it is understood that cells are influenced by fields and not currents of electricity, as the effect is minimal.

The firm abandoned the idea that it could be all things to all people and decided to focus on identified areas of expertise examples are the legal profession, building societies and the construction industry — and build a reputation for quality of service by becoming pre-eminent in those fields.

Whatever contribution hunting made to the diet, the domestic animals and crops in the fields must have provided the majority of the food eaten.

Nothing seemed to be moving on the road itself, though Sharpe supposed the French must have some skirmishers concealed in the fields of long rye.

Thus we fabricate a deeper sense of being red in which an object is red only if it is red in a stable fashion in the perceptual fields of all observers and which is therefore treated as part of the real world which exists independently of us.

One who was there on the day and has watched the film many times now suddenly notices that Snow, at The Oval, 1968, has his foot on the pitch as he fields at silly mid-on while Australia slide to oblivion against Underwood.

It was a particular damp Autumn, before the advent of land drainage at Strawberry Fields and the snapshot albums shows us (with all the children again) wellies up to the knees in mud, lifting the teethes out of the quagmire with forks!

Jump instructions could be a fourth group, if the layout of the addressing mode and operand fields differs from that of the first group.
Amongst the major achievements of the century in group theory one must mention the modular representation theory of groups by matrices over finite fields as pioneered by Richard Brauer and the subsequent use of this theory in investigations into finite simple groups (Section 6.6).

The mowers went out into the little fields of wheat and oats, and the sheaves stood yellow in the stubble.

The advancement of the newly invented discipline of English must thus be examined in the context of a growth in the number of semi-autonomous professions in fields like public administration and welfare, journalism, publicity, and the arts, and of the establishment of national cultural institutions geared to providing a schedule for organizing the nation.

But those fertile cultural fields which are said to have been generated and sustained by this vitalizing flow of truly native experience turn out to be presently inhabited only by a "limited section" of the society.

Even the freeholders in the fields — who were willing to have enclosure so that they could farm more efficiently or sell land for building — were helpless in the face of the burgesses who might have no land but who hoped to get a piece in time, or who already held these rights to graze their cattle and sheep.

Having already turned down Fields's first licence application in December 1983, Raymond Colegate, the CAA's commercial director and the chairman of the licensing panel, was ‘deeply sceptical’ of Fields's ability to get the project airborne.

Insects buzzed and butterflies filled the glades with silent flashes of colour; in the fields the corncrake stooped and zoomed, its strange, percussive call stuttering through the scent-laden air.

But even so Elizabeth should have known what she was walking into, should have looked closely at the encircling fields, the rock-built house and Hywel all muddy and iced and quiet from winter toil.

I have seen him with his girls in the fields, and when he knows I am watching he kisses them.

Later, as the aircraft swooped down over many of the fields that were so familiar to me in my detecting rambles around the countryside, I soon realised that the weather had taken its toll on the cropmarks.

In the Kras the vines grew close to the ground, and the fields were tiny and defined by stone walls, while in the Po valley there seemed to be no walls at all.

Most of them were on the lean side because of the hard life they led and the long walks they took over hilly country to reach their fields.

Natural gas produced from the Sanga-Sanga fields is transported to the Bontang plant.

The development comprises two offshore fields, Cohasset and Panuke,

LASMO's 30 per cent interest in its fields in the Irish Sea represents a significant source of future cash flow and earnings potential for the Group commencing in the mid-1990's.

However, the approximate fields generated by conveniently chosen polarizations may be inserted in the classical extremum principles (minimum potential energy and minimum complementary energy) to bound the overall energy and consequently provide bounds for the overall moduli.
HC5  60 To the traditional tasks of improving the climate in which members practice and provide them with support was added to the development of policies in fields such as housing, planning, energy and the environment and community architecture.

HEK  1 From my country upbringing I can remember fields of blaggets less common now but I do know of it still being grown in Orkney.

HP4  1134 That's because the development of 48 two bedroom flats enjoys prime views over Meggetland playing fields, famous for being the home of Boroughmuir Rugby Club.

HPN  898 This may be an extreme example, but subject fields which lack good bibliographical control of thesis literature, or whose research is conducted transnationally, are likely to exhibit similar problems.

HRF  830 It was while in Spain that Lennon wrote the Beatles classic ‘Strawberry Fields Forever’.

HU0  2787 At night my fields are more alive with poachers than rabbits.

HWF  8601 The use of keys to move between fields is fully described in Section 2 and summarised in Appendix A. You must provide the following details:

HWF  13858 On entry to an option, all fields which have data items maintained by the cache are automatically initialised, using the most recent data held in the cache.

JY3  3221 Last night had been a cruel joke, she decided, watching the windswept trees and fields of placid cows flash past the train window, without seeing them.

JYA  4487 There were fruit trees beyond the grass, and then the fields themselves, and the terraces of tomatoes, vegetables and vines.

K5H  4608 He also warned: ‘Certain UK fields, which are scheduled to commence production during 1993, are expected to be completed at considerably higher costs than originally forecast.

KC0  7470 when they used to put er the muck on the fields they used to put so many loads of eight and so many heaps of the well, when they pulled it out of the room they’d pulls out the crome.
Annexe 9-8 Occurrences de BACKGROUND dans CAEMS

1971

AS = appartenance sociale
CSci = culture scientifique explicite
CSoc = contexte sociétal
E = expérience
FI = formation initiale
Pub = publicité
RG = renseignements généraux
SF = savoir-faire

The person appointed will ideally combine a sound **background** of research with a knowledge of food microbiology. [733-019 (1971) : 40]
The applicant must have a strong **background** in physical and earth sciences, and research interests relating to interdisciplinary geotechnical studies, which involve liaison with civil engineers and geologists. [733-049 (1971) : 43]
Candidates for the present post should preferably have a statistical **background** and an interest in the application of Optimization methods. [737-025 (1971) : 279]
Applicants should have a **background** and experience in Computer Science. [741-005 (1971) : 520]
Experience in information retrieval and some technical **background** desirable. [745-039 (1971) : 60]
Candidates for the present post should preferably have a statistical **background** and an interest in the application of optimization methods. [745-060 (1971) : 62]
For one post a **background** which includes earth sciences [750-001 (1971) : 354] and for the other a **background** which includes chemistry would be preferred. [750-001 (1971) : 354]
A **background** of teaching science or engineering at elementary level is desirable, and preference would be given to candidates who have taught abroad. [750-039 (1971) : 357]
The successful candidate will be expected to register for a higher degree and will be given **background** training in gasdynamics and other related topics. [750-068 (1971) : 360]
Whilst applicants are expected to have a scientific or technical **background**, no formal qualifications are needed. [754-010 (1971) : 599]
Candidates should be over 30 years of age and have a university degree with either technical or non-technical **background** and experience in more than one field of graduate employment. [754-030 (1971) : 600]
Applications giving full academic **background** and the names of two referees should be made to Professor R. M. Barrer, Chemistry Department, Imperial College, London SW7. [758-009 (1971) : 50]
The salary offered will be competitive depending on previous **background** and experience. [758-014 (1971) : 51]
A sound chemical **background** is required for post (a). [758-029 (1971) : 52]
Preference will be given to those with an engineering **background** and some degree of specialisation in the mechanisms of materials, materials production, design and reliability, or materials finishing. [758-039 (1971) : 53]
Formal academic qualifications are of less importance than technical competence, but a **background** in X-ray analysis, materials science or electronics to at least HNC would be advantageous. [763-016 (1971) : 345]
**Background** in either biochemistry or tissue culture would be an advantage. [763-047 (1971) : 347]
Research Assistant required for three years to work on neural control of anterior pituitary function in relation to reproduction. **Background** in physiology / pharmacology. [767-051 (1971) : 546]

Applicants should have one or two "A" levels in scientific subjects or equivalent **background**. [767-061 (1971) : 547]

The successful applicant should have a technical **background** in either engineering and/or chemistry [772-004 (1971) : 52] and since technical appreciation will be more important than a **background** of information work the person will also have the ability to methodically read considerable amounts of technical literature and extract relevant details from it. [772-004 (1971) : 52]

A sound chemical **background** to H.N.C. and experience in analytical techniques are required. [772-038 (1971) : 56]

Candidates must be fully registered as medical practitioners in the United Kingdom and must have a sound clinical **background**. [772-051 (1971) : 58]

Applicants should possess a good degree in a biological science or its equivalent; a **background** in biochemistry and/or physiology would be an advantage but is not essential. [772-052 (1971) : 58]

Applications are invited for a Postdoctoral Research Assistantship from physicists, chemical engineers and chemists with a good **background** in experimental work, to work on a fundamental study of radiative heat transfer in flames and combustors, to be financed by a grant from the Science Research Council. [772-068 (1971) : 60]

It will provide **background** to modern electronics based on switching devices logic and computing circuits. [772-084 (1971) : 63]

FELLOWSHIPS AND ASSISTANTSHIPS for interdisciplinary graduate study in the solid-solid interface and tribology (the science of friction, wear, and lubrication) are available to qualified applicants with **backgrounds** in engineering, surface physics, or surface chemistry. [772-086 (1971) : 63]

Some **background** in one or more of the following subjects will be useful: plastics, composites, test procedures, physics, engineering, chemical engineering, chemistry, material science. [774-025 (1971) : 190]

The research programme of the Division is of fundamental **background** importance in problems of coastal pollution and others in which the movement of coastal waters is a controlling factor. [774-029 (1971) : 190]

**Background** in industrial market, research in formation procurement, new technology survey, etc. helpful. [774-036 (1971) : 190]

Applicants must have practical **background** with experience in light precision mechanical/electro-mechanical engineering, and in competent draughtsmen capable of supervising own designs. [776-002 (1971) : 286]
A background in policy development, and a knowledge of modern forestry practice and woodland ecology, are desirable. [1959-019 (1995) : 49]

If you have the background and ability we seek please send a full CV to: Mrs Sally Cockett, Whitbread Technical Centre, Park Street, Luton LU1 3ET. [1959-028 (1995) : 51]

You should ideally have a background in robotics, artificial intelligence, computer science, psychology or a related discipline. [1959-031 (1995) : 52]

Requirements: Candidates should have a nursing/scientific/medical background. [1959-033 (1995) : 53]

An aptitude to communicate and work with people of different backgrounds and interests. [1959-036 (1995) : 54]

If you believe that you have the motivation and ability to use your scientific background in this way then telephone now to discuss your future with: [1959-037 (1995) : 54]

The ideal candidate will have a sound technical background in the biological sciences/pharmacy fields. [1959-038 (1995) : 54]

Applicants for this post must hold, or about to be awarded, a Ph.D. degree, and should have a strong background in molecular biology and some interest and expertise in immunology or protein chemistry. [1959-042 (1995) : 55]

Applicants should note that these fellowships are primarily intended for the acquisition of skills in mathematical biology rather than to sustain the careers of those with an established research background in their discipline. [1959-043 (1995) : 56]

The Ceramics and Glass Course invites candidates with a Materials Science background to pursue a course of research leading to the award of an MPhil(RCA) or Ph.D.(RCA). [1959-048 (1995) : 57]

Candidates should preferably have a background in insect behaviour and/or pheromone chemistry. [1959-073 (1995) : 63]

A Ph.D. or a similar background in genetics is highly desirable, although applicants with other relevant experience and skills (BMSU management, transgenic and SPF work) will also be considered. [1959-091 (1995) : 66]

Applications are invited from candidates who have a background in physical metallurgy and electron microscopy, some experience of mechanical testing would be advantageous. [1963-054 (1995) : 62]

The individual should either have physiological measurement background or nursing qualifications, and be prepared to work in a flexible manner. [1963-060 (1995) : 64]

We are looking for someone with a strong scientific background and who has the ability to provide input and ideas into research projects. [1963-066 (1995) : 65]

Organisational skills and an interest in library computer systems are essential and a background in materials science, physics, electronics or engineering would be an advantage. [1963-071 (1995) : 66]

The successful applicant will already be working in a management or supervisory position with an industrial background in pharmaceutical research and development. [1963-083 (1995) : 69]

Candidates should have at least a BSc in Nutrition with a wide knowledge of the subject and a good command of written English. [1963-095 (1995) : 73]
Should have a sound background in freshwater biology with some specialisation or experience in freshwater fisheries research or management. [1963-096 (1995) : 73]

This post is particularly suited for a motivated individual with expertise in cell culture techniques (preferably neurons and endothelial cells) and a background in cellular and molecular biology. [1967-022 (1995) : 69]

Preference will be given to candidates with a background in marine ecology, in the fields of education, research or commerce, and to those who have demonstrated their ability to manage people, resources and market services. [1967-030 (1995) : 71]

Candidates should have a strong technical background in parallel/distributed computer systems engineering and an aptitude for technically-oriented administration. [1967-041 (1995) : 74]

With around one third of our revenues coming from franked mail, we are looking for an IT expert with a substantial background in networking and comms to combine the available technologies with our vision of the way organisations will use franked mail in the future. [1967-058 (1995) : 79]

It is probable that you will have an engineering background - ideally supported by an electronics degree - and knowledge of printing and coding systems will be highly valued. [1967-058 (1995) : 79]

We are looking for an enthusiastic and well organised information professional with a scientific background to join our production team for an exciting new project involving the expansion of the pulp and paper section of the Pira Abstracts database. [1967-083 (1995) : 85]

The ideal candidate will be a Chartered Chemist, or at least someone with an HNC or Degree in Chemistry, whose background includes a minimum of four years in the chemical analysis of environmental samples. [1967-089 (1995) : 86]

Applicants should have a background in cell biology and experience of cell culture techniques. [1967-103 (1995) : 89]

You will also receive an appraisal questionnaire which seeks background information on your company, details of its accounts, trading history, previous track record, and qualifications and experience of staff. [1967-105 (1995) : 90]

The successful candidate will be responsible for model development and co-ordination of an experimental programme aimed at obtaining validation data, and will be expected to have a background in chemical engineering together with experience in computer based modelling techniques. [1971-018 (1995) : 61]

And now, against a background of changes to the healthcare system and the increasing sophistication in the treatment of disease, our input needs to be greater than ever. [1971-024 (1995) : 63]

We are looking for: [...] a broad pharmaceutical background; [1971-026 (1995) : 64] Scientific Officer / Higher Scientific Officers required for two separate research projects. One project, funded for three years by the UK Home Office Forensic Science Service, needs SO and HSO with strong technical background in enzyme linked immunosassays or monoclonal antibody production to develop low cost immunodetection methods for forensic application. [1971-027 (1995) : 64]

Applicants should have a background in physics, mathematics or a quantitative environmental science and have or expect to have at least an upper second class degree. [1971-046 (1995) : 70]

Candidates should have a Ph.D., a proven research record and a background in waterfowl ecology. [1971-066 (1995) : 76]

Preference will be given to those with publishing experience and a background in biology; [1971-067 (1995) : 76]

You will be a graduate in the biological sciences with a strong general science background and excellent communication skills. [1971-078 (1995) : 78]

A background in dynamical systems and electronics would be an advantage. [1971-082 (1995) : 79]
This course provides a broad **background** in general pathology and mechanistic toxicology, and is jointly organised by the Departments of Histopathology and Clinical Pharmacology. [1971-099 (1995) : 83]

The course will be suitable for students with a **background** in medicine, dentistry, veterinary science or basic science, but previous experience in histopathology would be an advantage. [1971-099 (1995) : 83]

The successful applicant will be expected to contribute to teaching in a science department appropriate to their **background** as well as to teaching in science education (approximately 50% of their time in each department). [1976-014 (1995) : 66]

To help with this exciting and demanding work, we are seeking a computer science researcher with a strong **background** in distributed systems and user-interface design to join our multi-disciplinary team. [1976-027 (1995) : 69]

The person or persons appointed will have a strong academic **background** and an enthusiasm for working in a manufacturing environment as distinct from specialist engineering or management field. [1976-029 (1995) : 70]

This one year full-time modular course provides a **background** in the principles and technological / medical applications of biosensors and is taught by Departments from both the University and UMIST. [1976-030 (1995) : 70]

The ideal candidate will be qualified to degree level or equivalent with a **background** in an appropriate science or technology, and will be expected to develop a knowledge of instrumentation and the day-to-day management of the Institute’s computer network. [1976-050 (1995) : 74]

The candidate should have a **background** in pest management, conservation biology or population ecology and experience in biological control research and application. [1976-053 (1995) : 75]

The candidate should have: a strong **background** in pest management, experience in research and application of biological control, demonstrated ability for management of scientific programmes, and at least 7 years' experience in relevant applied science in developing countries. [1976-053 (1995) : 75]

A science **background**, experience within the pharmaceutical industry and knowledge of foreign languages would be advantageous. [1976-066 (1995) : 78]

The successful candidate should have: An academic **background** in a life science; English mother-tongue, born in the UK or the US; A fluent pen and the ability to write quality English; Experience in report/manuscript writing and word processing. [1976-072 (1995) : 80]

A **background** in DNA work would be an advantage but is not essential. [1976-092 (1995) : 84]

Postgraduate degree required or suitable work experience and strong mathematical **background**, preferably in the hydrocarbons industry. [1976-093 (1995) : 85]

The successful applicant should possess a sound scientific **background** with a working knowledge of the veterinary field. [1976-096 (1995) : 86]

Electrical oxidation of organic molecules (Professor Seddon, Chemistry): Two **background**s for graduates in chemistry or equivalent, preferably with a **background** in applied electrochemistry or synthetic co-ordination chemistry. [1980-014 (1995) : 58]

Expertise in **in situ** hybridisation, immunocytochemistry and/or binding techniques with a **background** in reproductive physiology would be advantageous. [1980-035 (1995) : 64]

The postholder will have a good **background** in medical image processing and will be familiar with UNIX. [1980-042 (1995) : 66]

EPSRC Ph.D. Studentship in Bio-organic Chemistry. Applications are invited from recent or prospective graduates with a strong **background** in Organic or Biological Chemistry (minimum 2i honours) for a 3 year EPSRC funded Ph.D. studentship tenable from October 1st 1995. [1980-048 (1995) : 68]
You should have a degree, preferably at 2i level, and have an academic **background** in soil science, geography or environmental science. [1980-061 (1995) : 71]

Applicants should have a sound **background** in analytical chemistry together with a Ph.D. and/or proven track record in analytical R & D. [1980-063 (1995) : 71]

Applicants should possess, or expect to obtain, a first or an upper second class honours degree in a relevant biological science, but candidates with a strong **background** in both histology and biochemistry would be particularly suitable. [1980-064 (1995) : 71]

Candidates should have a strong **background** in organic ligand synthesis and transition metal co-ordination chemistry. [1980-066 (1995) : 72]

A **background** in relevant theoretical (eg field-theoretic) techniques and/or numerical (eg Monte Carlo) methods will be an advantage. [1980-075 (1995) : 74]

A life sciences degree or nursing **background** is advantageous. [1980-084 (1995) : 76]

The successful candidate, who should have a **background** in physics and/or electronics and with a knowledge of computing, will be expected to take an active role in the development and supervision of new experiments as well as the day to day running of the laboratories and their associated staff. [1980-106 (1995) : 80]

All positions require individuals with a nursing **background** or a life sciences degree and who are dedicated to the pursuit of excellence and team performance. [1984-020 (1995) : 59]

Requirements for all posts are a life science degree, a nursing or laboratory **background**. [1984-048 (1995) : 67]

Applicants should have a **background** in molecular biology, tissue culture or immunohistochemistry. [1984-063 (1995) : 70]

The person appointed may be either a mathematician or an engineer with a strong mathematical **background** who will be expected to contribute to the wide range of courses in Engineering Mathematics provided for students in the Faculty of Engineering, from foundation year to postgraduate. [1984-079 (1995) : 74]

Applicants should be graduates with a **background** in virology and molecular biology and preferably with experience in PCR technology, sequencing and tissue culture. [1984-092 (1995) : 77]

Applications are invited from candidates with experience in clinical research, although consideration will also be given to new graduates and those with a nursing **background**, as training will be given. [1984-102 (1995) : 78]

It is important that you: have a medical or pharmacological **background** [1984-103 (1995) : 79]

You will possess a strong scientific or engineering **background**, and will hold a good honours degree or equivalent in a physical science field. [1989-010 (1995) : 60]

The successful applicant will have a strong **background** in organic synthesis and a first or 2.1 degree in chemistry. [1989-018 (1995) : 62]

Applicants should preferably have a **background** in catalysis, surface science or a related area of physical chemistry, inorganic chemistry or materials science. [1989-020 (1995) : 63]

Candidates should have a Ph.D., a proven research record and a **background** in conservation science. [1989-031 (1995) : 66]

Applications are invited from graduates with a good **background** in cellular metabolism, biochemistry or environmental toxicology for the above Ph.D. Studentship. [1989-085 (1995) : 79]

You will need: […] a full knowledge of **background** issues as well as government and airport operators' future proposals; [1989-087 (1995) : 80]

Candidates should have a strong **background** in physical or electrochemistry. [1989-088 (1995) : 80]

Candidates should have a strong **background** in at least one of these areas and a desire to broaden their experience. [1989-091 (1995) : 81]

We require a strong **background** in analytical chemistry with special emphasis in chromatographic methods (HPLC) and spectroscopy (MS and NMR). [1989-110 (1995) : 85]

6992
The Programme Director will therefore need good personal skills, in addition to a good academic background in engineering or science or social science. [1989-115 (1995) : 86]
The course will be suitable for students with a background in medicine, dentistry, veterinary science or basic science, but previous experience in histopathology would be an advantage. [1989-117 (1995) : 86]
Candidates should have a degree (or equivalent) in computer science or mathematical / physical sciences with a strong computing background. [1993-002 (1995) : 52]
This position would particularly suit a science graduate (or someone with a research background) with office experience, who is interested in developing a career in publishing. [1993-003 (1995) : 52]
Applicants should have a background (Ph.D.) in analytical chemistry and at least two years' experience in the pharmaceutical industry. [1993-012 (1995) : 54]
Applications are invited from candidates with a strong background in synthetic organic chemistry for the above position funded by the EPSRC to work with Dr J S Clark. [1993-016 (1995) : 56]
Applicants should be adept in computing and should have a background in remote sensing and/or vegetation modelling. [1993-016 (1995) : 56]
The successful candidate will have a technical background in pollution, pollution control and chemistry. [1993-029 (1995) : 59]
The post-holder will interact with and advise researchers from a variety of backgrounds, ranging from genetics and physiology, to molecular biology and chemistry and the appropriate communication skills will be important. [1993-036 (1995) : 62]
Your background in life sciences should include at least two years' clinical trial report writing. [1993-045 (1995) : 65]
Applicants should have a background in synthetic organic chemistry. [1993-050 (1995) : 66]
Successful applicants will have a background in organic, organometallic or physical organic chemistry. [1993-057 (1995) : 68]
To be successful in this high profile client liaison role, you'll have: a sound background in clinical research and CRA management [1993-061 (1995) : 69]
Diversity in research or industrial background would be an advantage. [1993-072 (1995) : 72]
The candidate should have international experience and a background relating to forestry research. [1993-087 (1995) : 76]
To successfully conduct customer feasibility and development programmes, an excellent academic background in Pharmaceutical Science or Chemistry, as well as proven industrial experience, will be required. [1993-092 (1995) : 77]
A background of supervisory experience in a batch manufacturing process (e.g. fine chemicals, special polymers) which operates to GMP is required for one position, together with demonstrable team building and communication skills. [1993-092 (1995) : 77]
The course may, in part, be tailored to suit your particular background and aspirations. [1993-100 (1995) : 78]
Experience in molecular biological techniques such as PCR, subcloning and sequencing is essential, however, a background in parasitology is not necessary. [1998-001 (1995) : 72]
You will probably be a graduate chemist, perhaps with a water or soil background. [1998-010 (1995) : 75]
Applicants should have a background in engineering, with some knowledge of fluid mechanics. [1998-012 (1995) : 76]
You should ideally have an experimental research background, a knowledge of modern physical metallurgy principles and the ability to undertake a wide range of microstructural investigations using state-of-the-art techniques. [1998-031 (1995) : 83]
Applicants with a strong background in physics, chemistry, metallurgy or materials science will be considered. [1998-036 (1995) : 84]
Experience in vacuum instrumentation is essential; plasma and/or surface science background preferable. [1998-055 (1995) : 90]
The first position are for candidates with a Ph.D. degree in organic chemistry and a strong background in organic synthesis. [1998-063 (1995) : 91]
Candidates should have a strong background in either organic synthesis or polymer chemistry. [1998-074 (1995) : 94]
One position is available from 1st February 1996, funded by the Wellcome Trust; a background in either molecular genetics or protein biochemistry is preferred. [1998-078 (1995) : 94]
If you are interested and you want to join a leading-edge organisation which believes that valuing individuals with different backgrounds and experience will lead to improved business performance, then please send a copy of your CV to Nick Cansfield, Personnel Officer, ZENECA Agrochemicals, Yalding, Kent ME18 6HN. [1998-090 (1995) : 99]
We want to talk to people who have a strong background in cell biochemistry. [1998-094 (1995) : 100]
All nominations must be received by 16 February 1996. They may be submitted by either professional colleagues or the individual(s) concerned, and should contain the following information; […] A bibliography including all achievements, awards, published work and professional background. [2002-001 (1995) : 2]
The appointment calls for a graduate with a background in chemistry/pharmacy coupled with practical experience in manufacture and accreditation in quality assurance. [2002-002 (1995) : 54]
The competitive salary will reflect your experience and background, and benefits will include a staff bonus scheme, profit related pay and a generous relocation package. [2002-016 (1995) : 59]
To be successful in this position you may have come from a clinical trials or economics role and will have: […] a background in or working closely with the pharmaceutical industry, particularly in a service/ Econtract environment; [2002-017 (1995) : 59]
You will have a good academic qualification with ideally a strong scientific background in drug development of analgesic drugs. [2002-024 (1995) : 62]
Alternatively candidates with a primarily Analgesic Marketing background who are interested in Project Development are encouraged to apply. [2002-024 (1995) : 62]
The successful candidate is likely to have a 2(i) Honours degree and a background in materials science, composites, physics or biomaterials. [2002-025 (1995) : 62]
Applicants should have a background in molecular microbiology with an interest in bacterial pathogenicity. [2002-037 (1995) : 66]
He/she will have a background in veterinary or biological research, a record of positive contribution to animal welfare, a proven ability to communicate with the scientific and lay communities and, ideally, editorial experience. [2002-038 (1995) : 66]
Lab background GLP, GCP, minimum three years CT management. [2002-039 (1995) : 66]
Our leading-edge organisation believes that valuing individuals with different backgrounds and experience will lead to improved business performance. [2002-042 (1995) : 68]
A graduate, ideally with a relevant postgraduate qualification, your extensive food science engineering and manufacturing experience will accompany your background in research and technology transfer management. [2002-054 (1995) : 71]
The research, in collaboration with the University of Nottingham, will involve equipment development, catalyst characterisation, and kinetic studies, and would be appropriate to a good experimentalist with an organic or physical chemistry background. [2002-062 (1995) : 74]
Candidates will have a Life Sciences Degree or nursing background, together with the ability to communicate with people at all levels. [2002-067 (1995) : 75]
Candidates should have a chemical/biological or a chemical/ physical background and at least an ONC or equivalent. [2002-072 (1995) : 76]
A senior researcher, preferably with a background in the development of astronomical instrumentation, you will lead the development of the prototype NGAT, the 'Liverpool Telescope', and its on-island commissioning phase. [2002-082 (1995) : 78]

An experienced researcher, preferably with a background in instrument and/or software development for astronomy, you will assist in ensuring that the scientific and technological goals of the NGAT project are met. [2002-082 (1995) : 78]

All nominations must be received by 16 February 1996. They may be submitted by either professional colleagues or the individual(s) concerned, and should contain the following information: [...] A bibliography including all achievements, awards, published work and professional background. [2006-001 (1995) : 13]

You are likely to be a graduate in an engineering related subject with a strong general science background, excellent communication skills and commercial awareness. [2006-009 (1995) : 62]

We are interested in creative people from a numerate background who are willing to work as part of a team. [2006-030 (1995) : 69]

Essential criteria are a Ph.D. in mucosal immunology with practical experience in mouse experimentation and a good theoretical background in immunology, particularly an understanding of the common mucosal immune system. [2006-033 (1995) : 70]

Applicants should have a strong mathematical background, experience in numerical methods and FORTRAN/C code development in a UNIX/PC environment. [2006-034 (1995) : 70]

Post-doctoral experience and some background in protein nutritional assays would be an advantage. [2006-038 (1995) : 71]

In addition to having a strong publication record, candidates should have a solid state physics background (including lasers), an understanding of semiconductor devices and be adept with PL-related techniques. [2006-039 (1995) : 72]

Due to the interdisciplinary nature of the project, previous experience in the field is not a prerequisite and applicants with a background in physics, chemistry, engineering and other related fields will be considered. [2006-042 (1995) : 73]

The Department is interdisciplinary in nature; its current members have backgrounds in biology, computing, medicine, physics and psychology. [2006-045 (1995) : 74]

Applications are invited for the above post, the ideal applicant should have a strong background in inorganic chemistry and an interest in its applications in biological, environmental or analytical contexts. [2006-051 (1995) : 75]

You must have a good honours degree in a biological or quantitative science. Successful candidates will be innovative biologists or ecologists with a sound quantitative background, or quantitative scientists with an interest in the life sciences. [2006-068 (1995) : 80]

The Trust operates an Equal Opportunities Policy and encourages applications from disabled people and those with an ethnic minority background. [2006-077 (1995) : 82]

Whatever your professional background, you will need to be organised, accurate and efficient. [2006-079 (1995) : 83]

Our leading-edge organisation believes that valuing individuals with different backgrounds and experience will lead to improved business performance. [2006-080 (1995) : 83]

Improve your job prospects! If you have a science / engineering background at good Honours degree level, this conversion course in Materials Chemistry could be for you. [2006-092 (1995) : 86]

Support will be available from IFE and CAPM staff and especially recruited student assistance, and the NRA will provide additional support and background information. [2006-093 (1995) : 86]
A strong background in Perl programming is essential and a working knowledge of relational database systems would be advantageous. [2481-005 (2005) : 54]

We employ a wide range of technical specialists from diverse backgrounds and Human Factors is of growing importance to our work, which is carried out for the Health and Safety Executive and other clients. [2481-015 (2005) : 58]

Journalistic or editorial experience and a scientific background would be an advantage. [2481-017 (2005) : 58]

Applicants must have flawless English-language skills and will ideally have a background in life sciences including research experience and publications. [2481-022 (2005) : 59]

If you are educated to degree level or above, have a science background, a strong interest in the area of complementary therapies and cancer, several years experience in research, clinical trials or complementary therapies and experience of writing research protocols and preparing grant applications then this could be the job for you. [2481-029 (2005) : 61]

A background in the area of physiological sciences would be desirable. [2481-043 (2005) : 67]

The ideal candidate will possess a degree in Chemistry or related science along with a minimum of 3 years experience in product and process characterisation; research background and/or experience in manufacturing. [2481-047 (2005) : 68]

You will probably be qualified to MSc/PhD level and have a background in virology, immunology or protein chemistry and experience of assay development. [2481-049 (2005) : 68]

You will have a degree and PhD in physics or chemistry, and a strong research background relevant to the measurement of nanoparticles. [2481-062 (2005) : 72]

Applications are invited for the post of non-clinical lecturer from postdoctoral scientists with a background in Endocrinology and Diabetes particularly with skills in second messenger pathways and molecular biology. [2481-067 (2005) : 74]

The appointee will have a PhD in a Physical / Environmental Chemistry area and a strong background in basic and applied research. [2481-071 (2005) : 75]

A strong background in both molecular and cell biology are essential but direct experience of proteoglycan research is not necessary. [2481-074 (2005) : 76]

A background in the design and implementation of PLC and PC control systems is required as well as previous experience of dealing with planned and unplanned maintenance, machine/system test and commissioning. [2485-002 (2005) : 56-57]

If you have a background in providing leadership into quality input and direction for development projects or leading continuous improvement activities using lean manufacturing, 6 Sigma and design experimentation or working with CAPA programmes or have worked in a complaint investigation capacity liaising with testing labs then we want to hear from you. [2485-002 (2005) : 56-57]

A background in custom-built equipment projects together with strong project management skills is essential. [2482-002 (2005) : 56-57]

A previous background in technology transfer and/or knowledge of legal issues would also be of value; however, a sound and robust understanding of scientific and medicinal applications is paramount. [2485-003 (2005) : 58]

This will require a proven scientific background, preferably including experience in a QC laboratory and a degree level education in Chemistry or a related discipline. [2485-028 (2005) : 66]

The fact remains, though: whatever your background, this will challenge you. [2485-029 (2005) : 67]

We are an international medical market research company with offices in London & New York looking for people with a science or medical background/degree who want to move into the world of commerce. [2485-035 (2005) : 70]

Although a biologist would be preferred someone with a chemical background with a sound knowledge of generation of intellectual property would also be considered. [2485-039 (2005) : 71]
A PhD, preferably with up to two years' post-doctoral experience, you will have expertise in mammalian cell culture and a strong background in oncology or immunology. [2485-045 (2005) : 73]

You will ideally be particularly familiar with the chemistry of Marine, PCEO, Driveline or HD Diesel lubricants, and have some background in the formulation and development of these products. [2485-058 (2005) : 77]

Due to continued expansion of our client base a new post has arisen for a Safety Consultant, preferably with a Bioscience background and based in the London area. [2485-061 (2005) : 78]

Applicants should send a CV, including their scientific background, and a covering letter explaining why they are interested in the position and including the names of two referees and current salary details, to: Mrs Sandra Gibney, MRC Technology, 1-3 Burtonhole Lane, Mill Hill, London NW7 1AD. [2485-062 (2005) : 78]

A readiness to travel is important and a background knowledge of Civil Service work and conditions would be an advantage. [2485-072 (2005) : 81]

Training in the use of equipment will be provided, but good background knowledge of the scientific principles is essential. [2485-082 (2005) : 84]

We welcome applications from candidates with an appropriate research background and who meet one of the three eligibility criteria of the scheme: researchers supported by any type of grant funding; holders of current fellowship awards; and returners/other researchers without current research support. [2485-099 (2005) : 89]

Accordingly, applicants with a wide range of backgrounds will be considered, but a proven record of research and publication is expected, and experience of seagoing oceanography, ocean dynamics, or geodesy, will be an advantage. [2489-025 (2005) : 70]

A PhD and proven research background are essential. [2489-028 (2005) : 71]

The successful candidate will have a degree with a scientific background in biomedical sciences and high degree of computer literacy. [2489-035 (2005) : 72]

Candidates should have a background in mathematics, physics, biology, medicine, or related sciences, and demonstrate an interest to pursue research at the interface. [2489-046 (2005) : 76]

Previous research experience (PhD) is essential, (ideally across an interface of biology and engineering/physics), for example with backgrounds in bioengineering, connective tissue engineering, biomaterials or cell culture. [2489-051 (2005) : 77]

You must have a background in Nutrition or Dietetics, preferably with postgraduate experience, along with good communication skills. [2489-052 (2005) : 77]

Applicants must have previous research experience in auditory physiology, biophysics, psychoacoustics or a related area, preferably at postdoctoral level, together with a strong basic science background. [2489-059 (2005) : 78]

This postgraduate programme is aimed at chemists, biochemists, pharmacologists, and biologists seeking to complement a science background with specialist computing skills. [2489-069 (2005) : 81]

Candidates with bio-science backgrounds with a demonstrable ability to develop computing solutions are encouraged to apply. [2493-009 (2005) : 58]

You will ideally have several years of post graduate experience of programming in a bioinformatics environment, together with some molecular or cell biological background. [2493-031 (2005) : 65]

A background in space plasma physics (preferably a PhD), and familiarity with any of the following would be an advantage: UNIX, LINUX, PERL, C, IDL, Matlab. [2493-041 (2005) : 68]

Applicants should have a good honours scientific degree in a subject related to the biological sciences and should ideally have a background in immunology or microbiology. [2493-043 (2005) : 69]

The successful candidates will complement an existing research team of 19 staff, including a number of recently recruited evolutionary ecologists, and will work alongside a total of CSci
some 80 employees from diverse backgrounds engaged in a range of issues in demography. [2493-052 (2005) : 71]

Those with backgrounds in mathematics or quantitative life history modeling are particularly encouraged to apply. [2493-052 (2005) : 71]

Chemistry, materials, physics and chemical engineering backgrounds will be suitable for these positions. [2493-054 (2005) : 71]

A background in genetics, animal health, animal science or data analysis would be desirable. [2493-058 (2005) : 72]

Relevant experience will include molecular modelling, simulation or protein structure prediction, but candidates with backgrounds such as computer science (eg. computer vision), statistics, data mining and/or with extensive software development experience, will also be considered. [2498-015 (2005) : 55]

Developers from computer science and database backgrounds are sought for the development of software tools to support the next generation of proteomics support infrastructure. [2498-015 (2005) : 55]

With a minimum of four years’ experience in the application of LC-MS, supporting research in the pharmaceutical industry, rather than a QC background, your expertise in mass spectrometry will encompass molecular fragmentation. [2498-019 (2005) : 57]

Whether you’ve a strong technical or planning background, are working with an NGO or government agency, or have just left college, you can help us make a difference to the lives of people and the future of wetland wildlife across England and Wales, and give your career a huge boost too. [2498-028 (2005) : 60]

We need two skilled technicians with an environmental science or engineering background to ensure the scientific rigour of this ongoing project and make sure the results of the programme influence our business. [2498-028 (2005) : 60]

With a strong background in veterinary epidemiology and mathematical modelling, you will be responsible for the advancement of the programme and report to the Principal Investigator. [2498-031 (2005) : 60]

A strong quantitative capability and a background in modelling ecological, population, genetic, spatial, bioeconomic or Bayesian processes together with a proven track record of relevant scientific publications and some experience of fisheries management are all essential. [2498-032 (2005) : 61]

Ideally you would also have a biological background in a relevant discipline and will have knowledge of immunoassay development, IVDD regulations and compliance expectations. [2498-043 (2005) : 66]

We wish to appoint a technician to support our research, ideally with a background in Physics to at least A-level, with the following: [2498-054 (2005) : 69]

We are looking for dynamic and highly motivated individuals with a scientific/healthcare background, who can develop and deliver business in the occupational health and health sectors. [2502-010 (2005) : 58]

Whatever your background, you should be able to operate in a commercial environment to develop scientific solutions to real life problems. [2502-010 (2005) : 58]

You will need a sound scientific / technical background including significant knowledge and experience in drug product formulation development, pharmaceutical technology, process development and relevant GMPs/GLPs. [2502-013 (2005) : 59]

Perhaps you have an academic background and are now ready to move to a leading commercial organisation, or it may be that you have gained some relevant experience in industry and are now looking for increased responsibilities and opportunities to develop. [2502-015 (2005) : 60]

You will be a synthetic organic chemist with at least two years' post-doctoral experience in either an academic or industrial environment, with a strong background in medicinal chemistry and drug discovery. [2502-015 (2005) : 60]

With a background of 3-5 years in the industry you will be looking to move into project management. [2502-016 (2005) : 60]
With a background of 5-10 years in the pharmaceutical industry you will have already managed multiple clinical studies to successful completion. [2502-016 (2005) : 60]

To expand our research and development team we are looking for a post-doctoral scientist with a strong background in molecular biology and bacteriology. [2502-023 (2005) : 62]

The post is available from September 2005 for two years and we are seeking someone who is enthusiastic and has a background in computational physics, [2502-060 (2005) : 74]

coming from either a computer science or astronomy/physics background. [2502-060 (2005) : 74]

Starting in September, we are seeking to recruit graduates onto our one-year, full time Secondary Postgraduate Certificate in Education programme who have a good background at degree level, or a closely related area, in either Chemistry, Geography, Mathematics or Physics. [2502-072 (2005) : 78]

Background Novocellus is a UK based diagnostic company engaged in the development of a potentially revolutionary clinical diagnostic test for use in IVF. [2506-018 (2005) : 61]

Only five people have the background for these roles [2506-026 (2005) : 65]

A background in Chemical Biology would be an advantage but not essential. [2506-028 (2005) : 66]

Consideration will also be given to applicants who are not specialist in Neurophysiology but have a broader background in physiological measurements and / or experience in clinical trials. [2506-029 (2005) : 66]

Likely to be from a hospital background, this position would suit someone who is both flexible and adaptable. [2506-039 (2005) : 66]

Do you come from a scientific (especially bioscience, chemistry or medical) background? [2506-040 (2005) : 69]

A background in science or a teaching or training qualification (or part-qualification) would be an advantage. [2506-046 (2005) : 71]

You should also be familiar with two dimensional gel analysis software and mass spectrometry data systems and have relevant experience in bioinformatics, with a strong background in other molecular biology techniques. [2506-051 (2005) : 73]

A background in computer vision, robotics and proven experience and knowledge of systems engineering, SEIFS, EKF and FastSLAM techniques are desirable. [2506-070 (2005) : 77]

Fully funded studentships are available for suitably qualified graduates (2(i) and above) with backgrounds in biological science, process engineering and related disciplines. [2506-077 (2005) : 79]

If you are used to being measured, unafraid of meeting targets or if you need fast, accurate and direct access to professional sales people from all industry backgrounds, Salesarget.co.uk has been designed for you. [2511-001 (2005) : 2]

PhD in organic chemistry, with a background in polymer technology, required for UK arm of US public company now launching innovative, leading-edge antimicrobial products globally. [2511-004 (2005) : 52]

If one of the above profiles fits your background and experience and you are interested in a challenging new role, please send your applications to: http://careers.roche.com/uk [2511-006 (2005) : 53]

 […] visiongain is offering you the chance to use your scientific background in a more commercial role. [2511-009 (2005) : 54]

A background in protein purification would be advantageous but is not essential as training will be provided for the right candidate. [2511-010 (2005) : 54]

BACKGROUND/MAIN DUTIES: The Institute of Naval Medicine which is located in an attractive setting close to Stokes Bay on the Hampshire coast provides operational medical support to the Royal Navy, carries out biomedical research and conducts training in all aspects of naval occupational medicine and allied subjects. [2511-019 (2005) : 58]

With a strong background and experience in working within Intellectual Property, you will be degree qualified with 5 years industry experience or PhD and experience in relevant
industry sector and scientific area. [2511-022 (2005) : 58]

We are now looking for committed scientists from a range of backgrounds, who can challenge constructively and drive forward our research. [2511-038 (2005) : 64]

Computer literacy and a keen eye for detail are essential, editorial experience would be an advantage, but is not essential for candidates who have editorial aptitude and a relevant science background. [2511-039 (2005) : 65]

A recent PhD in a relevant subject is desirable, background in clinical research or bioinformatics would be an advantage. [2511-039 (2005) : 65]

A track record in scientific writing would be a major advantage, as would a background in project or people management and scientific research or diagnostics. [2511-040 (2005) : 65]

You will have a strong background in soil biological processes and an ability to translate this understanding into soil quality assessment procedures. [2511-041 (2005) : 65]

You should have a scientific background and be qualified to degree level or equivalent with experience and/or qualifications in Information Science. [2511-042 (2005) : 66]

Applications are invited for a Postdoctoral Researcher position from individuals with appropriate research background, including experience in molecular and cellular biology. [2511-052 (2005) : 71]

You will have a strong background in experimentation and theory of complex fluids. SF [2511-055 (2005) : 71]

You should have materials science, materials processing, manufacturing technology or related engineering or scientific background and have or expect to obtain a minimum of a First or Upper Second Class (2:1) UK Honours degree or equivalent. [2511-065 (2005) : 74]

Candidates with a chemistry, pharmacy or biochemistry background are encouraged to apply. [2511-074 (2005) : 77]

Fully funded studentships are available for suitably qualified home students with backgrounds in biological science, process engineering and related disciplines. [2511-079 (2005) : 79]

If you are used to being measured, unafraid of meeting targets or if you need fast, accurate and direct access to professional sales people from all industry backgrounds, SalesTarget.co.uk has been designed for you. [2515-001 (2005) : 51]

As a member of a professional team you will: [...] have a background in ports/coastal or construction related sectors [2515-003 (2005) : 54]

As a BSc or PhD qualified Chemist, you will make a positive contribution to the group and have a background of at least three years' practical pharmaceutical analysis. [2515-027 (2005) : 65]

The applicant, preferably from a software and hardware programming background, will work within a multi-disciplinary team to develop an advanced real time imaging system for 3-dimensional manipulation of single molecules using optical traps (optical tweezers). [2515-029 (2005) : 66]

Depending on your own background, you'll either inspect clinical trials activities or Marketing Authorisation Holders to ensure their full compliance with their obligations, travelling frequently and working on your own initiative for extended periods. [2515-034 (2005) : 68]

Background & description NIAB is seeking an outstanding candidate for a new role as Associate Leader for its Plant Pathology Group in Cambridge. [2515-042 (2005) : 70]

Candidates with a strong background in general devices or implants will also be considered. [2515-045 (2005) : 71]

With at least five years in-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2515-045 (2005) : 71]

A background in polymer chemistry and/or analytical techniques, particularly chromatography, would be an advantage. [2515-058 (2005) : 75]
We would welcome applications from individuals with professional experience or with an academic/research background in forensic science. [2515-062 (2005) : 76]
The School will consider applicants with backgrounds in experimental and/or computational physical chemistry for both posts. [2515-068 (2005) : 78]
A background in medical and textiles research is essential. [2515-074 (2005) : 80]

We seek someone with a strong IT background and an interest in biodiversity to take primary responsibility for the IT development of the project. [2515-075 (2005) : 80]
We seek someone with a taxonomic background to research, assemble and curate the digital content for a taxonomic website on the plant family Araceae. [2515-075 (2005) : 80]
The position is funded by Children with Leukaemia for three years and a background in haematology/immunology would be advantageous but is not required. [2515-080 (2005) : 81]

You will have a background in Chemistry, Chemical Engineering, Mechanical Engineering or a related field and an inquiring and rigorous approach to research together with a strong intellect and disciplined work habits. [2515-082 (2005) : 82]
If you are used to being measured, unafraid of meeting targets or if you need fast, accurate and direct access to professional sales people from all industry backgrounds, Saletarget.co.uk has been designed for you. [2519-003 (2005) : 25]
Grade 5 (senior scientist with 5 years research experience) or Grade 6 (principal scientist with five years research and relevant scientific or clinical management experience, preferably from an industry background) [2519-011 (2005) : 58]

A background in developmental biology or neurobiology would be advantageous. [2519-052 (2005) : 70]
A strong background in physical and analytical chemistry with laboratory research and industrial formulation experience is a pre-requisite. [2519-054 (2005) : 71]
Candidates should have a background in life science, chemistry, pharmacology, or medicine, and excellent writing skills. [2519-056 (2005) : 71]
Knowledge of clinical trials and ICH GCP, preferably gained from a background as a Clinical Research Associate or Data Manager is essential along with excellent organisation, communication and IT skills. [2519-060 (2005) : 73]

Candidates with an excellent research background in computational or theoretical studies in any area of chemistry will be considered. [2519-068 (2005) : 76]
As an Equal Opportunity employer, we positively encourage applications from people of all backgrounds. [2519-079 (2005) : 78]
A PhD with several years' postdoctoral experience, preferably in industry you will have good electrophysiology skills and, preferably a background in a cardiovascular, endocrine or CNS area. [2524-002 (2005) : 52]
Candidates should have solid foundation with behavioural and biochemical determination of drug activity; tissue preparation for biochemical; molecular and immunohistochemical studies; HPLC; in-situ hybridization; Western Blotting; PCR; other biochemical determinations as they arise and a background in neurodegeneration (Alzheimer's or Parkinson's disease. [2524-004 (2005) : 52]
Major Pharmaceutical organisation. Physical Sciences degree plus analytical background (HPLC etc.). [2524-006 (2005) : 54]
You will preferably hold a PhD in mass spectrometry and/or proteomic research, but this is not essential if you possess a strong research background. [2524-008 (2005) : 54]
The requirement is for a rounded professional with a strong scientific background at degree/PhD level. [2524-009 (2005) : 54]
We would like to hear from you if you have: a background in managing the performance of both individuals and of projects in a diverse and complex research environment. [2524-011 (2005) : 56]
As the successful candidate you will have a strong scientific background in immunology or molecular biology, ideally to postgraduate degree level. [2524-012 (2005) : 56]
A scientist (not necessarily from a forensic background) to provide a scanning electron microscopy service, analysing gunshot residues using instruments, both at Tamworth and in the University of Oxford. [2524-024 (2005) : 61]

Ideally you will have a background in an analytical laboratory and experience of QA systems. [2524-033 (2005) : 63]

A full-time position is available for an enthusiastic and adaptable team member with a strong chemical background. [2524-042 (2005) : 65]

We are looking for qualified Scientists or Engineers with a sound technical background to join our Ammunition Consultancy team. [2524-045 (2005) : 66-67]

You will have a strong scientific background with either a Ph.D. degree in Computer Science/Systems Engineering or an M.Sc. with similar research experience in a relevant area. [2524-051 (2005) : 70]

You will have a strong scientific background, ideally in Computer Science, and experience with programming in C/C++ and ideally in Linux, and knowledgeable of techniques in image processing. [2524-051 (2005) : 70]

Applications are welcomed from candidates in any area of Medicinal Chemistry/Drug Design/Chemical Biology/Biological Chemistry, or those with chemistry or pharmacy training, an appropriate PhD and a strong background in synthetic organic/medicinal chemistry. [2524-064 (2005) : 75]

Appointments will be made on the Research Associate scale at a level dependent upon your background, and will be tenable for a period of two years in the first instance. [2524-071 (2005) : 77]

The Life Sciences Interface group at Tyndall National Institute, Cork, Ireland, is a multidisciplinary group of researchers, spanning engineering, physical and biological science backgrounds, developing micro- and nano-system tools and devices for applications in biological, medical and environmental science and technologies. [2528-011 (2005) : 63]

All we ask is that you have a strong scientific or technical background, a track record of delivering world class innovation, and the tenacity to drive us further, faster. [2528-016 (2005) : 65]

A background in food/FMCG companies would be beneficial but is not essential. [2528-016 (2005) : 65]

Suitable candidates will have a strong research background, with team working skills and the ability to work to deadlines. [2528-031 (2005) : 72]

We seek individuals with strong academic backgrounds and practical experience who have completed or expect to complete a first degree in microbiology, biochemistry, cell biology, virology or life sciences. [2528-038 (2005) : 74]

A background in drug safety, although useful, is not essential: we are also interested in candidates with in-depth knowledge of drug development gained through other disciplines such as clinical research regulatory, or pharmacology. [2528-045 (2005) : 77]

Candidates with a strong background in general devices or implants will also be considered. [2528-047 (2005) : 79]

With at least five years' in-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2528-047 (2005) : 79]

[Applicants] must have flawless English-language skills and will ideally have a background in life sciences including research experience and publications. [2528-048 (2005) : 79]

You should have a good honours degree in Chemistry or a related science, with a strong technical background. [2528-054 (2005) : 81]

We would welcome applications from individuals with professional experience or with an academic/research background in forensic science. [2528-055 (2005) : 82]

With an excellent research profile and a proven record of winning funding from Research Councils, Government and industry, you will have both a strong background in physical
principles and cutting-edge experience in the application of Remote Sensing to environmental management. [2528-056 (2005) : 83]
You will have a BSc in Biological Sciences or similar subject and a PhD and have experience in developmental biology or a background in basic scientific research. [2528-059 (2005) : 84]
You must be self motivated, have good communication skills and possess a strong background in semiconductor research and/or power electronics. [2528-062 (2005) : 85]

2006

With a PhD or at least three years' post-graduate experience in biochemistry/molecular biology, you will have experience of working in seed science and with scientists from different cultural backgrounds. [2533-001 (2006) : 44]
We require customer focused, technically knowledgeable individuals with a background in laser systems, coatings or printing. [2533-002 (2006) : 44]
Applicants will be either an experienced Registered Clinical Scientist with previous experience in training in cytogenetics, or someone with an educational background with an interest in genetics. [2533-005 (2006) : 46]
The Bioassay Group has a position available for a scientist with a background in immunology and a BSc with a minimum of two years experience working in a laboratory environment. [2533-013 (2006) : 49]
To succeed in any of these roles, it is essential that you have a strong analytical background with a good honours degree in a relevant discipline and experience in a GMP regulated industry. [2533-029 (2006) : 55]
Background ANGLE is a growing international Ventures, Management and Consulting company focusing on the commercialisation of technology and the development of technology-based industry. [2533-031 (2006) : 55]
But, whatever your background, you'll have the ability and desire to work to high standards, generate and analyse high quality data, to solve complex safety problems. [2533-036 (2006) : 57]
You should have experience of protein biochemistry, eukaryotic protein expression, Ion Channel Proteins and a background in Chemistry, Biochemistry or Molecular Biology. [2533-046 (2006) : 59]
The post requires a highly motivated team worker, with a background in biomedical/environmental science and good organisational skills. [2533-052 (2006) : 61]
Salary will be on the RA1B scale: £22,367 to £24,612 inclusive of £2,323 London Allowance per annum, depending on background and experience. [2533-052 (2006) : 61]
Applications are accepted from candidates with backgrounds from within a broad range of disciplines, including the biological, chemical, physical and mathematical sciences. [2533-066 (2006) : 65]
A background and/or higher qualifications in biology or botany would be a distinct advantage, as would knowledge of plant physiology and plant anatomy, and experience of public speaking. [2537-003 (2006) : 58]
Ideally candidates should have a strong background in synthetic organic chemistry, especially in the areas of palladium-catalysed carbon-carbon bond formation and parallel solution phase combinatorial synthesis. [2537-010 (2006) : 60]
Both posts require good IT, communication and inter-personal skills, as well as a relevant technical background/experience. [2537-029 (2006) : 68]
A background in bioinformatics and/or experience of working in a scientific organisation would be highly advantageous. [2537-035 (2006) : 69]
A background in scientific administration would be highly desirable, as would some understanding of the wider issues of biomedical research funding and policy. [2537-036 (2006) : 70]
Ideally you will have oncology writing experience possibly gained from a postdoctoral research background. [2537-052 (2006) : 75]

Candidates should have a strong scientific background and ideally possess industry experience or alternatively experience with the process of evaluating and funding science projects. [2537-054 (2006) : 76]

The position is funded by Children with Leukaemia for three years and a background in haematology/immunology would be advantageous but is not required. [2537-071 (2006) : 83]

You should either have a degree or equivalent in a quantitative discipline, or at least four years' experience in a range of quantitative disciplines (ideally in modelling), along with a strong academic background, preferably with a good understanding of current statistical software, such as SAS, SPSS and GIS. [2541-005 (2006) : 58]

You will also need confident and informed decision making skills, a background in strategic planning, negotiation and change management, as well as strong, inspirational and persuasive leadership abilities. [2541-008 (2006) : 60]

Your technical background could be in Electronics/Physics and you'll preferably have experience, through post-graduate studies or employment, in a biochemical or biomedical research environment. [2541-016 (2006) : 64]

Defra is committed to improving the diversity of the boards of its public bodies and welcomes in particular applications from members of currently under-represented groups including women, people from ethnic backgrounds and disabled people. [2541-018 (2006) : 65]

With a consultative and flexible approach, candidates will be graduates from a technical or scientific discipline, with a strong product/process development background and at least 5 years experience in a senior Technical/Project Management role, ideally in a highly regulated environment, e.g. medical, cosmetic, food, FMCG. [2541-019 (2006) : 66]

Candidates with a strong background in general devices or implants will also be considered. [2541-026 (2006) : 68]

With at least five years in-depth medical device experience, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2541-026 (2006) : 68]

The Home Office Scientific Development Branch has dedicated teams of engineers and scientists from a wide range of backgrounds. [2541-028 (2006) : 69]

He/she will have an established reputation, a technological background related to the work of the division, and will be someone who can communicate effectively with both scientific and non-scientific audiences. [2541-042 (2006) : 76]

Against this background, the Marine Institute seeks to recruit two high calibre fishery scientists to strengthen its stock assessment and advisory team. [2541-048 (2006) : 78]

Interdisciplinary background, experience in managing international scientific and technical programmes. [2541-066 (2006) : 82]

A background in biology, genuine enthusiasm and a willingness to learn are essential. [2541-067 (2006) : 83]

You should have a strong background in laboratory research (ideally with formal qualifications at degree level or equivalent) with good organisational, communication, management, financial and interpersonal skills. [2541-071 (2006) : 84]

The most appropriate background subjects would be Epidemiology and Public Health, and/or Nutrition, but because of the variety of tasks required for this post, graduates from other disciplines would be considered, given willingness to learn. [2541-074 (2006) : 84]

Applicants must have a PhD in physical oceanography previous experience in numerical modelling and a strong mathematical background, as well as a familiarity with the carbon cycle and the oceanic processes controlling natural concentrations of atmospheric carbon dioxide. [2541-077 (2006) : 85]
An enthusiastic individual with a background in Protein Chemistry/ Molecular Biochemistry is needed to help drive a BBSRC funded project focusing on the molecular basis for muscle performance. [2541-084 (2006) : 87]

To be considered, you should have a strong background in practical histology. [2545-010 (2006) : 62]

You should have a strong background in algorithm development, computer graphics and object-oriented software development. [2545-011 (2006) : 62]

Suitable candidates will have a strong development background with excellent communication skills, the ability to work to deadlines, experience of managing multidisciplinary projects and the ability to select and manage contract organisations. [2545-015 (2006) : 64]

A technical background in immunology and pharmacodynamic models would be an advantage. [2545-015 (2006) : 64]

[Applicants] must have flawless English-language skills and will ideally have a background in life sciences including research experience and publications. [2545-038 (2006) : 74]

Background? Ideally you would be a graduate with a strong pharmaceutical background, with 6-12 months business experience. [2545-039 (2006) : 74]

Ideally you would be a graduate with a strong pharmaceutical background, with 6-12 months business experience. [2545-039 (2006) : 74]

Against a background of increasing regulatory developments affecting the chemical industry product stewardship is a topic of growing importance, and a priority issue for the Company. [2545-049 (2006) : 79]

Candidates should have a physics/computer science or electronics background, with signal processing experience. [2545-082 (2006) : 90]

Candidates should have a physics / geophysics or engineering background, with experience of experimental design and data acquisition in a laboratory environment. [2545-082 (2006) : 90]

Up to 6 full and partial studentships for applicants from an environmental science background, whose interest is the environmental aspects of the course. [2545-093 (2006) : 94]

The German chancellor is a talented mathematician and scientist with a background in physics and chemistry, and is married to a university chemistry professor. [2550-007 (2006) : 58-59]

Ideal candidates will have a PhD in theoretical biology, mathematics or economy and should be experienced in modelling (e.g. game theory, agent-based simulation models, dynamic programming), preferably with a sound background in theoretical issues in evolutionary biology. [2550-010 (2006) : 60]

A sound background in modern analytical techniques is required to be applied to method development, quality control analysis, stability studies and troubleshooting. [2550-020 (2006) : 66]

You should have a strong technical background, preferably in Chemistry, have demonstrated the ability to convert technology into commercial revenue and have a track record of managing implementation programmes. [2550-033 (2006) : 73]

Along with a proven background in quantitative analysis of GPCR ligand pharmacology and/or GPCR assay development, you must demonstrate a commitment to success through multidisciplinary teamwork. [2550-040 (2006) : 75]

You should have a biological degree (preferably clinical physiology) or an HNC in MPPM and some experience of sleep and respiratory function tests studies, preferably with a background in lung function, sleep or neurophysiology. [2550-047 (2006) : 78]

You will have experience in the built environment, possibly with an architectural or engineering background and a minimum of two years of professional experience. [2550-051 (2006) : 79]

With excellent French skills - or a willingness to learn - you must have a natural resources or forestry degree or equivalent university qualification, extensive relevant experience, a
strong **background** in natural resources or forestry governance, and knowledge of rural livelihood issues. [2554-017 (2006) : 65]

Since graduating, you will have gained around three years' commercial experience in cell or molecular biology, perhaps from an antibody or immunology **background.** [2554-025 (2006) : 67]

To contribute to this vital field of work, you'll need a strong scientific **background** that includes a degree in Chemistry, Chemical Engineering or similar, along with two to three years' relevant lab or industry-based experience. [2554-035 (2006) : 72]

The successful candidate will have a **background** in immunology or a related discipline with a PhD degree, and at least 4 years of post-doctoral experience in immunology, with a focus on HIV/AIDS. [2554-041 (2006) : 75]

The successful candidate will have a **background** in molecular virology or a related discipline with a PhD degree, and at least 1 year of post-doctoral experience in molecular virology, with a focus on HIV/AIDS. [2554-041 (2006) : 75]

Section Heads - we are also interested to receive cv’s from laboratory section managers, with a good technical **background** and man management skills, for new vacancies arising at various locations. [2554-047 (2006) : 77]

Candidates with a Chemistry **background**, preferably at degree level are encouraged to apply. [2554-063 (2006) : 83]

The applicant should have a PhD in Electronic Engineering, Physics or a related discipline, and a proven **background** in device fabrication and the development of processes for micro-fabrication. [2554-082 (2006) : 88]

Send this form, together with a CV relevant publications, the names of two referees and a covering letter explaining your current interests and relevant **background** for this project to: [2554-082 (2006) : 88]

Students with a physical science / engineering / mathematics **background** will team up with students from biological and medical **backgrounds** to engage in training and exciting research in top notch Systems Biology. [2554-088 (2006) : 90]

Up to 10 fellowships are available for students with a physical science / engineering / mathematics **background** for 4-year PhD studentships in the Manchester Interdisciplinary BioCentre's Centre for Integrative Systems Biology. [2554-088 (2006) : 90]

Basic orientated: for **background** knowledge that forms the solution to expected or recognised problems or possibilities [2558-004 (2006) : 58-59]

With a strong **background** in flood risk modelling, you will lead an interdisciplinary team focussing on the estimation of flood risk and its impacts as climate changes. [2558-005 (2006) : 60-61]

As a mesoscale modeller you will have a strong **background** in modelling the atmosphere, and will wish to develop collaborations at the interfaces of the Earth System. [2558-005 (2006) : 60-61]

You should have a PhD or equivalent research experience in Computer Science, Mathematics, Electrical Engineering, or a cognate discipline, and should ideally have some **background** in agent-based virtual organisations, knowledge representation, logic-based argumentation, web-services and programming. [2558-017 (2006) : 65]

Responsible for the design and development of drug delivery devices, you’ll be an efficient and highly effective project engineer with a strong technical **background** and be capable of working in close collaboration with a wide range of both internal and external partners. [2558-025 (2006) : 68-71]

You will be an experienced polymer chemist ideally with a **background** in polymer synthesis and formulation and will be in charge of the new centre. [2558-028 (2006) : 72]

A **background** in statistics with previous experience in genetics or genomics is desirable. [2558-036 (2006) : 76]

Based in the central engineering function opportunities exist for people with a strong **background** in Materials Science/Metallurgy, Mechanical Engineering, Nuclear Engineering or Physics. [2558-046 (2006) : 79]
This is a permanent position and candidates should have previous experience of relevant background in either ecology or computing. [2558-048 (2006) : 80]

Just as important, you’ll have the presence to influence people from a wide range of scientific backgrounds, and will be a proven leader with experience of working in a matrix environment. [2558-052 (2006) : 81]

As a Medical Writer, you will have a strong life sciences background, ideally to PhD level, outstanding writing, creative and editorial skills, with superb attention to detail and the ability to work within a team environment. [2558-057 (2006) : 83]

As a Regulatory Writer, you will have a strong life sciences background, ideally to PhD level, outstanding writing and editorial skills, with superb attention to detail and the ability to work within a team environment. [2558-057 (2006) : 83]

As a Managing Editor, you will have a strong life sciences background, ideally to PhD level. You will have an excellent academic background, excellent communication and organisational skills and be skilled in information technology. [2558-074 (2006) : 90]

Inspired by the research of many top scientists in Systems Biology, students with biological and medical backgrounds will be teamed up with students from a physical science/engineering/mathematics background to engage in extensive experimental and theoretical training in Systems Biology in the MIB and in partner groups all over the world. [2558-078 (2006) : 91]

With extensive and excellent research and academic teaching experience in an area related to Systems Biology, you will also have sufficient background knowledge of the areas to serve as a basis for teaching diverse aspects thereof. [2558-078 (2006) : 91]

We would welcome applications from individuals with professional experience or with an academic/research background in forensic science [2558-079 (2006) : 92]

Alternatively, applying biologists, veterinarians or pharmacologists should have a comprehensive technical background. [2558-081 (2006) : 92]

See background information at www.warwick.ac.uk and apply to University of Warwick. RG [2558-083 (2006) : 93]

Candidates must be EU (including UK) citizens, and have confidence in numerical computational analysis of data, preferably with a background in chemical engineering, analytical or physical chemistry. [2558-092 (2006) : 96]

Fully funded studentships are available for suitably qualified home students with backgrounds in biological science, process engineering and related disciplines. [2558-098 (2006) : 98]

The course also provides the background knowledge and many of the generic and transferable skills, including planning and dissemination, necessary to carry out a career in research. [2558-099 (2006) : 98]

Requisites are a sound background in practical clinical assessment of vascular function, a thorough understanding of methods for interpretation of clinical data and a thorough understanding of clinical ethics. [2563-010 (2006) : 54]

The successful applicant will have a scientific/medical/research background and strong planning and leadership skills. [2563-016 (2006) : 56]

You should have a good science background and possess at least a BTEC/HTEC in Physiological Measurement or preferably a BSc in Clinical Physiology (or equivalent). [2563-037 (2006) : 62]

With a degree or equivalent and at least 5 years' laboratory background, you'll need experience of analysing dioxins and associated compounds, sound knowledge of laboratory quality standards and clear focus on customer service. [2563-049 (2006) : 66]

With a strong background in inflammation and gastroenterology you will head a group establishing in vivo models of inflammatory bowel disease. [2563-053 (2006) : 68]

A strong background in crystallography and experience in diffraction techniques, crystal structure refinement and computer networking are essential. [2563-073 (2006) : 75]
Candidates must have an appropriate background and a strong record of research. [2567-009 (2006) : 53]

The ideal candidate will have a strong background in the practice and communication of science with proven journalistic expertise and recent experience of: [2567-019 (2006) : 58]

You may also bring a background in personnel issues, especially training and development. [2567-028 (2006) : 62]

Your background: [2567-036 (2006) : 66]

In addition, we are looking to recruit talented candidates with a background in Packaging Development, (R&D) Communications & Training and Process Development. [2567-036 (2006) : 66]

You have a science background, preferably with experience within a food manufacturing or retailing environment. [2567-041 (2006) : 67]

You will have an in-depth knowledge of emulsion polymerisation and preferably will have a background in industrial processing and scale-up of emulsion polymers. [2567-057 (2006) : 74]

Applicants should be graduates with a background in an appropriate discipline and possibly a second degree. [2567-077 (2006) : 81]

You may have a veterinary or related background, but this isn't essential. [2572-023 (2006) : 69]

A background in biology is essential. [2572-033 (2006) : 74]

A strong technical background in pharmaceutical dosage forms means you have experience of a cGMP environment and the regulatory issues involved with CMC. [2572-036 (2006) : 75]

Ideally degree qualified you will have a background in either science or engineering (although we will consider candidates with other extensive experience). [2572-037 (2006) : 76]

In addition to a degree in engineering or a physical science, you'll have an extensive background in radioactive materials, waste production processes and waste management, gained in the nuclear industry. [2572-040 (2006) : 77]

You'll bring to this role a relevant degree preferably combined with a background in radioactive materials. [2572-040 (2006) : 77]

For these challenges, you should combine a degree in materials sciences or chemistry with a background in cement chemistry. [2572-040 (2006) : 77]

[Applicants] must have a strong academic background, including a higher degree in a relevant discipline, and several years' experience working with business requirements for research and knowledge transfer. [2572-043 (2006) : 78]

Doctoral Students with technical backgrounds to address policy issues in energy and environmental systems (e.g., electric power, climate change, green design, carbon management, regional pollution, improving regulation), information technology policy (e.g. computer security, telephone over the internet, wireless, software policy and industry structure); risk analysis and regulation (e.g. security of engineered civil systems); R&D and management of innovation; technology and development. [2572-049 (2006) : 80]

Business Analysts should have a strong scientific background and possess industry experience in the life science sector engaged in the process of evaluating and funding science projects. [2572-055 (2006) : 82]

Candidates would ideally have background in the physical sciences, possess excellent interpersonal skills and show evidence of practical experience in designing or building laser systems. [2572-061 (2006) : 86]

You will have a BSc in a Biological Sciences subject and a PhD and have experience in developmental biology or a background in basic scientific research. [2572-077 (2006) : 93]

The post would suit a science graduate with or without a PhD, or someone with a background in ultrasound or other imaging techniques, who would like to develop a Career in clinical research. [2572-081 (2006) : 94]

You will be a high calibre bioscience graduate, with a relevant research background or equivalent experience, with an interest in sustainability in research as well as a thorough
knowledge and experience of laboratory practices in the Biological Sciences. [2572-083 (2006) : 95]

The post offers opportunities for an enthusiastic individual with a **background** in GI Systems or Science to participate in, and develop, the School's highly regarded GIS programmes, to continue to develop their own research interests, and, in time, to contribute to the management of some of the School's courses. [2572-085 (2006) : 96]

Pharmaceutical companies employ people who specialise in navigating the regulatory system, and they often have scientific **backgrounds**. [2576-003 (2006) : 58-61]

Marketing executives usually have a scientific **background**, often up to PhD level for senior managers, while others come from medicine. [2576-003 (2006) : 58-61]

For SM10061, a strong **background** in recombinant DNA technology is necessary. [2576-012 (2006) : 65]

You will have a degree and probably a PhD in pharmaceutical science or chemistry and a proven **background** in a product development role within the pharmaceutical industry. [2576-018 (2006) : 68]

Candidates with a strong **background** in general devices or implants will also be considered. [2576-020 (2006) : 69]

In-depth medical device experience within an industrial, academic or clinical **background**, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2576-020 (2006) : 69]

A solid **background** in protein modelling and/or molecular dynamics, previous experiences with GRID as well as a programming skills (C, C++, java, pearl, python) will be considered as an added value. [2576-021 (2006) : 69]

You are a strong project manager and communicator, with an appropriate science **background** and proven investigative skills. [2576-028 (2006) : 71]

A **background** in water resources and hydrology would be advantageous however Dr Cymru would consider candidates who have operational experience in other areas of the water industry as long as knowledge and interest can be demonstrated. [2576-036 (2006) : 74]

Successful candidates will have a good BSc or higher degree in a life science or medicinal chemistry, although strong candidates with a **background** in organic chemistry will be considered. [2576-043 (2006) : 76]

A research **background** in synthetic organic chemistry would be an advantage. [2576-045 (2006) : 77]

Fluent English is required (native speaker or equivalent). A scientific, biomedical or food industry **background** is also required. [2576-059 (2006) : 80]

For **background** information about the Nanomedicine Laboratory, Centre for Drug Delivery please see: [http://cddr.pharmacy.ac.uk/main3.html](http://cddr.pharmacy.ac.uk/main3.html) [2576-082 (2006) : 88]

A **background** in space plasma physics, experience of handling large datasets, and familiarity with any of the following would be an advantage Perl, C/C++, LINUX, IDL. [2576-092 (2006) : 91]

Some **background** in marine biology/ecology is desirable, but is not a requirement. [2576-094 (2006) : 91]

The applicant should possess: Solid **background** in biology, statistics and ecology, excellent English skills and good scientific writing skills. [2580-009 (2006) : 57]

For both roles, you're likely to be a science graduate or someone with a strong nursing **background**. [2580-019 (2006) : 61]

You will have experience of working collaboratively across the academic, commercial and public sectors with **backgrounds** in medical technology, regenerative medicine and assistive technology. [2580-029 (2006) : 64]

You will use your strong healthcare/life science market research **background** to find and present information that supports and enables the delivery of CELS' strategy. [2580-029 (2006) : 64]
Applicants are expected to possess a solid scientific background, with a postgraduate qualification in a relevant discipline, or meteorology degree. [2580-059 (2006) : 75] [The successful appointee] will have an exemplary international research reputation, a capacity to provide academic vision and strategic leadership, and the ability to work with staff from diverse academic and cultural backgrounds. [2580-064 (2006) : 77] As QIS research can be multidisciplinary, applicants with appropriate backgrounds in mathematics, computer science, engineering etc., in addition to physics and mathematical physics are welcome. [2580-068 (2006) : 78] Preference will be given to candidates with a background in Remote Sensing, Physical Geography or Environmental Sciences. [2580-073 (2006) : 80] You will have experience of working collaboratively across the academic, commercial and public sectors with backgrounds in medical technology, regenerative medicine and assistive technology. [2580-076 (2006) : 80] You will use your strong healthcare/ life science market research background to find and present information that supports and enables the delivery of CELS’ strategy. [2580-076 (2006) : 80] You will act as the official media contact and will liaise with media to identify opportunities, handle media enquiries, organise press conferences, organise the ERS Annual Congress media centre and all press releases for the event, deal with requests for information about the society, attend press visits and carry out background research. [2689-012 (2009) : 50] Your Profile Scientific or medical background [2689-012 (2009) : 50] You should have a strong academic background with a good life science degree and knowledge of molecular laboratory techniques; proven sales success within the diagnostics or laboratory equipment market and able to provide input into sales and marketing planning processes. [2689-014 (2009) : 51] We are looking to recruit a Development Scientist. Prospective candidates should have a strong background in physics or a related field and educated to at least degree level or higher with 3+ years experience in IVD medical devices or biosensor systems development. [2689-019 (2009) : 52] Candidates may come from a wide range of background and experience although the successful candidates will need to have a proven track record in at least one of the areas outlined above. [2694-001 (2009) : 50] The UK Government and devolved administrations are committed to improving the diversity of their public bodies and welcome applications irrespective of race, ethnic or national origin, sex, marital status, disability, sexual orientation, religion, religious beliefs or similar philosophical belief, age, gender re-assignment or community background. [2694-001 (2009) : 50] Educated to at least degree level in a relevant discipline, you will bring significant ADME experience and sound background knowledge of mammalian toxicology. [2694-003 (2009) : 52] You will demonstrate a strong technical background in a range of in vivo and in vitro DMPK methodologies and a successful track record of representing your department on project teams. [2694-005 (2009) : 53] A scientific background would be an advantage. [2694-027 (2009) : 63] You will have an in-depth knowledge of research methods and specialist background literature, as well as an extensive publication record in high-impact scientific journals or books. [2694-033 (2009) : 64] A background in research management / governance in the NHS and / or academia is highly desirable. [2694-043 (2009) : 70]
You should have a Ph.D. in Microbiology and have a strong **background** in molecular biology and analysis of peptides with a sound understanding of bacteriology. [2694-044 (2009) : 70]

Leading the Scientific Engineering group is a key role that will demand an excellent track record and a strong **background** in management to enable the delivery and development of engineering services and support. [2694-047 (2009) : 71]

You should have a Ph.D. (or equivalent) in Chemical / Biochemical Engineering or related area and have a strong **background** in the practical application of statistics, in an industrial environment. [2694-049 (2009) : 72]

The four year Research Excellence Award Ph.D. studentships are open to applicants with a **background** in the physical sciences who wish to establish a career in cardiovascular research. [2694-052 (2009) : 73]

We wish to encourage students from non-biomedical **backgrounds** and applicants from any appropriate discipline (including physics, engineering, mathematics, chemistry computing and informatics) are invited to apply. [2694-052 (2009) : 73]

The MA in Philosophy, Politics and Economics of Health is the first of its kind in the world and is aimed at individuals wanting to specialise in this area with a **background** in medicine, social science, health economics or philosophy. [2694-056 (2009) : 74]

The minimum requirement for entry is an Upper Second Class Honours Degree, or equivalent, in engineering, physical sciences or mathematics. Applicants from a medical or life sciences **background** are also encouraged to apply provided they have proven mathematics ability. [2698-005 (2009) : 50]

The successful candidate will have several years' research project management experience in the industrial or academic sector, preferably with a **background** in oil and gas technology. [2698-011 (2009) : 53]

A **background** in one or more of the following would be especially beneficial: • The physics, chemistry and engineering of fluid flow in porous media; • Fluid thermophysical properties, especially in extreme conditions; • Burial diagenesis, structure and characterisation of fractured carbonate oil and gas reservoirs; • Mineral-fluid interactions and reactive flow, especially in carbonate-based systems; • Process modelling especially in the context of carbon storage and/or oil and gas recovery; • Enhanced oil recovery processes. [2698-011 (2009) : 53]

With a **background** in genomics/genome biology, you will have solid experience in molecular biology and bioinformatics in relation to high-throughput DNA sequencing, demonstrated through a strong publication record and proven ability to secure research funding. [2698-019 (2009) : 57]

Your scientific **background** will enable you to demonstrate all of the company's products and provide strong technical support to Miltenyi customers. [2698-020 (2009) : 58]

A proven manufacturing/quality control **background** will be essential, ideally within the pharmaceutical industry. [2698-024 (2009) : 59]

A **background** in the pharmaceutical industry and auditing experience is important, as is knowledge of quality systems and relevant legislation and regulations. [2698-024 (2009) : 59]

A **background** in managing toxicology studies and an appreciation of the purpose behind conducting mammalian toxicology studies are desirable. [2698-025 (2009) : 59]

A meteorological/technical/scientific **background** is desirable. [2698-030 (2009) : 61]

You will demonstrate a strong technical **background** in a range of *in vivo* and *in vitro* DMPK methodologies and a successful track record of representing your department on project teams. [2698-039 (2009) : 64]

For our more senior editorial roles you will have a **background** in medical/scientific writing within the pharmaceutical industry or an agency, a clear understanding of our business, plus the ability to mentor and motivate junior members of the team and coordinate the delivery of editorial projects. [2698-042 (2009) : 65]
The successful candidate for this position is likely to have a Ph.D. degree, an outstanding record in research with postdoctoral experience, a strong background in the physical metallurgy of steels, and demonstrated leadership qualities. [2698-044 (2009) : 67]

You will be able to demonstrate a clear understanding of both the supply and demand side issues affecting the environment and energy sectors, together with an educational background in a relevant discipline. [2698-045 (2009) : 67]

Applications are welcome from talented scientists that have a background in cell- and molecular biology. [2698-057 (2009) : 72]

IT skills at an advanced level using MS Office applications with excellent attention to detail are essential, as are social skills in managing and working in teams of people from a wide variety of countries, backgrounds and disciplines. [2698-060 (2009) : 72]

The University of Aarhus encourages all, irrespective of personal background, to apply. [2698-061 (2009) : 73]

With that kind of background, you'll be able to understand and assess complex groundwater environments. [2702-027 (2009) : 60]

The position requires an experienced manager with a strong background in commercial drug discovery and development. [2702-036 (2009) : 64]

As an Equal Opportunity employer, we positively encourage applications from people of all backgrounds. [2702-056 (2009) : 70]

A background in computing or ecology is desirable. [2706-013 (2009) : 51]

You should have a relevant degree and a background in bacterial molecular biology with particular experience in molecular epidemiology. [2706-015 (2009) : 53]

The Person; Ph.D. degree in Agronomy with a strong background on cropping systems management. [2706-017 (2009) : 53]

We really would like to hear from you if you have a background in a scientific, medical or clinical field and you feel you have the creativity and adaptability to turn this into good regulation. [2706-019 (2009) : 54]

The Bioinformatics Group within the Centre for Mathematical and Computational Biology is seeking a Bioinformatics Scientist with a background in software engineering. [2706-022 (2009) : 55]

A Ph.D. or healthcare background is preferable. [2706-023 (2009) : 56]

NHS Innovations London is committed to appointing on merit, seeking candidates from a diverse range of backgrounds and taking full account of equal opportunities. [2706-023 (2009) : 56]

The UK Government and devolved administrations are committed to improving the diversity of their public bodies and welcome applications irrespective of race, ethnic or national origin, sex, marital status, disability, sexual orientation, religion, religious beliefs or similar philosophical belief, age, gender re-assignment or community background. [2711-010 (2009) : 53]

The ideal candidate should have a background in environmental sciences, ecology or biology and relevant experience in mathematical, systems or meta-modelling. [2711-020 (2009) : 57]

We are seeking candidates with a background in the biological, veterinary or medical sciences to investigate molecular interactions between disease agents and the host. [2711-051 (2009) : 67]

With a strong academic background and passion for our planet, you'll be dedicated to ensuring we do. [2715-012 (2009) : 55]

A wealth of biotech knowledge will be essential - you'll bring a substantial and extensive background in the field of biological medicines, gained within industry, academia or a government agency, an international reputation of your own, proven management skills and clear ability to provide vision and leadership to the biologicals team. [2715-013 (2009) : 56]

Candidates may come from a wide range of background and experience although the successful candidates will need to have a proven track record in at least one of the areas outlined above. [2715-016 (2009) : 57]
The UK Government and devolved administrations are committed to improving the diversity of their public bodies and welcome applications irrespective of race, ethnic or national origin, sex, marital status, disability, sexual orientation, religion, religious beliefs or similar philosophical belief, age, gender real-assignment or community background.

We are seeking candidates who have a strong background in the area of environmental sustainability, and with proven leadership capability. Ideally, you have post-doctoral, or equivalent, experience in a field related to ADME or DMPK with a background in pharmacy, pharmacology, biological or medicinal chemistry.

Exceptional candidates with similar backgrounds to those described but with less experience will also be considered.

Experience working as a Project manager in Pharmaceutical Development and a relevant scientific background are essential. The ideal candidate will have a Ph.D. or equivalent skills and a background in natural products research.

Training and background must include hands-on microbiological experience, preferably in an industrial setting. You must have a Ph.D., a keen interest in clinically applied research and a strong background in molecular biology/microbial genetics with particular experience in molecular epidemiology and diagnostics.

Degree educated in a science-based discipline, you'll have a proven management background and an extensive knowledge of developing forensic science processes, tools and techniques. A background in biomedical sciences within a large, complex organisation is highly desirable.

Your background and proven ability of working on the scientific basis for radioactive waste management and your experience of geological disposal programmes will enable you to provide authoritative information on previous and present geological disposal programmes in the UK and overseas to regulators and Government officials with whom you will be an important interface.

Candidates should have a minimum of a first degree or equivalent experience preferably with an academic background appropriate for working in a scientific organisation.

A background in physical/chemical sciences is essential, along with significant experience in scientific research project management with application of polymer chemistry within a FMCG environment. Ideally from a life sciences background, you must have proven experience of managing complex IS projects and international stakeholder relationships within R&D.

Your strong background in life sciences R&D will have given you an excellent understanding of R&D data, relevant data management techniques and the project lifecycle.

A strategic thinker able to communicate across cultures, your IT/IM background will have a strong focus on systems design and development. We're looking for a background in training and system deployment / exploitation and you should be fully conversant with processes that support global R&D activities.

Coming from a scientific background, you will have a good science/environmental degree and a sound understanding of SEPA and what we do. It's an exceptional opportunity to build upon your academic or industry background, influence drug development strategies and raising the profile of pharmacokinetics across the European regulatory network.
Whilst you may come from an academic, public or private sector **background**, it will be essential that you can demonstrate scientific and technical knowledge in areas that can be applied to counter-terrorism science and technology efforts. [2724-020 (2009) : 59]

In particular, you will have a **background** in the physical or engineering sciences. [2724-020 (2009) : 59]

The candidate is expected to have a strong research **background** which complements well with the parasitology interests of the Institute. [2724-030 (2009) : 63]

Applicants are welcomed from all aspects of chemistry or from a mass spectrometry engineering **background**, although candidates with advanced expertise in Mass Spectrometry are particularly encouraged. [2724-044 (2009) : 68]

That said, a life sciences or biomedical **background** is often required, and these days postgraduate qualifications are increasingly important, though not necessarily in a purely scientific discipline. [2724-020 (2009) : 59]

A major component of the R&D Programme is the deployment of a team of 'R&D Specialists' with business development **backgrounds** who have detailed knowledge and understanding of leading-edge technologies and of the UK's R&D capabilities. [2724-005 (2009) : 54]

Candidates should have a broad **background** in R&D related to the design, introduction and commercial application of e-based products and services (e-commerce, e-health, e-government, etc.) ideally across the user/provider/participant interfaces and on an international basis. [2728-005 (2009) : 54]

Expertise **background** in molecular biology, cell biology or immunology would be advantageous. [2728-007 (2009) : 56]

You will ideally be educated with a science degree or equivalent, and will have a relevant industry related **background**, preferably in the formulation of drug products. [2728-016 (2009) : 59]

We also explicitly encourage applications from candidates with an interdisciplinary **background**. [2728-026 (2009) : 64]

With a degree in the biological sciences, you will either have held a similar position in the research/academic sector or you will be looking to use your scientific **background** in a research management role. [2733-024 (2009) : 69]

Applicants should have a strong scientific **background** and preferably a good working knowledge of the WTSI scientific portfolio. [2733-024 (2009) : 69]

For our editorial department we are looking for candidates with an academic **background** and a broad education in the area of chemistry. [2733-029 (2009) : 71]

We are looking for a highly motivated graduate research assistant to join our multidisciplinary research group studying the role of myocardial high-energy phosphate metabolism in the development of cardiac hypertrophy and heart failure (see Neubauer N Engl J Med 2007;356:1140). [2733-040 (2009) : 74]

However, applicants are invited from a wide range of **backgrounds**, including machine learning and areas in which complex models are used, subject to having strong statistical skills. [2733-041 (2009) : 75]

Engineering and Public Policy at Carnegie Mellon seeks doctoral students with technical **backgrounds** to address policy issues such as: electric power, energy and environment, nanotechnology, climate change; cybersecurity, privacy, IT policy; risk analysis and regulation; management of innovation and R&D. [2733-043 (2009) : 75]

We have a hugely successful track record in training staff from non-teaching **backgrounds** including academic research, industry, the media and the city. [2733-048 (2009) : 76]

Therefore a zoology/veterinary **background** and an understanding of epidemiology, spatial modelling and/or risk assessment are required, together with a broad interest in environmental change. [2733-049 (2009) : 77]

This position calls for a strong scientific **background** in the Physical Sciences to at least first degree level or equivalent. [2737-020 (2009) : 63]

You will contribute to the creative effort of the group, to understand subject **background** in the specific subject area and the wider field. [2737-022 (2009) : 64]
1971

1. Formal academic qualifications are of less importance than technical competence, but a background in X-ray analysis, materials science or electronics to at least HNC would be advantageous. [763-016 (1971) : 345]

2. FELLOWSHIPS AND ASSISTANTSHIPS for interdisciplinary graduate study in the solid-solid-interface and tribology (the science of friction, wear, and lubrication) are available to qualified applicants with backgrounds in engineering, surface physics, or surface chemistry. [772-086 (1971) : 63]

3. Some background in one or more of the following subjects will be useful: plastics, composites, test procedures, physics, engineering, chemical engineering, chemistry, material science. [774-025 (1971) : 190]

4. Background in industrial market, research in formation procurement, new technology survey, etc. helpful. [774-036 (1971) : 190]

1995

1. You should ideally have a background in robotics, artificial intelligence, computer science, psychology or a related discipline. [1959-031 (1995) : 52]

2. Requirements: Candidates should have a nursing/scientific/medical background. [1959-033 (1995) : 53]

3. A working knowledge of physical geochemistry / phase equilibria is essential and a background in Feldspar mineralogy, X-ray diffraction, Scanning electron microscopy, Experimental petrology, Granitic systems or Crystal growth would be an advantage. [1959-080 (1995) : 64]

4. Organisational skills and an interest in library computer systems are essential and a background in materials science, physics, electronics or engineering would be an advantage. [1963-071 (1995) : 66]

5. Applicants should have a background in physics, mathematics or a quantitative environmental science and have or expect to have at least an upper second class degree. [1971-046 (1995) : 70]

6. The course will be suitable for students with a background in medicine, dentistry, veterinary science or basic science, but previous experience in histopathology would be an advantage. [1971-099 (1995) : 83]

7. The candidate should have a background in pest management, conservation biology or population ecology and experience in biological control research and application. [1976-053 (1995) : 75]

8. The candidate should have: a strong background in pest management, experience in research and application of biological control, demonstrated ability for management of scientific programmes, and at least 7 years' experience in relevant applied science in developing countries. [1976-053 (1995) : 75]

9. You should have a degree, preferably at 2i level, and have an academic background in soil science, geography or environmental science. [1980-061 (1995) : 71]
10. Requirements for all posts are a life science degree, a nursing or laboratory **background**. [1984-048 (1995) : 67]

11. Applicants should have a **background** in molecular biology, tissue culture or immunohistochemistry. [1984-063 (1995) : 70]

12. Applicants should preferably have a **background** in catalysis, surface science or a related area of physical chemistry, inorganic chemistry or materials science. [1989-020 (1995) : 63]

13. Applications are invited from graduates with a good **background** in cellular metabolism, biochemistry or environmental toxicology for the above Ph.D. Studentship. [1989-085 (1995) : 79]

14. The course will be suitable for students with a **background** in medicine, dentistry, veterinary science or basic science, but previous experience in histopathology would be an advantage. [1989-117 (1995) : 86]

15. The successful candidate will have a technical **background** in pollution, pollution control and chemistry. [1993-029 (1995) : 59]

16. Successful applicants will have a **background** in organic, organometallic or physical organic chemistry. [1993-057 (1995) : 68]

17. Applicants with a strong **background** in physics, chemistry, metallurgy or materials science will be considered. [1998-036 (1995) : 84]

18. The successful candidate is likely to have a 2(i) Honours degree and a **background** in materials science, composites, physics or biomaterials. [2002-025 (1995) : 62]

19. Due to the interdisciplinary nature of the project, previous experience in the field is not a prerequisite and applicants with a **background** in physics, chemistry, engineering and other related fields will be considered. [2006-042 (1995) : 73]

20. The Department is interdisciplinary in nature; its current members have **backgrounds** in biology, computing, medicine, physics and psychology. [2006-045 (1995) : 74]

**2005**

1. You will probably be qualified to MSc/PhD level and have a **background** in virology, immunology or protein chemistry and experience of assay development. [2481-049 (2005) : 68]

2. Candidates should have a **background** in mathematics, physics, biology, medicine, or related sciences, and demonstrate an interest to pursue research at the interface. [2489-046 (2005) : 76]

3. A **background** in space plasma physics (preferably a PhD), and familiarity with any of the following would be an advantage: UNIX, LINUX, PERL, C, IDL, Matlab. [2493-041 (2005) : 68]

4. Previous research experience (PhD) is essential, (ideally across an interface of biology and engineering/physics), for example with **backgrounds** in bioengineering, connective tissue engineering, biomaterials or cell culture. [2489-051 (2005) : 77]

5. A **background** in genetics, animal health, animal science or data analysis would be desirable. [2493-058 (2005) : 72]

6. Relevant experience will include molecular modelling, simulation or protein structure prediction, but candidates with **backgrounds** such as computer science (eg. computer vision), statistics, data mining
and/or with extensive software development experience, will also be considered. [2498-015 (2005) : 55]

7. A strong quantitative capability and a **background** in modelling ecological, population, genetic, spatial, bioeconomic or Bayesian processes together with a proven track record of relevant scientific publications and some experience of fisheries management are all essential. [2498-032 (2005) : 61]

8. Fully funded studentships are available for suitably qualified graduates (2(i) and above) with **backgrounds** in biological science, process engineering and related disciplines. [2506-077 (2005) : 79]

9. You should have materials science, materials processing, manufacturing technology or related engineering or scientific **background** and have or expect to obtain a minimum of a First or Upper Second Class (2:1) UK Honours degree or equivalent. [2511-065 (2005) : 74]

10. Candidates with a chemistry, pharmacy or biochemistry **background** are encouraged to apply. [2511-074 (2005) : 77]

11. Fully funded studentships are available for suitably qualified home students with **backgrounds** in biological science, process engineering and related disciplines. [2511-079 (2005) : 79]

12. You will have a **background** in Chemistry, Chemical Engineering, Mechanical Engineering or a related field and an enquiring and rigorous approach to research together with a strong intellect and disciplined work habits. [2515-082 (2005) : 82]

13. Candidates should have a **background** in a life science, chemistry, pharmacology, or medicine, and excellent writing skills. [2519-056 (2005) : 71]

14. A PhD with several years' postdoctoral experience, preferably in industry you will have good electrophysiology skills and, preferably a **background** in a cardiovascular, endocrine or CNS area. [2524-002 (2005) : 52]

15. The Life Sciences Interface group at Tyndall National Institute, Cork, Ireland, is a multidisciplinary group of researchers, spanning engineering, physical and biological science **backgrounds**, developing micro- and nano-system tools and devices for applications in biological, medical and environmental science and technologies. [2528-011 (2005) : 63]

16. With at least five years' in-depth medical device experience within an industrial, academic or clinical **background**, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2528-047 (2005) : 79]

**2006**

1. We require customer focused, technically knowledgeable individuals with a **background** in laser systems, coatings or printing. [2533-002 (2006) : 44]

2. You should have experience of protein biochemistry, eukaryotic protein expression, Ion Channel Proteins and a **background** in Chemistry, Biochemistry or Molecular Biology. [2533-046 (2006) : 59]

3. Applications are accepted from candidates with **backgrounds** from within a broad range of disciplines, including the biological, chemical, physical and mathematical sciences. [2533-066 (2006) : 65]
4. You will also need confident and informed decision making skills, a **background** in strategic planning, negotiation and change management, as well as strong, inspirational and persuasive leadership abilities. [2541-008 (2006) : 60]

5. The most appropriate **background** subjects would be Epidemiology and Public Health, and / or Nutrition, but because of the variety of tasks required for this post, graduates from other disciplines would be considered, given willingness to learn. [2541-074 (2006) : 84]

6. You should have a strong **background** in algorithm development, computer graphics and object-oriented software development. [2545-011 (2006) : 62]

7. Candidates should have a physics/computer science or electronics **background**, with signal processing experience. [2545-082 (2006) : 90]

8. Candidates should have a physics / geophysics or engineering **background**, with experience of experimental design and data acquisition in a laboratory environment. [2545-082 (2006) : 90]

9. You should have a biological degree (preferably clinical physiology) or an HNC in MPPM and some experience of sleep and respiratory function tests studies, preferably with a **background** in lung function, sleep or neurophysiology. [2550-047 (2006) : 78]

10. Up to 10 fellowships are available for students with a physical science / engineering / mathematics **background** for 4-year PhD studentships in the Manchester Interdisciplinary BioCentre's Centre for Integrative Systems Biology. [2554-088 (2006) : 90]

11. You should have a PhD or equivalent research experience in Computer Science, Mathematics, Electrical Engineering, or a cognate discipline, and should ideally have some **background** in agent-based virtual organisations, knowledge representation, logic-based argumentation, web-services and programming. [2558-017 (2006) : 65]

12. Based in the central engineering function opportunities exist for people with a strong **background** in Materials Science/Metallurgy, Mechanical Engineering, Nuclear Engineering or Physics. [2558-046 (2006) : 79]

13. from a physical science/engineering/mathematics **background** to engage in extensive experimental and theoretical training in Systems Biology in the MIB and in partner groups all over the world. [2558-078 (2006) : 91]

14. Candidates must be EU (including UK) citizens, and have confidence in numerical computational analysis of data, preferably with a **background** in chemical engineering, analytical or physical chemistry. [2558-092 (2006) : 96]

15. Fully funded studentships are available for suitably qualified home students with **backgrounds** in biological science, process engineering and related disciplines. [2558-098 (2006) : 98]

16. The successful applicant will have a scientific/medical/research **background** and strong planning and leadership skills. [2563-016 (2006) : 56]

17. You may also bring a **background** in personnel issues, especially training and development. [2567-028 (2006) : 62]

18. In addition, we are looking to recruit talented candidates with a **background** in Packaging Development, (R&D) Communications & Training and Process Development. [2567-036 (2006) : 66]
19. In addition to a degree in engineering or a physical science, you'll have an extensive **background** in radioactive materials, waste production processes and waste management, gained in the nuclear industry. [2572-040 (2006) : 77]

20. In-depth medical device experience within an industrial, academic or clinical **background**, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. [2576-020 (2006) : 69]

22. You will have experience of working collaboratively across the academic, commercial and public sectors with **backgrounds** in medical technology, regenerative medicine and assistive technology. [2580-029 (2006) : 64]

23. As QIS research can be multidisciplinary, applicants with appropriate **backgrounds** in mathematics, computer science, engineering etc., in addition to physics and mathematical physics are welcome. [2580-068 (2006) : 78]

24. Preference will be given to candidates with a **background** in Remote Sensing, Physical Geography or Environmental Sciences. [2580-073 (2006) : 80]

25. You will have experience of working collaboratively across the academic, commercial and public sectors with **backgrounds** in medical technology, regenerative medicine and assistive technology. [2580-076 (2006) : 80]

**2009**

1. The MA in Philosophy, Politics and Economics of Health is the first of its kind in the world and is aimed at individuals wanting to specialise in this area with a **background** in medicine, social science, health economics or philosophy. [2694-056 (2009) : 74]

2. A **background** in one or more of the following would be especially beneficial: [2698-011 (2009) : 53]

3. We really would like to hear from you if you have a **background** in a scientific, medical or clinical field and you feel you have the creativity and adaptability to turn this into good regulation. [2706-019 (2009) : 54]

4. The ideal candidate should have a **background** in environmental sciences, ecology or biology and relevant experience in mathematical, systems or meta-modelling. [2711-020 (2009) : 57]

5. We are seeking candidates with a **background** in the biological, veterinary or medical sciences to investigate molecular interactions between disease agents and the host. [2711-051 (2009) : 67]

6. Ideally, you have post-doctoral, or equivalent, experience in a field related to ADME or DMPK with a **background** in pharmacy, pharmacology, biological or medicinal chemistry. [2719-007 (2009) : 49]

7. Expertise / **background** in molecular biology, cell biology or immunology would be advantageous. [2728-007 (2009) : 56]
Engineering and Public Policy at Carnegie Mellon seeks doctoral students with technical background to address policy issues such as: electric power, energy and environment, nanotechnology, climate change; cybersecurity, privacy, IT policy; risk analysis and regulation; management of innovation and R&D. [2733-043 (2009) : 75]

We have a hugely successful track record in training staff from non-teaching backgrounds including academic research, industry, the media and the city. [2733-048 (2009) : 76]

Annexe 9-8-4 Occurrences de BACKGROUND dans BNC

Here is a random selection of 50 solutions from the 6064 found.

Les occurrences en rouge renvoient au discours des ressources humaines

**A06** 312 And don't let your search for material lead you to choose the obscure for obscurity's sake, so you feel you will be sure to stun the panel with a piece that has no good professional **background**.

**A0P** 969 There are major differences of personality and style, as well as **background**, but these complement each other rather than antagonise.

**A5B** 155 Plus ecological **background** with emphasis on its deep water fauna.

**A88** 164 The historian Golo Mann wrote 20 years ago that Germany's post-war recovery took place against 'a historical **background** of which Germans had reason to be profoundly ashamed.

**ACW** 1239 Frankie had hovered in the **background**, eager to cuddle the puppy but not daring to approach the bigger dogs.

**ADX** 1713 The recognition of things creates a figure and ground relationship (see ‘Foveal and peripheral vision’; while focusing on the object, the **background** is out of focus).

**AL9** 19 Since we also hope that this account may be of interest to those who do not know the area, it includes, especially at the beginning, some historical and other **background** information about Lewis and Harris, in the wider contexts of the Western Isles as a whole and of the Highlands and Islands of Scotland.

**ALN** 725 Approaches such as these that assess a worker's competence against nationally-established standards and that issue a qualification regardless of a person's formal academic **background** need to be developed for larger groups of paraprofessionals.

**APH** 107 Figure 3.4 shows the results of an experiment by Channell and Hall (1983) in which rats received appetitive conditioning with a light CS — some subjects in a context to which they had been pre-exposed, others in a novel context, differing in its smell and the level of a **background** noise from that with which they were familiar.

**ASK** 759 But it is only against such a **background**, I submit, that the issue of the technological imperative can properly be understood.

**AT8** 107 The nuclear programme was embarked upon against a **background** of rising oil and energy prices.

**B0S** 2 Historical **Background**.

**B1N** 508 By the end of the evening, Alistair and Hilary's enthusiasm and **background** knowledge had almost convinced me.

**B29** 814 In the indoor galleries a range of exhibitions and audio visual presentations provide **background** information about the lives and experiences of the thousands of other Ulster-American emigrants and the part they played in the birth and growth of the United States.

**B3C** 1864 In each of their second and third years, students of the single-subject English course takes a series of four core units which have as a focus the relationship between literature and its **background**.
Socially, though, he and Karen, who taught part-time at a girls' school in Headington, were both from a lower-middle-class, comp/tech background, and it may not have been only the fearsome price of property in the North Oxford heartlands which had put them off moving there.

In turn I told her a little about my own background, as though we were out on a first date.

Though our parents had a parochial background, we, their offspring, were born free.

You should indicate the aspects of your background which the interviewer is looking for without rambling on about things which are irrelevant.

Occasionally as Mary describes, our panels' tempers are severely tested by fishkeepers who can't or won't do the basic background reading for themselves.

Is your family background musical?

When Buck and Ratso go to another greasy spoon, a crazy is ranting in the background.

Because you are so aware, you may even hear background noises outside, and you will certainly hear the therapist's voice.

Some workshops use white plastic off the roll so that it forms a plain background on which the constructor can sketch with a marker-pen.

The chiming keyboards of Mick Talbot stay enigmatically in the background, drowned in the authentic atmosphere of smoke and mild intoxication.

‘They have all this music in the background and people like Bush giving all these fierce power speeches.

That is a sober background to the arguments about one member, one vote, the nature of the trade union connection, a drive for mass Labour Party membership, and relationships with other opposition parties.

Of course we're not discriminating against you,’ Derek chortled in the background.

Given Peter Wood's background, it is scarcely surprising that Direct Line's computer systems impress.

Quinn's tough background dictated that he had to know how to take care of himself, especially when at a young age he moved from his native Mexico into an area of Los Angeles where everyone was either Irish, Mexican or black.

Before, however, I examine in more detail my own personal views on this subject I would like to set them against the background of alternative approaches.

Against a background of bitter hostility from the right-wing press, alarmed Conservative politicians attacked the Ballot, complaining that the questions were politically biased and that the whole enterprise was becoming a front for anti-Government activity.

BACKGROUND

an invaluable source of information and background reading

In the background a spectacular vitrine of the 19th Century attributed to the F Linke.
This paper outlines the background to the introduction of an electronic (non-print) publishing strand to an undergraduate degree in publishing.

The colours used to display the grid, cursor, text and screen background can all be independently set so that they do not interfere with the design itself.

‘They don't really want somebody with my background, even though they say they do.'

Writing and reporting skills are now much more sophisticated than even five years ago, and much more is expected of nurses and health visitors in completing documentation, preparing care plans and relating progress and evaluation reports, and in providing background reports for the information and assistance of other health professionals.

Hayling's left-wing politics were to a large extent the result of his background.

Chris had a normal middle-class background, with the exception of the fact that he had been adopted and brought up in Sutton Coldfield by step-parents called Bott.

We hope that curriculum specialists will find essential background and contextual material in these overview volumes.

For initial and early readers, books of a manageable size with clear print giving a good dark contrast against a light background and attractive colourful pictures are readily available.

This is because the connection between a person's everyday experience and his conceptual background is usually a good deal more tenuous than that between, say, his everyday experience of the weather and his belief that August is a wetter month than July.

There was a series of scholarly exhibitions, but again, the main focus being on the pictures in the collection, and against that background I think the 1980s were a wonderful period.

The study focused on welfare assistants working with children with special educational needs in ordinary primary schools and aimed to identify background experience, previous training and qualifications; conditions of service and appointment procedures; general duties and specific activities undertaken; opinions about the usefulness of these activities to both pupils and teachers;

As this brief background has perhaps already suggested, it incorporated themes with a distinctly classical flavour to them; sometimes, as we will see, this connection was acknowledged.

The background music is tasteful, the footage of Hobbs, in particular, delectable, and such utterances as heard from Tom Barling, now 85, touchingly in contrast to those of many latterday professionals.

Each of us approaches the problem from a different background, and each of us is dealing with a different situation, and a different culture, and from a different starting point.

When occasions have occurred, as they do in all organizations, where it is necessary to take a ‘big’ risk on a young man whose experience and background we think inadequate for the task, nine times out of ten not only does he rise to the occasion but he does even better than we would expect.

However, in selecting people for jobs, it is the current profile of goals that provides vital background and career history to date.
Here is a random selection of 50 solutions from the 740 found.

A0P 860 They invited people whose backgrounds were very different to join this ‘high class Jewish fraternity,’ and tried to run it as a continuous party.

A5Y 1490 Backgrounds can therefore be reconstructed for the ‘problem child’ in which their persistent offending becomes understandable.

A6V 9 The women in this book fall essentially into two groups — those who come directly from certain peasant societies of India, Pakistan and Bangladesh and those whose families migrated from the same peasant backgrounds first to East Africa and then to Britain.

A7D 1276 Back in the city, Sam and Graeme had owned a prop hire business, lending out country antiques, backgrounds and surfaces to photographers and stylists, mostly for cookery pictures.

ADB 572 Between 1945 and 1974, according to research analysing the backgrounds of Tory MPs, the back benches remained dominated by the public schools and Oxford and Cambridge.

ADB 750 Those who passed out successfully had as broad a range of social backgrounds as the original list of applicants — certainly more broadly based than the parliamentary party.

APL 69 Colorama Photodisplay have extended their range of backgrounds by adding three new fabric materials to their product range.

ARC 542 For such happy negligence a price was paid, and especially by pupils from less-favoured backgrounds.

B3C 896 Most will have taken a Foundation course in Art and Design, but applicants from a wide range of backgrounds are welcome, including those applying direct from sixth forms.

B3K 2930 …committed to working with groups and individuals of all ages, cultural backgrounds and special needs.

BLX 730 Perhaps the most extraordinary examples of animal camouflage are those in which the animals concerned have evolved into mimics of specific details in their backgrounds.

BLY 113 To this we may add the variations in cognitive, linguistic and perceptual growth between children of different backgrounds indicated in my last section.

BMF 678 To get a true picture it is important to watch a wide cross section of paddlers with a range of different backgrounds.

BMP 307 These workers, the plan suggests, will come from urban or suburban backgrounds, they will be part of mainstream urban society and Shetland will be quite new to their experience.

BN3 1641 Though belonging to different religions and coming from differing backgrounds, an affinity grew and developed.

C88 840 He is keen to form links in the community with people from as many varied backgrounds as possible.

C8G 146 We have children from a wide variety of backgrounds in our Catholic schools today.

CB8 2028 These days most of us meet so many different people from so many different backgrounds.
By discussing their family backgrounds, they had achieved some insight into why they had excluded sex from their relationship.

There were however differences in the types of crime persons with certain social backgrounds were likely to commit.

In such cases, the shots can often be saved by dubbing in suitable backgrounds of a kind which do not need to be closely synchronised to the pictures.

This is a scene which calls for imaginative lighting. The tree and its decorations should sparkle against darker backgrounds.

Were the backgrounds of candidates examined, the contrast would be even more striking.

Speakers of different languages and cultural backgrounds, and from different social groups, vary quite significantly in their preferred language norms.

Coming from three diverse musical backgrounds — the rock'n'roller, the classical and the technological — and pulled together by doctor Weatherall's rumbling production.

Having said that, many of my favourite pictures have been really bold designs using very strong colours on striking backgrounds!

We also discovered the richness and variety of our backgrounds and a growing understanding of our shared roots.

Students at...university, especially the top universities, come overwhelmingly from privileged urban backgrounds' (Hooper 1985: 55).

The project manager was a senior social worker and the three service managers all had nursing backgrounds.

Each, in his own way, was something of an expert, especially Mayhew and Abercrombie who also had solid rugby backgrounds.

Greg tries out his I-don't-know-any-different argument again: 'Most bands I know in Boston come from backgrounds that aren't radically different from mine.

The elaborate and costly manner of illustration (gold backgrounds and a preponderance of blue and red pigments) suggests a royal provenance and is unusual for this type of book.

John Isaacs, a Jamaican-born coach with Haringey, believed most black sportsmen to come from what he called 'limited family backgrounds', where their parents are unable to give them positive guidance.

But this would be to simplify things for, as I have argued, black kids generally come from the kind of family backgrounds which are not suited for their own educational needs — for reasons which I spelled out in the last chapter, but will summarize as 'neglect' or 'unattainable goals'.
There was both their **backgrounds** — a boy taken from a bleak past into a glorious future by a dedicated schoolteacher — and furthermore this acting business got him off duty, paid him as much cash as a miner's weekly wage for a few hours' easy work and had a satisfying tint of glamour…

Some woman-centred psychologists argue that women of different ethnic **backgrounds**, classes, and ages need to be represented fairly among them, in order for their work to be truly woman-centred.

She said: ‘There is an emphasis today on matching cultural and racial **backgrounds** when children are placed for adoption or fostering.

This may not include positive valuation of black people or different ethnic **backgrounds**.

Second, the instruments used for white middle-class parents may not be equally appropriate for black parents because they may fail to take account of different subjective experiences and racial and ethnic **backgrounds**.

A trend was nevertheless apparent for clients to form a ‘younger group of people from more privileged socio-economic **backgrounds** than might be expected’.

These goals reflect the **backgrounds** (values, beliefs and experiences) of individuals and do not emerge fully formed at 20 years of age; they are acquired over long periods, and particularly during childhood.

As Wright Mills observed in his critique, ‘The Professional Ideology of Social Pathologists’: ‘If the members of an academic profession are recruited from similar social contexts and if their **backgrounds** and careers are relatively similar, there is a tendency for them to be uniformly set for some common perspective’.

Public affairs, local authority, government, financial, and charity public relations all call for different talents so the people working in these areas often have very different educational **backgrounds** and work experience from those doing consumer public relations.

I believe our profession, whether print or broadcasting, should be more flexible, to attract and encourage suitable youngsters from all **backgrounds**.

The book is intended for undergraduates in their second or third year of a philosophy degree, but this need not necessarily deter readers with other **backgrounds**; e.g., my father claims to be able to understand it, though perhaps he would not thank me for the suggestion that he is representative.

Exposed to Minton's freewheeling, glamorous Bohemianism, some found it difficult afterwards to stand on their own feet, for Minton had effectively broken them away from their **backgrounds** or their jobs.

People from different **backgrounds**, different eras and with different levels of education will inevitably respond in a variety of ways to the same texts.

Evidence from different nationalities and different class **backgrounds** suggests an overall pattern to discourse about race and prejudice.

1971

Providing a thorough basic **grounding** in problems analysis and methods of research, the successful completion of the programme, which normally lasts about three years, leads to the University of Manchester Ph. D., […] [737-045 (1971) : 281]

1995

It is felt that this post will offer an excellent **grounding** in all issues related to the conduct of successful medical research. [1963-080 (1995) : 68]

This full-time/part-time course provides a thorough **grounding** in the science of Radiation Protection and its relationship to the broader field of Environmental Protection. [1967-018 (1995) : 68]

Applicants holding, or expecting to obtain, a good honours degree with a strong **grounding** in Biochemistry, should apply in writing, including a CV and the names of two referees, to the Unit Administrator, MRC Toxicology Unit, Hodgkin Building, University of Leicester, PO Box 138, Lancaster Road, Leicester LE19HN, quoting the appropriate reference number. [1971-031 (1995) : 66]

The course would provide a good **grounding** for a subsequent Ph.D. programme, or could lead directly to employment. [1980-129 (1995) : 87]

You will receive a good **grounding** in all aspects of the work carried out in a routine department of a large District General Hospital. [1989-039 (1995) : 68]

You should have a good honours degree in physics or computer science, three years' relevant postgraduate experience and a strong **grounding** in computer programming. [2002-068 (1995) : 75]

Applicants should be graduates in physics or materials science with good practical experience of electronics, or graduate electronics engineers with a solid **grounding** in materials. [2006-041 (1995) : 73]

2005

Both courses provide a core academic **grounding** in the culture, practice and communication of science complemented by practical media workshops on science writing, radio and TV production and a range of communication work placements. [2481-079 (2005) : 78]

This well-established programme provides an excellent **grounding** in HPC technologies and their practical application. [2485-007 (2005) : 59]

At the same time you should also have an excellent **grounding** in several of the following: optimisation, differential equations, function approximation, dynamical systems, fractals and stochastic processes, modeling, and other modern computational techniques. [2485-024 (2005) : 64]
We’re also looking for talented, degree-qualified chemists with a solid grounding in physical or inorganic chemistry to work across our R&D teams. [2485-059 (2005) : 77]

A good grounding in measurement techniques is essential as is wide and practical experience of PC software, hardware and measurement instrumentation. [2489-059 (2005) : 78]

Both courses provide a core academic grounding in the culture, practice and communication of science complemented by practical media workshops on science writing, radio and TV production and a range of communication work placements. [2502-077 (2005) : 79]

It'll be a great start to your microbiology career; where you'll get a broad grounding, and fantastic opportunities to expand your knowledge in the field of water microbiology. [2511-045 (2005) : 69]

“Employers like candidates with a good grounding in the basic sciences or in engineering,” says Seeley. [2515-002 (2005) : 52-53]

Applicants should have as a minimum qualification a HNC/HBTEC, in Biology or a related subject and must have a good grounding in molecular genetics laboratory techniques, preferably in an evolutionary biology context, and the ability to work independently but also to collaborate in a larger team. [2519-061 (2005) : 74]

Ideally you will be a recent graduate/post graduate probably in a chemistry/chemical engineering/ biotechnology discipline, preferably with two or more years’ industrial experience, and will have a thorough grounding in one of our core technology areas. [2528-030 (2005) : 71]

2006

Both courses provide a core academic grounding in the culture, practice and communication of science complemented by practical media workshops on science writing radio and TV production and a range of communication work placements. [2533-068 (2006) : 66]

You will be a versatile, pro-active, commercially aware PhD or exceptional graduate with a strong grounding in health or biological related science or engineering. [2537-028 (2006) : 68]

A basic grounding in the physical sciences and maths is important and often lacking, he adds. [2554-001 (2006) : 58-59]

With a flexible, well-organised approach, you will have a good grounding in the relevant techniques. [2554-025 (2006) : 67]

2009

Annexe 9-9-4 Occurrences de GROUNDING dans BNC

Here is a random selection of 50 solutions from the 208 found.

**A1A** 595 Searle characterizes Derrida as a genuine philosopher, who, because modern philosophy had undermined the transcendental **grounding** for reality offered by traditional metaphysics, concludes that there is nothing left but the free play of signifiers.

**A60** 252 its cultural **grounding**.

**A6L** 38 The basic **grounding** that all new management recruits underwent on joining Cadbury's helped to ensure that each of them obtained this innate understanding.

**ABF** 578 Dmitri Yazov: ‘completely lacks the **grounding** for the post of defence minister.’

**ACJ** 279 First, cases of ‘excessive defence’ have a **grounding** in legal justification, in that the occasion was one which justified the use of some force, and this places them on a higher social plateau than killings with no element of justification at all.

**AHA** 469 ‘We want a boat that gives a good **grounding** in trapeze and spinnaker techniques, in all weather conditions, but that isn't too demanding for youngsters joining the class.

**AK4** 539 She had also acquired a solid **grounding** in revolutionary politics and in France had worked for the Boulangist cause.

**AL0** 133 Children usually have a strong ballet **grounding** long before they apply to enter the Royal Ballet School from the age of 11.

**ALU** 99 Thus Hans Sloane began the thorough **grounding** on which he was to build his successful career.

**AM8** 718 We believe in partnership with parents, choice in schools and a good **grounding** in the basic skills all children need to make a success of their lives.

**AMA** 409 Every child needs a good **grounding** in science and technology.

**AMH** 145 Clearly it would be useless for any prospective export executive to attempt his final studies without a **grounding** in economics and geography, subjects which form the necessary foundation for detailed export studies.

**AYJ** 2255 Accountants seem to live that way and so do managers who have a **grounding** in disciplines such as engineering, economics or the natural sciences.

**B19** 133 My **grounding** in cancer therefore was thin.

**B1T** 597 Similarly, Freeman argued, in relation to unskilled labour, that ‘ineducative’ employment was unavoidable and, therefore, it was necessary that ‘the intelligence and character of the adolescent be trained outside the workshop’: ‘We cannot train for a trade, but we can enable the worker to do his duties as thoroughly as possible’; such training would give a ‘familiarity’ with ‘ordinary tools’ and ‘simple machines’, a **grounding** in ‘mechanics’ and ‘competent draughtsmanship’.

**B2E** 958 I had had quite a **grounding** in this at the City Temple.

**B3C** 1941 The first and second years of the course give students a thorough **grounding** in basic musicianship and develop their practical skills.
This stage of the course develops an effective knowledge of subjects specific to Hospitality Management, supported by a mix of carefully selected general business studies subjects which are necessary to attain a basic operational grounding and competence in supervisory and first-line management.

The first year of the course concentrates on providing a grounding in the tools and techniques of IT; this is subsequently developed in the second year, when the emphasis is on the application of the technology and its environment.

The course, which can be taken in a specialist or more general mode, seeks to give students a thorough grounding in Fine Craft Design, to give them a firm basis for thinking about their work and a useful introduction to business practice.

In exactly the same way as it is essential to deconstruct the rhetoric of Hansard by examining the context which structures Parliamentary debate, what we want to do here is to reveal this grounding of other contributions to this volume.

Avoid grounding your putter head at address should there be any chance of the ball moving.

It could only be given a new lease of life by grounding its themes in a transformed image of a much more efficient, modernised, client-centred public sector, to which Labour has not yet seriously directed itself.

The task is immense, painfully long-term and difficult to ‘sell’, but it has one great merit as a grounding for optimism: there is no alternative, no quick fix.

We may now refine the grounding formula as it applies to particular choices:

We may therefore propose as a specialization of our grounding formula:

Let us remind ourselves of the grounding formula for choices of ends:

The grounding Mr Morrison received at James Dowling's feet stood him in good stead.

This, he says, gave him a good grounding.

It's a great grounding for doing your own thing.’

We know, for instance, that large-scale grounding of Foxbats has occurred on all major Red Air Force bases over the last few months.

I think managers should have a proper grounding.

‘A very good grounding in the subject with sound advice for current implementation and interesting observations on future developments.’

The danger in utilizing a theory of ‘mind’ to solve the problem of grounding the sociology of knowledge is that it depends on concepts that relate to individual and inaccessible behaviour — ‘thought’, ‘consciousness’, etc.

Habermas is grounding truth in the particular form of human communication.
What is radical in Habermas's proposal is that while the possibility of speaking the truth is enstructured in every utterance, all the other modes of **grounding** truth become sources of distortion; historical world-view, ideology, scientism, material determinism, reduction to class consciousness.

However this sketch hardly rises above a ‘Dallas'-type description and Stotland failed to provide any empirical **grounding** for his arguments.

These are ideal opportunities for people who wish to enter the industry and gain a firm **grounding** in clinical research work.

If Protestant zealots were only partially successful in their attempt to sweep away the supernatural aura which had surrounded late medieval religion, their efforts to give the common people some **grounding** in knowledge of the gospels ‘and a basic understanding of the Reformed theology of grace and salvation also met with only limited success.

As far as the actual content of the education was concerned, the employers wanted no more than a solid, old fashioned **grounding** in ‘the basics’ and that ‘bright pupils’ should be positively encouraged to seek jobs in the industrial sector rather than in the academic world or public services.

In the first part of this, ‘Fixation of Belief, he outlines the project of **grounding** logical rules in the ‘presupposition’ of scientific inquiry — that there is a discoverable reality — and in subsequent papers attempts to do just that.

There are good reasons for not inflicting pain on animals, but no particular point is made, except rhetorically, by **grounding** this in rights.

For if the relations between the individual and society are as close as he believes, we must take them into account; instead of **grounding** explanations upon one part we must theorise about the whole to which all the parts belong.

Much of this public criticism directed at practitioners, often reinforced and fuelled by the reports themselves, is that these tragedies and scandals have arisen because practitioners ‘failed’, in part, because they lacked the knowledge about child abuse which a thorough **grounding** in the research and its findings would have given them.

One must add to this the spread and easier availability of pornography, television which not only normalises such changes, but on occasion appears to be in support of them, and the lack of a firm moral **grounding** in sex education.

Since so much emphasis falls on the pronouns, it seems to me natural to turn next to the basic **grounding** of education and humanity in the Renaissance, the trivium (grammar, logic, rhetoric) and to ask what these grammatical categories meant in Shakespeare's time, and what they mean today, so joining the history of grammar — a subject whose importance to the study of literature is seldom realized — to modern linguistics.

The trainee begins with PPL level training, with a solid **grounding** in aerobatics, and moves to the advanced trainer, the Tucano.

The hypothesis that states pursue their national interest could be shown to be empirically superior to its rivals, thus **grounding** a Positive science of international relations.

It aims to give writers and art directors a thorough **grounding** of the advertising business and valuable first-hand experience.
Reflecting a general attitude to democracy and participation at a grassroots level, primary health services are provided by people with no formal training but who possess a basic grounding in good health practices.

Children, it is argued, should receive a good grounding in the main forms or types of human knowledge, for both practical and abstract reasons.

If we are to compete effectively in world markets and to communicate on equal terms with our European partners we need to increase substantially the numbers of young people leaving school with a good grounding in at least one foreign language.

It may be suggested, then, that the shifting perspectives, as instruments zoom into the foreground, then out again, together with the relative lack of foregrounding of the voice, signify the dislocation of the individual's dominant position and of the single point of view.

After the abdication of Ferdinand at Bayonne, it refused to recognize the change of dynasty, grounding its refusal on legal formalities.

It is noted for its high proportion of ex-civil servants: ‘They are young chaps who by and large have contacts in the Civil Service and have a jolly good grounding of how the system works,’ he says.

He gathered his great weight neatly to a point against Fred’s sickly-looking chest, said ‘Serve you right’ in a cheery tone under the roar of the music-hall audience and shoved away, grounding delicately at the foot of the Forum steps and watching his partner with one eye.

The study that has been mounted consequent on the grounding of the tanker Braer on 5 January 1993 has been inaccurately reported.

Politics of oil: Just before his attachment to the premier's office at Number 10 Downing Street, he got a very good grounding in oil politics as head of the FO's Middle East department.

Although Henslow's teaching was not part of the undergraduate curriculum, interested students were taken on field trips and given a good grounding in the science of the time.

Where, though, do we see evidence today of any analogous common grounding, and of a felt shared set of interests running across the academic community and its various disciplines?

However, rather than serving to dissuade us from finding some base for the notion of students' academic freedom, the epistemological grounding of the German universities holds some definite clues that are worth pursuing.

In both, there is an absence of absolute authority, and of definitely grounding our claims to knowledge independently of the knower.

The student with an interest and a good grounding in the principles of economic theory should pursue that literature beginning with a standard public finance text (Musgrave and Musgrave, 1980; Prest and Barr, 1985).

He read English at Cambridge —‘actually I spent most of the time reading opera’ and went on to become one of the first crop of the Arts Council’s pioneering Arts Administration course, which was ‘a bit Heath Robinsonish then, but still a wonderful grounding’.

•Keeping the household budget (especially on only one salary) gives you a good grounding in financial matters.
Large end plates tend to ‘stick’ to sea beds when **grounding** and when they do come off have been known to carry around lumps of the said seabed for some time.

Other examples, often involving the movement of large blocks in structures well above sea level, are also known, while there is the record of the **grounding** of a 100-ton sloop on the top of Chesil Bank in 1824.

Electronics designers will need to follow some rules of thumb, many of which will be familiar, such as mains filtration, adopting a sensible **grounding** policy, minimising ground impedance, minimising cable lengths, screening cables which are carrying high frequency, large magnitude signals or which contain sensitive signals, and grouping cables to separate the sensitive from the interfering.

Building students preparing for a career in Europe need much more than just a **grounding** in languages, says John Watson, student representative for the CIOB's Northern Counties Region and press officer for the Tyneside Centre.

have but be a better **grounding**.

The experience thus gained provided a **grounding** for work on the development of a new general scheme, the first step in this regard being to identify main classes.

These reports had at least a **grounding** in real events, or my memory of them.

And evening classes are a good idea but more for a general **grounding** in computing in general as there are not likely to be directly relevant to your hardware and software.

‘He used to play head-tennis with people like Ray Wilkins and Gordon McQueen which isn't a bad **grounding**, is it?’ laughs Harry.

If all goes well, you will then have to attend the subject assessor induction training — which provides a **grounding** in SCOTVEC procedures, in criterion-referenced assessment issues and in the key task of maintaining national standards by visiting centres.

A fortunate **grounding** and optimistic cleansing which a cycle of this sort provides.

‘Cunard contends that the cause of the **grounding** was the presence of significantly shallower depths than those charted.

The **grounding** was reported to have cost Air India some US$100 million in lost revenues.

However, under intense international pressure at the Geneva conference, supported by US President George Bush's Oct. 2 announcement that the USA was prepared to participate in enforcing the ban, Karadzic finally on Oct. 13 agreed to the **grounding** of all combat aircraft and their transfer from Bosnia to the FRY (Serbia being the only party to have combat aircraft).

Accordingly, some theoretical and methodological **grounding** for this transformation needs to be provided.

As we shall see in Chapter 4, it is the absence of this **grounding** that opens some methods to the charge of excessive individualism.
This almost led to *grounding* of the plane but replacement with an incompatible elastomer made from ethylene-propylene copolymer rectified the fault.

Aims to broaden the range of classical subjects and provide *grounding* in methods and techniques of research.

The programme of study is intended to provide an intensive *grounding* in aspects of the History of Islamic Art for candidates with at least a good Second Class Honours degree (or the equivalent) in an appropriate subject.

The course at the introductory level, which is open to students of all faculties, offers a thorough *grounding* in both theoretical and practical aspects of atmospheric science.

Below that the car risked bogging down in the mud or *grounding* on an obstacle, above it the tyres might lose adhesion on the continual twists and turns or cliff-like descents, or one of the vicious pot-holes or rock outcrops rupture the suspension or pierce the sump.

Both of the general SVQs in science are designed to provide students and trainees with a broad *grounding* in science, while allowing them to develop higher levels of competence in their chosen areas.

(i) An applicant should have a basic *grounding* in personal injury work as well as basic *grounding* in medical negligence work.

If the mind is constrained to produce and understand metaphor in terms of this inventory of abstract *grounding*, derived from bodily experience, aren't other understandings of any figurative structure literally inconceivable?

Right yeah erm so that can be, that can be a bit awkward but still some of the older stuff can give you a bit of a *grounding* in, in, in, in, in what it's about if you can find anything relevant and sometimes you've just got to sort of wander round the library and pick things up off the shelves like at random and see, see if you can find something in the index or find something in the contents pages that sort of vaguely coincides with what the you know what's been talked about in the class that week erm sometimes if you keep looking you might actually be dead lucky and find one of the recommended books has actually come back in erm you may find that you've got to be a bit flexible about that because, you know, if a topic's dealt with in November you may not get a chance to see the book until you know kind of, I don't know, February or something, you know I mean so it, it sometimes does mean you've got to do the reading like a bit displaced from the from the classes

‘It obviously gave me a very good *grounding* and without it, I wouldn't be where I am today.

Veteran Japanese player, Isao Aoki, originally penalised two strokes after the first round for *grounding* his club in a bunker, disqualified himself from the tournament before the second round.

He responded to claims that the Shetland public were being kept in the dark about the facts of the Braer *grounding* by saying that MAIB inquiries were held in private to allow people to speak more freely.

Walker, who has turned 30 and has been at Tynecastle for over three years, will get his full international *grounding* at a time when goalkeeping problems abound for the national coach.

I tell you, if I'd have know what the content of the training was gonna be, I would've arranged for our twelve crime prevention officers to go across there and listen to it, because there was a locksmith there that gave a lot of sound advice in relation to security of homes as well cars that really was good basic *grounding* for a crime prevention officer.
The course is designed to give a **grounding** in the management side of all aspects of distribution.

In Heriot's we take this very seriously, and we have embarked on a major enhancement of our language provision, to give all our pupils a **grounding** in two languages — either French and German, or French and Spanish, depending on the year of entry.

Well actually the one thing you can say about it is, it is a good **grounding** for what you now go on and do
Maude Beauchesne
À Moi

Bonjour,

Votre demande est maintenant traitée. Vous pourrez constater les modifications apportées à TERMIUM lors de sa prochaine mise à jour. Nous vous remercions de nous avoir transmis votre commentaire.

Sincères salutations,

Maude Beauchesne

Objet : Absence d’acception pour le terme GROUNDING

Bonjour

Je vous soumets un terme pour lequel il manque dans votre base de données l’acception “formation” ou “bases” : il s’agit de “grounding”.
Ce terme semble être un quasi-synonyme de “background”.
En attendant votre feedback veuillez recevoir mes salutations
George Sosin
Université de Lorraine (France)

Annexe 10-1 Occurrences de COOPERATION dans CAEMS

1971

1. The appointee will be required to maintain close contact with the Australian dairy industry and to encourage co-operation with general food science studies in other parts of the Division. [741-008 (1971) : 520]

2. Applications are invited for a Ph.D. studentship offered by the S.R.C. under their scheme for “Co-operative Awards in Pure Science”. [750-065 (1971) : 360]

3. Work will be carried out under the supervision of Dr. J. S. Littler in co-operation with I.C.I. Ltd., Heavy Organic Chemicals Division, and Johnson Matthey and Co. Ltd. [750-069 (1971) : 360]

4. Applications are invited from students in the United Kingdom including those who expect to graduate this year) for a Ph. D. studentship award offered by the Science Research Council under their scheme for “Co-operative Awards in Pure Science”. [754-002 (1971) : 598]

5. CO-OPERATIVE AWARD IN PURE SCIENCE [754-005 (1971) : 598]

6. This Division co-operates with biologists and toxicologists in the assessment of the effects of chemicals upon man and his environment. [758-014 (1971) : 51]

7. A HISTOLOGY RESEARCH ASSISTANT (technical or graduate) required to co-operate in a grant-financed research project. [758-022 (1971) : 51]

8. He will be working in close co-operation with the Medical Director. [758-053 (1971) : 54]

9. Close co-operation with School of Engineering and School of Science. [758-057 (1971) : 54]

10. Applications are invited for a PH.D. STUDENTSHIP offered by the S.R.C. under their scheme for “Co-operative Awards in Pure Science”. [758-076 (1971) : 55]

11. The work will require to be carried out in close co-operation with the relevant academic departments. [763-006 (1971) : 344]

12. Applications are invited from candidates with a 1st or Upper 2nd Class Honours Degree (or equivalent qualification) in Pharmacy or Chemistry, to work on a RESEARCH PROJECT IN MEDICINAL CHEMISTRY. The project is sponsored by the S.R.C., C.A.P.S. (Award) and the co-operating Body to Allen and Hanburys Ltd. Applications to Dr. J. Walker, Pharmacy Department, (NS2), Chelsea College, Manresa Road, London. SW3 6LX as soon as possible. [767-055 (1971) : 546]

14. These 'Cooperative Awards in Pure Science' (CAPS) studentships are intended to [733-001 (1971) : 23]

15. encourage cooperation between industrial companies and science departments of universities and colleges and to give students some insight into the challenges and problems of R & D in industry. [733-001 (1971) : 23]

1995

1. The course will involve students from a wide range of relevant subjects in order to encourage multi-disciplinary cooperation. [1963-104 (1995) : 75]

2. An interest in the wider aspects of soil fertility, including the ability to cooperate with ecologists, soil microbiologists, soil physicists and soil chemists is desirable. [1971-047 (1995) : 70]

3. In such case, the candidate should be prepared to spend considerable time in Copenhagen in close cooperation with clinical study directors and other customers. [1976-072 (1995) : 80]

4. It is important that you: [...] can empathise with communication objectives and win the cooperation of authors and clients [1984-103 (1995) : 79]

5. Educated to degree level in a relevant discipline and possessing a postgraduate qualification in the field of plant biochemistry and/or physiology, you should have relevant research experience in a plant biology laboratory and must be a flexible, cooperative team player with good communication skills. [1989-100 (1995) : 83]

6. The initiative aims at a coordinated research program in Sub-Saharan Africa that will initially involve six National Agricultural Research Systems: Botswana, Burkina Faso, Kenya, Mali, Namibia and Niger; six international agricultural research centres: the International Livestock Research Institute (ILRI), the International Center for Research in Agroforestry (ICRAF), the International Food Policy Research Institute (IFPRI), the International Center for Agricultural Research in the Dry Areas (ICARDA), the International Plant Genetic Resources Institute (IPGRI) and ICRISAT; the International Fertilizer Development Center (IFDC); three regional institutions: Comité Permanent Inter-Etat pour la Lutte contre la Sécheresse au Sahel (CILSS)/Institut du Sahel (INSAH), Southern African Center for Cooperation in Agriculture (SACCAR) and the Intergovernmental Authority on Drought and Development (IGADD); [1993-069 (1995) : 71]

7. and a number of other research agencies. Active cooperation will play a pivotal role in this program and its related activities. [1993-069 (1995) : 71]

8. He/she will act as a catalyst to promote regional cooperation in the implementation of the initiative. [1993-069 (1995) : 71]

9. The job requires close cooperation with experimental psychologists as well as physicists in the development and application of quantitative statistical methods in the domain of neurofunctional imaging. [1998-103 (1995) : 103]

10. Applicants who would augment our thriving research group in applied mathematics and numerical analysis, enhancing the group’s cooperation with other research groups in the University and elsewhere, are especially welcome. [1967-050 (1995) : 77]

11. The Queen's University Environmental Science and Technology Research Centre is an industry-University cooperative research centre with a membership currently of nineteen companies supporting interdisciplinary research programmes. [1980-014 (1995) : 58]

12. Being a partner in both the Cooperative Research Centre (CRC) for Sustainable Sugar Production and the joint Queensland Department of Primary Industry/CSIRO Agricultural Production Systems Research Unit (APSRU), the Division has in place established research teams closely linked to its stakeholder industries. [1989-009 (1995) : 59]

13. You will be fully involved as a team member in the cooperative development of new techniques - and further training will be encouraged. [2006-062 (1995) : 78]
2005

1. You will need to have well-developed leadership, oral presentation and written communication skills, and possess personal attributes to work cooperatively with colleagues in CSIRO, universities, governments and private agencies. [2519-018 (2005) : 60]

2. Applications will shortly be invited from outstanding physicists for permanent academic positions and 4-5 year research posts within SUPA, an "Alliance for Excellence" formed to enhance Scottish physics research through co-operation and collaboration. [2485-017 (2005) : 61]

3. You will promote co-operation between the national and local partners, ensuring needs are reflected in national reporting and review processes, and that there is regular liaison between all parties concerned. [2485-049 (2005) : 74]

4. At Wyeth people work together - collaborating and co-operating to create breakthrough therapies. [2515-027 (2005) : 65]

5. The University of Bergen has a strong international profile which entails close co-operation with universities all over the world. [2519-070 (2005) : 76]

2006

1. The position will be associated with the newly formed Danish Centre for Marine Mammal Research (DCMMR); cooperatively established between SDU and Fjord & Baelt, an attraction and research institution. [2537-078 (2006) : 84]

2. You will also develop long-term plans for cooperation with other international satellite operators with a view to harmonising global Earth observation requirements and increasing the sharing of data and support capacity building in Earth observation in the African countries. [2541-039 (2006) : 75]

3. The definition of curation standards and guidelines; and cooperation with Swiss-Prot and IntAct curators both at the EBI and at IntAct partner sites, e.g. in Geneva and Rome will be another duty. [2545-013 (2006) : 63]

5. We are seeking someone with excellent organisation skills to join the coordinating data centre of a global, inter-cooperative group, randomised clinical trial designed to test a new hormonal treatment for post-menopausal patients with early breast cancer [2558-076 (2006) : 90]

6. In order to participate in this program the visitors have to carry out all their activities at the BIDR or its facilities in cooperation with BIDR faculty. [2567-074 (2006) : 80]

9. The Department of Engineering Cybernetics at the Norwegian University of Science and Technology (NTNU, www.ntnu.no), Trondheim, Norway have in cooperation with SINTEF Fisheries and
10. Cross-disciplinary cooperation results in innovative breakthroughs and creative solutions with far-reaching social and economic impact. [2580-004 (2006) : 56]

11. Cross-disciplinary cooperation results in innovative breakthroughs and creative solutions with far-reaching social and economic impact. [2580-010 (2006) : 57]

12. A co-operative and collaborative approach is also essential. [2545-036 (2006) : 73]

13. Within the Medical & Scientific Affairs Department you will [...] • identify and co-operate with key opinion leaders [2545-056 (2006) : 82]

14. The Faculty of Biological Sciences is one of the largest in the UK, with more than 150 academic staff. It houses five large MRC Co-operative Groups and nine research centres, covering the breadth of biological sciences including structural and membrane biology, neurosciences, cardiovascular biology, ecology, evolution and biodiversity, and sports and exercise sciences. [2550-055 (2006) : 81]

15. The International Atomic Energy Agency (IAEA), an independent United Nations organization headquartered in Vienna, Austria, with 140 Member States and a staff of 2200, serving as the global focal point for international cooperation in the safe and peaceful use of nuclear energy, is seeking a Mass Spectrometry Specialist for its Safeguards Analytical Laboratory (SAL), which is a Section of the Agency's Laboratories at Seibersdorf, Department of Nuclear Sciences and Applications. [2563-028 (2006) : 60]

17. Joining the Co-operative Group means joining a business that believes in honesty and fair and ethical practices. [2567-041 (2006) : 67]

18. In all, you've the potential to be recognised as an expert and a representative of the Co-operative Group. [2567-041 (2006) : 67]

20. You will co-operate with colleagues at all levels, sharing knowledge and experience where appropriate. [2572-039 (2006) : 76]

21. As you will be presenting results both internally and externally and preparing reports for a variety of journals, you will need to be professional and co-operative with excellent communication skills. [2580-013 (2006) : 59]

2009

1. The meeting will synthesise our understanding of the evolution of social behaviour and cooperation in micro-organisms, invertebrates, vertebrates and man, providing a unified conceptual overview of the mechanisms involved in the evolution of societies, the causes of variation in their structure, the contrasts and similarities between the processes operating in animals and man and the principal questions still unresolved. [2689-002 (2009) : 15]

2. Title: Evolutionary explanations for cooperation [2689-027 (2009) : 57]

3. A postdoctoral fellowship is available to investigate the cooperation of IGF-I and adhesion signalling in cancer progression. [2698-058 (2009) : 72]
4. Our innovations originate either out of our own research or through cooperation with external partners. [2702-010 (2009) : 50]

5. Our innovations originate either out of our own research or through cooperation with external partners. [2702-011 (2009) : 51]

6. The Alexander von Humboldt Foundation enables highly-qualified scientists and scholars of all nationalities and fields to conduct extended periods of research in Germany in cooperation with academic hosts at German institutions. [2715-034 (2009) : 63]

7. The position relates to the cooperation between the Forschungszentrum Jülich and the SNS. [2719-025 (2009) : 59]

8. Requirements: interest in scientific and technical problems, ability to cooperate with researchers from Jülich and other users, mobility, experience in scattering and condensed matter science. [2719-025 (2009) : 59]

10. Within the cooperation programme FOKUZ, 'Fundamenteel Onderzoek Kust en Zee' (Fundamental Research on Seas and Coasts), the two institutes will develop a joint research programme on the following topics: [2719-035 (2009) : 62]

11. The applicant should build up an own research team within the BIO department in cooperation with existing staff. [2719-035 (2009) : 62]

12. Our joint project aims to identify general principles through which chromatin state, epigenetic modifications, and transcription factors cooperate to achieve cellular differentiation in mammals. [2733-011 (2009) : 64]

13. The Co-operative Awards in Science and Engineering (CASE) studentships are designed to give students experience outside a purely academic environment; use joint supervision of the student by the Open University and e2v technologies; and provide guidance from an experienced engineer with industrial relevance. [2689-044 (2009) : 62]

14. Whilst looking after key customers, you will contact and establish relationships with potential prospects, cooperating with fellow account managers and sales specialists to bring in new business and build market share. [2715-011 (2009) : 55]

15. Leiden University cooperates with other leading universities in the League of European Research Universities. [2724-045 (2009) : 69]
Annexe 10-2 Occurrences de COLLABORATIVE dans CAEMS

1971

1. Much of the work will involve close collaboration with scientists, and the ability to combine a fundamental approach with sound practical skills is important. [733-040 (1971) : 42]

2. INSTITUTE OF CANCER RESEARCH, ROYAL CANCER HOSPITAL JUNIOR TECHNICAL OFFICER OR TECHNICIAN required in Physics department at Belmont, Sutton, Surrey, to collaborate with Scientific Staff in research on early chemical and biological effects of ionising radiation. [737-028 (1971) : 279]

3. The Unit is engaged in a number of collaborative projects with Universities and Research Institutes both in the United Kingdom and abroad. [745-047 (1971) : 61]

4. The experimental programme will be carried out in collaboration with the A.R.C. Poultry Research Centre, Edinburgh. [750-023 (1971) : 356]

5. A.R.C. ANIMAL BREEDING RESEARCH ORGANISATION. SCIENTIFIC OFFICER or SENIOR SCIENTIFIC OFFICER required to collaborate on experimental studies of genetic variation in mineral metabolism and in production traits of ruminants. [750-028 (1971) : 356]

6. The course in Combustion and Explosion, given in collaboration with the Departments of Fuel and Combustion Science and of Physical Chemistry, consists of lectures on the fundamentals of the subject and their application to industry and to the different types of internal combustion engine. [750-066 (1971) : 360]

7. The course in Exploitation of Materials is presented in collaboration with the Departments of Ceramics, Metallurgy and Physics and covers the full range of materials of construction, both metallic and non-metallic, with particular reference to their comparative properties, processing requirements and exploitation in engineering design applications. [750-066 (1971) : 360]

8. Applications are invited for an S.R.C. S.A.C.S. Studentship to study the translocation of Systemic Fungicides in collaboration with I.C.I. Ltd. Agricultural Division. [754-005 (1971) : 598]

9. Collaborative work with industry is encouraged and the project may be carried out in an external laboratory. [754-012 (1971) : 599]

10. The research, in collaboration with Dr. M. A. A. Clyne, consists of studies of the mechanisms and rates of rapid gas phase reactions of atoms and small radicals using vacuum ultraviolet resonance spectrometry and mass spectrometry. [754-039 (1971) : 601]

11. RESEARCH FELLOW IN THE THEORY OF ELECTROCHEMICAL TRANSPORT (to work in collaboration with Professor R. H. Tredgold [754-062 (1971) : 603]

12. The Unit will be particularly concerned in the longer term development of instruments and research techniques, and with the study of new neutron sources. It will collaborate closely with university scientists and the existing support teams of the UKAEA. [754-071 (1971) : 604]

13. JUNIOR OFFICER OR TECHNICIAN required to assist scientists in a Division working in close collaboration with the world health organization. [754-072 (1971) : 604]

14. Applications are invited for a Postdoctoral Fellowship sponsored by the Wellcome Trust and in collaboration with the Royal Postgraduate Medical School Hammersmith, to work on the synthesis of folic acid derivatives; technical assistance is available. [758-007 (1971) : 50]
15. Excellent opportunities to engage in relevant research and to collaborate with other biochemists and biologists. [758-045 (1971) : 53]

17. A Collaborative Ph.D. student is required to work in conjunction with a Surrey nucleonics firm on the development and applications of solid state avalanche detectors. [758-075 (1971) : 55]

18. Duties will include participation in research on fine structure and function of fungi and other organisms, and collaboration in the design and the interpretation of the results of research undertaken in the Department. [763-029 (1971) : 346]

19. One involves the study of gas flows using laser scattering in collaboration with Ideal Standard Ltd. [763-053 (1971) : 348]

20. The second is a study of laser breakdown in liquids, in collaboration with the Electricity Research Council. [763-053 (1971) : 348]

21. Honours graduate required to continue investigations on the lysosomal enzymes of the human invertebral disc, in close collaboration with the Orthopaedic Department of the Bradford Royal Infirmary. [767-005 (1971) : 541]

22. The initial emphasis will be on undersea optical problems and will involve collaboration with biologists concerned with the visual capacity of fish. [767-012 (1971) : 542]

24. The second is a study of laser breakdown in liquids, in collaboration with the Electricity Research Council. [767-071 (1971) : 548]

25. This is part of a collaborative programme directed towards the interest of commercial mushroom production. [772-016 (1971) : 54]

26. Aston’s Interdisciplinary Higher Degree scheme provides the opportunity to research into a genuine problem supplied by a collaborating industrial organisation and, at the same time, earn a Ph.D. [774-050 (1971) : 192]

27. The successful candidate will be expected to initiate and supervise research in collaboration with the senior Applications Specialist and other members of the Project staff. [776-009 (1971) : 287]

1995

1. The project will be supported by the Plymouth Marine Laboratory (PML) via a NERC CASE equivalent studentship as part of their involvement in the Plymouth Marine Network (a research and teaching partnership between the PML and five universities to catalyse collaboration in Marine Science). [1959-005 (1995) : 46]

2. The research is a collaboration between the Lung Pathology Unit and Glaxo Institute for Molecular Biology (Geneva) and focuses on the mechanisms of inflammatory cell recruitment in asthma. [1959-026 (1995) : 50]
3. The project is funded by a grant from the BBSRC and will be conducted in collaboration with Dr M. R. Clark of the Immunology Division, Cambridge University Department of Pathology. [1959-042 (1995) : 55]

4. The position is for two years and is for theoretical work on MHD Waves, in collaboration with Professor B. Roberts. [1959-044 (1995) : 56]

5. This will be achieved by support of research into: [...] • the development in collaboration with industry of small-scale demonstration applications that have the potential for commercial application. [1959-059 (1995) : 59]

6. You will be required to: facilitate access to data derived from DOE/ITE Countryside Surveys for the Department of the Environment and its contractors and collaborators; to service the Department's ad hoc requests for data, simple data analysis and reporting, including the use of the Department's Countryside Information System (CIS); to advise the Department about data characteristics and quality; to provide assistance and advice to CIS users; to provide materials for a CIS User Group Newsletter; and to provide a Secretariat for a CIS Management Team. [1959-061 (1995) : 60]

7. The Assistant Editor manages all aspects of the journal production process, from editing manuscripts to supervising the construction of the monthly issues. This involves collaboration with authors, the in-house Editor and production staff to produce clear, accurate material in an appealing magazine format. [1959-062 (1995) : 60]

8. Applications are invited for a postdoctoral or postgraduate researcher to work on a major collaborative project funded for three years by the Scottish Office Agriculture and Fisheries Department. [1959-064 (1995) : 60]

9. An experienced postdoctoral scientist is required to work in collaboration with other members of the Plant Science Department to develop and use molecular and related techniques to study the responses of whole plants to impeded aeration and other environmental stresses. [1959-069 (1995) : 62]

10. These projects are either in collaboration with industry and other university departments or are in-house research programmes involving postgraduate students. [1959-071 (1995) : 62]

11. Research will focus on the basic understanding of the mechanisms and products that are obtainable from this series of reactions and will be undertaken in collaboration with industrial partners. [1959-079 (1995) : 64]

12. It is taught in collaboration with leading industrial and governmental organisations and is supported by industrial scholarships and research council studentships. [1959-094 (1995) : 67]

13. It has an extremely successful record in attracting external funding (over £2 million per annum) and well developed industrial collaboration; there are very strong links with the Departments of Biology, Electronics and Physics at York. [1963-001 (1995) : 50]

14. It is taught in collaboration with leading industrial and governmental organisations and is supported by industrial scholarships and research council studentships. [1963-016 (1995) : 54]

15. Applications are invited for the post of Research Associate to work on an HGCA-funded collaborative programme to evaluate the influence of sulphur on the yield and the breadmaking quality of wheat. [1963-035 (1995) : 58]

16. The work contributes to the Natural Environment Research Councils Land-Ocean interaction Study (LOIS), and will involve collaboration with modellers and other scientists within POL and in other organisations. [1963-039 (1995) : 59]
17. Duties will be to analyse existing cores from maritime and continental Antarctica in collaboration with the Environmental Change Research Centre, extend the techniques currently used and apply them to new cores taken during two Antarctic summer seasons. [1963-039 (1995) : 59]

20. The project will involve development of photon counting detector systems using microchannel plate intensifiers in association with electronic image readouts, and will be undertaken in collaboration with an industrial partner. [1963-049 (1995) : 62]

21. The project is funded by the Commission of the European Union and involves collaboration with laboratories in Cordoba, Cork and Oxford. Information about the project may be obtained from Professor M. J. Daniels or D. A. E. Osbourn (Tel: +44(0) 1603 452571. Fax: +44(0)1603 250024). [1963-058 (1995) : 64]

22. Glasgow is a major centre for immunological and neurosciences research and extensive collaborations exist with other groups. [1963-069 (1995) : 66]

23. A temporary Plant Virologist is required for 2 years in the Plant Pathology and Weed Science Department to develop diagnostic assays to discriminate strains of raspberry bushy dwarf virus and to collaborate in on-going soft fruit virus research. [1963-085 (1995) : 70]

24. Collaborative links exist between the University of East Anglia, the John Innes Centre (which incorporates the John Innes Institute, the Nitrogen Fixation Laboratory and the Cambridge Laboratory), the Sainsbury Laboratory, the Institute of Food Research (Norwich Laboratory), the Ministry of Agriculture, Fisheries and Food CSL Food Laboratory and the British Sugar Technical Centre. [1963-092 (1995) : 72]

25. Previous experience of collaborating with pharmaceutical companies will be an advantage as will knowledge of a second European language. [1963-093 (1995) : 73]

26. The Research School is generally awarded about 20 three-year Ph.D. studentships each year including 10-15 CASE studentships which carry an extra stipend from the collaborating company. [1963-100 (1995) : 74]

27. This post is available from 1 April 1995 for a fixed period of up to 2 years to work on a project concerned with the chemical composition and origin of fine grained sediments in UK coastal waters, in collaboration with SOAFD Marine Laboratory, Aberdeen. [1967-001 (1995) : 60]

28. As the manager of several national facilities ANSTO provides resources to and often collaborates with universities and other science organisations. [1967-005 (1995) : 62]

29. Close collaboration with the Cell Structure and Mass Spectrometry Groups at Norwich, St Thomas's Hospital, London and the Department of Chemistry, Exeter University, is planned.

30. More specifically, the work will involve the synthesis and vigorous testing of polymers in close collaboration with the MAFF Central Science Laboratory at Norwich. [1967-007 (1995) : 64]

31. The incumbent should also develop effective collaborative networks with NARS National Gene Banks, especially in exploration and collection of germplasm with appropriate training and prepare appropriate protocols for all collection expeditions. [1967-012 (1995) : 66]
32. He/She will liaise with other international groups; promote the orderly development of the MPT-GRU laboratories and offices in the new research building scheduled for completion in 1996 and participate in ICRAP training activities for NARS collaborative counterparts and supervise MPT-GRU staff. [1967-012 (1995) : 66]

33. The project is in collaboration with other industrial and academic partners, based in the UK and Europe, and is funded by the Engineering and Physical Sciences Research Council and the European Union. [1967-041 (1995) : 74]

34. Biological interactions of these materials will be investigated in collaboration with researchers in the University of Nottingham Medical School. [1967-045 (1995) : 76]

35. The project is funded by the Commission of the European Union and involves collaboration with CIRAD (France) and forestry institutes in Malaysia. [1967-046 (1995) : 76]

37. There will be opportunities for collaboration with clinicians in the Norwich Hospitals. [1967-048 (1995) : 76]

38. rationalisation of the Research Council's support in this key area by maximising collaboration and interdisciplinarity between the relevant research communities within a co-ordinated programme environment, leading to increased effectiveness and value for research funding; [1967-052 (1995) : 78]

39. maximisation of industrial support and collaboration within the context of a co-ordinated programme; [1967-052 (1995) : 78]

40. The research is multidisciplinary and will involve collaborating with scientists within BIBRA and in Europe. [1967-082 (1995) : 85]

41. A second studentship held in collaboration with SmithKline Beecham Pharmaceuticals is available to work with Dr D. S. Leake on the biochemistry of low density lipoprotein oxidation. [1967-084 (1995) : 85]

42. The Co-ordinator will be expected to promote, co-ordinate and monitor research within the Programme and encourage collaboration both between industry and academia, and, within academia, between sciences and engineering disciplines. [1967-085 (1995) : 85]

43. Where more than one project in any area is eventually selected for funding, successful contractors may be asked to modify their proposals if it appears to the Department that collaborative research will yield better value for money than projects conducted in isolation. [1967-093 (1995) : 87]

44. The Game Conservancy Trust invites applications for this collaborative three-year studentship, tenable from April 1995 at the University of Sussex and sponsored jointly by the RSPB and English Nature. [1967-094 (1995) : 87]

45. A second studentship held in collaboration with SmithKline Beecham Pharmaceuticals is available to work with Dr D. S. Leake on the biochemistry of low density lipoprotein oxidation. [1967-099 (1995) : 88]

46. The three areas involve collaboration with other groups in the UK and abroad. [1971-003 (1995) : 55]

47. This is a collaborative project with research laboratories and industry in France, Italy and Denmark, and the post would involve coordination and travel between the partners. [1971-023 (1995) : 62]
48. The role of the research assistant will be to support the Specialty Working Groups and liaise between collaborating parties as required. [1971-056 (1995) : 73]

49. The Head of Unit will manage the BTO's contribution to the Wetland Bird Survey which is a collaborative scheme with, WWT, RSPB and JNCC. [1971-066 (1995) : 76]

50. Close collaboration with the Department of Chemistry, University of York, will enable an EPR spectrometer to be used for Fenton reaction kinetics and for probing radical production by growing fungi. [1971-070 (1995) : 77]

51. The group is part of The Centre for Plant Membrane Biology in Adelaide and there will be considerable scope for collaboration with other researchers in this area. [1971-072 (1995) : 77]

52. Essential criteria include a Ph.D. or submission of thesis prior to the commencement of employment; experience in membrane electrophysiology or membrane transport research; a keen interest in salinity tolerance in plants, and demonstrated ability to work in a team and to actively collaborate. [1971-072 (1995) : 77]

53. To initiate research into the measurement of nitrogen mineralization in collaboration with the ADAS and the Institute for Grassland and Environment Research. [1971-077 (1995) : 78]

55. This is a collaborative project between IACR Rothamsted and the Department of Agriculture. [1971-091 (1995) : 81]

56. It is taught in collaboration with leading industrial and governmental organisations and is supported by industrial scholarships and research council studentships. [1971-101 (1995) : 83]

57. The successful applicant will be expected to give academic leadership to the whole group of ecologists, particularly in research, and to develop collaborative research links between the Schools and between the University and its associated institutes such as the adjacent John Innes Centre and the MAFF Fisheries Laboratory at Lowestoft. [1976-004 (1995) : 60]

58. Based at the Department's Newcastle General Hospital Unit, the post will involve travel from time to time to the Department's other Units/Sub-Units in the geographical area of the former Northern Region, both to ensure the effectiveness of training and to promote collaborative research and development. [1976-025 (1995) : 69]

59. The laboratory has close links with a number of divisions of Xerox and Rank Xerox, and also collaborates with other research groups in the UK, continental Europe and the US. [1976-027 (1995) : 69]

60. We are currently collaborating with Professor David Billington; at Aston University, and there is an opportunity for a first class synthetic chemistry graduate to undertake research in this area. [1976-042 (1995) : 73]

61. Identifying needs, seeing out new ideas and opportunities and developing strong, production links with collaborators and sponsors is vital to our future. [1976-053 (1995) : 75]

62. The programme is a collaborative venture between the Universities and the industrial companies of Brintons Ltd, Electrocraft Ltd, Robotec Ltd and Trio Motion Technology Ltd. [1976-054 (1995) : 76]

64. This work involves the Centre in close collaboration with the military user and industrial manufacturers of detection equipment and frequently involves field trailing in military scenarios. [1980-002 (1995) : 51]

65. To this aim, you will work in close collaboration with our researchers in the design and analysis of experiments, ranging from bench top formulations to large scale consumer studies. [1980-009 (1995) : 57]

66. Students gain invaluable industrial experience by working in close collaboration with the member companies. [1980-014 (1995) : 58]

67. The work is in collaboration with the Department of Obstetrics and Gynaecology, University of Cambridge, and will be based at our Hawkshead Campus near Potters Bar. [1980-035 (1995) : 64]

68. He/she will be able to collaborate with equally dedicated researchers in a number of associated fields (among others: noble-gas and stable isotope geochemistry, physical hydrogeology, those of the two new appointees). [1980-039 (1995) : 66]

69. Applications are invited for the above post, the holder of which will join an established research team working in a fast-moving, clinically relevant field investigating immunoglobulin gene rearrangements in multiple myeloma, in collaboration with the Royal Postgraduate Medical School. Experience preferred in PCR, RT-PCR, cloning and/or sequencing, but training will be provided. [1980-049 (1995) : 68]

70. Longer term R & D programmes, including academic collaborations in the UK and US, are also undertaken. [1980-063 (1995) : 71]

71. Applications are invited for a BBSRC CASE studentship, in collaboration with Glaxo Research and Development Ltd, to investigate the skeletal and cardiac muscle toxicity of p-phenylenediamines. [1980-064 (1995) : 71]

72. A postdoctoral Research Assistant is required to work on the project "The Synthesis and Characterisation of Di- and Tri-nuclear Copper Protein Analogues" in collaboration with Dr P Hubberstey. [1980-066 (1995) : 72]

73. The project is part of an academic collaboration between groups in London, Cambridge and Europe. [1980-074 (1995) : 74]

74. The successful applicant will be working in collaboration with Dr C Camacho-Hubner and Dr A Cotterill on aspects of the IGF-1 system in insulin resistance. Experience needed in cell culture techniques, standard radio-immunoassays and molecular biological techniques. [1980-074 (1995) : 74]

77. As part of a recently awarded Department of Health research project involving collaboration with the School of Animal and Microbial Sciences, the University is looking to appoint a Research Fellow for a period of up to 2 years. [1980-089 (1995) : 77]
78. An Industrial Collaborative Studentship, supported by the Medical Research Council and Cruachem Ltd, is available from 1 October 1995 in the laboratory of Professor Barklie Clements FRSE. [1980-097 (1995) : 79]

79. Applications are invited for an Industrial Collaborative Postgraduate Studentship funded by the Medical Research Council and Glaxo Group Research. [1980-105 (1995) : 80]

80. These studentships will involve industrial collaboration and will attract a stipend of up to £7,600 pa. [1984-008 (1995) : 53]

81. The project is a result of collaboration between the Departments of Physiology (Dr. S Wray, Ext. 5306) Veterinary Preclinical Sciences (Dr. C Vaillant, Ext. 4224) and the Small Animal Hospital (Mr J Williams Ext. 4298). [1984-029 (1995) : 61]

83. The post is available for four years and is part of a project funded under the LINK Cell Engineering Scheme in collaboration with BBSRC, MAFF, SOAFD and Nickerson BIOCEM Ltd. [1984-035 (1995) : 62]

84. The Laboratory undertakes developmental work as needed, sometimes in collaboration with other coagulation laboratories. [1984-042 (1995) : 65]

85. Applicants must have a minimum of a 2i BSc degree in Chemistry with a strong interest in synthetic chemistry. This project is in collaboration with Kingston University (Dr A Bandara). [1984-047 (1995) : 66]

86. There is also considerable scope for initiating and executing new research projects and for participating in collaborative research. [1984-051 (1995) : 68]

87. During the last 3 years our two departments have developed a successful collaboration in the field of sepsis and septic shock, and applications are now invited for this new position which is designed to consolidate and develop this programme. [1984-053 (1995) : 69]

88. Proposals that demonstrate a comparative approach, exploit new methodologies, adopt an integrated approach or involve collaboration between different laboratories are particularly encouraged. [1984-066 (1995) : 71]

89. There is excellent scope for collaboration with Molecular Biologists and Medicinal Chemists. [1984-067 (1995) : 72]

90. Department of Clinical Pharmacology and the Peart-Rose Hypertension and Cardiovascular Disease Prevention Clinic in collaboration with the Bagrit Centre [1984-073 (1995) : 73]

91. Opportunities for research include involvement with other departments in the Faculty, either in the form of collaborative projects or in the joint supervision of research students. [1984-079 (1995) : 74]

92. Collaborative work, the use of new technologies, and links with industry are all encouraged. [1984-085 (1995) : 75]

93. Based at University of Edinburgh, this will involve development of methodology for design and analysis of experiments in sensory perception, in collaboration with the Department of Psychology and Hannah Research Institute. [1984-098 (1995) : 78]
94. The project involves a collaboration between Alchemie Ltd – an expanding UK based polyurethane and epoxy resin manufacturer, that serves the prototyping and tooling industries and Dr D. M. Haddleton of the Chemistry Department in the University of Warwick. [1984-106 (1995) : 80]

95. Applications are invited for an EPSRC industrial case studentship with Microsulis Ltd, commencing in October 1995. The project, which will be in collaboration with the medical physics department of the Royal United Hospital, Bath, will be to investigate the design and use of a novel microwave applicator for medical therapy. [1984-107 (1995) : 80]

96. Applications are invited for a 3-year EPSRC CASE research studentship, to be held at the School of Psychology, University of Birmingham, in collaboration with British Aerospace Sowerby Research Centre, from October 1995. [1984-114 (1995) : 81]

98. This is a £1.6m collaborative programme between four universities and four industrial companies, led by Professor D. K. Bowen at Warwick. [1989-004 (1995) : 56]

99. Other duties will include quality assurance of digital geographical data, merging new maps with the Antarctic Digital Database as a framework for GIS applications, and collaborative R&D of digital generalisation techniques. [1989-005 (1995) : 57]

100. It has a substantial research thrust in sugarcane and collaborates closely with CSR Ltd. in a sugarcane breeding program in north Queensland. [1989-006 (1995) : 58]

101. Experience with the development and application of crop simulation models would be relevant. You must have well developed inter-personal and team skills, be able to form collaborative alliances with scientists in your own and other organisations, and be able to communicate effectively with the scientific community and industry. [1989-006 (1995) : 58]

102. You must have excellent communication and interpersonal skills to be effective in operating in a dynamic research environment, where major collaborative opportunities are possible with groups such as the newly formed CRC for Sustainable Sugar Production and APSRU. [1989-009 (1995) : 59]

103. UCLH is a leading centre for medical care, teaching, and research. The site is adjacent to University College London and there is substantial academic collaboration. [1989-010 (1995) : 60]

104. Applications are invited from candidates wishing to undertake a three year, full-time, NERC-supported PDRA position in collaboration with Dr J R Underhill at The University of Edinburgh. [1989-016 (1995) : 62]

105. Although the student will be based at The University of Edinburgh and under the direction of Dr J R Underhill, the Project is collaborative with Dr R L Gawthorpe at The University of Manchester. [1989-016 (1995) : 62]

106. This involves collaboration with authors, the in-house Editor and production staff to produce clear, accurate material in an appealing magazine format. [1989-019 (1995) : 63]

107. Applications are invited for a three-year EPSRC-funded postdoctoral research fellow in the area of heterogeneous catalysis and fuel cell research, in collaboration with UMIST. [1989-020 (1995) : 63]
108. Applications are invited for two research posts funded by EPSRC. The first project (in collaboration with Prof. J. P. Simons ERS) is focused on spectroscopic probing of conformational structure using picosecond and nanosecond laser techniques. [1989-023 (1995) : 63]

109. The second (in collaboration with Dr M. Brouard and Prof. Simons) is focused on the dynamics of laser photo-initiated reactions; in particular those of importance in combustion and in atmospheric chemistry. [1989-023 (1995) : 63]

110. The LINK scheme aims to promote high-quality, pre-competitive research collaborations between academia and industry in the cause of innovation and increased UK industrial competitiveness. [1989-034 (1995) : 67]

111. They will liaise with the barley industry, including growers, marketers, marketers and brewers, to ensure that the breeding objectives of the program remain relevant to industry needs; supervise staff directly responsible to the position and collaborate effectively with other team members. [1989-042 (1995) : 69]

112. The appointee will be active in expanding and strengthening research activities within the Genetic Resources Division, in expanding the scope of collaboration with NARS, and in representing the Institute within the CGIAR's system-wide Genetic Resources Program and other regional and global for a for genetic resources and biodiversity issues. [1989-060 (1995) : 73]

113. Close collaboration of the Genetic Resources Division, with the other Research Division of ICRISAT, the International Agricultural Research Centers, and the national agricultural research systems including community groups and industry, is essential. Current activities include collection, characterisation and evaluation, conservation and distribution of ICRISAT's mandate crops. [1989-060 (1995) : 73]

114. The Senior Social Scientist will be expected to lead social science research at ICLARM, ensuring multi-disciplinary collaboration both internally and externally. [1989-079 (1995) : 77]

115. She/he will also oversee the conduct of ICLARM studies on the impacts of its research and collaborate with CGIAR, NARS and ASI partner institutions in developing and developed countries, to deliver the most effective social science. [1989-079 (1995) : 77]

116. She/he must be able to demonstrate the ability to work in collaboration with other researchers and must possess high-level research management skills. [1989-079 (1995) : 77]

117. She/he must be able to demonstrate the ability to work in collaboration with other researchers and must possess strong scientific leadership and management skills. [1989-079 (1995) : 77]

118. She/he will implement a collaborative inland aquaculture research program with the Fisheries Research Institute of Bangladesh and other agencies. [1989-083 (1995) : 78]

119. Applications are invited for a Postdoctoral Fellowship to work on the development of "Clean Processes in Chemistry" in collaboration with Professor Martyn Poliakoff and colleagues. [1989-091 (1995) : 81]

120. Applications are invited from graduates in either chemistry, physics, engineering, material science or pharmaceutical science for a three-year project, in collaboration with Smithkline Beecham. [1989-092 (1995) : 81]

121. We are seeking a Ph.D. level scientist who as a Study Director will be responsible for planning and execution of in vitro and in vivo drug metabolism studies partly in collaboration with contract laboratories and actively assist the discovery laboratories in drug candidate finding and optimization. [1989-110 (1995) : 85]
122. You will also be expected to participate fully in a collaborative project with the Royal Botanic Gardens, Edinburgh on monographic studies of the conifers. [1989-113 (1995) : 86]

123. The work will involve: developing highly vectorised and parallel implementations of existing Fortran 77 and F00 codes suitable to a Cray type computer; the use of common programming practices and standards, to ensure portability and reusability of code, optimisation of codes with respect to single node performance, interprocessor communications, load balancing, and input/output, etc; and collaboration with scientists on algorithmic development, visualisation needs and design of new projects. [1993-002 (1995) : 52]

125. We are seeking to recruit a Scientific Officer to work in the AIDS Collaborating Centre. [1993-017 (1995) : 56]

126. The overall objective of this programme is the support of innovative pre-competitive Earth Observation applications research on a collaborative basis (industry and academia) targeted on end-user needs emerging from the Technology Foresight Programme. [1993-022 (1995) : 57]

127. By also collaborating in civil research projects, DRA forms strong commercial partnerships with industry. [1993-034 (1995) : 61]

128. There will be excellent opportunities for collaboration with research groups within the Department as well as other institutions, therefore good interpersonal and presentation skills are required. [1993-035 (1995) : 62]

129. They should also be able to assist/collaborate with other colleagues in the John Innes Centre in the purification and preparation of proteins and peptides. [1993-036 (1995) : 62]

130. This will include: liaising with industry to identify where additional research is needed and to foster close collaboration with academics; encouraging and assisting academics to submit research grant applications; monitoring the progress of funded research projects; and developing mechanisms to ensure effective technology transfer. [1993-054 (1995) : 67]

131. The project will be in collaboration with Professor Barry Halliwell (King's) and Dr Peter Bruni (Royal Holloway). [1993-059 (1995) : 68]

132. He/She should also have an established record of managerial and administrative responsibilities in the international arena, the ability to develop rapport with national and international peers, and the ability to be an effective spokesperson for collaborative research initiatives involving many stakeholders. [1993-069 (1995) : 71]

133. The appointee will be active in expanding and strengthening research activities within the Genetic Resources Division, in expanding the scope of collaboration with NARS, and in representing the Institute within the CGIAR's system-wide Genetic Resources Program and other regional and global for a for genetic resources and biodiversity issues. [1993-084 (1995) : 74]

134. Close collaboration of the Genetic Resources Division, with the other Research Division of ICRISAT, the International Agricultural Research Centers, and the national agricultural research systems including community groups and industry, is essential. [1993-084 (1995) : 74]

135. You will supervise the research of individuals at Sandwich and become involved in external collaborations in these disease areas. [1993-086 (1995) : 75]
136. It has an extremely successful record in attracting external funding (over £2 million per annum) and well developed collaboration with industry and with the Departments of Biology, Electronics and Physics at York. [1998-018 (1995) : 78]

137. Have you the skills to influence others; to listen to their problems, and to build strong collaborative relationships? [1998-021 (1995) : 79]

138. The work is funded by the EPSRC. Research will be conducted at Cranfield in the nanotechnology area of the School of Industrial and Manufacturing Science with close collaboration with several industries, including the DRA, Xaar, Intravascular Research, GEC Marconi and Morgan Matroc. [1998-023 (1995) : 80]

139. Over recent years, this well-established international pharmaceutical company has pursued a successful programme of strategic, global expansion and collaborations. [1998-032 (1995) : 83]

140. The project is a collaboration between Napier University and The Moredun Research Institute, Edinburgh. [1998-057 (1995) : 90]

141. Participation in national and international collaborative research with industry and academia is encouraged, as is open literature publication of research. [1998-087 (1995) : 98]

142. The post is available for a period of three years and will involve extensive collaboration with the sponsoring companies. [1998-092 (1995) : 99]

143. The post will involve collaborative work with the Departments of Soil Fruit and Perennial Crops and Cellular and Environmental Physiology. [1998-093 (1995) : 99]

144. The senior appointment will be required to work with minimal supervision and interact productively with external collaborators. [1998-094 (1995) : 100]

145. This EPSRC-funded post is available immediately for a fixed period of 18 months to work on the project 'Remediation of Contaminated Land'. It will be carried out in collaboration with the Department of Earth Sciences of the University of Leeds and Lancaster University. [2002-013 (1995) : 58]

146. There is ongoing collaboration and conditions are good for further interdisciplinary interactions with related research groups at the Department of Physics, e.g. with surface science at the Division of Synchrotron Radiation Physics and MAX lab (Prof I. Lindau), with optical research at the Division of Atomic Physics (Prof S. Svanberg), with condensed matter theory at the Dept of Theoretical Physics (Prof L. Hedin, retiring in 1995) and with various subfields at the Chemical Center in Lund, e.g. high-resolution electron microscopy (Prof J-O. Bovin). [2002-022 (1995) : 61]

147. In addition, the Lecturer will be expected to collaborate within the Molecular Microbiology Research Group, as well as establishing independent research programmes. [2002-037 (1995) : 66]

148. The Department has a large research community of over 70 postgraduates and 30 postdoctoral fellows working within state-of-the-art facilities with numerous collaborative links with other major international scientific institutions and industries. [2002-037 (1995) : 66]

149. The successful candidates will become part of a multi-disciplinary collaborative team focusing on molecular and cellular aspects of staphylococcal infections and housed in the Institute of Infections and Immunity. [2002-037 (1995) : 66]
150. The research, in collaboration with the University of Nottingham, will involve equipment development, catalyst characterisation, and kinetic studies, and would be appropriate to a good experimentalist with an organic or physical chemistry background. [2002-062 (1995) : 74]

151. You will be required to collaborate with existing staff on a variety of projects, so flexibility is essential. [2002-081 (1995) : 78]

152. A mucosal immunologist is required to join a very active collaborative research team funded by CSL Ltd. [2006-033 (1995) : 70]

153. The successful applicant will have an ability to work independently, to collaborate with other staff, and to supervise honours and graduate students. [2006-033 (1995) : 70]

154. The successful applicant will be a creative individual who is able to work independently and collaboratively as part of a large multidisciplinary team. [2006-038 (1995) : 71]

155. Proposals which demonstrate collaboration between specialists in biology and IT are particularly encouraged. [2006-065 (1995) : 79]

156. The programme is also seeking industrial collaborations in the form of 'partnerships with industry' grants. [2006-065 (1995) : 79]

157. You will have the opportunity to participate in research vessel voyages and to be involved in national and international collaborative studies. [2006-068 (1995) : 80]

159. The success of our Technology Services Business providing chiral synthetic solutions for Pharmaceutical Companies, and the recent extensive broadening of our capabilities in crystallization-based technology and asymmetric chemocatalysis, has created the need for a scientist to conduct screening programmes for both internal research and collaborative targets. [2006-082 (1995) : 84]

160. Applications are invited for this postdoctoral research fellow position, funded for 30 months by a joint MRC award between the two departments. The successful applicant will join a collaborative group in the two institutes working on aspects of liver metabolism in ischaemia and storage as it relates to transplantation. [2006-097 (1995) : 87]

2005

1. The role will involve close collaboration with systems and DBA as well as direct interaction with laboratory scientists and managers. [2481-005 (2005) : 54]

2. What’s more our collaborative culture – chemists and biologists work together on a wide range of therapeutic areas – gives you exposure to huge scope and variety, across companion, livestock and laboratory species. [2481-006 (2005) : 55]

3. Facilities include a dynamic new molecular biology suite, with collaborative access to other European molecular centres. [2481-031 (2005) : 62]

4. It is dedicated to driving and delivering applied research and development in collaboration with industry partners and with world-leading research universities. [2481-060 (2005) : 71]

5. The work is in collaboration with Dupont Teijin Films and involves laying down micro-fine coatings onto plastic substrates. [2481-060 (2005) : 71]
6. The Wilton facility will become the leading centre in the UK, collaborating with industry and other national centres. [2481-060 (2005) : 71]

7. Our culture is collaborative, our teams small and multidisciplinary, and our work stimulating and rewarding. [2481-061 (2005) : 72]

8. Through contact with relevant user groups, you will facilitate collaboration, develop opportunities for co-funding and partnership and promote knowledge transfer for the exploitation of the Programme results. [2481-065 (2005) : 73]

9. Applicants should have an established track record in research and will be expected to develop innovative projects and collaborate in existing studies. [2481-067 (2005) : 74]

10. The Department has wide-ranging interests in basic and applied research on human cancer and the close collaboration between scientists and clinicians facilitates the translation of fundamental knowledge to understanding and treatment of disease. [2481-074 (2005) : 76]

11. Jim Wallace, Scotland's enterprise minister, says the collaboration establishes "a critical mass of innovative and dynamic research expertise" that will create 15,000 skilled jobs and contribute around £750 million to the Scottish economy. [2485-001 (2005) : 54-55]

12. Responsibilities will include assisting with: MTAs, CDAs, consultancies and revenue sharing, the development of collaborations and sponsored research agreements. [2485-003 (2005) : 58]

13. Applications will shortly be invited from outstanding physicists for permanent academic positions and 4-5 year research posts within SUPA, an "Alliance for Excellence" formed to enhance Scottish physics research through co-operation and collaboration. [2485-017 (2005) : 61]

14. The service is run in close collaboration with Consultants with specialist interests in osteoporosis. [2485-022 (2005) : 63]

15. This will be to support service developments in digital imaging, and the use of digital image data within the Medical Physics Department and imaging/clinical departments within the Trust. Collaborative working with colleagues in Southampton and universities with whom the department has R&D agreements will be encouraged. [2485-022 (2005) : 63]

16. Training and operation of routine microscopy services will also fall within your remit along with the development of collaborative projects with the line manager. [2485-027 (2005) : 66]

17. This is an excellent opportunity for an experienced and enthusiastic individual to take a key role in the molecular diagnosis of haemophilia A & B disorders for the Oxford Haemophilia Centre, in a new collaborative working relationship with the Oxford Molecular Genetics Laboratory. [2485-030 (2005) : 68]

18. You'll also need to combine problem-solving skills and research rigour with teamwork, leadership and highly effective communication skills - as this challenging work involves extensive collaboration with UK and international research partners. [2485-051 (2005) : 75]

19. You will be expected to liaise with collaborators at the Centre and local Universities to develop existing programs and new lines of research. [2485-053 (2005) : 76]

20. The position involves a wide range of editorial tasks, including liaising with scientific collaborators, planning and designing new websites, and managing our in-house editorial processes. [2485-065 (2005) : 79]
21. You will work as a media developer, making a critical contribution to the quality of our courses, collaborating closely with academics and other specialists to deliver world-class learning materials across a wide range of media and disciplines. [2485-086 (2005) : 86]

22. Evidence of national and/or international collaboration in research. [2485-089 (2005) : 87]

23. The project, funded by the MRC and in collaboration with the Roslin Institute, is for a period of two years. [2485-098 (2005) : 89]

24. The research project is funded by the Food Standards Agency and includes collaboration with other scientists in Newcastle, the Institute of Food Research in Norwich and with clinicians at Wansbeck General Hospital. [2485-103 (2005) : 90]

25. The work will include assessment of the diet and nutritional status of the volunteers, laboratory analysis of colorectal mucosal biomarkers, liaison with collaborators and day-to-day management of the project. [2485-103 (2005) : 90]

26. It provides opportunities to develop research project skills and develop collaborative links with colleagues within the Medical Research Council and elsewhere. [2489-008 (2005) : 62]

27. You’ll also maintain close ties with international collaborative networks to stay abreast of emerging academic and commercial developments. [2489-012 (2005) : 63]

28. Taking a lead in all departmental HR-related internal and external communications, and promoting inter-departmental working and collaboration with the MOD, industry and academia will complete your remit. [2489-014 (2005) : 66]

30. In order to develop long-term collaborations and to stimulate use of the site by the wider marine science community, we offer the opportunity for researchers to visit Ardtoe to review the facilities on offer and to discuss research opportunities. [2489-037 (2005) : 73]

31. You will be part of a new collaborative research grant to explore the linkage via intelligent agents of predictive models with process descriptions driven by manufacturing data. [2489-041 (2005) : 74]

32. Working in two laboratories, South Manchester University Hospital Trust (in the academic respiratory medicine department) and the Centre for Molecular Medicine (on the main University of Manchester campus), you will be expected to drive the research programme forward within a large, well-funded and collaborative research group. [2489-042 (2005) : 75]

33. The post holder will work closely with researchers in the School, across key interfaces and will engage with business and industry to identify and promote potential collaborations, partnerships and funding opportunities. [2489-043 (2005) : 75]

34. The successful candidate will be expected to initiate and conduct a research programme in the area and form collaborative links with researchers at the newly established Conway Institute for Biomolecular & Biomedical Research at UCD. [2489-045 (2005) : 76]

35. This project is collaborative with UK and European partners [2489-051 (2005) : 77]

36. and the successful candidate must have good collaborative skills. [2489-051 (2005) : 77]

37. The successful candidate will have good collaborative skills, a track record for independent scientific writing. [2489-051 (2005) : 77]
38. **Collaborators**: University of Warwick Myton School Oundle School Kings High School for Girls King Edward VI School Warwick School [2489-074 (2005) : 82]

39. St Andrews, in collaboration with Dundee, has obtained £6M in funding from SHEFC and BBSRC to establish The Scottish Structural Proteomics Facility. [2489-078 (2005) : 83]

40. Candidates should be excellent communicators preferably with first-hand experience of involvement in a multi-site collaborative project. [2493-009 (2005) : 58]

41. As well as a high degree of technical expertise, you'll need the ingenuity and personality to lead collaboration and debate with our industrial, academic, and Government partners. [2493-030 (2005) : 65]

42. With a PhD in physics, electronic engineering, materials science or a related discipline, you will have experience in one or more of the following: MBE growth, ultra-high vacuum systems, semiconductor device fabrication and characterisation, and the ability to work as part of a team in an interdisciplinary environment and liaise with Government, EC and University collaborators. [2493-037 (2005) : 67]

43. We are seeking to appoint an enthusiastic and motivated post graduate to join the multidisciplinary research team coordinating the MRC/CRUK/ Dept of Health funded United Kingdom Collaborative Trial of Ovarian Cancer Screening (UKCTOCS) (website: [www.ukctocs.org.uk](http://www.ukctocs.org.uk)). [2493-044 (2005) : 69]

44. CASE studentships are collaborative projects with an industrial partner and as such the student will benefit from an increase in their stipend of £2,500 p.a. [2493-058 (2005) : 72]

45. This student will join Prof Thomson's group to develop computational models of cortical microcircuitry in collaboration with 2 large consortia. [2493-060 (2005) : 73]

46. Most projects are in collaboration with industry and other departments. [2493-061 (2005) : 73]

47. It is expected that you will develop novel assay systems and engage in molecular epidemiological studies, and actively collaborate with others within and outside of the Centre for Infections. [2498-004 (2005) : 50]

48. It is dedicated to driving and delivering applied research and development, in collaboration with industry partners and academic centres of excellence. [2498-006 (2005) : 52]

49. You will lead the development and production of novel flexible electronic components for the flexible displays market, working in collaboration with leading UK companies and universities. [2498-006 (2005) : 52]

50. You will be actively involved in collaborations with early users of Solexa’s technology to develop key customer relationships and demonstrate the utility of our integrated sequencing platform in different genomic applications. [2498-010 (2005) : 53]

51. In addition to generating high quality data for presentations and publications, your role will also involve liaison with external collaborators in leading-edge centres both in the UK and USA. [2498-010 (2005) : 53]

52. The first two roles will require travel to the USA and ongoing liaison and collaborations with colleagues in America. [2498-010 (2005) : 53]
53. Experience in applying kinetic modelling to a variety of challenging problems in drug development and prior evidence of successful collaboration with or within the pharmaceutical industry is essential. [2498-015 (2005) : 55]

54. The individual will be expected to provide informed opinion on multiple aspects of protein science and help formulate technical research priorities, undertake research, apply for government R&D funding and help establish industrial collaborations as biotherapeutics become increasingly important to the pharmaceutical industry. [2498-015 (2005) : 55]

55. The projects are carried out in close collaboration with leading academic and commercial clinical research organisations, focusing on establishing the safety profile pharmacokinetic/pharmacodynamic correlations, mechanism of action and proof of concept of the therapies tested. [2498-021 (2005) : 58]

56. The ability to work within a team and collaborate with other project teams is essential. [2498-026 (2005) : 59]

57. You will perform research & development experiments on new products in collaboration with others on the project team. [2498-026 (2005) : 59]

58. Led by the Moredun Research Institute, the programme is funded by the Wellcome Trust and is in collaboration with the University of Berne, Switzerland, the International Livestock Research Institute, Kenya, the Kenya Agricultural Research Institute, the Animal Diseases Research Institute in Tanzania and VETAID, an international livestock NGO. [2498-031 (2005) : 60]

59. Your proven track record includes evidence of winning funding for a significant scientific portfolio, leading multi-disciplinary teams, forming international collaborative partnerships and is supported with relevant scientific publications. [2498-032 (2005) : 61]

60. Experience of developing or using up-to-date materials testing and successful collaborative working within a team or between groups is also essential. [2498-051 (2005) : 68]

61. The work will take place in brand-new laboratories using the group’s state-of-the-art equipment and many opportunities exist for national and international collaboration. [2498-054 (2005) : 69]

62. The Group consists of around 30 academics, postdoctoral researchers and PhD students, who work in a dynamic and collaborative environment. [2498-054 (2005) : 69]

63. The Department collaborates in these areas with several other UCL centres, including The Medical School, The Institute of Neurology, The Institute of Orthopaedics at The Royal National Orthopaedic Hospital, The Eastman Dental Institute, The Centre for Materials Research, The London Centre for Nanotechnology (a £14 million centre set up by UCL jointly with Imperial College), and The School of Pharmacy of the University of London. [2498-066 (2005) : 73]

64. Publishing in scientific journals and seeking external funding for research, either alone or as part of an internal or external collaboration, you will make a significant contribution to the Interdepartmental Institute of Biomedical and Biomolecular Science that received a 5 rating in the last Research Assessment Exercise. [2498-067 (2005) : 73]

65. This project is in collaboration with Professor Grigg, Leeds University and is focussed on the biological assessment of novel anticancer medicines. [2502-041 (2005) : 68]

66. To address this challenge, four departments at the University of Leeds (Electronic and Electrical Engineering, Physics and Astronomy, Centre for Self-Organizing Molecular Systems (SOMS), and the Astbury Centre for Structural Molecular Biology) have received a four-year collaborative award from the UK Research Council’s Basic Technology Research Programme to develop generic approaches for
the derivatization of patterned surfaces with molecules whose activity can be interrogated and/or programmed by underlying electronic circuitry. [2502-042 (2005) : 69]

67. You will work collaboratively between the four Departments, augmenting the existing departmental research groups and drawing upon the outstanding infrastructure and facilities available. [2502-042 (2005) : 69]

68. This project is part of a multidisciplinary collaboration involving both academic and commercial laboratories attempting to develop therapeutic agents from neural stem cells. [2502-043 (2005) : 70]

69. Principal investigators: Professor J Govan (john.rw.govan@ed.ac.uk) and Dr J-M Sallenave in collaboration with clinical colleagues at the CF centres in Belfast, Wythenshawe Hospital, Manchester and Papworth Hospital, Cambridge. [2502-055 (2005) : 73]

70. This new post will support a project in collaboration with the National Cancer Institute of the United States, which is looking at chemotherapy and radiotherapy-induced second cancers. [2502-057 (2005) : 73]

71. The projects are interdisciplinary and may involve collaborative studies and use of facilities in Australia. [2502-064 (2005) : 75]

72. Within the School’s extensive Industrial Collaborative Programme, there is an opportunity for the successful students to work closely with companies (e.g. Baxi, E.ON, Gifford, Hoare Lea and Thermacore) in research areas including energy efficiency, renewable energy, energy conservation, and architecture technology. [2502-067 (2005) : 77]

73. The Council for the Central Laboratory of the Research Councils (CCLRC) got the lion's share of the initial round, receiving £4 million. It used this to set up the Rainbow Seed Fund, a collaborative venture capital scheme. [2506-001 (2005) : 52-53]

74. You will gain: • a portfolio of contracts - from small consultancy projects to multi-million pound international collaborations; [2506-040 (2005) : 69]

75. As well as the day-to-day work of managing the laboratory you will be expected to develop your own research and develop industrial and academic collaborations, potentially as a consultant. [2506-043 (2005) : 70]

76. It provides opportunities to develop research project skills and develop collaborative links with colleagues in the Medical Research Council and elsewhere. [2506-050 (2005) : 72]

77. You will also have excellent communication skills and be keen to develop research, consultancy and/or collaborative projects. [2506-054 (2005) : 73]

78. The project is concerned with the development and evaluation of new magnetic resonance imaging methods for the detection of brain degeneration in the elderly and involves collaboration between NIMAG and the Neuroimaging Research Group at King’s College London. [2506-069 (2005) : 77]

79. Strong communication skills are essential, as you will work in close collaboration with statisticians and colleagues in drug development. [2511-006 (2005) : 53]

80. This is a new post and we are looking for an enthusiastic, forward thinking science communicator with the skills to forge links and collaborations between various stakeholders and to raise awareness of the NC3Rs. [2511-018 (2005) : 57]

82. The NBL provides analytical support to HNR and its many collaborators, both national and international. [2511-020 (2005) : 58]

83. The project will build on existing collaborations with the local veterinary practices and stud farms in the Newmarket area. [2511-029 (2005) : 61]

84. Duties within the section involve guiding scientific output including both routine surveillance outputs and novel scientific analyses prepared for peer-reviewed publication; taking a strategic overview of surveillance developments to keep pace with the changing epidemic and ensuring that information collected remains relevant; making sure that section activities integrate within the wider HIV and STI department and the Centre for Infections, and liaising with external collaborators such as the institute of child health, academic researchers and NGOs working in the field of HIV. [2511-043 (2005) : 67]

85. The post holder will investigate the environmental stimuli for pre-maturity alpha-amylase (PMA) formation in wheat grain and develop a plant breeder's screen for PMA as part of a collaborative LINK project funded by DEFRA, HGCA and the agri-food industry. [2511-058 (2005) : 72]

86. You’ll work within regulations and with our partners, operating collaboratively and using your influencing skills to ensure environmental improvements. [2515-005 (2005) : 55]

88. Providing a mixture of technical and strategic input, you will also manage collaborations with external partner organisations. [2515-018 (2005) : 61]

89. At Wyeth people work together - collaborating and co-operating to create breakthrough therapies. [2515-027 (2005) : 65]

90. We are seeking someone to work with and support a collaboration of groups applying the muon spin resonance method to a number of problems in chemistry and chemical physics, particularly to probe radical states and chemical reaction kinetics. [2515-029 (2005) : 66]

91. The successful candidate will be expected to establish national and international collaborations, and manage research projects and teams. [2515-042 (2005) : 70]

92. The company has a unique mix of proprietary biology and chemistry capabilities and has recently signed two major revenue generating collaborations with blue chip pharmaceutical companies. [2515-054 (2005) : 74]

93. The aim of the project is to build teams of researchers who are able to design new analytical methods and equipment that will solve cutting edge proteomics research challenges, both within the University of Glasgow, and with our collaborators in the Universities of Edinburgh and Dundee. [2515-063 (2005) : 76]

94. CMRI has an established track record of funding for collaborative and multidisciplinary research and innovation activities and facilities from HEFCE, Research Councils (EPSRC), DTI, EU and industry sources. [2515-074 (2005) : 80]

95. Each student will be based primarily at one of the collaborating universities but will spend substantial periods in the partner laboratories, thereby benefiting from a wide range of expertise in the invention, development and application of proteomics methods. [2515-083 (2005) : 82]
In addition to the close interaction between the three lead laboratories, each is at the hub of extensive collaborative research networks bringing analytical chemical and biochemical skills to bear upon the characterisation of proteomes from microbes to higher plants and animals. [2515-083 (2005) : 82]

The studentship will provide training in synthetic chemistry and collaboration with the Optoelectronics Group, University of Cambridge. [2515-086 (2005) : 82]

You will join an internationally recognised team that collaborates with other world leaders and receives considerable support from external agencies. [2519-011 (2005) : 58]

This is a growing section and is currently involved in the development of a centralised lymphoma service in collaboration with the Hammersmith Hospital. [2519-028 (2005) : 64]

This will involve participation in: the design and operation of field studies, analysis of data from these studies and, the development of remotely-sensed and weather-driven models, in close collaboration with project modelling teams at IAH and, Oxford and Cambridge Universities. [2519-032 (2005) : 65]

Both posts will involve working closely with laboratory staff and collaboration with other bioinformaticians so you are expected to have good communication skills. [2519-036 (2005) : 66]

You will also participate in a range of research projects in this area, often collaborating with other laboratories in Europe and commercial organisations such as oil companies. [2519-040 (2005) : 68]

And our Science Branch has been key to achieving this, taking responsibility for commissioning research, collaborating with other professional organisations, and providing timely and impartial advice. [2519-047 (2005) : 70]

You will work closely with trial co-ordinators, collaborators, including pharmaceutical companies where applicable and be required to travel within UK and Ireland (some overnight stays may be required). [2519-060 (2005) : 73]

Applicants should have as a minimum qualification a HNC/HBTEC, in Biology or a related subject and must have a good grounding in molecular genetics laboratory techniques, preferably in an evolutionary biology context, and the ability to work independently but also to collaborate in a larger team. [2519-061 (2005) : 74]

The project forms part of a larger collaborative research programme on animal welfare. [2519-062 (2005) : 74]

Additionally, good interpersonal and communication skills will be particularly important due to the collaborative nature of this job. [2524-004 (2005) : 52]

Duties may include: working with the project leaders in preparing and implementing plans, delivering reports to customers and collaborators, arranging meetings and generally contributing as required. [2524-020 (2005) : 59]

The jobholder will also be required to provide an appropriate level of support for the ISIS User Programme, particularly but not exclusively on the engineering instrument Engin-X, and will be strongly encouraged to build collaborations with UK and foreign visiting scientists. [2524-021 (2005) : 60]

You will also assist the Team Leader in translation of customer requirements into detailed programmes of work, including placement of external research contracts and international research collaboration arrangements. [2524-045 (2005) : 66-67]
111. The work involves international collaboration and research, dealing with customers, military users, scientists, engineers and colleagues internal and external to Dstl. [2524-045 (2005) : 66-67]

112. Applications are invited for a three year position as project manager/genetic epidemiologist/bioinformaticist on an international collaborative research project, investigating the genetic basis of susceptibility and severity of meningococcal disease. [2524-049 (2005) : 69]

113. You will be working in close collaboration with the Hadley Centre running their carbon cycle GCMs and combining them with data assimilation techniques. [2524-051 (2005) : 70]

114. We are currently assembling a team of world-class research scientists to partner with cutting-edge research teams from our industry partners (Analog Devices, Amic, Enfer, Hospira, Becton Dickinson & Inverness Medical Innovations) and collaborating institutions (The Royal College of Surgeons Ireland (RCSI) in Dublin, the National Centre for Biomedical Engineering Science (NCBES) at NUI, Galway, and the Tyndall National Institute (TNI) in Cork). [2524-053 (2005) : 71]

115. The BDI team will be based primarily in DCU, with some researchers located in our collaborating institutions. [2524-053 (2005) : 71]

116. A new initiative within the Unit is the establishment of the Drug Discovery Group headed by Dr Steven Everett which aims to design and synthesise selective cancer chemotherapeutic agents and to pursue proof of concept studies in collaboration with the Unit's Transgenic Group. [2524-060 (2005) : 74]

117. The project will be undertaken in collaboration with the University of Southampton (Prof Richard Oreffo). [2524-062 (2005) : 74]

118. We have access to state-of-the-art University imaging facilities, including research-dedicated 1.5T and 3T MRI scanners, and close collaboration with the School of Computer Science and clinical research groups. [2524-071 (2005) : 77]

119. The Irish government has invested heavily to reverse the brain drain. Enterprise Ireland, a state agency, pays for research projects and R&D collaborations, and provides mentoring and advice for technology transfer. [2528-002 (2005) : 58-59]

120. The successful candidate will be expected to initiate and conduct a research programme in the area of food toxicology and form collaborative links with national and international research teams. [2528-006 (2005) : 61]

121. The ability to promote the NCSR to national/international collaborating groups/companies as well as to national and international funding agencies; [2528-009 (2005) : 63]

122. Lhasa Limited is a not-for-profit company and educational charity with an enviable reputation for customer collaboration. [2528-020 (2005) : 67]

123. An important part of the job is liaising with collaborating laboratories and sending them mutants. [2528-025 (2005) : 70]

124. You will be expected to interact closely with other members of the group and with other groups with whom we collaborate. [2528-025 (2005) : 70]

125. The post holders will work closely together and in collaboration with colleagues at Rothamsted Research, Scottish Crop Research Institute and Syngenta to explore the interactions between the plant and invertebrate model components and, with the assistance of two technical staff to be appointed in the second year of the project, conduct joint field experiments to test model predictions. [2528-051 (2005) : 81]
126. This project will use cDNA microarray screening to generate novel gene expression data, in collaboration with a similar MRC-funded project already started. [2528-059 (2005) : 84]

127. The project is funded by BBSRC and will be based in the IVF unit at St Mary's Hospital, in collaboration with Faculty of Life Sciences, School of Chemical Engineering and Analytical Science, University of Manchester and the University of York. [2528-059 (2005) : 84]

128. The UK work will be in close collaboration with several teams developing models for assessments of options for a more sustainable management of urban pollution. [2528-064 (2005) : 86]

129. This work is a unique academic-industrial collaboration with GlaxoSmithKline and will bring a combination of necessary expertise, facilities and resources to develop and characterise small molecule therapeutics to combat variant CJD and other forms of prion infection of humans [2528-069 (2005) : 87]

130. The project (in collaboration with scientists in Brazil) will investigate the process of pathogenesis in host plants infected by the basidio-mycete fungus Crinipellis perniciosa. [2528-079 (2005) : 90]

2006

1. Working in lab-based teams, you will benefit from our excellent facilities as well as opportunities for collaboration with other scientists throughout the global organisation. [2533-004 (2006) : 45]

2. You will also collaborate within other areas of the VLA, and first class research institutes to provide modelling and statistical inputs into projects on a wide range of pathogens, as well as leading and developing modelling projects from within the group. [2533-022 (2006) : 52]

3. The new professor is expected to manage and strengthen the Interdisciplinary Centre of Electron Microscopy (CIME), to develop strong interactions with the School of Life Sciences and to initiate research collaborations with industry. [2533-039 (2006) : 58]

4. As part of an exciting new collaboration, we are seeking applications for a Lecturer/Senior Lecturer in Risk Analysis. [2533-040 (2006) : 58]

5. You will be able to work as part of a team and be willing to work in collaborating institutions. [2533-043 (2006) : 59]

6. The grant is held jointly by the University of Oxford and Oxford Brookes University and the teams enjoy close collaboration with Sharp Laboratories Europe, based in Oxford. [2533-043 (2006) : 59]

7. The work will be collaborative with Royal Botanic Gardens, Edinburgh, so a willingness to operate as a team player and an ability to engage with a range of external stakeholders are also important. [2537-005 (2006) : 58]

8. As much of the work will be undertaken collaboratively, an ability to engage with stakeholders is an important quality. [2537-005 (2006) : 58]

9. This is a collaborative EPSRC funded, 4 year research post facilitated by the University College London (UCL) Civil and Environmental Engineering Department. [2537-007 (2006) : 59]

10. Working with and for diverse partners/collaborative organisations you will be able to prioritise and manage several different activities in parallel. [2537-028 (2006) : 68]

13. Based in our 5 rated (2001 RAE) department, your work will involve liaising with colleagues in the Institute, international collaborators and with the aquaculture industry. [2537-072 (2006) : 83]

14. The post provides an opportunity to work on a novel collaborative project led by Dr David J Begley (KCL) and Professor Bryan Winchester, Institute of Child Health (UCL). [2537-073 (2006) : 83]

15. Working collaboratively, you will have exciting opportunities to undertake innovative research, identify additional data/evidence for the model, and work with Modellers, Economists and Senior Policy Makers to help create a more "user friendly" model producing novel and influential analyses. [2537-082 (2006) : 85]

16. Join us, and you’ll collaborate across a variety of categories and functions in Unilever on multidisciplinary projects; you’ll exchange ideas for novel approaches to risk assessment; and you’ll learn from some of the brightest scientific minds around. [2541-004 (2006) : 57]

17. Show us that and we'll show you a very open, friendly and collaborative place to work. [2541-005 (2006) : 58]

18. Help us to protect the environment as we develop a more collaborative approach to tackling the nuclear legacy. [2541-012 (2006) : 62]

19. As part of a team of electronics & technology experts, you will work within a collaborative framework of key universities in the UK as well as the Philips European Laboratory. [2541-016 (2006) : 64]

20. The role will involve extensive customer collaboration and internal liaison with possibility of international travel. [2541-031 (2006) : 70]

21. You will have a record of ability to carry out both independent and collaborative research and to communicate these results clearly. [2541-050 (2006) : 78]

22. You can expect significant opportunities for career development, by leading collaborative research in application and development of bioinformatics in the field of biological medicines. [2541-050 (2006) : 78]

23. A willingness to travel within the UK and overseas is essential, as is the desire to participate in large multinational collaborations. [2541-062 (2006) : 81]

24. You should have an interest in developing collaborative links with animal welfare scientists and will also contribute to teaching, particularly on the Animal Behaviour and Welfare BSc programme. [2541-068 (2006) : 83]

25. The work is in collaboration with Jodrell Bank radio observatory, and the high-performance filters will be tested out on a number of their telescopes. [2541-075 (2006) : 85]

26. You will join a new Scottish collaboration of highly active research groups targeted at addressing some of the principal challenges involved in developing and understanding the properties of nanoparticles, and in exploring their potential applications. [2541-078 (2006) : 85]

27. You will be pivotal in this collaboration between the Protein Function Group and Muscle Research Group in the Faculty of Veterinary Science at Liverpool. [2541-084 (2006) : 87]
28. Funded by The Wellcome Trust, this is a collaborative project with the University of Bristol. [2541-091 (2006) : 89]

30. We are delighted to invite applications for our collaborative studentships between leading academic institutions and GlaxoSmithKline. [2541-097 (2006) : 92-93]

31. GlaxoSmithKline will be collaborating on over 80 PhD studentships this year. [2541-097 (2006) : 92-93]

32. The project is based at the Scottish Crop Research Institute in collaboration with Strathclyde University and leading companies in the soft fruit industry. [2541-101 (2006) : 94]

33. Another big step towards overhauling the working conditions of biomedical scientists will begin later this year when yet another grouping of the great and the good – this time the UK Clinical Research Collaboration – begins a review of the career structures of biomedical scientists and how these might be improved. [2545-004 (2006) : 56-59]

34. This will involve written and verbal communications and collaborations relevant to scientific/medical issues pertaining to the use of Freelite™. [2545-029 (2006) : 70]

35. During the project, the successful candidate will work in collaboration with computational chemists from three companies – Astex, AstraZeneca (Alderley Park) and Syngenta - to evaluate whether new scoring functions are delivering better enrichments in high-throughput virtual screening. [2545-034 (2006) : 72]

36. A co-operative and collaborative approach is also essential. [2545-036 (2006) : 73]

37. This will include the study of selected genes in collections of patient DNA samples as part of collaborative projects. [2545-051 (2006) : 80]

38. This will include the study of selected genes in collections of patient DNA samples as part of collaborative project. [2545-051 (2006) : 80]

39. The EPSRC plans to make a considerable strategic investment of £14.5 million in this area in the form of an Interdisciplinary Research Collaboration (IRC) that will be funded for an initial period of six years. [2545-063 (2006) : 84]

40. The Director will be responsible for generating matching funding in cash or in-kind contributions from collaborating partners, etc. [2545-063 (2006) : 84]

41. The project will be in collaboration with CPB-Twyford Ltd. ADAS and CIMMYT (Mexico). [2545-076 (2006) : 88]

42. The post holder will work on a collaborative DTI-funded project with the University and Morgan Advanced Ceramics, focusing on the R & D of new Metal Injection Moulding (MIM) compounds (specifically biologically compatible implantable grades of titanium). [2545-083 (2006) : 90]

44. Funding is provided by The University of Reading Research Endowment Trust Fund and in some cases a collaborative external partner. [2545-086 (2006) : 91]
45. **Collaborative external partner:** Immunobiology Ltd.  [http://www.immunobiology.co.uk](http://www.immunobiology.co.uk) [2545-086 (2006) : 91]

46. **Collaborative external partner:** W Jordan (Cereals) Ltd.  [http://www.jordans-cereals.co.uk](http://www.jordans-cereals.co.uk) [2545-086 (2006) : 91]

49. A PhD Studentship is available from autumn 2006 for a study at the Department of Animal Nutrition and Health of SAC in collaboration with Aviagen Ltd.  [2545-087 (2006) : 92]

50. The research project is funded by the EPSRC and involves the co-combustion of tyres and plastics with coal in a large scale experimental facility and is in collaboration with E-On (formerly Powergen).  [2545-095 (2006) : 94]

51. In recent years, the Swiss government has made boosting international collaboration a key part of its science strategy.  [2550-006 (2006) : 56-57]

52. The Large Hadron Collider is a global collaboration sited near the Geneva headquarters of CERN (the European Organisation for Nuclear Research).  [2550-006 (2006) : 56-57]

53. For example, she has set out plans to improve technology transfer by abolishing Germany's rigid divide of basic and applied research, and by encouraging international collaborations in the country's many academic, public and industrial research institutions.  [2550-007 (2006) : 58-59]

54. In recent years there have been intensive efforts to encourage international collaborations in science and technology.  [2550-007 (2006) : 58-59]

55. The UK is a rich source of partners. For example, German biotech Novalung is collaborating with Imperial College London to develop the first tissue-grown human lung cells, destined for lung regeneration and repair.  [2550-007 (2006) : 58-59]

56. Key responsibility for this role will be development of inhalation dosage forms internally, as well as in collaboration with external partners.  [2550-011 (2006) : 61]

57. The successful candidate will: […] • Use excellent communication skills and analytical thinking in leading collaborative projects  [2550-012 (2006) : 62]

58. Have international collaborative projects and have the opportunity to be located in Horsham, UK or Basel, Switzerland  [2550-012 (2006) : 62]

59. EMBL offers a highly collaborative, uniquely international culture. It fosters top quality interdisciplinary research by promoting a vibrant environment consisting of young independent research groups with access to outstanding graduate students and postdoctoral fellows.  [2550-014 (2006) : 63]

60. Also commitment to collaborative, interdisciplinary approaches to science is highly desirable.  [2550-015 (2006) : 64]

61. A commitment to collaborative, inter-disciplinarity approaches to science, and experience in project coordination are also highly desirable.  [2550-015 (2006) : 64]
62. You will also have management responsibility for six programme managers and their associated projects and deliverables, and will contribute to the external representation of the BGS; customer and other stakeholder liaison and networking; and UK applied geoscience marketing efforts, whilst working closely with universities to further high quality collaborative science. [2550-026 (2006) : 69]

63. In addition to knowledge of the management systems employed by the BGS and the NERC, you will have experience of running scientific research programmes, including large external commissions, and co-funded and collaborative programmes across organisations. [2550-026 (2006) : 69]

64. You will actively work with the research community to identify required technologies, as well as foster strong, collaborative links with academia, industry, other research councils and government agencies. [2550-035 (2006) : 74]

65. undertake broad R&D programmes in conjunction with industrial and academic collaborators from across Europe. [2550-043 (2006) : 76]

66. In relation to ongoing large studies, work may involve travelling to locations throughout East Anglia to query collaborators, information systems. [2550-053 (2006) : 80]

67. You will contribute to instruction at all levels in the courses leading to Masters and Honours degrees in Chemistry and Chemistry with Medicinal Chemistry Opportunities will be available to pursue a programme of research in collaboration with another member of staff. [2550-058 (2006) : 82]

68. A post is available in St Andrews, for up to three years, developing advanced magnetic resonance instrumentation. The project is part of a major European collaboration led by Frankfurt University into Dynamic Nuclear Polarisation (DNP) in high magnetic fields. [2550-061 (2006) : 83]

69. There are state-of-the-art research facilities and opportunities to collaborate with active research groups across the Institute. [2550-063 (2006) : 84]

70. The IMRC collaborates with a significant range of other departments across University College London and beyond. [2550-066 (2006) : 84]

71. This CASE Studentship carries a stipend enhancement of an additional £3,565 pa, and involves spending up to six months working at the collaborating company. [2550-070 (2006) : 85]

73. We offer a stimulating research environment, opportunities for international collaboration, strong links to industry and good employment prospects. [2554-014 (2006) : 64]

74. You will also be encouraged to pursue your own area of specialism and build on existing national and international collaborations. [2554-024 (2006) : 66]

75. Experience in a research environment together with a proven track record in independent research as evidenced by a strong publication record and international collaboration is required. [2554-024 (2006) : 66]

76. It's a high-profile role that will see you both coordinate the growth of the discipline internally and lead external collaborations - accessing samples, developing and applying analytical methods to tumours and assessing the impact of pre-clinical compounds. [2554-025 (2006) : 67]

77. A senior post directing the overall research, fundraising and collaboration of IITA's Western and Central African Region programs in partnership with the other R4D Director. [2554-043 (2006) : 76]
78. The Micronutrient Status Research Section (MSRS), at the MRC Collaborative Centre for Human Nutrition Research, Cambridge, focuses on dietary minerals and vitamins and their role in public health. [2554-044 (2006) : 76]

79. Deriving benefit from scientific and technological innovations and the establishment of productive linkages and collaborations with industry, the profession and government funded organisations. [2554-048 (2006) : 77]

80. You will work in close collaboration with Professor David Briggs, the leader of the GIS group and co-ordinator of the INTARESE project, to help advance and lead the work of the GIS group. [2554-070 (2006) : 85]

81. Imperial has been a pioneer in this field, and the project is part of a major BSN collaboration involving a large multi-disciplinary team. [2554-082 (2006) : 88]

82. Integration of the power sources in complete sensor nodes will be part of the work, in collaboration with project partners. [2554-082 (2006) : 88]

83. The PhD research student will collaborate with a postdoctoral RA to develop the new instrument and then to prove it in two studies concerned with the environmental chemistry of particulates and the biochemistry of cancer cells. [2554-088 (2006) : 90]

84. Two of the modules and a student research project are undertaken in collaboration with the Peninsula Medical School and the Biocatalysis Centre. [2554-091 (2006) : 91]

85. A unique opportunity is presented by a £22M investment from the Scottish Funding Council and nine participating universities in SAGES, the Scottish Alliance for Geoscience, Environment and Society. SAGES is a major research partnership involving the Universities of Aberdeen, Abertay, Dundee, Edinburgh, Glasgow, Paisley, St Andrews, Stirling, and SAMS UHI. SAGES creates a long-term collaborative programme with significant investment in infrastructure and people, focused on answering some of the pressing questions in climate and environmental change research. [2558-005 (2006) : 60-61]

86. You will have expertise in soil micromorphology and microanalysis, and develop collaborative work on soil carbon distribution and the influence of land use change on microstructure and decomposition processes. [2558-005 (2006) : 60-61]

87. As a mesoscale modeller you will have a strong background in modelling the atmosphere, and will wish to develop collaborations at the interfaces of the Earth System. [2558-005 (2006) : 60-61]

88. The post holder will act as the link between NuGO (The European Nutrigenomics Organisation) and the EARNEST networks, and as such will be expected to develop collaborations with members of the latter group. [2558-009 (2006) : 62]

89. Research Professorships provide long-term support for world-class scientists of outstanding achievement and promise, allowing them to focus on research and collaboration. [2558-014 (2006) : 64]

90. Collaborative in your approach and capable of networking with others at all levels and gaining their support for your activities, you’ll be keen to demonstrate where new technologies can be exploited to further our strategic objectives. [2558-025 (2006) : 68-71]

91. Responsible for the design and development of drug delivery devices, you’ll be an efficient and highly effective project engineer with a strong technical background and be capable of working in close collaboration with a wide range of both internal and external partners. [2558-025 (2006) : 68-71]
92. You will **collaborate** with other AZ scientists to ensure the delivery of late stage development projects and will also develop further technical expertise within this area. [2558-025 (2006) : 68-71]

93. **Collaborative** working with colleagues in Product Development and the wider AZ community will be essential to delivering high quality, robust and innovative dosage forms. [2558-025 (2006) : 68-71]

94. With wide ranging experience in this field, both technical and scientific, you’ll initiate and lead investigations in collaboration with PAR&D colleagues and other AZ functions. [2558-025 (2006) : 68-71]

95. As part of your remit of keeping us at the forefront of NMR spectroscopy, you will also represent AWE as part of domestic and international technical collaboration programmes. [2558-045 (2006) : 79]

96. The new researcher would be expected to conduct their own research activities in the field of short pulse interactions and develop new and novel science in collaboration with our user community in this rapidly expanding field. [2558-047 (2006) : 80]

97. You will join an established team of data managers working at Imperial College's International Collaborative Cancer Group based at Charing Cross Hospital in Hammersmith, West London. [2558-076 (2006) : 90]

98. You will be responsible for day-to-day liaison with several globally-located collaborative trials groups, so good written and verbal communication skills are essential. [2558-076 (2006) : 90]

99. This is a new fixed-term, full time post for up to 3 years within the Diet and Health Research team, located within the Population Health Group of the School of Medicine, Health Policy and Practice at UEA, to complement the growing research interest in Diet and Health within the School and drive forward a collaborative research programme with other partners at UEA and the BBSRC-funded Institute of Food Research. [2558-082 (2006) : 92]

100. You will work on a collaborative project on the structures of protein folding catalysts and their interaction with partly-folded substrates. [2558-083 (2006) : 93]

101. University College London (UCL) is a leading international provider of research and training in the field of bioprocessing especially in collaboration with the industrial sector. [2558-087 (2006) : 95]

102. We are seeking a highly motivated Scientist/Engineer offering a skill base in the marketing and enabling of the collaborations which underpin such research and training activity. [2558-087 (2006) : 95]

103. You will be encouraged to take the opportunity to conduct research independently or in collaboration with others in the School. [2558-088 (2006) : 95]

104. A fully funded three year Ph.D. studentship is available within the Centre for Chemometrics for the computational analysis of process reaction data obtained by on-line HPLC, in collaboration with industry. [2558-092 (2006) : 96]

105. A major part of the programme takes the form of a research project, which may be done in collaboration with national or international research institutes or with industry. [2558-099 (2006) : 98]

106. Responsibilities: […] • Facilitating research collaborations supported by the ALC [2563-006 (2006) : 52]

107. Personal attributes: • A natural leader who has an established track record in the development of strategic research collaborations, as well as negotiating funding support is required. [2563-006 (2006) : 52]
We encourage close collaboration between our researchers in our Research Network and promote the dissemination of research in this field through our Annual Network Meeting and publication of our Research Review. [2563-016 (2006) : 56]

The Researcher Exchange Programme (RXP) is a £500,000 initiative that provides individual researchers with awards covering travel and subsistence costs, and some consumables costs, needed to develop new scientific collaborations and contacts through exchange visits of between one week and three months' duration. [2563-017 (2006) : 56]

You will work in close collaboration with drug project teams and good teamwork abilities are required. [2563-018 (2006) : 57]

The incumbents will be required to perform the following duties: (a) to undertake front-line research in Earth System Physics of which the following are examples: seasonal and interannual climate fluctuations including El Nino and monsoons, and their predictability; the Earth hydrologic cycle; solid Earth geophysics with emphasis on seismology, space geodesy, tectonics and earthquake hazard mitigation; long-term global and regional climate changes involving interactions between the atmosphere, ocean, land and biosphere; (b) to organize seminars and other ICTP activities such as schools, workshops, conferences and topical meetings; (c) on teach in the ESP Diploma Course Programme and collaborate with the Associates and visitors to the ESP section, especially with those from developing countries. [2563-019 (2006) : 57]

The NBL provides analytical support to HNR and its many collaborators, both national and international. [2563-020 (2006) : 57]

The INDOX Cancer Research Collaboration was established in July 2005 to undertake clinical research into the aetiology and treatment of cancer in India and is a partnership between the University of Oxford and India's top 6 cancer centres. [2563-056 (2006) : 70]

We are seeking a research assistant to work with the INDOX Clinical Director, Dr Raghib Ali, on the research arising from the collaboration and fellowship programme through clinical trials, epidemiological and other types of clinical research. [2563-056 (2006) : 70]

We are particularly keen to attract a scientist to work collaboratively in developing research in the area of aetiological and/or therapeutic aspects of the tumour cell and its microenvironment but outstanding applicants from any relevant area of cancer biology will be considered. [2563-063 (2006) : 72]

Working with University partners and external collaborators, the co-ordinator will play a key role in the development of a large-scale energy research programme designed to address national and global needs. [2563-067 (2006) : 73]

The Division of Child Dental Health at Bristol Dental Hospital & School is looking to appoint a research technician to support the research of a number of clinical and academic staff, and to facilitate an ongoing collaboration with academic oral microbiologists. [2563-075 (2006) : 76]

The posts are available immediately and have arisen as a result of a collaboration between CAMS and a global industrial partner. [2563-076 (2006) : 76]

The Division of Child Dental Health at Bristol Dental Hospital & School is looking to appoint a research technician to support the research of a number of clinical and academic staff, and to facilitate an ongoing collaboration with academic oral microbiologists. [2563-079 (2006) : 77]

A collaborative BBSRC CASE funded PhD Studentship is available to study the function of the LKB1-AMPK signalling pathway in cancer. [2563-080 (2006) : 77]
121. The successful candidate will be responsible for the efficient operation of the Laboratory and strengthening its collaborative links. [2567-008 (2006) : 53]

122. You will also act as the key liaison point with the not-for-profit organisation Aluka who will create the collaborative end-product - an online database of Latin American plants.

123. You will also contribute to the export of data and images to an external collaborator. [2567-012 (2006) : 55]

124. The Researcher Exchange Programme (RXP) is a £500,000 initiative that provides individual researchers with awards covering travel and subsistence costs, and some consumables costs, needed to develop new scientific collaborations and contacts through exchange visits of between one week and three months' duration. [2567-044 (2006) : 68]

125. The introduction of novel research collaborations or themes to researchers would also be beneficial, along with the ability to communicate effectively to a wide range of personnel. [2567-048 (2006) : 69]

126. At Hazelwood you will collaborate with chemists and engineers on problems in formulation and systems development, performance testing, and process/product development. [2567-053 (2006) : 71]

127. The Research Facilitator will be the point of contact for climate science within the Mathematical, Physical and Life Sciences Division, helping to foster links and collaboration between research groups. [2567-066 (2006) : 78]

128. Successful applicants will join a major European research group in optics and photonics, based in extensive new laboratories, with many opportunities for national and international collaboration. [2567-069 (2006) : 78]

129. The role will work with colleagues in the Research Development and Collaborations team comprising of three Research and Innovation Managers responsible for marketing and supporting the knowledge transfer strategies in three University defined areas: (i) Advanced Engineering, Physical Sciences and ICT (ii) Life Sciences and Health, and (iii) Humanities and Social Sciences. [2567-077 (2006) : 81]

130. The postholder will work to market the Environmental Technologies capabilities within the University of Bath, engaging with companies across the South West of England to develop collaborative projects and ventures. [2567-077 (2006) : 81]

131. Specific responsibilities will be to provide a lead on collaborative projects between academic staff and businesses, facilitating the interactions and concluding any contractual arrangements. [2567-077 (2006) : 81]

132. The course will be run in collaboration with the BBSRC Institute of Grassland and Environmental Research (Aberystwyth). [2567-079 (2006) : 82]

133. Exclusively postgraduate, Cranfield University's courses are developed in collaboration with employers and industry specialists. [2567-081 (2006) : 83]

134. It will allow trials of cancer immunotherapy in collaboration with 3 major Italian hospital centers: Istituto Regina Elena of Rome, Institute for Cancer Research and Treatment (Fondazione G. Pascale of Naples) and the National Cancer Institute of Milan. [2572-003 (2006) : 15]

135. Wyeth found it an exciting place to work, with lots of people to collaborate with. [2572-006 (2006) : 58-61]

136. Science Foundation Ireland, the universities, the Industrial Development Agency and Enterprise Ireland are all collaborating. [2572-006 (2006) : 58-61]
137. As an *in vivo* expert, you'll share your knowledge in this inspiring and collaborative global research environment, as you supervise a small team carrying out in-house screening and proof of concept evaluations for a range of livestock research programmes. [2572-023 (2006) : 69]

138. Astex also has significant research collaborations with some of the world's largest pharmaceutical companies. [2572-038 (2006) : 76]

139. In a move towards greater transparency and accountability in the long-term management of radioactive materials, Nirex became independent from the nuclear industry in April 2005. Our work involves researching safe, environmentally sound and publicly acceptable solutions in the UK. This involves extensive international collaboration. [2572-040 (2006) : 77]

140. Working in close collaboration with a laboratory based production team, this will include the development and validation of new bio-process systems, improvement and scale-up of existing processes and the investigation of technical process/product failure and customer complaints related to bioprocess systems. [2572-042 (2006) : 78]

141. The successful applicant will join the team at the very centre of the Institute's activities. He or she will work alongside companies, other intermediate organisations and university departments to create collaborations that exploit the commercial potential of the mathematical sciences across a diverse range of business sectors. [2572-043 (2006) : 78]

142. Each year, we work collaboratively with other major agencies to set the agenda on key issues. [2572-044 (2006) : 79]

143. The VSU and the Moredun Pathology Group work in collaboration with the Scottish Agricultural College Veterinary Services to measure the incidence and distribution of known endemic virus diseases and investigate new disease syndromes. [2572-046 (2006) : 80]

144. Collaboration with other national and international surveillance organisations will be expected. [2572-046 (2006) : 80]

145. Networking closely with collaborators whilst leading the development and implementation of measurement strategies. [2572-051 (2006) : 81]

146. Currently, the unit is undertaking two large international collaborative projects in China of the environmental and genetic causes of common chronic disease. [2572-066 (2006) : 89]

147. We are seeking an experienced person to join the team of epidemiologists, clinicians, administrators and computer programmers to help co-ordinate these two large projects collaborated between Oxford and two major medical institutes in China. [2572-066 (2006) : 89]

148. This post is part of an exciting new collaboration and provides an excellent opportunity for an individual interested in interdisciplinary applied research in public health and infectious diseases. [2572-070 (2006) : 90]

150. Supervisory experience is necessary and a proven ability to work collaboratively. [2572-072 (2006) : 91]

151. Currently, the unit is undertaking two large international collaborative projects in China of the environmental and genetic causes of common chronic disease. [2572-075 (2006) : 92]
152. We are seeking an experienced person to join the team of epidemiologists, clinicians, administrators and computer programmers to help co-ordinate these two large projects collaborated between Oxford and two major medical institutes in China. [2572-075 (2006) : 92]

153. This project will use cDNA microarray screening to generate novel gene expression data, in collaboration with the CRUK National microarray facility at the Paterson Institute, Manchester. [2572-077 (2006) : 93]

154. You will be based in the IVF unit at St Mary’s Hospital and the Faculty of Life Sciences, in collaboration with the Christie Hospital and the Paterson Institute, and the University of Leeds. [2572-077 (2006) : 93]

155. Current collaborations between the Schools of Biology and Physics include the use of enhanced spin resonance techniques to determine biomolecular structure, function and interactions (www.st-and.ac.uk/~mmwave) and biophotonics including the controlled neuronal growth and sorting of cells by the use of light and also the production of novel caged compounds (www.st-and.ac.uk/~biophot). [2572-084 (2006) : 95]

156. You will be joining a large, vibrant and successful School (RAE rating 5) with a wide research base. Biology also has strong collaborations with all the major Science Schools at St Andrews. [2572-084 (2006) : 95]

157. It will allow trials of cancer immunotherapy in collaboration with 3 major Italian hospital centers: Istituto Regina Elena of Rome, Institute for Cancer Research and Treatment (Fondazione G. Pascale of Naples) and the National Cancer Institute of Milan. [2576-002 (2006) : 11]

158. GlaxoSmithKline, for example, limits the number of employees in some of its labs to foster a collaborative and autonomous culture. [2576-003 (2006) : 58-61]

159. Astex also has significant research collaborations with some of the world's largest pharmaceutical companies. [2576-007 (2006) : 63]

160. Self motivated and organised, you will monitor and audit all data obtained from external collaborators. [2576-018 (2006) : 68]

161. Candidates for both positions should have an academic record of scientific excellence, a flair for independent research and a strong interest in interdisciplinary approaches and collaboration. [2576-027 (2006) : 71]

162. The Cambridge Research Institute (CRI) is a collaboration between CRUK and the University of Cambridge. [2576-041 (2006) : 76]

163. With a projected £150 million budget, we play an active role in transforming early-stage research into a package of intellectual assets, complete with clear commercial ambitions for onward exploitation. Our expanding range of exciting, innovative programmes is carried out in a collaborative team culture that welcomes the freshest, brightest thinking. Now you can be part of it. [2576-044 (2006) : 77]

164. This post would particularly suit applicants who have an interest in the practical application of clinical research data and will provide the opportunity to work within a large and vibrant multi-disciplinary clinical research group and for international collaboration with experts in the field. [2576-078 (2006) : 87]
agents, where the goal is to identify new therapeutic targets and predictive biomarkers. [2576-079 (2006) : 88]

166. A Senior Research Associate position funded by the Wellcome Trust, is available to work within a collaborative project to sequence and analyse a large number of human and animal influenza viruses. [2576-089 (2006) : 90]

167. The sequencing collaboration involves the National Institute for Medical Research (NIMR), the Health Protection Agency (HPA), the Wellcome Trust Sanger Institute (WTSI), the Cambridge Infectious Disease Consortium (CIDC), and the Veterinary Laboratories Agency (VLA). [2576-089 (2006) : 90]

168. The ideal candidate will have experience in both the molecular and bioinformatic analysis of influenza viruses, and be confident in interacting with multiple collaborators in several centres. [2576-089 (2006) : 90]

169. The CTSU is one of the world's leading centres for research into the causes, prevention, and treatment of chronic diseases (such as cancer and heart disease) that are major causes of death. Currently, the unit is undertaking two large international collaborative projects in China of the environmental and genetic causes of common chronic disease. [2576-091 (2006) : 91]

170. We are seeking an experienced person to join a team of epidemiologists, clinicians, administrators and computer programmers to help co-ordinate these two large projects collaborated between Oxford and two major medical institutes in China. [2576-091 (2006) : 91]

171. The post is funded through the NERC Flood Risk from Extreme Events (FREE) science programme, with climate and hydrological collaborators at other UK institutions. [2576-093 (2006) : 91]

172. Among the government's first steps towards this has been the creation of a body to finance university-industry collaborations. [2580-003 (2006) : 52-55]

173. At his centre, engineers and neurologists are working side by side (interdisciplinary collaboration is common as a result of Denmark's compact research scene) to restore impaired sensory-motor functions in the brain, be it in people who have been paralysed by strokes or in the development of advanced prostheses for amputees. [2580-003 (2006) : 52-55]

174. This money will be used to build 14 new centres for research-based innovation, where businesses and scientists will collaborate at the country's universities or research institutes. [2580-003 (2006) : 52-55]

175. The centres have been spread across the country's academic institutions, in Oslo, Bergen, Trondheim, Tromso and as part of government's policy to build collaboration between universities and keeping all parts of the country economically vibrant. [2580-003 (2006) : 52-55]

176. University of Iceland in collaboration with the Fishing Company VSV Ltd and Rutgers University are offering a PhD fellowship that will focus on problems attached to the lobster fishery in Iceland. [2580-009 (2006) : 57]

177. It will be conducted in collaboration with VSV Ltd (a fishing company located in Vestmannaeyjar), Prof. Kenneth Able, Rutgers University and Prof. Mark Sullivan, Stockton College, NJ USA. [2580-009 (2006) : 57]

178. Joining our team of healthcare scientists and clinicians, you'll share our collaborative approach to providing haemato-oncology molecular diagnostic services. [2580-016 (2006) : 60]
179. You will have experience of working collaboratively across the academic, commercial and public sectors with backgrounds in medical technology, regenerative medicine and assistive technology. [2580-029 (2006) : 64]

180. A new post has arisen as part of a collaborative project on Bovine TB in the developing world. [2580-038 (2006) : 66]

181. This is a collaborative project between Rothamsted Research (RRes) and Warwick HRI (WHRI) and is in consultation with the breeders at CPB Twyford. [2580-048 (2006) : 69]

182. This is a collaborative project with Dr Neil Millar's laboratory at University College London, and although an employee of Rothamsted Research, the post-holder will be expected to conduct experiments at both sites. [2580-048 (2006) : 69]

183. You will also have experience in the respiratory and/or inflammation therapeutic area(s), preferably gained in a fast-moving, collaborative, industrial research environment. [2580-056 (2006) : 72]

184. You will be a PhD-level (or equivalent) scientist and Home Office licence-holder, with prior experience of working in a fast-moving, collaborative, industrial research environment. [2580-056 (2006) : 72]

185. With experience of collaborative, environmental or other relevant planning you will join a dispersed team of river basin planning coordinators charged with implementing river basin planning in Scotland. [2580-058 (2006) : 74]

186. St George’s University of London in collaboration with St George’s Healthcare NHS Trust [2580-060 (2006) : 76]

187. A collaboration of stroke clinicians and researchers have successfully obtained funding to establish the South-East England Local Research Network. [2580-060 (2006) : 76]

188. The appointee will also be responsible for coordination of the undergraduate degree programme in Biomedical Sciences in collaboration with the School of Health Sciences and Nelson R Mandela School of Medicine. [2580-062 (2006) : 77]

189. The Department has a strong research tradition and active collaboration with other research institutes in Singapore and with many leading Universities worldwide. [2580-067 (2006) : 78]

190. The Edinburgh Research Partnership is a joint Edinburgh/Heriot-Watt University collaboration, with six joint research institutes, and this is one of 12 new Chair positions funded by it. [2580-070 (2006) : 79]

191. You will have experience of working collaboratively across the academic, commercial and public sectors with backgrounds in medical technology, regenerative medicine and assistive technology. [2580-076 (2006) : 80]

2009

1. You will develop and manage relevant translational research and clinical trials activities aimed at improving transplant outcomes, communicating and collaborating with academic and clinical colleagues within the Birmingham region. [2689-009 (2009) : 49]

2. An honorary contract with the University of Birmingham would also be available, allowing the NHSBT laboratory to cement collaborative studies with the Institute of Cancer Studies and other departments. [2689-009 (2009) : 49]
3. You will also provide an internal resource collaborating with marketing teams to ensure smooth and successful launch of new products and management of existing products. [2689-011 (2009) : 50]

4. You will be able to demonstrate excellent Medical Affairs skills and the ability to work collaboratively across external and internal networks. [2689-011 (2009) : 50]

5. PML is a NERC Collaborative Centre and independent business with charitable status which has been an integral part of the UK's strategic marine sciences & technology capability for over 30 years. [2689-016 (2009) : 52]

7. This work will be validated by using precision mass comparators maintained at the BIPM and through collaboration with other research institutes. [2689-020 (2009) : 53]

8. In this senior-level role, you will demonstrate the ability to clearly define and lead strategy and utilising an open, collaborative working style, engage with key governance bodies within the organisation and external networks to bring this to fruition. [2689-021 (2009) : 54]

9. In addition, the role involves leading a small team to further develop and integrate the use of pharmacokinetic prediction models (both empirical and physiologically based (PBPK) into the local Discovery process and in collaboration with our worldwide initiative. [2689-025 (2009) : 56]

10. A willingness to collaborate with other Schools within the University and to play a key role throughout the academic community at Nottingham is essential. [2689-026 (2009) : 57]

11. The Collaborative Centre of Excellence in Understanding and Managing Natural and Environmental Risks is a newly-funded strategic partnership between the Research Councils and the Department for Environment, Food and Rural Affairs. [2689-029 (2009) : 58]

12. Based at Cranfield University, and working collaboratively across the remit of its funders, the Centre will provide a world-leading evidence base for risk-informed policy development within Defra and other government departments. [2689-029 (2009) : 58]

13. Our aim is to enhance our international standing with a significant investment in our premises, and by continuing to build on our successes, developing new areas of research and commercial activity with a range of partners and research collaborators. [2689-032 (2009) : 59]

14. The University of Luxembourg has established a strong collaborative research program with the Institute for Systems Biology, Seattle Washington, USA, [2689-033 (2009) : 59]

15. and the new Director will have the responsibility to lead this collaborative research effort while building the CSBL [2689-033 (2009) : 59]

16. and forging this joint international collaborative effort. [2689-033 (2009) : 59]

17. All Ph.D. projects involve collaborations between at least two internationally competitive and well-funded laboratories, with topics covering the whole range of neuroscience related to pain mechanisms and their control: molecular biology, cellular mechanisms, integrated systems neuroscience and human neurophysiology. [2689-039 (2009) : 61]

18. They work in a focused, highly collaborative culture and benefit from the training, development and inspirational colleagues that you'd expect to find in a fast growing, international company. [2694-003 (2009) : 52]
19. Good written and oral communication skills are also key attributes, as is the ability to collaborate and work as part of a team. [2694-009 (2009) : 55]

20. Essential to this role is the ability to form effective partnerships and establish collaborative links with a range of contacts, using excellent interpersonal, influential and communication skills. [2694-017 (2009) : 58]

21. They work in a focused, highly collaborative culture and benefit from the training, development and inspirational colleagues that you'd expect to find in a fast growing, international company. [2694-018 (2009) : 59]

22. You will also be jointly responsible for investigating new NMR methods through research collaborations and introducing them into Syngenta. [2694-018 (2009) : 59]

23. Collaborating with our suppliers, scientists and operational personnel across the globe, you'll visit other European sites as necessary. [2694-019 (2009) : 59]

24. In addition the post holder will also be required to work independently and collaborate on related research projects. [2694-029 (2009) : 63]

25. Your role is to ensure that Kew's expertise in restoration ecology is translated into practical outcomes, with the focus on developing initiatives for sustaining this work long-term and building on an established network of international collaborative partnerships and agreements. [2694-033 (2009) : 64]

26. To drive the delivery of our ‘Next Generation Science for Planet Earth’ strategy, we are seeking to attract highly influential leaders in climate science and biodiversity to drive these areas forward and promote collaboration. [2694-036 (2009) : 66]

27. You must be able to work collaboratively and make sound decisions in the delivery of quality and timely results. [2694-038 (2009) : 66]

28. Collaborative inter-disciplinary research has high potential for future research developments and the Department wishes to strengthen its support to develop such initiatives. [2694-040 (2009) : 68]

29. You will assist analysis of potential drugs and their metabolites in biological samples and report writing for DMPK studies in research and industrial collaborations. [2694-041 (2009) : 68]

30. Three of the appointments will be part of a new Centre for Graphene Science being established in a collaboration between the Universities of Exeter and Bath following the award of a £5 million grant from the EPSRC / HEFCE ‘Science and Innovation Awards’ scheme. [2694-042 (2009) : 69]

31. National Marine Facilities – Sea Systems (NMF-SS) is part of the National Oceanography Centre, Southampton, a collaboration between the Natural Environment Research Council (NERC) and the University of Southampton. [2694-047 (2009) : 71]

32. We seek a technician to work on a collaborative research project on the NMR of outer membrane proteins from the bacterial pathogen Neisseria meningitidis. [2694-048 (2009) : 72]

33. You must be able to demonstrate your commitment to excel in research, including the ability to publish at an international standard and ability to work collaboratively. [2694-049 (2009) : 72]

34. Cranfield Health offers a diverse range of MSc courses - all developed in collaboration with industry. [2694-054 (2009) : 74]
35. Extraordinary talent remains one of the big unexplained puzzles, which will only be solved by a true collaboration between sciences and humanities. [2698-002 (2009) : 13]

36. This is a collaborative project with the School of Clinical Sciences and the Department of Physics and will involve micro-plasma design and development, electrical characterisation, the plasma treatment and functionalisation of material surfaces for biological cell growth, and the study of micro-plasmas using advanced diagnostic tools. [2698-007 (2009) : 51]

37. TGAC will also foster collaborations with industry to promote practical applications of genomic science. [2698-019 (2009) : 57]

38. There will be emphasis on developing collaborative programmes with academic groups and with industry and stimulating new strategic initiatives involving both public and private sector organisations. [2698-019 (2009) : 57]

39. They work in a focused, highly collaborative culture and benefit from the training, development and inspirational colleagues that you'd expect to find in a fast growing, international company. [2698-025 (2009) : 59]

40. We are looking for an enthusiastic and forward thinking team player to manage the Centre's research funding activities and advance the NC3Rs capacity in this area by identifying novel opportunities for collaboration and innovation. [2698-026 (2009) : 60]

41. Now entering our sixth year, the Anglonordic Biotech Conference provides the ideal one-stop opportunity to discover, collaborate and invest in this success. [2698-035 (2009) : 62]

42. This major collaboration will conduct innovative and long-term research on steels relevant for bearing technologies. [2698-044 (2009) : 67]

43. This post has been developed in collaboration with the Greater Manchester Comprehensive Local Research Network (CLRN) and the University of Manchester, to promote and facilitate a portfolio of high quality well designed clinical research studies in the area of photobiology / photodermatology. [2698-047 (2009) : 68]

44. The post holder is expected to contribute generally to research on resource utilisation by plants and to develop an independent research programme through innovation and collaboration with scientists both within and outside SCRI funded by external grant income. [2698-054 (2009) : 70]

45. The post holder is expected to contribute generally to research on rhizosphere processes, and to develop an independent research programme through innovation and collaboration with scientists both within and outside SCRI funded by external grant income. [2698-054 (2009) : 70]

46. The University and the Institute for Systems Biology are developing a 5-year partnership within the Health Technologies plan from the Government of Luxembourg to enhance collaboration and transfer knowledge. [2698-056 (2009) : 71]

47. The University of Luxembourg is funding 12 research assignments at ISB to enhance collaboration, develop new techniques and methods and transfer knowledge between the institutions that will have an important effect on the future of health care. [2698-056 (2009) : 71]

48. Another call will be issued for applications as Ph.D. students in the framework of this UL-ISB collaboration. [2698-056 (2009) : 71]

49. Of course, candidates will have the opportunity to collaborate with the top scientists on cutting-edge research projects. [2698-056 (2009) : 71]
50. The research group is located in the BioScience Institute at UCC and has much international collaboration. [2698-058 (2009) : 72]

51. Working closely with academic researchers, you will identify and develop new opportunities for IP commercialisation and research collaboration, seek out funding sources and market the University's applied research and technical facilities. [2698-059 (2009) : 72]

52. The JIC has recently been awarded priority studentships from the Biotechnology and Biological Sciences Research Council (BBSRC) to support this collaboration and we are offering 4 studentships in the following areas: [2698-065 (2009) : 74]

53. The project will involve microbiological, molecular, and immunological approaches in vivo and in vitro and will provide the appointee the opportunity to collaborate across the scientific groups within the Institute. [2698-068 (2009) : 75]

54. One organisation fostering such collaborations is the University of Manchester's new Centre for Excellence for Biocatalysis, Biotransformations and Biocatalytic Manufacture (CoEBio3). [2702-005 (2009) : 46-47]

55. Candidates should have a Ph.D. degree (or equivalent work experience) in a scientific discipline relevant to research in Antarctica or the Southern Ocean; an established track record as a scientist and/or as a manager of scientific activities; extensive experience in international scientific research and collaboration; and excellent communication and organizational skills. [2702-015 (2009) : 53]

56. Candidates should have a Ph.D. degree (or equivalent work experience) in a scientific discipline relevant to research in Antarctica or the Southern Ocean; an established track record as a scientist and/or as a manager of scientific activities; extensive experience in international scientific research and collaboration; and excellent communication and organizational skills. [2702-029 (2009) : 60]

57. These are new projects and will be carried out in collaboration with the Health Protection Agency. [2702-030 (2009) : 61]

58. Responsibilities • Project management of external academic/industry collaborations for therapeutic Anticalin® discovery, and in-house research projects [2702-036 (2009) : 64]

59. Experience of collaborative research partnerships, with national governments and international agencies, and proven leadership and organisational abilities, are further essential requirements. [2702-047 (2009) : 67]

60. Cellular therapy is becoming an increasingly important part of mainstream medicine. In collaboration with Imperial College Faculty of Medicine we are now expanding our translational research capacity aimed at developing and introducing new cytotherapies into clinical practice. [2702-050 (2009) : 68]

61. The Job: The Agronomist will be a member of the multi-disciplinary research team of ICRISAT to develop and implement an integrated research program on cropping systems management under rainfed farming systems in collaboration with national and international partners under ICRISAT's Protracted Relief Program (PRP). [2706-017 (2009) : 53]

62. It will also involve working with biologists as part of ongoing collaborations. [2706-022 (2009) : 55]

63. NST has been designated as a World Health Organization Collaborating Centre for Telemedicine since 2002. [2706-036 (2009) : 61]
64. There will be close **collaboration** with national and international project partners making measurements of the oceanic nitrogen system. [2706-040 (2009) : 62]

65. You must have a Ph.D. (or equivalent) in a relevant area, have scientific programming experience, possess good organisational skills and have the ability to work **collaboratively**. [2706-040 (2009) : 62]

66. You will **collaborate** with related fields such as catchment science, in-stream chemical processes, sediment dynamics and ecological response. [2711-004 (2009) : 51]

67. You will also take part in studies that determine immunogenicity of experimental vaccines and assist with **collaborative** studies to validate new antibody standards as part of international standardisation and reference programmes. [2711-017 (2009) : 56]

68. The MRC Centre in Cambridge seeks an experienced Science Administrator to work in a team with an existing full-time Contracts Manager to manage contractual issues concerning research grants, **collaborations** and knowledge transfer on behalf of the MRC units in Cambridge. [2711-028 (2009) : 60]

69. The group has a track record in undertaking an extremely diverse range of projects and offers an exciting interdisciplinary environment for **collaborative** research utilising a wide range of sensing systems and platforms. [2711-033 (2009) : 62]

70. The portfolio comprises large, multi-centre international projects which are centrally coordinated by the portfolio Trial Management team at CTRU and regional co-ordination projects where CTRU collaborate with other NCRI accredited trials units or other international academic groups. [2711-043 (2009) : 65]

71. This four year postgraduate training programme of research and training leads to an EngD degree, and is delivered by five **collaborating** universities. [2711-050 (2009) : 67]

72. Research in Real Life Ltd is a private research company with established academic **collaborations** including Universities of East Anglia and Aberdeen and the International Primary Care Respiratory Group. [2715-006 (2009) : 50]

73. Plymouth Marine Laboratory (PML) is a dynamic and highly innovative, leading-edge provider, recognised nationally and internationally for the excellence of its research and in the provision of technologies and advice across the marine sciences, PML is an independent organisation with charitable status, privileged to be a NERC **Collaborative** Centre and an integral part of the UK's strategic marine sciences & technology capability for over 30 years. [2715-014 (2009) : 56]

74. You will develop links and **collaborative** projects with scientists in the UK community, notably in the NERC Centre for Earth Observation and will also have the opportunity to be involved in the wider research and development activities in the group. [2715-014 (2009) : 56]

75. **Collaborative** Centre of the Natural Environment Research Council. [2715-014 (2009) : 56]

76. We work in a **collaborative** and inspiring culture where personal contribution is rewarded and growth and development are at the heart of our culture. [2715-024 (2009) : 59]

77. Cranfield Health offers a diverse range of MSc courses – all developed in **collaboration** with industry and delivered by leading academics in our unrivalled facilities. [2715-045 (2009) : 66]

78. We work in a **collaborative** and inspiring culture where personal contribution is rewarded and growth and development are at the heart of our culture. [2719-007 (2009) : 49]

79. (+ **collaboration**) x Coca Cola = scientists – fermented research [2719-017 (2009) : 55]
80. You will be equally at home undertaking basic or applied research and your work will support the development and testing of new diagnostics, facilitate research carried out by all members of staff and expand upon existing academic collaborations. [2719-019 (2009) : 57]

81. In partnership with Cambridge University, the recent establishment of the first academic unit of medical microbiology in Cambridge offers an unrivalled opportunity for research collaborations. [2719-019 (2009) : 57]

82. Research in Real Life Ltd is a private research company with established academic collaborations including Universities of East Anglia and Aberdeen and the International Primary Care Respiratory Group. [2719-024 (2009) : 58]

83. Since NIOZ is a multidisciplinary institute, collaboration with geologists, biogeochemists and physicist is encouraged. [2719-035 (2009) : 62]

84. You will have a track record of collaborations with academia, industry, government and other NERC centres. [2724-009 (2009) : 53]

85. We work in a collaborative and inspiring culture where personal contribution is rewarded and growth and development are at the heart of our culture. [2724-015 (2009) : 57]

86. In addition, you will have excellent communication skills together with the ability to work collaboratively as part of a team. [2724-024 (2009) : 61]

87. You will develop the area of DNA virus research within the workgroup and build up collaborations across and beyond the Virology department. [2724-035 (2009) : 65]

88. The project involves a close collaboration with a research team at Cornell University. [2724-042 (2009) : 68]

89. The Tissue Fibrosis and Repair Research Group in the Institute of Cellular Medicine at Newcastle University in collaboration with GlaxoSmithKline, is pleased to offer this prestigious studentship from September 2009. [2724-053 (2009) : 71]

90. Working with business development staff, you will look for new opportunities for application of AO systems and technologies in collaboration with non-astronomy based institutions, in particular industrial partners and other research groups. [2728-012 (2009) : 58]

91. Your role will include collaborating with other BAS researchers and publishing and presenting research. [2728-019 (2009) : 61]

92. These plans describe the offerings, facilities and activities of each Department and the strategic partnerships and collaborations that each desires. [2728-021 (2009) : 61]

93. All our courses are developed in collaboration with industry and delivered by leading academics in our unrivalled facilities. [2728-040 (2009) : 70]

94. We're collaborating with car makers and other partners on an array of new technologies to improve efficiency while reducing emissions – like advanced lightweight car plastics, new liners to keep tyres properly inflated longer and our lithium-ion battery separator film that could speed the adoption of hybrid vehicles. [2733-003 (2009) : 22]

95. In addition to the main laboratory north of Zurich, PSI collaborates with an international high-altitude research station at Jungfraujoch, 3580 metres above sea level. [2733-006 (2009) : 60-61]
96. Dindoyal has already experienced Swiss collaboration, regularly meeting with a group at the Swiss Federal Institute of Technology in Lausanne. [2733-006 (2009) : 60-61]

97. The short distances between Switzerland's cities promotes collaboration, says Schwikowski. [2733-006 (2009) : 60-61]

98. In close collaboration with regulatory authorities you will represent Swiss toxicology in national and international scientific expert groups (e.g. ECETOC, ILSI-HESI). [2733-010 (2009) : 64]

99. Data will be analyzed in close collaborations between computational and experimental groups. [2733-011 (2009) : 64]

100. To support communication with collaborators you will maintain an internal ENCODE web page, assist in the preparation and delivery of activity, scientific and management reports, and provide updated implementation and financial plans, and supplementary reports as required. [2733-024 (2009) : 69]

101. The post is funded for one year by a BHF Centre for Research Excellence pump-primer award in collaboration with the Departments of Chemistry and Pharmacology, and the outcome may be used as the basis for further funding. [2733-040 (2009) : 74]

102. They will be well-organised with good attention to detail, and will be able to interact with post-doctoral scientists, technical staff and graduate students within our own and collaborating groups. [2733-040 (2009) : 74]

103. Applications are invited for the position of research assistant on an NERC funded research project "End-to-end Quantification of Uncertainty for Impacts Prediction" (EQUIP), a collaborative project involving 11 UK universities and research institutions. [2733-041 (2009) : 75]

104. The Nanotechnology and Advanced Materials Institute and the Computer Science Research Institute are working in partnership with the Dublin City University and various industrial collaborators in the area of point of care diagnostics and Connected Health. [2733-046 (2009) : 76]

105. You will be expected to maintain a high level of independent research and at the same time develop collaborative research activities both within Cardiff and externally with academia and industry. [2733-047 (2009) : 76]

106. The projects arise from collaborations between scientists from at least two NRP institutions and students will be registered with the University of East Anglia. [2733-051 (2009) : 78]

107. We offer a range of postgraduate opportunities – all developed in collaboration with industry and delivered and supported by leading academics in our unrivalled facilities. [2733-053 (2009) : 79]

108. At Shell, we’re working on several different projects around the world, including CO2SINK in Ketzin, Germany, a demonstration facility that is operated in collaboration with the European Union. [2737-002 (2009) : 15]

109. Candidates should have at least five years post-doctoral experience, a strong publications record in a relevant ecological field, experience of developing research programmes and a desire to work collaboratively to tackle complex research issues. [2737-008 (2009) : 56]

110. Collaborative Centre of the Natural Environment Research Council [2737-010 (2009) : 57]

111. We work in a collaborative and inspiring culture where personal contribution is rewarded and growth and development are at the heart of our culture. [2737-020 (2009) : 63]
112. You will also pursue individual and collaborative research in line with the group's scientific programme. [2737-022 (2009) : 64]

113. You will lead research into the development of novel PET radiopharmaceuticals, especially C-11 and F-18 labelled small molecules for cancer imaging and neuroligand receptor imaging, in collaboration with the Cancer Imaging Centre and the Institute of Psychiatry. [2737-028 (2009) : 66]

114. You will be based in the KCL Division of Imaging Sciences but will collaborate with other Divisions within KCL and its associated NHS Trusts. [2737-028 (2009) : 66]
Annexe 10-3 Occurrences de PARTNER / PARTNERSHIP dans CAEMS

1971

1. SRC contributes to that joint venture a studentship at its normal rates and the industrial **partner** is expected to make a financial contribution to the research or to provide facilities not available in the academic institution. [733-001 (1971) : 23]

2. Chemist, widely experienced in University and Industrial research, requires senior position with small company, or to acquire **partnership** in new venture. [763-048 (1971) : 347]

3. The Faculties **Partnership** [767-062 (1971) : 547]

1995

1. The project will be supported by the Plymouth Marine Laboratory (PML) via a NERC CASE equivalent studentship as part of their involvement in the Plymouth Marine Network (a research and teaching **partnership** between the PML and five universities to catalyse collaboration in Marine Science). [1959-005 (1995) : 46]

2. The project is consortium based with **partners** including Italian and Spanish companies; you will therefore be involved in considerable travel between the UK, Italy and Spain. [1959-031 (1995) : 52]

3. Breeding of improved varieties of white clover for subsequent development by a commercial **partner** will be a major focus of the post. [1959-058 (1995) : 59]

4. Research will focus on the basic understanding of the mechanisms and products that are obtainable from this series of reactions and will be undertaken in collaboration with industrial **partners**. [1959-079 (1995) : 64]

5. The project will involve development of photon counting detector systems using microchannel plate intensifiers in association with electronic image readouts, and will be undertaken in collaboration with an industrial **partner**. [1963-049 (1995) : 62]

6. Bidwells is a major **Partnership** of Chartered Surveyors, managing over 1 million acres of land within the UK. [1963-076 (1995) : 67]

7. The post will require the successful candidate to liaise closely with **partners** in France, Denmark and Germany including regular review meetings. [1967-010 (1995) : 65]

8. The project is in collaboration with other industrial and academic **partners**, based in the UK and Europe, and is funded by the Engineering and Physical Sciences Research Council and the European Union. [1967-041 (1995) : 74]

9. DRAL offers a unique research environment, where more than 1,000 scientists and engineers conduct a very broad based programme in close association with UK Universities, Industry, Government Departments and International **Partners**. [1971-003 (1995) : 55]

10. This is a collaborative project with research laboratories and industry in France, Italy and Denmark, and the post would involve coordination and travel between the **partners**. [1971-023 (1995) : 62]

11. Working directly to the Chief Executive, with full Corporate support, you will play a vital role in advising the Council on the development of a Local Agenda 21 strategy, including the formation and promotion of effective **partnerships** within the community. [1971-053 (1995) : 72]
12. Applicants should have a good understanding of science and its application through the creation of partnerships with users. [1976-011 (1995) : 62]

15. Philips is the major partner in a consortium dedicated to the development and commercial production of LCDs in Europe, a market which is growing by 30% p.a. [1984-049 (1995) : 67]

17. Being a partner in both the Co-operative Research Centre (CRC) for Sustainable Sugar Production and the joint Queensland Department of Primary Industry/CSIRO Agricultural Production Systems Research Unit (APSRU), the Division has in place established research teams closely linked to its stakeholder industries. [1989-009 (1995) : 59]

19. Final proposals will need to be submitted with research base and industrial partners in place, [1989-034 (1995) : 67]

20. a commitment from the industrial partner to contribute at least 50% of the costs of the research, and a clear project-management plan with defined objectives, timetable and deliverables, including plans for exploitation. [1989-034 (1995) : 67]

22. She/he will also oversee the conduct of ICLARM studies on the impacts of its research and collaborate with CGIAR, NARS and ASI partner institutions in developing and developed countries, to deliver the most effective social science. [1989-079 (1995) : 77]

23. The International Relations Coordinator will be responsible for promoting productive and mutually beneficial linkages between ICLARM and its institutional partners in national research systems (NARS), advanced scientific institutes, other CGIAR centers, government organisations and NGOs. [1989-079 (1995) : 77]

24. She/he will also help establish ICLARM's strategic directions in research and related external partnerships [1989-079 (1995) : 77]

25. and advise the Director General and other Board of Trustees on priorities and initiatives to enhance ICLARM's partnership arrangements. [1989-079 (1995) : 77]

26. She/he will be expected to maintain an ICLARM register of key NARS and other partners and act as a focal point within ICLARM for international liaison activities. [1989-079 (1995) : 77]

27. The Department of Trade and Industry, the Natural Environment Research Council and the Department of the Environment, as partners within the British National Space Centre (BNSC), have launched the BNSC Earth Observation LINK programme. [1993-022 (1995) : 57]

28. Approximately eight projects will be funded each year. Applications for project support must come from a partnership [1993-022 (1995) : 57]
29. which includes at least one industrial **partner** (in association with an end-user) [1993-022 (1995) : 57]

30. and at least one science **partner** (university or government funded research lab). [1993-022 (1995) : 57]

31. At least one of the **partners** must be able to exploit the results of the research to bring the work closer to market. [1993-022 (1995) : 57]

32. By also collaborating in civil research projects, DRA forms strong commercial **partnerships** with industry. [1993-034 (1995) : 61]

33. You will also be involved in the presentation of projects to senior management and potential **partners**. [1998-069 (1995) : 93]

34. Anagen (UK) Limited is the subsidiary of Anagen PLC engaged in the development and supply of immunoassay systems and reagents to a number of worldwide corporate **partners**. [1998-096 (1995) : 101]

35. We are seeking an Assay Support Manager, whose principal responsibilities are: [...] - to provide the technical interface with our corporate **partners** [1998-096 (1995) : 101]

36. The post will involve close liaison with regulatory and manufacturing personnel - both within the company and with alliance **partners** - and responsibility for conducting inspections. [2002-002 (1995) : 54]

37. You will be responsible for building customer **partnerships** and working together to improve quality standards. Initiative and strong leadership abilities are essential as are excellent communication and interpersonal skills enabling you to interact with a variety of people across the organisation. [2002-048 (1995) : 69]

38. INFOCUS aims to bring together innovative opto-electronic hardware developed by another **partner**, imaging devices and treatment planning software to enhance the clinical application of conformal radiotherapy using multileaf collimators (MLC). [2002-068 (1995) : 75]

39. The integration of software / results from other INFOCUS **partners** will be required. [2002-068 (1995) : 75]

40. The programme is also seeking industrial collaborations in the form of '**partnerships** with industry' grants. [2006-065 (1995) : 79]

41. The unit, which has the active support of a number of NHS providers, industrial **partners** and academic institutions, will be sited within the Academic Centre of Frenchay Hospital. [2006-077 (1995) : 82]

---

**2005**

1. Rather than bench work, you'll focus on assessing contracts and the suitability of CROs to **partner** Pfizer, so it's important that you can travel widely within Europe and have the confidence to demand high standards from external bodies. [2481-006 (2005) : 55]

2. Proven ability to win business by developing successful proposals or **partnerships** and experience of negotiating with clients. [2481-015 (2005) : 58]
3. In addition to possessing good IT skills, you must be able to influence representatives of industry and have excellent communication skills with both internal and external partners. [2481-033 (2005) : 63]

4. Project management, expertise and good written and oral communication and negotiation skills, with both internal and external partners are essential. [2481-033 (2005) : 63]

5. Its aims are to secure the conservation and enhancement of Scotland's natural heritage, and to foster its understanding and enjoyment, through partnership working and local delivery of its functions. [2481-036 (2005) : 64]

6. The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2481-041 (2005) : 66]

7. You will provide GIS based environmental data handling, analysis, mapping and interpretation skills in support of corporate GIS needs and liaise and communicate, as required, with internal and external partners. [2481-058 (2005) : 71]

8. CPI, the Centre for Process Innovation, is moving forward as the UK's pre-eminent innovation and resource partner for the chemical using industries. [2481-060 (2005) : 71]

9. It is dedicated to driving and delivering applied research and development in collaboration with industry partners and with world-leading research universities. [2481-060 (2005) : 71]

10. The role • Lead technical liaison with industrial partners, while managing team activities and ensuring clear communication of milestones and deliverables [2481-060 (2005) : 71]

11. Through contact with relevant user groups, you will facilitate collaboration, develop opportunities for co-funding and partnership and promote knowledge transfer for the exploitation of the Programme results. [2481-065 (2005) : 73]

12. CK Associates is a specialist recruitment consultancy working in partnership with some of the best known and most exciting companies across the UK. [2485-006 (2005) : 59]

13. In its launch phase, SUPA will offer the following posts (to be held within its partner institutions) to help develop the Alliance through targeted initiatives: 4 Professorships, 16 Readers/lectureships, 14 SUPA Advanced Fellowships, a SUPA Chief Executive and a Director of the SUPA Graduate School; plus 8 SUPA Prize Studentships per annum. [2485-017 (2005) : 61]

14. The task of SNH is to secure the conservation and enhancement of Scotland's natural heritage - the wildlife, habitats and landscapes which have evolved through the long partnership between people and nature. [2485-021 (2005) : 62]

15. Start date: mid-April 2005 Covering letter plus CV to: Emma Clark at The Research Partnership, 45 Seagrave Road, London, SW6 1SB. [2485-035 (2005) : 70]

16. E-mail: emmac@researchpartnership.com [2485-035 (2005) : 70]

17. You will promote co-operation between the national and local partners, ensuring needs are reflected in national reporting and review processes, and that there is regular liaison between all parties concerned. [2485-049 (2005) : 74]

18. You'll also need to combine problem-solving skills and research rigour with teamwork, leadership and highly effective communication skills - as this challenging work involves extensive collaboration with UK and international research partners. [2485-051 (2005) : 75]
19. The Unit is a partner in several major European research initiatives such as EuroHear, EUREGENE and is aiming to attract full-time (unless otherwise stated) dynamic, hard working researchers for these challenging projects. [2485-054 (2005) : 76]

20. You will also implement new national list arrangements and plant breeders' rights arrangements for ornamental species, and manage contracts and relationships with delivery partners. [2485-072 (2005) : 81]

23. Investing in Global Partnerships [2485-121 (2005) : 95]

24. Partnering [2485-121 (2005) : 95]

25. Source new business partners & suppliers from around the world [2485-121 (2005) : 95]

26. Represent Lubrizol's Engine Oils technology at the customer interface in partnership with our Sales team [2489-038 (2005) : 73]

27. Reporting to the project co-ordinator, Professor Carlo Leifert, you will be responsible for managing the collection of WP and subproject-specific technical reports, the preparation and timely submission of consolidated technical reports to the European Commission and the co-ordination of exchanges or project deliverables between partners. [2489-040 (2005) : 74]

28. The output will be tested against processes run at pilot-scale at UCL and full-scale data from an industrial partner. [2489-041 (2005) : 74]

29. The post holder will work closely with researchers in the School, across key interfaces and will engage with business and industry to identify and promote potential collaborations, partnerships and funding opportunities. [2489-043 (2005) : 75]

30. The School is a major partner in the Biomedical and Pharmaceutical Sciences Research Group (BPSRG), which made a joint submission with staff from St George's Hospital Medical School for the last RAE, which resulted in a 3a rating. [2489-047 (2005) : 76]

31. This project is collaborative with UK and European partners and the successful candidate must have good collaborative skills. [2489-051 (2005) : 77]

33. This 2-year post is funded by the Dept of Trade and Industry and Lein Applied Diagnostics Ltd under the ‘Knowledge Transfer Partnership’ scheme. [2489-054 (2005) : 78]

34. The post will be partly based in the Dept of Chemical Pathology, Guy's Hospital Campus of KCL and partly at the industrial partner, Lein Applied Diagnostics. [2489-054 (2005) : 78]

35. The duration of the post is two years full-time and is funded by the Department of Trade and Industry (Knowledge Transfer Partnership) and Lein Applied Diagnostics Ltd. [2489-054 (2005) : 78]

38. Roslin Institute is a central **partner** in the European Animal Disease Genetics Network of Excellence (EADGENE), an EC Framework VI-funded project coordinating research on host-pathogen interactions. [2493-009 (2005) : 58]

39. The successful candidate will work within the Institute's Bioinformatics group, and will interact with other key staff at Roslin involved in research relevant to EADGENE, as well as external **partners**. [2493-009 (2005) : 58]

40. The Agency (in **partnership** with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2493-021 (2005) : 61]

41. As well as a high degree of technical expertise, you'll need the ingenuity and personality to lead collaboration and debate with our industrial, academic, and Government **partners**. [2493-030 (2005) : 65]

42. CASE studentships are collaborative projects with an industrial **partner** and as such the student will benefit from an increase in their stipend of £2,500 p.a. [2493-058 (2005) : 72]

43. With Breakthrough, the Research Centre and appropriate **partners**, you will devise a scientific research programme investigating complementary therapy use and breast cancer treatment. [2498-003 (2005) : 50]

44. The Agency (in **partnership** with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2498-004 (2005) : 50]

45. The Centre for Process Innovation (CPI) is moving forward as the UK’s pre-eminent innovation and resource **partner** for the chemical using industries. [2498-006 (2005) : 52]

46. It is dedicated to driving and delivering applied research and development, in collaboration with industry **partners** and academic centres of excellence. [2498-006 (2005) : 52]

47. The role • Commission, operate, maintain and improve the performance of a sputter coating rig, liaising closely with the industrial **partners** to ensure clear communication of milestones and deliverables [2498-006 (2005) : 52]

48. As a small company, working with larger marketing **partners**, we are looking for innovative, flexible people with the skills and foresight to ensure our success. [2498-012 (2005) : 54]

49. The successful applicants will work in close proximity to industrial **partners** during all phases of software development. [2498-015 (2005) : 55]

50. Working within a scientific development team, your role will be to contribute to the formulation development of R&D programmes — liaising with marketing and regulatory functions in affiliates worldwide, as well as industrial and academic **partners**. [2498-020 (2005) : 57]

51. You’ll help guide our own activities at a regional level, influence our **partner** organisations, and support the Board in bringing the issues to the wider political arena. [2498-028 (2005) : 60]

52. Your proven track record includes evidence of winning funding for a significant scientific portfolio, leading multi-disciplinary teams, forming international collaborative **partnerships** and is supported with relevant scientific publications. [2498-032 (2005) : 61]
53. The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2498-037 (2005) : 64]

54. We work in partnership with universities to invest in people and scientific discovery and innovation. [2498-042 (2005) : 65]

55. The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. [2498-044 (2005) : 66]

56. Reporting to the Project Co-ordinator, Professor Carlo Leifert, you will be responsible for managing the collection of WP and subproject-specific technical reports, the preparations and timely submission of consolidated technical reports to the European Commission and the co-ordination of exchanges or project deliverables between partners. [2498-058 (2005) : 70]

57. With significant work experience and a relevant degree or equivalent, you’ll need thorough knowledge of water resources, but equally important will be the ability to negotiate effectively with external partners, to influence their decisions and outcomes. [2502-002 (2005) : 54]

60. You will be expected to develop partnerships with external bodies and contribute to the identification, prioritisation and management of research and development in relation to human health and the environment. [2506-002 (2005) : 54]

61. For further information and an application form please contact Amanda Hossack at Penna, our recruitment partners on 0131 446 2024 (24hrs) [2506-012 (2005) : 58]

62. Customer and supplier partnering to lead project opportunity definition and project selection, you’ll develop and define success criteria and metrics. [2506-026 (2005) : 65]

63. The Institute staff achieved the highest possible rating (5**A) in the recent UK Research Assessment Exercise. PEALS Research Centre was established in 1999 as a partnership between the Universities of Durham and Newcastle and the International Centre for Life. [2506-045 (2005) : 71]

64. A graduate with experience in delivering training or teaching at some level, you will have outstanding interpersonal skills to form effective partnerships within and outside the department. [2506-046 (2005) : 71]

65. Our partner NHS Trusts are Guy’s and St Thomas’, King’s College Hospital, University Hospital Lewisham and the South London and Maudsley Hospital which serve a diverse patient population in excess of one million people. [2506-055 (2005) : 74]

66. As part of the Business Development Team, the postholder will play a pivotal role in fulfilling King’s mission to transfer knowledge to business and the wider community, by creating new partnerships and strengthening existing relationships with industry. [2506-055 (2005) : 74]

67. You will engage with world-class scientists across a range of divisions in the Health Schools at King’s to facilitate relationship-building with external partners in the pharmaceutical and biotechnology sectors to generate new business. [2506-055 (2005) : 74]
68. Focusing on the development of the Orchid DNA forensic business, you will promote our services to police forces across the UK - proactively identifying and exploiting business opportunities, implementing joint strategic plans with our strategic business partner Forensic Alliance, and representing the company at high profile forums. [2511-017 (2005) : 57]

69. At all times, you will maximise sales and profitability, whilst driving account management service standards and partnering our US forensic business unit and central Marketing function to deliver a visionary and effective UK marketing plan. [2511-017 (2005) : 57]

70. You will naturally be familiar with dealing with public sector and/or police customers and working with strategic partners, and will bring broad knowledge of the forensic genotyping process. [2511-017 (2005) : 57]

71. A choice between a final salary pension (with a contribution rate of 3.5%) and a defined contribution or ‘Partnership’ pension, giving you the flexibility to choose the pension that suits you best. [2511-019 (2005) : 58]

72. Many of the School's industrial partners are global organisations able to offer international career opportunities for Cranfield graduates. [2511-076 (2005) : 78]

73. You’ll work within regulations and with our partners, operating collaboratively and using your influencing skills to ensure environmental improvements. [2515-005 (2005) : 55]

74. You will also develop mechanisms that provide generic information to customers and be involved in developing and maintaining partnerships with research and conservation organisations in Scotland and the UK taking the lead on issues concerning the conservation of lower plants and fungi. [2515-013 (2005) : 58]

75. You must have at least five years’ relevant experience in conservation management or the practice and management of research into lower plants or fungi; experience of working with the general public, official and voluntary bodies to develop partnerships to secure lower plant conservation; and be able to demonstrate good time and project management skills through the management of research projects and grant programmes. [2515-013 (2005) : 58]

76. Providing a mixture of technical and strategic input, you will also manage collaborations with external partner organisations. [2515-018 (2005) : 61]

77. Each student will be based primarily at one of the collaborating universities but will spend substantial periods in the partner laboratories, thereby benefiting from a wide range of expertise in the invention, development and application of proteomics methods. [2515-083 (2005) : 82]

78. Applications should be made to one of the partner universities by Friday, 16 September 2005, [2515-083 (2005) : 82]

79. Join the UK’s leading group at Greenwich, carrying out industrially relevant research with GSK and the Powdermatix Faraday partnership. [2515-085 (2005) : 82]

80. Partner Relations Manager [2519-013 (2005) : 58]

81. As a member of the management team, you would be expected to determine the scientific direction of the work; to mentor, encourage and train members of staff; to contribute to the scientific strategy of NPL; to engender a culture of scientific excellence; and to develop partnerships with industry and universities. [2519-038 (2005) : 67]
82. PPD is a leading global provider of discovery and development services, market development expertise and compound partnering programs to biopharmaceutical, medical device, academic and government organisations. [2519-039 (2005) : 67]

84. This is part of a NERC-funded project with partners in St Andrews and London. [2519-061 (2005) : 74]

85. The Liverpool Materials Chemistry Group has recently been awarded Portfolio Partnership support by the EPSRC for Complex Materials Discovery. [2519-071 (2005) : 76]

86. The Initiative, which is to be carried out in partnership with industry, governments, scientists and communities, is focused on delivering bycatch conservation outcomes in three areas: technology/gear innovation, policy frameworks and conservation zoning. [2524-019 (2005) : 59]

87. The successful applicant will be a self-motivated, creative professional with the ability to work in partnership with all levels of the fishing industry, governments and communities. [2524-019 (2005) : 59]

88. You will also support the Head of Unit who is the Co-ordinator for a Commission funded project (ERA-NET) ‘Co-ordination of European Marine Fisheries Research’ which involves 17 European Partners. [2524-022 (2005) : 60]

89. The North Pennines AONB Partnership, the joint advisory body for the AONB, is seeking to appoint two enthusiastic people to lead our major new Peatscapes project, aimed at conserving and celebrating our peatland heritage. [2524-027 (2005) : 62]

90. You will be supported in this work by colleagues in the AONB Partnership Staff Unit and an Advisory Group of organisations [2524-027 (2005) : 62]

92. You will be based in the AONB Partnership office in Stanhope, Weardale, [2524-027 (2005) : 62]

93. and employed by the AONB Partnership's host authority, Durham County Council. [2524-027 (2005) : 62]

94. A track record of successful work in partnership with landowners and a wide variety of public, private and voluntary sector organisations is essential, as is experience of peatland conservation and project management. [2524-027 (2005) : 62]

95. Further details about the AONB Partnership and the area can be found at www.northpennines.org.uk [2524-027 (2005) : 62]

96. You will be a key player in the long-term development plans for establishing links with University partners in Europe. [2524-030 (2005) : 62]

97. Helping us deliver sustainable inshore fisheries management, you'll prepare and deliver technical guidance, review survey data from recent management schemes, manage research contracts and represent SNH's interests on relevant partnership projects. [2524-034 (2005) : 63]
98. For both Systems Engineering posts you will be able to demonstrate a keen interest in state-of-the-art research and development, working alongside academic partners and end users to achieve goals within tight time constraints. [2524-051 (2005) : 70]

99. The Biomedical Diagnostics Institute (BDI) was established in October 2005 at Dublin City University, through an award of €16.5M from Science Foundation Ireland (SFI) under its Centres for Science, Engineering and Technology (CSET) programme, in addition to a €6M contribution from industry partners. [2524-053 (2005) : 71]

100. We are currently assembling a team of world-class research scientists to partner with cutting-edge research teams [2524-053 (2005) : 71]

101. from our industry partners (Analog Devices, Amic, Enfer, Hospira, Becton Dickinson & Inverness Medical Innovations) and collaborating institutions (The Royal College of Surgeons Ireland (RCSI) in Dublin, the National Centre for Biomedical Engineering Science (NCBES) at NUI, Galway, and the Tyndall National Institute (TNI) in Cork). [2524-053 (2005) : 71]

102. Some applicants for the Postdoctoral positions may be offered employment by our industrial partners. [2524-053 (2005) : 71]

103. Elan and its marketing partner company Biogen withdrew controversial multiple sclerosis drug Tysabri from the US earlier this year after three people developed a brain disease and two of them died. [2528-002 (2005) : 58-59]

106. World class nanoscience research institute will open 2007, in partnership with Intel [2528-007 (2005) : 62]

107. and other industrial partners [2528-007 (2005) : 62]

110. Partnership Pathology Services (PPS) is a joint venture between The Royal Surrey County and Frimley Park Hospitals, two large, community hospitals. [2528-018 (2005) : 66]

111. NIMR works in close contact with both its academic and industrial partners, with the mission to transform knowledge into competitive and innovative business applications for the Dutch metals industry. [2528-024 (2005) : 69]

113. We are about to expand our research programmes with pharmaceutical partners, and are looking to employ scientists for several new positions. Suitable candidates will have a strong research background, with team working skills and the ability to work to deadlines. [2528-031 (2005) : 72]

114. The post is tenable for an initial period of up to two years, responsible to the Director of Bio manufacturing for research and funding in the field of biocatalysis, for liaison with the Managing Director and industrial members of CoEBio3 and for maintaining professional relationships with project partners. [2528-039 (2005) : 75]
115. To ensure that a new National Industrial Biotechnology Facility created in partnership with the Centre of Excellence, CoEBIO3, is a commercial success. [2528-039 (2005) : 75]

116. The CSC is situated on the Hammersmith Hospital Campus of Imperial College Faculty of Medicine and there is a complex matrix of relationships between the CSC, Imperial College and the other site partners, Hammersmith Hospitals NHS Trust, Hammersmith Imanet Ltd and, shortly, GlaxoSmithKline. [2528-044 (2005) : 77]

117. Key aspects of this role will include the production of API batches for preclinical development projects using the in-house kilo-lab facility, and to liaise with outsourcing API partners on technology transfers and process development to full-scale manufacturing of APIs. [2528-052 (2005) : 81]

118. The School is a major partner in the Biomedical and Pharmaceutical Sciences Research Group (BPSRG), which made a joint submission with staff from St Georges Hospital Medical School for the last RAE, which resulted in a 3a rating. [2528-055 (2005) : 82]

120. The Environment Partnership includes the National Soil Resources Institute, the Institute of Water and Environment and the Institute of Environment and Health. [2528-056 (2005) : 83]

121. Currently, the Partnership has more than 100 staff including 10 Professors and is making good progress with ambitious plans for growth. [2528-056 (2005) : 83]

122. For an informal discussion please contact Professor Mark Kibblewhite, Operations Director, Environment Partnership [2528-056 (2005) : 83]

123. The Land Resources Monitoring group, within the Environment Partnership, specialises in monitoring and assessment, related to sustainable land resources management and the work of all three Institutes. [2528-056 (2005) : 83]

124. The Land Resources Monitoring Group is seeking to award a Research Scholarship. The part-time registration fees for a Higher Degree by Research will be covered by the Environment Partnership. [2528-056 (2005) : 83]

2006

1. You will work with the Head of Research on science input for partners and developing science networks. [2533-001 (2006) : 44]

2. The post offers an exciting opportunity to conduct research at the interface between industry and academia and will involve liaison with a foreign industrial partner. [2533-049 (2006) : 60]

3. Cranfield, in partnership with 3M Health Care Limited, will be supporting highly qualified graduates to undertake the course. [2533-067 (2006) : 66]

4. Benefits include 30 days annual leave, an on-site nursery, flexible working, annual pay reviews and an optional partnership pension account. [2537-014 (2006) : 62]

6. In all cases, we aim to develop strategic partnerships with our clients in industry and the public sector in the UK and abroad. [2537-028 (2006) : 68]
7. Working with and for diverse **partners/collaborative organisations** you will be able to prioritise and manage several different activities in parallel. [2537-028 (2006) : 68]

8. You will also raise funds for priority digitisation projects led by the Herbarium and develop **partnerships** with relevant institutions in the UK and abroad. [2537-050 (2006) : 74]

9. To do this, the Division administers a fund for early stage translation projects and operates in **partner**ship with scientists, their research institutions and small companies. [2537-054 (2006) : 76]

10. The Pfizer Institute for Pharmaceutical Materials Science is an exciting new **partner**ship between Pfizer Inc., the Cambridge Crystallographic Data Centre (CCDC), and the University of Cambridge. [2537-060 (2006) : 79]

11. Includes a tax free stipend of £12,300 and up to £8,000 from industrial **partner**. [2537-067 (2006) : 81]

12. The centre aims to be the pre-eminent innovation resource and **partner** for the Process Industry in the UK. [2541-002 (2006) : 56]

13. It's changing the way the nuclear industry works and is giving us an incredible opportunity to persuade our external **partners** to put environmental considerations right at the top of the agenda. [2541-012 (2006) : 62]

14. You'll also need the sharp influencing skills to champion nuclear regulation throughout our organisation, to public bodies like the Nuclear Decommissioning Authority, and to a variety of media and other external **partners**. [2541-012 (2006) : 62]

15. You'll have a key role liaising with our **partners**, rolling out our new measures and co-ordinating incident response training. [2541-012 (2006) : 62]

16. As Head of Strategy and International Relations, you will assist EUMETSAT's Director General in implementing key areas of EUMETSAT strategy and develop related business areas in conjunction with existing and new **partners**. [2541-039 (2006) : 75]

17. Furthermore, you will expand the funding base for future EUMETSAT programmes by identifying and cultivating additional **partners** to develop technical Programmes. [2541-039 (2006) : 75]

18. This is a high profile leadership post for public engagement in science and technology and you will have and develop national and regional **partnerships** to support the mission of GSC and the Scottish Science Centres Network. [2541-040 (2006) : 75]

19. The STAP comprises 15 eminent scientists appointed by the Executive Director of UNEP in consultation with the GEF **partners**. [2541-066 (2006) : 82]

21. [www.promotingpartnerhip.ac.uk](http://www.promotingpartnerhip.ac.uk) [2541-094 (2006) : 91]

22. The results of these **partnerships** are worth seeing. [2545-002 (2006) : 13]

23. That is why for the past two years I have been delighted to chair the National Cancer Research Institute (NCRI), a **partner**ship of cancer-related organisations working together on a shared cancer agenda. [2545-004 (2006) : 56-59]

25. The task is to develop innovative visualization-based, geometric morphometric software to be used in studies of biological form by the other partners of EVAN. [2545-011 (2006) : 62]

26. In addition he/she will be involved in the re-engineering of the database schema to accommodate our partners' data. [2545-013 (2006) : 63]

27. The definition of curation standards and guidelines; and cooperation with Swiss-Prot and IntAct curators both at the EBI and at IntAct partner sites, e.g. in Geneva and Rome will be another duty. [2545-013 (2006) : 63]

28. The purpose of this job is to take a lead role in the implementation of Cancer Research UK's strategy with respect to institutes, particularly the development of the funding relationships with the institutes, and to manage, in partnership with another Senior Research Manager, the organisation of Institute Reviews to the core-funded Institutes. [2545-019 (2006) : 65]

29. Candidates should have: [...] • excellent communication capabilities with technical, academic and economical conversational partners [2545-056 (2006) : 82]

30. The Director will be responsible for generating matching funding in cash or in-kind contributions from collaborating partners, etc. [2545-063 (2006) : 84]

31. We operate to meet the needs of industry and society by working in partnership with universities to invest in people and scientific discovery and innovation. [2545-063 (2006) : 84]

33. The project is in partnership with The University of Northampton and you will have the opportunity to register for a research degree. [2545-073 (2006) : 88]

34. The post is supported by the dti Knowledge Transfer Partnership Scheme and you will be expected to undertake an NVQ level 4 in management. [2545-073 (2006) : 88]

35. Funding is provided by The University of Reading Research Endowment Trust Fund and in some cases a collaborative external partner. [2545-086 (2006) : 91]

40. The results of these partnerships are worth seeing. Improved processes, increased quality and lower costs contribute to the success of our customers. [2550-002 (2006) : 15]

41. A graduate in applied biology, he worked for a biotechnology company in Bern before moving to Roche in Basel, where he works in the division that forms partnerships with other companies. [2550-006 (2006) : 56-57]

42. The UK is a rich source of partners. [2550-007 (2006) : 58-59]
43. Key responsibility for this role will be development of inhalation dosage forms internally, as well as in collaboration with external partners. [2550-011 (2006) : 61]

44. The position will involve strong interaction, co-ordination and management of an established external network of suppliers and development partners. [2550-011 (2006) : 61]

45. Excellent communication skills, both written and verbal, are essential, as extensive liaison (to include report writing and presentations) with internal and external partners is a crucial part of your role. [2550-028 (2006) : 70]

46. Moreover, our skills in applying those technologies to solve counterfeit, adulteration and smuggling issues for clients, ensures that we are a trusted partner of leading brand owners and governments. [2550-033 (2006) : 73]

47. You will also have sound leadership, IT and communication skills with the ability to act on your own initiative, build effective partnerships and work well as part of a team. [2550-035 (2006) : 74]

48. Ideally with an understanding of the Drug Discovery process and the information systems that support it, you'll be expected to work in close partnership with our scientific research colleagues looking for opportunities to make improvements, interpreting their business requirements and taking ownership for the delivery of highly effective solutions. [2550-039 (2006) : 75]

49. The Centre for Process Innovation (CPI) is moving forward as the UK's pre-eminent innovation and resource partner for the chemical & electronics industries. [2550-043 (2006) : 76]

50. It is dedicated to delivering applied research & development with industrial & academic partners. [2550-043 (2006) : 76]

51. Maintain, operate and improve the performance of the FESF including the cleanroom & roll-to-roll sputter coater while liaising closely with industrial partners to ensure clear communication of milestones & deliverables. [2550-043 (2006) : 76]

52. Partnering with major players in the automotive, electronics, oilfield, pharmaceutical, agrochemicals, consumer care, tyres, and paints and coatings markets, Rhodia offers tailor-made solutions combining original molecules and technologies to respond to customers' needs. [2550-045 (2006) : 77]

53. Our strategic partnerships with over thirty of the world's leading PACS vendors mean that our Voxar 3D software is available as an integrated option on over 50% of the world's PACS workstations. [2550-050 (2006) : 79]

54. The applicant would be expected to carry out fundamental research in one or more of the IMRC research areas; to have a supervisory role for other researchers (both PhD and postdoctoral); to liaise with the 12 companies who are partners in the IMRC programme. [2550-066 (2006) : 84]

55. Together with its partners, GRID Arendal's core focus is to support decision-making processes aimed at securing a sustainable future. [2554-010 (2006) : 63]

56. You will use and extend your current international and environmental network actively with partner organizations like UNEP, UNDP, WRI, EEA... [2554-010 (2006) : 63]

57. They will play a key role in the development of the ARK team and in furthering commercial and academic partnerships. [2554-012 (2006) : 63]

58. The Objective One Partnership for Cornwall and Scilly [2554-012 (2006) : 63]
59. Covering a wide range of policies and programmes including multi-donor forest sector reform, Partnership Agreements to promote forest law enforcement, governance and trade, and pro-poor livelihood initiatives, [2554-017 (2006) : 65]

60. you'll communicate with and influence our partners at every level. [2554-017 (2006) : 65]

62. A senior post directing the overall research, fundraising and collaboration of IITA's Western and Central African Region programs in partnership with the other R4D Director. [2554-043 (2006) : 76]

63. Integration of the power sources in complete sensor nodes will be part of the work, in collaboration with project partners. [2554-082 (2006) : 88]

64. A unique opportunity is presented by a £22M investment from the Scottish Funding Council and nine participating universities in SAGES, the Scottish Alliance for Geoscience, Environment and Society. SAGES is a major research partnership involving the Universities of Aberdeen, Abertay, Dundee, Edinburgh, Glasgow, Paisley, St Andrews, Stirling, and SAMS UHI. [2558-005 (2006) : 60-61]

65. The SAGES partners will appoint 6 full Professorial Chairs (to include the position of Director), 18 Lectureships and 6 Research Fellows to address the challenges of understanding and modelling global environmental and climate change. [2558-005 (2006) : 60-61]

66. The main challenge for the Director will be to work with the partner institutions to develop SAGES into a sustainable, world-leading programme and to ensure that it uses its leverage to build research capacity over the longer term. [2558-005 (2006) : 60-61]

67. Responsible for the design and development of drug delivery devices, you'll be an efficient and highly effective project engineer with a strong technical background and be capable of working in close collaboration with a wide range of both internal and external partners. [2558-025 (2006) : 68-71]

68. Liaising with AZ discovery projects and alliance partners to ensure candidate drug criteria are met - and agreeing and delivering the long-term formulation strategy including packaging and devices - you'll be keen to apply your expertise in identifying and introducing new technologies and processes. [2558-025 (2006) : 68-71]

69. Inspired by the research of many top scientists in Systems Biology, students with biological and medical backgrounds will be teamed up with students from a physical science/engineering/mathematics background to engage in extensive experimental and theoretical training in Systems Biology in the MIB and in partner groups all over the world. [2558-078 (2006) : 91]

70. This is a new fixed-term, full time post for up to 3 years within the Diet and Health Research team, located within the Population Health Group of the School of Medicine, Health Policy and Practice at UEA, to complement the growing research interest in Diet and Health within the School and drive forward a collaborative research programme with other partners at UEA and the BBSRC-funded Institute of Food Research. [2558-082 (2006) : 92]

71. The studentship is fully-funded by the EU as part of the FP6-FET CILIA project in which the centre is a partner [http://www.cilia-bionics.org/]. [2558-093 (2006) : 96]

72. BBSRC Industrial CASE Studentship (ref SCH/06/05), in partnership with the WALTHAM Centre for Pet Nutrition, on comparisons of ways of enriching the kennel environment for domestic dogs, including the development of novel welfare indicators for this species. [2558-096 (2006) : 98]

74. Faraday Partnerships are projects funded by Government and Research Councils to improve the co-ordination between industry and the research community. [2563-015 (2006) : 56]

75. An important part of the role will also be to develop interactions with other members of the EARNEST consortium and with partners in the NuGO Network of Excellence (www.nugo.org). [2563-024 (2006) : 59]

76. Experienced professional needed to undertake senior administrative management responsibilities including financial/ partner management and technical reporting. [2563-025 (2006) : 59]

77. A global partner to the pharmaceutical, biotechnology and medical device industries, we're one of the world's largest and most comprehensive drug development organisations. [2563-055 (2006) : 69]

78. Working in partnership with our clients to support their products through the drug development process, you will provide advice and expertise from pre-IND through to NDA approval - and beyond. [2563-055 (2006) : 69]

79. The INDOX Cancer Research Collaboration was established in July 2005 to undertake clinical research into the aetiology and treatment of cancer in India and is a partnership between the University of Oxford and India's top 6 cancer centres. [2563-056 (2006) : 70]

80. Opportunities now exist for ambitious, highly motivated researchers, at both post-graduate and post-doctoral levels, to join a world-class research team of scientists from our industry partners (Analog Devices, Àmic, Enfer, Hospira, Becton Dickinson & Inverness Medical Innovations) [2563-062 (2006) : 71]

81. and partner academic institutions [Royal College of Surgeons Ireland (RCSI) in Dublin, National Centre for Biomedical Engineering Science (NCBES) at NUI, Galway, and the Tyndall National Institute (TNI) in Cork], along with the core research team at Dublin City University (DCU). [2563-062 (2006) : 71]

82. Working with University partners and external collaborators, the co-ordinator will play a key role in the development of a large-scale energy research programme designed to address national and global needs. [2563-067 (2006) : 73]

83. Building strong partnerships with businesses, the community and other like-minded colleges across the UK, our goal is to deliver excellence in everything we do. [2563-068 (2006) : 73]

84. The posts are available immediately and have arisen as a result of a collaboration between CAMS and a global industrial partner. [2563-076 (2006) : 76]

85. Such partnerships, once unheard of, are becoming normal: openness, it seems, is now for real. [2567-002 (2006) : 50-51]

86. In short, you'll lead us to this - combining an overarching vision with a grounded operational focus - overseeing research and commercial activities and networking with academics and business partners, locally, nationally and internationally. [2567-005 (2006) : 52]

87. In our dealings with stakeholders, partners and customers, you'll be a confident advocate and champion for our activities. [2567-005 (2006) : 52]
88. Working in partnership with other scientific organisations, customers and stakeholders you will also be the lead scientific advisor to the Scottish Executive and other resource management agencies. [2567-008 (2006) : 53]

89. In particular, you will be responsible for providing advice and guidance to Latin American, European and American members of the LAPI partnership, supervising training and equipment needs and providing technical advice where necessary. [2567-012 (2006) : 55]

90. The post may involve some limited travel to partner meetings. [2567-012 (2006) : 55]

91. The post will involve some contribution to training of international project partners. [2567-012 (2006) : 55]

92. You will: be responsible for the development and management of policy and political debate in relation to physics education and funding, physics outreach activities, partnerships with other science and industry bodies/agencies, and recruitment and retention of members. [2567-017 (2006) : 58]

93. Enjoying an extremely high profile, you will develop & deliver medical training to Head Office and field-based colleagues, whilst partnering the Marketing Department at the conceptual stage of promotional campaigns to ensure ABPI compliance. [2567-031 (2006) : 64]

94. KNOWLEDGE TRANSFER PARTNERSHIP ASSOCIATE [2567-037 (2006) : 66]

95. Applications are invited for a Knowledge Transfer Partnership Associate, with practical experience of plant tissue culture and a high level of commitment to commercial development and marketing of new plant varieties. [2567-037 (2006) : 66]

96. We are an employer who values diversity and welcomes applications from suitably qualified people regardless of gender, ethnicity, culture, age, physical ability, mental impairment, sexual orientation, religion/belief, marital status, civil partnership status, education and those with caring responsibilities. [2567-041 (2006) : 67]

97. In partnership with The Royal Marsden NHS Foundation Trust, we form the largest comprehensive cancer centre in Europe. [2567-054 (2006) : 72]

98. Additional experience of medicinal working in partnership with chemistry is desirable but successful applicants will have ample opportunity to develop these skills in post. [2567-054 (2006) : 72]

100. The University of Modena and the Eye Bank Foundation of Venice have joined forces to create a public/private partnership forming the Research Center for Regenerative Medicine. [2572-003 (2006) : 15]

101. This project’s partners include Intel, Hewlett-Packard and the Tyndall National Institute in Cork - itself no dinghy. [2572-006 (2006) : 58-61]

102. CPL Science & Engineering is the leading staffing partner to the pharmaceutical and medical device industries in Ireland. [2572-022 (2006) : 68]

103. You’ll work with external partners to make certain that their waste packaging strategies have a long-term outlook, commission multi-disciplinary assessments and make sure they are well managed. [2572-040 (2006) : 77]
104. You'll work closely with **partner** organisations to maximise the potential and value of our programmes. [2572-044 (2006) : 79]

105. Reviewing, appraising and developing healthcare innovations from NHS trusts in Greater Manchester and Cheshire with commercial **partners** will also be integral. [2572-058 (2006) : 84]

106. This is a multi-**partner** (CCLRC, Diamond Light Source, Imperial College and Oxford University), multi-disciplinary project to develop a facility based on high repetition rate, few optical cycle tuneable laser sources - one of which will be used to produce ultra-fast XUV pulses through high harmonic generation. [2572-061 (2006) : 86]

107. This post is supported by a **Partnership** grant from the UK Natural Environment Research Council, held between the Institute of Geological Sciences (IGS) at the University of Leeds and RESON. [2572-073 (2006) : 92]

108. Project **partners** RESON are world leaders in the development and manufacture of high-resolution multibeam sonar systems. [2572-073 (2006) : 92]

110. The University of Modena and the Eye Bank Foundation of Venice have joined forces to create a public/private **partnership** forming the Research Center for Regenerative Medicine. [2576-002 (2006) : 11]

111. Accordingly, the third measure of health is the number of acquisitions and **partnerships**. [2576-003 (2006) : 58-61]

112. A company with potential will also have a global mindset, says Powlett-Smith, and be prepared to enter overseas markets and build **partnerships** abroad. [2576-003 (2006) : 58-61]

114. You should also have the ability to communicate effectively as there will be key relationships within internal DCWW colleagues, our operational contact **partners**, the Environment Agency Wales and other key stakeholders. [2576-036 (2006) : 74]

115. You should also have the ability to communicate effectively as there will be key relationships within internal DCWW colleagues, our operational contact **partners**, the Environment Agency Wales and other key stakeholders. [2576-037 (2006) : 74]

116. The chance to work with a unique organisation which offers talented professionals the chance to transcend traditional scientific boundaries with leading R&D **partners** and make a direct contribution to Scotland's economy. [2576-044 (2006) : 77]

117. With significant marketing and communications experience, you'll provide invaluable Marketing and PR support for R&D programmes and ensure that ITI Life Sciences actively engages with both its membership and other external parties, including potential **partners**. [2576-044 (2006) : 77]

118. Valuing and negotiating contracts for both in-licensed and out-licensed technologies, you'll work with external **partners** to ensure that the IP generated from our programmes is commercialised successfully. [2576-044 (2006) : 77]

119. Others will explore research such as stem-cell tumour therapy, while at a telemedicine centre in northern Norway scientists will team up with **partners** such as IBM's Zurich [2580-003 (2006) : 52-55]
120. Borealis today is a {partner} to its customers manufacturing and developing products such as food packaging, diapers, appliances, normative parts, distribution pipes for water, gas and sewage, power cables, sporting equipment and medical devices. [2580-006 (2006) : 56]

121. CRT's role is to identify, protect, develop and commercialise intellectual property from both Cancer Research UK and institutions worldwide, to deliver patient benefit. CRT works closely with cancer researchers and their institutes to protect the intellectual property arising from their research and to establish links with commercial partners. [2580-017 (2006) : 60]

122. Senior Research Manager (Institutes Funding & Scientific Events) - the purpose of this job is to take a lead role in the implementation of Cancer Research UK's strategy with respect to Institutes, particularly the development of the funding relationships with the Institutes, and to manage, in partnership with another Senior Research Manager, the organisation of Institute Reviews to the four core funded Institutes, including the newly established Institute in Cambridge. [2580-025 (2006) : 63]

123. A post doctoral research scientist is required for a BBSRC Industrial {Partnering} Award to investigate possible mechanisms of resistance to neonicotinoid insecticides in insect pests. [2580-048 (2006) : 69]

124. The University of Edinburgh and Heriot-Watt University form the £28M SFC funded Edinburgh Research {Partnership} in Engineering. [2580-070 (2006) : 79]

125. The Edinburgh Research {Partnership} is a joint Edinburgh/Heriot-Watt University collaboration, with six joint research institutes, and this is one of 12 new Chair positions funded by it. [2580-070 (2006) : 79]

2009

1. The person appointed to this post will help create a unique {partnership} between Diamond and the University of Manchester that will produce a state-of-the-art instrument for the users of synchrotron tomography. [2689-003 (2009) : 46]

2. The Collaborative Centre of Excellence in Understanding and Managing Natural and Environmental Risks is a newly-funded strategic {partnership} between the Research Councils and the Department for Environment, Food and Rural Affairs. Based at Cranfield University, and working collaboratively across the remit of its funders, the Centre will provide a world-leading evidence base for risk-informed policy development within Defra and other government departments. [2689-029 (2009) : 58]

3. Our aim is to enhance our international standing with a significant investment in our premises, and by continuing to build on our successes, developing new areas of research and commercial activity with a range of {partners} and research collaborators. [2689-032 (2009) : 59]

4. The candidate may also expect to spend significant time within the institute of our research {partner} in the United States. [2689-034 (2009) : 60]

5. DR BURGOYNE & PARTNERS LLC [2694-008 (2009) : 54]

6. Dr JH Burgoyne & Partners LLP [2694-008 (2009) : 54]

7. Dr JH Burgoyne & Partners LLP [2694-008 (2009) : 54]

8. Joining our Innovation and Skills Group, you will bring drive and determination to increasing the economic and social impact of the research and training we support. In particular, you will play a vital role in engaging with {partners} and organisations to maximise the impact of our activities. [2694-010 (2009) : 56]
9. Leading the development of agreed policy and strategy initiatives in the areas of bioscience skills and careers, you will actively work with partners in developing strategic, evidence-based interventions in the skills pipeline. [2694-010 (2009) : 56]

10. Increasing the breadth and depth of our interaction with business, you will facilitate greater exchange with UK-based life science companies to create partnerships and help to manage joint research programmes. [2694-010 (2009) : 56]

11. Essential to this role is the ability to form effective partnerships and establish collaborative links with a range of contacts, using excellent interpersonal, influential and communication skills. [2694-017 (2009) : 58]

12. Your role is to ensure that Kew's expertise in restoration ecology is translated into practical outcomes, with the focus on developing initiatives for sustaining this work long-term and building on an established network of international collaborative partnerships and agreements. [2694-033 (2009) : 64]

13. You will also represent the Agency to national and international partners and institutions on all relevant areas within the Centre's remit. [2694-034 (2009) : 65]

14. An ability to command credibility amongst senior stakeholders and to promote the HPA and constructively engage internal and external partners. [2694-034 (2009) : 65]

15. You will propose action plans to respond to NERC strategy, be a focal point for the community and promote strategic partnerships. [2694-036 (2009) : 66]

16. SINAPSE is an alliance of six universities in partnership with the Scottish funding Council and the Chief Scientist Office of the Scottish Government Health Department. [2694-046 (2009) : 71]

17. Never before has effective partnering and licensing been so critical. [2698-001 (2009) : 4]

18. The BIO Business Forum will host more than 14,000 partnering meetings among 1,500 business development and financial professionals. [2698-001 (2009) : 4]

20. Our Business Incubator provides up to £70,000 of hands on support to help start ups get the early stage investment, licence agreements and partnerships they need to grow. [2698-003 (2009) : C4]

21. All projects will have co-supervisors in Chemistry and Chemical Engineering and will also have an industrial or an international partner. [2698-008 (2009) : 51]

22. Complete Medical Group works in partnership with the pharmaceutical industry, providing a wide range of innovative and class-leading services. [2698-042 (2009) : 65]

23. We are seeking an experienced and motivated individual to join the physical science & engineering team, who will take responsibility for developing knowledge transfer activities across the energy and environment sectors with the twin objectives of delivering significant growth in technology transfer activity and assisting in the development of strategic partnerships between UCL and relevant commercial/governmental organisations. [2698-045 (2009) : 67]

24. The University and the Institute for Systems Biology are developing a 5-year partnership within the Health Technologies plan from the Government of Luxembourg to enhance collaboration and transfer knowledge. [2698-056 (2009) : 71]
25. The post will focus on management of productive relationships between the University and external partners building on York's research strengths. [2698-059 (2009) : 72]

26. Never before has effective partnering and licensing been so critical. [2702-001 (2009) : 2]

27. The BIO Business Forum will host more than 14,000 partnering meetings among 1,500 business development and financial professionals. [2702-001 (2009) : 2]

28. A £14 million, five-year partnership between the BBSRC, the Engineering and Physical Science Research Council and a consortium of leading companies such as GlaxoSmithKline and Pall Life Sciences, it aims to fund innovative biotechnology-related research across several universities. [2702-005 (2009) : 46-47]

29. Our innovations originate either out of our own research or through cooperation with external partners. [2702-010 (2009) : 50]

30. Experience in interaction with contract research organizations and external partners [2702-010 (2009) : 50]

31. Our innovations originate either out of our own research or through cooperation with external partners. [2702-011 (2009) : 51]

32. Experience in interaction with contract research organizations and external partners [2702-011 (2009) : 51]

33. This post will support the wider co-ordination and delivery of FW&E microbiology laboratory services to partners in public health delivery in the East Midlands. [2702-025 (2009) : 58]

34. You will liaise with all local partners in health protection both within and outside the HPA and have an active role in assisting and providing advice in all aspects of provision of FW&E services (including training) both within and outside of the FW&E Laboratories serving the Region. [2702-025 (2009) : 58]

35. You have good communication and coordination skills to work effectively with other teams in the multidisciplinary matrix and with external partners. [2702-036 (2009) : 64]

36. Experience of collaborative research partnerships, with national governments and international agencies, and proven leadership and organisational abilities, are further essential requirements. [2702-047 (2009) : 67]

37. To provide global leadership across sub-Saharan Africa and south Asia to a diverse and active group of scientists and partners in natural resource management research focused on alleviating poverty and improving the well being of poor rain-fed farming communities in the dry tropics. [2706-016 (2009) : 53]

38. The Agronomist will be a member of the multi-disciplinary research team of ICRISAT to develop and implement an integrated research program on cropping systems management under rainfed farming systems in collaboration with national and international partners under ICRISAT's Protracted Relief Program (PRP). [2706-017 (2009) : 53]

39. This will involve development of new research ideas, establishment of partnerships with other parts of BGS and UK academia, and the identification of new opportunities/additional sources of funding in this section. [2706-020 (2009) : 55]
40. There will be close collaboration with national and international project partners making measurements of the oceanic nitrogen system. [2706-040 (2009) : 62]

41. The group is also committed to partnering with universities and companies to ensure the most appropriate data and knowledge is generated in the most suitable environment, internal and external to the Company. [2711-005 (2009) : 52]

42. You will require good verbal and written communication skills, and an ability to work with internal and external partners to achieve goals. [2711-005 (2009) : 52]

43. Funded by the Department for Environment, Food and Rural Affairs (Defra), the Darwin Initiative aims to draw on the wealth of biodiversity expertise in the UK to work with local partners in developing countries to protect and enhance their biodiversity. [2711-010 (2009) : 53]

44. Routinely working with Government, NGOs, user groups and numerous academic and industrial partners from all over the world, we are pushing the frontiers of scientific, intellectual and practical knowledge in this rapidly developing field and we expect this appointment to help us push these boundaries even further. [2711-034 (2009) : 62]

45. The post holder will work as part of a small enterprise and applications team in a business facing role innovating, partnering, networking and brokering EO-led (GMES) remote sensing solutions to business requirements [2711-036 (2009) : 63]

46. by building on the work of EO research teams in the University and partner organisations. [2711-036 (2009) : 63]

47. Models and datasets developed by the group are used as national and international standards. Routinely working with NASA, the European Space Agency, the Ordnance Survey and numerous academic and industrial partners, we are pushing the frontiers of scientific, intellectual and practical knowledge in this rapidly developing field and we expect this appointment to help us push these boundaries even further. [2711-038 (2009) : 63]

48. In conjunction with top rank academic partners, VLA is now offering two Ph.D. studentships in the following subject areas: [2711-051 (2009) : 67]

49. Academic partner: Prof. J Wastling Faculty of Veterinary Science, University of Liverpool [2711-051 (2009) : 67]

50. Academic partner: Prof. A. Lalvani, St Mary's Hospital, Imperial College, London [2711-051 (2009) : 67]

51. The Living With Environmental Change (LWEC) partnership is a major new research initiative bringing together 20 UK organisations funding, undertaking and using environmental research. [2715-030 (2009) : 62]

52. In support of this initiative, the Partners' Board has established a directorate to support the Director in promoting and co-ordinating the various LWEC programmes and activities. [2715-030 (2009) : 62]

53. He/she will lead the communication strategy and duties will include representing the programme at meetings, liaising with partners and other relevant organisations, organising and servicing meetings, reporting on LWEC's outputs, achievements and impacts, quality assurance [2715-030 (2009) : 62]

54. and maintaining an oversight of LWEC expenditure by the Partners. [2715-030 (2009) : 62]
55. You must also have experience of working in multi and interdisciplinary scientific partnerships and excellent communication, administrative and management skills. [2715-030 (2009) : 62]

57. Working with the Head of Secretariat you will facilitate work between the Partners and support co-ordination between LWEC research programmes and activities. [2715-030 (2009) : 62]

58. World class facilities with over £10 million invested in new laboratories at our three partner universities [2715-049 (2009) : 67]

59. Our Business Incubator provides up to £70,000 of hands on support to help start ups get the early stage investment, licence agreements and partnerships they need to grow. [2719-001 (2009) : 11]

60. This high profile development will bring together high-tech businesses, universities, research organisations and industrial partners with the business support and investor community, to create more than 10,000 jobs. [2719-014 (2009) : 54]

61. For further information please contact Paul Aldridge, Partner, King Sturge Consultancy on 0161 238 6232 or Paul.Aldridge@kingsturge.com [2719-014 (2009) : 54]

62. STFC along with the other stakeholders Northwest Regional Development Agency and Hafton Borough Council, is now seeking a partner to develop the potential of the Campus. [2719-014 (2009) : 54]

63. In partnership with Cambridge University, the recent establishment of the first academic unit of medical microbiology in Cambridge offers an unrivalled opportunity for research collaborations. [2719-019 (2009) : 57]

64. The Agency employs over 700 scientists and experts and works with over 1000 partners in 102 countries world-wide. [2719-023 (2009) : 58]

65. The post is part of the Evidence team, which provides a national expert service for natural and social sciences across Natural England and to our external partners. [2719-034 (2009) : 61]

66. Applicants will be competent at working both independently and in leading a team within a large network of varied external partners and organisations. [2724-018 (2009) : 58]

67. We partner numerous prestigious gaming and sports book companies in Europe. [2724-021 (2009) : 59]

68. It's not just about working "in partnership with society", she says, but about recruiting and motivating top-notch staff. [2728-004 (2009) : 52-53]

69. It's one of several big pharma labs and institutes operated in partnership with NGOs, where you will find opportunities to work on treatments for diseases such as malaria and sleeping sickness. [2728-004 (2009) : 52-53]

70. The Uganda Malaria Partnership Programme, funded by GSK, provides much-needed education [2728-004 (2009) : 52-53]

71. The Agency employs over 700 scientists and experts and works with over 1000 partners in 102 countries world-wide. [2728-009 (2009) : 56]
72. Our business is to develop our clients' research into the reality of new medicines. This means that in addition to being world class development scientists, we need to forge successful client partnerships. [2728-011 (2009) : 57]

73. Working with business development staff, you will look for new opportunities for application of AO systems and technologies in collaboration with non-astronomy based institutions, in particular industrial partners and other research groups. [2728-012 (2009) : 58]

74. MRC awards jointly funded pre-doctoral/entry level clinical research training fellowships in partnership with a number of Royal Colleges and other organisations [2728-025 (2009) : 63]

75. to promote research of relevance to each partner. [2728-025 (2009) : 63]

76. We're collaborating with car makers and other partners on an array of new technologies to improve efficiency while reducing emissions – like advanced lightweight car plastics, new liners to keep tyres properly inflated longer and our lithium-ion battery separator film that could speed the adoption of hybrid vehicles. [2733-003 (2009) : 22]

77. This matchmaking site has the laws of attraction down to an exact science. Zurich-based GenePartner takes a Swiss researcher's "sweaty T-shirt study" to a marketable level. [2733-006 (2009) : 60-61]

78. The main responsibilities are: […] • Release information to the media, related political departments and partner Institutions [2733-012 (2009) : 64]

79. Coordinate information flow among SIB groups, SIB partners and SIB management [2733-012 (2009) : 64]

80. NOCRI will facilitate more rapid, informed and productive interactions with investigators who are interested in working with the NIHR-funded infrastructure, as well as strengthening enduring relationships between the NIHR, NHS, NHS/university partnerships and the biotech, medtech and pharma industries. [2733-022 (2009) : 68]

81. Working in partnership with key personnel at all levels within the Wellcome Trust to ensure appropriate channelling of information on WTSI policies and activities will be another important focus. [2733-024 (2009) : 69]

82. They will include contributing to the development of new initiatives and may involve working in partnership with other funders. [2733-025 (2009) : 70]

83. The Nanotechnology and Advanced Materials Institute and the Computer Science Research Institute are working in partnership with the Dublin City University and various industrial collaborators in the area of point of care diagnostics and Connected Health. [2733-046 (2009) : 76]

84. The University is also partnering with the Network for Excellence for Functional Materials at the National University of Ireland, Galway in the area of tissue engineering. [2733-046 (2009) : 76]

85. BBSRC Genome Analysis Centre In partnership with EEDA [2733-051 (2009) : 78]

87. The Knowledge Transfer Partnership is a shared venture with Cardiff University and will be jointly supervised by Professor Andy Sewell (www.tcells.org). [2737-016 (2009) : 59]
88. This post will be based at Immunocore, but the successful candidate will be required to undertake any travel necessary to manage the partnership element of the project. [2737-016 (2009) : 59]

89. Further information about Knowledge Transfer Partnerships can be found on www.ktponline.org.uk [2737-016 (2009) : 59]

90. Our strengths are fuelled by numerous intimate relationships with partners in the business world – medicine, communication and the automotive industry to name a few. [2737-024 (2009) : 65]

91. The NHS Trusts and Kings' College London are forming an Academic Health Sciences Centre called King's Health Partners. [2737-028 (2009) : 66]
Annexe 10-4 Occurrences de TECHNOLOGY TRANSFER dans CAEMS

1971
American consulting firm in international licensing and technology transfer seeks contact with experienced person, male or female, to handle UK and European research assignments. [774-036 (1971) : 190]

1995
1. Applicants are sought for a one-year post funded under the PPARC Industrial Programme Support Scheme, the aim of which is to facilitate transfer of novel technologies to industry. [1963-049 (1995) : 62]

2. Working to achieve technology transfer and process development, you will be responsible for organising and supervising the scale-up and validation activities necessary to bring new products and major process improvements into production. [1976-001 (1995) : 59]

3. The successful candidate will have developed an active working knowledge of vacuum coating processes such as sputtering and ion plating, and should have experience of technology transfer from laboratory to production. [1980-071 (1995) : 73]

4. The BBSRC Food Directorate is seeking a technical consultant to assist in the future development and implementation of one of its programmes: Microbiological Aspects of Food Safety and Preservation. This will include: liaising with industry to identify where additional research is needed and to foster close collaboration with academics; encouraging and assisting academics to submit research grant applications; monitoring the progress of funded research projects; and developing mechanisms to ensure effective technology transfer. [1993-054 (1995) : 67]

5. The Process Validation Group is looking for a graduate scientist to assist in the scale-up, validation and transfer to production of new Zydis products. [1998-101 (1995) : 102]

6. The role will provide you with the opportunity to make a significant contribution to the CSG's work, specifically in the fields of LINK programmes and technology transfer. This will bring you into contact with the LINK board, technical experts, academic and industrial communities, joint Government sponsors and European networks. [2002-054 (1995) : 71]

7. A graduate, ideally with a relevant postgraduate qualification, your extensive food science engineering and manufacturing experience will accompany your background in research and technology transfer management. [2002-054 (1995) : 71]

2005
1. Design Transfer Engineers [2485-002 (2005) : 56-57]

2. Technology Transfer Assistant (Part-time) [2485-003 (2005) : 58]

3. developing Intellectual Property and assisting in Technology Transfer [2485-003 (2005) : 58]

4. A previous background in technology transfer and/or knowledge of legal issues would also be of value; however, a sound and robust understanding of scientific and medicinal applications is paramount. [2485-003 (2005) : 58]

5. The role is focussed on the development and transfer of new materials and/or processing techniques into a manufacturing environment. [2485-032 (2005) : 68]
6. The successful candidates will be expected to manage projects, develop research proposals and deliver technology transfer. [2485-042 (2005) : 72]

7. MRC Technology is a company affiliated to the UK Medical Research Council that acts as the MRC's agent in technology transfer. [2485-062 (2005) : 78]

8. Supervising a small team of technicians, you will ensure that laboratory projects are transferred to pilot scale in accordance with HSE and cGMP requirements. [2485-070 (2005) : 81]

9. Technology Transfer Manager (physical sciences) [2485-093 (2005) : 88]

10. We are recruiting a Technology Transfer Manager [2485-093 (2005) : 88]

11. and seek applicants who would like to join a dynamic technology transfer team and make a real contribution to the business. [2485-093 (2005) : 88]

12. You will also be expected to support the work and preparation of scientific publications and/or technology transfer/training activities under either the crop agronomy (WP2.1 and 3.3.2) or the dairy research programme (WPs2.2.1 and 2.2.2) contracted to the University of Newcastle upon Tyne under the Integrated Project. [2489-040 (2005) : 74]

13. You will create and identify opportunities to launch new products into existing and new markets and enable the transfer of this technology to full scale production. [2493-002 (2005) : 54]

14. You will also play a key role in the transfer of these new products and methodologies to production facilities. [2493-032 (2005) : 66]

15. Preparation of master files and transferring of new products to production [2498-026 (2005) : 59]

16. You will also be expected to support the work and preparation of scientific publications and/or technology transfer/training activities under either the crop agronomy (WP2.1 and 3.3.2) or the dairy research programme (WPs2.2.1 and 2.2.2) contracted to the University of Newcastle upon Tyne under the Integrated Project. [2498-058 (2005) : 70]

17. With a 90-year history of technology and knowledge transfer in this field, East Mailing Research is a registered charity, operates from two sites in Kent and employs 100 staff. [2502-007 (2005) : 56]

18. The work will encompass early phase work at the laboratory and pilot plant scale through to full-scale technology transfers and worldwide Affiliate support. [2502-013 (2005) : 59]

19. According to James, the government is on the right track with its drive to set up technology transfer companies in the public sector that trawl through research, looking "outside the box" for opportunities. [2506-001 (2005) : 52-53]

20. Jacqueline Senker at the University of Sussex's Science Policy Research Unit, one of the authors of a 2003 report for the European Commission on European technology transfer policy, claims that the Medical Research Council is the only success story in the UK so far. [2506-001 (2005) : 52-53]

21. "Throughout Europe there are simply too many technology transfer organisations that don't know what they're doing, don't have the right expertise, know nothing about biotechnology, or about patenting and licensing and so are useless," she says. [2506-001 (2005) : 52-53]

22. The appointees will join a progressive research team in beef production and will initiate and undertake research and prepare scientific and technology transfer outputs on all aspects of beef production to
include: applied nutrition, all aspects of economically sustainable beef production systems (including suckler cow systems and cow fertility), genotype comparisons, grassland management, forage production and utilisation, over wintering accommodation of beef cattle and factors affecting meat eating quality. [2511-013 (2005) : 56]

23. Cancer Research Technology is a specialist technology transfer company wholly owned by Cancer Research UK. It works closely with cancer researchers to develop their discoveries into potential cancer therapies and diagnostics for the benefit of cancer patients. [2519-033 (2005) : 65]

24. Avidex, a biotechnology company based near Oxford, requires a Licensing Manager to lead the negotiation and execution of Avidex's new in-licensing and material transfer agreements and to assist the Chief Business Officer in the management of out-licensing projects. [2524-012 (2005) : 56]

25. You will have first-hand experience of negotiating and implementing licensing transactions, ideally gained over a number of years within a university technology-transfer office environment or within a corporate licensing role. [2524-012 (2005) : 56]

26. Enterprise Ireland, a state agency, pays for research projects and R&D collaborations, and provides mentoring and advice for technology transfer. [2528-002 (2005) : 58-59]

27. With a 90-year history of technology and knowledge transfer in this field, East Malling Research is a registered charity, operates from two sites in Kent and employs 100 staff. [2528-033 (2005) : 72]

28. Key aspects of this role will include the production of API batches for preclinical development projects using the in-house kilo-lab facility, and to liaise with outsourcing API partners on technology transfers and process development to full-scale manufacturing of API's. [2528-052 (2005) : 81]

2006

1. A track record in the transfer of technology from an academic to a commercial environment, together with excellent team building, communication and project management skills are desirable. [2533-045 (2006) : 59]

2. In addition, you may also support the commercial division, helping with technical transfer and scientific promotion activities related to candidate commercialisation. [2537-020 (2006) : 65]

3. You will have a degree in materials science/engineering with several years industrial experience, or technical experience in an industrially focused R&D/technology transfer environment. [2537-028 (2006) : 68]

4. In these key roles, you will be part of a multi-disciplined team working on a number of diverse projects from technical transfer of products from R&D through to process optimisation for existing products. [2537-051 (2006) : 75]

5. The Technology Transfer Division aims to maximise the impact of this research on health by facilitating the development of innovations to the point at which they can be developed further by the market. [2537-054 (2006) : 76]

6. Developing API processes for technology transfer from research to manufacture, you’ll look at issues connected to scale up, whilst introducing innovative processes. [2541-013 (2006) : 63]

7. As a senior member within a team of highly motivated scientists and engineers, you will work closely with suppliers to ensure that optimum design solutions are developed, verified and transferred to our production facilities. [2545-024 (2006) : 68]
8. The country's excellent science base, well-organised technology transfer and the proximity of big pharma companies are key to its biotech success, according to Ernst & Young. [2550-006 (2006) : 56-57]

9. For example, she has set out plans to improve technology transfer by abolishing Germany's rigid divide of basic and applied research, and by encouraging international collaborations in the country's many academic, public and industrial research institutions. [2550-007 (2006) : 58-59]

10. Key responsibility for this role will be development of inhalation dosage forms internally, as well as in collaboration with external partners. This comprises all stages of product development from pre-formulation through to transfer to the designated commercial production facility. [2550-011 (2006) : 61]

11. An Ecologist is required to carry out and manage research on the management of TB transmission from wildlife to cattle and to undertake applied studies to inform best-practice in cattle TB control. You will prepare reports and make presentations of research findings to customers and peer groups, e.g. at national and international conferences, and ensure that best-practice is promoted to policy makers and the farming community through technology transfer. [2550-031 (2006) : 71]

12. A number of experienced and recent PhDs and chemical engineering graduates with an interest in development, scale-up and optimization of new chemical processes & technologies are sought to join our worldwide team which is responsible for providing process engineering input into late phase development projects facilitating seamless process transfer within the R&D pilot plant network and to final manufacturing sites. [2550-032 (2006) : 72]

13. Pera is a European centre of excellence for the development and transfer of new technologies. [2550-036 (2006) : 74]

If you’re ready to transfer your skills to our organisation and take on a new and considerable challenge, then we would like to hear from you. [2554-005 (2006) : 61]

14. Working on a number of exciting projects, you will manage activities required to ensure robust processing methods are transferred into the site. [2558-024 (2006) : 67]

15. We focus on the overall formulation and delivery system design, manufacturing process development and the subsequent transfer to commercial production. [2558-025 (2006) : 68-71]

16. With a proven track record in formulation design, manufacturing process development, technology transfer and regulatory documentation, you’ll ensure appropriate expertise is available to project teams, providing the appropriate utilisation of resource and co-ordinating the activities within the function in order to meet our time, quality and cost objectives. [2558-025 (2006) : 68-71]

17. Duties include: […] • Oversee the technical transfer of new products into the commercial manufacturing network [2558-062 (2006) : 85]

18. Duties include performing and reporting lab scale experimental work, conducting scale-up activities and clinical manufacturing in the pilot plant, and facilitating the technology transfer of new products into the commercial manufacturing network. [2558-062 (2006) : 85]

19. Your team will include organic chemists, analytical chemists, engineers, PAT technologists and pharmacists. If you’ve got experience in technical transfers, physical chemistry and modelling of processes, so much the better. [2558-070 (2006) : 88]
20. The ALC’s main objective is the funding, management and facilitation of laser-based science and technology, including research, development, technology transfer, education and training on the African continent. [2563-006 (2006) : 52]

21. We are looking for two enthusiastic scientists to join our team to facilitate new and established projects in research or technology transfer and to be involved with post-graduate training. [2563-015 (2006) : 56]

22. The main responsibility is to carry out custom synthesis, process research and development and technical transfer to our global manufacturing sites. [2567-011 (2006) : 54]

24. Experience of chromatographic method development, validation and transfer is an advantage. [2567-059 (2006) : 75]

25. Experience in the development, validation and transfer of physical properties methods is an advantage but not imperative. [2567-059 (2006) : 75]

26. A track record in the transfer of technology from an academic to a commercial environment, together with excellent team building, communication and project management skills are desirable. [2572-013 (2006) : 64]

27. This important position will provide technical leadership and management to the Formulation and Process Development groups across multiple projects. Duties include, but are not limited to: 3. Overseeing the technical transfer of new products into the commercial manufacturing network [2572-018 (2006) : 67]

28. You will also have demonstrable experience of NPI and technology transfer, design control, Six Sigma and an understanding of validation within a regulated environment. [2572-037 (2006) : 76]

29. TECHNOLOGY TRANSFER SCIENTISTS: 5+years pharma exp (£Neg) - UK Wide [2572-054 (2006) : 82]

30. The Technology Transfer Division maximises the impact of this research on health through the development of innovations to the point at which they can be further developed by the market. [2572-055 (2006) : 82]

31. To do this, Tech Transfer manages funds for translation projects across the spectrum of biomedical science. [2572-055 (2006) : 82]

32. As a result of expansion in funds Tech Transfer is seeking to appoint a Business Analyst or in the case of an exceptional candidate, Senior Business Analyst. [2572-055 (2006) : 82]

33. The role will require you to work as part of a team promoting Tech Transfer's translation activities and be responsible for undertaking due diligence of proposals, evaluating their anticipated commercial exits and project managing the Trusts interests in key projects. [2572-055 (2006) : 82]

34. Based in the Formulation Group, you will support the development of inhalation products post feasibility through to product registration and transfer to commercial manufacturing. [2572-063 (2006) : 87]

35. Joining an existing team, you will support the department’s core activities, which could involve the testing of process related samples, assay transfer, assay evaluation, protein stability, protein characterisation and/or assay validation. [2576-009 (2006) : 64]
36. Applying your expertise, you'll work on a wide range of formulations and characterisation techniques, encompassing early phase research through to **transfer** to cGMP manufacturing facilities. [2576-018 (2006) : 68]

37. Joining an existing team, you will support the department’s core activities, which could involve the testing of process related samples, assay **transfer**, assay evaluation, protein stability, protein characterisation and/or assay validation. [2576-035 (2006) : 74]

38. If you have a degree or similar qualification in bioscience, plus either a proven track record in **technology transfer/business development** or a higher degree in bioscience research, this is an ideal opportunity for you to turn scientific innovations into profits. [2576-088 (2006) : 90]

39. The successful candidates will be qualified to PhD (or equivalent) level, preferably with experience in oncology and/or commercial drug discovery/development. Appointment to Business Manager level requires relevant experience in **technology transfer** and/or licensing. [2580-017 (2006) : 60]

41. A new post has arisen as part of a collaborative project on Bovine TB in the developing world. Duties will include **technology typing transfer** of molecular typing from the VLA to the Armauer Hansen Research Institute (AHRI), Addis Ababa, microarray and functional analyses of selected strains and Quality Control of typing results and data. [2580-038 (2006) : 66]

42. Experience of project management, using databases and proved **technology transfer** would be an advantage. [2580-038 (2006) : 66]

2009

1. Candidate should have degree level engineering, physics or equivalent plus three years development experience. Methodologies for system level specification, design and evaluation. Product development and **transfer** to manufacturing. [2689-005 (2009) : 47]

2. Ability to use CAD packages (Solidworks, ProE, iDEAS) to their full potential. Product development and **transfer** to manufacturing. [2689-005 (2009) : 47]

3. The DSTL has a **technology transfer** company called Ploughshare whose task it to identify and develop projects with this “dual-use” potential. [2698-004 (2009) : 48-49]

5. The **Technology Transfer** Division maximises the impact of this research on health by managing funds for translation projects across the spectrum of biomedical science. [2698-033 (2009) : 62]

6. with the twin objectives of delivering significant growth in **technology transfer** activity and assisting in the development of strategic partnerships between UCL and relevant commercial/governmental organisations. [2698-045 (2009) : 67]

8. "Traditionally biotechnology has tended to focus on the healthcare sector, but it is now diversifying," says Tim Hart of ISIS Enterprise, part of the University of Oxford's **technology transfer** company ISIS Innovation. [2702-005 (2009) : 46-47]
9. For those considering striking out on their own, taking part in a programme such as the UK-wide Biotechnology Young Entrepreneurs Scheme (Biotechnology YES) can help. On this particular scheme, participants hear from leading figures about all aspects of technology transfer and commercialisation. [2702-005 (2009) : 46-47]

10. He now juggles two jobs: he is a project manager for the University of Oxford's technology transfer subsidiary ISIS Innovation, as well as managing director of one of its break-out firms, Zyoxel, which develops simple microbioreactors, devices that enable cost-effective 3D cell culture. [2702-005 (2009) : 46-47]

11. TECHNOLOGY TRANSFER at the Wellcome Trust [2702-007 (2009) : 49]

13. Policy Adviser You will lead a range of policy activities focusing particularly on support for the UK research base, higher education, technology transfer and innovation. [2702-024 (2009) : 57]

14. Intellectual Property Manager Technology Transfer (One year fixed term) [2706-023 (2009) : 56]

15. A Ph.D. in a life sciences discipline is required together with three years' experience in managing IP or technology transfer. [2706-023 (2009) : 56]

16. This is your chance to help drive forward our policy and strategy on technology transfer and translation. [2715-017 (2009) : 58]

17. Experimental approaches will include multiparametric flow cytometry, in vitro culture and in vivo murine models including adoptive transfer techniques. [2715-023 (2009) : 59]

18. Medical Research Council Technology (MRCT) is the technology transfer company of the UK Medical Research Council (MRC) and is responsible for the development and commercialisation of some of the finest biomedical research in the world. [2719-033 (2009) : 61]

19. Ideal candidates will have an excellent knowledge of the patenting process, extensive experience of liaising with industry or will have worked in industry in a technology transfer, business development or academic liaison capacity. [2719-033 (2009) : 61]

20. A proven track record of commitment in driving projects to a successful outcome and transferring the result into the mainstream manufacturing business is required. [2724-011 (2009) : 55]

22. The Technology Transfer Division maximises the impact of this research on health through the development of innovations to the point at which they can be further developed by the market. [2724-019 (2009) : 59]

23. To do this, Tech Transfer manages funds for translation projects across the spectrum of biomedical science and this year has committed in excess of £60M to product discovery and development in both academia and industry. [2724-019 (2009) : 59]

24. As a result of expansion in funds Tech Transfer is seeking to appoint a Business Analyst. [2724-019 (2009) : 59]
25. The role will require you to work as part of a team promoting Tech Transfer's translation activities and be responsible for undertaking due diligence of proposals, evaluating their anticipated commercial exits and project managing the Trust's interests in key projects. [2724-019 (2009) : 59]

26. The Analytical Development department is involved in supporting core activities on site, which involves the testing of in-process and purified samples, protein stability studies, protein characterisation, technology transfer, assay evaluation and assay validation. [2728-006 (2009) : 55]

27. You will be responsible for the technical transfer of bioreactor processes into the Production group and the manufacture of products in compliance with cGMP requirements. [2728-011 (2009) : 57]

28. Experience in the technical transfer of projects between R&D and Production and trouble-shooting technical issues associated with bioreactor processes will be advantageous. [2728-011 (2009) : 57]

29. Candidates will also have a broad experience of diverse industrial sectors. Experience in sales, marketing or technology transfer will be essential. [2728-021 (2009) : 61]

30. Medical Research Council Technology (MRCT) is the technology transfer company of the UK Medical Research Council (MRC) and is responsible for the development and commercialisation of some of the finest biomedical research in the world. [2728-029 (2009) : 65]

31. TECHNOLOGY TRANSFER at the Wellcome Trust [2728-044 (2009) : 71]

33. Interacting with clients’ Data Management departments, you'll translate and transfer the Covance database into an electronic clinical file using a customized format that meets the needs and expectations of the customer. [2733-014 (2009) : 65]

34. An opportunity has arisen to join our Enterprise and Commercialisation Services Team to assist with our ambitious vision to accelerate our contribution to society and the knowledge economy through sponsored research, technology transfer, consultancy services and placement schemes. [2733-045 (2009) : 76]

35. TECHNOLOGY TRANSFER at the Wellcome Trust [2733-050 (2009) : 77]

37. The Associate funded by this prestigious award will transfer novel technology developed at Cardiff to Immunocore, with the objective of designing mTCR reagents with increased specificity for cancer cells. [2737-015 (2009) : 59]

38. Interacting with clients’ Data Management departments, you'll translate and transfer the Covance database into an electronic clinical file using a customized format that meets the needs and expectations of the customer. [2737-019 (2009) : 62]

39. The Grassland Development Centre team 'bridges the gap' between farmers and researchers through technology transfer programmes, ADAPTING the latest research outputs into effective farming practice. [2737-025 (2009) : 66]
1. We are delighted to announce that Ericsson Ireland has been awarded EU FP6 funding under the Marie Curie Actions, Transfer of Knowledge scheme for 2005-2009. [2481-054 (2005) : 70]

2. You will work closely with the Steering Committee to develop and execute the Programme Science, Implementation, Data Management and Knowledge Transfer Plans, and monitor progress against programme objectives. [2481-065 (2005) : 73]

3. Through contact with relevant user groups, you will facilitate collaboration, develop opportunities for co-funding and partnership and promote knowledge transfer for the exploitation of the Programme results. [2481-065 (2005) : 73]

4. A previous background in technology transfer and/or knowledge of legal issues would also be of value; however, a sound and robust understanding of scientific and medicinal applications is paramount. [2485-003 (2005) : 58]

6. This 2-year post is funded by the Dept of Trade and Industry and Lein Applied Diagnostics Ltd under the ‘Knowledge Transfer Partnership’ scheme. [2489-054 (2005) : 78]

7. The duration of the post is two years full-time and is funded by the Department of Trade and Industry (Knowledge Transfer Partnership) and Lein Applied Diagnostics Ltd. [2489-054 (2005) : 78]

8. With a 90-year history of technology and knowledge transfer in this field, East Mailing Research is a registered charity, operates from two sites in Kent and employs 100 staff. [2502-007 (2005) : 56]

9. Thanks to funding under the Marie Curie Transfer of Knowledge programme, we are now looking for four exceptional scientists - from outside the UK, but within the EU. [2502-015 (2005) : 60]

10. The Bioindustry Association through its DTI funded Knowledge Transfer Network require a recent life science graduate with interest in bioprocessing to support the team in building knowledge of the international bioprocessing sector. [2502-018 (2005) : 60]

11. A proven track record in the conduct and strategic management of scientific research in a relevant discipline and knowledge transfer. [2506-013 (2005) : 59]

12. Proven leadership skills and the ability to develop a programme of knowledge transfer of research outcomes. [2506-013 (2005) : 59]

13. SAC is a Scottish organisation dedicated to innovation and the transfer of knowledge to the land based industries. [2506-047 (2005) : 71]

14. As part of the Business Development Team, the postholder will play a pivotal role in fulfilling King’s mission to transfer knowledge to business and the wider community, by creating new partnerships and strengthening existing relationships with industry. [2506-055 (2005) : 74]
15. Experience of motion capture is desirable. You will be part of a team helping to develop the School's research and knowledge transfer agenda. [2519-069 (2005) : 76]

16. Three organisations at the centre of UK innovation, Crystal Faraday (green chemical technology), IMPACT Faraday (colloid and formulation technology) and Insight Faraday (high throughput technology) are joining together as founder members of the Chemistry Innovation Knowledge Transfer Network. [2528-030 (2005) : 71]

17. With a 90-year history of technology and knowledge transfer in this field, East Malling Research is a registered charity, operates from two sites in Kent and employs 100 staff. [2528-033 (2005) : 72]

**2006**

1. bioProcessUK is a Knowledge Transfer Network dedicated to advancing the UK biopharmaceutical bioprocessing sector and is managed by the BioIndustry Association (www.bioindustry.org). [2541-058 (2006) : 80]

2. Knowledge Transfer Networks are a DTI business support product delivered through the Technology Programme. [2541-058 (2006) : 80]

4. The project is in partnership with The University of Northampton and you will have the opportunity to register for a research degree. The post is supported by the dti Knowledge Transfer Partnership Scheme and you will be expected to undertake an NVQ level 4 in management. [2545-073 (2006) : 88]

5. SAC is a Scottish organisation dedicated to innovation and the transfer of knowledge to the land based Industries. [2545-087 (2006) : 92]

6. You will be responsible for the implementation and knowledge-transfer (KT) of the tools, working methods and results of the "Microscale Polymer Processing" project with the industrial members of the consortium. [2550-064 (2006) : 84]

8. To help the economy reap the rewards of our investments in environmental science (around £370m pa), we actively promote the transfer of knowledge generated by supported HE institutions and our institutes [2554-005 (2006) : 61]

9. Determined and able to make a significant impact, you will ensure a robust approach to Knowledge Transfer is in place [2554-005 (2006) : 61]

10. which involves users in the planning, implementation and review of the science and knowledge transfer activities supported by NERC. [2554-005 (2006) : 61]

11. As well as assuming leadership for NERC’s corporate knowledge transfer activities, you will also be responsible for our contribution to the Office of Science and Innovation’s target which relates to better exploitation of science base. [2554-005 (2006) : 61]

12. A self-starter who can operate with a high degree of autonomy and deliver to agreed goals, you will have experience in a senior knowledge management role. This will include broad knowledge of the issues associated with Knowledge Transfer, Commercialisation and Science into Policy and in-depth knowledge of at least one of these areas. [2554-005 (2006) : 61]

14. A central aim of SAGES is to facilitate links between scientists seeking a better understanding of the natural environment and people developing policy. Key posts in each Theme above will link our research in environmental science with the development, testing and application of policy and with economic development through **knowledge transfer**. [2558-005 (2006) : 60-61]

15. **KNOWLEDGE TRANSFER PARTNERSHIP ASSOCIATE** [2567-037 (2006) : 66]

16. Applications are invited for a **Knowledge Transfer** Partnership Associate, with practical experience of plant tissue culture and a high level of commitment to commercial development and marketing of new plant varieties. [2567-037 (2006) : 66]

17. The successful candidate will have the ability to: […] • Train and mentor colleagues in their specialist field, ensuring an effective **transfer of knowledge** and skills into the quality team. [2567-051 (2006) : 70]

18. We wish to appoint a dynamic, highly-proactive project manager to promote and support the University's research and **knowledge transfer** strategies in the Environmental Technology Sector. [2567-077 (2006) : 81]

19. The role will work with colleagues in the Research Development and Collaborations team comprising of three Research and Innovation Managers responsible for marketing and supporting the **knowledge transfer** strategies in three University defined areas: (i) Advanced Engineering, Physical Sciences and ICT (ii) Life Sciences and Health, and (iii) Humanities and Social Sciences. [2567-077 (2006) : 81]

20. It has a mixed portfolio of private and public sector business, and manages the recently established **Knowledge Transfer** Network for Industrial Mathematics (www.industrialmaths.net). [2572-043 (2006) : 78]

21. Applicants must be motivated by the prospect of expanding the industrial use of mathematics on a national scale. They must have a strong academic background, including a higher degree in a relevant discipline, and several years' experience working with business requirements for research and **knowledge transfer**. [2572-043 (2006) : 78]

22. **Knowledge Transfer** Managers, South and Midlands [2572-122 (2006) : 98]

24. You will take the lead in the development and execution of new projects focusing on issues such as: scientific entrepreneurship; protection and exploitation of intellectual property; barriers and incentives relating to **knowledge transfer** from universities; [2576-019 (2006) : 68]

25. and UK and EU funding schemes aimed at promoting innovation and **knowledge transfer**. [2576-019 (2006) : 68]

**2009**

1. Building on our existing track record and your own track record in research, **knowledge transfer** and commercialisation - you will embrace our ambitions and play a key role in realising our development targets. [2689-032 (2009) : 59]

2. This will involve: • The line management of the staff undertaking R&D, **Knowledge Transfer** and Sector Communication in the horticulture division, who collectively manage a research programme of over 200 projects with an annual budget of £3.5m. [2694-004 (2009) : 52]
3. Our mission is to raise public awareness and engagement in science and innovation and we work closely with business areas of the seven UK Research Councils, from knowledge transfer to research programmes. [2698-041 (2009) : 65]

4. UCL Business PLC is responsible for the delivery of University College London's commercial-facing knowledge transfer activities. [2698-045 (2009) : 67]

5. We are seeking an experienced and motivated individual to join the physical science & engineering team, who will take responsibility for developing knowledge transfer activities across the energy and environment sectors [2698-045 (2009) : 67]

6. By engaging with regional and UK businesses the KCMC is supporting sector development across key industries in the North West and the wider UK through contract research, knowledge transfer, and product & process innovation. [2698-051 (2009) : 69]

7. The University and the Institute for Systems Biology are developing a 5-year partnership within the Health Technologies plan from the Government of Luxembourg to enhance collaboration and transfer knowledge. [2698-056 (2009) : 71]

8. The University of Luxembourg is funding 12 research assignments at ISB to enhance collaboration, develop new techniques and methods and transfer knowledge between the institutions that will have an important effect on the future of health care. [2698-056 (2009) : 71]

9. ISB also has a major commitment to transferring knowledge to society. [2698-056 (2009) : 71]

10. Each year the Research Councils invest around £2.8 billion in research, training and knowledge transfer covering the full spectrum of academic disciplines. [2702-039 (2009) : 65]

11. KNOWLEDGE TRANSFER LEADER [2706-025 (2009) : 57]

12. With the imminent retirement of our current Senior Liaison Officer, Broom’s Barn is seeking a highly motivated person to lead its knowledge transfer work. [2706-025 (2009) : 57]

13. Three exciting opportunities have arisen within HGCA's Knowledge Transfer team, which co-ordinates delivery of output from the research portfolio to levy-payers using channels including field demonstrations, workshops and conferences, publications, web-tools and articles in the farming press. [2711-003 (2009) : 50]

14. The MRC Centre in Cambridge seeks an experienced Science Administrator to work in a team with an existing full-time Contracts Manager to manage contractual issues concerning research grants, collaborations and knowledge transfer on behalf of the MRC units in Cambridge. [2711-028 (2009) : 60]

15. Strong on, analysis, organisation, and networking, you will ideally have experience of knowledge transfer or the Research Council system. [2715-017 (2009) : 58]

17. Applications are invited for the post of Director of the Environmental Sustainability Knowledge Transfer Network. [2715-031 (2009) : 62]

18. We are seeking candidates who have a strong background in the area of environmental sustainability, and with proven leadership capability. He/she will develop and implement the knowledge transfer strategy of the KTN, enhance the service to business, academia and other
stakeholders, to drive innovation in environmental sustainability for the benefit of UK Plc. [2715-031 (2009) : 62]

20. The **Knowledge Transfer** Partnership is a shared venture with Cardiff University and will be jointly supervised by Professor Andy Sewell ([www.tcells.org](http://www.tcells.org)). [2737-015 (2009) : 59]

21. Further information about **Knowledge Transfer** Partnerships can be found on [www.ktponline.org.uk](http://www.ktponline.org.uk) [2737-015 (2009) : 59]

Disciplinarity Ø
Here is a random selection of 50 solutions from the 1072 found.
A0S 145 But unacceptable behaviour (and that includes bad timekeeping and too much sick leave) and poor work standards should be dealt with through your usual disciplinary procedures.

A5C 249 SHAUN EDWARDS, the Great Britain international, was found not guilty at a meeting of the Rugby League's disciplinary committee in Leeds tonight, following his sending-off during Wigan's Lancashire Cup semi-final defeat by Oldham last week.

A9H 62 A previously blameless disciplinary record should have entitled Cooper to more lenient treatment, they argue.
A9H 63 But Cooper was unfortunate to appear before the disciplinary committee at a time when it was under increasing pressure to eradicate the high, late tackle that has been such a scar on the game this season.

AAE 338 The disciplinary commission of the Italian League will consider disciplinary action against the Argentinian, who plays for Napoli.
AAE 472 The Welsh Rugby Union disciplinary committee handed out such a stiff sentence — Anthony will be out of the game until December 1990 — because this was his fourth offence.

AAN 204 STEVE HAMPSON, the Wigan and Great Britain full-back, was suspended for 10 matches by the disciplinary committee yesterday after being sent off for a head tackle in Saturday's Regal Trophy quarter-final with at Leeds.

ALW 2865 Arising from PAB, Council accepted amendments to the disciplinary regulations for a procedure for dealing with certain complaints against members, where a full investigation by a Disciplinary Committee is not published.

ASB 292 After a three-year investigation involving the Police Complaints Authority, it was announced that a number of police officers were to be admonished or advised about their conduct and were to face disciplinary charges.
ASB 775 In each year, less than 800 of these cases led to any form of criminal or disciplinary action, and the vast majority of even this small number involved nothing more severe than ‘advice or admonishment’— 651 of the 766 cases in 1987, for example.

B08 672 It would be naive, though, to think that every disciplinary complaint is avoidable.

B08 700 This is made explicit in most sets of disciplinary rules, but is in any event a term built in to your contract by the common law.

B10 1097 Research has shown the method to be by far the most effective disciplinary technique to use in situations of defiance and (as often occurs) the ensuing aggression.

B10 117 Many of the more worrying disciplinary problems of childhood and adolescence involve moral rules, and it is when children break these rules that parents become most perturbed.

B10 1185 Half of these mothers said they smacked only in anger; the remainder used smacking deliberately as a disciplinary technique.
Dreikurs advises parents to restrict talking to friendly conversations and not use it as a disciplinary measure.

Let us look at two examples of these principles applied to two common disciplinary problems.

His disciplinary record was appalling and in modern times only Willie Johnson of Rangers and Billy Bremner of Leeds come remotely close to seizing his crown.

SOUNESS LEAVES AN SFA DISCIPLINARY HEARING AT PARK GARDENS

If the manager had wanted to take tough disciplinary action against Johnstone another opportunity arose a few days after the drunken sailor saga.

He will have a fiery temper, a bad disciplinary record and a passionate spirit.

So, for instance, the responsibility of governing bodies for disciplinary and grievance procedures overrides previous local and national agreements.

Disciplinary procedures are necessary if there is dissatisfaction with a member of staff's work or conduct.

As outlined in Chapter 1, LEAs will still be the employers of school staff; governors of schools with delegated budgets, however, will now have control over setting the total number of staff at the school; appointing and dismissing staff; setting certain elements of pay and working conditions; and controlling disciplinary and grievance procedures.

principles of disciplinary policy;

The threat of disciplinary action or even dismissal from the Library Association is empty when one can practise as a librarian without membership of the professional association.

After the acquittal, the Disciplinary Committee of the jockey Club called Filmer to Portman Square to warn him as to his future behaviour, and Filmer said they couldn't touch him, and was generally unbearably arrogant.

The £2.5 million England striker, speaking for the first time since being charged with misconduct by the Football Association over the incident, said the furore surrounding his disciplinary problems was 'getting beyond a joke'.

The Great Britain forward, sent off for tripping Mike Ford in Saturday's Regal Trophy defeat by Castleford, presented video evidence to yesterday's Rugby League disciplinary committee, but it failed to save him from a two-match ban.

Disciplinary committee doubled ban, he called them a 'bunch of idiots' and announced his retirement.

A few of these difficult public-interest cases go, not to the disciplinary committee, but to the Joint Disciplinary Scheme: not more than about one or two a year, but each of them demanding a great investment of time and money.

Apart from the need to reduce delays in the investigation of complaints there is no more important issue than the need to ensure that serious misconduct is met with suitable sanctions, and that the costs of disciplinary proceedings should, so far as is practicable and just, be borne by those who cause us to incur those costs.
CBV 1974 REPORT OF THE DISCIPLINARY COMMITTEE

CBV 336 The Institute first considered the possibility of extending openness to disciplinary hearings at the request of Council member Douglas Llambias, after he had been refused admittance as an observer to the Disciplinary Committee hearing into the conduct of Polly Peck administrators Michael Jordan and Richard Stone (see ACCOUNTANCY, August, p 14).

CBV 337 Although Mr Llambias is a member of the Disciplinary Committee, he had not been selected as a member of the disciplinary panel and so was prevented by the committee's byelaws from attending.

CBV 338 The Professional Conduct Directorate will also separately consider expanding the information that is published after a Disciplinary Committee finding.

CBV 339 At present this is confined to a brief outline of the defendant's breaches and the penalty imposed, but a working party will consider the possibility of issuing a full judgment outlining the facts alleged by the Investigation Committee, the member's defence, the Disciplinary Committee's findings and any mitigating circumstances (see also p 25).

CBW 3782 Report of the Disciplinary Committee

CBW 3829 (FCA) of who had been found to be in breach of Bye-law 76(a) and liable to disciplinary action under Bye-law 76(a) (i) in that between 6 July 1983 and 9 September 1991 when joint liquidator of a limited company failed timeously to submit accounts to Companies House was reprimanded, fined £500 and ordered to pay £250 by way of costs.

CBW 3831 (FCA) of who had been found to be in breach of Bye-law 76(a) and liable to disciplinary action under Bye-law 76(a) (i) in that at Ware between 30 April 1978 and 1 October 1984 his firm audited the accounts of a limited company when his wife held shares in that Company was reprimanded, fined £1,000 and ordered

CBX 514 It has, for instance, appointed a lay chairman to its disciplinary committee and ensured that 25% of its investigation and disciplinary committees are non-accountants.

CFB 979 Suffolk NAGM secretary Margaret Young said members ‘shared the concerns of teachers’ but would not comment on whether disciplinary action would be taken.

CH3 6158 ‘If he doesn't come, the Disciplinary Committee then has to decide whether to go ahead with the inquiry in his absence,’ said the Jockey Club's Sue Williams.

CS0 1473 The compulsory haircuts forced upon the long-haired defendants in the indecency trial of the underground magazine Oz, are a clear example of the disciplinary message conveyed by the cutting of hair.

EA6 1044 Moreover, disciplinary measures proved counter-productive.

ECB 1164 Readers interested in social policy should not be put off by the disciplinary context of geography: in many respects present-day geography is the next-door neighbour of social policy studies.

EVK 1372 The system cannot be used unless:(a) the complainant consents;(b) the chief officer of police is satisfied that the case would not justify criminal or disciplinary charges being brought.

EVK 1398 or whether to bring disciplinary charges against the officer in question.

EVK 1409 He will then decide whether to prefer disciplinary charges.
EVK 1411 Disciplinary charges

EWR 768 Disciplinary conservation

FAY 1534 As regards the police, should the publication of racist statements like the unofficial communique be made a disciplinary offence, or would this merely strengthen rank-and-file resistance to the implementation of antiracist policies within the force?

FBK 302 This mechanism does not rely on a disciplinary code nor on a court-like body.

FDW 139 It was common ground that if the pre-1873 jurisdiction of the judges as visitors to the Inns of Court in disciplinary appeals was a jurisdiction exercised by them sitting elsewhere than in court or chambers, when acting as judges in pursuance of any statute, law or custom, then the jurisdiction was vested in the High Court and exercised by judges of that court sitting as such and was not amenable to judicial review.

FDW 249 The judges, with the concurrence of the Inns of Court, resolved when these arrangements were created that disciplinary powers over barristers should be exercised in accordance with the regulations governing the new Senate, and by those regulations a committee of the Senate, known as the disciplinary tribunal, exercised those powers.

FDW 66 On an application for judicial review made pursuant to leave granted by Auld J. on 7 June 1991, the applicant in the first case, Renee Joyce Calder, a barrister, sought an order of certiorari to quash the finding by the Visitors to Lincoln's Inn on 6 March 1991, upholding a decision of a disciplinary tribunal of the Council of the Inns of Court that the applicant was guilty of professional misconduct but varying the sentence from disbarment to one of five years' suspension.

FDW 8 Barrister — Discipline — Disciplinary tribunal — High Court judges sitting as visitors to Inns of Court — Disciplinary hearing resulting in suspension or disbarment — Whether decision of visitors amenable to judicial review — Whether visitors acting in capacity of High Court judges — Supreme Court of Judicature Act 1873 (36 & 37 Vict. c. 66), s. 16

FDW 9 In the first case the applicant, a barrister of Lincoln's Inn, was found guilty of professional misconduct by a disciplinary tribunal of the Council of the Inns of Court which directed that she be disbarred.

FP2 1219 Much has been made of the disciplinary power of the market for managerial services.

FP2 548 A desire to strengthen the disciplinary framework has prompted a search for ways either of restoring integrity to the model or of installing functional equivalents for owner control.

FRT 497 Lord Kilmuir added that he had no sort of disciplinary jurisdiction over Her Majesty's judges, each of whom, if asked to broadcast, would have to decide for himself whether he considered it compatible with his office to accept.

G0K 582 The latter should be reinforced by regulating what personnel may carry into the warehouse, on entry, together with an effective disciplinary procedure agreed by employees and unions.

GOR 141 How could this be, given the fissiparous nature of academic life, with its discrete disciplinary sub-communities?

GOR 1576 Specifically, it can uncover disciplinary partiality, ideology, hidden interests, professional skullduggery, deception and illusion.
‘Surprisingly’ because it is the large American universities that typify most obviously the apparent disintegration of the academic community into a multitude of discrete disciplinary cultures.

This is not just a matter of words: one does not become a member of a disciplinary community simply by having access to the latest dictionary or even the fullest encyclopaedia on the subject.

This was particularly so where, as here, the applicant had been charged with serious disciplinary offences which would result in a loss of liberty.

In case the reader should think that this small book is about to offer the solution to this problem, let it be stated immediately that a complete integration of all these different disciplinary approaches to the investment decision will probably take a considerable time and much research effort by a range of researchers.

In such cases the court will, when giving reasons for striking out and after hearing the parties' representatives if they wish, indicate who in its view is to blame for the delay, thus assisting the process of professional disciplinary sanctions and the pursuit of compensation by litigants.

We may also consider taking disciplinary action.

The right hon. Gentleman suggests that the existing disciplinary systems within the services are inadequate.

These included a concentration on a few sectors, a bias towards managerial and commercial interests, a limited appreciation of relevant contexts, the lack of a historical perspective, and a disciplinary imbalance including insufficient attention to economic factors.

‘Nevertheless the fact remains that disciplinary action against officials who may have exceeded their duties or wilfully abused the position of responsibility with which they have been entrusted is a purely internal matter which will be carried out, should the situation warrant it, by the appropriate authorities at the appropriate time.

Once any observations have been received, these and the complaint will be considered by the Director and an honourary officer and their Decision as to whether there is a case to answer before the disciplinary committee will be conveyed in writing.

That the Disciplinary Committee erred in principle in finding the complaint proven; that is, that the decision was perverse in that the weight of evidence supplied did not support the allegation made;

That the sanction recommended by the Disciplinary Committee to the HCIMA council was in appropriate or excessive.

The Council will not on such an application for readmission review, annul or amend the decision of the Disciplinary Committee which led to the expulsion and which the Council had formally approved.

There are rights of appeal against decisions of the Law Society and of the Solicitors' Disciplinary Tribunal.

The Disciplinary Tribunal may revoke recognition where there has been a breach of the Rules or other conduct requirements.
It has been suggested that Methodism generally produced an attitude of mind and sense of resignation as well as the habits of order and "industry" which combined to reinforce in the proletariat the necessary submission to the disciplinary imperatives of industrial capitalism.

Where participants cross disciplinary boundaries and professional backgrounds, a rich mix of ideas is fostered.

A disciplinary hearing has been told that the horse need five stitches to a head wound.

They'll now face disciplinary action.

Peter O'Hagan of the SDLP described the possibility of disciplinary measures against the workers as ‘victimisation of the worst kind’.

Mr Barnett said he did not believe any rules of racing had been broken, so he did not believe the Jockey Club could hold a disciplinary hearing.

His first transfer to Tottenham split two spells with Millwall before he moved to the Dell, where his no-nonsense approach and disciplinary problems earned him a hard-man reputation.

Senior Jockey Club stewards meet to decide whether disciplinary proceedings are necessary, in the wake of Mr Justice Connell's Grand National inquiry.

A £5-A-RACE flagman was today facing the prospect of disciplinary action over the Grand National fiasco after being made the scapegoat in the official inquiry report.

A disciplinary hearing involving a senior education officer who went missing during the summer was cancelled at the last minute yesterday.

THE disciplinary hearing of a senior council official accused of gross misconduct has been delayed until a legal dispute is settled, writes John Smith.

The move, pending a full disciplinary hearing, follows Mr Murphy's claims to The Scotsman earlier this month that he has evidence to support claims that there have been cases of patronage to ensure that certain jobs in the local authority went to Labour Party members.

Under a regime of permanent full employment, ‘the sack’ would cease to play its role as a disciplinary measure…‘discipline in the factories’and ‘political stability’are more appreciated by business leaders than profits.
1971

1. A one-day multi-disciplinary symposium, sponsored by Inveresk Research International, will be held at the Royal Society of Medicine, London on Monday 24th 1971. [745-093 (1971) : 64]

2. Chemical Technicians are sought for the Chemotherapeutic Research Centre, Brockham Park, Betchworth, Surrey to work as a member of a multi-disciplinary team engaged upon research in the field of anti-bacterials. [767-032 (1971) : 544]

3. Facilities are available for such studies in a variety of species and encouragement is given to carry out and publish independent work within a multi-disciplinary project team. [772-013 (1971) : 53]

4. Beecham Group Ltd has the following vacancies in its newly established multidisciplinary Research Unit for scientists interested in providing scientific support for internationally used proprietary products [733-047 (1971) : 43]

5. Emphasis is now being given to industrially oriented and multidisciplinary M.Eng. programmes; [733-053 (1971) : 44]

6. The Unit is a multidisciplinary team of scientists, economists and engineers. [750-010 (1971) : 355]

7. The successful candidate will join a multidisciplinary research project team engaged in work on various aspects of parasitology. [772-060 (1971) : 59]

8. Biochemist with good honours degree interested in enzyme kinetics required to join multidisciplinary research group. [776-024 (1971) : 288]

1995

1. The posts offer an opportunity to develop an expert role, and provide technical leadership within our multi-disciplinary project teams. [1959-017 (1995) : 49]

2. The Faculty of Engineering is a broad based multi-disciplinary faculty which covers the disciplines of Mechanical, Manufacturing, Aeronautical and Electronic and Electrical Engineering. [1959-031 (1995) : 52]

3. The successful candidate will possess both an ability to work in a multi-disciplinary team and a good understanding of computer based data analysis. [1963-026 (1995) : 56]

4. Applications are invited for a position of Postdoctoral Research Officer to work in a multi-disciplinary group which is active in new approaches to treatment and diagnosis of cancer. [1963-036 (1995) : 58]

5. The course will involve students from a wide range of relevant subjects in order to encourage multi-disciplinary cooperation. [1963-104 (1995) : 75]

6. We are looking for [...] good interpersonal skills and the ability to work effectively as a member of a multi-disciplinary team. [1971-026 (1995) : 64]

7. You will make an important contribution either as a team leader or key member of a multi-disciplinary group, establishing and building strong relationships at all levels across a wide range of UK functions and European manufacturing facilities. [1976-001 (1995) : 59]
8. Within our pharmaceutical development group we have opportunities for two formulation scientists and an analytical chemist to join our multi-disciplinary teams. [1976-012 (1995) : 63]

9. To help with this exciting and demanding work, we are seeking a computer science researcher with a strong background in distributed systems and user-interface design to join our multi-disciplinary team. [1976-027 (1995) : 69]

10. As part of a small, highly skilled multi-disciplinary team, you will be involved in all aspects of biosensor development, from project inception right through to product launch. [1976-028 (1995) : 69]

11. Experience of project/budget management is essential, as is the ability to lead a multi-disciplinary team. [1980-002 (1995) : 51]

12. We seek an enthusiastic and progressive IT Specialist to operate in a multi-disciplinary scientific environment. [1980-047 (1995) : 68]

14. The research will be based in a multi-disciplinary School which is currently active in the following areas: [1984-008 (1995) : 53]

15. The successful applicants should have: […] a practical approach and the ability to work within a multi-disciplinary team [1984-016 (1995) : 58]

16. The ability to work as part of a multi-disciplinary team is essential. [1984-036 (1995) : 63]

17. Scientists working in a multi-disciplinary environment at Philips Research Laboratories in Redhill, Surrey have the vital task of providing the product and technology innovations which will continue to give this activity its competitive technical edge. [1984-049 (1995) : 67]

18. Post-doctoral Research Fellow to work within an active and well equipped multi-disciplinary group researching into photoprocessing of thin films and surfaces directed by Professor I W Boyd. [1984-082 (1995) : 74]

19. The Division is seeking to appoint two research scientists to strengthen our existing multi-disciplinary research teams. [1989-009 (1995) : 59]

21. The Department of Medical Physics & Bioengineering is one of the foremost in the UK, providing multi-disciplinary support and development services to a wide range of hospital departments. [1989-010 (1995) : 60]

22. You will be experienced in the application of technology in a medical setting and will be interested in working with patients and be able to work well on your own and as part of a multi-disciplinary team. [1989-010 (1995) : 60]

23. Working as part of a multi-disciplinary team, you should be qualified to degree level or equivalent in Chemistry, Geology, Civil Engineering, Environmental Science or other relevant discipline (with Chemistry studied to at least "A" level standard, or as part of a subsequent qualification). [1989-068 (1995) : 75]
24. The staff of the Department have a multi-disciplinary team approach to teaching and research, and promote the concept of sustainable agricultural activity and the quality of the environment. [1989-070 (1995) : 75]

25. The candidate is expected to become part of a multi-disciplinary team whose research priority is in the area of tropical food crops and the sustainability of agriculture in Papua New Guinea and the Pacific region. [1989-070 (1995) : 75]

26. Applications are invited for this post in the newly formed multi-disciplinary Polymer Research Centre based in the Department of Chemistry. [1989-073 (1995) : 76]

27. The Senior Social Scientist will be expected to lead social science research at ICLARM, ensuring multi-disciplinary collaboration both internally and externally. [1989-079 (1995) : 77]

28. Applicants with an understanding of enzyme and protein systems as well as analytical techniques (HPLC) should also possess good communication skills and the ability to function effectively in a multi-disciplinary environment. [1989-080 (1995) : 78]

29. Working in our Ecotoxicology Branch as part of a multi-disciplinary team, you will be responsible for evaluating data contained in reports on the toxicity of pesticides to a variety of species, ranging from birds and wild mammals to earthworms and soil micro-organisms. [1993-006 (1995) : 53]

30. Working in a multi-disciplinary team you will be focusing on the cellular and molecular biological aspects of the mechanistic basis for adverse affects resulting from the interaction of chemicals with the nervous system. [1993-013 (1995) : 55]

31. Evidence of active, sustained research and professional standing in the field of specialisation is essential, as is experience in multi-disciplinary research team leadership. [1993-069 (1995) : 71]

32. There will also be opportunities to contribute to multi-disciplinary research projects involved in the characterisation of mechanisms of toxicity and international project teams responsible for drug development. [1993-077 (1995) : 73]

33. The Institute conducts problem-oriented and multi-disciplinary forest research at the European level in order to serve the needs of policy-making and decision-making bodies in Europe, as well as those of its members. Its research priorities are forest sustainability; [1993-087 (1995) : 76]

34. In addition, you must be able to demonstrate a successful track record in NPD and first hand experience of working in multi-disciplinary terms. [1998-011 (1995) : 76]

35. The successful applicant will join a thriving multi-disciplinary research department (rated 5a in the last UFC selectivity exercise) with a research income from the research councils, charities, government agencies, European Union and industry in excess of £2m per annum. [2002-037 (1995) : 66]

36. The successful candidates will become part of a multi-disciplinary collaborative team focusing on molecular and cellular aspects of staphylococcal infections and housed in the Institute of Infections and Immunity. [2002-037 (1995) : 66]

37. We seek a senior crop physiologist to join a multi-disciplinary team studying growth and its susceptibility to control through husbandry. [2002-043 (1995) : 68]

38. The Environmental Protection and Waste Management Branch is a small multi-disciplinary department within the Health Safety and Environment Division based at Barnwood, Gloucester. [2006-011 (1995) : 63]
39. An opportunity has arisen for a person holding a suitable science, audiological or equivalent degree to join a **multi-disciplinary** team providing support to the audiological service with a complement of 29 staff. [2006-012 (1995) : 63]

40. We now have an opportunity for a graduate in pharmacology or a related discipline to join a **multi-disciplinary** team engaged in the identification of novel anti-inflammatory/ immunomodulatory drugs. [2006-019 (1995) : 66]

41. Applicants who will probably hold a higher degree must demonstrate: Excellent communication and interpersonal skills and the ability to bring together and motivate **multi-disciplinary** teams. [2006-077 (1995) : 82]

42. The Centre is embarking on a **multi-disciplinary** study to assess real and perceived risks faced by the public and to investigate existing and novel approaches to address these risks at the national, community and personal level. [2006-091 (1995) : 86]

43. comprehensive vision of a systemic approach to complex, **multidisciplinary** research themes, involvement in the formulation of informatics strategies; [1959-003 (1995) : 45]

44. Applications are invited for the following posts to join **multidisciplinary** teams in the Cell Biology, and Plant Sciences, Departments. [1959-069 (1995) : 62]

45. All positions call for excellent communication skills, initiative and ability to function in a **multidisciplinary** setting. [1959-071 (1995) : 62]

46. Interrelations between all the groups in the Department are designed to allow students to tackle projects with a **multidisciplinary** approach. [1959-074 (1995) : 63]

47. We are looking for an enthusiastic and motivated person to join our **multidisciplinary** team in the radiochemistry laboratory at the Clinical PET (Positron Emission Tomography) Centre based at our St Thomas's Campus. [1959-088 (1995) : 66]

48. The successful applicant will join an active **multidisciplinary** team, an interest in computing and bioelectronics would be an advantage. [1963-040 (1995) : 60]

49. Required to work in a **multidisciplinary** team on the analysis of drug metabolites, proteins and biopolymers by either GC-MS, LC-MS or MS-MS methodologies. [1963-078 (1995) : 68]

50. Project work is done with the **multidisciplinary** IRC research team, whose current targets include virus-like particles for vaccines, protein engineered enzymes for industrial catalysis and gene production for therapy. [1963-102 (1995) : 75]

51. The course is designed to provide the quantitative, analytical and numerical skills necessary to tackle **multidisciplinary** environmental problems encountered by consultancies and national bodies. [1963-104 (1995) : 75]

52. Ability to work in a cross-cultural and **multidisciplinary** environment is essential. [1967-012 (1995) : 66]

53. A strong well-funded **multidisciplinary** department seeks research students from a wide variety of biological, chemical and physical sciences. [1967-081 (1995) : 84]

54. The research is **multidisciplinary** and will involve collaborating with scientists within BIBRA and in Europe. [1967-082 (1995) : 85]
55. This multidisciplinary Centre comprises research staff from the departments of: Colour Chemistry, Biochemistry and Molecular Biology, Medical Physics and the Regional Centre for Cancer Treatment at Cookridge Hospital at Leeds, and is funded by the Yorkshire Cancer Research Campaign to develop a new form of treatment for cancer patients using tumour photosensitising agents and laser light. [1971-030 (1995) : 65]

56. Comprehensive programmes of multidisciplinary research on Leptospira hardjo and Mycobacterium bovis are currently ongoing at the above institute. [1971-074 (1995) : 78]

57. Preference will be given to applicants who are interested in complex molecular systems and are willing to contribute to the University's new multidisciplinary Centre for Self-Organising Molecular Systems. [1980-046 (1995) : 67]

58. A high calibre Analytical Chemist is required to work within the multidisciplinary process analysis group. [1980-063 (1995) : 71]

59. Applications are invited for a two-year postdoctoral fellowship, which may be renewed at the Interdisciplinary Research Centre at the University of Sussex, to work on a multidisciplinary research project to investigate learning in a model molluscan system. [1980-102 (1995) : 80]

60. Both students would become part of well-funded multidisciplinary research teams specialising in microbial infection. [1980-121 (1995) : 86]

62. You should have the ability to pick up ideas quickly and be able to interact within a multidisciplinary team. [1984-015 (1995) : 57]

63. Applicants should be prepared to take a multidisciplinary approach and experience in analytical science and/or electron microscopy would be an advantage. [1984-091 (1995) : 76]

64. A multidisciplinary approach to neuroscience with emphasis on neurological and psychiatric disorders starting in October 1995. [1984-118 (1995) : 82]

66. The person will have demonstrated ability to manage and provide scientific leadership to a multidisciplinary research and development group; demonstrated excellence in hydrologic or soil physics research relevant to irrigated agriculture with effective information transfer; [1989-043 (1995) : 70]

67. You will need […] experience of environmental assessment, working in a multidisciplinary project team and giving evidence at public enquiries; [1989-087 (1995) : 80]

68. Applications are invited for a post for up to two years in a large multidisciplinary team working on fungal pathogens of insects. [1989-097 (1995) : 82]

69. An ability to work accurately and communicate at the appropriate level is essential together with the ability to work within a small multidisciplinary team. [1993-021 (1995) : 57]

71. Opportunities have arisen for four scientists to join *multidisciplinary* teams in two of our Units. [1998-045 (1995) : 87]

72. The Veterinary Medicines Directorate is an Executive Agency of the Ministry of Agriculture, Fisheries and Food responsible for ensuring the safety, quality and efficacy of veterinary medicines in the UK. Its *multidisciplinary* teams assess licence applications, investigate suspected adverse reactions and inspect manufacturers of immunological products. [2002-047 (1995) : 69]

73. The successful candidate will be expected to work independently with an international *multidisciplinary* team and to take responsibility for guiding and supervising laboratory staff. [2002-070 (1995) : 75]

74. The successful applicant would be encouraged to pursue research in a *multidisciplinary* environment with, for example, exercise physiologists, biomechanists and psychologists. [2006-016 (1995) : 65]

75. The successful applicant will be a creative individual who is able to work independently and collaboratively as part of a large *multidisciplinary* team. [2006-038 (1995) : 71]

76. Applications are invited to join a highly active *multidisciplinary* research group for a two-year position, funded by the EPSRC, involving the examination of semi-solid emulsions using dielectric spectroscopy. [2006-042 (1995) : 73]

77. An integral part of this exploration effort is a group of geophysicists operating as a *multidisciplinary* team throughout the region. [2006-064 (1995) : 78]

78. The Clinical Sciences Centre is a *multidisciplinary* research institute which integrates basic chemical and biological research with clinical applications. [2006-081 (1995) : 83]

79. This new role will also present the opportunity to organise our collections of resolving agents and catalysts and liaise effectively within dynamic *multidisciplinary* project teams to solve pharmaceutical synthetic problems. [2006-082 (1995) : 84]

2005

1. The work will be conducted in our *multi-disciplinary*, well-equipped research laboratory, which accommodates 15 technical, scientific and clinical staff involved in clinical research of the hormonal aspects of breast cancer. [2481-009 (2005) : 56]

2. Joining a talented, *multi-disciplinary* team, you will be central to the discovery and characterisation of novel therapeutic antibodies - medicines that will make a difference to patients' lives. [2481-037 (2005) : 65]

3. You will be required to carry out a wide range of duties in a *multi-disciplinary* group. [2481-074 (2005) : 76]

4. NIBSC is a *multi-disciplinary* scientific establishment whose purpose is to safeguard and enhance public health by standardizing and controlling biological substances used in medicine. [2485-027 (2005) : 66]

5. A Senior Research Scientist with considerable plant biochemistry experience is required to join a *multi-disciplinary* team. [2485-042 (2005) : 72]

6. For all these positions we seek individuals capable of working within *multi-disciplinary* project teams and who have excellent communication skills. [2485-047 (2005) : 74]
7. The successful candidates will work in multi-disciplinary teams, to offer support to a variety of projects. [2485-062 (2005) : 78]

8. The Department regularly achieves the highest possible ranking as part of research assessment exercises and our research takes place in a strongly multi-disciplinary environment that provides the basis for applications in Energy Transport, Defence and Health Care sectors. [2485-107 (2005) : 92]

9. We're based in a purpose-built laboratory in a multi-disciplinary setting and are looking for a highly motivated self-starter, to manage one ATO and one MTO3. [2489-010 (2005) : 62]

10. The Analytical Sciences function of the MS & T group currently has vacancies for scientists to be part of multi-disciplinary teams working on analytical aspects of all global pharmaceutical API and drug product activities, ensuring that business goals are met to the highest quality standards and demanding project timescales. [2489-022 (2005) : 69]

11. This position offers an ideal opportunity to learn about the work of a multi-disciplinary scientific and clinical research group, and to gain experience in the management of a translational clinical study. [2489-042 (2005) : 75]

12. An opportunity currently exists for a Biochemist to join our lively multi-disciplinary team supporting the production and development of research biochemicals in Poole. [2493-011 (2005) : 58]

13. ACES brings together the multi-disciplinary skills of the University of Aberdeen, the Scottish Executive Environment and Rural Affairs Department (SEERAD), Macaulay Land Use Research Institute, and the Natural Environment Research Council's (NERC) Centre for Ecology and Hydrology. [2493-059 (2005) : 73]

14. Our Scientists are involved in a wide range of projects, often working within multi-disciplinary teams, contributing directly to improving the lives of the workforce in the UK. [2498-016 (2005) : 56]

15. One where you can contribute as a Formulation Scientist, and grow your own expertise across a range of activities and dosage forms — within close-knit, multi-disciplinary teams. [2498-020 (2005) : 57]

16. Your proven track record includes evidence of winning funding for a significant scientific portfolio, leading multi-disciplinary teams, forming international collaborative partnerships and is supported with relevant scientific publications. [2498-032 (2005) : 61]

17. Working in a multi-disciplinary team, you will be involved in formulation and processing studies in support of the development and improvement of new and existing pharmaceutical products. [2502-013 (2005) : 59]

18. The laboratory is part of a strong multi-disciplinary program in cell signalling and gene expression and is situated in a new state-of-the-art research facility. [2502-047 (2005) : 71]

19. In addition to your analytical ability, integrity and experience of working in a multi-disciplinary environment, you will also be able to demonstrate your expertise in one of the following fields : [2511-015 (2005) : 56]

20. A post has been funded as part of the Millennium Cohort Study and the post holder will join a multi-disciplinary research team involved in determining the acquisition of common childhood infections in early life. [2511-043 (2005) : 67]

21. Recognised globally for our multi-disciplinary approach to research in the three key areas of manufacturing, materials and sustainable systems, our focus is on fundamental research and its application to meet the needs of industry and society. [2511-076 (2005) : 78]
22. Cascade Consulting is a **multi-disciplinary** environmental consultancy with offices in Manchester, East Grinstead and Swindon. [2515-004 (2005) : 54]

23. Our Scientists are involved in a wide range of projects, often working within **multi-disciplinary** teams, contributing directly to improving the lives of the workforce in the UK. [2515-022 (2005) : 63]

24. The applicant, preferably from a software and hardware programming background, will work within a **multi-disciplinary** team to develop an advanced real time imaging system for 3-dimensional manipulation of single molecules using optical traps (optical tweezers). [2515-029 (2005) : 66]

25. You will maintain an awareness of worldwide industry trends and contribute to project objectives and outcomes as part of a **multi-disciplinary** team. [2515-041 (2005) : 70]

26. You should have excellent practical skills and an innovative approach as well as the ability to work independently within a **multi-disciplinary** team environment. [2515-049 (2005) : 72]

27. The Australian Nuclear Science and Technology Organisation, ANSTO, is a leading Australian **multi-disciplinary** research and development organisation focussed upon delivering the benefits of nuclear science and technology to community and industry. [2519-017 (2005) : 60]

28. You will be a senior member of a small **multi-disciplinary** research team working within the Manufacturing Science Group, which aims to provide support across the business. [2519-020 (2005) : 61]

29. An exciting opportunity has arisen within Process Catalysts & Technologies (Billingham) to fulfil the role of Catalyst Forming Development Scientist as part of a **multi-disciplinary** Manufacturing Science Team. [2519-020 (2005) : 61]

30. The job responsibilities include designing and executing experiments, defining realistic timelines for studies, and supervising the activities of research associates, as well as analyzing, recording and interpreting data, compiling and maintaining data and communicating results to **multi-disciplinary** teams. [2524-004 (2005) : 52]

31. The Department of Neurodegenerative Disease is looking to appoint a Research Active Tissue Bank Manager to work as part of a **multi-disciplinary** research team on an MRC sponsored Prion-1 Clinical Trial. [2524-076 (2005) : 78]

32. Equally important, however, are team leadership experience, a forward-thinking approach and the ability to bring out the best in **multi-disciplinary** teams. [2528-036 (2005) : 73]

33. As part of our planning for RAE 2008, the School's research portfolio now integrates its scientific and clinical disciplines into cross cutting **multi-disciplinary** programmes focussing on human health, disease and treatment. [2528-060 (2005) : 85]

34. Our culture is collaborative, our teams small and **multidisciplinary**, and our work stimulating and rewarding. [2481-061 (2005) : 72]

35. A **multidisciplinary** panel will judge applications and the results will be announced in March 2005. [2481-084 (2005) : 79]

36. In this senior mathematical modeling role, you'll evaluate scientific opportunities, develop strategies, provide leadership to **multidisciplinary** teams, and act as a group leader for a mathematical modeling team. [2485-024 (2005) : 64]
37. The MRC Mammalian Genetics Unit is a **multidisciplinary** campus for mouse genetics research with a wide array of programmes. [2485-054 (2005) : 76]

38. You are flexible, highly organized, able to work to tight deadlines, and enjoy working in a **multidisciplinary** team. [2485-057 (2005) : 77]

39. This will involve managing programs as well as developing and implementing discovery strategy in a **multidisciplinary** environment. [2485-066 (2005) : 80]

40. Comfortable working independently or in a **multidisciplinary** team, you will have good communication skills and natural scientific creativity. [2485-066 (2005) : 80]

41. You will also be independent, with initiative as well as the personal and communication skills to work well with chemists and biologists in a **multidisciplinary** team. [2485-066 (2005) : 80]

42. The group takes a **multidisciplinary** approach to technological innovation. [2485-095 (2005) : 88]

43. A funded research studentship leading to PhD available now for a good Honours graduate to work in a **multidisciplinary** team with substantial funding from the EPSRC, SRIF and the Wolfson Foundation. [2485-106 (2005) : 92]

44. You’ll bring in new ideas on organisational dynamics and team working, you’ll review the approaches of the **multidisciplinary** teams and facilitate changes where necessary, and most important of all, you’ll inspire a culture of more integrated thinking throughout SEAC’s diverse project portfolio. [2489-007 (2005) : 61]

45. We’re looking for a professional with five to ten years’ people management experience in a large, **multidisciplinary** scientific / technical programme environment. [2489-007 (2005) : 61]

46. Key requirements include: […] Excellent interpersonal skills and an ability to work within **multidisciplinary** and international teams. [2489-022 (2005) : 69]

47. For all positions we are looking for individuals with an aptitude to learn and the desire to apply new techniques, an open and proactive personality, the ability to work in **multidisciplinary** teams combined with excellent communication and problem solving skills. [2493-008 (2005) : 57]

48. i2 Analytical are a rapidly growing **multidisciplinary** environmental testing laboratory based in Uxbridge, West London. [2493-014 (2005) : 58]

49. With a pivotal role in the drug discovery and development process a sound knowledge of drug metabolism would be welcome, however it is less important than the ability to work in a **multidisciplinary** team, where dedication, self-motivation and effective communication are prerequisites. [2493-029 (2005) : 64]

50. We are seeking to appoint an enthusiastic and motivated post graduate to join the **multidisciplinary** research team coordinating the MRC/CRUK/ Dept of Health funded United Kingdom Collaborative Trial of Ovarian Cancer Screening (UKCTOCS) (website: www.ukctocs.org.uk ). [2493-044 (2005) : 69]

51. Working with a **multidisciplinary** research team, you will perform a variety of molecular biology techniques and provide technical support and assistance investigating the genetic and environmental factors involved in modulating thrombosis risk in patients with diabetes mellitus. [2493-055 (2005) : 71]
52. You’ll play an active role in **multidisciplinary** teams, applying advanced techniques and pushing scientific boundaries, all in the cause of protecting UK Armed Forces from the effects of toxic agents. [2498-005 (2005) : 51]

53. The Microbiology Department is a large **multidisciplinary** team of scientists working with the food industry to improve safety and quality of food products. [2498-013 (2005) : 54]

54. The HSB will be responsible for managing all internal research and industry support contracts in Systems Biology, evaluation of scientific opportunities, strategy development and provision of leadership to **multidisciplinary** teams. [2498-015 (2005) : 55]

55. The ability to work within and lead **multidisciplinary** teams, applying skills from laboratory to manufacturing scale is essential. [2498-027 (2005) : 59]

56. The NCSR is a world renowned, large-scale, **multidisciplinary** research centre focused on the fundamental science and applications of chemical sensors and biosensors. [2498-061 (2005) : 71]

57. Key requirements include: [...] Excellent interpersonal skills and an ability to operate within **multidisciplinary** and international teams. [2502-013 (2005) : 59]

58. You must have, or be expecting to receive, a PhD in an appropriate discipline; a good track record of publications, and a proven ability to work on **multidisciplinary** projects are highly desirable. [2502-042 (2005) : 69]

59. This project is part of a **multidisciplinary** collaboration involving both academic and commercial laboratories attempting to develop therapeutic agents from neural stem cells. [2502-043 (2005) : 70]

60. A **multidisciplinary** approach, encouraged through strong links with UK and international companies, guarantees the School’s graduates a high standing in the market place of employment, research training and professional recognition. [2502-067 (2005) : 77]

61. **Multidisciplinary** projects: [2506-060 (2005) : 75]

62. These projects are **multidisciplinary**. [2506-060 (2005) : 75]

63. We are currently looking for suitably qualified individuals to join a **multidisciplinary** research team based in the School of Industrial & Manufacturing Science that offers an exclusively postgraduate environment in which to develop research related careers. [2511-065 (2005) : 74]

64. The Group offers an exciting **multidisciplinary** environment with research in progress applicable to energy, waste, oceanography, earth imaging and numerical mathematics. [2511-069 (2005) : 75]

65. This is a **multidisciplinary** study linked to wider NERC & EU projects and will study a range of environments (e.g. estuaries, mud volcanoes, seeps) and will involve European research cruises. [2511-070 (2005) : 75]

66. We seek 3 enthusiastic individuals to contribute scientifically and technically to our work providing radiation safety and radiology physics services, delivering radionuclide therapies as part of an internationally recognised **multidisciplinary** team, and contributing to the NHS Breast Screening Programme. [2515-017 (2005) : 60]

67. You will join our **multidisciplinary** Product Development team that focuses on investigating new drug delivery technologies and demonstrating the technical feasibility of these new developments. [2515-018 (2005) : 61]
68. The CCLRC is one of Europe's largest *multidisciplinary* research organisations supporting scientists worldwide. [2515-029 (2005) : 66]

69. We are looking for an experienced Immunologist or Pharmacologist to join our *multidisciplinary* Immunopharmacology team as a Scientific Associate. [2515-033 (2005) : 67]

70. Your primary role will be the synthesis of novel, biologically targeted compounds as part of a *multidisciplinary* team. [2515-057 (2005) : 74]

71. Applicants should have at least a first degree in biological sciences or in a related discipline, proven IT experience, and excellent written and verbal communication skills, and be able to work effectively in a *multidisciplinary* academic and clinical environment. [2515-065 (2005) : 77]

72. CMRI has an established track record of funding for collaborative and *multidisciplinary* research and innovation activities and facilities from HEFCE, Research Councils (EPSRC), DTI, EU and industry sources. [2515-074 (2005) : 80]

73. Applications are invited for a position based in the Division of Pathology and Neuroscience at Ninewells Hospital & Medical School in a *multidisciplinary* research group investigating the responses of the haemopoietic system to ionizing radiation, the influence of genetic factors on these responses and the mechanisms underlying the development of longer-term pathological changes. [2515-080 (2005) : 81]

74. An enthusiastic scientist with 5-10 years' post-doc in vivo drug discovery experience with a PhD in Pharmacology, Physiology or a related discipline, you will be scientifically credible with significant experience of drug discovery in a biotech or pharmaceutical environment and a track record of delivery on NCE projects as part of a *multidisciplinary* team. [2519-021 (2005) : 61]

75. The Health and Safety Laboratory (HSL) is the UK’s leading health and safety facility with an enviable international reputation for *multidisciplinary* research and investigation. [2519-040 (2005) : 68]

76. A *multidisciplinary* research team at Letterkenny Institute of Technology, Ireland have successfully secured funding from Enterprise Ireland to develop a new Centre of Applied Marine Biotechnology and undertake research on three projects: (1) Identification of bivalve larvae using fluorescence in-situ hybridisation (FISH) techniques, (2) Development of high-value products from crustacean processing waste and (3) Development of multiplex real-time PCR techniques for the detection of Listeria, Salmonella and E. coli in marine products. [2519-044 (2005) : 69]

77. The Division provides an integrated laboratory animal and technical resource to the NIMR, managing several *multidisciplinary* animal facilities that include the breeding and supply of SPF rats and mice, housing of animals in containment levels II, III and IV, maintenance of several aquatic species and the production of genetically altered rodents and associated techniques. [2519-057 (2005) : 72]

78. This project is part of a larger DEFRA/HEFCE funded *multidisciplinary* programme investigating food borne pathogens in farm environments. [2519-067 (2005) : 75]

79. This is a *multidisciplinary* research programme which offers a broad range of opportunities in materials synthesis and characterisation. [2519-071 (2005) : 76]

80. There are opportunities to manage programs, develop and implement a drug discovery strategy in a *multidisciplinary* environment. [2524-002 (2005) : 52]

81. Comfortable working independently and co-ordinating with a *multidisciplinary* team, you will have excellent scientific ability and communication skills. Experience with automation of electrophysiology would be useful. [2524-002 (2005) : 52]
82. You will design and synthesize small molecule ion channel ligands, working in a multidisciplinary environment interacting with scientists from other disciplines. [2524-002 (2005) : 52]

83. Applications are invited for the position of Centre Director of the NCSR - one of the world's leading multidisciplinary research centres in Sensor technology - at Dublin City University (DCU). [2528-009 (2005) : 63]

84. Applicants should have previous experience in managing and directing multidisciplinary research teams and should have research interests that lie within the primary focus areas of the NCSR (www.ncsr.ie). [2528-009 (2005) : 63]

85. Ability to identify and drive/lead strategic research initiatives involving multidisciplinary teams targeting national, EU and international funding agencies; [2528-009 (2005) : 63]

86. The Life Sciences Interface group at Tyndall National Institute, Cork, Ireland, is a multidisciplinary group of researchers, spanning engineering, physical and biological science backgrounds, developing micro- and nano-system tools and devices for applications in biological, medical and environmental science and technologies. [2528-011 (2005) : 63]

87. They should also be able to demonstrate effective multidisciplinary teamworking and communication skills. [2528-014 (2005) : 64]

88. Your primary role will be the synthesis of novel, biologically targeted compound libraries as part of a multidisciplinary team of synthetic, analytical and computational chemists. [2528-017 (2005) : 66]

89. As the role involves multidisciplinary teams and interaction with client companies, the role would be suited to candidates with several years' relevant industrial experience. [2528-017 (2005) : 66]

90. A research associate is required to study the interaction of carcinogenic compounds with DNA, as part of a multidisciplinary team researching the molecular mechanism of carcinogenesis. [2528-071 (2005) : 88]

2006

1. This senior role involves working on preclinical and clinical studies, as well as representing the department in multi-disciplinary, international project teams. [2533-026 (2006) : 54]

2. Just as important will be the confidence and communication skills to operate in a multi-disciplinary team environment, and knowledge that includes mechanistic organic chemistry and problem solving. [2537-021 (2006) : 65]

3. The CSIR is South Africa's largest research and technology organization. It has a strong track record in directed and multi-disciplinary research focused on improving the quality of life of the people of South Africa. [2537-038 (2006) : 70]

4. MEMS and Nanotechnology Multi-disciplinary projects include: [2537-067 (2006) : 81]

5. NIBSC is a multi-disciplinary scientific establishment with the crucial role of protecting public health through standardizing and controlling biological substances found in medicine. [2537-085 (2006) : 87]

6. Here's your chance to work with them – even those who are outside of your specialist area. Join us, and you’ll collaborate across a variety of categories and functions in Unilever on multi-disciplinary projects; you’ll exchange ideas for novel approaches to risk assessment; and you’ll learn from some of the brightest scientific minds around. [2541-004 (2006) : 57]
7. Within the **multi-disciplinary** structure of Unilever, we’re currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. [2541-004 (2006) : 57]

8. Within the **multi-disciplinary** structure of Unilever, we're currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. [2541-007 (2006) : 59]

9. We are seeking a competent **multi-disciplinary** scientist to join our sales and marketing team. [2541-010 (2006) : 60]

10. Within the **multi-disciplinary** structure of Unilever, we're currently looking for people at various levels in disciplines such as Statistics, Machine Learning, Bioinformatics, Toxicology, Microbiology, Life Cycle Analysis and Analytical Chemistry. [2541-011 (2006) : 61]

11. Working in **multi-disciplinary** teams with structural scientists, biologists, molecular modellers and DMPK/pre clinical development scientists the Winnersh role is likely to be more laboratory based whilst at Cambridge the bias will be towards projects. [2541-029 (2006) : 69]

12. The National Institute for Biological Standards and Control is a **multi-disciplinary** scientific establishment which protects public health through standardization and control of biological substances used in medicine. [2541-050 (2006) : 78]

13. You will lecture in vertebrate zoology and will be a member of a **multi-disciplinary** team teaching and researching zoological and ecological issues of national and international importance. [2541-063 (2006) : 81]

14. You will join a **multi-disciplinary** team of Chemists, Psychologists and Neuroscientists working on novel MRI techniques, plasticity, learning and memory and studies involving implantation therapies to cure neurological disease. [2541-070 (2006) : 83]

15. Required to join a dynamic, **multi-disciplinary** team working on large-scale research into the molecular and genetic causes of heart attacks. [2541-082 (2006) : 86]

16. In addition you will have effective communication, interpersonal and organisational skills and the proven ability to work effectively to tight deadlines and under pressure as a member of a **multi-disciplinary** team. [2545-023 (2006) : 67]

17. As a PhD or equivalent in physics or materials science with several years' experience in a relevant R&D environment, you will have a strong **multi-disciplinary** and technical understanding of complex polymer network formation. [2545-026 (2006) : 68]

18. You will be able to demonstrate a strong **multi-disciplinary** and technical understanding and an ability to influence the development of new materials. [2545-026 (2006) : 68]

19. Responsible for the design, analysis and interpretation of these studies, you will contribute to **multi-disciplinary** project teams to aid optimal drug discovery. [2545-027 (2006) : 69]

20. As well as a commitment to success through **multi-disciplinary** teamwork, you must be self-motivated and exhibit excellent communication skills. [2545-035 (2006) : 73]

21. Part of the **multi-disciplinary** Pharmacovigilance Group, you will be involved in a range of activities relating to drug safety monitoring. [2545-043 (2006) : 77]
22. In addition you will have effective communication, interpersonal and organisational skills and the proven ability to work effectively to tight deadlines and under pressure as a member of a **multi-disciplinary** team. [2545-043 (2006) : 77]

23. Required to manage a series of international clinical trials, the role will involve trial design and protocol preparation, CRO selection and management, leadership of a **multi-disciplinary** team, trial timeline, budget management and interaction with key opinion leaders. [2545-064 (2006) : 84]

24. Besides people management, the position will offer opportunities to work in **multi-disciplinary** and international teams, and to represent the department in external expert groups. [2550-011 (2006) : 61]

25. Besides people management, the position will offer opportunities to work in **multi-disciplinary** and international teams, and to represent the department in external expert groups. [2550-011 (2006) : 61]

26. Based in Inverness, you'll travel throughout the region giving nature conservation advice to our property-based staff, establishing and maintaining ecological monitoring programmes and inputing - as part of a **multi-disciplinary** team – to holistic management planning. [2554-021 (2006) : 65]

27. You will join a **multi-disciplinary** team that uses a broad range of molecular biology and mammalian cell biology techniques to select and characterise antibodies against novel cancer targets. [2554-025 (2006) : 67]

28. Good people skills, demonstrating ability and comfort in leading **multi-disciplinary** teams are required. [2554-040 (2006) : 74]

29. Imperial has been a pioneer in this field, and the project is part of a major BSN collaboration involving a large **multi-disciplinary** team. [2554-082 (2006) : 88]

30. To achieve this goal, you will have a track record in developing and sustaining research networks, enthusiasm for promoting **multi-disciplinary** research and international credibility in geoscience and environmental research. [2558-005 (2006) : 60-61]

31. The UCL Ear Institute is a **multi-disciplinary** facility which opened in January 2005. [2558-018 (2006) : 65]

32. Individuals who wish to work in a **multi-disciplinary** environment are particularly encouraged to apply. [2558-018 (2006) : 65]

33. Working closely with **multi-disciplinary** scientists from all areas of discovery and development, you will provide expert technical input to the selection of developable materials for candidate drugs used in pre-clinical and early clinical studies. [2558-025 (2006) : 68-71]

34. Analytical Development within PAR&D plays a major role in the development of new pharmaceuticals, combining the expertise of analytical chemists, organic chemists and spectroscopists in **multi-disciplinary** teams. [2558-025 (2006) : 68-71]

35. You will work in a **multi-disciplinary** team of postgraduate scientists and students, within a larger multi-user research lab. [2558-078 (2006) : 91]

37. We are looking for an experienced and well-organised individual to join the **multi-disciplinary** research team responsible for supporting the regional centres and ensuring data quality. [2563-074 (2006) : 76]
38. Introduce new methodologies and approaches, whilst working in various projects and **multi-disciplinary** teams. [2567-036 (2006) : 66]

39. These are exciting and forward thinking roles, requiring candidates who are self-motivated, equipped with **multi-disciplinary** team working skills and committed to success: [2567-056 (2006) : 73]

40. You'll work with external partners to make certain that their waste packaging strategies have a long-term outlook, commission **multi-disciplinary** assessments and make sure they are well managed. [2572-040 (2006) : 77]

41. From the start, you'll determine areas for exploration and oversee a **multi-disciplinary** programme that encompasses both desk and laboratory research. [2572-040 (2006) : 77]

42. In addition you will have effective communication, interpersonal and organisational skills and the proven ability to work effectively to tight deadlines and under pressure as a member of a **multi-disciplinary** team. [2572-060 (2006) : 85]

43. This is a multi-partner (CCLRC, Diamond Light Source, Imperial College and Oxford University), **multi-disciplinary** project to develop a facility based on high repetition rate, few optical cycle tuneable laser sources - one of which will be used to produce ultra-fast XUV pulses through high harmonic generation. [2572-061 (2006) : 86]

44. The National Institute for Biological Standards and Control is a **multi-disciplinary** scientific establishment whose purpose is to safeguard and enhance public health by standardizing and controlling biological substances used in medicine. [2576-049 (2006) : 78]

45. This post would particularly suit applicants who have an interest in the practical application of clinical research data and will provide the opportunity to work within a large and vibrant **multi-disciplinary** clinical research group and for international collaboration with experts in the field. [2576-078 (2006) : 87]

46. You will be required to work in a **multi-disciplinary** team of postgraduate scientists and students within a larger multi-user research lab. [2576-078 (2006) : 87]

47. In this challenging position, you will be part of a large **multi-disciplinary** team conducting exploratory research to identify and validate targets for cystic fibrosis and COPD. [2580-013 (2006) : 59]

48. The role will also involve the provision of technical support to end-users, licensees, the sales team and the **multidisciplinary** R&D team. [2533-002 (2006) : 44]

49. To maintain our position at the cutting-edge we require talented individuals to join our **multidisciplinary** R&D team with relevant skills and qualifications in coatings, printing inks, photochemistry, organic, inorganic or polymer chemistry. [2533-002 (2006) : 44]

50. We are looking for an Immunologist or Pharmacologist to join our **multidisciplinary** Immunopharmacology team as a Scientific Associate. Along with a relevant BSc or MSc, you will need at least two years' experience in the use of current immunological assays - particularly ELISA, flow cytometry and cellular immunological techniques such as cell purification, proliferation and intra-cell cytokine studies. [2533-019 (2006) : 51]

51. A **multidisciplinary** panel will judge applications and the results will be announced in March 2006. [2533-038 (2006) : 57]

52. This is an exciting opportunity for a synthetic organic chemist with a desire to join a lively **multidisciplinary** team. [2537-021 (2006) : 65]
53. You will have excellent written and oral communication skills with organisational skills relevant to the management of a multidisciplinary science and engineering R&D programme involving NHS units, universities, industry and charities. [2537-028 (2006) : 68]

54. The National Institute for Biological Standards and Control is a multidisciplinary scientific Institute concerned with the control and standardisation of biological substances used in medicine. [2537-035 (2006) : 69]

55. Your role will focus on designing and interpreting multidisciplinary toxicology studies to evaluate the safety of chemicals and proteins. [2537-048 (2006) : 73]

56. Applications are invited for a position based in the Division of Pathology and Neuroscience at Ninewells Hospital and Medical School in a multidisciplinary research group investigating the responses of the haemopoietic system to ionizing radiation, the influences of genetic factors on these responses and the mechanisms underlying the development of longer-term pathological changes particularly leukaemia. [2537-071 (2006) : 83]

57. These courses emphasise the use of state-of-the-art, multidisciplinary methods in modern post-genomic biology and macromolecular structure-function relationships. [2537-086 (2006) : 87]

58. With a PhD in heterogeneous catalysis, and preferably with experience in synthesis of inorganic catalysts, the successful candidate will join our high performing multidisciplinary team to deliver these exciting challenges. [2541-020 (2006) : 66]

59. You must demonstrate an ability to prioritise your own workload, have excellent communication skills and be able to work as part of a multidisciplinary team. [2541-043 (2006) : 76]

60. The Council for the Central Laboratory of the Research Councils, CCLRC, is one of Europe's largest multidisciplinary research organisations supporting scientists and engineers world-wide. [2541-062 (2006) : 81]

61. You will be responsible for leading multidisciplinary teams to deliver development programmes involving all aspects of pre-clinical, CMC and clinical development. [2545-007 (2006) : 60]

62. You will have a proven track record of working in multidisciplinary teams and will have demonstrated both a meticulous attention to detail and the ability to develop a strategic overview. [2545-007 (2006) : 60]

63. Suitable candidates will have a strong development background with excellent communication skills, the ability to work to deadlines, experience of managing multidisciplinary projects and the ability to select and manage contract organisations. [2545-015 (2006) : 64]

64. As the work involves interaction with a range of different business units, the ability to work as part of a multidisciplinary team and liaise with customers and clients is essential. [2545-055 (2006) : 81]

65. The role involves working in multidisciplinary teams with close interaction with client companies. [2550-034 (2006) : 73]

66. Along with a proven background in quantitative analysis of GPCR ligand pharmacology and/or GPCR assay development, you must demonstrate a commitment to success through multidisciplinary teamwork. [2550-040 (2006) : 75]
67. Reporting to the SVP Drug Discovery, you will lead a team of pharmacologists within the R&D group and will also act as project leader directing a **multidisciplinary** team of scientists. [2550-049 (2006) : 79]

68. Reporting to the Discovery Informatics Department Head, you will also act as project leader directing a **multidisciplinary** team of scientists. [2550-049 (2006) : 79]

69. You will join a well-funded **multidisciplinary** team actively engaged in skeletal tissue engineering. [2550-055 (2006) : 81]

70. The successful candidates will join a **multidisciplinary** team based at Imperial College in London working with an extensive international network of pharmaceutical scientists in this major high-profile project. [2550-062 (2006) : 83]

71. With a track record of excellence in large scale modelling of the Earth's climate system, you will help lead the development of a **multidisciplinary** Centre of Earth System Dynamics. [2558-005 (2006) : 60-61]

72. We offer a **multidisciplinary** environment that encourages freedom of thought and expression, in an area of Scotland with exceptional natural beauty and high quality of life. [2558-010 (2006) : 63]

73. This challenging position involves working with various teams on **multidisciplinary** projects and surveys. [2558-033 (2006) : 74]

74. Forming part of a large **multidisciplinary** team, you will carry out basic research to identify and validate new targets for GI disease, and to provide key animal model data to support our drug discovery projects. [2563-053 (2006) : 68]

75. You should have the ability to work effectively on **multidisciplinary** problems. [2563-058 (2006) : 70]

76. The Group offers an exciting **multidisciplinary** environment with research in progress applicable to energy, waste, oceanography, earth imaging and numerical mathematics. [2563-082 (2006) : 78]

77. Candidates should possess excellent communication and presentational skills and enjoy working in a multi-team **multidisciplinary** environment. [2567-014 (2006) : 56]

78. Perform and manage **multidisciplinary** research on food ingredients that can favorably affect the blood lipid profile, blood pressure and vascular function and provide scientific evidence to substantiate cardiovascular health effects of existing and new food products. [2567-036 (2006) : 66]

79. The National Institute for Biological Standards and Control is a **multidisciplinary** scientific establishment whose purpose is to safeguard and enhance public health by standardizing and controlling biological substances used in medicine. [2567-039 (2006) : 67]

80. Potential candidates are likely to have at least two years industrial medicinal chemistry experience and will be ambitious to develop their careers in an exciting laboratory-based **multidisciplinary** role. [2572-038 (2006) : 76]

81. A post-doctoral scientist or exceptional graduate in a relevant discipline will join a **multidisciplinary** group with a special focus on CF disease. [2572-078 (2006) : 94]

82. A research background in synthetic organic chemistry would be an advantage. Candidates should also possess excellent organisational, communication and presentational skills, and enjoy working in a multi-team **multidisciplinary** environment. [2576-045 (2006) : 77]
83. The successful candidate will join a team of multidisciplinary addiction researchers and will contribute to the preclinical and/or clinical components of drug abuse research. [2576-058 (2006) : 80]

84. This is a multidisciplinary group based in the Division of Pathology and Neuroscience at Ninewells Hospital and Medical School investigating the responses of the haemopoietic system to stress and injury (particularly ionizing radiation) the influences of genetic factors on these responses and the mechanisms underlying the development of longer-term pathological changes, particularly leukaemia. [2576-083 (2006) : 89]

85. As an experienced marine ecologist, skilled particularly in the collection and identification of marine and estuarine algae, you will be expected to work as part of a multidisciplinary marine team, participating in field survey work, laboratory analysis, assessing & interpreting data including the analysis of remotely collected images and use of GIS. [2580-058 (2006) : 74]

86. This will involve close working with multidisciplinary clinical teams in each centre, other researchers both employed by the network and employed in the individual centres and the co-ordinating centre and Stroke Network Manager at St George's. Applicants will be required to travel to a number of hospitals within South London and Surrey. [2580-060 (2006) : 76]

87. As QIS research can be multidisciplinary, applicants with appropriate backgrounds in mathematics, computer science, engineering etc., in addition to physics and mathematical physics are welcome. [2580-068 (2006) : 78]

2009

1. Typically a geneticist or genomicist who has worked as part of a multi-disciplinary sequencing team encompassing the whole experimental cycle from sample collection through to high quality publication, the ideal candidate needs to be an innovative thought-leader and scientific risk taker, probably also having links to other key people in the field. [2689-005 (2009) : 47]

2. Requiring a high level of interaction between multi-disciplinary teams, this role interfaces the design of the instrumentation with the needs of the customer and our internal scientists and engineers. [2689-005 (2009) : 47]

3. The multi-disciplinary team combines innovative experimental work on biochemistry and electrochemistry as well as electronic design and testing. [2689-010 (2009) : 49]

4. Our multi-disciplinary department is well equipped with state of the art instrumentation and the latest technologies and models to assess both in vitro drug metabolism, in vivo pharmacokinetics, and in vitro genotoxicity. [2689-025 (2009) : 56]

5. This successful candidate will be responsible for representing the ADMET group on multi-disciplinary Discovery project teams, providing appropriate ADMET scientific input and actively contributing to the decision making process involved in the design, evaluation and selection of pre-clinical candidate molecules. [2689-025 (2009) : 56]

7. Profile: […] Excellent oral and written communication skills, strong quality awareness, enthusiastic and highly motivated, flexible and willing to interact across multi-disciplinary teams. [2689-025 (2009) : 56]
8. This new **multi-disciplinary** programme will provide high-level training in all aspects of carbon capture and storage, as well as an overview of global carbon management. [2689-043 (2009) : 62]

9. Senior responsibility within a **multi-disciplinary** team for surveillance data management for VLA’s Food and Environmental Safety programme. [2694-002 (2009) : 51]

10. Experienced in quantitative epidemiology in animal or public health, you will lead **multi-disciplinary** research and/or surveillance project teams in challenging areas including food-borne zoonoses and TSEs. [2694-002 (2009) : 51]

11. As a member of a **multi-disciplinary** team, you will support successful delivery of research and/or surveillance projects through tasks including descriptive data analysis, managing implementation of fieldwork and questionnaire design. [2694-002 (2009) : 51]

12. We have two positions for experienced scientists who are motivated by the challenge of leading our ADME activities in an exciting **multi-disciplinary** environment. [2694-003 (2009) : 52]

14. The John Innes Centre (JIC) and University of East Anglia (UEA) have formed a unique **multi-disciplinary** alliance, integrating world-class expertise in biological, earth and social sciences to tackle the challenges posed by a changing climate. [2698-065 (2009) : 74]

15. This new **multi-disciplinary** programme will provide high-level training in all aspects of carbon capture and storage, as well as an overview of global carbon management. [2698-070 (2009) : 75]

16. Excellent interpersonal and communications skills is essential, as is the ability to work in a **multi-disciplinary** team. [2702-022 (2009) : 56]

17. Skills and experience in working with **multi-disciplinary** and multi-cultural teams and team building are also required. [2706-016 (2009) : 53]

18. The Job: The Agronomist will be a member of the **multi-disciplinary** research team of ICRISAT to develop and implement an integrated research program on cropping systems management under rainfed farming systems in collaboration with national and international partners under ICRISAT's Protracted Relief Program (PRP). [2706-017 (2009) : 53]

19. In return you'll be able to enjoy working as part of a **multi-disciplinary** team in a stimulating environment, with a competitive salary package and a dedicated mentor to steer your career development. [2711-012 (2009) : 55]

20. Applications are invited for a postdoctoral Research Assistant to join our active **multi-disciplinary** group consisting of members of the Fetal Medicine Unit (Professor Thilaganathan) and the Reproductive and Cardiovascular Research Group (Professor Whitley and Dr Cartwright). [2711-045 (2009) : 65]

21. Many projects are **multi-disciplinary**, so a working knowledge of engineering would also be advantageous. [2715-026 (2009) : 60]

22. The Nuffield Department of Medicine (NDM) is a large **multi-disciplinary** Department that links high quality basic biological science with medical application. [2715-037 (2009) : 64]

23. We also have two exciting opportunities for scientists who are motivated by the challenge of developing and applying xenobiotic metabolism expertise in a stimulating **multi-disciplinary** environment. [2719-007 (2009) : 49]
24. This exciting **multi-disciplinary** project will involve working in laboratories in John Matthey and the University of Cambridge Engineering Department, where advanced research on nanomaterials has a high international reputation. [2719-038 (2009) : 63]

25. This new **multi-disciplinary** programme will provide high-level training in all aspects of carbon capture and storage, as well as an overview of global carbon management. [2724-005 (2009) : 52]

26. The National Institute for Biological Standards and Control (a centre of the HPA), is a **multi-disciplinary** scientific establishment whose purpose is to safeguard and enhance public health by standardizing and controlling biological substances used in medicine. [2728-007 (2009) : 56]

27. Applications from candidates with **multi-disciplinary** interests spanning micro and nanotechnology for healthcare, energy and/or "green" technologies would be particularly welcomed. [2728-034 (2009) : 67]

28. A proven track record in a communications management role in a complex **multi-disciplinary** public sector organisation, operating in a highly political environment, is essential. [2733-022 (2009) : 68]

29. The PDRAs will be based within leading research groups in the Universities of Hull, Leeds, Sheffield and York working across four **multi-disciplinary** university projects. [2733-038 (2009) : 74]

30. This is a **multi-disciplinary** project concerned with quantifying and reducing uncertainty in the predictions of complex models across a wide range of application areas, including basic science, environmental science, engineering, technology, biosciences and economics. [2733-041 (2009) : 75]

31. The Division of Imaging Sciences is a large **multi-disciplinary** department with a large basic science programme in imaging with particular focus on PET, SPECT and MRI, and has a large research team of imaging physicists, computer scientists, mathematicians and chemists. [2737-028 (2009) : 66]

32. Delivering specialist cell biology knowledge to multidisciplinary teams creating biosensing devices [2689-010 (2009) : 49]

33. Excellent communication skills are a pre-requisite as the position involves interacting with a team of multidisciplinary scientists and external contractors. [2689-019 (2009) : 52]

34. Substantial experience in recruiting, leading the integration of multiple scientific disciplines into a coherent program and the multidisciplinary (biology, mathematical and computational biology, and new technologies) development of research teams is mandatory. [2689-033 (2009) : 59]

35. In addition to excellent practical skills and top-tier knowledge of synthetic organic chemistry, a creative ability for planning and executing assignments in a multidisciplinary environment is essential. [2694-009 (2009) : 55]

36. First class communication and interpersonal skills are essential as you will be working with multidisciplinary teams. [2694-024 (2009) : 61]

37. The National Institute for Biological Standards and Control is a multidisciplinary scientific establishment whose purpose is to safeguard and enhance public health by standardising and controlling biological substances used in medicine. [2694-029 (2009) : 63]

38. Our vision is for a multidisciplinary and interdisciplinary approach to the understanding and application of functional materials, exploiting world-leading materials knowledge to deliver new concepts, processes and products. [2694-042 (2009) : 69]
39. Appointees will also have the opportunity to contribute to the **multidisciplinary** Energy Futures Lab and the Grantham Institute for Climate Change and to work closely with scientists and engineers in Shell and Qatar Petroleum. [2698-011 (2009) : 53]

40. All researchers will work in **multidisciplinary** teams in the QCCSRC and have close contact with the Energy Futures Lab and the Grantham Institute for Climate Change. [2698-011 (2009) : 53]

41. Both JIC and UEA have excellent research facilities and distinguished reputations for basic and applied research in plant, microbial and environmental science using **multidisciplinary** approaches. [2698-065 (2009) : 74]

42. We are seeking an enthusiastic and motivated individual to join a **multidisciplinary** team delivering a range of knowledge exchange activities aimed at different stakeholder groups and areas pertinent to the Moredun group, including: Scientists, Veterinarians, Farmers, Policy, Education and Public. [2702-016 (2009) : 53]

43. Reporting to the Research Operations Manager and working as part of a small team, you will provide day-to-day support for our laboratory based scientific/research staff in a **multidisciplinary** role. [2702-022 (2009) : 56]

44. Competent interpersonal and communications skills is essential, as is the ability to work in a **multidisciplinary** team. [2702-022 (2009) : 56]

45. You have good communication and coordination skills to work effectively with other teams in the **multidisciplinary** matrix and with external partners. [2702-036 (2009) : 64]

46. The Norwegian Centre for Integrated Care and Telemedicine (NST) is a consolidation of **multidisciplinary** and previously separate entities at University Hospital of North Norway in Tromso, Norway, that work with Information and communication technologies (ICT) to enhance integrated healthcare. [2706-036 (2009) : 61]

47. We have a vacancy for a Team Leader who can demonstrate excellence in ADME/PK. Managing 2-3 members of staff, the role combines lab-based work with client-facing activities and involves working in **multidisciplinary** teams with close interaction with client companies, dealing with a rapidly changing workload whilst working to tight deadlines. [2711-030 (2009) : 61]

48. The appointee will work with Professor Nick Tyler (who heads the ARG) and will be able to make use of the ARG's facilities such as the world's only multisensory pedestrian environment laboratory and its national, international and **multidisciplinary** connections. [2711-034 (2009) : 62]

49. Ready to work in a **multidisciplinary** environment with drive and enthusiasm to take your research to the next level? [2715-048 (2009) : 67]

50. Since NIOZ is a **multidisciplinary** institute, collaboration with geologists, biogeochemists and physicist is encouraged. [2719-035 (2009) : 62]

51. "It is very **multidisciplinary**, the whole area of global health research, drug access, delivery and quality assurance," says Shunmay Yeung, who also works on malaria at LSHTM. [2728-004 (2009) : 52-53]

52. They will be learning in an environment with strong **multidisciplinary** research and a broad range of basic, translational and clinical research training. [2728-025 (2009) : 63]

53. The successful candidate will be well-organised and able to work independently and contribute conceptually to the overall research programme of our **multidisciplinary** group. [2728-038 (2009) : 69]
54. We are looking for a highly motivated graduate research assistant to join our multidisciplinary research group studying the role of myocardial high-energy phosphate metabolism in the development of cardiac hypertrophy and heart failure (for background see Neubauer *N Engl J Med* 2007;356:1140). [2733-040 (2009) : 74]
Annexe 10-8 Ourrences de INTERDISCIPLINARY dans CAEMS

1971

1. Interdisciplinary Research in Farm Waste [733-035 (1971) : 42]

2. The applicant must have a strong background in physical and earth sciences, and research interests relating to interdisciplinary geotechnical studies, which involve liaison with civil engineers and geologists. [733-049 (1971) : 43]

3. Experience of teaching interdisciplinary science and technology-based courses is desirable. [745-001 (1971) : 57]

4. The successful candidate will join an interdisciplinary team of Scientists, Psychologists, Statisticians and Natural Scientists carrying out research into aspects of the Open University’s operation. [745-027 (1971) : 59]

5. The organisation of the University provides considerable flexibility in the construction of degree courses for individual students and provides for interdisciplinary studies. [750-030 (1971) : 357]

6. Candidates should have research and/or industrial experience, and an interest in interdisciplinary studies. [758-039 (1971) : 53]

7. One of the studies of this interdisciplinary group concerns the immobilisation of enzymes to permit their retention in catalytic reactors for medical and industrial application. [763-014 (1971) : 344]

8. The research program is highly interdisciplinary and the total staff of approximately 300 includes about 130 professional scientists and engineers. [772-018 (1971) : 54]

9. However, the Polytechnic is in the process of organising a new Interdisciplinary degree under the aegis of the CNAA [772-027 (1971) : 55]

10. FELLOWSHIPS AND ASSISTANTSHIPS for interdisciplinary graduate study in the solid-solid-interface and tribology (the science of friction, wear, and lubrication) are available to qualified applicants with backgrounds in engineering, surface physics, or surface chemistry. [772-086 (1971) : 63]

12. Aston’s Interdisciplinary Higher Degree scheme provides the opportunity to research into a genuine problem supplied by a collaborating industrial organisation and, at the same time, earn a Ph.D. [774-050 (1971) : 192]

1995

1. rationalisation of the Research Council’s support in this key area by maximising collaboration and interdisciplinarity between the relevant research communities within a co-ordinated programme environment, leading to increased effectiveness and value for research funding [1967-052 (1995) : 78]

2. Graduate Research Assistant required to join an inter-disciplinary research group whose objective is development of growth factor antagonists for cancer chemotherapy. [1959-068 (1995) : 61]

3. A Chemist, preferably with ICP-AES experience, is needed to join an interdisciplinary team to carry out analysis of sediments. [1959-075 (1995) : 63]
4. Applications are invited for 2 Post-Doctoral Research Fellows and a Research Studentship to join an inter-disciplinary research team working in the area of optical-based sensors for chemical and in-situ health monitoring of materials and structures. [1984-047 (1995) : 66]

5. The project will contribute to wider inter-disciplinary research funded by a Realising Our Potential Award (ROPA) gained by the University of York. [1989-114 (1995) : 86]

6. Under BBRSC funding a new research post is available to join an inter-disciplinary research group on the applications of Surface Plasmon Resonance to immunosensing. Expertise in SPR is essential, preferably with some experience in biosensors or the biosciences. [1959-091 (1995) : 66]

7. Many of the individual projects are inter-disciplinary, while the majority are supported by, or are connected with, similar programmes in the pharmaceutical industry. [1963-024 (1995) : 56]

8. This inter-disciplinary department specialises in research, design, evaluation and manufacturing of novel custom built joint replacement devices. [1963-044 (1995) : 60]

9. The BBSRC and EPSRC jointly announce a new inter-disciplinary co-ordinated programme in bioinformatics, which is intended to consolidate the previous bioinformatics activities of SERC and AFRC. [1963-055 (1995) : 63]

10. The person appointed will be required to work as a member of an inter-disciplinary team and should have expertise in imaging, mathematical modelling and visualisation of experimental data. [1963-082 (1995) : 69]

11. The School is the largest inter-disciplinary institution in the UK devoted to environmental sciences. [1963-092 (1995) : 72]

12. The BBSRC inter-disciplinary Research Centre at UCL offers a route tailored to biological scientists who wish to help the biotechnological-based industries harness new discoveries in biology. [1963-102 (1995) : 75]

13. As the UK’s inter-disciplinary Research Centre, UCL is superbly equipped and the last phase of an additional £12m facility has recently been completed. [1963-102 (1995) : 75]

14. An ability to address demanding inter-disciplinary challenges is essential, and previous experience in one or more of the areas of biophysical chemistry, experimental surface science and physical organic chemistry would be advantageous. [1967-045 (1995) : 76]

15. promotion of high quality engineering and scientific research studies of an inter-disciplinary nature, which reflect the longer term needs of British industry; [1967-052 (1995) : 78]

17. Applicants should hold a Ph.D. in a science or engineering discipline that equips them with the inter-disciplinary knowledge and skills required to chemically modify electrolytes, analyse and characterise resulting deposits. [1967-057 (1995) : 78]

18. Urban sustainable development is a highly inter-disciplinary activity, with a remit across the engineering, physical and social sciences and we need a coordinator with experience of user needs and an enthusiasm for urban sustainable development. [1967-091 (1995) : 87]

19. RXRC Cambridge carries out inter-disciplinary research in the development and use of technologies for supporting distributed organisations, with a strong emphasis on the human and organisational aspects of technology in use. [1976-027 (1995) : 69]
20. The successful applicant will be a member of an interdisciplinary team investigating the problems of establishing new woodlands under the Farm Woodland Premium Scheme. [1976-051 (1995) : 75]

21. The Council is seeking applications for funding in the above areas; proposals for interdisciplinary teams are particularly encouraged where appropriate. [1976-058 (1995) : 77]

22. Materials Science is an interdisciplinary undergraduate programme in the Faculty of Science. [1976-084 (1995) : 83]

23. The Queen's University Environmental Science and Technology Research Centre is an industry-University co-operative research centre with a membership currently of nineteen companies supporting interdisciplinary research programmes. [1980-014 (1995) : 58]

24. The ORC is a large interdisciplinary research centre with an international pioneering reputation in lasers, guided-wave and fibre optics, optical communications, optical sensor technology, optical physics and solid state laser technology. [1980-081 (1995) : 75]

25. Applications are invited for a two-year postdoctoral fellowship, which may be renewed at the Interdisciplinary Research Centre at the University of Sussex, to work on a multidisciplinary research project to investigate learning in a model molluscan system. [1980-102 (1995) : 80]

26. The Department adopts an interdisciplinary approach to research with broadly-based interests ranging from the fundamental to the applied. [1980-126 (1995) : 87]

28. The School is the largest interdisciplinary institution in the UK devoted to environmental sciences. [1984-072 (1995) : 72]

29. The UK Natural Environment Research Council has approved funding of £1.4 m for a 3-year interdisciplinary Special Topic on marine biofouling, to address surface properties, attachment processes and other interactions between organisms and marine substrata. [1984-085 (1995) : 75]

30. The purpose of the studentship is to create an opportunity to research an interdisciplinary, applied environmental sciences Ph.D. in some aspect of land use change, coastal management or rural sustainability in the East Anglia region generally, but most especially in the area around Aldeburgh in East Suffolk. The subject matter could be based on agriculture in transition, conservation of threatened ecosystems, managing coastal retreat in the face of the sea level changes, or rural renaissance through Local Agenda 21 sustainable development schemes. [1984-105 (1995) : 79]

31. Ideally the successful candidate should be able to tackle the research in an interdisciplinary manner. [1984-105 (1995) : 79]

32. The School is the largest interdisciplinary institution in the UK devoted to environmental sciences. [1984-105 (1995) : 79]

33. We have a vacancy for a specialist in Geographical Information Systems (GIS) and statistics to work as a member of an interdisciplinary team carrying out applied research on the control of malaria and funded by the Overseas Development Administration: the ODA Malaria Programme. [1989-061 (1995) : 73]

34. The successful applicant should have demonstrated experience in the selection and ongoing evaluation of major interdisciplinary research projects [1993-008 (1995) : 54]
35. The successful candidate's duties will include - Providing support for these methods in an interdisciplinary team up to the point of handover to Quality Control [1993-012 (1995) : 54]

36. The following BBSRC (ROPA)-funded posts are available immediately for a fixed period of three years to join research groups in this expanding interdisciplinary research centre. [1993-072 (1995) : 72]

38. Applications are invited for 2 Laboratory Managers for our Departments of Engineering (...) and Materials/ Interdisciplinary Research Centre [1998-066 (1995) : 92]

39. An interdisciplinary national program on nanometer structures is coordinated by Prof L. Samuelson at the Division of Solid State Physics and is centred around the physics, fabrication and applications of low-dimensional semiconductor structures, with special emphasis on optical properties and electronic transport phenomena. [2002-022 (1995) : 61]

40. There is ongoing collaboration and conditions are good for further interdisciplinary interactions with related research groups at the Department of Physics, e.g. with surface science at the Division of Synchrotron Radiation Physics and MAX lab (Prof I. Lindau), with optical research at the Division of Atomic Physics (Prof S. Svanberg), with condensed matter theory at the Dept of Theoretical Physics (Prof L. Hedin, retiring in 1995) and with various subfields at the Chemical Center in Lund, e.g. high-resolution electron microscopy (Prof J-O. Bovin). [2002-022 (1995) : 61]

41. We are looking for graduate scientists to join an interdisciplinary project team working on the development of plants with improved disease/pest tolerance at our research station in Jealott's Hill, Berkshire. [2002-042 (1995) : 68]

42. Commitment to GIS is growing with the Department-based development of an interdisciplinary University Centre for Geographic Information Studies. [2006-016 (1995) : 65]

43. Due to the interdisciplinary nature of the project, previous experience in the field is not a prerequisite and applicants with a background in physics, chemistry, engineering and other related fields will be considered. [2006-042 (1995) : 73]

44. The Department is interdisciplinary in nature; its current members have backgrounds in biology, computing, medicine, physics and psychology. [2006-045 (1995) : 74]

46. Its programme is directed at pressing global issues of the United Nations, particularly those concerning developing countries, making use of advanced research methodologies with an interdisciplinary approach. [2006-075 (1995) : 82]

2005

1. The programme, Global Science in the Antarctic Context, focuses on important science problems and uses integrated inter-disciplinary research, monitoring and survey. [2481-003 (2005) : 53]

2. Candidates should have strong research experience in atomic force microscopy, scanning tunnelling microscopy or single molecule electronics, and be keen to work in an interdisciplinary research team that includes physical and life scientists. [2485-097 (2005) : 89]
3. To fulfil this role, you must have: [...] Proven **inter-disciplinary** communication and interaction skills. [2498-010 (2005) : 53]

4. To fulfil this role, you must have: [...] Proven **inter-disciplinary** communication and interaction skills. [2498-010 (2005) : 53]

5. To fulfil this role, you must have: [...] Proven **inter-disciplinary** communication and interaction skills. [2498-010 (2005) : 53]

6. It is expected that the incumbent will participate in the development of **inter-disciplinary** health research and clinical training in the McGill University Hospital Centre. [2515-067 (2005) : 78]

7. The Plymouth Marine Laboratory (PML) is an international centre of excellence for **interdisciplinary** science and technology. [2481-031 (2005) : 62]

8. The centre will effectively double in size in July when a new building housing the Centre for **Interdisciplinary** Research opens for business, specialising in diabetes and tropical diseases. [2485-001 (2005) : 54-55]

9. The appointee will be part of an **interdisciplinary** team, and will have an excellent opportunity to broaden his/her scientific horizons. [2485-100 (2005) : 90]

10. The programme will provide an **interdisciplinary** training, and applications are invited from students graduating from any biological, physical, computational or mathematical first degree course. [2485-120 (2005) : 95]

12. We are actively seeking talented students with an interest in **interdisciplinary** science to enter our Masters programme in October 2005. [2489-073 (2005) : 82]

13. This MSc delivers a core course in term one which provides **interdisciplinary** training in environmental economics, law, policy, science, health and technology. [2489-077 (2005) : 83]

14. The Dental Materials and Biomaterials Science Group, at the University of Bristol, is an **interdisciplinary** group comprising physical, biological and clinical scientists and is based in the 5* RAE-rated Department of Oral and Dental Science. [2493-036 (2005) : 67]

15. With a PhD in physics, electronic engineering, materials science or a related discipline, you will have experience in one or more of the following: MBE growth, ultra-high vacuum systems, semiconductor device fabrication and characterisation, and the ability to work as part of a team in an **interdisciplinary** environment and liaise with Government, EC and University collaborators. [2493-037 (2005) : 67]

16. Applications are particularly welcome from applicants who utilise GIS, molecular techniques, stable isotopes or **interdisciplinary** approaches (including physics, mathematics and social sciences), but this is not a requirement. [2493-046 (2005) : 69]

17. Applications are invited for **interdisciplinary** projects aimed at understanding processes influencing sustainability, analysing conflicts which threaten sustainability, and developing strategies for intervening and managing these conflicts. [2493-059 (2005) : 73]
18. Facilities for **interdisciplinary** research have recently been expanded with the Faculty of Engineering's new £15M BLADE laboratories. [2493-061 (2005) : 73]

19. You will manage an **interdisciplinary** team of post doctoral level scientists and will liaise with your UK and USA colleagues across a wide range of scientific disciplines, including software, hardware, molecular biology and chemistry. [2498-010 (2005) : 53]

20. The Life and Environmental Sciences Division at the University on Oxford is a highly **interdisciplinary** organisation, bringing together academic departments representing diverse disciplines but sharing common thematic interests. [2498-049 (2005) : 68]

21. Provides **interdisciplinary** training in environmental economics, law, policy, science, health and technical innovation. [2498-070 (2005) : 74]

22. Manchester **Interdisciplinary** Biocentre [2502-047 (2005) : 71]

23. This is a very broad-based and challenging role within a unique **interdisciplinary** environment, requiring a breadth of experience and expertise. [2502-047 (2005) : 71]

24. As part of the College of Medicine and Veterinary Medicine the School offers unparalleled opportunities for groundbreaking **interdisciplinary** research in the bio-medical Sciences. [2502-052 (2005) : 72]

25. The projects are **interdisciplinary** and may involve collaborative studies and use of facilities in Australia. [2502-064 (2005) : 75]

26. The successful candidate will take responsibility for applied ecological and agronomy elements and help to run an **interdisciplinary** research programme on organic farming systems. [2506-047 (2005) : 71]

27. We offer excellent non-clinical courses in a 5A rated **interdisciplinary** Research Institute within the Medical School - high success rate in job or academic placement. [2506-074 (2005) : 78]

28. This **interdisciplinary** project combines psychometric methods for quantifying personality traits with molecular genetic methods. [2511-072 (2005) : 77]

29. The project will draw upon **interdisciplinary** and complementary skills in any of the following methods: lab-on-a-chip, microfluidics, fluorescence microscopy, cell biology, proteomic measurement technologies, assay development and spectroscopy. [2515-063 (2005) : 76]

30. This post is available immediately for a fixed term until 1 October 2010 to join an **interdisciplinary** and multi-centre team of scientists on a project, funded by the Wellcome Trust, to study the role of protein matrices in the control of biomineralisation. [2519-060 (2005) : 73]

31. The Department of Chemistry (www.uwo.ca/chem) is a large research intensive department with strong programs in many areas of chemistry and with good **interdisciplinary** links to research groups in other departments in the Faculties of Science, Engineering and Medicine and Dentistry. [2519-068 (2005) : 76]

32. The University of Southampton ORC is the largest Photonics Centre in the UK and provides a stimulating **interdisciplinary** research environment spanning diverse fields including: optics, lasers, chemistry and biology. [2524-074 (2005) : 78]

**2006**

1. We offer the successful applicant an inspiring and innovative **inter-disciplinary** environment located within the pleasant surroundings of a green-field science park. [2541-009 (2006) : 60]
2. You will also have a strong **inter-disciplinary** approach, with the ability to work with others across disciplinary boundaries. Experience of project planning and supervision is essential. [2554-070 (2006) : 85]

3. Whether you are an emerging researcher or plan a future in a biophotonics-related industry, we can provide the fundamental understanding and hands-on experience necessary for work in this rapidly developing **inter-disciplinary** field. [2558-094 (2006) : 96]

4. The activity will fit within the Cambridge Centre for Micromechanics, which is an inter-departmental, **inter-disciplinary** research group housed within the Engineering Department. [2576-077 (2006) : 87]

5. We offer the successful applicant an inspiring and innovative **inter-disciplinary** environment located within the pleasant surroundings of a green-field science park. [2580-021 (2006) : 61]

6. This £100,000 award will be presented to a European-based scientist with less than ten years of post-doctoral experience for the proposal of a novel **interdisciplinary** research project in the field of toxicology. [2533-016 (2006) : 50]

7. Applications will be judged on the basis of innovative approaches to **interdisciplinary** research and relevance to the LRI programme. [2533-016 (2006) : 50]

8. Faculty Position in Electron Microscopy and Director of the **Interdisciplinary** Centre of Electron Microscopy (CIME) [2533-039 (2006) : 58]

9. The new professor is expected to manage and strengthen the **Interdisciplinary** Centre of Electron Microscopy (CIME), to develop strong interactions with the School of Life Sciences and to initiate research collaborations with industry. [2533-039 (2006) : 58]

10. We seek applicants with an **interdisciplinary** vision, a strong record of scientific accomplishments and a commitment to excellence in teaching at both the undergraduate and graduate levels. [2533-039 (2006) : 58]

11. This post provides an excellent opportunity for an individual interested in **interdisciplinary** applied research in animal and public health. [2533-040 (2006) : 58]

12. Our research encompasses both pure and applied science that find solutions to specific scientific, and technological problems in traditional disciplines and new **interdisciplinary** areas. [2533-063 (2006) : 64]

13. One of the core objectives of the College is to encourage **interdisciplinary** research and training and our schools work in close association with each other and other research organisations and universities. [2533-063 (2006) : 64]

14. Applicants must be of high intellectual calibre, ambitious, willing to work in an **interdisciplinary** and transnational environment and to experience academic as well as industrial approaches. Intensive specialist training will be given in a formal setting by leading experts. [2537-047 (2006) : 73]

15. You should have experience of working as part of an **interdisciplinary** team, ideally gained in an industrial environment. [2537-065 (2006) : 80]

16. **Interdisciplinary** background, experience in managing international scientific and technical programmes. [2541-066 (2006) : 82]

17. Projects are available across a range of modern and **interdisciplinary** research areas including structural
biology, biochemistry, virology, biological chemistry, enzymology, neurobiology, cell biology, physiology, computational biology and biophotonics. [2541-094 (2006) : 91]

18. The Engineering and Physical Sciences Research Council (EPSRC) seeks to appoint a Director with the vision and skills to bring together a team of interdisciplinary researchers drawn from academic, industrial and Government institutions, to develop a coherent research portfolio around grand challenges in Autonomous Systems Application Domains. [2545-063 (2006) : 84]

19. The EPSRC plans to make a considerable strategic investment of £14.5 million in this area in the form of an Interdisciplinary Research Collaboration (IRC) that will be funded for an initial period of six years. [2545-063 (2006) : 84]

20. The European Molecular Biology Laboratory, EMBL is an international research organisation with its Headquarters Laboratory in Heidelberg, Germany and four additional Units in Hinxton (the European Bioinformatics Institute, EBI), Grenoble, Hamburg, and Monterotondo. EMBL offers a highly collaborative, uniquely international culture. It fosters top quality, interdisciplinary research by promoting a vibrant environment consisting of young independent research groups with access to outstanding graduate students and postdoctoral fellows. [2550-014 (2006) : 63]

21. First and post-graduate degrees in relevant subjects, a strong track record in publications and grant-winning, and a willingness to operate as a team player in the Soils theme, are essential. Also commitment to collaborative, interdisciplinary approaches to science is highly desirable. [2550-015 (2006) : 64]

22. The appointee will continue developing their own high quality research, at the same time as shaping the research direction of an interdisciplinary team of soil physicists, biologists and geochemists, as well as spatial statistics and GIS experts. [2550-015 (2006) : 64]

23. We are seeking an enthusiastic and hard working individual to join our interdisciplinary research team in stem cell therapy and skeletal tissue engineering. [2550-055 (2006) : 81]

24. The project is interdisciplinary, ideally suited to an individual who wishes to work at the interface between chemistry and biomedical science. [2550-057 (2006) : 82]

25. Fermentation position in the Interdisciplinary Manufacturing Research Centre (IMRC) for Bioprocessing, UCL. [2550-066 (2006) : 84]

26. The Interdisciplinary Manufacturing Research Centre for Bioprocessing at UCL is funded by the Engineering and Physical Sciences Research Council (EPSRC) and currently have research themes on protein and plasmid DNA production with hosts such as Escherichia coli, Pichia pastoris and mammalian cells. [2550-066 (2006) : 84]

27. MSc Environmental Technology develops an interdisciplinary understanding of technical, scientific and social science aspects of environmental technology [2554-011 (2006) : 63]

28. The Biophysics Group consists of an interdisciplinary team of physicists, chemists, engineers and dentists. There are currently 6 PhD students and 2 postdoctoral scientists. Links are also established with Departments of Biomaterials, Materials, Chemistry and Physics within the University and overseas, as well as with several leading commercial companies. [2554-062 (2006) : 83]

29. Edinburgh's School of Chemistry offers an innovative and interdisciplinary approach to traditional chemistry subjects and is at the forefront of research in emerging disciplines. [2554-086 (2006) : 89]

30. Systems Biology discovers how living organisms function in health and fail in disease through interactions of their components. With its brand-new Manchester Interdisciplinary BioCentre, the Manchester Centre of Integrative Systems Biology (www.mcisb.org), and the AstraZeneca Chair of
Systems Biology, The University of Manchester is becoming a world-wide lead in Systems Biology. [2554-088 (2006) : 90]

31. Up to 10 fellowships are available for students with a physical science / engineering / mathematics background for 4-year PhD studentships in the Manchester Interdisciplinary BioCentre's Centre for Integrative Systems Biology. [2554-088 (2006) : 90]

32. David W. Schindler is recognized for his discoveries, made through interdisciplinary experimental research and ecological hypothesis testing, that contribute to understanding how anthropogenic stressors affect the health of freshwater ecosystems. [2558-002 (2006) : 19]

33. With a strong background in flood risk modelling, you will lead an interdisciplinary team focussing on the estimation of flood risk and its impacts as climate changes. [2558-005 (2006) : 60-61]

34. You will have expertise in researching vulnerable populations to complement and enhance the interdisciplinary team working on the social impacts of flooding. [2558-005 (2006) : 60-61]

35. This interdisciplinary project involves a consortium of six academic groups from the University of Manchester and aims to develop a Raman spectroscopic approach for the rapid unequivocal identification of microorganisms. [2558-078 (2006) : 91]

36. The consortium includes chemists, analytical scientists and informatics experts and will be primarily based in the Manchester Interdisciplinary Biocentre. [2558-078 (2006) : 91]

37. School of Chemical Engineering and Analytical Sciences and Manchester Interdisciplinary Biocentre [2558-078 (2006) : 91]

38. Following substantial investments in the brand-new Manchester Interdisciplinary Biocentre-MIB www.mib.ac.uk/ the Manchester Centre for Integrative Systems Biology - MCISB www.mcisb.org/ and the AstraZeneca Chair of Systems Biology, The University of Manchester is now becoming unique world-wide by also having a Doctoral Training Centre for Systems Biology funded by EPSRC and BBSRC. Inspired by the research of many top scientists in Systems Biology, students with biological and medical backgrounds will be teamed up with students from a physical science/engineering/mathematics background to engage in extensive experimental and theoretical training in Systems Biology in the MIB and in partner groups all over the world. [2558-078 (2006) : 91]

39. You should have a strong motivation for interdisciplinary research and the ability to work independently. [2558-093 (2006) : 96]

40. The MRes programme provides experience of real research in the rapidly developing interdisciplinary areas of Biophotonics, Nanomaterials, Nanophotonics and X-Ray Physics. [2558-099 (2006) : 98]

41. Excellent oral and written communication skills as well as the ability to work in an interdisciplinary environment will be required. Experience working with databases would be advantageous. [2567-053 (2006) : 71]

42. We now intend to build our capabilities further across an exciting range of interdisciplinary themes. [2572-019 (2006) : 67]

43. Looking carefully at our research needs, you'll manage an interdisciplinary programme focused on wasteform evolution issues to support the viability of geological disposal of intermediate level wastes. [2572-040 (2006) : 77]

44. The aim of the Fellowships is to promote high quality interdisciplinary environmental research and teaching, building on established major research groups and investments in the School. [2572-069
45. This post is part of an exciting new collaboration and provides an excellent opportunity for an individual interested in **interdisciplinary** applied research in public health and infectious diseases. [2572-070 (2006) : 90]

46. You would work as part of a leading-edge, **interdisciplinary** team, assisting in the processing of customer samples and the development of new applications. [2576-012 (2006) : 65]

47. Candidates for both positions should have an academic record of scientific excellence, a flair for independent research and a strong interest in **interdisciplinary** approaches and collaboration. [2576-027 (2006) : 71]

48. At his centre, engineers and neurologists are working side by side (**interdisciplinary** collaboration is common as a result of Denmark's compact research scene) to restore impaired sensory-motor functions in the brain, be it in people who have been paralysed by strokes or in the development of advanced prostheses for amputees. [2580-003 (2006) : 52-55]

49. NIVA is a private research foundation, and is the largest **interdisciplinary** applied water research centre in Norway. [2580-005 (2006) : 56]

50. We work closely with colleagues from NIVA's other scientific sections to provide **interdisciplinary** solutions to complex environmental problems. [2580-005 (2006) : 56]

51. The **interdisciplinary** nature of these projects will require the integration of structural, cellular, molecular and biochemical methods. [2580-014 (2006) : 59]

**2009**

1. Collaborative **inter-disciplinary** research has high potential for future research developments and the Department wishes to strengthen its support to develop such initiatives. [2694-040 (2009) : 68]

2. Experience of **inter-disciplinary** working, and a track record in publishing peer-reviewed papers and generating external funding are all desirable. [2698-013 (2009) : 54]

3. As a member of a dynamic **inter-disciplinary** science team, you will provide expert advice on the behaviour, fate and effects of chemical substances in the environment with particular respect to informing front-line regulatory decisions. [2702-033 (2009) : 63]

4. The Science and Technology Facilities Council (STFC) is the UK’s provider of large scale **inter-disciplinary** research infrastructures and their supporting technologies, which enable UK researchers to investigate the world we live in and understand the building blocks of the universe. [2728-021 (2009) : 61]

6. The University of Luxembourg, established in 2003, invites applications for the position of founding a new **interdisciplinary** centre being established by the University [2689-033 (2009) : 59]

7. The CSBL will be an autonomous, highly **interdisciplinary** unit within the University of Luxembourg whose Director will develop the vision, participate in the recruitment of key faculty and establish its research programs. [2689-033 (2009) : 59]

9. Are you interested in learning computing from the perspective of more than just one scientific discipline? The Centre for Scientific Computing (CSC) at Warwick offers an exciting **interdisciplinary** taught Masters course in Scientific Computing, i.e. the use of computers to solve problems in science and engineering. [2689-042 (2009) : 62]

10. In April 2008 the University of Exeter announced plans to invest £80 million in science, engineering and medicine, building on existing areas of excellence. An initial £30 million of existing funds will be spent on new appointments, infrastructure and studentships in five groundbreaking **interdisciplinary** research themes. [2694-042 (2009) : 69]

11. Our vision is for a **multidisciplinary** and **interdisciplinary** approach to the understanding and application of functional materials, exploiting world-leading materials knowledge to deliver new concepts, processes and products. [2694-042 (2009) : 69]

12. Biomedical Engineering is an exciting and rapidly expanding discipline that endeavours to apply engineering principles to challenges faced in biology, life sciences and medicine. It is **interdisciplinary** by nature and at Imperial College London encompasses a number of diverse areas of research. [2698-005 (2009) : 50]

13. We are currently accepting applications for our MSc in Biomedical Engineering for entry in October 2009. We deliver sound training in this highly **interdisciplinary** subject and include core modules such as systems physiology, statistics and data analysis, physiological monitoring, biomedical imaging, and modelling in biology. [2698-005 (2009) : 50]

14. The Doctoral Training Centre is based within the **interdisciplinary** Centre for Sustainable Chemical Technologies. [2698-008 (2009) : 51]

15. A post is available in an **interdisciplinary** team working in a new EU Framework 7 project evaluating approaches to reduce net global greenhouse gas emissions through avoided deforestation in the tropics. [2698-013 (2009) : 54]

16. You will head a Laboratory in vivo PK team, serve as a preclinical PK expert and represent the DMPK in **interdisciplinary** project groups [2702-010 (2009) : 50]

17. You will head a Laboratory in vivo PK team, serve as a preclinical PK expert and represent the DMPK in **interdisciplinary** project groups [2702-011 (2009) : 51]

18. Research concepts should be **interdisciplinary** and integrate research methods that explore interconnections between global and regional environmental problems. [2706-038 (2009) : 61]

19. The candidate should also be familiar with data assimilation, have knowledge of pedological and/or ecological processes and be willing to work as part of an **interdisciplinary** team. [2711-020 (2009) : 57]

20. The group has a track record in undertaking an extremely diverse range of projects and offers an exciting **interdisciplinary** environment for collaborative research utilising a wide range of sensing systems and platforms. [2711-033 (2009) : 62]

21. You must also have experience of working in multi and **interdisciplinary** scientific partnerships and excellent communication, administrative and management skills. [2715-030 (2009) : 62]

22. Details available online of **interdisciplinary** studentships areas [2715-049 (2009) : 67]
23. Coca-Cola offers a competitive salary, excellent benefits and an opportunity to work in an exciting interdisciplinary team environment. [2719-017 (2009) : 55]

24. With a staff of 4400, we are one of the largest interdisciplinary research centres in Europe and are also a member of the Helmholtz Association of German National Research Centres. [2719-025 (2009) : 59]

25. We also explicitly encourage applications from candidates with an interdisciplinary background. [2728-026 (2009) : 64]

26. The Leipzig School of Human Origins offers a unique interdisciplinary graduate program to study the evolutionary history of humans and great apes. [2733-035 (2009) : 73]
Annexe 10-9 Occurrences de CROSS-DISCIPLINARY dans CAEMS

1971
Ø

1995

1. The post will be based in the Centre for Environmental Strategy, a cross-disciplinary group providing a focus for environmental research and postgraduate education and training at Surrey. [1989-115 (1995) : 86]

2. The nature of the research programme is highly cross-disciplinary, so the flexibility to operate effectively in areas outside your specialist discipline is essential. [1993-034 (1995) : 61]

2005

1. The responsibilities include cross-disciplinary research and coordinating research in communication with company consultants and senior scientists from other divisions. [2485-039 (2005) : 71]

2006

1. The job holder will join a cross-disciplinary team and will be responsible for developing software applications for advanced laser spectroscopy, imaging, data collection, data processing and instrument control. [2576-064 (2006) : 81]

3. Cross-disciplinary cooperation results in innovative breakthroughs and creative solutions with far-reaching social and economic impact. [2580-004 (2006) : 56]

2009

1. The Office of the Deputy President (Research & Technology) at NUS (Website: http://www.nus.edu.sg/dpr/) is responsible for facilitating, regulating and developing research and technology in a wide range of disciplines and cross-disciplinary areas. [2706-039 (2009) : 62]

2. The university's cross-disciplinary research results in innovative breakthroughs and creative solutions with far-reaching social and economic impact. [2733-004 (2009) : 26]

George Sosin

A carlos alvarez

Good evening,

I am doing a PhD in the scientific discourse in ads and came across the term "arrestin". I tried hard to find the etymology of this term but unfortunately found no clues anywhere. Could you please provide the etymology of this term? Thank you in advance for your help.

Carlos

Subject: Re: Arrestin

Dear Carlos,

I have attached a chapter by Lohse from...

George Sosin

Thank you very much for your answer. I suppose I was not clear enough when I...

Carlos

See my highlighting of Lohse article: Based on this "arresting" function, Ralph Zuckermand and colleagues proposed the third name, arrestin...
1. We need several more Chemists for our Research Centre pleasantly situated at Chessington in Surrey. [733-017 (1971) : 39]

2. The Association is located in very pleasant surroundings in Surrey and working conditions are excellent. [733-019 (1971) : 40]

58. In Dublin, pharmaceutical company Wyeth is building one of the largest biopharmaceutical campuses in the world, investing about $2 billion on a 35-hectare site. [2572-006 (2006) : 58-61]

59. The purpose-designed building represents the Irish government’s largest single investment ever in chemistry research, [2572-006 (2006) : 58-61]

60. Not only will you be making a difference to the quality of animals' lives around the world, but you'll also benefit from the resources at our state-of-the-art facilities, and enjoy easy access to London and continental Europe. [2572-027 (2006) : 71]

61. The service is provided for over 3 million of the population of the Nottinghamshire, Derbyshire, Leicestershire and Lincolnshire and is situated in excellent, well-equipped, laboratory facilities. [2572-030 (2006) : 72]

62. Ipsen have recently invested £4.5 million into a new "state of the art" laboratory facility at the Wrexham site. [2572-032 (2006) : 74]

63. Unipath is the world's leading women's healthcare diagnostic company. Unipath researches, develops and manufactures its products at a purpose built factory in Bedford, which employs over 500 people. [2572-042 (2006) : 78]

64. The Future Science Group is an expanding organization at the forefront of biomedical publishing, with offices conveniently located close to Finchley Central tube station in North London. [2572-047 (2006) : 80]
66. Our European R&D headquarters are based near the beautiful East Kent coast, with direct transport links to both London and continental Europe. [2572-059 (2006) : 85]

67. Our operating area is one of the most beautiful and protected environments within the UK and presents exciting and interesting challenges in the management of water resources. [2576-036 (2006) : 74]

68. By 2010, EBRC will be based in a purpose built £55m facility on the University of Edinburgh's veterinary campus. [2576-046 (2006) : 77]

69. Roslin Institute is a world renowned centre for research in genetics, molecular biology and developmental biology, with strong transport links and located within minutes of the centre of the beautiful, historical and cultural capital of Scotland, Edinburgh. [2576-054 (2006) : 79]

70. With the anticipated increase in local NHS provision of infertility services, there are exciting plans afoot for the eventual transfer of the Centre to a new, purpose-built unit, financed by the NHS on a local hospital site. [2576-076 (2006) : 86]

71. The University of Edinburgh is an exciting, vibrant, research-led academic community offering opportunities to work with leading international academics whose visions are shaping tomorrow's world. [2576-084 (2006) : 89]

73. Students will join a thriving scientific community situated on an attractive parkland campus near Cambridge. [2576-095 (2006) : 92]

74. Innovation takes imagination and vision. It also takes an openness to explore new ideas and approaches. Join us as a Scientist at our state-of-the-art research facility in Horsham, West Sussex, and you’ll have the freedom to do just that. [2580-013 (2006) : 59]

75. We offer the successful applicant an inspiring and innovative inter-disciplinary environment located within the pleasant surroundings of a green-field science park. [2580-021 (2006) : 61]

76. The successful applicant will benefit from working in new purpose-built laboratories at Rothamsted that include state-of-the-art mass spectrometers. [2580-024 (2006) : 62]

77. Set in Stirling in the heart of Scotland, SMI is situated amongst some of the most beautiful scenery in the country, with the city boasting excellent transportation links, a thriving business and commercial sector dynamic cultural, leisure, sport and recreational facilities. [2580-028 (2006) : 64]

78. We are located in Forest Row in England's beautiful county of East Sussex. [2580-039 (2006) : 66]

79. The role is based in North London, conveniently located close to Finchley Central tube station. [2580-041 (2006) : 67]

80. Teva is moving into new state-of-the-art offices in Harlow in the New Year. So alongside an attractive salary and benefits package, you can look forward to a high quality working environment including superb onsite gym and restaurant facilities. Although we're a large company, we pride ourselves on providing a friendly and supportive environment that encourages everyone to contribute. [2580-057 (2006) : 73]

81. Prof Halliwell’s group is located in excellent purpose-built accommodation at the new Centre for Life Sciences building in the Neurobiology group [2580-067 (2006) : 78]
82. Work will be based in **brand new purpose built science laboratories which have recently been occupied.** [2580-072 (2006) : 79]

83. The University of Edinburgh is an **exciting, vibrant, research-led academic community offering opportunities to work with leading international academics whose visions are shaping tomorrow's world.** [2580-074 (2006) : 80]

2009

1. The Editorial Office is based at WILEY-VCH in Weinheim, a **lively small town within short distance of the vibrant urban centres of Heidelberg and Mannheim in southwest Germany.**

2. WILEY-VCH **The place to be** [2694-006 (2009) : 54]

3. The Centre is located on the University Hospital site at Walsgrave which is on the edge of historic Coventry with convenient transport to the City and easy access to rural Warwickshire, the M6 and the M69 motorways. [2694-016 (2009) : 58]

4. Seattle is a picturesque city surrounded by beautiful natural environment and outdoor activities including skiing, boating, hiking and cycling. [2698-056 (2009) : 71]

5. We offer: A good work-life balance, free on-site parking, accommodation, lovely grounds, subsidised staff restaurant, friendly working environment, good team work, staff pension scheme and excellent training and personal development opportunities. [2706-026 (2009) : 57]

6. We offer an attractive working environment based in **converted Grade II listed barns on the outskirts of Oxford,** a competitive salary, a profit-related bonus and further benefits. [2706-027 (2009) : 58]

7. In return you'll be able to enjoy working as part of a multi-disciplinary team in a **stimulating environment,** with a competitive salary package and a dedicated mentor to steer your career development. [2711-012 (2009) : 55]

8. We are based at Chesterford Research Park, a 250 acre low density parkland setting, where there is a range of on-site facilities, including restaurant/bar, gym and 7-hole golf course. [2711-030 (2009) : 61]

9. The role is based in **our North London offices, conveniently located close to Finchley Central tube station on the Northern Line.** [2724-007 (2009) : 53]

10. The role is based in **our North London offices, conveniently located close to Finchley Central tube station on the Northern Line.** [2724-026 (2009) : 61]

11. NTNU is Norway's leading science and engineering university, located in Trondheim at 63° north. We may work at Europe's outer edge – but our research is cutting edge. [2733-004 (2009) : 26]

12. THE INSIDER Swiss **paradise** [2733-006 (2009) : 60-61]

14. WITH picturesque Alpine villages, vast expanses of skiable terrain, and delectable fondue, Switzerland is a popular holiday destination. [2733-006 (2009) : 60-61]
15. All member laboratories lie in close proximity within Basel, Switzerland, a city boasting academic and cultural excellence, located in the heart of Europe. [2733-011 (2009) : 64]

16. The Institute has excellent purpose built facilities on the Genome Campus, Hinxton on the outskirts of Cambridge. [2733-024 (2009) : 69]

17. Queen's Gate is [...] ideally situated in Central London to take advantage of the many educational opportunities on offer. [2733-037 (2009) : 73]

Annexe 11-5 Occurrences de STATE OF THE ART dans CAEMS

1971 – Ø

1995

1. ituinvestigates state of the art technology to enhance food quality and production [1959-028 (1995) : 51]

2. Using state-of-the-art equipment in a modern laboratory, we undertake extensive R & D on printing plate products, processing chemicals and equipment and also on the electrochemical and web coating processes used in their manufacture. [1967-003 (1995) : 61]

5. This studentship is funded by NRSCL with a stipend of £7,000 p.a. plus fees and will seek to develop remote sensing parameterization and validation for state-of-the-art river flood flow models. [1971-046 (1995) : 70]

7. Using state of the art equipment in a modern laboratory, we undertake extensive R&D on printing plate products, processing chemicals and equipment and also on the electrochemical and web coating processes used in their manufacture. [1976-079 (1995) : 82]

8. We offer state of the art facilities. We have a young and dynamic work atmosphere in which we anticipate the new team member to occupy a key position. [1976-083 (1995) : 82]

9. The School of chemistry is equipped with a wide range of state of the art research facilities. Further major updating of research facilities is planned to take place within the next three years. [1980-018 (1995) : 59]

10. You will be responsible for end-user and state-of-the-art on-line information services and be expected to interact with both scientific and administrative staff. [1980-047 (1995) : 68]
11. You will join a multi-disciplinary environment, using an extensive range of radiation facilities and assisting in the development and application of a novel charged-particle microbeam that uses state-of-the-art micropositioning and imaging techniques to probe sub-cellular targets. [1980-047 (1995) : 68]

12. The successful candidate will gain extensive expertise in organic synthesis as well as 'state of the art' spectroscopic and biochemical techniques. [1980-048 (1995) : 68]

13. Guided by state-of-the-art molecular design techniques the chemists will synthesise a wide variety of structures presenting a stimulating challenge to practical and theoretical abilities in synthetic organic chemistry. [1980-059 (1995) : 70]

14. Following the transfer of the Haemophilia Centre to a purpose built facility at Kent and Canterbury Hospital, the laboratory has been re-equipped with state of the art equipment and is fully computerised. [1980-078 (1995) : 75]

15. The department is equipped with a wide range of state-of-the-art GC/LC-MS/MS instruments. [1984-030 (1995) : 62]

16. These vacancies provide an ideal opportunity for suitably qualified scientific staff to join the leading UK contract research and development group in the UK, located in modern, laboratories equipped with state-of-the-art instrumentation and automated data capture and computer data processing facilities. [1984-030 (1995) : 62]

17. These projects will utilise the state of the art X-ray facilities at Keele University, the X-ray synchrotron sources at SRS Daresbury, UK and ESRF, Grenoble, France and the neutron sources at the ISIS Facility, UK and the Institut Laue-Langevin, Grenoble, France. [1984-062 (1995) : 70]

18. The group has state-of-the-art technology including DNA synthesisers, PCR, and in-situ hybridisation techniques computerised image analysis and confocal microscopy systems. [1984-065 (1995) : 70]

19. Candidates should have experience in low and high level (C) software design, signal processing and knowledge of state-of-the-art design and fabrication of low power, microminiature embedded systems [1989-005 (1995) : 57]

21. If you enjoy an atmosphere of team work, challenge and a chance to guide state of the art pharmaceutical manufacturing technologies, you already meet most of the important requirements. [1989-028 (1995) : 65]

22. Comprehensive research services are provided to the pharmaceutical, agrochemical, industrial chemical and consumer product industries from our purpose-built, state-of-the-art facility in East Lothian, close to the city of Edinburgh. [1989-041 (1995) : 69]

23. The Anthony Nolan Bone Marrow Trust has one of the busiest tissue typing laboratories in the world, testing patient and volunteer donor samples, using state of the art molecular and cellular techniques. [1989-046 (1995) : 70]

24. The laboratory is equipped with state-of-the-art HPLC and LC-MS and is located in a new research facility in Maaloev, some 20 km outside of Copenhagen. [1989-110 (1995) : 85]

25. We are expanding our business in the areas of trace inorganics and general micro biological work and offer a high quality and quick turn round from our state of the art laboratory near Chelmsford. [1993-063 (1995) : 69]
26. We have vacancies for recently qualified scientists who are looking to develop a career in bioanalytical science primarily using state-of-the-art LC-MS/MS. [1998-029 (1995) : 82]

27. You should ideally have an experimental research background, a knowledge of modern physical metallurgy principles and the ability to undertake a wide range of microstructural investigations using state-of-the-art techniques. [1998-031 (1995) : 83]

28. They are continuing to invest heavily in state of the art design and development tools and have adopted the most up to date methodologies to aid the development process. [1998-095 (1995) : 100]

29. My client is a major international pharmaceutical company, spending over $1.1 billion a year on R&D. They have a fully equipped, state-of-the-art clinical research facility for evaluating new chemical entities in Phase I/IIA, and have created an exciting opportunity for a Unit Manager to be responsible to the Medical Director. [2002-004 (1995) : 55]

30. UGAMP aims to improve our understanding of atmospheric processes and natural variability, using state-of-the-art General Circulation Models (GCM) and a range of idealized models, allied to diagnostic studies of observational data. [2002-035 (1995) : 65]

31. The Department has a large research community of over 70 postgraduates and 30 postdoctoral fellows working within state-of-the-art facilities with numerous collaborative links with other major international scientific institutions and industries. [2002-037 (1995) : 66]

32. L.O.T.- Oriel Ltd supplies a range of state-of-the-art scientific instrumentation from the world's leading manufacturers. [2006-031 (1995) : 69]

2005

1. Experienced scientist required to lead a team of 3-4 people engaged in development of state of the art microplate virology assays for the blood bank and clinical market. [2481-049 (2005) : 68]

2. The Sackler Institute of Psychobiological Research opened last year, with state-of-the-art brain imaging and sleep research facilities at Southern General Hospital. [2485-001 (2005) : 54-55]

3. The Refinery Laboratory has a vacancy for an experienced Section Head to oversee the acquisition and installation of new, state-of-the-art, analysers for both its Quality Control and Analytical Sections. [2485-031 (2005) : 68]

4. The Research Centre in Oxfordshire brings together scientists of multiple disciplines and varying backgrounds who have access to state-of-the-art technology. [2485-045 (2005) : 73]

5. You will need good skills in method development and application as well as an enthusiasm for increasing your knowledge of state-of-the-art technology. [2485-056 (2005) : 77]

6. An EPSRC-funded postdoctoral position is available for two years to work on the development of novel hierarchical porous organosilicas and advanced characterization of their structure and dynamics using state-of-the-art solid-state NMR, powder X-ray diffraction and porosimetry techniques. [2485-081 (2005) : 84]

7. The Department has state-of-the-art new buildings and equipment on a lakeside campus in a beautiful historic city near the Yorkshire Dales and Moors. [2485-118 (2005) : 94]

8. Our client, Guidant, is a global leader in the manufacture, marketing and sales of state-of-the-art implantable medical devices. [2489-005 (2005) : 60]
9. A Scientific Officer is required to join our **state-of-the-art** Protein Analysis Team. [2489-023 (2005) : 69]

10. Alongside radiolabelling services, SCYNEXIS offers novel hit generation compounds, hit explosion, lead optimization, medicinal chemistry and analytical services in our **state-of-the-art** facilities, based at our European site in Ongar, Essex, UK. [2489-036 (2005) : 73]

11. Students will develop skills in computing and information management and will apply these skills to real-world chemical problems using **state-of-the-art** commercial software. [2489-069 (2005) : 81]

12. The **state-of-the-art** controlled environment facilities, specialised laboratories and cutting-edge equipment will put you at the forefront of your chosen field. [2489-075 (2005) : 82]

13. These exciting, key positions offer excellent career opportunities as part of a rapidly growing drug discovery team at our **state-of-the-art** facilities in Mechelen, Belgium. [2493-008 (2005) : 57]

14. You will work on discovery and delivery of structurally optimised antibodies developed through use of **state-of-the-art** bioinformatic, molecular modelling, molecular genetic and biochemical techniques. [2493-018 (2005) : 60]

15. At our **state-of-the-art** Harrogate facility we are currently recruiting for the following vacancies [2493-029 (2005) : 64]

16. Based at our **state-of-the-art** laboratories on the banks of the River Thames at Maidenhead, the following openings have arisen within the Pharmaceutical Development Department: [2493-032 (2005) : 66]

17. The project involves the construction, optimisation and testing of a new kind DNA/protein detector based on **state-of-the-art** CMOS active pixel technology being produced by the £4.5M M13 Consortium [2493-045 (2005) : 69]

18. The University of Manchester's Wolfson Molecular Imaging Centre is a brand new, **state-of-the-art** facility dedicated to the exploration of physiological processes via PET. [2493-049 (2005) : 70]

19. Your job will involve working with HSE’s **state-of-the-art** population database tool, to examine the consequences of industrial activity on surrounding communities [2498-016 (2005) : 56]

20. The work will take place in brand-new laboratories using the group’s **state-of-the-art** equipment and many opportunities exist for national and international collaboration. [2498-054 (2005) : 69]

21. Its **state-of-the-art** facility comprises custom-designed laboratories, clean rooms, a polymer microfabrication suite, a biohazard facility, and a range of other support laboratories. [2498-061 (2005) : 71]

22. The School benefits from a range of **state-of-the-art** facilities specifically designed for pharmacy, pharmacology and biomedical teaching and research. [2498-067 (2005) : 73]

23. In addition to **state-of-the-art** isolator and gas sanitisation technology of the brand new Aston University site, we have earmarked significant resources for further investment. [2502-003 (2005) : 55]

24. Both laboratories were refurbished in 2002 to provide an air-conditioned **state-of-the-art** environment with modern analytical equipment including a Tandem Mass Spectrometer and a new laboratory computer system. [2502-022 (2005) : 62]
25. In our **state-of-the-art** facility the dedicated efforts of our 2,000 employees represent the key to our success, both individually and collectively. [2502-028 (2005) : 64]

26. Ipsen have recently invested £4.5 million into a new "**state of the art**" QC laboratory facility at the Wrexham site, which will be occupied from the 2nd Quarter 2006, and will require technical transfer of all QC activities. [2502-034 (2005) : 66]

27. The laboratory is part of a strong multi-disciplinary program in cell signalling and gene expression and is situated in a new **state-of-the-art** research facility. [2502-047 (2005) : 71]

28. The School of the Built Environment has extensive laboratory and IT facilities for research and teaching as well as **state of the art** buildings including the Millennium Eco-House and the Sustainable Research Building, providing dedicated office space and laboratory services for research students. [2502-067 (2005) : 77]

29. You will provide a customer focused service, supplying and developing **state of the art** environments such as wide temperature and pressure ranges and magnetic fields to the scientific community. [2506-008 (2005) : 56]

30. You don’t set the pace in pharmaceutical research by following others. You do it by challenging convention, exploring new possibilities and creating new pathways to drug discovery. If you’re ready to help shape the future of respiratory medicine, it’s time to join our **state of the art** research facility in Horsham, UK. [2506-030 (2005) : 67]

31. The study uses cell culture models and **state of the art** proteomics facilities to address the regulation of cell cycle and cell death by riboflavin *in vitro*, it also includes an *in vivo* component. [2506-039 (2005) : 69]

32. The main thrust of the work will be to use the Salford **state-of-the-art** FIB (focused ion beam miller to manufacture structures, such as electron lenses, at the nanoscale. [2506-042 (2005) : 70]

33. This will involve the use of a new **state-of-the-art** small animal SPECT imaging system as well as other animal imaging modalities that may be required. [2506-062 (2005) : 75]

34. Leadership, innovation and a powerful entrepreneurial spirit. Qualities you’ll bring to Roche's **state-of-the-art** Biostatistics department - and qualities you share with this outstanding global organisation. We combine cutting-edge technology and creative thinking to drive medical breakthroughs that enrich lives across the world. [2511-006 (2005) : 53]

35. With responsibility for the management of embryology and andrology services in this **state of the art** facility, you will have a proven track record in facilitating education and training for trainees and be a HFEA licensed ICSI practitioner. [2511-008 (2005) : 54]

36. 3-year position investigating the development of tools to use as physical evidence through the integration of **state-of-the-art** soil characterisation with National soil databases, for forensic purposes. [2511-028 (2005) : 61]

37. Testing and analysis is critical to the business, and our **state-of-the-art** laboratory in Reading provides a comprehensive service, conducting over 600,000 microbiological analyses every year. [2511-045 (2005) : 69]

38. The unit is equipped with 3 TEMs and 2 SEMs and **state-of-the-art** preparation equipment including cryo. [2511-061 (2005) : 73]
39. If so, why not apply your skills to health and safety within the Health and Safety Laboratory (HSL) at our new state-of-the-art laboratory near Buxton? [2515-022 (2005) : 63]

40. As part of our aim to become the best European beer-led drinks company, our central analytical and microbiological laboratories will move into new, state-of-the-art premises. [2515-028 (2005) : 66]

41. So join our state of the art research facility in Horsham, Sussex and you won't just be at the frontier of medical science. [2515-033 (2005) : 67]

42. A £55 million investment in our state-of-the-art bulk pharmaceutical manufacturing facility at Haverhill has created an international centre of excellence to help meet the ever growing demand for RenageT™ - a major advance in the treatment of renal disease. [2519-025 (2005) : 63]

43. SEPA is responsible for regulating and improving Scotland's natural environment. Our Chemistry Department provides chemical information, advice and expertise to support our statutory duties and its state-of-the-art laboratories offer a comprehensive chemical monitoring programme. [2524-033 (2005) : 63]

44. For both Systems Engineering posts you will be able to demonstrate a keen interest in state-of-the-art research and development, working alongside academic partners and end users to achieve goals within tight time constraints. [2524-051 (2005) : 70]

45. Two high calibre and experienced individuals are required to act as senior PET methodologists to develop and apply quantitative data analysis techniques at this new state-of-the-art medical imaging research facility on the Christie Hospital NHS Trust campus. [2524-066 (2005) : 75]

46. We have access to state-of-the-art University imaging facilities, including research-dedicated 1.5T and 3T MRI scanners, and close collaboration with the School of Computer Science and clinical research groups. [2524-071 (2005) : 77]

47. You will be responsible for overseeing the successful operation of state-of-the-art analytical equipment, which underpins the biopharmaceutical and biotechnology area. [2524-073 (2005) : 77]

48. Jena is an upcoming research area which offers an exciting environment and access to state-of-the-art research facilities. [2524-078 (2005) : 79]

49. The appropriate candidate will have relevant academic achievement (BSc., MSc., PhD, or equivalent) supported by a substantial peer-reviewed publication record in the field of clinical microbiology/molecular biology, and demonstrable familiarity with state-of-the-art, computer-based data analysis techniques. [2528-032 (2005) : 72]

50. Help shape our Respiratory Disease Area for cystic fibrosis at our state of the art research facility in Horsham, Sussex and you’ll have the freedom to do just that. [2528-043 (2005) : 77]

51. Modern facilities include a well-equipped R&D department housing state of the art instrumentation and an international team of scientists fully committed to the discovery and development of new therapeutic agents. [2528-052 (2005) : 81]

2006

1. So join our state of the art research facility in Horsham, Sussex and you won't just be at the frontier of medical science. [2533-019 (2006) : 51]

3. The project involves the development and application of a state-of-the-art theory for nano-structured polymeric systems [2533-060 (2006) : 63]

4. We're constantly discovering new therapies to treat animal diseases, and with cutting-edge science, state-of-the-art technology and world-class individuals, we're dedicated to maintaining our position. [2537-020 (2006) : 65]

5. You will work in state-of-the-art laboratories which were recently refurbished with support from a major JIF grant from the Wellcome Trust. [2537-082 (2006) : 85]

7. If you are ready to contribute, it's time to join our state of the art research facility in Horsham, West Sussex. [2541-038 (2006) : 74]

8. The position of Laboratory Manager/Chief Technician is available within the Institute of Cancer, Barts and The London School of Medicine and Dentistry, and will be based in the School's state-of-the-art Cancer Research UK-funded Centre for Molecular Oncology at Charterhouse Square. [2541-071 (2006) : 84]

9. In addition to the other School- and College-wide services, there are in-house state-of-the-art facilities, including laser dissection microscopy, transcription profiling, proteomics and GMP laboratories for the production of cell and gene therapy investigational medicinal products for clinical evaluation. [2541-085 (2006) : 88]

10. You will have opportunities for training in state-of-the-art quantitative techniques. [2541-090 (2006) : 89]

11. Cancer Research UK is the world's leading independent organisation dedicated to cancer research, spending £217m a year on cutting-edge research into treating, preventing and curing cancer. Cancer Research UK Research Services provide state-of-the-art scientific services to CR-UK funded researchers across the country [2545-010 (2006) : 62]
12. Set in attractive Cheshire countryside, the Holmes Chapel site is a state of the art product development and manufacturing site and our worldwide centre of excellence for respiratory inhalations technology. [2545-024 (2006) : 68]

13. So join our state-of-the-art facilities in Horsham, West Sussex, and we can promise you a career at the very forefront of respiratory medicine - and the chance to achieve the kind of recognition and rewards you deserve. [2545-027 (2006) : 69]

14. Innovation takes imagination and vision. It also takes an openness to explore new ideas and approaches. Join us at our state-of-the-art research facility in Horsham, West Sussex and you'll have the freedom to do just that. [2545-035 (2006) : 73]

15. Innovation takes imagination and vision. It also takes an openness to explore new ideas and approaches. Join us as a Scientist – Histology at our state-of-the-art research facility in Horsham, West Sussex and you'll have the freedom to do just that. [2545-037 (2006) : 74]

16. The Laboratory, which comprises many modern, state-of-the-art analysers and a dedicated team of scientists, generates data for process control, finished product blending and certification, and for environmental purposes. [2545-041 (2006) : 76]

17. Just one example of how our state-of-the-art technologies improve people’s lives. [2545-042 (2006) : 77]

18. This new state-of-the-art research facility is dedicated to the development of new treatments in cancer and brain disorder patients using Positron Emission Tomography (PET). [2545-072 (2006) : 87]

19. Based in a vibrant and exciting research environment at the University of Manchester, the Faculty of Life Sciences (rated 5* in the last RAE) has recently moved into a brand new state-of-the-art building that provides superb facilities for all aspects of biological research. [2545-072 (2006) : 87]

20. The Institute is fully equipped for state-of-the-art biological research including: innovative molecular biology, stem cell manipulation and transgenics, real-time laser scanning confocal microscopy, fluorescence sorting of cells, gene targeting and knockouts, mouse models of disease, mouse behavioural testing and proteomics. [2545-092 (2006) : 93]

21. Doctoral research is accompanied by an intensive theoretical and practical training programme in state-of-the-art analytical and synthetic methods. [2550-009 (2006) : 60]

23. In drug discovery you don't wait for the future to happen. You actively shape it – exploring innovative ideas, influencing scientific practice and creating new and better pathways. If you are ready to contribute, it's time to join our in vitro Drug Discovery team at the state-of-the-art research centre in Horsham, West Sussex. [2550-040 (2006) : 75]

24. The Institute has an extensive range of fully-equipped teaching laboratories linked by state-of-the-art audio-visual equipment. [2550-056 (2006) : 82]

25. The overall aim of this project is to apply state-of-the-art metabolic and "omics" technologies to explore the impact of nutrition on health and disease. [2550-062 (2006) : 83]

26. There are state-of-the-art research facilities and opportunities to collaborate with active research groups across the Institute. [2550-063 (2006) : 84]
27. The Department has state-of-the-art fermentation and downstream processing facilities housed in the Advanced Centre for Biochemical Engineering. [2550-066 (2006) : 84]

29. The Laboratory of Molecular Biology provides a thriving environment for research in neuroscience and has state-of-the-art equipment. [2558-019 (2006) : 65]

31. Working on all aspects of method development and validation, you will analyse a wide range of pharmaceutical products and raw materials using a variety of analytical techniques and state-of-the-art separation science techniques, including High Pressure Liquid Chromatography (HPLC). [2558-029 (2006) : 73]

32. In drug discovery you don't wait for the future to happen. You actively shape it - exploring innovative ideas, influencing scientific practice and creating new and better pathways. If you are ready to contribute, it's time to join our state-of-the-art research facility in Horsham, UK. [2558-034 (2006) : 75]

33. The laboratories employ a variety of modern analytical methodologies and are committed to a high-level of automation, using computerised instrumentation and state-of-the-art laboratory robotics. [2558-042 (2006) : 78]

34. You will bring state of the art knowledge on adsorption and desorption, or the transportation of molecules across membrane structures. [2558-058 (2006) : 83]

35. The junior research group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups. [2558-075 (2006) : 90]

36. You will be associated with a highly active immunology research group, working under the direction of Dr. Douglas Millar in state-of-the-art research facilities. [2558-078 (2006) : 91]

37. The group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups. [2558-081 (2006) : 92]

38. UEA's new state of the art BioMedical Research Centre provides an attractive and academically stimulating environment for building research programmes of international standing. [2558-082 (2006) : 92]

39. The group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups. [2558-089 (2006) : 95]

40. The group will be embedded in the outstanding scientific environment of the Beutenberg Campus providing state-of-art research facilities and a highly integrative network of life science groups [2558-090 (2006) : 95]

41. The School of Engineering Sciences (SES), at the University of Southampton is a leading 5* rated research School with cutting-edge projects, strong industrial links and state-of-the-art facilities. [2558-100 (2006) : 99]
42. Our client is at the forefront of scientific developments in a competitive, commercial market. Their **state of the art** research and development centre provides technology and knowledge driven solutions for an international network operating across the globe. [2563-008 (2006) : 52]

43. Your department will be responsible for equipment ranging from basic to **state of the art**, including computing and networking, acoustic instrumentation, communications, navigational systems, ocean/atmosphere sampling/measurement and oceanographic cables, winches and handling systems. [2563-014 (2006) : 56]

44. The School has recently moved into a new Biosciences Research Building, which provides **state-of-the-art** laboratories. [2563-073 (2006) : 75]

45. The laboratories are modern and furnished with **state of the art** equipment for immunofluorescence, flow cytometry, ELISA, molecular biology and cell function assays etc. [2567-038 (2006) : 67]

46. Part of the Inverness Medical Innovations Group, Unipath has invested heavily in its **state of the art** R&D facility in Bedford to ensure that it continues to stay at the forefront of the industry. [2567-051 (2006) : 70]

47. We are now looking for Senior Scientists to join us at our **state-of-the-art** research and development centre in Horsham. [2567-056 (2006) : 73]

48. Researchers…get funded access to our **state-of-the-art** facilities and expertise using the science foundation Ireland funded national access programme [2572-017 (2006) : 66]

49. Successful applicants will be granted access to **state-of-the art** laboratory facilities along with comprehensive supporting expertise. [2572-017 (2006) : 66]

50. Not only will you be making a difference to the quality of animals' lives around the world, but you'll also benefit from the resources at our **state-of-the-art** facilities, and enjoy easy access to London and continental Europe. [2572-027 (2006) : 71]

51. Ipsen have recently invested £4.5 million into a new "**state of the art**" laboratory facility at the Wrexham site. [2572-032 (2006) : 74]

52. You will have a significant scientific input to BMST projects as required and will be responsible for the delivery of assigned projects, including obtaining, maintaining and providing **state-of-the-art** knowledge for biological technology. [2572-032 (2006) : 74]

53. As a global market leader in human health, we provide an exciting and stimulating working environment, with **state-of-the-art** laboratories, and the kind of rewards you’d expect from a world-leading pharmaceutical company. [2572-059 (2006) : 85]

54. This project is to develop two **state of the art** probe capabilities for Astra TA2 and the Astra Gemini system (see website). [2572-061 (2006) : 86]

55. The Faculty of Life Sciences (rated 5 in the last RAE) has recently moved into a brand new **state-of-the-art** building that provides superb facilities for all aspects of biological research. [2572-077 (2006) : 93]

56. The WMIC is a brand new, **state-of-the-art** facility dedicated to investigating regional tissue function and to supporting the development of new treatments in cancer and brain disorder patients using Positron Emission Tomography (PET). [2572-077 (2006) : 93]
57. With over 1,600 employees and state-of-the-art facilities, Charles River Laboratories' scientific excellence and innovation is renowned within the drug development industry. [2576-015 (2006) : 66]

58. Tepnel is expanding its contract analysis business significantly within the Pharmaceutical and Biopharmaceutical sector through the construction of a state-of-the-art facility in Scotland. [2576-026 (2006) : 71]

59. The new head of the HTS Facility will develop state of the art infrastructure to deliver HTS capabilities and expertise to research labs at LRI. [2576-047 (2006) : 78]

60. You will work under the direction of Drs Richard Kammerer and Edward McKenzie in state-of-the-art research facilities. [2576-078 (2006) : 87]

61. The successful candidate will manage a new state-of-the-art Silicon nanofabrication clean room facility, located on the Highfield Campus, which is currently at the approval stage for estimated completion end 2007 - early 2008. [2576-085 (2006) : 89]

62. The Institute is fully equipped for state-of-the-art biological research including: innovative molecular biology, stem cell manipulation and transgensics, real-time laser scanning confocal microscopy, fluorescence sorting of cells, gene targeting and knockouts, mouse models of disease, mouse behavioural testing and proteomics. [2576-095 (2006) : 92]

63. Join us as a Scientist at our state-of-the-art research facility in Horsham, West Sussex, and you'll have the freedom to do just that [2580-013 (2006) : 59]

64. State of the art technology will then be used to study gene rearrangements which contribute to the cancer phenotype. [2580-016 (2006) : 60]

65. The successful applicant will benefit from working in new purpose-built laboratories at Rothamsted that include state-of-the-art mass spectrometers. [2580-024 (2006) : 62]

66. Teva is moving into new state-of-the-art offices in Harlow in the New Year. [2580-057 (2006) : 73]

2009

1. The person appointed to this post will help create a unique partnership between Diamond and the University of Manchester that will produce a state-of-the-art instrument for the users of synchrotron tomography. [2689-003 (2009) : 46]

2. We're offering a competitive package and the opportunity to join a highly motivated team who have recently relocated to state-of-the-art laboratory facilities in Cambridge. [2689-010 (2009) : 49]

3. Our multi-disciplinary department is well equipped with state of the art instrumentation and the latest technologies and models to assess both in vitro drug metabolism, in vivo pharmacokinetics, and in vitro genotoxicity. [2689-025 (2009) : 56]

4. J&JPRD, Beerse, Belgium is offering a competitive salary package and a scientific challenging environment with state-of-the-art equipment [2689-025 (2009) : 56]

5. This will involve the development and application of methods for the quantitative analysis of novel low molecular weight drugs in biological samples and will be accomplished through the use of state of the art sample extraction systems and LC-MS/MS instruments. [2694-024 (2009) : 61]

6. The MSc in Translational Clinical Science provides training in state-of-the-art biomedical science, and could lead to a PhD programme at UCL. [2694-056 (2009) : 74]
7. MedImmune's state-of-the-art facility in Cambridge (formerly Cambridge Antibody Technology) is continuing to increase its biopharmaceutical research and development capabilities. [2698-015 (2009) : 55]

8. As Head of Genome Technology, you will establish and manage a high-throughput state-of-the-art DNA sequencing facility to deliver sequence resources to meet current and future demands. [2698-019 (2009) : 57]

9. Selected candidates will be paid by the University of Luxembourg and have medical, dental and vision benefits provided for them and their families by ISB. They will enjoy a state of the art facility located on Seattle’s Lake Union, a biotech hub, with over 65,000 square feet of research and development space. [2698-056 (2009) : 71]

10. We are currently building a state-of-the-art Scanning X-ray Transmission Microscopy Beamline (STXM) using radiation in the energy range 250 to 3000 eV, with image resolution approaching -20 nm. [2702-037 (2009) : 64]

11. The Magnetic Spectroscopy Group has a vacancy for a physicist to develop and explore state-of-the-art techniques for time resolved measurements and ferromagnetic resonance using x-ray magnetic dichroism as a detection technique. [2702-037 (2009) : 64]

12. Bial is a leading and rapidly expanding Portuguese pharmaceutical company located in the outskirts of Oporto. Modern facilities include a well-equipped R&D department housing state of the art instrumentation and an international team of scientists fully committed to the discovery and development of new therapeutic agents. [2706-029 (2009) : 58]

13. A long-standing presence in Lowestoft, brand new state-of-the-art facilities opening in 2011 and a scale of work ranging from complete ecosystems to nano-technologies. [2711-031 (2009) : 61]

14. Meet Cranfield academics, attend course specific seminars and workshops, tour our state-of-the-art facilities and explore our extensive campus. [2711-047 (2009) : 66]

15. Our state-of-the-art Cambridge site (formerly Cambridge Antibody Technology) is home to around 400 employees, and serves the company's European hub for research and development. [2715-007 (2009) : 51]

16. Working in a state-of-the-art compounding facility, you will be responsible for the formulation and manufacture of a variety of different dosage forms to meet the needs of patients and healthcare professionals. [2715-009 (2009) : 53]

17. The laboratory is well equipped with automated high throughput sequence and real time technologies and automated extraction facilities and will be moving to a state of the art new pathology building Sept 2009. [2719-029 (2009) : 60]

18. MedImmune's state-of-the-art Cambridge site (formerly Cambridge Antibody Technology) is home to around 390 employees, and serves the company's European hub for research and development. [2724-024 (2009) : 61]

19. A long-standing presence in Lowestoft, brand new state-of-the-art facilities opening in 2011 and a scale of work ranging from complete ecosystems to nano-technologies. [2724-037 (2009) : 66]

20. Due to the initiation of new projects we are looking to recruit talented individuals into our state of the art R&D facilities based in Slough, UK and Winnersh, UK [2728-006 (2009) : 55]
21. From our Liverpool, UK facility, we provide state of the art process development, cGMP manufacturing and analytical development for every significant biopharmaceutical product technology. [2728-011 (2009) : 57]

22. All students benefit from the dynamic research environment within the Institute, in which they can draw on the wide expertise of our scientists and clinicians and make use of our modern laboratories and state-of-the-art service units. [2728-023 (2009) : 62]

23. The University has recently made a £100m investment in a state-of-the-art Nanofabrication Centre and a further £50m in a new Institute for Life Sciences. [2728-034 (2009) : 67]

24. Bial is a leading and rapidly expanding Portuguese pharmaceutical company located in the outskirts of Oporto. Modern facilities include a well-equipped R&D department housing state of the art instrumentation and an international team of scientists fully committed to the discovery and development of new therapeutic agents. [2733-016 (2009) : 66]

25. The University of Manchester's Wolfson Molecular Imaging Centre is a state-of-the-art facility dedicated to the exploration of physiological processes via PET, with the primary focus being oncology and neuroscience. [2737-022 (2009) : 64]

26. The Division also has two state-of-the-art clinical PET-CT scanners which are used for both clinical and research purposes with a primary focus on cancer. [2737-028 (2009) : 66]

27. There are state-of-the-art 1.5T XMR, 3T MRI, 9.4 Tesla experimental NMR, nanoPET-CT and nanoSPECT-CT systems dedicated to research. [2737-028 (2009) : 66]

Annexe -11-5-2 Occurrences de STATE OF THE ART dans BNC

Here is a random selection of 50 solutions from the 139 found.

**En rouge utilisation dans un contexte scientifique / technique / recherche** Les syntagmes nominaux sont symbolisés par **SN**

**A11** 1501 The first BREL/GEC Class 90, an updated version of the Class 87 Bo-Bo, emerged from Crewe in mid-1988, but it was many months before the **state of the art** electronics were mastered.

**A1A** 1022 the assumption that only enquiry into literature that is founded on the **state of the art** in sociology or other adjacent disciplines is valid, the rest being impressionist and subjective. **SN**

**A1A** 888 Zapp is simply keeping up with the **state of the art**; he is more convinced than ever that professionalism is its own justification and reward. **SN**

**A6X** 1368 The Ferguson-developed 4wd system, which directs power between the front and rear wheels in a fixed 34/66 per cent ratio, is effective and durable but hardly **state of the art**. **SN**

**ALP** 525 The first section will review the literature on client participation and its measurement, and the second section will summarize the ‘**state of the art**’ in the measurement of effectiveness, stressing evaluation of community work intervention. **SN**

**AM7** 203 The **state of the art** in the study of professionals in schools is still represented by the work of Hoyle (1975) who suggested the notion of professionality as a way forward from the sterile debates of whether teaching is a profession in the ‘checklist of characteristics’ manner. **SN**

**APN** 443 The ‘**state of the art**’ of soil conservation is clearly in a sorry mess: ‘The need for soil conservation was emphasised by Bennett (1955), Jacks and Whyte (1939) and many others…but so little has been achieved that most recent reports…are virtually indistinguishable in factual content and sentiment from the earlier studies.’ **SN**

**APS** 1021 The metaliterary component is not so much in the existence of characters who discourse on the **state of the art**, even obliquely, through the exploration of writing's other — through non-writing or no-more-writing — as in the project of the central characters, which is an essentially dramatic one: that of trying to imagine themselves into the world of another. **SN**

**AR7** 1413 An editorial in The Lancet (November 10, 1990) entitled ‘Who's for tennis?' but which could have just as easily been entitled ‘Who's for running?' sums up the present **state of the art** and looks particularly at a new piece of research carried out on civil servants. **SN**

**ARE** 265 Manufactured by Quatek Ltd, the Ace Pro-File is a **state of the art** dive computer that is fully interactive with any IBM-compatible personal computer (PC).

**ARE** 326 It is certainly a **state of the art** unit, offering an impressive 36 functions which range from three altitude settings, to an internal memory capable of storing up to eight hours of diving profiles, and if that's not enough, you can interface it with a personal computer and relive your dive profiles in your own home.

**ASV** 2577 **State of the art** for those days.’ **SN**

**B1G** 769 In applications of this kind the authors argue that geographic information management in general and GIS in particular have an important role to play and they give a number of examples from research in progress to illustrate the current **state of the art** in this field. **SN**

**B29** 278 The latest in **state of the art** quality bowling equipment.
While monkeys are not normal elephant food, it is conceivable that such an event could occur (or at least, it is hard, at the current state of the art, to envisage a reasoner that could reject this possibility without rejecting other, similar ones incorrectly).

Werking's 1980 review of the state of the art with regard to evaluation provides an up-to-date account of the use of tests in library user education.

There is a real feel here for a developing area of research, which avoids giving a misleading impression that the current state of the art provides any ultimate answers, handed down on tablets of stone from above.

For instance, enabling a robot to recognise a wide variety of objects in different positions and lighting-conditions is currently beyond the state of the art, as is building a robot or desk-computer that will understand many different sentences, on different topics and spoken by different speakers.

The author then surveys the current state of the art of zeolite synthesis and transformation, and shows how it is possible to ring the changes among the component atoms of zeolites — the silicon and oxygen parts of the polymeric framework and the counterbalancing metal ions can all be changed for other elements while still preserving the topology that is the characteristic feature of a zeolite.

If other publications from the energy programme summarise the ‘state of the art’ as well as this gasification report, then there will be less need for the spurious and repetitious consultant reports that daily besiege the desk of the Third World policy maker.

Still, it is difficult to imagine this immensely civilised music ever being more persuasively presented, as once again performance (bar a couple of mild intonation slips in the ’Sicut erat’ of the C major Magnificat) and production values are (if you'll forgive the in-phrase) truly ‘state of the art’.

David Austin's English roses are a delicious fusion of the past and the current state of the art — they have all the romantic charm, the graceful form, the fresh, sweet perfume of antique roses.

By combining traditional craftsmanship with state of the art electronics, Yamaha's APX range of electro-acoustic guitars has long been the professionals' choice for performing and recording alike.

Close to ‘state of the art’ aircraft operation can be achieved economically by modification or retrofit, ie hushkitting, reengine programmes, flight deck upgrades, etc.

The state of the art — I: Some current initiatives in church planting

The state of the art — II: One a month

I still see fishkeepers purchasing ‘state of the art’ power filters such as Eheim, Shark, Fluval etc, and stuffing them full of little other than filter-wool.

The value of dry foods in their various forms should not be overlooked as a great deal of ‘state of the art’ research has gone into the major manufacturers' efforts to produce these high-quality nutritious foods.

Prior to describing his method, and that perfected by his brother John, it is necessary to examine in detail the state of the art that led to the seventeenth- and eighteenth-century experiments, culminating in the most celebrated of the Hunterian ‘mummies’, Mrs Maria Van Butchell.
The Hunters’ techniques cannot, alas, be regarded as contributions to the state of the art as it then existed.

Older gameheads might perhaps prefer something deeper, but, in terms of pure techno-flash, Sonic 2 defines the current state of the art.

Harwell is one of the world’s leading nuclear laboratories and, as such, owned state of the art neutron equipment combined with high level expertise in electrochemistry.

How the whole process is cheaper and easier than you probably imagine, and with our state of the art equipment there’ll be no danger of having to replace it in years to come.

Using state of the art passive backplane technology, Graphite Micro Series systems become truly modular.

Q. What is the new state of the art?

State of the art technology in 15″, 16″ and 17″.

The same situation was prevalent in England over a decade ago, and while the new breed of English walls has blossomed to state of the art types such as Newcastle’s Berghaus Wall, Scotland’s walls remain poor relatives.

Is this a case of clever marketing aimed at diversifying one product to fit two market groups — the ‘poor cat owner buying cheap and nasty cat litter and the ‘elite’ fishkeeper buying state of the art filter media.

The result of selective competent design along these lines should be a system with optimal man-machine allocation given the technological state of the art and a comprehensive sensitivity to the feasibility of the human tasks.

Technically the state of the art seems to be that systems are most efficient, reliable and safe when control is largely automatic but the human operator remains in a monitoring and supervisory role.

Soviet economists estimate that with state of the art computer technology, ten years of work would be required to produce each one-year plan.

The whole thing kicked off with a state of the art video which introduced the T9000 as the ‘next link in the chain for ranging from supercomputers to database managers, to switching and telecommunications systems, management systems for production lines and car engines.

Irvine, California-based, State of the art Inc has introduced a new accounting graphical user interface, Momentum.

As compactness is an important design feature of cordless tools the all round efficiency of the tool is crucial, and that is why I tend to perceive cordless tools as being very much state of the art.
In the present **state of the art**, the temptation to use these without — at the very least — first having had some academic training in econometric techniques should be resisted.

Ergas (1987) has referred to this as a ‘deepening’ model of technological development, in which ‘learning by doing’ and making the best organizational and technical use of ‘what you've got’ are far more important than acquiring the latest *state of the art* process technology (Ewer et al., 1987: ch. 4).

For now, suffice it to say that the present **state of the art** is such that while some areas are capable of producing meaningful output measures, it is proving difficult to develop appropriate measures in other areas.

While command line interpreters do have a certain fascination and instill a tremendous discipline on the user they could hardly be described as **state of the art**.

Those in the know — the core group of researchers in any field who spend a lot of time at conferences and seminars chatting about the **state of the art** — will simply disregard the anomalous result, or they will have gossiped it away in the bar after the meeting.

Royal portraiture appears to be a barometer of the **state of the art**.

The current **state of the art**, therefore, presents particular difficulties to the development of good practice in comprehensive assessment of older people.

The new computer has some **state of the art** fibre optic channels as well as the conventional copper ones but these will not initially be used and will come into play as new device types are acquired in the future.

Clearly, at the present **state of the art**, both communication and interpretation of CL results in petrography are dominantly subjective.

The new company will be known as AEA Boffin International Inc and will supply **state of the art** software and support to the US market and worldwide.

This **state of the art** evaluation technique uses a 1” tool that is run into the well.

The project build on considerable experience of applied GIS: the School of Geography at the University of Leeds has been at the forefront of international developments in applied geographical modelling and through GMAP (Geographical Modelling and Planning) Ltd. is now applying its unique **state of the art** approach in many varied business and planning environments.
In particular, the ‘state of the art’ in the collection and processing of raw data by the Soviet Central Statistical Administration is something about which rather little is known.

No Congress, Swan Hunter is a modern hi-tech, high skilled, state of the art, manufacturing facility.

Continues to make rapid progress in both the UK and continental markets and its new state of the art factory at Chilton was opened on — fully reported on pages 4 and 5.

This state of the art technology will considerably reduce maintenance and increase durability of the needles three fold.

There's no complicated system of motorised controlled valves — just state of the art technology.

The department also has extensive and state of the art facilities for modern investigations and diagnostic veterinary pathology.

The University of Edinburgh benefits from the largest campus computing network in Britain, which is constantly being upgraded to provide students and staff with state of the art facilities.

The network is constantly being upgraded to provide staff and students with state of the art facilities.

People who bought amateur video-making equipment, however good it was (and the Minolta stuff is state of the art), usually had little of interest to actually film.

On the contrary, it would've seemed a very, very up to date, state of the art, kind of book.

It even had a 1940's bakelite telephone which seemed to work, but the typewriter was state of the art and so, probably, was the young lady behind it.

What is more, they are increasingly seen as the training ground for management professionals who want to develop state of the art business, organisational and leadership skills.

With increasing demands on caterers to provide top quality food quickly and efficiently, chefs are turning to well-established equipment manufacturers to provide them with state of the art equipment which will make their job easier.

State of the art technology can be applied to existing installations to systematically monitor and record all lift activity and events.

To achieve maximum optimization of the existing lifts, it was agreed to combine all three lifts into a common group with a state of the art microprocessor control system.

There are certain defences available, an important one of which is the "state of the art" defence.

Section 2 of the Act expands on the meaning of "new" and says that an invention is new if it does not form part of the "state of the art"; this expression comprises all matter which has been made available to the public in the United Kingdom or elsewhere, by written or oral description, by use or in any other way.
The inventor must resist any temptation he might have to publish details of his invention before the first filing date (the priority date), otherwise he could inadvertently add his invention to the state of the art and anticipate his own invention. However, if details of the invention are disclosed by a person acting in breach of confidence or who has obtained details unlawfully, that disclosure will be disregarded in determining the state of the art. Indeed, it is not an easy task to find out if the invention has been anticipated and is already part of the state of the art, given the massive world-wide volume of published work, and it is possible that a publication which anticipates the invention will not be discovered. Member states were allowed a discretion as to whether to include a state of the art defence and its inclusion is controversial as states which do have the defence could become testing grounds for new products.

You know, using artificial insemination techniques, they're using erm, some er, designer er, seeds for their er, for their crops, they're using scientifically engineered agro-chemicals, they're using state of the art machinery, and they're, they're using those, that technology to increase output because the more they produce, the more support, or the higher their, their income will be.

Our continuing investment in state of the art technology ensures that our production facilities are second to none. Our continued investment in production facilities not only ensures a top quality product but sets the standard for state of the art operations.

At Grupo Cruzcampo in Spain, the lager beer brewery in Jaen is state of the art, as are the new brewhouses recently completed in Seville and Madrid. But they are difficult, "state of the art" programs, needing very large and fast computers.

Where the original tenant is not required to provide a guarantor but the alienation provisions permit the landlord to require a guarantor on an assignment if it is reasonable to do so, some landlords and tenants prefer the form of the guarantor's covenants not to be set out in the lease but to rely upon what is reasonable at the time of the assignment, presumably to ensure that the state of the art is employed. As such, the issue of fault is irrelevant, which is beneficial to a buyer especially since s4(1) (e) of the Consumer Protection Act 1987 restricts recovery in tort with its development risks or state of the art defence (see Chapter 6).

Despite the common cause announced in the introduction to the volume it is difficult in the present state of the art to see how the different methods and purposes can be said to constitute a unified and coherent approach to the literary text and thus to conceive of literary pragmatics as an "antidote to the fragmented specialization so characteristic of the humanities in the 20th century" (dust jacket).

Possible Worlds, Artificial Intelligence and Narrative Theory provides an interesting and accessible account of the state of the art in the theory of fiction and the semantics of narrative. But this is in fact a state of the art jukebox. Along the way, state of the art technology helps assemble the vehicles. This state of the art Vivienne Westwood corset says it all.
He carries a state of the art radio and SA 80 rifle.

THE Ulster Transport Museum is looking to the future — with a state of the art bike.

The LSE package also includes a state of the art security alarm, improved headlights, an increase in rear luggage space and an incar entertainment system with four co-axial speakers.

This is a state of the art system, much faster than the old manual methods and produces far more concise and accurate reports.
Annexe 11-6 Occurrences de CUTTING-EDGE dans CAEMS

1971
Ø

1995
At the cutting edge of pharmaceutical research, our client's prolific new product pipeline and outstanding growth record continues at an astonishing pace. [1998-083 (1995) : 96]

2005
1. We are the world's leading independent organisation dedicated to cancer research, spending £191 m a year on cutting-edge research into treating, preventing and curing cancer. [2481-039 (2005) : 66]

2. The roles are likely to expand to include further programme management opportunities, offering candidates the opportunity to develop broad, technology based project management skills within an actively growing environment at the cutting edge of science. [2481-060 (2005) : 71]

3. The Beatson Institute for Cancer Research is Scotland's leading cancer research centre. It is core funded by Cancer Research UK and supports diverse and dedicated groups carrying out cutting-edge research into the molecular mechanisms of cancer development. [2485-003 (2005) : 58]

4. The vision of Cancer Research UK is to conquer cancer through world-class research. We are the world's leading independent organisation dedicated to cancer research, spending £213m a year on cutting-edge research into treating, preventing and curing cancer. [2485-077 (2005) : 83]

5. The vision of Cancer Research UK is to conquer cancer through world-class research. We are the world's leading independent organisation dedicated to cancer research, spending £213m a year on cutting-edge research into treating, preventing and curing cancer. [2489-023 (2005) : 69]

6. The vision of Cancer Research UK is to conquer cancer through world-class research. We are the world's leading independent organisation dedicated to cancer research, spending £213m a year on cutting-edge research into treating, preventing and curing cancer. [2528-014 (2005) : 64]

7. The vision of Cancer Research UK is to conquer cancer through world-class research. We are the world's leading independent organisation dedicated to cancer research, spending £213m a year on cutting-edge research into treating, preventing and curing cancer. [2519-036 (2005) : 66]

8. You will join a project investigating the use of human oocytes for derivation of embryonic stem (ES) cells. This is an exciting opportunity to become involved in cutting edge research in embryo development, ES cells and gene expression analysis of single cells/embryos. [2485-098 (2005) : 89]

9. We’re identifying and implementing cutting-edge scientific developments and turning them to breakthroughs in healthy ageing for the whole body – developing nutritional, personal care and lifestyle interventions to complement an existing portfolio of more than 400 famous brands. [2489-012 (2005) : 63]

10. You will be actively involved in experimental cutting-edge research of ubiquitin- proteasome system and stress signalling proteins, and assist in the efficient running and management of a group of research scientists. [2489-039 (2005) : 74]

12. University of Southampton - at the cutting edge of innovation [2502-069 (2005) : 77]

7373
14. The state-of-the-art controlled environment facilities, specialised laboratories and **cutting-edge** equipment will put you at the forefront of your chosen field. [2489-075 (2005) : 82]

15. Overseeing the effective management of the Research and Development Department, you will be responsible for managing a dedicated team of scientists to ensure the successful completion of **cutting edge** projects. [2493-002 (2005) : 54]

16. The project would suit students with an interest in applying **cutting-edge** technologies to problems in vertebrate genetics and genomics. [2493-058 (2005) : 72]

17. Already the world's leading pharmaceutical companies have come to our world-class research and development centre, in the beautiful heart of rural Cornwall. They come here for one reason - at Tripos we have pushed the boundaries of drug candidate discovery, with genuinely **cutting-edge** computer modelling and chemistry which is transforming the process with unparalleled precision. [2502-015 (2005) : 60]

18. Masters and Research opportunities at the **cutting edge** in: [2502-066 (2005) : 76]

19. "PSREs have extraordinarily exciting, **cutting-edge** research, potentially years ahead of the market," says Jones. [2506-001 (2005) : 52-53]

20. ISIS is a world leading research facility, providing materials scientists with **cutting edge** instrumentation. [2506-008 (2005) : 56]

21. Their prime role is to identify, evaluate technically and financially, and help install and commission new manufacturing processes, technologies and/or equipment, usually at the **cutting edge** of nonwovens technology. [2506-019 (2005) : 61]

22. Invitrogen is a $billion company at the **cutting edge** in the Life Science Industry. [2506-026 (2005) : 65]

23. A joint project between NFAB, a nanotechnology company, and the Institute for Materials Research (IMR) at Salford has recently been established to develop patented **cutting-edge** nanotechnology. [2506-042 (2005) : 70]

24. Experience with FIB systems, ion beams, electron microscopes or MEMS would be an advantage but not to the exclusion of good candidates who have demonstrated an ability to work successfully at the **cutting edge** of technology – particularly in some aspect of nanotechnology. [2506-042 (2005) : 70]

25. We combine **cutting-edge** technology and creative thinking to drive medical breakthroughs that enrich lives across the world. [2511-006 (2005) : 53]

26. UNIVERSITY COLLEGE LONDON "Life At The **Cutting Edge" [2511-079 (2005) : 79]

27. The aim of the project is to build teams of researchers who are able to design new analytical methods and equipment that will solve **cutting edge** proteomics research challenges, both within the University of Glasgow, and with our collaborators in the Universities of Edinburgh and Dundee. [2515-063 (2005) : 76]

28. We offer a comprehensive package of benefits and all the scope you need to develop your career at the **cutting edge** of science. [2519-032 (2005) : 65]

29. We have exciting opportunities for life-science graduates to join our expanding publishing team producing high-quality review journals at the **cutting edge** of medicine. [2524-040 (2005) : 65]
30. The BDI will carry out cutting-edge research programmes focused on the development of next-generation biomedical diagnostic devices measuring indicators of chronic disease (e.g. cancer, cardiovascular disease). [2524-053 (2005) : 71]

31. We are currently assembling a team of world-class research scientists to partner with cutting-edge research teams from our industry partners (Analog Devices, Amic, Enfer, Hospira, Becton Dickinson & Inverness Medical Innovations) and collaborating institutions (The Royal College of Surgeons Ireland (RCSI) in Dublin, the National Centre for Biomedical Engineering Science (NCBES) at NUI, Galway, and the Tyndall National Institute (TNI) in Cork). [2524-053 (2005) : 71]

32. The Biotechnology and Biological Sciences Research Council (BBSRC) is the UK's principal public funder of innovative non-medical biological research, supporting a huge range of cutting-edge projects. [2528-026 (2005) : 70]

2006

1. We have exciting opportunities for life-science graduates to join our expanding publishing team producing high-quality review journals at the cutting edge of medicine. [2537-045 (2006) : 72]

2. We have exciting opportunities for life-science graduates to join our expanding publishing team producing high-quality review journals at the cutting edge of medicine. [2537-056 (2006) : 76]

3. The Protein Engineering (PE) group focuses on the development and application of cutting-edge technologies for lead isolation and optimization [2541-024 (2006) : 67]

4. Many believe this trend will lead to the emergence of US-style comprehensive cancer centres, where cutting-edge research and treatment go hand in hand. [2545-004 (2006) : 56-59]

5. We need cutting-edge pharmacologists working in every research centre: unfortunately most don't have them," he says. [2545-004 (2006) : 56-59]

6. Cancer Research UK is the world's leading independent organisation dedicated to cancer research, spending £217m a year on cutting-edge research into treating, preventing and curing cancer [2545-010 (2006) : 62]

7. Part of the European Molecular Biology Laboratory (EMBL), the European Bioinformatics Institute (EBI) is located on the Wellcome Trust Genome Campus at Hinxton, near Cambridge, UK, and provides cutting-edge research, service and training in the field of bioinformatics. [2545-013 (2006) : 63]

8. EU and UK candidates holding or expecting 1st class or 2i degrees or equivalent in appropriate subject areas are invited to apply for the following PhD studentships, available from 1st October 2006, in the Faculty of Life Sciences which consists of five schools conducting cutting-edge research in biology, agriculture, food sciences, psychology and pharmacy. [2545-086 (2006) : 91]

9. The post is based in Bath and the successful applicant will join an enthusiastic team of scientists who are working to merge cutting-edge research with top quality consultancy services. [2550-030 (2006) : 70]

10. The role is likely to expand, offering candidates the opportunity to develop broad, technology based project management skills within a growing environment at the cutting edge of science. [2550-043 (2006) : 76]

11. Masters and Research opportunities at the cutting edge in: [2550-074 (2006) : 87]
12. If you’re looking for an environment where you can develop **cutting-edge** scientific skills, welcome to AstraZeneca. [2558-025 (2006) : 68-71]

13. We need the sharpest minds to stay at the **cutting edge**. [2558-045 (2006) : 79]

14. UCL "Life at the **cutting edge**" [2558-098 (2006) : 98]

15. The School of Engineering Sciences (SES), at the University of Southampton is a leading 5* rated research School with **cutting-edge** projects, strong industrial links and state-of-the-art facilities. [2558-100 (2006) : 99]

16. Based in Dublin City University (DCU), the Biomedical Diagnostics Institute was established in 2005 through a Science Foundation Ireland Centre for Science, Engineering & Technology award, and industry funding, The Biomedical Diagnostics Institute (BDI) carries out **cutting-edge** research focused on the development of next-generation biomedical diagnostic devices measuring indicators of disease. [2563-062 (2006) : 71]

17. We have an exciting opportunity for a Commissioning Editor to manage our **cutting-edge** title, Pharmacogenomics. [2567-018 (2006) : 58]

18. The successful candidate will actively follow the latest developments in the field of microscopy and image analysis and will be responsible for ensuring that the facility remains at the **cutting-edge**. [2567-022 (2006) : 59]

20. The company is a world leader in underwater environmental acoustics, and has a track record of developing novel solutions to problems, and providing **cutting-edge** research and consultancy to government and industry. [2572-035 (2006) : 74]

21. Successful candidates will have the opportunity to contribute to the development of high-quality review journals in **cutting-edge** biomedical research specialties. [2572-047 (2006) : 80]

22. This is an exceptional opportunity to join a world-class organisation dedicated to the application of **cutting-edge** science for the treatment of significant unmet medical needs. [2572-072 (2006) : 91]

23. As part of our SHEF team, you'll work at the **cutting edge** of chemical science, inputting to a range of research programmes and support services. [2580-022 (2006) : 62]

24. Stirling Medical Innovations (SMI) is a new **cutting-edge** research and development organisation dedicated to enhancing the lives of people suffering with chronic heart disease. [2580-028 (2006) : 64]

25. Future Science Group is at the forefront of biomedical publishing - our programme of high-quality review journals spans the key therapeutic areas and **cutting-edge** biomedical research specialties. [2580-041 (2006) : 67]

26. A centre for postgraduate excellence, Cranfield University has an unrivalled reputation for transforming **cutting-edge** technology, management and science into practical, life-enhancing solutions. [2580-075 (2006) : 80]
2009

1. Diamond Light Source is a new synchrotron and a leading scientific facility of its type in the world. Located on the Harwell Science and Innovation Campus in South Oxfordshire, we host research facilities supporting cutting-edge research in all fields of science. [2689-003 (2009) : 46]

2. Working to best practice, you will ensure the service stays at the cutting edge of patient-foocussed care. [2689-009 (2009) : 49]

3. We are developing a novel and cutting-edge teaching curriculum designed to equip graduates with the diagnostic, medical and surgical skills required to succeed in a changing world. [2689-026 (2009) : 57]

4. Students will learn about the cutting-edge research methods and techniques used to advance our understanding of this disease and design better treatment strategies. [2689-038 (2009) : 61]

5. At the UK Ministry of Defence's (MOD) Defence, Science and Technology Laboratory (DSTL), based at sites throughout the UK, engineers work on cutting-edge research. [2698-004 (2009) : 48-49]

6. Of course, candidates will have the opportunity to collaborate with the top scientists on cutting-edge research projects. [2698-056 (2009) : 71]

7. Diamond Light Source is a new synchrotron and a leading scientific facility of its type in the world. Located on the Harwell Science and Innovation Campus in South Oxfordshire, we host research facilities supporting cutting-edge research in all fields of science. [2702-037 (2009) : 64]

8. Lund University is one of Europe's leading universities, combining centuries of tradition with dynamic development and cutting-edge competence. [2706-034 (2009) : 60]

9. The Unit provides an exciting and lively working environment at the cutting edge of medical research into brain diseases (notably CJD and BSE), dementia and other neurodegenerative disorders. [2711-032 (2009) : 61]

10. Learn cutting-edge skills to equip you to excel at the Science and Engineering interface [2715-049 (2009) : 67]

11. Over 1500 suppliers of cutting-edge technologies from over 100 countries [2724-006 (2009) : 52]

13. Working as key members of cross functional project teams these openings provide excellent opportunity to work on cutting-edge novel research at the interface between academia and industry. [2728-029 (2009) : 65]

14. You will work closely with academics both in design and analysis of experiments utilizing these cutting-edge technologies. [2728-033 (2009) : 67]

15. NTNU is Norway's leading science and engineering university, located in Trondheim at 63° north. We may work at Europe's outer edge – but our research is cutting edge. [2733-004 (2009) : 26]

16. We have an extensive network of expertise including: [...] nutritional research to pursue cutting-edge science aimed at preventing disease and improving health through good nutrition; [2737-031 (2009) : 67]
Annexe 11-7 Occurrences de LEADING-EDGE dans CAEMS

1971
Ø

1995
1. At the leading edge of research, innovation and learning [1984-037 (1995) : 64]
2. At the leading edge of research, innovation and learning [1989-075 (1995) : 76]
3. At the leading edge of research, innovation and learning [1993-095 (1995) : 78]
4. At the leading edge of research, innovation and learning [1993-098 (1995) : 78]
5. At the leading edge of research, innovation and learning [1998-014 (1995) : 76]

6. Currently we have a number of vacancies for individuals who would enjoy the challenge of solving complex problems to generate leading-edge products. [1967-066 (1995) : 81]

7. Our Information Management Department is one of the foremost in the pharmaceutical industry and develops leading-edge practices in the provision of high-quality, evaluated information for our R&D scientists. [1989-024 (1995) : 64]

9. If you are interested and you want to join a leading-edge organisation which believes that valuing individuals with different backgrounds and experience will lead to improved business performance, then please send a copy of your CV to Nick Cansfield, Personnel Officer, ZENECA Agrochemicals, Yalding, Kent ME18 6HN. Closing date for applications is 13 October 1995. [1998-090 (1995) : 99]

10. Our leading-edge organisation believes that valuing individuals with different backgrounds and experience will lead to improved business performance. [2002-042 (1995) : 68]

12. During the Schemes's 2 year training programme, you will be engaged in providing leading-edge advice and support to Sea Systems projects on Computing Policy, Software Engineering Management and Safety Related Software. [2002-060 (1995) : 73]

13. Our leading-edge organisation believes that valuing individuals with different backgrounds and experience will lead to improved business performance. [2006-080 (1995) : 83]

2005

1. Join us at Syngenta and you will be working with leading-edge technology in excellent facilities, while our total commitment to training means you will never stop learning. [2481-012 (2005) : 57]

2. We are looking for an engineer/physicist to join our sustainability and renewable energy team in London to develop leading-edge sustainable design solutions. [2481-023 (2005) : 59]

3. You are invited to apply for a new post, offering a highly motivated molecular scientist the exciting opportunity to work with us on leading-edge and globally important research. [2481-031 (2005) : 62]

4. There is an opportunity for a qualified Medical Physicist to join a team of Clinical Scientists and Technologists in providing a high quality service and participating in leading-edge development projects. [2481-034 (2005) : 64]
5. You will be expected to contribute to the leading-edge R&D projects in the section and also be an active participant in the Department's Research program. [2481-034 (2005) : 64]

6. The course has a strong practical focus and you will have access to leading-edge HPC platforms and technologies. [2485-007 (2005) : 59]

7. Are you interested in joining Australia's premier research organisation to undertake leading-edge research in world-class facilities, and working in scientific teams with significant international reputations? [2485-067 (2005) : 80]

8. East Malling Research (EMR), located in Kent, is a provider of strategic and near market R & D, with a 90 year history of leading-edge work on perennial plants. [2493-019 (2005) : 60]

9. Dstl welcomes life science graduates who want to do leading-edge research of profound national importance. [2498-005 (2005) : 51]

10. In addition to generating high quality data for presentations and publications, your role will also involve liaison with external collaborators in leading-edge centres both in the UK and USA. [2498-010 (2005) : 53]

11. As part of the Global Drug Development division of Roche, you’ll also be working at the leading-edge of the pharmaceutical industry, helping to bring important new medicines to market to combat human disease. [2498-047 (2005) : 67]

12. You will ideally have a degree in engineering or (physical) science and experience with, and management of leading-edge high-technology experimental facilities. [2502-047 (2005) : 71]

13. PhD in organic chemistry, with a background in polymer technology, required for UK arm of US public company now launching innovative, leading-edge antimicrobial products globally. [2511-004 (2005) : 52]

14. This is an opportunity to work at the leading edge of environmental monitoring on a high profile development with a team of recognised experts. [2515-003 (2005) : 54]

15. As a result we are able to offer the following excellent opportunity to work with a people-oriented organisation that is constantly striving to push out the boundaries of leading-edge technologies. [2515-051 (2005) : 73]

16. Are you interested in joining Australia's premier research organization to undertake leading-edge research in world-class facilities, and working in scientific teams with significant international reputations? [2519-029 (2005) : 64]

17. With over 50 years' experience and more than 6,400 employees operating in over 300 countries, IMS Health offers leading-edge business intelligence products and services that are integral to clients' day-to-day operations and decision making. [2528-023 (2005) : 68]

18. Nottingham Trent University is renowned for excellent teaching and leading-edge research, and our strong links with industry and the professions provide a genuine culture of innovation, firmly focused on success. [2528-075 (2005) : 89]

2006

1. The courses aim to teach advanced laboratory techniques in leading-edge areas, principally genomics-related. [2537-036 (2006) : 70]
2. This latest purchase is just part of an ongoing commitment to stay leading edge, and in what is a high-profile and influential role, you'll be responsible for determining our Supercomputer procurement plans and strategy. [2541-037 (2006) : 74]

3. We’re responsible for carrying out leading-edge research into climate change - dealing with issues that affect the whole planet, our work has immense implications worldwide. [2545-061 (2006) : 83]

4. The knowledge and expertise gained maintains a technological leading edge, builds a strong economy and improves people's quality of life. [2545-063 (2006) : 84]

5. The kind of people that we are looking for are those with a real passion for excellence, change agents with the courage to challenge mindsets and behaviours, inspirational leaders who can motivate teams and technical masters who can ensure we maintain leading-edge knowledge. [2550-017 (2006) : 65]

6. Experienced graduate or PhD synthetic chemists are sought to join our worldwide team to contribute to the design and optimization of new processes to drug candidates utilizing leading-edge automation platforms and statistical experimental design techniques. [2550-032 (2006) : 72]

7. The Northern Ireland Civil Service offers challenging, interesting work with real job satisfaction in a dynamic environment dealing with the most important issues of the day. Good training and promotion opportunities and an attractive benefits package make for a rewarding career with a leading-edge employer. [2567-060 (2006) : 76]

8. The sector is spurred on by the strong interaction between academia and business environment, a vibrant medical and hospital system, the capacity of world class scientists to produce leading-edge research as well as government support. [2572-003 (2006) : 15]

9. The national foundation for excellence in scientific research is investing in academic researchers and research teams who are most likely to generate new knowledge, leading-edge technologies, and competitive enterprises. [2572-010 (2006) : 63]

10. UCD is at the forefront of leading-edge research and teaching activities across a wide range of disciplines. [2572-019 (2006) : 67]

11. Here at Cmed we’re proud that we stand out from the clinical research services crowd. Our pioneering approach, leading-edge intelligent Data Acquisition and Management (iDAM) patented technology and processes allow us to deliver all encompassing solutions that provide real advantages to our clients. [2572-025 (2006) : 70]

12. You will be responsible for the development of ‘leading-edge’ R&D technologies, providing world-class expertise. [2572-057 (2006) : 83]

13. Here at Cmed we’re proud that we stand out from the clinical research services crowd. Our pioneering approach, leading-edge intelligent Data Acquisition and Management (iDAM) patented technology and processes allow us to deliver all encompassing solutions that provide real advantages to our clients. [2572-062 (2006) : 87]

14. The sector is spurred on by the strong interaction between academia and business environment, a vibrant medical and hospital system, the capacity of world class scientists to produce leading-edge research as well as government support. [2576-002 (2006) : 11]

15. You would work as part of a leading-edge, interdisciplinary team, assisting in the processing of customer samples and the development of new applications. [2576-012 (2006) : 65]
16. HMGCC produces **leading-edge** communications equipment to protect Her Majesty's Government's interests at home and abroad. [2576-067 (2006) : 82]

17. Experienced in market research and strategy development in the healthcare industry, you will develop innovative and **leading-edge** strategic programmes that are commensurate with the CELS’ business plan and also lead the development of CELS’ market and technology research resources to deliver CELS’ regional and commercial goals. [2580-029 (2006) : 64]

18. Experienced in market research and strategy development in the healthcare industry, you will develop innovative and **leading-edge** strategic programmes that are commensurate with the CELS’ business plan and also lead the development of CELS’ market and technology research resources to deliver CELS’ regional and commercial goals. [2580-076 (2006) : 80]

2009

1. Merck Sharp & Dohme Limited (MSD) is the UK subsidiary of Merck & Co., Inc., of Whitehouse Station, New Jersey, USA, a leading research-based pharmaceutical company that has a track record of discovering, developing, manufacturing and marketing a wide range of **leading-edge**, innovative pharmaceutical products in a wide range of exciting therapy areas. [2689-011 (2009) : 50]

2. We aim to provide a progressive, dynamic environment which will deliver an outstanding learning experience drawing upon **leading-edge** teaching methods and the latest research advances. [2689-026 (2009) : 57]

3. The Digital Design Studio at Glasgow School of Art is a **leading-edge** research and academic centre within UK Higher Education and has become a flagship for advanced 3D digital technologies. [2689-032 (2009) : 59]

4. Plymouth Marine Laboratory (PML) is a dynamic and highly innovative, **leading-edge** provider, recognised nationally and internationally for the excellence of its research and in the provision of technologies and advice across the marine sciences, PML is an independent organisation with charitable status, privileged to be a NERC Collaborative Centre and an integral part of the UK’s strategic marine sciences & technology capability for over 30 years. [2715-014 (2009) : 56]

5. A major component of the R&D Programme is the deployment of a team of 'R&D Specialists' with business development backgrounds who have detailed knowledge and understanding of **leading-edge** technologies and of the UK’s R&D capabilities. [2728-005 (2009) : 54]

6. We are searching for an experienced Molecular Geneticist to join our expanding team, working to design and undertake experiments to develop and optimise novel thermophilic bacteria using classical adaptation/mutagenesis techniques as well as **leading-edge** molecular genetics approaches. [2728-030 (2009) : 66]

Le nombre total des annonces est parfois différent de la somme des occurrences des blasons ou de logos qui accompagnent les annonces dans un sous-corpus donné, puisque les éléments graphiques des universités peuvent apparaître dans des publicités publiées par New Scientist (par exemple Employers of Choice).

Le fait d’avoir un blason avec une devise (*motto*) ne signifie pas que l’université en question les publie dans les annonces pour l’emploi. La dimension réduite du blason ne permet pas toujours de lire la devise dans ces annonces.

---

Annexe 12-4 Cranfield University Spend on Advertising
Dear George,

Thank you for your email.

The information you are asking for is difficult to obtain as we do not store it in the breakdown you request.

However there is some information near the end of this job ad which is currently advertised on our website for the HR dept -

http://www.cranfield.ac.uk/hr/jobopportunities/vacancy%20packs/1022e%20vacancy%20pack.pdf

- It is £150k spend per year and 1,900 vacancies. I hope this will help you and am sorry we cannot send the information in more detail.

I am uncertain how the spend broken into the different media helps in your PhD topic on the language used, or comparing the turnover of a private company vs a university. The link to our latest financial reports is here

http://www.cranfield.ac.uk/annualreport/accounts/uni_accounts2010.pdf

I am not sure if this is the Annual Report you read? I hope it helps to answer your questions.

I wish you every success with your PhD and hope the information above is helpful.

Regards
Diane

Diane Dalgarro

>Subject: Advertising from Cranfield University
>
>Dear Sir or Madam,
>
>I am doing a PhD on the language used in job ads.
>I have to compare the turnover of a private company and a university.
>I could read in the Annual Report of Cranfield University your annual
>income for 2010.
>Could you help me in providing the percentage expenditure for placing ads
>in different media?
>Thank you in advance for your precious help.
>
>George Sosin

7. With picturesque Alpine villages, vast expanses of skiable terrain, and delectable fondue, Switzerland is a popular holiday destination. [2733-006 (2009) : 60-61]
Annexe 14-3-1 Occurrences de PICTURE DANS BNC
Here is a random selection of 50 solutions from the 10627 found.

1. A19 889 It represents all of the available picture information, and no surplus information.
2. ABS 3528 Everyone agreed it was a fine picture, a breezy blend of wit and taste.
3. B3J 1904 Dan had never seen anything like her outside of Berkeley picture house.
4. BNT 1499 Certainly my own identikit picture of the classic nasty old git a Tory faces is about 68, wears a string vest and the trousers of an old suit, bears remnants of a tattoo on one shoulder and comes at you from the door of a council house with an unkempt garden in Mansfield, waving a stick and blaspheming mightily.
5. CE4 278 FRAMING THE PICTURE
6. CE4 1040 For the background, I chose a pale cream silk and a mount of pale blue-grey, with a plain gold frame to make the picture fit as well as possible into a colour scheme as yet unknown.
7. CEN 4944 Osborne broke down and confessed to the killing when a picture of the curtains in which Dean's body was wrapped was flashed on TV.
8. CG6 1236 The British picture Vocabulary Test (BPVT)
9. CH2 909TOT: Matthew and mum Picture: HARRY PROSSER
10. CRT 1042 The only forms of decoration were photographs of family, children and, in a majority of cells, some form of religious symbol, usually a picture or statue of 'Our Lady of Guadalupe'.
11. EBW 1320 She also had quite a few things two small Picassos and a picture by Robert Delaunay called 'The window' that Taïrov was given when they were in Paris on tour together, and a very fine Yakulov.
12. ECT 287 'Well, essentially, we show a big picture of a pint of John Smith's for 30 seconds.'
13. EFR 1837 Leaflets and posters carrying a picture of Latimeria and offering a huge reward were distributed among the countless fishing villages that dot the coasts of southern and eastern Africa.
14. F9V 1000 In this picture the teddy's on the chair but there ain't no teddy in that one.
15. GIX 2130 This God-eyed version is a fake — a charming, impossible fake, like those medieval paintings which show all the stages of Christ's Passion happening simultaneously in different parts of the picture.
16. HAE 3608 Send your shots to: Prize Pics, Picture Desk, The People, 33 Holborn, London EC1P 1DQ.
17. HGF 411 Same damn bit of canvas, same damn picture.
18. HHY 3449 The role of object properties in picture naming
19. H19 1924 On July 16 a Warsaw court acquitted Jerzy Urban, the former spokesman for Poland's communist government, of spreading pornography by reprinting an explicit picture from Penthouse magazine in his satirical weekly magazine Nie ("No").
20. HXF 1257 (9) An evidence questioning question questions that look at the veracity of the evidence, e.g. "On what do you think the weavers of the tapestry based their picture?"
21. JOW 151 It was a very low-budget British picture, shot at Pinewood studios in black and white and sought to do little more than provide an entertaining hour and a half or so, with a topic to which a great many people could relate — National Service.
22. J1Y 319 Our picture shows, L to R:(Chief Engineer with P&O, subsequently Technical Services Division and Three Quays Marine);(Secretary to Albert Morris before going to sea as an assistant purser in 1954);(Chief Engineer, P&O, subsequently Deputy Engineer Manager);(ex-Manager, Islay Kerr in Singapore until transferring in 1967 to P&O Lines as General Manager, retired as Managing Director OCL South Africa in 1985).
23. A04 1481 The Christian painting may be at once a holy picture and a convincing representation of a woman tenderly cradling her son, seen in front of a north Italian landscape.
24. AC7 93 And another picture.
25. ACP 74 Second, correct me if I'm wrong, but in the excellent John Stoddart picture he's wearing foundation and eyeliner, but apart from that absolutely no make-up at all.
26. ANU 1133 Among the earliest souvenirs to be hawked to the victorious Allied troops who marched into Beirut on 8 October 1917 was a horrific picture postcard, old copies of which can still be found in the antiquarian bookshop that sells the David Roberts lithographs on Makhoul Street.
27. ASC 1319 Then in September, when the Sadler's Wells Ballet danced in Paris (opening the day after the premiere of School for Nightingales), he added to his scrapbook, besides snapshots of Legerton, Powell and himself in the obvious tourist spots, a picture of two puppets; he also pasted a picture of Marie Antoinette in the middle of a page otherwise devoted entirely to gargoyles from Nôtre-Dame.
28. B1X 657 All the time his eyes deliberately avoided mine; he kept them fixed on a picture on the wall behind me.
29. B76 1078 Although there is definitely some loss of vertical definition, General Electric says it is hardly noticeable because adjacent picture lines are nearly identical anyway.
30. BMD 1164 Main picture For luthier Arthur Robb playing the instrument is a vital part of producing it: this enables him to check the sound quality and make any necessary final adjustments.
31. C9X 147 Main picture: In the kitchen/dining room a magnificent arrangement of satin ribbons finishes off the table setting
32. CA5 2325 After an almost silent session, I felt unsure how to begin to help her; so I asked her if she could draw a picture of a tree.
33. CDY 2648 He couldn't flesh her out, however hard he studied the picture.
34. CEM 566 'This picture shows her unhappy resignation.'
35. CG6 697 For example, we might draw the inference that a child who is able to name a picture of a boat, while looking at a picture book with her mother, will be able to name it on any other occasion; the child ‘knows the meaning of the word boat’.
36. F71 197 Can I just point out that something here, erm, was, I think I mentioned about my children it was the height of the table and it’s just so little that, that they indicate their in height in this picture, but it is there and, erm, that, I found that really very exciting and as I say the, The Three, it, the three goblets, the three apples the three puppies, so often I've, I've found that there is three sets of, three objects and in
37. F9R 924 There was a second picture, a Juan Gris, very fine.
38. F9V 1005 When the teacher inhibits the child from pointing and pretends not to be able to see the picture, the child understands that the communicative situation has changed, that she can no longer rely on the shared visual context and she makes her reference explicit (the teddy), locates him verbally rather than by pointing to him (on the chair)and makes explicit how the second picture differs from the first (there ain't no teddy).
39. G0F 944 She is intent upon the picture she is painting, a luminous, finely-detailed portrait of a myoglobin molecule.
40. G0P 3363 Set out in chronological order, the first picture had been taken in 1934, then, every ten years until the most recent one.
41. G1H 1186 She refers, for example, to an issue of the Baltimore Sun which showed a picture of an unidentified motorcyclist, a gun strapped to his back.
42. G21 744 Rarely completing a painting on the spot, preferring to take sketches back to ‘the studio ’ missing and ‘think’ the picture through, often combining various elements from more than one sketch to form a completed picture.
43. G2E 284 Main picture: Les Onze Danseurs de Molly Molloy flutter round as garish pink butterflies at the Opéra-Comique
44. GX9 626 Our picture shows Malcolm (right) presenting the trophy to Paul.
45. GX9 787 Helping hold the cheque is Resource Manager Norma Macsween and others in the picture are (from left) John Macdonald, Ellen Macdonald, Alan Sillars, Margaret Morrison, Anne Henderson, Donald Macdonald, Anne Macleod, Christina Bain and Mairi Macleod.
46. HAF 1173 HOT STUFF: TV Catherine's cuppa surprise Picture: JOHN CLEAVE
47. HBF 954 Once again we're holding a competition…to find the best picture of 1993.
48. HUT 328 I'm glad you've made reference actually to that picture of the circles because I, I erm I came up with that after we'd had the parish day and I you know, observing who was there on the parish day and then trying to see how, how we reach people and, and, and who were missing and how important was it that everybody should be there on parish day, and wasn't it that people who are involved should be there on parish day because that's a point at which erm you know parish council can meet those very people.
49. K4J 492 Butcher Howard Callaghan outside the shop after the gas blast Picture: FRANK LOUGHLIN
50. K4N 106 THIS is the first picture of Romanian toddler Constantin who will be travelling to the North-East for a vital operation.
51. KLH 406 Erm a late picture, say on or about the day before it was packed up which was erm July nineteen fifty nine for passenger servicing.
52. KLH 542 There's a signal box, from which the other picture was taken.
53. **A0R 1919** The picture changed once more.
54. **A6A 205** Five hundred picture sleeves can cost from £200 to £500 depending on the number of colours and the thickness of the card.
55. **ARK 1339** It occurs to me we're just about to circulate the picture of that man, Stein, suspected of wholesale fraud — so maybe we get them mixed up, Kurt.'
56. **CE4 1087** For example, if the recipient loves freesias, you can either press some bright yellow freesias and create a picture of autumnal shades, or press some mauve and cream freesias and incorporate them in a picture with blue or pink colouring.
57. **CLH 117** Apart from the word list, the comparative study reported above also included the signing of a text based on a picture book story The snowman.
58. **AJX 646** Property: Not quite as pretty as a picture A house committed to canvas is a house that's easy to sell.
59. **AMB 399** It was empty apart from a round wooden table, a large golden picture frame on one wall and a cupboard.

1. **A4W 9** The picture is similar when Fiesta production is compared at Dagenham and Valencia.
2. **C8Y 1028** This rather gloomy picture of the troubles of the daughter at home obviously does not apply in every case.
3. **CEJ 2010** Such a picture points to the great Messianic feast in the future.
4. **CEM 74** THE picture of wizened old Frenchmen puffing contentedly on their Gauloises over a glass of pastis could be coming to an end — by law.
5. **CMS 454** In their work, the Centre for Contemporary Cultural Studies tried to combine the view of the young people themselves — gathered through ethnography — with a more global picture of changes taking place in contemporary capitalism.
6. **CN4 683** I'm really making up bits now, making the picture look how I want it to look — dark on light, light on dark — not forgetting to look in the mirror!
7. **CRM 6225** Probably the clearest picture has emerged from the use of anisomycin, which inhibits translation of proteins from mRNAs.
8. **E9T 610** Nationwide a picture has emerged of nurses worrying that patient care is being compromised by reductions in the number of qualified nursing staff in the NHS.
9. **EAA 441** This picture of myself develops from a myriad of experiences, particularly from the feedback I get from other people.
10. **EDD 726** Newtonian science, as epitomized by physics, thus yielded a picture of nature as a mechanical, inanimate, purposeless system of forces acting on matter in a way governed by inevitable laws of cause and effect.
11. **EWH 647** It was more difficult — and more intriguing — to conjure up a picture of her future husband, Dom João.
12. **G10 1024** This is the image, the picture, the memory I shall fold away, so that somewhere in the future, somewhere on the other side of the pain I know awaits, I shall be able to unfold the memory and I shall never quite lose her.
13. **G15 2702** The car purred on, the driver looking neither to left nor right, the picture of inscrutability.
14. **G39 954** They were once very common in Teesdale and its tributary dales, like Baldersdale, but with the coming of intensive farming the picture changed dramatically.
15. **H8U 665** The fact that more sites have been identified as time passes shows that archaeological distribution maps only depict the activities of individual archaeologists or field societies up to any particular date, rather than the total picture of deserted medieval villages!
16. **A67 1292** Reading the book gives you a picture of what number of BoB participants think about these topics, and also what a number of learned air historians have concluded on the same subjects.
17. **HJ1 18282** In the project, a number of data sources are being utilised; in particular, recently available data from the 1981 Census of Population and the 1981 British Rail Origin-Destination Survey are being compared with earlier data to obtain a picture of recent trends.
18. **HJ4 7437** The reduction was regarded by Ministers as modest grounds for hope that the high level of imports is at last beginning to ease and the three-month picture shows a 13.4pc fall in the deficit.
19. **HY5 1383** Cheap newsprint; new technology which made it possible to attract readers by printing illustrations relatively cheaply; growing mass literacy, at least in western Europe; mass newspaper readerships; a resulting growth of mass public feeling, often emotional and volatile, on international questions: all these were now adding another element to the changing **picture** of relations between the European states.

20. **JXY 970** ‘That's not quite the **picture** you had of our Dr David Markham, is it, Rachel?’ she said quietly.

21. **KBY 2744** Anyway, he knew Steve Hilaire, and he could reach the **picture** through him.

22. **AYP 34** It will be amalgamated with information obtained from others to provide a complete statistical **picture** of the characteristics of people in particular occupations.

23. **B0H 1146** Disclosure of the main standing Committees would thus give a partial **picture** only.

24. **B2G 1192** The ministry of Christian healing and deliverance introduces the missing part to the incomplete **picture** of modern and alternative medicine.

25. **BMV 990** The biographer of Edward the Confessor shows us (in what is meant to be a panegyric) the **picture** of a thoroughly idle king, who spent much of his time ‘in the glades and woods in the pleasures of hunting’.

26. **C9R 765** In the second statement every short group of simple words creates a **picture**, has its own emphasis and rhythm.

27. **EAA 145** If we can articulate those goals and their underlying values and beliefs, then we have some **picture** of what, given the right circumstances, may lead to arousal and potential activity.

28. **CN3 2841** He crossed his long legs, the **picture** of relaxation as he studied Newman, his grey eyes half closed.

29. glass.

30. **FB3 513** Adorno did not write a history of music, nor did he describe his **picture** of the music-historical field in any great detail.

31. **H83 661** It is important to note here that although an analysis of individual texts follows, the point of this approach is to provide an overall **picture** of a pupil's literary diet across a range of texts met in the lower years of the secondary school.

32. **HAB 335** The value of reports on one or two skeletons is not to serve as the basis of any theory of morphological relationships, but to provide standardized data which may eventually be built into a general **picture** of population at one period or through time.

33. **HH1 3182** No, the **picture** tormenting her mind was of herself waking in FitzAlan's arms and staying there.

34. **HH2 613** It will be useful at this point to outline the **picture** of the market process which incorporates our views on competition and entrepreneurship, contrasting it briefly with the dominant concept of the market.[…]

35. **HRG 1602** This idealized **picture** of creep behaviour in a polymer has its mechanical equivalent constructed from the springs and dashpots described earlier.

36. **HY5 1383** Cheap newsprint; new technology which made it possible to attract readers by printing illustrations relatively cheaply; growing mass literacy, at least in western Europe; mass newspaper readerships; a resulting growth of mass public feeling, often emotional and volatile, on international questions: all these were now adding another element to the changing **picture** of relations between the European states.

1. **EA5 936** Yer was pretty as a **picture** an’ I said ter meself straight away, ‘Fred’, I ses, ‘this 'ere little lady is gonna be good fer yer business.’

2. **FUA 753** The opposite of turning down the sound is blacking out the **picture**.

3. **HRE 119** By the beginning of the thirteenth century, Genghiz Khan and his Mongols were entering the **picture**.

4. **ABG 882** This, characteristically, is where Mr Solarz comes into the **picture**.

5. **JOP 835** This is not the **picture** of starvelings about to arise from their slumbers, but neither is it a picture of men and women ‘better, immensely better, than they were fifty years ago’, still less of a class that ‘had almost all the material benefit of the last fifty years’ (Giffen) as self-satisfied and ignorant liberal economists maintained.

Dear George

Novartis Staffing functions work with either different external media agencies or our internal Communications departments for the layout and design of job adverts. Novartis has an internal image library featuring own employees so chances are that on this particular ad a Novartis employee is shown. We do not have an annual budget for Staffing advertising and haven’t collected those figures centrally, so can’t help you with an overall spend figure. Adverts tend to be done on a job by job basis.

I hope this answers your query.

Best regards

Dear Madam,

In my PhD I am dealing with the job ads made by different companies as they appear in a *New Scientist* corpus from 1971 to 2009.

In the July issue 2005 page 67 of *New Scientist* you issued a job ad which is well structured and should have a good impact on the candidates who apply for a job.

- Who makes your job ads?
- Is the researcher photographed an employee from your company?
- What is the budget your company spends annually for job ads?

I am aware that your time is precious but it would be really helpful if you could provide this information.

Thank you in advance

George Sosin
