ASSISTANT PROFESSOR
Department of Chemistry
The University of British Columbia

The Department of Chemistry, The University of British Columbia is seeking to fill two tenure-track openings at the assistant professor level starting 1 July 1996: (1) an appointment in the area of theoretical chemistry and (2) an appointment in inorganic chemistry. Both positions require a Ph.D. degree, postdoctoral experience preferably, and a proven research track record. The successful candidates will be expected to teach chemistry courses at the undergraduate and graduate level and to develop vigorous and creative research programs. The salary will be commensurate with experience.

Applications should consist of a curriculum vitae, list of publications, summary of research interests, a detailed research proposal, and the names and addresses of at least three references. The University of British Columbia welcomes all qualified applicants, especially women, aboriginal people, visible minorities and persons with disabilities. The positions are subject to final budgetary approval and, in accordance with Canadian immigration requirements, priority will be given to Canadian citizens and permanent residents.

Applications should be received by November 1, 1995 and should be directed to:

UBC

Vancouver, BC Canada V6T 1Z1
ESSEX ANALYTICAL SALES - PART-TIME

Essex Analytical is the commercial laboratory of Essex Water Management Services a part of the Lyonnaise des Eaux water business in the UK.

We are expanding our business in the areas of trace inorganics and general micro biological work and offer a high quality and quick turn round from our state of the art laboratory near Chelmsford.

Whilst the majority of the business comes from in-house sources, external business is rising steadily. We now need additional expertise to fully develop our customer base.

Candidates will need to be available for 3 days per week and be fully mobile. They must be experienced in selling and have scientific knowledge relative to our business. For the right applicant age will not be an issue.

We are offering a salary which equates on a 5 day pro-rata basis to over £20,000 per annum together with a company car.

Applications along with CVs should be addressed to: Prue Thurston, Human Resources Department, Essex & Suffolk Water, Hall Street, Chelmsford, Essex CM2 0HH.

Closing date: 15th September 1995.

ESSEX & SUFFOLK WATER
ICLARM
INTERNATIONAL CENTER FOR LIVING AQUATIC RESOURCES MANAGEMENT

A member of the Consultative Group on International Agricultural Research (CGIAR), ICLARM is an international non-government, non-profit organization conducting research on aquaculture and fisheries resources management in developing countries. The Center requires highly competent and motivated individuals to fill the following positions for its Coastal Aquaculture Center (CAC) in the Solomon Islands:

**AQUACULTURE SCIENTIST**

The appointee will be responsible to the Junior Scientist for implementation of a major program on the artificial propagation and mass-rearing of tropical sea cucumbers. The appointee will be supported by a graduate dedicated to the production of live algae, and by several other technical staff.

A Ph.D. in an appropriate discipline and at least three (3) years of relevant experience is required. The appointee must also have extensive, first-hand experience in rearing of marine larvae, and demonstrated ability in writing scientific papers and reports, designing experiments, analyzing data and maintaining data bases. Preference will be given to candidates with experience in working in teams, tropical aquaculture research, project management and work in developing countries.

Project Funding and Timeframe: This position is funded by the Australian Center for International Agricultural Research (ACIAR) and is for a period of four (4) years from January 1996, subject to ACIAR’s annual appropriation of funds.

Remuneration: Salary and allowances are within the range US$37,000 - 44,000 tax free, other benefits are competitive with those offered by similar international organizations and include removal expenses, subsidized on-site housing, vehicle, assisted education for children, home leave, health and life insurance and contributions to a retirement plan.

**RESEARCH ASSOCIATE (Algal Culture)**

Under the direction of the Senior Scientist, the successful applicant will be responsible for the maintenance of algal cultures and the production of large quantities of microalgae and diatoms for us in experiments to rear sea cucumbers and other tropical marine invertebrates.

Applicants should have tertiary qualifications in aquaculture, preferably M.S, extensive experience in all aspects of a large-scale laboratory for the culture of marine alga, and good organizational skills. They should also have demonstrated ability in writing reports, conducting experiments, computing and analysis of data. Experience in teamwork, working in remote locations and a driver’s license are also major considerations.

Remuneration: The salary for the position will be paid in Solomon Islands dollars (tax free) and will be in the range of SB$42,250 - $57,000 (approximately AUD$19,500 -$23,500) per annum. One bedroom self-contained accommodation will be provided at the Coastal Aquaculture Center at a rental of SB$105 per week. Other benefits include home leave, health and life insurance and contributions to a retirement plan.

Duty Station: All the above positions will be based at the Coastal Aquaculture Center located in the Solomon Islands.

ICLARM is an equal opportunity employer and welcomes all applications regardless of gender, nationality, ethnic origin, religious persuasion or political beliefs. Applications from women are especially encouraged.
Applications should reach Dr Johann Bell, Senior Scientist, ICLARM Coastal Aquaculture Center, PO Box 438, Honiara, Solomon Islands. Fax: (677) 29130. Tel: (677) 29255; e-mail: ICLARM@FFA.GOV.SB, by September 30, 1995.

NIAB
“Better Seeds: Better Crops”

Seed Specialist

NIAB has an international reputation for its expertise in testing varieties and seeds. Within NIAB, the Official Seed Testing Station (OSTS) provides services to government, the seed industry and farmers, together with training courses and consultancy for UK and overseas clients.

Applications are invited for a technical officer post. This will involve applying a knowledge of seed testing in managing work programmes, test development, quality systems, advice and lecturing, and initiating and working on research projects.

Applicants should have a good honours degree in a relevant science and at least two years work experience, preferably in seed physiology. Knowledge of quality management systems would be an advantage. The successful candidate will be well motivated with a methodical approach and good communication skills. Salary scale £13,155 to £19,100. Ref SV/A513. Closing date 15 September

Further details and an application form contact the Personnel Office, NIAB, Huntingdon Road, Cambridge, CB3 0LE, Tel (01223) 342234.

National Institute of Agricultural Botany
UNIVERSITY OF BRISTOL
Department of Obstetrics and Gynaecology

EMBRYOLOGIST

Required for the Centre for Reproductive Medicine, IVF Service. The work involves all aspects of the laboratory procedures of human in vitro fertilisation, including the analysis and preparation of semen and the handling and culture of oocytes and embryos and embryo preservation.

Applicants should be graduates in one of the biological sciences. Previous experience particularly with micro-injection and manipulation methods would be an advantage, although full training would be given to candidates without suitable experience including sessions in the University Seminology Laboratory and Regional Cytogenetics Centre.

The appointment would be made on the other related scale between £14,317 and £18,294, according to age and experience. A flexible approach to the working week is expected including participation in the weekend rota, for which a salary supplement of currently 20% is given. This will vary in line with rota requirements. The appointment would be for 1 year in the first instance.

Interviews are to be held week commencing 2 October 1995.

For informal enquiries contact Dr J. Williams on 0117 973 2562, ext 244 or Dr A McDermott on 01 17 959 5569.

For further details telephone 0117 925 6450 (answerphone after 5pm), or minicom 0117 928 8894, or write to the Personnel Office (EO), University of Bristol, Senate House, Bristol BS8 1TH, quoting reference D543.

Closing date: 14 September 1995.

of its students and society at large.
ICRISAT
COORDINATOR FOR DESERT MARGINS INITIATIVE
[Code WACA-08-P]

The International Crops Research Institute for the Semi-Arid Tropics (ICRISAT) is a nonprofit, autonomous, scientific research and training institute receiving support from donors through the Consultative Group for International Agricultural Research (CGIAR). The ICRISAT corporate office is at Patancheru, near Hyderabad, India, and there are regional centres and teams in Asia and Africa.

ICRISAT is the convener of an "Ecoregional Initiative on Sustainable Natural Resource Management Options to Arrest Land Degradation in the Desert Margins of Sub-Saharan Africa" and is seeking a Coordinator to assist in implementing a planned research program.

The overall objective of the Desert Margins Initiative is "to promote innovative and action-oriented dryland management research to arrest land degradation". The initiative aims at a coordinated research program in Sub-Saharan Africa that will initially involve six National Agricultural Research Systems: Botswana, Burkina Faso, Kenya, Mali, Namibia and Niger; six international agricultural research centres: the International Livestock Research Institute (ILRI), the International Center for Research in Agroforestry (ICRAF), the International Food Policy Research Institute (IFPRI), the International Center for Agricultural Research in the Dry Areas (ICARDA), the International Plant Genetic Resources Institute (IPGRI) and ICRISAT; the International Fertilizer Development Center (IFDC); three regional institutions: Comité Permanent Inter-Etat pour la Lutte contre la Sécheresse au Sahel (CILSS)/Institut du Sahel (INSAH), Southern African Center for Cooperation in Agriculture (SACCAR) and the Intergovernmental Authority on Drought and Development (IGADD); and a number of other research agencies. Active cooperation will play a pivotal role in this program and its related activities.

The Coordinator will be internationally recruited and will be an experienced scientist with international standing. He/she will plan and manage the work of the Coordination Unit and will be responsible to a Steering Committee and will also act as its ex-officio Member-Secretary. The Coordinator will maintain liaison with donors, and will report to a Donor Support Group. He/she will act as a catalyst to promote regional cooperation in the implementation of the initiative. The appointee will interact with Conveners of the member countries to ensure that research results are effectively synthesised and reported, will review the research, report to the Steering Committee and assist them in their work. The Coordinator and the Coordinating Unit will be administered by ICRISAT, and will be located at the ICRISAT Sahelian Center in Niamey, Niger. He/she will be administratively responsible to the ICRISAT Executive Director of the West and Central Africa region.

Applicants should have a Ph.D. degree or equivalent, in one or more of the fields of agronomy / agroclimatology / soil chemistry / soil physics / resource economics and extensive experience in natural resource management or a related field of research. Evidence of active, sustained research and professional standing in the field of specialisation is essential, as is experience in multi-disciplinary research team leadership. Candidates should be familiar with networking procedures, and have a good knowledge of agricultural and administrative systems in Africa. He/She should also have an established record of managerial and administrative responsibilities in the international arena, the ability to develop rapport with national and international peers, and the ability to be an effective spokesperson for collaborative research initiatives involving many stakeholders. Proficiency in oral and written English is required. Basic knowledge of French language is also essential.

The salary and benefit package, for a 2-year (renewable) contract will be competitive with that of other internationally recruited staff in the CGIAR Centers. ICRISAT is an equal opportunity employer, and is especially interested in increasing the participation of women on its staff. ICRISAT is responsive to the needs of dual career families. A Fact Sheet on employment possibilities for spouses is available on request. ICRISAT has a flexible approach to international appointments, and welcomes enquiries from persons interested in working with the Institute while on secondment.
Applications, referring to the code number, should reach the Executive Director, ICRISAT West and Central Africa Programs, BP 12404, Niamey, Niger (Phone: 227 722529/722626; Fax: 227 734329 or telex: 5046/5560 ICRISAT NI) by 30 September 1995. Applicants should include a statement on the special qualifications of the candidate for this position, a current Curriculum Vitae, the names and addresses (including fax/telex/e-mail) of three referees, and the date of availability.

SALISBURY HEALTHCARE NHS TRUST
Salisbury District Hospital Histopathology/Cytopathology Department

**MLSO 1 Cytoscreener**
Salary MLSO 1: £10,405 to £13,693
Cytoscreener: £8,627 to £11,253

A vacancy exists for an experienced MLSO 1/Cytoscreener in our busy integrated department. Situated in new laboratories the department has excellent facilities, is totally computerised and has full CPA accreditation. There is a rapidly expanding FNA service and approximately 16,000 gynaecological cytology requests. 1,500 non-gynaecological cytology plus 12,000 histology per annum.

Duties include primary screening of cervical smears, non gynaecological cytology prep work and screening. The candidate will have the opportunity to take an active role in the histopathology work of the department, with appropriate training.

Applicants must hold the Certificate of Competence in Cervical Cytology Screening or be state registered and have proven experience of gynaecological cytology.

For further details please phone Lucinda Johns, Specialty Manager, 01722 336262, ext 4111.

Part-time candidates will be considered.

For an application form and job description please write to the Personnel Department, Salisbury District Hospital, Wiltshire SP2 8BJ.

Closing date: Friday 22 September 1995.
Research Assistant
Functional Optoelectronic & Optomechanical Composite Materials

Applications are invited for a postdoctoral research assistant (RA1A) starting on 1st October 1995 to develop novel composite materials which combine the properties of one material in the form of particles with those of polymer matrix to create new functional properties. Specific objectives include the manufacture of piezo-luminescent and photo-strictive materials and novel infra-red to visible light conversion material.

Applicants should have experience in electronic materials processing, colloid chemistry, surface modification and polymer processing. Experience in making simple device structures and optical / electrical characterisation is essential.

Salary available will be on the RA1A scale in the range £13,941 - £16,191 p.a.

Applications including CV and particulars of two referees should be sent to The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ, tel: (01865) 273013 from whom further particulars can be obtained. Please quote "FO/OCM" in all correspondence. Closing date for applications is Friday 15th September 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.
Research Fellow in Inorganic Chemistry

This EPSRC-funded post is available from 1 December 1995 for a fixed period of one year in the first instance, with the possibility of extension to two years, to work in novel areas of molecular boron-cluster chemistry. The objectives are to discover and develop routes to macromolecular boron-containing cluster compounds in the 'macropolyhedral' category, and to explore the new chemistry revealed. Approaches will include fusion reactions of smaller clusters, together with aufbau and other reactions on preformed macropolyhedral substrates.

Applicants should be motivated scientists with a good Ph.D., preferably in synthetic inorganic or organometallic chemistry, or a related area. Experience in NMR spectroscopy would be an advantage.

Salary will be on the scale for Research Staff Grade 1A (£14,317 - £21,519) according to qualifications and relevant experience.

Application forms and further particulars may be obtained from Dr J D Kennedy, School of Chemistry, The University of Leeds, Leeds, LS2 9JT, tel: 0113 233 6414 fax: 0113 233 6565 email inc6jdk@gps.leeds.ac.uk quoting the reference number 43/70. Informal enquiries about the post may also be made to Dr Kennedy.

Closing date for applications: 15 October 1995.

DEPARTMENT OF BIOCHEMISTRY AND MOLECULAR BIOLOGY, AND THE CENTRE FOR PLANT BIOCHEMISTRY AND BIOTECHNOLOGY

Two Postdoctoral Fellows

The following BBSRC (ROPA)-funded posts are available immediately for a fixed period of three years to join research groups in this expanding interdisciplinary research centre.

Ref: 85/14 Molecular forming and control of parasites of livestock. The appointee will identify and clone further genes encoding proteins that disrupt life processes of nematode parasites. The technology to be developed will involve the expression of such genes in transgenic plants for use as animal feeds. The post will suit a molecular biologist with experience in gene cloning and/or protein engineering. Some experience of parasitology would also be of value. Informal enquiries about the post may be made to Professor Howard Atkinson tel: 01 13 233 2900.

Ref: 85/15 Galactose oxidase : exploring fungal pathogenesis and potential for novel biomass modification. This project will improve understanding of the major extracellular enzyme of several fungal (Fusarium spp.) crop pathogens. The appointee will investigate, by molecular and biochemical approaches, (a) the role of the enzyme in the infection process of plants: potential anti-fungal targets may be identified, (b) the use of the enzyme (or engineered variants) for novel biomass modification. The post will suit a molecular biologist or biochemist with experience of plants and/or fungi. Informal enquiries may be made to Dr Mike McPherson, tel: 01 13 233 2595.

Salary will be on the scale for Research Staff Grade 1A within the range £14,317 - £17,466 according to qualifications and relevant experience.

Application forms and further particulars may be obtained from Dr M J McPherson, Centre for Plant Biochemistry and Biotechnology, The University of Leeds, Leeds LS2 9JT, tel: 0113 233 2595 quoting the appropriate reference number.
Closing date for applications: 28 September 1995.

SCHOOL OF GEOGRAPHY AND LEEDS ENVIRONMENT CENTRE

Research Officer/Fellow

This EPSRC (ROPA)-funded post is available from 1 October 1995 for a fixed period of 1 year to work on a project concerned with catchment management and focused on the development of generic tools for catchment planning for water resource management. It will involve an assessment of the available water resource, water quality and the risks associated with the management of the catchment both in respect of the sensitivity of the catchment to change and the place of the catchment in the integrated river and water supply system.

Applicants should have either a Doctoral degree or a higher degree with relevant industrial experience. Qualifications and experience in environmental management, science or consultancy with a locus on water or catchment management, experience in the provision of reports, and good numeracy and communication skills are required. Diversity in research or industrial background would be an advantage.

Salary will be on the scale for Research Staff Grade 1A within the range £14,317 - £15,986 according to qualifications and relevant experience.

Application forms and further particulars may be obtained from Professor Adrian McDonald, School of Geography, The University of Leeds, Leeds LS2 9JT, tel: 0113 233 3344 quoting the reference number 32/97. Informal enquiries about the post may also be made to Professor McDonald.

Closing date for applications: 29 September 1995.

The University of Leeds promotes an Equal Opportunities Policy.

Promoting excellence in teaching, learning and research.

Marine Biologist

To assist with fieldwork; sorting & identification of marine benthic fauna; data handling. A strong interest in taxonomy is essential. The post, for six months in the first instance, would suit a recent graduate with relevant experience. Recent applicants will be considered and need not re-apply.

Applications (letter and CV) by 15 September to Unicomarine Ltd, 7 Diamond Centre, Works Road, Letchworth, Herts SG6 1LW.
RUGBY SCHOOL

**Physics Technician**
(Graduate or HNC/D)

Required asap to lead a small team supporting the work of six teachers.

Details from the Technical Manager on 017885435336 or write to him at the Science Schools, Barby Road, Rugby CV22 5DS.

Sanofi Research is the R & D division of a multi-national pharmaceutical company with Drug Safety Evaluation at centres in Europe and the United States. An excellent opportunity now exists for an enthusiastic scientist to join our Safety Evaluation Group as a Research Investigator in our modern, well equipped Research and Development Centre at Alnwick, Northumberland.

In this position, you will be principally involved in the design, conduct and reporting of a range of safety evaluation studies. Initially, you will actively participate in a training programme for your role as a Study Director. There will also be opportunities to contribute to multi-disciplinary research projects involved in the characterisation of mechanisms of toxicity and international project teams responsible for drug development.

We invite applications from graduates in a biological science with evidence of strong scientific abilities, preferably having recently completed a Ph.D or with a post graduate qualification in Toxicology.

We can offer an exciting and challenging environment, competitive salary and an attractive benefits package, including relocation assistance, where appropriate, to an area of natural beauty.

To apply, please send a detailed C.V. to:
Debbie Child, Personnel Assistant, Human Resources, Sanofi Research Division, Alnwick Research Centre, Willowburn Avenue, ALNWICK, Northumberland NE66 2JH.

Closing date for applications 22nd Sept 1995

SANOFI & WINTHROP
institute of food research

COLLOID SCIENTIST

A post-doctoral worker is required to join a team interested in the role of food structure and composition on the availability of nutrients for absorption by the gut. Although the post-holder will be a physical scientist, the emphasis of the post will be on working with a range of disciplines such as nutrition, microscopy, mathematical modelling and biochemistry. The project is funded until 30.9.98.

Applicants should have a Ph.D. or equivalent in the physical sciences. Experience in biological and colloid techniques would be preferred and a knowledge of multi-phase structure and characterisation, e.g. NMR, would be an advantage.

Starting salary will be in the range £13,951 - £16,235 p.a. depending on qualifications and experience.

Please apply using an application form obtainable from the Laboratory Personnel Officer, Institute of Food Research, Norwich Laboratory, Norwich Research Park, Colney, Norwich NR4 7UA or telephone (01603) 255348, quoting ref: N68/95. Closing date 13 September 1995.

FARMLAND ECOLOGY
Salary range £12 - 15,000 depending on qualifications and experience

Applications are invited for this post to be based at The Allerton Research and Educational Trust's Loddington Estate in Leicestershire. The post is for three years in the first instance with the possibility of further extension after this period. The appointee will assist in carrying out research on the interaction between agriculture and game/wildlife conservation. Applicants should possess a BSc or equivalent in an appropriate subject. Some experience of plant and arthropod identification would be an advantage.

Send written applications including CV and two referees to Dr N. D. Boatman, The Allerton Research and Educational Trust, Loddington House, Loddington, Leics LE7 9XE, from whom further details are available.

Closing date: 22 September 1995. Interviews are likely to be held in the week beginning 23 October.
Information Scientist

The Leatherhead Food RA is the foremost independent food research facility in Europe, providing research and information services to the food industry throughout the world.

A vacancy exists for an Information Scientist in the Legislation Department, who will have responsibilities for food legislation in certain European and overseas countries. Duties will include provision of awareness and interpretative services to Member Companies of the Research Association, participation in training for the food industry on technical food laws and their development and computerisation of legislative data.

Essential requirements are a 2(i) degree in Food Science or Food Technology or equivalent discipline and the ability to assimilate and interpret detailed requirements of foods laws, together with excellent communication and interpersonal skills. Experience of the food industry, in particular providing advice and training, and some foreign language ability will also be an advantage.

Please apply in writing, enclosing full CV to Mrs Joan Cox, Personnel Administrator, Leatherhead Food RA, Randalls Road, Leatherhead, Surrey KT22 7RY. Closing date for applications is 28 September 1995.

MSc Synthetic Organic Chemistry
New 2 year, evenings only modular MSc course. (Includes modern synthetic reagents/techniques (inc. CAD) and associated structural methods. Starts Sep 95. Further details on 0171 753 5125.

MSc Applied Neuroscience
joint MSc with London Guildhall University. Provides specialist training for those interested in broad field of neuroscience. Includes experimental project. Starts Jan 96. Further details on 0171 753 7023/7.

Faculty of Science, Computing and Engineering, 166 - 220 Holloway Road, London N7 8DB

Helping students to improve their futures

UNIVERSITY OF NORTH LONDON
**Occupational Hygienist**

MINISTRY OF DEFENCE  
Clyde Naval Base, Faslane

The Occupational Hygienist is a member of a group of specialist health, safety and environmental protection advisers located within the Clyde Naval Base. The Group provides comprehensive health, safety and environmental protection advice, surveys, training and audit services to civilian and service personnel throughout the Base and throughout the Scotland, Northern England and Northern Ireland Land Area.

**DUTIES:**  
Duties include the evaluation of a wide range of chemical and physical hazards associated with new and existing processes in a wide range of industrial areas, and the preparation and delivery of comprehensive advice and training on all aspects of the management of processes so that the MOD(N) can eliminate or reduce risks to health.

There will be opportunities for non-routine field work involving novel problems in the occupational environment, mostly concerning hazardous substances and noise.

The nature and quantity of work is such that the post-holder may frequently be expected to work unsupervised on a day-to-day basis.

**QUALIFICATIONS & EXPERIENCE:**  
The vacancy is at Higher Scientific Officer level which requires a minimum of 2 years' relevant postgraduate experience. The post-holder should have an Honours Degree in Occupational Hygiene, or alternatively, a Degree or equivalent in a Science or Engineering discipline together with either a British Examining Board in Occupational Hygiene (BEBOH) or postgraduate qualification in Occupational Hygiene.

A minimum of 2 years' practical experience of Occupational Hygiene in a complex environment would be useful. The ability to achieve high standards in all forms of communication with all levels of civilian and service management is required, as is the proven ability to work as part of a team.

**SALARY:**  
Starting salary will be £13,025 to £23,009 according to qualifications and experience.

DESG  
DEFENCE ENGINEERING AND SCIENCE GROUP

For an application form please write to: DESG Recruitment Office, Room 136, Pinesgate East, Lower Bristol Road, Bath, Avon, BA1 5AB, quoting reference DSQ1. Please note application forms will not be sent out after 13th September 1995 and completed forms must be returned by 27th September 1995.

The Ministry of Defence positively supports equal opportunity policies.

**POSITIVE ABOUT DISABLED PEOPLE**  
TECHNICAL AUTHOR

We are part of the multi-national Perkin-Elmer Corporation and are recognised as a world leader in the design and manufacture of advanced analytical instrumentation.

We are seeking an additional Technical Author to join the small team in our busy Technical Publications Department, which is responsible for producing a variety of documentation for our customers and Company service personnel.

Working as part of a project team, you will prepare information that will enable the user to install, operate and maintain analytical instruments, accessories and software. Reporting to the Technical Publications Manager, your duties will include:

• Planning the content and style of both manuals and on-line documentation
• Learning about the product by using it and liaising with other members of the project team
• Writing documentation that complies with the language, style and presentational quality defined by Company standards, and specifying illustrations.

Applicants must possess excellent all-round communication skills, a well-organised approach and a good eye for detail. Ideally, candidates should be educated to degree level or equivalent in a science or engineering discipline. Previous experience in a similar role would be advantageous.

For this position we offer a comprehensive salary and benefits package, including BUPA, free Life Assurance cover, a Company Pension scheme, 25 days holiday and a subsidised restaurant. All applicants must be prepared to work in a no-smoking environment. Please write with CV to: Mrs J J Davies, Human Resources Department, Perkin-Elmer Limited, Post Office Lane, Beaconsfield, Bucks HP9 1QA. Tel: 01494 679003. NO AGENCIES PLEASE

PERKIN ELMER
Cert No FM 11397

REGISTERED FIRM
The International Crops Research Institute for the Semi-Arid Tropics (ICRISAT) is a nonprofit, autonomous, scientific research and training institute with regional centres and teams in Asia and Africa. ICRISAT is recognised for its work on plant genetic resource collection, characterisation, conservation, and distribution and holds in trust major ex situ collections of its mandate crops and related species.

ICRISAT is seeking a Principal Germplasm Scientist and Director of the Genetic Resources Division.

The Germplasm Scientist will be located at the ICRISAT Asia Center, near Hyderabad, India, and will be expected to provide scientific and administrative leadership in genetic resources within ICRISAT and to advise the management of ICRISAT on related matters. The appointee will be active in expanding and strengthening research activities within the Genetic Resources Division, in expanding the scope of collaboration with NARS, and in representing the Institute within the CGIAR's system-wide Genetic Resources Program and other regional and global fora for genetic resources and biodiversity issues.

Close collaboration of the Genetic Resources Division, with the other Research Division of ICRISAT, the International Agricultural Research Centers, and the national agricultural research systems including community groups and industry, is essential. Current activities include collection, characterisation and evaluation, conservation and distribution of ICRISAT's mandate crops. Research will be enhanced in a range of areas including spatial analyses of biodiversity, molecular characterisation of germplasm, ex situ and in situ conservation methodologies, and development of core collections.

Applicants should have a Ph.D. degree or equivalent qualification in genetic resources or other fields closely related to germplasm conservation, management and utilisation. Experience in national, regional, or international genetic resources programs is essential. Knowledge and experience of one or more relevant topics, such as the use of molecular methods in characterisation of germplasm, GIS analyses of biodiversity, computer applications and database development for genetic resources and in situ conservation would be particularly advantageous. Proficiency in written and spoken English is essential, and a command of French desirable. Strong skills in communication and presentation are necessary.

The appointment will be initially for two years with the possibility of further contracts. An internationally competitive salary and benefits package will be provided. ICRISAT is an equal opportunity employer, and is especially interested in increasing the participation of women on its staff. ICRISAT is responsive to the needs of dual career couples. A Fact Sheet on employment possibility for spouses is available on request. ICRISAT has a flexible approach to international appointments and welcomes enquiries from persons interested in working at ICRISAT while on secondment. Applications, referring to the code number, may be submitted to Dr C. Renard, Chairperson of the Search Committee, ICRISAT Asia Center, Patancheru, Andhra Pradesh 502 324, India [phone: +91(40)596161; fax: +91(40)2 41239] by 30 September 1995. The application should include a current curriculum vitae, the names and addresses (including fax/telex/e-mail) of three referees, the date of availability, and a statement on the special qualifications of the candidate for this position.

DRUG INFORMATION EXECUTIVE

A Drug Information role, with the emphasis on customer service, backed by the resources of a market leader in pharmaceuticals and healthcare products.

Following restating of the Drug Information Department to Welwyn Garden City, we now have a vacancy in this area. This is an outstanding opportunity to work together with marketing and regulatory functions to provide drug information support for products in a defined therapeutic area.

The special qualities needed for this role are:
• Outstanding written and verbal communication skills, and 'at ease' working with personal computers.
• A degree in the life sciences.
• Either experienced within the Pharmaceutical Industry, or recently graduated with a strong desire to succeed.
• A wish to exercise your scientific knowledge in a commercial environment.

You will be required to:
• Work as an effective team member providing Drug Information services to one of the Roche business units (Promotional copy approval, technical training etc.)
• Liaise closely with Marketing, Regulatory and Drug Surveillance Departments to ensure continuing safe and effective use of the Company's products.
• Provide an efficient product enquiry answering service to internal and external customers.
• Act as Training Co-ordinator for the Department's medical computer system.

Rewards include a competitive salary and generous company benefits. But, equally important, it is an opportunity to develop your career in a role offering variety and genuine responsibility. To apply, please write enclosing full CV to: Mrs Jo Dempsey, Roche Products Ltd., PO Box 8, Welwyn Garden City, Herts. AL7 3AY.

Roche
CENTRAL RESEARCH

ANTIVIRALS RESEARCH SCIENTISTS

Pfizer Central Research is one of the most successful pharmaceutical R&D divisions in the world. Our discovery teams have made a major contribution to this success. We are now looking for scientists to participate in the discovery of novel drugs against a number of viral diseases. You will supervise the research of individuals at Sandwich and become involved in external collaborations in these disease areas.

These positions will require at least a Ph.D. or equivalent experience in molecular biology, mammalian cell culture, and/or protein manipulation, although post-doctoral training would be an advantage. Ideally, this expertise will have been gained through molecular virological studies.

Experience in the kinetic analysis of the interaction of enzymes with substrates and inhibitors would be an advantage for discovering novel antiviral drugs.

Scientific expertise and a track record in problem solving are essential for this position and you should be able to demonstrate leadership potential within a team of highly motivated individuals. Excellent communication skills, effective contribution of ideas to a multi-disciplined project effort and an ability to provide support to your colleagues will enable you to succeed.

In return for asking a lot of you, we offer the support to help you succeed, a highly competitive salary, attractive relocation package and all the benefits you'd expect from an industry leader.

If you would like to be part of our future success, please send a full CV to: Vincent Tuckwood, Personnel Adviser, Pfizer Central Research, Sandwich, Kent CT13 9NJ.

1991
AWARDED TO PFIZER CENTRAL RESEARCH DIVISION OF PFIZER LIMITED
Pfizer
European Forest Institute - EFI welcomes applications for the post of

DIRECTOR

The Institute
The European Forest Institute is an independent, non-governmental association with headquarters in Joensuu, Finland. The Institute conducts problem-oriented and multi-disciplinary forest research at the European level in order to serve the needs of policy-making and decision-making bodies in Europe, as well as those of its members. Its research priorities are forest sustainability; forestry and possible global climate change; structural changes in markets for forest products and services; policy analysis; and forest sector information services and research methodology.

The Institute currently has 53 member organisations from 29 European countries, with good prospects for further expansion. It thus provides an extensive research network throughout Europe. The Institute functions also as an information bank on the European forest and forest industry sector.

Basic funding for the Institute is provided by the Finnish Government but Funding from other public and private sources is becoming increasingly significant.

The Director
The Director of EFI will be a person possessing leadership abilities and a proven capacity for the management of scientific research in a complex international environment. The candidate should have international experience and a background relating to forestry research. A good command of English is a necessity; knowledge of other major European languages is an asset. The nationality of the candidate is not restricted to European countries.

As chief executive officer the Director will be responsible for the management of EFI, including formulation and implementation of the research programme and other activities. The Director will engage staff within the limits of the approved budget and is expected to maintain a stimulating international working atmosphere at the Institute. He reports to the EFI Conference, which meets annually, and to the Board, which usually meets three times a year.

Salary and Appointment
Salary and benefits are commensurate with international standards for a senior position of this nature. The appointee is expected to take up the post in October 1996. A fixed term appointment for three to five years is envisaged.

Further information and applications
Further information, including the selection criteria, is available from Director Birger Solberg or Deputy Director Risto Päivinen. Written applications should be concise, address the selection criteria, and include a curriculum vitae and the names and addresses of three referees. Applications are requested by 2 December 1995.

Contact Details
European Forest Institute, Torikatu 34, Fin-80100 Joensuu, Finland.
Tel: +358 73 252 020. Fax: +358 73 124 393. E-mail: solberg@efi.joensuu.fi.
THE CROWN ESTATE

Research Assistant in Marine Benthic Ecology

The Ministry of Agriculture, Fisheries and Food and the Crown Estate Office are looking for a Research Assistant to complete an important piece of research into the impact of marine aggregate extraction on benthic communities. The work will include the processing and analysis of samples of benthos collected from around the UK coast and laboratory investigation of the effects of suspended solids on benthic organisms.

You will be contributing to essential work to advise on and inform decisions regarding applications for licences to extract marine aggregates.

You should have a degree/HND or equivalent in marine biology and at least two years relevant experience. You should also have a keen interest in the study of benthic communities in relation to the physical environment and be able to demonstrate an aptitude for macrofauna identification.

You will be required to participate in surveys on MAFF research vessels for which a specialist medical will be required before appointment.

This is an 18 month appointment (which may be extended) based at the Fisheries Laboratory, Burnham on Crouch, Essex with a salary commensurate with qualifications and experience. Further details may be obtained from Mr T. Cotter at the Marine Estates, The Crown Estate, 16 Carlton House Terrace, London SW1Y 5AH. Telephone 0171 210 4263.

Applicants should supply their curriculum vitae from "A" levels onwards with relevant personal, academic information and appropriate experience. The closing date for application is 11 September 1995.

The Crown Estate is an Equal Opportunities Employer

The Humboldt-University of Berlin invites applications for two

Researcher/curator positions
at the Museum for Naturkunde, Institute of Systematic zoology

- Researcher/curator for the section "Marine Invertebrates": Mollusca, Tentaculata Chiffre AN/157/95.
- Researcher/curator for the section "Entomology": Ephemeroptera, Odonata, Plecoptera, Dictyoptera, Orthoptera, Dermaptera, Phasmatoptera, Neuropteroidea, Mecoptera Chiffre AN/155/95.

The salaries for both positions are classified as "A 13" according to German Public Service regulations.

The successful candidate will have
- to curate the collections in his or her area of responsibility according to modern standards
- to conduct independent research in systematics in at least one of the taxonomic groups for which he or she is responsible
- to participate in academic teaching
- to take on editorial tasks in one of the Museum's scientific journals.

In addition to a Ph.D., applicants are expected to have
- experience pertinent to the curation of natural history collections
- international scientific contacts in the fields of systematics, taxonomy, and phylogeny
- proven capability to attract external funding.

Proficiency in German is not mandatory, yet desirable.

Humboldt-Universität is an equal opportunity employer.

Please direct applications (including chiffre of position in question) to:
Humboldt-Universität zu Berlin, Referat Personal Wirtschaft Unter den Linden 6, 10099 Berlin.

Deadline for applications is 3 weeks.
Ph.D. Studentship

Applications are invited for a 3 year Ph.D. studentship from October 1995 in Physics Applied to Medicine to apply magnetic resonance imaging with high performance gradients to measure perfusion, diffusion and other tissue properties.

Candidates should have a 1st or 2.1 Honours degree in Physics or related subjects. A stipend will be paid of £8,000 in the first year, rising to £9,000. Further information can be obtained from Dr M O Leach (tel: 0181 642 6011 ext 3338, fax: 0181 643 3812). Please send a CV and details of two university referees to the Student Registrar, The Institute of Cancer Research, McElwain Laboratories, 15 Cotswold Road, Sutton, Surrey SM2 5NG. Quote reference SA7/95.

The Institute operates a no smoking policy.

Research Technician

An enthusiastic recent science graduate is required to join a group looking at the immunity of breast cancer patients to carbohydrate antigens. The work will include basic antibody measurements and biochemical purification of tumour and microbial antigens with a view to studying the effects of geographical and environmental factors on the immune system in breast cancer patients.

The work will be carried out in the department of surgery at University College London Medical School and is funded for an initial period of 12 months by Action against Breast Cancer, the salary will be £12,133 (including London Allowance).

Applications with curriculum vitae should reach Dr K. Bodman by 22 September 1995. Further particulars can be obtained by ringing Dr Bodman on 0171 636 8333, ext 3193.
We provide the innovation and development. Can you provide the commitment!

Scherer DDS Ltd, part of the international R. P. Scherer Corporation, is a rapidly expanding manufacturer and developer of innovative and technically advanced drug delivery systems. At our purpose built facility in Clydebank, Scotland, we are developing Pulsincap™, a capsule product for the pharmaceutical industry that will offer unique advantages in improving the therapeutic effectiveness of a wide range of drugs. The capsule relies on patented polyethylene glycol polymerisation technology for its delivery mechanism. We have several vacancies for experienced graduate scientists.

Formulation Development
Two experienced scientists are required to develop products for the Pulsincap™ drug delivery system. To successfully conduct customer feasibility and development programmes, an excellent academic background in Pharmaceutical Science or Chemistry, as well as proven industrial experience, will be required. Excellent communication and presentational skills would be advantageous. The more senior of these vacancies will probably require a Ph.D. and be expected to assume project responsibilities within 6 months.

Technical Development
The polymer processing group are also looking for two experienced scientists. A background of supervisory experience in a batch manufacturing process (e.g. fine chemicals, special polymers) which operates to GMP is required for one position, together with demonstrable team building and communication skills. The other position will require a candidate with some industrial experience and a higher degree (Ph.D.) to focus on fundamental development of the polymer manufacturing process. The confidence and broad technical knowledge to work across several scientific disciplines is required, and experience of process validation would be a distinct advantage.

Interested in joining a young and progressing team? If you wish to be considered for any of these opportunities then please forward a comprehensive CV together with salary expectation to:
The Personnel Manager, Scherer DDS Ltd, 10 South Avenue, Clydebank Business Park, Clydebank, G81 2LF to be received by Wednesday, 13 September 1995.

SCHERER DDS LTD
Pioneering Drug Delivery Systems
De La Rue

Thomas De La Rue Limited is the world market leader in the production of security paper printed documents. The Research & Development Department is an essential part of the Company and is there to maintain its market leadership in innovative new products and processes for banknotes and other security documents.

The following vacancies are currently available:

**Project Scientist**
The successful applicant will play a key role in the development of new security print products, passports, ID cards and plastic cards. He or she will lead project teams liaising with manufacturing and sales after gaining the necessary experience.

A Ph.D. or good honours degree in Chemistry or Material Science will be required together with some industrial experience, preferably in areas of plastics, adhesives, polymers, foils or surface coatings. Experience in thermal analysis would be an advantage.

**Scientist**
The successful applicant will be involved in the development of new security print products, passports, ID cards and plastic cards and the improvement of existing products. He or she will liaise with manufacturing and sales personnel.

A Degree in Chemistry or Material Science will be required together with some industrial experience, preferably in areas of plastics, adhesives, polymers, foils or surface coatings.

**Scientist**
The successful applicant will work on the development of innovative print designs and products, designed to enhance security. The preparation of demonstration material for other functions will also be necessary. Education to degree level, BTEC or equivalent in Printing or Graphic Arts, is envisaged. This appointment would suit a newly qualified person. A practical approach with creative and artistic ability is required.

Please send your Curriculum Vitae and covering letter by 30 September 1995 to the Divisional Personnel Controller at:

FELLOWSHIP OPPORTUNITIES
IN PORTUGAL
EUROPEAN PROGRAMME
"TMR - TRAINING AND MOBILITY OF RESEARCHERS"

Young Post-doc or Post-graduate students seeking opportunities for fellowships in Portugal, under the EU programme "TMR - TRAINING AND MOBILITY OF RESEARCHERS" should contact JNICT (Dra. Ana Paula Cruz), Fax: 351-1-6007481 indicating one of the seven thematic areas of the Programme (Mathematics & Information Technologies, Physics, Chemistry, Life Sciences Engineering Sciences, Earth Sciences, Economy/Management / Human & Social Sciences) and their particular research interest. Deadline for the next calls for proposals (to be submitted to the European Commission in Brussels): 15 September and 15 December 1995.
IMPERIAL COLLEGE
(University of London)
TECHNICIAN URGENTLY REQUIRED

An excellent opportunity has arisen for a technician to work in the undergraduate teaching laboratories of this leading College.

The successful applicant will have a BTEC/ONC in science (or equivalent).

Salary will be in the range £12,133 - £14,003 inclusive of London Weighting and pending a pay award currently under negotiation.

Application forms and further particulars are available from Miss J. Stephenson, Department of Chemistry, Imperial College, London SW7 2AZ.

Closing date for applications is Friday 22 September 1995.

The College is striving towards equal opportunities.

RENEWABLE ENERGY ADVICE CENTRE

Head of Centre
to £20,000 (+ car allowance)

The National Energy Foundation (Regd Charity No 298951), with support from the European Commission, is to establish the South Midlands Renewable - Energy Advice Centre. Based in the Foundation's Milton Keynes offices, the centre will encourage the development of renewable energy in the region. Applications are invited for the position of Head of Centre. Knowledge and experience of a range of RE technologies is required, together with the ability to promote RE and advise those interested in developing schemes. The post will be for an initial contract of three years.

Handwritten letters of application, together with a CV, should be sent by 15 September, quoting ref: RE1/NS to: The National Energy Foundation, 3 Benbow Court, Shenley Church End. Milton Keynes MK5 6JG

Applications are invited for the post of Graduate Research Assistant to work on a 2 year MRC project grant to study the opportunistic fungal pathogen *Pneumocystis carinii*, an important cause of death in HIV infected individuals, under the supervision of Dr Ann Wakefield. The research project will involve the use of molecular genetic techniques to study the epidemiology of *P. carinii* infection, including the acquisition and transmission of the disease. The post is available now. Applicants should have a degree in biochemistry, molecular biology or a related subject. Practical experience in molecular biological techniques would be an advantage. For further particulars please contact Dr Ann Wakefield on email: wakefield@molbiol.ox.ac.uk. Applications (2 copies) by letter and full CV including the names, addresses and telephone numbers of two referees (quoting reference AW) to be sent to Mr D A Harper, Departmental Administrator, University Department of Paediatrics, Level 4, John Radcliffe Hospital, Oxford OX3 9DU (Tel: 01865 221070). Closing date: 22 September 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

Imperial College
OF SCIENCE, TECHNOLOGY AND MEDICINE
University of London
St Mary's Hospital Medical School

**Research Assistant** (Grade 1B)

required for a 3 year project to work on aspects of pathogenesis of *Neisseria gonorrhoeae*, using bacterial genetics and cell biology to study the role of putative virulence factors. A postgraduate with a recent life sciences degree would be suitable.

Applications in the form of a full C.V. with names and addresses of 2 referees and a covering letter, should be sent to Dr. Brian Robertson, Department of Medical Microbiology, Wright Fleming Institute, St. Mary's Hospital Medical School, London W2 1PG.

Closing date: 20 September 1995.

The College is striving towards Equal Opportunities.

Nantwich, Cheshire CW5 6DF Tel: (01270) 625131. Fax: (01270) 625665
COURSES & EVENTS
THE UNIVERSITY OF MANCHESTER

MRes in Surface Science

A one-year Master of Research course is offered in the area of surface science. The course focuses on the fundamental chemistry which underpins the large range of processes which occur at surfaces, eg, catalysts, corrosion, etc. The MRes philosophy also provides the student with the ability to design and plan research as an individual or part of a team. It is therefore envisaged that on completion of the course candidates will pursue careers in the industrial or academic research area.

For admission to the course you must hold at least a 2.1 honours degree in chemistry, physics, materials science, engineering or a related subject. The course may, in part, be tailored to suit your particular background and aspirations.

Three EPSRC studentships, for which usually only UK and EU candidates are eligible, are still available at Manchester for the 1995/96 session (course starts 18 September). These cover fees and provide a maintenance allowance of £5,400 per annum.

For further information contact either Dr P. L. Wincott or Dr G. Thornton, telephone 0161 275 4643/4642, fax 0161 275 4971, email plw@ssci.liv.ac.uk or geoff@ssci.liv.ac.uk, Department of Chemistry, The University of Manchester, Manchester M13 9PL.

- Behavioural Neuroscience
- Neurotransmitters
- Neuropharmacology
- Membranes
- Visual Systems
- Receptors
- Neurophysiology
- Degenerative disorders
- Brain models
- Techniques and Statistics
- Neuroimmunology

MSc training will also include a research project.

Applications are invited from medical and science graduates.

For further details, fees, etc, please contact: Jackie Broadey, Department of Neuroscience, Institute of Psychiatry, De Crespigny Park, London SE5 8AF. Telephone:0171-919-3282, Fax: 0171-277-1390.

UNIVERSITY OF LONDON
MSc POSTGRADUATE DIPLOMA IN WASTE MANAGEMENT
(FULL-TIME/PART-TIME)
STARTING IN JANUARY 1996

The University seeks applicants for this well established course, designed both for those wishing to enter the industry and those seeking further training. There are 18 full-time places funded by the Key Technology Training Initiative available to graduates who have been unemployed since the 17th July 1995 or longer. Flexible part-time study arrangements are available for those already working in waste management seeking to enhance their career opportunities through higher level study.

For further information and application form contact Elaine Lambert or Chris Jordan, Department of Environmental Management. University of Central Lancashire Preston PR1 2HE Tel: 01772 893492 Fax: 01772 892903 Closing date for applications: 31st October 1995

UNIVERSITY OF CENTRAL LANCASHIRE

PROMOTING EXCELLENCE AND OPPORTUNITY IN EDUCATION AND RESEARCH
UNIVERSITY OF GLASGOW
Department of Veterinary Parasitology

POSTDOCTORAL RESEARCH ASSISTANT
Development of a PCR-based assay for the identification of equine cyathostome species

This post, funded by the Horserace Betting Levy Board, is available from January 1996 for a three year period. You will join a group studying molecular phylogeny and diagnosis of cyathostomes, the most common and pathogenic nematodes found in horses. The project will be based in a large active laboratory studying various aspects of nematode molecular biology and immunology. The Department of Veterinary Parasitology is five star-rated, has a strong research base and is closely linked with the Wellcome Unit of Molecular Parasitology. Experience in molecular biological techniques such as PCR, subcloning and sequencing is essential, however, a background in parasitology is not necessary. Ref: 8918/NS.

Starting salary: RA1A £15,566.

For informal enquiries please contact Dr Jacqui McKeand, tel 0141 330 5604 or email gvma09@udcf.gla.ac.uk or Prof Sandy Love, tel 0141 330 5736 or email gvma09@udcf.gla.ac.uk

Department of Physics and Astronomy

RESEARCH ASSISTANT POSITION IN MEDICAL PHYSICS

Applications are invited from postdoctoral or similarly experienced physicists or electrical engineers for a Research Assistant position to develop microwave computational models of human body regions coupled to radiometric antennas. This modelling will be used to assist the interpretation of microwave thermographic data for the detection and diagnosis of disease. You should have a good understanding of high-frequency fields, experience of computational modelling, and a strong interest in developing a new clinical technique. The work will involve the developing of the computational techniques and software, the testing of the modelling, and working with other members of the Microwave Techniques Group who are measuring tissue properties, microwave radiometer behaviour, and assisting in clinical assessments.

The appointment will be for two years with an initial salary of up to £15,986 pa (under review).

Applicants should send a full cv and names and addresses of two referees to: Dr D. V. Land, Department of Physics and Astronomy, University of Glasgow, Glasgow G12 8QQ, UK. Ref: 8916/NS.

Closing date for applications for above posts: 2 November 1995.

Department of Chemistry

POSTDOCTORAL POSITION: THE MAJOR MEMBRANE PROTEINS OF MYELIN

This post is funded by MRC, to improve the existing protocol for the extraction and purification of the two major components of bovine myelin. The focus of the project is to initiate crystallisation trials with the ultimate goal of determining the 3-dimensional structure of the transmembrane component, PLP, and the extrinsic MBP. Experience in the purification of proteins is essential and previous work with membrane proteins would be advantageous.

The position is available for one year with the possibility of an extension. Salary will be up to £15,986 per annum on the Grade 1A scale.
Informal enquiries to Dr Andy Freer (tel: 0141 330 5945; e-mail: andy@chem.gla.ac.uk).

Applications including two copies of cv and the names and addresses of two referees should be sent to Dr A. A. Freer, Protein Crystallography Laboratory, Chemistry Department, University of Glasgow G12 8QQ. Closing date: 12 October 1995. Ref: 8902/NS.

Protein Crystallography Laboratory, Department of Chemistry, and Division of Biochemistry and Molecular Biology, IBLS

RESEARCH ASSISTANT IN STRUCTURAL STUDIES ON BACTERIAL LIGHT-HARVESTING COMPLEXES

This postdoctoral research position is in an active group working on the crystallisation and structure determination of integral membrane antenna complexes from photosynthetic bacteria. A protein chemist / molecular biologist is sought and experience in protein purification and crystallisation would be advantageous.

The post will be funded within the Research Assistant 1A scale (£14,317 - £18,294) and is available now for a period of three years.

Applications including a cv and the names of two referees should be sent to Prof R. J. Cogdell, IBLS, Division of Biochemistry and Molecular Biology, University of Glasgow, Glasgow G12 8QQ, by 27th October 1995. Further details can be obtained from Professor Cogdell (0141 330 4232, e-mail: gbtal8@udcf.gla.ac.uk) or Professor Isaacs (0141 330 5954, e-mail: neil@chem.gla.ac.uk). Ref: 8912/NS. An equal opportunities employer.

The University of Glasgow is an exempt Charity dedicated to excellence in teaching and research.
UNIVERSITY OF OXFORD
Nuffield Department of Orthopaedic Surgery
MRC Bone Research Laboratory

Research Technician

Applications are invited from graduates in Molecular Biology to assist in research involving bone cell differentiation and human bone diseases. Candidates with 1-2 years experience of basic techniques of molecular biology are required.

This position has tenure until 31 Dec 1997 in the first instance and a salary within the Whitley Council Medical Laboratory Scientific Officer 1 scale (£10,405 - £13,693) depending on qualifications and experience.

Applicants should send as soon as possible a full curriculum vitae including names, addresses and telephone numbers of two professional referees to The Administrator, MRC Bone Research Laboratory, Nuffield Orthopaedic Centre, Oxford OX3 7LD (01865 227657). Closing date 19 October 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

PLANT CELL PHYSIOLOGIST

A graduate or postdoctoral scientist is required to undertake a study of ion homeostasis in cultured barley cells exposed to salinity stress and potassium deficiency. Experience of plant tissue culture and/or molecular biology an advantage. The post is available until 30 October 1996. Salary range £11,929 - £20,665 or £13,951 - £24,174 depending on qualifications and experience.

Apply by application form only, available with further particulars from Personnel Department, IACR-Rothamsted, Harpenden, Herts, AL5 2JQ. Ref: 222. Closing date 26 October 1995.

**CLINICAL SUPPLIES COORDINATOR**  
TEMPORARY POSITION  
SANDWICH, KENT

We're looking for a Pharmacist or Pharmaceutical Scientist to join a Clinical Trials Supplies Coordination team for a period of one to two years. We need you to help us handle a heavy workload caused by Pfizer's very full development portfolio.

The role involves planning, coordination and liaison in the interface between the people who make and assemble trials supplies (including external contractors), and our customers who include Pfizer Clinical Groups, CRO's and overseas affiliates.

You'll need at least a couple of years' experience of Clinical Supplies packaging, together with top class interpersonal and administrative skills - we're looking for someone energetic and enthusiastic, with a winning way with people, detail minded but not pedantic, and computer literate.

We offer plenty of benefits - competitive salary, flexible hours, subsidised restaurant, our own sports and social facilities too - in fact, all that you would expect of one of the world's leading companies.

Please send a CV to Mr. S Rhodes, Senior Personnel Adviser, Research Personnel, Pfizer Central Research, Ramsgate Road, Sandwich, Kent CT13 9NJ. Fax 01304 618749.

1991  
AWARDED TO CENTRAL RESEARCH DIVISION OF PFIZER LIMITED

Pfizer

QUALITY ASSURANCE SCIENTIST
RESEARCH AND DEVELOPMENT

Abbott is a leading healthcare organisation with a turnover in excess of $9 billion and a large market presence in antibiotic, cardiovascular and anaesthesia fields.

The International Development Centre (IDC, located at Queenborough in Kent plays an important role in the formulation development of new products and provides clinical supplies world-wide.

We wish to recruit a graduate scientist or qualified Pharmacist to play a key role in our Quality Assurance group which has responsibility for assuring that clinical trial materials and pharmaceutical development data meet European and United States GMP/GLP and Regulatory standards.

The successful candidate is likely to have previous experience of the pharmaceutical industry and/or quality assurance. You should be able to demonstrate attention to detail, initiative and good communication skills to facilitate liaison with staff in development, packaging and analytical functions.

Abbott culture produces an environment where the emphasis is on flexibility and personal accountability. This will suit individuals who are looking to develop their career and be recognised for their achievements.

Salaries are competitive and will reflect ability and experience. The remuneration package includes 25 days' annual leave, contributory pension, flexible working hours, private medical insurance and relocation assistance where appropriate.

For further details write to or telephone Diana Wiles, Personnel Department, Abbott Laboratories Ltd, Queenborough, Kent ME11 5EL.
Tel: (01795) 580099.

Abbott Laboratories Limited
1994
The National Rivers Authority is the strongest and most effective environmental regulator in Europe and will form a key part of the Environmental Protection Agency. Dedicated to safeguarding and improving the water environment in England and Wales, the Authority is widely respected in the UK and the European Community.

The Ecology and Recreation Department in the Southern Yorkshire area is now looking for an Ecologist, to be based at the Willerby Office in Hull for an initial period of 12 months.

Your role will be to plan and undertake both routine and investigative biological surveys in marine, estuarine and freshwater environments. You will also provide ecological advice both internally and externally and input into the planning and consenting process.

You should have a degree in an Environmental Science with two or three years experience of both biological and more general ecological survey work in marine, estuarine and freshwater environments. You will also need a full, clean driving licence.

To take advantage of this opportunity, please write or telephone for an application form quoting Ref: S014 to Lorraine Gillett, Ecology and Recreation, National Rivers Authority, Northumbria & Yorkshire Region, Olympia House, Gelderd Road, Leeds LS12 6DD. Tel: 0113 231 2112.

Closing date for receipt of applications is 19 October 1995.

The NRA is committed to achieving Equal Opportunities.
ENGLISH NATURE

Quaternary Geologist/Geomorphologist

English Nature is the Government body which promotes the conservation of wildlife and natural features of England, employing over 700 people throughout the country.

Permanent appointment

Higher Scientific Officer

English Nature is seeking a Quaternary Geologist/Geomorphologist to provide site conservation advice and casework support. The post is based at Peterborough within the Environmental Impacts Team.

You will need to:
• Possess an excellent specialist knowledge and understanding of British Quaternary Geology/Geomorphology
• Be dynamic, enthusiastic and highly motivated
• Possess excellent communication skills
• Prioritise and plan work strategically
• Evaluate and provide innovative solutions to complex site and policy issues
• Deliver targets by specified deadlines to quality standards
• Be an effective and efficient team worker
• Maintain and develop a scientific profile

Previous experience of conservation advisory work would be advantageous.

Qualifications: Candidates must have a First or Second Class Honours Degree in a scientific subject with a sound knowledge of British Quaternary Geologic (Stratigraphy)/Geomorphology. A postgraduate qualification in either of these subject areas or a minimum of two years' relevant postgraduate experience is also required. A current UK driving licence is essential.

Salary: In the range £13,025 to £18,185, depending upon qualifications and experience. Additionally, there are performance-related increments.

This post is permanent and pensionable. For an application form and further details, please contact Personnel Services, English Nature, Northminster House, Peterborough PE1 1UA. Telephone 01733 318241, quoting reference number E23-10-15.

The closing date for completed application forms is 26 October 1995. Interviews will be held in the week commencing 20 November 1995. We have a no-smoking policy within our Peterborough Headquarters.

English Nature is working towards Equal Opportunities, and welcomes applications from all members of society.

MICROBIOLOGIST

Thornton & Ross Ltd enjoy an excellent reputation as a leading manufacturer of pharmaceuticals and household disinfectants.

As assistant Microbiologist you will be involved in routine quality control and development projects. An interest in hygiene would be advantageous. The successful applicant will be qualified to degree level.

Students qualifying this summer may apply.

Please send a detailed CV to Carrine Jones. Closing date: 19th October, 1995.

THORNTON & ROSS LTD PHARMACEUTICAL MANUFACTURERS
LINTHWAITE LABORATORIES HUDDERSFIELD HD7 6QH
INSTITUTE for ANIMAL HEALTH

MOLECULAR BIOLOGISTS
COMPTON LABORATORY £11,929 TO £16,183

The Institute has vacancies for graduates with experience in molecular biology techniques and basic computing.

Post I Ref: 05/0073. For 3 years to assist in the identification and analysis of yeast artificial chromosome (YAC) clones.

Post II Ref: 05/0091. For 2 years to assist with research into respiratory disease in commercial chicken flocks in the UK.

Post III Ref: 05/0090. Maternity cover for 6 - 9 months to characterise the major histocompatibility Class I genes in horses using biochemical and recombinant DNA techniques. Experience in tissue culture an advantage.

Post IV Ref: 05/0092. For 6 months initially to undertake the cloning and sequencing of the extra-chromosomal DNA of *Eimeria tenella*.

PIRBRIGHT LABORATORY NR. GUILDFORD

Post V Ref: 05P/0021. For 26 months to provide technical support for research into the physical and antigenic structure of viruses.

Application forms and further details from the Personnel Officer, Institute for Animal Health, Compton, Newbury, Berkshire RG20 7NN quoting the appropriate reference number. Closing date for receipt of applications 20 October 1995.

An Equal Opportunities Employer.

Good science, useful science.
Protecting the environment… Developing your career

A leading organisation in analysis and environmental consultancy and part of the Southern Water Group of Companies, Southern Science has an outstanding reputation for quality and innovation. Providers of sophisticated consultancy and laboratory services, our environment is rewarding, technically challenging and offers first class openings for career development.

Manager - Contaminated Land
Crawley, West Sussex £neg
This high profile role carries full responsibility for co-ordinating the development of laboratory and consultancy services, as well as marketing this key area of the business.

With a first degree in Chemistry, Environmental Science or other relevant discipline, you must have at least 10 years experience in contaminated land investigation, evaluation and reporting, preferably in a consultancy environment.

Senior Oceanographer / Hydrographer
Nr Winchester, Hampshire £neg.
With full responsibility for the development of this key area of the business, you will use your extensive experience and well developed contacts to increase the diversity of our client base maximising our profile on an international basis.
5-10 years experience will have given you a sound understanding of Marine Science and scientific surveys and will be complemented by a degree level education in a Scientific / Oceanographic subject.

Marine Environmental Scientists
Brighton, East Sussex £neg.
You will be responsible for co-ordinating and project managing environmental aspects of wastewater treatment improvement schemes as well as dealing with a wide range of enquiries. Degree qualified (or equivalent) in Environmental Science, Oceanography or related discipline, you will have at least 2-5 years relevant working experience where you have gained a particular strength in two or more of the following areas, with an appreciation of them all: “Oceanography”, “Mathematical Modelling”, “Water quality”, “Marine Ecology”.

Scientist - Metals/Chromatography
Chatham, Kent £10,000 - £17,000
Reporting to the Principal Scientist Special Analysis, you will be using your extensive experience of metals/chromatography analysis to continue the development of methodology and increase our profile at home and abroad.
Probably a graduate chemist, you will have a minimum of 2 years experience of Saturn 3 GC/MS or Enviro I ICAP. A sound knowledge and understanding of waste, soil and contaminated land analysis would be a distinct advantage.

Assistant Scientist
Chatham, Kent £9,000 - £13,000
Reporting to a Senior Scientist, you will be responsible for analysis, maintaining NAMAS accreditation standards, dealing with enquiries and assisting other members of your team.
You will probably be a graduate chemist, perhaps with a water or soil background.

Scientist - Chromatography
Nr Winchester, Hampshire £10,000 - £17,000
Reporting to a Senior Scientist, you will be responsible for low level pesticide analyses, possibly involving some development work.
A minimum of 2 years relevant experience will have included the use of the following techniques: GC, GC-MS, HPLC, HPLC-Diode Array and will be combined with a degree in chemistry.
We offer attractive salaries and a comprehensive range of benefits including generous holiday entitlement, contributory pension scheme, flexible working hours and free life and personal accident insurance.

If you believe that you possess the qualities we seek, please send your full CV to: Helen Bowman, Personnel Manager, Premium House, Worthing, West Sussex BN11 2EN. Closing date: 20th October 1995.

SOUTHERN SCIENCE
Southern Science is a member of the Southern Water group of companies. [1998-010 (1995) : 75]
Research and Development Executives
£ Attractive plus Car

Cussons International is a wholly owned subsidiary of Paterson Zochonis plc, a British based group with a strong brand portfolio, including Imperial Leather, Pearl, 1001 and Morning Fresh. Based near to Stockport, the Research and Development department provides sites in the UK, Africa, Poland, Greece, Canada, Australia and the Far East with an innovative and comprehensive NPD programme.

Exciting opportunities exist for specialists in:

COSMETICS and/or TOILETRIES
Managing a team of Chemists he/she will be responsible for all NPD aspects for Cussons Liquid Cleansing products, examples of which are the brand leaders Carex and Imperial Leather Shower.

Applicants must be educated to degree level in a Science and must have at least five years' experience in Toiletries and/or Cosmetics in an FMCG environment. In addition, you must be able to demonstrate a successful track record in NPD and first hand experience of working in multi-disciplinary terms.

SKIN SCIENCE
This new role will provide "in-depth" scientific knowledge and will be expected to advise the business on all aspects of marketed skin care products.

Applicants must have a minimum of five years' experience of skin physiology in a scientific environment, either in the cosmetics or toiletries industry or in consultancy or an academic organisation. He/she must be able to demonstrate an understanding of the application of skin physiology to commercial cosmetic NPD and be conversant with the latest trends in the Cosmetics/Toiletries industry.

A BSc (Hons) in a scientific or medical discipline is a pre-requisite, whilst further research studies would be an advantage. Specific knowledge of all aspects of product/skin interactions is essential.

Both positions will offer the opportunity to make significant contributions to our expanding brand portfolio in a world-wide market place and offer opportunities for overseas travel.

If you are interested in applying for either position, please send brief career details including current salary to John Silverwood, Senior Personnel Executive at Cussons House, Bird Hall Lane, Stockport SK3 0XN. Alternatively, application forms and further details may be obtained by ringing 0161 491 8148.

CUSSONS.
Applications are invited for the position of research assistant, to be appointed on the postdoctoral scale (RA1A), starting on 1st January 1996 or sooner if possible. The project is funded by the Realising Our Potential Award (ROPA) scheme, and will be of two years duration. The successful applicant will join a team developing a new type of coriolis mass flow meter using advanced digital technology. The position will involve carrying out a substantial experimental programme to model the response of the flow meter to a range of operating conditions and fault modes, and to provide input into the flow meter design process.

Applicants should have a background in engineering, with some knowledge of fluid mechanics. Experience with industrial flow meters and/or extensive experimental work on flow-rigs will be welcomed.

Salary will be in the RA1A scale in the range £14,317 - £21,519 p.a.

Applications, including CV and particulars of two referees should be sent to The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford, OX1 3PJ. Tel: 01865-273013, from whom further particulars can be obtained. Please quote "RA/MPH" in all correspondence. Closing date for applications is Friday 20th October 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

KUWAIT INSTITUTE FOR SCIENTIFIC RESEARCH

Kuwait Institute for Scientific Research (KISR) is a nonprofit organisation actively engaged in applied research in the fields of environmental and earth sciences; water resources; food resources; engineering; petroleum, petrochemicals and materials and techno-economics.

KISR has a vacancy for a:

SENIOR AQUACULTURIST

Major Duties:
• Planning, implementing and supervising aquaculture programs.
• Conducting research projects on Aquaculture, Marine and Tilapia aspects.
• Coordinating Aquaculture R&D with various clients in Kuwait.
• Assisting and training junior researchers in formulating and implementing research ideas.

Qualifications Required:
Applicants should have a Ph.D. degree in Aquaculture with 20 years of experience.

KISR offers attractive tax free salaries commensurate with qualifications and experience and generous benefits that include: gratuity, free furnished and air-conditioned accommodation, school tuition fees for children, six weeks annual paid vacation, air tickets, free medical care and life insurance.

Interested applicants are requested to send their Curriculum Vitae with supporting information not later than one month from the date of this publication.

Ph.D. Research Studentships

Applications are invited from science/engineering graduates with 2.1 degree or MSc for two three-year Ph.D. studentships at Imperial College. Maintenance allowance payable, plus home/EC tuition fees.

1. Pore-scale modelling of petrophysical characteristics of hydrocarbon reservoir rocks: Dr X D Jing
2. The statistical representation of permeability and relative permeability on the grid block scale: Dr A H Muggeridge

CV and application letter should be sent to Jenny Lewis, Petroleum Engineering Coordinator, Department of Earth Resources Engineering, Imperial College, London SW7 2BP. Tel: 0171 594 7338. Fax: /7444. E-mail: j.lewis@ic.ac.uk by 29th October 1995. Further information is available on request.

The College is striving towards Equal Opportunities

At the leading edge of research, innovation and learning [1998-014 (1995) : 76]
Pathologist

Department of Drug Safety

Applications are invited for an experienced pathologist to head our Pathology Department within the Department of Drug Safety in Health Care Development. The Department of Drug Safety is situated in a new complex some 15 km west of Copenhagen and consists of 30 persons within toxicology, pathology and safety pharmacology. Drug Safety participates in risk assessments of potential new drugs and is responsible for generating the preclinical safety documentation by carrying out investigations in cells, organ systems, and animals.

The pathology group's main task is to carry out histopathological diagnostics as well as participation in elucidation of mechanisms behind toxic and safety pharmacologic effects.

The successful applicant is expected to:
• take complete charge of the pathology group which at present consists of a veterinary surgeon and three histology laboratory technicians
• carry out histopathological diagnostics in internal toxicological examinations and other research
• be responsible for the professional, technological and methodological development within pathology to be used for diagnostics and evaluation of mechanisms
• liaise between pathologies at contract research laboratories, including evaluation and discussion of findings and ensuring terminology uniformity
• become a member of the Drug Safety Management Team.

The appointee should have a DM or DVM degree and several years of postgraduate education and experience within pathology.

It is essential that documentation of your expertise within toxicology and biological problem solving is provided. Excellent organisational and interpersonal skills, initiative, sense of humour, and the ability to think clearly and work independently under pressure are also essential.

The appointment will be a tenured position which will attract a salary reflecting the age and experience of the successful candidate.

For further information, please contact Karsten Skydsgaard telephone +454444 8888, extension 34630. Written applications should be marked "7118" and sent to the Personnel Department D&D, Krogshocejvej 31, DK-2880 Bagsvaerd, Denmark.

Novo Nordisk

Novo Nordisk A/S is the world leader in insulin and diabetes care and also the world's largest producer of industrial enzymes. The company also manufactures and markets a variety of other pharmaceutical and bioindustrial products. Headquartered in Denmark, Novo Nordisk employs more than 13,200 people in 53 countries and markets its products in 130 countries.

Schools of Clinical Medicine and Pharmacy

RESEARCH FELLOW
This post (ref. 95/02), funded by the Arthritis and Rheumatism Council, is available from January 1996 for three years, to investigate the role of anaerobic bacteria in bone and joint disease. Applicants must have at least a lower second class honours degree, or equivalent primary qualification in a relevant discipline, and hold, or expect to obtain shortly, a Ph.D. in biochemistry, microbiology, pharmacy or related discipline. Applicants must have experience in one or more of bacteriology, immunodetection methods, monoclonal antibody technology or biomedical device technology, must demonstrate the ability to present scientific data, either in written or oral form.

Commencing salary range: £14,319 - £15,987 per annum, placing depending on age, experience and qualifications.

School of Geosciences
RESEARCH ASSISTANT – ELECTRONIC JOURNAL PRODUCTION MANAGEMENT

This post (ref 95/S2), funded by John Wiley and Sons, is available for one year to work with Professor W. B. Whalley on a new electronic journal, investigating various systems of subscription, document validation, manuscript editing and refereeing processes for the journal, which will be disseminated using the World Wide Web and working towards production of the first issues. Applicants must possess a primary degree and preferably a postgraduate qualification in computing or computer applications. Knowledge of the World Wide Web/Internet, of the hypertext mark-up language html and of client-server applications is essential, as is experience of microcomputers and word processing packages. Graphic design or similar experience, a working knowledge of UNIX systems and script programming (eg PERL) and experience of copy editing and/or proof reading are desirable.

Salary: £14,319 per annum.

Applicants, quoting the reference number indicated, may obtain further particulars from the Personnel Officer, The Queen's University of Belfast BT7 1NN, Northern Ireland (01232) 245133, ext 3044/3246 or fax (01232) 324944/310629. Closing date: 20 October 1995.

The University is a charity, established in 1845 to advance education. Committed to an Equal Opportunities policy and selection on merit, it welcomes applications from all sections of the community.

UNIVERSITY OF SUSSEX
UNIVERSITY OF SUSSEX AT BRIGHTON

School of Biological Sciences

TECHNICIAN (Grade D)

Applications are invited for a Molecular Histology and Electron Microscope Technician. The post holder will work 50% of the time assisting in the School's Electron Microscope Laboratory and 50% with the Sussex Centre for Neuroscience undertaking Molecular Histology.

Experience in the following areas would be advantageous: routine preparation of samples for TEM and SEM, including ultramicrotomy, light microscopy, in situ hybridisation, immunocytochemistry and other modern molecular histological techniques.

Qualifications: HNC or equivalent plus seven years relevant laboratory experience. Salary will be in the range £11,707 to £13,977 per annum. The post is for a period of two years.

Application forms and further details may be obtained from Mr C. Leech, Building & Resources Manager, School of Biological Sciences, University of Sussex, Falmer, Brighton BN1 9QG. Tel: 01273 678053. E-mail: C.Leech@Sussex.ac.uk

Closing date: 31 October 1995.

Promoting Excellence in Teaching, Learning and Research.

An equal opportunity employer.
DEPARTMENT OF CHEMISTRY

LECTURESHIP IN PHYSICAL CHEMISTRY

Applications are invited for a Fixed-Term Lectureship in Physical Chemistry, available for 5 years from 1 January 1996 or shortly thereafter.

The Department, graded 4 in the last UFC research selectivity exercise, has particular research strengths in the areas of time-resolved spectroscopy and transient intermediates, biomolecular spectroscopy, protein crystallography, molecular graphics and modelling, supported reagents, reaction mechanisms and synthetic organic chemistry. It has an extremely successful record in attracting external funding (over £2 million per annum) and well developed collaboration with industry and with the Departments of Biology, Electronics and Physics at York. The Department has 32 full-time academic staff, 80 research fellows and 90 post-graduate students. There are over 300 undergraduates reading single-subject Chemistry in 3-year (BSc) and 4-year (MChem) courses; interdisciplinary MRes programmes commence in 1995. New research and teaching laboratories have been completed and both the Protein Structure Laboratory and the Physical Chemistry Research Laboratories are currently being refurbished and extended.

Professor Klaus Müller-Dethlefs has been appointed to a new Chair in Physical Chemistry and the Department seeks to develop its existing strengths in physical chemistry, especially in the fields of gas-phase high resolution laser spectroscopy and ZEKE photoelectron spectroscopy of molecular systems. Applicants will be expected to develop their own research programmes in this area; an outline research proposal should be included. Applicants will also be expected to contribute to the Department's teaching programme in physical chemistry, via lectures, tutorials, workshops and demonstrating.

Salary will be on the Lecturer A scale £15,154 - £19,848 per annum.

Informal enquiries may be directed to the Head of Department, Professor B C Gilbert, (direct dial number 01904 432500).

For further information and details of how to apply, please write to the Personnel Office, University of York, Heslington, York YO1 5DD, quoting reference number 3/3421. The closing date for applications is Friday, 20 October 1995.

PROMOTING EXCELLENCE IN TEACHING AND RESEARCH.

THE UNIVERSITY of York
UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Department of Engineering Science

**Research Assistant**
Advanced Technology for Digital Photography

Applications are invited to work on novel small particle technology. Applicants should have Ph.D. or equivalent experience and be familiar with materials processing of polymeric materials and powder technology. This is an exciting area which is being funded by the Nashua Corporation for one year. The funding of the post is, however, subject to external funding and is, therefore, contingent upon agreement being reached between the University and Nashua in respect of the terms and conditions of research.

The salary will be in the range of £14,317 to £17,466 p.a.

Please quote "RA/ATDP" in all correspondence. Closing date for applications is Thursday 19th October 1995.

Applications including CV and particulars of two referees should be sent to The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford, OX1 3PJ. Tel: 01865-273013. Further particulars may be obtained from Dr. P.J. Dobson at the same address.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

Silsoe Research Institute

CHEMICAL/BIOCHEMICAL ENGINEER
£16,000 plus benefits

Silsoe Research Institute is a world-class organisation involved with research in engineering and physical sciences within agriculture and other biologically based industries. It has a prestigious and successful reputation within the international research community and gained the Queen's Award for Industry in 1992.

Within the Institute, the Process Engineering Division studies the scientific basis of process systems that are important in these industries, and now seeks a chemical/biochemical engineer to join the Biochemical Engineering Group. In this role, you will be contributing to research on the development of a decontamination system for animal wastes, with specific emphasis on Swine Vesicular Disease and African Swine Fever. This project will involve the evaluation of established and new treatment technologies, the development of mathematical models of the most appropriate reactors, the design and construction of a small pilot plant and the completion of an experimental programme to evaluate the selected treatment process. You will spend approximately 25% of your time at the Institute of Animal Health in Pirbright, who will be providing the microbiological input to the project.

You should have at least an upper second class honours degree in chemical biochemical/engineering, supported by at least two years' post-graduate experience including, preferably, mathematical modelling and process simulation.

This position is offered initially on a three year, Fixed term contract. The comprehensive benefits package includes non-contributory pension scheme, life assurance, subsidised workplace nursery & staff restaurant, sports & social club, gymnasium and excellent working conditions.

For further details and an application form, please call (01525) 860000, quoting Ref 12/76, or write to: Personnel Department, Silsoe Research Institute, Wrest Park, Silsoe, Bedford MK45 4HS. Closing date for applications is 25 October 1995 and interviews are scheduled for 16 November 1995.

We are Equal Opportunity Employers

ENGINEERING for Life

1992
CLINICAL TRIALS SUPPLIES COORDINATION

TEAM LEADER
SANDWICH, KENT

Right at the heart of Pfizer we have a demanding opportunity for someone who relishes a challenge: planning global clinical supplies for Pfizer. A challenge because of the success and momentum that we have built up as a result of sound company strategy - a sharp focus on our health core businesses, continued growth in productivity, the exploitation of markets all round the world, increasing our R&D spending, and meeting the real needs of patients. Demanding because, perhaps not surprisingly, we have one of the busiest development pipelines of new products around.

We have a great opportunity available to lead a team whose role is portfolio planning of our clinical supplies for Phase I, II and III candidates, budgeting, forecasting, finding and managing contractors and our relationship with them, keeping colleagues right up to date and representing the team and your department at project management meetings.

Might you be the person we seek? Experienced in Clinical Trials Supplies work, either as a planner or supervisor, with a real insight into the problems that can arise? An accomplished planner and a practical problem solver with ideas and the drive to put them into action. Have you the skills to influence others; to listen to their problems, and to build strong collaborative relationships? Can you draw upon experience to develop your team members to the full? You'll need at least five years’ experience following a degree or Ph.D. in order to have the maturity, insight, knowledge and skills for this role.

We have plenty to offer you in return - brand new facilities for the department opening in 1996, a lively, busy workplace with pleasant colleagues and an informal culture and the opportunity to coordinate projects on a world stage for one of the world's leading pharmaceutical companies.

We pay competitive salaries, have flexible hours and a wide range of other benefits. Relocation assistance is available where appropriate.

Please send a CV to Mr. S Rhodes, Senior Personnel Adviser, Research Personnel, Pfizer Central Research, Ramsgate Road, Sandwich, Kent CT13 9NJ. Fax 01304 618749.

1991
AWARDED TO CENTRAL RESEARCH DIVISION OF PFIZER LIMITED
Pfizer
Quintiles, servicing the pharmaceutical and biotechnology industries, is one of the largest Contract Research Organisations in the world. Due to the expansion of its library and information services in Edinburgh, the following position has now arisen:

**Information Scientist**

This challenging position provides a unique opportunity to design, develop and expand on not only existing but new business and scientific information services within a highly successful organisation.

Ideally you will be an experienced Information Scientist working in an Information Services Department of a scientific organisation. Extensive hands-on experience of online database search and retrieval systems especially in biomedical and business/commercial areas is essential. Additionally a thorough understanding of current information technological developments and their application to information services is required.

You must be a graduate or equivalent, with either a postgraduate qualification in Information Sciences and/or several years relevant experience in the provision of information services.

Self-motivated with initiative and drive, you will have excellent communication skills and the ability to work well in a team environment.

The rewards are excellent. Besides a highly competitive salary the benefits include bonus potential, free medical insurance and free sports facilities.

If you have the qualifications and experience for this position, then please write enclosing your CV stating current salary to: Human Resources Department, Quintiles Scotland Limited, Research Avenue South, Heriot-Watt University Research Park, Riccarton, Edinburgh EH14 4AP

Closing date: Friday 20th October 1995.

HYGIENE CHEMIST

Rentokil, best known for its Pest Control and Property Care activities, also provide Hygiene Services for the food industry and commercial offices.

The R&D Division seeks a recently qualified chemist to develop new hygiene services, evaluate new cleaning products/disinfectants, safe working procedures and application methods. The work involves laboratory and field testing and commercialisation of the new developments.

Applicants should be enthusiastic, self-motivated, possess good communication skills and be able to work to challenging deadlines.

Benefits include a company car, free lunches and profit sharing bonus.

Application forms from the Secretary, R&D, Rentokil, Felcourt, East Grinstead, West Sussex RH19 2JY. Tel: 01342 833022, ext 287.
HARVARD UNIVERSITY

BULLARD FELLOWSHIPS IN FOREST RESEARCH

Each year Harvard University awards a limited number of Bullard Fellowships to individuals in biological, social, physical and political sciences to promote advanced study, research or integration of subjects pertaining to forested ecosystems. The fellowships, which include stipends up to $30,000, are intended to provide individuals in mid-career with an opportunity to utilise the resources and to interact with personnel in any department within Harvard University in order to develop their own scientific and professional growth. In recent years Bullard Fellows have been associated with the Harvard Forest, Department of Organismic and Evolutionary Biology and Kennedy School of Government and have worked in areas of ecology, forest management, policy and conservation. Fellowships are available for periods ranging from four months to one year and can begin at any time in the year.

Applications from international scientists, women and minorities are encouraged. Fellowships are not intended for graduate students or recent postdoctoral candidates. Further information may be obtained from: Committee on the Charles Bullard Fund for Forest Research, Harvard University, Harvard Forest, Petersham, MA 01366 USA. Annual deadline for applications is February 1.
A NEW BREAKTHROUGH IN SIGHT?

Assistance and funding available for suitable start-up and ongoing development projects. Biotech, software, diagnostics etc. Individual researchers and teams considered.

Please reply with brief details to Box No: 864, IPC Magazines, Kings Reach Tower, Stamford Street, London SE1 9LS.
**SITE OCCUPATIONAL HYGIENIST**

Astra is one of the fastest growing pharmaceutical companies in the world. As part of its global expansion and long-term commitment to the future, it has recently acquired substantial R&D resources in the UK, based in Longborough, Leicestershire.

Astra is dedicated to growth through innovative science and has positive plans for these new, purpose built and rapidly expanding R&D facilities in the UK.

Current therapeutic areas of interest in Loughborough include: cardiovascular, respiratory, and immunological disorders.

The Environmental Affairs Department encompasses all aspects of Occupational Health, Safety and Environmental activities. These areas are subject to continuing change and growth and as a result we are looking for an enthusiastic and dedicated Occupational and Environmental Hygienist to provide advice and support to the Astra Charnwood site. You will be working alongside a team comprising the Environment and Safety Adviser and the Occupational Health Physician and Nurse.

You will be required to conduct environmental and work place assessments across the broad spectrum of occupational hazards and risks. There is a specific need to focus on risks associated with the development of new pharmaceutical compounds. You will also be required to provide training to line managers with regard to statutory and corporate health, safety and environmental compliance issues.

You will need to demonstrate pragmatism, have the ability to think strategically in all aspects of your work and be able to communicate effectively at all levels. You will have a minimum of either a BSc in Occupational Environmental Hygiene or the BEBOH Certificate and at least 2 years' experience in either the Pharmaceutical, Chemical or Energy industry sectors. It would be desirable if you also had the NEBOSH Certificate or Diploma.

Astra Charnwood offers a competitive salary and benefits including private healthcare, company pension scheme, flexitime, 25 days' annual leave and a generous relocation package where appropriate.

To apply, please send a full current CV with the names of 2 referees (one of whom must be a current or recent employer) to Ms Leena Kalyanvala, HR Operations Manager, Astra Charnwood, Bakewell Road, Loughborough, Leicestershire LE11 0RH.

Please quote reference 5109/NS on all correspondence.

Closing date for applications: 23rd October 1995.

ASTRA CHARNWOOD
A model for defence.

AWE plc is renowned throughout the world as a high technology leader making a vital contribution to the UK's defence capabilities. The development of sophisticated software and models is an increasingly important part of our operations and we are now looking to appoint a number of technical specialists to join teams in this area. The posts are:

**Computational Fluid Dynamics Code Developer**

c.£15 - 27k

You will be responsible for developing advanced software in support of dynamic processes. This will involve the constructive and creative use of new and existing algorithms and codes.
You should be educated to honours degree standard, and preferably have a knowledge of Fortran.

**Laser Physics Code Modelling and Development**

c.£15 - 27k

You will be working to develop physics and mathematical models of the processes used in laser laboratory experiments. This will involve the imaginative use of existing large codes and the development of new algorithms and codes.
You must have a 2.1 honours degree in a relevant discipline. A knowledge of Fortran would prove useful.

**Advanced Physics Code Support**

c.£15 - 27k

You will be providing advanced physics support in codes with features including fluid dynamics radiation flow and neutronics, as well as assisting in developing and maintaining relevant computer codes.
You must be educated to honours degree standard, and a knowledge of physics, Fortran and computer software would be an advantage.

**Physicist/Mathematical Modeller**

c.£15 - 22k

You will be responsible for the development and validation of mathematical models focused on hydrodynamic simulations and the analysis of nuclear safety.

You must have a good Physics or Mathematics degree, and the ability to apply innovative thinking and technical expertise in an advanced computational facility.

In return for your expertise, you can expect an attractive salary which will reflect your experience together with a benefits package which includes a generous leave allowance, nominal contributory pension, excellent sports and social facilities and relocation assistance where appropriate.

To apply, please write or telephone for an application form to Jane Bienkowski or Amanda James, SRW Personnel, AWE plc, Aldermaston, Reading, RG7 4PR. Telephone: 01734 827132.

Closing date for return of application forms 3rd November 1995.

We are an equal opportunities employer.

**POSITIVE ABOUT DISABLED PEOPLE**

AWE plc

HRC

We are Europe's largest biological research organisation. We carry out essential work evaluating the safety of pharmaceutical products, agrochemicals and industrial chemicals.

Metabolism and Environmental Chemistry
Further expansion has created opportunities for graduate and postgraduate scientists in our Metabolism and Environmental Chemistry Group.

Working in this Group will enable you to develop a wide range of experience in animal metabolism and environmental fate studies. You will be using radioisotopes and a variety of other analytical techniques to study the behaviour of materials such as agrochemicals, veterinary products and food additives.

To apply at graduate level you should possess a degree in chemistry, biochemistry or a related subject. For appointment at postgraduate level you will need a Ph.D. or MSc in similar areas or equivalent laboratory research experience in a relevant organisation.

Enthusiasm for laboratory work and the ability to apply practical techniques to the solution of challenging and interesting problems will be important contributors to your success. Ref: IP40.

Mass Spectrometry

Mass Spectroscopist
A scientist (preferably Ph.D.) is required to solve challenging problems associated with the structural identification of metabolites and degradation products derived from studies in biological systems.

Previous experience in mass spectrometry is essential and a knowledge of separation techniques and biotransformation would be advantageous.

The successful candidate will be joining Europe's leading contract research laboratory in this field. Ref: IP41.

Senior Bioanalyst
An experienced bioanalyst is required to supervise a team of study scientists. A knowledge of LC-MS and experience in assay method development and validation in a GLP environment are essential qualifications for this position. Ref IP42.

Bioanalyst
We have vacancies for recently qualified scientists who are looking to develop a career in bioanalytical science primarily using state-of-the-art LC-MS/MS. The work will involve the development and validation of assay methods and the analysis of samples of clinical or other origin, usually as part of new drug development programmes.

The department is equipped with ten mass spectrometers with facilities for GC/LC-MS/MS, high resolution MS and a range of ionisation techniques. Recent acquisitions include a Finnigan TSQ 7000 and several Sciex API III Plus mass spectrometers. The department is rapidly expanding and presents excellent opportunities for career development.

HRC is located in pleasant countryside with excellent road and rail links to Cambridge, London and the Midlands.

We offer competitive salaries based on qualifications and experience, together with the usual benefits you would expect from a successful and expanding organisation.
Please apply by sending your CV, including details of current remuneration, with a letter stating what special skills and experience you would bring to the position to: Ian Pell, Personnel Department, HRC Ltd., Huntingdon, Cambs. PE18 6ES.

Please quote the appropriate reference.

Closing date for the receipt of applications: 19th October, 1995.
Leicester University  
FACULTY OF MEDICINE  
Department of Medicine and Therapeutics

**LECTURER (NON-CLINICAL) IN MOLECULAR MEDICAL GENETICS**  
(Head of Molecular Genetics Diagnostic Service Laboratory Genetics Centre, Leicester Royal Infirmary NHS Trust)

Applications are invited for the post of Lecturer (Grade A or B) in Molecular Medical Genetics with additional responsibility for the Molecular Genetics Diagnostic Laboratory at the Leicester Royal Infirmary NHS Trust. The post will be tenable from as soon as possible for a term of 5 years.

The postholder will develop independent research, working at the interface of diagnostic service provision for medical molecular genetics. The duties of the post will include teaching of human genetics to medical students and the appointee will supervise the molecular genetic diagnostic service.

The post has a substantial research commitment to the application of molecular biology to medicine and close academic links exist with the Department of Genetics.

The initial salary will be at an appropriate point, according to qualifications and experience, on the Non-Clinical Lecturer Grade A Scale £15,154 to £19,848 pa or the Non-Clinical Lecturer Grade B Scale £20,677 to £26,430 pa.

Further particulars and an application form are available from the Personnel and Planning Office (Academic Appointments), University of Leicester, Leicester LE1 7RH. Tel: (0116) 252 2758. The closing date for applications is 27 October 1995. Please quote ref: A5038

Department of Medicine and Therapeutics

**RESEARCH TECHNICIAN**  
Two Year Post

Applications are invited for the post of a temporary Research Technician in the Department of Medicine and Therapeutics based at the Clinical Sciences Building, Leicester Royal Infirmary. This post is funded by the British Heart Foundation.

The postholder will assist with research on the molecular biology of potassium channels from human vascular tissue with Dr Brenda Leckie. Experience of molecular biology techniques is preferred.

Applicants must possess ONC, BTEC or equivalent and have at least three years’ relevant experience (including any period of training). Salary Grade C £10,138 to £11,368 pa. Recent graduates will also be considered for appointment as Graduate Trainees at an initial salary of £9,835 pa.

Written applications, a CV and the names and addresses of two referees to Mrs Joan Brice, Chief Technician, Department of Medicine and Therapeutics, Clinical Sciences Building, Leicester Royal Infirmary, Leicester LE2 7LX. Closing date: 26 October 1995.

THE QUEEN’S ANNIVERSARY PRIZES 1994

Promoting excellence in University teaching and research

The Defence Research Agency is an agency of the Ministry of Defence with the mission to be the prime provider of technical advice to the MOD. We also provide advanced technical services to other Government Departments and to private industry.

Microstructural Analysis

**Materials Scientist**
A leading role in the development of improved shape memory alloys and radar absorbing services
To £25,000 & benefits - Farnborough, Hampshire

The Structural Materials Centre is a DRA Business Sector and one of the largest materials research laboratories in Europe, with a reputation for scientific and technological excellence.

In the Microstructural Analysis Group at Farnborough, we're seeking an experienced materials scientist with electron microscopy skills to join the research programme involved with development of improved shape memory alloys for potential actuator applications and radar absorbing surfaces on metal-matrix composites. You should ideally have an experimental research background, a knowledge of modern physical metallurgy principles and the ability to undertake a wide range of microstructural investigations using state-of-the-art techniques. Concise and articulate reporting of your findings will be essential, and in the medium term you will assume responsibility for the day-to-day technical management of the programmes.

The appointment will be initially for three years but may be extended or made permanent by mutual agreement. Salary will depend on skills and experience, and rapid advancement is possible for high achievers. Pensions are non-contributory and relocation costs may be offered.

DRA welcomes applications from suitably qualified people regardless of sex, marital status, race or disability.

Please contact us for an application form quoting reference E/95/SMC/38. SMC (HR), P161 Building, DRA Farnborough, Hampshire GU14 6TD. Tel: 01252 392707. Closing date for receipt of completed applications 27th October 1995.

DRA
DRA is a division of DERP, an Agency of the MOD
**Drug Safety Manager**  
Set up and run a new function  
London excellent salary

Over recent years, this well-established international pharmaceutical company has pursued a successful programme of strategic, global expansion and collaborations. An intrinsic element of this plan is that compounds with clinical and commercial potential from its own research and development activities are developed by the European operation, which has its headquarters in London.

The progressive advancement of this evolving operation creates an unusual opportunity for a Drug Safety Manager to set up and run a new pharmacovigilance function where you'll devise and establish the initial strategy and procedures, and then be personally responsible for managing clinical safety on an international basis.

This is very much a solo hands-on role requiring control of the database, processing of adverse event notifications and reporting. Once you have firmly established pharmacovigilance, there will be scope for you to extend your span of influence and responsibility into the management of clinical quality assurance processes. Qualified to degree level in a life science, you will have at least three years' pharmacovigilance experience that could have been gained in a specialist role or as part of broader responsibilities. Competency in another European language would also be an advantage.

If you possess the self confidence and expertise to set up and run this expanding area in a small company, where flexibility in dealing with issues from the highest to the lowest level will be crucial to your success, send your cv to Micheline Eames, Eames - Jones - Judge - Hawkings, 29 High Street, Welwyn, Herts AL6 9EE. Telephone: 01438 840984. Fax: 01438 840429.

EAMES - JONES - JUDGE - HAWKINGS  
PERSONNEL CONSULTANCY • SEARCH & SELECTION • MANAGEMENT CONSULTANCY  
Senior Lecturer in Medicine
(Neurobiology)
Initial salary within the range £27,747 - £31,357 pa.

To work in the Diabetes and Endocrinology Research Group. You will have an excellent track record in basic neurosciences, ideally in molecular neuroendocrinology and/or the CNS control of energy homeostasis. Your main priority will be to develop a strong research programme. The group's current research interests focus mostly on neuropeptide Y in the hypothalamus and its roles in diabetes and obesity (see Peptides 1995;16: 757-771). Initially, you will work on a project supported by SmithKline Beecham, to investigate the interactions between the OB protein (leptin) and hypothalamic NPY in the control of body weight.

Further information from Professor Gareth Williams on 0151 706 4070; fax: 0151 706 5802. Send full CV, including publications and grants obtained, together with outline research proposals.
Quote Ref: A\916\NS Closing Date: 27 October 1995

Senior Research Assistant/Research Associate in Cardiac Electrophysiology
Initial salary within the range £14,317 - £17,446 pa.

To investigate factors involved in control of cardiac contraction, involving measurements of [Ca], using fluorescent dyes and sarcoplasmic reticulum calcium content using an electrophysiological technique.

You should have a Ph.D. in a relevant subject and experience of these techniques would be an advantage. The post is funded by the Wellcome Trust and is tenable for up to five years within the Department of Veterinary Preclinical Sciences.

Informal enquiries may be made to Professor D A Eisner, on 0151 794 4228, email: eisner@liverpool.ac.uk or Dr S C O'Neill, on 0151 794 4231, email: oneill@liverpool.ac.uk.
Quote Ref: B\472\NS Closing Date: 27 October 1995

Applications by c.v. with the names of three referees should be received by the Director of Personnel, The University of Liverpool, Liverpool, L69 3BX. Further particulars may also be requested from this address or via email: jobs@liv.ac.uk.

Working Towards Equal Opportunities

FOR THE ADVANCEMENT OF LEARNING
Applications are invited for a one year postdoctoral position funded by the Department of Trade and Industry in conjunction with Unilever, ICI, Schlumberger and Zeneca, to develop the application of environmental scanning electron microscopy to colloidal systems. A Ph.D. in physics, chemistry or materials science is required, with experience of colloidal systems and/or electron microscopy.

Candidates should send their CVs including the names of at least two referees to: Mrs M A Staff, Polymers and Colloids Group, Cavendish Laboratory, Madingley Road, Cambridge CB3 OHE. Closing date 3 November 1995.

The University aims to achieve the highest quality in teaching and research, and is an equal opportunities employer.

King's College School of Medicine and Dentistry of King's College London

**Lecturer In Medical Statistics**  
Academic Department of Public Health and Epidemiology  
In Association with the South Thames Regional Health Authority

Applications are invited for the above post tenable at King's College School of Medicine and Dentistry. The Lecturer will be involved in initiating research projects, advising on statistical techniques to various groups within King's and other regional groups, teaching undergraduates and assisting in the teaching of clinical trainees.

Applicants should be in possession of a higher degree in statistics and preferably have previous experience of working in the area of medical statistics. They should also be able to communicate effectively with people who have little, or no, knowledge of statistics and be able to work both independently and as part of a team.

The post attracts an annual salary of £20,677 - £26,430 plus £2,134 London Weighting Allowance.

Please telephone the Personnel Department on 0171 346 3011 for an information pack and details on how to apply.

The closing date for receipt of applications is: 17th October 1995.

Promoting excellence in teaching, learning & research  
Equality of opportunity is College policy  
University of Durham  
DEPARTMENT OF PHYSICS

**Senior Research Assistant**

This SERC funded post is available immediately for three years to work with Dr. D.P. Hampshire on the effect of strain on the critical current density of low temperature and high temperature superconductors. You should have experience characterising/fabricating superconductors including measuring the critical current density in magnetic fields. Applicants with a strong background in physics, chemistry, metallurgy or materials science will be considered. Consideration will also be given to candidates nearing completion of their Ph.D.

The salary will be on the scale RA1A (£14,317 - £21,519 p.a.).

Further details and an application form may be obtained from the Director of Personnel, University of Durham, Old Shire Hall, Durham, DH1 3HP, tel: 0191 374 7258, fax: 0191 374 7253, e-mail: Acad.Recruit@durham.ac.uk. Closing date for completed applications is 14 November 1995. Please quote reference number A488.

Investing in Excellence in Teaching and Research
Ph.D. STUDENTSHIP IN GUT IMMUNOLOGY
Department of Gastroenterology

Applications are invited from candidates with a good honours degree in immunology or a related subject, for a Ph.D. studentship investigating mechanisms of inflammation in intestinal disease. Applicants should have experience in cell culture and immunoassays, while FACS analysis would be of benefit. Relevant post-graduate experience would be an advantage.

For further information please contact Dr R Harvey on 0171-928 9292 x 2650. Please send letter of application and CV to Dr R P H Thompson, The Rayne Institute, St Thomas's Hospital, Lambeth Palace Road, London SE1 7EH.

Closing date for applications: 27th October 1995.

Promoting excellence in teaching, learning & research

Equality of Opportunity is School Policy

UDMS
GUY'S AND ST THOMAS'S MEDICAL AND DENTAL SCHOOL
(University of London)
A WORLD OF OPPORTUNITY

Systems Analyst
Apply your IS excellence in a challenging scientific environment

Rhône-Poulenc Rorer is a world-leading pharmaceutical company with a reputation based firmly on the innovation and inspiration of its research scientists around the globe. As you would expect, our future success will depend very much on their continued ability to discover and develop outstanding new drugs. Equally important is the work of our IS professionals in designing and developing applications required by the scientists to make their work as effective and efficient as possible.

The Systems Analyst will, therefore, be expected to work closely with our discovery scientists to understand their requirements and then translate these into practical software applications. This will involve you initially in the development and implementation of the global structural and biological databases, and in the future implementing knowledge-based systems. You will also provide application support and advice and ensure that all developments are fully validated and comply with all regulatory and company requirements. In addition to your technical knowledge, you will need to possess excellent interpersonal and communication skills.

A key part of your wide-ranging brief will be to use your knowledge of developments in computer technology to identify new opportunities for the application of IS techniques. Once any new systems development is implemented, it will be your responsibility to make sure that all potential users can achieve maximum benefit from that development.

To be considered for this important role, you will need to be educated to at least degree level in the chemical / biological sciences and have spent at least 2 years working in IS. In that time you will have gained a thorough understanding of technological tools, including database design, and their applicability in meeting business requirements. An in-depth knowledge of PCs and end-user computing technologies, including problem analysis and decision support techniques, is essential. You may also have a recognised qualification in IS.

The position offers an exciting development opportunity, together with a competitive salary and an extensive range of benefits including pension scheme, private health insurance and relocation assistance where appropriate.

So, if you believe you can apply your IS excellence in this challenging scientific environment, please send your CV and a supporting letter, quoting Ref. SA/NS, to David Strong, Human Resources Manager, Rhône-Poulenc Rorer, Dagenham Research Centre, Rainham Road South, Essex RM10 7XS. Closing date for applications: 19th October 1995.

rpr
RHÔNE-POULENC RORER
WORLD CONSERVATION MONITORING CENTRE

HEAD OF INFORMATION SYSTEMS

WCMC, an international organisation that manages and distributes conservation information and helps others to do so, seeks an experienced computer professional to lead the development and management of its information systems. Applicants should have a degree or equivalent and five years' experience in information systems, preferably in a biological environment. A proven track record in information systems planning and management, experience in PC and Unix systems and software (eg Ingres, Arc/Info) and excellent interpersonal skills are required.

The post will be for an initial three year period with the possibility of extension.

Salary £25,302 on a scale rising to £31,533, with starting salary dependent upon qualifications and experience. This is coupled with an excellent benefits package, including a non-contributory pension scheme, disability insurance and death-in-service package.

Further details are available from the Personnel Officer, World Conservation Monitoring Centre, 219 Huntingdon Road, Cambridge CB3 0DL, UK. Fax: +44 (0)1223 277316. E-mail: personnel@wcmc.org.uk, to whom applications with full CV and details of two referees should be sent by 16 October 1995.

Interviews will be held in Cambridge during the week 30 October 1995.
Research Assistant

A Research Assistant is required to join a team of 6 workers investigating the control of G-protein coupled receptor gene expression. The lab is part of the newly built Wellcome Laboratory for Molecular Pharmacology within University College London and is well equipped for all aspects of molecular biology. The work will involve gene cloning, promoter mapping, expressing reporter constructs in cultured neurones, transgenesis and monitoring gene expression using in situ hybridisation and immunocytochemistry. Experience in any of the above areas is welcome but not essential. Enthusiasm, ability to work independently and an interest in molecular neurobiology are more important. Appointment will be for up to 3 years and starting salary will be £16,451 to £18,120 depending upon experience. Informal enquiries may be made to Dr Noel J Buckley (tel 0171 380 7244; fax 0171 380 7245, email n.buckley@ucl.ac.uk). Starting date for this post is a.s.a.p. and applications, including c.v. and names of two referees should be submitted to Dr Noel J. Buckley, Department of Pharmacology, University College London, Gower Street, London WC1E 6BT, by 20 October 1995.

Working towards Equal Opportunity

PURSUING EXCELLENCE IN EDUCATION AND RESEARCH
SENIOR APPOINTMENTS IN TOXICOLOGY

Inveresk Research International (IRI) Limited, part of the SGS Group, is a major international contract research organisation providing comprehensive services to the pharmaceutical, agrochemical, industrial chemical and consumer product industries worldwide. We are located in East Lothian, close to Edinburgh, Scotland's capital city.

We are currently recruiting within our General and Acute Toxicology department. Studies undertaken in the department range from short term to chronic and are generally of conventional design and predominantly non-rodent. These positions would suit people who seek challenge, who are self motivated and who enjoy the demands of a busy working environment.

SENIOR TOXICOLOGIST
This senior individual will be expected to principally deal in matters relating to General Toxicology. The successful candidate will act as a Study Director; review where appropriate the work of, and provide advice to, more junior Study Directors and Project Leaders; maintain a high level of awareness of current trends in general toxicology and deputise for the Head of Department. Applicants should have a minimum of 5-8 years postgraduate experience in a toxicology environment. A professional qualification in toxicology would be a distinct advantage. (Ref 3807A)

STUDY DIRECTOR
This post exists within the General Toxicology section. The successful candidate will take responsibility for toxicity studies performed according to agreed protocols, including protocol design, study management and reporting, and liaison with Sponsors. Applicants should have a good first degree together with a minimum of 4 years toxicology experience. (Ref 3807B)

Salary for these important positions will be dependent upon qualifications and relevant experience. Other benefits include bonus scheme arrangements, private medical cover, pension and life assurance plan membership and assistance with relocation (where applicable). Interested candidates should submit a full CV to the Personnel Department, quoting the relevant reference number.

IRI
INVERESK RESEARCH INTERNATIONAL
Inveresk Research International Limited
Tranent EH33 2NE.
The Royal Veterinary College

Research Studentship

Applications are requested for a Research Studentship in the Department of Veterinary Basic Sciences. The proposed project will investigate the role of chylomicron remnants in the pathogenesis of atherosclerosis. The studentship will be for three years and the recipient will register for a Ph.D. degree. A tax free stipend of £6520 to £7020 will be provided.

Applications, including a CV and names of two referees, should be sent to Dr J. Elliott, Department of Veterinary Basic Sciences, Royal Veterinary College, Royal College Street, London NW1 0TU by October 31, 1995.

Further details can be obtained by contacting Dr J. Elliott, (tel 0171 468 5266) or Dr K. Botham, (tel 0171 468 5274).
Applications are invited for a permanent Lectureship. The successful applicant will be expected to have research skills in one or more of the following areas: hydrogeochemistry; mineral surface processes in the weathering regime; geohydrology; physico-chemical theory and modelling of fluid-rock interactions; applications of studies of fundamental processes to environmental pollution. The position is a strategic one, and the lecturer will be expected to interact with established groups in allied areas which include marine geochemistry, experimental fluid-rock interactions under in situ conditions, and near-surface geophysical methods. He or she will play an important role in defining and contributing to the new Environmental Geoscience BSc honours degree course.

The appointment will commence from 1st March 1996.

Salary will be on the scale £15,154 - £19,848.

Please quote REF: NS 590451

Technical information may be obtained by contacting: Professor Ian Parsons, Department of Geology & Geophysics, The University of Edinburgh, West Mains Road, Edinburgh EH9 3JW e-mail: ian.parsons@ed.ac.uk or from the World Wide Web at: http://www.glg.ed.ac.uk

Further particulars including details of the application procedure should be obtained from THE PERSONNEL OFFICE, THE UNIVERSITY OF EDINBURGH, 1 ROXBURGH STREET; EDINBURGH EH8 9TB or TEL: 0131 650 2511 (24 hour answering service).

Closing date: 31 October 1995

Promoting Excellence in Teaching and Research
An EPSRC funded, postdoctoral research position has become vacant in the Department of Physics and is available from 1 November 1995 until 31 August 1997 with a possibility of an extension.

The aim of the project is to advance the new technique of polarised neutron reflectometry on the CRISP instrument at the ISIS spallation neutron source, and to apply the method to study magnetic flux phenomena near surfaces and interfaces in superconductors. The work will be carried out jointly in Oxford and at the Rutherford Appleton Laboratory, near Oxford.

Applicants should have, or expect to obtain shortly, a Ph.D. in physics. Previous experience with neutron reflectometry or superconductivity is not essential, but an interest in data visualisation and analysis would be an advantage.

Informal enquiries can be made to Dr A T Boothroyd (tel. (01865) 272376, e-mail a.boothroyd1@physics.oxford.ac.uk), or to Dr J Penfold (tel. (01235) 445661, e-mail jp@isis.rl.ac.uk). Applications in writing, with curriculum vitae and the names of two referees, should be sent to: The Administrator, Department of Physics, Clarendon Laboratory, Oxford University, Oxford OX1 3PU by 31 October 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

Scientific Officers

The Medicines Control Agency is an Executive Agency of the Department of Health responsible for safeguarding public health by ensuring that all medicines for human use on the UK market meet appropriate standards of safety, quality and efficacy. Opportunities have arisen for four scientists to join multidisciplinary teams in two of our Units.

The PLUS Unit

The PLUS Unit of the Licensing Division is responsible for the classification and transcription of all applications for new marketing authorisations on to the agency's new innovative computer system, the Product Licence User System (PLUS). The unit is also responsible for the maintenance of licence records and development of the system.

You will be involved in the transcription and classification of data supplied by pharmaceutical companies in support of applications for new marketing authorisations. Applicants for this post should have a degree in one of the Biological Sciences, experience in classification of medical or pharmaceutical data, a meticulous approach to work, good interpersonal skills and an ability to work under pressure. Ref: SO/PLUS/9/22/95.

The ADROIT Unit

The Post Licensing Division of the MCA is responsible for the safety of all licensed medicines and uses information from a number of sources including the Yellow Card Scheme. An innovative computer system, ADROIT (Adverse Drug Reaction On-Line Tracking) has been introduced to support its work.

You will be involved in a range of activities related to drug safety including classification and interpretation of adverse reaction reports; assessment of drug safety issues and measures taken to improve drug safety.

Applicants for this post will need to possess a First or Upper Second Class honours degree covering one of the following areas: Pharmacology, Pharmacy, Toxicology or Physiology. Ref: SO/ADROIT/9/23/95.

In return we offer starting salaries in the range of £13,542 to £18,589, according to experience, rising to £22,230 dependent on performance. This includes a Recruitment and Retention Allowance of £1,766. These appointments are for a fixed term of three years' with the possibility of extension. We also offer the full range of Civil Service benefits, including a noncontributory pension.

For further details and an application form for either of these posts, please write to Yvonne Gwam at the MCA Personnel Unit, Room 1605, Market Towers, 1 Nine Elms Lane, London SW8 5NQ or telephone 0171 273 0516. Please ensure that you clearly state which post you are interested in and quote the relevant reference number.

The closing date for applications is 20th October 1995.

As an Equal Opportunities employer the Department welcomes applications regardless of gender, race, disability or sexuality. We operate flexible working patterns within a non-smoking environment.

MCA
MEDICINES CONTROL AGENCY
THE UNIVERSITY OF BIRMINGHAM

RESEARCH TECHNICIAN
CHROMATIN AND GENE EXPRESSION GROUP

This new post is to join a team based in the Medical School studying the role of protein modification in the regulation of gene expression in higher organisms. It is funded for 5 years by Wellcome Trust and will involve the characterisation of new antisera to modified histones involving immunomicroscopy, ELISA and Western blotting. Training will be available although previous experience and a degree level qualification in biological sciences will be an advantage.

Salary to start £11,983.

Informal enquiries to Dr B Turner, tel. 0121 414 6815, email b.m.turner@bham.ac.uk

Application forms (returnable by 27th October 1995) and further particulars available from the Director of Staffing Services, The University of Birmingham, Edgbaston, Birmingham B15 2TT, telephone 0121 414 6483 (24 hours), E-mail: STAFFING@BHAM.AC.UK quoting reference M12940/95.

Application forms and further particulars may be obtained from the Personnel Section, Cardiff Institute of Higher Education, Central Management Unit, Llandaff Centre, PO Box 377, Western Avenue, Cardiff CF5 2SG. Telephone (01222) 506119/6. Closing date for receipt of applications: 16 October 1995.

THE INSTITUTE IS COMMITTED TO EQUALITY OF OPPORTUNITY IN EMPLOYMENT

Creating Your Future Through Education
Post-doctoral Fellowship in Molecular Plant Pathology

Applications are invited for a fixed term three year position funded by the BBSRC to carry out research on the molecular biology of bacterial pathogenesis to plants. The specific area of research will be concerned with a recently discovered RNA polymerase sigma factor and its role in pathogenesis of Xanthomonas to plants.

Candidates should possess an Honours Degree and postgraduate research experience in a relevant discipline such as Biochemistry, Molecular Genetics, Microbiology or Plant Pathology.

The appointment will be to the R&A1A grade within the salary range £14,317 to £21,519 per annum. Contributory superannuation scheme. Equal opportunities employer.

Applications with full CV together with the names and addresses of two referees should be sent to the Personnel Officer, John Innes Centre, Norwich Research Park, Colney, Norwich, Norfolk NR4 7UH. Quoting Reference SL/031.

Intending applicants are welcome to contact informally Dr J. M. Dow (tel 01603 452571, fax 01603 250024), from whom further particulars may be obtained. The closing date for completed applications will be 31 October 1995.

ENVIRONMENTAL CONTROL OFFICER
CHARTER MARK
Initial salary circa £16,000 plus car allowance and performance related pay

Working in Environmental Health as a Technician?
or
Relevant Degree or HND qualification?
or
Two years experience in Food Safety and/or Health and Safety at Work Compliance?

We will soon have a vacancy in our small but busy Environmental Health Division. The post has specific responsibility for Food Hygiene and Health and Safety Inspections, sampling and infectious disease work. There may be opportunities to work in other areas of Environmental Health as well. You must be able to offer:
Good written and oral communication skills.
A practical approach, balancing firmness with tact.
The confidence to deal with difficult situations.
An ability to interpret and implement legislation.

We will offer relevant training in appropriate circumstances and the Council is committed to personal development enhancing skills.

Interested? For a job description and application form, please phone our 24hr answerphone on (01372) 732116.

If you think you have the necessary qualifications but want to discuss the post, please ring Andrew Eperson, Chief Environmental Health Officer on (01372) 732402.

Epsom &Ewell Borough Council needs good staff. We will seek to appoint the most suitably qualified and experienced person for the job without regard to gender, disability or ethnic group.

Closing date: 16th October, 1995. Interviews to be held week commencing 30th October 1995.

INVESTOR IN PEOPLE
EPSON EWELL BOROUGH COUNCIL
UNIVERSITY OF BRISTOL
School of Chemistry

Postdoctoral Research Assistantship in Laser Photochemistry

Applications are invited for the above post, available from 1 January 1996, funded by EPSRC, to work on a number of extensions of the technique of H atom photofragment translational spectroscopy. You should have, or soon expect to obtain, a Ph.D. in Physical Chemistry/Chemical Physics. Starting salary on the RA1A scale in the range £14,317 to £15,986 per annum according to age and experience.

Informal enquiries to Professor M. N. R. Ashfold, School of Chemistry, University of Bristol, Cantock's Close, Bristol BS8 1TS, UK.

For further details telephone 0117 925 6450 (answerphone after 5pm), or minicom 0117 928 8894, or write to the Personnel Office (EO), University of Bristol, Senate House, Bristol BS8 1TH, quoting reference D611.

Closing date: 31 October 1995.

An Equal Opportunities Employer
An International Centre for Education and Research
The NRA is Europe's strongest environmental protection agency, responsible for the protection of fisheries, conservation, water resources and flood defence throughout England and Wales.

Thames Region requires three experienced hydrologists to fill positions in the Regional Water Resources Section. The roles are concerned with various stages in the collection and processing of field data and provision of a hydrological service to customers.

The first post (Ref: 5189) reports to the Hydrometry Manager and will be responsible for providing advice and support to two operational hydrometric teams based at Reading and Waltham Cross. The post holder will also be active in developing policies, procedures and best practices to ensure the development of the standard and consistency of the hydrometric service across the Region.

The second post (Ref: 5188) reports to the Principal Hydrologist and is concerned with the development and management of data processing and archiving systems, with the setting up and implementation of associated quality assurance procedures and acting as a focus for customers of hydrological information.

The third post (Ref: 5210) also reports to the Principal Hydrologist. The post holder will be involved in the use and development of soil moisture and river flow models, hydrological procedures and techniques in order to provide a hydrological service to other departments.

Applicants for all the posts, must be highly motivated and hold a degree in environmental science, civil engineering or geography. You must preferably have a relevant higher degree and at least three years' experience relevant to hydrology or hydrometry. A full driving licence will also be required.

Applicants for the first post (Ref: 5189) should be able to demonstrate good communication skills and the energy and enthusiasm to influence and help co-ordinate much of the organisation and development of the hydrometric function. Applicants for the other posts will also need communication skills to enable them to influence internal practices and to develop relationships with customers, they should also be able to demonstrate considerable experience in the development and use of software for data analysis or modelling.

The posts will provide excellent opportunities to develop technical and personal skills and the service we provide. They are initially offered on a 12-month contract which may be renewable.

For further information and an application form, please telephone 01734 535667 or write to the Personnel Department, National Rivers Authority Thames Region, Kings Meadow House, Kings Meadow Road, Reading, Berks RG1 8DQ. Please quote appropriate reference. The closing date for receipt of applications is 19 October 1995.

The NRA is committed to achieving Equal Opportunities.
INTEGRATED SCIENTIFIC INFORMATION SYSTEMS

SUPPORT SPECIALIST
MDL Information Systems is the world's leading supplier of chemical information management systems. Our clients include many of the largest international pharmaceutical, agrochemical and chemical companies.

We are seeking an additional Technical Support Specialist, to join our energetic UK support team. The primary responsibilities include:
• Pre- and Post-sales support, including presentations and demonstrations to new and existing customers
• Specification, development and implementation of customised ISIS applications
• Customer Support and training

The ideal candidate would have a degree in Chemistry or a related discipline, demonstrable experience of application building in Windows or Macintosh and experience of Relational Database Management Systems. A working knowledge of ISIS, with UNIX and/or VMS experience would be a distinct advantage.

Self motivation, flexibility and a desire to help customers get the very best from MDL products are vital qualities for this varied role.

Reporting to our Technical Support Manager, the chosen candidate will join our enthusiastic and friendly team in Camberley. Benefits include a competitive salary, performance related bonus, company car, private healthcare insurance, pension scheme and 25 days annual leave.

We enjoy what we do and have an excellent reputation for high quality technical support and consulting. If you believe you have the experience, skills and personality to help us maintain that tradition, send your CV to:

CLARE HALL

Research Fellowships in the Sciences

The Governing Body of Clare Hall proposes to elect one or more non-stipendiary Research Fellows in the Sciences for a period of three years starting mainly from October 1996. There are no restrictions on age, sex or previous standing, except those who have previously held College Research Fellowships in Oxford or Cambridge are not eligible. The closing date for the receipt of applications and references is 1 December 1995. Candidates are responsible for seeing that their curriculum vitae and references reach the College by this date.

Application forms to be obtained (written requests only, stamped addressed envelope required) from: The College Secretary, Clare Hall, Herschel Road, Cambridge CB3 9AL, UK.

Clare Hall is a charity for the promotion of education.

THE UNIVERSITY OF SHEFFIELD
DEPARTMENT OF ENGINEERING MATERIALS

EXPERIMENTAL PHYSICIST TO WORK ON PLASMA POLYMERISATION

Applications are invited for the above position, tenable for 18 months, to work on a DTI/EPSRC LINK project concerned with the deposition of hard coatings using microwave plasmas. Experience in vacuum instrumentation is essential; plasma and/or surface science background preferable. Candidates should have a Ph.D. or equivalent experience. Salary within £14,317 - £21,519 pa.

Informal enquiries to Professor F R Jones (0114-282 5477) or Dr R D Short (0114-282 5475).

Closing date for applications: 20 October 1995. (Ref.R759)

DEPARTMENT OF CHEMISTRY
HIGH TEMPERATURE SCIENCE LABORATORIES

RESEARCH FELLOWSHIP(S)
"CHEMICAL VAPOUR DEPOSITION"

A 1 year postdoctoral Research Fellowship is available immediately for experimental work on chemical vapour deposition (CVD). Shorter term appointment(s) will also be considered. Applicants should be graduates or Ph.D.s with interest and experience in CVD. Salary within £14,317 - £21,519 pa.

Informal enquiries to Dr Robin Devonshire (Tel: 0114-282 4468; Fax: 0114-270 1563).

Closing date for applications: 27 October 1995. (Ref.R760)

Further particulars, quoting the appropriate reference number, from the Director of Human Resource Management, The University of Sheffield, Western Bank, Sheffield S10 2TN, Tel: 0114-282 4144.

Founded in 1905, the University of Sheffield provides higher education within a research-led environment. We encourage equality of opportunity for all.

Assistant Scientific Officer

Applications are invited for the post of Assistant Scientific Officer in the Division of Neurophysiology. The successful applicant will join a team working on the release and actions of hormones involved in controlling growth. The main duties of the post include carrying out radio-immunoassays to measure hormone levels in small samples of blood; assisting in the preparation of special equipment used in the experimental sampling procedure and assisting other members of the group with general analytical methods. Full training will be provided.

Applicants should possess relevant experience/qualifications in the biological sciences and be able to work in a team. The minimum entry requirements for this grade are 4 GCSE passes (at Grades C or above) including English and Maths or a science subject.

Salary for this position will be on the Civil Service Assistant Scientific Officer scale (up to a maximum of £16,640 per annum inclusive of London Weighting and pension supplement). A performance related pay scheme is in operation.

Application forms are available on 0181913 8544, or write to Mr Graeme Liddle, Assistant Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA, quoting reference number PN/5460. The closing date for complete applications is 27th October 1995.

The MRC is an Equal Opportunity Employer

RESEARCH ASSISTANT  
£13,941 - £15,566 (under review)

To work on a three year, Wellcome Trust funded project on oxidative stress associated with parasitic gut infections in sheep. The project is a collaboration between Napier University and The Moredun Research Institute, Edinburgh.

You should have an honours degree in an appropriate subject together with some experience in cell biology, biochemistry or immunology and you will be encouraged to register for a Ph.D.

Application forms and further particulars are available from the Director of Personnel Services, Napier University, 219 Colinton Road, Edinburgh EH14 1DJ. Tel: 0131 455 4658 (24 hour answering service). Closing date: Monday 30 October 1995.

Investing in teaching and research to serve the community.  
UNIVERSITY OF CAMBRIDGE
Department of Engineering

University Lecturer or Assistant Lecturer in Heat Transfer

A vacancy exists for a University Lecturer or University Assistant Lecturer to take up his or her appointment on the 1st January, 1996, or as soon as possible thereafter. The person appointed will be expected to play a part in the teaching of the four-year course leading to the B.A. and M.Eng. degrees. He or she will have an active research record within the general field of thermodynamics and fluid mechanics and a special interest in heat transfer under conditions relevant to industrial processes. The scales of annual stipends for a University Lecturer are £18,924 rising by eleven annual increments to £28,215 - and for a University Assistant Lecturer £15,154 - rising by seven annual increments to £19,848.

Further information and application forms may be obtained from the Secretary of the Appointments Committee of the Faculty of Engineering, Faculty Board Office, Department of Engineering, Trumpington Street, Cambridge CB2 1PZ, to whom completed application forms and a curriculum vitae should be sent so as to reach him not later than 31st October 1995.

The University is an equal opportunities employer and aims to achieve the highest quality in teaching and research.
EORTC
European Organization for Research and Treatment of Cancer
Central Office/Data Centre, Brussels

Medical/Scientific Writer

EORTC is an international organization at the forefront of promotion and co-ordination of cancer research in Europe.

We are seeking an experienced medical/scientific writer, with English mother tongue, to work on a number of exciting and important projects. Applicants should be highly motivated, well organized, and used to working with minimal supervision to tight deadlines. The successful applicant will be based in our attractive modern office on the outskirts of Brussels. Salary will be negotiable, depending on experience.

Letters of application and curriculum vitae should be sent by 2nd November 1995 to Professor Francoise Meunier, Director, EORTC Central Office/Data Centre, Avenue E. Mounier 83, boite 11, B1200 Brussels, Belgium.
Fax 00 322 7712040
SELWYN COLLEGE
CAMBRIDGE

Trevelyan Research Fellowship

Selwyn College, Cambridge invites applications for a Trevelyan Research Fellowship tenable from 1 October 1996 for three years. The holder of the Fellowship will be expected to conduct research in Natural Sciences, Medical Sciences, Mathematics or Engineering. Candidates must be completing, or have completed within the last three years, a Ph.D degree.

Further particulars are available from the Master's Secretary, Selwyn College, Cambridge CB3 9DQ. The closing date for applications is 28 October 1995.

Selwyn College is dedicated to excellence in teaching and research.
UCL HOSPITALS
University College
London Hospitals NHS Trust
Diagnostic & Support Services Division
Department of Haematology

Trainee MLSO £10,054 - £10,626 p.a. inc.

Do you have a degree in Medical Laboratory Sciences or Biomedical Sciences or an HNC in Haematology and Transfusion?

We have a vacancy in this busy haematology department. The department is well equipped and employs a wide range of techniques. The successful candidate would have the opportunity to rotate through the following sections: Immunocytochemistry and markers, haemoglobin electrophoresis/globin chain synthesis, bone marrow cryopreservation, routine and special coagulation, routine Haematology and Blood Transfusion. You will be required to work towards State Registration in Haematology and Blood Transfusion, for which study leave is granted. Encouragement is given to pursue further qualifications in the relevant field.

There is an interest free season ticket loan scheme, social club providing bar and sports facilities, staff restaurants and single accommodation if required.

For further information, please contact Mary Popeck on 0171 380 9887.

For application forms and job packs, please contact the Personnel Department, University College London Hospitals NHS Trust, Mortimer Street, London W1N 8AA. Tel 0171 380 9170 (daytime) or 0171 380 9166 (24 hour answerphone).

Please quote reference number: PAD/69.

Closing date: 20th October 1995.

An employer committed to equal opportunities. Staff benefits include: pension scheme, nursery, playscheme, flexible working and subsidised catering. All jobs are open to job sharing with or without a partner.

We actively discourage smoking at work.

Great Ormond Street Hospital for Children NHS Trust
and the Institute of Child Health

Clinical Scientist
Department of Biomedical Engineering

We need a high-calibre Clinical Scientist to provide electronic and computing engineering design services in support of the Epilepsy Surgery Programme at this Hospital as well as participating in research specifically in the area of problems associated with epilepsy monitoring.

The post holder will be a key member of a team of Clinicians and Scientists and will oversee all technical aspects of the project.

The ideal candidate will have a good honours degree in Electronic-Computing Engineering as well as at least two years' relevant experience, preferably in Medical Engineering.

For an application form and job description contact our 24-hour Recruitment Line on 0171-829 8606 or write to the Personnel Department, Great Ormond Street Hospital for Children NHS Trust, London WC1N 3JH. Please quote Ref: 53SP.

Closing date: 20th October 1995.

The child first and always

Applications from job sharers are welcome.
A leading international publisher of medical and scientific books and journals is seeking two

**Scientific Editors**

and an

**Assistant Scientific Editor**

The first position is for candidates with a Ph.D. degree in organic chemistry and a strong background in organic synthesis. The second position is for a candidate with a first degree in chemistry who has displayed particular interest in organic synthesis.

Excellent language skills are required in English. Strong motivation, good organisational skills and a methodical approach towards problem solving as well as the ability to work as an integral member of a team are required. Computer experience would be advantageous.

Thieme offers an attractive salary, a comprehensive benefits program and relocation assistance. The successful candidates would be expected to be able to take up the position by 1 January 1996.

Interested? If you would like to apply for this position, then send us a full CV, containing the names of two current referees accompanied by a handwritten supporting letter.

Closing date 31st October 1995.

BIRKBECK COLLEGE
UNIVERSITY OF LONDON
DEPARTMENT OF CHEMISTRY

RESEARCH STUDENTSHIP IN COMPUTATIONAL CHEMISTRY

BBSRC Earmarked Studentship for a project entitled The Dynamic Searching of Free Energy Surfaces With Application to the Drug Design.

Applications are invited for a BBSRC Earmarked Studentship in the Chemistry Department at Birkbeck College, University of London, under the supervision of Dr Paul King. The studentship is fully funded for a period of 3 years and will lead to a Ph.D. degree.

The project is concerned with the development of a computer simulation method for the design of novel guest molecules for macrocyclic hosts (e.g. proteins and DNA molecules) and hence lies in the general area of rational drug design. It will utilise classical force-field methods and molecular dynamics, and will entail methodological development in these areas.

Students who have, or expect to obtain, a good degree in chemistry or a related subject should send a CV and the names and addresses of two academic referees to the address below as soon as possible. Further details can also be obtained from the same address. While relevant experience in computer simulation or molecular modelling would be beneficial, it is not essential. The studentship has an enhanced stipend which is currently £8,300 per annum.

Address for applications and further details: Dr Paul M King, Department of Chemistry, Birkbeck College, Gordon House, 29 Gordon Square, London WC1H 0PP. Tel: 0171-380 7472 (Direct), 0171-380 7466 (Departmental Office). Fax: 0171380 7464. Email: p.king@ucl.ac.uk.

BPL
Bio Products Laboratory

TECHNICIANS
Starting salary £12,661 - £14,885 p.a. inclusive
appropriate allowances paid for shift working

There are vacancies for Technicians in our Immunoglobulin Processing Section (Reference: IG/01) and Albumin Solutions Section (Reference: AS/01). The Technicians are required to undertake general production duties which involves working with products of high value and applicants must be able to demonstrate a mature and responsible attitude to work. In both areas, the persons appointed will be joining a small, flexible team and will be required to participate in a shift working operation.

In the Immunoglobulin Processing Section, the range of duties will include all aspects of production up to the transfer of bulk product for sterile filling, virus inactivation by solvent detergent treatment, running a chromatographic column and an ultrafilter and carrying out clarifying and sterilising filtrations. The work will also include preparation of equipment and the operation of clean-in-place and steam-in-place systems. The hours of work will be 9.00am to 5.00pm initially, but moving to shift working (6.00am to 2.00pm and 2.00pm to 10.00pm on alternating weeks). Flexibility during the period of change will be necessary.

In the Albumin Solutions Section, the range of duties will include the operation of ultrafilters and a chromatographic column. The hours of work will be 6.00am - 2.00pm (3 weeks in 4) and 11.30am - 7.30pm (1 week in 4). A willingness to work some overtime, when required, is desirable; this will normally be following the morning shift.

For both positions, candidates with good “A” level passes will be considered but a degree or equivalent in a relevant discipline would be preferred. Experience in the use of computers and of computer control systems will be a distinct advantage. An ability to maintain accurate records and to assist in the generation of written procedures is essential.

For an application form, please telephone 0181 207 6415 (24 hour answerphone) quoting the appropriate reference number or write to the Personnel Office at the address below.

Dagger Lane, Elstree, Herts. WD6 3BX
Tel: 0181 905 1818 Fax: 0181 207 4824

A unit of the National Blood Authority. A Special Health Authority within the NHS.
NATIONAL BLOOD SERVICE
Laboratory Managers

Applications are invited for 2 Laboratory Managers for our Departments of Engineering (Ref 95139) and Materials/Interdisciplinary Research Centre (Ref 95140). The main responsibilities will be to organise the Departments’ laboratory research and teaching programmes and to manage the Departments’ technical support staff.

For both positions it is essential that you are educated to Degree level in Engineering or a Physical Science. You should have relevant research experience together with experience of the development and manufacture of laboratory equipment and/or the testing of materials. You should also have experience of teaching undergraduate and postgraduate students the principles and operation of a range of experimental techniques and be able to organise an undergraduate laboratory programme including the writing of laboratory instruction sheets for students. You should be computer literate with experience of a variety of software packages. Preferably you have had experience of managing a team of technical support staff.

The salary will be in the range £18,762 - £23,653 pa inclusive depending on experience. Benefits include a holiday entitlement of 31 days a year, superannuation scheme and season ticket loan.

For an application form and further details please telephone our 24 hour Recruitment Line on 0171-975-5171 quoting the relevant Reference No. Only completed application forms will be accepted and these should be returned by 20 October 1995 to the Recruitment Coordinator, Personnel Office, Queen Mary and Westfield College, Mile End Road London E1 4NS.

UNIVERSITY OF LONDON
WORKING TOWARDS EQUAL OPPORTUNITIES

A multi-faculty college of the University of London engaged in teaching and research of international distinction

Guy’s & St Thomas’ HOSPITAL TRUST
WOMEN’S SERVICES
ASSISTED CONCEPTION UNIT

EMBRYOLOGIST
2 year fixed term contract
Clinical Scientist Grade A - £13,705 - £17,401 p.a. inc. (dependent on experience)

We are looking for an Embryologist to join a successful NHS IVF Unit at St Thomas' Hospital. You will be involved in laboratory aspects of assisted conception including gamete handling, embryo culture and cryopreservation. The post offers an outstanding opportunity to learn ICSI and to become involved in the latest developments in the treatment of infertility.

Experience in mammalian embryology is an advantage although full training will be given. Applicants will be expected to have a BSc in a biological subject and to have an interest in reproductive physiology. Some weekend work will be expected on a 1 in 3 basis.

Informal enquiries can be made to Mrs P Rowell on 0171 922 8105.

Benefits include: Library • Social Club • Hairdresser • Sports Facilities • Counselling Service • Opportunities for training and development • On-site Nursery

For application details please contact Women and Children's Services, Personnel Department, 1st Floor, North Wing, St Thomas' Hospital, Lambeth Palace Road, London, SE1 7EH. Tel: 0171 928 9292 ext. 2792 (answerphone), quoting reference: E/056.

Closing date: 19th October 1995.

Aiming to be an equal opportunities employer.

POSITIVE ABOUT DISABLED PEOPLE
A position is available in a group concerned with studies of the aetiology of childhood cancer in particular the identification of specific associations between childhood and adult cancers and conditions which may predispose to childhood cancer. The appointee will be expected to play a full role in the development of the research programme. The post will involve the analysis of a broad spectrum of general epidemiological and genetic epidemiological data and management of these data. Applicants should be graduates in statistics or other relevant subject. Some postgraduate research or work experience in biostatistics, medical statistics, epidemiology or related area is essential. A higher degree in a relevant subject is desirable. Applicants must have expertise in general statistical methods and knowledge of epidemiological / genetic epidemiological methodology would be an advantage.

The post will be paid on the University Research and Analogous Scale 1A in the range £14,317 - £21,519 per annum and will be for 12 months in the first instance but may be extended to 30th September 1999.

Application forms and further details may be obtained from: Dr J M Birch, Director, CRC Paediatric and Familial Cancer Research Group, Royal Manchester Children's Hospital, Stancliffe, Hospital Road, Manchester M27 4HA.
Tel: 0161-727 2507. Closing date for receipt of applications is 16th October 1995.
Advancement through excellence

Rapid growth and expansion over the past two years has confirmed Chiroscience's place as the world's leading and most innovative chiral pharmaceutical company. Our core chiral expertise will continue to drive our business into the next century, ensuring the continual advancement of our product pipeline and sustaining our dynamic progress.

CHIROSCIENCE
The chiral pharmaceutical company

PHARMACEUTICAL PROJECT CO-ORDINATOR

The success of our single isomer development programmes and our NCE research has created the need for an additional Project Co-ordinator within Chiroscience's Pharmaceutical R & D department. The successful applicant will be responsible for the day-to-day running of programmes, including management of external contractors and consultants and co-ordination of internal resources. You will also be involved in the presentation of projects to senior management and potential partners.

You will have either a graduate or postgraduate qualification and several years' development experience in the pharmaceutical industry. Project management experience would be an advantage. Applicants must be flexible, motivated, have good organisation abilities, attention to detail, excellent communication skills, experience with Windows-based software and be willing to travel both within the UK and overseas.

MEDICINAL CHEMIST

A first degree Chemistry graduate with 3-5 years' experience of organic synthesis within the pharmaceutical industry, you will join a team of chemists applying intellectual and synthetic skills to the discovery of novel pharmaceuticals. There are a wide variety of synthetic chemistry problems to be solved, and as an outstanding chemist you will have a unique opportunity to establish your career at the forefront of pharmaceutical research.

We offer good facilities for training and development, as well as the opportunity for you to contribute in a significant way to major research programmes. Our focus is on discovering new compounds that will influence the treatment of inflammatory disorders, cancer, cognitive disorders and autoimmune diseases.

Chiroscience provides an exciting project-orientated working environment with the opportunity for enthusiastic individuals to make a significant contribution to the discovery and early development of new pharmaceuticals.

Salary and benefits are competitive - reflecting the importance we place on the recruitment of high quality staff.

If you would like to develop your career in one of the country's most exciting pharmaceutical companies, please send a full CV, quoting ref NS/10/95, to: The Personnel Manager, Chiroscience Limited, Cambridge Science Park, Milton Road, Cambridge CB4 4WE.
King’s Healthcare NHS Trust  
Nuclear Medicine Department

Clinical Physicist  
B Grade (Spine 17-19)

A B Grade Clinical Physicist is required to join a team of three physicists providing scientific and management support for the Nuclear Medicine Department at King's College Hospital. The appointed physicist will work under the Department Manager (a Consultant Physicist) and the Clinical Director.

The department is housed in newly refurbished premises with modern equipment (ADAC Genesys and Pegasys systems installed 1993) and has a high and rising workload of both routine studies and research and teaching.

For an informal discussion or further information, application form and job description, please contact the Consultant Physicist, Dr Nicholas Brown, on 0171 346 3153.

Closing date: 19th October 1995.

WORKING TOWARDS EQUAL OPPORTUNITIES

KING’S HEALTHCARE  
MRC
Medical Research Council
NATIONAL INSTITUTE FOR MEDICAL RESEARCH

Scientific Officer

The Division of Developmental Neurobiology invites applications for the post of Scientific Officer to participate in projects investigating the molecular basis of early vertebrate development. Applicants should possess a degree, BTec Higher Certificate or equivalent qualification in an appropriate scientific discipline. Prior experience of molecular biology and/or developmental biology would be an advantage.

The salary for this position will be on the Civil Service Scientific Officer scale (with an initial salary of up to £18,630 per annum inclusive of London Weighting and pension scheme). A performance related pay scheme is in operation.

Please telephone for an application form, quoting reference number GDNB/0197 on 0181 913 8544, or write to Mr Graeme Liddle, Assistant Personnel Officer, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA. The closing date for completed applications is 27 October 1995.

The MRC is an Equal Opportunities Employer

Smoking is actively discouraged
Applications are invited for this postdoctoral research assistant post, funded for a 3 year period by the Engineering and Physical Sciences Research Council (EPSRC).

The central theme of the project is process tomography, in which the attenuation of some form of energy beam by the different phases within a process vessel can be used to reconstruct (3-D) cross sectional images of the phase distributions. The scope of the project is focused on the statistical treatment of multivariate process tomographic images, with the specific aim of enabling rapid and reliable data extraction for process control purposes.

The successful applicant will preferably have some experience in process control, image analysis (using multivariate statistical techniques) and processing, principal component analysis and neural network. Some general knowledge of the use of Matlab and its toolboxes, Unix programming and operation would be useful. Starting salary will be £15,566 plus London Allowance of £2,134. Applicants should have, or be about to complete a Ph.D.

Those interested should send their CV, together with the names and addresses of two referees, to: Dr. Stefan Simons, Dept. Chemical & Biochemical Engineering, University College London, Torrington Place, London WC1E 7JE. E-mail: stefan.simons@ucl.ac.uk Tel: 01711119 3805 (direct) Fax: 0171-383 2348

PURSUING EXCELLENCE IN EDUCATION AND RESEARCH
ROYAL NATIONAL ORTHOPAEDIC HOSPITAL (NHS) TRUST
Brockley Hill, Stanmore, Middlesex HA7 4LP

Medical Technical Officer
MT02/3 (Electronics)

The Royal National Orthopaedic Hospital Trust is a world renowned centre of excellence in the field of orthopaedics and spinal injuries.

This is a joint appointment with the Medical Physics and Occupational Therapy departments. The successful applicant will be required to assist the Chief Medical Technical Officer in carrying out first-line servicing of electromedical and anaesthetic equipment. He/she will also be required for the design and implementation of electronic equipment and devices to assist spinally injured patients with their everyday tasks.

The successful applicant should have a minimum of a HNC in electronic engineering.

Please contact Mr S. Rebello, Medical Physics Department for further information.

For application forms and job descriptions please contact The Personnel Department, The Royal National Orthopaedic Hospital Trust, Brockley Hill, Stanmore, Middlesex HA7 4LP.

Outstanding individuals are invited to apply for postdoctoral positions in the research group of Dr David Leigh to work on supramolecular assembly processes and their applications (see *Angew Chem Int Ed Engl*, 1995, 34, 1209 & 1212). Candidates should have a strong background in either organic synthesis or polymer chemistry. Salary will be within the range £14,317 - £21,519 per annum, depending upon experience. The post is available for one year in the first instance.

To apply, send a full CV and the names and addresses two referees to: Dr David Leigh, Department of Chemistry, UMIST, PO Box 88, Manchester M60 1QD. Reference CH/CV/138.

A Centre of Excellence in education and research and an equal opportunity employer.
Research Fellowship

Applications are invited for a Research Fellowship funded by The Leverhulme Trust to work on the mathematical modelling of diffraction and inelastic scattering of electrons and polarized light from atomically rough surfaces of crystals using statistical methods. The project is linked with a program of experimental work on surface structure of crystals grown by molecular-beam epitaxy, and the Fellow will be encouraged to interact closely with the IRC in Semiconductor Materials at Imperial College, London.

The Fellowship, available from 1 January 1996, will be for up to three years. Familiarity with statistical treatment of wave scattering by random systems would be an advantage.

The salary scale is £14,317 - £21,519 depending on age and experience.

Applications Including a curriculum vitae and the names and addresses of two referees, should be sent to the Administrator, Department of Materials, Parks Road, Oxford OX1 3PH from whom further particulars can be obtained. Closing date 1 November 1995.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

RESEARCH FELLOW/ASSOCIATE 1A
Division of Immunology
Guy's Campus

required to undertake research on the immunology of the simian immunodeficiency virus. Applicants should possess a BSc or equivalent and have several years' experience in lymphocyte culture or cytotoxic cell assay and virus techniques. A Ph.D. or a working knowledge of the immunology of AIDS is desirable. The post is available immediately until 31 December 1996 in the first instance. Salary in the range £14,317 - £19,848 pa plus £2,134 pa LW.

For a job description and details about the application procedure, please call 0171-922 8049 (24 hours) quoting reference G/IMM/497a.

Closing date for receipt of applications: 20 October 1995.

University of Bristol
Department of Physics

Postdoctoral Research Assistant in High Pressure Scanning Electron Microscopy

This post, financed by the BBSRC, is for two years in the first instance. Appropriate research experience required and ability to demonstrate a high degree of competence in computer programming-particularly with Macintosh computers - electronics, instrumentation, low angle x-ray diffraction and scanning probe microscopes. Experience and interest in application of physics to materials of biological origin is vital.

Informal enquiries to Dr J. S. Shah, Department of Physics (tel: 0117 9288719. Secretary: Mrs Boxhall tel: 0117 9288314). For further details telephone (0117) 925 6450 (answerphone after 5.00pm) or minicom (0117) 928 8894 or write to the Personnel Office (EO), Senate House, Bristol BS8 1TH, quoting reference D614. Closing date for applications by letter and CV, with the names and addresses of two referees, is 23 October 1995. Salary in range £14,317 £15,986.

An Equal Opportunities Employer. An International Centre for Education and Research.
UNIVERSITY OF CAMBRIDGE
Department of Genetics

Research Positions

Postdoctoral positions available in the group of Prof P Goodfellow to work on the genetics of sex determination. One position is available from 1st February 1996, funded by the Wellcome Trust; a background in either molecular genetics or protein biochemistry is preferred. Further details can be obtained from SEXLAB@gen.cam.ac.uk Send applications including c.v. to Prof P Goodfellow, Department of Genetics, University of Cambridge, Tennis Court Road, Cambridge CB4 3EH, UK.

The University is an equal opportunities employer and aims to achieve the highest quality in teaching and research.
Leatherhead Food RA

PROCESSING MODELLING EXPERT
Food Preservation

Leatherhead Food RA is expanding its specialist team that assists member companies in developing food processes and carries out Government, EU and other funded research and development work. This demanding role requires a self motivated person who has a sound knowledge and experience in modelling food sterilisation and dehydration processes. The candidate must be able to develop new ideas and carry through projects from proposal stage to completion.

Key requirements:

A mature experienced male or female graduate in food technology or engineering with an MSc or Ph.D. is required. The candidates must have a significant and proven experience in food process research and equipment development.

Demonstrable experience of food preservation process technologies, including the modelling of aseptic particulate systems and the general ability to model food processes. Specific skills and experience in designing test systems to measure process parameters, along with general food equipment design principles, are also a requirement. The ability to carry out pilot scale trials would be beneficial. Fluency in at least one foreign language (East European or Far Eastern) is required to meet the needs of the expanding food market and our activities in those areas. Experience in giving training would be an advantage.

Please apply in writing, enclosing full CV, to Mrs Joan Cox, Leatherhead Food RA, Randalls Road, Leatherhead, Surrey KT22 7RY.

Closing date for applications: 26 October 1995.
THE CHALLENGE COULD BE YOURS

CLINICAL DATA ASSISTANTS BERKSHIRE

Wyeth Research (UK) is part of a world leading pharmaceutical company with an impressive record of growth in the field of medicine and nutrition, founded upon a commitment to research.

Recent organisational change, resulting from a programme of acquisition and development, continues to build upon this solid record, creating a dynamic and challenging work environment. This is particularly true of the Data Management Department and has led to the creation of a number of new opportunities.

We are looking for CLINICAL DATA ASSISTANTS with the necessary skills to work in fast moving, project oriented teams. Responsibilities include the review and computer validation of clinical data, the resolution of problems and liaising with other departments, both local and overseas. Candidates should ideally possess a life science degree or other relevant qualifications. Experience is not essential as full training will be provided.

In return we offer a competitive salary and a comprehensive benefits package, including 25 days annual holiday, a contributory pension and life assurance scheme; free medical insurance, an excellent subsidised staff restaurant and an active sports and social club. Our offices, between Slough and Maidenhead, are within easy reach of the M4, M40 and M25.

If you are interested please forward your CV quoting ref: WR03 to: The Personnel Officer, Wyeth Research (UK), Huntercombe Lane South, Taplow, Nr Maidenhead, Berkshire SL6 0PH. Telephone: 01628 604377 ext. 4341.

Are you: Flexible Detail Focused Highly Organised A clear Communicator Team Orientated

Wyeth Research (UK)
EXPERIENCED MEDICAL WRITERS
ADELPHI COMMUNICATIONS

specialises in communication programmes to support the marketing objectives of international pharmaceutical industry clients. As a member of the expanding Adelphi Group of companies /with offices in the UK, Belgium, France and New York/, Adelphi Communications offers excellent career prospects for talented and enthusiastic individuals.

As a result of recent new business gains, we are now seeking to appoint a number of experienced medical writers. Applications are sought from writers who can demonstrate an excellent editorial track record gained within an agency or pharmaceutical industry environment. Applications from candidates with expertise in anti-infectives, anti-virals, oncology, psychiatric illness or regulatory affairs would be particularly welcome, however, good writing skills and an enthusiastic attitude are as important.

If you are a self-starter who can work well under pressure, have a good biological science degree and a minimum of two years relevant experience, we would like to hear from you.

Please send your full CV, together with a letter stating why you are a suitable candidate for a job in a demanding (and rewarding) agency environment, to: The Editorial Director, Adelphi Communications Ltd. Adelphi Mill, Bollington, Macclesfield, Cheshire. SK10 5JB

Adelphi Communications offers an attractive package including life insurance, pension, private health and profit-share schemes. Where necessary, relocation packages will be negotiated. We work in a pleasant, smoke-free environment in rural Cheshire but within easy reach of Manchester.

Regulatory Affairs
Manage key European regulatory projects

West of London
c. £40,000

At the cutting edge of pharmaceutical research, our client's prolific new product pipeline and outstanding growth record continues at an astonishing pace. Its Regulatory Affairs Department is recognised as the leader within a quality-focused industry, managing the vast number of new products going through the centralised European system.

International and European registrations are coordinated and progressed from its head office just west of London. This high-profile regulatory project leader role offers a golden opportunity for an ambitious professional to join an international therapeutic team, take responsibility in Europe for specific projects, and make an impact in a rapidly changing organisation.

Mutual recognition procedures will involve significant contact with the EMEA, as well as American colleagues and European affiliates, so your skill in establishing and developing effective working relationships will be crucial in driving projects forward to achieve rigorous time and quality goals.

In addition to possessing a life science degree and substantial regulatory experience, you must be able to coordinate numerous projects - with the meticulous attention to detail demanded by each individual licence application - and formulate relevant procedures to ensure the company's leading reputation is both maintained and enhanced.

If you're looking for an influential role in making things happen with a global leader, send your cv to Ann Judge, Eames - Jones - Judge - Hawkings, 29 High Street, Welwyn, Herts AL6 9EE. Telephone: 01438 840984. Fax: 01438 840429.

Lilly

Eli Lilly and Company are world leaders in the development, manufacture and marketing of pharmaceutical products.

Our Basingstoke manufacturing plant specialises in producing tablets and filled capsules for both the UK domestic and export markets and is a key site for the introduction of our range of new products.

We now require a number of:

**Senior Pharmaceutical Analysts**

Based in our Quality Control Laboratories, you will need to demonstrate:

- Industrial analytical experience, preferably within the pharmaceutical sector
- GLP/GMP experience is essential
- HPLC/GC experience an advantage
- Proven project co-ordination and/or troubleshooting and supervisory experience

You must have good organisation and planning skills, be highly motivated self-starters and be able to work in a team environment. For people with initiative and ability, you will find the future is wide open in a Company that is committed to you.

We provide competitive salaries with regular reviews, 5 weeks' holiday, non-contributory pension and life assurance scheme, BUPA and excellent facilities at our site in Basingstoke.

For more information, please apply in writing with a CV to: The Personnel Officer, Eli Lilly and Company Limited, Kingsclere Road, Basingstoke, Hants RG21 6SA.

ABERDEEN ROYAL HOSPITALS NHS TRUST
Aberdeen Royal Hospital NHS Trust

DEPARTMENT OF BIO-MEDICAL PHYSICS AND BIO-ENGINEERING

HEAD OF NHS RADIATION PROTECTION SERVICE
CLINICAL SCIENTIST GRADE C (SALARY RANGE £29,904 - £40,924) Ref. No. 94357

The Aberdeen Royal Hospitals NHS Trust has a vacancy for an experienced physicist to act as its head of radiation protection service. This group is part of the department of Biomedical Physics and Bioengineering and is located in the Physical Sciences Directorate. Currently the group consists of a Grade B clinical scientist and a technician. The applicant will also be expected to liaise with the university's RPA.

Aberdeen Royal Hospitals Trust is a major teaching hospital and the postholder will be expected to be involved in the scientific development / research activities of the department as well as taking part in teaching. The department, which has a Grade 5 research rating, has a wide range of scientific support services including mechanical and electronic workshops and a well equipped computing section. The post-holder is required to have 10 years relevant experience in radiation protection and allied subjects. Applicants should normally have a higher degree, preferably a Ph.D., and hold a Certificate in Radiation Protection from an appropriate organisation. Applicants not holding these qualifications may be considered for initial appointment at a lower grade.

Aberdeen is an attractive city which offers a high standard of living. Situated by the sea, it is within easy reach of scenic walking and climbing areas and winter ski resorts. There are good air, road and rail links with the rest of the UK and Europe.

Informal enquiries to Prof. P.F. Sharp on (01224) 840733. Application form/Job description from Human Resources on (01224) 840679 (24hr jobline) quoting the above Ref. No. Closing Date for applications 3 November 1995.

HR HUMAN RESOURCES
"We are committed to Equal Opportunities"

POSITIVE ABOUT DISABLED PEOPLE
MS-ACCESS Programmer/Analyst
Fixed term appointment

A programmer/analyst is required to work as part of the Applications Development Team of the Computer Unit maintaining and extending the SEPASAL database for the Centre for Economic Botany. The software used is Microsoft ACCESS, together with third-party DLLs providing simple mapping functionality.

Prior experience of developing software in Microsoft ACCESS is desirable, although candidates with experience of developing applications in other Windows relational database packages or in Visual Basic may apply. The successful candidate will be expected to develop an in-depth knowledge of ACCESS and the target application. They will also liaise closely with Centre for Economic Botany staff in defining requirements, prototyping and implementing the software, under the management of a team leader, so well developed interpersonal skills, initiative and flexibility are necessary. An interest in plants and development issues would be advantageous.

The post is for 18 months with a possibility to extend to 2 years. Starting salary for a 36-hour week will be in the range £11,673 to £16,000 depending on experience.

For an application form and further information about this post please telephone 0181-332 5150/5153, or write to David Green, Personnel Section, Royal Botanic Gardens, Kew, Richmond, Surrey TW9 3AB.

The closing date for completed applications is 23 October 1995.

An equal opportunities employer

The Defence Research Agency is an agency of the Ministry of Defence with the mission to be the prime provider of technical advice to the MOD. We also provide advanced technical services to other Government Departments and to private industry.

Acoustics and Electromagnetics of New Materials  
Structural Materials Centre - Farnborough, Hampshire

The Structural Materials Centre (SMC) is one of the largest materials research laboratories in Europe with a reputation for scientific and technological excellence.

Physics research on acoustical and electromagnetic materials, the interaction of wave propagations with materials, and associated measurement techniques are key capabilities and we are expanding our research in these areas for a wide range of Defence, Civilian and Medical applications.

Over the next 12 months we are recruiting ambitious, well qualified graduate and postdoctorate physicists, engineers and mathematical scientists for the above programmes. Whilst welcoming expressions of interest from scientists who may not be available for 6 to 12 months, the following posts are of current interest:

Acoustical Materials at Ultrasonic Frequencies: research on the design and measurement of viscoelastic energy absorbing materials with precise acoustic properties in the ultrasonic frequency range. Experience in computer based digital signal processing techniques and the mathematical modelling of acoustic systems would be advantageous. Applicants' experience might be in physics, acoustics or optics.

Infrared and Microwave Materials and Measurements Techniques: research on new IR and Microwave low observable materials, their absorption, transmission and radiation properties, materials measurement techniques and performance prediction algorithms. You should have a good understanding of electromagnetic effects and relevant material properties. Applicants' experience is most likely to have been in Physics based subjects.

Participation in national and international collaborative research with industry and academia is encouraged, as is open literature publication of research.

The appointments, initially at Poole, Dorset but relocating in July 1996, will be initially for three years but may be extended or made permanent by mutual agreement. Salaries will depend on demonstrated skills and capabilities and rapid advancement is possible for high achievers. Pensions are non-contributory, and relocation costs may be offered.

DRA welcomes applications from suitably qualified people regardless of sex, marital status, race or disability.

Please contact us for an application form quoting reference E/95/SMC/33. SMC(HR), P161 Building, DRA Farnborough, Hampshire GU14 6TD. Tel: 01252-392694. Closing date for receipt of completed applications 3rd November 1995.

DRA
DRA is a division of DERA an Agency of the MOD
Renowned throughout the world for quality and innovation, Ciba Pharmaceuticals, part of the worldwide biological and chemicals group, operates in over 60 countries around the globe.

In order to enhance the UK's contribution to Ciba's global drug development process, we are looking to further strengthen and develop our statistical team.

**Medical Statistician**  
Horsham, West Sussex

As a talented Statistician, you will be joining a professional team engaged in all statistical aspects of clinical research including advising on the methodology, planning, analysis and reporting of clinical studies.

With advanced computing facilities which make extensive use of the SAS statistical package, we can offer you the opportunity to work on a range of therapeutic areas, have close liaison with clinical research teams and further develop your design and analytical skills.

A key team player with a post-graduate qualification in statistics, you should have at least three years' experience in the application of statistics for clinical trials in the pharmaceutical industry.

In return for your skills and experience, we can offer a highly competitive salary and the range of benefits commensurate with a leading pharmaceutical company.

In the first instance please send your full CV to The Personnel Department, Ciba Pharmaceuticals, Wimblehurst Road, Horsham, West Sussex RH12 4AB, quoting reference S/9.

Ciba  
Graduate Research Assistant - Plant Molecular Biology
Application of DNA Markers to Oil Palm Breeding

Plant Breeding International Cambridge Ltd is one of the operating companies of Unilever plc.

A research assistant is required to join the Plant Technology Group. The work involves development and use of DNA markers to assist the oil palm breeding programmes within Unilever. Specific applications include confirmation of genotypes in breeding progenies, identifying marker linkages to desirable traits in segregating populations and establishing genetic distance in breeding pools. The molecular marker laboratory consists of about 12 research workers and Ph.D. students developing and applying DNA screening tools against an array of crops including tomato, wheat, peas, tea and barley.

Qualifications include a degree in the biological sciences or equivalent and, ideally, practical experience in molecular biology.

For further details and application form telephone Cambridge (01223) 840411, or write to The Personnel Officer Plant Breeding International Cambridge Ltd, Maris Lane, Trumpington, Cambridge CB2 2LO (also enclose your cv and letter describing your research interests) quoting reference: BIO/212

CAMBRIDGE
PLANT BREEDING INTERNATIONAL

Closing date for receipt of applications 27 October 1995
PROJECT ANALYST
(Trace Analysis)

Zeneca's sophisticated crop protection products are synonymous with quality and innovation all over the world. We now have an opportunity for an enthusiastic Chemistry graduate to join our Yalding-based International Quality Assurance Services Group which monitors the performance of more than ten international sites.

You will be part of a small specialist project team, developing trace analysis methods, providing a general analysis service and maintaining specialised equipment including GC with Mass-Spectrometer detection.

You should have at least two years post degree experience (or equivalent) and a thorough understanding of the latest analytical techniques including analysis at ppm levels. The ability to balance the need for technically sound results with demanding deadlines will also be important.

This position will be offered for a fixed term of 12 months which may be renewable and will include an attractive salary package.

If you are interested and you want to join a leading-edge organisation which believes that valuing individuals with different backgrounds and experience will lead to improved business performance, then please send a copy of your CV to Nick Cansfield, Personnel Officer, ZENECA Agrochemicals, Yalding, Kent ME18 6HN. Closing date for applications is 13 October 1995.

HELPING FARMERS FEED THE WORLD
Post-Doctoral Research Fellowship
Wood Science/Technology Program
$38K - $43K + Superannuation
Division of Forest Products, Clayton

The Division of Forest Products is focused on increasing the value of Australian forest products by generating profitable technologies, practices and processes that improve the environment. Our Wood Science and Technology Program provides research and development expertise to all sectors of industry that utilise solid wood products.

• If you have a Ph.D. in the wood technology field and are driven by achievement and results;
• If you like being a team member involved in new and exciting opportunities;
• If you are seeking to utilise your knowledge of solid and reconstituted wood and value adding processes;
• If you would like to be involved in a series of projects related to the use of timber for high value wood products that will optimise your training and skills;
• If you are self-motivated and have the ability to initiate new and innovative ideas then this three year Post-Doctoral Fellowship within our Wood Science and Technology Program could be an excellent opportunity for you.

Further information and a copy of the selection criteria and duty statement may be obtained by contacting Ms Maria Germano on any of the following - Telephone (03) 9542 2217, Facsimile (03) 9543 6613 or Email: m.germano@forprod.csiro.au

Please forward your application addressing the selection criteria with details of skills, qualifications, work achievements and the names of two referees to: The Chief, Ms M J Germano, CSIRO Division of Forest Products, Private Bag 10, Rosebank MDC Clayton Vic 3169 Australia by October 30, 1995.

DEPARTMENT OF MATERIALS ENGINEERING & MATERIALS DESIGN

Postdoctoral Research Assistant

A Postdoctoral Research Assistant in materials is required to undertake research into the ion implantation of carbide tooling dies. This work is supported by the LINK Surface Engineering Committee and will require extensive expertise of transmission electron microscopy and wear testing.

The post is available for a period of three years and will involve extensive collaboration with the sponsoring companies.

Research Assistant

A one year project is being sponsored by Ian Sparrow Equipment Ltd to look into the development of wear resistant materials for mixing of concrete for industrial purposes. The project will require experience in standard microscopy and abrasive wear testing. It will involve on-site visits in addition to undertaking laboratory tests. There will be considerable interaction with the two main companies involved in this programme and the ability to communicate well is essential.

Applicants should send a detailed CV, together with the names of two referees, to Professor J V Wood, Department of Materials Engineering and Materials Design, The University of Nottingham, University Park, Nottingham NG7 2RD. Closing date: 27 October 1995.

The University of Nottingham

The University of Nottingham

Two three year Research Scientist (Band 7) posts are currently available for work on SOAFD Flexible Funded projects

Post A: NEMATOLOGY DEPARTMENT (Ref NEM/1/95)
To monitor the effects of transgenic plants containing foreign gene inserts for the control of plant pests. The post will involve collaborative work with the Departments of Soil Fruit and Perennial Crops and Cellular and Environmental Physiology. The person will liaise with the supervisors and undertake the bioassays and statistical analyses of tests to examine the efficacy of transgenic plants on insect and nematode pests, as well as on beneficial non-target organisms. The project will involve bioassays of nematodes (plant-feeding and saprophytic), insects (foliar and root feeding), and soil microorganisms. The successful candidate will be expected to have good laboratory practice and expertise in at least one of the following areas: soil biology, feeding-trials and plant bioassays.

Qualifications: Candidates should normally have a first or upper second class honours degree in a related science subject.

Post B: SOFT FRUIT & PERENNIAL CROPS DEPT (Ref SFG/2/95)
To work on the production and analysis of transgenic plants of a variety of species with various potentially useful genes. The successful candidate will be expected to construct vectors containing new genes and promoter sequences for further plant transformation experiments.

Qualifications: Candidates should normally have a first or upper second class degree in molecular biology/plant biotechnology or similar, and/or experience in molecular biological techniques such as DNA isolation, PCR, Southern and Northern Blotting and vector construction. Experience of tissue culture and Agrobacterium transformation is also desirable although training in this aspect could be given.

Salary: £11,929 - £20,665 plus non-contributory superannuation.

The Institute is an equal opportunities employer and is grant-aided by the Scottish Office Agricultural and Fisheries Department (SOAFD).

Curriculum vitae with the names and addresses of three referees should be sent to Mr I. Paxton, Personnel Officer, by Friday 20 October 1995 quoting the appropriate reference.

Scottish Crop Research Institute Invergowrie, Dundee DD2 5DA
Cell Biochemists
Recent Ph.D.’s, graduates and Technicians

We are in the forefront of development in life science research, nuclear medicine and industrial quality and safety assurance - and - are committed to enhancing the quality of human life through radioactive and non-radioactive technologies.

Our R & D teams are spearheading the emergence of breakthrough technologies which attract worldwide attention ... in particular bringing improvements to the quality of life by creating new methods of diagnosing and detecting disease, combined with the technologies required to discover new pharmaceuticals. If you have an interest and commitment to science, consider joining one of these high calibre teams.

We seek highly motivated individuals who desire to make a practical contribution to a high profile area of life science research. The senior appointment will be required to work with minimal supervision and interact productively with external collaborators. We want to talk to people who have a strong background in cell biochemistry.

Specifically we're looking for expertise in the isolation and characterization of membrane receptors, protein-protein interaction, enzymes and signal transduction mechanisms (such knowledge is essential for the Ph.D. and graduate level posts). It would be useful to have experience of a diversity of practical techniques such as cell culture, protein isolation, assay development, detection technologies and kinetic analysis.

Amersham International offers first class prospects - and a competitive benefits package which includes 25 days holiday, contributory pensions and relocation assistance where appropriate.

To apply, please forward your comprehensive cv to: Richard Hart-Jones, Human Resources, Amersham International plc, Forest Farm, Whitchurch, Cardiff CF4 7YT.

Amersham
The Health Science Group
Developing the world of electronic imagery  
Hertfordshire

As an Engineer with a real curiosity and interest in your subject, you'll thrive in our Client's R&D function.

This is a company that believes in individual responsibility, a multi-disciplined approach and a strong team ethos. It is renowned for the technology that has made it a market-leading manufacturer of precision equipment for electronic imaging, incorporating the entire process from image capture, through processing to final output. With a range of high-technology products, encompassing mechanical, optical, electronic and IT disciplines, they present a diverse and challenging Engineering environment. They are continuing to invest heavily in state of the art design and development tools and have adopted the most up to date methodologies to aid the development process.

**Graduate Optical Systems Engineers**  
£15,000 - £18,000  Ref: 381

These appointments would suit graduates (probably in Applied Physics) who have up to 2 years' experience of optical work or who have obtained some experience in this field during their studies.

You will initially work on the design of input/output scanners for image processing equipment, later becoming involved in the specification of optical, mechanical, electronic and software aspects of imaging systems.

Our Client will particularly look for strong mathematical ability and a good understanding of experimental design procedures and data analysis techniques. Normal colour vision and a clean driving licence are essential. Candidates should possess strong team-working skills but at the same time have the ability to work under their own initiative. Familiarity with software for the capture and analysis of experimental data would be an advantage.

You can look forward to all the support and development you need to succeed in your role. In addition, you can expect a comprehensive range of benefits from a market leading player in its field.

If you can play a key role in the world of electronic imaging, please send full CV to Barkers Response & Assessment, 103-195 Jeremyn Street, London SW1Y 6EE. Tel: 0171 470 0455. Please quote appropriate reference number.

Closing date: 19th October 1995.

BARKERS  
RESPONSE & ASSESSMENT  
IMMUNOASSAY
ASSAY SUPPORT MANAGER

Anagen (UK) Limited is the subsidiary of Anagen PLC engaged in the development and supply of immunoassay systems and reagents to a number of worldwide corporate partners. Its products are aimed at both the clinical and food analysis markets.

The company operates under ISO9001 certification and conforms to GMP and GLP standards. It is located in a pleasant part of South-East England with good commuter links.

Position
We are seeking an Assay Support Manager, whose principal responsibilities are:
- to manage the function of validating automated immunoassays to support marketing claims and regulatory submissions
- to provide the technical interface with our corporate partners
- to provide technical support to our Manufacturing and QC departments.

This is a senior position reporting to Director level, with commensurate compensation in terms of salary and a highly competitive benefits package, including a Company car.

Qualifications/Experience
Candidates will have at least a first science degree, preferably a Ph.D., and will have had approximately 10 years experience in the development, validation and support of quantitative enzyme immunoassays. This experience will have been gained in either a hospital or commercial environment, and include team management experience.

Candidates must be able to show familiarity with GLP and GMP requirements, and at least a good understanding of ISO9001 standards, with considerable statistical data analysis practice.

Personal Characteristics
Candidates will possess an energetic personality, be target-orientated, and be capable of good oral and written communication at all levels. We are looking for a mature personality, capable of gaining respect from subordinates and superiors alike, as well as external organisations.

Applicants should write in the first instance, enclosing a detailed cv to:
Mrs Lyn Blanchette, Anagen (UK) Ltd
4 Spring Lakes Estate, Deadbrook Lane, Aldershot, Hants GU12 4UH

STRICTLY NO AGENCIES

ANAGEN
(UK) LIMITED
ENVIRONMENTAL MODELLER - RADIOACTIVITY

The Directorate of Fisheries Research is an internationally renowned centre of fisheries and marine environmental research. We are currently seeking to fill the above post in the Fisheries Radiological Inspectorate, based at our laboratory in Lowestoft.

This is a two year fixed term appointment with the possibility of extension.

Your main duties will include: using existing models to rigorously assess the potential effects of radioactive releases; to make contributions to the work of the team assessing whether proposals from the nuclear industry are acceptable; to assist in improving the qualities of the models already in use.

You must have a degree or equivalent, preferably in Physics or Mathematics, and for appointment at the higher grade, at least two years relevant experience and be capable of contributing to the work programme with a minimum of further training.

The starting salary is £11,138 pa (Scientific Officer) or £13,025 pa (Higher Scientific Officer). Exceptionally, a higher starting salary may be awarded to reflect qualifications, skills or experience of particular relevance to the work.

You will be required to participate in research vessel voyages and field work for which a specialist medical will be required before appointment.

For further details and an application form, to be returned by 20 October 1995, write to Mrs E. Withers, Fisheries Laboratory, Pakefield Road, Lowestoft, Suffolk NR33 0HT or tel: (01502) 524529 (answerphone in operation) quoting ref: IL128/28/95.

An Equal Opportunity Employer.
DEPARTMENT OF VIROLOGY

CLINICAL SCIENTIST GRADE B (11-13)

SENIOR ViroLOGIST

THE ROYAL FREE HAMPSTEAD NHS TRUST

SALARY SCALE: £20,018 - £21,488 (Inclusive of London Weighting) pa (3% pay award pending)

THE ROYAL FREE HAMPSTEAD NHS TRUST

Situated close to Hampstead Heath, the Royal Free Hospital is one of the most successful NHS Trusts in London.

We currently require a Clinical Scientist Grade B to join to a dedicated professional team in the Department of Virology. This is an expanding and progressive Department offering a comprehensive diagnostic service for Virology, and has full CPA approval. The Department specialises in the rapid diagnosis of CMV and viruses in the immunocompromised patient, especially transplant recipients and those with severe HIV infection.

The successful candidate will supervise one of four departmental sections on a rotational basis and will be responsible for the work in that section and the training of junior members of staff. They will also be expected to have a thorough understanding of, and an innovative approach to all aspects of diagnostic virology. Applicants must have an honours degree in a relevant subject, a post-graduate qualification i.e an MSc or fellowship of the I.B.M.S and minimum of 3 years' experience in diagnostic virology.

For further information please contact Gillian Clewley, Principal virologist, on 0171 794 0500 ext 3174.

For an application form and job description contact the Department of Human Resources Department, Lower Ground Floor, Royal Free Hospital, Pond Street, Hampstead, London NW3 2QG. Tel: 0171 830 2064. Please quote Ref: 21529.

Closing date: 20th October 1995.
Committed to Equal Opportunities
**Principal Public Health Consultant Microbiologist**

Daresbury

Acer Environmental Laboratories and Sciences is one of the fastest growing Scientific businesses in the UK. Rapid development of workload has given rise to an opportunity for a Principal Public Health Consultant Microbiologist in Daresbury.

The successful applicant will be highly motivated with extensive experience in public health microbiology and consultancy. A wide knowledge of health related aspects of water microbiology and other areas such as environmental health, biotechnology or molecular biology is also required. A proven track record in consultancy and project management together with an interest in business development is essential.

The job holder will lead a small public health consultancy team providing clients with consultancy services allied to our successful laboratory testing business.

To apply, please write with your CV detailing remuneration to Anne Keyser, Personnel Manager, Acer Consultants, Chancellor Court, Occam Road, The Surrey Research Park, Guildford, Surrey GU2 5XS, by the closing date of Friday 20th October 1995.

Technology shaping your world

PROJECT LEADERS AND EXPERIENCED CRAs

PROJECT LEADERS

Migraine/epilepsy/anti virals West London
You will need a minimum of 3-4 years' clinical research/project management experience in the above therapeutic areas.

Gastroenterology International travel
This Project Leader's role involves working 3 days per week in West London and 2 days abroad, predominantly in Europe. Fluency in French would be a distinct advantage and you will need clinical research experience in Gastroenterology.

Urology Bedfordshire
Living within commuting distance of Bedfordshire, you will need excellent project management skills for a role where half your time will be spent on clinical work, the other half in managing the project team.

EXPERIENCED CLINICAL RESEARCH ASSOCIATES

We have opportunities countrywide at every level - from those with six months' experience as a CRA or in a related discipline, to CRAs with several years' experience and who are now ready for a bigger and more interesting challenge. Bring us your expertise, flexibility and a record of success and Innovex will provide the environment in which your CRA career can flourish.

If you would like to take the first step not just towards any of these roles but to a career with Innovex, send or fax (on 01628 491555) your CV to Louise Woolfenden in the Clinical Resourcing Department, Innovex (UK) Limited, Innovex House, Marlow Park, Marlow, Buckinghamshire SL7 1TB. Alternatively call her on 01628 491590 quoting reference NS/W10/95/CR.

INNOVEX
Scherer DDS is a world leader in the development and contract manufacturing of drug delivery systems. One of our recent successes is the Zydis fast dissolving oral dosage form which is developed and manufactured at our new Swindon facility for pharmaceutical companies worldwide. To meet the demand created by the increasing interest in this major new dosage form, we are continuing to expand both our product development and production operations.

**Process Validation Scientist**

The Process Validation Group is looking for a graduate scientist to assist in the scale-up, validation and transfer to production of new Zydis products. This will involve working closely with customers to develop programmes and protocols and the co-ordination of in-process sampling and testing of validation batches. To succeed you must have good communication and interpersonal skills with the ability to work under pressure. This would be an ideal opportunity to gain experience in an increasingly important discipline. Previous experience in pharmaceutical development is preferred.

In addition to an attractive salary, we offer a generous benefits programme, including an annual bonus scheme, comprehensive health care and relocation assistance where appropriate.

To follow up your interest, please send a CV with salary expectation to: Lorraine Howes, Personnel Officer, Scherer DDS, Frankland Road, Blagrove, Swindon SN5 8RU to be received no later than Monday 16th October 1995.

SCHERER DDS
Pioneering Drug Delivery Systems
LECTURESHP IN WOOD AND ORGANIC CHEMISTRY

The University of Waikato, Hamilton and the New Zealand Forest Research Institute, Rotorua, New Zealand invite applications for a joint appointment as Lecturer in Wood and Organic Chemistry centred at the University, but involving research time at NZFRI in Rotorua.

The appointee will have a doctorate degree and appropriate research experience. Enthusiasm for teaching in organic chemistry and wood chemistry, and for the supervision of research students for masterate and doctorate degrees will be essential. Research in wood chemistry will be carried out in association with Dr Richard Ede, another joint University-NZFRI appointee, but independent research in other areas of organic chemistry will be possible.

Research facilities in the Chemistry Department include NMR (400 MHz), FTIR, electrospray MS, GC-MS and SEM.

The current salary range for Lecturers is NZ$37,440 to NZ$49,088 per annum.

Enquiries to the Chemistry Department of the University may be directed to Dr Richard Ede (Tel. [64 7] 856 2889; Fax [64 7] 838 4219; E-mail address: RMEde@waikato.ac.nz). Information on the University is available on the World Wide Web at http://www.waikato.ac.nz/. Details on the method of application and conditions of appointment can be obtained from Personnel and Management Services, The University of Waikato, Private Bag 3105, Hamilton, New Zealand (tel. [64 7] 838 4003; fax [64 7] 856 0135; e-mail personnel@waikato.ac.nz). Applications quoting reference number A95/62 should reach Personnel & Management Services by 30 November 1995.

Equal opportunity is University policy.

The newly founded Max-Planck-Institute of Cognitive Neuroscience in Leipzig (Directors: Prof Dr A. D. Friedrici & Prof Dr D. Y. von Cramon) is looking for an

Experimental Neuroscientist / Biostatistician

with experience in quantitative statistics as well as biosignal analysis. Experience with the analysis of multi channel EEG/ MEG data and/or fMRI data is desirable. The job requires close cooperation with experimental psychologists as well as physicists in the development and application of quantitative statistical methods in the domain of neurofunctional imaging. The institute will be equipped with a 150 channel MEG system as well as a 3 Tesla MRI system.

The Max-Planck-Society offers a generous salary and relocation assistance.

Preference will be given to disabled persons of the same qualification.

Candidates should send their application by 4 November 1995 to:
Max-Planck-Institut für neuropsychologische Forschung Verwaltung, Inselstrasse 22-26 D-04103 Leipzig Germany

Ph.D. Studentship
Mathematical modelling of sediment and pollutant transport

Applications are invited for a three-year studentship. The project will involve modelling sediment transport in estuaries and will consider the role played by sediments in pollutant transport. Good mathematical skills and a 2.1 degree are required.

Applications, with a full CV and the names of two referees, should be sent to Dr A. J. Elliott, Marine Science Laboratories, Menai Bridge, Gwynedd LL59 5EY. E-mail: aje@uces.bangor.ac.uk

RDS is pleased to award
The SmithKline Beecham Laboratory Animal Welfare Prize
for OUTSTANDING CONTRIBUTION to the WELFARE of LABORATORY ANIMALS

The premier laboratory animal welfare in the UK.

RDS is pleased to announce that nominations are now being accepted for the 1996 SmithKline Beecham Laboratory Animal Welfare Prize. It recognises and rewards any individual or group making an important contribution to the welfare of laboratory animals in the UK.

A distinguished panel will select the recipient(s) based on their contributions to improvements in the welfare of animals in laboratory procedures, or recommendations or techniques which reduce the number of animals required for laboratory procedures. RDS will present an award of £2000 with an inscribed plaque to the winner.

All nominations must be received by 16 February 1996. They may be submitted by either professional colleagues or the individual(s) concerned, and should contain the following information;
- Name and address.
- A bibliography including all achievements, awards, published work and professional background.
- A description of their contribution to laboratory animal welfare.

Nominations should be sent together with an indication of where you read about the 1996 award to:
Dr Mark Matfield, Executive Director, RDS, 58 Great Marlborough Street;; London W1V 1DD.

Regulatory Affairs & Compliance
2 Senior Posts

Our clients are the European arm of one of the fastest growing international pharmaceutical groups. They have built a wide product portfolio through shrewd marketing alliances and strategic acquisition, creating a powerful base for further development.

We now seek two senior staff to join the company's Regulatory Affairs Department based in South London:

The Regulatory Affairs Manager will lead a small team of regulatory staff engaged in the preparation, variation and maintenance of the company's European licences. He/she will be responsible for expanding the group, for the development of regulatory documentation systems, and for the coordination of supply and licensing agreements with third parties.

Applicants should have a minimum of 5 years' experience in regulatory affairs with a significant pharmaceutical company, combined with good appreciation of the different principles applied to ethical and generic pharmaceuticals.

Excellent Prospects

The Regulatory Compliance Controller will be responsible for ensuring compliance with GMP guidelines, importantly including assurance of the quality of products released. The post will involve close liaison with regulatory and manufacturing personnel - both within the company and with alliance partners - and responsibility for conducting inspections.

The appointment calls for a graduate with a background in chemistry/pharmacy coupled with practical experience in manufacture and accreditation in quality assurance.

Both positions will report to the Director of Scientific Affairs. Particular importance will be attached to team leadership skills and flexibility, and there is also considerable scope for personal development. The company provides excellent remuneration packages, including relocation assistance where appropriate.

Please send a comprehensive CV, or telephone Dr Kevin Young to discuss either post before applying:

An exciting management opportunity...

**Clinical Unit Manager**
Up to £30,000 package, plus benefits

My client is a major international pharmaceutical company, spending over $1.1 billion a year on R&D. They have a fully equipped, state of the art clinical research facility for evaluating new chemical entities in Phase I/IIA, and have created an exciting opportunity for a Unit Manager to be responsible to the Medical Director.

The role is to manage the staff, the unit and the clinical trials that are undertaken. This is a busy job ensuring that maximum benefit is gained from the total resources available.

Candidates will hold a life sciences degree (or equivalent) or be a Registered General Nurse, and have significant experience of managing staff in a research environment. Ideally, they will have clinical trials knowledge, be computer literate and trained in management skills. The studies can cover several days and there is a need to have a flexible attitude to hours.

This is a challenging management role and requires drive, enthusiasm and leadership qualities. You must be self-motivated, able to organise and plan, have excellent interpersonal skills and be able to operate successfully in a dynamic environment. Ideally, you will already be managing a clinical research unit, but applications are welcomed from managers of medical laboratories or suitably experienced CRA's.

The position is based in an attractive part of southern England. It offers an excellent salary and benefits package including bonus, profit related pay, pension and private medical insurance, plus appropriate relocation costs.

If you are ready for your next challenge in a dynamic environment, then send your CV, quoting Ref. NS/1116/IC to Dr Ian Collins, Managing Director, Executive & Scientific Appointments Ltd., Salisbury House, 15-17 The Broadway, Old Hatfield, Hertfordshire, AL9 5HZ. Tel: 01707264311 or Fax: 01707275402.

NORTHERN IRELAND REGIONAL MEDICAL PHYSICS AGENCY

MEDICAL PHYSICS

Principal Clinical Engineer
Salary £22,799 - £30,004

The Agency is developing its activities in clinical engineering and applicants are invited for this new post based at the Royal Victoria Hospital but with responsibilities throughout the Province.

The Agency, a corporate body within the NHS, is pioneering a unique arrangement for providing medical physics and clinical engineering services to health bodies in Northern Ireland. The post offers a challenge to be involved scientifically and managerially in expanding the work of the section in new directions and through new arrangements. Research and Development activities will be encouraged.

Applicants should have a good honours degree in electronic engineering or equivalent and be chartered. Relevant experience in clinical engineering, equipment management and clinical instrumentation essential.

Closing date for receipt of applications is 24 November 1995. Full details and application forms can be obtained from: The Personnel Department

AN EQUAL OPPORTUNITIES EMPLOYER
Senior Writer
Creative, articulate senior medical writer sought
OXFORD CLINICAL Communications

We are looking for a senior medical writer with a good life-sciences degree or medical qualification.

Good organizational and communication skills, and a proven ability to perform under pressure are vital. Medical writing experience across a range of medical education materials, including clinical paper writing, is essential. Agency experience would be a distinct advantage.

The ideal candidate will also need to have analytical/problem solving ability, a strong, confident personality, and be a team player as well as a team leader.

In return, we offer the opportunity to travel, and to work on a variety of projects encompassing a range of communications media, including print, video and interactive computer programs.

We also offer a competitive salary and benefits package reflecting the senior nature of this position.

Interested? Write, enclosing your CV and details of current salary and daytime telephone number, to the Personnel Department, Oxford Clinical Communications Ltd, 213 Barns Road, Oxford OX4 3UT. Or telephone 01865 747774, for further information.

Oxford Clinical Communications is a leading medical communications agency producing a wide range of high quality educational materials for the international pharmaceutical industry. [2002-006 (1995) : 55]
QUALITY ASSURANCE
PHARMACEUTICAL RESEARCH & DEVELOPMENT

Sanofi Research is the worldwide R&D organisation for a leading healthcare company with research centres in France, UK and USA. It has a strong product pipeline with a number of exciting development candidates.

A vacancy has arisen for an experienced Quality Assurance auditor in the Quality Assurance Department. You will be a member of a small team of well qualified experienced professionals reporting to the Director of Quality Assurance.

Through a programme of systematic reviews, audits and inspections, Quality Assurance seek to improve the quality of all activities associated with pre-clinical development, manufacture; assembly and control of investigational drugs whilst assuring compliance with all applicable regulations and corporate policies.

In this position, you will be required to conduct a programme of audits and inspections of Pharmaceutical Sciences and Analytical Sciences including Sterile Products Manufacture, Clinical Trials Assembly, Quality Control, Microbiology, Stability Studies, Warehouse and Dispensary. In addition, you will conduct periodic inspections of facilities, plant, equipment and supporting engineering services.

The successful candidate is expected to have a degree in a relevant scientific discipline with two to four years experience in Quality Assurance, Pharmaceutical R&D or manufacturing. A broad understanding of the drug development process and a current in-depth knowledge of the legislative and regulatory requirements governing the development, manufacture and control of investigational drugs for clinical trials is desirable.

Our modern research facilities are located at Alnwick, Northumberland and provide a pleasant working environment, ready access to an unspoiled rural location whilst still being within easy reach of both Newcastle and Edinburgh.

In return, we can offer a competitive salary and an attractive benefits package, a contributory pension scheme and good opportunities for career development.

To apply, please send a detailed C.V. quoting reference number SR-26 to:
Ms Deborah Child, Personnel Assistant, Human Resources, Sanofi Research Division, Alnwick Research Centre, Willowburn Avenue, ALNWICK, Northumberland NE66 2JH. Closing date for applications: Friday 1/12/95.

Clinical Projects Manager, Europe

Our client, Baxter Healthcare Corporation, has become one of the world's foremost providers of pioneering health care products with a solid dedication to breakthrough research.

Position Description
Manage clinical, technical, and administrative aspects of European-based clinical studies and related clinical projects.

Lead independent internal and contract research organisation teams in Europe to implement the clinical development plan.

Support the generation of protocols and the analysis of clinical data.

Successful candidate will work in Baxter Nivelles, Belgium and report to the Director, Clinical Affairs in the USA, based in Chicago.

Our client offers
An excellent salary and benefits package, including relocation assistance as appropriate.

Position requirements
At least a Master's level education (Doctorate preferred) in a biomedical field related to clinical research such as pharmacy; medicine or life science.

Clear understanding of the drug development process in the European regulatory environment with respect to clinical development

At least five years of experience in pharmaceutical / biotech industry clinical trials, including success in the design, initiation, monitoring and management of clinical research projects, and in leading teams.

Solid experience in written communications, including technical reporting, business correspondence and clinical protocol generation.

Fluency in English and French, and a working knowledge of one other European language.

BBA
BRITISH BOARD OF AGREEMENT
ASSESSMENT OF PRODUCTS FOR CONSTRUCTION

Product Assessors (Scientists/Technologies)
Salary in range: £14,083 to £21,396

The British Board of Agreement is a government sponsored body which tests and assesses innovative construction products and systems leading to the issue of Agrément Certificates which are used by architects, engineers and other specifiers as an authoritative and independent source of product performance data.

We wish to appoint two Scientists/Technologists in our Materials & Building Physics Division to assess test data, manufacturer's quality systems and the in-service performance of building products including thermal insulation, ventilation components and board materials in one of the jobs, or waterproofing, roofing and plastics in the other. Both jobs will involve contact and liaison with technologists and managers in industry and research.

You should have a degree or similar in a physics, materials science or similar field and relevant experience would be an advantage. You will need to be capable of working to tight deadlines, have good communication skills and the ability to produce high quality work with a minimum of supervision. The appointments will be made initially for a period of 12 months, but this may be extended or made permanent dependent on workload and performance in the job.

The closing date for completed applications is 17 November 1995. For an application form and job description guide please contact: Irene Brinklow, British Board of Agrément, PO Box 195, Bucknalls Lane, Garston, Watford, Herts WD2 7NG. Telephone: 01923 670844. Fax: 01928 662133.
DEPARTMENT OF ELECTRONIC AND ELECTRICAL ENGINEERING

Research Fellow in Computer Modelling of Microwave Semiconductor Devices

This post, funded by Hewlett-Packard is available immediately for a fixed period of one year in the first instance to join a team with an international reputation in modelling of semiconductor active devices at high frequencies. The project is part of an effort to establish quasi-2D device models as an integral part of industry-standard computer-aided design practice.

Applicants should hold, or have submitted for a Ph.D., and have software experience including physics-based device modelling.

Salary will be on the scale for Research Staff Grade IA within the range £14,317 - £18,985 p.a. according to qualifications and relevant experience.

Application forms and further particulars may be obtained from Professor C M Snowden, Department of Electronic and Electrical Engineering, The University of Leeds, Leeds LS2 9JT, tel: 0113 233 2001, email cms@elec-eng.leeds.ac.uk, quoting Ref: 66/85.

Closing date for applications: 30 November 1995.

DEPARTMENT OF CIVIL ENGINEERING

Research Fellow

This EPSRC-funded postdoctoral position is available from April 1996 for a fixed period of one year in the Civil Engineering Materials Unit to work in transport properties of concrete. Applicants should have a Ph.D., or equivalent qualification in Civil Engineering or Materials Science. Salary will be on the scale for Research Staff Grade 1A within the range £14,317 - £15,986 p.a. according to qualifications and relevant experience.

Informal enquiries about the post may be made to Professor J G Cabrera tel: 0113 233 2283 fax: 0113 233 2265 or Dr Richardson tel: 0113 233 2331 email i.g.richardson@leeds.ac.uk Ref: 64/93.

Research Fellow

This EPSRC (ROPA)-funded postdoctoral position is available immediately for a fixed period of two years. The appointee will work in the Civil Engineering Materials Unit on a project entitled 'The Influence of Pozzolans on the Composition and Structure of C-S-H in Hardened Cement Pastes'. Applicants should have a Ph.D. or equivalent qualification in Materials Science, Chemistry or Physics. Experience in Solid State Nuclear Magnetic Resonance Spectroscopy or/and Transmission Electron Microscopy will be an advantage.

Salary will be on the scale for Research Staff Grade 1A within the range £14,317 - £15,986 p.a. according to qualifications and relevant experience.

Informal enquiries about the post may be made to Professor J G Cabrera tel: 0113 233 2283 fax: 0113 233 2265 or Dr Richardson tel: 0113 233 2331 email i.g.richardson@leeds.ac.uk Ref: 64/94.

Research Assistant

This EPSRC-funded post is available immediately for a fixed period of 18 months to work on the project 'Remediation of Contaminated Land'. It will be carried out in collaboration with the Department of Earth
Sciences of the University of Leeds and Lancaster University. Applicants should have a good honours degree in an engineering or science discipline. A basic knowledge of chemistry or geophysics will be an advantage.

Salary will be on the scale for Research Staff Grade 1B (£14,317 - £15,986 p.a.) according to qualifications and relevant experience. Informal enquiries about the post may be made to Dr D I Stewart tel: 0113 233 2278 fax: 0113 233 2265 email d.i.stewart@leeds.ac.uk Ref: 64/95.

Application forms and further particulars for the above three posts may be obtained from Mandy Stamp, Department of Civil Engineering, The University of Leeds, Leeds LS2 9JT, tel: 0113 233 2302 quoting the appropriate reference number.

Closing date for applications: 30 November 1995.

The University of Leeds promotes an Equal Opportunities Policy. Promoting excellence in teaching, learning and research.
Microbiology Research Technician

Microbiology is a fundamental component of the research strategy of the HAS Terrestrial & Freshwater Life Science (TFLS) and Marine Life Science (MLS) Divisions. The discipline is a key area for terrestrial studies of climate change and is also fundamental to the understanding of nutritional interactions and food webs in freshwater and marine ecosystems.

A vacancy has arisen for a Microbiology Technician who will have sole responsibility for maintaining a microbiology suite and terrestrial research laboratory, at a high standard of efficiency for research. You will provide technical support for a wide range of microbiology projects within the TFLS and MLS Divisions. Working closely with the Laboratory Manager, (who has overall responsibility for the Life Sciences Laboratories and for the implementation of COSSH Regulations), you will also liaise with the Technical Resources Manager over controlled environment and low temperature storage facilities. You will participate in a range of microbiological research projects including studies of soil colonisation processes during climate change, effects of desiccation and low temperatures, the microbial loop in freshwater bodies, and predation pressures in marine systems.

The vacancy is for five years on a fixed-term contract; there may be a field work requirement either from a ship, or at a HAS research station during the summer, therefore applicants must be physically fit.

With a BSc or BTec degree in Microbiology, Biochemistry or a related science, you will also have practical laboratory experience with cyanobacteria, bacteria, algae and/or microfungi. The future use of molecular techniques is envisaged and relevant experience would be an advantage.

Salary is in the range of £11,584 - £24,567, depending on qualifications and experience.

For further details and an application form please contact: The Personnel Section, British Antarctic Survey, High Cross, Madingley Road, Cambridge CB3 0ET. Tel: 01223 251508/7. Please quote reference: HAS 36/95. Closing date for completed application forms: 23rd November 1995.

NERC has an equal opportunities policy and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome.

Pfizer is a major, international, research driven pharmaceutical company with an extensive product development portfolio. Due to the continuing productivity of our discovery scientists and the changing regulatory scene, we now have a further opportunity for a Population Pharmacokineticist within our Clinical Pharmacokinetics Group.

You will be responsible for population pharmacokinetic/pharmacodynamic exercises undertaken with compounds in development. This will involve appropriate input into studies, ensuring relevant data is generated and subsequently analysed using recognised and novel software.

Ideally you will be a Ph.D. level Pharmacokineticist with some industrial experience and a proven track record in industry. You will require the tact, skills and personal qualities to manage and co-ordinate the activities both inside and outside the organisation.

The position will be based at our European headquarters at Sandwich, on the attractive Kent coast, an area known for its reasonable living costs. The competitive salary will reflect your experience and background, and benefits will include a staff bonus scheme, profit related pay and a generous relocation package.

If this opportunity attracts your interest, please write enclosing a full CV to: Mr. Gerard Collins, Senior Personnel Adviser, Pfizer Central Research, Ramsgate Road, Sandwich, Kent CT13 9NJ. Telephone 01304 618720, Fax 01304 618749.

Pfizer
PHARMACEUTICAL HEALTH ECONOMIST
Buckinghamshire
Attractive Salary + Benefits Package

Innovex is a successful and fast expanding Contract Pharmaceutical Organisation (C.P.O.) providing services to the pharmaceutical industry to support the clinical, sales and marketing activities involved at all stages of a product life cycle. It has over 1,600 employees.

We are recruiting a health economist to play the key role in developing health economic elements within our international clinical trial and disease management functions. This high profile position will report directly to the General Manager, International Clinical Research.

To be successful in this position you may have come from a clinical trials or economics role and will have:

• a record of direct involvement in the design and implementation of clinical trials with major economic objectives;
• a background in or working closely with the pharmaceutical industry, particularly in a service/contract environment;
• managerial experience with the ability to project manage;
• an understanding of pharmacoeconomic strategy and modelling and knowledge of the key players in the field. You will have energy and self-sufficiency with an ability to multi-task. A communicator, you are comfortable working with both clients and economics experts. This key position will carry a highly competitive salary and benefits package.

To apply, please send a full CV to Mr C S Morley, Director of Human Resources, Innovex (UK) Limited, Innovex House, Marlow Park, Marlow, Bucks SUL7 TB.

INNOVEX
An equal opportunities employer
[2002-017 (1995) : 59]
The Building Research Establishment (BRE), near Watford in Hertfordshire, is an Executive Agency of the Department of the Environment. Leading UK research into building and construction and the prevention and control of fire, it is a key player in the provision of advice to government as well as helping further improve the performance of the construction industry and its products.

Fire Research Station
The Fire Research Station at BRE is playing a leading role in the evolution of an integrated, engineering approach to fire safety design. An essential part of this process is the development of methods for predicting fire growth and the movement of smoke and other fire products in complex buildings and spaces.

Computational Fluid Dynamics (CFD) Fire Modeller
The Fire Research Station has won international acclaim for its pioneering work in the application of computational fluid dynamics. We now wish to expand the existing research team to help with both the ongoing enhancement to the application techniques and their commercial exploitation.

The successful candidate will become part of a team working on areas such as the application of CFD models to problems of smoke movement and control, the development of existing models to include fire development and suppression, the development of user-friendly interfaces for the input and output from CFD models (including the possibility of using virtual reality techniques) and the development of a consolidated approach to fire safety design in buildings.

Candidates should have a good honours degree (or equivalent) in mathematics, physics or engineering and preference will be shown to those candidates with experience in numerical techniques, especially in the field of computational fluid dynamics as applied to combustion and/or building aerodynamics.

The starting salary is in the range £11,766 - £19,669 depending on experience, with further progression occurring within a performance related pay scheme.

Applicants will need to be computer literate, articulate, good team players, have the ability to present complex ideas to non-specialists and be comfortable working to tight deadlines.

This position is a three year fixed term appointment which, subject to review, may be extended or lead to a permanent appointment. We are currently reviewing our grades and salary structure.

If you have a genuine interest in this area of research we would like to hear from you. BRE offers a creative working environment set in 30 hectares of parkland, only 20 miles from London. Other benefits include sports and childcare facilities, a restaurant on site, and a non-contributory pension scheme.

Closing date for applications: 24th November 1995.

For further details and an application pack, please ring our 24 hour answerphone on 01923 664274.

You can also register your interest by fax on 01923 664784 or E-mail recruitment@bre.co.uk quoting reference RRE297.

If you have any queries regarding this vacancy, contact Kelly Rose, Tel: 01923 664745.

BRE is an equal opportunity employer and the post is open to British, European and Commonwealth Nationals.

Research assistantship in large vocabulary connectionist speech recognition

Applications are invited for a Research Assistantship in the use of connectionist models and hidden Markov models in large vocabulary automatic speech recognition. The project is funded by the EU and is of 36 months duration. Candidates for this post will have a good first degree and preferably a postgraduate degree in a relevant discipline. The candidate is expected to have prior knowledge of connectionist / Markov modal hybrids, large vocabulary recognition or a related area. The ability to manage a large software project, participate in international evaluations and liaise with industry would be advantageous. Salary will be in the range £14,317 to £19,848.

Further details may be obtained by writing to Dr Tony Robinson, Cambridge University Engineering Department, Trumpington Street, Cambridge CB2 1PZ, UK, via email (air@eng.cam.ac.uk), or http://svr-www.eng.cam.ac.uk-air. The deadline for applications is 26 November 1995.

The University follows an equal opportunities policy and aims to achieve the highest quality in teaching and research.

Leatherhead Food RA

**PROCESSING MODELLING EXPERT**
Food Preservation

Leatherhead Food RA is expanding its specialist team that assists member companies in developing food processes and carries out Government, EU and other funded research and development work. This demanding role requires a self motivated person who has a sound knowledge and experience in modelling food sterilisation and dehydration processes. The candidate must be able to develop new ideas and carry through projects from proposal stage to completion.

Key requirements:
A mature experienced male or female graduate in food technology or engineering with an MSc or Ph.D. is required. The candidates must have a significant and proven experience in food process research and equipment development.

Demonstrable experience of food preservation process technologies, including the modelling of aseptic particulate systems and the general ability to model food processes. Specific skills and experience in designing test systems to measure process parameters, along with general food equipment design principles, are also a requirement. The ability to carry out pilot scale trials would be beneficial. Fluency in at least one foreign language (East European or Far Eastern) is required to meet the needs of the expanding food market and our activities in those areas. Experience in giving training would be an advantage.

Please apply in writing, enclosing full CV, to Mrs Joan Cox, Leatherhead Food RA, Randalls Road, Leatherhead, Surrey KT22 7RY.

Closing date for applications: 26 October 1995.
Postdoctoral Research Assistants - RS1A
£14,317 - £21,519 p.a

Applications are invited for several two year EPSRC funded postdoctoral research positions in the Condensed Matter Theory Group in the sub-department of Theoretical Physics. Current interests of this large group included the quantum Hall effect, quantum impurity problems and spin systems, the statistical mechanisms of phase transitions, interfaces, random surfaces and polymer networks, non-equilibrium systems and neural networks. There is also a strong overlap with related work in theoretical particle physics.

Informal enquiries can be made to Dr J Cardy (01865 273957, cardy@thphys.ox.ac.uk). Applications with a curriculum vitae and the letters from two referees should be sent to the Administrator, Department of Physics, Clarendon Laboratory, Parks Road, Oxford OX1 3PU by 31 January 1996.

The University exists to promote excellence in education and research, and is an equal opportunities employer.

The Lund Institute of Technology is one of the faculties of Lund University. The Institute was founded in 1961, and provides education in seven areas of engineering for about 5,000 undergraduate students. 650 postgraduates are enrolled in research studies. The Institute has a total of 1600 employees. The teaching staff of the School of Engineering Physics totals 84, of which 15 are professors. The School of Engineering Physics has an annual turnover of about SEK 70 million.

Lunds University invites applications for the following position:

**PROFESSOR IN SOLID STATE PHYSICS, SPECIALISING IN EXPERIMENTAL SEMICONDUCTOR PHYSICS**

Reference number 2996. The position is located in Lund.

The University Board has decided that no special description of the subject will be given.

The successful applicant will be expected to take part in the supervision of research, postgraduate teaching and undergraduate teaching within the Division of Solid State Physics at the Department of Physics. The main research direction is experimental semiconductor physics, including physical studies, advanced technology and microelectronic applications. The environment in which the successful candidate will work is described as follows.

The Department of Physics comprises faculty and research staff of 250 and covers a broad spectrum of research and education, ranging from fundamental elementary particle physics to the more applied field of combustion physics. Research at the Division of Solid State Physics was started by Prof. H. G. Grimmeiss in the 1960s and concentrated, at that time, on the properties of impurities and defects in semiconductors. During the last ten years the focus has been shifted towards the electronic structure and properties of semiconductor materials and heterostructures, based on considerable efforts in epitaxy and electron-beam lithography. The materials studied include many of the III-Vs and group-IV semiconductors.

An interdisciplinary national program on nanometer structures is coordinated by Prof. L. Samuelson at the Division of Solid State Physics and is centred around the physics, fabrication and applications of low-dimensional semiconductor structures, with special emphasis on optical properties and electronic transport phenomena. There is ongoing collaboration and conditions are good for further interdisciplinary interactions with related research groups at the Department of Physics, e.g. with surface science at the Division of Synchrotron Radiation Physics and MAX lab (Prof I. Lindau), with optical research at the Division of Atomic Physics (Prof S. Svanberg), with condensed matter theory at the Dept of Theoretical Physics (Prof L. Hedin, retiring in 1995) and with various subfields at the Chemical Center in Lund, e.g. high-resolution electron microscopy (Prof J-O. Bovin).

The advertised position carries responsibilities for research and education, on undergraduate as well as postgraduate level, in solid state physics. The Division belongs to the School of Engineering Physics, Lund Institute of Technology at Lund University, and is located at the Department of Physics, which is a joint department for physics under both the Faculty of Technology and the Faculty of Mathematics and Natural Sciences.

The Faculties, the University, and the National Research Councils have for more than ten years given high priority to resources for semiconductor physics, technology and applications at the Department of Physics. It is essential that the candidate has the desire to interact with existing research groups and has a proven ability to motivate and direct research.

Information to the applicant:
The qualifications required for the position of professor are set out in the Higher Education Ordinance of 1993 (SFS 1993:100).

The position is awarded by the Vice-chancellor of the University.

The applicant should state which scientific work he/she considers to be of most importance regarding the application for the position.

It should also be made clear in the application which teaching and other qualifications the applicant wishes to draw attention to in the consideration of the application.

The application is to be submitted in English, and must be structured according to instructions which can be obtained from LTH's kansli, Eva Persson, tel +46 46-222 97 80, fax 46 46-222 37 21.

The University of Lund has a positive gender policy and women are encouraged to apply for the position, as well as men.

The application, stating the reference number, should be addressed to the Vice-chancellor of Lund University, and must be received by the registrar, PO Box 117, S-221 00 LUND, no later than Wednesday 6th December 1995.

Information on the nature of the position can be obtained from the Faculty Dean, Prof Klas Malmqvist, tel +46 46-222 76 84, fax +46 46-222 47 09, and on the conditions of employment from the personnel director, Staffan Svensson, tel +46 46-222 71 17, fax +46 46-222 37 21.

SAC

SAC is one of Europe's leading specialist institutions for education and training, research and development and advice and consultancy for rural areas and the industries on which they depend. Based in Scotland, SAC and its associate company COSAR Ltd have an international client base and a world-wide reputation.

Excellence in Food, Land and Environment

Department of Horticulture

Opportunities for career advancement are open at SAC Auchincruive resulting from the retirement of staff with long service records.

**Senior Lecturer in Horticulture**
(Post 1) (Reference: 95/40)
Candidates should possess an Honours Degree in Horticulture or allied discipline, together with a postgraduate qualification relevant to Horticulture.

The successful candidate should possess substantial experience in the provision of undergraduate and postgraduate education and should have an established reputation in research relevant to horticulture.

Main responsibilities in this post will relate to research and to the management of the educational activities of the Department.

**Senior Lecturer in Horticulture**
(Post 2) (Reference: 95/41)
Candidates should possess an Honours Degree in Horticulture or allied discipline supported by relevant postgraduate qualifications and/or industrial experience in production or environmental horticulture.

The successful candidate will have an established record in applied research and consultancy.

Main responsibilities in this post will be management of the consultancy activities of the Department.

**Lecturer in Landscape Studies**
(Reference: 95/42)
Candidates should be graduates in Horticulture or related studies with specialist knowledge and expertise in landscape design and management. Duties include the provision of courses concerned with urban and rural designed landscapes, supervision of postgraduate students, research and consultancy.

Salaries, depending on qualifications and experience will be:
Senior Lecturer: £19,699 - £31,492
Lecturer: £10,973 - £26,920

Application forms and further particulars for each of these posts may be obtained from the Personnel Unit, SAC Auchincruive, Ayr, KA6 5HW, (telephone 01292 520331) by quoting the relevant reference number.

Applications should be lodged by 22 November 1995.

SAC receives funding from the Scottish Office Agriculture and Fisheries Department.
PROJECT MANAGER
Therapeutic RAD/Analgesics
High negotiable salary and full relocation
Based Austria

Our client, an international R&D Centre, requires a Project Manager to lead a development team responsible for a number of projects in Therapeutic R&D/ Analgesics.

You will have a good academic qualification with ideally a strong scientific background in drug development of analgesic drugs. Applicants without specific analgesic experience but who have full scale Project Development experience within another field would also be of interest. Alternatively candidates with a primarily Analgesic Marketing background who are interested in Project Development are encouraged to apply.

You will be target oriented, computer literate with team leading skills.

CVs to Richard Hickson, Beechwood Appointments, 221 High Street, London W3 98Y. Tel: 44181 992 8648/9. Fax: 44181 992 5658. E-mail: 100623.1514@compuserve.com

Appointments Register
The University of Reading
Centre for Biomimetics

**Research Studentship**
A Research Studentship, funded by Unilever, is available to investigate the mechanical and structural properties of keratin fibres such as hair. The project will involve the use and development of mechanical measurement techniques to further our understanding of hair structure biomechanics.

The successful candidate is likely to have a 2(i) Honours degree and a background in materials science, composites, physics or biomaterials. Duration of the projects is three years with a proposed start date of January 1996. All fees will be paid and the maintenance allowance will be £7,500 increasing annually.

Send CV, names and addresses of two referees and a one page summary of practical and project work undertaken to date, Professor G Jeronimidis, Centre for Biomimetics, The University of Reading, Earley Gate, Reading RG6 2AT, from whom further details are available.

A centre of excellence for university teaching and research.
The Royal Marsden NHS Trust
The Department of Academic Biochemistry

**Histopathology Technician**
Salary up to £14,500 pa inclusive according to experience

The Royal Marsden NHS Trust is an internationally renowned centre of excellence in the research and treatment of cancer.

We are looking for an experienced and enthusiastic Histopathology Technician to join our breast cancer programme. Knowledge of immunocytochemical techniques would be an advantage but not essential as full training would be given. Your work will be as part of a team including other technicians, scientists and clinicians.

For further information please contact Miss Janine Salter on 0171 352 8171. ext 2339. For an application package please contact the Human Resources Department, The Royal Marsden NHS Trust. Fulham Road. London SW3 6JJ, telephone 0171 352 8171. ext 2146/7 or send in a copy of your CV.

Closing date for applications: 17 November 1995. Committed to equal opportunities in employment.
University of Southampton

**Ph.D. Case Studentship in Applied Entomology**

University of Southampton and Silsoe Research Institute, funded by BBSRC: "Optimising insecticide sprayer design to minimise off-target effects"

To examine the potential of controlled droplet application (CDA) sprayers for minimising effects of insecticides on non-target insects and the environment. To start by 1 January 1996.

For further information contact Dr D Goulson, Department of Biology, University of Southampton, Bassett Crescent East, Southampton SO16 7PX, on (01703) 594212.

Closing date: 15 November 1995.

Working For Equal Opportunities

A centre of excellence for university research and teaching

No Status Quo Fans.

HANDS-ON SCIENTISTS & TECHNOLOGISTS
£20,000 - £26,500 + EXCELLENT BENEFITS

At Mars Confectionery, we know that great ideas often come by challenging accepted thinking. And because we're always looking for ways to improve our already hugely successful products, we need people who aren't afraid to go beyond - or even against - received wisdom. We know that no product is so perfect that it cannot be improved on - so we place a high premium on fresh ideas.

Now, as a result of ongoing growth and internal development moves, we're looking for more hands-on scientists and technologists to join us in Slough. Here, R&D activity is closely integrated with manufacturing, and your key challenge will be to provide the broadest possible support for our production lines. This could include everything from facilitating the achievement of quality and output targets to introducing new quality systems, troubleshooting technical problems, and conducting trials with new materials and products. In every case, you will be seeking to improve on the best.

This means you'll enjoy an unusually high level of personal accountability. It'll be up to you to challenge the status quo, identify areas for improvement, generate innovative, practical solutions and drive them through to completion. You won't be restricted to a particular specialism, but encouraged to broaden your technical base. And if the technology to solve a particular problem doesn't exist, it'll be up to you to create it.

You'll need a good honours BSc or BEng, preferably with a track record of commercially-focused R&D achievement. You must also combine proven analytical and problem-solving skills with a practical can-do approach, and be capable of working both independently and as part of a highly motivated team.

To a large extent, we'll expect you to manage the direction of your own career. Our rapid expansion into developing markets is creating a constant stream of new opportunities, so a genuinely international outlook would be an advantage.

Salaries will be backed by a valuable package of non-contributory benefits including, if appropriate, assistance with relocation to the Thames Valley area.

So if you believe in doing away with outdated concepts, call our recruitment hotline on 01628 474646 to request an application form. (Closing date for calls: Wednesday 15th November 1995). We are committed to equal-opportunity employment practices.

Mars
UNIVERSITY OF LEEDS  
SCHOOL OF COMPUTER STUDIES  
COMPUTATIONAL PDE'S SOFTWARE UNIT

Two posts are available immediately on a rolling contract basis for a period of one year in the first instance. The appointees will work in the newly-formed Computational PDE's Software Unit which will undertake industrial and academic research over the next five years.

**Manager**

The appointee will be responsible for the day-to-day running of the Unit which undertakes a variety of contract research in the development and application of software for the solution of partial differential equations. This will involve the supervision of research contracts and staff, contributing to the maintenance and development of the current library of software tools and the generation of new business in the form of both short and long term industrial and academic research contracts.

Salary will be on the scale for Computer Staff Grade 2 (£16,628 - £21,519 p.a.) or Grade 3 within the range £22,374 - £25,035 p.a. according to qualifications and relevant experience. Ref: 48/121.

**Software Engineer**

The appointee will be expected to work on a variety of industrial research contracts such as those with Shell Research and EPSRC requiring Computational methods for PDE's. This will include some mathematical modelling and the development, application and maintenance of the Unit's software library.

Salary will be on the scale for Computer Staff Grade 1 (£14,317 - £15,986 p.a.), or Grade 2 within the range £16,628 - £18,985 p.a. according to qualifications and relevant experience. Ref: 48/122.

Applicants for both posts should have good honours and postgraduate degrees in a scientific or engineering discipline, with practical experience of mathematical software and modelling, C and/or Fortran programming and experience of applying computational techniques to industrial problems.

Informal enquiries may be made to Judi Thursby, Secretary to the Unit, tel: 01 13 233 5432 or email judi@scs.leeds.ac.uk. The School's World Wide Web home page is at: http://agora.leeds.ac.uk/WWW/welcome.html Application forms and further particulars for both posts may be obtained from the Personnel Office (Academic Section), The University of Leeds, Leeds LS2 9JT, tel: 0113 233 5771, email e.f.moran@registry.leeds.ac.uk World Wide Web address http://www.admin.leeds.ac.uk/jobadverts/index.html, quoting the appropriate reference number.

Closing date for applications: 17 November 1995.

The University of Leeds promotes an Equal Opportunities Policy.

Promoting excellence in teaching, learning and research.

Research Assistant
Aerospace Structural Optimization

Applications are invited for a research assistant to form part of an expanding team carrying out research on aerospace structures for a twelve month period. This work is funded by the EPSRC and is tenable by either a postdoctorate or postgraduate worker.

The research is concerned with the computational modelling of satellite and aircraft structures using multi processor super-computing graphics workstations. The aim of the research is to provide improved design methods for dealing with noise and vibration problems in structures as diverse as space stations and helicopters. These will be based on Genetic Algorithm techniques which seek to apply survival of the fittest criteria to the problem of aerospace structural design. Candidates would ideally have experience in optimization methods, modal analysis or artificial intelligence and familiarity with a high level programming language or Unix would be an advantage.

Salary available will be on the RA1A scale in the range £14,317 - £21,519 p.a.

Applications including CV and particulars of three referees should be sent to The Senior Administrator, Department of Engineering Science, University of Oxford, Parks Road, Oxford OX1 3PJ. Tel: (01865) 273013; from whom further particulars can be obtained. Please quote "AJK Opt" in all correspondence. Closing date for applications is Thursday 16th November.

The University exists to promote excellence in education and research, and is an equal opportunities employer.
[2002-030 (1995) : 64]
Technical Support Specialists

The Industrial Analysis Group manufactures and markets analytical instruments for a broad range of industrial quality control applications, using XRF, NMR and NIR technologies. Employing some 120 people, we are currently enjoying considerable success in expanding our business.

We are now seeking two Technical Support Specialists to join our Sales Support Team in Abingdon to assist with the development of applications for our full range of instruments, including X ray fluorescence, near infrared and nuclear magnetic resonance technologies. The roles will involve providing support to the sales team in terms of producing application reports, preparing and running demonstrations and in user training, both on- and offsite. Some UK and overseas travel will be necessary in support of the selling activities of our network of customers and distributors.

Candidates should be educated to degree level in Chemistry or Physics, ideally with 2/3 years relevant experience in a laboratory environment and be familiar with the technologies we employ. XRF experience would be a distinct advantage for one post and NMR experience essential for the other. Good PC skills, a methodical approach and the ability to work within a team environment while also being able to work on your own initiative will be important. Knowledge of a European language would be an advantage.

An attractive package is offered including private medical insurance, pension and share options schemes.

For further details and an application form, please contact Jill Shepherd on Tel. (01235) 532123.

Oxford Instruments (UK) Ltd Industrial Analysis Group 19/20 Nuffield Way Abingdon, Oxon OX14 1TX

Closing date: 16th November 1995.

A subsidiary of Oxford Instruments plc

OXFORD
[2002-031 (1995) : 64]
The University of Reading
Department of Computer Science

Following the recent appointment of G M Megson to a Chair in Computer Science applications are invited for a four year fellowship in the area of parallel and distributed architectures with an emphasis on emergent computing structures for algorithm specific design techniques.

You will be working closely with Professor Megson in one of the following areas: Regular Algorithm Design, High Level Array Design tools, Algorithm Engineering and Hardware Compilation and must be able to link effectively with other members of the Parallel, Emergent and Distributed Architectures Laboratory (PEDAL) at Reading. Experience in parallel restructuring and compilation techniques, Matematica/Maple systems, or Field Programmable Gate Arrays (FPGAs) will be an advantage. The appointment will be a Research Assistant Grade 1B £14,317 - £15,986 p.a.

For informal discussion contact G.M.Megson@reading.ac.uk or Department of Computer Science, The University of Reading, PO Box 225, Whiteknights, Reading, Berkshire RG6 6AY. Tel: +44 (0)1734 318600, Fax: +44 (0)1734 751994 or try our web pages on http://www.cs.reading.ac.uk.

Apply for Application Form to Personnel Officer, The University of Reading, Whiteknights, P.O.Box 217, Reading RG6 2AH telephone (01734) 316771. Closing date 1 December 1995. Please quote Ref: R9575.

A centre of excellence for university teaching and research.
[2002-032 (1995) : 64]
Biomedical Scientists
Department of Haematology

Royal Brompton Hospital is an internationally renowned postgraduate teaching hospital specialising in the treatment and research into heart and lung diseases. Two new posts have been developed to support and strengthen the Haematology Department. The department is CPA accredited. It is fully computerised and well equipped with Technicon H*1 analysers and a fully automated haemostasis laboratory (KC40 and Cobas Mira). The department has a special interest in acquired defects of haemostasis and undertakes a wide range of assays including microplate and gel techniques. Special haematology testing includes haematinics and investigation of haemoglobinopathies.

Senior Biomedical Scientist Grade 2 (Ref: JS/31)
We are looking for an experienced Biomedical Scientist to take part in the organisation and supervision of the department. Although based in the haematology section you will have the opportunity to rotate to the haemostasis and blood transfusion sections. The successful candidate will be expected to take an interest in all aspects of the department including participation in, and support of, research, quality issues, some managerial duties and the on-call rota. Candidates must be State Registered and will be expected to hold relevant postgraduate qualifications.

Informal enquiries may be made to Ms Linda Townsend, Head of Haematology and Haemostasis on 0171 351 8407.

Biomedical Scientist Grade 1 (Ref: JS/32)
A State Registered Biomedical Scientist is required to rotate through all sections of the department and participate in the on-call rota. Support will be given for suitable vocational postgraduate courses.

Informal enquiries may be made to Ms Jan Teahon, Head of Haematology Staff on 0171 351 8407.

For an application form and job description, please contact The Human Resources Department, Royal Brompton Hospital, Sydney Street, London SW3 6NP or telephone - 0171 351 8686 (24 hour answerphone). Please state clearly for which post you are applying and quote the job ref. Closing date 20 November. Interviews will be held on 6 December 1995.
SCOTTISH NATIONAL BLOOD TRANSFUSION SERVICE
Protein Fractionation Centre
Development Department
Three-year Contract Initially

ASSISTANT DEVELOPMENT SCIENTIST
£10,410 to £14,248 per annum (pay award pending)

The Protein Fractionation Centre, located on the southern outskirts of Edinburgh, is a busy pharmaceutical manufacturing facility, responsible for meeting the requirements of Scotland and Northern Ireland for many of the products derived from human blood donations.

Applications are invited for a position in the Development Department, where the successful candidate will participate in research programmes aimed at developing and improving processes for the isolation and preparation of blood plasma proteins used in a variety of clinical indications.

Candidates should be qualified BSc or degree equivalent standard in an appropriate subject, eg., Biochemistry. Applicants should also have relevant laboratory experience.

Salary will be in the range £10,410 to £14,248 per annum (pay award pending) for a three-year fixed term contract, which may be renewed.

Further information concerning this post can be obtained from Dr John Hardy, telephone 0131664 2317, ext 224, or Dr Anne Welch, ext 263.

For a job description and application form please apply to Robert Stevenson, Personnel & Training Officer, Protein Fractional Centre, 21 Ellen's Glen Road, Edinburgh EH17 7QT. Telephone 0131 664 2317, ext 316.

Closing date for receipt of completed applications is 21 November 1995.
The University of Reading
UGAMP
UK Universities' Global Atmospheric Modelling Programme

Postdoctoral Research Scientists

The Department of Meteorology and the Centre for Global Atmospheric Modelling requires Postdoctoral Research Scientists to work on aspects of global atmospheric modelling within the framework of the Universities' Global Atmospheric Modelling Programme. UGAMP aims to improve our understanding of atmospheric processes and natural variability, using state-of-the-art General Circulation Models (GCM) and a range of idealized models, allied to diagnostic studies of observational data. Six posts are available as follows:

Modelling and diagnostics studies of the Asian Summer Monsoon
One 1-year position beginning in early 1996.
One 3-year position beginning in early 1996.
Dr Julia Slingo (Tel. +44 1734 318424, email swssling@met.reading.ac.uk) Ref: R9569

Palaeoclimate Modelling
One 2-year position beginning in early 1996.
Dr Paul Valdes (Tel. +44 1734 316517, email swsvalde@met.reading.ac.uk) Ref: R9571

Southern Hemisphere storm tracks and Antarctic sea ice
One 3-year position beginning as soon as possible.
Dr Jan James (Tel. +44 1734 318955, email LN.James@reading.ac.uk) Ref: R9572

Parametrization of cumulus convection in GCMs
One 20 month position beginning in mid-1996.
Dr Mike Blackburn (Tel. +44 1734 318327, email mike@met.reading.ac.uk) Ref: R9573

Middle Atmosphere Model Intercomparison project
One 2-year position beginning in early 1996.
Dr William Lahoz (Tel. +44 1734 31824, email wal@met.reading.ac.uk) Ref: R9574

Applicants should hold, or expect to gain shortly, a Ph.D. and should possess experience in numerical modelling of the atmosphere, oceans and other fluid systems. Salaries will be in the range £14,317 to £21,519 p.a. depending on experience. Please contact the named individual for informal discussion of each post. Apply for Application Form and further particulars to Personnel Officer, The University of Reading, Whiteknights, P.O. Box 217, Reading RG6 6AH, telephone (01734 316771). Please quote appropriate reference number. Closing date 24 November 1995.

A centre of excellence for university teaching and research.

DEPARTMENT OF PHARMACEUTICAL SCIENCES

Lecturer in Molecular Microbiology

The University of Nottingham has a leading international research department in Pharmaceutical Sciences and to strengthen the key area of molecular microbiology, a three year fixed-term lectureship is available.

Applicants should have a background in molecular microbiology with an interest in bacterial pathogenicity.

The successful applicant will be expected to contribute quality teaching in microbiology, molecular biology and biochemistry at both undergraduate and postgraduate levels. In addition, the Lecturer will be expected to collaborate within the Molecular Microbiology Research Group, as well as establishing independent research programmes.

The successful applicant will join a thriving multi-disciplinary research department (rated 5a in the last UFC selectivity exercise) with a research income from the research councils, charities, government agencies, European Union and industry in excess of £2m per annum. The Department has a large research community of over 70 postgraduates and 30 postdoctoral fellows working within state-of-the-art facilities with numerous collaborative links with other major international scientific institutions and industries.

Informal enquiries may be addressed to Dr Paul Williams, tel: 0115 951 5047, Email: Paul.Williams@nottingham.ac.uk.

Further details and application forms are available from the Personnel Office, Highfield House, The University of Nottingham, University Park, Nottingham NG7 2RD. Tel: 0115 951 5778. Fax: 0115 951 5205.

Please quote ref. DCH/077. Closing date: 30 November 1995.

Ph.D. Studentships

Two research studentships are available immediately for honours (minimum 2:1) graduates (Physical, Biological or Pharmaceutical Sciences) interested in drug delivery.

Drug Targeting
The research is directed towards the development of novel colloidal carrier systems for site specific delivery of drugs, diagnostic agents and DNA to target sites in the body.

Transmucosal Delivery
The research is directed towards the development of novel systems for the nasal delivery of drugs for local and systemic treatment.

The successful applicants will join dynamic, internationally recognised research groups.

Further information can be obtained from Professor S S Davis or Professor Lisbeth Illum. Tel: 0115 951 5121. Fax: 0115 9515122.

Applicants should send a detailed CV, together with the names of two referees, to Professor S S Davis, Department of Pharmaceutical Sciences, The University of Nottingham, University Park, Nottingham NG7 2RD. Closing date: 24 November 1995.

DEPARTMENT OF PHARMACEUTICAL SCIENCES & DEPARTMENT OF MICROBIOLOGY

2012
Applications are invited for the following two posts funded by the Medical Research Council as part of the MRC Nottingham University Clinical Research Initiative in Bacterial Infections. The successful candidates will become part of a multi-disciplinary collaborative team focusing on molecular and cellular aspects of staphylococcal infections and housed in the Institute of Infections and Immunity.

**Postdoctoral Research Fellow**

Applicants are invited for a three year Postdoctoral Research Fellowship focusing on aspects of environmental regulation of virulence gene expression in *Staphylococcus aureus* and in the coagulase-negative staphylococci. Candidates should have a Ph.D., possess expertise in molecular microbiology and have an interest in microbial pathogenicity.

Informal enquiries may be addressed to either Dr Paul Williams, tel: 0115 951 5047, Email: Paul.Williams@nottingham.ac.uk, Professor Mike Emmerson, tel: 0115 970 9162 or Professor Roger Finch, tel: 0115 969 1169 ext 455735.

**Ph.D. Studentship**

A research studentship focusing on the adaptation of staphylococci to life in vivo during medical-device related infection is available. The project will involve training in molecular biological and immunological approaches to the study of bacterial pathogenicity.

Informal enquiries may be addressed to Dr Paul Williams, tel: 0115 9515047, Email: Paul.Williams@nottingham.ac.uk.

For both posts applicants should send a detailed CV, together with the names of two referees, to Dr P Williams, Department of Pharmaceutical Sciences, The University of Nottingham, University Park, Nottingham NG7 2RD. Closing date: 24 November 1995.

The University of Nottingham is a research-led institution which provides the highest quality learning environment and is committed to equal opportunities in employment. - The University of Nottingham

Universities Federation for Animal Welfare

Scientific Director

Applications are invited from suitably qualified persons for the prestigious appointment of Scientific Director of the Universities Federation for Animal Welfare.

The successful applicant will be required to lead a small, dynamic team engaged in the effective application of the Charity's funds to the pursuance of humane behaviour to animals. He/she will have a background in veterinary or biological research, a record of positive contribution to animal welfare, a proven ability to communicate with the scientific and lay communities and, ideally, editorial experience.

Salary will be in the professorial range according to experience and qualification.

Candidates are requested to send 6 copies of their applications and CVs together with the names of 3 referees to the Chief Executive, from whom further details may be obtained.

Applications are to arrive by 30th November 1995 and envelopes should be addressed 'Personal for the Chief Executive', Sir Michael Simmons, UFAW, 8 Hamilton Close, South Mimms, Potters Bar, Herts EN6 3QD.

UNIVERSITY OF OXFORD

**International Project Manager**
To manage international clinical trials and co-ordinate activities of Symbio-Clin Group of European Central Laboratories. Ambitious, professional, self-starter, GLP, GCP, Project Leader/CRA experience, European languages. Salary c£27k.

**Study Director**
To manage clinical trials and deputise for department head. Lab background GLP, GCP, minimum three years CT management. Experience with central Lab or CRO. Salary c£22k.

CVs to Managing Director, Ravenscourt Laboratories, Ravenscourt Square, London W6 0TW.
Acquire team management responsibility while retaining hands-on contact with your discipline as a

**Microbiologist**  
Pharmaceutical Development  
Salary: £25-30K

The overall job purposes will be to provide a practical microbiological service and advice in key areas associated with both sterile and non-sterile product development, environmental control and animal welfare. Duties will include responsibility for operator training, method development and validation, sterility assurance, and testing of raw materials, in-process samples, finished products, and environmental and animal health monitoring.

Managerially, candidates will be responsible for a small, proficient team of staff within the Analytical Department, and have responsibility for the microbiological content of Product Development Reports, PLA and NDA applications. As senior microbiologist on site, the appointee will act as a local consultant, will maintain contacts with European and US counterparts, and will be involved in issues of international company harmonisation.

Candidates should have at least a good first degree in Microbiology and relevant experience in a pharmaceutical development, GMP environment extending over a minimum of 3-5 years.

Our Client has modern facilities located in an attractive setting where the atmosphere is pleasant, progressive and well motivated. If you believe you can lead a small team and have the competencies sought, send your CV to Dr Mike Hall, or phone for a confidential discussion.

Reference 9595.

Roger Stephens & Associates

Applications are invited for the position of

CHIEF TECHNICIAN

in the department of BIOCHEMISTRY (preferably with background in molecular biology).

Candidate should have experience as a Clinical Laboratory technician and hold the FIMLS, or equivalent qualifications, with fifteen years experience including training. The applicant's duties will be of a multidiscipline nature and will be both in the laboratory and in the field.

Salary will be in the range KD.312-528 per month (KD = 2.1 stg. pd, 3.4 US dollar approximately). Plus a sum of KD.150 towards your accommodation. No income tax in Kuwait and currency is transferable without restriction. Sixty days paid annual leave for each completed year of employment. Annual round trip economy class air tickets to the country of citizenship or permanent residence for self and family up to three dependent children.

METHOD OF APPLICATION
Curriculum vitae in duplicate which should include the names of three referees; personal particulars; copy of the relevant pages of passport; qualifications should arrive by 15th December 1995 to:
The Vice Dean Administration, (Recruitment Office), Faculty of Medicine, University of Kuwait, Post Box No: 24923, 13110 Safat, Kuwait or Fax No: 5318454.
PLANT TECHNOLOGISTS
£12,000 - £14,000

ZENECA is a world leader in the development of crop protection products, with an international reputation in biotechnology.

We are looking for graduate scientists to join an interdisciplinary project team working on the development of plants with improved disease/pest tolerance at our research station in Jealott's Hill, Berkshire.

You will have experience of plant molecular biology techniques and biochemical analysis. These are laboratory based positions, requiring the delivery of high quality results to meet tight deadlines.

We offer a competitive salary and the benefits you would expect of an organisation of our calibre - 25 days holiday, a subsidised restaurant and a lively sports and social club.

Appointment to these positions will be on a fixed term contract.

To apply, please send your CV quoting reference PLANT BIO 38, to Mrs Sarah Carro, Human Resources, PO Box 303, Bracknell, Berks RG12 6YX. The closing date for applications is 17th November 1995.

Our leading-edge organisation believes that valuing individuals with different backgrounds and experience will lead to improved business performance.

ZENECA Agrochemicals

HELPING FARMERS FEED THE WORLD
ADAS

SENIOR CROP PHYSIOLOGIST

ADAS is the leading consultancy to the land-based industries of England and Wales. We provide consultancy, research and development services to the agricultural, horticultural and related industries, to Government, individuals and corporate groups.

ADAS's Arable Research Centre at Cambridge is identifying and promoting principles on which to base crop management, compatible with the constraints of modern agriculture.

We seek a senior crop physiologist to join a multi-disciplinary team studying growth and its susceptibility to control through husbandry. The physiologist will manage projects seeking to track crop progress for the wheat industry, and to improve the use of nitrogen fertilisers. The role will be to publish and promote the findings, and to develop, market and lead their own research.

Applicants should have a doctorate or equivalent experience in crop physiology, and appropriate scientific publications. They must have good data interpretation and communication skills and be particularly attracted to working under the constraints of a commercial research operation.

The appointment will be for five years in the first instance, and has the prospect of permanency. Starting salary is expected to be in the range £15,000 to £25,000 depending on qualifications and relevant experience. ADAS has a performance related pay policy for which personal performance is reviewed annually against agreed work objectives of the post.

This post is open to UK, Irish, Commonwealth and EC citizens.

For further details please contact Andrew Seaman, ADAS Anstey Hall, Maris Lane, Trumpington, Cambridge CB2 2LF. (Tel: 011223 840011; Fax: 01223 841618). Please quote Ref: RSB. Closing date for applications is 1 December 1995.

ADAS is an equal opportunity employer.
OPPORTUNITIES OVERSEAS

VSO volunteers work in some of the poorest countries in the world, sharing their skills to help people become self-sufficient and build a future of their own. We have the following requests:

Park Planner, Pandam Game Reserve, Nigeria
You will provide on the job training in conservation protection and put together a management plan for the park. You will need some experience in conducting research.

Conservation Educator, Jos Wildlife Park, Nigeria
You will be setting up a conservation education programme and developing a small museum. The above posts are for two years with the Plateau State Tourism Corporation. Volunteers must have experience and a degree in Zoology or Wildlife Management.

Lecturer in Water Supply and Treatment, Xian, China 12 months
To lecture teachers on pipe netting design, water treatment for high rise buildings, and water recycling. You will also research into special waste water treatment, reliable city water supplies and the treatment of fluoride in underground water.

Volunteers should be adaptable and sensitive to other cultures, and a sense of humour. In addition you must be aged 20-70, without dependent children, willing to work for a modest living allowance, and have unrestricted right of re-entry into the UK.

Closing date: 15 November.

For further details and an application form, please contact: Atha Murphy, (Ref. NSC11), VSO, 317 Putney Bridge Road, London SW15 2PN. Tel. 0181-780 1331.

VSO enables men and women to work alongside people in poorer countries in order to share skills, build capabilities and promote international understanding and action, in the pursuit of a more equitable world.

Monoclonal Antibody Production Scientist

Applications are invited for the above post to work as part of a small team producing monoclonal antibodies for use in diagnostic kits.

Applicants should ideally be graduates who have at least two years' experience working in the field of protein purification. Cell biology experience would also be useful. Salary according to experience.

Applications in the form of a CV and requests for information should be sent to the Administration Manager, BioChem ImmunoSystems (UK) Ltd, 20 Woking Business Park, Albert Drive, Woking GU21 5JY. Telephone: 01483 755330 / Fax: 01483 755889.

Residues Chemist

Pharmaceuticals and Feed Additives Team
£17,315 - £29,986
Addlestone, Surrey

The Veterinary Medicines Directorate is an Executive Agency of the Ministry of Agriculture, Fisheries and Food responsible for ensuring the safety, quality and efficacy of veterinary medicines in the UK. Its multidisciplinary teams assess licence applications, investigate suspected adverse reactions and inspect manufacturers of immunological products.

Working with toxicologists, veterinarians, pharmacists and other scientists you will evaluate residues data related to animal test certificates, maximum residue limits and marketing authorisations for products. You will also prepare technical summary reports, attend meetings of key committees and provide advice on relevant legislation and regulations to authorisation holders and the pharmaceutical industry. The role calls for close liaison with administrative and professional colleagues within the Directorate and MAFF.

A graduate in chemistry, ideally with a relevant post graduate qualification, you must have experience of the animal health and livestock industries, preferably supported by a good knowledge of regulatory affairs, safety issues and key authorisation systems.

This post is offered on a three-year, fixed-term basis with the possibility of extension or conversion to permanent status. Your starting salary will normally be at the lower end of the range, but will take into account your qualifications and quality of relevant experience.

For an informal discussion about the role please contact Kevin Woodward on 01932 336911 ext. 3009.

For further details and an application form (to be returned by 24th November 1995), please telephone Recruitment & Assessment Services on Basingstoke (01256) 468551 (24 hours) or fax 01256 846374/846660. Please quote reference B2724.

RAS
Quality Support
Lilly

Lilly Industries is part of Eli Lilly and Company, a multi-national organisation firmly established in the research, development, manufacturing and marketing of quality pharmaceutical products.

Pharmaceutical Manufacturing
Basingstoke, Hampshire

Opportunities have arisen within the Production Quality Control Group at Basingstoke for people interested in putting their commitment to GMP and Total Quality Management into action.

As a member of the group, you will work closely with the manufacturing and packaging teams - reviewing and approving batch documentation, troubleshooting on quality matters, auditing production areas and advising many departments on GMP.

You will be responsible for building customer partnerships and working together to improve quality standards. Initiative and strong leadership abilities are essential as are excellent communication and interpersonal skills enabling you to interact with a variety of people across the organisation.

A graduate with at least 3 years experience in the pharmaceutical industry, you must be able to demonstrate your commitment to TQM within a pharmaceutical manufacturing environment. This experience may have been achieved either by working directly within a manufacturing/packaging environment or technical support or from within a production based non-laboratory quality control role.

Recent science graduates who wish to join the industry in a quality role will also be considered for entry positions within the Group.

Lilly Industries is committed to personal development and offers a highly competitive salary and benefits package.

If you would like to be considered please write, enclosing a detailed CV, to Chris Rapson, Personnel Representative, Lilly Industries Ltd., Kingsclere Road, Basingstoke RG21 2XA. Tel: 01256 315765. [2002-048 (1995) : 69]
The Royal Society of Chemistry is a major publisher of scientific information, in both printed and electronic media. The Society has recently launched a Web Server on the Internet, and the text of all its primary journals are available on-line, via a host service.

We are now looking for a graduate in science or engineering with practical experience in electronic publishing (preferably STM) and marketing, to be responsible for the electronic distribution of the Society's primary and tertiary information and its Web Server facilities. This will include the internal and external marketing of products and services and the planning and management of profitable business strategies for them.

The successful candidate will already have a good knowledge of services available on the Internet, particularly in science and technology.

Assistance with relocation expenses will be available where appropriate.

To apply, send full CV, with current salary details, to Mrs S. M. Durham, Personnel Manager, Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF, or telephone 01223 432238 (24 hour answerphone) for a job description and application form.

Closing date for applications: 14 November 1995.

Further details and application forms are available from Personnel Services, The Nottingham Trent University, Burton Street, Nottingham NG1 4BU, by telephoning 0115 9486522 (24 hour answering service. Post Ref No: S0513/NS. Closing date 17 November 1995.

Please note: CVs will only be accepted when submitted with a fully completed application form.

We are actively implementing equality of opportunity policies and seek people who share our commitment
[2002-053 (1995) : 70]
Head of Food Technology Unit
£29,482 - £48,879  Central London

The Food Technology Unit lies within the Agriculture and Food Technology Division, a part of MAFF's Chief Scientists Group (CSG). To enhance the Ministry's science policy formulation, drive forward their strategy and optimise the scientific benefits of policy implementation, we are now seeking a senior research management professional.

The role will provide you with the opportunity to make a significant contribution to the CSG's work, specifically in the fields of LINK programmes and technology transfer. This will bring you into contact with the LINK board, technical experts, academic and industrial communities, joint Government sponsors and European networks.

As prime interface with industry, you will provide timely advice on key trends, answer parliamentary questions and prepare briefings for the Chief Scientist and Ministers. Close monitoring and periodic programme evaluation will help you make funding recommendations and develop a balanced portfolio of projects. You will also promote research results through launch events, conferences, publications and presentations to expert bodies. To maintain the Unit's presence within the research community, industry and Whitehall you may need to identify and employ external resources.

A graduate, ideally with a relevant postgraduate qualification, your extensive food science engineering and manufacturing experience will accompany your background in research and technology transfer management. You will also need the capacity to propose solutions to unprecedented problems, together with strong communication, negotiation and presentation skills.

This is a three-year fixed-term appointment with the possibility of extension or conversion to permanent status. There may also be the opportunity to transfer to other posts within MAFF.

For further details and an application form (to be returned by 24th November 1995), please telephone Recruitment & Assessment Services on Basingstoke (01256) 468551 (24 hours) or fax 01256 846374/846660.

As part of our continuing expansion within Europe, a new position has been created within European Clinical Management for a

**Clinical Data Manager**

Enthusiastic, well organised and possessing excellent attention to detail, you will be involved in all aspects of managing clinical trial data generated from studies throughout Europe, from assisting in Case Report Form and database design, data validation and review, to specify quality standards.

Ideally you will be qualified to degree standard, or equivalent, and have up to 18 months' experience with a Data Management or Life sciences environment. The level of appointment will be dependant upon previous experience.

We offer a competitive benefits package, together with training in an environment where you will be encouraged to develop your technical skills and become involved in a wide range of Data Management activities.

Applications, complete with detailed CV and covering letter should be sent to: Dr Sue Snape, Senior Clinical Data Manager-Europe, Alkermes Europe Ltd, The Quorum, Barnwell Road, Cambridge CB5 8RE. Tel: (+44) 01223 416 063.

MOLECULAR BIOLOGY COMPUTER OFFICER
£14,012 - £19,261 pa
3 year fixed term appointment

The Museum's Department of Zoology currently has a vacancy for a Molecular Biology Computer Officer to set up and maintain computer services. You must have experience of computer systems and molecular data analysis. A degree in a science or technology subject is desirable and familiarity with Solaris, Mac and Ethernet systems would be an advantage.

Starting salary is dependent upon experience and qualifications. We offer a comprehensive benefits package, including a non contributory pension scheme, generous leave entitlement and an interest free season ticket loan.

For further details and an application form please send an A5 SAE to:
Collette Hayes, Personnel Section, The Natural History Museum, Cromwell Road, London SW7 5BD.

Closing date for receipt of applications is Friday 17 November 1995.

The Natural History Museum is working towards Equal Opportunities.

THE NATURAL HISTORY MUSEUM
The National Centre for Instrumentation and Marine Surveillance is urgently looking for an Image Processing Technician to join the Data Section at our offices in Twerton. With responsibility for processing digital data obtained in extensive aerial surveys, you will produce standard products and design special products as required. You will liaise both with the NRA and external users of the Remote Sensing Database.

You will be trained and have experience in remote sensing techniques, particularly in image processing and preferably experience in a marine science. A relevant science degree would be advantageous and you will be highly organised, able to work as part of a team and capable of demonstrating a high degree of computer literacy.

This is a temporary contract for a period of up to 12 months which may be extended. Salary will be dependent upon experience and qualifications. The NRA offers an attractive benefits package, including a generous holiday allowance and contributory pension scheme.

For further information and an application form, please contact Richard Saull on 01278 457333 ext 4238, or write to him at National Rivers Authority, Rivers House, Lower Bristol Road, Twerton, Bath BA2 9ES. Applications to be received by 16 November 1995. Interviews will be held in late November.

The South Western region of the NRA operates a No Smoking Policy.

The NRA is committed to achieving Equal Opportunities.
Uniquely positioned as a successful Contract Pharmaceutical Organisation (C.P.O.) within the international Healthcare arena, Innovex PLC has the clinical development and sales/marketing capability of a fully-fledged healthcare company, and provides an integrated range of services embracing Clinical Research, Health Management and Sales & Marketing. You'll join them as:

**Business Development Director**

Package to £60,000 plus car Marlow

Managing and developing the interface between the company and a portfolio of existing and prospective clients across the entire spectrum of services, you'll foster relationships of mutual respect both inside and outside the organisation as you:

• propose value-added solutions which optimise customers' product development and marketing plans
• negotiate profitable agreements for which you will have full financial accountability
• ensure high levels of client satisfaction by engaging the enthusiasm and competences of your colleagues at every level

You are a self motivated, creative thinker with persuasive communication and presentation skills. Your successful career includes experience of late phase clinical research gained within the Industry or a Clinical Research Organisation. You understand the complex organisational changes taking place in the Healthcare marketplace and have a keen commercial outlook. You are now ready to move ahead in your career, ready to shape and grow new business with a world class Contract Pharmaceutical Organisation.

Please write with a succinct letter relating your experience and ambitions to Mrs Catriona Shuba, quoting ref 95100, or telephone first for a brief discussion.

BP
BP OIL

Asphalt Research Leader
BITUMEN TECHNOLOGY UNIT
£29,000 - £35,000 + Benefits

Sunbury-on-Thames

Here at Sunbury, our Bitumen Technology Unit provides product development expertise, consultancy and technical support for BP's highly successful international bitumen business. The industry trend towards performance-based specifications has now created this opportunity within the Unit for an individual capable of managing and co-ordinating research on asphalt performance and the role played by bitumen in asphalt behaviour.

Your work will involve agreeing research targets with the sponsor, developing the work programme, securing and managing the resources, interpreting results and finally delivering the appropriate technology back to the sponsor. You will also provide ad-hoc technical consultancy and support to the business, as well as covering for colleagues with specialisms in other areas. There will be opportunities to prepare and present papers at conferences and for publication.

In addition to a good degree in civil engineering, materials science or physics, you should have at least five years' experience in two or more of the following areas: • asphalt research • asphalt road design and construction • bitumen rheology • polymer modification of bitumen. Proven leadership, communication and presentation skills are required, together with the ability to design experiments and manage multi-site research programmes within an ISO 9001 environment. Well developed PC expertise is also vital.

In return we offer an excellent salary and benefits package, including non-contributory pension and share scheme.

Please call Sue Shirley on 01932 763711 for an application form or send her your CV including details of current salary to Personnel Department, BP Oil International Limited, Oil Technology Centre, Chertsey Road, Sunbury-on-Thames, Middlesex TW16 7LN.

BP is an equal opportunity employer.

Graduate Scientist Trainee Scheme

The Defence Engineering Science Group (DESG) is a group of civilian specialists in the Ministry of Defence, responsible for all aspects of the equipment programme. Scientists and engineers within the DESG ensure that Britain's Armed Forces have the best that science and technology can provide, from helmets to helicopters.

DESG
DEFENCE ENGINEERING AND SCIENCE GROUP

Leading-Edge Work in Computer Controlled Systems

To recruit scientists who can develop quickly to become managers of scientific projects, we have a Graduate Scientist Trainee Scheme. We have recently identified a vacancy, in the Sea Systems Controllerate at Bath, (re-locating to North Bristol mid 1996), for a scientist who has, or is about to obtain, a computer related degree.

During the Schemes's 2 year training programme, you will be engaged in providing leading-edge advice and support to Sea Systems projects on Computing Policy, Software Engineering Management and Safety Related Software.

You will assist in the management of software intensive projects and in the attainment of safety in computer controlled systems. The job will involve providing consultancy to procurement projects and writing or contributing to relevant instructions and procedures.

The work is demand driven and provides opportunity for variety, with the successful candidate able to make a productive contribution to the attainment of dependability in computer controlled systems. We offer flexibility of tasking to suit the aspirations of the individual, and current interests are software intensive project engineering management, software integration, software management metrics, safety management and systematic integrity assurance.

To be eligible to join the Scheme, you should have or expect to gain at least an upper second class degree. We also look for qualities beyond your degree discipline - the capacity for development, and ability to acquire managerial and professional skills rapidly. Trainees are encouraged to attain corporate Membership of the British Computer Society (MBCS) or the IEE and Chartered Engineer status (C.Eng). Support of part-time MSc or Doctorate studies beyond the DESG programme can be considered.

The salary is £13,806, and provided your performance meets our expectations, you will be promoted to Higher Scientific Officer at a salary of £17,485 after completing the 2 years training.

For an application form, please write to the DESG Recruitment Office, Room 136, Pinesgate East, Lower Bristol Road, Bath BA1 5AB, quoting reference SSC10. Your completed application form should reach us by Wednesday 22nd November 1995.

The successful candidate will be expected to take up employment within 6 months of the date of application.

The Ministry of defence positively supports equal opportunity policies.

THE UNIVERSITY of MANCHESTER

Simon Research Fellowships

Applications are invited for Simon Research Fellowships (2 posts) in any of the Social Sciences, including Law and Education, tenable for 3 years.

The Fellowships are not awarded for postgraduate study. Applicants should have a higher degree in a relevant subject or equivalent qualification. A record of research and publications or demonstrated potential for research in relevant subject areas is essential. Experience of teaching and attainment is desirable. Salary, within the range £15,154 - £26,430 pa according to qualifications and experience.

It is anticipated that applicants will have recently completed (or are about to complete) a Ph.D. degree in an area of research that is currently being pursued within the University and, if successful will be attached to the research programme of a specific department.

Applicants are advised to make informal contact with the head of the department with which they wish to be associated before submitting their application.

Further particulars and application forms (returnable by November 24th 1995) are available from the Director of Personnel The University of Manchester, Oxford Road, Manchester M13 9PL (tel. 0161 275 2028). Quote ref. 316/95.

As an Equal Opportunities Employer, the University welcomes applications from suitably qualified people from all sections of the community regardless of race, religion, gender or disability.

Promoting quality, teaching and research

POSITIVE ABOUT DISABLED PEOPLE
Arjo Wiggins
Printing & Writing – Impression-Ecriture

**Diagnostic Engineer**
Beaconsfield Based up to £19,000

Arjo Wiggins is one of Europe's leading manufacturers and distributors of high added value paper products. A vacancy has arisen within the Process Diagnostics Group at their Technology Centre based at Beaconsfield in Bucks. The majority of the work involves use of a range of advanced technologies and techniques (e.g., data acquisition and analysis techniques, imaging systems, thermal imaging etc) to enable effective process trouble shooting at the many production units situated mainly in the UK, France and Belgium. There will also be the requirement to work on projects related to process innovation. The work should prove both challenging and rewarding to anybody willing to apply themselves to this interesting and valued activity.

The successful candidate could be a physics/mathematics graduate or equivalent with at least two years industrial experience having an inquiring nature and looking for the opportunity to practically apply their knowledge in a process environment. Good interpersonal skills, drive and innovative flair are essential requirements. The job involves extensive travel and the ability to communicate in French would be an advantage.

An excellent employment package is available for the right person with a salary up to £19,000 according to age and experience.

If this is the challenge you are looking for then please contact: Mr A. P. Way. Telephone 01494 652200.

Arjo Wiggins Ltd, Butlers Court, Beaconsfield, Bucks HP9 1RT.
CLINICAL TRIAL MONITORS AND CLINICAL RESEARCH ASSOCIATES

We require Monitors and CRAs for a busy, expanding, independent Contract Research Organisation. We are looking for people who are enthusiastic reliable and hard working with some experience to join our team and be responsible for the day to day management of studies. A relevant science degree would be an advantage.

If you are interested in a varied job involved in many different therapeutic areas, then please send a CV to: Vicky Diment – Head of Clinical Trials.
Medical Monitoring & Research Limited 17-19 Castle Street, Hertford, Herts SG14 1ER
Telephone: Hertford (01992) 554422/3 Fax: 0 1992 586790
Euro Bio-Pharm
Field-based and office-based opportunities for:

**SENIOR CLINICAL RESEARCH ASSOCIATES** and **CLINICAL RESEARCH ASSOCIATES**

Euro Bio-Pharm is an established Clinical Research Organisation comprised of an experienced team of highly motivated professionals.

Due to a growing demand for our services, we now have a number of opportunities within our Clinical Monitoring Group for CRAs and Senior CRAs, whose skills will complement our existing expertise in the planning, design, monitoring, analysis and reporting of clinical trials.

Candidates will have a Life Sciences Degree or nursing background, together with the ability to communicate with people at all levels. At least 12 months' experience as a CRA within a Pharmaceutical Company or Clinical Research Organisation is required.

In return, Euro Bio-Pharm offers a stimulating and challenging working environment with openings in project management and the opportunity to work across a variety of therapeutic areas on both UK and pan-European projects.

The package includes a competitive salary, company pension scheme, private medical cover and a quality company car.

If you are interested in these positions, please apply in writing, enclosing a full curriculum vitae, to Mrs Angela Law, Head of Clinical Monitoring at the following address, Euro Bio-Pharm Limited, Wessex Business Centre, Bumpers Way, Bumpers Farm, Chippenham, Wiltshire SN14 6NQ.

As a research and development physicist you will work in the area of computerised conformal radiotherapy in a post sponsored by the EC BIOMED-2 programme as part of the multinational INFOCUS project. INFOCUS aims to bring together innovative opto-electronic hardware developed by another partner, imaging devices and treatment planning software to enhance the clinical application of conformal radiotherapy using multileaf collimators (MLC).

The Christie Hospital has its own software running on Digital Alpha computers supporting treatment on two MLC linear accelerators. You will develop new software for pictorial / graphical data capture and manipulation linked to dosimetric and biological modelling for conformal radiotherapy environments. The integration of software / results from other INFOCUS partners will be required.

The appointment will be for three years as a Grade B Clinical Scientist (Scale points 8-11, depending on experience, salary £16,500 to £18,560 pa inclusive). You should have a good honours degree in physics or computer science, three years' relevant postgraduate experience and a strong grounding in computer programming. Programming experience in a medical imaging/graphics environment would be advantageous.

Informal enquiries to Dr C. J. Moore, 0161 446 3892.

Application form and job descriptions from the Personnel Department, tel: 0161 446 3828 (24 hour answerphone) quoting Job Reference No: 95/185C.

The closing date for this post is 23 November 1995.

Farmland Ecologists
Ref LN6094 £13,951 - £24,174

An ecologist with particular interest in entomology is required to conduct research on the ecology and management of different hedge types, with the aim of improving their conservation value. You will join a team of researchers investigating the ecology of semi-natural habitats in agricultural systems. You should be trained in research to Ph.D. level, or have at least two years’ postgraduate experience in a relevant field of ecology, and must hold a full, clean driving licence. This MAFF-funded post is expected to last three years.

Ref LN6095 £11,929 - £20,665
An ecologist with particular interest in plants is required to complete on-going research on the ecology and dynamics of different field boundary types, and their role in agricultural landscapes. You will join a small team of researchers investigating the ecology and management of field boundaries. You should have a degree in environmental science, ecology or botany, and preferably some research experience. You will also need good skills in field identification of native plant species, knowledge of ecosystem function and a reasonable grasp of statistics. This EC AIR funded post is expected to last one year.

Both posts offer 25 days' annual leave and non-contributory superannuation scheme. For an informal discussion, please contact Dr E J P Marshall at Long Ashton on 01275 392181, or direct line 01275 549360.

Further information and application forms are available from the Personnel Officer, IACR-Long Ashton Research Station, Department of Agricultural Sciences, University of Bristol, Long Ashton, Bristol BS18 9AF (telephone 01275 392181). Please quote the appropriate reference number. Closing date for applications: 16 November 1995. An Equal Opportunities Employer.
Sandoz Pharma Ltd has a vacancy in its Drug Delivery Systems (DDS) department for a

Pharmacist
to head a laboratory specialising in the development of innovative formulations for dermal application. The main activities will involve research and development work in all areas of this field, from pre-formulation through production of clinical samples to the manufacture of finished product. Related activities will include physical and chemical characterisation and participation in the development of innovative application systems.

Applicants for this wide-ranging position must have a doctorate in pharmacy and experience of the industrial development of dermatological agents. The successful candidate will be expected to work independently with an international multidisciplinary team and to take responsibility for guiding and supervising laboratory staff. Further requirements are a markedly scientific way of thinking, good communication skills, flexibility and an excellent command of English.

Applicants, including a full curriculum vitae, should be sent to: Sandoz Pharma Ltd, Personnel Department, Ref 5426, Mrs S. Brunnschweiler, CH-4002 Basel/Switzerland.
UNIVERSITY OF LEEDS
Research Opportunities

RESEARCH SCHOOL OF MEDICINE
ICRF CANCER MEDICINE RESEARCH UNIT

Research Assistant

This post is available immediately for a fixed period of 2 years to work on the molecular genetics of melanoma. Previous laboratory experience in standard molecular biology techniques is essential as is a BSc in a biological discipline.

Salary will be on the scale for Research Staff Grade 1B (£14,317 - £15,986 p.a.) according to qualifications and relevant experience. Informal enquiries and job description requests may be made to Mrs Janet Holt, Laboratory Manager tel. 01 13 283 7033.

Applications in the form of a CV with details of two referees should be submitted to: Dr J Newton-Bishop, ICRF Cancer Medicine Research Unit, St James's and Seacroft University Hospital, Beckett Street, Leeds, LS9 7TF.

Closing date for applications: 23 November 1995.

DEPARTMENT OF EARTH SCIENCES

Research Fellow

This post is available from 1 December 1995 for a fixed period of six months in the first instance. It is concerned with crust and upper mantle structure beneath Eurasia using gravity, topography, and aeromagnetic data together with available borehole, seismic refraction, and heat flow data, as constraints.

Applicants should have a Ph.D. in geophysics, with some geological experience. Experience in spectral analysis and management of large data sets within a UNIX environment is essential. Candidates familiar with plate flexure problems and modelling techniques are sought.

Salary will be on the scale for Research Staff Grade 1A (£14,317 - £21,519 p.a.) according to qualifications and relevant experience. Informal enquiries about the post may be made to the principal researcher, Professor J D Fairhead, email jdf@getech.leeds.ac.uk Application forms and further particulars may be obtained from Mr W J McKay, Department of Earth Sciences, University of Leeds, Leeds, LS2 9JT tel 0113 233 5254, quoting the reference number 49/68. Closing date for applications: 23 November 1995.

The University of Leeds promotes an Equal Opportunities Policy. Promoting excellence in teaching, learning and research.

UNIVERSITY OF BATH
SCHOOL OF PHARMACY AND PHARMACOLOGY

TECHNICIAN

A vacancy exists for a Technician in the Pharmaceutics/Pharmaceutical Technology section of the School. The successful candidate will have responsibility for organisation of two new pharmaceutical laboratories, routine equipment maintenance and technical support required to support various research activities. When possible, opportunity will be given for work on longer research projects to be carried out. In addition, the position also involves servicing undergraduate teaching in pharmaceutics.

Candidates should have a chemical/biological or a chemical/physical background and at least an ONC or equivalent.

Salary in the range £10,138 - £11,368 per annum.

Closing date 16 November 1995.

Application forms are available from the Personnel Department, University of Bath, Claverton Down, Bath BA2 7AY or telephone 01225 826096 (e-mail E.J.Wood@bath.ac.uk) quoting reference 95/239.

Working towards Equal Opportunities

Advancing Learning and Knowledge in Association with Business and Industry
PROFESSOR AND DIRECTOR
SCOTTISH INSTITUTE OF SPORTS MEDICINE AND SPORTS SCIENCE

Applications are invited from suitably qualified candidates for appointment as Professor in the Department of Physical Education, Sports and Outdoor Education. The successful candidate will also be appointed as Director of the Scottish Institute of Sports Medicine and Sports Science, based at the Jordanhill Campus of the University of Strathclyde (appointment as Director of the Scottish Institute will be for five years in the first instance). The Institute, steered jointly by the Universities of Aberdeen and Strathclyde, together with the Scottish Sports Council, has been established to manage the development of sports medicine and sports science in Scotland.

Applications will be welcomed from candidates with a proven track record in any branch of sports medicine or sports science or in a related area. Applications from candidates who wish to maintain their professional activities on a part-time basis, eg clinical duties, will be welcome - the University will adopt a flexible approach to such candidates.

For application form (Ref: 81/95) and further particulars contact the Personnel Office, University of Strathclyde, Glasgow, G1 1XQ. Telephone 0141 552 4400, Extension 4476.

Applications Closing Date: 24 November 1995.

The University is 'A Place of Useful Learning' and committed to Equal Opportunities.

UNIVERSITY OF STRATHCLYDE
THE UNIVERSITY of MANCHESTER

Senior Research Fellowships

Applications are invited for the following Fellowships:

HALLSWORTH FELLOWSHIPS for advanced work in the field of Political Economy (including Public Administration), tenable for up to one year commencing October 1st 1996. Salary, within the range £15,154 - £31,999 p.a. according to qualifications and experience. Quote ref. 317/95.

The Fellowships are not awarded for postgraduate study. Applicants should have a first degree in a relevant subject or equivalent qualification. A record of research in relevant subject areas is essential. Experience of teaching and attainment is desirable.

SIMON INDUSTRIAL AND PROFESSIONAL FELLOWSHIPS tenable for up to one year commencing October 1996. The Fellowships are intended to provide opportunities for persons employed in industry, commerce, the public service, the professions, or who are self-employed to be associated with the departments of the University. The association may be for research purposes or for developing teaching or continuing education, or for such other purposes as deemed appropriate by the awarding committee. Salary will be within the range £15,154 - £31,999 pro rata according to qualifications and experience. Quote ref. 318/95.

Applications for these Fellowships are advised to make informal contact with the head of the department with which they wish to be associated before submitting an application.

Further particulars and application forms (returnable by November 24th 1995) are available from the Director of Personnel, The University of Manchester, Oxford Road, Manchester M13 9PL (tel. 0161 275 2028). Please state for which Fellowship details are required and quote appropriate reference number.

As an Equal Opportunities Employer, the University welcomes applications from suitably qualified people from all sections of the community regardless of race, religion, gender or disability.

Promoting quality teaching and research

POSITIVE ABOUT DISABLED PEOPLE
Lecturer in Organic Chemistry

Applications are invited for this Lecturership which is available from 1 January 1996 or as soon as possible thereafter. The Department is well equipped and active with established research lines in organic and inorganic chemistry, electrochemistry, materials chemistry and the chemical applications of spectroscopy.

The duties will include the supervision of research students and the teaching of undergraduate and postgraduate students.

The successful applicant will have a strong commitment to research in organic chemistry. Excellence in research and the ability to rapidly establish a research programme are the primary criteria for appointment, although an interest in pharmaceutical or medicinal chemistry would be an advantage.

Informal enquiries may be made to Dr K D Sales, Head of the Department of Chemistry on 0171-975-5026 or to Professor J H P Utley on 0171-975-5023.

The salary will be in the range £17,288 - £28,564 pa inclusive depending on experience.

For an application form and further details please telephone our 24 hour Recruitment Line on 0171-975 5171 quoting Reference 95153.

Completed application forms should be returned by 24 November 1995 to the Recruitment Coordinator, Personnel Office, Queen Mary and Westfield College, Mile End Road, London E1 4N5.

UNIVERSITY OF LONDON
WORKING TOWARDS EQUAL OPPORTUNITIES

A multi-faculty college of the University of London engaged in teaching and research of international distinction
[2002-075 (1995) : 77]
UNIVERSITY OF BRISTOL
School of Chemistry

RESEARCH ASSOCIATE

Applications are invited for this one-post to study mechanism, kinetics and molecular basis of immune and allergenic reactions, using Electron Spin Resonance (Bruker ESP300E) combined with LTV/visible spectroscopy. Stopped flow techniques and computer modelling of complex multiple step reaction systems will also be used. Minimum requirement: Ph.D. in Chemistry, Biochemistry or Physics. Salary on RA1A scale.

Informal enquiries to Drs Bryn Mile or John Maher, School of Chemistry, Bristol BS8 1TS. Tel: (0117) 928 7653, e-mail: john.mahler@bristol.ac.uk (see http://emrs.chm.bris.ac.uk).

For further details telephone (0117) 925 6450 (answerphone after 5pm), or minicom (0117) 928 8894, or write to the Personnel Office (EO), University of Bristol, Senate House, Bristol B88 1TH, quoting reference E44.

Closing date for applications: November 30, 1995.

AN EQUAL OPPORTUNITIES EMPLOYER

An International Centre for Education and Research
UNIVERSITY OF STRATHCLYDE

RESEARCH FELLOW

Applications are invited for this two year post funded by the Home Office, to work with Professor W. E. Smith and Dr P. C. White, to develop a highly specific and sensitive sampling system for Raman spectroscopy. Applicants must have experience of Raman spectroscopy, preferably coupled with an interest in synthetic organic chemistry. Salary in range £14,317 - £21,519.

For application form and further particulars (Ref: R31/95) please contact the Personnel Office, University of Strathclyde, Glasgow G1 1XQ. Tel: 0141552 4400, ext 4476. Applications closing date: 24 November 1995.

The University is ‘A Place of Useful Learning’ and committed to Equal Opportunities
Campden & Chorleywood Food Research Association is a major independent research organisation which provides worldwide scientific and technical support for the food and drink industries.

Applications are invited for the following positions:

**MOLECULAR BIOLOGY SPECIALIST**

The Microbiology Department require a graduate experienced particularly in molecular aspects. Experience of nucleic and acid fingerprinting methods would be advantageous although training will be given.

The successful candidate will be responsible for all Research Association services concerning molecular microbiology. Good communication and team working skills are essential as the position will involve customer contact and the supervision of technical staff.

Salary in accordance with qualifications and experience plus benefits. Code MIC12

**FOOD PROCESS TECHNOLOGIST**

We now have a vacancy in the Biscuits and Extruded Foods Department for a Food Process Technologist. The ideal candidate will be educated to degree level or equivalent in food science or technology, or other scientific subjects, and will have gained skills in computing and data handling. The successful candidate will work on projects related to extrusion cooking and biscuit production, and will be used to working in teams or individually.

The role offers excellent opportunities for career development for those who can show motivation and initiative, and will be located initially at Chorleywood, Hertfordshire, with relocation to Chipping Campden in Spring, 1996.

Salary will be in accordance with qualifications and experience plus benefits. Code: CW9

**RESEARCH OFFICER**

Food Process Engineering Department

The Food Process Engineering Department require a graduate with an Engineering or Food Technology Degree and an interest in research and development work. Some experience within the food industry would be preferable. The applicant should be computer literate with good communication skills.

The job will involve screening and developing new technologies in food processing as well as working in the general food process engineering areas of heat processing, food mixing, etc. Contract consultancy work both in factories and at CCFRA, will also be part of the job.

Salary will be based on qualifications and experience plus benefits. Code: FPE3

For an application and further details, please contact Jeanette Propert, CCFRA, Chipping Campden, Gloucestershire GL55 61LD, telephone 01386 840319.

Closing date for all positions: 30 November 1995.

NERC Industrial CASE Ph.D. Studentship
Molecular Microbial Ecology

Exciting new techniques to study the ecology of microorganisms have been developed recently, including the use of PCR and 16S rRNA-targeted oligonucleotide probes. Shell Research Ltd and the University of Newcastle have come together to exploit this technology, to explore and improve our understanding of nitrifying bacteria and nitrification in wastewater treatment systems. Applications are invited from suitably qualified candidates. Start date 2 January 1996. Further details and an application form can be obtained from Dr Ian M. Head at Newcastle Research Group in Fossil Fuels and Environmental Geochemistry, Drummond Building, University of Newcastle, Newcastle upon Tyne NE1 7RU. Tel: 0191 222 6605.

Committed to Equal Opportunities
Dedicated to Excellence in Teaching and Research
Information Officer
c £15,000 p.a. inc. (depending on experience)
2 year fixed term contract

EHH HA is a health service commissioning agency incorporating District Health Authority and Family Health Services Authority functions. It covers three local Authorities with a total resident population of 650,000.

This new post offers the opportunity to work in the Agency's Communicable Disease Team which comprises two consultants, a senior clinical medical officer and two infection control nurses. The unit has overall responsibility for surveillance of infections diseases, investigation of disease outbreaks and health risks related to biological and chemical agents. You will be joining this expert team to enhance the current surveillance programme with particular emphasis on Tuberculosis and multi-drug resistant organisms.

You will be maintaining a computerised database of communicable disease reports and developing the electronic transfer of reports from the hospitals and general practitioners within EHH HA. You will be using this database to provide intelligence reports for the Health Agency and the units providing the raw data to develop cost effective interventions.

You must have a basic degree in a biological or social science, and/or mathematics or statistics. In addition, you must be computer literate with experience in common database, spreadsheet and graphic packages (preferably MS Windows). Experience in microbiology or communicable disease e.g. hospital laboratory work would be desirable.

For an application form and job description, please contact the Human Resources Department, Ealing, Hammersmith and Hounslow Health Agency, 1 Armstrong Way, Southall, Middlesex UB2 4SA. Tel. 0181 893 0182 (24 hour answerphone service). Please quote ref: 0163.

Closing date: 20th November 1995.

Interviews will be held on: 5th December 1995.

EHH

Working Towards Equal Opportunities
Cranfield UNIVERSITY

**RESEARCH OFFICER**
School of Engineering and Applied Science
£14,427 - £21,683 p.a.

We are seeking a Research Officer to support the modelling and simulation work of the Ballistics Group. Our research covers the fields of computational fluid dynamics, heat transfer and aerodynamics applied to studies arising in the general areas of ballistics and energetic materials. You will be required to collaborate with existing staff on a variety of projects, so flexibility is essential.

A graduate in a mathematical or engineering discipline, you will preferably have a further degree or relevant experience. In addition, you should have experience of scientific programming and be prepared to assist in the enhancement of current software, mainly written in FORTRAN.

The post will be for a period of up to two years in the first instance.

Application forms and further details may be obtained from the Personnel Office, Cranfield University, RMCS, Shrivenham, Swindon, Wilts SN6 8LA. Tel: 01793 785758, quoting ref SEAS6. Closing date: 20th November 1995.

Cranfield University is an exempt charity offering a centre of excellence for research and education.

ROYAL MILITARY COLLEGE OF SCIENCE, SHRIVENHAM.
Building students' futures through Learning, Teaching and Research

New Generation Astronomical Telescopes Project

This unique joint venture between Liverpool John Moores University, The Royal Greenwich Observatory, Cambridge, National Museums and Galleries on Merseyside and Merseyside industry, funded in part by the European Commission, wishes to make its first key appointments:

**Project Scientist**
£22,568 - £26,981 or £27,655 - £32,030

A senior researcher, preferably with a background in the development of astronomical instrumentation, you will lead the development of the prototype NGAT, the 'Liverpool Telescope', and its on-island commissioning phase. Based in Liverpool, you will play a vital role in maximising the technological, scientific and education outputs of the project. You will be expected to devote a proportion of your time to your own research, by negotiation with the Project Director. Ideally, your research should complement one of the areas of work of the LJMP astrophysics group. At the end of the initial five-year contract, it is envisaged that, subject to satisfactory performance, you will become Observatory Scientist for the Liverpool Telescope:

Please quote Ref: B5528

**Assistant Project Scientist**
£13,884 - £21,108

An experienced researcher, preferably with a background in instrument and/or software development for astronomy, you will assist in ensuring that the scientific and technological goals of the NGAT project are met. Particular emphasis will be placed on the development of remote operation capabilities. As with the Project Scientist, you will be appointed for a fixed term of five years in the first instance, be based in Liverpool and will be expected to devote a proportion of your time to your own research, by negotiation.

Please quote Ref: 85529

Interviews are scheduled to be held in early December and successful candidates will be expected to take up their posts within three months.

For an informal discussion on either of the above posts please contact Professor Michael Bode (LJMU Professor of Astrophysics and Project Director) on 01512313537, email: mfb@staru1.livjm.ac.uk, or Mr Neil Parker (Royal Observatories' Head of Technology and Associate Project Director) on 01223 374890, email: nmp@ast.cam.ac.uk

Closing date: 17 November 1995.

Further particulars are available from:
Personnel Services, Liverpool John Moores University, Rodney House, 70 Mount Pleasant, Liverpool L3 5UX. Telephone: 0151 231 3520 or 0151 231 3564. (24 hour answerphone) EMAILJOBS@LIVJM.AC.UK

PROMOTING EXCELLENCE IN TEACHING AND RESEARCH.

THE UNIVERSITY of York

HARVARD UNIVERSITY

BULLARD FELLOWSHIPS IN FOREST RESEARCH

Each year Harvard University awards a limited number of Bullard Fellowships to individuals in biological, social, physical and political sciences to promote advanced study, research or integration of subjects pertaining to forested ecosystems. The fellowships, which include stipends up to $30,000, are intended to provide individuals in mid-career with an opportunity to utilise the resources and to interact with personnel in any department within Harvard University in order to develop their own scientific and professional growth. In recent years Bullard Fellows have been associated with the Harvard Forest, Department of Organismic and Evolutionary Biology and Kennedy School of Government and have worked in areas of ecology, forest management, policy and conservation. Fellowships are available for periods ranging from four months to one year and can begin at any time in the year.

Applications from international scientists, women and minorities are encouraged. Fellowships are not intended for graduate students or recent postdoctoral candidates. Further information may be obtained from: Committee on the Charles Bullard Fund for Forest Research, Harvard University, Harvard Forest, Petersham, MA 01366 USA. Annual deadline for applications is February 1.
A NEW BREAKTHROUGH IN SIGHT?

Assistance and funding available for suitable start-up and ongoing development projects. Biotech, software, diagnostics etc. Individual researchers and teams considered.

Please reply with brief details to Box No: 864, IPC Magazines, Kings Reach Tower, Stamford Street, London SE1 9LS.
The premier laboratory animal welfare prize in the UK.

RDS is pleased to announce that nominations are now being accepted for the 1996 SmithKline Beecham Laboratory Animal Welfare Prize. It recognises and rewards any individual or group making an important contribution to the welfare of laboratory animals in the UK.

A distinguished panel will select the recipient(s) based on their contributions to improvements in the welfare of animals in laboratory procedures, or recommendations or techniques which reduce the number of animals required for laboratory procedures. RDS will present an award of £2000 with an inscribed plaque to the winner.

All nominations must be received by 16 February 1996. They may be submitted by either professional colleagues or the individual(s) concerned, and should contain the following information;
- Name and address.
- A bibliography including all achievements, awards, published work and professional background.
- A description of their contribution to laboratory animal welfare.

Nominations should be sent together with an indication of where you read about the 1996 award to: Dr Mark Matfield, Executive Director, RDS, 58 Great Marlborough Street;, London W1V 1DD.

RDS Understanding Animal Research in Medicine
ASSISTANT DIRECTOR – CLINICAL RESEARCH
Helping to ensure our competitive edge
Based Harlow, Essex

SmithKline Beecham retains its position as one of the leading research-based pharmaceutical companies in the world today, with a broad range of innovative products under development. A key source of our competitive advantage is the ability to capitalise on commercial opportunities by developing new products rapidly to the market.

As Assistant Director, Clinical Research, you will fulfil a crucial role in this process, joining our central cardiopulmonary therapeutic team with responsibility for the successful planning and implementation of pivotal clinical studies in Europe, leading to the effective registration of new products in this expanding therapeutic area. We operate in a matrix organisational environment where you will be working closely with our European offices and the R&D Project Team. Your involvement in a wide range of activities will include protocol generation, the organisation of trials materials for use in a multinational environment, international investigator meetings, the management of budgets and team recruitment targets, and the supervision of report completion to deadlines. This role provides an exceptional opportunity in which to establish yourself within our world-class clinical research team, with good prospects of further career development within this or another therapeutic area.

Your 4 plus years’ experience in the management of large Phase II/III studies, preferably on an international basis, will ideally have included some involvement in diabetes research. Of great importance will be your creative approach to problem solving combined with the enthusiasm and the ability to communicate effectively with scientists from a broad range of disciplines. Additional personal qualities include management and leadership skills matched by a proven ability to deliver results in a matrix environment and a good team player approach.

In return for your commitment to this challenging work, we offer an attractive salary and superb range of benefits including bonus, company car, pension and medical plans, performance-related pay, share-matching scheme, generous holidays, flexible working hours and good sports and social facilities.

If you have the necessary qualities to make a major contribution in this important area, please send your full career details, quoting Ref: CRM1, to the Human Resources Manager, Clinical, SmithKline Beecham Pharmaceuticals, New Frontiers Science Park (South), Third Avenue, Harlow, Essex CM19 5AW. Closing date for applications: 15th December 1995.
Head of Biomedical Engineering Department

ROYAL BROMPTON HOSPITAL
NHS TRUST
Salary up to £36,000 inc. Closing date: 8.12.95

We seek a clinical engineer to manage the Biomedical Engineering Department of this leading specialist heart and lung postgraduate teaching hospital which has an international reputation for innovation and leadership in research, treatment and education in heart and lung disease.

The Biomedical Engineering Department provides a comprehensive equipment management service to the hospital, together with a 24 hour clinical support service. Research and development of equipment underpins all functions of the department.

Applicants should demonstrate considerable experience in the management and motivation of technical and scientific staff and have a proven record in the development of equipment for clinical research.

For further information or to arrange an informal visit, please contact Dr. Bryn Hughes, Clinical Director of Medical Support Services on 0171 351 8022. Written details and application forms are available from Debbie Humphreys, Human Resources Assistant, Royal Brompton Hospital, Sydney Street, London SW3 6NP, or telephone 0171 351 8685 quoting ref: HB/52.

We are an equal opportunities employer and operate a no smoking policy throughout the hospital.
PROJECT MANAGER
Harefield, Middlesex
Up to £30k + Benefits

Producing and marketing over 1000 quality products globally, Mallinckrodt Veterinary is one of the world's leading animal health and nutrition companies. Ambitious growth plans are underlined by the company's commitment to Research and Development which is centred in the USA, with the European headquarters based in Middlesex.

This newly created opportunity to join a dynamic and highly focused team arises as a result of an increasing number of projects concerned with feasibility studies, new product development, product upgrades and support of existing products.

Applicants should have at least three years project management experience gained in a regulated industry - ideally pharmaceuticals. Degree level in a scientific or business related discipline, you will have a broad knowledge of business and a good understanding of project planning theory and practical experience of the latest software packages.

Send full CV with current/latest salary details to the Consultant advising on this appointment, Guy Newton, Barnes Kavelle Limited, Cavendish House, Queen Street, Mirfield, West Yorkshire WF14 8AH. Quote reference number 8157.

MALLINCKRODT VETERINARY
DULWICH PUBLIC HEALTH LABORATORY AND MEDICAL MICROBIOLOGY
King's College School of Medicine and Dentistry

DEPUTY HEAD OF THE MYCOBACTERIAL REFERENCE UNIT
(England and Wales)
Grade C Clinical Scientist Salon £30,848 - £41,481

This post arises from the transfer of the PHLS Mycobacterium Reference Unit (MRU) to the Dulwich Public Health Laboratory which has recently been combined with Medical Microbiology, King's College School of Medicine and Dentistry. The MRU consists of approximately 350m² of excellent refurbished laboratory, office and research accommodation. The new MRU will also fulfil the role of the Regional Tuberculosis Centre.

The PHLS is seeking an enthusiastic, experienced scientist for this challenging post. The appointee will, with the Head of the MRU, lead a research programme into novel diagnostic and identification methods, molecular epidemiology, drug susceptibility testing and other topics relevant to the study of mycobacteria. The successful candidate will need to have research experience in mycobacteriology and a higher research-based degree, preferably a Ph.D. in a relevant subject. Previous published research pertaining to molecular mycobacteriology would be an asset. The MRU is core-funded by the PHL but the Deputy Head would be expected to attract external grant funding based on their personal research and that of the research team. It is hoped that the Academic status of the appointee would merit an Honorary Lectureship with King's College School of Medicine and Dentistry.

For further information, please contact Dr Anne Uttley (Acting Head) at Dulwich Public Health Laboratory or Dr F. Drobneiwski (Head of the MRU from April 1996) e-mail: drobniew@ecom.yu.edu

A job description and application form are available from Jane Heaton, PHLS, Personnel Department, 61 Colindale Avenue, London NW9 5EQ.

The PHLS is an Equal Opportunities Employer.
[2006-005 (1995) : 60]
UCL
UNIVERSITY COLLEGE LONDON
Department of Physics & Astronomy

STARLINK SYSTEM MANAGER

The UCL Starlink node is a cluster of DEC Alpha workstations (running digital UNIX), with ancillary peripherals, used in the reduction and analysis of astronomical data. Management duties include responsibility for efficient running of the node (including all aspects of hardware maintenance), software installation and development, advisory services to the user community, and liaison with the Starlink Project.

The starting salary will be in the range £16,451 - £23,653 (including London weighting), depending on age and experience. Universities Superannuation Scheme benefits are available. Applicants should have a good degree in a mathematical or physical science; experience of scientific computing and knowledge of the UNIX operating system are essential, and some knowledge of astronomy desirable.

Applications should be by letter, with CV, to Dr. I. D. Howarth, Department of Physics & Astronomy, University College London, Gower Street, London WC1E 6BT; applicants should arrange for two references to be sent to the same address. Closing date for applications: December 5, 1995.

FLEXIBILITY

SKILLS

JOB

Skills for success tomorrow

Neil Harris

THE IDEA that education is as much about developing skills as it is about acquiring knowledge has been gaining ground for some time. Knowledge alone is never enough when scientists go in search of employment. The speed at which technology moves forward means that knowledge is soon out of date, yet skills can be continually developed and adapted to suit new situations.

Recruiters look for people with skills which are relevant to the jobs they offer, as anyone who has recently completed an employer's application form will testify. Applicants to blue-chip companies are often asked questions about how they would solve specific problems or persuade people to work together toward a goal. Potential employers often want to know what obstacles you have negotiated in your life so far, and how. They believe that if you did it before you are more likely to do it again, this time for them. The difference between a scientist who can do an adequate job in the laboratory and one able to manage projects, teams, finance and equipment is judged by employers not on academic prowess but on leadership qualities, initiative, teamwork and verbal and written communication. For many years now, employers have been emphasising the need for transferable skills. These are skills which can be employed in a variety of jobs, not just in one area of employment, and those who possess them are seen as both flexible and adaptable. Some years ago, a survey by the National Advisory Body for Public Sector Higher Education listed the most important transferable skills as the ability to analyse complex problems, to identify the core of a problem and the means of solving it, and to synthesise and integrate disparate elements.

Research carried out last year for the Association of Graduate Recruiters (AGR) – which represents some 500 leading employers – produced a different list of skills in short supply among new graduates. The top five were business awareness, communication skills, leadership, teamwork and problem solving. These were followed by conceptual ability, knowledge and competence in an academic discipline, foreign languages and numeracy. Today's students can find many opportunities to develop these skills in their academic life, leisure activities, work experience, travel and many other aspects of their lives. Employers always want to know what new graduates did with their vacations, what clubs they joined and what competitive activities they were good at. The Enterprise in Higher Education scheme, introduced into universities by the Department of Education and Employment, has been a vehicle for developing skills.

Last month, the AGR published the results of new research which asked the question: what skills will employers be looking for after the millennium? Skills for Graduates in the 21st Century, takes a look into the future. Given the structural changes which are taking place in the world of employment – flatter organisations; the need to manage one's own career and perhaps pay for one's own training – this is certainly a question worth asking.

The certainty that a career will not be spent with one single employer or even a single area of work makes it essential for employees to adapt continuously to change throughout their careers. There is an increasing probability that people will be self-employed at some time. Self-reliance, says the report, is the key which will enable people to cope with such situations. The self-reliant person is one who "takes
responsibility for their career and personal development and is able to manage the relationship with work and learning throughout all stages of their life".

The introduction of mass higher education has inevitably meant that today's students can expect less individual attention than their predecessors and therefore they must be more autonomous. The DEE has been funding projects at several universities in the past two years which encourage precisely these attitudes. Projects at the University of Wales, Bangor, universities of Greenwich, London, Northumbria at Newcastle, Oxford Brookes and North London, and Nene College have concentrated on increasing student autonomy by creating improved guidance systems.

Skills which will be paramount in the future, according to the AGR report, include self-confidence and self-promotion, "action planning", networking, negotiation, political awareness and coping with uncertainty. Self-confident people, says the report, have a sense of their own worth and a confidence in their abilities. Good negotiators can seek out "win-win" situations without necessarily being given the authority to do so. Networkers can develop their contacts with a range of people and use them to seek out advice and information. Action planners organise their time effectively and identify the steps needed to reach their goals. They have the ability to implement action plans and evaluate how they are progressing.

In a rapidly changing world, adaptability and flexibility are essential ingredients for success. The ability to think laterally and apply what has been learnt in one job to other occupations and environments is valuable.

"The world in which business now operates is short-term, says Alan Britten, vice-president of Mobil Europe. "Flexibility is our watchword. Employee relations departments don't mastermind our careers. Today's graduates will get little support from the personnel departments."

"The AGR produced this report to pull together ideas being developed to make the experience of a university education more relevant to subsequent employment," says Roly Cockman, secretary of the AGR. "There is a momentum for change which should result in benefits for universities, employers, students and Britain's economy. Our research identifies the major challenges we all face in moving towards a better educated society."

Due to recent promotion, a vacancy has arisen in our Nutrition Affairs Department.

Reporting to the Manager - Nutrition Affairs, you will be based at our UK headquarters in Manchester. You will liaise with marketing, agency, technical and managerial staff at all levels and external organisations, not only in the UK but also in Europe and the USA.

Your main responsibilities will include the development and control of an external research programme, as well as maintaining awareness of nutritional topics relevant to the Company's business. Recommendations will be made as to future actions based on new information. These will include the commissioning of new research, presentations, marketing programmes and the production of new consumer leaflets.

Qualified to Ph.D. level in nutrition and/or dietetics, you may also be a State Registered dietician. Your verbal and written communication skills will be excellent, as will be your computer literacy. The ability to deliver to a public audience is essential.

We offer an attractive salary, together with additional employee benefits including a non-contributory pension scheme, private medical health care, employee share ownership scheme, five weeks' annual paid holiday and assistance with relocation (if applicable).

Please write to Iain Campbell, Consultant, for an application form quoting Ref P736, Austin Knight UK Limited, 98 King Street, Manchester M2 4WD, or phone him on 0161-834-8984 (office hours, Mon-Fri).

TECHNOLOGY PRODUCT SPECIALIST

Philip Harris Education is a world leader in the development, manufacture and distribution of Science and Technology Education equipment and resources. We require an energetic graduate to fulfil the position of Technology Product Specialist within the busy Marketing and Technical department.

Your role will be to assist in the process of identifying and developing new products in response to school and college requirements, write instructional and catalogue copy, liaise with educationalists and suppliers and provide advice and support to teachers.

You are likely to be a graduate in an engineering related subject with a strong general science background, excellent communication skills and commercial awareness.

Please apply in writing with a full C.V. to the Personnel Officer, Philip Harris Education, Lynn Lane, Shenstone, Lichfield, Staffordshire WS14 0EE. Telephone: 01543 480077. Fax: 01543 480068.

Philip Harris Education is a division of Philip Harris plc.

philip harris
The Systematics Association

SYSTEMATICS ASSOCIATION RESEARCH GRANTS

The council of the Systematics Association has re-established its Research Grants scheme to promote systematic and taxonomic investigations in biology and palaeobiology. Applicants of all nationalities are welcome, and need not be members of the Association. Younger, retired and "amateur" systematists are encouraged to apply, as well as more established researchers. Typical activities supported include contributions to fieldwork expenditure, the purchase of scientific equipment or expertise (e.g. buying time on expensive analytical equipment), specimen preparation (including the cost of temporary technical assistance), and contributions to publication costs (including academic theses).

Successful projects are selected by a panel of systematists reflecting a wide range of conceptual interests and taxonomic groups. Up to 10 grants per annum are awarded, ranging in value from £100 - £1,000 (typically ca. £500).

Applications for awards should be made on forms obtainable from: Dr Richard M. Bateman, Chair, Grants and Awards Subcommittee, Systematics Association, Royal Botanic Garden, 20A Inverleith Row, Edinburgh EH3 5LR, UK. Closing date for completed applications: December 31st.

Nuclear Electric
In accordance with the conclusions of the Government's Nuclear Review, which were published in May 1995, it is proposed that the existing Nuclear Electric plc will evolve into two separate companies. Whilst the Magnox reactors will remain in public ownership, the Government intends to privatise the AGR and PWR stations currently owned by Nuclear Electric plc, together with the AGR stations owned by Scottish Nuclear Limited, in 1996.

Environmental Specialist
Barnwood, Gloucester £20,881 - £27,748

The Environmental Protection and Waste Management Branch is a small multi-disciplinary department within the Health Safety and Environment Division based at Barnwood, Gloucester. The main purpose of the department is twofold:

• To provide a single focus at the corporate level for environmental issues, and in particular to provide the corporate interface with the environmental regulators;
• To identify and provide consented power generation sites as required in order to fulfil Nuclear Electric's business strategy.

Contributing to the work of the department across a broad range of issues, and working both as part of a busy team and autonomously, your initial effort will focus upon providing support in the area of non-radiological discharges to the estuarine and marine environment. A comprehensive working knowledge of environmental regulatory legislation and practice combined with a strong scientific base is essential, and you should be capable of representing the company through effective and authoritative communication with the relevant regulators. Practical experience in water quality management, applied ecology or ecotoxicology would be a distinct advantage, as would prior involvement in investigating and/or setting water quality criteria for environmental protection. You should be educated to degree level or equivalent, in a relevant discipline, and possess excellent communication skills and an enthusiasm to develop your experience across a diverse range of projects. A real awareness of national and international environmental issues and their practical implications is essential.

In return we offer a full range of company benefits including relocation assistance where appropriate. We are also totally committed to the training and ongoing personal development of our staff.

For an application form and information pack, interested candidates should call: Sanderson Recruitment Advertising on 0117 925 2363 quoting reference number BWD/72/95 or fax 0117 925 1865. Alternatively write to: The Nuclear Electric Account Director, Sanderson Recruitment Advertising, 15-16 Lower Park Row, Bristol, BS1 5BN. Please return your completed application form and a copy of your C.V. to the above address no later than 15 December 1995.

As equal opportunities employer Nuclear Electric welcomes applications from men and women including ethnic minorities and the disabled.

Corporate Headquarters
Nuclear Electric plc Barnett Way Barnwood Gloucester GL4 7RS
An opportunity has arisen for a person holding a suitable science, audiological or equivalent degree to join a multi-disciplinary team providing support to the audiological service with a complement of 29 staff.

The successful applicant will provide scientific input to the neuro-otology department, with particular emphasis on both routine and complex vestibular testing for adults and children. The postholder will have the opportunity to develop his/her specialist interest in this area and will be responsible for researching and introducing new clinical procedures and developing advanced techniques. A scientist is sought with the capacity to establish a niche for their research through learned society publications and presentations.

Candidates must have at least four years experience in appropriate research or clinical practice, this post is therefore not suitable as a CAC training post.

Salary: £20,270 - £21,923 (plus £1,999 London Weighting).

For an informal discussion, please contact Robert Royston on 0171 915 1538. An application form and job description is available from the Personnel Department on 0171915 1545 (24 hour answerphone). Please quote reference number AS1/CS.

We are committed to Equal Opportunities and welcome applications from suitable candidates including those with disabilities.

Closing date: 15th December 1995.
Applications are invited from suitably qualified persons for positions in the following Departments:

**SENIOR LECTURER/LECTURER IN COMPUTER SCIENCE**
Department of Mathematics and Computer Science

The Department of Mathematics and Computer Science has established a Degree and Diploma programme in Computer Science. It also provides service courses for students reading for degrees or diplomas in Agriculture, Architecture, Accountancy and Business Studies, Chemical Technology, Engineering, Forestry, Surveying and Land Studies. The Department also runs Postgraduate Diplomas in Mathematics and Computer Science. A large proportion of the Department's teaching occurs at first and second year levels and all staff contribute to these areas. Specialised teaching occurs at third and fourth year levels. The present positions prefer people specialising in one or more of the areas: database, real time, software engineering operating systems or applicable mathematics. Applicants should have a relevant postgraduate degree with teaching/research experience at University level.

**SENIOR LECTURER / LECTURER IN THE DEPARTMENT OF MINING ENGINEERING**

Applicants should be young and energetic with a postgraduate degree in mining engineering and about three years industrial experience in the above areas. They will be expected to pursue research and consultancy interests which are relevant to Papua New Guinea. The successful applicants for these positions would be required to teach the following subjects:
- Mining Engineering: Alluvial Mining; Mining Legislation; Underground and Surface Mining Methods; Computerised Metal Mine Planning and Design; Rock Mechanics; Material Handling; Rock Fragmentation and Blast Design; Mineral Economics. Applied/Mining Geology: General Geology; Structural, Economic and Engineering Geology; Mineralogy; Mine Geological Mapping; Exploration Techniques; Mine Geology and Hydrogeology; Geostatistics and Reserve Estimation.

Salary per annum: Senior Lecturer K38,781 - K42,758; Lecturer II K33,699 - K37,329; Lecturer I K30,433 - K33,763. (Level of appointment depends upon qualifications and experience). Initial contract period is normally for three years but shorter periods can be negotiated. Other benefits include a gratuity of 30% in the first year, 35% in the second year and 40% in the third year taxed at 35%; support for approved research; appointment and repatriation fares for family; settling-in and settling-out allowances; six weeks' paid leave per year; recreation leave fares for authorised dependants after 18 months of service; education fares and assistance towards school fees for two children. Free housing, salary protection plan and medical benefit schemes are available. Staff members are also permitted to earn from consultancy up to 50% of earnings annually.

Detailed applications (two copies) with curriculum vitae, including CERTIFIED copies of qualifications obtained, names, addresses and fax/phone numbers of three referees and an indication of the earliest availability to take up the appointment should be received by: The Registrar, PNG University of Technology, Private Mail Bag, LAE, Papua New Guinea by 18 December 1995. Applicants resident in the United Kingdom should also send one copy to the Appointments Department, Association of Commonwealth Universities, 36 Gordon Square, London WC1H 0PF (tel. 0171 387 8572 ext. 206; fax 0171 813 3055; email appts@acu.ac.uk) from whom further information may be obtained.

Scientech Contract Recruitment

Scientech is the leading recruitment consultancy for Science and Technology in the UK. We now have opportunities for experienced Scientists to work on contract within the pharmaceutical, chemical and allied industries including:

- Medicinal Chemistry
- Pharmaceutical Analysis
- Process Development
- Regulatory Compliance
- Quality Assurance
- Data Analysis
- Formulation
- Statistics
- Diagnostics
- Separation Chemistry

If you offer industrial experience and seek a new challenge please send your CV, quoting Ref. NS/1127/SCJ, to Sharon Carter-Jones, Senior Consultant, Scientech, Salisbury House, 15-17 The Broadway, Old Hatfield, Hertfordshire AL9 5HZ. Tel: 01707 264311 or Fax: 01707 275402.

A Salisbury Consulting Group Company

SCG
[2006-014 (1995) : 64]
THE UNIVERSITY OF MANCHESTER
School of Biological Sciences

SENIOR TECHNICIAN
Salary scale £11,707 to £13,977 pa

Required to manage and contribute to the day to day operation of Professor Ferguson's large research group, researching aspects of wound healing, craniofacial development and sex determination. Previous experience, high levels of technical skills, organizational abilities, and the flexibility and determination to get work done are essential.

TECHNICIANS
Salary scale £9,251 to £10,138 pa

Required to assist with research programmes in wound healing and sex determination. Techniques used will include histology, immunocytochemistry, molecular biology, biochemistry. Previous experience of these techniques is useful but not essential. Commitment, enthusiasm and the ability to work hard as part of a team are essential.

All the positions are funded by external research grants and are for 3-5 years in the first instance. For further particulars and an application form contact: The Chief Technician, Cells, Immunology and Development Division, School of Biological Sciences, 3.239 Stopford Building, University of Manchester, Manchester M13 9PT. Tel: 0161275 6763. Fax: 0161275 5945. Closing date 14 December 1995 (interviews held on 21 December 1995).

AS AN EQUAL OPPORTUNITIES EMPLOYER, THE UNIVERSITY OF MANCHESTER WELCOMES APPLICATIONS FROM SUITABLY QUALIFIED PEOPLE FROM ALL SECTIONS OF THE COMMUNITY REGARDLESS OF RACE, RELIGION, GENDER OR DISABILITY.

PROMOTING QUALITY TEACHING AND RESEARCH
[2006-015 (1995) : 64]
Applications are invited for the following posts:

**Two Lectureships (Non-Medical) in Physiology**
Department of Physiology School of Medicine  
Vacancy UAC.673

The Department has two new (non-medical) positions available which recognize the role of Physiology in the expansion of advanced research-led teaching at the School of Medicine. Applicants should hold a Ph.D. or its equivalent in Physiology and have established a strong research record in the physiological sciences. The Department teaches Physiology for degrees in both medicine and science, and is responsible for courses at undergraduate and graduate level. The main research interests of the Department are currently in neurophysiology, cardiac physiology and the physiology of muscle and exercise. Excellent laboratory and workshop facilities exist to support the Department's research activities. Applicants should have experience in teaching Physiology at the undergraduate level. Preference will be given to applicants with research experience in the use of molecular and/or biophysical techniques. Ability to teach renal, gastro-intestinal or endocrine physiology, and/or to initiate research on mechanisms of epithelial transport would be an advantage.

Closing date: 5 February 1996.

**Lectureship (Non-Medical) in Nutrition**  
(Limited Term - 5 Years) Section of Nutrition  
Department of Medicine School of Medicine  
Vacancy UAC.672

The position is a full-time appointment. The successful candidate will play a leading role in the development of nutrition teaching in the Faculty of Medicine and Health Science. Current research in the Department of Medicine includes clinical research in cardiovascular and endocrine medicine, diabetes and gastroenterology. The successful candidate would also develop a nutritionally-based research programme in either a related or independent field of research. The Department is closely linked with other Medicine and Science Departments and also the Cancer Research Laboratories. Applicants should hold a Ph.D. or equivalent in a field of nutritional science or a related area and also have substantive experience in a field related to clinical nutrition. Experience in teaching would be an advantage. The successful candidate would be expected to have a proven research ability and leadership at the post-doctoral level.

Closing date: 5 February 1996

**Lectureship in Geography**  
(Geographical Information Systems)  
Department of Geography  
Vacancy UAC.677

The Department of Geography provides a progression of courses at undergraduate and graduate levels with a focus on Geographic Information Technology. The Department is also active in research on Geographic Information Systems. Both programmes have established technical support.

Commitment to GIS is growing with the Department-based development of an interdisciplinary University Centre for Geographic Information Studies. This position will be associated with these developments and carries with it opportunities for external consultancy. Applicants must have a Ph.D. degree or equivalent and demonstrated abilities in research and teaching in GIS. Preference will be given
to applicants with strengths in GIS applications in at least one sub area of Geography. Additional interests in spatial analysis would be an advantage.

Closing date: 18 March 1996.

Lectureship/Senior Lectureship in Sports Science (Motor Control)
Sports Science Programme
Division of Science & Technology Tamaki Campus

The Tamaki Campus is the rapidly expanding second campus of the University of Auckland, established in 1991. Its Sports Science programme leads to BSc or BSc (Hons) degrees, and MSc and Ph.D. programmes are also available. The successful applicant will be expected to contribute to the second and third year papers and to work with other staff to develop the fourth year papers.

All motor control, exercise physiology, biomechanics, ergonomics and rehabilitation papers include a laboratory component which focuses on the measurement, analysis and evaluation of human performance. Applicants should have a Doctoral qualification with research and teaching strengths in motor control. A record of publications in internationally refereed journals would be an advantage, as would a demonstrated ability to attract external research grants. The successful applicant would be encouraged to pursue research in a multidisciplinary environment with, for example, exercise physiologists, biomechanists and psychologists. Applicants with an interest or experience in a particular sport should state this in their application.

Closing date: 31 January 1996

Conditions and Procedures for all vacancies

Commencing salary per annum will be established within the following ranges: Lecturer NZ$42,500 - NZ$51,500; Senior Lecturer NZ$54,750 - NZ$63,500.

Further information, Conditions of Appointment and Method of Application should be obtained from the Appointments Department, Association of Commonwealth Universities, 36 Gordon Square, London WC1H 0PF (tel. 0171 387 8572 ext. 206; fax 0171 813 3055; email appts.acu@ucl.ac.uk); or from the Academic Appointments Office, University of Auckland, Private Bag 92019, Auckland, New Zealand tel. [64 9] 373 7599 Extn 5097; fax 164 91 373 70231. Three copies of applications should be forwarded to reach the Registrar by the appropriate closing date. Please quote relevant Vacancy Number in all correspondence. The University has an EEO policy and welcomes applications from all qualified persons

W B NICOLL, REGISTRAR

The University has an equal opportunities policy and welcomes applications from all qualified persons

The University of Auckland
Applications are invited for the following posts to adapt transcriptional control elements from Aspergillus for use in the control of gene expression in transgenic plants. The project is funded for three years by Zeneca Agrochemicals and will be based in the Department of Genetics and Microbiology in Liverpool, but the job holders will be expected to spend time at Zeneca's Jealott's Hill Research Station in Berkshire.

**POSTDOCTORAL RESEARCHER**  
Initial salary within the range £14,317 - £18,985 p.a.

We are seeking an experienced Postdoctoral Research worker in either plant or fungal molecular biology/genetics. Experience in the production and analysis of transgenic plants will be an asset but is not essential. Quote ref: B/503 (a).

Applications by c.v. with the names of three referees, should be received by the Director of Personnel (B), The University of Liverpool, Liverpool L69 3BX. Further particulars may also be requested from this address or via email: jobs@liv.ac.uk.

**RESEARCH TECHNICIAN**  
Grade: D Initial salary within the range £11,707 - £15,275 p.a.

The Research Technician will provide technical support in all areas of the project. Experience in molecular biology, transgenic plants and plant/fungal cell culture will be an advantage. Quote Ref B/503 (b).

Applications forms are available from the Director of Personnel (B), The University of Liverpool, Liverpool L69 3BX. Tel: 0151-794 2210 (24 hour answerphone). Informal enquiries for either position may be made to Dr. Brian Tomsett on 0151-794 3616 or Dr. Mark Caddick on 0151-794 3632.

Working Towards Equal Opportunities

Closing date for both posts: 22nd December 1995.
MRC
Medical Research Council

MEDICAL RESEARCH COUNCIL
Laboratory of Molecular Biology

**Postdoctoral Research Associate**

Applications are invited for the above position to work on overexpression and isolation of neurotransmitter-gated ion channels for structure analysis by electron microscopy and/or X-ray diffraction. Experience with molecular biological, biochemical and cell culture techniques is necessary.

This position is available for three years from February 1996. Salary will be in the range of £16,628 to £19,848 per annum, depending on qualifications and experience.

Applications, including two full curriculum vitae and the names and addresses of two professional referees, should be sent by 28 December 1995, quoting reference NB/NU to Sheila Jenkins, Personnel Officer, MRC Centre, Hills Road, Cambridge CB2 2QH.

The Medical Research Council is an Equal Opportunities Employer

Celltech Group plc is one of the largest emerging pharmaceutical companies in Europe. Celltech Therapeutics focuses on the discovery and development of novel anti-inflammatory/immunomodulatory drugs.

We now have an opportunity for a graduate in pharmacology or a related discipline to join a multidisciplinary team engaged in the identification of novel anti-inflammatory/immunomodulatory drugs. As a member of the pharmacology department's respiratory group, you will be responsible for performing in-vitro / in-vivo assays to characterise the pharmacological properties of novel chemical entities in models of respiratory disease. Previous experience in the pharmaceutical industry would be an advantage, but is not essential.

Celltech offers excellent opportunities for career development in addition to competitive salaries and attractive benefits.

If you would like to join this ambitious and expanding business, please send your full cv, including details of present remuneration and quoting reference 966, to the Recruitment Officer, Celltech Group plc, 216 Bath Road, Slough, Berkshire SL1 4EN.

MEDICAL INFORMATION OFFICER

LOOKING FOR A NEW CHALLENGE IN 1996.....?

Pasteur Mérieux MSD is a European market leader in the specialist field of vaccines. The Scientific Directorate of the UK subsidiary located in Maidenhead, Berkshire, is expanding its activities and has an exciting new opportunity for an enthusiastic individual.

After thorough training you will have responsibilities ranging from answering internal / external enquiries, working on advertising copy / promotional material concepts with our Marketing Department and managing our in-house bibliography. You will work closely with our information service both locally and internationally, together with our Scientific and Commercial Departments in the UK.

You will be able to offer us:
• Life Sciences degree
• Two years medical information experience in dealing with technical data and ABPI guidelines.
• Strong commercial awareness with excellent interpersonal skills. The ability to assimilate and perhaps more importantly, disseminate large amounts of information.
• The initiative to develop new systems and procedures with the aim of constantly improving our medical information services.

We will be able to offer you:
• The chance to work for a company that is committed to providing the highest calibre of information in a commercial environment.
• The opportunity of being an active participant with a successful team in a company where individual contributions are acknowledged and valued. An attractive salary.
• Generous benefits including life assurance, private health scheme, pension. 24 days annual leave.

Pasteur Mérieux MSD

If you are interested in joining us, please send your full CV including current salary details to Lis Thompson, Head of Human Resources, Pasteur Mérieux MSD, Clivemont House, Clivemont Road, Maidenhead, Berkshire SL6 7BU Closing date for applications: Tuesday, 19 December 1995

70.8% of the world is covered by water...
… BRI International covers the rest.

BRI International is a highly successful International CRO providing a full range of services to the pharmaceutical industry. As a rapidly expanding company vacancies now exist for

**CLINICAL DATA SCIENTISTS AND PROJECT MANAGERS**

Based in Battle, East Sussex and Esher, Surrey

The successful candidates will be graduates with a life science degree and at least two years experience, preferably within a clinical environment.

Responsibilities will include data management and/or project management and will involve extensive client liaison. Knowledge of programming in SAS or data processing in CLINTRIAL would be an advantage. The ideal candidates will possess excellent communication skills and be able to plan effectively and be team players. Opportunities are available to travel both in the UK and abroad, and could involve working on client sites.

In return we offer a competitive salary, with relocation package, a non-contributory pension, membership to private health care scheme and life assurance. BRI are committed to personal development and the opportunities are available to all staff to expand their knowledge and enhance their career.

To apply and receive a full job description please send a full c.v. to:

Jayne Stevenson, BRI International, Glengorse, Battle, East Sussex, TN33 0TX.

Closing date 15\textsuperscript{th} December 1995, start date January 1996.

BRI

Division of Immunology

LABORATORY SCIENTIFIC OFFICER (LSO1) required to assist with research into immunological mechanisms in inflammatory retinal disease as a member of the Ocular Immunology Research Group at our St Thomas's Hospital Campus. The project involves the application of biochemical and immunochemical techniques: Experience in ELISA methods and cell culture techniques are essential and immunohistochemistry experience is desirable. The post is available for 2 years in the first instance. Applicants should have an HNC/D in Medical Laboratory Science or BSc in Biochemistry, Immunology or related subject, and at least 2-3 years post-qualification experience.

Salary range £10,734 - £12,570 pa plus £2,064 pa LWA.

For a job description and application form, please call 0171 922 8049 (24 hours) quoting reference number STH/IMM/578 or send a self addressed envelope, no smaller than 16 cm by 23 cm, clearly indicating the reference number on the envelope to: UMDS Personnel Department, Medical School Office, North Wing, St Thomas's campus, Lambeth Palace Road, London SE1 7EH.

Closing date for receipt of applications: 14 December 1995.

Advancing Learning and Knowledge in Association with Business and Industry
Postgraduate Research Studentships
Biomedical Sciences Division

The Biomedical Sciences Division invites applications for 15-20 Research (Ph.D.) Studentships expected to be available in October 1996, from Research Councils, Medical Research Charities and other sources. Applicants should have, or expect to obtain, an Upper Second Class Degree or better in a relevant science subject, or in medicine.

Research interests of members of the Division include areas of anatomy, molecular biology, biophysics, pharmacology, physiology, human biology and physiotherapy, with particular emphasis on neurobiology and neuropharmacology, cell biology, human biology and physiology, receptors and intracellular signalling, cellular and molecular endocrinology and reproduction. Major new Research Centres in Developmental Biology, Vascular Biology, Neuroscience and Neurodegeneration have been established and are expected to have studentships available. Studentships are also available in the MRC Muscle and Cell Motility Unit, part of the Randall Institute at King's.

At present all students within the Division receive stipends not less than the current MRC rates, regardless of source of funding.

For full details please write to: Mrs Judith Litvin, Biomedical Sciences Division, King's College London, The Randall Institute, 26/29 Drury Lane, London WC2B 5RL. Fax: 0171-4979078. E.mail: dmd@helios.rai.kcl.ac.uk

MATERIALS / SEMICONDUCTORS TECHNICAL SALES

L.O.T. - Oriel Ltd supplies a range of state-of-the-art scientific instrumentation from the world's leading manufacturers.

Due to expansion of business in the area of surface analysis we are looking for a high calibre science graduate to work alongside the Product Manager.

THE JOB WILL INVOLVE:
• Acting alongside the Product Manager of the Materials/Semiconductors Group in sales and marketing of high value instrumentation including the Digital Instruments Scanning Probe Microscope
• Performing customer demonstrations and running samples.
• Service support, handling technical issues and problem solving.
• Administrative support such as processing orders and handling correspondence.

THE SUCCESSFUL CANDIDATE WILL PROBABLY HAVE:
• A good degree and possibly a Ph.D. in physical sciences or engineering.
• Some experience of microscopy related techniques.
• Good personal skills.
• Some sales experience.
• A practical attitude with a willingness to get involved with a variety of sales related activities.
• Computer literacy with basic keyboard skills.
• Some electronics knowledge.

For the right individual we can offer an attractive remuneration package.

In the first instance, please send an up-to-date CV and a letter telling us why you are the best person for the job, to:

**Development Scientists**  
Microbial-Immunochemistry

Unipath Limited, a member of the Unilever group of companies, is a leading manufacturer of immunodiagnostic devices for the consumer and clinical markets and of microbiological culture media. Our "Clearblue", "Clearview" and "Oxoid" brands are distributed throughout the world.

As part of an expansion programme on our Basingstoke site, we have vacancies for graduates in microbiology or a related topic to join our R & D team developing a range of products for use in both clinical and industrial laboratories. A minimum of 2 years' experience in the immunodiagnostic industry is required and preference will be given to candidates with a knowledge of antigen preparation suitable for antibody production.

As well as receiving the usual range of large company benefits, successful candidates will be eligible for inclusion in our Graduate Development Programme and may have the opportunity to undertake courses leading to further qualifications. Salaries, commensurate with experience and qualifications, will be on a scale rising to £17,650. Consideration will be given for appointment to higher grades for exceptional candidates.

For further information and an application form please contact: Mrs. V. Osborne, Personnel Officer on 01256 841144.

UNIPATH

OXOID

[2006-032 (1995) : 70]
A mucosal immunologist is required to join a very active collaborative research team funded by CSL Ltd. The team's goal is to produce an oral vaccine for therapeutic and prophylactic immunisation against the human gastroduodenal pathogen Helicobacter pylori. The successful applicant will be expected to do active research and play a leadership role in the research group in conjunction with the project management team. Essential criteria are a Ph.D. in mucosal immunology with practical experience in mouse experimentation and a good theoretical background in immunology, particularly an understanding of the common mucosal immune system. The successful applicant will have an ability to work independently, to collaborate with other staff, and to supervise honours and graduate students. Desired criteria include experience in immunohistochemistry, flow cytometry, cytokine assays and histopathology. A knowledge and understanding of EEO/AA principles is also required.

The position is available for a fixed term of 3 years commencing early 1996, with possibility of renewal dependent upon continued external funding.

Enquiries may be directed to Professor Adrian Lee on 612 385 2101.

Applications close 19 January 1996.

PLEASE QUOTE Ref 675NSI

Application Procedure Applicants should submit a written application QUOTING REFERENCE NUMBER. Include business and private telephone numbers; a complete résumé, (copies of academic transcript and qualifications where appropriate); and the names and addresses and preferably facsimile numbers of at least two referees to: The Recruitment Officer, Human Resources, UNSW, Sydney 2052 Australia by the applications close date.

UNSW is an Equal Opportunity Employer with a smoke free workplace.
Numerical/ Reservoir Modeller

CSM Associates Limited provides services to the hydrocarbons, minerals, hydrocarbons, renewable energy and radwaste industries. A modeller is required to work in the development of numerical models of processes in geomechanics and hydraulic fracture simulation, fluid flow in porous media and reservoir simulation and computational fluid dynamics. Applicants should have a strong mathematical background, experience in numerical methods and FORTRAN/C code development in a UNIX/PC environment.

Candidates should apply in writing, with a full CV and the names of two referees to: Dr A. Fisher, CSM Associates Ltd, Rosemanowes, Penryn, Cornwall TR10 9DU.

Closing date: 22 January 1996.
[2006-034 (1995) : 70]
UNIVERSITY OF GLASGOW
Department of Electronics and Electrical Engineering

POSTDOCTORAL RESEARCH ASSISTANTS
Multi-Giga-Hertz Integrated Optoelectronic Systems

Two research assistants are required to work on a rolling programme supported by the EPSRC in the field of multi-GHz integrated optoelectronics. The applicants should be qualified to Ph.D. level.

The first of the posts is focused on the development of novel device fabrication processes for photonic integrated circuits. For this post, candidates should have a proven research record in the areas of semiconductor device design, fabrication and assessment. Experience with material assessment techniques such as TEM, electrochemical profiling, and photoluminescence is preferable.

The second post is focused on using photonic integrated circuits in high speed systems. Candidates should have experience in the design and assessment of optoelectronic devices for use in high data rate or microwave frequency systems. Experience of microwave design tools would be an advantage.

Both appointments will be for two years in the first instance, with salaries on the RA1A scale in the range £14,317 to £19,848.

Applications (two copies), including CV and the names and addresses of three referees, should be sent to Professor S. P. Beaumont, Department of Electronics and Electrical Engineering, University of Glasgow, Glasgow G12 8LT, by 20 December 1995. Further particulars are available from Dr J. H. Marsh (telephone 0141 330 5220, email j.marsh@elec.gla.ac.uk). Reference NS/9002.

EXCITING OPPORTUNITIES IN JOURNAL PUBLISHING

International Thomson Publishing is bringing together its journal companies and divisions in London at the start of 1996. The imprints include Rapid Science, Chapman & Hall and Routledge, synonymous with quality and innovation. The new entity will be in the top three learned journal companies in the UK. The twelve editorial and production groups will manage publications in most medical, scientific, business, social sciences and humanities disciplines.

Specifically we are looking for Senior Staff for cardiology, neurology and infectious diseases group, people with proven experience in relevant publishing position.

We are also looking for Assistant Editors and Editorial Assistants. The sort of person we seek is a recent graduate, keen on a career in publishing and ideally with some relevant experience, but we would consider others who think they could make a contribution. There are serious opportunities for training and career progression. From the start there will be chances to take real responsibility and to interface with journal editors and suppliers.

Successful candidates will work in a modern office building within easy reach of Waterloo station. Salary and benefits are in keeping with a large international company.

Please write, enclosing full CV and stating your salary, if appropriate to:

Flavour Chemist

A scientist is required to participate in a research programme to study mechanisms of flavour release from foods. Duties involve the development of instrumental flavour release methods and to set up studies to determine the factors affecting the release of flavour from different food matrices.

The successful candidate will have a first or upper second class honours degree or equivalent in food chemistry or chemistry together with several years experience in flavour release research and the ability to display an innovative approach to develop flavour release measurements.

Knowledge of food chemistry is essential, with particular interest in flavour chemistry and physical chemistry. Essential skills in the use of gas chromatography and mass spectrometry are required. Experience of statistics of data handling and computing would be an advantage. The starting salary will be in the range £17,317 to £23,954 p.a. depending on qualifications and experience.

Please apply using an application form obtainable from: The Laboratory Personnel Office, Institute of Food Research, Reading Laboratory, Earley Gate, Whiteknights Road, Reading RG6 6BZ or by telephoning (01734) 357128 quoting ref: R33/95. Closing date 15th December 1995.

An Equal Opportunities Employer.

New Zealand  
Dairy Research Institute

Please quote vacancy No 897 and send your application to Human Resources Administrator  
New Zealand Dairy Research Institute Private Bag 11029 Palmerston North

**SCIENTIST**  
Food Science Section

The New Zealand Dairy Research Institute provides the dairy industry with the science and technology needed to compete successfully in international markets.

The Food Science Section is seeking a highly motivated Scientist to join an on-going research programme focused on understanding the structural, functional and nutritional properties of milk proteins. The appointee will contribute to existing projects, design and implement new experiments and communicate results through written and oral reports.

A Ph.D. in chemistry and biochemistry with practical knowledge of protein chemistry including instrumental and wet chemical skills is essential. Post-doctoral experience and some background in protein nutritional assays would be an advantage.

The successful applicant will be a creative individual who is able to work independently and collaboratively as part of a large multidisciplinary team.

For further information please contact Dr Jeremy Hill on +64 06 350 4649.

Written applications, which close on 5 February 1996 should contain a detailed personal résumé and a contact day time telephone number.  
DEPARTMENT OF OBSTETRICS & GYNAECOLOGY

Postdoctoral Research Fellow

A researcher is required with experience in molecular biology to work on the study of angiogenic growth factors in normal pregnancy and pregnancies complicated by pre-eclampsia.

Salary will be within the Research 1A scale £14,317 - £21,519 pa, depending on qualifications and experience.

Applications in writing, together with a detailed CV and the names of two referees, to Dr P Baker, Department of Obstetrics and Gynaecology, Professorial Unit, Maternity Unit, City Hospital, Hucknall Road, Nottingham NG5 1PB. Closing date: 15 December 1995.

DEPARTMENT OF ELECTRICAL & ELECTRONIC ENGINEERING
Solid State Group

Applications are invited for one Senior Research Associate post and two Research Associate posts to work on semiconductor lasers. This will be a three year industrially driven research project, supported under the EU BRITE EURAM III programme.

Senior Research Associate
(Senior Solid State Physicist/Optical Spectroscopist)

Candidates should have at least four years of postdoctoral research experience in the spectroscopic characterisation of semiconductor materials and devices. In addition to having a strong publication record, candidates should have a solid state physics background (including lasers), an understanding of semiconductor devices and be adept with PL-related techniques. The person appointed will be expected to take on significant supervisory responsibilities.

The post is available from February 1996 for a maximum period of three years.

Salary will be within the range £17,000 - £22,000 pa, depending on qualifications and experience.

Research Associate
(Solid State Physicist/Semiconductor Engineer)

Candidates should have at least one year of postdoctoral research experience in semiconductor devices. Preference will be given to experimentalists with a good understanding of electronic defects.

Research Assistant
(Optical Modelling Specialist)

Candidates should have at least one year of postdoctoral research experience in the area of computer simulation and modelling. Preference will be given to candidates with experience in electromagnetic simulation of semiconductor optoelectronic devices.

Both posts are available for a period of one year, which may be renewable for up to three years.

Salary for both posts will be within the range £14,000 - £18,000 pa, depending on qualifications and experience.

Further information about these opportunities and the Solid State Group can be found at http://www.eee.nott.ac.uk/solid/solid.html.
Applicants should send a detailed CV, together with the names of three referees, to Professor J W Orton, Department of Electrical and Electronic Engineering, The University of Nottingham, University Park, Nottingham NG7 2RD.

Closing date: 11 December 1995.

The University of Nottingham is a research-led institution which provides the highest quality learning environment and is committed to equal opportunities in employment.

The University of Nottingham
THE LINBURY TRUST

SENIOR RESEARCH FELLOWSHIP INTO CHRONIC FATIGUE SYNDROME

The Linbury Trust invites applications from scientists and researchers from a broad range of disciplines for the first Linbury Research Fellowship in Chronic Fatigue Syndrome. The Trust supports research into the aetiology, pathogenic mechanisms and applied research in the management of patients with CFS. This appointment is to allow the selected applicant to pursue and develop a specific research interest into an aspect of this condition.

Applicants are invited to submit proposals for work to be carried out over four years in an appropriate university, hospital or equivalent UK institution. Applications will be judged on calibre of applicant and the scientific merit and originality of the proposal, irrespective of career stage of the individual. The Fellowship can commence in August 1996. Support provided will include salary, laboratory consumables and travel expenses.

Application forms and further information can be obtained from David Brown, The Linbury Trust, 9 Red Lion Court, London EC4A 3EB (Tel: 0171-410 0330). The closing date for final application is 31 January 1996.

The Linbury Trust is a general grant making charity.
Registered Charity Number 287077
RESEARCH TECHNOLOGISTS

Cookson Group is a well established, British owned, international group of companies with a strong interest in new technologies. A FTSE-100 Company with a turnover in excess of £1.5 billion, Cookson operates within a number of industrial sectors which are growing by 10% per year.

The Cookson Technology Centre is charged with making innovations leading to new products and manufacturing processes which will be implemented within the Cookson operating divisions: electronic materials, plastics, ceramics and engineered products. Expansion of our research programme has created opportunities in the following areas.

PLASTICS
The team works on melt spinning of fibres, novel composites and microporous materials. We use rheology, thermal analysis and physical testing.

Candidates will have a strong degree in physics, chemistry or polymer science/technology. Experience of industrial R&D or a Ph.D. will be an advantage.

ELECTRONICS
The role is based in the applications engineering group, whose current projects include sensor instrumentation for the power and steel industries, metal atomisation machines and characterisation of complex high frequency materials.

Applicants should be graduates in physics or materials science with good practical experience of electronics, or graduate electronics engineers with a solid grounding in materials.

EXPERIMENTAL AND MATHEMATICAL MODELLING
Computer-aided modelling of products and processes has increasing importance for innovation. We wish to build on our existing strengths in experiment based modelling.

Ideally a physical chemist or chemical engineering graduate, applicants will require good computing skills with a strong interest in mathematics and will have a track record of practical experimental work.

JOINING TECHNOLOGY
The team works on a range of technologies for surface mount electronics and other joining technologies.

Candidates will have a strong degree in chemistry or materials science and will probably have a Ph.D.; post-doctoral or industrial experience would be an advantage.

Each of these opportunities is for a self-starter with a flexible approach and the ability to plan, carry out work and lead its implementation within a defined timescale. Good communication skills, coupled with the ability to work as part of a team, both on site and with development staff in manufacturing companies, are essential. Travel within Europe and to the USA is also likely to be required from time to time.

We offer an attractive salary commensurate with qualifications and experience together with the benefits associated with a progressive organisation. Assistance with relocation will be given where appropriate.

To apply, please telephone or write for an application form. Priority will be given to forms returned by 15 December 1995. Mrs M Brearley, Cookson Technology Centre, Sandy Lane, Yarnton, Oxford OX5 1PF. Tel: (01865) 841921.

Cookson C
Cookson Group plc
Applications are invited to join a highly active multidisciplinary research group for a two-year position, funded by the EPSRC, involving the examination of semi-solid emulsions using dielectric spectroscopy. Due to the interdisciplinary nature of the project, previous experience in the field is not a prerequisite and applicants with a background in physics, chemistry, engineering and other related fields will be considered. The position offers a salary in the region of £16,451 and £18,120, inclusive of London Allowance.

For an informal discussion concerning this position, please contact Dr Craig on 0171 753 5863. Please send a CV, with the names, addresses and contact numbers of two referees, to Dr Duncan Craig, Centre for Materials Science, The School of Pharmacy, 29-39 Brunswick Square, London WC1N 1AX. The closing date for applications is 19 January 1996.

The School of Pharmacy, a constituent college of the University of London, was incorporated by Royal Charter in 1952 and provides education and research in the pharmaceutical and toxicological sciences.
UNIVERSITY OF ABERDEEN

Daphne Jackson Fellowship
Women Returners to Science and Engineering
£14,317 to £21,519 pro rata per annum

The fellowship is available within the Department of Biomedical Physics and Bioengineering to enable a female scientist or engineer to update her skills, on a flexible part-time basis, following a career break.

The successful candidate will be a graduate in physics, mathematics engineering or a related subject. She will be required to complete a supervised research project and to attend courses appropriate to her individual requirements. The fellowship is tenable for a fixed period of two years. Informal enquiries may be made to Professor P. F. Sharp, telephone 01224 840733 or Professor D. W. L. Hukins, telephone 01224 681818, ext 53495, email d.hukins@biomed.abdn.ac.uk.

Application forms and further particulars are available from Personnel Services, University of Aberdeen, Regent Walk, Aberdeen AB9 1FX, telephone 01224272727, quoting reference number ZBP850R. A 24-hour answering service is in operation.

Closing date: 20 December 1995.

The University of Aberdeen is established to provide Higher Education and to carry out related research.

An Equal Opportunities Employer
Is your organisation really committed to equal opportunities? Advertising is the fairest, most open form of recruitment. It also sends a very positive message about you. It's economical and fast. It can be highly focused or universal. It produces measurable results. And it attracts the people you need - at whatever level. The Institute of Practitioners in Advertising, 44 Belgrave Square, London SW1X 8QS. Telephone 0171 235 7020.

IPA
Chair in Physics
Ref: AC95/58

Applications are invited from candidates possessing a strong research record in Condensed Matter Physics with a particular emphasis in Applied Materials. The Department has strong research groups in Magnetism, Polymer Structure, Theoretical and Computational Physics, Protein Crystallography and Astrophysics. There is a strong commitment to contributing to the development and exploitation of national and international x-ray synchrotron and neutron beam facilities. The Department offers a wide-ranging and imaginative teaching programme which it wishes to expand in applied areas of physics. Prospective applicants who wish to discuss the post informally should contact Professor Watson Fuller, telephone 01782 583326, email pha40@potter.cc.keele.ac.uk.

Senior Lecturer/Lecturer
Ref: AC95/61

The aim of the Department of Communication and Neuroscience is to explore the function of the brain by research into vision, hearing and speech. In addition to an MSc course on Machine Perception and Neurocomputing, the Department is establishing an undergraduate Neuroscience course as a major new contribution to Keele's popular dual honours programme, a course that will be especially valuable to students interested in Psychology or Computing but will also be available in combination with a wide range of other subjects.

The Department is interdisciplinary in nature; its current members have backgrounds in biology, computing, medicine, physics and psychology. We are seeking applications from neuroscientists who have demonstrated a capacity for independent research and who would make a contribution to the development of our new undergraduate course.

For application forms and further particulars, please write, quoting the post reference number, to the Personnel Department, Keele University, Keele, Newcastle, Staffs ST5 5BG, or fax your request on 01782 583471.

Closing date: 12 January 1996.

An Equal Opportunities Employer
UNIVERSITY OF NEWCASTLE UPON TYNE
Faculty of Science
Department of Chemistry

**Studentship in Inorganic Chemistry**

A three-year Ph.D. studentship for work on the Reactivity of Ribonucleotide Reductase is available from a date as soon as possible in the group of Professor A. G. Sykes in the Department of Chemistry at the University of Newcastle. The group has previous experience in handling the tyrosyl free-radical/binuclear Fe(III) containing enzyme and considerable progress has already been made in understanding mechanistic aspects of its reactivity. Experience will be gained in isolating the enzyme, as well as air-free techniques and kinetic studies.

Candidates should have a good upper second or first class degree in chemistry, biochemistry or related subjects. Subsistence is at the level £6,500 per annum, plus fees, are provided.

Applications, with CV and referees, and any information enquiries, should be directed to Professor A. G. Sykes, Department of Chemistry, The Bedson Building, University of Newcastle, Newcastle upon Tyne NE1 7RU. Tel: 0191 222 6700 (direct); fax: 0191 261 1882.

Committed to Equal Opportunities

Dedicated to excellence in teaching and research
Directory Database Editor
£17-19,000 Slough
Are you looking for a bioscience publishing job with real responsibility?
BioCommerce Data Ltd

BioCommerce Data is a small company specialising in business information for the worldwide biotechnology industry. We are seeking a full time database manager and editor for our directory products which include the UK Biotechnology Handbook. You will be responsible for selecting, compiling and updating information and for timely production of printed and electronic products. You will also be involved in the development of new products and in customised projects for clients. A relevant degree and some editorial or abstracting experience is expected as well as an ability to work with and help develop computer systems. Basic keyboard skills are also required. You will need to be efficient, organised and hard working, able to write clearly and concisely about technical matters, and have good communication skills. European languages would be a bonus but are not essential. This challenging position, arising from expansion of our activities, offers a high level of involvement and real product responsibility for a committed and enthusiastic individual.

If this sounds like you, please send your CV to BioCommerce Data Ltd, Prudential Buildings, 95 High Street, Slough, Berks SL1 1DH. Telephone 01753 511777. Fax 01753 512239. Email biocom@dial.pipex.com.
Research Assistant
Social, Genetic and Developmental Psychiatry Research Centre

Graduate with a good degree in science required to participate in a research initiative, that aims to identify genetic factors which contribute to alcohol abuse, directed by Professor Robert Plomin. Practical experience of molecular genetic techniques would be an advantage.

Starting salary in the range £16,451 pa to £21,119 pa (inclusive of £2,134 pa London Allowance).

Applications in the form of a CV, including the names of two referees, should be sent to the Personnel Manager, Institute of Psychiatry, De Crespigny Park, London SE5 8AF, from whom further written details are available. Tel. 0171 919 3734 (24 hrs answerphone). Please quote ref. no. 95/R66

Closing date 5 January 1996.

Working towards Equal Opportunities

UNIVERSITY OF LONDON
We are a leading independent contract laboratory bringing innovative research techniques and preclinical testing services to the pharmaceutical, chemical and biotechnology industries as well as to specialized segments of the healthcare industry. We are located just outside Montreal, Canada on a 30 acre site and employ over 500 people.

As a result of continued growth and expansion, we offer the following opportunities.

**Director Metabolism**
Reporting to the General Manager, Toxicology, the successful candidate will be a Senior Scientist who will design and conduct regulatory drug metabolism (ADME) studies, particularly for pharmaceuticals and protein based drugs. Knowledge of radiometric techniques and GLP regulations is essential. Experience with in-vitro metabolism studies and a knowledge of analytical or bioanalytical techniques are definite assets. The successful candidate must also have proven management ability, a high level of interpersonal skills, the ability to communicate effectively both verbally and in writing, and will be expected to contribute significantly to the growth and direction of the Metabolism Department. Ref 57626/1

**Veterinary Pathologist**
The ideal candidate will possess a D.V.M. with an MSc or DVSc in Pathology. Board certification or eligibility by the ACVP is preferred. Responsibilities include interpretation of studies to evaluate the toxicity of potential new pharmaceutical, agrochemical and biotechnology products. We enjoy a modern pathology facility. Ref 57626/2

**Toxicologists (6)**
Each successful candidate will possess at least one degree in the biological sciences and have a minimum of 3-5 years' experience directing studies for GLP compliant regulatory submissions in the pharmaceutical or contract research industry. In addition, two of these positions require a speciality either in metabolism or inhalation. These positions will evolve to include studies in other disciplines of toxicology after appropriate training. Due to client interaction, strong interpersonal skills and a high level of energy are definite assets. Ref 57626/3

**Senior Scientist, Neurotoxicology**
Reporting to the General Manager Toxicology Operations, the successful candidate will be responsible for directing studies in the discipline of neurotoxicology. An advanced degree in neuroscience as well as experience in a GLP/CRO environment is an advantage. In depth experience with behavioural techniques along with a solid knowledge of pharmacology and toxicology are mandatory. The successful candidate must also have strong interpersonal skills and the ability to co-ordinate the work of Technicians. Ref 57626/4

**Certified Veterinary Opthalmologist**
The successful candidate will possess at least 3 years' experience preferably in a GLP/CRO environment and will have demonstrated competency in evaluating ophthalmoscopic findings. Autonomy, flexibility, high energy and good interpersonal skills are essential. Ref 57626/5

We offer competitive remuneration packages reflecting experience and we include relocation allowances. We promote equality in the workplace and enjoy a clean air environment.

Please fax your CV or write, in confidence, with full career and salary details, to Jane Pollard, MSL International Limited, 32 Aybrook Street, London W1M 3JL. Please quote appropriate reference. Fax: 0171 224 2350,

Interviews will begin on December 7th and 8th 1995.

BIO-RESEARCH LABORATORIES LTD.
Lecturer in Systems Modelling and Optimisation

Applications are invited for the above post. The Department holds a Grade 5 research rating and is one of the UK's leading providers of education and research in civil and offshore engineering. The Department enjoys excellent laboratory and computing facilities.

Preference will be given to those with proven research expertise and professional experience in the application of systems analysis and optimisation to water resources and/or transportation. The successful applicant would be expected to maintain appropriate professional and industrial links, be committed to research and teaching, and provide a major input to the Department's MEng and MSc programmes in civil engineering and environmental management.

Salary will be on the Lecturer A/B Scale, £15,154 - £26,430 depending on qualifications and experience.

For an application form and further particulars please contact the Personnel Office, Heriot-Watt University, Riccarton, Edinburgh EH14 4AS, telephone 0131 451 3475 (24 hours) quoting Reference 88/95/NS.

The closing date for completed applications is 3 January 1996.

Heriot-Watt University aims for high quality based on innovative teaching and research excellence.

Applications are invited for the above post, the ideal applicant should have a strong background in inorganic chemistry and an interest in its applications in biological, environmental or analytical contexts. The successful applicant will contribute to the planning and delivery of new courses which will form part of joint Honours Degrees involving Chemistry, and will establish a distinct research programme within the overall areas of interest in the School of Natural Sciences.

The appointment will be for 5 years in the first instance, with salary on the Lecturer A or B scale £15,154 - £26,430 per annum with placement according to qualifications and experience.

Further particulars are available from the Personnel Office, University of Stirling, Stirling FK9 4LA, tel (01786) 467028, fax (01786) 466155 where applications in the form of a CV including a statement of proposed research interests together with the names and addresses of three referees should be returned by 8 January 1996.

PROMOTING EXCELLENCE IN TEACHING AND RESEARCH
ROYAL FREE HOSPITAL SCHOOL OF MEDICINE
(University of London)

Wellcome Trust Ph.D. Studentships in Cellular and Molecular Reproductive Toxicology

Applications are invited from students who have or expect to attain at least a Class II (1) honours degree in toxicology, biochemistry or related subject. The research topic will be on the molecular and cellular actions of toxicants that inhibit fertility in the male.

Stipend and research expenses will be at an advantageous level and similar to Wellcome Prize Studentships.

Applications and enquiries to Professor B. A. Cooke, Department of Biochemistry and Molecular Biology, Royal Free Hospital School of Medicine, Rowland Hill Street, London NW3 2PF. Telephone 0171830 2254. Closing date: 2 January 1996.
Science Writer/Editor
Part-time

The Publishing Department of The Wellcome Trust, the UK’s largest medical research charity, seeks a part-time Science Editor/Writer to provide cover for the Science Editor.

The successful candidate will be expected to work one day per week in the Publishing Department, based in our offices in central London.

Applicants must have a life science degree, at least two years' editing or writing experience and a firm grasp of the principles of biomedical research. The ability to work independently and efficiently is also required.

The post will commence in January 1996 and is offered on a three month contract in the first instance. Salary will be negotiable according to experience.

To apply, write with your full CV, including a daytime telephone number, and two examples of recent work In Mrs Julie Farrell, The Wellcome Trust, 183 Fusion Road, London NW1 2BE by Friday 15th December. Interview date will be 20th December.

THE WELLCOME TRUST

The Wellcome Trust is a Registered Charity (No: 210183), and seeks to support research in biomedical sciences and the history of medicine by means of grants and other activities.
ROYAL ASTRONOMICAL SOCIETY

EDITOR (Part Time)

An Editor is required to take responsibility for the foundation and management of the Royal Astronomical Society's new house journal, Astronomy and Geophysics, which will start bi-monthly publication in February 1997. The Editor will be involved in the design and development of the new journal, be responsible for all editorial content, provide edited copy and illustrations to the publisher, and will stimulate the generation of new and topical material by the astronomical and geophysical community.

Postgraduate experience in astronomy, geophysics or a closely related subject as well as proven writing skills and creative flair are essential. Relevant work in a scientific journal or magazine would be an added advantage. Location is flexible and will be discussed with the successful candidate. Gross salary will be in the range £10k to £15k, subject to experience, for a three day week plus an office allowance and an agreed travel budget. Applications are required by 4 January; interviews will take place in late January 1996 and the successful applicant will be expected to start in mid April 1996.

A job description and further details on how to apply can be obtained by writing to the Executive Secretary, Royal Astronomical Society, Burlington House, Piccadilly, London W1V 0NL.
LABORATORY SCIENTIFIC OFFICER
LSO1 (or 2 with suitable experience and qualifications)

The Division of Surgery (St Thomas's Campus) requires a Laboratory Scientific Officer to join the research team into vascular disease. Experience in tissue culture is desirable. Previous exposure to histological, haematological and physiological measurement techniques would be an advantage. Computer skills are desirable. The post is initially for one year with the possibility of renewal. The department would encourage the candidate to sit for a further degree (ie Ph.D. or MSc as appropriate).

Salary range up to £14,705 pa plus £1,999 pa LWA; depending on qualifications and experience. Interested candidates may discuss the position informally by telephoning Mr D Eastham on 0171-928-9292 exit 2338/2424 or Dr A Smith on ext 2314/2424.

For a job description which contains details about the application procedure, please send a self addressed envelope, no smaller than 16 cm by 23 cm, clearly indicating the reference number STH/SURG/581 on the envelope to: UMDS Personnel Department, Medical School Office, North Wing, St Thomas's Campus, Lambeth Palace Road, London SE1 7EH.

Closing date for receipt of applications: 15 December 1995.

Promoting excellence in teaching, learning & research

Equality of Opportunity is School Policy

GUY'S AND ST THOMAS'S MEDICAL AND DENTAL SCHOOL
(University of London)
APPLICATION OF GC-IR-MS TO ENDOGENOUS STEROID HORMONES

A POST-DOCTORAL RESEARCH SCIENTIST OR EQUIVALENT (3 year post)

Is required immediately to participate in the development of techniques to differentiate between natural and exogenous steroid hormones using high precision stable isotope methods. The successful applicant will be expected to optimise specific extraction and gas chromatographic procedures for steroid hormones and to develop GC-IR-MS methods applicable to biological fluids. Knowledge of GC-MS and/or GC-IR-MS would be advantageous. The appointee will be on secondment to Professor C. Pillinger at the Open University.

Applications, cv and two referees should be submitted to:

Dr Edward Houghton, Horseracing Forensic Laboratory Limited, PO Box 15, Snailwell Road, Newmarket, Suffolk CB8 7DT, UK.
Tel: (01638) 663867. Fax: (01638) 665232.

Closing date for applications: 14 December 1995.

More information can be obtained from Dr Houghton or Professor C. T. Pillinger FRS. Tel: (01908) 652119.
Cranfield UNIVERSITY

Research Studentships
COMPUTATIONAL FLUID DYNAMICS
Reacting Flows and Process Chemistry

The School of Mechanical Engineering has an active academic and research programme associated with CFD and combustion modelling. The research programme emphasises reacting flows as typified in combustion systems, e.g. gas turbine combustors, furnaces and fires in buildings. Additionally an association has been formed with Prof J Warnatz, Univ. of Heidelberg, to incorporate advanced computational techniques for reaction chemistry into a generic CFD code for process industry applications.

Two research students are sought to contribute to the programme. A good first degree or a relevant Masters degree in engineering, applied maths, physics or mathematical chemistry is required. Previous experience of CFD or reaction kinetics would be beneficial.

Financial support at a rate above standard EPSRC studentships will be available. Tuition fees are available for EC citizens only.

Contact Dr P Rubini, ext. 4649, or Prof J B Moss, ext. 4835 (Ref: 3042), SME, Cranfield University, Bedford MK43 0AL. Tel: 01234 750111, Fax: 01234 750728. Also see http://www.cranfield.ac.uk/public/sme/cfd.

Cranfield University is an exempt charity offering a centre of excellence for research and education. [2006-057 (1995) : 76]
Compliance led…Quality driven R&D

Gosport, Hampshire

Cyanamid Agriculture (UK) Division continues to increase its share of the UK, European and worldwide markets and with the planned introduction of new products our environment is dynamic, challenging and driven to achieve standards of the highest quality.

The increasing importance and significance of European and UK legislation, demands regulatory compliance skills of the highest calibre. As such, our team of Compliance Officers work across our European organisation to ensure that these standards are met.

Regulatory Compliance Officer

As a science graduate, with 1-3 years experience in a quality assurance role, you will rise to the challenges this key role has to offer. With full responsibility for ensuring that all documentation meets statutory requirements, you will be working with staff across the company to systematically audit R&D records, as well as undertake live audits. Your brief will additionally include the provision of advice and guidance on GLP, covering laboratory/pilot plant studies at Gosport and field work for which UK and European travel will be required.

Your experience in Quality Assurance, ideally, although not exclusively, gained from within a crop protection environment, will ensure that you have the technical credibility to win the support and commitment from your colleagues. Highly analytical, self motivated and with a keen eye for detail, you will have effective interpersonal skills combined with the presence to persuade others to your point of view. Similarly, as a disciplined professional, you will recognise the importance of adopting an ethical and proactive approach in this key area of our business.

In addition to a comprehensive salary and benefits package, we can offer an excellent forum in which to develop your professional expertise.

Please forward your full CV, including covering letter, to: David Black, Personnel Officer, Cyanamid (UK), Cyanamid House, Fareham Road, Gosport, Hants PO13 0AS.

Please quote reference 935 on all correspondence.

CYANAMID
The Natural Environment Research Council is a source of world-class expertise, and the UK's leading body: for research, survey, monitoring and training in all the environmental sciences. The Council is divided into a number of Institutes, each of which is recognised as a centre of excellence.

Natural Environment Research Council

Geophysicist/Programmer

The Regional Geophysics Group, within the Thematic Maps and Onshore Surveys Division of the British Geological Survey has a vacancy for a geophysicist / programmer.

Joining a small team at the Survey's office in Edinburgh, you will serve the hydrocarbons exploration industry, in addition to public information needs. In this role you will be required to develop new software and to maintain existing programmes for the processing and analysis of geophysical potential field data. Some knowledge of the computational techniques involved in geophysical data processing, and experience in software development are essential. Familiarity with marine or satellite-derived gravity data, with the development of database systems, or with the PV-WAVE software environment would be an advantage.

The post is for a period of one year in the first instance with the possibility of extension, and you should have a good degree in Earth Sciences or Computing.

Starting salary will be within the range of £11,584 - £18,782, depending on qualifications and experience. Terms include a non-contributory pension scheme, and twenty five days annual leave.

For an application form, to be returned by 15th December 1995, write to Personnel (Recruitment), British Geological Survey, Keyworth, Nottingham NG12 5GG. Please quote reference SO/HSO/MH/95/1.

The Council has an equal opportunities policy and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently underrepresented and their applications are particularly welcome.

BGS 1835
British Geological Survey
Scientific Officer
Wirral

Proudman Oceanographic Laboratory forms part of the Natural Environment Research Council's Centre for Coastal and Marine Sciences and is the UK’s principal centre for research into the dynamics of coastal and shelf seas and sea level trends worldwide.

Our Technology Group needs an Electronics Engineer / Applied Physicist to develop new instrumentation systems for oceanographic research and to make innovative contributions to new systems for UK continental shelf and coastal waters, in the deep oceans and on oceanic islands. Excellent support facilities are available and you could participate in research cruises and fieldwork.

For this three year appointment, you should have a good degree (or equivalent) in Electronics Engineering or Applied Physics with experience in micro-computing, programming, data transmission or manipulation.

Starting salary will depend on qualifications and experience, from £11,000 - £15,000 with performance increments within a band up to £20,500. A generous leave allowance, flexible hours and a non-contributory pension are offered.

For an application form and further details please contact P Sprigings, Establishments Section, Proudman Oceanographic Laboratory, Bidston Observatory, Birkenhead, Wirral L43 7RA. Telephone: 0151 653 8633 ext 214, Facsimile: 0151 653 9011. Closing date for applications: 14th December 1995.

The Council has an equal opportunities policy and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently underrepresented and their applications are particularly welcome.

Proudman Oceanographic Laboratory
RESEARCH TECHNOLOGIST

Cookson Matthey Ceramics (CMC) is a successful joint venture, formed as a result of a merger of the ceramics businesses of two giants in the materials supply business, Cookson Group plc and Johnson Matthey plc. The merger has provided a dynamic and expanding company which is a leading supplier worldwide of high specification products to the tile, sanitaryware, tableware, glass and construction industries.

At Cookson Technology Centre (Oxford), the corporate research centre of Cookson Group, we have a vacancy for a research technologist to support the CMC business. Following training at the research centre, the successful candidate will be expected to transfer to a similar role in the business a year later.

The successful candidate will hold a good degree in a materials-related discipline (materials, ceramics, chemistry, physics) preferably complemented by postgraduate or industrial experience. Familiarity with glass technology and ceramic powder processing along with a proven ability in carrying out research projects would be advantageous. Presenting one’s work effectively and communicating with audiences ranging from sales and marketing to production and end customers will be an important aspect of the job.

We offer an attractive salary commensurate with qualifications and experience, together with other benefits associated with a progressive organisation.

To apply, please write enclosing a full CV to: Mrs M Brearley, Cookson Technology Centre, Sandy Lane, Yarnton, Oxford OX5 1 PF.

COOKSON MATTHEY Ceramics plc
Cookson
Cookson Group plc
C
Applications are invited for an enthusiastic engineer/scientist to join a three person team providing full in-house maintenance and engineering support to the radiotherapy service. Proven practical ability in electronics is essential plus, preferably, a good basic knowledge of radiotherapy (possibly via the IPEMB Training Scheme). You should be keen to apply your engineering and scientific skills in a clinical environment and be able to contribute well in a small team. The equipment you will work on includes two linear accelerators (one fitted with an integral multi-leaf collimator), a cobalt unit, superficial and orthovoltage x-ray units and a simulator. You will be fully involved as a team member in the co-operative development of new techniques - and further training will be encouraged.

For informal enquiries or to arrange a visit, please contact Ted Procter, Head of Radiotherapy Physics on 0171 794 0500 ext 3153.

Application packages are available from the Human Resources Department, Lower Ground Floor, Royal Free Hospital, Pond Street, Hampstead, London NW3 2QG. Tel: 0171 794 0500 ext 4285. Please quote Ref: 23516.

Closing date: 15th December 1995

Committed to Equal Opportunities
Ph.D. STUDENTSHIP

Applications are invited for a three year MPhil / Ph.D. studentship, tenable as soon as possible. The project involves the isolation of commercially useful enzymes from bacteria and the identification, cloning and analysis of the relevant genes. Candidates should have a good honours degree in molecular biology, biochemistry or a related subject.

Informal enquiries to Dr M. G. Mortimer on 01484 422288, ext 2435 or 2169. Application forms from the Research Office on 01484 422288, ext 2356.

Closing date 7 December 1995.
BHP

EXPLORATION GEOPHYSICIST
London Based

BHP Minerals Exploration has an expanding exploration group based in London. It is responsible for our exploration throughout Europe and the former Soviet Union, where we are currently exploring for gold, base metals and a variety of other commodities.

An integral part of this exploration effort is a group of geophysicists operating as a multidisciplinary team throughout the region. We require an additional geophysicist for this team. The position will involve: design and supervision of field surveys; data acquisition, compilation, processing and interpretation of existing data; regional geophysical assessments; and close liaison with geographically and culturally diverse exploration teams. The position will involve a significant amount of travelling.

The candidate should have a BSc or MSc and one to five years' experience in mineral exploration geophysics. Experience in the application of potential field, electrical and electromagnetic methods is desirable. The person must be self-motivated and be able to work well as part of a team.

Applications in writing to the Chief Geologist, BHP New Business Development - Geophysics, Brook House, 229 Shepherds Bush Road, Hammersmith, London W6 7AN, UK.

Closing date for applications: 31 December 1995.

Programme in Bioinformatics

Call for proposals.

The BBSRC and EPSRC jointly fund an interdisciplinary co-ordinated programme in bioinformatics.

Outline proposals for research grants are sought from all areas of bioinformatics, under the following
themes:

• Analysis of sequences and genomes
• Biomolecular structure prediction and modelling
• Novel approaches to the storage, integration and exploitation of evolving biological data collections
• Novel applications of systems engineering techniques to biological problems.

In particular, the programme has identified a number of priority areas within its remit, and is especially keen to fund high quality applications in the following areas:

• Sequence to function: making sense of sequence data
• Comparative genome analysis
• Understanding how computer science and IT techniques can aid biological research
• Methods to create biological databases from uncomputerised or unstructured data
• Tools for handling images of biological material
• New approaches to the integrity and maintenance of biological databases

Proposals which demonstrate collaboration between specialists in biology and IT are particularly encouraged. The programme is also seeking industrial collaborations in the form of ‘partnerships with industry’ grants. The BBSRC/EPSRC co-ordinated programme will be open to scientists in UK universities and BBSRC Institutes as well as scientists from Government Research Establishments and Agencies, and Institutes and Units of other Research Councils. Funds will be allocated through open competition.

Applications should be submitted on outline proposal forms. Forms and further details can be obtained from Debbie Harding, Science & Engineering Base Group, BBSRC, Polaris House, North Star Avenue, Swindon SN2 1ET, or at http://www.epsrc.ac.uk under ‘What's New’. Tel: 01793 413341, Email: debbie.harding@bbsrc.ac.uk

The closing date for applications is 9 February 1996
**Sainsbury Studentships in Plant Science**

Enhanced postgraduate studentships, each for three years, starting in October 1996, will once again be awarded by the Gatsby Charitable Foundation, one of the Sainsbury Family Charitable Trusts. Each of the supervisors below will select a candidate who will then compete at interview for one of up to four Sainsbury studentships.

Interested applicants should write as soon as possible for further details to one or more of the following:

Molecular ecology of supernumerary segments in Rumex  
Professor J S. Parker, Department of Botany, The University of Reading, Plant Science Laboratories, Whiteknights, PO Box 221, Reading RG6 6AS.

Plant cell signal transduction and ion channels  
Dr M. R. Blatt, Department of Biological Sciences, Wye College, University of London, Wye, Kent TN25 5AH.

The role of the LHY gene in regulating flowering time and photomorphogenic responses of *Arabidopsis thaliana*  
Dr G. Coupland, John Innes Centre, Norwich Research Park, Colney, Norwich NR4 7UH.

Tissue specific regulation of mitochondrial biogenesis and function during flower development  
Professor C. J. Leaver, Department of Plant Sciences, University of Oxford, South Parks Road, Oxford OX1 3RB.

The molecular basis of cell-cell recognition during the self-incompatibility reaction  
Dr E. C. H Franklin, School of Biological Sciences, The University of Birmingham, Edgbaston, Birmingham B15 2TT.

Cell signalling and self recognition in the mushroom coprinus  
Dr L. Casselton, Department of Plant Sciences, University of Oxford, South Parks Road, Oxford OX1 3RB.

Molecular genetics of co-suppression in arabidopsis  
Dr. I. Furner, Department of Genetics, University of Cambridge, Downing Street, Cambridge CB2 3EA. [2006-066 (1995) : 79]
Cranfield UNIVERSITY

Ph.D. RESEARCH STUDENTSHIPS IN ENGINEERING

Cranfield University is offering five research studentships at The Royal Military College of Science at Shrivenham. The studentships will normally be of three years' duration and attract an annual stipend of £7,600. The students will be expected to register for a Ph.D. Each of the five successful applicants will undertake research in one of the following areas:

- Communications and Electro Optics (including signal and image processing, neural networks, imaging systems and acoustics)
- Large eddy simulation in fluids
- Control of flexible structures
- Boundary-layer stability
- Heat transfer in internal combustion engines using advanced instrumentation
- Modelling and control of multi-wheel skid-steer hybrid vehicles
- Development of armour systems for ballistic protection of personnel
- Hydrocode modelling of fibre reinforced composite materials
- The optimisation of a novel form of sandwich construction
- Optimisation of hull design for inland waterway craft
- Verification, validation and accreditation of networked simulations (this project is sponsored by the Defence Evaluation and Research Agency (DERA) and will attract an additional annual stipend of £2,200).

Applications are invited from candidates who have, or expect to have, a First or Upper Second Class Honours degree in an appropriate science or engineering discipline. If you are interested, please write, enclosing your CV, to Professor J G Hetherington, Cranfield University, RMCS, Shrivenham, Swindon, Wilts SN6 8LA, (e-mail: hether@rmcs.cranfield.ac.uk) from whom further details can be obtained. Please identify which of the topics above interest you and explain why you would like to study for a Ph.D. in that area.

Cranfield University is an exempt charity offering a centre of excellence for research and education.

ROYAL MILITARY COLLEGE OF SCIENCE, SHRIVENHAM.

Directorate of Fisheries Research

FISHERIES RESEARCH SCIENTISTS

The Directorate of Fisheries Research is an internationally renowned centre of fisheries and marine environmental research. We are currently seeking to fill a number of posts based at our laboratory in Lowestoft.

These are key posts for innovative scientists to help advance our understanding of the dynamics of natural populations and to play a central role in providing quantitative advice to Government on the status and prospect of populations in relation to the effects of fishing and other environmental impacts.

Vacancies currently exist in the following areas:
• Marine pelagic and demersal fisheries
• Shellfisheries
• Salmonid and freshwater fisheries
• Ecological and fisheries modelling

You will be expected to conduct high quality research into the population biology, assessment and status of the relevant species. You will have the opportunity to participate in research vessel voyages and to be involved in national and international collaborative studies.

You must have a good honours degree in a biological or quantitative science. Successful candidates will be innovative biologists or ecologists with a sound quantitative background, or quantitative scientists with an interest in the life sciences.

Reflecting our commitment to attract high calibre candidates, we offer these posts on a permanent basis with full British Civil Service employment conditions including a non-contributory pension, plus relocation assistance in appropriate circumstances.

Starting salary will be in the range £11,000 to £28,000 pa, with opportunities to gain promotion, and a maximum salary of £38,000 pa. A specialist medical will be required before appointment.

Please contact us for further details and an application form by writing to Mrs E. Withers, Fisheries Laboratory, Pakefield Road, Lowestoft, Suffolk NR33 0HT, UK; or tel: (01502) 524334; Fax (01502 524390) or e-mail: l.a.withers@dfr.maff.gov.uk. Closing date for returning application forms is 22 December 1995. Please quote reference: 32/95.

MAFF
Ministry of Agriculture Fisheries and Food

Collaborative Research Studentship

Effects of pre and probiotic foods on lipid metabolism and gut microbiota in human subjects.

Recent findings suggest that some foods which may alter the composition of the gut microflora have beneficial effects on human health through their ability to modify circulating levels of cholesterol and other lipid containing particles implicated in atherogenesis. The aim of this project is to investigate the efficacy of pre and probiotic foods in reducing blood lipid concentrations in human subjects and to study the role of altered gut microflora in mediating these effects. Mechanisms by which altered gut flora influence the metabolism of hepatic and/or intestinal lipids may form part of the later stages of the project.

This will be a jointly supervised project between Professor Christine Williams, Hugh Sinclair Unit of Human Nutrition (The University of Reading) and Drs Glenn Gibson and Ian Johnson (IFR Reading and Norwich).

The student stipend will be £6,500 per annum.

The deadline for applications will be Friday 8th December 1995. Applications, including the names of two referees should be sent to Professor C M Williams, Department of Food Science and Technology, PO Box 226, Whiteknights, Reading RG6 6AP. Further details can also be obtained from Professor Williams, telephone (01734) 318706.

A centre of excellence for university teaching and research.

HARVARD UNIVERSITY

BULLARD FELLOWSHIPS IN FOREST RESEARCH

Each year Harvard University awards a limited number of Bullard Fellowships to individuals in biological, social, physical and political sciences to promote advanced study, research or integration of subjects pertaining to forested ecosystems. The fellowships, which include stipends up to $30,000, are intended to provide individuals in mid-career with an opportunity to utilise the resources and to interact with personnel in any department within Harvard University in order to develop their own scientific and professional growth. In recent years Bullard Fellows have been associated with the Harvard Forest, Department of Organismic and Evolutionary Biology and Kennedy School of Government and have worked in areas of ecology, forest management, policy and conservation. Fellowships are available for periods ranging from four months to one year and can begin at any time in the year.

Applications from international scientists, women and minorities are encouraged. Fellowships are not intended for graduate students or recent postdoctoral candidates. Further information may be obtained from: Committee on the Charles Bullard Fund for Forest Research, Harvard University, Harvard Forest, Petersham, MA 01366 USA. Annual deadline for applications is February 1.
Antenna Research

Applications are invited for a **Post-Doctoral Research Assistant** to work on a project which concerns the electromagnetic modelling of interference in closely spaced satellite earth-stations antennas. The work is mainly theoretical but has an experimental element concerned with laboratory modelling a typical microwave ground station with local scatterers at 90 GHz.

Applicants should have a Ph.D. in the field of antennas or electromagnetic theory and experience in programming in FORTRAN.

Further information about the QMW Antenna Research Group can be found on their world-wide web site: [http://www.elec.qmw.ac.uk/antenna/](http://www.elec.qmw.ac.uk/antenna/). Informal enquiries may be made to Dr Clive Parini on 0171-975-5339 or e-mail: c.g.parini@qmw.ac.uk

The post is funded until 31 March 1997 with a salary in the range £16,451 - £18,120 pa inclusive depending on experience.

For an application form and Further details please telephone our 24 hour Recruitment Line on 0171-975-5171 quoting Reference 95159. Only completed application forms will be accepted and these should be returned by 22 December 1995 to the Recruitment Coordinator, Personnel Office, Queen Mary and Westfield College, Mile End Road, London E1 4N5.

**UNIVERSITY OF LONDON**

Excellent Opportunities in Pharmaceutical Analysis

Sanofi Winthrop is a world-wide pharmaceutical organisation with research centers in France, UK and USA. We are committed to the development of innovative new medicines and have a number of exciting new compounds in development. The Alnwick Research Centre is responsible for a number of these development projects.

Vacancies exist for three graduates in the Analytical Sciences Department, which has a wide range of modern analytical equipment, a chromatography data system and a PC network. A Laboratory Information Management System (LIMS) is to be installed during 1996.

Ref No: SR-36
The Method Development and Stability Section is responsible for developing and validating a variety of control methods for new drug substances and products. Degradation mechanisms are elucidated and the stability of drug substances and products is assessed. A variety of techniques are used, including chromatography and spectroscopy. This position would suit a recently qualified Chemistry Honours Graduate.

Ref No: SR-37
The position in Physical Organic Chemistry is concerned with the physical and chemical characterisation of drug substances and products, using various techniques including Thermal Analysis, X-ray Powder Diffraction and Nuclear Magnetic Resonance. Also these techniques are used for non-routine problem solving. Training will be provided for these and other areas of physical characterisation, as necessary. The applicant should hold a first or upper second class honours degree in chemistry. Newly qualified graduates and scientists with up five years relevant pharmaceutical experience will be considered for this position.

Ref No: SR-29
The QC Section is responsible for analysing raw materials, intermediates and products to ensure that they comply with specifications. A wide range of methods are employed including spectroscopy, chromatography and ‘wet’ chemical methods. In addition to contributing to the work of the QC Section, the person to be appointed will have responsibility for developing and implementing an Analytical Sciences data capture and processing programme, working in conjunction with the LIMS manager and Information Sciences Department. Thus the ideal candidate will have a strong interest in analytical chemistry, together with knowledge of the application of information technology to analytical chemistry. Applicants should possess a first or upper second class honours degree in chemistry, or chemistry with computing science, and 0 - 3 years experience.

In return we offer an exciting and challenging environment, competitive salary and an attractive benefits package, including relocation assistance, where appropriate, to an area of natural beauty.

To apply, please send a detailed CV and quote the appropriate reference number to: Ms Deborah Child, Human Resources, Sanofi Research Division, Alnwick Research Centre, Willowburn Avenue, Alnwick, Northumberland, NE66 2JH.

Closing date for applications is Monday 18 December 1995

Sanofi WINTHROP
Solvay Healthcare is the UK subsidiary of a major international pharmaceutical group, and part of the multinational Solvay organisation.

An interesting opportunity exists for an experienced individual to join our Therapeutic Unit, which handles a range of gynaecological products. In this varied role, you will initiate and monitor clinical trials throughout the UK involving lead compounds in hormone replacement therapy.

To join us, you will need at least two years’ experience as a Clinical Research Associate working on gynaecological studies, plus excellent interpersonal and communications skills. It is also essential that you can work effectively on your own initiative and as a therapeutic team member, and that you have a clean, current driving licence.

As you would expect, we offer a competitive salary and company car, plus a comprehensive range of large company benefits. This position is offered on a temporary contract basis, and will last for approximately 12-18 months.

Please write, enclosing full personal and career details to Mrs. Di Smith, Personnel Officer, Solvay Healthcare Limited, Hamilton House, Gaters Hill, West End, Southampton SO18 3JD.

Closing date for applications: 14 December 1995.

Solvay Healthcare Limited
SOLVAY
LISTER INSTITUTE RESEARCH FELLOWSHIP

The Lister Institute of Preventive Medicine is a registered charity established to support biomedical research of relevance to preventive medicine. The Institute invites applications for Lister Institute Research Fellowships, of which up to five will be available from October 1996. Non-clinical fellowships will each be tenable for five years. Fellows actively pursuing clinical training will also be offered five year fellowship, to enable them to be employed as Senior Registrars by a Regional or District Health Authority. An extension would be considered in appropriate circumstances, subject to satisfactory review. Candidates must be post-doctoral in the bio-medical field and aged under 34 years, with evidence of independent research, including at least two years' post-doctoral research, and with an interest in a scientific aspect of preventive medicine. A permanent post temporarily vacated by the Fellow must be protected by his/her employing institution which will be required to appoint a temporary replacement during the period of the fellowship. The salary, payable by the employing institution and reimbursed by the institute, will normally be on University clinical or non-clinical scales, with London Weighting if appropriate, plus USS (or equivalent) and N.I. contributions. A generous allowance for consumables and minor equipment is also payable.

Applications will not be entertained from persons permanently employed by Research Councils, nor from employees or prospective employees of medical research charities.

In exceptional circumstances, as for example where there have been career breaks on family or other grounds, the Institute would consider electing a Fellow aged up to 40 years. Personal details supporting the claim of such a candidate must be provided in writing as soon as possible. The Institute will then give a decision as to whether or not the candidate may proceed to submit a full application for a Fellowship.

Application forms and further particulars may be obtained from: The Secretary, Ref: N81, The Lister Institute of Preventive Medicine, The White House, 70 High Road, Bushey Heath, Hertfordshire WD2 3JG to whom completed forms must be returned not later than 19 January, 1996.

Ph.D. internships are to be offered at the soon-to-be-established United Nations University/Institute of advanced studies (UNU/IAS). The UNU is an autonomous body of the United Nations established by the General Assembly to be an international community of scholars engaged in research, advanced training, and the dissemination of knowledge related to the pressing global problems of human survival, development, and welfare.

The UNU/IAS, to be established in new buildings adjacent to the UNU Headquarters in Tokyo, is a multi-thematic research and training centre. Its programme is directed at pressing global issues of the United Nations, particularly those concerning developing countries, making use of advanced research methodologies with an interdisciplinary approach.

Requirements: Applicants should be at the dissertation stage of their Ph.D. with a research topic accepted by the candidate's university and able to make use of the UNU/IAS facilities in Tokyo to carry out their research. Research topics should relate clearly to one of the following research areas of the UNU/IAS for the initial 1996-97 years: (i) eco-restructuring for sustainable development; (ii) mega-cities and urban development (iii) policy aspects of science, technology, and society in relation to sustainable development; and (iv) peace, multilateralism, and governance. Where appropriate, applicants should be competent in scientific research methodologies and computer-based analysis. The successful applicant will work in Tokyo under the supervision of a UNU/IAS faculty member and/or affiliated UNU/IAS network scholars. Language proficiency in English is essential. Applicants from developing countries are particularly encouraged to apply.

Internship: Up to ten internships will be offered, each for a period of six to ten months, depending on the stage of the successful applicant's Ph.D. research. A monthly stipend will be paid, in addition to the availability of subsidised accommodation at the UNU/IAS and a return ticket between Tokyo and the applicant's home country.

Application: Deadline for applications is 31 January 1996. There is no specific application form. Applicants should send a covering letter explaining his/her qualifications and suitability for the internship, curriculum vitae, dissertation outline/proposal (an early chapter, if available), supporting letter(s) of reference from Ph.D. supervisor(s), and academic record to the address below. Only complete applications will be considered and replied. Applications submitted in response to previous announcements are still valid and need not be re-submitted.
Fish/Fisheries Biologist

The Scottish Association for Marine Science (SAMS) has a vacancy for a fish/fisheries biologist to work as part of a small team on a research project related to the new fisheries for deep water fishes in the northeastern Atlantic. The project, which is part-funded by the European Commission, will be mostly concerned with the biology of deep water fishes and their interactions with the environment. The post, which is for a fixed term of three years, would ideally suit a person with postgraduate experience.

Salary will be on Band 6 (£13,416 to £24,567 per annum) for HSO. Qualifications sought would normally be a degree in a scientific subject, with two years' relevant experience or equivalent.

For further details and an application form, to be returned by 15 December 1995, please write to the Establishments Officer, Fisheries Applications, SAMS, Dunstaffnage Marine Laboratory, PO Box 3, Oban, Argyll PA34 4AD, or telephone 01631 562244.

SAMS has an Equal Opportunities Policy and welcomes applications from all sections of the community.

Could you manage a Research and Development Support Unit?
c. £27,000
(Three year fixed term appointment)

To promote the concepts and practical implementation of Health Service research in North and North East Bristol area a Research and Development Support Unit is to be established at Frenchay NHS Trust. The unit, which has the active support of a number of NHS providers, industrial partners and academic institutions, will be sited within the Academic Centre of Frenchay Hospital.

This new post requires a combination of skills covering experience of research projects, innovation and enthusiasm, but above all a firm commitment to the benefits of evidence based medicine.

Applicants who will probably hold a higher degree must demonstrate:
1. Excellent communication and interpersonal skills and the ability to bring together and motivate multi-disciplinary teams.
2. Experience in planning and conducting research projects from their inception to their peer reviewed publication.
3. Training and skills in areas of research methods, experimental design or statistics.
4. An understanding of the reformed NHS and the need to more effectively manage, promote and fund research and development within the new service.

For an informal discussion please contact the Director of Research and Development on: 0117 970 1212 ext 2481.

For a job description and application form please contact Employment Services, Frenchay Hospital, Frenchay Park Road, Frenchay, Bristol BS16 1LE, Tel: 0117 970 1212, ext 3488. Please quote ref: FBUI730JBi.

Closing date: 20 December 1995.

The Trust operates an Equal Opportunities Policy and encourages applications from disabled people and those with an ethnic minority background. An extensive benefits package includes good annual leave, a top quality subsidised pension, creche and playscheme facilities, free car parking and a job share scheme. A non-smoking policy is in operation

EXCELLENCE IN PRACTICE
Applications are sought for the position of Development Chemist in the Electronics Products group of the Alpha-Fry European Regional Development Laboratory in Croydon.

The group is concerned with the development of new products for electronics assembly and printed circuit board fabrication applications. The Alpha-Fry range includes fluxes, solder pastes, wire, stripping solutions, polymeric resists, and protective coatings.

Candidates should have an Honours degree in Chemistry or equivalent, with experience in formulation work, surface coatings, and surface treatment. Experience of electronics assembly or PC fabrication is desirable but the ability to work as part of a team as well as under one's own initiative is essential.

The successful candidate will report to the Development Manager, Electronic Products.

A competitive salary will be paid dependent on experience.

Please reply in writing enclosing a current CV to Mr A. C. Hoggan, Product Development Manager, Alpha-Fry Group, ERDL, Tandem House, Marlowe Way, Croydon CR0 4XS.

ALPHA-FRY GROUP
A Cookson Company
CHEMISTRY AND MICROBIOLOGY ANALYTICAL MANAGERS
Competitive salary - Attractive benefits - Based Hayes, Middlesex

Safeway Stores plc is acknowledged as one of the most innovative, forward thinking and rapidly growing food retailers in the country. As part of our culture of continuous improvement, we are committed to introducing new products as well as enhancing existing lines. Not only do these have to satisfy the most stringent health, safety and quality standards, they must also comply totally with any claims made on the packaging.

Whether it is checking current products, new merchandise or responding to customer queries, the actual testing process is out-sourced to external contract laboratories. Your role as Analytical Manager will be to establish risk analysed testing programmes, to interpret the results of investigations, draw conclusions and provide expert advice on any issues or trends. Liaising closely with laboratories you will perform audits of their procedures, resolve problems and ensure appropriate methodology and standards are applied.

To qualify, you must be a Chemistry, Microbiology or Food Science graduate with at least five years’ food analysis experience and knowledge of laboratory accreditation schemes.

Possibly, you will come from a similar role with another retailer. Alternatively, you could be currently working either in a contract laboratory or within the public sector. Whatever your professional background, you will need to be organised, accurate and efficient. Highly knowledgeable of your field, but still an avid information seeker, you must also be able to communicate effectively with people at all levels.

This is an ideal opportunity to develop your skills on a wide range of products. In addition, you can look forward to an attractive package and excellent prospects.

An appetising offer? Then please write with your CV, stating current salary details, to: Helen Rogers, Resourcing Executive, Safeway Stores plc, Safeway House, 6 Millington Road, Hayes, Middlesex UB3 4AY.

Closing date: 15th December, 1995.

SAFEWAY
CELL BIOLOGIST
Salary dependent upon experience

ZENECA is a world leader in the development of crop protection products, with an international reputation in biotechnology. We are now looking for an experienced and innovative Cell Biologist to lead a team of scientists contributing to the invention of novel pest control agents.

You'll be working with molecular biologists and biochemists to devise novel cell-based assays and expression systems for a wide variety of gene products.

We'll expect you to have a record of scientific achievement, gained over several years in either industry or academia. A wide knowledge of cell biology in prokaryotes and eukaryotes will be essential, together with an understanding of expression systems, and ideally experience of baculovirus expression work. In addition, we shall be looking for the interpersonal skills that will allow you to work as part of a tightly-knit team.

We offer a competitive salary and the benefits you would expect of an organisation of our calibre - 25 days' holiday, holiday bonus, pension scheme, a subsidised restaurant and a lively sports and social club.

To apply please send your CV, quoting reference EPS9, to Sarah Carro, Human Resources, ZENECA Agrochemicals, PO Box 303, Bracknell, Berkshire RG12 6YX. Closing date for applications is 15th December 1995. Interviews will take place in January 1996.

Our leading-edge organisation believes that valuing individuals with different backgrounds and experience will lead to improved business performance.

ZENECA Agrochemicals
HELPING FARMERS FEED THE WORLD
Ph.D. Studentships in Chemistry and in Applied Mathematics, Cyclotron Unit

The Clinical Sciences Centre is a multidisciplinary research institute which integrates basic chemical and biological research with clinical applications. Applications are invited for two Ph.D. Studentships based in the Cyclotron Unit and commencing in October 1996.

Project titles are as follows:
1. Synthesis of carbon-11 labelled agonists for studying the dopaminergic system by Positron Emission Tomography. (Supervisors: Dr S. K Luthra and Dr F. Brady.) Ref: Ph.D./SK/FB.
   Applicants should have a keen interest in synthetic organic/medicinal chemistry and preferably have experience in modern analytical techniques, especially HPLC. Experience in radiochemistry is desirable but not essential.

2. Mathematical Modelling in Positron Emission Tomography. (Supervisor: Dr V Cunningham.) Ref: Ph.D./VC.
   This project will be suitable for applied mathematicians with an interest in image analysis and kinetic modelling.

Positron Emission Tomography (PET) is a clinical tool, based on the use in vivo of radiolabelled tracers. PET allows the generation of quantitative functional images of biochemical, physiological and pharmacological parameters such as blood flow, metabolic rate, and the distribution and density of receptor sites in a variety of tissues and organs such as brain, heart, etc. In the Unit there are active clinical research programmes employing PET in neurology, psychiatry, cardiology, oncology and pulmonary studies.

Applicants for both Studentships should have, or expect to gain, a first or upper second class honours degree in an appropriate subject, and must ordinarily be resident in the UK.

For further details and application forms, please contact the Personnel Department, telephone 0181 740 3446/7, quoting the appropriate reference number. Closing date for completed applications is 31 December 1995.

The Medical Research Council is an Equal Opportunity Employer
Advancement through excellence

Rapid growth and expansion over the past two years has confirmed Chiroscience's place as the world's leading and most innovative chiral pharmaceutical company. Our core chiral expertise will continue to drive our business into the next century, ensuring the continual advancement of our product pipeline and sustaining our dynamic progress.

CHIROSCIENCE
The chiral pharmaceutical company

RESEARCH SCIENTIST

The success of our Technology Services Business providing chiral synthetic solutions for Pharmaceutical Companies, and the recent extensive broadening of our capabilities in crystallization-based technology and asymmetric chemocatalysis, has created the need for a scientist to conduct screening programmes for both internal research and collaborative targets. This new role will also present the opportunity to organise our collections of resolving agents and catalysts and liaise effectively within dynamic multidisciplinary project teams to solve pharmaceutical synthetic problems.

To be considered as a suitable applicant, you will have a good honours degree with a minimum of 2 years' experience, preferably gained in industry, together with an understanding of chirality concepts.

This position will be offered on a 1 year contract initially.

Salary and benefits are competitive - reflecting the importance we place on the recruitment of high quality staff.

If you would like to develop your career in one of the country's most exciting pharmaceutical companies, please send a full CV, quoting reference NS/11/95 to: The Personnel Manager, Chiroscience Limited, Cambridge Science Park, Milton Road, Cambridge CB4 4WE.

ASSISTANT MICROBIOLOGIST

Henry Telfer Limited produces a comprehensive range of sandwiches for a premier retailer in a custom made manufacturing facility.

You will work with a high degree of autonomy within a department engaged in bacteriological evaluations of food products. As number two to the Company Microbiologist, you will be involved in ensuring the microbial quality of a wide variety of sandwiches and raw materials. Your interpersonal skills will be called upon in dealing with suppliers and helping manage our busy, modern microbiological laboratory. This is a 7 days a week operation, therefore a flexible attitude to the working patterns is necessary.

Your formal qualifications should include a Degree or HND in Microbiology or associated science and your other qualities should encompass problem solving ability and good communication skills.

Preference will be given to those with previous food industry experience and a working knowledge of pathogen testing.

If you want a job working at the forefront of Food Technology where each day presents new challenges, please write with full CV details to Mrs Walker, Personnel Officer, Henry Telfer Limited, Moulton Park, Northampton NN3 1NP or telephone for an application form on (01604) 790666 ext 202.

Henry TELFER
BSIA
Bureau of Stable Isotope Analysis Ltd

Due to expansion we seek a

LABORATORY MANAGER
To be responsible for daily running of laboratory

Should have proven supervisory/managerial skills, with about five years' experience in analytical chemistry and/or diagnostic testing, as well as experience in Mass Spectrometry.

Knowledge of the following would be useful: GC, LIMS and laboratory accreditation.

Please send CV to Sue Elgar, BSIA Ltd, 15 Brooke Lane Business Centre, Brook Lane North, Brentford TW8 0PP.
SAS PROGRAMMERS ETC

CONTRACT / PERMANENT

Excellent opportunities available for experienced SAS Programmers, A/ Ps and Credit Scorers.
* Major Companies
* Varied Projects
* Pharmaceutical
* Marketing
* Financial

Phone/fax Jo Scott on 01626 773513, EF Contracts, 6 The Wharf, Mill Lane, Taplow, Maidenhead. Banks SL6 0AD.
Assistant Health and Safety Adviser

Applications are invited for this position which will be based primarily at our Charterhouse Square site to give advice to the clinical science departments of the School of Medicine and Dentistry.

It is essential that you have a Degree, preferably in a science or engineering based discipline and ideally a Health and Safety qualification, (NEBOSH, Dip SM or equivalent). In addition you must have at least 3 years' experience of Health and Safety practice in a large organisation, ideally NHS/higher education with a knowledge of and the ability to interpret Health and Safety legislation. The ability to communicate effectively with a wide range of people at all levels is essential as is computer literacy.

The salary will be in the range £18,762 - £23,653 pa inclusive depending on experience. Benefits include a holiday entitlement of 31 days a year, superannuation scheme and season ticket loan.

For an application form and further details please telephone our 24 hour Recruitment Line on 0171-975-5171 quoting Reference 95145. Only completed application forms will be accepted and these should be returned by 5 January 1996 to the Recruitment Coordinator, Personnel Office, Queen Mary and Westfield College, Mile End Road, London, E1 4NS.

UNIVERSITY OF LONDON
WORKING TOWARDS EQUAL OPPORTUNITIES

A multi-faculty college of the University of London engaged in teaching and research of international distinction
Nuclear Electric
In accordance with the conclusions of the Government's Nuclear Review, which were published in May 1995, it is proposed that the existing Nuclear Electric plc will evolve into two separate companies. Whilst the Magnox reactors will remain in public ownership, the Government intends to privatise the AGR and PWR stations currently owned by Nuclear Electric plc, together with the AGR stations owned by Scottish Nuclear Limited, in 1996.

Technical Officer
£13,000 - £23,000   Gloucestershire

The successful applicant will be working as part of a highly skilled team undertaking post irradiation examinations of core graphite and associated tasks, including preliminary analysis of data and development of measurement techniques.

This is an excellent opportunity for someone looking to expand their laboratory experience in a computerised, highly professional environment. You should be flexible and team orientated, educated to at least BTEC Higher in a relevant subject, and with a methodical and systematic approach to problem solving.

While 3-4 years experience in a similar environment would be ideal, it is essential that you have a working knowledge of one or more of the following: radioactive handling, physical chemistry, physics, materials science, experimental work, measurement techniques.

In return you can expect a highly competitive salary and benefits package commensurate with an organisation of our standing, plus an ongoing commitment to training and development that will enable you to fully realise your potential.

To apply send a full C.V. to the Nuclear Electric Account Director, Sanderson Advertising and Design Group Limited, 15-16 Lower Park Row, Bristol, BS1 5BN. Alternatively for an application form and further information call 0117 925 2363.

The closing date for receipt of completed applications is 15 December 1995.

In promoting equal opportunities, Nuclear Electric plc welcomes applications from all sections of the community. We select people according to their abilities and our needs.

Corporate Headquarters
Nuclear Electric plc Berkeley Technology Centre Berkeley Gloucestershire GL13 9PB
**MLSO1 or Trainee MLSO**

Immunology Department

Required for this large, busy department providing a service to Nottingham hospitals and GPs.

The Trainee must have a BSc in Biomedical Science accredited for State Registration training by the CPSM.

The MLSO1 will be State Registered. Previous experience of Immunology would be an advantage but not essential.

Training will be given in a wide variety of techniques.

For further information contact Mr S J Carlton, Laboratory Manager on Nottm (0115) 970 9129.

QMC
QUEEN'S MEDICAL CENTRE NOTTINGHAM
MLSO 1 £10,405 - £13,693
Trainee MLSO £6,584 - £8,627

Closing date 20 December 1995.

ROYAL BROMPTON HOSPITAL
NHS TRUST
Biomedical Engineering Department

Clinical Support Technician

Royal Brompton Hospital is an internationally recognised postgraduate teaching hospital specialising in cardiothoracic medicine.

The Biomedical Engineering Department provides a clinical support service 24 hours a day, 365 days a year and the team of Clinical Support Technicians are looking for someone who is:
• qualified to at least HNC or equivalent in a technical or scientific subject
• technically minded and can demonstrate practical skills
• able to work under pressure and complete routine tasks reliably
• a highly motivated team member and an excellent communicator
• interested in working in a high tech clinical environment
• experienced in hospital and/or technical work.

Your duties will involve setting up, checking and maintaining analysers, monitoring and treatment equipment used in clinical areas. You will work closely with nursing and medical staff and assist with the use and understanding of highly complex medical technology associated with modern adult / paediatric intensive care and operating theatres.

Salary range £16,800 - £19,300 pa inc (plus £36.07 per night standby duty - approximately 60 standby duties per annum on average).

If you are interested and want to find out more, please contact the Human Resource Department, Royal Brompton Hospital, Sydney Street, London SW3 6NP, or telephone 0171 351 8688 (24 hour answerphone) quoting ref: HB/54. Closing date: 15 December 1995.
We wish to appoint two research fellows to expand our programme on Brain Spheroid Cultures in Toxicity Testing. We specialise in In Vitro Toxicity Testing with particular emphasis on Neurotoxicity.

**Spheroid Cryopreservation Ref R2601N**
You will investigate and establish cryopreservation techniques and viability measurements for brain spheroids to facilitate interlaboratory validation. A neurobiologist, or biochemist with experience of cell culture and/or cryopreservation technology is sought.

**Spheroid Coculture and Metabolism Ref R2600N**
You will investigate the coculture of brain and liver spheroids for studying the metabolic activation of neurotoxins and the inherent metabolic potential of brain tissue in vitro. A neurotoxicologist, with experience of drug metabolism is required.

Both fellowships will commence 1st January 1996.

Informal enquiries to Professor Chris Atterwill CTU Director (01707 284510) or Dr Wendy Purcell, CTU Deputy Director (01707 284597).

Application form and further details are available from the Personnel Department, University of Hertfordshire, College Lane, Hatfield, AL10 9AB or telephone (01707) 284802 (24 hour answerphone) quoting appropriate Ref No.

Closing date: 14 December 1995

The University is an Equal Opportunities Employer and an Investor in People.

THE UNIVERSITY OF HERTFORDSHIRE IS A REGISTERED CHARITY COMMITTED TO THE FURTHERANCE OF EDUCATION.
School of Environmental Sciences
UEA NORWICH

SENIOR RESEARCH ASSOCIATE IN PUBLIC RISK

Applicants are sought for the post of Senior Research Associate in the Centre for Environmental and Risk Management within the School of Environmental Sciences. The Centre is embarking on a multi-disciplinary study to assess real and perceived risks faced by the public and to investigate existing and novel approaches to address these risks at the national, community and personal level. The project will examine risks of many kinds, e.g. of disease; accidents or ill-health arising at work, home, during leisure or travel; risks from criminal activities; and lifestyle risks.

The post is available immediately and until 30 September 1996 initially. The post holder could be full or part-time. Salary will be paid on the Research & Analogous 1A Scale in the range £14,317 to £21,519 per annum depending on experience. A range of suitable qualifications should indicate experience or the post doctoral level.

A letter of application and a current curriculum vitae containing the names and addresses of three referees who can testify for your academic abilities should be sent to Dr J P Darch, Research Administrator, School of Environmental Sciences, University of East Anglia, Norwich NR4 7TJ, UK by 13 December 1995.

Further particulars can be obtained from Dr Darch by telephoning 01603 592994, on E-mail, J.Darch@uea.ac.uk or by viewing the vacancies section on our web home page at: http://www.uea.ac.uk/menu/acad_depts/env/all/default.html

UEA is committed to excellence in education and research and to equality of opportunity for all.

UNIVERSITY OF ABERDEEN

MSc in Chemistry
with specialisation in MATERIALS incorporating a placement in either INDUSTRY or a CONTINENTAL UNIVERSITY

Improve your job prospects! If you have a science / engineering background at good Honours degree level, this conversion course in Materials Chemistry could be for you.

Details: one year, full-time; start dates either January 1996 or September 1996. Grants may be available for UK citizens under 25. Course specialisations include: ceramics, polymers, glass, cements, liquid crystals.

Further details: Professor Tony West, University of Aberdeen, Department of Chemistry, Aberdeen AB9 2UE. Tel: 01224 272918.
NERC / NRA
Post-Doctoral Fellowship
Institute of Freshwater Ecology, Wareham

Applications are invited for the post of Research Fellow under the supervision of the Institute of Freshwater Ecology and IACR-LARS Centre for Aquatic Plant Management. The post, which is for a period of three years, will be based at the IFE River Laboratory and will address the Role of Bankside Habitat in River Ecology with special reference to chalk streams. The work will form part of a more generalised study of river habitats and will draw on the Laboratory's extensive experience of the chalk stream ecosystem.

The applicant should have wide ecological interests and be a self-motivated, organised individual; capable of the planning and execution of a holistic study of this under-researched river ecotone. Support will be available from IFE and CAPM staff and especially recruited student assistance, and the NRA will provide additional support and background information. The innovation required demands an integration of data from a number of sources to develop a full and basic understanding of the role of the riverbank in the functioning of the river and its interactions with stream management and riparian land-use.

Further details and application forms are available from the Deputy Director - Regions, Institute of Freshwater Ecology, River Laboratory, East Stoke, Wareham, Dorset BH20 6BB. The closing date for receipt of applications is 4th January 1996.

The Institute of Freshwater Ecology is a component body of the Natural Environment Research Council. The Council has an equal opportunities policy and welcomes applications from all sections of the community.

NRA
Natural Environment Research Council
TECHNICIAN

Required for a period of five years to join an active group of researchers studying protein structure and function.

Duties will include growth of bacterial cultures, and large-scale protein purification using HPLC and other chromatographic techniques. A particular interest is protein crystallisation, and training will be given in this area. Applicants should hold a BTEC Certificate/ Diploma or equivalent and have more than three years' laboratory experience. Graduates in Biochemistry/Chemistry are also invited to apply.

Salary Grade C: £10,138 to £11,368 per annum.

For application forms and further particulars, please contact Mrs M. Tummala, Department of Biochemistry & Molecular Biology, The University of Leeds, Leeds LS2 9JT, on Leeds 233 3022. Closing date for completed applications: 13 December 1995. The University of Leeds promotes excellence in teaching, learning and research.
DEPUTY/ASSISTANT NEWS EDITOR
Equal opportunities.
Equal prospects.

New Scientist is looking for a dynamic editor with a reputation for science writing/editing and the ability to help manage a lively newsroom. Salary, title and responsibility dependent on experience.

Write to the Editor, New Scientist, IPC Magazines, King's Reach Tower, Stamford Street, London SE1 9L5 by 19 December.

New Scientist
COURSES & EVENTS

The Queen's University of Belfast
School of Geosciences

Lectureship in Archaeology

Queen's University is pleased to announce a new and attractive post, tenable from 1 February 1996 or such other date as may be agreed, to strengthen research in archaeology; establish and oversee an archaeological field unit capable of bidding for contracts in areas such as archaeological excavation, archaeological building or underwater survey, and to teach within a proposed new MSc programme in Archaeological Field Studies.

Applicants must have an honours degree or equivalent in archaeology or related area, evidence of relevant postgraduate research experience/field archaeology experience and have relevant publications/reports. Managerial experience, experience in bidding for excavation and field work contracts, research interests in the archaeology of Ireland and in problems of more than one period of archaeology, experience in the main geophysical surveying techniques used in field archaeology, four RAE countable research publications, teaching experience at further/higher education level, a 2.1 honours degree or equivalent in archaeology or other related area and a Ph.D. or equivalent recognised qualification in a relevant area are desirable. A clean current driving licence and a willingness to direct field excavations and projects relevant to student training are essential.

Informal enquiries to Professor B. Whalley, School of Geosciences, telephone 01232 335146, or email b.whalley@qub.ac.uk.

Salary scale Grade A: £15,154 to £19,838 with eligibility for USS. Assistance with relocation as appropriate.

Further particulars are available from the Director of Human Resources, The Queen's University of Belfast, BT7 1NN, Northern Ireland, telephone 01232 245133, ext 3044/3246 or fax 01232 324944/310629. Closing date: 21 December 1995.

The University is a charity, established in 1845 to advance education. Committed to an Equal Opportunities policy and selection on merit, it welcomes applications from all sections of the community. Under its affirmative action programme, it particularly welcomes applications from women for academic posts.
ROYAL FREE HOSPITAL SCHOOL OF MEDICINE
and Institute of Child Health (University of London)

Postdoctoral Research Fellow

Applications are invited for this postdoctoral research fellow position, funded for 30 months by a joint MRC award between the two departments. The successful applicant will join a collaborative group in the two institutes working on aspects of liver metabolism in ischaemia and storage as it relates to transplantation. The study will involve biochemical and molecular techniques, and will also utilise the NME facilities at the Institute of Child Health. An interest in metabolic studies and/or NMR spectroscopy is preferable, and the appointed person will be encouraged to develop independent ideas alongside others in the group working on clinical and experimental hepatic transplantation.

The starting salary will be commensurate with experience on the scale 1A up to £16,628 per annum plus £2,134 London Weighting.

Job details available from the School Office, RFHSM, Rowland Hill Street, London NW3 2PP, telephone 0171794 0500, ext 4262. Applicants should send four copies of their CV (please include four copies of any covering letter), together with full details of two referees, to the above address by 2 January 1996. Please quote reference number SUR/PRF/161.

HISTOPATHOLOGY BMS 2
£24,049 - £29,701 inc.
Applications are invited from experienced biomedical scientists for two BMS2 posts to be part of a highly professional team in this busy department which main base is at Fulham Palace Rd W6. The department provides the diagnostic service to Hammersmith Hospitals NHS Trust, Chelsea & Westminster Healthcare Trust plus a service to local GPs and the Ravenscourt Park Hospital. The Division is committed to continuing professional development, has just been awarded the investors in people charter and there is a very active in-house training centre.

BMS2
This is an exciting opportunity for state registered Histopathology biomedical scientists to develop their skills and progress their career through further education.
One BMS2 post is for the routine surgical laboratory and the second post is to support the histological work from the Kennedy Institute.
The successful candidates will be enthusiastic, flexible and fully conversant with modern histological techniques. Candidates should have at least 1 years post State Registration experience and preferably hold FIBMS or equivalent. Keyboard and computer skills would be a definite advantage. The West London Pathology Federation is currently developing a new IT system for use in West London.
For an informal discussion or visit contact David Neale on 020 8846 7140 or Keith Stephens on 020 8846 7131.
For an application pack please call our recruitment line on 0870 770 2363 quoting reference number P/313.
Or you can apply on line at www.healthjobfinder.com
Closing date for applications is Friday 28th January.

Vascular Scientists
Job Ref: B/HS/133
Salary: £15,580 - £23,997 p.a. (Dependant on experience) Hours: f/t - 37.5 p.w.

We require enthusiastic, flexible individuals willing to join a busy friendly team of Vascular Scientists to work in the Vascular Studies Unit within the Nuffield Department of Surgery. The Vascular Studies Unit provides diagnostic and monitoring services for all peripheral arterial and venous diseases, arterial graft surveillance, carotid, vertebral and abdominal studies using non-invasive investigations, predominantly colour Duplex sonography.

Experienced scientists preferred but we are willing to provide training to someone wishing to enter this ultrasound field.

Applicants would be expected to work independently at times and also share training responsibilities. The successful candidates must hold a BSc or equivalent biological/physics qualification. AVS would be preferred.

For more information please contact Jackie Walton on 01865 220041.

Closing Date: 21 January 2005.

Write the users' manual
By 2012, the British Antarctic Survey aspires to become the leading international centre for global science in the Antarctic context.
When it comes to developing and maintaining a sustainable future, understanding the Earth System is essential - and the Antarctic is a key element of that system.
Using the unique research opportunities provided by this continent and surrounding seas, our new five-year science programme will represent a major step forward, building knowledge of fundamental environmental science issues and the functioning of the Earth as a whole.
The programme, Global Science in the Antarctic Context, focuses on important science problems and uses integrated inter-disciplinary research, monitoring and survey. The science and data will provide critical input for national and international policy makers.
Over the coming year, we will be recruiting Physicists, Engineers, Modellers, Geophysicians, Biologists, Sedimentologists, Meteorologists, Palaeontologists, Oceanographers, Chemists, Data Analysts, Glaciologists and Technicians-to name but a few.
We will begin advertising in January.
For further information, visit www.antarctica.ac.uk
We welcome applications from all sections of the community. People from ethnic minorities are currently under-represented and their applications are particularly welcome.

Met Office

**Intellectual Property Rights (IPR) Manager**
£24,480 - £36,720 (The standard rate of pay for new entrants is the relevant pay range minimum)
Permanent post at Met Office Exeter

An internationally renowned centre of excellence, we provide a wide range of meteorological and environmental services to customers throughout the world. Right now we're looking for an experienced individual to take ownership of all our intellectual property rights (IPR) activities, which include copyright, trademarks, designs and patents. These copyright and licensing issues can be complex because copyright results from generation of data, information and products, often including data, software, etc. that are being used under licences, including licences from other countries. You will draft our policy for the exploitation and protection of Intellectual Property. The current policy is to ensure that all IP generated within the Met Office is assessed and suitably exploited to generate maximum benefit. This IP will receive protection commensurate with its potential value to the Met Office and our stakeholders.

It's a wide-ranging role with responsibilities that include answering a range of internal and external copyright issues; owning the process for copyright, patent and trademark infringement actions; managing trademark registration; and managing relevant contracts and licences.

**Person Specification - Essential:**
- Experience in managing intellectual property or a very strong interest in IP
- Certificate in IP or a good science or law degree
- Able to quickly understand complex issues and recommend ways forward
- Experience in reviewing detailed statements and identifying relevant points
- Able to interface with staff at all levels
- Able to challenge statements and discuss options constructively
- Able to work on your own
- Excellent communication skills
- Meticulous record keeping skills.

**Person Specification - Desirable:**
- Experience in discussing intellectual property (including licences) with customers and colleagues
- Used to dealing with contractual and legal issues
- Experience of managing cost-effective processes
- Experience of managing processes to identify ideas that may be patented
- Have knowledge of competition law and be able to apply it.

The Met Office offers a choice of final salary and stakeholder pensions. Career prospects for non-UK nationals may be limited. Staff have a mobility commitment. The Met Office is an equal opportunities employer.

For an application form and further information please contact Capita RAS, Innovation Court, New Street, Basingstoke, Hampshire RG21 7JB. Tel: 08700 435066 (24 hours). Please quote reference B7819. The closing date for applications is 28th January 2005.

Computer Biologist
£19,000 - £26,000 dependent on experience

The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems. We are looking to appoint a Computer Biologist within the glovar team. Glovar (www.glovar.org) is a project centred around showing sequence variation (SNPs) in genomic context. You will be educated to degree level and have at least 3 years experience of programming in a UNIX/LINUX environment.

A strong background in Perl programming is essential and a working knowledge of relational database systems would be advantageous. An interest or understanding of biological concepts is also desirable. The role will involve close collaboration with systems and DBA as well as direct interaction with laboratory scientists and managers. Strong communication skills are therefore essential and you should be able to work independently or as part of a team.

This is an exciting opportunity to join a growing team central to a fast moving organisation at the forefront of science and technology.

Informal enquiries should be sent to mng@sanger.ac.uk

Benefits include 25 days annual leave, generous noncontributory pension scheme, optional private healthcare (on successful completion of probation period), PDI, life assurance, childcare voucher scheme, on-site restaurant and café, on site gym and an active sports and social scene.

To apply for this position please email your CV (including 2 referees) and current salary details, Quoting reference NS890 to: humanresources@sanger.ac.uk

Or post your application to: Human Resources Department, The Wellcome Trust Sanger Institute, Genome Campus, Hinxton, Cambridge, CB10 1SA

The closing date for applications is 28th January 2005

[2481-005 (2005) : 54]
STAY
It's perfectly OK to remain where you are.
You'll still have scope.
You'll still have job satisfaction.
You'll still have resources.
You'll still have prospects.

Just not as much or as many.

FETCH
It’s far more exciting to seize opportunities when they come along. Especially opportunities like these.
For a start, you’ll be joining the largest R&D business in the world – with the largest animal health R&D investment and a strong pipeline.
Then there’s the relative size of our Sandwich Veterinary Medicine R&D group – 160 people. That means you’ll be highly visible, able to make an impact and crucial to the drug discovery process.
What’s more our collaborative culture – chemists and biologists work together on a wide range of therapeutic areas – gives you exposure to huge scope and variety, across companion, livestock and laboratory species.
And let’s not forget our location on England’s scenic south coast – where the quality of life lives up to the quality of the science.
When you add it all up, it makes staying put seem like standing still.

R&D Headquarters - Sandwich, Kent

In Vivo Biologist
You'll run physiological/pharmacokinetic in vivo studies in both livestock, companion and laboratory animals, interpreting the data to analyse the efficacy and safety of drug candidates. A Biologist with three years' practical experience, ideally in in vivo studies in a similar business, you must also be technically versatile, influential and able to gain a personal Home Office licence.
A veterinary degree would be an advantage. REF: 039697

Veterinary Pharmacologist
To take responsibility for operational planning, protocol construction and data management, you'll need solid research experience with in vivo animal models. Rather than bench work, you'll focus on assessing contracts and the suitability of CROs to partner Pfizer, so it's important that you can travel widely within Europe and have the confidence to demand high standards from external bodies. A first degree in veterinary medicine is a must and a PhD would be helpful.
REF: 040403

Molecular Biologist
Building on three or more years' post-doctoral experience, you'll contribute to the direction of all aspects of our in vitro research. As you'll be primarily lab-based and part of a small dedicated team, practical and interpersonal skills are vital. Also essential are experience of industry and a good working knowledge of bioinformatics. A veterinary degree would be an advantage.
REF: 039855

Pfizer
Go out and get the kind of role you deserve.
Find out more and apply online at www.pfizer.co.uk
Please quote the appropriate requisition number.
Closing date: 28 January 2005.

FOOD STANDARDS AGENCY
Research Co-ordinator Post
Every year the Agency carries out or commissions extensive scientific research and survey work to ensure that our advice to the public is based on up to date nutrition science.
As a result we are looking for a Research Co-ordinator to assist us in developing and maintaining our food acceptability and choice (Programme N09) and food choice inequalities (Programme N14) research portfolios. For further details on these programmes go to: www.food.gov.uk/science/research/researchinfo/nutritionresearch
The work will involve liaising closely with researchers and Agency staff to ensure the smooth running of research projects, as well as critically reviewing projects and project proposals.
The Co-ordinator will procure advice to identify new research needs and contribute to project formulation and development to ensure that Agency research addresses policy needs. You will be required to maintain a watching brief on related international research activity.
For more details go to:
www.food.gov.uk/science/research/researchfunding/rrd/adhoccalls/currentadhoc
To obtain an application pack contact: Tamara Beckett, Nutrition Division, Food Standards Agency, Room 808C, Aviation House, 125 Kingsway, London WC2B 6NH.
Tel: 020 7276 8936. Email: tamara.beckett@foodstandards.gsi.gov.uk
Closing date for applications is 18th February 2005.
The Food Standards Agency - putting the consumer first.

The Academy of Medical Sciences
FORUM MANAGER Circa £30K

The Academy of Medical Sciences was founded in 1998 to promote medical science across traditional disciplinary boundaries and brings together doctors and scientists from across the academic spectrum. In order to expand the breadth of Academy interests, The Forum was established in 2003 to promote interaction between biomedical scientists in academia and industry.

This exciting new post will provide leadership and direction to the development of the Forum and work with the Advisory Board to develop and implement a forward-thinking strategy. The post holder will play a key role in expanding the membership, initiating and drawing up policy documents, developing a comprehensive communications strategy and raising the profile of the Forum.

The successful applicant will be educated to postgraduate degree level in the life sciences, will be a confident, strategic thinker with excellent analytical skills, and proven communication skills. General knowledge of the higher education or health care sectors of the UK together with 3-5 years experience in a related role is desirable. A sound understanding of industry is essential. The salary is negotiable depending on experience.

Further information and an application form are available on the Academy web site: www.acmedsci.ac.uk or may be obtained from the Academy office by sending an email to apollo@acmedsci.ac.uk

The closing date for receipt of applications is Friday 28 January 2005.

[2481-008 (2005) : 56]
Research Assistant
£22,143 - £25,901 + London Weighting according to experience
We are looking for an enthusiastic, self-motivated Research Assistant to join our Breast Cancer Translational Research Team. You will have at least two years' excellent practical experience in molecular techniques, particularly RNA extraction. A PhD is desirable but not essential. The work will be conducted in our multi-disciplinary, well-equipped research laboratory, which accommodates 15 technical, scientific and clinical staff involved in clinical research of the hormonal aspects of breast cancer.

The post will initially be for one year.
For further information on the position, please contact Janine Salter 020 7808 2884.
For an application pack, please contact the Human Resources Recruitment Bureau on 020 8643 5846 (24 hour answerphone) or visit our website to apply on-line. Please quote Ref: 379.

Syngenta is the leader in crop protection and the third largest seeds business worldwide. We are a young company for the 21st century, yet we have years of innovation behind us. This is your chance to join a team of more than 19,000 people in 90 countries, all of whom are committed to helping farmers feed the world today and tomorrow.

Where scientific teamwork delivers solutions
Metabolism/Residue Experimentalist - Environmental Safety Jealott's Hill, Berkshire - £ Excellent & benefits

Our first-class environmental safety section is situated in excellent facilities at the heart of our Jealott's Hill International Research Centre - a global centre for scientific expertise. Establishing the safety of our crop protection products in the environment, we sit at the interface of a number of different scientific disciplines and offer a stimulating setting in which to progress a specialist career. We now have an opportunity available for an individual wishing to join us in these exciting activities.

Working as part of a laboratory based team you will specialise in carrying out varied and challenging studies to measure the trace levels of our products and their metabolites in soil and water. You may already have several years of relevant experience either in trace chemical analysis or in the study of chemical breakdown using radioisotopes. Alternatively, you will be a graduate seeking to begin your career in industry.

You will enjoy solving technical problems as well as interpreting data and communicating your results. Join us at Syngenta and you will be working with leading-edge technology in excellent facilities, while our total commitment to training means you will never stop learning. In addition to an attractive salary, you can access a company pension scheme and a flexible benefits package that includes a generous holiday allowance and healthcare provision. We also provide recreational sports facilities and a subsidised restaurant.

To apply, please send a full CV, quoting ref JHEF1, to: Human Resources, Syngenta, Jealott's Hill International Research Centre, Bracknell, Berkshire RG42 6EY. Email: uk.recruitment@syngenta.com

[2481-014 (2005) : 57]
Senior Vibration Specialist/Ergonomist
£30,000
Buxton, Derbyshire

The Health and Safety Laboratory (HSL) is an international centre of excellence in solving problems of health and safety at work. We employ a wide range of technical specialists from diverse backgrounds and Human Factors is of growing importance to our work, which is carried out for the Health and Safety Executive and other clients.

Whole-Body Vibration is a good example of a health and safety problem that cannot be effectively tackled without Human Factors expertise. Our well-established Noise and Vibration team are seeking an Ergonomist, or a Vibration Specialist with human factors expertise, to extend their capabilities in this area and to develop new work building on an integrated Engineering/Human Factors approach.

For this key strategic post you will need:
• A good honours degree in a relevant subject, e.g. Ergonomics or Acoustics, with at least four years' relevant post graduate experience.
• A keen interest in human factors in vibration exposure and vibration reduction.
• Proven ability to win business by developing successful proposals or partnerships and experience of negotiating with clients.
• Good interpersonal and team working skills, to meet the managerial/leadership challenge of working in a team undergoing change.

This post will involve leading a demanding portfolio of work, directing the work of others, designing research methodology, presenting outcomes and developing proposals for new work. The job will give you managerial experience, business development experience and the opportunity to act in representational roles. For those with eligible qualifications we are able to offer the opportunity to work towards Professional Registration. Our staff benefit from an excellent final salary pension scheme or a stakeholder pension with an employer contribution.

Location: HSL has recently moved to a new purpose built laboratory close to Buxton in the High Peak district of Derbyshire. Surrounded by the Peak District National Park and yet within daily commuting distance of several major towns and cities, our location is ideal for both urban and rural living.

For an application pack (quoting reference EX192) please contact Emma Gillis-Wakelin, Health and Safety Laboratory, Harpur Hill, Buxton, Derbyshire SK1 7 9JN, Tel: 01298 218622, email: emma.gillis-wakelin@hsl.gov.uk or visit our website.

Closing date: 13 February 2005.

ACCOVION
Medical Writer based near Frankfurt am Main

Accovion (formerly Covidence) GmbH is a leading European research organization formed from the international clinical development, biostatistics, data management and pharmacovigilance departments of Aventis Pharma Germany. Now numbering more than 200 staff, Accovion provides comprehensive drug development services to the research-based pharmaceutical and biotechnology industries. We employ some of the most skilled and experienced professionals to be found anywhere in the industry, and we offer a creative scientific and international environment that will allow you to develop your own skills. Our headquarters are conveniently situated in Eschborn on the outskirts of Frankfurt, and we have additional locations elsewhere in Germany, France and the USA.

The Medical Writing department is a key function within Accovion, with highly experienced medical writers involved in all aspects of clinical and regulatory documentation, closely interacting with colleagues at all levels. We offer training and mentoring programmes to new staff, and are now further expanding the group to meet the increasing demand for quality medical writing services from our clients. Projects include editing and writing (in English) of investigator brochures, clinical study protocols, reports, summaries, and manuscripts for publication. Senior writers also undertake co-ordination and planning of submission documentation, and other senior medical communication roles.

Applicants must be native English speakers and have the ability to express medical data accurately and concisely. They must have flawless English-language skills and will ideally have a background in life sciences including research experience and publications. Preference will be given to candidates with experience of medical writing within the pharmaceutical industry. A sound basis in German would be a considerable advantage, as would good word-processing skills. You will receive a competitive salary, bonus and benefits package to suit your qualifications.

To apply, please send your curriculum vitae including the names of two references, and two samples of your written work, to:
Gabriela Pawlak-Kuhlmann, Human Resources, Accovion GmbH, Helfmann-Park 2, 65760 Eschborn, Germany
Tel.: +49 6196 7709-466, Fax +49 6196 7709-110

Further information can be found on our website at http://www.accovion.com

Genzyme European R&D
Group Leader, Cambridge, UK
Generous salary & comprehensive benefits

Genzyme Corporation, one of the most successful biotechnology companies in the world, established their first R&D facility outside of the US in Cambridge, in 2004. Dedicated to the development of new and next-generation therapies, scientists are focusing on human antibody technology and its applications in oncology, renal and immune-mediated diseases.

We have an exciting opportunity for a dynamic research-focused cell/molecular biologist, to manage and develop a team of biologists in the characterisation of single chain antibodies and Fabs.

You must have a proven track record in biological research and will have a minimum of 10 years' post doctoral experience, at least half of which gained in a commercial setting where you have also been a successful line manager.

You will be an expert in the generation, expression and characterisation of human monoclonal and single chain antibodies. You should have broad experience in biological techniques including several of the following: PCR, sub-cloning, DNA sequencing, FPLC, SDS PAGE, ELISA, CDC, ADCC assays and Western analysis.

To apply, send your CV and cover letter, stating your current salary, to Malcolm Brookman ideally by e-mail at the address below quoting Ref: Genzyme. Candidates should be available for interview in January 2005.

Targeting cancer
MANUFACTURING CO-ORDINATOR
West London
£ Very Attractive Salaries + Good Benefits
Antisoma is an established and well-funded biopharmaceutical company focused on the development of novel cancer targeting products (antibodies and small molecules).
Liaising closely with our Manufacturing Managers, you will help to co ordinate the outsourcing of production of new products for clinical trials. Antisoma operates a project management system, and you will be required to work extensively across all appropriate disciplines in house to help the team achieve the required project objectives. There will also be a need to liaise with external contractors across Europe and the US.
This will involve the development and control of manufacturing project documentation, and meeting minutes, ensuring all is produced in a timely, efficient manner. You will also collect and trend key process data, implement GMP compliance procedures and organise and control key documents.
Helping to establish common project manufacturing systems, you will manage the distribution of information, including cashflows and budgets, be involved in inventory management, arrange the shipping and tracking of products and samples as well as proactively identify and highlight manufacturing issues.
A graduate or equivalent in chemistry, biochemistry or a related subject, you will preferably have practical experience of GMP manufacturing, although applicants with a directly relevant qualification will be considered. An enthusiastic team player, with good all round communication and organisation skills, you will have the personality to get on with people at all levels as well as the flexibility to travel, which may involve visits abroad.
Please send your CV, including a covering letter, to: Rosalind Chelliah,
Antisoma Research Limited, West Africa House, Hanger Lane, Ealing, London W5 3QR.
E-mail: rosalind.chelliah@antisoma.com
We thank all candidates in advance for their interest and would appreciate all responses by our closing date of Monday 24th January 2005.

GENERAL SECRETARY
International Council for the Exploration of the Sea

The International Council for the Exploration of the Sea (ICES) seeks an experienced leader, with scientific work experience and/or education appropriate to head this prestigious intergovernmental marine science organisation.

ICES, the world's oldest intergovernmental scientific organisation, promotes and co-ordinates marine research pertaining to living resources and their environment, publishes the results of this research, and provides scientific information and advice for the management of fisheries and the marine environment. The Council currently has 19 Member Countries bordering the North Atlantic and adjacent seas, and six Affiliate Members, mostly from the Southern Hemisphere. Approximately 1500 scientists from around the world participate in ICES activities. Information about ICES is available at http://www.ices.dk.

The General Secretary is the Council's Chief Executive Officer and is responsible for managing the Secretariat, currently numbering 38 staff members, in providing services for the implementation of the Council's programme of work.

The post, which will become vacant on or about 5 January 2006, is based at the Council's headquarters in Copenhagen, Denmark. Pay and conditions are similar to UN scales.

If you think you might be the person we need, possessing leadership ability as a forward-looking strategic thinker and with successful administrative/managerial experience with a scientific organization (preferably one concerned with marine science), please read the detailed vacancy announcement at http://www.ices.dk/aboutus/advert-sec-gen.htm

Applications must be submitted by Friday 1 April 2005.

[2481-028 (2005) : 61]
The Complementary Therapies Clinical Studies Development Group was established in September 2004. Its remit is to develop high quality research studies in complementary therapies in cancer. The Group is seeking to appoint a Research Development Coordinator to take a key role in advising and actively supporting the Group in rapidly developing a portfolio of clinical studies. This will include overseeing the portfolio of existing studies, considering new research questions, developing proposals and securing funding. For further information visit http://www.ncrn.org.uklcsg/index.htm

If you are educated to degree level or above, have a science background, a strong interest in the area of complementary therapies and cancer, several years experience in research, clinical trials or complementary therapies and experience of writing research protocols and preparing grant applications then this could be the job for you. Excellent organisational, interpersonal and presentational skills, together with flexibility and enthusiasm, are essential attributes of the successful candidate. Experience in developing and running randomised control trials, although not essential, is highly desirable. So too is a postgraduate research qualification.

If you are interested in this rare and exciting opportunity, please submit your CV and a covering letter explaining how you match the experience and skills required, to Resourcing, Cancer Research UK, PO Box 123, Lincoln's Inn Fields, London, WC2A 3PX or email: recruitment@cancer.org.uk quoting reference NS8892.

Closing date: 27th January 2005, 5 pm.

Interviews will take place on 9th February 2005. This is a fixed-term three-year contract in the first instance, and will be based in Central London.

For a full job description, please visit www.cancerresearchuk.org/aboutus/ and click on jobs. Please contact Dr Eileen Loucaides, Senior Executive, on 020 70618585 if you have any queries.

Looking for real quality?
We have the answer.
Scientific excellence has established Cambridge Antibody Technology as a world leader in the rapid generation and isolation of therapeutic human monoclonal antibodies and its remarkable success provides the platform for a very exciting future.

QA Scientist
We require a scientist to join our QA team, which is responsible for ensuring regulatory compliance both internally and at our contractor sites. The role includes liaising with internal client groups to manage the life cycle of a range of GMP, GLP and GCP documents, providing an effective archiving service and contributing to the development of our quality systems.
A qualification in pharmacy or a life science together with a sound knowledge of Word and Excel, good communication skills and attention to detail are required. Experience of pharmaceutical manufacturing or quality assurance would be an advantage, however full training will be provided.
To apply, please send your CV and covering letter to Human Resources Department, Cambridge Antibody Technology, Milstein Building, Granta Park, Cambridge CB1 6GH or e-mail human.resources@cambridgeantibody.com. Please include details of your current salary.

Cambridge Antibody Technology
[2481-030 (2005) : 62]
Molecular Biologist
(Initially as Project Scientist for the EU project AQUAFIRST)
Plymouth Marine Laboratory

Salary on appointment £23,590 pa • Plymouth, Devon

The Plymouth Marine Laboratory (PML) is an international centre of excellence for interdisciplinary science and technology. You are invited to apply for a new post, offering a highly motivated molecular scientist the exciting opportunity to work with us on leading-edge and globally important research.

We are looking for an innovative molecular scientist to join our core research team. Initially you will work on the European Commission project AQUAFIRST, on combined genetic and functional genomic approaches for stress and disease resistance in fish and shellfish. This will involve analyses of single nucleotide polymorphisms, including microarrays and quantitative PCR for gene expression profiles.

Overseas travel to workshops and short periods at sea will be required. Facilities include a dynamic new molecular biology suite, with collaborative access to other European molecular centres.

You are required to have a minimum of three years research experience; with an excellent track record of employing molecular biological techniques. Experience in protein chemistry and/or the use of small interfering RNA would be an advantage. A PhD or equivalent experience level would be desirable, together with a publication history. The appointment is for a full time permanent position.

For additional information and an application form, write to Miss J Weeks, Human Resources Department, Plymouth Marine Laboratory, Prospect Place, Plymouth, PL1 3DH.

Tel: (01752) 633 100. Fax (01752) 633 101. Email: vacancies@mail.pml.ac.uk

The application deadline is 1300hrs on Monday 31st January 2005 and the interviews will be held in mid to late February 2005 for a start in April 2005.

Candidates who have not been contacted by 21st February 2005 may assume that they have not been successful on this occasion.

The PML is a charitable research organisation and as such operates an equal opportunities policy and welcomes applicants from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome. We operate a Guaranteed Interview Scheme for disabled candidates who hold the minimum qualifications for the post.

Scottish Environment Protection Agency

RADIOACTIVE SUBSTANCES SPECIALISTS

Recent developments in the nuclear industry have resulted in the rapid expansion of SEPA's Radioactive Substances Policy Unit and Radioactive Substances Field Operations Group. As a result of this expansion, seven positions have been created.

Radioactive Substances Policy Unit

The Radioactive Substances Policy Unit works across a broad spectrum of areas relating to SEPA's policy on the regulation of radioactive substances. Two permanent positions and two fixed-term positions have been created to address developments in a number of these areas. The first of the permanent posts will co-ordinate fulfilment of SEPA's new duties arising from the formation of the Nuclear Decommissioning Authority (NDA). The second permanent post will focus on development of SEPA's policy for radioactively contaminated land and nuclear emergency planning. The two fixed-term posts will liaise with NIREX, the Health & Safety Executive and the Environment Agency in the development of improved regulatory arrangements for the management of intermediate level radioactive waste.

Specialist I (4 posts)
£30,546 - £44,609 dependent on skills and experience
Corporate Office, Stirling
Ref: OPRS2724 - Permanent
Ref: OPRS2725 - Fixed Term to March 2006
Ref: OPRS2726 - Fixed Term to March 2006
Ref: OPRS2727 - Permanent

Detailed job summaries for all four of these posts can be found in the vacancies section of SEPA's website, www.sepa.org.uk

For all four posts, a degree or equivalent in a relevant discipline and at least 5 years' industrial, research or regulatory experience relevant to environmental regulation and/or decommissioning in the nuclear industry are essential. Knowledge of legislation relevant to the nuclear industry and to the management and disposal of radioactive waste and project management and/or supervisory experience is desirable as is corporate membership of an appropriate professional body. In addition to possessing good IT skills, you must be able to influence representatives of industry and have excellent communication skills with both internal and external partners.

Radioactive Substances Field Operations Group

The primary function of the Radioactive Substances Field Operations Group is to regulate the keeping and use of radioactive material and the accumulation and disposal of radioactive waste.

Specialist II (1 post)
£25,698 - £32,360 dependent on skills and experience
Central Belt, Dingwall or Aberdeen (to be agreed with successful applicant)
Ref: OPRS2721 - Permanent

Your duties will include:

- Undertaking the regulation and enforcement of legislation controlling the use/keeping of radioactive substances and the accumulation and disposal of radioactive wastes.
- Assisting in the regulation of nuclear facilities and in particular to undertake assessments of site plans prepared to support the decommissioning programs of the NDA.
- Supporting regulation of NDA designated sites by assessing site work plans against SEPA's environmental priorities.

Inspecting sites, premises etc, and assessing the level of compliance with statutory requirements and licence conditions and initiate enforcement action where necessary.

Investigating complex complaints or reports of pollution incidents, taking appropriate action and preparing relevant reports; actioning these complaints and dealing with the public.

A degree or equivalent in a relevant discipline, such as natural sciences or engineering, is essential whilst corporate membership of a relevant professional body is desirable. You will have 5 or more years' experience (post-qualification) of the regulation relevant to radioactive substances preferably coupled with project management experience. You will be an excellent communicator, both written and oral, with the ability to present and communicate often complex data to external parties.
Specialist I (2 posts)
£30,546 - £44,609 dependent on skills and experience Central Belt, Dingwall or Aberdeen (to be agreed with successful applicant)
Ref : OPRS2722 - Permanent
Ref: OPRS2723 - Permanent

You will undertake the regulation of and enforce the legislation controlling the use of radioactive substances and the accumulation and disposal of radioactive waste. Within this role you will:
Provide specialist and technical expertise management to ensure common standards in the management of radioactive wastes at nuclear sites and, if required, at non-nuclear sites.
Control/license radioactive substances.
Scrutinise and assess applications for authorisations to discharge radioactive wastes and examine operator BAT or BPM cases, ensuring consistency with other regulated sectors.
Inspect sites, promises etc, and assess the level of compliance with statutory requirements and licence conditions.
Contribute to policy and technical guidance, quality procedures and templates development to ensure consistency with other environmental regulatory regimes.
Investigate complex complaints or reports of pollution incidents, taking appropriate action and preparing relevant reports; actioning these complaints and dealing with the public.
Contribute as requested to the drafting of media and other written responses to enquiries associated with radioactive substances.

An appropriate degree, or equivalent, in a science or engineering based discipline is essential coupled with at least 5 years' processes/industry or other experience relevant to environmental strategies and waste management. Knowledge of legislation relevant to IPC/IPPC or the regulation of radioactive waste disposal and/or other relevant experience is also essential as is experience with the application of BAT and BPM to industrial processes. Project management, expertise and good written and oral communication and negotiation skills, with both internal and external partners are essential.
Membership of a relevant professional body and a full driving licence are desirable.
Whilst experience in the nuclear industry is desirable it is not essential for all vacancies. If you can bring relevant skills and experience to the complex issues that SEPA faces we can, in return, offer you development opportunities to learn the aspects of the work that are specific to radioactive substances.
Although the vacancies offered have no formal management responsibility, some of the positions offered in the Radioactive Substances Policy Unit may have responsibility for the supervision of others in the Unit.

The closing date for all posts is 20th January 2005 at 12 noon.
Interviews are likely to be held during week commencing 14th February 2005.
For an application form, please call 01786 452555 or email recruitment@sepa.org.uk
Send your SEPA application form to Recruitment, SEPA Corporate Office, Erskine Court, Castle Business Park, Stirling FK9 4TR. Applicants must quote the appropriate job reference numbers.
Applicants wishing to apply for more than one position should cite reasons for applying for each position in Section 4 of the SEPA application form and reference all positions being applied for on the front page of the form. CVs will not be included as part of the application process.
Details can also be found in the vacancy section on our website, www.sepa.org.uk
[2481-033 (2005) : 63]
Clinical Scientist (Nuclear Medicine)

• £31,514 - £38,340 (Clinical Scientist Grade B17-22)
• 35 hours per week
• Ref:192-CS-1201

There is an opportunity for a qualified Medical Physicist to join a team of Clinical Scientists and Technologists in providing a high quality service and participating in leading-edge development projects. You are required to co-ordinate and perform medical physics duties in support of nuclear medicine at the Trusts three hospitals. The successful candidate will lead the development and implementation of the radionuclide therapy, Imaging and non-imaging programmes for Nuclear Medicine. You will be expected to take part in teaching and training of physicists, technologists and trainees.

The successful candidate will be a member of the Radiation Protection group run within the Department of Medical Physics. You will be expected to contribute to the leading-edge R&D projects in the section and also be an active participant in the Department's Research program. You will be actively involved in commissioning of new gamma cameras, PET system for the Nuclear medicine service at the new site. Candidates should have an MSc or PhD in medical physics or a related field. You should hold state registration, have at least six years' experience in nuclear medicine physics and have attained, or be eligible for, corporate membership of the IPEM. Research experience in the fields of nuclear medicine and medical physics; experience with the SunOs and Solaris operating system and experience in software development would be advantageous.

For informal enquiries and/or to arrange a visit, please contact Dr Michael Masoomi, Head of Nuclear Medicine Physics, tel: 023 9258 4255, ext: 2705 or 023 9228 6000, ext: 3463 or email: michael.masoomi2@porthosp.nhs.uk

Closing date: 27th January 2005.

Medical Technical Officer (MTO2)/Healthcare Scientist

• £15,069 - £19,069
• Ref:192-CS-1202

Joining our Medical Physics Service within the Radiological Sciences Group, you'll be both conscientious and technically capable. Our team provides scientific and technical services and your responsibilities will include safety and performance testing of medical X-ray equipment, measurement of radiation doses, technical support, record keeping and ensuring equipment is calibrated and fit for purpose. The majority of the work involves the use of computers. You'll need a minimum of BTEC/A level in a Physical Science, or BSc or equivalent qualifications. Full training will be provided. The work involves some travel to locations outside Portsmouth, so your own transport would be an advantage.

For informal enquiries and/or to arrange a visit, please contact Anne Davis, Acting Head of Radiological Sciences, tel: 023 9228 6000, ext: 2198, or email: recruitment@porthosp.nhs.uk

Closing date: 20th January 2005.

To apply, please go to www.jobs.nhs.uk and type the relevant reference into the quick search. Alternatively, you can telephone our 24-hour answerphone for an application pack quoting the reference on 023 9228 6203 or email: recruitment@porthosp.nhs.uk

Scottish Natural Heritage

SCIENTIFIC ADVISORY COMMITTEE MEMBERS

SNH is a government body established by the Natural Heritage (Scotland) Act 1991 and responsible to Scottish Ministers. Its aims are to secure the conservation and enhancement of Scotland's natural heritage, and to foster its understanding and enjoyment, through partnership working and local delivery of its functions.

To help ensure a rigorous, scientific approach to our work, SNH has an active Scientific Advisory Committee. This is made up of experts ranging across relevant specialist disciplines who assist on a variety of site designation and species management issues as well as in quality control of research and scientific advice.

The full Committee meets three times per year, with smaller working groups meeting on particular issues as required.

SNH is now looking for a number of new members who have expertise in one or more of the following five areas: 1) Coastal ecology/ornithology, 2) Field botany/plant ecology, 3) Geology/ earth Sciences, 4) Landuse systems/modelling, 5/ Marine ecology.

Successful applicants will be appointed initially for a period of between 2 and 4 years and be expected to spend approximately 1.5 days per month on SNH work. The salary is set at £4,683 per annum (non-pensionable) plus expenses (including reasonable childcare and carer expenses).

For an application form and information pack please write to: The Secretariat, Scottish Natural Heritage, 12 Hope Terrace, Edinburgh EH9 2A5 or email kate.alexander@ snh.gov.uk or phone 0131 446 2206 or fax 0131 446 2278. The closing date for completed applications is Friday 4 February 2005.

SNH encourages applications from all sectors of the community

Great Science Leads To Great Drugs
Scientific excellence has established Cambridge Antibody Technology as a world leader in the rapid generation and isolation of therapeutic human monoclonal antibodies. Our commitment to continued success has resulted in these exciting opportunities in Drug Discovery.
Joining a talented, multi-disciplinary team, you will be central to the discovery and characterisation of novel therapeutic antibodies - medicines that will make a difference to patients' lives. These roles offer an exceptional opportunity to expand your skills and gain exposure to diverse techniques from early discovery through to pre-clinical development.

Molecular Biologists
Apply your knowledge to the display, isolation and engineering of human antibodies. You will have a relevant degree and practical lab experience, or equivalent, and be keen to develop your skills in new directions.

Assay Scientists
Exploit and enhance your experience of developing and applying biochemical and cellular assays to screening or profiling drug candidates. A graduate or PhD scientist, you will enable us to identify novel antibody leads and to help us develop the assay platforms of the future.

Biologist
Apply and expand your cell biology expertise to the characterisation of novel antibody leads in disease relevant in vitro models. Of graduate calibre, you will have at least one year's practical experience of functional cell assay development and implementation.

For detailed further information and to apply for any of these positions please visit www.pharmarecruit.com/cat
Alternatively please call Dr Julian Cavanna for a confidential discussion. Closing date: 28 January 2005.

Biotica
Building a leading position in polyketide therapeutics
Biotica is a privately held UK biotechnology company focused on the discovery of therapeutics for the treatment of cancer and other diseases.

microbiologists
Downstream Processing/Fermentation Ref: MICRO/DSP/01
The successful candidate will be experienced in downstream process and/or fermentation development for the isolation of novel polyketide compounds from micro-organisms. With a minimum of three years industrial experience, you will have an excellent understanding of scaling laboratory processes to pilot scale in preparation for industrial scale up.

Fermentation/Strain Development Ref: MICRO/Strain/01
The successful candidate will be experienced in strain and/or medium development for the fermentation and production of novel polyketide compounds from micro-organisms. With a Ph.D. or equivalent experience, you will have an excellent understanding of microbial metabolism and be familiar with classical and/or molecular approaches to strain development.

As members of the Microbiology Department, you will be part of a team involved in generating new biologically active compounds for Biotica's drug discovery pipeline. Experience acquired in the pharmaceutical or biotechnology industry, in particular with natural products, would be a distinct advantage. Candidates will possess excellent communication and reporting skills and should be keen to acquire new techniques and develop their scientific expertise.

An application letter and CV together with the names and addresses of two referees should be sent to Tracy Jennings, Biotica, - Chesterford Research Park, Little Chesterford, Nr. Saffron Walden, Essex, CB10 1XL, UK; tracy.jennings@biotica.com
The deadline for applications is Monday 28 February 2005.

Scientific Officer (Open Grade)
£ 16,352 - £28,942 plus Location Allowance
South Mimms, Herts

The vision of Cancer Research UK is to conquer cancer through world-class research. We are the world's leading independent organisation dedicated to cancer research, spending £ 191 m a year on cutting-edge research into treating, preventing and curing cancer.

A (Senior) Scientific Officer position is available within the DNA Editing Laboratory of Svend Petersen-Mahrt at Cancer Research UK's Clare Hall Laboratories. We are using biochemical, genetic and cytological techniques to understand the function, specificity, and involvement in oncogenesis of a newly identified class of DNA deamination/modification proteins in vertebrates. Applicants interested in working in this new and fast-developing field should have a PhD with experience in biochemistry and cell biology; experience with protein purification from bacteria or eukaryotic cells, as well as possessing nuclear protein characterisation and general molecular/cell biology skills, is a plus. Good people skills as well as great enthusiasm for science and running a lab are very important. The job duties would include significant responsibility in shaping and maintaining the overall structure and day-to-day running of the laboratory, initial supervision of incoming scientists (PhD student to post-doc), and running independent research projects.

To apply, please submit two copies of both your CV and covering letter to Resourcing, Cancer Research UK, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX or email: recruitment@cancer.org.uk
Please quote reference NS2040 on all correspondence.

Positive about disabled people
[2481-040 (2005) : 66]
Senior environmental scientist
CHAPs London
London Guy's and St Thomas' Hospital NHS Foundation Trust, Avonley Road, London SE14 5ER
£28,016 - £30,302 p.a. + £2,762 LW Grade: Scientist B14-16
Full-time

The Health Protection Agency (HPA) is an independent body that protects the health and well-being of everyone in England and Wales. The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. We also prepare for new and emerging threats, such as a bio-terrorist attack or a virulent new strain of disease.

The post forms part of the Chemical Hazards and Poisons Division (London), London's chemical incident response and training unit by bringing in environmental health including responsibility for contaminated land and environmental modelling. You will be expected to undertake response, training and help to develop the non infectious and environmental hazards aspects of health protection. You will contribute to the ongoing assessment of health impact of industrial facilities and be part of the day time on call chemical incident response rota.

You should have a MSc in an appropriate area such as environmental science, land contamination, chemistry etc with a minimum of 2 years' relevant post graduate work experience. Experience in interpreting environmental modelling and having an understanding of land contamination would be required as well as working in multi disciplinary organisations. You should also be competent in the use of most components of Microsoft packages particularly in the use of e-mail and the internet.

Informal enquiries are encouraged by contacting
Professor Virginia Murray - Head of Unit on 020 7771 5383.
For an application form and job description e-mail: sabrina.senior@hpa.org.uk quoting reference 9915004 as details will be returned via e-mail.

You can also telephone Sabrina Senior in HR, on 020 8327 6622 if you do not have access to e-mail.
Closing date: 21st January 2005.

All staff will be subject to Agenda for Change terms and conditions.
For other employment opportunities, visit our website
www.hpa.org.uk

Wellcome Trust
Science Programme Manager

The Wellcome Trust is one of the world's largest biomedical research charities and its mission is to foster and promote research with the aim of improving human and animal health.

We are seeking to appoint a Science Programme Manager to be responsible for the management of the Trust's programme of support in the area of Physiological Sciences. This is a key role within the organisation which involves managing the process of evaluating and funding grant proposals, from initial contacts with the scientific community, through the peer review process and decision making at funding committees, to the implementation of the funding decisions. You will be responsible for leading a team of seven staff, contributing to the development and implementation of Trust policy and strategy, and developing and maintaining links with the scientific and academic community. You will also be a member of the Science Funding Division's Managers' Forum.

Candidates should normally have a PhD and substantial experience in a research environment, along with a proven track record in management. A background in the area of physiological sciences would be desirable. In addition you will possess:

• First class communication and interpersonal skills
• Demonstrable leadership skills
• An understanding of management issues
• Knowledge of universities and/or research institutions in the UK

Experience within a funding agency and/or a keen interest in the wider issues of science policy/funding is highly desirable.

Salary will be between £40,000 pa and £50,000 pa, depending on experience.

To apply, please send in a full CV (including a daytime telephone number) and a covering letter explaining how you feel you meet the above criteria, along with a short paper (no more than 2 sides of A4) addressing the following question: "What do you consider to be the current opportunities and challenges facing the Wellcome Trust?" Applications should be sent to the HR Department, The Wellcome Trust, 215 Euston Road, London NW1 2BE or to hr@wellcome.ac.uk by Friday 21 January 2005.

THE WELLCOME TRUST IS COMMITTED TO BEING AN EQUAL OPPORTUNITIES EMPLOYER THE WELLCOME TRUST IS A REGISTERED CHARITY NO. 210183

Play a role at the heart of product innovation.
Trainee Study Director, Toxicology - Ref: H490
Huntingdon Life Sciences is one of Europe's largest and most respected Contract Research Organisations. Our aim is to ensure that pharmaceutical products, agrochemicals, food and industrial chemicals used across the globe are safe. At-Huntingdon Life Sciences, we pride ourselves on our innovative and highly scientific approach and commitment to excellent customer service.
We are expanding our Study Director group and are looking to recruit a number of individuals. As part of a successful team, you'll take responsibility for the day-to-day organisation of a range of toxicology studies as well as for keeping the relevant Study Director and members of the project team fully informed of all progress.
In return for your contribution, we'll provide you with an extensive training programme designed to help you become a Study Director. We are committed to continuing professional development and have a progressive salary scheme.
We are interested in individuals with a degree or an MSc in a life sciences subject or the prospect of achieving one. You should also have a solid, general education combined with excellent computer skills and the ability to prioritise and multi-task to manage a challenging workload. At the same time, you should have the confidence to communicate effectively with people at different levels of the organisation while your common sense approach will see client issues resolved quickly.
Please contact Human Resources for an application form on 01480 892500 quoting the relevant reference.
The closing date for applications is 20th January 2005.
Huntingdon Life Sciences. Working for a better future.
Johnson Matthey is the global leading supplier of catalysts for emissions control from both gasoline and diesel vehicles. As a result of continued expansion of our research and development facilities at Royston, near Cambridge, we have exciting positions available associated with the development, scale-up and manufacture of novel emissions control systems. We are seeking new chemistry, physics, and chemical engineering graduates, as well as those with relevant industrial experience. Applicants should be enthusiastic and versatile practical people who can rise to intellectual and hands-on technical problem solving challenges. To apply please write enclosing a CV to:

Dr Martyn Twigg
Technology Director
Johnson Matthey
Orchard Road Royston, Herts, SG8 SHE
or e-mail beverley.williams@matthey.com (www.matthey.com for more information).

Johnson Matthey Catalysts

Johnson Matthey Catalysts is one of the world's leading catalyst companies with strengths in process catalysis, environmental catalysis and fuel cell technologies. Clitheroe site is a lead site within the company manufacturing solid catalysts. At Johnson Matthey Catalysts, our people are our strength. Going beyond simply providing products and services, we develop tailored solutions for challenging opportunities. Our in-depth practical knowledge enables us to optimise the performance of our products in the customer's plant by applying a unique blend of process, design and engineering skills. Our dynamic groups of scientific and commercial personnel are the catalysts for your competitive advantage. Due to the continuous expansion of the Clitheroe Manufacturing Unit the following vacancies exist.

ANALYTICAL SERVICES MANAGER
Competitive salary plus Benefits
Ref: JMB/ASM
Managing the analytical functions at Clitheroe in order to continually improve and develop the manufacturing processes, customer assurance of supplied product and to provide external analysis for commercial services and development programmes.
The ideal candidate will possess a degree in Chemistry or related science along with a minimum of 3 years experience in product and process characterisation; research background and/or experience in manufacturing.

PROCESS DEVELOPMENT CHEMIST
Competitive salary plus Benefits
Ref: JMB/PDC
To project manage the incremental development of existing products, processes and raw materials and the introduction of new products and step out developments to Clitheroe manufacturing processes.
This role requires a high level of self-motivation and analytical thinking combined with excellent communication and ICT skills.
The ideal candidate will possess a degree in Chemistry with inorganic analytical skills, ideally with manufacturing plant experience, Catalysts knowledge and experience and also to have had chemical industrial work experience.

Closing Date for receipt of applications for the above positions is 10th January 2005
The Selection Event is scheduled to take place w/c 24th January 2005
To apply for one of the above positions please telephone our recruitment hotline for an application form on 01200 421608 or alternatively e-mail arwen.allen@matthey.com or write to Johnson Matthey Catalysts, Pimlico Industrial Area, West Bradford Road, Clitheroe, Lancashire, BB7 40B.

Welcome to knowledge
Welcome to life.

Project Leader - Product Development
£25k - £35k Ref: 415
Experienced scientist required to lead a team of 3-4 people engaged in development of state of the art microplate virology assays for the blood bank and clinical market. You will be involved in all aspects of product development to take products from concept to launch in an IVDD compliant environment. You will probably be qualified to MSc/PhD level and have a background in virology, immunology or protein chemistry and experience of assay development.

Process Development Technician
£18k - £22k Ref:421
Scientist with experience in immunoassays and/or virology/protein chemistry required to join a team providing technical support to a wide range of virology products. You will be involved in identifying process improvements and troubleshooting technical issues with the products themselves, and with the key raw materials used in their manufacture. You will probably have a degree in a relevant discipline and/or experience in relevant areas.

To find out more, please forward your CV to Sara Phillips, Recruitment Officer, sara.phillips@abbott.com Human Resources Department, Murex Biotech Limited, Central Road, Temple Hill, Dartford, Kent DA1 SLR. Closing date: 20th January 2005.

Abbott Murex
[2481-049 (2005) : 68]
QM

Senior Microbiologist

Quality Management (QM) is a market leader in providing proficiency testing schemes. An exciting opportunity has arisen for a Senior Microbiologist to join the company. Main responsibilities will include supervision and training of microbiology staff, setting objectives, sample production and QC, product development and technical input into reports.

The successful applicant will possess:

• A degree or HND in Microbiology or Biological Science
• 5 years' relevant experience
• Supervisory experience preferable
• Experience of working in an accredited laboratory

Candidates should be proactive, organised and be eager to make a positive impact on the laboratory. In return, the successful candidate will be rewarded with a competitive salary and all the benefits of working for a rapidly expanding company.

Please send your CV with covering letter to Julie Maddocks at: Quality Management, Minerva House, 63 Hornby Street, Bury, Lancs., BL9 5BW, UK
Or phone 0161 762 9240 for further details and an application form.

[2481-050 (2005) : 68]
Health Protection
Health and Social Care Standards & Quality

These exciting roles give you the chance to use your scientific expertise to influence policy development. You will also be offered on-the-job, specialist, and professional training, encouraged to publish scientific papers and attend scientific conferences, and supported to seek professional accreditation.

SCIENTIST - HEALTH PROTECTION - TOXICOLOGY
£27,528 - £40,807 pa
LONDON
Ref: 04/0203

Based in the Health Protection, Toxicology and Radiation Branch, you will undertake chemical risk assessments of a variety of areas including pesticides, biocides and consumer products. This will involve liaising with ministers, preparing scientific papers for expert advisory committees, and managing the work of scientists from the Department of Health's Toxicology Unit at Imperial College.

Your degree in toxicology or a related biological science will be complemented by at least four years' post-graduate experience, ideally in toxicology or epidemiology. Able to explain complex scientific issues to a non-technical audience, you will be keen to maintain or seek registration as a toxicologist with the British Toxicology Society.

SCIENTIST - AIR POLLUTION AND NOISE
£27,528 - £40,807 pa
LONDON
Ref: 04/0191

You will provide scientific support to a senior medical officer and senior scientist exploring the health effects of air pollution and noise. Your role will vary from reviewing epidemiological and toxicological studies, and contributing to committee reports, to responding to requests for health and policy advice from other Departments, Ministers and the public.

The ability to critically review technical papers published in relevant scientific journals will be essential. In addition, you will need a degree in toxicology, epidemiology, or a related biological science, and four years' post-graduate experience, ideally in air pollution, noise, or epidemiological analysis.

For an application pack, please email s&qrecruit@dh.gsi.gov.uk or call 0207 972 4370, quoting the post reference number, by Thursday 20th January 2005. Application packs will be sent on 21st January 2005. The Department aims to be a modern and equitable employer. We recognise and encourage the potential of a diverse workforce, positively welcome all applications and appoint on merit.

ROSLIN INSTITUTE (Edinburgh)
The Roslin Institute is a leading international centre for research on farm animal genetics and has extensive genomics research programmes.

Bioinformatician - RI 35/04

Based at Roslin Institute as part of a BBSRC-funded Investigating Gene Function initiative, the ARK-Genomics facility provides access to genomic resources for UK scientists studying Farm Animal species. With the continued development of this facility, a vacancy has arisen for a Bioinformatics Analyst to join the team.

There are approximately 1 million physical clones within the facility; working closely with the Laboratory staff and the Facility's LIMS developer, the post-holder will be responsible for implementing high-quality annotation against these clones.

The successful candidate will be highly organised and methodical and will have considerable experience of handling sequence database. They will be familiar with sequence searching algorithms and the retrieval and interpretation of data from ENSEMBL and other genome resources, including Gene Ontology terminology. Experience of implementing database systems and/or web interfaces would be an advantage, but is not essential.

Starting salary will depend on qualifications and experience.

The position is available immediately.

Application forms can be obtained from the Human Resources Office, Roslin Institute, Roslin, Midlothian, EH25 9PS. Tel 0131-527-4481. email Roslin.HR@bbsrc.ac.uk

Please quote appropriate ref no.

Closing date 14 January 2005.

Scottish Association for Marine Science
Post-Doctoral Researcher (Macroalgal Cultivation)
SAMS is seeking to appoint a Post-Doctoral Researcher to join the Invertebrate Biology and Mariculture team researching sustainability in Aquaculture.
A PhD is required and preferably 2-3 years relevant post-doctoral experience in the culture and physiology of commercially important species of macroalgae. Experience in field-based research would be advantageous.
The post is full-time and for a fixed period of 2 years, based at the Dunstaffnage Marine Laboratory and salary ranges from £23,643 - £27,116, depending on qualifications and experience.
Further Particulars and Application Forms are available online www.sams.ac.uk.
Alternatively please write to:
The Personnel Officer, Post Doctoral Researcher, D13/04.MK Scottish Association for Marine Science, Dunbeg, Oban, Argyll, PA371QA
or by e-mail to recruitment@sams.ac.uk
The closing date for applications is Friday 14th January 2005.
[2481-053 (2005) : 69]
Ericsson is the largest supplier of mobile systems in the world and supports all major standards for wireless communication. We have been a strong driver in major standardisation forums for many years and have always been a driving force in research and development, leading the way in development in our industry.

We are delighted to announce that Ericsson Ireland has been awarded EU FP6 funding under the Marie Curie Actions, Transfer of Knowledge scheme for 2005-2009. By hosting a number of Research Fellowships and Visiting Senior Researchers, we will bring world-class researchers to Athlone, Ireland. We will create the next generation of network management systems based on Distributed computing (P2P Grid) and Knowledge engineering (data mining, machine learning, ontologies).

The main functions of these Research Fellowships will be to:

(i) Evaluate and develop components and techniques for self-configuring systems based on Peer-to-Peer and Grid computing distributed systems theory and practices in order to create a distributed secure real-time network management architecture.

(ii) Based on knowledge engineering principles, determine a suitable knowledge representation schema; evaluate the application of data mining to real-time telecommunication management issues and creation of ontologies for use in a real-time distributed management system.

Visiting Senior Researchers (6 month contracts over 2 years)

Eligible applicants should have at least 10 years' post-doctoral research experience in either an academic and/or an industrial setting with extensive peer reviewed publications in relevant learned journals and conferences. They should also have experience of research project management in terms of leading teams, generating external funding and supervision of PhDs.

Research Fellows (24 month contracts over 2 years)

Eligible applicants should have at least four years' research experience since gaining a university diploma giving them access to doctoral studies, or should have a PhD.

Ericsson is an equal opportunity employer. Fellowships are available regardless of nationality. Eligible candidates must have spent 4 of the last 5 years outside of Ireland. For more information please visit our recruitment web site at www.ericsson.com/jobs

Please send your CV and a research statement to hr.Ireland@ericsson.com Closing date: 31st January 2005.

[2481-054 (2005) : 70]
Defra
Department for Environment Food and Rural Affairs
Defra (the Department for Environment, Food and Rural Affairs) was created in June 2001 to drive forward the Government’s programmes on the environment, food and rural affairs.
We work for the essentials of life - food, air, land, water, people, animals and plants. Our remit is the pursuit of sustainable development - weaving together economic, social and environmental concerns.

Senior Scientific Officer
£32,466 - £39,669 per annum Based in London
Ensuring that the new EU chemicals strategy achieves its aims of protecting the environment and human health from hazardous chemicals is important to us.
You will play a significant part in negotiating this strategy, leading on specific aspects and contributing your scientific and policy making skills to the development of others. This legislation is at a pivotal point in negotiations and will provide you with a fascinating opportunity to be part of decision making in Whitehall and Brussels.
With a postgraduate qualification in a relevant field, you will have at least five years' relevant experience and specialist knowledge of the behaviour of chemicals in the environment. You will also be able to demonstrate good policy development skills, and understand the wider issues surrounding the management of environmental risk.
Your communication and decision making skills will be first class and you will be able to work within a team and on your own initiative. You will also have the ability to build relationships with colleagues of all levels.
This is a busy and challenging role in a complex area, therefore you must be prepared to work to tight timescales and under pressure from conflicting priorities. Knowledge of other European languages is desirable but not essential.
For further information, please contact Elizabeth Surkovic on 020 7082 8108.
If you would like an application form and job description, please contact Resource Centre, Defra, HR Unit, Government Buildings, Whittington Road, Worcester WR5 2LQ. Tel: 01905 768818 (24 hour answerphone) or email: ResourceCentre@defra.gsi.gov.uk quoting reference RCRE110.
Closing date: 21 January 2005.
As an Equal Opportunities employer the Department welcomes applications regardless of gender, race, disability, age, religion, or sexual orientation. We operate a family-friendly policy including flexible working patterns. The posts are open to British, Commonwealth and EU Nationals.

[2481-055 (2005) : 70]

SEPA
Scottish Environment Protection Agency
SEPA aims to provide an efficient and integrated environmental protection system for Scotland, which will both improve the environment and contribute to the Government's goal of sustainable development.

Hydrogeological Support Officer
£18,642 - £28,602 p.a. dependent on skills and experience
fixed term to 31 October 2006
Edinburgh Ref: OPEA3058

Working as part of SEPA's Groundwater Task Team, you will prepare the hydrogeology service for the implementation of the Water Framework Directive, liaising with relevant internal and external parties as required. You will assist with the further characterisation of groundwater bodies and the development of monitoring and classification schemes. You will be required to deliver a high volume workload and meet the stringent deadlines imposed by this project. Data entry and GIS tasks will be a responsibility. You must hold a degree in Geology, Hydrology, or related discipline and possess at least 2 years' relevant experience. Post-graduate experience is desirable in such areas as GIS, database development or groundwater modelling. An enthusiastic team worker, you will operate within a small team working to tight deadlines, therefore excellent self-discipline and self-motivation are essential. Experience in the management of databases, good communication and report writing skills are a necessity of the post. You will possess a full driving licence.

GIS Scientist
£18,642 - £28,602 p.a.
6 months
Edinburgh Ref: OPE03650

You will provide GIS based environmental data handling, analysis, mapping and interpretation skills in support of corporate GIS needs and liaise and communicate, as required, with internal and external partners.

A graduate in a relevant scientific discipline with at least 2 years' GIS experience including working knowledge of ESRI Geographic Information System software, you will possess experience in the preparation and presentation of reports with cartographic content, both technical and non-technical. You must have good IT skills including MS Office, RDBMS in an ORACLE environment and experience in data handling and reporting scientific and environmental information. Furthermore, you must be a team player with excellent communication and organisational skills.

The closing date for both posts 20th January 2005 at 12 noon.

For an application form, please call 01786 452555 or email recruitment@sepa.org.uk

Send your SEPA application form to Recruitment, SEPA Corporate Office, Erskine Court, Castle Business Park, Stirling FK9 4TR.

Applicants must quote the appropriate job reference number. CVs will not be included as part of the application process.

Details can also be found in the vacancy section on our website, www.sepa.org.uk

[2481-058 (2005) : 71]
Tridend Technologies, a division of Oxford Gene Technology (OGT), created to develop novel molecular tools for life sciences end nanotechnology, is seeking to recruit a Postdoctoral Research Scientist to work in the field of Mass-spectrometry for Genomics and Proteomics. This position, initially for two years, is created as part of OGT's commitment to a European MolPage FP6 initiative. We are seeking a talented, highly motivated and innovative researcher who will be developing and applying TT's proprietary mass-spectrometry-enhancing approaches to MolPage projects.

The successful candidate will have a degree in molecular biology, biochemistry, bioconjugate chemistry or a similar field. It will be extremely advantageous if candidates have hands-on experience in oligonucleotide synthesis and/or peptide conjugation. An understanding of PAGE and HPLC techniques as well as mass-spectrometry of biomolecules would also be a plus. Your ability and desire to learn new techniques in a dynamic team environment will be particularly welcome.

We offer a competitive salary and an excellent benefits package.

Applications, including a covering letter, a full CV and the names and addresses of two professional referees, should be sent to:
Anita Medway, HR Coordinator, Tridend Technologies, Oxford Gene Technology (Operations) Ltd, Begbroke Business & Science Park, Sandy Lane, Yarnton, Oxford OX5 IPF or by email to anita.medway@ogt.co.uk

Closing date: 31 January 2005

CPI The Centre for Process Innovation
An opportunity to join a dynamic inspiring team
CPI, the Centre for Process Innovation, is moving forward as the UK's pre-eminent innovation and resource partner for the chemical using industries. It is dedicated to driving and delivering applied research and development in collaboration with industry partners and with world-leading research universities.

CPI is progressing its core technology platforms in Functional Materials and Advanced Processing and Manufacturing, together with the UK’s only facility dedicated to the development of Fuel Cells in static and portable applications.

Technology Programme Managers ca £45k plus car + benefits
Flexible Electronics: we are seeking to recruit an enthusiastic and technically astute programme manager to lead the development and production of new flexible electronic components for the flexible displays market. The work is in collaboration with Dupont Teijin Films and involves laying down micro-fine coatings onto plastic substrates.

Functional Materials: An experienced and highly motivated technical manager to lead in the design, planning and management of projects to deliver work programmes in liaison with clients and a diverse set of stakeholders. The Wilton facility will become the leading centre in the UK, collaborating with industry and other national centres.

The role
• Lead technical liaison with industrial partners, while managing team activities and ensuring clear communication of milestones and deliverables
• Undertake knowledge management using IT systems including development and delivery of Intellectual Property Value
• Work across business functions, multi-tasked, maintaining confidentiality
• Ensure team performance at highest standards of safe working

Requirements
• Higher degrees in relevant sciences, professional qualifications, expertise in technology management
• Task focused analytical thinkers with negotiating skills
• Commercial acumen

The roles are likely to expand to include further programme management opportunities, offering candidates the opportunity to develop broad, technology based project management skills within an actively growing environment at the cutting edge of science.

Please apply with CV to: Val Briggs, Centre for Process Innovation, Wilton Centre, Wilton, Redcar. TS10 4RF.
Closing date: 21st January 2005

[2481-060 (2005) : 71]
Pfizer
We're building a better future. Help us make it a reality.
Separation Scientist
Sandwich, Kent
It takes fresh thinking, new approaches and inspired problem solving to develop new drugs that really make a difference to animals health. That is why we've created the kind of conditions that creative people thrive in. Our culture is collaborative, our teams small and multidisciplinary, and our work stimulating and rewarding.
As a result, and with the support of unrivalled resources plus the largest animal health R&D budget in the industry, we have an impressive drugs pipeline. With your help we'll add to it.
As part of our Veterinary Medicine Discovery Chemistry Group, you'll work closely with the Medicinal Chemists at all stages of the discovery process - from developing new methods for purifying novel compounds for initial screening through to the purification of larger scale batches of drug candidates. Using your hands-on experience of Separation Science and automation, you'll be expected to purify compounds on microgram to multigram scales, to agreed deadlines. You'll also be able to apply your imagination and experience in HPLC and other separation technologies coupled with different detection techniques, such as MS and ELSD to a wide range of problems.
As a chemistry graduate, ideally with a PhD, you'll have at least two years experience in the practical application of chromatography, gained in the chemical industry. You'll need to be an enthusiastic team player with excellent interaction skills and be keen to learn, apply your knowledge and break new ground.
Bring us skills like these and you'll find yourself working with a highly motivated and focused team of flexible and positive minded people on one of the most productive research sites in the industry: a site that is located on England's scenic south coast where the quality of life lives up to the quality of the science.
If those challenges appeal, find out more and apply online of www.pfizer.co.uk
Please quote requisition number 040696.
Closing date: 20th January 2005.
It is anticipated that first interviews will be conducted during the two weeks commencing 24th January 2005.
2001 2002
AWARDED TO PFIZER LIMITED
[2481-061 (2005) : 72]
£28 - £36
Teddington, Middx.

Senior research scientist
Nanoparticulate measurement and sampling
NPL is the UK’s national standards laboratory. We carry out fundamental research and develop measurement technologies, vital to improving quality of life, trade competitiveness and protecting the environment.

The Analytical Sciences Team conducts world-leading research in a diverse range of areas including nanotechnology, electrochemistry, environmental measurements, and remote sensing. We work closely with industry and government to ensure the quality of measurements, for example for national air pollution monitoring networks, industrial emissions monitoring, and the measurement of vehicle emission gases.

We are seeking a PhD scientist to join this vibrant and diverse team to strengthen our research into the next generation of standards and measurement techniques for airborne nanoparticles. You will have a degree and PhD in physics or chemistry, and a strong research background relevant to the measurement of nanoparticles. Industrial experience would be beneficial, but more important is a desire to deliver high quality innovative research.

Full details and online application at www.npl.co.uk/recruitment or e-mail your CV, quoting ref. QL/001, to recruitment@npl.co.uk Closing date: 21st January 2005.

NPL is committed to equal opportunities.

NPL
National Physical Laboratory
The National Physical Laboratory is operated on behalf of the DTI by NPL Management Limited, a wholly owned subsidiary of the Serco Group plc.

[2481-064 (2005) : 73]
The Natural Environment Research Council (NERC) is seeking a Science Co-ordinator (FREE Leader) for its new directed science programme Flood Risk from Extreme Events (FREE) which is due to start in early 2005 with a programme budget of £10m over 5 years. There is an additional £4m potentially available subject to SISB (Science and Innovation Strategy Board) approval. FREE will focus on the atmospheric, marine and geological forcing of floods. Its aim is to improve the forecasting of these forcings and so allow society to have early warning of impending flooding.

The FREE Leader will be employed by, or seconded to, a University or Private Sector organisation. Individuals will be considered if they are registered as a company for the purpose of payment of VAT, income tax and national insurance contributions. The successful candidate, if a tenured member of an institution will remain an employee of the host organisation, with whom any subsequent contract will be placed.

The FREE Leader will ensure sound outcomes from a programme which brings together a number of communities and will be responsible for the management and co-ordination of a core team. You will work closely with the Steering Committee to develop and execute the Programme Science, Implementation, Data Management and Knowledge Transfer Plans, and monitor progress against programme objectives. Establishing liaison with and between award holders in the Programme you will assist in building a programme community and play a major role in promoting awareness of the Programmes aims and achievements. Through contact with relevant user groups, you will facilitate collaboration, develop opportunities for co-funding and partnership and promote knowledge transfer for the exploitation of the Programme results.

More details about the programme and the role of the FREE Leader can be found on the NERC web page http://www.nerc.ac.uk/funding/thematics/free/

UNIVERSITY OF OXFORD
University of Oxford
Academic Fellowship Scheme

In vivo Neuropharmacology or Neurotoxicology

The Academic Fellowship Scheme is a national initiative funded by the Research Councils to provide a structured path into an academic career for contract research staff and other suitably qualified individuals. Additional funding for this post is provided by the BPS/Pharmaceutical Industry Integrative Pharmacology Fund.

The Fellowship will specifically build on research at the interface between cellular and in vivo neuroscience. Applicants should ideally have guaranteed research funding from a source other than the Academic Fellowship for at least part of the five-year fellowship period (or a track record likely to attract research funding during the period of the fellowship); the scheme is open to researchers supported on any type of grant funding and to holders of current fellowship awards.

The Academic Fellow will take up the appointment on 1st October 2005 and be appointed to a permanent academic post, subject to satisfactory performance, at the end of the five-year fellowship period. The salary during the fellowship period will be paid on the research support scales according to experience and stage of academic career.

The University will especially welcome applications from women and ethnic minorities meeting the selection criteria, who are under-represented among its academic staff (Section 38 of the Sex Discrimination Act 1975 and Section 48 of the Race Relations Act 1976 apply).

Details of the application procedure, together with further particulars for the post and details of the Academic Fellowship Scheme are available on the University website at http://www.pharm.ox.ac.uk/recruit/recruit.htm or from the Deputy Administrator, Department of Pharmacology, Mansfield Road, Oxford, OX1 3QT, tel. +44 (0)1865 281123, e-mail: chris.hardy@pharm.ox.ac.uk

The closing date for applications is 8th February 2005.

The University is an Equal Opportunities Employer.

[2481-066 (2005) : 74]
POSTGRADUATE MEDICAL INSTITUTE
DIVISION OF ACADEMIC MEDICINE, DIABETES AND ENDOCRINOLOGY
Non-Clinical Lecturer
Applications are invited for the post of non-clinical lecturer from postdoctoral scientists with a background in Endocrinology and Diabetes particularly with skills in second messenger pathways and molecular biology. Applicants should have an established track record in research and will be expected to develop innovative projects and collaborate in existing studies.
Salary will be £23,643 pa.
Informal enquiries are encouraged and can be made to Dr SL Atkin, Head of Academic Diabetes and Endocrinology, on 01482 675365.
For further information and details of how to apply, tel: 01482 463888, fax: 01482 464173, email: d.mann@hull.ac.uk (quoting reference PG72).
Closing date: 21 January 2005.

THE UNIVERSITY OF HULL
[2481-067 (2005) : 74]
School of Applied Sciences  
Department of Chemical & Biological Sciences  
ACADEMIC-INDUSTRIAL LECTURER IN CHEMISTRY  
Fixed term appointment for two years  
Ref: 8916  
£23,643 - £29,479 per annum  
The Department of Chemical and Biological Sciences is a thriving successful department and is seeking an enthusiastic individual to promote science courses and maintain close links primarily with regional industry but also with local schools and colleges. Applicants should have enthusiasm for science subjects and the ability to promote education in science especially in an industrial context. You will have a good degree in a relevant chemically orientated science and either a PhD or considerable relevant experience. However, both would be an advantage. Excellent communication and professional skills are essential. An understanding of the educational and training needs of industry would be invaluable. Informal enquiries are welcome to Professor P A Barnes on 01484 473138 (e-mail: p.a.barnes2@hud.ac.uk). Closing date: 24 January 2005.

UNIVERSITY OF OXFORD
University of Oxford
Veterinary Services
Veterinary Laboratory Manager
Salary: £25,432 - £27,116 p.a. (Scale, grade and salary are currently under review).
We are seeking to appoint an experienced and capable person to manage and develop the diagnostic laboratory for the Oxford University Veterinary Services, and to act as Health and Safety Officer for this busy and dynamic department. The work of this laboratory currently involves the microbiological, parasitological and haematological examination of samples for diagnosis and health monitoring. However in early 2006 the unit will move to a new laboratory when it will expand to include serological testing. This is an opportunity to become part of a unique department within the University and to take an active role in shaping the future of the diagnostic and research support services.
Applicants must have a minimum qualification of BSc or equivalent together with at least 3 years’ practical experience of bacteriology. Additional skills in serology and haematology would be an advantage. Previous work involving laboratory report writing using Word or Excel, financial management, staff management, and health and safety management are essential.
Further information about the department can be obtained from www.vet.ox.ac.uk Information about the post can be obtained by contacting the Laboratory Manager on tel. (01865) 282544, or by e-mail: enquiries@vet.ox.ac.uk. Applications should be made in writing with full CV, daytime contact number, and the contact details of two referees who can be contacted prior to interview. Please direct e-mail enquiries or requests for further particulars to administrator@vet.ox.ac.uk and send applications to the Administrator, Oxford University Veterinary Services, Parks Road, Oxford OX1 3PT by noon on 26th January 2005. Interviews will take place on 4th February 2005.
The University is an Equal Opportunities Employer.
[2481-069 (2005) : 74]
LONDON SCHOOL OF HYGIENE & TROPICAL MEDICINE
Two Research Fellowships
Applications are invited for two 3-year postdoctoral fellowships at the London School of Hygiene & Tropical Medicine (LSHTM).
These are intended for outstanding individuals in the early part of their independent research careers. The expectation is that the successful candidates will become international research leaders in their fields. Applicants should have a PhD and postdoctoral experience. They should also have a clear vision of the future direction of their research, sources of future funding, and how the research will fit within the context of ongoing research at LSHTM.
(Ref: PD3) The Department of Epidemiology and Population Health (EPH) is looking for someone to work within the discipline of demography, epidemiology, public health nutrition or statistics.
(Ref: GW5) The Department of Public Health and Policy (PHP) is looking for someone interested in public health, behaviour change and health promotion.
Please see the LSHTM website for more details of the sort of work undertaken within the two Departments: www.lshtm.ac.uk
Applications, consisting of a curriculum vitae, including a list of publications, an outline of a proposed research project(s) and the names of three referees, should be sent to the Personnel Officer at the London School of Hygiene & Tropical Medicine, Keppel Street, London WC1 E 7HT (telephone 020 7927 2203, fax: 020 7636 4771, e-mail: personnel@lshtm.ac.uk) by 10 January 2005 quoting the appropriate reference PD3 or GW5.
Informal queries to each Head of Department:
Pat Doyle (EPH) pat.doyle@lshtm.ac.uk, or Gill Walt (PHP) gill.walt@lshtm.ac.uk
The London School of Hygiene & Tropical Medicine is committed to being an equal opportunities employer.

University College Cork
Colaiste na hOllscoile, Corcaigh
Department of Chemistry LECTURESHP IN
PHYSICAL & ENVIRONMENTAL CHEMISTRY

Applications are invited for the above full-time permanent post. The appointee will be expected to develop an internationally competitive research profile and contribute to the teaching and training of undergraduates and postgraduates in both the disciplines of Chemistry and Environmental Science.

The appointee will have a PhD in a Physical / Environmental Chemistry area and a strong background in basic and applied research. A 5-year plan outlining specific research directions in physical / environmental chemistry should be provided on one page A4. It is also desirable that the successful candidate has some experience in teaching and/or training of undergraduates or postgraduates. Candidates with interests in atmospheric chemistry (field/laboratory/modelling) will be particularly welcomed.

A full description of the Department is available at http://chemweb.ucc.ie/

Salary scale (new entrants): €31,304 - €50,851 per annum. [There is provision for progression beyond a bar to a maximum salary of €56,721 - €74,720]

For informal discussion contact:
Professor John Sodeau, j.sodeau@ucc.ie Closing Date: Tuesday 15 March 2005

Application forms must be completed and are available, together with further particulars, on our website at: http://hr.ucc.ie/employment.php or from,

University College Cork is an Equal Opportunities Employer

[2481-071 (2005) : 75]
Imperial College London
Department of Metabolic Medicine
Division of Investigative Science
Faculty of Medicine
Departmental Research Co-ordinator
Salary Range £25,259 - £32,232

The Faculty of Medicine at Imperial College is one of the largest Medical Faculties in Europe. The Department of Metabolic Medicine is a 5* research department with a number of prestigious Nature papers to its name.

It undertakes research in areas which are key to health in the 21st Century including work on obesity appetite and associated diseases such as diabetes.

The Department is seeking an experienced individual to work in this exciting and high-profile area, supporting academic staff by co-ordinating and driving the development of its research strategy. The post is based at the Hammersmith Hospital Campus located in East Acton.

The role will include identifying funding opportunities and managing the submission of research and ethics proposals. Working closely with the Chairman of Department you will have excellent written skills and the ability to draft complex documentation from a minimal brief.

A degree in a life sciences/medicine area is essential, as is the ability to meet tight deadlines and to co-ordinate the work of others at all grades.

Flexible working will be possible.

For an informal discussion about the role please contact s.bloom@imperial.ac.uk

For an application pack please contact the Human Resources Division, Imperial College London, Hammersmith Campus, Commonwealth Building, Du Cane Road, London W12 ONN, quoting reference number HJ 780.

Alternatively an application form and job description may be obtained from the following web link
http://www.imperial.ac.uk/employment/index.htm and sent to the above address.

Closing date: 18 January 2005
Interviews to be held: 25 January 2005

Valuing diversity and committed to equality of opportunity

Cancer Research UK Department of Medical Oncology
Postdoctoral Research Associate in Glycoangiogenesis
Ref: 1332/04
Applicants are invited for the above vacancy based at the Paterson Institute for Cancer Research in South Manchester.

The Department has wide-ranging interests in basic and applied research on human cancer and the close collaboration between scientists and clinicians facilitates the translation of fundamental knowledge to understanding and treatment of disease.

The post is a new position on a Cancer Research UK funded project grant on the "Development of oligosaccharides as anti-angiogenic agents". The particular focus of the research is on the efficacy, biological activity and optimisation of oligosaccharides manufactured in our organic synthesis programme.

You will be a highly committed scientist determined to make a positive contribution to cancer research. A strong background in both molecular and cell biology are essential but direct experience of proteoglycan research is not necessary. Experience in signal transduction would be an advantage.

The post is available for 12 months in the first instance on the scale for research staff, subject to a review after this time. It is anticipated that funding will be extended until the end of September 2007.

Salary will be in the range £19,460 - £27,116 p.a. (depending on experience).

Application forms and further particulars can be obtained from Dr Kate Vaughan, Room RG34, Paterson Institute for Cancer Research, Wilmslow Road, Manchester M20 4BX, e-mail kvaughan@picr.man.ac.uk Tel: 0161 446 3037. Anyone wishing to discuss the posts can contact Dr Gordon Jayson on 0161 446 3606 or e-mail: gordon.jayson@christie-tr.nwest.nhs.uk

Faculty of Life Sciences
Research Technician
(Tissue Culture and Molecular Biology)
Ref: 1312/04
You will be required to carry out a wide range of duties in a multi-disciplinary group. The main duties in the first instance will include general maintenance of tissue culture stocks and medium, generation and maintenance of cell lines, transient transfection protocol. Additional duties will include preparation of reagents for molecular biology, including buffers and bacteria medium, plasmid DNA preparation and agarose gel electrophoresis.

You should have some knowledge of general aspects of cellular biology (training can be provided) and you must have high levels of personal initiative and conscientiousness and overall enthusiasm to interact with others.

You must possess two A levels, GCSEs (inc. Maths, Science and English) BTEC or equivalent qualifications. An HNC/BSc in a biological science or equivalent is desirable.

The position is funded by the Wellcome Trust and is available for five years. Salary is circa £15,000 p.a. (depending on experience).

Further particulars and application forms are available from Ms Louise Hewitt, Faculty of Life sciences, 1.124 Stopford Building, The University of Manchester, Oxford Road, Manchester M13 9PT. E-mail: louise.hewitt@manchester.ac.uk

Research Technician
Ref: 1311/04
You will be part of a team undertaking novel and exciting research connected with the effect of hormones and ageing on wound healing. The project is sponsored until April 2006 by the PPP foundation and is tenable from January 2005. As well as undertaking research you will be responsible for some aspects of managing our multi-user facilities as directed by associated academic staff and the chief
You will also be responsible for ensuring the maintenance of laboratory stocks and equipment, microscopic tissue examinations, assistance with a range of computer software packages including image analysis software, spreadsheets, word-processing and general data processing systems. You must demonstrate flexibility and in the future, you should expect to work on new scientific areas depending on the success and direction of the project. You must be familiar with a range of modern genetic manipulation techniques and must demonstrate some aptitude towards managing group facilities and be a team player with a keen interest in supporting scientific research. You should preferably hold at least an ONC or BSc in biological sciences or an equivalent qualification and have some relevant experience.

Salary is circa £14,500 p.a. (depending on experience).

Further particulars and application forms are available from Mr Gary Porteous, Faculty of Life Sciences, 3.614 Stopford Building, The University of Manchester, Oxford Road, Manchester M13 9PT. E-mail: garyporteous@manchester.ac.uk

As an Equal Opportunities Employer the University welcomes applications from suitably qualified people from all sections of the community regardless of race, religion, gender or disability.

10 Fellowships 3-year Ph.D. Programme Fall 2005
The Graduate School offers a high-level Ph.D. programme with research opportunities in cellular,
molecular, developmental, physiological, neuro- and evolutionary genetics and genomics. Plant, animal
and microbial systems are equally well represented.
The three-year programme starts with a six-month rotation and course period, followed by a Ph.D.
project in one of the participating groups. Seminars and training courses complement the research work.
Comprehensive support is provided throughout the programme. The programme language is English,
and no tuitions apply.
10 competitive three-year fellowships (initially 1000 EUR, then 1250 EUR per month) are available. In
addition, up to 10 students with self-provided funding may be selected.
For information on the application process and the admission requirements, please visit our website:
www.uni-koeln.de/bio-graduateschool.
Applications must be submitted between Dec 1st, 2004 and February 28th, 2005. Candidates holding or
expecting to receive a German Diploma degree may apply until March 31st, 2005.
[2481-075 (2005) : 77]
Sainsbury PhD Studentships in Plant Science
Enhanced postgraduate studentships, each for three years, starting in October 2005, will once again be awarded by the Gatsby Charitable Foundation, one of the Sainsbury Family Charitable Trusts. Each of the supervisors below will select a candidate who will then compete at interview, with Sainsbury Undergraduate students, for one of up to four Sainsbury PhD Studentships. Interviews will be held in London on Friday, 4 March 2005.
Interested applicants should write, attaching a CV, before 21 January 2005, to one or more of the following:

The University of Manchester
Manchester 1824
Combining the strengths of UMIST and The Victoria University of Manchester
Opportunities for Graduate Study from September 2005
PhD Open Day 28th January 2005
The Faculty of Life Sciences at The University of Manchester is a centre of research excellence combining the merged strengths of the Victoria University of Manchester and UMIST. A vibrant and interactive research environment (5* RAE 2001 Grading) for graduate study is supported by our acclaimed Graduate Training Programme. A large number of 3 & 4 year PhD Studentships, funded through the UK Research Councils and Charities, are now available for September 2005 entry.
As part of our recruitment process, we invite early application to attend an Open Day in January 2005. Details of the Open Day and studentships available from September are given on our website: http://www.manchester.ac.uk/lifesciences/postgraduate
Attendance at the Open Day will be by invitation only. Applicants should submit a formal application, providing details of up to 3 potential supervisors whose research areas are most related to their interests. Any other relevant information such as previous research or industrial laboratory experience should also be included.
We expect to make firm offers of studentships as a result of the Open Day interviews. All reasonable travel expenses will be reimbursed. Applicants should be submitted as soon as possible and no later than 17th January 2005.

Provision of technical advice to the Rural Payments Agency
The Rural Payments Agency (RPA) is an Executive Agency of the Department for Environment, Food and Rural Affairs (Defra). It is the principal paying agency responsible for CAP schemes in England and for administering certain schemes throughout the UK.

The Agency seeks to place a contract for the supply of demand-led, specialist agricultural-related specialist services for a period of one year, starting on 1 April 2005, with an option for annual extensions over a four-year period. The services to be contracted include:

* training in the use and interpretation of aerial photography and satellite imagery;
* technical advice on remote sensing;
* resolution of queries on land eligibility/use issues arising in connection with RPA's administration of EC income support schemes;
* use and evaluation of area measuring equipment;
* technical assistance relating to RPA's administration of EC income support schemes, e.g. on crop yields and agricultural practices; and
* the possible need to arrange for the acquisition of aerial photographs of selected land and the analysis of those photographs.

For a copy of the tender documentation, please contact: Christel Burns, Rural Payments Agency, PO Box 69, Reading RG1 3YD, or email Christel.burns@rpa.gsi.gov.uk, no later than 24 January 2005.
1996

The Hypertension Trust
A registered charity to promote research in hypertension and related cardiovascular conditions (www.hypertensiontrust.org)

Research Fellowship
Applications are invited for a two-year Research Fellowship for research and training in hypertension and related fields. The Fellow appointed will hold a medical degree or higher degree in science (PhD) and have evidence of research aptitude or clinical experience in hypertension. The award will support a two-year period of research at an institute, university or other academic centre in the UK or Republic of Ireland. Awards will be given preferentially to UK or EC nationals working in the UK or the Republic of Ireland. The stipend will be based on UK Clinical/Academic Staff salaries in the range of £20,000 - £30,000 p.a. (+ NI, superannuation and London Allowance if appropriate).

Research Studentship
Applications are invited for a three-year Research Studentship for research and training in hypertension and related fields leading to a PhD. Applicants will usually be graduates of an EU university or currently working in a UK or Republic of Ireland hospital or institution. Awards will be given preferentially to UK or EC nationals working in the UK or the Republic of Ireland. The stipend will be based on current MRC rates and will cover PhD fees.

Applicants for both the Fellowship and the Studentship must identify a preferred research centre, an indication of why that centre is particularly appropriate for the research, and confirmation from the relevant head of department that they will administer and supervise the Research Fellowship/Studentship. Up to £5,000 per annum may be made available for justifiable additional expenses related to the project. It is expected that successful applicants will commence their research positions by October 2005.

Application forms can be downloaded from www.hypertensiontrust.org and are also obtainable from: Mrs. Gerry McCarthy, Administrator, The Hypertension Trust, 113-119 High Street, Hampton Hill, Middx, TW12 1NJ, UK. Tel: 020 8979 8300 Fax: 020 8979 6700 Email: gmccarthy@hamptonmedical.com

Yakult
Research Travel Awards
Applications are invited for Travel Awards front post-graduates and established Scientists and Health Professionals whose research is aimed at understanding
THE ROLE OF BACTERIA IN FOOD AND HEALTH
Specifically in the areas:
• Host bacteria interactions
• Fermentation/Processing
• Molecular methods for identification
• Therapeutic effects
Closing Date for Applications:
31st January 2005
Established 70 years ago, Yakult the pioneering international probiotic company is committed to educating and advancing research in areas of intestinal health. Presented annually, the travel awards are open to those whose research focuses on the dynamic and often complex role of pathogenic and/or health promoting bacteria in food and its implication on health within the human gut. Applications are invited from individuals working in the field of microbiology, gastroenterology, food safety, nutrition and food science in the UK and Ireland.
Awards will be offered to researchers for attendance at a National or International symposium where their work has been accepted for presentation. In addition, to celebrate Yakult's 70th Anniversary, this year the awardees will also have the opportunity to visit the company's renowned Central Institute for Microbiological Research in Tokyo. A multidisciplinary panel will judge applications and the results will be announced in March 2005.
Applications must be submitted on forms available from:
Science Department, Yakult UK Limited 12-16 Telford Way, Westway Estate, Acton, London W3 7XS

The Nuffield Foundation
THE NUFFIELD FOUNDATION
Undergraduate Research Bursaries
The Nuffield Foundation is offering a limited number of awards to enable undergraduates to participate in scientific research during the summer vacation before their final year. The purpose of the awards is to encourage undergraduates with research potential to consider a career in scientific research. The awards provide support for the student at a rate of £150 per week (£160 per week in London), normally for a period of between six and eight weeks. An additional sum of up to £200 for specified research costs may also be awarded. Around 250 awards will be made.
Researchers in the Physical Sciences, Engineering, Computing, Mathematics and the Biological and Biomedical Sciences at Universities and Research Institutions within the UK are eligible to apply on behalf of a named student.
The application, which must be on the new form for 2005, should be made by the person supervising the research.
The closing date for applications is Tuesday 15th February 2005.
Further details and application forms are available from the Nuffield Foundation (ref: JC/URB), 28 Bedford Square, London WC1B 3JS. Tel: 020-7580-7434 (24-hour answerphone). Further information and forms may also be downloaded from our website: www.nuffieldfoundation.org
The scheme is only open to applicants and students from institutions within the United Kingdom. The Foundation's objects are the advancement of education, health and social well being.

A scientist’s guide to Scotland

It's not just beautiful countryside that makes researchers want to work north of the border. James Kingsland investigates

When people ask Philip Cohen how he squeezes in so many hobbies alongside being a university professor and the director of Dundee's Wellcome Trust Biocentre he has a simple answer: "No commuting". Researchers are attracted to Scotland by relatively low house prices, stunning scenery, a great education system and a thriving science economy. So for those frustrated by the frenetic pace of life in England's south-east, here is New Scientist's guide to Scotland's research hotspots.

**Aberdeen**
"As the most northerly city in the UK we're seen as a wee bit geographically challenged. But a lot of people, when they arrive - including myself - are very surprised to find such a vibrant, thriving, affluent city"
Andy Porter, Haptogen chief scientific officer and antibody engineer, University of Aberdeen

Built from locally quarried granite, Aberdeen has a reputation for toughness and grit. Thanks to its role since the 1970s as a base for oil and gas exploration and production in the North Sea, the UK's most northerly city is also one of the most prosperous. The Granite City hosts two universities - Robert Gordon University and the University of Aberdeen - and is internationally renowned for research in energy and renewables. In August last year the Department of Trade and Industry and the Scottish Executive announced £6 million of funding for a pilot offshore wind farm in the Moray Firth. If the five-year pilot is successful, a 200-turbine wind farm will be built and should generate enough electricity to supply the entire city.
Perhaps surprisingly, the city boasts Europe's highest concentration of life scientists per head of population. For example, it is second only to Cambridge when it comes to antibody engineering, with four antibody engineering companies based here. One of these, Haptogen, is developing therapeutic antibodies that target the molecules bacteria use to communicate. Just before Christmas the University of Aberdeen spin-off signed a deal with a US biotech giant and a Korean pharmaceutical company (the details have yet to be announced) to take two of its products through clinical trials.

Another surprise is a small but growing electronics industry, including the start-up 4i2i, which in September last year won a contract with NASA worth £135,000. The company's video coding technology will allow astronauts to beam DVD-quality images back from space.

In 2001, four departments at the University of Aberdeen were awarded the second-highest rating – five - in the Research Assessment Exercise (RAE): plant and soil science; biological sciences; community-based medicine; and pure mathematics.

**SCOTLAND BY NUMBERS**
- Despite being home to just 9 per cent of the UK population, Scotland wins 13 per cent of the UK research councils' funding
- It ranks third in the world for the number of research papers published per head of population
- 18 per cent of all UK biotech-related PhDs are awarded here
- The country produces nearly 20 per cent of the UK's life-science graduates
- Between 1990 and now, the number of biotech organisations in Scotland grew from 257 to 505. Over the same period the number of people employed in the industry here has grown from 13,000 to 27,000.

**Dundee**
"There's mountaineering, hiking, kayaking, sailing. If you are an outdoors person like me this is a great place to be" Spiro Rombotis, CEO Cyclacel

Electric street lighting, submarine telephone cables, hole-in-the-wall cash dispensers, keyhole surgery and marmalade all started life in Dundee. Continuing its tradition of discovery, the city is now the third
biggest biotech cluster in the UK (after Cambridge and the region around Oxford) - up from seven companies to 40 in the past 10 years, 12 of them spin-offs from the University of Dundee. And unlike companies at other locations, not a single one has gone under during that time. One of those spin-offs is Cyclacel, founded by Nobel laureate David Lane in 1997, which now has nine potential cancer drugs in the pipeline, three of them in clinical trials.

Biotech businesses are booming all over the city. In October, the Dundee branch of the US-owned company Upstate, which makes biotech reagents, expanded its premises in Dundee Technology Park. When the company came to the city in 1999 there was just one member of staff. There are now 77.

Another Dundee company, Axis-Shield Diagnostics, is one of the top 20 biotechs in the world measured by sales.

The originator of many of these businesses, the University of Dundee, hosts two five-star departments - the highest RAE rating - in preclinical medicine and biological sciences, and four departments rated five, including civil engineering. Last year it opened the first forensic anthropology department in the UK.

The university's prestige in biology is largely due to the Wellcome Trust Biocentre, which opened in 1997 and performs basic medical research. The centre will effectively double in size in July when a new building housing the Centre for Interdisciplinary Research opens for business, specialising in diabetes and tropical diseases.

Edinburgh

"You can take the excellence of the science base as read, but the city is also a wonderful place culturally. The Scottish Chamber Orchestra and Royal Scottish National Orchestra are based here. We've got galleries and museums, the Edinburgh International Festival, a jazz festival, a film festival, a book festival, the military tattoo..." 

John Archer, principal of Heriot-Watt University and chair of Scottish Enterprise Edinburgh.

Edinburgh has every right to call itself the brainiest city in Europe - it has more graduates per head of population than any other European city. Its intellectual life and neoclassical Georgian architecture have earned it the nickname "the Athens of the north". Not surprisingly it has more universities than any other Scottish city: a grand total of four. The most science-oriented is Heriot-Watt, which has three departments rated five in the RAE - applied mathematics, statistics, and the built environment - and a five star rated department of mineral and mining engineering. Last year, the University of Edinburgh ranked 10th in Europe and 47th in the world in a league table of research universities. Complementing this strong academic base are the technology parks and scientific institutions that have mushroomed across the city and its environs. In an effort to coordinate and market their activities internationally, the Edinburgh Science Triangle (EST) was created at the end of September 2004, bringing together seven of them.

The new grouping brings together unusual bedfellows, including the Roslin Institute, birthplace of Dolly the cloned sheep, and household names in electronics such as Motorola and Epson on the Alba Campus in the heart of Scotland's Silicon Glen in Livingston, which is 30 minutes' drive from the city centre. The Triangle also brings under one umbrella the pioneering work of the Institute for Stem Cell Research and the optoelectronics expertise of the Heriot-Watt Research Park.

Jim Wallace, Scotland's enterprise minister, says the collaboration establishes "a critical mass of innovative and dynamic research expertise" that will create 15,000 skilled jobs and contribute around £750 million to the Scottish economy.

The Wellcome Trust Biocentre in Dundee is to double in size this year

In two weeks' time New Scientist answers your burning questions about taking a PhD

Glasgow

"It's a great place to live. If you'd been here 10 years ago and came back now you would not recognise it. A lot of jobs have been coming in, including high-tech jobs, so there isn't the same unemployment and depression there was" David Jackson, University of Glasgow chemist and director of ScotCHEM.
Sometimes referred to as the Dear Green Place, there are no fewer than 70 public parks and gardens in Glasgow. More than 2 million tourists visit every year, many using it as a base to explore the magnificent surrounding countryside.

But Glasgow is not just a pretty place, it is also well endowed academically, with three world-class universities: Glasgow, Strathclyde and Caledonian. The University of Glasgow has 11 science departments rated five in the RAE - more than any other Scottish university. Chemistry at Glasgow is rated a respectable four, but with chemistry and physics departments closing or scaling back all over the UK, that might not have been enough to ensure its survival. But Scotland has a unique solution. In November the departments at Glasgow, Strathclyde, Edinburgh and St Andrews united as ScotCHEM. The idea is to capitalise on the strengths of particular departments rather than competing. They will share facilities and make joint bids for funding.

The future of physics at Glasgow and Strathclyde universities has also been buttressed with the creation of the Scottish Universities Physics Alliance. The other SUPA departments are at Edinburgh, Heriot-Watt, Paisley and St Andrews. Between them, ScotCHEM and SUPA will receive more than £37 million over the next four years in government and university funding. The University of Glasgow also hosts the renowned Optoelectronics Research Group, and its psychology department is five-star rated. The Sackler Institute of Psychobiological Research opened last year, with state-of-the-art brain imaging and sleep research facilities at Southern General Hospital.

Are you clever enough to work for Katie?

Katie is diabetic. And like millions of other patients around the world, she depends on our LifeScan blood glucose monitoring equipment to keep her healthy. Our world-class research and development facility in Inverness is run by a dedicated, highly skilled team, keeping us at the forefront of our market. And we need your help.

As a wholly owned subsidiary of Johnson & Johnson the opportunities are endless within our open creative and supportive environment. We are looking for individuals with energy, passion and a determination to succeed who will contribute to creating a life without limits for people with diabetes. We are particularly looking for individuals who have worked in a medical device, IVD or high volume regulated manufacturing environment.

Highly competitive salary, pension & benefits package with generous relocation. Inverness.

**Process Engineers** - You will provide leadership and support on process and product issues, your role will be to develop new and/or improve existing products and processes. Responsibilities include designing and performing process development experimentation, developing and reviewing manufacturing process documentation and developing the necessary equipment, process and product knowledge.

**Controls Engineers** - You will be responsible for the provision of first class engineering support for all control systems associated with our manufacturing process. You will be involved in the implementation of improvement projects that improve compliance and efficiencies. A background in the design and implementation of PLC and PC control systems is required as well as previous experience of dealing with planned and unplanned maintenance, machine/system test and commissioning.

**Facilities Engineers** - With over 700 employees on site, the ongoing development and improvement of all buildings, electrical, mechanical and controls facilities is essential. Working as part of a focused facilities management team, your role would be to project manage these new developments and improvement programmes. You will have strong experience working in a large diverse facility, be able to demonstrate leadership and problem solving skills and will be familiar with site safety regulations and validation processes.

**Project Manager** - In this role you will lead aspects of highly integrated and complex projects focused on delivering new processes and equipment platforms for our newest and most advanced products. You will have the ability to lead a multidisciplined team, manage budgets and deliver against challenging timelines.

**Quality Roles** - Quality is critical to all we do. We have a number of opportunities within the Operations and Development Quality teams. If you have a background in providing leadership into quality input and direction for development projects or leading continuous improvement activities using lean manufacturing, 6 Sigma and design experimentation or working with CAPA programmes or have worked in a complaint investigation capacity liaising with testing labs then we want to hear from you.

**Statisticians** - Your role will be to provide statistical support across the company - including R&D, Operations and quality. Working as part of a strong, focused team, you will be involved at the start of new projects, providing the teams with experimental design, trend analysis, data analysis and reporting. With at least 3 years experience gained in a similar role, you will have a degree in Statistics or a related subject, and experience of SPSS or similar.

**Senior Project Engineer** - The key purpose of this role is to lead the development of equipment platforms and strategies to support new products. Included in your responsibilities will be defining process equipment requirements, determining budgets, negotiating with equipment suppliers and evaluating existing capital efficiencies. A background in custom-built equipment projects together with strong project management skills is essential.
There are a number of other exciting job openings at LifeScan - and we are particularly keen to speak with:

- IT/Systems Analysts
- Mechanical Design Team Leaders
- Quality Lab Team Leaders
- Regulatory Affairs Specialists
- Supplier Quality Engineers
- Supplier Quality Auditors
- Design Transfer Engineers
- Operations Engineers
- Senior Microbiologists
- Senior Resourcing Specialists

We are based in a beautiful port of Scotland - so you can enjoy a lifestyle that matches your career potential! We are confident that the salaries and benefits packages are amongst the best in the industry. Please apply by mailing your CV with a covering letter and salary to lifescan@online-cvs.com

Lifescan
Scotland Ltd
A Johnson & Johnson company.

[2485-002 (2005) : 56-57]
The Beatson Institute for Cancer Research is Scotland's leading cancer research centre. It is core funded by Cancer Research UK and supports diverse and dedicated groups carrying out cutting-edge research into the molecular mechanisms of cancer development. The Beatson Institute is growing. We are building a new research centre and plan to double our size over the next few years.

Group Leaders
As part of ongoing recruitment, we are inviting applications for Group Leader positions from outstanding scientists with an interest in cancer research, a commitment to excellence, and a strong record in and command of their field. The resources available include research posts from core resources with space for expansion for further staff on outside funding. Salary will be dependent on experience. Further information is available on our website www.beatson.gla.ac.uk or from the Director of the Institute, Professor Karen Vousden, tel: 0141 330 3979; email: k.vousden@beatson.gla.ac.uk To submit an application please include a CV, a brief description of research achievements and future proposals and the names of three referees.

Postdoctoral Fellows
Postdoctoral positions are available in Professor Frame's lab studying new regulators of tyrosine kinase-induced oncogenesis. A combination of technologies, including proteomics to identify novel molecular complexes downstream of peripherally acting tyrosine kinases, and molecular intervention strategies (for example RNAi), will be used to dissect their roles in appropriate cancer cell models. Applicants should have a good degree, and PhD in Molecular Cell Biology, or other relevant area of Biosciences, and should be committed to their scientific career progression.

To submit an application please include a CV and the names of two referees to Professor Margaret Frame tel: 0141 330 3979; email: m.frame@beatson.gla.ac.uk or by post to the address below. Salary will be in the range £23,161 - £25,999 for up to three years' postdoctoral experience. A higher starting salary will be considered for those candidates with greater experience.

Technology Transfer Assistant (Part-time) - developing Intellectual Property and assisting in Technology Transfer
Responsibilities will include assisting with: MTAs, CDAs, consultancies and revenue sharing, the development of collaborations and sponsored research agreements. This is an administrative post; however, applicants should hold a PhD and have at least two years' experience as a research scientist in a field of biomedical research. A previous background in technology transfer and/or knowledge of legal issues would also be of value; however, a sound and robust understanding of scientific and medicinal applications is paramount.

To submit an application please include a CV and the names of two referees to Dr Katherine Walker, tel: 0141 330 8695; email: k.walker@beatson.gla.ac.uk or by post to the address below. Salary will be in the range £23,161 - £25,999 pro rata.

The Beatson Institute for Cancer Research is on Garscube Estate, Switchback Road, Bearsden, Glasgow G61 1BD, Scotland. www.beatson.gla.ac.uk
Charity no: SC006106

Opportunities in Scotland
Scotland's life sciences industry is one of the most vibrant in Europe - employing over 25,000 people. The quality of life in Scotland is among the highest in the UK.
If you have a science degree or experience in this industry, then SRG can help you find the best jobs in this beautiful country that has so much to offer. So, why not take a fresh look at Scotland and come back to the land of opportunity?

Some of the opportunities available:
- QA Officer, perm, Central Scotland c£25
- Regulatory Affairs Officer, perm, central Scotland c£25
- Synthetic Organic Chemist, contract, up to 2 years experience in related role c£23
- Microbiologist, Perm, Dundee, Env Monitoring c£13
- Inks Chemist (Flexographic), Central Scotland, Perm, previous flexographic inks experience c£18K
- Radiochemist, 1 year contract, Ayrshire, liquid scintillation counting and gamma spectrometer experience required £18K

To apply, email your CV to: Scotland@srg.co.uk

The University of Edinburgh

**MSc in High Performance Computing**

**UK/EU studentships available**

EPCC at the University of Edinburgh offers a one-year taught MSc in High Performance Computing (HPC). This well established programme provides an excellent grounding in HPC technologies and their practical application. EPCC is an institute within the School of Physics. It has an international reputation as a leading centre of expertise in HPC and Grid computing. EPCC supports HPCx, which is the UK's flagship academic supercomputer service and one of the largest machines in Europe. EPCC also hosts an IBM Blue Gene system, the architecture used to build the most powerful supercomputer in the world today.

This MSc will appeal if you have a keen interest in programming and would like to learn about HPC and parallel programming. The course has a strong practical focus and you will have access to leading-edge HPC platforms and technologies. Applications are encouraged from people who are competent programmers in Java, C++, C or Fortran, and are graduates in science, engineering, computer science and mathematics or are currently working in a relevant field.

The entrance requirement is a good honours degree or equivalent work experience. No prior HPC knowledge is assumed.

The closing date is 28 February 2005 for UK/EU nationals and 31 January 2005 for non-UK/EU nationals.

For more information and application details see [http://www.epcc.ed.ac.uk/msc/](http://www.epcc.ed.ac.uk/msc/) or email msc@epcc.ed.ac.uk. The MSc in HPC is supported by EPSRC, who offer a number of funded studentships for UK/EU students.

THE UNIVERSITY OF EDINBURGH

[2485-007 (2005) : 59]
Applications are invited for studentships in the following areas:
Role of Dectin-1 in dendritic cell function (Dr Simon Wong)
A novel role for HLA-827 in the inflammatory disorder Ankylosing Spondylitis (Dr Simon Pawis)
Control of Gene Expression by Induced Protein Folding (Dr Iain McEwan)
Gene nutrient interactions and bone health (Dr Helen MacDonald)
Regulatory circuits that control the responses of a fungal pathogen to its host (Professor Al Brown)
Cell-cell adhesion and mechanotransduction in bone (Dr Miep Helfrich)
Novel genetic systems to study brain circuits. (Professor Bill Wisden)
Cell cycle, hyphal growth and pathogenesis of Candida albicans (Professor Neil Gow)
Cancer as a developmental disease (Dr Martin Collinson)
TNF life/death switching as a means of controlling human cancer cell fate. (Dr David MacEwan)
Neuromuscular adaptations to vibration (Dr Marco Cardinale)
The involvement of PrLZ in human prostate cancer (Dr Kath Shennan)
Functional genomics of alpha-catenin function: understanding the role of an important tumour suppressor (Dr Jonathan Pettitt)
Species differences in substrate specificity and induction of hepatic drug transporters (Professor Gay Hawksworth)

Students from the UK/EU who are interested in the above positions should respond by e-mail to c.e.bain@abdn.ac.uk, attaching a short CV that includes the names of at least 2 academic referees. Please indicate clearly the project in which you are interested. Further details of all these research opportunities can be found on our Graduate School website at www.abdn.ac.uk/clsm/graduateschool
Midland Valley

**Senior C++ Software Developer**

Location: Glasgow  Salary: 35-45K (dependent on experience) + benefits

A superb opportunity for a skilled and motivated C++ programmer with 5+ years of commercial experience in a software development role. You would be working in a dynamic software development team and developing exciting 3D graphical modelling applications for the Oil & Gas industry.

Requirements:
- Minimum 5 years relevant work experience focused on C++.
- Software engineering, IT or other degree with necessary experience.
- Excellent system development and software architecture skills
- Strong mathematical skills
- Excellent communication skills including fluency in English

Beneficial:
- The ideal candidate will have a successful track-record of developing desktop applications in a scientific field e.g. geology / geophysics or the oil industry
- Cross platform development: Windows, Linux, Irix, Solaris
- Writing multithreaded code
- Perl, Python, SCons or make experience
- Perforce SCM experience
- Elegant and effective GUI design
- Knowledge of any of the following libraries or APIs : Open Inventor (Coin), OpenGL, Qt, Boost, Zthreads, CGAL.
- Experience of continuous integration (e.g. CruiseControl), unit testing (e.g. cppunit) or other modern development practices.

Responsibilities:
- Key application developer on our structural geology modelling products 4DVista, 2DMove and 3DMove. Programming and design of algorithms and components.
- Implementing agreed systems for QA/QC

To apply please email a covering letter and CV to Colin Dunlop, colin@mve.com

Midland Valley is an accredited Investor in People.

PROVEXIS  
NATURAL PRODUCTS  
Aberdeen, UK  
£ Competitive + share options  
Provexis develops novel patented products, backed by strong research, for application in functional food & medical food markets.

**Formulation Specialist**  
Working closely with the research project leaders, you will formulate bioactive extracts to maximise biological efficacy. You will develop and control manufacturing processes, implement GMP procedures and control key process data and documents. Frequent travel between the UK and Ireland will be necessary. A graduate or equivalent in chemistry, biochemistry or a related subject, you will have practical experience of GMP manufacturing, preferably in the food industry.

**IBD Product Development Project Leader**  
You will be involved in developing and implementing a research strategy to underpin new product development in the area of Inflammatory Bowel Disease (IBD). In liaison with other R&D staff, you will optimise product characteristics and be involved in the design and management of clinical trials. You are likely to be a highly motivated postdoctoral scientist or MD with research experience in the area of IBD or colon cancer. Travel between Aberdeen and Liverpool will be required.

**Research Scientist**  
A graduate or equivalent in biochemistry or life sciences with research experience in clinical applications is required to join the Cardiovascular Disease (CVD) team. Working as part of a team to carry out platelet function measurements during human trials, you will also work independently researching the modulation of platelet function by natural plant extracts.

Please send your CV, including a covering letter, to: Dr Niamh O'Kennedy, Provexis Limited, The Rowett Research Institute, Bucksburn, Aberdeen AB21 9SB, or by email to niamh.okennedy@provexis.com  
Closing date: 10th February 2005  
[2485-010 (2005) : 60]
LABORATORY TECHNICIAN

We require, as soon as possible, a well motivated and enthusiastic Chemistry Technician to work in our newly refurbished department. The post would ideally suit someone who would welcome the opportunity to assist in our efforts to make practical chemistry relevant and exciting to all our students. The person appointed will be responsible for assisting the teaching staff with the day-to-day running of four laboratories and for assisting the other science technicians as required. The successful applicant will hold at least a Higher National Certificate in a related field.

If you enjoy working with young people and adults and are interested in a fresh challenge in a forward looking school, please send a letter of application, including your CV and the details of two referees, by Wednesday, 16th February 2005 to the Deputy Head, Mr Neal Clark, from whom further details may be obtained. General information about the school can be obtained from our website, www.esms.edin.sch.uk
Environment and Rural Affairs Department

Ecological adviser
£21,292-£26,728
Edinburgh

Want to be part of the team providing ecological and environmental advice across a range of policy areas? We need an enthusiastic, motivated individual to join a small team based at Victoria Quay, Edinburgh. The team provides impartial ecological and environmental advice and guidance to ministers and policy staff across the Scottish Executive. Much of the work involves biodiversity, agriculture, fisheries, Natura, wildlife and development & energy issues. You will specialise in and lead on marine and aquatic issues and be a contact point for ecological and environmental advice and information on these issues.

You will have a sound knowledge of the environment and natural heritage in Scotland with particular knowledge and experience of wetland, aquatic and marine issues. You will have either a relevant postgraduate degree and a degree in ecology or similar discipline and at least two years' experience in a professional ecological field or a degree in ecology or similar discipline plus three years professional ecological experience. You will also have practice in providing ecological and environmental advice. You will have a proven ability to research, analyse and interpret ecological and environmental information and to present your analysis and advice clearly and effectively to customers. Sound writing and presentation skills are therefore essential. An ability to work with others through sharing knowledge and developing good working relationships is necessary.

A willingness to travel to locations throughout the UK is required.

This is a permanent and pensionable appointment. Applications from candidates wishing to work part-time or on a job-share basis will be considered. Starting salary will be determined by the skills and experience evident to the Selection Board. Pay is performance related, offering progression and bonuses to high achievers. Salary will be pro rata for part-time.

We shall invite to the interview stage any applicants with disabilities who meet the basic criteria.

If you wish to discuss this post informally, please ring Joanna Drewitt, Senior Ecological Adviser on 0131 244 1437. You may access an application form and full details online at www.scotland.gov.uk/government/careers Alternatively, please write to the Scottish Executive, Recruitment Unit, T Spur(EA), Saughton House, Broomhouse Drive, Edinburgh EH11 3XD (or E-mail to: angela.ray@scotland.gsi.gov.uk providing your full postal address).

We regret that we are unable to accept telephone requests. Completed applications must be returned by Friday 25 February 2005.

We welcome applications from all suitably qualified people and aim to employ a diverse workforce which reflects the people of Scotland.

An Equal Opportunities Employer

SUPA
Scottish Universities Physics Alliance (SUPA)
Applications will shortly be invited from outstanding physicists for permanent academic positions and 4-5 year research posts within SUPA, an "Alliance for Excellence" formed to enhance Scottish physics research through co-operation and collaboration. In its launch phase, SUPA will offer the following posts (to be held within its partner institutions) to help develop the Alliance through targeted initiatives: 4 Professorships, 16 Readers/lectureships, 14 SUPA Advanced Fellowships, a SUPA Chief Executive and a Director of the SUPA Graduate School; plus 8 SUPA Prize Studentships per annum.
Appointees will join a community of some 500 academics, research staff and graduate students dedicated to raising further Scotland’s international standing as a leading centre for physics research. SUPA is organised around five major theme areas of research excellence, linked together by a Graduate School which will offer studentships and a Distinguished Visitor Programme.
For details of posts and theme areas, of the Graduate School, and to learn more about SUPA, visit: www.supa.ac.uk

Prize PhD Studentships
The Scottish Universities Physics Alliance (SUPA) is offering up to 8 fully funded PhD studentships for outstanding students from anywhere in the world. The alliance brings together internationally leading physics research across Scotland to form the largest physics grouping in the UK. Major research themes being pursued are astronomy, condensed matter and materials physics, nuclear and plasma physics, elementary particles and photonics.
These prestigious and competitive awards are intended to attract outstanding students to study for a PhD in Scotland. Applicants will be registered for a PhD in physics at one of the participating Universities namely Edinburgh, Heriot Watt, Glasgow, Paisley, St Andrews and Strathclyde. An excellent training environment will be provided by the SUPA Graduate School, giving candidates access to a wide range of courses across Scotland.
Applications should be made at www.supa.ac.uk by March 11th.

UNIVERSITY OF ABERDEEN 1495
School of Medical Sciences

Research Assistant/Research Fellow (MRI)
£19,460 - £29,128 per annum

TauRx Therapeutics, a company based in the School of Medical Sciences at Aberdeen University, is developing agents to visualise and treat Alzheimer's Disease. Development data will be acquired using a high field, small bore MRI system, and TauRx intend to recruit a physicist to carry out the work. You will have experience of operating MRI systems, MRI protocol design, data analysis and RF coil design. The post is for two years in the first instance and would suit a person who has completed, or is about to complete, a PhD in MRI. Informal enquiries to Professor Claude Wischik (Tel: 01224 555709, e-mail c.m.wischik@abdn.ac.uk).

Online application forms and further particulars are available from www.abdn.ac.uk/jobs. Alternatively e-mail: jobs@abdn.ac.uk or telephone (01224) 272727 (24 hour answering service) quoting reference number YBM114R for an application pack.

The closing date for the receipt of applications is 18 February 2005. Promoting Diversity and Equal Opportunities throughout the University

VACANCIES FOR PRINCIPAL INVESTIGATORS, LECTURER/ SENIOR LECTURERS, a SCIENTIFIC OFFICER, POSTDOCTORAL RESEARCHERS and a RESEARCH ASSISTANT in the SCHOOL OF LIFE SCIENCES and WELLCOME TRUST BIOCENTRE
University of Dundee, Scotland
The 5* research-rated School comprises 70 Research Groups and 650 staff from 53 countries and was recently rated the best European research institute in which to work ("The Scientist", November 8th 2004). Research papers published by University of Dundee scientists in the fields of Biology, Biochemistry and Molecular Biology were more highly cited over the past 10 years than any other University in Europe. Current research grants exceed £24 million p.a. A new research building will open in July 2005. There are vacancies for Principal Investigators in 3 Divisions. A Lecturer/Senior Lecturer in Forensic Anthropology and a Lecturer/Senior Lecturer in Anatomy are available along with a Lecturer within the Academic Fellowship Scheme. There is also a vacancy for a Scientific Officer with Professor Humer, a Research Assistant with Professor Crocker and new postdoctoral positions with Professors Hardie, Stark and Dr Dale. Additional postdoctoral vacancies also exist in several Divisions. For further details about these positions and how to apply, please consult our website or email
j.v.brown@dundee.ac.uk

[2485-020 (2005) : 62]
Scottish Natural Heritage (SNH) is a government body responsible to Scottish Executive Ministers and, through them, to the Scottish Parliament. The task of SNH is to secure the conservation and enhancement of Scotland's natural heritage - the wildlife, habitats and landscapes which have evolved through the long partnership between people and nature.

SNH manages a vigorous Research and Technical Support Programme and is supported in this by its Scientific Advisory Committee. As part of developing its research work linked to its operational priorities, SNH proposes to fund a number of studentships to support research. In 2005, SNH will fund three Ph.D studentships drawn from one or more of the following areas within the SNH Corporate Plan:

- Access and nature conservation
- Impacts of renewable energy development
- Biodiversity
- Climate change and the natural heritage
- Large scale ecology, especially in relation to ecological networks and catchment management
- Coastal dynamics and sediment regimes

Applications are sought from UK University/Research Institute staff wishing to secure funding for a studentship. The annual stipend for the studentships would be £15,000 (running for 3 years). The closing date for outline applications is 4 March 2005. An announcement on the successful applications will be made by the end of March 2005. An application form is available by post from Marian Brown, SNH, 2 Anderson Place, Edinburgh EH6 SNP, or by email from Marian.Brown@snh.gov.uk

If you have scientific enquiries about SNH studentships contact Dr Phil Boon, Advisory Services, SNH, 2 Anderson Place, Edinburgh EH6 51N. Tel: 0 131 446 2412 or email: Phil.Boon@snh.gov.uk

SNH encourages applications from all sectors of the community

**State Registered Clinical Scientists**
Grade B11-18 £24,906-£32,772 (depending on experience)
Joining our Portsmouth Medical Physics Service, you’ll provide scientific and technical support in the field of MRI, and secondly in Bone Densitometry. This will also involve medical image processing and analysis. Consideration will be given if you are not currently state registered with the aim of achieving this. It is expected that training will be provided in some areas and there are good opportunities and funding available.

MRI: The Trust currently operates two MRI scanners with installation of a further machine programmed following the completion of the redevelopment of the Queen Alexandra Hospital site in 2007/8. You'll provide routine scientific and developmental support. Current clinical developments include the use of MRI data in radiotherapy planning, vascular and cardiac MR. Ref: 192-CS-0109.
Bone densitometry: The Medical Physics Service run the Portsmouth Osteoporosis Scanning Service and sees around 2,000 patients per year. The service is equipped with a Hologic Discovery A DXA machine.
For both roles, you'll be involved in medical image processing and analysis projects using IDL and/or Matlab. This will be to support service developments in digital imaging, and the use of digital image data within the Medical Physics Department and imaging/clinical departments within the Trust. Collaborative working with colleagues in Southampton and universities with whom the department has R&D agreements will be encouraged. Both posts are based at St. Mary's Hospital and will involve some travel to other hospitals/centres.

For informal enquiries and/or to arrange a visit, please contact Mike Holubinka, tel: 023 9286 6461 or email: mike.holubinka@porthosp.nhs.uk

**Clinical Scientists Radiotherapy Physicists**
• Grade B8 - 13 • £22,143 - £26,939 (depending on experience) • Ref: 192-CS-0101
The Radiotherapy Physics Group of the Portsmouth Medical Physics Department has vacancies for two Clinical Scientists. You must have a first degree in Physics, or other appropriate science subject, and preferably a post-graduate qualification (MSc or PhD) with additional relevant experience.
These posts are established as part of the ongoing expansion of the Portsmouth Oncology Centre, and also provide ideal training opportunities. You'll join a friendly and enthusiastic team of 7 physicists and 6 technicians who provide the comprehensive physics support to an Oncology service that is equipped with the most modern equipment. You'll be expected to make a contribution to the day-to-day physics support in a number of areas of radiotherapy physics. There is an active research and development group with interests in Monte Carlo simulation and radiotherapy imaging and networking, with opportunities to participate in project work within the diagnostic imaging areas of the Medical Physics Department. There are close links with academia and participation in research and development will be encouraged depending on your interests.

For informal enquiries and/or to arrange a visit, please contact Mrs. F Morris, tel: 023 9286 6166 or email: forbes.morns@porthosp.nhs.uk
To apply, please go to www.jobs.nhs.uk and type the relevant reference number into the quick search. Alternatively, you can telephone our 24-hour answerphone for an application pack on 023 9228 6203 or email: recruitment@porthosp.nhs.uk quoting the relevant reference number.
Closing date: 3rd March 2005.
The Trust is committed to valuing the benefits of diversity in its staff.
POSITIVE ABOUT DISABLED PEOPLE

Looking for a career in Bioinformatics?

**Protein Analysis Specialist Bioinformatics Support Team** Salary £23 - 24k p.a.

Bioscience IT Services (BITS) is the core supplier of IS/IT services to the Research Establishments of the Biotechnology and Biological Sciences Research Council throughout the UK. We provide central computing support to the scientists at the BBSRC's Institutes, many of whom are involved in important research into protein structure and function using modelling techniques.

We are looking for an enthusiastic individual to join a small team providing support and training for scientists using computational molecular biology techniques.

**BBSRC**

Bioscience IT Services

If you have communication and presentation skills, are prepared to take responsibility for support of scientists working in the areas of protein analysis and structure/function prediction and are interested in a career in bioinformatics, then we would like to hear from you.

Applicants should be educated to degree level in a biological science, with 3-4 years research experience of current techniques in this area of science. A sound understanding of current research techniques is more important than computing experience. If necessary, we will provide training in the use of computational molecular biology techniques, especially those in modern protein analysis and current modelling structure viewing software. Experience of Office desktop packages is also required. A knowledge of PERL or UNIX shell scripts would be an advantage but is not essential. A full current driving licence is required.

BITS is committed to the personal development of all staff. We offer core technology training and the opportunity to develop transferable skills. A choice of pension schemes and 25 days annual leave are offered. We are located in pleasant rural surroundings with excellent sports and social facilities on site.

If you would like to speak to someone informally about the post please telephone Dr John Owen on the number below.

For an application form and further particulars, please contact the Personnel Officer, BBSRC Bioscience IT Services, West Common, Harpenden, Herts AL5 2JE. Tel: 01582 714900, email: itjobs@bbsrc.ac.uk or visit our website at www.bits.bbsrc.ac.uk Please quote reference: Post 94.

Closing date for applications: 22 February 2005.

The BBSRC is an equal opportunities employer.

INVESTOR IN PEOPLE

[2485-023 (2005) : 64]
Senior Computational Systems Biology/ Mathematical Modeling
Stevenage, United Kingdom

At G1axoSmithKline, one of the world's leading pharmaceutical businesses, we discover, develop and produce products that help people live longer, do more and feel better. The Scientific Computing and Mathematical Modeling group, SCMM, applies mathematical and computational techniques to, a variety of challenging problems in pharmaceutical research for both biological and physical systems. In this senior mathematical modeling role, you'll evaluate scientific opportunities, develop strategies, provide leadership to multidisciplinary teams, and act as a group leader for a mathematical modeling team. You'll also develop mathematical models of the kinetics of metabolic, signal transduction, and genetic regulatory networks. While the work will focus mostly on eukaryotic systems, prokaryotic ones will be of some interest as well. Reconstructing the biology, developing the mathematical models, validating them, and applying your results to our development efforts will be the focus of this role. This work will require the ability to work with a wide variety of different computational and numerical analysis approaches, especially differential equations, optimisation, and dynamical systems. Above all, you will need to communicate your findings to a range of scientific teams.

We are looking for someone who can successfully apply sophisticated mathematics to pharmaceutical problems. You should be able to learn quickly in many areas of biology and mathematical computation, assimilate the complex phenomenology of problems and develop practical as well as creative approaches. Supervisory experience and expertise in building and utilising mathematical models of pathways or biological networks are essential. At the same time you should also have an excellent grounding in several of the following: optimisation, differential equations, function approximation, dynamical systems, fractals and stochastic processes, modeling, and other modern computational techniques. Physical, life sciences or engineering experience is an advantage and a PhD. in a scientific field is required.

To find out more, and apply, please visit www.gsk.com/careers A full description of this role can be found under job ID 20594. All data is processed in accordance with the provisions of the Data Protection Act.

POSITIVE ABOUT DISABLED PEOPLE

Be heard at the MOD

Acoustics Scientist

Up to £29,000 & benefits - Based Winfrith, likely to relocate to Porton Down, Salisbury in 2-3 years

Dstl, the Defence Science and Technology Laboratory, provides a wealth of scientific and engineering expertise to the Ministry of Defence (MOD) that gives UK Armed Forces the competitive edge.

The Acoustics team within our Physical Sciences department is concerned with all aspects of acoustics that affect the underwater domain. These include acoustic scattering, structural acoustics and receivers, as well as modelling of ocean acoustics and sonar performance. We are now looking to expand our capability in these areas.

Together with a good relevant degree, you must have three years' experience in either acoustics or a related field that demonstrates the ability to apply your technical knowledge across associated domains. You will be self-motivated and capable of working with minimal supervision, yet also able to work closely with others in the team. Innovative and flexible, your technical expertise must be complemented by the ability to communicate at all levels, both verbally and in writing.

In addition to a stimulating and rewarding career, as a civil servant you'll enjoy a competitive benefits package. This includes a choice of stakeholder or final salary pension schemes, generous holiday allowance, relocation assistance where appropriate, and good sports and leisure facilities.

Applicants who reach a suitable standard in this campaign, but are not appointed, may be considered for other vacancies.

Dstl is a committed equal opportunities employer and recruits staff fully on the basis of specified competencies and skills.

This permanent post is only open to UK Nationals. Applicants must be willing to undergo and satisfy the current Government/MOD Security Vetting procedures prior to a formal offer of employment being made.

Under the Dstl rationalisation programme it is anticipated that this post will be relocated to Porton Down in the next 2 - 3 years.

For an application form, job and competency profile, please contact, quoting reference 020709, Response Solutions, aia*, 5 St John's Lane, London EC1M 4BH. Email: response@aia.co.uk Tel: 020 7553 9120 (between 9.30am and 5.30pm). If you have a hearing impairment we are happy to accept Typetalk calls.

Closing date: 24th February 2005.

*aia is a recruitment advertising agency and is handling the response to this advertisement on our behalf. Your details will be sent to Dstl only and will not be used for any other purpose, www.dstl.gov.uk

Dstl is part of the Ministry of Defence

[2485-025 (2005) : 65]
You could be instrumental in shaping future agendas.

As one of Europe's most influential and innovative environmental regulators, we're right behind the use of economic instruments, such as Emissions Trading Schemes, to achieve global environmental targets. We're also looking to take a lead in the development of informatics in our understanding and management of the environment.

In these vital and growing areas of our work, two new leading roles have been created. Both call for a high degree of intellect and expertise. And both offer the chance to have a positive, long-term impact on environmental policy and political thinking.

**Policy Advisor - Trading & Economic instruments**

Bristol • £31,100 - £35,400 • 12 Month Fixed Term Contract

Trading schemes and other economic instruments undoubtedly have a key role to play in future environmental outcomes. Your brief will be to develop our approach to the design and implementation of these schemes and support the case for new instruments in environmental regulation. With the introduction of schemes for greenhouse gases, biodegradable waste, water abstraction and acid gases, you will be strengthening our reputation as Europe's leading environmental innovator. With the ability to influence and negotiate with Government, you'll shape strategy and policy for the use of instruments across various industry-sectors, in particular energy.

Ideally a graduate in Economics or a closely relevant technical field, you'll certainly have an in-depth understanding of industrial business economics and trading dynamics. A persuasive negotiator with a keen environmental awareness, you now have the chance to make a huge impact over the course of this 12-month contract. Ref: EP0090

**Principal Scientist - Informatics**

Bath • £31,100 - £35,400

There is massive potential for data mining and statistical modelling to add to our understanding and management of the environment. Your objective will be to pull together the huge variety of datasets that exist throughout the Agency - and in other organisations - and exploit this potential to the full: you'll be working with Science Managers to develop, challenge and validate hypotheses relating to environmental change. From the outputs of data mining; modelling or hypothesis testing you'll identify any changes that may be needed in our environmental policies.

There's no denying it is a huge challenge, even for a postgraduate like you with several years' experience in statistical modelling and high level expertise in informatics. By the same token, it is also a massive opportunity to take the science forward and redefine the future of environmental policy development. Are you ready to seize it? Ref. SC0067

Besides the personal and professional rewards, both positions offer an attractive package, including a contributory final salary pension scheme (with life cover), generous holidays, flexible working and family-friendly provisions.

For a full information pack and to apply, please visit www.environmentagency.gov.uk/jobs

If you do not have internet access call Tina Drew on 0117 414 2915 (Policy Advisor) or Melissa Turner on 01255 444066 (Principal Scientist) quoting the appropriate reference. Closing date for applications: 18 February 2005.

The Environment Agency is committed to achieving Equal Opportunities

Assuring the quality of biological medicines
NIBSC
Imaging Scientist • Hertfordshire
NIBSC is a multi-disciplinary scientific establishment whose purpose is to safeguard and enhance public health by standardizing and controlling biological substances used in medicine.
The development of our imaging facility, within the division of Cell Biology and Imaging, has created an opportunity for an Imaging Scientist to join the centralised biological imaging resource group.
The successful applicant will provide day-to-day technical imaging support for a wide range of scientific projects. You will be required to assist in the development of new techniques and protocols necessary to fully exploit the capabilities of the new facility. Your key responsibilities will be the processing and analysis of samples for electron, confocal and light microscopy including cellular, bacterial, and viral samples along with the coordination of the external quality assurance programme for EM viral diagnostics. Training and operation of routine microscopy services will also fall within your remit along with the development of collaborative projects with the line manager.
You will have a degree in biological sciences or an appropriate subject with significant experience in microscopy in a research or service environment. You will also need three years experience working in a laboratory undertaking a high level of microscopy including Electron Microscopy, along with good administrative and personal organisational abilities.
Salary will be on a scale from £23,000 up to £27,000, dependent on experience. Please see our website www.nibsc.ac.uk for a full job description.
To apply, please submit a full Curriculum Vitae (2 copies), including the names and addresses of two referees, to the Human Resources Department, National Institute for Biological Standards and Control, Blanche Lane, South Mimms, Potters Bar, Hertfordshire, EN6 3QG, or email HR@nibsc.ac.uk
Closing date for applications is 14th February 2005. Interviews to be held w/c 21st February. Please quote reference CB.080/1 clearly on your application.
www.nibsc.ac.uk
[2485-027 (2005) : 66]
Swindon
Patheon is a leading provider of drug development and manufacturing services in the rapidly growing pharmaceutical outsourcing sector. From our network of 14 facilities we serve a client base of 150 pharmaceutical and biotechnology companies, including 17 of the world's 20 largest pharmaceutical companies.

Section Heads - QC Microbiology
As head of a Microbiology section, you will manage a team of Scientific Officers and Technicians as well as carry out scientific and technical tasks including batch release procedures and prepare technical documentation. An Applied Biology with Microbiology (or similar) graduate with a minimum of 3 years' relevant experience in the pharmaceutical or allied industries, you will have experience in either microbiological assays, LAL testing and water testing or environmental control and diagnostics. The experience should preferably have been gained in a QC environment. Working knowledge of SAP and LIMS would be advantageous.

Scientific Officers - QC Chemistry
Undertaking a variety of laboratory procedures, you will ensure our compliance with current GMP and Health & Safety policies at all times. This will require a proven scientific background, preferably including experience in a QC laboratory and a degree level education in Chemistry or a related discipline. Above all, you should possess exceptional attention to detail and first-rate organisational skills.

These positions offer a competitive salary, benefits package and excellent career opportunities for people with a passion for applying their scientific expertise in a commercial environment.

Please send your CV and current salary details (preferably as a Word document) to qcpharma@uib.srg.co.uk or to Bhavlsha Vaidya, Senior Account Manager, SRG, Buckland House, Waterside Drive, Langley Business Park, Slough SL3 6E2. Tel 01753 589603.

Closing date: 15th February 2005

Unilever

Study one of the most complex structures known to man.

Ice Cream Technician
This is no exaggeration. Ice Cream is an immensely complicated product to create, to produce, to transport, even to store. What's more, the market for it moves incredibly fast: so to stay on top we need the most innovative science and technology - as well as the most creative people. This, then, is your chance to solve some of the most technically difficult problems for some of the biggest brands in ice cream - from Magnum to Cornetto to Carte D'Or. To get involved in developing the microstructure of new products, grapple the logistics of how to bring innovation to our worldwide supply chain, and further ahead, to join project teams across the globe. There are opportunities for fresh graduates in Physical Science, Chemical Engineering or Food Science (Ref: 105961); for those who have recently completed a PhD (Ref: 106101); and more senior roles for people with a strong record in research (Ref: 106101). The fact remains, though: whatever your background, this will challenge you. To apply, send your CV to recruitment.peoplelinkuk@unilever.com quoting the appropriate reference number. Closing date: 24th February 2005.

In applying for the above positions, you agree, unless you notify us when responding to this advert, that we may consider you for other vacancies we have and make your details available to other companies in the Unilever Group for the same purpose. Some Unilever companies are in countries without any data protection laws. We are committed to diversity in everything we do.

Applications are invited for a new Clinical Scientist post to provide a molecular genetics diagnostic service for haemophilia disorders. As a result of new funding for the establishment of an Oxford Haemophilia Centre molecular genetics service, we are seeking an experienced Grade B Molecular Geneticist to establish a DNA diagnostic service, assisted by a part-time Genetic Technologist and a Biomedical Scientist running a Factor V Leiden diagnostic service in the Centre.

This is an excellent opportunity for an experienced and enthusiastic individual to take a key role in the molecular diagnosis of haemophilia A & B disorders for the Oxford Haemophilia Centre, in a new collaborative working relationship with the Oxford Molecular Genetics Laboratory. The position will therefore be based in both of these locations. Scale points for this post will depend on previous experience.

Applications are also invited for a part-time Genetic Technologist (MT02), who will be based at the Oxford Molecular Genetics Laboratory. The successful applicant will be expected to assist the new Clinical Scientist with the DNA sequencing analysis of Haemophilia A and B genes using an automated DNA sequencer located in the laboratory.

Applicants for the Clinical Scientist post will be HPC registered Clinical Scientists with appropriate experience in the molecular diagnosis of haemophilia disorders.

Applicants for the MT02 post should have a degree in a biological science or a BTEC qualification and some experience in relevant laboratory techniques.

For informal information contact Dr John Old on 01865 857092 or Dr Anneke Seller on 01865 225594.

Closing Date: 18 February 2005

Senior Chemist - Analysers
The Bahrain Petroleum Company is the National Oil Company of the Kingdom of Bahrain. The Kingdom of Bahrain is an archipelago of low-lying islands located in the Arabian Gulf. It operates a 250,000 bpd Refinery.
The Refinery Laboratory has a vacancy for an experienced Section Head to oversee the acquisition and installation of new, state-of-the-art, analysers for both its Quality Control and Analytical Sections. These generate data for process control and for finished product certification. Applicants should have initiative and drive, the ability to trouble-shoot testing and analytical problems, possess good inter-personal skills and be able to motivate a team. Extensive knowledge of standard petroleum testing procedures for crude oil, refinery process streams and a full range of finished products, from naphtha through to asphalt, is required.
The ideal candidate will be a Chemistry Graduate with at least ten years experience in a modern petroleum testing laboratory operating a certified quality system, at least five years of which will have been at supervisory level. Knowledge and experience of environmental and laboratory health and safety protocols, including risk-assessment will be advantageous. The candidate must be computer-literate and conversant with the use of laboratory information management systems as well as being able to communicate effectively at all levels. Experience of statistical quantity control techniques will be an advantage.
In return, the rewards are excellent for a two-year renewable contract (married or single status). The position offers an attractive tax free salary, with a full range of benefits including free furnished accommodation and utilities, generous assistance with local and overseas children's education, paid annual home leave with generous travel settlement and excellent social and recreational facilities. Bahrain is a safe and stable country with a cosmopolitan society, compatible with a western lifestyle.
To apply, please send your CV, accompanied by a hand-written letter of application telling us how you meet our requirements, to:

MATERIALS TECHNOLOGIST
Morgan Advanced Ceramics Ltd (MAC), a wholly owned subsidiary of the Morgan Crucible Company plc, is one of the world leaders in the manufacture of technical ceramic components, and has nearly 20 manufacturing sites world-wide. An extensive range of advanced production techniques is utilised in order to manufacture complex engineering products, suitable for use in the laser, aerospace, medical, and telecommunication markets. The Company now wishes to recruit a Materials Technologist to join its dedicated Technical team based at our new facility in Rugby.

The role is focussed on the development and transfer of new materials and/or processing techniques into a manufacturing environment. The identification and implementation of continuous improvements in quality and process optimisation will be key to the future growth of the Rugby site.

The successful candidate will be educated to degree level or above in a materials engineering/science related subject. Previous industrial experience in the development and manufacture of ceramic and glaze products would be advantageous, as would an understanding of the processes involved in the manufacture of ceramic-metal brazed assemblies. He/she will be self-motivated, results driven and have an aptitude for problem solving. Good communication skills in a team-working environment are essential.

Career advancement opportunities exist based on individual performance within this international group of businesses.

The Company offers competitive salaries, benefits and assistance with relocation where necessary.

Applications are invited in writing to the address below. Closing date for applicants is 4th March 2005.

Morgan Advanced Ceramics
[2485-032 (2005) : 68]
The Natural Environment Research Council is one of the UK's seven Research Councils. We specialise in Earth System science, covering the full range of atmospheric, earth, terrestrial and aquatic sciences. We employ around 2,600 people in a wide range of scientific, engineering and support roles who are all highly motivated by the importance of our work and appreciate the many family friendly benefits we offer our people.

**e-SCIENCE PROGRAMME CO-ORDINATOR**
c£31,000 plus benefits, two year fixed term appointment
We are looking for a full time Programme Co-ordinator for a £15 million cross Research Council programme in Information Technology. The e-Science Programme is part of a broader government investment in e-Science to meet the data management and analysis needs of the UK science base. The objective of the programme is to invest in the development and implementation of new computing technologies and infrastructure that enable the UK NERC communities to exploit larger scale datasets. Reporting to the Science and Innovation Manager responsible for e-Science, the primary focus of this role is to ensure that investment is targeted most effectively to meet the computing needs of NERC science and it will also make a significant contribution to the development of new computing technologies for the wider science base and industrial/commercial application over the next decade.

With advice from a steering committee comprised of senior representatives from the NERC community and industry, you will provide the strategic leadership and co-ordination of the programme. You will have overall management responsibility for investment strategy and how NERC's programme can be aligned most effectively with other national and international programmes.

Self-motivated with a proven track record in successfully planning and managing large-scale projects, you will have excellent leadership, negotiating and communication skills. Experience of research including modelling and the use of large-scale datasets is highly desirable and it would be advantageous if you also have experience of the funding arrangements within the UK science and technology base.

To find out more, visit [www.nerc.ac.uk](http://www.nerc.ac.uk) or contact our joint Recruitment Unit for an application form on (01793) 444468 or email: [jru@epsrc.ac.uk](mailto:jru@epsrc.ac.uk)

**NATURAL ENVIRONMENT RESEARCH COUNCIL**
The Council has an equal opportunities policy and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome. Vacancy number 05/05  
BIOSECURITY  
NEW ZEALAND

**Senior Adviser, Nursery Stock** (Import Health Standards)  
This position is within the Import Health Standards Team in Biosecurity New Zealand, Ministry of Agriculture and Forestry (MAF), Wellington, New Zealand.  
The Senior Adviser is responsible for:  
• Development, review and implementation of import health standards for nursery stock commodities (plant and forestry species) including leadership of project teams. This also includes representing MAF in discussions with international bodies and government agencies;  
• Development of technical and operational standards (importation and clearance of plant propagation material).  
The Senior Adviser will be involved in technical quarantine discussions with appropriate authorities in overseas countries and the audit of programmes in New Zealand for the importation and clearance of nursery stock.  
For this role you will require:  
• A degree in a plant related science preferably in plant pathology, or relevant experience;  
• Good oral and written communication skills;  
• Ability to plan, set priorities and meet deadlines within tight time frames;  
• Ability to work under stress and in conflict situations created by high work loads, changing priorities, and industry and political demands;  
• Proven ability to work with others in a team environment.  
Preference will be given to applicants with experience and knowledge of quarantine principles, horticultural production systems, agrochemical treatments and biometrics.

AMCOL SPECIALTY MINERALS

DEVELOPMENT SCIENTIST

A new position has arisen for a development scientist based at our Merseyside Laboratory. The job is to develop catalysts for our existing customer base and provide technical input into the assessment of commercial opportunities for developing mineral based catalysts and catalyst supports.

The company, which operates internationally, is a world leader in Bentonite minerals and this vacancy arises due to the establishment of the AMCOL Specialty Minerals group.

The successful candidate will ideally have experience in the field of catalysis and preferably industrial experience also. Particularly we are seeking an individual who can demonstrate good lab skills, innovation and who possesses good verbal and written communication skills (they will be in direct contact with customers).

Some international travel will be required and the role requires close working with the US laboratory based in Chicago.

We offer a competitive salary and excellent benefits package.

Please apply, stating current salary to Julia Taylor, Personnel Manager, CETCO Europe Ltd, Birch House, Scotts Quays, Birkenhead, Merseyside CH41 1FB

Or email julia.taylor@cetco.co.uk

The most valuable contribution to the environment?
Diversity

**Flood Warning Officer - Forecasting**
£21,300 - £21,900 Reading Town Centre
Permanent and Temporary
Our flood forecasting team deliver our flood warning service: forecasting and responding to emergencies when they happen. This could be at any time, so you'll join an emergency 24-hour call-out roster. Degree qualified or equivalent, you'll need a good understanding of hydrology and hydraulics and some mathematical modelling experience. Computer literate, you'll also have excellent organisational, analytical and people skills. The temporary post will end December 2005. Ref: 8474 (Temp) 8475 (Perm)

**Flood Warning Officer – Projects**
£19,300-£21,900
Reading Town Centre
12-month Temporary Post
You'll be involved in flood warning projects as part of a team; managing our systems and planning emergency exercises in response to incidents. Degree qualified or equivalent, you'll have flood warning experience and strong organisational, analytical and communication skills. Computer literate, you'll know your way around. GIS/Database. Ref: 8476

**Regulatory Officers**
£19,300-£36,000 Nottingham
‘Firm but fair’ sums up this role. You'll regulate the activity of major industry with regard to pollution prevention and the control of radioactive substances, making detailed assessment sand working closely with senior industry managers and local stakeholder communities to optimise the use of resources. You'll need excellent negotiating skills and the conviction to take enforcement action when it’s needed. Ideally degree qualified in a scientific, environmental or engineering discipline, you’ll need at least three years’ relevant industry experience, ideally within a regulated industry. Ref: 8477
As well as flexible working, a comprehensive benefits package is on offer, including generous holidays, family-friendly policies and final salary pension scheme. For a full information pack and to apply, please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs). If you do not have internet access call 01925 542141 for an application pack quoting the appropriate reference.
Closing date for applications: 18 February 2005.
The Environment Agency is committed to equality of opportunity. We aim to reflect the diversity of the community and encourage applications from minority ethnic and disabled groups and women as they are underrepresented amongst our staff.

ENVIRONMENT AGENCY
[2485-038 (2005) : 71]
Oxford New Tech

1 Group Leader 2 Team Leaders 2 Research Associates
2 Graduate Technicians 2 Junior Technicians

Oxford NewTech Ltd is a company set up and backed by Merlin Biosciences with a primary focus on the generation of intellectual property relevant to the development of new diagnostic procedures for human disease and systems designed to expedite the drug development process. The company has signed an exclusive deal with QinetiQ and a prototype of a bio-sensor system that will revolutionise cardiac drug identification and safety evaluation has been developed. The other major focus will be on the development of novel histopathological screening systems in programmes run jointly with the Agency for Cancer Research. A decision has recently been made to consolidate all research at the Kent Science Park, Sittingbourne, Kent. To coincide with this move several new positions have been made available.

Group Leader: It is unlikely that anyone with less than 7 years postdoctoral industrial experience in pharmaceutical research will be suitable for this position. The candidate will be expected to set and maintain the highest scientific standards and co-ordinate the research in both teams. A key attribute will be excellent man management skills as will be the ability to communicate effectively within and outside the company. A major component of the job will involve creating effective interrelationships with new and existing clients. Although a biologist would be preferred someone with a chemical background with a sound knowledge of generation of intellectual property would also be considered. You will report directly to the company’s chief scientific officer.

Team Leader 1: An experienced scientist is required to manage the company’s cardiac characterisation programmes which, using proprietary biosensor technology, have already identified novel drug candidates and/or potential for cardio-toxicity. The ideal candidate will have at least three years industrial experience as an electrophysiologist, although other disciplines will be considered. You will manage three or four staff with the objective of developing basic structure activity relationships versus classical and novel targets. You will contribute to the identification of new roles for the biosensor technology and the extension to non cardiac systems.

Team Leader 2: An experienced scientist is required to manage 3-4 staff. The groups' primary focus is to validate novel histopathological screens and develop new diagnostic procedures. The responsibilities include cross-disciplinary research and coordinating research in communication with company consultants and senior scientists from other divisions. A detailed knowledge of cell biology and pathology is essential. Excellent communication skills are a prerequisite. You will contribute ideas to the research program and be involved in developing proposals for additional diagnostics. The ideal team leaders will have a BSc and PhD in life sciences with at least five years postdoctoral employment. A successful molecular or cell biologist with basic skills in bioinformatics, the candidates will also be skilled in quantitative gene expression analysis at the RNA and protein level.

Research Associates (2 posts): A researcher is required to develop cell-based assays and diagnostic procedures. Essential skills are cell culture, co-transfection and reporter gene assays. cDNA cloning, site directed mutagenesis, RNA and DNA purification are also required. Basic protein purification skills are also required for this position.

Another researcher is required to provide basic electrophysiological support to the programme designed to develop a detailed understanding of the structure activity relationship of drug action at various cardiac receptors and ion channels. These posts are suitable for recent PhD graduates or MSc qualified candidates with practical experience.

Technicians (2 posts): Two technicians are required to perform cell culture and molecular biology under the direction of the team leaders. With a BSc in a life sciences discipline you will have some experience with molecular biology including DNA and protein extraction, protein and nucleic acid blotting and PCR.

Junior Technicians (2 posts): Suitable for a school leaver these positions require an eager person to be involved in all aspects of laboratory function.

The successful candidates will be provided with a competitive salary and benefits package and an exciting work environment where you will be an integral part of a dynamic research and development company.

Informal enquiries can be made to fiona.swingland@oxfordnewtech.co.uk
Applications including a full CV, covering letter, names and contact details of two referees can be emailed or posted to Dr Fiona Swingland, ONT Recruitment, 46 Ridgeway Road, Herne, Kent CT6 7LN. Closing date: 28th February 2005.

[2485-039 (2005) : 71]
NORTH WEST ENGINEERING OPPORTUNITIES

PROJECT ENGINEER
Exciting opportunity to work within the Automotive industry and gain experience in continuous improvement and WCM. The suitable candidate will be educated to HNC/Degree level or have gained relative industry experience and have a proven record of successfully delivering projects and management skills. This role will offer an excellent Package and opportunity.

Team Leader
To undertake minor maintenance activities, undertake 5C activities with the team and implement 7 waste activities with the team. To support line balancing activities. To develop, maintain, enforce and improve standardised work.
This role will also involve supporting engineering with line trials, assist in the operational plan of new product introduction.
Salary 24k+

Sales Engineer-LV switchgear
The role will be largely technical in its content and therefore a formal electrical engineering qualification with some recent relevant experience would be preferred. To be responsible for existing accounts within the OEM marketplace and also for business within the M&F contractors and consultants.

Quality engineers / managers
Presentation and feedback to customers on quality concerns and corrective actions. Detailed knowledge of all products, manufactured within business unit and the supplier base. Monitor supplier quality and provide rapid response for any quality problems. Communication and monitoring of supplier problem solving. Analyse customer returns, assure implementation and verification of corrective / preventive actions.
Salary 30 to 40k.
Please send your CV and salary details, preferably by E-mail to Technical.chester@proactivepersonnel.net
Alternatively by post to Proactive Personnel Ltd, Ground Floor, Windsor House, Chester, CH11 1DF

BIOVAIL Technologies (Ireland) Ltd.
Biovail Corporation is a fully integrated pharmaceutical company engaged in the development, manufacture, marketing, licensing, and distribution of pharmaceutical products in North America. Biovail's primary focus is on the development of advanced, proprietary oral controlled release technologies that provide significant advantages over existing formulations for the treatment of a broad portfolio of therapeutic areas.

A new position has been created within Biovail's Dublin Research & Development facility for a **Senior Pre-Formulation Scientist** to provide scientific expertise across the facility's entire portfolio of solid oral controlled development projects. Responsibilities include:

- ensuring that all aspects of formulation design and drug delivery are considered during pharmaceutical formulation development;
- performing scientific due diligence for new technology opportunities;
- providing the scientific lead in driving Biovail Dublin's drug delivery patent strategy;
- developing a network of links with academic groups and Key Opinion Leaders;
- writing Development Pharmaceutics sections of Quality Overall Summaries for regulatory submissions.

A PhD in a relevant scientific discipline is preferred, together with at least 5 years experience either in an academic or industrial development pharmaceutics environment.

A strong scientific knowledge of controlled/sustained release drug delivery technologies is preferred. Please send up to date CV to C Coss at: Biovail Technologies Ireland Ltd, 3200 Lake Drive, Citywest Business Campus, Dublin 24 or email to hr@biovail.ie. Closing date 25th February 2005.

[2485-041 (2005) : 72]
ADAS
ADAS is the leading research based consultancy to land-based industries in England and Wales. We are currently seeking suitably qualified applicants for the following permanent posts:

**Senior Research Scientist** in
Crop Biochemistry (based at ADAS Boxworth, Cambridge)
A Senior Research Scientist with considerable plant biochemistry experience is required to join a multi-disciplinary team. The work will involve identifying the factors influencing the level of active ingredients or other quality parameters in crops, for non-food applications including medicinal and personal care products. An understanding of crop traceability, quality assurance and registration issues for pharmaceutical products would be beneficial, as would experience in one or more of the following areas: cereal chemistry; plant volatile emissions; post-harvest physiology. The role is to initially build relationships with a range of stakeholders in the supply chain who are seeking to develop new plant-derived products. The successful applicant will then be expected to undertake focused sales activity with these new clients, culminating in winning and delivering new R&D projects.
Starting salary will be in the range of £25,048-£28,180, according to qualifications and experience.
(Range currently to £31,310)

**Research Scientist** in Plant Pathology (based at ADAS Arthur Rickwood, Cambridge)
The successful candidate will play a key role in a programme of research directed to providing solutions to disease problems in the UK horticultural industry. The work will include investigations of the biology and epidemiology of causal organisms and the development of integrated management strategies, including studies on efficacy of fungicide treatments and alternatives to conventional fungicides. The appointee will join an established horticultural plant pathology team.
Starting salary will be in the range of £14,544-£19,089, according to qualifications and experience.
(Range currently to £25,250). Recently qualified graduates will be considered.
Applicants for both positions should be enthusiastic and competent researchers with excellent communication skills. The successful candidates will be expected to manage projects, develop research proposals and deliver technology transfer. For full job descriptions and details of how to apply, please contact Claire.Baker@adas.co.uk or write to ADAS Arthur Rickwood, Mepal, Ely, Cambridgeshire, CB6 2BA.
Final date for all completed applications will be 21st February 2005. Interviews will be held during the period 9-11th March, 2005. Agency applications not accepted.
[2485-042 (2005) : 72]
Marie Curie Research Institute
The Chart, Oxted, Surrey, UK

RESEARCH ASSISTANT POSITIONS
CHROMOSOME SEGREGATION LABORATORY

Applications are invited for the post of Research Assistant in Chromosome Segregation laboratory of Dr Andrew McAinsh. Current research focuses on the assembly and function of kinetochores in yeast and mammalian systems (see website: http://www.mcri.ac.uk/ChromSeg/ChromSeg.html). The successful applicant will undertake their own research project and will be responsible for organizing and maintaining laboratory facilities.

Applicants should be highly motivated, enthusiastic individuals, and have an undergraduate degree in a relevant subject. Some experience in cell biology and biochemistry would be advantageous. Competitive salary will depend upon age, qualifications and experience.

Candidates should submit a full C.V., including the name and addresses of two referees, to Dr Andrew McAinsh, Chromatin Segregation Laboratory, Marie Curie Research Institute, The Chart, Oxted, Surrey, RH8 OTL, UK. Tel: +44 (0) 1883-722-30
Fax: +44 (0) 1883-714-375, email A.McAinsh@mcri.ac.uk

[2485-043 (2005) : 72]
BAE SYSTEMS is now recruiting for current and future opportunities in Metrology and Calibration Supporting Project Al Yamamah in Saudi Arabia

We offer an excellent compensation and benefits package to include;
- Competitive salaries
- Pension Scheme
- Free Food
- Excellent leisure and recreation facilities
- Two year open ended contract
- Free accommodation
- Generous leave & ticketing Allowances
- Free medical care in Saudi Arabia
- Personal Accident Insurance

**Metrology Engineer** (Electrical, Mechanical and Physical specialisation) UK Nationals £109,914 over two years, plus benefits

In support of the Chief Metrologist, Engineering, you will be responsible for the provision of engineering solutions within the Royal Saudi Air Force Metrology Programme, embracing a wide range of activities including the writing of calibration procedures / technical reports, determination of equipment requirements, development of computer applications, as well as the calibration and repair of complex test, measurement and diagnostic equipment.

You will have at least six years practical experience at an engineering level, two years being within the Metrology and Calibration field. You must hold a university degree in an appropriate technical subject.

**Calibration Technician** (Electrical or Mechanical) UK Nationals £76,315 over two years, plus benefits

The post holder will carry out the calibration and repair of a wide range of test, measurement and diagnostic equipment at one of several Royal Saudi Air Force Calibration Laboratories within Saudi Arabia. Duties may additionally include on-the-job training of Saudi nationals.

You will have at least five years practical experience within the Metrology and Calibration field including at least two years in the performance of diagnostic and rectification work to component level. You must be educated to ONC level or equivalent, in an appropriate discipline (for UK nationals), or High School Graduation with further military or civilian technical school training (for US nationals).

If you have the appropriate skills we are looking for and want to find out more then visit our website at www.projectay.co.uk or alternatively please send a comprehensive CV quoting Reference No 761 to Tina Cookson, KSA Resourcing, BAE SYSTEMS, Mill Lane, Building W386, Warton Aerodrome, Preston, PR41AX e-mail: tina.cookson@baesystems.com

Telephone: + 44 (0)1772 854017 Fax: + 44 (0)1772 852096

We are committed to equal opportunities but, as these positions are based in Saudi Arabia, we are only able to consider male applicants.
**Post-Doctoral Scientist** – Cell Biology  
European Research Centre – Oxfordshire  
Vertex (Europe) Ltd. is an UK-based subsidiary of Vertex Inc., a global biotechnology company focused on the discovery, development and commercialisation of breakthrough drugs for a range of serious diseases. The Research Centre in Oxfordshire brings together scientists of multiple disciplines and varying backgrounds who have access to state-of-the-art technology. We have a highly creative and productive team that has generated compounds for clinical development and the quality of our scientific work is documented by our publications in high-impact journals.

We now seek a **Cell Biologist** to join our world-class team in an integrated environment where chemists, biologists, structural biologists and computational chemists work closely together in tackling some of the most ambitious projects in the industry.

A PhD, preferably with up to two years' post-doctoral experience, you will have expertise in mammalian cell culture and a strong background in oncology or immunology. Your responsibilities will include target validation and compound profiling and you will be expected to apply your knowledge to the design and implementation of novel assay systems. A proactive thinker with a demonstrable talent for solving problems, you will also be highly motivated with excellent team working skills.

We offer excellent salary and benefits including private healthcare (medical, dental and optical), life assurance, long-term disability insurance, company pension scheme, share scheme, subsidised gym membership and workplace nursery.

Please send your CV clearly marked with 'Cell Biology Vacancy' via e-mail to: recruiting.uk@vrtx.com or in writing to: Vertex Pharmaceuticals (Europe) Limited, 88 Milton Park, Abingdon, Oxon OX14 4RY, UK.

Closing date: 28 February, 2005.

New Scientist Jobs
www.newscientistjobs.com
[2485-048 (2005) : 74]
Senior Scientific Officer/Executive Officer
£30,792 per annum Based in Bristol

Working within the European Wildlife Division, you will lead on the development of local and regional implementation of England Biodiversity Strategy, supporting the work of local and regional workstreams, Regional Biodiversity Chairs Group and related working groups. This involves forward planning with managers and Chairs of the groups, drafting and promoting publications, developing and publishing indicators, and contributing to regular reporting.

You will be involved in local and regional biodiversity policy advocacy, promoting biodiversity programmes across Government, and pursuing opportunities for integration into developing national policy. You will promote co-operation between the national and local partners, ensuring needs are reflected in national reporting and review processes, and that there is regular liaison between all parties concerned.

In addition to your degree in Biology, Geography or a related discipline, you will have at least three years’ experience in, and a good knowledge of, the Biodiversity Action Plan process and of the way in which local and regional government works and relates to national Government. You will need the vision and confidence to drive for results and develop innovative approaches.

You will have the ability to motivate, inspire and engage your colleagues and to understand and respect differing styles and opinions. You will actively promote change and manage uncertainty whilst ensuring productive discussions at meetings. With your systematic approach to problem solving, you will be able to identify key issues and make reasoned assessments at all times. You will work well within a team, building upon ideas and continually developing your technical knowledge.

For further information, please email: biodiversity@defra.gsi.gov.uk

If you would like an application form and job description, please contact Resource Centre, Defra, HR Unit, Government Buildings, Whittington Road, Worcester WR5 2LQ. Tel: 01905 768818 (24 hour answerphone) or email: ResourceCentre@defra.gsi.gov.uk quoting reference RCRE124.

Closing date: 18 February 2005.

As an Equal Opportunities employer the Department welcomes applications regardless of gender, race, disability, age, religion, or sexual orientation. We operate a family-friendly policy including flexible working patterns. The posts are open to British, Commonwealth and EU Nationals.

Defra (the Department for Environment, Food and Rural Affairs) was created in June 2001 to drive forward the Government’s programmes on the environment food and rural affairs.

We work for the essentials of life - food, air land, water, people, animals and plants. Our remit is the pursuit of sustainable development – weaving together economic, social and environmental concerns.

Pfizer
If you can see the possibilities, you will realise the potential.

**Associate Regulatory Scientist**
Excellent Package.
European R&D Headquarters, Sandwich, Kent.
The possibilities and potential of our science. The possibilities and potential of our products. The possibilities and potential of you - with the biggest name and the most prestigious brands in the global Animal Health market. Pfizer Animal Health brings good science, best practice and total commitment to the healthcare of animals across the world. And we provide you with an exceptional opportunity to make a profound impact across the widest possible range of product developments.

If Veterinary Medicine Regulatory Affairs is the crossroads of taking product development into product reality, you'll provide the roadmap. Planning and compiling technical dossiers for submission to European and other Regional Regulatory agencies, you'll maintain existing product licences, provide regulatory advice to our Veterinary Medicine Research and Development teams, coordinate responses to regulatory queries - and facilitate the approval of new products in EMEA, driving the design of development programmes for some of the most innovative candidate veterinary medicines in the world. A Chemistry/Biological Sciences degree, or equivalent, is essential. Beyond that, broad experience of the processes involved in drug development and registration is important, ideally with experience of pharmaceutical regulatory affairs in a commercial organisation.

If you can see the possibilities, come and realise the potential.

Find out more and apply online at [www.pfizer.co.uk](http://www.pfizer.co.uk) quoting requisition number 041101. Closing date: 28th February 2005

The sights and sounds of the future.
Research opportunities Competitive salary + benefits Farnborough
QinetiQ works at the very forefront of scientific and technological discovery. So it's the perfect environment for ambitious research professionals to challenge their skills on far-reaching projects. We're currently looking for talented people in image processing and hypersonics.

**Hypersonic Researchers**
We are looking for scientists and engineers to carry out practical and theoretical research relevant to future hypersonic missiles. So you may be involved in the design and testing of subsystems on trials of a complete prototype.

For a senior role, you'll need to be an established research professional with an international reputation in aerodynamics, control systems, computational fluid dynamics, combustion science, or another relevant discipline. Familiarity with testing techniques and facilities would also be valuable.

For other roles, you'll need a relevant first degree and at least two years' relevant postgraduate experience in industry or academia. You'll also need to combine problem-solving skills and research rigour with teamwork, leadership and highly effective communication skills - as this challenging work involves extensive collaboration with UK and international research partners. Ref: junior role 012623/senior role 012787

**Image Processing Researcher**
Part of the Guidance and Imaging solutions department of the Weapons Division, our team develops image processing and machine vision algorithms and code, primarily for missile-seeking systems and unmanned air vehicles. Due to recent successes in the sports and transport arenas, the department is growing rapidly.

Generating image processing and machine vision algorithms from first principles through to real-time systems, you'll perform fascinating research on both future missile-seeking systems and sports broadcasting projects.

We are looking for a scientist or engineer with 5 or more years' experience to perform a senior role within the group. You will need to be an established professional working for either a research company or university department. You will also need to be a maths or science graduate with experience in theoretical or applied image processing and C/C++/Matlab software development. Ref: 012669

Whichever role you're interested in, we'll offer you a generous salary and benefits package combined with an extremely stimulating working environment.

If you would like to apply for either of these roles please visit www.QinetiQ.com/careers in the 'Jobs at QinetiQ' section, register your details and search by the appropriate reference, where you will be able to apply. Closing date: 17 February 2005.

The future has our name on it. Will it have yours?

intercare
Pharmaceutical Distribution
Senior Regulatory Affairs Officer

Attractive salary subject to experience.
Based Harrogate, North Yorkshire.
Intercare Pharmaceutical Distribution, through its 11-depot network, is a provider of prescription medicines to pharmacies across the UK.
Reporting directly to the Quality, Compliance & Regulatory Affairs' Director, you will lead and co-ordinate parallel import licence applications and maintain our current licence portfolio.
You will sustain and develop good working relationships with the main regulatory bodies, our leaflet and carton producers and with relevant colleagues to ensure that licences are granted swiftly and artwork meets regulatory requirements. Good interpersonal skills are, therefore, essential.
Qualified and/or trained in regulatory affairs, your experience and knowledge should ideally include European trademark law, the pharmaceutical wholesale/PI business and dealing with PI licences.
Good keyboard skills, familiarity with MS Office and the ability to meet deadlines are essential.
How to apply:
Please contact Ruth Wetherill, Intercare Pharmaceutical Distribution, Freeman House, Cold Bath Road, Harrogate HG2 ONA. Telephone: 01423 508800.

Mapping and cloning of new mouse models of diabetes that have arisen out of our ENU mutagenesis screen sensitised for insulin resistance. Detailed physiological and molecular phenotyping and functional validation of any identified candidate genes. (Ref: CDF/RC)

GRADUATE RESEARCH ASSISTANTS
1. to work on mouse models of hearing & balance (EU funded - 78 months in the first instance)
Screening of new mouse models from our ENU mutagenesis programme for defects in hearing and balance. (Ref: RA/SB)
2. to work on mouse models of kidney disease (EU funded - 18 months in the first instance)
The work includes experiments to investigate diabetic nephropathy and to identify and clone new kidney disease models using ENU mutagenesis and phenotyping. (Ref: RA/RC)
3. to work on mouse models of severe neural tube defects (MRC funded - 4 years)
The project involves the analysis of genetic and protein interactions between mutants with severe spina bifida, using a variety of methodological approaches, as well as the identification and cloning of novel mutants with this disorder. (Ref: GRA/JM)
4. to work on applied statistical methods for experimental genetics (MRC funded - 3 years) To evaluate and extend statistical methodology, such as regression analysis and experimental design, for data arising from modern experimental genetics, including microarrays and proteomics. The holder will be expected to develop procedures within R software environment for release to the scientific community. Applications for part-time (minimum 15 hours pw) will be considered. (Ref: RA/CH)

For further information visit our website: www.mqu.har.mrc.ac.uk/research/
For an application form and further details, please contact the Personnel Office, MRC Centre Oxfordshire, Harwell, Didcot, Oxon, OX11 ORD. Tel: 01235 841230 or email: personnel@har.mrc.ac.uk. Please quote the reference of the job for which you are applying.
Closing date: 1st March 2005.

Chemist
Construction Materials
Based: St Albans, Hertfordshire
STATS Materials Consultancy is seeking to recruit a Construction Materials Chemist to join a busy group of other scientists, engineers and technicians undertaking analysis, investigation and consultancy work in a broad range of natural and artificial, inorganic and organic materials used in construction. You will lead a small dedicated chemistry laboratory section and undertake interesting analytical work and materials consultancy, both individually and as part of a team. Whilst a good chemistry degree (or equivalent) and appropriate experience are important, we are equally interested in personality and aptitude. Please apply in writing enclosing a full cv to: Janet Farr, Personnel Manager, STATS Limited, Porterswood House, Porters Wood, St Albans, Herts, AL3 6P0. Tel: 01727-833261 Fax: 01727-798613 janet.farr@stats.co.uk

Pfizer
Exciting Opportunities within Clinical Pathology

A new opportunity has arisen for experienced scientists who can demonstrate a high level of enthusiasm and initiative to work for a one year contract within the Safety Sciences division of Pfizer’s world-leading research and development facilities in Sandwich, Kent. Over 75% of your time will be spent in the laboratory where you will need a sound knowledge of good laboratory practice, quality control, quality assurance and method development and evaluation.

Clinical Pathology Scientists - Method Development
Circa £30 - £35K
The successful candidates will be competent with automated clinical pathology analysers and will have either strong assay development experience or an understanding of physiology of clinical pathology change. You will need good skills in method development and application as well as an enthusiasm for increasing your knowledge of state-of-the-art technology. An MSc with at least 3 years experience in clinical pathology, preferably in a toxicology or pharmaceutical setting is a prerequisite for these positions.

Laboratory Assistant - Assay Performance
Circa £17 - £20K
You will be responsible for operating a highly programmable, automated chemical analyser, as well as processing the associated samples and maintenance and operation of the analyser. A BSc or equivalent is essential with ideally some experience in a biochemistry or clinical pathology laboratory. The successful candidates will be employed by SRG for a twelve month contract.
To apply please send your CV, stating the position for which you are applying, to rebecca.dobbs@srg.co.uk or contact Rebecca on 01304 646709
Visit our website at www.srg.co.uk for a full list of current vacancies.

GREAT MINDS DON’T THINK ALIKE
Excerpta Medica is a leading force in the world of medical communications. Excerpta Medica's links with opinion leaders and medical societies and growing reputation for new media technology have contributed to an impressive list of world-class clients in the pharmaceutical industry. As a result of a significant increase in business, we are looking for new talented colleagues to join our staff in the Netherlands.

Medical Writer
Responsible for writing high-quality, medically accurate documents in print or electronic format, for a wide range of medical communication programmes, addressing different target audiences, you will have:
life science academic education, preferably with a postgraduate degree at least 2 years' writing experience in a scientific publishing company or a medical communications agency
superb command of the English language
outstanding writing and communication skills, with exceptional attention to detail
excellent computer skills (Microsoft Office and Internet proficient) experience in electronic and multimedia publishing

You are flexible, highly organized, able to work to tight deadlines, and enjoy working in a multidisciplinary team.

Based in the vibrant city of Amsterdam, you will be a part of a dynamic organization, with well-educated and dedicated colleagues. Compensation packages are highly competitive and commensurate with experience. We offer flexible working hours, differentiated holiday schemes, corporate health insurance, pension plan, profit sharing, and tuition reimbursement programmes. Relocation allowance can be considered. Please send your application and curriculum vitae to career@elsevier.com

**Lubricant Technologists**

Excellent salary  Thames Valley

bp

BP is a major global marketer and manufacturer of lubricants who pride themselves on their technical ability, and this leadership is frequently demonstrated by ongoing product introduction and technology innovation. To maintain this technical advantage, and to meet their future business development plans, they now wish to recruit additional senior technologists and scientists who want to be part of a team formulating new products and solutions as well as directing test and approval programs.

You will ideally be particularly familiar with the chemistry of Marine, PCEO, Driveline or HD Diesel lubricants, and have some background in the formulation and development of these products. In addition to project management and laboratory product development, the team is involved in new technology evaluation, liaison with external bodies, coordination of Intellectual Property issues, and interacting with OEMs.

As a lubricant professional you will have had practical R&D experience, and good science, engineering, or technology qualifications. Probably you will also be up to date with technical, OEM and engineering trends and be able to interact with other internal and external professionals in these areas. There are excellent opportunities for advancement and also current opportunities for more senior team leaders.

BP is a successful company offering a rewarding career to those that want to develop a technical exposure in the lubricants market. If you want to progress your career in the utilisation and management of technology email CV and details to Clive Asher at 5043@regent-consulting.co.uk or phone him on 01 18 9560522 to discuss.

With a global presence through [www.inac-global.com](http://www.inac-global.com) REGENT CONSULTING

Nanotecture

2 PhD Chemists
2 Graduate Chemists

Based in Southampton, UK

Nanotecture is a highly-regarded nanomaterials technology company with strong growth aspirations. R&D efforts are focussed on the application of our unique materials to power sources and other products. We are seeking talented PhD electrochemists and inorganic chemists to work within our Applications Development Teams. As a successful candidate you’ll need experience in the preparation of inorganic materials by electrodeposition or conventional methods. Preferably, you’ll have industrial or postdoctoral experience.

We’re also looking for talented, degree-qualified chemists with a solid grounding in physical or inorganic chemistry to work across our R&D teams. Experience in materials synthesis gained in an industrial laboratory environment is desirable.

As a successful candidate you’ll also need to be commercially aware and have excellent communication, presentation and interpersonal skills. A strong team-working ability is essential.

Nanotecture offers a competitive remuneration package including share options and the opportunity to develop your career within a dynamic organisation.

To apply, please write with your full CV to Phil Nelson, Technical Manager Nanotecture Limited, Epsilon House Enterprise Road Chilworth Science Park, Southampton 5016 7NS or email: phil.nelson@nanotecture.co.uk

Closing date: 17th February 2005 www.nanotecture.co.uk

[2485-059 (2005) : 77]
MINISTRY OF DEFENCE

SCIENTIFIC OFFICER BAND D
RAF Innsworth, Gloucester
Land Quality Assessment Team
RAFIO
HQ Personnel & Training Command

Working as a Scientific Officer within the Land Quality Assessment Team you will act as a team member/leader in undertaking assessment and investigation of contaminated RAF sites. Specifically you will be required to plan, manage, conduct and report upon desk study and geophysical assessment of sites. In addition you will assist in providing intelligent customer advice on the work of contractors and undertaking non-intrusive and intrusive site investigations. You will also manage and oversee the work of junior staff. Candidates should be aware that this post is subject to extensive travel within the United Kingdom.

You should possess a minimum 2nd Class Honours Degree, HNC, HND (or equivalent) qualification in Chemistry, an Environmental, Geological or Physical Science or a related discipline. You must have the ability to work as a team member providing support to your Line Manager in achieving the department aims and targets, be able to plan and organise your work in an effective manner, be proactive in achieving results by seeing tasks through to completion and possessing tactful influencing and negotiating skills and be a concise and clear communicator both orally and in writing. You will be positive in responding to change by keeping up to date with the required specialist skills and applying those skills in practice. Starting salary is normally £16,672. Candidates with exceptional qualifications and experience may be appointed above the minimum salary. Annual salary increases are through automatic progression, subject to satisfactory performance. You will receive 25 days Annual Leave, rising to 30 days after 5 years service plus 10.5 Public and Privilege holidays. The Civil Service offers a choice of final salary and stakeholder pension giving you the flexibility to choose the pension that suits you the best.

The normal working week is 42 hours gross.

These are reserved posts and only UK Nationals are eligible to apply. You should have been resident in the UK for at least 5 years.

Further information is available from Wg Cdr T P Farmer, OC LQA, RAF Innsworth 01452 712612 Ext 5857.

For an application form, please contact, CPM(Rect)1F, Room F70, Building 255, RAF Innsworth, Gloucester GL3 1EZ, email: cpmrectlf.cmdsec@ptc.raf.mod.uk or telephone 01452 712612 Ext 5122. Completed applications must reach this office by 4th March 2005.

The MoD is an Equal Opportunities employer and seeks to reflect the diverse community it serves. Applications are welcome from anyone who meets the stated requirements.

POSITIVE ABOUT DISABLED PEOPLE

USC

SAFETY CONSULTANT

SALARY: UP TO £30,000

USC Ltd is dedicated to the provision of quality safety services to both the public and private sectors. We have a large client base which includes Universities, Hospitals, Schools, Factories and Small Businesses.

The services are wide ranging and include Consultancy Services, Health and Safety Training, Testing and Calibration Services and the Provision of Safety Equipment.

Due to continued expansion of our client base a new post has arisen for a Safety Consultant, preferably with a Bioscience background and based in the London area.

Candidates for this position should:

• have a science degree or equivalent
• have at least 5 years medical research / hospital / university / education sector experience in some or all of the following:
  - Biological Safety
  - Chemical Safety
  - General/Fire Safety
  - Occupational Health/ Occupational Hygiene.
• have or be in the process of obtaining a safety qualification and be a member of IOSH, IIRSM or equivalent.
• have excellent written and verbal communication skills
• have experience in providing and developing training programmes

Please send a full curriculum vitae, with details of current salary to: Miss Natasha Lucas, Marketing Manager, USC Ltd, Cumberland House, 80 Scrubs Lane, London, NW10 6RF

Tel: 020 8960 3201

RESEARCH ASSISTANT POSITIONS IN ASSAY DEVELOPMENT AND SCREENING
£20-28K plus benefits
MRC Technology is a company affiliated to the UK Medical Research Council that acts as the MRC’s agent in technology transfer. MRCT has an Applied Research Division, with laboratories in London and Edinburgh, which assists in the development and translation of discoveries emanating from basic MRC funded science into healthcare products. Research assistant positions are available immediately to work in the new Drug Discovery Group (DDG) at our laboratories in Mill Hill, North London, adjacent to the National Institute for Medical Research.

The DDG will take novel therapeutic targets identified from research in MRC Units and generate potent lead compounds for progression into drug discovery. The Assay Development and Screening group develops robust assays, and performs High Throughput Screens to identify novel small molecules for lead discovery programmes. The successful candidates will work in multi-disciplinary teams, to offer support to a variety of projects. The candidates should possess a first degree in a relevant discipline and have excellent interpersonal and organisational skills. Ideally the successful candidates will be graduates with laboratory experience of molecular biology, protein biochemical methods, cell culture and data handling. Knowledge of assay design, automation and the drug discovery process is desirable, but not essential.

The post provides an opportunity for a enthusiastic candidate, showing initiative to develop valuable skills. Additional information may be obtained from Dr Debbie Taylor (Debbie.taylor@tech.mrc.ac.uk).

Applicants should send a CV, including their scientific background, and a covering letter explaining why they are interested in the position and including the names of two referees and current salary details, to: Mrs Sandra Gibney, MRC Technology, 1-3 Burtonhole Lane, Mill Hill, London NW7 1AD. A detailed job description may be obtained from Mrs Gibney Sandra.gibney@tech.mrc.ac.uk. For further information on MRCT, please visit our Website (www.mrctechnology.org).

The Closing date for receipt of applications is Thursday, 17th February 2005.

DISCOVERY

**Electrophysiologists**

Cambridge UK - Attractive Salaries + Benefits

A well-funded drug discovery company, we are using our proprietary ion channel capabilities to develop a pipeline of ion channel drug molecules across a number of indications - focusing on the cardiovascular, neurology and metabolic disease areas. We now seek people who would thrive on the challenges and opportunities of working in an under exploited, but expanding, area of drug discovery as key members of a company with very ambitious plans.

**Senior Scientist - Electrophysiology**

You will manage and co-ordinate the work of a small team of electrophysiologists to build an effective assay group and will help design and build drug discovery programs based on ion channels. This will involve managing programs as well as developing and implementing discovery strategy in a multidisciplinary environment.

A PhD with good electrophysiology skills, your several years' postdoctoral experience, preferably in industry will probably include a cardiovascular, endocrine or CNS area. Comfortable working independently or in a multidisciplinary team, you will have good communication skills and natural scientific creativity. Knowledge of the automation of electrophysiology would be an advantage.

**Scientist - Electrophysiology**

As part of a highly skilled team, you will create, implement, automate and maintain day-to-day electrophysiology assays as well as develop and optimise new active molecules for our ion channel targets.

A recent PhD or a BSc with experience, preferably in drug discovery, you will have good electrophysiology skills. You will also be independent, with initiative as well as the personal and communication skills to work well with chemists and biologists in a multidisciplinary team.

Please send your CV and a covering letter with "Electrophysiologists" in the subject line to Rob.Pinnock@xention.com

We thank all candidates for their interest and would appreciate all responses by 18 February 2005.

IGER
INSTITUTE OF GRASSLAND AND ENVIRONMENTAL RESEARCH

TRAINEE PLANT BREEDER

Required at Aberystwyth Research Centre to meet IGER's forage grass breeding programme and maintain its continuity. An innovative person is required who is able to seize opportunities at every level to make further improvements in agronomic performance and feeding value and widen the range of adaptation of IGER's varieties. A training and career development programme will be established to include: quantitative genetics and other relevant subjects; developments in genetics, ruminant nutrition and grassland agronomy; monitoring and understanding technical developments; visiting trial sites in the UK and abroad; recording and analysing data. In addition, the postholder is also expected to undertake applied techniques of plant breeding, such as harvesting, cleaning and sowing seed, cross-pollinating and self-pollinating plants and screening plants for DNA profiles.

Candidates must possess a first or upper second class degree in plant science and a keen interest in practical plant breeding. Must be computer-literate. Relevant work experience desirable. Ability to communicate with other scientists and farmers is important as will be the potential to initiate research programmes. Must be able to travel outside normal working hours. Driving licence essential.

Starting salary: £17,613 - £19,939.

Application forms and further details are available from Auriel Evans, Personnel Office, IGER, Plas Gogerddan, Aberystwyth, Ceredigion SY23 3EB (tel: 01970 823023 or email: auriel.evans@bbsrc.ac.uk

Celltech and UCB Pharma have come together to become a global biopharmaceutical leader, specialising in CNS, inflammation/immunology and oncology. Our combined expertise, natural synergies and commitment to R&D have created a new company - one where Process Chemistry plays a pivotal role in drug discovery and development. Join us at this exciting time, and our size and small-team structure will give you significant visibility and the chance to influence and gain recognition for your efforts.

**PhD Senior Process Chemist** - Cambridge

Your role will involve devising and developing novel routes of synthesis for our new drug molecules, which can be scaled-up to provide material for safety and efficacy studies. For a newly or recently qualified PhD chemist with a keen interest in synthetic organic chemistry this is an ideal chance to gain a valuable understanding of drug development and the role of chemical process R&D. Ref: 915

**Graduate Process Chemist** - Cambridge

You will focus on the laboratory evaluation and development of synthetic routes to our new drug molecules. As well as broadening your knowledge of synthetic organic chemistry, you will gain expertise in an array of modern analytical and automated techniques. The role would suit a new graduate with a good degree in Chemistry or someone with a couple of years' post-graduation experience in a chemistry lab (not necessarily process chemistry). Ref: 916

**Team Leader**

Braine-l'Alleud, South Brussels, Belgium

Supervising a small team of technicians, you will ensure that laboratory projects are transferred to pilot scale in accordance with HSE and cGMP requirements. You should be a PhD/post-doctoral organic chemist with at least three years' experience in a pharmaceutical or fine chemical process R&D environment - knowledge of safety, regulatory and QA requirements for API manufacture would be useful. A very good command of French and English is essential. Ref: BRA-002135

Please apply with CV and covering letter in English, quoting the appropriate reference number, to HR Officer, UCB, Granta Park, Great Abington, Cambridge CB1 6GS.

defra

**Technical Manager**
£47,708 per annum Based in Cambridge

You will lead the Plant Variety Rights Office and Seeds Divisions Operations Unit, a team of 20 staff who deliver the three services of Plant Breeders' Rights, National Listing and Seed Certification to the plant breeding and seeds industry. You will manage policy on development of technical protocols in international forums and ensure that UK testing services comply with them.

You will devise and manage a programme of R&D to support related policy development and improvements to efficiency of service delivery. You will also implement new national list arrangements and plant breeders' rights arrangements for ornamental species, and manage contracts and relationships with delivery partners.

You will have a degree in agriculture, horticulture, agricultural botany, biology or equivalent subject with a minimum of five years' experience of science-based testing programmes. You should have established yourself as an expert in your field. Experience in the techniques of variety performance trials or the identification, classification and description of varieties, seed certification and seed testing will be a significant advantage. A proven track record in delivering improvements in services and managing risk is essential. A readiness to travel is important and a background knowledge of Civil Service work and conditions would be an advantage.

You will be able to demonstrate strong team building, leadership and communication skills and be confident dealing with senior representatives of external organisations. You will also be expected to take the lead on complex issues. This job will provide opportunities for international travel and career development.

For further information, please contact Mike Wray on 01223 342380.

If you would like an application form and job description, please contact Resource Centre, Defra, HR Unit, Government Buildings, Whittington Road, Worcester WRS 2LQ. Tel: 01905 768818 (24 hour answerphone) or email: ResourceCentre@defra.gsi.gov.uk quoting reference RCRE128.

Closing date: 24 February 2005.

As an Equal Opportunities employer the Department welcomes applications regardless of gender, race, disability, age, religion, or sexual orientation. We operate a family-friendly policy including flexible working patterns. The posts are open to British, Commonwealth and EU Nationals.

**INVESTOR IN PEOPLE**

Defra

Department for Environment, Food and Rural Affairs

Defra (the Department for Environment, Food and Rural Affairs) was created in June 2001 to drive forward the Government's programmes on the environment, food and rural affairs. The work for the essentials of life - food, air, land, water, people, animals and plants. Our remit is the pursuit of sustainable development - weaving together economic, social and environmental concerns.
The Joint Nature Conservation Committee (JNCC) was established by the Environmental Protection Act 1990 and advises on UK and international conservation issues.

We are now looking for two people to join our city centre office in Peterborough.

**Marine Support Officer**
Permanent post £18,253 pa
You will maintain the Marine Recorder national benthic marine database, contribute to management and processing of marine mapping datasets (mostly in ArcGIS), maintain the image library and a Reference Manager database. You will also maintain and manage the pool of marine survey equipment. You will contribute to other aspects of the work, and there may be an opportunity for fieldwork in the future.
You will need a degree in marine biology or a relevant subject. You need to be able to organise and manage data, have sound computer skills and be capable of organising your own work. Ref No 2004/26

**Biodiversity Officer**
Part time maternity leave cover £12,805 pa
You will be working with BIS and other JNCC units to prepare papers and minutes in support of the Global Biodiversity sub-committee of the Global Environmental Change Committee (GECC) and maintain a relationship with Defra. You will also contribute to reports on biodiversity research needs and formulate responses to consultation exercises.
You will need a sound knowledge of UK nature conservation and emerging biodiversity issues. You will also need to co-ordinate, support and minute meetings. With sound computer skills you will be able to summarise technical information in a clear, concise written style. You need to be able to build relationships as part of the process of collecting information. This post is for 21 hours per week.
Ref No 2004/27

For further information, full details of the post and the necessary application form visit our website at www.jncc.gov.uk or leave a message by email at recruitment@jncc.gov.uk or on 01733 866892.
Closing date for both posts will be 24 February 2005. The JNCC welcomes applications from all members of society.

WWF for a living planet

WWF, the global conservation organization, has two new openings within its Global Marine Programme: HIGH SEAS ADVOCACY OFFICER and EUROPEAN FISHERIES CAMPAIGN MANAGER. Both positions to be based in Gland, Switzerland.

Please consult www.panda.org/jobs and e-mail your application to recruitments@wwfint.org by Friday 11 February 2005.

[2485-074 (2005) : 82]
SENIOR STATISTICIAN
BAND 5  REF: CSP 2817  PERMANENT
The Agency provides policy advice and technical support underpinned by high quality R&D to help Defra, and other customers, safeguard food supplies, protect consumers and the environment. We have a strong emphasis on statistics and modelling in our work. Statistics is a key skill and the post holder will have the opportunity to play a crucial role in projects that often have significant impact in public affairs. A Senior Statistician is now required provide statistical expertise in relation to a variety of research projects on ecology, applied biology and food science.
Applicants should have a degree, or equivalent qualification, in statistics or mathematics or a degree in a relevant science subject with a strong statistics/mathematics component and a post-graduate degree (MSc, Diploma or PhD) in statistics or its applications. Candidates without a degree would need to have a minimum of six years relevant experience. In addition you will have demonstrable experience of statistical consultancy, preferably in agricultural, ecological, food or applied biological research, an ability to communicate statistical ideas to non-statisticians and good computing skills including at least five years experience in statistics package such as GenStat, MINITAB, SPSS or R.

QUALITY AUDITOR
BAND 3  REF: CSP 2814  PERMANENT
A Quality Auditor is required to provide support to the Quality Manager in delivering an audit function within CSL. You will assist with the full range of QA Audits and support functions particularly for the GLP teams who work on beneficial species and pesticide residues, organise and prepare documentation for QA systems and assist with QA based training courses run at CSL.
A degree (or equivalent level of qualification) in a biological science or chemistry subject (or a related subject) is required. Candidates without this level of qualification should have at least three years relevant experience. You should also have 2-3 years relevant GLP/QA experience, which must include some practical auditing in laboratory environments, and technical experience in air least one of the following: classic toxicology, environmental toxicology, environmentally beneficial species, analytical chemistry.
For an application pack call 01904 462302 or email jobs@csl.gov.uk Further information and an application form are also available on the CSL Internet site at www.csl.gov.uk .
CSL is an Equal Opportunities Employer. We operate flexible working practices and the York site includes various staff facilities.
Closing date for applications is 23 February 2005.
The Central Science Laboratory (CSL) is an Executive Agency of the Department for Environment, Food and Rural Affairs (DEFRA). The Agency provides policy advice and technical support underpinned by high quality R&D to help DEFRA and other customers safeguard food supplies, protect consumers and the environment.

REGULATORY AFFAIRS

Regulatory Affairs Executive
Based in the South of England, this vacancy offers the successful candidate an excellent opportunity to expand their base of regulatory experience working in one of the major players in consumer healthcare. Ideal candidates will have between 1 to 3 year’s experience in UK Regulatory Affairs. For further information forward a full CV to: Peter McLeod, CMS, 10 Pilgrims Close, Chandlers Ford, Eastleigh, Hants S053 4ST. Email: la@hmsl.com or phone 02380 271585 for further information

[2485-076 (2005) : 82]
**Senior Research Manager (Reviews)**
Salary: £31,990 - £43,680 incl. LW (dependent on experience)
Central London

The vision of Cancer Research UK is to conquer cancer through world-class research. We are the world's leading independent organisation dedicated to cancer research, spending £213m a year on cutting-edge research into treating, preventing and curing cancer.

An exciting opportunity has arisen for an experienced biomedical research administrator / manager to take up a new and challenging role in the Research Management & Planning Directorate of Cancer Research UK.

As the Senior Research Manager for Reviews you will take the lead in running the Quinquennial Review Schedule and in managing the staff concerned with this major activity. You will be expected to deputise for the Section Head in representation at internal and external meetings and in management of the Section. You will also play an important role in working with the Head of Programmes in managing cross-committee peer review issues.

You will have obtained a PhD in a biomedically related area and will have completed a period of postdoctoral research of at least one year. At least three years' experience in research administration is required, preferably with an understanding of some of the issues currently affecting the funding of research in universities and other research environments. Strong interpersonal skills and proven staff management experience are essential requirements. You should have an organised and adaptable approach to work and have strong IT skills (familiarity with Microsoft Office and Internet-based searches). In this role you will be expected to work closely with other research managers within the Directorate in order to deliver your set objectives. The role demands the ability to work both independently and as part of a team.

To apply, please submit two copies of both your CV and covering letter to Resourcing, Cancer Research UK, PO Box 123, Lincoln's Inn Fields, London WC2A 3PX or email: recruitment@cancer.org.uk

Please quote reference NS8897 on all correspondence.

Closing date: 24th February 2005. For further information, please visit www.cancerresearchuk.org/aboutus/ and click on jobs. A culture of diversity. A focus on success.

CANCER RESEARCH UK
Charity no: 1089464.

MUDSKIPPER

MEDICAL COMMUNICATIONS PROFESSIONALS

Mudskipper Bioscience is an innovative independent healthcare communications company servicing blue-chip pharmaceutical clients in Europe, the USA and East Asia. Due to planned business growth, we are currently seeking talented professionals to join existing client service teams. Opportunities exist for:

**Experienced medical writers** (Macclesfield and South-West London)

If you have a PhD in a biomedical subject with at least two years' writing experience in a medical communications agency and are keen to assume a high profile role interacting directly with clients and international medical thought leaders, wed be delighted to hear from you. A distinct opportunity exists in the Macclesfield office for a senior writer (at least 4 years' experience) to assume a key leadership role.

**Trainee medical writer** (South-West London)

If you wish to pursue a career in medical writing and have a good first degree and PhD in a biomedical science you could join our writing team as a trainee. In addition to excellent technical qualifications, we'd expect you to demonstrate a high level of energy and enthusiasm and an interest in drug development.

Mudskipper offers a dynamic and creative working environment; the support of an experienced management team and an excellent salary and benefit package.

To discuss these opportunities in total confidence, please telephone Richard Allcorn on 020 8392 3982 or drop him a line at richard.allcorn@mudskipper.biz

[2485-078 (2005) : 83]
Radiation Protection Specialist
Tracerco, Billingham - Teesside Tracerco
Salary range £35-42k, plus benefits package consistent with top international company: profit related bonus, final salary pension, company share-save scheme.
Tracerco is part of Johnson Matthey PLC, a UK multi-national FTSE 100 company. A truly international business in its own right, Tracerco delivers a range of process diagnostic services, specialist measurement solutions and sophisticated taggant products to the global process industry.
Formed over 40 years ago, Tracerco has established a strong reputation for customer service across its international client base. With over 120 highly trained and experienced personnel, Tracerco is focused on adding value throughout the whole hydrocarbon chain - from reservoir optimisation through to fuel brand protection solutions.
Tracerco's Radiological Protection Services Group specialise in providing expert advice and technical training to the Oil, Gas & Chemical Industries. The RPA Group also underpins a wide range of company activities across these industries. An opportunity exists for a Radiation Protection Specialist to join our team located at Billingham on Teesside. The post will involve travel (both domestic and international) in support of our global oil and gas customer base.
Key requirements:
• Certificated or experienced Radiation Protection Specialist (current RPA 2000 certificate of competence preferred but consideration and training support will be given to a suitable candidate who can evidence appropriate qualifications and experience).
• Self-motivated and ability to manage conflicting priorities.
• Willing to work offshore and worldwide.
• Excellent presentation skills.
• Strong interpersonal and communication skills.
The position requires a high level of customer interaction and the candidate will be required to promote and grow the business.
Please send CV's to Sue Magson at sue.magson@matthey.com
Applicants are encouraged to include details of relevant past experience and achievements.
Once received applicants will be asked to complete an application form.
Adams Environmental specialise in asbestos consultancy in the built environment. We need well-presented, energetic, degree-qualified people to join both our monitoring and surveying departments.

Analysts: You will be able to demonstrate common sense, clear communication skills and maturity. We offer full training - and also welcome applications from people already experienced in UKAS-accredited asbestos monitoring works.

Surveyors: You will hold S301/P902 and be able to demonstrate full competence in carrying out asbestos surveying and associated project management works. Starting salary will from £25K, depending on experience.

Please send your CV with a handwritten covering letter to Mrs Helen Cole, Adams Environmental Ltd, Unit 6, Kimpton Link Business Park, 40 Kimpton Road, Sutton SM3 9QP.

For more information on our company please visit: www.adamsenvironmental.co.uk

Environmental Analysts and Surveyors

ADAMS ENVIRONMENTAL
An equal opportunities employer

[2485-080 (2005) : 83]
An EPSRC-funded postdoctoral position is available for two years to work on the development of novel hierarchical porous organosilicas and advanced characterization of their structure and dynamics using state-of-the-art solid-state NMR, powder X-ray diffraction and porosimetry techniques. A PhD in chemistry, materials science or biomaterials and expertise in materials synthesis are essential. Experience in either advanced high-resolution or solid-state NMR methodology is desirable.

Informal enquiries to Dr Yaroslav Khimyak on 0151 794 3535, email: khimyak@liv.ac.uk
Quote Ref B/433/NS Closing Date: 1 March 2005

We seek to appoint a postdoctoral researcher to undertake the detailed verification of probabilistic seasonal forecasts and malaria transmission model runs driven by these forecasts. The region of interest is Africa. The EU ENSEMBLES and EU AMMA 6th Framework projects fund the post.
You will have research experience in one or more of the following fields: data analysis and manipulation, programming preferably C/C++ under UNIX/Linux, the running or application of existing numerical models, collection and use of disease datasets. The post is available for one year from May 2005.

Informal enquiries to Dr. Andy Morse 0151 794 2879, email: A.P.Morse@liv.ac.uk
Quote Ref: A/790/NS Closing Date: 25 February 2005

Further particulars and details of the application procedure should be requested from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on 0151 794 2210 (24 hr answerphone), via email: jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html

[2485-081 (2005) : 84]
Applications are invited for this indefinite, full-time post available within the School of Environmental Sciences.

You will be responsible, under the Chief Technician, for the operation and maintenance of analytical instruments within the Laboratory for Global Marine and Atmospheric Chemistry (LGMAC). LGMAC is a recent development within the department providing new laboratories and equipment from the government's joint Infrastructure Fund. The research of LGMAC centres on understanding the way atmosphere and oceans interact to regulate climate.

Main duties of the post:
• arranging maintenance, service and repairs for the instruments
• sample analysis for research projects
• instructing staff and students (PhD and MSc) in the operation of the instruments
• method development.

Instruments:
• Gas Chromatographs
• Gas Chromatograph - Mass Spectrometers
• Mass Spectrometers
• General laboratory equipment.

You will be required to maintain and operate the instruments in order to obtain reliable analytical data. The use of fault-finding techniques and diagnostic checks will be required to determine faults and minimise down-time. Training in the use of equipment will be provided, but good background knowledge of the scientific principles is essential. Good communication skills are essential as you will be instructing staff and students in the use of instruments and will have regular contact with staff throughout the University and outside companies. You will have at least an HNC, BTEC 2 or equivalent qualification and have at least five years work experience working with analytical instruments.

Salary will be on the Technical Staff Grade D, £16,071 to £19,050 per annum.

For an informal discussion please contact Mr Gareth Lee (Research Chief Technician) on: 01603 593396, or email: G.A.Lee@uea.ac.uk

An application form and further particulars can be obtained from the Personnel Office, University of East Anglia, Norwich NR4 7TJ (Internet: http://www.uea.ac.uk/personnel/jobs/ e-mail: personnel@uea.ac.uk or answerphone: 01603 593493), to be returned no later than 21 February 2005. Interviews are scheduled to take place on 11 March 2005. If you have not heard by that date you must assume you have been unsuccessful. Please quote reference number TC 174.

POSITIVE ABOUT DISABLED PEOPLE
[2485-082 (2005) : 84]
Vacancies in Interfacial properties of small molecules and proteins
Unilever and the Unilever Centre for Molecular Informatics are creating an exciting new group to investigate the interfacial properties of complex materials. The aim is to understand at a fundamental level how macromolecular structure can be stabilised in the drying / rehydration of food materials, how solubility of food ingredients is influenced by physiological conditions and how crystal growth is influenced by environmental effects in solution.

**Post-doctoral Research Associates** £19,460 - £29,127 pa (depending on experience)
Limit of tenure: Three years

Molecular simulations on small molecule-protein interactions relevant to the drying and rehydration of food material (Ref: PD1)
Nature uses a variety of small molecules and specialised proteins in order to preserve macromolecular structures under extreme conditions like heat, cold and dehydration. An understanding of the underlying mechanisms might lead to a better control of structural and textural changes during drying of food material. This position requires previous experience of biomolecular modelling and the holder will be expected to co-ordinate the activities of the Interfacial Properties group. This position is in the group of Dr Jonathan Goodman.

Computation of nanomaterials (Ref: PD2)
Applications are invited for a Postdoctoral Research Associate with an interest in applying computational methods to the prediction of crystal structures in the presence of organic and biological additives. The successful candidate will have a good knowledge of chemistry and crystallography and will develop a system to computationally model the interaction of charged organic compounds with crystal surfaces. This position is in the group of Dr Peter Murray-Rust.
Applicants for post-doctoral positions should have a Ph.D. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline. The posts are available from 1 April 2005, and are subject to a probation period of six months.
Applications should include a full CV, publications list, and the names of three professional referees, and should be accompanied by a completed form PD18 (downloadable from http://www.admin.cam.ac.uk/offices/personnel/forms/pd18).

**PhD Studentships**

Protein sugar interactions (Ref: PhD1)
It is well recognised that strongly bound water molecules in the primary hydration shell of proteins are important for their structural integrity. Thus drying of proteins to a level where these water molecules are removed will inevitably lead to denaturation. However, it has been observed that drying in the presence of disaccharides like trehalose or sucrose will lead to protein structures similar to the native structures. Initial studies will focus on elucidating the factors that promote stability. Supervisor: Professor Robert Glen.

Hydration of small molecules (Ref: PhD2)
Salts and small co-solvent molecules like disaccharides are known to have a profound effect on a wide range of aqueous chemistry like protein solubility, protein stability, enzymatic activity, polymer swelling, polymer cloud points or water activities. The effect of a given co-solvent on these properties usually follows the Hofmeister series. Despite its importance for biopolymer sciences, the underlying molecular level mechanism is still not completely understood. This will be investigated using computational modelling. Supervisor: Dr Jonathan Goodman.

Solubility of key food ingredients (Ref: PhD3)
Solubility is a key property of materials absorbed from the gut. There is scant information and relevant data on the thermodynamic solubility of materials used in nutritional supplements, food additives and active ingredients. The aim of this project is to compile a database of relevant materials, source these
and experimentally determine the thermodynamic solubility in aqueous solutions that mimic the GI tract taking into account pH, salt effects, cosolvents etc. The outcome would be prediction of solubility for relevant materials under physiologically relevant conditions. Supervisor: Dr John Mitchell.

The studentships are available from October 2005, and are fully funded by Unilever plc. Applicants must be highly motivated with an honours degree (at least 2:1 or equivalent) in Chemistry, Physics or other relevant subjects.

Applications should include a full CV and the names of two professional referees. All applications should be sent to Mrs S.M. Begg, Unilever Centre for Molecular Informatics, Department of Chemistry, Lensfield Road, Cambridge CB2 1 EW, E-mail: smb28@cam.ac.uk quoting the appropriate job reference.

Closing date for all posts: 25 February 2005.

Vacancies in Polymer Informatics

Unilever HPC, home to leading brands such as Dove, Persil, Sunsilk and Axe, and the Unilever Centre for Molecular Informatics at Cambridge are creating a dynamic new research group that will investigate the academic and commercial challenges in the exciting area of Polymer Informatics.

Post-doctoral Research Associates £19,460 - £29,127 pa (depending on experience)

Limit of tenure: Three years

Polymer Informatics - Data structures and computational methods (Ref: PD3)

Polymer Informatics is the extension of Molecular Informatics to the particular problems posed by polymers. Research will seek to identify experimental methods, theoretical and simulation approaches that result in more meaningful structure-property relationships. In this key role you will manage and coordinate the team of scientists and students working in the area of Polymer Informatics. This position requires previous experience of polymer experimentation/modelling and will be in the group of Dr Peter Murray-Rust.

Simulation of polymer materials and property prediction (Ref: PD4)

With a thorough knowledge of the latest methods for the calculation and simulation of polymer properties, the candidate will provide polymer experience to the group, apply best practice to the calculation of polymer properties and, where required, develop and validate new methods to compute polymer properties. This project is expected to encompass simulation at different length scales and granularities from atomic to mesoscale. This position requires previous experience of polymer experimentation/modelling and will be in the group of Dr John Mitchell.

Applicants for post-doctoral positions should have a Ph.D. in a relevant area of Polymer Science, Chemistry, Physics or a related discipline. The posts are available from 1 April 2005, and are subject to a probation period of six months.

Applications should include a full CV, publications list, and the names of three professional referees, and should be accompanied by a completed form PD18 (downloadable from http://www.admin.cam.ac.uk/offices/personnel/forms/pd18).

Design of biodegradable polymers for calcium salt colloid stabilisation (Ref: PhD4)

The project will investigate the factors that govern the biodegradability of polymers and seek to understand how polymers can stabilise calcium precipitation. Using experimental and calculated data a range of QSPRs will be deduced using statistical and pattern recognition methods based on the molecular structure and physical properties. Supervisor: Professor Robert Glen.

Design of polymeric benefit agents for consumer products (Ref: PhD5)

Using a combination of experimental and theoretical models, we wish to relate physico-chemical properties of polymers to consumer benefits such as "conditioning" and "softness" as a means of selecting and designing the most promising materials that could be delivered to fabric under wash conditions or to hair for conditioning. Supervisor: Dr Peter Murray-Rust.

Rules for polymer deposition to hair and laundry substrates from the wash (Ref: PhD6)
We wish to develop a stronger physical insight and robust design rules for deposition of polymers to hair and fabric (cotton and polyester) surfaces. This requires simulation of cotton, polyester and hair surface under wash conditions, a comprehensive "library" database of materials with appropriate structural and property descriptors, and methods and software for applying the design rules to select experimental candidates. Supervisor: Dr Jonathan Goodman.

The studentships are available from October 2005, and are fully funded by Unilever plc. Applicants must be highly motivated with an honours degree (at least II:1 or equivalent) in Chemistry, Polymer Science, Physics or other relevant subjects.

Applications should include a full CV and the names of two professional referees.

All applications should be sent to Mrs S.M. Begg, Unilever Centre for Molecular Informatics, Department of Chemistry, Lensfield Road, Cambridge CB2 1 EW, E-mail: smb28@cam.ac.uk quoting the appropriate job reference.

Postdoctoral Fellowships in Science, Engineering and Technology

The Embark Initiative, operated by the Irish Research Council for Science, Engineering and Technology, invites applications for research funding under the Embark Postdoctoral Fellowship Scheme (2005).

The scheme promotes excellence in individual research careers by funding exceptional researchers with a doctoral degree to associate with established research teams of international reputation.

Successful candidates must pursue their research work at qualifying research bodies in Ireland. The scheme is open to applicants worldwide. Please refer to the Terms and Conditions on our website for further details of eligibility.

Applications must be received before 5.00 pm, on Friday 25th February 2005.

For further information and to apply using an online applications system, please visit: www.embark.ie

Approximately 50 individual awards are being made available (duration two years) with €33,000 (plus a social insurance contribution) available in the first and second year, together with appropriate expenses up to €5,000 in each year. Applications will be subject to evaluation, strictly on merit, by an international assessment committee.

The Irish Research Council for Science, Engineering and Technology, Brooklawn House, Crampton Avenue, Dublin 4, Ireland

[2485-084 (2005) : 86]
Applications are invited for this full-time post in carotid surgery research/audit. We are seeking a highly motivated individual to co-ordinate and manage the Asymptomatic Carotid Surgery Trial (ACST), a successful, large, randomised, controlled clinical trial with centres throughout Europe. You should have a degree in science/biological science or equivalent qualification, experience in project management and data handling, possess excellent communication skills, initiative, be highly organised and fully computer-literate. The post is fixed-term until 31 December 2006 in the first instance. The starting salary will be in the range £24,830 - £25,966 pa inclusive.

http://www.sghms.ac.uk/ or contact the Personnel Office, St George's Hospital Medical School, Cranmer Terrace, London SW17 0RE, telephone 020 8725 5020 (24-hour answerphone) or email: personnel@sghms.ac.uk Closing date 18 February 2005. Please quote reference 401/05.
Learning & Teaching Solutions (LTS)

Editor (Ref: 1563)

£22,507-£29,128 p.a.

Are you an experienced editor from book, journal or new-media publishing? We need you to contribute to the production and delivery of distance learning materials. You will edit learning materials from our Faculty of Technology, which teaches a wide range of courses from engineering through environmental studies to Third World development.

You will work as a media developer, making a critical contribution to the quality of our courses, collaborating closely with academics and other specialists to deliver world-class learning materials across a wide range of media and disciplines.

You will have hands-on editing experience in educational, academic or related publishing, and be familiar with production processes. You will be educated to degree level, or equivalent, and be skilled in working as part of a team, with a range of media developers and authors. Good personal organisational and time-management skills are essential.

Knowledge of creating and editing interactive multimedia teaching materials would be an advantage, as would experience of open and distance learning.

Closing date for applications: 21 February 2005.

Application forms and further particulars (and access details for disabled applicants) are available from the LTS Recruitment Co-ordinator:

• (01908) 659972
• L.A.Payne@open.ac.uk
• write to: Learning & Teaching Solutions, The Open University, Walton Hall, Milton Keynes MK7 6AA.

We promote diversity in employment and welcome applications from all sections of the community. Disabled applicants who meet the essential job requirements will be interviewed. Further particulars are available in large print, disk or audiotape. Minicom (01908) 654901 for hard of hearing.

Division of Primary Care, Public and Occupational Health Department of Public Health and Epidemiology

**Research Fellow/Senior Research Fellow** (in Molecular/Genetic Epidemiology or Bioinformatics)

A new post within the Molecular & Genetic Epidemiology Group with a maximum duration of 3 years has been established. One objective of this group is to generate scientific information on the aetiology and prognosis of bladder and prostate cancer, although new studies in the field of paediatrics are at hand.

An important area includes methodology development including computational genomics and bioinformatics. The new postholder will work to conduct and supervise ongoing research projects in these fields.

The postholder will be encouraged to initiate his/her own research line in these or related disciplines.

Applicants should hold a PhD in an area that demonstrates commitment to the subject area and should have demonstrated scientific achievement in terms of publications, project funding and project management. Excellent knowledge of molecular/genetic epidemiology or bioinformatics and good knowledge of genetics, statistics, epidemiology and laboratory methods are an asset.

Informal enquiries can be addressed to Dr Maurice Zeegers on m.p.zeegers@bham.ac.uk or telephone 0121 414 7578 /6721.

Starting salary £21,640 to £29,128 depending on qualification and experience

Application forms (returnable by 22nd February 2005) and details from Personnel Services, The University of Birmingham, Edgbaston, Birmingham B15 2TT. Tel: 0121 415 9000, web: www.personnel.bham.ac.uk/vacancies

KING’S COLLEGE LONDON
Technology Transfer Manager (physical sciences)
KCL Enterprises Ltd
KCL Enterprises (KCLE) is the wholly owned business development and commercialisation company of King’s College London (KCL). KCLE is responsible for protecting and commercialising Intellectual Property developed within the College as well as the marketing, negotiation and financial administration of research and consultancy activities.
KCL is in the top five universities for research earnings with income from grants and contracts of more than £93 million (2002-2003) and has an annual turnover of £320 million.

We are recruiting a Technology Transfer Manager and seek applicants who would like to join a dynamic technology transfer team and make a real contribution to the business. The TTM will focus on evaluating, protecting and commercialising opportunities developed at King’s College London in the fields of physical sciences, engineering and IT, including bioinformatics and biomedical devices.

You should be qualified to PhD level in a relevant physical science with at least five years in a research or development environment, preferably with experience of working in industry. With experience of intellectual property and commercialisation, you will be able to demonstrate deal completion. You will be comfortable working across a broad range of scientific disciplines. The successful candidate will be an enthusiastic self-starter and strong team player. S/he will demonstrate the ability to analyse complex issues and make clear business decisions and should be able to open doors to companies in the relevant industrial sectors.

This is a fixed-term 2-year contract working on a specific project to develop a portfolio of commercialisation opportunities.

Salary will be within the ALC Grade 5 salary scale, currently between £37,558 and £42,573 per annum plus £2,323 London Allowance, depending on experience. A contributory final salary pension scheme is also included.

To obtain a job pack and further information about King’s please see our website at www.kcl.ac.uk/depsta/pertra/vacancy or alternatively email recruitment@kcl.ac.uk A job pack can also be obtained by writing to the Personnel Department, Central Administration and Support Services, Room 7.20, James Clerk Maxwell Building, 57 Waterloo Road, London SE1 8WA, quoting reference E5/QV/16/05.

Closing date: 24 February 2005

Equality of opportunity is College policy

[2485-093 (2005) : 88]
ARE YOU LOOKING FOR ME?

Well you’ve come to the right place.

Over 90% of professional scientists recommend New Scientist to find the top jobs in science. New Scientist Jobs [www.newscientistjobs.com](http://www.newscientistjobs.com) [2485-094 (2005) : 88]
Professor of Agricultural Engineering
Wageningen University invites applicants for the position of professor of Agricultural Engineering. The professor will lead the Farm Technology Group of Wageningen University. This group develops advanced technology for sustainable and viable agro-production systems. This includes e.g. the use of sensors, automation and models for precision agriculture. The group takes a multidisciplinary approach to technological innovation.

The professor will be appointed in the Department of Agrotechnology and Food Sciences of Wageningen University. The research takes place within the graduate schools of the University, with Production Ecology and Resource Conservation as the main one. The professor will have teaching assignments in the BSc Agrotechnology and in the MSc Agricultural and Bioresource Engineering.

What we require The candidate holds a PhD in a relevant engineering discipline, e.g. agricultural, horticultural or biosystems engineering; has ample research experience and proven scientific excellence, as evidenced by publications in major scientific journals; is a competent teacher and contributes to innovating education programmes; is active in attracting students to the University; contributes to the chair group's strategic positioning both in the University and at national and international level; is an inspiring leader and an excellent communicator; has a wide experience and good contacts in industry, as evidenced by contract research and consultancy; has Dutch for a native language or is willing to learn the language quickly, and is fluent in English.

What we offer A full professor position for 5 days a week. The salary will be at professor level.

Information Contact the chairman of the nomination committee, Prof. dr ir Jos H. M. Metz, tel. +31 (0)31 482129, e-mail: jos.metz@wur.nl, or its secretary, dr ir Gert Jan Hofstede, tel. +31 (0)317 484630, e-mail: gertjan.hofstede@wur.nl. For information about the chair group, have a look at www.agriculturalengineering.nl

Applications Those who are interested in this position are asked to respond before January 31, 2005 by sending a letter of application together with a curriculum vitae to the Staff Bureau of Wageningen University, PO. Box 9101, 6700HB Wageningen, the Netherlands, mentioning vacancy number HGL 2004-1201.

WAGENINGEN UNIVERSITY
WAGENINGEN
UNIVERSITY OF OXFORD
Department of Engineering Science

Research Assistant in Computer Vision
The starting salary will be on the RA1A scale £19,460 - £21,640 p.a.
The Department of Engineering Science wishes to recruit a Research Assistant to work in the Active
Vision Laboratory on 2 new projects funded by the EPSRC. This post is available for 36 months.
The successful applicant for this post will have a good first degree plus doctorate (or be close to
submission) in Engineering, Computer Science or related discipline. A demonstrable knowledge of
probability and statistics together with good programming skills especially in C/C++ is also essential.
You will have the ability to do novel research and write and publish research papers, work alone and as
part of a team. Experience with machine vision and/or mobile robotics is desirable.
Please quote DF05001 - POST 1 in all correspondence.

Research Assistant in Computer Vision
The starting salary will be on the RA1A scale £19,460 - £24,820 p.a.
The Department of Engineering Science wishes to recruit a Research Assistant to work in the Active
Vision Laboratory on 2 new projects funded by the EPSRC. This post is available for 24 months.
The successful applicant will have a good first degree and doctorate (or be close to submission) in
Engineering, Computer Science or related discipline with experience in 3D computer vision and strong
programming skills in C/C++. You will also have the ability to design and execute experiments together
with demonstrable written and verbal communication skills. A publication record commensurate with
experience and the ability to innovate and work alone or as part of a team are essential.
Please quote DF05002 - POST 2 in all correspondence.

Research Assistant in Computer Vision and Wearable Computing
The starting salary will be on the RA1A scale £19,420 - £24,820 p.a.
The Department of Engineering Science wishes to recruit a Research Assistant to work in the Active
Vision Laboratory on 2 new projects funded by the EPSRC. This post is available for 24 months.
The successful candidate will have a good first degree and doctorate (or be close to submission) in
Engineering, Computer Science or related discipline, experience in sensor-driven actuation and strong
computing skills in C/C++. You will need to have the ability to design and execute experiments and
have demonstrable oral and written communication skills. A publication record commensurate with
experience and the ability to innovate and also work alone or as part of a team is also essential.
Please quote DF05004 - POST 3 in all correspondence.

Further particulars for the above three posts may be obtained from Mr C J Scotcher, The Senior
Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ
to whom written applications should be made enclosing a curriculum vitae and the names and addresses
of two referees.
The closing date for applications is 21st February 2005.
The University is an Equal Opportunities Employer.

UNIVERSITY OF OXFORD
[2485-096 (2005) : 89]

NTT
University of Oxford
Department of Physics

NTT Fellow in Bionanoscience
Salary: £19,460 - £29,128 p.a.
NTT Basic Research Laboratory (BRL) and Oxford University invite applications for the post of NTT
Fellow for a period of up to three years in the field of bionanoscience starting on 4th April 2005 or as
soon as possible thereafter. Candidates should have strong research experience in atomic force
microscopy, scanning tunnelling microscopy or single molecule electronics, and be keen to work in an
inter-disciplinary research team that includes physical and life scientists.
The experimental project will be based in the Bionanotechnology IRC at the Department of Physics, and may involve work at NTT BRL, Atsugi, Japan. The successful applicant will join a team that is investigating the electrical and structural properties of membrane proteins and receptors, by applying techniques including protein synthesis and mutagenesis, AFM and nanogap electrodes. The project will be directed by Dr Keiichi Torimitsu NTT BRL and Professors John Ryan and Anthony Watts (Oxford University).

Applications including a CV, list of publications and the contact details of three referees should be sent to the Senior Administrator, Clarendon Laboratory, Department of Physics, Parks Road, Oxford OX1 3PU, or e-mail: a.gordon@physics.ox.ac.uk by 4th March 2005 and quoting reference number DK05/002.

The University is an Equal Opportunities Employer.

[2485-097 (2005) : 89]
The University of Manchester  
Manchester 1824  
Faculty of Medical and Human Sciences  
Division of Human Development  

**Research Scientist/ Embryologist** Ref. MHS/014/05  
You will join a project investigating the use of human oocytes for derivation of embryonic stem (ES) cells. This is an exciting opportunity to become involved in cutting edge research in embryo development, ES cells and gene expression analysis of single cells/embryos. The project, funded by the MRC and in collaboration with the Roslin Institute, is for a period of two years. Research will take place in The Department of Reproductive Medicine, St Mary’s Hospital, Manchester. The post may be organised as a mixture of research and clinical embryology work, including patient contact. You will be a newly qualified or experienced clinical embryologist looking for short-term locum work or research experience, or a postdoctoral research associate.  
The starting salary for this position will be within the range £24,820 - £33,278 p.a.  
Informal enquiries can be made to Dr Daniel Brison, Scientific Director, Department of Reproductive Medicine, by e-mailing daniel.brison@manchester.ac.uk or tel: 01 61 276 6612.  
Application forms and further particulars are available at http://www.manchester.ac.uk/vacancies or from the Directorate of Human Resources, The Chisholm Building, The University of Manchester, Oxford Road, Manchester M13 9PL. Tel: +44 (o) 161 27s 88;5 or e-mail : Mhs-hr@manchester.ac.uk  
Closing date: 18 February 2005. Please quote reference number.  
The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.  
Combining the strengths of UMIST and The Victoria University of Manchester [2485-098 (2005) : 89]
Applications are invited for a five-year Fellowship to work on Bioterrorism. This new post has arisen following a successful bid to the Research Councils UK Academic Fellowship Scheme (http://www.rcuk.ac.uk/ac/fellow) which is designed to provide contract research staff with more attractive and stable paths into academia. On satisfactory completion of the Fellowship, the post-holder will be offered a permanent academic position.

The Fellow will be expected to establish research in the area of Bioterrorism, and to contribute to teaching in appropriate areas in the biological sciences. We welcome applications from candidates with an appropriate research background and who meet one of the three eligibility criteria of the scheme: researchers supported by any type of grant funding; holders of current fellowship awards; and returners/other researchers without current research support.

Informal enquiries can be made to Dr J D Fish (01970 622321, jdf@aber.ac.uk).

Ref: IBS/05/02. Closing date: 18 February 2005. Interviews to be held on 18 March 2005.

For further particulars and an application form, please contact the Personnel Office, quoting the reference number, at the University of Wales Aberystwyth, Old College, King Street, Aberystwyth, Ceredigion SY23 2AX. Tel: 01970 621586. Fax: 01970 622975. E-mail: personnel@aber.ac.uk or at www.aber.ac.uk/employment.shtml

Working towards Equal Opportunities.
POSITIVE ABOUT DISABLED PEOPLE
[2485-099 (2005) : 89]
The Department of Physics at Royal Holloway, University of London has an opening for a postdoctoral researcher funded under the UK Research Council's prestigious Basic Technology Programme, "Reverse Engineering Human Visual Processes", which started in October 2003. We are seeking a highly motivated candidate who has, or expects shortly to obtain, a PhD in image processing, computer vision or a closely related area, to join a team of researchers studying vision algorithms and human vision. The aim of the project is to develop new paradigms for building artificial vision systems by studying biological visual processes.

The research will aim at improved strategies and levels of performance in object recognition, tracking, visual search, and scene interpretation, in a selection of applied problem areas. The appointee will be part of an interdisciplinary team, and will have an excellent opportunity to broaden his/her scientific horizons.

Starting salary will be in the range £21,594 - £26,954 inclusive of London Allowance.
Informal enquiries may be made to Professor E R Davies, Machine Vision Group, Department of Physics, email: e.r.davies@rhul.ac.uk tel: 01784 443497.
Further details and an application form are available from the Personnel Department, Royal Holloway, University of London, Egham, Surrey TW20 OEX; fax: 01784 473527; tel: 01784 414241; website: http://www.rhul.ac.uk/Personnel/JobVacancies.htm
Please quote reference KB/004011.
The closing date for the receipt of applications is 3 March 2005. It is anticipated that interviews will be held in the week 10-16 March 2005.
We positively welcome applications from all sections of the community.
[2485-100 (2005) : 90]
UNIVERSITY OF TEESSIDE
SCHOOL OF SCIENCE TECHNOLOGY
Lecturer/Senior Lecturer in Forensic Science
Salary £23,643 - £36,428
At the University of Teesside, our determination to achieve excellence in teaching, enterprise and research is matched by our success in widening access and participation for our 20,000 students. Our North East of England location offers exceptional opportunities for an affordable, quality lifestyle and an innovative, challenging work environment.
You will contribute to the development, delivery and promotion of courses in the area of forensic science, together with research and consultancy.
With a good First Degree in Chemistry, Physics, Biology or other relevant subject and significant practical work experience in a related discipline, you will be able to contribute to curriculum design and development and be able to teach at a range of levels, i.e. undergraduate / postgraduate. It is essential that you have specialist knowledge of one or more of the following areas: drugs and toxicology, the examination of marks and traces (tool marks, glass, paint etc), hairs and fibres or analytical chemistry experience applicable within the forensic science arena. Experience as a Forensic Scientist and experience of case management and crime scene examination is desirable.
This post is available on a full time or job share basis.
Job Reference: 1058
Application forms and further details are available from the Personnel Department, Middlesbrough, Tees Valley, T51 3BA. Tel 01642 342200 (24 hours) or e-mail: jobs@tees.ac.uk
For further details of this and other posts, please refer to our web site http://www.tees.ac.uk
Closing date: 10 February 2005 12.00 noon
Interview date: 3 March 2005

INVESTOR IN PEOPLE
POSITIVE ABOUT DISABLED PEOPLE
As the Opportunity University, we welcome applications from every section of the community supporting our commitment to equality of opportunity within a diverse working and learning environment.
Technical University of Denmark

Professor in Operations Management

DTU

At the Department of Manufacturing Engineering and Management (IPL), Technical University of Denmark we are looking for a professor in operations management to play a key role in research and education within the field including development of production systems, planning and control covering physical products as well as knowledge and service. Further information may be obtained from Head of Department, professor Leo Alting, tel.: +45 45 25 47 44 or Per Langaa Jensen, Professor, tel.: +45 45 25 60 31.

The full text of the announcement can be seen on DTU’s homepage at www.dtu.dk/job

Application deadline: 30th March 2005 at 12.00.
[2485-102 (2005) : 90]
University of Newcastle upon Tyne

**Research Associate**  £19,460 - £23,643

Based in the Human Nutrition Research Centre within the School of Clinical Medical Sciences, you will be required to work as part of a team developing novel diet-related biomarkers of bowel cancer risk. The research project is funded by the Food Standards Agency and includes collaboration with other scientists in Newcastle, the Institute of Food Research in Norwich and with clinicians at Wansbeck General Hospital. The work will include assessment of the diet and nutritional status of the volunteers, laboratory analysis of colorectal mucosal biomarkers, liaison with collaborators and day-to-day management of the project. You should have a PhD in nutrition (or related science) and experience of working with human volunteers. Excellent communication, team working and organisational skills are essential. Previous experience of using ACCESS would be an advantage. Informal enquiries may be made to Professor John Mathers, e-mail [john.mathers@ncl.ac.uk](mailto:john.mathers@ncl.ac.uk)

The post is available immediately and is tenable for 4 years. For further details please telephone (0191) 222 8487, or to apply please submit your written application on single sided, loose leaf A4 paper, giving full details of your qualifications and experience, together with a completed Employment Record Form (available from our web site at [www.ncl.ac.uk/vacancies](http://www.ncl.ac.uk/vacancies)) to: Mrs Margaret White, Human Nutrition Research Centre, School of Clinical Medical Sciences Agriculture Building, University of Newcastle upon Tyne, Newcastle upon Tyne NE1 7RU quoting job reference A270R. Closing date: 18/02/05. Interviews to be held on: 01/03/05.

CANCER RESEARCH UK
[2485-104 (2005) : 91]
The London School of Hygiene & Tropical Medicine, one of the largest postgraduate medical schools in Europe, is pleased to call for applications for two Research Council-funded studentships, which will be awarded to young science graduates for research leading to careers in public and international health. Each studentship runs for 3 years from October 2005 and provides financial support and stipend subject to eligibility requirements.

The Department of Infectious & Tropical Diseases (ITD) has a wide ranging research programme encompassing the molecular biology, immunology and epidemiology of globally important infectious diseases. The following research projects for PhD studentships are some of those currently on offer:

- **Host-pathogen interactions during Campylobacter jejuni infection**
  Nick Dorrell

- **Mathematical models of infectious disease - evolution of the pathogen and the development of drug resistance**
  Azra Ghani

- **Evolution of Yersinia species via functional analysis of putative virulence determinants**
  Stewart Hinchcliffe

- **Putative proteases of C jejuni and their biological roles**
  Andrey Karlyshev

- **Regulating immunity to malaria**
  Eleanor Riley

- **Localisation and function of STEVOR proteins in Plasmodium falciparum gametocytes**
  Colin Sutherland

- **Molecular basis of quorum sensing and biofilm formation in pathogenic Yersinia**
  Brendan Wren

Further information on all of the studentship projects available can be found at: [www.lshtm.ac.uk/prospectus/howto/bbsrcmrc.html](http://www.lshtm.ac.uk/prospectus/howto/bbsrcmrc.html)

Applicants must hold or expect to obtain a 1st or 2.1 university degree in a relevant science subject. Full MRC and BBSRC awards are available to UK residents only: other EU nationals may receive awards which cover tuition fees only. Please check eligibility requirements at [www.mrc.ac.uk](http://www.mrc.ac.uk) and [www.bbsrc.ac.uk](http://www.bbsrc.ac.uk).

To apply, select up to 2 projects only: first and second choice must be stated. The application must include a cover letter, CV, names of two academic referees, current postal and e-mail address and telephone number.

Send applications by post or e-mail to Ms Deanne Eastwood, Department of Infectious and Tropical Diseases, London School of Hygiene & Tropical Medicine, Keppel Street, London WC1E 7HT (e-mail: Deanne.eastwood@lshtm.ac.uk).

Closing date for applications is Friday 4th March 2005, and decisions on awards will be made in April 2005.

Further details on the courses offered by the School are available at: [www.lshtm.ac.uk/courses](http://www.lshtm.ac.uk/courses)

[2485-105 (2005) : 91]
UNIVERSITY OF STRATHCLYDE

PHD IN SINGLE MOLECULE RESEARCH

A funded research studentship leading to PhD available now for a good Honours graduate to work in a multidisciplinary team with substantial funding from the EPSRC, SRIF and the Wolfson Foundation. Experience or keen interest in at least one of the following is essential:

- Optical microscopy
- Nanoparticles
- Biomedical sensing
- Ultrafast
- Fluorescence
- Sol-gel ceramics

Further details at [http://sensor.phys.strnth.ac.uk](http://sensor.phys.strnth.ac.uk). CV with contact details of two referees to Prof. David Birch, Head of Physics, Strathclyde University, Glasgow G4 ONG. E-mail: djs.birch@strath.ac.uk or tel. 0141 548 3132.

[2485-106 (2005) : 92]
Imperial College London  
Department of Mechanical Engineering

**Research Studentships**

The Department of Mechanical Engineering has a number of EPSRC-funded studentships available starting in October 2005. Studentships with funding from other sources are also available throughout the year. The EPSRC-funded studentships are open to UK nationals with good honours degrees. Each studentship will pay the holder a stipend of not less than £12,500 p.a. in addition to College fees.

The Department regularly achieves the highest possible ranking as part of research assessment exercises and our research takes place in a strongly multi-disciplinary environment that provides the basis for applications in Energy Transport, Defence and Health Care sectors. Studentships are thus open to applicants with first degrees in subjects such as Chemistry, Physics, Mathematics and Engineering.

Projects are available in the following areas:

- Adhesives and Composites
- Laser Diagnostics
- Chemistry of Advanced Fuels
- Catalytic Oxidation
- Distributed Power Systems
- Carbon Capture
- Environmental Engineering
- Multiphase Flows
- Non-destructive Evaluation
- Mechanics of Soft Solids
- Nano-particles and Materials
- Medical Robotics
- Renewable Fuel Technologies
- Railway Technology
- Thermal Barrier Coatings
- Turbulent Reacting Flows

For further details contact Vernette Rice, Postgraduate Office, Department of Mechanical Engineering, Imperial College London, Exhibition Road, London SW7 2AZ; tel. 020 7594 7022; fax. 020 7594 1472; e-mail: vrice@imperial.ac.uk

[2485-108 (2005) : 92]
Research Studentships
Department of Plant Sciences
Applications are invited for PhD positions commencing in October 2005 in plant and microbial sciences, ranging from molecular to field studies. For details of all projects in Development, Cell Biology, Photosynthesis and Metabolism, Epidemiology and Ecology, together with application procedures and eligibility criteria, see www.plantsci.cam.ac.uk Applications are especially invited for the following projects:

Plant Ecology Scaling of hydraulic conductance to wood anatomy of trees
Metabolism Crystal structure of a plant Vitamin B5 biosynthetic enzyme
Ion Transport Cell-specific mobilisation of vacuolar nitrate
Signalling Regulation of photosynthesis gene expression by the circadian clock
Molecular Biology Role of stromules in starch granule formation (CASE award)
Epidemiology Modelling and prevention of diseases in heterogeneous landscapes
Plant Pathology Mechanisms of viral counter-defence

Closing date: 21 February 2005
UNIVERSITY OF CAMBRIDGE
[2485-109 (2005) : 92]
THE MRC CENTRE FOR IMMUNE REGULATION

Research Studentships 2005

Four-year MRes/PhD programme based in 5* (minimum)-rated research divisions within the MRC Centre. The 1st (MRes) year primarily consists of 2 research projects with some additional advanced teaching and acquisition of appropriate generic/transferable skills. The next 3 years are devoted to the PhD project, subject areas and supervisors for which are:

Role of stroma in T cell development - Graham Anderson/Eric Jenkinson
Role of stroma in leukocyte survival - Chris Buckley/Janet Lord
Epstein-Barr virus & B cell transformation - John Gordon/Lawrence Young
Leukocyte recruitment and inflammation - David Adams/Gerard Nash

Four 4-year MRC-funded studentships are available for UK citizens. Other nationals may be selected to join the course on a self-funded basis. Details of this research career training programme and eligibility criteria are shown on the Centre website: http://www.bham.ac.uk/mrceir/

Interested candidates should send a CV to Allison Shakespeare, e-mail: a.s.shakespeare@bham.ac.uk

Closing date: 11th March 2005.

THE UNIVERSITY OF BIRMINGHAM

Working towards Equal Opportunities Work-Life Balance Award Winner 2003

POSITIVE ABOUT DISABLED PEOPLE

[2485-110 (2005) : 92]
Applications are invited for suitably qualified UK or other EU nationals for studentships in the following areas. Further details can be found at the respective web sites. www.aber.ac.uk/biology and www.irs.aber.ac.uk

Institute of Biological Sciences
• Behaviour and ecology of fish and freshwater invertebrates.
• Ecology of soils, plants and fungi.
• Functional and genetic diversity in marine and freshwaters.
• Interactions between viruses and bacteria in aquatic ecosystems.
• Intercellular signaling and communication in microbes.
• Unraveling host-parasite interactions.
• Why have sex? The evolution of sex and recombination.

Institute of Rural Sciences
• Physiology of defective luteal function: a proteomics approach.
• Proteomics of oocyte maturation in Welsh breeds of sheep.
• Mechanisms of invasion of bovine mammary epithelial cells by Staphylococcus aureus.
• Role of the Somatotropic Axis on Mammary Epithelial Cell Function.
• The effect of yeast on microbial numbers and activity in the rumen and the hindgut of equines.

Applicants should normally have obtained or expect to obtain at least upper second class honours in their first degree. You are encouraged initially to contact either Professor Mike Young (miy@aber.ac.uk) for projects in the Institute of Biological Sciences or Professor Jamie Newbold (ejn@aber.ac.uk) for projects in the Institute of Rural Sciences.

Training Opportunities in Molecular Medical Science

Four Research PhD Studentships
The School of Clinical Sciences provides an excellent research environment for the training of students in modern molecular medicine techniques.
Applications are invited for a motivated and enthusiastic student with an interest in molecular medical science.
Applications are invited from candidates who hold or expect to obtain a first or second class Honours degree in a relevant subject for the following research projects:
Novel Gene associations in colorectal cancer, Professor Alastair Watson, Division of Gastroenterology.
Mechanisms and regulation of cell shedding in the intestinal epithelium, Professor Alastair Watson, Division of Gastroenterology.
Investigation of protein expression in clonogenic intestinal epithelial cells. Dr Mark Pritchard, Division of Gastroenterology.
Selenium Metabolism in the failing kidney. Dr Frank McArdle, Division of Metabolic and Cellular Medicine.
The successful candidates will be anticipated to commence on 1 September 2005 (though this is negotiable) and will be paid a stipend of £10,000 p.a. (tax free). These posts are only open to students from the EU countries.
For informal enquiries regarding this post please contact Professor Alastair Watson or Dr Mark Pritchard (sscourt@liv.ac.uk), Tel: 0151 794 6822, Fax 0151 794 6825 or Dr. Frank McArdle (savg@liv.ac.uk) Tel: 0151 706 4089 before 25th February 2005.

COMMITTED TO EQUAL OPPORTUNITIES

[2485-114 (2005) : 93]
LANCASTER UNIVERSITY
Celebrating 40 years of excellence
Centre for Sustainable Water Management
PhD Studentships on Groundwater Surface Water Flux Processes (2 posts)
Environment Agency

For further details contact Professor Louise Heathwaite tel: (01524) 510225, e-mail: louise.heathwaite@lancs.ac.uk or Professor Andy Binley e-mail: a.binley@lancs.ac.uk or Dr Hao Zhang e-mail: h.zhang@lancs.ac.uk

Application forms can be found at http://www.lancs.ac.uk/users/admissions/postgrad/pgform1.htm
Closing date: 23 February 2005.

Applications are invited for two PhD Studentships on mapping flow and nutrient flux processes in the hyporheic zone. Strong chemical, redox and flux gradients make this zone an ecologically critical interface between surface and subsurface waters in groundwater catchments.

Studentship one: Linked to a NERC project led by Professors Heathwaite and Lane (Durham University), which is developing a risk model for prioritising environmental protection within river catchments.

Studentship two: Led by Professors Heathwaite and Binley and Dr Zhang and will evaluate artificial and natural tracers for mapping flow and solute transport in the riparian zone of groundwater-fed catchments.

Both students will undertake field research in experimental river reaches and riparian zones in predominantly rural catchments. The Studentships are supported by funds from the Environment Agency and form a part of the Agency's larger Hyporheic Zone Processes research programme. They will start on 1 October 2005 or earlier if an appropriate candidate is found. They will be based in the Centre for Sustainable Water Management, Lancaster Environment Centre, Lancaster University (please visit http://www.lec.lancs.ac.uk/swm).

POSITIVE ABOUT DISABLED PEOPLE
Working towards equality of opportunity
Should I stay or should I go?

Advertise your studentship here and gain maximum response. To be a part of this special issue or to find out more, please call the team on: +44 (0) 20 8652 4444 or email: sales@newscientist.com

Booking deadline 11 February 2005 10.30 am.
[2485-116 (2005) : 94]
Department of Biochemistry
Postgraduate Open Days
Wednesday 23rd February and Wednesday 2nd March 2005, 10.30 a.m. to 6.00 p.m.
A significant number of Ph.D studentships will be available from October 2005 for postgraduate research and training in the following fields:
• Cancer Biology and Cell Signalling
• Cell and Developmental Biology
• Control of Gene Expression
• Functional Genomics
• Molecular Enzymology
• Structural Biology and Bioinformatics
• Molecular Pathogenesis
• Antibiotic Resistance and Biosynthesis
The Open Days will provide the opportunity to discuss potential research projects with members of staff, to view the excellent research facilities and to talk with current postgraduates.
Reasonable travel expenses will be reimbursed and a buffet lunch will be served.
To register for one of the Open Days and to obtain further information on postgraduate research and training in the department, together with details of staff research interests, please visit our website at www.le.ac.uk/biochem or contact Marilyn Turner, Department of Biochemistry, University of Leicester, Adrian Building, University Road, Leicester LE1 7RH (email mt33@le.ac.uk).
Shortly after registration applicants will be sent a brochure containing information on postgraduate training and research in the Department and further details of the Open Days.
A Leading Research and Teaching University
University of Leicester
[2485-117 (2005) : 94]
THE UNIVERSITY of York
DEPARTMENT OF BIOLOGY
PhD studentships 2005
York Biology is a leading centre for biological research in the UK and offers an active programme of graduate research training, founded in research excellence (RAE 5). The Department has state-of-the-art new buildings and equipment on a lakeside campus in a beautiful historic city near the Yorkshire Dales and Moors. The Sunday Times selected the University of York as UK University of the Year for 2003.

Over 20 PhD Research Studentships are available to UK/EU students for October 2005, including 14 BBSRC/NERC quota studentships (3- and 4-year), for which projects are available across the whole range of modern biological research, including the following research foci: Biochemistry & Biophysics; Bioinformatics & Mathematics; Developmental Biology; Ecology & Environmental Biology; Molecular & Cellular Medicine; Molecular Microbiology; and Plant Biology. In addition, 5 BBSRC project-linked studentships and 1 Unilever studentship are also available:

• Using Arabidopsis-derived tools to investigate shoot branching central in Brassicas Prof Ottoline Leyser (hmoll@york.ac.uk)
• An integrative study of reserve mobilisation and germination in oilseeds Prof Ian Graham (iag1@york.ac.uk)
• Defining the rules for small molecule inhibition of protein-protein interactions Prof Colin Kleanthous (ck11@york.ac.uk)
• High-performance pattern matching & visualization for genome property annotation Dr Leo Caves (lsdc1@york.ac.uk)
• Identifying targets of MyoD and Myf5 in myogenic stem cells Dr Betsy Pownall (mep4@york.ac.uk)
• Learning from resurrection plants: the rehydration of dried polymeric materials Professor Simon McQueen-Mason (sjmml@york.ac.uk)

For application forms and project details, see our website (www.york.ac.uk/depts/biol/) or contact: Graduate Admissions, Department of Biology, University of York, YO10 5YW, email: biol-pg-admissions@york.ac.uk.

UNIVERSITY OF YORK - EXCELLENCE IN TEACHING AND RESEARCH
www.york.ac.uk
[2485-118 (2005) : 94]
MSc in The Molecular Biology and Pathology of Viruses

This one year MSc course provides a comprehensive understanding of the nature of viruses and of the diseases caused by virus infections, with the emphasis on the understanding of these processes at the molecular level. The course consists of lectures, tutorials, seminars and practical classes followed by a full-time research project and will next begin in October 2005. Some funding may be available. Applications are invited from graduates in the biological sciences, medicine, or veterinary science (normally with second class honours or above) or those with an equivalent overseas qualification. Further information is available from Dr M.J. McGarvey, Division of Medicine, Imperial College Faculty of Medicine, St Mary's Campus, South Wharf Road, London. W2 1NY, tel: +44 (0)20 7886 6404, fax: +44 (0)20 7724 9369, e-mail: m.mcgarvey@imperial.ac.uk

Details of the course are also available from: www.imperial.ac.uk/medicine/mbpv

Application forms are available from: The Registry, Sherfield Building, Imperial College of Science, Technology and Medicine, South Kensington Campus, Exhibition Road, London SW7 2AZ. Tel: +44 (0)20 7594 8093, fax: +44 (0)20 7594 8004, e-mail: pgmedreg@ic.ac.uk or via the Internet at http://www.imperial.ac.uk/templates/pg01text3.asp?P=1397[2485-119 (2005) : 95]
PhD/MSc in Bioinformatics & MSc in Bioinformatics

Applications are invited for a Wellcome Trust 4-year PhD programme in Bioinformatics with five places commencing October 2005. In the first year the students will follow the MSc in Bioinformatics. During the next three years the student would join the PhD programme in one of the departments at Imperial associated with the Programme. The programme will provide an interdisciplinary training, and applications are invited from students graduating from any biological, physical, computational or mathematical first degree course. We are keen to encourage graduates from numerical and physical sciences to join the course.

Applicants must have or be expected to obtain at least an upper second honours degree or an equivalent overseas qualification. The current stipend starts at £17,595 with further increments with additionally the Home/ European Union course fees being paid.

For further details and application procedure see:
http://www.bioinformatics.ic.ac.uk/bio_mscphd.html

The closing date for applications is 16 February 2005 and interviews will be held in mid March.

Applications can also be made just for the MSc in Bioinformatics. For further details and the application procedure see www.bio.ic.ac.uk/teaching/pg/bioinf.htm

Amgen, the world's largest biotechnology company with a turnover in excess of $10 billion, uses science and innovation in an effort to dramatically improve people's lives, and aspires to be the world's best human therapeutics company. Our researchers harness the powerful tools of cellular and molecular biology and medicinal chemistry to discover, develop and commercialise naturally occurring proteins, antibodies and small molecules, extending the reach of science to unleash the body's own powerful therapeutic responses.

**MEDICAL INFORMATION EXECUTIVE**
Contract Cambridge

Reporting to our Medical Information Manager, you will respond promptly and accurately to internal and external requests for information about marketed and development products as well as research and prepare written responses. Supporting our Nephrology Franchise, you will critically review and extract key points from relevant scientific publications and have input into the development of sales training materials and promotional literature.

A biomedical science/pharmacy graduate or healthcare professional, experienced in clinical medicine, you will be able to review and summarise scientific literature as well as document your findings clearly and concisely. A natural team player with the personal qualities to relate well with people at all levels, you must be analytical and inquisitive with the logic skills to research for answers efficiently and effectively. Medical information and literature database search experience would be advantageous while you must be highly-motivated and quick to learn. Full training will be given.

You will benefit from a progressive, team-oriented ideology where everyone is encouraged to attain their full potential.

Please send your CV and covering letter explaining your suitability for the role, to the Human Resources Department, Amgen Ltd, 240 Cambridge Science Park, Milton Road, Cambridge CB4 OWD. E-mail uk-human-resources@uk.amgen.com

We thank all candidates for their interest and would appreciate all responses by Monday 21 March 2005.

[2489-001 (2005) : 58]
RCC is an independent, privately owned Swiss company with its headquarters in Itingen, close to the city of Basel. We are seeking to fill the following vacancies:

**Study director**
for experimental studies in reproductive Toxicology

The successful candidate is expected to have a Ph. D., a BSc or an equivalent training in veterinary medicine or biology (specialized in toxicology/pharmacology) with 2-5 years of relevant experience in CRO-business. In-depth skills particularly in regulatory studies of reproductive toxicology, good knowledge of study design as well as some experience in GLP environments would be of advantage.

The primary responsibility is to serve as a study director for reproductive toxicology studies and to maintain a dose relationship with our clients. Our rapid growth has generated a busy department with the prospective of further development and we can offer you a highly motivated team, good terms of employment and excellent social benefits.

Are you a good team player, self-motivated, skilled in diplomacy and fluent in English with some German knowledge?

**Technician**
for reproductive toxicology lab

The successful candidate is expected to be skilled in the techniques of experimental studies in reproductive toxicology (2-5 years of experience), especially in the techniques of fetal pathology. You will also need some experience in a GLP environment and be prepared to work for a modern, growing and active CRO in Switzerland.

We offer you good terms of employment and excellent social benefits in a professional organization, a highly motivated team as well as the prospective for further development.

Are you a good team player, self-motivated, skilled in diplomacy and fluent in English with some German skills?

Applicants are requested to send their CV with a covering letter to:
RCC Ltd, Susanne Henz, Human Resources. Zelgliweg 7, CH-4452 Itingen / Switzerland E-mail: personal@rcc.ch

Compliance Manager (Operations)
West Yorkshire

Our client is an independent medical device company, dedicated to the research, development and manufacture of tissue implant products.

Due to the company's continued growth we are looking to appoint a Compliance Manager to manage and facilitate all quality control activities across the business.

The role has full responsibility for organising site QA Operations resource to meet the requirements of the Manufacturing, New Product Development and Regulatory teams to assure compliance of materials, suppliers and product to company specifications and standards.

Additionally, you will be required to operationally lead the continuous improvement of the company, represent the compliance group, facilitate site audit inspections, prepare and write controlled documentation, and present the analysis of QC data to the senior managers within the business.

Interested Applicants will be educated to degree level or equivalent ideally with a science related discipline. Microbiologist experience and qualifications are essential. You will also have a minimum of 3 years experience leading a QC function ideally within a similarly controlled industry.

To apply:
Interested applicants should send a detailed CV quoting current salary and references 4000/rhhr Right Hand HR, Ltd, Rotterdam House, 118 Quayside, Newcastle upon Tyne, NE1 3DY or e-mail sue.little@rhhr.com

Closing Date: 30th March 2005

[2489-006 (2005) : 60]
Unilever
What do you give the scientist that has everything?

**Head of Risk Analysis** £50,000 & excellent benefits  Bedfordshire, UK

At the Unilever Safety & Environmental Assurance Centre (SEAC) our scientists have the lot: deep expertise, a global reputation, years of experience, and diverse and challenging projects. But we want you to make them even better. How? By exploring new ways in which this talent can be employed, by developing a culture where everyone thinks broader and by helping to maintain our record of keeping consumers, our employees and the environment safe. As a scientist yourself, this challenge could mean everything to your career.

Guiding and managing 70 experts in toxicology, microbiology, occupational and process safety, environmental science, statistics and modelling, you’ll implement risk analysis methodologies to provide advice on the suitability of options being considered during product and process innovation. You’ll bring in new ideas on organisational dynamics and team working, you’ll review the approaches of the multidisciplinary teams and facilitate changes where necessary, and most important of all, you’ll inspire a culture of more integrated thinking throughout SEAC’s diverse project portfolio.

We’re looking for a professional with five to ten years’ people management experience in a large, multidisciplinary scientific / technical programme environment. A proven track record of designing and implementing risk analysis strategies is highly desirable, and top notch influencing and resource management skills are absolutely vital. Going back a bit, you’ll need a PhD or equivalent scientific qualification and a reputation for delivering in scientific or technical areas.

To apply, send your CV to [recruitment.peoplelinkuk@unilever.com](mailto:recruitment.peoplelinkuk@unilever.com) quoting ref. 106673.

Closing date for applications is Monday 21\textsuperscript{st} March 2001.

In applying for the above position, you agree, unless you notify us when responding to this advert, that we may consider you for other vacancies we have and make your details available in other companies in the Unilever Group for the same purpose. Some Unilever companies are in countries without any data protection laws.

We are committed to diversity in everything we do.

The MRC Dunn Human Nutrition Unit (Director: Professor Sir John Walker) wishes to appoint a post-doctoral protein biochemist to undertake research on the structure analysis of F₁F₀-ATPase from mitochondria. You will have a PhD in an appropriate subject, preferably with interest and proven expertise with membrane proteins required to study the structure and function of the rotary engine in ATP Synthase from mitochondria.

This is a 3 year training and development position for a post-doctoral scientist who has either recently completed his/her doctoral studies, is moving into a new research discipline or has limited previous experience of key transferable skills. It provides opportunities to develop research project skills and develop collaborative links with colleagues within the Medical Research Council and elsewhere. The research group is housed within the Dunn Human Nutrition Unit, a world-renowned centre for Bioenergetics research.

Informal inquiries should be addressed to Professor Sir John Walker via e-mail walker@mrc-dunn.cam.ac.uk or phone 01223 252701. A full job description and additional information about the unit can be found at www.mrc-dunn.cam.ac.uk.

The starting salary will be in the range of £25,000 - £25,500 per annum, depending on qualifications and experience. This is supported by a flexible pay and reward policy and optional MRC final salary Pension Scheme. We can offer 30 days holiday entitlement and excellent on site sports and social facilities.

Please send a CV and covering letter stating how you meet the role requirements, also detailing the names and addresses of two professional referees who can be contacted prior to interview.

Please quote job reference DHNU/205/12 and e-mail your application to: recruit@mrc-centre.cam.ac.uk or post to: Recruitment Office, Personnel Department, MRC Centre, Hills Road, Cambridge, CB2 2QH.

Closing date: 31 March 2005

Nutritionists Bedfordshire UK

It takes a good deal more than an apple a day to stay completely healthy all the time. And that’s precisely our objective in Corporate Research at Unilever. We’re identifying and implementing cutting-edge scientific developments and turning them to breakthroughs in healthy ageing for the whole body – developing nutritional, personal care and lifestyle interventions to complement an existing portfolio of more than 400 famous brands.

For you that means a chance to immerse yourself in a peer group of industry-leading experts, who all share a passion for helping people around the world enjoy a better quality of life. You’ll also maintain close ties with international collaborative networks to stay abreast of emerging academic and commercial developments.

As well as a PhD in nutritional epidemiology or human nutrition, you’ll have an understanding of the drivers which form the basis of the relationship between diet, lifestyle and health. This will be complemented by an ability to interpret and translate scientific evidence into practical dietary and lifestyle advice.

Come and see us at www.unilver-colworth.co.uk for more information on these roles and how to apply. Closing date for applications 17th March 2005.

In applying for the above position, you agree, unless you notify us when responding to this advert, that we may consider you for other vacancies we have and make your details available to other companies in the Unilever group for the same purpose. Make the fruit work harder

Unilever

Harnessing the potential benefits in each and every natural ingredient we use - keeping the taste, texture and nutritional value at their optimum - is a wide-ranging and complicated science, to say the least. But it’s a challenge we’re tackling head on at Unilever - and we're enjoying substantial success. Now we're expanding our operations even further, pushing the boundaries of our research capabilities to maximise the natural goodness in our products, so that our consumers can look and feel their best. And we need your help. This is an exciting opportunity to join a group of scientists, expert in a wide variety of fields, providing scientific know-how throughout the Unilever business.

**Cell/Molecular Biologist**
Researching the effect of plant based ingredients on skin health & appearance, you'll conduct cell & molecular based research to explore the regulation of key processes associated with skin function. You'll have a PhD in a biological subject, with extensive experience of molecular biology and mammalian cell culture, knowledge of skin biology, although not essential, would be highly desirable. Ref: CM890

**Biochemist**
In this role, you’ll be working as part of a team aiming to understand the impact of plant based ingredients on skin function. Your duties will be broad reaching, ranging from the biochemical analysis of clinical samples through to formulation and analysis of new products for skin care. With a BSc (Hons) in a biological discipline, you'll ideally have 2-3 years' practical experience of biochemical and/or molecular biology techniques. Ref: B91

**Biomaterials Scientist**
You’ll establish relationships between the material properties of plant tissues and raw material selection, post-harvest physiology and processing, in relation to specific sensorial attributes. You'll then identify and provide options to deliver the desired attributes. Certainly with a PhD in materials science, mechanical engineering, biomimetics or a related field, you’ll have a proven track record of research delivery and materials science. Ref B563

**Plant Biochemist**
You’ll determine key biochemical mechanisms that influence specific product attributes on processing and/or storage. That will include analysing specific quality changes in plants and key enzymic reactions. Following that you’ll identify and test options to control the biochemistry so that we can deliver the ultimate fruit and vegetable quality. A graduate in biochemistry, plant biology or biological sciences, your practical experience will ideally include 20-3 years’ experience in an industrial or academic environment. Ref: PB64

**Molecular biologist**
You’ll join our international pea breeding operation, which is responsible for breeding exclusive varieties of peas for our Frozen Foods business. Determining the genetic profiles of plants as well as analyzing the genetic data, you’ll identify the genes that cause quality traits. You’ll be a Biological Science graduate with practical experience of PCR and ideally 2-3 years’ relevant experience. Ref: MB89

To apply, send your CV to unilver@workcomms.com quoting the appropriate reference number. Closing date for applications 21st March 2005.

In applying for the above position, you agree, unless you notify us when responding to this advert, that we may consider you for other vacancies we have and make your details available to other companies in the Unilever group for the same purpose. Some Unilver companies are in countries without any data protection laws.
We are committed to diversity in everything we do.

[2489-013 (2005) : 64-65]
Play a pivotal role in a diverse technical programme

**Operations & Resource Co-ordinator**  
Up to £36,000 & benefits - Based Portsdown West, Portsmouth

Within Dstl, the Defence Science and Technology Laboratory, the Naval Systems department provides the Ministry of Defence (MOD) with analysis and top-level systems advice on both existing and future capabilities of naval systems. We address whole-system issues including requirement definition, balance of investment, technical risk and systems research, working closely with other Dstl departments to deliver integrated advice.

A key member of the management team, you will have a vital role to play in the delivery of a diverse technical programme. Dividing your time between three sites in the South of England, you will be the focal point for business planning, process improvement, business continuity, risk management and assets control. On the resourcing side, your role will involve optimising the talents of some 300 people, as well as co-ordinating corporate HR requirements. Taking a lead in all departmental HR-related internal and external communications, and promoting inter-departmental working and collaboration with the MOD, industry and academia will complete your remit.

You must have around 10 years' project management experience that has included significant team leader responsibilities, along with wide exposure to staffing issues. A science or business degree would be an asset. You should be an accomplished organiser and a fluent communicator, capable of building internal and external relationships at all levels. The ability to meet deadlines while maintaining the highest technical standards will be key. A full, clean driving licence is also required.

In addition to a stimulating and rewarding career, as a civil servant you'll enjoy a competitive benefits package. This includes a choice of stakeholder or final salary pension schemes, generous holiday allowance, relocation assistance where appropriate, and good sports and leisure facilities.

Applicants who reach a suitable standard in this campaign, but are not appointed, may be considered for other vacancies.

Dstl is a committed equal opportunities employer and recruits staff fully on the basis of specified competencies and skills.

This permanent post is only open to UK Nationals. Applicants must be willing to undergo and satisfy the current Government/MOD Security Vetting procedures prior to a formal offer of employment being made.

For an application form, job and competency profile, please contact, quoting reference 020734NS, Response Solutions, aia*, 5 St John's Lane, London EC1M 4BH. Email: response@aia.co.uk Tel: 020 7553 9120 (between 9.30am and 5.30pm). If you have a hearing impairment we are happy to accept Typetalk calls. Closing date: 25th March 2005.

*aia is a recruitment advertising agency and is handling the response to this advertisement on our behalf. Your details will be sent to Dstl only and will not be used for any other purpose.

Dstl is part of the Ministry of Defence

Genus ABS

Research Technician Cattle Breeding
The Post

Genus Breeding Ltd requires a research technician for the semen laboratory at our bull stud in Ruthin, North Wales. A programme of research is conducted both in house and with a number of Universities to develop novel processes and products for cattle breeding. Techniques in use include flow cytometry, fluorescence microscopy and FISH.

What we expect from you

Applicants will have a good degree in a relevant subject and a keen interest in reproductive biology.

Interested?

Please write to Human Resources Dept, Genus Breeding Ltd, Alpha Building, London Road, Nantwich CW5 7JW or email aoakes@genusbreeding.co.uk

The closing date for applications is 18th March 2005. If we have not contacted you within 2 weeks of this date you will not have been selected for interview.

Advisory Committee on Pesticides (ACP)

Government Advisers on Pesticides Chair & Member

The ACP is established under the Food and Environment Protection Act 1985 (FEPA) to give independent advice to Ministers on all matters relating to pesticides. There are currently 21 Members on the Committee. Members serve an initial term of three years and the Committee meets up to seven times a year in York. The ACP positions will become available in January 2006.

Scientific Members

The Advisory Committee on Pesticides is looking for a new Chair and one independent Member to provide scientific advice to Government and the devolved Administrations on the safe and effective use of pesticides and other pest control methods. We are specifically seeking expertise for the vacancies in the following areas:

Chair

You should have experience in chairing scientific committees and knowledge of regulatory procedures relevant to the assessment of human health and/or environmental impacts. Strong analytical skills are required, together with an ability to draw together high-level scientific advice and present the conclusions coherently to Ministers and interested parties including members of the public. Ref: ACP/01

Member (Medical Toxicologist)

Medically qualified with expertise in clinical pharmacology/toxicology, you will have experience of a range of regulatory mammalian toxicity study types and their interpretation, and knowledge of risk assessment and risk management procedures relevant to human exposures to chemicals. Ref: ACP/02

Potential applicants will need to be able to demonstrate their ability to contribute to detailed technical discussions. Applicants should have considerable postgraduate experience and have gained recognition in the scientific community in their field.

The posts are part-time and voluntary, although modest travel and subsistence costs are met and attendance and preparation fees paid. Applicants should be aware that the work can generate a considerable amount of both public and media interest. Travel and subsistence costs will also be met for those attending interviews for these posts.

Appointments will be based on merit, with independent assessment, openness and transparency of process. The Government and devolved Administrations are committed to the principles of equal opportunities and welcome applications from all sections of the community regardless of gender, sexual orientation, race, colour, ethnic origin, religion or disability. Women, representatives of ethnic minority communities and people with disabilities are currently under-represented on the Committees and applications from such people are therefore particularly welcome.

If you are interested in serving and have the necessary qualifications and experience, an information pack and application form are available from: Mrs Kathy Wood, Pesticides Safety Directorate, Room 312, Mallard House, Kings Pool, 3 Peasholme Green, York Y01 7PX. Tel: 01904 455707. Email: kathy.wood@psd.defra.gsi.gov.uk Interviews have been provisionally scheduled to take place end of June/beginning of July 2005 and will be held in York.

The closing date for applications is 16 April 2005.

[2489-018 (2005) : 67]
Because health matters

The sanofi aventis Group is Europe's largest pharmaceutical manufacturing company, and the 3rd largest in the world. Backed by world-class research and development, sanofi aventis is committed to developing both personnel and products through innovation and challenging the norm.

Our modern well-equipped research facility in Alnwick is engaged in the development of a wide range of new pharmaceutical products, and is helping us develop leading positions in seven major therapeutic areas: cardiovascular disease, thrombosis, oncology, diabetes, central nervous system, internal medicine and vaccines. So if you want your career to develop in a varied and stimulating environment that sets very high standards, here's your opportunity.

Analytical sciences

**Senior Research Scientist** – Ref ALN05/009

You will be responsible for analysing drug substances and various products as part of the drug development programme, operating within a small team.

Generating data from a range of analytical instruments and assessing its quality, you will also develop and validate analytical methods and techniques, and help evaluate equipment and software.

Familiar with the principles of GMP and GLP you will ideally be able to offer us at least two years' experience within an analytical sciences department, together with a BSc (or equivalent) in Chemistry and excellent organisational and interpersonal skills.

**Research Scientist** – Ref ALN04/042

You will perform analysis of drug substances and various products as part of the drug development programme. This position is also responsible for assisting in the development and validation of analytical methods and techniques. You will generate data from a range of analytical instruments and assess its quality against pre-determined limits.

Experience within an analytical sciences department and familiarity with the principles of GMP and GLP would be an advantage. However, if you have a BSc (or equivalent) in Chemistry and a strong interest in and aptitude for analytical chemistry, as well as the ability to work as part of a small team, we are interested in hearing from you.

Isotope Chemistry and Metabolite Synthesis

**Research Scientist** – Ref ALN04/037

An exciting opportunity has arisen to join the team responsible for the synthesis of compounds labelled with either stable isotopes ($^2$H, $^{13}$C and $^{15}$N) or radioisotopes ($^{14}$C). These are required by our Global Metabolism and Pharmacokinetics Departments, both at Alnwick and elsewhere within the organisation.

In addition, as you develop within the role you will have the prospect of representing the department in liaison with International Project Teams.

The successful candidate will be expected to have a MChem or BSc in Chemistry, with an aptitude for synthetic organic chemistry, together with excellent verbal and written communications skills and a strong teamwork approach. You will not be expected to have had previous experience working with $^{14}$C as in-house training will be provided.

Global Metabolism and Pharmacokinetics

**Senior Research Scientist** – Ref ALN05/011

As a Study Director, you will be responsible for the design, conduct and reporting of in vitro and in vivo drug metabolism and protein binding studies supporting all phases of drug development. As you develop, you will also be responsible for identifying and introducing new technologies to ensure the department remains up to date.

In addition to a BSc in Biochemistry, Biomedical or Analytical Science, you will have at least two years' relevant experience, ideally in a GLP environment. Strong organisational skills, verbal and written communication skills and an aptitude for analytical thinking will help you to succeed in this role.
In return, we offer an excellent remuneration package including pension scheme, a range of health care initiatives including private medical insurance, dental care scheme, share incentive plan and flexible working hours. We are located only 30 minutes from the vibrant city of Newcastle-upon-Tyne and yet close to the majestic Northumbrian coastline and countryside. To request an application pack, please contact Human Resources Department, Alnwick Research Centre, Willowburn Avenue, Alnwick, Northumberland NE66 2JH, telephone (01665) 608 358, email alnwick.recruit@sanofi-aventis.com. Please ensure you clearly quote the relevant reference number. Closing date for completed application forms: Friday, 18 March 2005. [2489-019 (2005) : 68]
Humane Slaughter Association
UFAW
Established 1926

**Public Relations and Fundraising Officer**
The Universities Federation for Animal Welfare (Reg Charity No 207996) and the Humane Slaughter Association (Reg Charity No 209563) have international reputations for promoting advances in animal welfare through research and education in the UK and overseas. It is vital for the continuing success of these charities that their aims and work are well-publicised. The Public Relations/Fund Raising Officer will be responsible to the CE for promotion of the charities and for developing fund-raising activities. The ideal candidate will be a self-motivated, proactive individual with exceptional presentation and communication skills, a biological science degree, and employment experience relevant to this post. Some management experience would be an advantage.
The initial appointment is for 3 years. Starting salary will be within the range: £25-£28k (plus 8% pension contribution after completion of probationary period).
For further information, contact: Dr James Kirkwood, Chief Executive, UFAW and HSA, The Old School, Brewhouse Hill, Wheathampstead, Herts AL4 8AN (tel 01582-831818/919), to whom your application, including CV and names and addresses of 2 referees, should be sent by the closing date 25th March 2005.

Analytical Scientists
• competitive salary • final salary, pension scheme • private healthcare
• continuing professional development • share scheme • employee assistance programme

Abbott Laboratories is one of the world's largest healthcare companies, operating in 130 countries, employing 77,000 people worldwide and generating a turnover in excess of $20bn. Our site at Queenborough, Kent produces medicines in therapeutic areas of respiratory infection, HIV/AIDS, Cardiovascular, men's & women's health and Paediatrics. Operations include pharmaceutical manufacturing and packaging for solid dose forms and anaesthetics, API production, QP, and Logistics.

The UK branch of our Manufacturing, Science & Technology group, part of Global Pharmaceutical Operations, provides the vital link between R&D and worldwide commercial manufacturing plants by ensuring the smooth transition of all new API's and drug products (both chemical and biological), processes and manufacturing technology. It also provides key support for currently marketed products in terms of site transfers, compliance improvements, reformulation and process/method optimisations.

The Analytical Sciences function of the MS & T group currently has vacancies for scientists to be part of multi-disciplinary teams working on analytical aspects of all global pharmaceutical API and drug product activities, ensuring that business goals are met to the highest quality standards and demanding project timescales. The roles also involve liaising extensively with other parts of the group in various locations world-wide including international travel, both within Europe and to the US.

To be successful in these roles, you will have a minimum of an honours degree in Chemistry or a related subject, although a MSc/PhD would be a definite advantage, as would experience in the analysis of APIs and/or drug products within the healthcare industry. Also you will be able to demonstrate a genuine interest in analytical and organic chemistry.

Key requirements include:
• Practical experience and aptitude to work with analytical equipment.
• Ability to work on your own initiative to meet aggressive deadlines.
• Excellent interpersonal skills and an ability to work within multidisciplinary and international teams.
• Excellent computer and communication skills.

If you feel you have the correct attributes to tackle this role, please apply with full CV quoting reference number MS&T9001/05 and including current salary details, to Moyra Hills, Senior HR Advisor, Abbott Laboratories Ltd, Queenborough, Kent ME11 5EL.
Email: ukqueenboroughhr@abbott.com

ABBOTT LABORATORIES
Quality Health Care Worldwide
[2489-022 (2005) : 69]
Scientific Officer
£19,602-£25,193 inclusive
Central London
Ref: NS2048

The vision of Cancer Research UK is to conquer cancer through world-class research. We are the world's leading independent organisation dedicated to cancer research, spending £213m a year on cutting-edge research into treating, preventing and curing cancer. A Scientific Officer is required to join our state-of-the-art Protein Analysis Team. We identify and sequence proteins by mass spectrometric techniques as a service for CR-UK researchers. You should hold a degree or equivalent in biochemistry/chemistry and have at least two years' experience of working in a lab, ideally within a mass spectrometry environment. Experience of nano or capillary HPLC systems would be an advantage, although training will be provided. You will be an enthusiastic and practical person, who is comfortable working with instrumentation and able to trouble shoot. You will also have good attention to detail and enjoy working in a team.

To apply, please send two copies of both your CV and covering letter, quoting reference NS2048, to Resourcing, PO Box 123, London, WC2A 3PX or email recruitment@cancer.org.uk

Closing date: 18th March 2005.

Placing People First

www.srg.co.uk

[2489-024 (2005) : 69]
The Proudman Oceanographic Laboratory (POL) is a Natural Environment Research Council laboratory and has a strong international reputation for research in sea-level and the ocean margins. It is situated in newly-built premises in Liverpool, adjacent to the Department of Ocean and Earth Sciences of the University of Liverpool. We are seeking to recruit scientists to work on ocean dynamics and climate change within the sea level group. Two posts are available.

**RAPID CLIMATE CHANGE RESEARCHER, THREE-YEAR FIXED-TERM APPOINTMENT, BAND 6**

This is a position funded by the NERC Rapid Climate Change thematic programme, to investigate propagation of signals related to the Atlantic thermohaline circulation, along the U.S. and Canadian continental slope. First data from the WAVE array of 18 bottom pressure recorders and 15 moorings will be available from summer 2006. Candidates should have a Ph.D. or equivalent research experience in a relevant area, and should be highly numerate.

**PHYSICAL OCEANOGRAPHER, OPEN-ENDED APPOINTMENT, BAND 5**

You will contribute to research in ocean dynamics based on sea level and related geodetic techniques, including ocean bottom pressure measurement. You will be involved in POL’s ocean climate monitoring projects in Drake Passage (Antarctica) and the North Atlantic Deep Western Boundary Current, and will help to set the direction of future research. The primary criterion for selection is the potential to make a strong contribution to the sea level and ocean dynamics group in the long term. Accordingly, applicants with a wide range of backgrounds will be considered, but a proven record of research and publication is expected, and experience of seagoing oceanography, ocean dynamics, or geodesy, will be an advantage. Applicants with less experience but strong future potential will be considered for a post at Band 6.

Starting salary for the Band 6 vacancy is £21,140 rising to £26,100 after 3 years. Starting salary for the Band 5 vacancy is £27,940 rising to £32,960 after 3 years' service. Benefits include a contributory final salary pension scheme. Annual leave entitlement starts at 25 days' paid holiday per year, rising to 30 days after 2 years, plus 10.5 public/privilege holidays and a flexi-time system. Pay awards are effective from 1 July. As an Investor in People, we can assure you of the opportunity for further training and development.

Please contact Mrs Linda Parry, Personnel Department, Proudman Oceanographic Laboratory, Joseph Proudman Building, 6 Brownlow Street, Liverpool L3 5DA, telephone number 0151 795 4836, or email birecruit@pol.ac.uk for an application form. If you wish to telephone for an informal discussion about the post, please contact Chris Hughes, on 0 151 795 4854.

Closing date for return of application forms is Tuesday 29th March 2005.

Proudman Oceanographic Laboratory (POL) is a component of the Natural Environment Research Council, has an equal opportunities policy and welcomes applicants from all sections of the community. People with disabilities and those from ethnic minorities are particularly welcome

Closing Date 18th March 2005

[2489-027 (2005) : 70]
The National Centre for the Replacement, Refinement and Reduction of Animals in Research (NC3Rs) is a newly established independent organisation focussing on the development and application of the 3Rs - the principles which underlie the humane use of animals in scientific research. The Centre is funded by the MRC, BBSRC, Home Office, Wellcome Trust and ABPI.

**Programme Managers**

**London To £41,000 pa**

The Centre is currently looking to appoint two Programme Managers to support the delivery of its objectives.

The first post will focus on the 3Rs and the use of animals in the pharmaceutical industry. You will already have experience of this industry sector and ideally, an understanding of molecular, cell and tissue biology as alternatives to animals in research. A PhD and proven research background are essential. (Ref: B3/PMPI2005)

The second role involves developing and implementing the NC3Rs' communications strategy. You will need to possess proven experience of communicating effectively and persuasively with a broad range of stakeholders, including scientists, the media and lay audiences. A PhD is desirable, although not essential. (Ref: B3/PMCI2005)

These are varied and challenging positions incorporating project management/co-ordination responsibility and calling for extensive communication and networking with a wide range of stakeholders and interest groups on contentious issues. For either post, you will need to demonstrate a good understanding of the use of animals in research and a commitment to the 3Rs.

A three-year fixed term contract for both vacancies will apply in the first instance.

For an application pack and further details, please call 020 7670 5331 or email enquiries@nc3rs.org.uk, quoting the appropriate reference. More information on the NC3Rs can be found at www.nc3rs.org.uk

Closing date: 18th March 2005

JOINT NATURE CONSERVATION COMMITTEE
The Joint Nature Conservation Committee (JNCC) was established by the Environmental Protection Act 1990 and advises on UK and international conservation issues.

Renewable Energy Advisor  Salary £21,952 pa
Fixed Term Appointment for two years
The JNCC is looking for a new staff member at our city centre office in Aberdeen. You will be providing advice on marine casework and strategic level advice to government, work with other nature conservation agencies to co-ordinate UK level advice and develop projects to review the impact on nature conservation of UK energy production.
You will need a relevant degree or its equivalent. This post requires good interpersonal and self management skills. The ability to communicate clearly, particularly on technical issues is important, as is effective computer skills. You should be prepared to deal with a range of problems.
Experience in, or the ability to quickly develop knowledge of, the renewable industries, particular aspects of marine ecology, knowledge of environmental impact assessments and consenting regimes for marine projects is necessary.
In return we offer 25 days leave per annum plus public and privilege leave, the opportunity to join our pension scheme and the chance to work with friendly, committed colleagues. Ref No 2004/29
For further details and the necessary application form visit our website at www.jncc.gov.uk leave a message on our voicemail 01733 866892, or email recruitment@jncc.co.uk. The closing date is 23 March 2005. Interviews will be held in Aberdeen.
The JNCC welcomes applications from all members of society
[2489-029 (2005) : 71]
Clinical Scientist - Grade B17 - 19    Ref: 115DJF £31,514 - £34,086 pa (depending on qualifications and experience) 37.5 hrs pw

Joining the Molecular Genetics Team in Bristol, you will help the lab deliver a quality diagnostic service as a member of the SCOBEC consortium (population 14 million).

The Bristol laboratory is funded to implement automated high throughput mutation and SNP detection technologies in newly refurbished facilities, and undertakes diagnostic tests for a wide range of core and specialist genetic disorders. In addition the laboratory is undertaking developments in molecular pathology and tumour prognostics.

As section head, you will have responsibility for the co-ordination and delivery of core service work for a specified subset of diseases and provide training programmes in those areas. You will also be responsible for service development in a specialist area. You will be required to participate in a 1 in 4 duty scientist/signer rota with full result authorising and clinical liaison responsibilities.

Residential accommodation can be provided at reasonable rates. You must be state registered in molecular genetics and have, or be undertaking, MRCPath Part 1. For further details see the CMGS website: www.cmgs.org

Relocation expenses apply to this post.
Informal enquiries: Maggie Williams on (0117) 9596026 maggie.williams@nbt.nhs.uk

To apply: Please visit our website www.nbt.nhs.uk to apply online or call (0117) 9596064.

Closing date: 17 March 2005.

Benefits include flexible working, a final salary pension scheme, a range of childcare support including nursery and playscheme facilities (subject to availability), a childcare voucher scheme, and lots more.

Positive about Disabled People

[2489-030 (2005) : 71]
We seek either a Clinical Cytogeneticist or a Medical Technical Officer to join our small team of clinical cytogeneticists in the field of cancer genetics. Applications welcome from clinical scientists that have completed, or are near completion of, A-grade training for appointment to a Clinical Cytogeneticist B8-B10 post or from applicants with cytogenetic laboratory experience for appointment to a Medical Technical Officer 2 post.

The Paediatric Malignancy Cytogenetics Unit is based at Great Ormond Street Hospital for Children in London. The unit provides a wide-ranging diagnostic service investigating acquired chromosomal abnormalities in childhood leukaemias and solid tumours. You will be involved in all aspects of the provision of this service.

Your main responsibilities will include primary cytogenetic analysis, the processing and culturing of samples submitted to the unit for analysis, and provision of support for the general day-to-day running of the laboratory. The role also includes basic upkeep of a Cytogenetics Tissue Bank Database and involvement in translational research projects. You will have the opportunity to become involved with all areas within the laboratory and personal development will be encouraged.

An honours degree or equivalent in genetics or a biological science is required. Experience in leukaemia and karyotype/FISH analytical experience is desirable.

For further details please contact Steve Chatters on 020 7405 9200 ext.5755 or email: ChattS@gosh.nhs.uk or Dr Helena Kempski on 020 7829 8883 or email: H.Kempski@ich.ucl.ac.uk

For a complete information pack and application form with job description please contact our Recruitment line by calling 020 7813 8407 or visit our website www.gosh.nhs.uk

Please quote reference number PT488.

Closing date: 17th March 2005.

The Trust is committed to equality of opportunity in employment and encourages applications from all sections of the community.

We offer a range of flexible working patterns. Please contact us for more information.

The Trust will apply for Enhanced Disclosure with the successful candidate, and confirmation of this will be required before the post may be taken up. For information on Disclosure please visit the CRB website at www.disclosure.gov.uk

[2489-033 (2005) : 72]
SENIOR PROGRAMMER AND JUNIOR PROGRAMMER

We are looking for energetic, bright computer programmers, who would be interested in working in a small medical software company, to develop and support software for use in medical screening in pregnancy. This is a field that is constantly changing and evolving in the light of scientific and medical advances, and the posts represent an exciting and challenging opportunity.

The main software development relates to a program called alpha, which is used in antenatal screening for Down's syndrome and neural tube defects. alpha is available in a DOS version, written in Fortran and C, and a Windows version, written in Visual Basic, with a library of core routines written in Fortran. The program interprets various tests that are based on estimating the risk of having an affected pregnancy, computed using a woman's age and the values of several screening markers. It is a risk interpretation software with many related features, such as the ability to build a database of screening results which can then be used in monitoring the performance of the screening programme.

In addition to software development and support, responsibilities include administration of the company's computer systems, website and ISO 9001 quality management system.

The Senior Programmer would need to have had experience of software project management, including supervision of other programmers. Expertise in Visual Basic is essential, and a working knowledge of Fortran and C would be an advantage. An understanding of and interest in scientific, mathematical and statistical concepts is required.

The Junior Programmer would need to show evidence of academic talent, ability to learn new computer skills, and programming experience. A willingness and ability to learn quickly would be essential. Willingness to learn and understand scientific, mathematical and statistical concepts is important.

Candidates should have basic experience of Windows operating systems, and be familiar with the standard Microsoft Office applications (including Access, Excel and Word).

For both positions, we are looking for self-motivated, flexible, enthusiastic people, with good problem-solving and English communication skills.

[2489-034 (2005) : 72]
PROXIMAGEN NEUROSCIENCE

Proximagen Limited is a drug discovery and development company focused on the treatment of age-related neurodegenerative illnesses. We are looking for individuals with energy and a determination to succeed who will contribute to the significant unmet medical needs of patients with neurodegenerative disease.

Proximagen is a London-based, rapidly expanding business, that provides an exciting and rewarding environment for individuals wanting a challenging career in the pharmaceutical industry. We offer highly competitive salary and benefits packages.

Proximagen is expanding through the following appointments:

**Project Manager:**
The key purpose of this role is to lead project development programmes ranging from preclinical investigation through clinical trials. Your proactive approach will enable you to anticipate project requirements and lead a multidiscipline team, manage budgets, and deliver against challenging timelines.

The successful candidate will have a degree or PhD, or equivalent work experience. Knowledge of project management processes with excellent presentation skills combined with a knowledge of preclinical development, clinical trial process and regulatory requirements.

**Technical Manager:**
Working as part of a focused team, your role would be to provide support to project management. You will have strong experience working in a diverse facility, be able to demonstrate leadership and problem solving skills and will be familiar with site safety regulations, risk assessment, and radiation protection regulations.

The successful candidate will have a degree with a scientific background in biomedical sciences and high degree of computer literacy. The person appointed will be responsible for the day-to-day administration of research activities.

**Research technicians:**
You will have an understanding of the drug discovery and development process with experience in some of the following techniques; HPLC, cell culture, behavioural analysis, immunohistochemistry, and *in situ* hybridisation. You will have an understanding of pharmacology, pharmacological techniques and their utilisation in the drug discovery and candidate selection process.

Interested applicants must have a degree or PhD in life sciences. A fluent communicator in both written and oral form, you will be able to influence others through reasoned argument. A good team player, you will also be confident to take the initiative, problem solve and promote your own ideas.

Proximagen is conveniently based near London Bridge station in central London. We are confident that the salaries and benefits packages are amongst the best in the industry.

Applications may be emailed to: delia.wilson@proximagen.com or posted to: Proximagen Limited, Attn: Delia Wilson, Hodgkin Building, King's College London, London, SE11UL.

SCYNEXIS
SYNTHETIC CHEMISTS RADIOSYNTHESIS
Ongar, Essex, UK

Radiolabelled compounds have made possible a revolution within the biomedical sciences and have underpinned our understanding of behaviour of modern drugs, playing a vital role in the safety assessment programs for the majority of new drugs entering the market. This has created an expanding activity in market demand for our services.

SCYNEXIS has become one of the leading suppliers of custom synthesized carbon-14 radiolabelled compounds for the life sciences industry. Alongside radiolabelling services, SCYNEXIS offers novel hit generation compounds, hit explosion, lead optimization, medicinal chemistry and analytical services in our state-of-the-art facilities, based at our European site in Ongar, Essex, UK.

With the continued expansion of our custom radiosynthesis facility, an exciting opportunity has arisen for highly motivated and experienced graduate synthetic organic chemists or radiochemists to join our team.

Ideally, you will be a graduate in organic chemistry with at least 2-3 years industrial experience. Strong synthetic execution skills are key in this role. Experience in 14C or tritium labeling is desirable, but full training will be provided.

You will be a key team player with the ability to work within tight deadlines and deliver results. You will possess excellent interpersonal and communication skills, combined with a strong customer-focused approach in all activities.

In return, SCYNEXIS offers a comprehensive package that includes stock options, private medical insurance plus more. Our entrepreneurial environment makes it a pleasure to work at our company.

Are you the person we are looking for? If so, please contact Human Resources for an application pack on telephone number 01277 367040 or alternatively, you can e-mail your request to: UK_Human.Resources@Scynexis.com, quoting reference: SEL/007/0305.

The closing date for completed application forms: Friday 8th April 2005.

SCYNEXIS Europe Limited is an equal opportunities employer and welcomes applications from all sections of the community. www.scynexis.com

Scottish Association for Marine Science
Ardtoe Marine Laboratory

**Visiting Researchers Grants**

Would you like to carry out a short marine science research project? Are you looking for access to large-scale marine research facilities? Are you looking for marine research collaborators? Would you like to visit Ardtoe Marine laboratory?

Since 1965 the Ardtoe laboratory on the west coast of Scotland has been investigating the early life stages of marine fish. We currently maintain distinct genetic breeding stocks of halibut, cod and haddock. Our research facilities range from multi-replicated tanks of 3 to 3,000 litres in temperature controlled rooms, through to a large number of 20, 50, 70 and 160m$^3$ indoor and outdoor tanks, some of which can also be environmentally controlled. These facilities are backed by well-equipped wet and dry laboratories, a phyto/zooplankton culture unit, an engineering workshop, video conference room, meeting room, library, fibre-optic internet connection and offices. The unit links to services in SAMS new main laboratory in Oban and is an excellent field base for studying a range of "pristine" exposed and sheltered marine habitats.

In order to develop long-term collaborations and to stimulate use of the site by the wider marine science community, we offer the opportunity for researchers to visit Ardtoe to review the facilities on offer and to discuss research opportunities. Funding is available for travel and subsistence for an exploratory site visit and additional funds are available to support innovative, short projects. Interested scientists should contact Dr Kenny Black at the address below in the first instance. Proposals received before the end of March 2005 will receive preference.

SAMS Ardtoe Ltd, Ardtoe Marine Laboratory, Acharacle, Argyll PH36 4LD, Scotland
Tel : 01397 875000 Fax : 01397 875001
E : kennyblack@sams.ac.uk

[2489-037 (2005) : 73]
LUBRIZOL
Lubrizol Ltd is an innovative specialty chemical company that produces and supplies technologies that improve the quality and performance of our customers' products in the global transportation, industrial and consumer markets. These technologies include lubricant additives for engine oils, other transportation-related fluids and industrial lubricants, as well as fuel additives for gasoline and diesel fuel.

We currently require a **PROJECT MANAGER** for our Engine Oils Team. Key responsibilities will be to:

- Effectively develop and implement project plans that result in product approvals on time and within budget
- Accurately collate, manipulate and interpret data from bench and engine tests
- Ensure that project status is documented and that final reports are issued upon project completion
- Develop solutions to technical problems as they arise
- Work effectively with other members of the Engine Oils Team (Commercial and Technical)
- Represent Lubrizol's Engine Oils technology at the customer interface in partnership with our Sales team

You will need to demonstrate that you have the ability to:

- Communicate effectively with people at all levels
- Work effectively in a multifunctional team
- Work independently with minimum supervision

**Skills and qualifications**

- Commercially minded with and aptitude for project management
- B.Sc. or equivalent as a minimum
- Computer literate. Competent with MS software (PowerPoint, Excel, Word)

We're based in a beautiful part of Derbyshire close to the Peak National Park, so you can enjoy a lifestyle that matches your career potential! We offer a competitive salary, together with a comprehensive benefits package.

Interested? Then please forward your CV with a covering letter and salary details to hz-hr@lubrizol.com or send by post to: HR Officer, Lubrizol Ltd, PO Box 88, Belper, Derbys DE56 1QN.

Closing date: 24th March 2005 (No Agencies please)

[2489-038 (2005) : 73]
Research Assistant £19,460 - £22,507
Chromatin Regulation in Self-Renewal of Cancer Stem Cells
The post entails the investigation of epigenetic mechanisms regulating genes involved in the self-renewal of cancer stem cells as this may uncover new therapeutic targets and specific markers for the detection of cancer and residual disease after therapy. Our research aims to understand the molecular basis for cancer immortality and exploit this information in the development of new cancer therapies. You should have a BSc in biology or related relevant subject and experience in gene therapy, epigenetics and gene regulation would be an advantage. This post is available until September 2007.
Beatson Laboratories are well-equipped modern research laboratories, housing 20 research groups (see web site: www.beatson.gla.ac.uk).
Informal enquiries may be made to Professor W Nicol Keith (e-mail: n.keith@beatson.gla.ac.uk).
Applications, enclosing a current CV and the names, addresses, fax numbers and e-mail addresses of two referees to Mrs Margaret Jenkins, Division of Cancer Sciences & Molecular Pathology, Garscube Estate, Glasgow G61 1BD. Tel: (0)141 330 4884 Fax: (0)141 330 4063, e-mail: M.lenkins@beatson.gla.ac.uk quoting Ref 11124/DPC/A3. Closing date: 18 March 2005.

Postdoctoral Research Assistant £19,460 - £21,640
We have recently identified an SUMO-protease that is crucial for downstream signalling during salt stress. You will elucidate the role of this SUMO protease in triggering cellular signalling during salt stress. This post is available for up to three years. Further particulars can be found at: www.gla.ac.uk/ibls/news/posts.html
Letters of application, including two CVs, the names, postal and e-mail addresses and fax numbers of two academic referees, should be sent to Lesley Frew, IBLS, West Medical Building, University of Glasgow, Glasgow G12 8QQ, UK quoting Ref 11119/DPL/A3.

Technician £13,953 - £15,585
You will be actively involved in experimental cutting-edge research of ubiquitin-proteasome system and stress signalling proteins, and assist in the efficient running and management of a group of research scientists. Available for up to three years.
For an application pack, please see our website or write Ref 11118/HRL/T1 to the Recruitment Section, Human Resources Department, University of Glasgow, Glasgow G12 SQG.
Unless stated otherwise, closing date: 25 March 2005
The University is committed to equality of opportunity in employment.

[2489-039 (2005) : 74]
University of Newcastle upon Tyne

**Project Technical Manager** £22,507

We are seeking either a crop or animal science specialist with experience in project management for the position of project technical manager of the EU project QualityLowInputFood (see project website [www.qlif.org](http://www.qlif.org)). Reporting to the project co-ordinator, Professor Carlo Leifert, you will be responsible for managing the collection of WP and subproject-specific technical reports, the preparation and timely submission of consolidated technical reports to the European Commission and the co-ordination of exchanges or project deliverables between partners. You will also be expected to support the work and preparation of scientific publications and/or technology transfer/training activities under either the crop agronomy (WP2.1 and 3.3.2) or the dairy research programme (WPs2.2.1 and 2.2.2) contracted to the University of Newcastle upon Tyne under the Integrated Project. For further information telephone Lois Bell on (01661) 830 222, e-mail [l.e.bell@ncl.ac.uk](mailto:l.e.bell@ncl.ac.uk)

For further details and information on how to apply, please visit our web site at [www.ncl.ac.uk/vacancies](http://www.ncl.ac.uk/vacancies) or call the 24 hour answerphone on (0191) 222 5085 quoting job reference D276A, or write to: Human Resources Section, Faculty of SAgE Offices, University of Newcastle upon Tyne, 1st Floor, Agriculture Building, Newcastle upon Tyne NE 1 7RU. Closing date: 21/03/05.

[2489-040 (2005) : 74]
UNIVERSITY COLLEGE LONDON
Department of Biochemical Engineering

Research Assistant
The Advanced Centre for Biochemical Engineering at UCL and the CPACT group at the University of Newcastle seek a process engineer to undertake scale-down and modelling research. You will be part of a new collaborative research grant to explore the linkage via intelligent agents of predictive models with process descriptions driven by manufacturing data. The output will be tested against processes run at pilot-scale at UCL and full-scale data from an industrial partner. You will need to be confident with a range of experimental and analytical methods as well as being familiar with the demands of process modelling. Salary will be on the R.AIA scale £23,970 pa including London Weighting. The post is available from April 2005 for 3 years.

Interested applicants should obtain an application pack from Miss Tracy Woods, Departmental Administrator, Biochemical Engineering, University College London, Torrington Place, London WC1E 7JE (Tel: 020 7679 3003 or email: t.woods@ucl.ac.uk). Applications in the form of a full CV, together with letter of application quoting Research Assistant, should be sent to the above address. The closing date for applications is Friday, 11th March 2005.

UCL Taking Action for Equality

[2489-041 (2005) : 74]
The University of Manchester
MANCHESTER 1824

Faculty of Medical and Human Sciences

**Scientific Administrator/ Data Manager** (RAPPER)  Ref:MHS/059/05

Salary circa £23,000 p.a.

Radiogenomics: the assessment of polymorphisms for predicting the effects of radiotherapy (RAPPER) is a national translational research study, funded by Cancer Research UK. The long-term goal of the work is to identify patients who are more likely to develop normal tissue toxicity following radiation treatment for cancer. The project is being run between Addenbrooke's hospital, Cambridge and Christie Hospital, Manchester. The study will be co-ordinated by The University of Manchester Academic Department of Radiation Oncology (ADRO), based at Christie Hospital, Manchester.

We are looking for an enthusiastic, well-motivated individual with excellent interpersonal, communication, IT and organisational skills to provide scientific administration and data management support for the RAPPER study. You should be educated to degree level, preferably in the physical, biological or medical sciences. A PhD would be an advantage, as would experience working within university or trust environments. Financial and data management experience would be an advantage.

This position offers an ideal opportunity to learn about the work of a multi-disciplinary scientific and clinical research group, and to gain experience in the management of a translational clinical study.

The post is available immediately and will be for 12 months in the first instance, with the possibility of renewal for a further two years.

Application forms and further particulars are available at http://www.manchester.ac.uk/vacancies or from Dr Jo Cresswell on +44 (0) 161 446 8268 or jo.cresswell@manchester.ac.uk

---

Academic Respiratory Medicine Department

**Post-Doctoral Research Scientist** Ref: MHS/054/05

salary £19,460 - 22,507 p.a.

An enthusiastic and highly motivated cell biologist is sought to join a research group investigating modulation of glucocorticoid receptor (GR) function in the lungs of smokers. The project will focus on GR protein phosphorylation, and GR recruitment to key regulatory gene elements using human lung tissue. This is a unique opportunity to pursue translational research.

Working in two laboratories, South Manchester University Hospital Trust (in the academic respiratory medicine department) and the Centre for Molecular Medicine (on the main University of Manchester campus), you will be expected to drive the research programme forward within a large, well-funded and collaborative research group.

You should have relevant experience in cell biology (particularly protein biochemistry and molecular biology) and hold a PhD in a biological science.

This post is available for 18 months initially with excellent prospects of contract extension.

Informal enquiries can be made to Dr Dave Singh +44 (0) 161 2912672 or Dr David Ray on +44 (0) 161 275 5655 or e-mail: dsingh@meu.org.uk

Application forms and further particulars are available at http://www.manchester.ac.uk/news/vacancies or from the Directorate of Human Resources, The Chisholm Building, The University of Manchester, Oxford Road, Manchester M13 9PL. Tel: +44 (0) 161 275 885, e-mail Mhs-hr@manchester.ac.uk

Closing date for both posts: 17 March 2005.

Please quote the reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

Combining the strengths of UMIST and The Victoria University of Manchester

[2489-042 (2005) : 75]
The University of Sheffield
School of Medicine and Biomedical Sciences

**Business Research Fellow (Fixed-term)**
Salary: from £22,500 per annum
Applications are invited for the post of Business Research Fellow (fixed term) within the School of Medicine and Biomedical Sciences. The post holder will support the development of the School’s Clinical Research Facility (CRF), by assisting the stimulation, and securing of clinical research projects and trials to be undertaken within the new facility with the public and corporate sectors. The post holder will work closely with researchers in the School, across key interfaces and will engage with business and industry to identify and promote potential collaborations, partnerships and funding opportunities. The successful applicant will have a good honours degree (or equivalent) with experience of research, development and commercialisation in the medical, health or clinical field, ideally in both and academic and industrial environment. Applicants will be expected to have excellent project management and communication skills that can be applied to both the scientific and business setting; be self motivated to manage their own portfolio of projects and to be dynamic and effective in establishing and building relationships across key sectors. Ideally the applicant will have a good understanding of the main issues associated with business-university interactions. The post is available for a fixed-term of eighteen months.

Closing Date: 22 March 2005 Ref: R3602

Department of Molecular Biology & Biotechnology

**Research Technician (Fixed-term)**
Salary: from £13,900 per annum
The post holder will join a project studying membrane protein structure. The successful candidate will provide the technical support necessary to maintain various research activities and acquire a wide range of skills in protein biochemistry and electron microscopy. Candidates should have enthusiasm for laboratory work and be educated to BTEC or equivalent. Familiarity with basic computing (PC) and protein biochemistry techniques is essential. Experience of electron microscopy would be an advantage. This post is available for up to 36 months.

Closing Date: 17 March 2005 Ref: S5664

Instituto Gulbenkian de Ciência

**One Post-doc and Two PhD Positions**

The European Commission supports the establishment of a Marie Curie Excellence Team to develop theoretical models for the epidemiology of recurrent infections. Within the programme a number of positions for researchers are available, and the present call is for two PhD Students and one Postdoctoral Fellow. The PhD Studentships are for three years, and the Postdoctoral Fellowship is for an initial period of one year renewable up to four years. Projects have an emphasis on mathematical modelling to explore reinfection processes. The ultimate goal is to provide useful information for vaccine development and public health. Diseases of current interest within the team include malaria and tuberculosis. Candidates should have a background in mathematics, physics, biology, medicine, or related sciences, and demonstrate an interest to pursue research at the interface.

For further details visit [www.igc.gulbenkian.pt/sites/ggomes](http://www.igc.gulbenkian.pt/sites/ggomes)

Deadline for applications: March 18, 2005, or until positions are filled. Possible starting dates are between April 1, and October 1, 2005.

Applications, including research interests, CV, and two letters of reference should be sent to the Team Leader (contact below). Candidates to the post-doc position should include copies of selected publications.

Contact: Dr Gabriela Gomes, Instituto Gulbenkian de Ciência, Apartado 14, 2781-901 Oeiras, Portugal, ggomes@igc.gulbenkian.pt, Tel: 351-214-464-626.
Science

**Lecturer/Senior Lecturer** in Immunology/Haematology

£25,424 - £38,209 pa inc

The School of Life Sciences at Kingston University is recognised for its excellent teaching quality. In the 2000 QAA teaching quality subject review, Biosciences at Kingston University was awarded 24/24 points. New laboratory facilities have recently been built and all staff are actively engaged in research/consultancy.

The School is a major partner in the Biomedical and Pharmaceutical Sciences Research Group (BPSRG), which made a joint submission with staff from St George's Hospital Medical School for the last RAE, which resulted in a 3a rating.

We are seeking to appoint an Immunologist/Haematologist to contribute to the delivery of our BSc (Hons) and MSc courses in Biomedical Sciences and other closely related courses. You will ideally have a PhD in Immunology/Haematology or a closely related subject. Applicants who additionally have professional experience within these subject areas would be welcomed. Experience of teaching in higher education would be desirable and you will be expected to contribute to the research and consultancy activities of the School. Suitable candidates would be encouraged to join the BPSRG, which is aiming to achieve a 5 rating in the next RAE.

For further details and an application form, please call the recruitment line on 020 8547 7153 or email recruitment@kingston.ac.uk quoting reference 05/050. If you are a minicom user, please phone 020 8547 7169.

[2489-050 (2005) : 77]
UCL
UNIVERSITY COLLEGE LONDON
Royal Free and University College Medical School
Tissue Regeneration & Engineering Centre

Research Associate
RAIA (lower end scale) £21,790 - £24,837, incl. LW
A research associate is required to join a New European Research Programme in novel approaches to nano-micro scale biomaterials and bioreactors for Tissue Engineering (3rd Generation Scaffolds). This project is collaborative with UK and European partners and the successful candidate must have good collaborative skills. Research will involve detailed biomechanical and biomaterials investigation of 3D culture systems, developing new controlling hardware and computer models where necessary. This exciting and developing field, supporting regenerative medicine, will provide a strong basis for future career development of suitable individuals. Previous research experience (PhD) is essential, (ideally across an interface of biology and engineering/physics), for example with backgrounds in bioengineering, connective tissue engineering, biomaterials or cell culture. The ideal candidate will be mobile within the EU, with a good track record for independent scientific writing.

Further information on the position from Professor Brown: tel: +44 (0)20 8909 5425/5353. To apply submit a completed job application form which can be downloaded at: www.ucl.ac.uk/hr/docs/download_forms/job_app.doc and CV along with a short letter explaining how your background and experience would be suitable for this post. Send to: Marion Harvey, Institute of Orthopaedics & Musculoskeletal Science, Royal National Orthopaedic Hospital NHS Trust, Brockley Hill, Stanmore, HA7 4LP Email: m.harvey@ucl.ac.uk or tel: +44 (0)20 8909 5425 for the post specifications.

The closing date for applications for both posts is Friday, 25th March 2006.

School of Medicine  
Infection, Inflammation & Repair Division (IIR)  
**Laboratory Technician**

The University of Southampton IIR division is an internationally renowned unit comprising a unique and highly successful blend of clinicians and basic scientists that are investigating molecular mechanisms of human disease. The 200+ members of scientific staff of the division operate in newly refurbished and well-equipped laboratories at the Southampton General Hospital site. This post is for a full-time laboratory manager and technician responsible for day-to-day management of all technical activities for academic staff on Level E of the south lab and path block. We are seeking a scientist ideally with a BSc in a biological science and considerable experience in bioscience laboratories. You will demonstrate excellent managerial and technical skills, a high level of organisation and time management, have good people management skills and "hands-on" experience with cell culture and/or microscopy/image analysis.

Salary in the range £ 18,537 - £22,111 per annum. For informal enquiries please contact Dr Jane Collins, e-mail: [jec3@soton.ac.uk](mailto:jec3@soton.ac.uk)

An application form and further particulars may be obtained from the Human Resources Department (M), University of Southampton, Highfield, Southampton SO17 1BJ. KING'S COLLEGE LONDON

Research Associate, ‘Knowledge Transfer Partnership’

Medical devices for non-invasive blood glucose testing

This 2-year post is funded by the Dept of Trade and Industry and Lein Applied Diagnostics Ltd under the ‘Knowledge Transfer Partnership’ scheme. The project aims to develop optical approaches to non-invasive blood glucose monitoring in diabetes, and is an exceptional opportunity to train in both clinical research and business procedures. The post will be partly based in the Dept of Chemical Pathology, Guy's Hospital Campus of KCL and partly at the industrial partner, Lein Applied Diagnostics. The successful applicant must have a good first degree in a life/health science, physical science or bioengineering subject and is likely to have decided on a career combining research and business.

Salary will be offered on the RAIA scale £19,460 - £23,643 per annum plus £2,323 London Weighting Allowance. The duration of the post is two years full-time and is funded by the Department of Trade and Industry (Knowledge Transfer Partnership) and Lein Applied Diagnostics Ltd.

To receive an application pack please contact: Mandi Nijjar, Personnel Department, 4th floor Capital House, 42 Weston Street, London SE1 3QD. Alternatively visit http://www.kcl.ac.uk/jobs where a full job description and person specification is available when you view this advert on the vacancy bulletin. Should you experience any difficulties please contact mandip.nijjar@kcl.ac.uk

Informal enquiries can be made to Professor John Pickup (e-mail john.pickup@kcl.ac.uk) and to Dr Graeme Clark (graeme.clark@lein-ad.com). Further details are available at http://www.lein-ad.com

www.newscientistjobs.com
[2489-058 (2005) : 78]
The new Centre for Auditory Research is part of UCL’s recently inaugurated Ear Institute and conducts basic research aimed at understanding hearing and fighting deafness. There are two vacancies:

**Lecturer in Auditory Function and Biophysics**

The successful applicant will play a key role in establishing research in the Centre's Auditory Function laboratory - becoming an integral part of this lively research community. They will participate in ongoing projects relating to auditory system function and also develop an internationally competitive research programme of their own. This appointment offers an unrivalled opportunity to interact with research groups throughout UCL. Applicants must have previous research experience in auditory physiology, biophysics, psychoacoustics or a related area, preferably at postdoctoral level, together with a strong basic science background. Salary will be on the University Non-clinical Scale (A or B) plus London Weighting.

**Research Assistant Instrumentation**

A Research Assistant is required to establish and support novel electroacoustic measurement systems and specialised computer facilities for hearing research. The post holder will provide support to researchers and also have the opportunity to participate in the research. Candidates must have a formal qualification in an appropriate area of electronics or basic science and have practical experience with software-based signal acquisition and processing instrumentation. A good grounding in measurement techniques is essential as is wide and practical experience of PC software, hardware and measurement instrumentation. The appointment is for 3 years in the first instance at salary scale RAIB/RAIA (up to point 8) plus London Weighting, depending on qualifications and expertise.

Further particulars can be obtained from Mrs Cheryl Overington, Administrator, The Ear Institute, 332-336 Gray's Inn Road, London WC1X 8EE. (Tel: 020 7915 1514). Please state clearly which of the two posts is of interest to you. For further information on either post, please contact Professor David Kemp (website: [www.ear.ucl.ac.uk](http://www.ear.ucl.ac.uk) . Tel: 020 7679 8934 or e-mail emission@dircon.co.uk )

Closing date for applications is 18 March 2006.

UCL Taking Action For Equality

[2489-059 (2005) : 78]
Research Associate in Clinical Pharmaceutics (ref. KTI)
The School of Pharmacy is seeking a postgraduate research associate to conduct and supervise research in the area of clinical pharmaceutics, including formulation and stability studies. The successful applicant will also contribute to ongoing research into the pulmonary delivery of liposomes. The post is a joint initiative of SOP and University College London Hospitals and has been created to support Professor Kevin Taylor in his joint role as Professor of Clinical Pharmaceutics. Applicants should have experience of pharmaceutical formulation, HPLC, pulmonary and/or colloidal drug delivery and preferably also be a qualified pharmacist. Starting salary will be in the range £21,783 to £31,451 per annum, including London Allowance, according to experience. Funding will be for one year in the first instance.
For further information and application details, please view the School's website www.ulsop.ac.uk/vacancies email personnel@ulsop.ac.uk or telephone the Personnel Office on 020 7753 5813.
Closing date: Wednesday, 16th March 2005.
The School of Pharmacy is committed to equality of opportunity and selection on merit

[2489-061 (2005) : 79]
Lectureship in Theory of Magnetically Confined Fusion Plasmas

You should have experience in theoretical and/or computational modelling of fusion plasmas with the ability to establish an independent research programme and obtain grant funding. The post has arisen following the appointment of Professor Howard Wilson in a new initiative to expand our internationally-recognised Plasma Physics Group into magnetically confined fusion plasma physics. In addition to research, you will also contribute to our teaching programme. A PhD or equivalent and experience in magnetic confinement fusion plasma physics are both essential.

Informal enquiries to Professor Howard Wilson, tel: +44 (0)1235 466902, email: hw508@york.ac.uk

For information on the Department see http://www.york.ac.uk/physics

Salary will be within the range £24,820 - £35,883 p.a.

For further particulars and details of how to apply, please see our website: http://www.york.ac.uk/admin/persnl/jobs/ or write to the Personnel & Staff Development Office, University of York, Heslington, York YO10 5DD, quoting reference number AA0572.

Closing date: 29 April 2005.

The University of York is committed to diversity and has policies and developmental programmes in place to promote equality of opportunity. It particularly welcomes applications from ethnic minority candidates.

[2489-062 (2005) : 79]
Applications are invited for a Lectureship in the Department of Materials Science and Metallurgy, available from 1 October 2005. There is no specific requirement regarding field of research but you will be expected to make a contribution to the teaching activities of the Department across a wide range of materials topics.

Applications (two copies of a curriculum vitae, a statement of research plans for the future (up to four pages), and the names and addresses of three referees) should be sent to Dr Rosie Ward, Department of Materials Science and Metallurgy, Pembroke Street, Cambridge CB2 3QZ. Form PD18, obtainable from http://www.admin.cam.ac.uk/offices/personnel/forms/pd18 should be included with the application.

The closing date for receipt of applications is 8 April 2005.

Further particulars of the post are available from the Department website at http://www.msm.cam.ac.uk/.

For an informal discussion about the post, prospective applicants may contact the Head of Department, Professor Derek Fray E-mail: djf25@cam.ac.uk

The University offers a range of benefits including attractive pension schemes, professional development, family friendly policies, health and welfare provision, and staff discounts. The University is committed to equality of opportunity.

[2489-063 (2005) : 79]
The Glycobiology Institute (under the direction of Professor Raymond Dwek) is seeking to appoint a Research Associate to develop a data handling system for the automated interpretation of oligosaccharide analysis data derived from established HPLC technology. This will involve creating databases, procedures and algorithms for the automatic inclusion of profiles into a central European prototype database. Manuals, tutorials and guidelines for user input and retrieval options will also be required.

Applicants should possess a PhD in biochemistry, bioinformatics or an equivalent discipline. Relevant computing experience is essential. The ideal candidate will also have a good understanding of oligosaccharide structures. Outstanding organisational skills will be required as well as the ability to work both in a European team and with the analytical team in the GlycoImmunology group led by Dr Pauline Rudd.

The post is funded by an EU award (Eurocarb DB) for up to 4 years, in the first instance.

This position is graded on the University's 1A scale, for which the salary range is £19,460 - £29,128 p.a. The actual starting salary offered will be based on qualifications and experience.

Further general information, including details of the selection criteria that will be used for shortlisting, can be obtained on tel. (01865) 275262, quoting the reference number below or from the Departmental website http://www.bioch.ox.ac.uk/jobs

Applications, including two copies of a detailed CV, the names and addresses of two referees (one of whom must be the current employer), and two copies of a letter setting out, with examples, how you meet the selection criteria, should be sent to: The Deputy Administrator, Department of Biochemistry, University of Oxford, South Parks Road, Oxford OX1 3OU. Please quote reference number: BR/160/NS. The closing date for applications is 1st April 2005.

MSc Chemoinformatics
EPSRC Studentships
Chemoinformatics is a high profile, developing field in the pharmaceutical and agrochemical sectors. This postgraduate programme is aimed at chemists, biochemists, pharmacologists, and biologists seeking to complement a science background with specialist computing skills. The course involves the application of IT to chemical and biological data and has substantial industrial involvement. Students will develop skills in computing and information management and will apply these skills to real-world chemical problems using state-of-the-art commercial software.

Topics include:
- Chemoinformatics
- Computer-aided molecular design
- Programming and data mining
- Databases and web technologies
The course involves a three month dissertation project that may be carried out at a pharmaceutical or software company.

MSc in Environmental Technology
This MSc delivers a core course in term one which provides interdisciplinary training in environmental economics, law, policy, science, health and technology. Term two offers the following specialist options: Business and the Environment; Energy Policy; Environmental Analysis and Assessment; Global Environmental Change and Policy; Pollution Management; Health Risk Assessment, Management and Policy; Water Management, Ecological Management and Environmental Economics and Policy. The third term consists of an individually designed research project.
The 1,900+ course graduates since 1977 have been highly successful in gaining degree-related employment. Using our international Alumni Network, 93% of our graduates find degree-related employment shortly after course completion.
Applications seriously considered until 8 August for Autumn 2005 entry. For further details of these courses please contact: The Assistant Registrar (Admissions), Imperial College of Science, Technology and Medicine, London SW7 2AZ; Email: admissions@imperial.ac.uk Tel: +44 (0)20 7594 8032; Fax: + 44 (0)20 7594 8004; Website: http://www.env.ic.ac.uk

MSc in Environmental Diagnosis
This MSc provides comprehensive practical training, skills and knowledge to diagnose, remediate and restore aquatic, atmospheric and terrestrial environments affected by natural and man-made pollution. It produces leading experts through interactive teaching of transferable skills, case studies, site study visits, practical laboratory work, fieldwork activities, and teambuilding.
There is an individually chosen 5-month research project, with several funded placements in environmental consultancies, industry, regulatory agencies and government organisations. Graduates enjoy degree-related employment success of almost 100%. The course is supported financially by Department of Environmental Science and Technology bursaries, the Panasonic Trust, the British Council, Shell Centenary Scholarships, industrial sponsors, private studentships and a favourable loan facility.
This MSc is a highly rated and popular course based in new teaching and research facilities at Silwood Park, an attractive postgraduate campus near London. For further details please view the course website (www.imperial.ac.uk/environmentalscience/teaching/msc/envdiag) or contact the Course Director, Dr Kevin C Clemitshaw: k.clemitshaw@imperial.ac.uk 020 7594 2445.

THOMSON

SCIENTIFIC EDITORS/ANALYSTS (Central London)

Thomson Scientific, part of the Thomson Corporation, is a leading provider of integrated information to researchers and other professionals in the scientific, academic and governmental marketplaces. We are looking for creative and enthusiastic Editors and Analysts to provide content for our dynamic web-based products, including the innovative new Thomson Pharma platform.

Editors - Pharmaceutical Information

We seek motivated Editors to help maintain the market-leading status of our pharmaceutical information products, in particular the Investigational Drug database (IDdb). You will be required to proactively seek and edit the latest information relating to drug development from a variety of sources, for daily online publication.

Commissioning Editors

Two Editors are needed to commission opinions on key drugs from scientists in academia and the pharmaceutical industry for publication electronically and in print. You will edit submitted material and ensure that the associated drug records on relevant products, such as the IDdb, are as accurate and up to date as possible.

Patent Analysts

We are also looking for Patent Analysts to join our Current Awareness Team. The role involves extracting and indexing key information from patents, to provide accurate, value-added data to customers of our DOLPHIN database, which is used for research and strategic planning purposes.

Senior Chemistry Editor

A position is available for a Senior Editor in our Chemistry Team, responsible for maintaining the chemical content of the IDdb and other products. Applicants will be expected to possess an advanced knowledge of chemical nomenclature, stereochemistry conventions, and organic synthesis processes.

Salary will be dependent on experience and position applied for. Successful candidates will have a degree/MSc/PhD or equivalent in the area of life sciences or organic/medicinal chemistry. All positions require you to be organised and flexible, and be comfortable with deadlines and varying workloads. Interest in the pharmaceutical industry is a distinct advantage for most positions. You should additionally possess excellent communication skills (both written and verbal), and enjoy working both independently and as part of a small team.

To apply, send your CV, together with a covering letter to Arlene McCabe, HR Officer, Thomson Scientific, Suite 3/1, 3rd Floor, Skypark SP1, 8 Elliot Place, Glasgow, G3 8EP, or email to Arlene.mccabee@thomson.com. Please also state the position for which you are applying. Closing date for applications is 15th April 2005.

Please note that if you have not received a response from the Company within 4 weeks of the closing date, you should assume that your application has been unsuccessful.

Our client is a world leader in adhesive technology and one of the largest manufacturers of high specification adhesives and sealants for the industrial and consumer markets. Their considerable investment into research and development ensures they remain at the forefront of its technology.

**RESEARCH & DEVELOPMENT MANAGER** Northamptonshire  
£50,000 Dependent on experience + car allowance + benefits

Overseeing the effective management of the Research and Development Department, you will be responsible for managing a dedicated team of scientists to ensure the successful completion of cutting edge projects. You will create and identify opportunities to launch new products into existing and new markets and enable the transfer of this technology to full scale production.

A qualified PhD Synthetic Chemist, you will have a proven track record in developing projects within a manufacturing environment. Well organised and highly motivated, with excellent communication skills, the ideal candidate will also have experience in team management and the commercial focus, to meet cost and timescale targets.

Please apply in writing with your CV and current salary details, quoting reference number KF95564 to: MKH, Response Handling Services, Media House, 1 Purser Road, Northampton NN1 4PG or email: services@mkh.co.uk

Rentokil Initial

HYGIENE SCIENTIST

Initial Hygiene is a major provider of washroom and cleaning services worldwide and has an opportunity for a chemist to help grow these services. You will manage product development from laboratory and field trials through to production and sales support, including liaison with design and commercial staff. Educated to degree level, you should have experience of formulation chemistry. Confident and proactive in approach you will have the vision and ability to lead multiple projects, and an appreciation of high-quality customer service. You should enjoy working both on your own and as part of a team, and have some experience of project management. You must have good verbal and written communication skills to liaise effectively with all levels of management, be computer literate and strongly self-motivated.

This position has the benefit of a company car.

The British Antarctic Survey carries out research in an environment like no other. Using unique insights gained from the Antarctic, we address fundamental questions of earth system science – ranging from evolution and the way the planet functions to global warming and rising sea levels.

But in order to work effectively, it’s essential that we’re supported by the very best senior managers – experienced professionals like you.

As Deputy Director, you’ll be based in Cambridge, but will regularly visit the Antarctic. You will work closely with the Director and other members of the BAS Board, and will take special responsibility for driving and inspiring delivery of the Science Programme and the BAS vision.

You will ensure that our work is underpinned by the necessary infrastructure and logistic support, also taking special responsibility for Health and Safety and strategic development of our information Management. A knowledge of UK legislation regarding Health and Safety and Freedom of Information will be important.

Analytical and decisive, you’ll have a strong track record of leading a research group or organisation. International research experience is also essential, along with proven budget management skills and the ability to manage staff and projects.

If you think you’ve got what it takes, find out more general information on our website, www.antarctica.ac.uk/employment

For an application pack, please contact Susan Lloyd, Personnel Officer, Corporate Personnel, Natural Environment Research Council, Polaris House, North Star Avenue, Swindon, Wiltshire, SN2 1EU

Telephone: 01793 442592.

Email: silo@wpo.nerc.ac.uk

Please quote reference BAS 34/05

Closing date for receipt of application forms is Friday 29th April 2005.

Interviews are scheduled for Monday 23rd May 2005.

You must be physically capable and medically fit to work in Antarctic conditions. We welcome applications from all sections of the community. People from ethnic minorities are currently under-represented and their applications are particularly welcome.

Alaska Food Diagnostics Plc
Alaska Food Diagnostics Plc
MICROBIOLOGY R&D MANAGER
Salary c£35k – Hampshire/Wiltshire

Alaska Food Diagnostics Plc is a joint venture created between Dstl Porton Down and investors to apply a highly sensitive and specific diagnostic technique, originally developed during the Gulf War, to the field of food and beverage pathogen testing.

The purpose of this job is to manage the company's microbiological assay development programme in order to achieve agreed product development objectives. This involves managing a small team of scientists at the company's laboratory at Porton Down near Salisbury, liaising with external accreditation bodies to ensure successful validation of Alaska’s test kits, evaluating new opportunities and generally participating in the strategic development of the company as a whole.

A degree in Food Science, minimum Masters level, with a major in Microbiology is essential. Fluency in a second European language apart from English is would be an advantage. Applicants should be able to demonstrate several years experience of working with a broad range of food and beverage matrices, for compositional and microbiological analysis, ideally with at least two years international exposure to food manufacturing and analysis. Experience in any of the areas of immuno-magnetic separation, propagating and purification of bacteriophages and of antibody production is highly desirable as is direct experience of dealing with AOAC and AFNOR. Fluency in commonly available PC software (Windows, MS Office, Access etc.) is essential, as is an ability to use a range of standard and specialist laboratory equipment.

To apply, please send your CV with covering letter stating current salary to: Director of Operations/R&D, Alaska Food Diagnostics Plc, Building 227 Dstl Porton, Salisbury SP4 0JQ or via email to hbd@alaskafooddiagnostics.com

For further information about the company and its technology please visit www.alaskafooddiagnostics.com

Johnson & Johnson

Regulatory Affairs Associate/Manager

Johnson & Johnson has more than 200 operating companies in 57 countries around the world, selling products in more than 175 countries throughout the world. We are looking for an ambitious, enthusiastic and commercially aware individual to join our highly respected team.

Our European Regulatory Affairs team is looking for a suitable candidate to support our UK and Irish operating companies. The successful candidate will be pivotal in ensuring regulatory compliance for our cosmetic and toiletry products.

The ideal candidate should have a good degree in a scientific discipline and an appreciation of consumer markets. Previous experience of working in the cosmetic industry, with a good understanding of the regulatory framework, would be preferable but candidates with pharmaceutical or related experience would also be considered.

You should possess excellent written and verbal communication skills, be practical, a good team player, hungry for intellectual challenge and eager to succeed.

The position is based in Maidenhead (Berkshire). If you feel you have the above qualities and are keen to progress your career with a highly respected consumer products company, we would be interested to discuss this opportunity with you.

Please forward your application to:
e-mail: personnel@sci-tech.demon.co.uk
Tel: 01737 241823. Fax: 01737 225498.

Exciting opportunities for chemists and bioinformaticians

Galapagos is a genomics-based discovery company focused on the development of novel drugs for the treatment of bone and joint diseases. Using an innovative high-throughput biology platform, Galapagos has discovered several novel disease-modifying drug targets and now is developing small molecule compounds for clinical use. As part of our expanding chemistry programme we are seeking creative chemists and bioinformaticians to complement our strong biology programme.

These exciting, key positions offer excellent career opportunities as part of a rapidly growing drug discovery team at our state-of-the-art facilities in Mechelen, Belgium. Successful candidates will play a critical role in the next stage of the Company's evolution while expanding their field of scientific expertise.

Competitive packages designed to attract the best

Ref NS-1761a • Team Leaders Medicinal Chemistry
Managing a team of between 4-5 scientists in the disciplines of medicinal, analytical and synthetic chemistry, you will be responsible for deriving and delivering medicinal chemistry strategy on Galapagos' programmes. Candidates should have a PhD in Medicinal or Organic Chemistry combined with at least five years' post-doctoral pharmaceutical and/or biotech experience.

Ref NS-1761b • Medicinal Chemists
There also exists opportunities for enthusiastic medicinal chemists with 1-3 years post doctoral pharmaceutical and/or biotech experience, who can drive forward the company's medicinal chemistry programmes, and in return wish to develop their skills in an exciting environment.

Ref NS-1762 • Team Leader: Computational Chemistry
With a desire to productively apply in silico techniques in a dynamic industry setting, you will be responsible for optimising the use of structural information and managing the computational input into the drug discovery project teams. Ideally at PhD level, you will have at least five years' post-doctoral pharmaceutical and/or biotech experience gained in computational chemistry. Previous experience of kinases, GPCRs and/or nuclear hormone receptors would be advantageous.

Ref NS-356a • Analytical Chemist
With a BSc or MSc in Analytical Chemistry, combined with one to six years' post-graduate industry experience in drug discovery, you will be responsible for the continuous management of all aspects of the running of the analytical service for the chemistry group with responsibility for managing any outsourced activities. The successful candidate is likely to have experience in most modern analytical techniques such as HPLC, GLC, FT-IR, NMR and LC-MS.

Ref NS-356b • Synthetic Chemists
There exists several opportunities for graduate level synthetic chemists to support Medicinal Chemistry on drug discovery programmes. You should have 1-6 years' post BSc experience and, although not essential, some exposure to synthetic development gained in an industrial setting would be preferred.

Ref NS-G-BIO • Bioinformatician
You will be an enthusiastic bioinformatician who takes on responsibility for the management of drug target information from scientific and patent literature as well as biological databases to assist in target selection and prioritisation. Ideally possessing a PhD, you should have at least two years' post-doctoral pharmaceutical industry experience.

For all positions we are looking for individuals with an aptitude to learn and the desire to apply new techniques, an open and proactive personality, the ability to work in multidisciplinary teams combined with excellent communication and problem solving skills.
To be considered please send your CV in the first instance, quoting the relevant reference, to Galapagos@euromedica.com. For further information please call Euromedica on +44 (0) 20 7536 7950. Euromedica is a market leader in global executive search consultancy specialising exclusively in the healthcare and life sciences sectors. www.euromedica.com

[2493-008 (2005) : 57]
ROSLIN INSTITUTE
The Roslin Institute is a leading international centre for research on farm animal genetics and has extensive genomics research programmes.

Bioinformatician RI 3/05
European Animal Disease Genomics Network of Excellence (EADGENE)
Roslin Institute is a central partner in the European Animal Disease Genetics Network of Excellence (EADGENE), an EC Framework VI-funded project coordinating research on host-pathogen interactions. Specifically, Roslin Institute leads the 'Integrating Activities' component and has responsibility for the Bioinformatics component of EADGENE, as well as making a major contribution to the overall programme of research. The Bioinformatics role at Roslin combines strategic definition of the tools required for the application of genomics to host-pathogen interactions, as well as the development of urgently required tools.

The successful candidate will work within the Institute’s Bioinformatics group, and will interact with other key staff at Roslin involved in research relevant to EADGENE, as well as external partners. The successful applicant will be required to:
- Identify key biological issues so that appropriate databases and interfaces can be determined
- Define required standards on experimental design, data collection and storage
- Characterise and make the databases available within the Network but also to a wider community widely known
- Assess the inter-operability of existing databases and define steps for improvement
- Develop specific software for the representation of comparative maps displaying data relevant to host-pathogen interactions
- Determine and document the requirements concerning access restriction to the data
- Identify gaps in data provision within the Network

Candidates with bio-science backgrounds with a demonstrable ability to develop computing solutions are encouraged to apply. Previous experience of genomics and or work in an area of Animal Health research would be preferred. Candidates should be excellent communicators preferably with first-hand experience of involvement in a multi-site collaborative project.

In return, we offer the opportunity to develop your career in a constantly evolving area of science and to use your skills to help improve the understanding of the interaction between genome and animal health status.

Starting Salary will depend on qualifications and experience.
The position is available immediately.

Application forms can be obtained from the Human Resources Office, Roslin Institute, Roslin, Midlothian, EH25 9P5. Tel: 0131 527 4481. Email: Roslin.HR@bbsrc.ac.uk

Closing date: 15 April 2005.
The Roslin Institute is an Equal Opportunities Employer.

**Senior Patent Engineer**  
Fantastic Salary, Pension, Bonus, Healthcare & Relocation  
Based Inverness

LifeScan Scotland is a world leader in the fast growing blood glucose monitoring market, serving diabetes patients across the world. Now a wholly owned subsidiary of Johnson & Johnson, the Scottish facility has enjoyed huge success thanks to the combination of world-class research and development, and a highly skilled manufacturing workforce.

The opportunities are endless and very much down to your own efforts and contribution. We are looking for energy, passion and determination to succeed and your contribution will be invaluable in creating a world without limits for people with diabetes.

LifeScan is based in a beautiful port of Scotland - so you can enjoy a lifestyle that matches your career potential! We are confident that the salaries and benefits packages are amongst the best in the industry.

As a Senior Patent Engineer, you will play a key part in the development, maintenance and assessment of the patent portfolio. Liaising closely with R&D and the Johnson & Johnson legal teams, your remit will be to identify and capture ideas and convert this to written form. Once these ideas have been selected for patenting, you will then go on to assist with detailing these 'inventions' ready for submission. You will become fully conversant with the company's technical goals.

Suitable candidates will have a Science or Engineering degree, and should be able to demonstrate at least 3 years experience in a relevant role with knowledge of patents and associated processes.

We are particularly keen to hear from individuals who have worked in a medical device or high volume manufacturing environment.

Please apply by emailing your CV with a covering letter and salary details to lifescan@online-cvs.com

LIFESCAN  
Scotland Ltd a Johnson & Johnson company

Reed Exhibitions

**International Sales Manager** Cordia

Based in Richmond, Surrey with regular overseas travel

Competitive salary plus excellent benefits

This is an exciting and challenging opportunity to join an International event. We are looking to recruit an experienced, highly motivated and enthusiastic Sales Manager to work on the international Biotechnology event Cordia, part of World Life Science Week. With ambitions targets to develop this new event internationally, you will source new exhibitors and sponsors from around the world by quickly developing an understanding of the market and the events industry.

We are looking for an exceptionally strong and mature sales professional with a minimum of 5 years' experience in an international sales environment. The successful candidate must be highly self-motivated, customer focused, ideally have a biology/science degree and be fluent in a second language. This position requires regular international travel, meeting prospective exhibitors/sponsors and attending industry events worldwide.

You must have a proven track record of developing new business by actively seeking out and following through on new prospects from relevant sources, in chairing meetings and in setting up and managing effective sales presentations.

You will join an established international team and report into the Exhibition Director.

If this position interests you please apply to Melanie Merriden, Human Resources, Reed Exhibitions Ltd, Oriel House, 26 The Quadrant, Richmond, Surrey TW9 1DL or email Melanie.Merriden@reedexpo.co.uk by 15th April.
Programme Leader-Track Position in Neurobiology

Scientists interested in developing an independent programme of basic research are invited to apply for a programme leader-track position in the Division of Neurobiology. We are particularly looking to appoint an individual whose research focuses on synaptic integration and/or advanced neuronal imaging. Other areas of interest to the Division include the molecular mechanisms of synaptic transmission, circadian rhythms and neurodegenerative diseases.

The Laboratory of Molecular Biology provides an excellent environment for hands-on research. The research is funded by the Medical Research Council and there are no teaching responsibilities. There is an extensive central support including electronic and instrumentation workshops, imaging and transgenic mouse facilities. Interactions across the four Divisions within the Laboratory are encouraged. Additional information about the Neurobiology Division and about the Laboratory as a whole may be obtained at [http://www2.mrc-imb.cam.ac.uk](http://www2.mrc-imb.cam.ac.uk)

Further information can be obtained from Dr. Nigel Unwin (Tel: +44 1223 402492; e-mail: mas@mrc-imb.cam.ac.uk) or Dr. Michel Goedert (e-mail: mg@mrc-imb.cam.ac.uk)

Programme leader-track positions are equivalent to tenure-track and are for candidates at an early stage in their career. The appointment provides an opportunity over 6 years to demonstrate your suitability for a Programme Leader appointment. The starting salary is likely to be in the range of £34,245 - £40,252 per annum, depending on qualifications and experience. This is supported by a flexible pay and reward policy, and MRC final salary Pension Scheme. Some financial assistance with relocation may be available. We can offer 30 days annual leave entitlement and excellent on-site sports and social facilities.

To apply, please quote reference NB/305/6 and include a covering letter and CV with the names and addresses of two professional referees who can be contacted prior to interview.

E-mail your application to: recruit@mrc-centre.cam.ac.uk or post to Recruitment Office, Personnel Department, MRC Centre, Hills Road, Cambridge, CB2 2QH.

Closing date: 29 April 2005.

The Medical Research Council is an Equal Opportunities Employer.

'Leading Science for Better Health'

Applied Plant Scientist

East Malling Research (EMR), located in Kent, is a provider of strategic and near market R & D, with a 90 year history of leading-edge work on perennial plants. We are expanding our experimental trials work for the Hardy Nursery Stock (FINS) and other crop sectors and are seeking someone who can develop these areas further.

We are seeking a graduate with experience of applied plant science and/or planning and conducting field/glasshouse experiments. He/she will be lively, communicative, have good interpersonal skills and be able to sustain excellent relations with our customers.

Desirable attributes are:

• Experience in writing technical reports for both growers and scientists
• First class organisational skills and an ability to meet deadlines
• R & D innovation ability
• Business awareness

Salary will be commensurate with qualifications and experience. This is a permanent position.

Further details and an application form can be obtained from the EMR website (www.eastmallingresearch.com) or by Email from recruitment@emr.ac.uk. Please quote Reference No. EM/PSO1.

Closing date: 15 April 2005

[2493-019 (2005) : 60]
An exciting opportunity has arisen for a motivated team player to join the Sleep team at the Guy's and St Thomas' Foundation Trust. This is a new role and will be crucial to developing the paediatric sleep service. The adult Sleep Disorders Centre (based at St Thomas' Hospital) enjoys an enviable nationally and internationally renowned status, not only for the quantity and diversity of sleep investigations offered, but also for its contribution to sleep research and technical and academic training. This specialist paediatric sleep service, to be based at the new Evelina Children's Hospital (Autumn 2005), will enable us to provide a unique continuum of care in Sleep Disorders within one Trust.

We are looking for someone with a degree (preferably a biological science) or an HNC in MPPM, or an advanced nursing qualification in a relevant specialty, that has at least five years' experience of sleep studies and is looking to develop their management potential. Experience of paediatric sleep studies will be a distinct advantage.

We could offer you an excellent opportunity to develop your professional and technical competencies (according to a detailed technical progression framework), a very competitive salary with enhanced payment for unsociable hours and excellent opportunities to be involved in teaching and training.

For further details and an informal visit please contact Simone de Lacy, Consultant Technologist, on 020 7188 3439.

For an application pack please contact our 24 hour Recruitment line on 020 7188 8111 or visit www.guysandstthomas.nhs.uk quoting ref: A266/NS.

Closing date: 21st April 2005.

Interviews will take place approximately 2 weeks after the closing date.

All our vacancies can be viewed on our website.

Guy's and St Thomas' is an early implementer of Agenda for Change. The Trust is committed to fair pay for all its staff.

Benefits include:

Swimming Pool and Fitness Centres, Knowledge & Information Centre, Social Clubs, On-site Nursery (limited places), access to a Childcare Co-ordinator and Index Linked Final Salary Scheme. The Trust aims to help staff balance work and home life. Equality of opportunity is our policy.

Exciting Grant Funded Research and Development Opportunities

Health Protection Agency Centre for Infections

The Health Protection Agency (HPA) is an independent body that protects the health and well-being of everyone in England and Wales. The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. We also prepare for new and emerging threats, such as a bio-terrorist attack or virulent new strains of pathogens.

The Centre for Infections at Colindale, NW London is an internationally renowned centre of excellence for expertise, reference and research, surveillance and epidemiology in relation to micro-organisms that affect human health. The modern purpose built centre is well equipped and staffed and provides excellent Library, Occupational Health and Refectory facilities. There is also a Nursery on Site.

TECHNOLOGIST - PRODUCT ASSESSMENT £18-£21,000+ benefits package (Southampton)

Our client requires a Technologist to join their team working in Risk Characterisation. This vacancy is in Product Assessment, and involves carrying out a range of in vitro tests to evaluate and support the company's ingredients and product research. The job-holder will have sole responsibility for one in vitro test and will assist in the optimisation, validation and application of new and existing in-vitro methods for use across the biological sciences group.

Applicants should hold a Biological Sciences degree with some laboratory experience, or at least 2 years' experience in genetic toxicology and experience of cell culture techniques. They must be able to work independently, as well as fitting readily into a team. Good organisational and problem-solving skills will be combined with excellent IT and verbal communication skills as the job-holder will be required to interpret and communicate findings and produce reports to support the presentation of their work.

Closing date: 29th April.

For a full job spec and more information call Hudson Shribman Scientific Recruitment on 020 7269 0900, or email your CV to info@hs-scientific.co.uk.

[2493-024 (2005) : 62]
npower Generation & Renewables is a part of RWE npower, a leading integrated UK energy company owned by the RWE Group. npower Generation & Renewables owns and operates generating plant across the UK, and is a market leader in renewable energy through its hydro, wind, and biomass co-firing businesses.

**Environmental Analyst**

Swindon

£32,000 - £40,000+ depending upon experience

An opportunity has arisen for an Environment Analyst in the Environment Department within RWE npower Generation and Renewables.

You will be responsible for providing technical advice to all business units within RWE npower, with a focus on the assessment and management of environmental risk of a range of power plant and related energy business issues. You will manage a number of both internal and external work programmes, make a substantial contribution to the preparation of environmental case making, represent the business at national fora and manage external interfaces.

Applicants will require a good first degree in a physical or biological science, possibly a second degree, together with proven experience in one or more of the following: water resources, water quality, aquatic ecosystems, air quality and meteorology.

You will have at least five years experience working on environmental issues with an industrial or commercial focus and a proven track record of applying models to environmental issues. Highly motivated, with first class communication and interpersonal skills you will possess an innovative, flexible and enthusiastic approach to solving complex problems and tackling issues.

If you wish to apply, please send your CV with an accompanying letter quoting reference number SN12 to The RWE npower Join Team, Shared Services HR, Clearwater Court, Vastern Road, Reading RG1 8DB or e-mail to sharedserviceshr@rwenpower.com with the job title and reference number in the e-mail subject field.

Closing date for applications is Friday 8th April 2005

Why Wait?
You’ll find the most opportunity… now and throughout your career – with a company that is focused on what you want to do: develop drugs.
Covance’s purpose is to lead advancements in drug development through science, service and shaping solutions for the top 50 global pharmaceutical and biotech companies. By joining this thriving company you’ll work with progressive management, inventive technologies and alongside the talented scientists who have made us one of the world’s largest and most comprehensive, drug development services companies with net revenues around a billion from nationwide and global operations. No wonder the challenges and professional fulfillment develop faster here!

At our state-of-the-art Harrogate facility we are currently recruiting for the following vacancies:

**Scientist – Mass Spectometry**
Ref: 6505
We require a skilled and experienced scientist to provide specialist analytical and mass spectrometry support within our Metabolism and Environmental Sciences Department. This is a key role providing compound identification support for animal and plant metabolism studies as well as technical expertise to other departments such as Protein Chemistry and Pharmaceutical Analysis. You will be involved in the LC/MS/MS analysis of samples from a number of study types, providing interpretation and reporting of data for inclusion in GLP reports. The successful candidate will have good analytical chemistry skills and a sound understanding of SPE and HPLC techniques along with experience of compound identification by mass spectrometry methods. A knowledge of metabolism and experience of working within a GLP environment would be an advantage.

Professional Requirements:
- PhD or relevant degree combined with at least 3 years' relevant experience.
- Experience in the analysis of samples and the preparation of interpretation reports for inclusion into GLP studies, metabolite profiling and identification by LC/MS/MS using a range of sample preparation and chromatographic techniques.
- Experience in the use of radiolabelled compounds would be an advantage as well as knowledge of handling potentially hazardous materials.
- Excellent computer skills, including word processing, spreadsheets, databases and specialised personal computer software.

**Research Associate – In Vitro Metabolism**
Ref: 6126
Working with a dedicated team of in vitro and/or LC/MS specialists you will oversee the day to day execution of the laboratory phase of studies to determine the disposition and metabolic fate of NCE's and biotechnology products as part of the drug development process. You will demonstrate skills in either the conduct of in vitro metabolism studies utilising microsomes, human hepatocytes and cell culture technologies or bioanalytical techniques such as HPLC, LC/MS, and fluorescence/UV spectroscopy for the analysis of novel compounds in biological matrices. With a pivotal role in the drug discovery and development process a sound knowledge of drug metabolism would be welcome, however it is less important than the ability to work in a multidisciplinary team, where dedication, self-motivation and effective communication are prerequisites.

Professional Requirements:
- BSc or equivalent in Biochemistry, Pharmacology, Analytical Chemistry or a related subject.
- At least 2 years of relevant laboratory experience or a postgraduate qualification in similar subject areas.
- Experience of working under aseptic techniques, handling human tissues or organ perfusion.
- Additional experience in bioanalytical techniques such as HPLC, LC/MS, fluorescence and spectroscopy would be advantageous.
- Excellent computer, communication and instrument handling skills.
As well as a comprehensive salary, the opportunity to work for a global leader in its field and with some of the most well respected people in the industry, and for the right candidates we also offer a wide range of benefits including:

• Excellent company pension scheme • Minimum of 24 days holiday each year • Further studies support
• Free employee assistance plan

To apply please go to our website at www.covance.com/careers and search by the relevant job reference. Alternatively email your CV, stating job reference and current salary details, to recruitmentharrogate@covance.com or by post to the Recruitment and Talent Services Team, Covance Laboratories Ltd, Otley Road, Harrogate HG3 1PY.

COVANCE
THE DEVELOPMENT SERVICES COMPANY
Helping to bring miracles to market sooner
[2493-029 (2005) : 64]
Protecting the environment,
improving human health.
Wallingford

Of all our high-profile scientific investigations, the interaction between human health and the environment is emerging as one of the most critical. Our integrated Science Group needs two more high-quality scientists to develop UK guidance on assessing risks to human health from land contamination. As senior roles in our Human Health Science Team, they will be crucial in delivering our environmental goals.

**Principal Scientist - Exposure Modeller** £31,100 - £35,400
Your main focus will be to further develop the CLEA model in relation to exposure modelling advances and derive Soil Guideline Values. An intimate knowledge of the CLEA model and its associated publications such as the CLR7-10 will ensure that the schedule of science activities you prepare and work on delivers the desired outcomes.
Ref: SC0068A

**Principal Scientist - Mammalian Toxicologist** £31,100 - £35,400
Your main focus will be to establish Health Criteria Values through the commission and generation of toxicological reviews. The conclusions you make, will be crucial to the derivation of Soil Guideline Values using the CLER model. Added to that, you will project manage science studies to further develop and understand the health risks associated with soil contaminants. Ref: SC0068B

Already scientifically credible within the UK science community for your specialist area, you will have five years' experience, including management of research projects, and probably a post-graduate qualification. The opportunity to use your technical skills to influence national issues within our organisation will enhance your experience and your career opportunities further. As well as a high degree of technical expertise, you'll need the ingenuity and personality to lead collaboration and debate with our industrial, academic, and Government partners.

We offer a great benefits package including contributory final salary pension scheme (with life cover), excellent training and development opportunities and generous holidays.
For more information and how to apply, please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs) or telephone Sarah Webb on 01491 828544 for an application pack quoting the appropriate reference. Closing date: 25 April 2005.
We are committed to making our organisation as diverse as the environment

ENVIRONMENT AGENCY
[2493-030 (2005) : 65]
**Senior Computer Biologist** £30,000 to £35,000 dependant upon experience

The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems.

We are seeking an experienced bioinformatician to join our embryonic Software Action Team (SWAT) as part of the core Software Services group. This is a unique opportunity to work with numerous scientific teams rapidly developing a range of software to support their *ad hoc* data analysis requirements.

The role will involve undertaking a wide range of small, rapid-development projects, with the emphasis on delivering fast-track solutions. These development projects, requested by research groups across the Institute, are expected to take no more than a few days each.

You will ideally have several years of post graduate experience of programming in a bioinformatics environment, together with some molecular or cell biological background. Strong Part programming skills are essential and experience in one of more of the following; web/CGI, RDBMS/ODBC (particularly MySOL), LIMS would be a distinct advantage.

You would be expected to work in a very flexible way, rapidly defining requirements, prioritising tasks and delivering "one-off" solutions. Strong communication skills are necessary for efficient and effective interactions among research teams.

Benefits include 25 days annual leave, final salary pension scheme, optional private healthcare (on successful completion of probation period), permanent disability insurance, life assurance, childcare voucher scheme, on-site restaurant, café, gym and an active sports and social scene.

To apply for this position please email your CV (including 2 referees) and current salary details, Quoting reference NS906 to: humanresources@sanger.ac.uk

Or post your application to: Human Resources Department, The Wellcome Trust Sanger Institute, Genome Campus, Hinxton, Cambridge, CB10 1SA

The closing date for applications is 15th April 2005

Choose what you do and do it well
STIEFEL®
Research in Dermatology™
Stiefel Laboratories is an International Pharmaceutical Organisation renowned in the field of Dermatology and committed to the Research and Development of Dermatological preparations. Based at our state-of-the-art laboratories on the banks of the River Thames at Maidenhead, the following openings have arisen within the Pharmaceutical Development Department:

**Senior Project Chemist**
You will work as part of the Development Chemistry team whose responsibilities include providing analytical development expertise and practical assistance for projects from preclinical and clinical development, through to the compilation of regulatory dossiers/registration support. This will involve responsibilities for developing and validating analytical methods for new drug products and line extensions. You will also play a key role in the transfer of these new products and methodologies to production facilities. You may assist or lead in the evaluation, development and management of outsourcing (contract synthesis, analytical investigations etc.).
A thorough knowledge of chromatographic techniques is essential and previous experience in qualitative LC-MS is desirable.
Candidates are likely to have a postgraduate qualification in Analytical Chemistry together with a minimum of 6 years experience of pharmaceutical analysis. A good working knowledge of GMPs and of the regulations impacting areas of work is also essential.
We are looking for motivated, enthusiastic individuals possessing excellent verbal and written communication skills, to apply their knowledge/experience in this dynamic environment.

**Formulation Chemist**
The purpose of this role is the development of new products and the improvement of existing products. As well as being involved in the formulation and evaluation of new products, you will carry out physical stability testing and provide technical support to ensure the effective scale up of new formulations.
Essentially you will have gained a B.Pharm (Hons) or BSc (Hons) in Life or Physical Science and you will have the ability to work well within a team and independently; prioritise and organise your workload to meet deadlines; accurately record data and write technical reports; communicate effectively at all levels.
We offer a competitive salary and a generous fringe benefit package.
To apply, please post your CV, including your salary expectations, to the HR Dept at Stiefel International R&D, Whitebrook Park, 68 Lower Cookham Road, Maidenhead, Berks, SL6 8XY or email cmoppett@stiefel.org.uk

[2493-032 (2005) : 66]
NDA
“There’s no other project in the world like it. That’s what makes it so exciting”.

**Nuclear Materials Specialist**
**Low Level Wastes Specialist**
coko
West Cumbria

This is your chance to be at the forefront of the emerging nuclear clean-up industry. We are the newly created organisation responsible for ensuring the best-practice decommissioning of the UK’s civil nuclear legacy. Overseeing the work of contractors and site licensees, we will ensure the optimum results for taxpayers, for local communities and for the environment.

We're looking for two experienced individuals to play important and influential roles within our Waste and Nuclear Materials Strategy Unit. Whichever specialist area you focus on, you will contribute to determining and supporting the guiding strategies for characterisation, treatment, storage and disposition/disposal. You will also ensure that materials and wastes are properly inventoried across out various sites, and liaise with external bodies to share ideas, raise awareness and improve programme efficiency.

For both roles, we are looking for specialist expertise gained through considerable experience in technical or strategic posts within the nuclear industry. You will also be degree qualified in science, engineering or a related discipline, and ideally have membership of a professional institution.

To find out more and to apply, please visit [www.nda.gov.uk](http://www.nda.gov.uk)
Applications are invited for a Research Technician to work in the Department of Neurodegenerative Disease, at the Institute of Neurology, an internationally recognised centre for the study of prion diseases (which include bovine spongiform encephalopathy (BSE) in cattle and Creutzfeldt-Jakob Disease (CJD) in humans).

The successful applicant will be responsible for rural and maintenance of MoFlo FACS machine. To prepare tissue homogenates, carry out ELISA, Elispot, western blotting and immunoprecipitation on various samples at levels II and III containment laboratories. Also to maintain cell lines and measure prion levels in a scrapie cell assay. Experience in flow cytometry, using MoFlo, and cell culture will be a distinct advantage but full training will be given. The ability to work flexible hours is essential.

Applicants should be State Registered Biomedical Scientists (Grade 1) or Research Technicians with a relevant first degree and at least 2-3 years experience in at least one of the following areas: immunology, biochemistry and infectious agents. The post is available immediately until July 2007, starting salary on the University Technician Scale E, depending on qualifications and experience £21,944 - £25,727 inclusive, superannuable.

For further details of how to apply, please go to http://www.ion.ucl.ac.uk/about/vacancies.htm or contact Anne Wardrobe, Personnel Assistant, Institute of Neurology, 23 Queen Square, London WC1N 3BG, tel: 020 7676 2191 or email a.wardrobe@ion.ucl.ac.uk

Closing date for applications is 22nd April 2005.

We particularly welcome applicants from an ethnic minority for this post, as they are underrepresented within University College London at this level. This is in line with Section 38 of the Race Relations Act 1976.
THE UNIVERSITY OF Warwick
Biological Science
Microbiology
Research Technician
£13,953 - £15,585 pa  Ref: 12075-035
Fixed term contract for 9 months

You will assist on a project directed at identification of genes and polypeptides underpinning DMS oxidation in marine bacteria.

You will hold a degree or equivalent in an appropriate Biological Science.

Application packs are available from Personnel Services on 024 7652 3685 (24 hour answerphone), by email recruit@warwick.ac.uk, our website below or www.jobs.ac.uk/warwick. An application form MUST be completed if you wish to be considered for this post.
Closing date: 28 April 2005

Lecturer – Chemistry
(Re-advertised)
School of Chemistry
Faculty of Science
Monash University, Melbourne, Australia
Applications are invited for a tenured lectureship in the area of Synthetic Organic/Medicinal Chemistry within the School of Chemistry. Applicants should hold a PhD in an area of chemistry relevant to the position and have a proven track record of excellence, flair and productivity in their field of research. Successful applicants will be expected to contribute to the development and teaching of the Bachelor of Medicinal Chemistry.
Salary range: $A57,936 - $A68,801 pa Level B plus generous superannuation
Contact: Ms Glenda Oliver, tel. +61 3 9905 4507 or email glenda.oliver@sci.monash.edu.au
Applications: By email to the above contact or by mail addressed to Ms Glenda Oliver, School of Chemistry, Faculty of Science, Monash University, Clayton, Victoria 3800, Australia by 22/04/2005.
Location: Clayton campus Ref No: A045438
Position information, selection criteria and application details can be viewed on our website at www.monash.edu.au/opportunities
Applications must address the selection criteria, quote the reference number and include curriculum vitae and the names and contact details of three referees.

Two Chairs
As part of an ongoing programme of expansion, applications are invited for the following posts in Computer Science.

You should have an outstanding international record of research and publication or the equivalent industrial experience. The new Chairs will play a leading role in the continuing development of the School's expansion and will be expected to form new research groups.

The School currently has 2 professors, 2 readers, 4 senior lecturers, 7 lecturers, and 10 postdoctoral fellows and provides a stimulating environment for research and teaching. It has a Research Selectivity Rating of 5A and an SSR of about 10:1. A new Computer Science building has just been constructed.

Further details are given on the School website http://www.dcs.st-andrews.ac.uk/

Please quote ref: SK164/05. Closing date: 29 April 2005.

Application forms and further particulars are available from Human Resources, University of St Andrews, College Gate, North street, St Andrews, Fife KY16 9AJ (tel: 01334 462571, by fax: 01334 462570 or by e-mail: jobline@st-andrews.ac.uk). The advertisement and further particulars can be viewed at http://www.st-andrews.ac.uk/hr/recruitment/vacancies

PDRA to support the Cluster Active Archive

Applicants are invited for a postdoctoral Research Associate position supporting the European Space Agency Cluster Active Archive (CAA), working at the Mullard Space Science Laboratory (University College London) based in Surrey, with data from the PEACE electron spectrometer instruments on the four ESA Cluster magnetospheric research spacecraft. The successful candidate will join a team responsible for all aspects of PEACE operations. The candidate will contribute to instrument in-flight calibration, preparation and validation of electron moments data, and other activities in support of the CAA. A background in space plasma physics (preferably a PhD), and familiarity with any of the following would be an advantage: UNIX, LINUX, PERL, C, IDL, Matlab.

PDRA in the PEACE Operations Team

Applicants are also invited for a postdoctoral Research Associate position in the PEACE Operations Team at the Mullard Space Science Laboratory (University College London), based in Surrey. Six PEACE electron spectrometer instruments (10 sensors) are currently collecting data on the ESA Cluster and CNSA/ESA Double Star magnetospheric research spacecraft. The successful candidate will join a team responsible for all aspects of PEACE operations, from routine commanding through data handling activities and in-flight instrument calibration, to providing accurate electron moments data (density, velocity, temperature). A background in space plasma physics, and familiarity with any of the following would be an advantage: UNIX, LINUX, PERL, C, IDL, Matlab.

Both of the appointments will start as soon as possible, initially for one year. Salary for both posts will start on the 1A scale for research staff in the range of £21,640 - £24,820, depending on experience. Applications for both posts, including a CV, publications list, names and addresses of three referees and a brief description of experience and aspirations, should be sent to Mrs E.A. Daghorn (ead@mssl.ucl.ac.uk), Mullard Space Science Laboratory, University College London, Holmbury St Mary, Dorking RH5 6NT, U.K. PLEASE STATE WHICH POST YOU ARE INTERESTED IN. The closing date for applications for both posts is Saturday, 16th April 2006. UCL Taking Action for Equality

TWO RESEARCH ASSISTANT POSTS
12 MONTHS AND 9 MONTHS
(FIXED-TERM CONTRACTS) Two Research Assistants are immediately required (to start May) in the St George's Vaccine Institute to join a live attenuated oral *Shigella* human vaccine study. The postholders will be mainly responsible for running immunology assays. Applicants should have a good honours scientific degree in a subject related to the biological sciences and should ideally have a background in immunology or microbiology. The successful applicants will join an established research group investigating human mucosal immunity and mucosal vaccines, both at the clinical and cellular-molecular levels. Starting salary will be in the range £22,863 - £23,963 pa inclusive. Informal enquiries can be made to Dr David Lewis (020 8725 5826).

Further information on [http://www.sghms.ac.uk/](http://www.sghms.ac.uk/) or from the Personnel Office, St George's Hospital Medical School, Cranmer Terrace, London SW17 0RE, 020 8725 5020 (24-hour answerphone) or email: [personnel@sghms.ac.uk](mailto:personnel@sghms.ac.uk) Closing date 14 April 2005. Interviews will take place on 28 April 2005. Please quote reference number 306/05.

The school is an Equal Opportunities Employer

250 years of medical training

St. George’s

[2493-043 (2005) : 69]
Research Assistant, Cancer Screening Trials

We are seeking to appoint an enthusiastic and motivated postgraduate to join the multidisciplinary research team coordinating the MRC/CRUK/Dept of Health funded United Kingdom Collaborative Trial of Ovarian Cancer Screening (UKCTOCS) (website: www.ukctocs.org.uk). The main purpose of the post is to assist in the conduct of the trial. In addition, the postholder will be required to contribute to ongoing clinical and scientific research programmes.

The applicant should hold a postgraduate degree in life sciences, have IT and database experience, excellent written and verbal communication skills, be highly organised and meticulous to detail.

The post is available immediately for a period of two years in the first instance. Salary will be according to experience on the Research Assistant 1B scale (Salary Scale: £19,460 to £21,640 plus London Weighting of £2,330).

Further details may be obtained from Jenny Sheals (tel: 020 7380 6908 or email: j.sheals@ucl.ac.uk).

To discuss the post informally, please telephone Dr Usha Menon, Senior Lecturer (020 7380 6908). For an application form please go to http://www.ucl.ac.uk/hr/docs/download_forms/job app.doc and supply a copy of your CV.

The closing date for applications is Friday, 16th April 2005.

UCL Taking Action for Equality

[2493-044 (2005) : 69]
Applications are invited for a postdoctoral position of up to three years to be held jointly between the Department of Physics and the School of Biological Sciences. The project involves the construction, optimisation and testing of a new kind DNA/protein detector based on state-of-the-art CMOS active pixel technology being produced by the £4.5M M13 Consortium (www.activepixel.org). This project is funded through the Basic Technology Scheme and is closely linked with an extensive programme of technology development within the Centre for BIOARRAY Innovation and the Liverpool Semiconductor Detector Centre.

Applicants would normally hold a PhD or have equivalent experience in biosensors, electronic engineering or detector physics. Experience in interfacing detection equipment with computers and software development would be an advantage.

Informal enquiries should be directed to Professor A R Cossins, Liverpool Microarray Facility, School of Biological Sciences (cossins@liv.ac.uk) or Professor P Allport, High Energy Physics Group, Department of Physics (allport@cern.ch)

Quote Ref: B/468/NS Closing Date: 29 April 2005

Further particulars and details of the application procedure should be requested from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on 0151 794 2210 (24 hr answerphone), via email: jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html

COMMITTED TO EQUAL OPPORTUNITIES

[2493-045 (2005) : 69]
Manchester Metropolitan University
FACULTY OF SCIENCE AND ENGINEERING
Department of Environmental and Geographical Sciences

Lecturer/Senior Lecturer in Soil Ecology
Scale L/SL £23,643 - £33 428 pa

The Department of Environmental and Geographical Sciences is one of the largest in the country, with over 900 students, and delivers a very successful undergraduate and postgraduate programme. This thriving Department has developed a vigorous outward looking philosophy, maintaining close links with a variety of external organisations, and gained a reputation as a centre of excellence. The Department highly values research and was awarded a grade 4 in the most recent RAE exercise. It expects to improve this in 2008.

We require an individual whose teaching and research interests inform land use and sustainable development or climate change, and whose research interests complement those of staff in the Department. Applications are particularly welcome from applicants who utilise GIS, molecular techniques, stable isotopes or interdisciplinary approaches (including physics, mathematics and social sciences), but this is not a requirement.

You should possess a PhD and have a substantive postdoctoral career, along with an excellent track record in research, with publications and ideally external funding to demonstrate this.

For an informal discussion please contact Prof. John Hooker on 0161 247 1602 or email j.hooker@mmu.ac.uk

For an application form and further particulars, returnable by 18th April 2005, please contact Personnel Services on 0161 247 6464 quoting reference SB427 or email j.c.cooper@mmu.ac.uk Alternatively download these documents from our website http://www.mmu.ac.uk/jobs

POSITIVE ABOUT DISABLED PEOPLE
MMU values diversity and welcomes applications from all sections of the community.

[2493-046 (2005) : 69]
Imperial College London
Wye campus

Postdoctoral Research Associate (full-time)
(fixed-term contract, up to 12 months)

Applications are invited for a 1-year postdoctoral Wain Fellowship to be filled as soon as possible in the Plant Sciences Group (www.imperial/agriculturalsciences/research/sections/ps.htm) at the Wye campus of Imperial College London. Applicants must have a PhD and at least 2 years' postdoctoral experience in an area relevant to one of the following interests of staff:
• plant development, genetics and biophysics
• plant-microbe (including rhizosphere) interactions
• plant-insect interactions

Potential applicants are welcome to contact Professor Mike Jeger (m.jeger@imperial.ac.uk) or Professor John Mansfield (j.mansfield@imperial.ac.uk) for preliminary discussion. Application forms are available on request from Carol Jovanovic (c.jovanovic@imperial.ac.uk)
Tel: +44(0)20 7594 2745 or by writing to Mrs C Jovanovic, Administrator, Imperial College London, Wye campus, Ashford, Kent TN25 5AH, UK and should be returned to her by 19 April 2005 together with a CV and statement on the research the applicant would wish to pursue in one of the above research areas.
Interviews will be held in the week beginning 25 April 2005.
Please quote job ref: 04.4000

Valuing diversity and committed to equality of opportunity
[2493-047 (2005) : 70]
KING'S COLLEGE LONDON
Technical Officer (Grade 4)
Division of Genetics & Development
Guy's, King's & St Thomas' School of Medicine

Required to join a Leukaemia Research Fund-supported project, using molecular monitoring to determine treatment approach of acute promyelocytic leukaemia, under the supervision of Dr David Grimwade and Professor Ellen Solomon.

Applicants must have an appropriate academic or laboratory qualification, knowledge of molecular biology and relevant laboratory experience. It is essential that applicants are able to work independently and have an organised approach to work.

This post is available from July 2005 until January 2008, and will be based at Guy's Campus. Starting salary is in the range £17,991 - £21,506 per annum, including London Weighting Allowance.

Informal enquiries can be made to Dr Grimwade (david.grimwade@genetics.kcl.ac.uk). For an application form and a job description, please visit the King's College London website www.kcl.ac.uk/jobs Alternatively, please send an A4-size self-addressed envelope quoting reference M4/MG/375/05 to Horace Livingstone, Personnel Department, 4th Floor, Capital House, 42 Weston Street, London SE1 3QD or email horace.livingstone@kcl.ac.uk

Closing date for applications: 8 April 2005.
Equality of opportunity is College policy
[2493-048 (2005) : 70]
Faculty of Medical and Human Science

Quality Assurance Manager   Ref: MHS/093/05
Salary £40,000 - £45,000 p.a.

This is an exciting opportunity to be part of a new, world-class research centre. You will lead the Quality Assurance activities in the Centre where the main focus of the job is to maintain the Centre's legal and regulatory status for a range of activities including the production of Investigational Medicinal Products for research related to Positron Emission Tomography (PET) technology. The University of Manchester's Wolfson Molecular Imaging Centre is a brand new, state-of-the-art facility dedicated to the exploration of physiological processes via PET. The primary focus of the centre is oncology and neuroscience.

You will have a life science degree or equivalent, five years' experience working in a senior position in a regulated environment and knowledge of GMP, GCP and GLP. In addition, you will have experience of inspection, external audits and managing and controlling documentation. You will have excellent organisational skills, the ability to work independently and as part of a team, be able to communicate and develop effective working relationships with a wide range of staff at all levels, internally and externally, work under pressure and under defined regulatory safety conditions and maintain a high degree of accuracy.

The Centre is based at the Christie Hospital NHS Campus in Withington, Manchester, a visit is highly recommended.

For further information please contact Dr Pamela Venning, Clinical/Operational Project Manager on 0161 446 8426 or e-mail: Pamela.venning@manchester.ac.uk

Application forms and further particulars are available from our website or the Directorate of Human Resources, The Chisholm Building, The University of Manchester, Oxford Road, Manchester M13 9PL Tel: +44 (0) 161 275 8835, e-mail: Mhs-hr@manchester.ac.uk

Closing date: 15 April 2005. Please quote the reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

www.newscientistjobs.com
[2493-051 (2005) : 70]
The Max Planck Institute for Demographic Research is seeking to expand further its activities in the field of Evolutionary Biodemography and is recruiting to 

**PhD, Post-Doc, and Research Scientist level** vacancies involving the Mathematical Modeling of Life History Evolution.

The successful candidates will complement an existing research team of 19 staff, including a number of recently recruited evolutionary ecologists, and will work alongside a total of some 80 employees from diverse backgrounds engaged in a range of issues in demography. The team aims to gain a fundamental understanding of how age-specific demographic processes are shaped by evolution. We have ongoing projects on age-specific schedules of mortality, reproduction and growth, on the evolution of senescence, on reproductive effort, parental investment and intergenerational transfers, on environmentally-cued life-history choices, and on the costs of reproduction and the delayed effects of stress. We seek to advance our knowledge of these issues using a combination of theoretical modeling, analysis of existing databases, and a variety of field and laboratory based studies. We wish to complement our empirical studies with theoretical insights through the appointment of scientists engaged in the mathematical modeling of fundamental evolutionary processes.

We are seeking able scientists from all levels with strong academic track records in quantitative disciplines. Those with backgrounds in mathematics or quantitative life history modeling are particularly encouraged to apply. Applications should be addressed to Executive Director, Prof. James W. Vaupel and should include a CV with a statement of academic interests and relevant experience, qualifications, a list of publications and the contact details of 3 referees. All material should be e-mailed to: math-evol.positions@demogr.mpg.de for information.

The Max Planck Society wishes to increase the share of women in areas where they are underrepresented, and strongly encourages women to apply. The Max Planck Society is committed to employing more handicapped individuals and especially encourages them to apply.
fife college
of further and higher education
Biological Sciences

**LECTURING OPPORTUNITIES** (Min 1.5 Posts)
£19,632 - £28,748

Due to a successful funding bid we have opportunities within our Applied Sciences Team. You will be expected to teach on a range of courses at NQ, HNC and HND level as well as contributing to new and existing course development.

It is likely that there will be a need for a Molecular Biologist, however since more than one appointment is planned, those with other degree disciplines are encouraged to apply. You will have recent industrial and/or teaching experience. It would be advantageous to have worked under GLP/GMP regulatory systems. Qualifications such as the assessor units and/or TQFE would be desirable.

Candidates should note that the appointment will be subject to a satisfactory Enhanced Disclosure Scotland Application.

For a recruitment pack, please call 01592 207711 or e-mail recruitment@fife.ac.uk Alternatively you can download the application pack from our website at wwwfife.ac.uk/about/jobs.asp

Closing date for application forms is 8 April 2005.
School of Chemistry

Research Fellows (3) £19,460 - £21,640 pa

PhD Studentships (3)

As part of the EPSRC Supergen Fuel Cell Consortium we are seeking to fill the above positions.

Post 1 - One Research Fellow and a PhD student to work with Dr Richard Baker on the application of catalysis, electrochemistry and electron microscopy techniques to study new materials for solid oxide and polymer electrolyte fuel cells. Ref no: ML170/05.

Post 2 - Two Research Fellows and a PhD student to work with Prof John Irvine investigating the electrochemistry of fuel oxidation in SOFCs and seeking to find new strategies to utilise complex hydrocarbons such as biofuels. We seek a third PhD student to work with Prof John Irvine on the processing and development of SOFC electrolyte materials. Ref no: ML171/05.

All positions are available from 1 April 2005, an early start is preferable but a delayed start of 1 September 2005 may be available.

Chemistry, materials, physics and chemical engineering backgrounds will be suitable for these positions. Electron microscopy, impedance spectroscopy and heterogeneous catalysis experience would be desirable for the Research Fellow posts.

For Studentship information contact Professor John Irvine (e-mail: jitsi@st-and.ac.uk) or Dr Richard Baker (e-mail: rtd5@st-andrews.ac.uk).

Please quote the appropriate reference number. The closing date for all posts is 18 April 2005.

Application forms and further particulars are available from Human Resources, University of St Andrews, College Gate, North Street, St Andrews, Fife KY16 9A1 (tel: 01334 462571, by fax: 01334 462570 or by e-mail: jobline@st-andrews.ac.uk).

The advertisement and further particulars can be viewed at http://www.st-andrews.ac.uk/hr/recruitment/vacancies

WORKING TOWARDS EQUALITY AND DIVERSITY
UNIVERSITY OF LEEDS
[2493-055 (2005) : 71]
Applications are invited for a PhD studentship funded jointly by The University of Reading and Rothamsted Research in the UK. This studentship forms part of the strong academic link between Reading and Rothamsted, and it is expected that the successful student will spend time working at both institutions on one of the three projects listed below. Further details can be obtained from the relevant members of staff:

1. The impact of changing weed management on bird populations: scaling from field to landscape
   (Contact Dr John.Cussans@bbsrc.ac.uk or Prof K.Norris@reading.ac.uk)

2. Epigenetics and adaptive plasticity in plants
   (Contact Dr Graham.King@bbsrc.ac.uk or Dr MJ.Wilkinson@reading.ac.uk)

3. Investigating molecular origami: Structure and mechanism of terpene synthases
   (Contact Dr K.A.Watson@reading.ac.uk or Prof Mike.Beale@bbsrc.ac.uk)

Formal applications should be made to Jonathan Lloyd, Faculty of Life Sciences, The University of Reading, Whiteknights, Reading RG6 6AF on forms which can be obtained from the University website, or by contacting j.d.lloyd@reading.ac.uk. Applicants should have (or expect to obtain) a 1st or upper 2nd class degree or equivalent qualification. The stipend will be in line with BBSRC rates. The studentship is open to all nationalities, but only covers fees at the level charged to EU students. Closing date 28 April 2005.

[2493-056 (2005) : 72]
KING’S COLLEGE LONDON

3-year PhD Studentship
Department of Infection and Immunobiology

An excellent opportunity for an enthusiastic and highly able student to conduct an integrated laboratory and clinical-based project focusing on the role of CD25+ T regulatory cells in HIV infection. The supervisors will be Dr Barry Peters, Senior Lecturer in HIV and Dr Anna Vyakarnum, Senior Lecturer in Immunology, within the world-class 5* research Division headed by Professor Adrian Hayday. An appropriate first degree gained at 1st or 2:1 is expected. The student will work in new purpose-built laboratories at Guy's Hospital and will also have a base at St Thomas' Hospital in London. The student will be part of a vibrant research community with fellow PhD students and researchers at all levels. There are excellent amenities, sporting and social facilities at the college. A stipend of £12,000 pa and tuition fees at the home/EU rate will be paid.

For further details please contact Dr Barry Peters, Senior Lecturer/Head Academic Unit of HIV/STDs, Harrison Wing, St Thomas' Hospital, Lambeth Palace Rd, London SE1 7EH (Barry.Peters@gstt.nhs.uk) telephone 020 7188 2663. To apply, please complete the application form available at www.kcl.ac.uk/pgpapp and submit it together with a detailed CV, an academic transcript and two written confidential references to Dr Peters at the above address.

The closing date for applications is 7 April 2005. Equality of opportunity is College policy.

[2493-057 (2005) : 72]
Roslin Institute is a world renowned centre for research in genetics, molecular biology and developmental biology, with strong transport links and located within minutes of the centre of the beautiful, historical and cultural capital of Scotland, Edinburgh.

1. **BBSRC CASE Studentship**: Genetic Dissection of Ascites. Ascites is a genetic condition associated with pulmonary hypertension causing mortality in some fast growing lines of chicken. A high-density marker based genome scan is being undertaken to map genes associated with susceptibility to this disease. This studentship will utilise the results of this scan and apply tools from molecular biology, bioinformatics and quantitative genetics in an attempt to identify genes-causing ascites. The project would suit students with an interest in applying cutting-edge technologies to problems in vertebrate genetics and genomics. For further information contact chris.haley@bbsrc.ac.uk.

2. **BBSRC CASE Studentship**: Dissecting the genetic control of resistance to PRRS. PRRS is an important viral disease affecting many aspects of pig health and performance. The student will join a team at Roslin Institute and Sygen International investigating genetic variation of host resistance to this disease. The project will involve analysis of data that describes epidemic effects and data from a genome scan for resistance genes, and it will include assessments of the practical consequences of resistance genes. A background in genetics, animal health, animal science or data analysis would be desirable. For further information contact stephen.bishop@bbsrc.ac.uk.

3. **BBSRC CASE Studentship**: The role of the MHC in immune responsiveness traits in cattle. Identifying genes controlling susceptibility/resistance to infections disease opens up opportunities to breed for healthier livestock. This project will focus on the candidate gene locus, the MHC and its role in determining variability in response to pathogens in a cattle cross herd. For further information contact liz.glass@bbsrc.ac.uk

CASE studentships are collaborative projects with an industrial partner and as such the student will benefit from an increase in their stipend of £2,500 p.a. Roslin Institute currently hosts 25 PhD students. Successful candidates will receive an excellent training, with access to programmes in transferable skills including statistics, experimental design, computing and presentation skills, career planning and a thesis workshop.

**Starting dates**: from October 2005 and funding is available for four years.

**Eligibility**: All students must satisfy BBSRC criteria. UK residents are eligible for full funding and non-UK EU students are entitled to fees only. Applicants should have, or expect to obtain, a first or upper second class degree in statistics/quantitative genetics or a related discipline.

Applications including a full CV and the names and addresses (including email addresses) of two academic referees and indicated project of interest should be sent to: Human Resources, Roslin Institute (Edinburgh), Roslin, Midlothian, EH25 9PS (tel: 0131 527 4481) email: Roslin.HR@bbsrc.ac.uk by 21 April 2005.
For further details of the projects, please contact the principal supervisors directly or visit http://www.roslin.ac.uk/jobs/ For further information about Roslin Institute, visit our web page at http://www.roslin.ac.uk/

The Roslin Institute is an Equal Opportunities Employer.
PhD Studentships for October 2005

ACES brings together the multi-disciplinary skills of the University of Aberdeen, the Scottish Executive Environment and Rural Affairs Department (SEERAD), Macaulay Land Use Research Institute, and the Natural Environment Research Council’s (NERC) Centre for Ecology and Hydrology. ACES is now offering up to 8 funded studentships across the three ACES research themes of Environmental Degradation and Ecosystem Restoration, Sustaining Biodiversity and Livelihoods, and Catchment and Coastal Studies. Applications are invited for interdisciplinary projects aimed at understanding processes influencing sustainability, analysing conflicts which threaten sustainability, and developing strategies for intervening and managing these conflicts.

Further details and a list of potential projects (which also includes anthropology and law) is available at [www.aces.ac.uk](http://www.aces.ac.uk)

Applications are invited from UK/EU candidates holding or expecting to obtain a good honours degree or equivalent in the natural, social and economic sciences.

Closing date: Friday 22 April 2005.

[2493-059 (2005) : 73]
4 Year PhD Studentships:
Neurodegenerative Disease
Computational Neuroscience
Department of Pharmacology,
The School of Pharmacy London University
Two Studentships are available in October 2005. Stipend and home student fees provided. Students will
join a 4 year Systems Pharmacology/Physiology programme.
Brain Derived Computational Architecture funded by EPSRC. This student will join Prof Thomson's
group to develop computational models of cortical microcircuitry in collaboration with 2 large consortia.
Applicants should have, or expect to obtain a first/upper second class degree in physics engineering,
mathematics, but graduates in physiology or cognate science with good mathematics considered. A
histology technician is also sought for a 3 year MRC funded post.
Proteomics of the Parkinson's disease protein kinase Dardarin, funded by School of Pharmacy. This
student should have experience of proteomics or molecular biology and with Dr Kirsten Harvey will
study how Dardarin (PARK8) mutations lead to neurodegeneration. Applicants should have, or expect
to obtain, a first or upper second class degree in biochemistry, pharmacology or related discipline.
Closing date 21st April 2005. Please send 2 paper copies of your CV and latter of application and ask
two academic referees to write directly to: Professor A.M. Thomson, Dept. Pharmacology, The School
of Pharmacy, 29-39 Brunswick Square, London WC1N 1AX.

Department of Mechanical Engineering

**PhD Studentships**

with tax free stipends between £12,500 and £15,500 pa

The Department of Mechanical Engineering at Bristol University has a number of PhD studentships starting 1st October 2005 for UK Nationals with a good degree in physics, maths, engineering or other relevant subject.

The Department has research groups specialising in Dynamics & Control, Design & Manufacture, Solid Mechanics and Fluid Mechanics & Thermodynamics, and was awarded 5A at the last research assessment. Most projects are in collaboration with industry and other departments. Facilities for interdisciplinary research have recently been expanded with the Faculty of Engineering's new £15M BLADE laboratories.

Opportunities currently exist in the following areas:

- **Medical**: Projects in conjunction with Clinical Science & Department of Anatomy in areas of dynamics & control and materials engineering.
- **Materials**: Residual stress analysis for aerospace & nuclear industries.
- **Engineering design**: Development of novel electromechanical actuation solutions.
- **Sensors**: Ultrasonic sensor arrays for large structures. Development of non-destructive evaluation methods.
- **Non-linear dynamics**: Automotive driveline modelling and analysis. Bridge cable dynamics.

If you would like to find out more, then in the first instance please contact Joy Moody by email or fill in our web application form, referring to this advertisement.

University of BRISTOL

[2493-061 (2005) : 73]
UNIVERSITY OF SHEFFIELD
Department of Physics and Astronomy

Postgraduate Research
Applications are invited for postgraduate research leading to a PhD in the Department of Physics and Astronomy for entry in October 2005.
We are an RAE grade 5 department undertaking research in a wide number of areas:
- Astronomy and astrophysics
- Astroparticle theory and cosmology
- Organic opto-electronic materials and devices
- Particle physics (ATLAS experiment at CERN, dark matter, neutrino physics)
- Polymer physics and soft nanotechnology
- Semiconductor physics and devices (quantum dots, photonic structures, advanced lasers)
- Theoretical condensed matter physics (molecular, semiconductor and photonic materials, and systems biology)

Further details of our research is available at [http://www.shef.ac.uk/physics/research.html](http://www.shef.ac.uk/physics/research.html)
British citizens are eligible for fully-funded EPSRC and PPARC awards covering maintenance and university fees. In addition, there may also be other awards, e.g. Dorothy Hodgkin Postgraduate Awards, University scholarships and White Rose Awards, available to overseas applicants. Self-supported applicants are also welcome.

There is no closing date for applications, but interested candidates are advised to apply as soon as possible.

Candidates should apply via [http://www.shef.ac.uk/physics/postgradbrochure.html](http://www.shef.ac.uk/physics/postgradbrochure.html)
For further information please contact, Dr William Barford (postgraduate tutor) Department of Physics and Astronomy University of Sheffield, Sheffield S3 7RH Tel: 0114 222 3519
E.mail: K.Lambert@shef.ac.uk

[2493-062 (2005) : 73]
PhD Projects available for 2005
As a leading UK school in the pharmaceutical research sector, we can offer exceptional opportunities for postgraduate education to high quality applicants from all sciences.

PhD (3 and 4 years) and MRes (1 year) opportunities exist in:
Advanced Drug Delivery and Tissue Engineering
- Biophysical engineering of stem cell interactions and control of differentiation in 3-D culture – Dr. Lee Buttery
- Pattern formation in synthesis of polymeric cell regulatory components – Dr. Cameron Alexander

Centre for Analytical Bioscience
- Monitoring proliferation and differentiation of stem cells in engineered constructs using nanosensor technology – Dr. Jon Aylott
- New strategies for metabolite profiling (metabolomics) in biological systems using a hybrid quadrupole / linear ion trap mass spectrometer – Dr. Dave Barrett

Medicinal Chemistry and Structural Biology
- Computational modelling of cell growth and death – Dr. Charlie Laughton
- Molecular interrogation of the Human Beta-1 Adrenoceptor Secondary Binding Site – Dr. Barrie Kellam

Laboratory of Biophysics and Surface Analysis
- Biophysical investigations of the structure and interactions of IRES messenger ribonucleic acids (mRNAs) – Dr. Stephanie Allen
- A new enzyme sensor: micro mechanical arrays functionalised with switchable peptides – Pr. Clive Roberts
- Nanoscale analysis of polymer micro-arrays for biomaterial stem cell interaction – Pr. Martyn Davies
- The interactions of drug particles with materials employed in inhaled delivery devices – Pr. Clive Roberts
- Single Molecule Mechanics: bridging the gap between experiment and simulation – Dr. Phil Williams

PLUS MANY MORE……………………..
Candidates should have, or be likely to obtain, a first or upper second class honours degree in a relevant discipline, and should indicate one or more areas of interest from the list of topics mentioned.
FURTHER DETAILS and APPLICATION FORMS ARE AVAILABLE FROM School of Pharmacy, The University of Nottingham, University Park, Nottingham, NG7 2RD

The Wellcome Trust & New Scientist Essay Competition 2005

HOW WELL CAN YOU WRITE?
Are you a current postgraduate student in science, engineering or technology?
Can you captivate an audience with a lively, fresh 700-word article on your research and its implications for society?

Then why not tell the world?
Your chance to win a Wellcome Media Training Placement with New Scientist
Enter this year's essay competition and show your skills:
it could gain you a career training opportunity

PRIZES
First A two-week expenses paid media placement with New Scientist, £100 spending money and your essay published in New Scientist
Second £750
Third £500

The winners plus the top 10 runners-up get a free one-year subscription to New Scientist and all winners will be invited to give a short talk at an exciting event to be held in London later this year and to share their work with famous people from science and the media.

Closing date Friday 27 May 2005

**MSc Scholarships**

The school of Molecular Medical sciences has been successful in securing 22 fully funded ESF Scholarships for the academic session 2005/2006.

Applications are now invited for the following MSc courses:

- MSc in Molecular Medical Microbiology
- MSc in Clinical Microbiology
- MSc in Immunology & Allergy
- MSc in Oncology
- MSc in Cancer Immunotherapy

There is also a limited amount of funding available for overseas students.

For detailed information on eligibility conditions of the scholarships, the courses and for application information please see the following webpages:

breakthrough breast cancer
We are the leading charity committed to fighting breast cancer through research and awareness.

**Research Development Officer** (Complementary Therapies)
C. £28,000 per annum

One year fixed-term contract

Breakthrough Breast Cancer is the UK’s leading breast cancer charity with a current income of over £12m. Breakthrough funds an exciting and expanding portfolio of research focused on our flagship projects, the Breakthrough Research Centre which, opened in 1999, and the Breakthrough Generations Study launched in 2004.

We are seeking a Research Development Officer who will develop Breakthrough’s research strategy to investigate the use of complementary therapies in the treatment of breast cancer. You will have, or will be prepared to develop, a solid understanding of complementary therapies towards identifying gaps and opportunities for research in the field. With Breakthrough, the Research Centre and appropriate partners, you will devise a scientific research programme investigating complementary therapy use and breast cancer treatment. You should have at least three years’ post-degree experience in cell biology, biochemistry or molecular biology research, which may include a PhD. High-level project management skills and excellent communication skills are essential and knowledge of clinical research and the use of complementary therapies is desirable. The position is initially offered on a one year fixed-term basis and a secondment would also be considered.

Our excellent benefits package includes: contributory pension, season ticket loan and generous holiday entitlement.

For an application pack please call People Media Response on 020 7420 2080 or email breakthrough@peoplemedia.co.uk quoting reference BTRDO1.

Applications closing date: 20 May 2005.
Interviews will take place on 10 June 2005.
CVs will not be accepted.

Breakthrough wholeheartedly supports the principle of Equal Opportunities.
Registered Charity No: 1062636

INVESTOR IN PEOPLE

Our vision is a future free from the fear of breast cancer

[2498-003 (2005) : 50]
**Senior Scientist** (Sexually Transmitted Viral Infections) (Ref: 4525021)
Specialist and Reference Microbiology Division, Centre for Infections, Colindale
Grade: CSB 11-13, £27,457 - £29,556 inc. LW

The Health Protection Agency (HPA) is an independent body that protects the health and well-being of everyone in England and Wales. The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. We also prepare for new and emerging threats, such as a bio-terrorist attack or virulent new strains of pathogens.

The Centre for Infections at Colindale, NW London is an internationally renowned centre of excellence for expertise, reference and research, surveillance and epidemiology in relation to microorganisms that affect human health. The modern purpose built centre is well equipped and staffed and provides excellent Library, Occupational Health and Refectory facilities. There is also a Nursery on Site.

We wish to recruit an ambitious and high quality post-doctoral virologist to join a growing R&D team to underpin core surveillance and epidemiological studies on HIV, STI and blood borne viruses. They will take a major role in developing a programme of work on human papilloma virus and herpes simplex virus infections, in the context of other infections, including HIV. A particular focus will be studying the impact of antiviral and vaccine interventions, and monitoring the impact of these at a virological and population level. It is expected that you will develop novel assay systems and engage in molecular epidemiological studies, and actively collaborate with others within and outside of the Centre for Infections.

This is an exciting position, with opportunities for development and scientific leadership within the field of STI and blood borne viruses. You will have a keen interest in human virology, and wide experience of molecular and cell culture-based approaches to the study of viruses. It is expected that you will contribute to further growth of the group, through external grant income.

For an application form and job description please apply by email to cfi.vacancies@hpa.org.uk or by enclosing a large s.a.e. to the Human Resources, Centre for Infections, 61 Colindale Avenue, London NW9 5HT.

Closing date: 19th May 2005.

In line with the rest of the NHS, this post is subject to a terms and conditions review (Agenda for Change)

For other employment opportunities, visit our website [www.hpa.org.uk](http://www.hpa.org.uk)
The Health Protection Agency is an equal opportunities employer

[2498-004 (2005) : 50]
Develop your expertise in toxicological research

Research Scientists
Up to £26,000 & benefits, Porton Down nr. Salisbury
Dstl welcomes life science graduates who want to do leading-edge research of profound national importance. Our Biomedical Science Department seeks to support MOD’s needs by being the indispensable source of biomedical science and technology at the heart of defence and wider government. We currently have opportunities in some of our specialist teams who work to counter the threat posed by chemical weapons. Their work ranges from the discovery of potential drug therapies and delivery systems through to supporting the licensing of medical products and their introduction into service.

Current vacancies are:
Dermatoxicologist. Ref: 020754
Cell Biologist Ref: 020755
**In vivo** Pharmacologist/Toxicologist Ref: 020756
Immunotoxicologist. Ref: 020757
Clinical Biochemist. Ref: 020758
Imunochemest Ref: 020759

You’ll play an active role in multidisciplinary teams, applying advanced techniques and pushing scientific boundaries, all in the cause of protecting UK Armed Forces from the effects of toxic agents. You’ll plan experimental projects, prepare papers and presentations and share ideas with colleagues and the wider scientific community. We can also promise unrivalled training and the scope to develop your career in diverse directions.

Bring us a year or two of post-graduate research experience, and we’ll give you new challenges, a fresh sense of purpose and a very rewarding future. Flexible working hours offer a good work/life balance, and the benefits include a generous pension and holiday allowance, relocation assistance and sports and leisure facilities.

For full details of all the roles and how to apply, please visit [www.dstl.gov.uk/careers](http://www.dstl.gov.uk/careers) and select ‘Other Vacancies’.

For an application form, job and competency profile, please contact, quoting the appropriate reference, Response Solutions, aia*, 5 St John’s Lane, London EC1M 4BH. Email: response@aia.co.uk
Tel: 020 7553 9120 (between 9.30am and 5.30pm). If you have a hearing impairment we are happy to accept Typetalk calls. Closing date: 20th May 2005.

Applicants who reach a suitable standard in this campaign, but are not appointed, may be considered for other vacancies.

These permanent posts are only open to UK Nationals. Applicants must be willing to undergo and satisfy the current Government/MOD Security Vetting procedures prior to a formal offer of employment being made.

Dstl is a committed equal opportunities employer and recruits staff fully on the basis of specified competencies and skills.

POSITIVE ABOUT DISABLED PEOPLE

Dstl

Dstl is part of the Ministry of Defence

[2498-005 (2005) : 51]
The Centre for Process Innovation

**Process Technologist - Vacuum coating**

c£30k + benefits Process Innovation

An opportunity to shape the future of display technology

The Centre for Process Innovation (CPI) is moving forward as the UK’s pre-eminent innovation and resource partner for the chemical using industries. It is dedicated to driving and delivering applied research and development, in collaboration with industry partners and academic centres of excellence. CPI is progressing its core technology platforms in Flexible Electronics and Functional Materials.

We are seeking to recruit an enthusiastic technologist, experienced in vacuum deposition and sputter coating, laying down micro-fine coatings onto plastic substrates. You will lead the development and production of novel flexible electronic components for the flexible displays market, working in collaboration with leading UK companies and universities. CPI is working to develop the Wilton facility to become the leading Centre in the UK for this technology.

**The role**

- Commission, operate, maintain and improve the performance of a sputter coating rig, liaising closely with the industrial partners to ensure clear communication of milestones and deliverables.
- Undertake broad knowledge management activities, including the development of Intellectual Property Values.
- Carry out the duties of safety steward, ensuring the highest standards of quality and safety are set and maintained.
- Develop a technological leadership position in the area of coating substrates focusing on flexible electronics.

**Requirements**

- Minimum of a degree level in Chemistry or Physics or an associated discipline.
- Good practical experience in the operation of vacuum coating equipment.
- Task focused analytical thinker with negotiating skills and commercial acumen.

Please apply with CV to: Pam Watson, Centre for Process Innovation, Wilton Centre, Wilton, Redcar. TS10 4RF
Email: pam.watson@uk-cpi.com, Tel: 01642 447276
Closing date: 21st May 2005

[2498-006 (2005) : 52]
TECHNOLOGIST

Autoglym is a division of the Altro Group and is a rapidly expanding organisation, developing and manufacturing high quality professional and DIY vehicle care products which are widely endorsed by major car manufacturers and distributed worldwide.

Due to increasing demands on new product development, an opportunity has arisen in our busy R & D Department for a Technologist. Your main responsibility will be to develop vehicle wash and vehicle care products.

You should possess HNC/HND or a degree in chemistry, together with at least two years experience of working in a Laboratory environment. Knowledge of detergents and cleaning technology would be an advantage.

The position requires an innovative individual who is able to fit into a small friendly team, self-motivated, organised, methodical, enthusiastic and flexible, and able to communicate at all levels.

Autoglym offers employees a competitive salary, excellent benefits package and relocation package if required.

To apply, please e-mail, fax, send your CV and current salary details or request an application form, to:
Liz Barker, Human Resources Department, Autoglym, Works Road, Letchworth, Herts SG6 1LU.
Email: ebar@autoglym.co.uk Fax: 01462 475397 www.autoglym.com

Closing date: 19 May 2005

Autoglym is by choice an equal opportunities employer

Autoglym is a division of the Altro Group plc.
Medical Writer
Do you have a 1st or 2:1 life sciences degree? Do you have cardiovascular or gastrointestinal research experience, preferably postdoctoral? Do you have a desire to develop your writing skills and take your career in a new direction? Are you keen to work as part of a small, accomplished team in a customer-focused company? If so, we are keen to hear from you.

Oxford PharmaGenesis™ offers a complete marketing and medical communications service to the pharmaceutical industry. Based in a Grade II listed barn in a country setting on the outskirts of Oxford, we provide an excellent working environment. We also offer on-the-job training, a competitive benefits package and your chance to be part of a professional and enthusiastic team.

For the successful applicant, we are offering a gateway to an exciting new career as a Medical Writer, working on stimulating and diverse communication projects, often with work-related travel.

If you want to be part of our success, please write, enclosing your CV to Jeanette Costigan, Oxford PharmaGenesis™ Ltd, 1 Tubney Warren Barns, Tubney, Oxford OX13 5Q3. www.pharmagenesis.com

Generating Lifetime Pharmaceutical Value
[2498-008 (2005) : 52]
Programmer (Computer Officer III)
University of Cambridge
Departments of Oncology and Public Health & Primary Care
A programmer/bioinformaticist is required to work on a new project related to large-scale association studies in breast cancer. The project will involve the analysis of data involving over ¼ million genetic markers. The post will be based at Strangeways Research Laboratory, close to the Addenbrookes Hospital site in Cambridge.
Applicants should have a good degree in a science-based discipline and knowledge of a high-level language such as Perl, Java or C++. Familiarity with SQL and a relational database such as Oracle or MySQL understanding of web-based programming and/or bioinformatics software tools, and some knowledge of statistics and for genetics would be a strong advantage. Ability to interact with other scientists will be essential. Pensionable salary is on the scale £23,613 to £29,127 (according to experience). The post is available immediately until 30 November 2006, in the first instance.
For further information please contact Professor Douglas Easton (tel 01223 740160. e-mail Douglas@srl.cam.ac.uk) or visit http://www.srl.cam.ac.uk/genepi/vacancy.htm Applicants should send a PD18 application form, which is available from the office or http://www.admin.cam.ac.uk/offices/personnel/forms/pd18 a covering letter and full CV, with the names and addresses of two professional referees, to Pat Hamilton, Cancer Research UK Genetic Epidemiology Unit, Strangeways Research Laboratory, Worts Causeway, Cambridge CB1 8RN.
The closing date for applications is 20th May 2005.
CANCER RESEARCH UK
Charity no: 1089464
[2498-009 (2005) : 52]
Solexa
Individual Total Genome Analysis
Join the front-runner in DNA sequencing
With its UK R&D facility based 15 minutes south of Cambridge, Solexa, a Nasdaq quoted biotech company located in Cambridge and California, is aiming to revolutionise DNA sequencing. Our objective is an initial product launch at the end of 2005. Our technology promises to have the power and economy to measure practically all the differences between any individual and the human reference sequence (TotalGenotyping™) thereby enabling the concept of the ‘thousand dollar genome’. To ensure that we meet this exciting scientific challenge, we are now expanding our scientific team following our recent successful fundraising.

**Research Leader Molecular Biology**
You will be responsible for managing the programme of molecular biology to implement robust methods for creating complex libraries of genomic DNA fragments, the production of our proprietary enzymes for commercial launch, and managing the pipeline of samples through to sequencing on our new generation of sequencing instruments. You will manage an interdisciplinary team of post doctoral level scientists and will liaise with your UK and USA colleagues across a wide range of scientific disciplines, including software, hardware, molecular biology and chemistry.

To fulfil this role, you must have:
- A PhD in life sciences.
- A minimum of three years’ further post-doctoral training.
- Broad technical experience in molecular biology, preferably with experience in developing new products/applications.
- Demonstrable experience, gained over a number of years, of managing a medium sized team of PhD molecular biologists in an industrial environment.
- Extensive industrial research experience across a number of projects.
- Proven ability to drive projects to tight deadlines, finding robust solutions to problems and with a track record of delivery.
- Proven inter-disciplinary communication and interaction skills. Experience of integrating molecular biology with new instrument platforms would be an advantage. Ref. RL05051.

**Applications Scientist**
You will be actively involved in collaborations with early users of Solexa’s technology to develop key customer relationships and demonstrate the utility of our integrated sequencing platform in different genomic applications. In addition to generating high quality data for presentations and publications, your role will also involve liaison with external collaborators in leading-edge centres both in the UK and USA.

To fulfil this role, you must have:
- A PhD in molecular biology.
- A further two years’ post-doctoral training.
- Experience of developing and applying new technology in the area of genomics or human genetics.
- Proven inter-disciplinary communication and interaction skills. Experience of working in a commercial environment would be an advantage. Ref. AS05051.

**Laboratory Technician**
You will work alongside molecular biologists, physicists and chemists to manufacture our proprietary surface coatings and help develop QC methodologies.
A BSc in a physical or life-science discipline and/or experience in the operation of sophisticated scientific instruments and familiarity with scientific software are required. Ref. LT05051.

These are permanent, full-time positions based at the Company’s laboratories at Chesterford Research Park. The first two roles will require travel to the USA and ongoing liaison and collaborations with colleagues in America.
We offer competitive salaries, private medical cover, contributory pension scheme, a generous share-option package and membership of the site gym and spa. The company supports the Childcare voucher scheme. In addition to the company benefits, site facilities include a golf course and secure parking.
To be considered, send a covering letter, together with your CV to Bettina Haigh, Solexa Ltd., Chesterford Research Park, Little Chesterford, Nr Saffron Walden, Essex CB1O 1XL or email hr@solexa.co.uk
See our website at www.solexa.com
[2498-010 (2005) : 53]
BioFocus Discovery is a leading Company working with major pharmaceutical and biotechnology companies in the drug discovery area. We focus on innovative early stage drug discovery and have a broad, integrated technology base encompassing biology, medicinal chemistry and informatics.

**Team Leader Compound Logistics - (B10074)**
We are looking for someone to lead our compound logistics team. The compound logistics team plays an essential role in the Discovery Products Division of BioFocus, managing and delivering our highly successful compound libraries to customers worldwide. Our customer base includes many of the top Pharmaceutical and Cropscience companies as well as small to medium size biotechs.

You will be responsible for leading a small team whose prime responsibilities are the management of our compound collection and the processing of customer orders to exacting standards and strict delivery schedules.

Attention to detail and the ability to carry out procedures from standard protocols and according to customer wishes is critical. This group works closely with several other departments within the company and you will need to liaise often with the logistics teams of our customers. As a result the candidate will need to show excellent organisation and good communication skills. Computer literacy is necessary along with the ability to use liquid handling systems which ideally has been achieved within the BioPharmaceutical industry.

The closing date is Friday 13 May 2005 and we would prefer to receive applications by email. Therefore please send your CV and covering letter stating the appropriate reference to recruitment@biofocus.com

Alternatively, if this is not possible, please send your application to:
Human Resources Department
Chesterford Research Park
Saffron Walden
Essex
CB10 1XL

BioFocus

[2498-011 (2005) : 54]
PanOpSys
Immuoassay Development
PanOpSys is a rapidly expanding young company specialising in the development of innovative *in vitro* diagnostic devices to be used to speed up diagnosis and improve health care delivery at the point of care. PanOpSys is based in a brand new laboratory facility at the Kent Science Park, a countryside science campus with excellent staff sports and recreational facilities, in the heart of the “Garden of England” between Maidstone and Sittingbourne ([http://www.kspuk.com/](http://www.kspuk.com/)).

Using our novel patented piezofilm technology, we will develop a range of rapid, sensitive, whole blood immunoassay based products for the measurement of clinically critical markers in non-laboratory settings. If you have experience in immunoassay, IVD development, IVD systems engineering and clinical chemistry we would like to hear from you, although applications from other disciplines will be considered on merit. As a small company, working with larger marketing partners, we are looking for innovative, flexible people with the skills and foresight to ensure our success. We guarantee an open, challenging working environment in which your role and responsibilities can develop as the company expands.

We have immediate openings and intend to employ more than 20 scientific staff over the next 2 years. As a guide we will appoint at three levels:

**Assistant Researcher** - a relevant BSc or MLSO with experience
**Researcher** - a relevant MSc/PhD looking for industrial experience
**Senior Researcher** - PhD with several years relevant research or industry experience

Please send your CV with a covering letter explaining how you can help our aggressive plans succeed and your salary expectations to:

The Chief Scientific Officer, PanOpSys Limited, Viking House, Ellingham Way, Ashford, Kent, TN23 6NF
fax: 01233-645020 email: tinc@panopsys.co.uk

CC
Campden & Chorleywood Food
Research Association Group
Opportunities at CCFRA
CCFRA is a major independent membership-based food research organisation, specialising in scientific and technical research, development, contract and advisory services specifically tailored to the needs of industry world-wide.
We are seeking Senior Scientists to fill the following vacancies:

Food Hygiene Research Manager
The Food Hygiene Department has a key role in helping the food and drink industry prevent contamination during food processing. Current research is concerned with the optimisation of open and closed surface cleaning, hygienic filling of food products, managing allergens in food factories and the ranking of microbial cross-contamination vectors.
You are likely to have postgraduate qualifications in one of the following disciplines: microbiology, aerobiology, chemical or mechanical engineering, ideally with experience of working within a food research or food industrial environment.

Microbiology Molecular Methods Manager
The Microbiology Department is a large multidisciplinary team of scientists working with the food industry to improve safety and quality of food products.
The department is seeking a microbiologist who has experience with molecular detection and identification techniques to lead a research team. Suitable candidates are likely to have a postgraduate qualification in microbiology or a related discipline.

These positions are likely to appeal to candidates looking for a rewarding challenge in an innovative and stimulating research environment.
Excellent benefits package offered to all employees
For an application form and detailed job description, please contact the Personnel Department, Campden & Chorleywood Food Research Association, Chipping Campden, Gloucestershire GL55 6LD, telephone +44(0) 1386 842091, or see http://www.campden.co.uk
email: personnel@campden.co.uk

The Wellcome Trust & New Scientist Essay Competition 2005
HOW WELL CAN YOU WRITE?
Are you a current postgraduate student in science, engineering or technology? Can you captivate an audience with a lively, fresh 700-word article on your research and its implications for society? Then why not tell the world?
Your chance to win a Wellcome Media Training Placement with New Scientist
Enter this year’s essay competition and show your skills: it could gain you a career training opportunity
PRIZES
FIRST A two-week expenses paid media placement with New Scientist, £1000 spending money and your essay published in New Scientist
SECOND £750 THIRD £500
The winners plus the top 10 runners-up get a free one-year subscription to New Scientist and all winners will be invited to give a short talk at an exciting event to be held in London later this year and to share their work with famous people from science and the media
Closing date Friday 27 May 2005

[2498-014 (2005) : 54]
The Biosystems Informatics Institute
bii
Biosystems Informatics Institute

Bii is a new UK government initiative recently funded (£4.5m) by the Department of Trade and Industry and the Regional Development Agency, One NorthEast. From its outset, the Institute will undertake industry-facing R&D and the commercialisation of software tools through its trading arm, Turbinia Limited.

Bii will focus on post-genomic data integration with a view to building better drugs through technical improvements in data handling of relevance to proteomics, systems biology, and the prediction and monitoring of protein-protein interactions. Intimate links are being forged with local Universities and industry groups at a number of levels.

Bii is currently a project supported by ONE NorthEast. Persons recruited to fill these posts will be employed by Bii once it is established as an independent charity.

Chief Scientific Officer:
The CSO will report directly to the CEO and be responsible for strategic and technical planning with particular importance being given to task prioritisation for on-going product roll-out. Previous industrial experience and an intimate knowledge of user needs in post-genomic technologies are essential. A key role will be industrial liaison and helping secure external funding for the Institute’s research programmes.

Chief Operating Officer:
The COO will report directly to the CEO and will be charged with the development and implementation of business-led strategies, structures and systems within the organisation. The COO will be responsible for effective coordination of teams of software developers, Quality Assurance, and rigorous development scheduling with respect to budgets and timelines. Prior experience in industry based on both hands-on software development and staff supervision is essential.

Head of Systems Biology:
The HSB will be responsible for managing all internal research and industry support contracts in Systems Biology, evaluation of scientific opportunities, strategy development and provision of leadership to multidisciplinary teams. The successful applicant will work to develop of kinetic models and reconstruct biology and possess the ability to work with wide variety of computational & numerical analysis approaches, but especially differential equations, optimisation techniques and dynamic modelling. Experience in applying kinetic modelling to a variety of challenging problems in drug development and prior evidence of successful collaboration with or within the pharmaceutical industry is essential.

Post-Doctoral Fellowship (Two Years) in systems biology - Senior
The successful applicant will develop large scale kinetic models of complex biological systems, including metabolic pathways and gene regulation networks, applying the models to solve practical problems in pharmaceutical research. Qualified candidates should have a Ph.D in a relevant scientific discipline and more than 5 years of post-doctoral research. Strong education in mathematics is essential, as is significant prior research experience with the development of dynamic models of different cellular processes.

Post-Doctoral Fellowship (Two Years) in systems biology - Junior
The successful applicant will develop dynamic models of complex biological systems, including metabolic pathways and gene regulation networks. The candidate must have a Ph.D. in a relevant scientific discipline (Biophysics, Biochemistry); prior experience in modeling metabolic pathways; good knowledge of kinetics and thermodynamics of enzymatic processes and skills to model enzyme kinetics with the use of a variety of approaches. Skills should include numerical optimization of model parameters.
Head of Protein-Protein Interactions
We are seeking a highly-competent individual with an excellent knowledge and first-hand experience of all aspects of protein-protein interaction prediction and prior participation in CAPRI or the development of relevant mathematical approaches for such. The individual will be expected to provide informed opinion on multiple aspects of protein science and help formulate technical research priorities, undertake research, apply for government R&D funding and help establish industrial collaborations as biotherapeutics become increasingly important to the pharmaceutical industry.

Post-Doctoral Fellowship (Two Years) in Protein-Protein interactions - One
Post-doctoral research scientist is required to work on computational methods related to the nature and prediction of protein-protein interactions. Relevant experience will include molecular modelling, simulation or protein structure prediction, but candidates with backgrounds such as computer science (eg. computer vision), statistics, data mining and/or with extensive software development experience, will also be considered.

Post-Doctoral Fellowship (Two Years) in Protein-Protein interactions — Two
Post-doctoral research scientist is required to work on the computational methods related to the prediction of protein-protein interactions and the detailed structure of protein-protein complexes. Relevant experience will include software development (using compiled languages) and scripting, while previous exposure to Molecular Dynamics & Monte Carlo Simulation, the estimation of Binding Free Energy and the Linear interaction Energy method will be advantageous.

Proteomics Software Developers (3 posts)
Developers from computer science and database backgrounds are sought for the development of software tools to support the next generation of proteomics support infrastructure. Prior knowledge of proteomics in general and more specifically mass spectral analysis would be highly desirable. The successful applicants will work in close proximity to industrial partners during all phases of software development.

For more information and detailed job specifications, please see www.biiuk.com. All positions, unless otherwise stated, are permanent in nature, while salary shall be commensurate with experience. Please submit a covering letter, curriculum vitae and salary expectations to Human Resources Officer, Biosystems Informatics Institute, Bioscience Centre, Times Square, Newcastle-upon-Tyne, United Kingdom, NE1 4EP or by email to hr@biiuk.com

Further information on specific positions can be obtained by contacting Bii directly on +44 (0)191 211 2587

[2498-015 (2005) : 55]
Challenging Opportunities - **Health & Safety Scientists** c.£17,000 Buxton, Derbyshire

The Health and Safety Laboratory (HSL) is an international centre of excellence in solving problems of health and safety at work. Our Scientists are involved in a wide range of projects, often working within multi-disciplinary teams, contributing directly to improving the lives of the workforce in the UK. We are looking for highly motivated, well-organised staff with effective communication skills, with the confidence to take forward new initiatives and be adaptable and flexible in working across a wide range of activities at HSL. In return we will provide a learning environment in which graduate-level researchers can progress their professional development and apply their knowledge and skills.

**Risk Assessment Programmer/Modeller**  
Ref: E12  
Working as a Risk Assessment Programmer/Modeller you will provide technical support to HSE in the use of computerised models for describing the consequences and risks from major hazard chemical plant. This will involve the maintenance and development of computerised risk analysis tools, and research supporting data for model implementation.  
You will need:  
• A good honours degree (or equivalent) in either Maths/Physics or other relevant scientific discipline.  
• Experience of programming.  
• A keen interest in the development of quantified risk assessment tools and techniques.

**GIS Scientist**  
Ref: E09  
Your job will involve working with HSE’s state-of-the-art population database tool, to examine the consequences of industrial activity on surrounding communities. You will also provide GIS support to frontline inspectors and senior policy makers.  
Good presentation skills or public speaking experience would be an asset for this post.  
You will need:  
• A good honours degree (or equivalent) in either Maths, Physics, Geography, Environmental Science or other relevant scientific discipline.  
• You must have experience of using and/or developing GIS.  
• Experience of using MapInfo and ESRI ArGIS products and of manipulating GIS databases.

**Safety Scientist - Pedestrian Safety**  
Ref: E10  
Working in the Pedestrian Safety team your work will be varied and could encompass the following areas: assessment of the slip potential of footwear and flooring research into the prevention of slip and trip accidents; root causes of accidents and behavioural change; accident characteristics of stairs, walkways, ramps and ergonomics issues in prevention of low falls. You will also be encouraged to get involved in a wider Human Factors portfolio through joint projects with other teams within the Human Factors Group, whose work covers all aspects of Human Factors impacting on health and safety at work.  
You will need:  
• A good relevant Science degree.  
• Practical laboratory skills.  
• Knowledge of, and interest in, Pedestrian Safety issues in relation to health and safety.  
Good presentation skills or public speaking experience would be an asset for this post.

As a growing laboratory, with a secure and expanding customer base, we can offer a fist class range of benefits including the choice between an excellent public sector final salary pension scheme and a stakeholder pension.  
For an application pack (quoting the appropriate reference) please contact Alistair Walsh, Health and Safety Laboratory Harpur Hill, Buxton, Derbyshire SK17 9JN, tel 01298 218626, email alistair.walsh@hsl.gov.uk or visit our website.  
Closing date: 26 May 2005.
Leatherhead Food International

PRINCIPAL REGULATORY ADVISOR

Leatherhead Food International is a major provider of information, consultancy, research and analytical services to the worldwide food and drink industry. We are seeking a Principal Regulatory Advisor to join our internationally recognised Legislation Department. This role encompasses the use of extensive Food Legislation knowledge in delivering membership services across the food industry.

The role involves heading up the International Legislation Team, liaising and consulting with the food industry on a daily basis through enquiries, training and conferences. The internal role involves training and developing staff in the team in specific regulatory areas and assisting the Business Unit Head in spotting commercial opportunities and efficient delivery of the services.

A suitable candidate for this role will have minimum of 7 years regulatory experience, preferably a detailed knowledge of EC legislation, and ability to work as part of a team, as well as leading the team when required. Essential qualities are good customer orientation, public speaking skills and an ability to thrive in a varied and multi-faceted working environment.

Full and Part Time applicants considered.

For further information, or to apply, please contact Ruth Thompson, HR Manager, Leatherhead Food International, Randalls Road, Leatherhead, Surrey, KT22 7RY. 01372 822351, or e-mail: rthompson@leatherheadfood.com

[2498-017 (2005) : 56]
MRC
Medical Research Council

Research Officer - (Ref: IF05)
The MRC Toxicology Unit is an internationally renowned institution focusing on mechanisms underlying responses to injury. We are looking to recruit a Research Officer into the Molecular and Cellular Neuroscience group to provide expert assistance in molecular, transgenic and electrophysiological experiments into synaptic transmission. Your excellent organisational skills will enable you to take responsibility for laboratory management, problem solve and provide expert advice and training. You should be educated to degree level (or equivalent), with several years bench experience.

This is a permanent position with a minimum starting salary of £18.859 per annum, 30 days holiday per year and access to a final salary pension scheme.
Applications must be made on an MRC application form and submitted to: Amanda Harris, MRC Toxicology Unit, Hodgkin Building, Leicester University, Lancaster Road, P.O. Box 138, Leicester LE1 9HN. U.K. E-mail: ajhl2@le.ac.uk
Application forms and further particulars are available from our web site: www.le.ac.uk/mrctox
Applications to be received by 23rd May 2005. The MRC is an Equal Opportunities Employer

LET’S GROW TOGETHER.
Competitive salaries & benefits Slough
UCB and Celltech have come together to form one of the world’s leading biopharmaceutical companies. Our combined expertise, natural synergies and commitment to R&D have created an exciting new company.

**Principal Scientist — Liquid Chromatography/Mass Spectrometry**
In this trouble shooting role, you will use modern quadrupole, ion trap and accurate mass TOF instruments working with team members and medicinal chemists to resolve complex structural problems and assure the integrity of compounds entering primary screens. Mass and UV directed purification, together with normal phase/chiral chromatographic separations are also components of the remit for this varied position. With a minimum of four years’ experience in the application of LC-MS, supporting research in the pharmaceutical industry, rather than a QC background, your expertise in mass spectrometry will encompass molecular fragmentation. You should also possess a thorough understanding of chromatographic separations and the impact of structure on retention properties, together with an appreciation of other structural characterisation techniques. In addition, you will also need excellent interpersonal skills while familiarity with Agilent Chemstation, Bruker Hystar or Waters-Micromass Masslynx software would be an advantage. Ref: SL171

**Research Scientists — Oncology Biology**
Part of a team involved in the identification and development of both antibody and small molecule therapeutics, you’ll perform high-quality molecular and cell biology techniques, including the cloning of genes, generation and maintenance of cell lines, and the development and running of a wide range of cellular assays, including ELISAs and flow cytometry. Experience of establishing screening assays would be particularly desirable for one of these positions. With at least 2 years’ post-graduate experience ideally with an oncology bias, you’ll be highly motivated and ready to input your own ideas into small, dynamic working groups. Ref: SL157

To apply, please send your CV and covering letter, quoting the relevant ref, to HR Administrator, UCB Celltech, 208 Bath Road, Slough, Berkshire SL1 3WE. Email: SloughRecruitment@celltechgroup.com

[2498-019 (2005) : 57]
Formulation Scientist/ Principal Formulation Scientist
Global science. Progressive environment.
More responsibility — and more scope to grow.

Imagine working in a highly dynamic, global product development environment. One which engages you throughout short project lifecycles, where demand for innovation is high. One where you can contribute as a Formulation Scientist, and grow your own expertise across a range of activities and dosage forms — within close-knit, multi-disciplinary teams.

Welcome to Wyeth Consumer Healthcare. As one of the world’s leading pharmaceutical OTC enterprises, we have many world-leading brands to our name — including Advil®, Centrum® and Robitussin®. At our Research and Development Centre in the UK, we use our scientific expertise to deliver key new products to the global business — bringing benefits to the company and consumers around the world.

Working within a scientific development team, your role will be to contribute to the formulation development of R&D programmes — liaising with marketing and regulatory functions in affiliates worldwide, as well as industrial and academic partners. You will also be responsible for the quality of experimental work and reports, working in compliance with Quality Standards.

Beyond that, in our broad-ranging and committed environment you will be encouraged to think outside the box — contributing advice and ideas, taking the lead in project work and challenging established methods to achieve scientific advances.

You will be educated to at least degree and/or PhD level in Pharmacy, Chemistry or Life Sciences with some relevant Formulation experience gained within the Pharmaceutical or an allied regulated industry. Self-motivated, analytical and detail conscious you will also have a positive and adaptable approach that is matched by excellent people communication skills.

Wyeth Consumer Healthcare offers a highly attractive package, support for your own professional growth — and all the opportunities you would expect within our challenging international environment.

Please send your CV including current salary to Deborah Churcher, HR Officer, Wyeth, New Lane, Havant, PO9 2NG. Email: wahvjob@wyeth.com. Closing date: 26th May 2005
[2498-020 (2005) : 57]
**senior clinical pharmacology associate**

Merck Sharp & Dohme is part of Merck & Co., inc., one of the world’s leading pharmaceutical companies with 63,000 employees worldwide. Merck discovers, manufactures and markets a broad range of products to improve human and animal health and has an unparalleled reputation for innovative research.

The Clinical Pharmacology (Europe) group manages early phase clinical trials with the Company’s novel compounds over a broad range of therapeutic areas. This includes all aspects of clinical development including study design, study placement, study monitoring and concern for the protection of human subjects who participate in the clinical trials.

The projects are carried out in close collaboration with leading academic and commercial clinical research organisations, focusing on establishing the safety profile pharmacokinetic/pharmacodynamic correlations, mechanism of action and proof of concept of the therapies tested.

Our UK group is located at Terlings Park, set in picturesque parkland surroundings, on the rural Hertfordshire/Essex border. We currently have an exciting opportunity within our Clinical Pharmacology Department for a science graduate with a minimum of 3 years’ monitoring experience. Candidates will need to possess a degree in Life Sciences and ideally have an MSc/PhD. The post holder will actively be involved in placing and monitoring the progress of clinical pharmacology studies, reporting their outcome. In addition to this, they will also oversee all critical aspects of clinical trials conduct, such as: adherence to protocol, programme timelines, GCP requirements and the timely reporting of critical safety/efficiency parameters.

The ideal candidate will have a broad scientific base and will need to be self motivated, resourceful and autonomous in their approach. The ability to be persuasive in engendering confidence in others is a key quality, as is the demonstration and use of initiative. Adherence to planned timescales is essential and candidates must enjoy thriving on the pressure and challenge this role brings. Excellent oral and written communication skills are essential, as is a good working knowledge of PC’s. Candidates should also hold a full driving licence and be willing to travel.

We offer excellent salary and benefits, including private healthcare, life assurance, company pension scheme, and where appropriate, relocation assistance. We have a very active Sports and Social Club and a well equipped gym. There is also an on-site childcare facility.

Please write or e-mail, enclosing a full CV, and a covering letter indicating why you are interested in the position and quoting reference CP05/0934 to our consultants: Blitz, 105-107 High Street. Hemel Hempstead, Herts HP1 3AH. Email: msd@blitzadvertising.com

**Post-Doctoral Scientist**  
(Soil phosphorus chemistry and biology)  
We require an innovative soil scientist to participate in a newly-funded BBSRC project on links between soil microbial biomass phosphorus dynamics and the movement of phosphorus to water. The post is based at Rothamsted Research but held under the Cross Institute Programme between Rothamsted and the Institute of Grassland and Environmental Research (IGER). It will involve working closely with a similar research team at IGER.

This post offers an exciting opportunity for you to apply your research skills to tackle the complex and important problem of the link between soil chemical and biological processes and the eutrophication of UK surface waters. You will also join a research group with an international reputation so some foreign travel would be expected.

Ideally, you will have experience in the chemistry and/or biology of soil phosphorus. However, applications from candidates with experience in other areas of soil science (e.g. nutrient cycling and/or microbial biomass) are also invited. You must have completed your PhD. Evidence of publishing ability would be an advantage and a full UK driving licence is essential.

The post is funded for 3 years at Band 6-PD which has a starting salary normally in the range £22,351 to £25,767 per annum.

Apply by application form only, available with further particulars from our website [www.rothamsted.bbsrc.ac.uk](http://www.rothamsted.bbsrc.ac.uk) or from the HR Group, Rothamsted Research, Harpenden, Herts, AL5 2JQ. Please quote reference 824.

UNIPATH
Unipath researches, develops and manufactures its products at a purpose built factory in Bedford, which
employs over 450 people.
We are currently looking for individuals to work within our Research and Development facility, working
within the area of drugs of abuse testing and other areas.

R&D Scientists - Competitive salary + benefits
You will be involved in researching and developing new products independently and supporting the
expansion at intellectual property. The role will include:
• Research and development of new products
• Trouble shooting and conducting follow-up research on current products
• Search, analysis and preparation of raw and intermediate materials for new projects
• Reporting the progress of work to the project team/leaders
• Preparation of master files and transferring of new products to production
• Participate in development of patentable technology
You should have good verbal and written communication skills with the ability to design and implement
a project independently. You should be a critical thinker with strong problem solving and analytical
skills. The ability to work within a team and collaborate with other project teams is essential. You should
be educated to degree level in a relevant scientific subject (i.e. biomedical, biology, biochemistry) with
three to five years relevant work experience, ideally within the area of drugs of abuse testing, although
this is not essential. Experience in biochemistry, protein purification, Hapten Assay, and a general
knowledge of immunology is also required.

R&D Technicians — Salary circa £16,000 + benefits
You will perform research & development experiments on new products in collaboration with others on
the project team. The role will include:
• Research and development of new products for rapid in situ diagnosis
• Trouble shooting and conducting follow-up research on current products
• Reporting progress regularly to the project team
• Design, execute, interpret and document experiments in a structured, organised timely fashion with
  supervision
You should have good verbal and written communication skills with the ability to work within a team.
You should be educated to degree level in a relevant scientific subject (i.e. biomedical, chemistry or
bioscience). Previous work experience within the area of drugs of abuse testing is ideal but not essential.
Ideally you will have experience in biochemistry, protein purification or a general knowledge of
immunology with experience in GLP/OSR environment. Basic computer skills are essential.

**R&D Scientists**

Cumbria

Innovia Films is a leading global producer of speciality cellulose and Biaxially Oriented Polypropylene (BOPP) films with production sites in the UK, USA, Belgium and Australia. We hold a leading global position in markets for labels and security films, coated packaging, overwrap and biodegradable films. We employ over 1,500 people worldwide and we now have two vacancies for Project Leaders and one for an Experimental Analyst, based at our Group Research & Development Centre in Wigton, Cumbria (UK).

**The Project Leader - Structures**, will be involved in the development of new polypropylene and cellulose film structures. The Project Leader - Surface Engineering, will be involved in the development of both aqueous and solvent based coatings for polypropylene and cellulose films. In both roles, the Project Leaders will coordinate or Lead a number of projects, with the aim of developing or refining products and processes, in order to support the growth of our business. This will involve the planning and execution of Laboratory evaluations and plant trials. Applicants should be educated to degree level in a science based discipline, with 3 - 5 years post-graduate industrial experience. A Ph.D. in Organic Chemistry, Polymer Science or a related discipline would be advantageous. The ideal candidate will be a conceptual thinker, with the ability to successfully deliver multiple R&D projects to challenging deadlines. Candidates must be excellent communicators and be able to combine a practical ‘hands on’ approach with the generation of innovative solutions. The ability to work within and lead multidisciplinary teams, applying skills from laboratory to manufacturing scale is essential.

**The Experimental Analyst** will be maintaining and developing a family of analytical technologies to support existing film grades and processes, and the development of new products and processes. Applicants should be educated to degree level in Chemistry (or a chemistry based subject), with a mathematical capability. Alternatively, an experienced analyst with a proven track record in analytical testing or physical characterisation of materials would be suitable. The ideal candidate will have a good knowledge of the core concepts of analytical chemistry and will be expected to deliver results within defined timescales to support a variety of analytical customers. Planning, problem solving and working under pressure in a busy department are vital factors for success in this role.

In the first instance, applicants should send their CV and covering letter (including details of current / last salary) to Mrs. Jennie Rankin, Employee Relations Manager, Innovia Films Ltd, Wigton, CA7 9BG. E-mail: Jennie.Rankin@innoviafilms.com. Tel: 016973 41264

Closing date: Monday 30th May 2005

[2498-027 (2005) : 59]
Environment Agency
protecting 5 million people from flooding, whilst maintaining wetlands

Policy & Process roles in Flood Risk Management
Policy Advisors £25,000 to £35,400
Policy Support Officer £17,000 to £20,000
Process Technical Officer £17,600 to £20,000
Policy roles – Peterborough, London, Bristol or Cardiff
Process roles – Bristol, Cardiff or Tewkesbury

It’s a big job, making the environment a better place to live and protecting the diversity of our wetland world. You might know this, but with five million people and two million properties at risk from flooding, we spend a lot of time and money protecting them — £450 million, or half our budget, in fact. Whether you’ve a strong technical or planning background, are working with an NGO or government agency, or have just left college, you can help us make a difference to the lives of people and the future of wetland wildlife across England and Wales, and give your career a huge boost too.

Join our Policy team and you’ll be setting the Flood Risk Management (FRM) guidelines for the entire Agency — and beyond. You’ll help guide our own activities at a regional level, influence our partner organisations, and support the Board in bringing the issues to the wider political arena. As a member of our Process team, you’ll provide the vital link between policy and operational staff. In short, this team turns policies into practice, detailing how things can and should be done at ground level; as well as giving strategic advice on all elements of FRM.

There are a number of areas you could work in. The first of these is Flood Risk & Planning, where you’ll work with developers and local authorities to help determine our future approach to water management. Several years’ postgraduate planning experience would be ideal, particularly if this involves water management. If you’re more technically minded, you could join our Business Development and Science team, working on a joint research programme with Defra and helping stitch such tricky issues as climate change into our water management policies. We need two skilled technicians with an environmental science or engineering background to ensure the scientific rigour of this ongoing project and make sure the results of the programme influence our business. You could lead our Policy Co-ordination if you have a good knowledge of the issues involved in flood risk management. You’ll be communicating these issues, both within the Agency and with external organisations.

As a geographer or biologist interested in water systems management, you could play a key role in improving the nation’s water quality, as part of our Water Framework Directive team. Alternatively, you could join Flood Event Management, where your water/flood risk management experience will be invaluable. This team is responsible for how we deal with actual floods and their impact on industry and the wider community. Flood Risk Mapping & Data Management maintains our Flood Map through activities such as river modelling. You could join this team and help set data management standards, commission survey work, and deal with related enquiries. Our Strategic Planning & Development team also needs people to assist with high level, long term flood risk planning. As an example, you could be developing catchment or shoreline flood management plans. Finally, we have Process Advisor, Process Technical Officer and Policy Support Officer roles in our Asset Management team, for geography, biology or engineering graduates with a keen interest in this field.

Your focus will be on our 35,000 km of flood defences and how we can maximise their benefits.

Whichever team you join, you can be sure of ongoing support, training and development opportunities, as well as an excellent benefits package that includes: contributory final salary pension scheme (with life cover), flexible working and generous holidays.

For further information, visit www.fluidfacts.com
If you do not have internet access, please contact Debbie on 01925 542013. Closing date for applications is 18 May 2005.
We are committed to making our organisation as diverse as the environment.

FUEL CELL OPPORTUNITY

Have a real impact on the design and development of a new approach to fuel cells at emerging Technology Company, ACAL Energy Ltd. based in Merseyside.

**Coordination Chemist** (PhD or Post-Doc) with experience of metal complex design, is required to drive forward the company’s innovative approach, with passion, flexibility and imagination.

**Electrochemical Technologist** (BSc/MSc) with a degree in chemical science or engineering, preferably with experience of electrochemical measurement, with the determination and practical skills to develop the performance of the technology.

For further details contact Dr Andrew Creeth on 01151 795 4143 or email your CV to acreeth@acalenergy.co.uk

[2498-030 (2005) : 60]
VETERINARY EPIDEMIOLOGIST Ref: 04/04/05
An opportunity has arisen for a Veterinary Epidemiologist to participate in and manage a five year programme aimed at evaluating a modified vaccine for Contagious Bovine Pleuropneumonia (CBPP) in East Africa. Led by the Moredun Research Institute, the programme is funded by the Wellcome Trust and is in collaboration with the University of Berne, Switzerland, the International Livestock Research Institute, Kenya, the Kenya Agricultural Research Institute, the Animal Diseases Research Institute in Tanzania and VETAID, an international livestock NGO. With a strong background in veterinary epidemiology and mathematical modelling, you will be responsible for the advancement of the programme and report to the Principal Investigator. You will be responsible for a comprehensive epidemiological analysis of endemic CBPP in Maasai pastoral cattle herds in Kenya and Tanzania, before, during and after a three year vaccination campaign. You will also oversee laboratory vaccine characterisation studies and evaluation of novel CBPP vaccines derived by targeted mutagenesis. The post will be a 5 year appointment and will be based at the Moredun Research Institute, involving frequent travel to East Africa.
Salary range £26,780 - £31,186 plus excellent employee benefits.
For application details and further particulars, please visit:
www.mri.sari.ac.uk/jobs or telephone +44(0)131 4455111.
Closing date 13th May 2005.

INVESTOR IN PEOPLE
[2498-031 (2005) : 60]
The Centre for Environment, Fisheries and Aquaculture Science is a thriving, scientific research and consulting centre delivering solutions to meet the diverse needs of UK and International organisations active in marine, coastal and freshwater environments. To meet growing business opportunities we are seeking to fill 3 newly created, high profile posts. For these posts we are looking for innovative, self-motivated individuals who are results orientated, excellent communicators and strong team players. For each post the successful candidate will have a degree and must be able to demonstrate substantial relevant experience.

**Natural Resource Modeller**
Lowestoft, c.£40,000 to £45,000 pa REF: DNF/13/05
(More may be payable to an exceptional candidate)
To strengthen our natural resource modelling and fisheries management capability we are recruiting a Senior Scientist with a track record of innovation and publication in this area. You will provide leadership for a range of advisory, research and consultancy projects and actively contribute to developing CEFAS’s international science business.
A strong quantitative capability and a background in modelling ecological, population, genetic, spatial, bioeconomic or Bayesian processes together with a proven track record of relevant scientific publications and some experience of fisheries management are all essential.

**Principal Scientist-Marine Ecosystem Change**
Lowestoft, c.£40,000 to £45,000 pa REF: DNF/16/05
(More may be payable to an exceptional candidate)
A Senior Scientist is required to develop and lead programmes to strengthen our understanding of aquatic ecosystems and how these ecosystems respond to change. You will be by nature a synthesiser and systems thinker as well as being adept at using the quantitative tools required for simulation.
Your proven track record includes evidence of winning funding for a significant scientific portfolio, leading multi-disciplinary teams, forming international collaborative partnerships and is supported with relevant scientific publications. You must be highly numerate and have experience in some of the following: Eutrophication, Harmful Algal Blooms, the use of biogeochemical models e.g. ERSEM, climate change impacts to ecosystems and development of indicators of ecosystem change.

**Environmental Risk Assessor**
Burnham-on-Crouch, c.£40,000 to £45,000 pa REF: DNF/7/05
(More may be payable to an exceptional candidate)
You will lead the development of environmental risk assessment and will have responsibility for the delivery of projects and the development of new business.
You must have experience of working in a consultancy, industrial or regulatory environment in the area of environmental risk assessment, preferably relating to chemicals in the environment. A high level of technical ability, a record of successful project management, experience of gathering and interpreting data on the fate and effects of chemicals to ecosystem or human health, a good understanding of European and UK legislation, experience of winning new business and excellent networking skills are also essential requirements for this demanding role.

Our Benefits include a pension package with a final salary option, flexible working hours, 25 days annual and 10.5 days privilege and bank holiday leave on commencement.

To receive full details and apply please phone (01502) 524529, e-mail recruitment@cefas.co.uk or go to www.cefas.co.uk/vacancies and apply online, quoting the relevant reference. Closing date for all of the posts is 20 May 2005.

21 May 2005
New Scientist
[2498-033 (2005) : 62]
Come to our open day and you’ll get more than a dried-up ham sandwich or lukewarm cup of coffee. In fact, if you’re a science graduate, you could walk away with a pharmacy career. It’s guaranteed to leave a much nicer taste in your mouth!

Giving you the chance to meet the team, you’ll enjoy a tour of the pharmacy department and see firsthand what pharmacy technicians do. You’ll also get a tasty free lunch, the chance to explore Oxford in the afternoon and an invitation to take an interview on the day if you choose.

As one of our graduate trainees you’ll receive a salary of £13,256* p.a. rising to £16,089* p.a. We’ll also train you up via a combination of on-the-job training and distance learning, and give you all the support you need. So if you want to put your science degree to good use at one of the largest teaching Trust’s in the country, let’s talk at the open day over a nice hot cup of coffee or tea!

Attendees are required to complete an application form prior to interview, to be received by 27th May 2005. Overnight accommodation is available either the night before or after the open day at £18 a room. For more details and to book your place, call Jo Johnson on 01865220086.

* The pay and terms and conditions will be subject to the new national pay framework for the NHS (Agenda for change).
Johnson Matthey Catalysts is one of the world’s leading catalyst companies with strengths in process catalysis, environmental catalysis and fuel cell technologies.

At Johnson Matthey Catalysts, our people are our strength. Going beyond simply providing products and services, we develop tailored solutions for challenging opportunities. Our in-depth practical knowledge enables us to optimise the performance of our products in the customer’s plant by applying a unique blend of process, design and engineering skills. Our dynamic groups of scientific and commercial personnel are the catalysts for your competitive advantage. Due to the continuous expansion of the Business the following vacancies exist at our Billingham site.

Technical Development Manager
Technical Development Project Manager

We are looking for highly motivated and enthusiastic scientists to lead new product development to drive forward our growing business.
You will have a PhD in Chemistry or related subject and preferably 3-5 years experience in postdoctoral or industrial research positions.
The successful candidates will be responsible for setting technical strategy and leading a team of research scientists to deliver the required business goals.
The ideal candidate will be innovative, technically excellent and have highly developed communication skills together with knowledge of heterogeneous / homogeneous catalysis.
To apply for one of the above positions please send your CV together with a covering letter including current salary details, to sue.magson@matthey.com. Once received you will be sent an application form to complete & return.

Closing Date for receipt of applications for the above positions is 23rd May 2005.
No enquiries from media or recruitment agencies please.

[2498-035 (2005) : 63]
Kew
Plants People Possibilities
Darwin Initiative Project Officer
Two year fixed-term contract

The Darwin Initiative Project will help Costa Rica implement the Convention on Biological Diversity through research and training orchid conservation. Your main role will include assisting with the day-to-day management of the Project, including field work, and producing orchid DNA barcodes for species identification. You will also help with the herbarium digitalisation of Meso-American orchid types and the running of the MolSys laboratory.

With excellent communication and organisational skills, you will have a good degree in a relevant subject area and basic knowledge of molecular techniques, including PCR and DNA sequencing. You will have the ability to plan and organise work schedules and have some proven project management experience. Basic computer skills and a full, clean driving licence, for the field work, are essential, with a fluency in Molecular Biology, Computing and Phylogenetics being desirable. The ability to speak Spanish would also be an advantage.

Salary is £17,505 per annum and benefits include a choice of final salary or stakeholder pension, generous annual leave and a stunning work environment.

Application packs are available from our website at www.kew.org (click on the ‘about us’ icon). Alternatively, please contact the HR Department, RBG Kew, on 020 8332 5184/5150 (24 hour answerphone). Please quote Ref DO. Closing date: 20 May 2005.

[2498-036 (2005) : 63]
The Health Protection Agency (HPA) is an independent body that protects the health and well-being of everyone in England and Wales. The Agency (in partnership with the National Radiological Protection Board) plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. We also prepare for new and emerging threats, such as a bio-terrorist attack or a virulent new strain of disease.

**Scientific Genotoxicologist** (Ref: 9985004)
CHAPD
Newcastle

The Chemical Hazards and Poisons Division of the Health Protection Agency provides comprehensive expert advice and support for the management of chemical incidents across England and Wales. The Newcastle Unit is responsible for research into the toxic effects in Man of chemicals in the environment, including the development and application of novel biomarkers of human exposure.

You will join the research and development team of the Chemical Hazards and Poisons Division of the Health Protection Agency (HPA) located on the campus of Newcastle University. The main responsibility of the postholder is to provide an expert resource in genotoxicology and develop a research programme on the role of interactions between the environment and genes in human toxicity and the health implications of interindividual variability in susceptibility to toxic effects.

You will be expected to take an active part in the research activities of the unit as well as join a team providing advice on chemical hazards to various UK agencies such as local Health Protection Units and the National Poisons Information Service, and will join an out-of-hours on-call rota (for which training is available).

You’ll need a PhD in relevant discipline and 3-5 years’ post doctoral experience. You should have experience in tissue culture techniques, analysis of biological tissues, and PCR and other molecular biology techniques. It is also essential that you have a wide knowledge of genotoxicology and the ability to develop novel methodology is desirable. A willingness to comply with Caldicott principles on the use of patient identifiable data and current data protection legislation is essential.

**Scientific Neurotoxicologist** (Ref: 9985005)
£28,016 - £30,302 p.a. (Subject to Agenda for Change)

You will be expected to play a leading role in the development of neurotoxicology expertise in the Unit and become the expert resource in neurotoxicology for the HPA. Neurotoxicology has been identified as a major subject area for the Unit and it is intended that a Centre of Excellence is developed in Newcastle. You will contribute to on-going research projects within the unit (and the HPA as a whole), particularly with respect to the structural and functional consequences of exposure to known and novel neurotoxins, and the development of testable mechanistic hypotheses. You will also join a team providing advice on chemical hazards to various UK agencies such as local Health Protection Units and the National Poisons Information Service, and will join an out-of-hours on-call rota (for which training is available).

You’ll need a PhD in a relevant discipline and 3-5 years’ post doctoral experience. You should have experience in research relevant to neurotoxicology. A willingness to comply with Caldicott principles on the use of patient identifiable data and current data protection legislation is essential.

For an informal chat or other information for either post please contact one of the following: Professor Peter Blain: 0191 222 7195 (peter.blain@hpa.org.uk) or Professor Faith Williams: 0191 222 7255 (f.m.williams@ncl.ac.uk). For an application and job description you should contact Sabrina Senior in HR via e-mail sabrina.senior@hpa.org.uk quoting the reference and details will be returned via e-mail. You can also telephone 020 7492 0418.

Closing date for both posts: 20th May 2005.

In line with the rest of the NHS, this post is subject to a terms and conditions review - Agenda for Change.

For other employment opportunities, visit our website [www.hpa.org.uk](http://www.hpa.org.uk)

The Health Protection Agency is an equal opportunities employer

Unilever

Monday: dry skin, Tuesday: itchy scalp, Wednesday: split wine, Thursday: infected sink, Friday: body odour
Could this be your dream week?

**Microbial Enzymologist / Enzyme Biochemist** • Port Sunlight, Wirral

Face creams, shampoos, washing powders, kitchen cleaners, protein-based technologies, with an emphasis on understanding deodorants - for years, we’ve developed groundbreaking products using physical and chemical science. Now, we’re turning more and more to Nature. For our bioscientists, that means a tremendous amount of variety in a week — here, you’ll work on developing a whole range of popular home and personal care brands. Crucially, however, you’ll also enjoy the support and inspiration of a team of like-minded scientists, the freedom to conduct your own research, and the backing of one of the largest consumer goods companies in the world.

Working with a lab team, you’ll build an enzyme science base here to help us identify natural ingredients that can deliver amazing benefits for our consumers. You’ll characterise and evaluate new protein-based technologies, with an emphasis on understanding the key reaction parameters of new enzymes and enzyme cascades. For a true protein scientist with a PhD in enzyme biochemistry or microbial enzymology and preferably two to three years’ post-doc experience, this could be the perfect career move.

Please apply by email to [recruitment.peoplelinkuk@unilever.com](mailto:recruitment.peoplelinkuk@unilever.com) enclosing your CV and remuneration details and quoting Ref: 107202. Closing date: 26th May 2005.

In applying for the above position, you agree, unless you notify us when responding to this advert, that we may consider you for other vacancies we have and make your details available to other companies in the Unilever Group for the same purpose. Some Unilever companies are in countries without any data protection laws.

We are committed to diversity in everything we do.

[2498-041 (2005) : 65]
EPSRC
Engineering and Physical Sciences Research Council
Make a difference!
Research Portfolio Managers
Swindon
£22,500 (with generous progression arrangements) + benefits
At the Engineering and Physical Sciences Research Council, we know that advances in knowledge and technology make a real difference. We work in partnership with universities to invest in people and scientific discovery and innovation. Our mission is to harness these resources to deliver real economic and social benefits, and promote public interest in engineering and the physical sciences.
It’s a fascinating, rewarding role, and the scale of our task is reflected in our 2005/06 budget of over £550m.
The team of 68 Research Portfolio Managers is at the heart of our operations working with Britain’s innovators at the edge of discovery. Depending on your specific role, you could find yourself developing relationships with leading scientists and engineers in universities and industry, managing the peer review process or representing our interests on high profile external bodies. Typically we recruit around 20 RPMs a year, normally on a quarterly basis, to provide development opportunities for existing RPMs internally.
Naturally, you will be an effective and persuasive communicator, skilled in team working with good organisational abilities. You will need to have strong enthusiasm for the management and administration of science. If you have a good degree and an interest in physical sciences or engineering, together with several years’ experience in a science related field or a PhD, we would like to hear from you.
Your biggest reward will be helping us achieve our goals, but you can expect wide-ranging career prospects and a comprehensive range of benefits. Travel in the UK is an important part of the role. Other benefits include a final salary pension scheme, flexible working hours, on-site shop and restaurant, and an interest free loan on appointment. If you wish to discuss the challenges and opportunities these posts offer, you are encouraged to have informal discussions with our existing RPMs. To take advantage of this, please contact Kathy Squires on 01793 444339 or email kathy.squires@epsrc.ac.uk
Make a difference to your career by requesting an application pack from Claire Ashley, Joint Recruitment Unit on 01793 444468 (24 hours), fax 01793 444016 or email claire.ashley@epsrc.ac.uk
Please quote ref: JRU 65/05.
We are an equal opportunities employer and seek to employ suitable people regardless of disability, sex, marital status, sexual orientation, race, colour, religion, ethnic or national origin.
There is a guaranteed interview scheme for suitable candidates with disabilities.

POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE
[2498-042 (2005) : 65]
Welcome to knowledge.
Welcome to life.

As part of Abbott Laboratories, one of the largest international healthcare and diagnostics organisations in the world, with annual sales of over $19bn, Murex Biotech Limited is committed to improving the quality of patient care. We do this by researching, developing and producing biological reagents used for the detection of a wide range of human diseases. We deliver on this commitment through the talent, dedication and ability of our team. As a result you’ll find that working for Murex Biotech Limited is a blend of career progression and true personal satisfaction. Based in Dartford, Kent, Murex Biotech Limited is one of four Abbott sites in the UK and has a workforce of 400 staff.

**Process Development Scientist**
Dartford, Kent
We are looking for experienced scientists to join the technical team supporting the manufacture of diagnostics/screening products for the infectious disease market. We seek professionals to focus on the design and validation of robust manufacturing processes. You will also play a key role leading investigations aimed at delivering tangible process improvements.

You will be a scientist with proven experience either in the use of multi-factorial experimental design for the structured development and validation of key processes or in the application of investigational tools, such as FMEA, fault tree analysis to structured problem solving. Ideally you would also have a biological background in a relevant discipline and will have knowledge of immunoassay development, IVDD regulations and compliance expectations.

With a relevant first degree, you’ll also ideally be qualified to MSc or PhD level. Comfortable working both within a team environment and individually, you should possess impressive analytic and problem-solving skills with the tenacity and drive to overcome problems and drive solutions through to implementation. Good attention to detail and strong written communication skills will also be essential.

For further information and to apply, quoting reference: N5446 please contact Sara Phillips, Recruitment Officer, Murex Biotech Limited, Central Road, Temple Hill, Dartford, Kent DA1 5LR. Or contact Sara by email at sara.phillips@abbott.com or on 01322 282508.

Roche Pharmaceuticals
“My contribution drives a vital process.”

**Senior Regulatory Documentation Specialist & Documentation Specialist**

£ Highly Competitive Welwyn Garden City, Herts

Documentation Specialists are at the heart of the drug licensing process taking responsibility for key documentation projects and driving them through to fruition. As part of the Global Drug Development division of Roche, you’ll also be working at the leading-edge of the pharmaceutical industry, helping to bring important new medicines to market to combat human disease.

Documentation Specialists ensure that our clinical regulatory documentation meets the highest standards of quality, accuracy and organisation. This involves the planning and preparation of study reports and other documents for submission to the FDA, EMEA and other regulatory bodies. As a key member of an international project team, you will work closely with global scientific and medical associates to drive product development and to ensure that all aspects of clinical NDA/MAA documentation are adequately planned and executed.

You will have 1-2 years’ medical writing experience for the Documentation Specialist role, with a demonstrably clear, concise scientific writing style.

The Senior Documentation specialist will have 3+ years’ previous medical writing experience including the preparation of high level clinical summary documents and regulatory filings. Both roles require a PhD, MSc or equivalent in a biomedical discipline, a flexible approach, and the ability to work on a variety of projects within schedule across different therapeutic areas. Previous experience of clinical research and development in a pharmaceutical company would be a major asset.

These are globally focused, highly challenging roles, where you will take responsibility for your own project within a supportive, close-knit team. So, they call for a detail-conscious, persuasive, influential and decisive approach, with a talent for cross-cultural communication.

In return Roche offers a competitive salary plus the excellent benefits you would expect from a blue-chip organisation, including a genuine interest in your development and progression.

Closing date for applications: 20th May 2005

[2498-047 (2005) : 67]
Kerry Bio-science is a division of Kerry Group Plc. and the new operating company name for the former Food Ingredient Division of Quest International. Kerry Bio-Science is a globally operating company, specialized in production and development of Emulsifiers, Enzymes, Texture Systems, Hydrocolloids, Cultures, Fermented Ingredients, Yeast, Yeast Extracts and Specialty Proteins for the Food, Beverage and Pharma industry. Through sales and technical centres in more than 20 countries and production at 9 locations in 3 continents, we are committed to serving our customers needs. Kerry Bio-Science head office is located in Naarden, the Netherlands.

For the Research department in Naarden, we are offering the positions of:

**Group leader Bio-processing R&D – Senior Scientist fermentation R&D m/f**

**Job description:**
The bio-processing R&D group is involved in the execution of the early project phases of fermentation related product development projects for the Yeast, Enzyme and Cultures & Fermented ingredients business units. The group acts as centre of expertise for fermentation science in the company. The group leader bio-processing is responsible for the management of the group and the projects the group executes. The group leader position will also involve the role of senior scientist fermentation R&D, consulting and advising other R&D functions. The group leader Bio-processing reports to the R&D Director.

**Profile:**
We are looking for a highly motivated candidate with a PhD or Masters degree in biochemistry, biotechnology or microbiology, having a profound understanding of microbial physiology. The candidate must have good line management and excellent project management skills with 3 - 5 years experience, preferably in an industry environment, with proven yeast propagation, enzyme production or lactic culture production experience. The applicant should be fluent in English.

**Application expert for Fermentation and Diagnostics m/f**

**Job description:**
The R&D group for Sheffield Pharma ingredients is involved in the development of components for fermentation and diagnostic applications. The Application expert for fermentation and diagnostics is responsible for the support of the Pharma product line and works closely together with international colleagues to evaluate the performance of new and existing products. The Application expert acts as centre of expertise for fermentation and diagnostic applications in the company. He or she also interacts with customers to initiate joint projects. The application expert for fermentation and diagnostics reports to the R&D Director for this segment.

**Profile:**
We are looking for a highly motivated candidate with a Masters degree in biochemistry, biotechnology or microbiology, having a profound understanding of (industrial) fermentation and preferably 3-5 years of relevant experience. The candidate must have good project management skills, preferably in an industry environment. The applicant should be fluent in English.

Kerry Bio-Science

**CONDITIONS:** We are offering a challenging function in an international environment. Kerry Bio-Science offers an attractive package of labour conditions, including a competitive salary and growth opportunities.

**CONTACT:** For further inquiries about the position of Group leader Bio-processing R&D - Senior scientist fermentation R&D you can contact Mr. R.Orsel, R&D Director Kerry Bio-Science: Roel.Orsel@kerrybioscience.com For further inquiries about the position of Application expert for Fermentation and Diagnostics you can contact Mr. A. Kunst, R&D Director Proteins: Ton.kunst@Kerrybioscience.com
Please send your application and CV to: Mr. J. van Kleef, Manager Human Resources, Kerry BioScience, P.O Box 5112, 1410 AC Naarden, The Netherlands or mail to Joost.van.Kleef@kerrybioscience.com

[2498-048 (2005) : 67]
UNIVERSITY OF OXFORD
Life and Environmental Sciences Division

The Life and Environmental Sciences Division at the University on Oxford is a highly interdisciplinary organisation, bringing together academic departments representing diverse disciplines but sharing common thematic interests. Units within the Division are the Departments on Biochemistry, Plant Sciences and Zoology and the Schools of Archaeology, Anthropology and Geography and the Environment.

University Lectureship in Human Geography in association with St Catherine’s College

The Department of Geography proposes to appoint a University Lecturer in Human Geography. The post in tenable from 1st October 2005 or as soon as possible thereafter.

The successful candidate will be offered a Fellowship at St Catherine’s College.

The combined College and University salary will be according to age on a scale up to £45,707 p.a. (as of 1st August 2004).

The University and the College are seeking candidates with a proven record of scholarship and research in human geography and a track record of all attracting research funding. The appointee will be required to engage in research which will contribute to the Department’s research reputation; to teach, supervise and examine undergraduate and graduate students; and to contribute to administration in College and the Department.

Further particulars are available from http://www.admin.ox.ac.uk/fp/ or from Professor G Clark, Head of the School, to whom informal enquiries may be addressed (e-mail Gordon.clark@ouce.ox.ac.uk).

Applications (eight copies except from candidates overseas who need send only one), including a curriculum vitae, a list of principal publications, and the names of two referees, should be sent to Professor Gordon L Clark, Head, School of Geography and the Environment, Mansfield Road, Oxford OX1 3TB for receipt not later than 1st June 2005.

RCUK Academic Fellowship Scheme

Applications are invited for four 5-year fellowships which will lead to a permanent academic post on the successful completion of a probationary period. Fellowships tenable from 1st August 2005 are available in the following subject areas:

- Biomathematics: in the Department of Zoology, with research interests in behaviour or development
- Motivations and Means of Global Migration: in the Institute of Social and Cultural Anthropology
- Chromosomes and Development: in the Department of Biochemistry
- Archaeological Science (Tephrochronology): in the Research Laboratory for Archaeology and the History of Art

The Academic Fellowship Scheme is a national initiative funded by the Research councils to provide a structured path into an academic career for contract research staff and other suitably qualified individuals. Applicants should have guaranteed research funding from a source other than the Academic Fellowship for at least part of the five-year fellowship period; the scheme is open to researchers supported on any type on grant funding and to holders of current fellowship awards. In the case of cell cycle and development, departmental funds are available to help support returners or other researchers without current research support.

Academic Fellows will:
- take up their appointments on 1st August 2005
- be able to develop their expertise in both research and teaching
- take part in outreach to schools
- have an academic mentor and full access to the University’s staff development provision, including the opportunity to take the University’s postgraduate diploma in learning and teaching
- be appointed to a permanent academic post, subject to satisfactory performance, at the end on the five-year fellowship period
- be paid on the research support scales during the fellowship period according to experience and stage of academic career.

Further particulars for the posts together with details of the Academic Fellowship Scheme are available on the University website at http://www.admin.ox.ac.uk/fp/ or from Dr M S Edwards, Secretary of the Life and Environmental Sciences Division, 9 Parks Road, Oxford OX1 3PD. The closing date for applications is 1st June 2005.
The University in an Equal Opportunities Employer.
[2498-049 (2005) : 68]
Research Assistant
(VBS/63/05)
Applications are invited for a six-month Research Assistant position funded by a grant from the Horse Race Betting Levy Board. This project involves the measurement of bone mineral density in racehorses, and aims to validate a DEXA scanner for measuring bone density in equine cannon bones. The successful candidate will be trained in the use of the scanner, and will be required to undertake in vitro and in vivo measurements, and assist in data analysis. Applicants should have a science degree (preferably in the equine or veterinary science fields), and excellent communication skills, since the project will involve work with veterinarians and racehorse trainers.
The salary will be on the Universities’ Research Salary Scale, Grade 1B (£19,460 per annum), plus £2,134 annual London Allowance. To make informal enquiries about the post, please contact: Dr Joanna Price (tel: 020 7468 5238; email: jprice@rvc.ac.uk). For an application pack, please contact: Helen Stradling, HR Administrator, Royal Veterinary College, Royal College Street, London NW1 0TU (tel: 020 7468 5263; email: hstradling@rvc.ac.uk), quoting the reference above. Application packs can also be downloaded from our website: www.rvc.ac.uk
Closing date: 16th May 2005.
We are committed to Equality of Opportunity and welcome applications from ethnic minority and disabled members of the community.
The Royal Veterinary College
University of London

POSITIVE ABOUT DISABLED PEOPLE
[2498-050 (2005) : 68]
Research Assistant in the Mechanics of Solid Polymers

Applications are invited for the above post. The Research Assistant will undertake an experimental study, and associated numerical modelling of the biaxial stretching of solid polymers, under conditions relevant to industrial processes for the manufacture of polymer packaging.

The successful applicant will have a good first degree and PhD in engineering, physics or materials science, together with research experience in polymer engineering or science, including high-quality experimental work. Experience of developing or using up-to-date materials testing and successful collaborative working within a team or between groups is also essential. Experience of giving presentations at meetings or conferences, preparing high-quality technical reports and journal papers and modelling of solids, especially polymers, is desirable. Experience of using key computer software packages, especially ABAQUS, and MS Office, would be useful.

This post is available for 27 months, starting as soon as possible. The starting salary will be on the RA1A scale £19,460 - £24,820 p.a. depending on age and experience.

Further particulars can be obtained from Mr C J Scotcher, The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ, or from administrator@eng.ox.ac.uk to whom written applications should be made enclosing a curriculum vitae and the names and addresses of two referees.

Please quote DF05031 in all correspondence. The closing date for applications is 23rd May 2005. The University is an Equal Opportunities Employer.
St George’s University of London
Medicine, Biomedical Sciences, Health and Social Care Sciences
Department of Cardiac and Vascular Sciences
Division of Clinical Neuroscience

Research Assistant/Research Nurse
Fixed term for 3 years

St George’s is one of the leading units for research and clinical care in stroke. This is a three-year post to work on a UK-wide stroke genetics study. The project aims to establish a DNA bank from patients with Lacunar Stroke.

The postholder will play a crucial role in recruiting cases and controls, both at St George’s and in other centres throughout the South London region.

The post would suit either a non-nurse healthcare professional or science graduate, with experience of working with patients and/or clinical trials, or a nurse looking for an introduction to research or with some research experience.

The starting salary will be up to £29,166 pa inc. depending on skills and experience.

This post is subject to the successful candidate being asked to apply for Disclosure from the Criminal Records Bureau (CRB) at Enhanced Level. Further information regarding Disclosure can be found at www.disclosure.gov.uk

For further information, visit http://www.sgul.ac.uk/ or contact the Personnel Office, St George’s, University of London, Cranmer Terrace, London SW17 0RE, telephone 020 8725 5020 (24-hour answerphone) or email: personnel@sgul.ac.uk

Closing date for applications: 19th May 2005.
Please quote reference 409/05.

St George’s is an Equal Opportunities Employer

[2498-052 (2005) : 69]
Research Fellow
Department of Medical Genetics
This new post provides an exciting opportunity to make a contribution to the genetics of cancer associated with neurofibromatosis type 1.
You should:
• Have a postgraduate qualification, preferably PhD. A minimum requirement of a good honours degree in a related scientific discipline is essential;
• Have experience in a Molecular Genetics laboratory for a minimum of three years;
• Experience in PCR and DNA sequencing;
• Be an effective verbal and written communicator with good interpersonal skills;
• Be able to assist in the supervision of junior staff.
This position is fixed-term for a period of three years and a maximum starting salary of £27,116 will apply.
Salary: £19,460 - £29,128 per annum
For an application pack and details of all our vacancies, visit www.cardiff.ac.uk/jobs Alternatively email vacancies@cardiff.ac.uk or telephone +44 (0) 29 2087 4017 quoting vacancy number 288.
Closing date: 19 May 2005
[2498-053 (2005) : 69]
UNIVERSITY OF BATH
Photonics & Photonic Materials Group
Department of Physics

Postdoctoral Positions and PhD Studentships
(Ref: 05/167) Following the award of a major £2.7 million grant from EPSRC, we are seeking outstanding candidates for five postdoctoral positions and four PhD studentships (EU citizens only) in the area of photonic crystal fibres (PCFs) and their applications. The projects include experimental nonlinear optics, theory & numerical modelling (solitons, nonlinear optics, photonic band structure), development of new light sources (lasers, correlated photon pairs, white light supercontinua), near-field optics and PCF fabrication & post-processing. The work will take place in brand-new laboratories using the group’s state-of-the-art equipment and many opportunities exist for national and international collaboration. Experience in nonlinear optics, fibre optics or photonic band-gap materials would be an advantage.

The Photonics and Photonic Materials Group consists of some 30 researchers and academics working on optics in microstructured materials. It is especially known for the invention and development of photonic crystal fibre.

The University of Bath is in the top league of British research-led universities. Its campus is just outside Bath, a spectacularly beautiful city which stands on the River Avon among the hills of England’s West Country.

Salary for postdoctoral posts in the range £19,460 - £29,128 per annum.

Informal enquiries may be directed to: Professor Philip Russell (tel: +44 (0)1225 386946, email: p.s.j.russell@bath.ac.uk) and more information is available on the group website www.bath.ac.uk/physics/groups/ppmg/

Closing date: 23 May 2005.

Applications for the research studentships should be directed to Professor Philip Russell, Department of Physics, University of Bath, Bath BA2 7AY

Application forms for the postdoctoral posts may he obtained from the Human Resources Department, University of Bath, Claverton Down, Bath BA2 7AY (email: jobs@bath.ac.uk). Alternatively please phone the 24 hour answerphone service on 01225 386921, text-phone 01225 386039, or apply online at www.bath.ac.uk/jobs quoting the reference.

Technician
(Ref: 05/160) The Group consists of around 30 academics, postdoctoral researchers and PhD students, who work in a dynamic and collaborative environment. We have an international reputation for our research into optical fibres and waveguides, and optical devices. We wish to appoint a technician to support our research, ideally with a background in Physics to at least A-level, with the following:

- Basic workshop skills
- Familiarity with fabrication or industrial technologies
- Ability to work closely with others
- Enthusiasm, imagination and versatility

This is a permanent post, available immediately.

Salary in the range £19,614- £22,113 per annum (Technical Grade E).

Closing date: 19 May 2005.

Application forms and further details may be obtained from the Human Resources Department, University of Bath, Claverton Down, Bath, BA2 7AY e-mail: jobs@bath.ac.uk). Alternatively please phone the 24 hour answer-phone service on 01225 386924, text-phone 01225 386039, or apply on-line at www.bath.ac.uk/jobs quoting the reference.

[2498-054 (2005) : 69]
LONDON SOUTH BANK UNIVERSITY
FACULTY OF ENGINEERING, SCIENCE & THE BUILT ENVIRONMENT
DEPARTMENT OF APPLIED SCIENCE
LECTURER/SENIOR LECTURER
FORENSIC SCIENCE
£26,355 - £39,140 PA

We are currently expanding our course portfolio and research in Forensic Science as well as already running a well-established undergraduate degree in Forensic Science and Masters degree. In addition, we have recently acquired around £1 million worth of equipment and a dedicated laboratory and office block.

We seek a talented individual to join our well-focused and successful team to contribute to undergraduate and postgraduate teaching activities and course management. You will demonstrate academic expertise and/or professional experience in a specific area directly relevant to forensic science and we will consider a range of expertise particularly in relation to crime scene investigation, biological and chemical forensic analysis or human identification. You will also make a contribution to research and consultancy, this will of course be dependent upon your research interests and academic and professional experience.

For an informal discussion please contact Dr Clive Steele on 020 7815 7989 or steelech@lsbu.ac.uk

For further details and an application form please visit www.lsbu.ac.uk/humanres or send a stamped addressed envelope to the Human Resources Department, London South Bank University, 103 Borough Road, London SE1 0AA, telephone: 020 7815 6223 (24 hour answering service). Please quote reference: A543. Closing date for the receipt of applications: 23 May 2005.

An Equal Opportunities Employer.
UEA Norwich
School of Environmental Sciences

**Senior Research Associate**
- Monitoring Desertification

£19,460 to £23,643 per annum Ref: RA162

Applicants are invited to work in the Climatic Research Unit in the 5** School of Environmental Sciences, University of East Anglia.

The postholder will work on the DESURVEY project, funded by the European Commission, to develop systems for monitoring desertification in the Mediterranean region and beyond with Professor Phil Jones, Professor Jean Palutikof and Dr Tom Holt. The role of the Climatic Research Unit is to provide climate data, construct climate change scenarios for use by other project members, and analyse data from climate models with respect to predicted changes in drought conditions. The post will be for two years in the first instance and the work is to start as soon as possible.

The candidate will have recently received a PhD degree, or will be in the final stages of writing up their thesis, in a climate-related subject, and with experience in the analysis of climate model data. Candidates will have skills in statistical analysis, and must have experience in Matlab or similar programming environments. A first degree in environmental sciences, meteorology, physics, mathematics or a similar topic is essential.

Further particulars can be obtained from [http://www.uea.ac.uk/env/vacancies.html](http://www.uea.ac.uk/env/vacancies.html)

An application form should be obtained from the Personnel Office, University of East Anglia, Norwich, NR4 7TJ (Internet: [http://www.uea.ac.uk/personnel/jobs/](http://www.uea.ac.uk/personnel/jobs/) or e-mail: personnel@uea.ac.uk or answerphone: 01603 593493), to be returned by 20 May 2005.

**POSITIVE ABOUT DISABLED PEOPLE**

[2498-056 (2005) : 70]
You will work with Dr Marian Ludgate, on a project funded by the Wellcome Trust to investigate the role of cell signalling in determining differentiation outcome of adult precursor cells.

**Research Technician**
You should have a BSc and several years’ experience (particularly of tissue culture) working in a research environment. (Vacancy no. 292)
Hours: 21 per week
Salary: £16,071 - £19,050 per annum, pro rata for hours worked

**Research Fellow**
You should have a PhD and two years’ post-doctoral experience in one or more relevant areas (cell signalling, adipogenesis, micro-array analysis, proteomics). (Vacancy no. 293)
Salary: £19460 - £29128 per annum
Both posts are fixed-term for 3 years.

Further information for both posts may be obtained from Dr Ludgate by email at Ludgate@cardiff.ac.uk
For an application pack and details of all our vacancies, visit www.cardiff.ac.uk/jobs Alternatively email vacancies@cardiff.ac.uk or telephone +44 (0) 29 2087 4017 quoting the relevant vacancy number.

Committed to Equal Opportunities

[2498-058 (2005) : 70]
A vacancy exists for a Research Technician on a project funded by Sterix Ltd, a biopharmaceutical company, operating at sites in Imperial College and the University of Bath. The postholder will be employed by Imperial College, St Mary’s campus.

Applications are invited from suitably qualified candidates with proven technical abilities in cancer research. Experience in cancer cell biology with expertise in one or more of the following areas: enzymology, HPLC analysis, cell culture, molecular biology, cell signalling, fluorescent microscopy, FACS analysis would be an advantage but it is not a pre-requisite.

The successful candidate will be involved in the identification and evaluation of enzyme inhibitors (see Cancer Research, 60: 3394, 2000) and steroid-based therapeutics (see Cancer Research, 60 5441, 2000) for a variety of novel biological targets.

Informal enquiries are welcome and should be made to Dr A Purohit: e-mail: a.purohit@imperial.ac.uk

To obtain an application form and further details go to: http://www.imperial.ac.uk/employment, alternatively write to The Recruitment Assistant, HR Division, Imperial College London, Medical School Building, Norfolk Place, London W2 1PG, quoting reference number MJ037105.

Closing date: 13 May 2005.

Interview date: the week commencing 23 May 2005

Valuing diversity and committed to equality of opportunity

[2498-059 (2005) : 71]
Division of Clinical Sciences

Research Fellow
£19,460–£29,128 pa Ref: 52964-045
Fixed term contract for 36-months

This position is for a Molecular Biologist. The project concerns the role of inflammation, mineral alteration and endocrinology in the process of vascular disease, in particular arteriosclerosis and vascular calcification.

A PhD. or equivalent, in molecular biology with a minimum of 3 years of postdoctoral experience including experience in a wide range of molecular techniques is essential. Experience in vascular biology would be advantageous.

Application packs are available from Personnel Services on 024 7652 3685 (24 hour answerphone), by email recruit@warwick.ac.uk, our website below or www.jobs.ac.uk/warwick. An application form MUST be completed if you wish to be considered for this post.

Closing date: 26 May 2005.

www.warwick.ac.uk/jobs
Applications are invited from internationally recognised scientists and engineers for the position of Professor / Associate Professor in Microsystems Technology within the Faculty of Science & Health at Dublin City University (DCU). Applicants should have research interests that encompass a wide spectrum of emerging microfluidic and (bio)analytical systems. This research should focus on the innovative design and fabrication of such systems for applications in biomedical diagnostics and biopharmaceutical sciences, as well as other sensing applications. The successful candidate will direct research programmes primarily within the National Centre for Sensor Research (http://www.ncsr.ie) at DCU. The NCSR is a world renowned, large-scale, multidisciplinary research centre focused on the fundamental science and applications of chemical sensors and biosensors. Its state-of-the-art facility comprises custom-designed laboratories, clean rooms, a polymer microfabrication suite, a biohazard facility, and a range of other support laboratories.

The holder of the position will be expected to provide leadership in research and contribute to the education mission of the Faculty and its constituent Schools (www.dcu.ie/science_and_health/index.shtml). We seek an exceptional individual whose accomplishments and reputation are consistent with an academic appointment at Professor / Associate Professor level. Expertise in one or more of the following areas is essential:

- Microfluidics / Lab-on-a-chip systems
- Integrated analytical systems consisting of optical, (electro-)chemical, mechanical, or biological components
- Biochips / Bio-MEMS devices
- Polymer device fabrication

Candidates will be evaluated on the basis of proven excellence in research and education, their international impact and their ability to compete for external funding. Applications will be reviewed by an International Search Committee.

An attractive salary, commensurate with experience, will be offered for this post.

Closing date for receipt of applications for the above position: 01 July 2005

Application form is available from:
Human Resources Department, Dublin City University, Dublin 9, Ireland.
Tel: +353 (01) 700 5149; Fax: +353 (01) 700 5500
Email: hr.applications@dcu.ie

Full job description is available at: http://www.dcu.ie/vacancies/current.shtml

Applicants are encouraged to contact:
Professor Brian MacCraith, Director, National Centre for Sensor Research, Dublin City University, Dublin 9, Ireland.
Tel: +353 (01) 700 5299 or
Email: brian.maccraith@dcu.ie for informal discussions before submitting an application.

DCU is an equal opportunities employer

Dublin City University
Ollscoil Chathair Bhaile Átha Cliath

[2498-061 (2005) : 71]
Applications are invited from graduates educated to PhD level in Chemistry, Physics, Electrical Engineering and related disciplines for ten Postdoctoral positions funded through a recent Basic Technology award to a consortium including the Universities of Sheffield, Glasgow, Manchester and Nottingham to develop a massively parallel near-field photolithography system, the “Snomipede”. The project builds on advances at the University of Sheffield that have facilitated the fabrication of molecular structures with dimensions ten times smaller than the conventional diffraction limit using a novel lithographic tool, scanning near-field photolithography. This project will develop parallel near-field light sources capable of delivering control of molecular structure with a precision of 10 nm over macroscopically extended areas. The consortium includes chemists, physicists, molecular and cell biologists and engineers covering the range of expertise required to deliver the Snomipede. The following positions are available. All appointments will be for two years, although may be renewable for a further year, subject to funding.

Construction of a Parallel Near-field Lithography Platform: two positions are available, starting on July 1, one at Nottingham under the supervision of Prof C J Roberts and one at Sheffield, under the supervision of Dr J K Hobbs and Prof G J Leggett. Enquiries should be addressed to either Prof Roberts (Clive.Roberts@nottingham.ac.uk) or Dr Hobbs (Jamie.Hobbs@shef.ac.uk).

Novel Probe Fabrication: a position is available at Glasgow from July 1, under the supervision of Prof J M R Weaver (j.weaver@elec.gla.ac.uk), which will involve the use of sophisticated fabrication techniques to produce novel probes for use in near-field lithography. A further two positions are available at Manchester University, under the supervision of Prof P O’Brien (paul.obrien@man.ac.uk), starting October 1, and at Sheffield, under the direction of Dr D G Lidzey (d.g.lidzey@sheffield.ac.uk), from July 1, which will be focussed on the development of novel light sources. A fourth position, based at Nottingham under the direction of Prof C J Roberts (Clive.Roberts@nottingham.ac.uk) and starting an July 1, will be focussed on the development of novel, functionalised probes.

High-Speed Lithography: recent advances have led to the availability of scanning probe microscopes capable of functioning at very high scan velocities. These offer unique possibilities for lithographic applications. A position is available in this area at Sheffield from October 1, under the supervision of Dr J K Hobbs and Prof G J Leggett.

Novel Synthetic Chemistry: a major objective of the consortium will be the application of massively parallel near-field lithography techniques to cell and molecular biology and plastic electronics. Two synthetic chemists are required to work in Manchester under the guidance of Dr J Micklefield (j.micklefield@man.ac.uk, novel photolabile protecting group chemistries) and Prof M L Turner (synthesis of novel precursors for plastic electronics applications).

Microfluidics: recently it has been demonstrated that near-field nanolithography can be conducted in a fluid medium. A position is available from October 1 to work on the development of fluidic devices for integration with near-field lithography systems to facilitate reactive nanolithography. This work package will be supervised by Dr N J Goddard in Manchester (njgoddard@man.ac.uk).

For general enquiries, please contact Professor G J Leggett, the Project Coordinator, at the University of Sheffield (tel: 0114 222 9556, e-mail Graham.Leggett@shef.ac.uk). Information is also available through Professor Leggett’s web pages (http://www.shef.ac.uk.leggett/home) and at www.shef.ac.uk/jobs. For further information about how to apply for these positions, please contact the individuals identified above. Closing Date: 23 May 2005 Ref. R3649 For full post details/application pack visit: www.sheffield.ac.uk/jobs or email: jobs@sheffield.ac.uk tel: 0114 222 1631 (24hr) Please quote Ref. in all enquiries

UNIVERSITY OF GLASGOW  
[2498-065 (2005) : 73]
5 Academic posts: 1 Chair plus 1 Senior Lecturer and 3 Lecturers Grade B posts in Bio-Materials and Bio-Engineering

The Department of Mechanical Engineering is strengthening its research through substantial investment in new research facilities and posts. The Department has world-class research in the fields of structural materials evaluation, computational engineering, internal combustion engines, fundamental aspects of fluid mechanics, naval architecture and marine engineering. These five new positions are an exciting opportunity aimed at strengthening the research of the Department in materials, structures, and fluids, with applications in biological and medical systems. The Department collaborates in these areas with several other UCL centres, including The Medical School, The Institute of Neurology, The Institute of Orthopaedics at The Royal National Orthopaedic Hospital, The Eastman Dental Institute, The Centre for Materials Research, The London Centre for Nanotechnology (a £14 million centre set up by UCL jointly with Imperial College), and The School of Pharmacy of the University of London.

A total of five posts is available, one at Chair, one at Senior Lecturer, and three at Lecturer level. The Chair plus a number of the other four posts are available in the area of materials applied to biological and medical systems. The appointee to the Chair will be an outstanding scholar who will undertake world-class research and provide research leadership, working closely with the Lecturers. The remaining posts are available in the areas of structures and fluids with applications in biological and medical systems. Whilst individual applications are encouraged, the possibility of filling several of the posts by a pre-existing group is available. Areas of expertise relevant to the five posts include: development and application of materials to biological/medical systems theoretical or experimental analysis of human body systems, implants and prostheses, drug delivery systems, applications of engineering to surgery applications of micro-engineering to biological and medical systems and analysis of fluid flows in the human body.

The initial annual salary for the Professor will be arranged by negotiation. The annual salary for the Senior Lecturer will be within the range £39,888 to £44,903 (under review incl. London Allowance) and for the Lecturers within the range £30,319 to £38,213 (under review incl. London Allowance).

For informal enquiries about the posts please contact the Head of Department, Professor Nicos Ladommatos, on 020 7679 7068, n.ladommatos@ucl.ac.uk. Further particulars and information on how to apply for the posts can be obtained from Mrs Margaret Harrison, on 020 7679 7178, margaret@meng.ucl.ac.uk

We particularly welcome female applicants and those from an ethnic minority, as they are currently under-represented within UCL at these levels. This is in line with section 48 of the Sex Discrimination Act and section 38 of the Race Relations Act.

The closing date for applications is Friday 10th June 2005.

[2498-066 (2005) : 73]
School of Pharmacy and Biomedical Sciences

**Professor in Biomedical/Pharmacological Sciences**

Salary in the Professorial range, min £44,120

The School benefits from a range of state-of-the-art facilities specifically designed for pharmacy, pharmacology and biomedical teaching and research. We undertake research in the areas of oncology, biomaterials, drug delivery, molecular design, pharmacology, physiology, molecular medicine, natural products and pharmacy practice. Forming a major part of the Institute of Biomedical and Biomolecular Sciences that was rated 5 in the 2001 Research Assessment Exercise, we received top grades for all elements of teaching quality in our last QAA Subject Review.

We have an opportunity for an innovative and energetic scientist with an established international reputation in an area relevant to biomedical/pharmacological sciences. Providing clear evidence of research leadership, including success in the supervision of research students, publications and research grant applications, you will make a contribution to academic leadership within the School. Ref: ASCI 0105/NS.

For an informal discussion, please contact Dr John Wong, Head of School on 023 9284 3594, or email john.wong@port.ac.uk

**Lecturer/Senior Lecturer in Pharmaceutical/Biomedical Microbiology**

£23,643 - £36,428

The Pharmaceutics section is part of the Division of Pharmaceutics and Microbiology that currently consists of eleven members of staff (including this post), with technical support provided by the Faculty pool.

You will contribute towards teaching at all levels of the Masters degree in Pharmacy (accredited by the Royal Pharmaceutical Society of Great Britain) and the BSc courses in Pharmacology and Biomedical Sciences, along with the new BSc in Pharmaceutical Sciences. In addition, a contribution to the teaching and supervision of students on a variety of postgraduate routes, e.g. MSc, MPhil, PhD and Professional Doctorate will be expected. Publishing in scientific journals and seeking external funding for research, either alone or as part of an internal or external collaboration, you will make a significant contribution to the Interdepartmental Institute of Biomedical and Biomolecular Science that received a 5 rating in the last Research Assessment Exercise.

Qualified to PhD level in an area related to pharmaceutical and/or biomedical microbiology, you will teach general microbiology, disinfection, sterilisation, antimicrobial chemotherapy and undertake other teaching duties. Membership of the Royal Pharmaceutical Society of Great Britain, ‘Qualified Person’ status, previous experience of industrial or hospital manufacturing, clinical microbiology and some undergraduate and postgraduate teaching are desirable. Ref: ASCI 6039/NS.

For an informal discussion, please contact Dr Michael Norris, Head of Division on 023 9284 2629, or email mike.norris@port.ac.uk

For an application pack, please contact us at the number (24-hour answerphone) or address below, quoting the relevant ref.

Closing date: 27th May 2005.

UNIVERSITY OF PORTSMOUTH
INVESTOR IN PEOPLE

[2498-067 (2005) : 73]
SCHOOL OF BIO SCIENCES

PhD Studentships for October 2005

PhD studentships in Exeter and Cornwall funded by NERC, BBSRC, EPSRC (including CASE awards), industry and charities are available in the following areas:

• Understanding the causes of urban house sparrow population decline
• Genetic status of stocked Atlantic salmon populations
• Integrative mechanisms controlling gender-assignment in fish
• In silico modelling of insect-mediated gene escape from GM crops
• Integrating transcriptomics and metabolomics to study plant adaptation
• Evolutionary/behavioural ecology of risk and information use by animals
• Exploring the plant growth promotion and biocontrol attributes of fungi
• Chemical genetics - novel molecular components of plant infection by fungi
• Estuarine habitat modifications and their impact on shorebirds
• Two NERC projects on environmental/ecological/ecophysiological topics.

Six further PhD projects (funded by 4-year graduate teaching assistantships) are available in the areas of molecular biology, plant sciences, microbiology, chemical biology, environmental biology and ecology.

Applicants should have, or expect, at least a 2:1 Honours degree in an appropriate subject.
Deadline for applications is 27th May 2005.

For further information, contact: Sarah Mudge, tel: 01392 263706
Email: BS-PGadmissions@ex.ac.uk stating the relevant project title(s).
Further details are also available at: www.ex.ac.uk/biology/

UNIVERSITY OF EXETER

[2498-068 (2005) : 74]
A three-year BBSRC PhD Studentship entitled “Host-pathogen interactions in a nutrient structured grassland” is available commencing as soon as possible, at the Wye campus. This project will use models and experiments in combination with analysis of long-term data sets to examine the population dynamics of the *Tragopogon praefensis-Puccinia hysterium* host-pathogen model system in a grassland mosaic created by variation in fertilizer input and representative of future dynamic agricultural landscapes.

To apply, please send a CV, covering letter and the names of at least two academic referees to Professor M Jeger (m.jeger@imperial.ac.uk). Applications are welcome from students with at least an upper second-class degree in an appropriate biological subject and good quantitative skills. The studentship attracts an enhanced bursary stipend above the current BBSRC rates and BBSRC eligibility conditions apply (BBSRCstuddetails.doc or BBSRCstuddetailspdf). Shortlisted applicants will be interviewed in May 2005.
Imperial College London

**MSc in Environmental Technology**

Europe’s leading practical environmental course in one of the world’s major and most rewarding growth areas.

Provides interdisciplinary training in environmental economics, law, policy, science, health and technical innovation. Nine specialist options comprehensively covering the field of environment and: business, economics, energy, health, water and ecological management, global issues anti analysis and assessment. More than 2,000 graduates since 1977 have become environmental leaders worldwide, through our alumni network, with key positions in industry, major international, regional, national government bodies, NGOs, and major consultancies. Bursaries are available. Applications seriously considered until 1 August 2005. For further details please contact: admissions@imperial.ac.uk  The Assistant Registrar (Admissions), Imperial College, London SW7 2AZ Tel+44(0)20 7594 8032: Web: www.ic.ac.uk/environmentalscience/teaching/msc/envtech/

**MSc in Environmental Diagnosis**

Provides comprehensive practical training, transferable skills and scientific knowledge to diagnose and remediate a wide range of aquatic, atmospheric and terrestrial environments affected by natural and man-made pollution. Produces leading experts through interactive teaching of transferable skills, case studies, site study visits, practical laboratory work, fieldwork activities, and team-building. Several funded project placements in environmental consultancies, industry and regulatory institutions which match the employment profile for our graduates. Highly rated and popular course based in new teaching and research facilities at Silwood Park, an attractive postgraduate campus near London.

For further details please view the course website (www.imperial.ac.uk/environmentalscience/teaching/msc/envdiag).

Course Director. Dr Kevin C Clemisthaw: k.clemisthaw@imperial.ac.uk Tel. 020 7594 2445

[2498-070 (2005) : 74]
The Department of Materials has available a number of fully funded 3-year studentships, sponsored by industry and/or the EPSRC, starting in October 2005, for postgraduate research leading to a DPhil qualification. Each studentship will pay the holder a stipend of at least £12,000 p.a. Eligibility for these projects varies according to the applicant’s country of legal residence - details are given on the website referenced below.

- Studies of advanced electronic materials with a pulsed laser 3-D atom probe (Profs A Cerezo and GDW Smith, EPSRC Project Studentship)
- Processing and properties of nanocomposite dielectric films (Prof PS Grant, Rolls Royce-EPSRC Industrial CASE Studentship)
- Dislocation dynamics - modelling of flow and fracture in fusion reactor materials (Dr SG Roberts, EPSRC Project Studentship)
- Kinetic Monte-Carlo modelling of microstructure evolution in fusion reactor materials (Drs SL Dudarev and SG Roberts, EPSRC Project Studentship)
- Electron microscopy of materials for fusion reactors (Dr ML Jenkins, UKAEA Culham funded Studentship)
- NanoSIMS analysis in biological materials (Prof CRM Grovenor, EPSRC Project Studentship)
- Quantum computation theory (Dr SC Benjamin, EPSRC Studentship)
- Micromechanics and fatigue crack initiation (Drs M Wilkinson and F Dunne, EPSRC Project Studentship).

Full details of these and other projects available in the Department may be found at the website [www.materials.ox.ac.uk/postgraduate](http://www.materials.ox.ac.uk/postgraduate)

The University of Oxford operates a ‘Gathered Field’ application process and information on how to apply is given at [www.admin.ox.ac.uk/gsp](http://www.admin.ox.ac.uk/gsp). The closing dates for the final two gathered fields for entry in October 2005 are 27th May 2005 and 5th August 2005 (please note: we are currently processing applicants from the previous gathered field and it is possible that some of the studentships listed above will no longer be available for new applicants - our website will be updated accordingly).

For further information please contact the Graduate Studies Secretary, Department of Materials, University of Oxford, Parks Road, Oxford OX1 3PH, UK; tel. (01865) 283101; fax: (01865) 273789; e-mail: graduate.studies@materials.ox.ac.uk

The University of Oxford exists to promote excellence in education and research, and is an equal opportunities employer.

So much more...
An MSc qualification from Cranfield University means a whole lot more than other degrees. Check out our courses in:
Bioinformatics
Clinical Research
Environmental Diagnostics
Environmental Management for Business
Geographical Information Management
Land Reclamation and Restoration
Medical Diagnostics
Medical Technology Regulatory Affairs
Molecular Medicine
Natural Resource Management
Soil Management
Translational Medicine
Water Management
If you would like to speak to a current student, discover which scholarships are available for 2005 or require any other information contact: Carla Watson, Student Enquiries, Cranfield University, Silsoe, Bedford MK45 4DT quoting ref no: NS/07/05.
E: StudentEnquiries.silsoe@cranfield.ac.uk

SERIOUS ABOUT JOBS.
[2502-001 (2005) : 15]
Our aim is to improve the environment for the people of England and Wales. That means tackling and dealing with issues as diverse as water resources, flood risk, agriculture, pollution and nuclear regulation. The work we do has an enormous impact on the state of the environment, and what we do today will impact directly on the environment of tomorrow. To help us continue to achieve our aims, we have two crucial roles that are as challenging and stimulating as they are rewarding.

**Project Manager**  
**Water Resources Development**  
Wallingford; Oxon £31,100 - £37,300  
As a result of increasing housing and demands on water resources, we are working to ensure that any new resource developments in the Upper Thames benefit the environment, as well as water company customers. Working closely with internal and external stakeholders, your role will be to provide input into the proposals for the development of the water resource at a stage where we can have a positive influence on the way it is approached - keeping the good of the environment at the forefront of your mind. Developing and promoting our position externally, while liaising with our own specialists, you’ll act as an ‘ambassador’ for us, as well as managing our overall work on this subject.  
With significant work experience and a relevant degree or equivalent, you’ll need thorough knowledge of water resources, but equally important will be the ability to negotiate effectively with external partners, to influence their decisions and outcomes. You’ll need sound, relevant technical knowledge, and may well be currently working with a water company, environmental consultancy or a similar private or public organisation.

**Environmental Projects Scientist**  
**Bath • £19,300 - £21,900**  
Working in our Monitoring Techniques Team Science Group, you’ll work with the Senior Environmental Projects Scientist to develop innovative monitoring/surveillance systems, including remote monitoring technology, and demonstrate their practical potential. Undertaking extensive national travel, you’ll spend much of your time engaged in the field - deploying/maintaining trial and prototype systems. Performing scientific investigations that will impact on our projects and the commercial market will also be part of your role.  
Educated to degree level, with around three years’ relevant experience, you will need a wide knowledge of integrated systems for monitoring land, air and water environments. With a broad competence in a range of technical disciplines, including monitoring techniques, computing and electronics, you’ll be able to produce concise scientific reports and manuals. Ideally, you’ll also have small boat operation experience.  
For both roles, a high degree of motivation, initiative, teamwork and problem-solving skills will be essential.  
We offer a great benefits package including contributory final salary pension scheme (with life cover), excellent training and development opportunities, generous holidays, flexible working and family friendly policies.  
For a full information pack and to apply for either role, please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs) If you don’t have internet access, please call Becky Rayner on 0118 953 5669 (24-hour answerphone) for the Project Manager role, quoting reference TWEMTO9/NS. For the Environmental Projects Scientist role, please call Jason Curtis on 0117 914 2743 or email: jason.curtis@environment-agency.gov.uk quoting reference SC0085. Closing date for applications is 16 June 2005.  
The Environment Agency is committed to equality of opportunity. We aim to reflect the diversity of the community and encourage applications from minority ethnic and disabled groups and women, as they are underrepresented among our staff.
Get excited...
Mayne Manufacturing Solutions at Aston University

Mayne Manufacturing Solutions, a subsidiary of Mayne Pharma Plc, is one of the leading suppliers of aseptically manufactured products to the NHS. Building on successful delivery of services over the last four years, we are now establishing a dedicated manufacturing unit which will double our capacity for providing affordable, cytotoxic, anti-infective and pain control ready-to-use products. Mayne Pharma is committed to the continuing development of aseptic specials manufacture in the UK. In addition to state-of-the-art isolator and gas sanitisation technology of the brand new Aston University site, we have earmarked significant resources for further investment.

We are now recruiting the rest of our team for the successful commissioning, validation, launch and operation of this model unit. With production scheduled to begin in September 2005, it's time to seize your opportunity.

**Quality Assurance Pharmacist**
You will work closely with the Quality Assurance and Production Managers in a full range of Quality Assurance activities including product release, process validation and documentation approval. You will ensure efficient service delivery and ensure that staff comply with Health & Safety regulations, in particular, COSHH. There will be an opportunity to contribute to research and development projects.

**Lead Quality Assurance Technician**
You will organise the laboratory activities and clean room environmental monitoring plus equipment maintenance and validation. Responsible to the Quality Assurance Manager, you will be an integral part of the team, working closely with production staff. You will be involved with the development and delivery of training packages and research projects towards competency and evidence based practice. You will have at least two years' relevant experience and have worked within a GMP environment.

**Aseptic Production Operators**
As an operator your primary role will be the aseptic preparation of injections using isolator technology. Operators will participate in a rotation programme to experience a wide variety of production responsibilities; your duties will include environmental monitoring, batch documentation, specialist cleaning and stock control. You will need to be a flexible and versatile team worker. Computer skills are desirable but pharmaceutical qualifications and experience are not essential. Flexibility is a key requirement for all of these posts. To be successful you will need to be a hard working and enthusiastic individual, with a commitment to continuing professional development.

Salaries are according to experience and the role. In addition to competitive salaries and excellent benefits, we offer high quality training in a supportive team culture that recognises achievement. To register your interest, please send your CV with a covering letter, including details of your salary, to Debbie Gillespie, Human Resources Manager, Mayne Pharma Plc, Queensway, Leamington Spa CV31 3RW or email: debbie.gillespie@uk.maynepharma.com
Closing date: 17 June 2005.

mayne Manufacturing Solutions
[2502-003 (2005) : 55]
Department for Transport

**Science and Technology Adviser – Transport Security**

£27,785 - £31,573 pa

This is your chance to use your specialist scientific knowledge and skills to improve the security of the travelling public. As a part of the Department for Transports Transport Security and Contingencies Directorate (TRANSEC), you will influence not only UK transport security policy, but also international security considerations.

Based in the Victoria and Westminster area, but working throughout the UK, you will lead projects that focus on optimising security processes and making effective use of emerging technologies. You will work closely with the transport industries, research organisations and equipment manufacturers to guide research and development initiatives and to conduct operational evaluations of the latest equipment and techniques.

Educated to a minimum of degree level in physics, chemistry or related discipline plus two years' relevant experience, or a minimum of eight years' relevant experience, you will be marked out by your strong analytical, prioritisation and project management skills. Your broad interest in science and technology will be complemented by the ability to communicate clearly and enthusiastically at all levels.

The successful applicant will be required to undergo security vetting before taking up the post.

For an application pack, please contact Tracey Lambert at the Department for Transport on 020 7944 2413 or email tracey.lambert@dft.gsi.gov.uk

Closing date for applications is 5.30pm, Thursday 23 June 2005.

The Department for Transport values equality and diversity in employment and a socially inclusive transport system.

**POSITIVE ABOUT DISABLED PEOPLE**

[2502-004 (2005) : 55]
At smith&nephew wound management we focus on chronic wounds. Our technology helps heal tissue, reduce pain and give people back their lives.

This is your chance to play a key role in our Statistics and Data Management team, which provides support to a broad range of research and commercial projects within our successful Wound Management business.

**Statistical Programmer** £ 25,000 - £33,000, Hull.
In particular you will develop SAS programs for the data management and statistical reporting of clinical studies. You will also provide training and advice to colleagues within the team.
Educated to at least BSc level, you will have excellent programming ability including advanced SAS BASE skills and ideally knowledge of SAS Macro. Ideally you will have industry experience of SAS systems development. Recent graduates are also encouraged to apply.

**Statistician**
Temporary Contract £25,000 - £33,000, Hull
We’re looking for an individual with the expertise to influence a range of projects in clinical and pre clinical research. As well as consulting on study design, you will also write study protocol analysis plans and analyse and report results.
With at least a BSc in Statistics, you will ideally have industry experience which includes clinical trials and SAS programming. Recent graduates are also encouraged to apply.
To apply please send your CV to Helen Watts, HR Manager, Innovation Services, Smith & Nephew Medical, 101 Hessle Road, Hull HU3 2BN,
[www.smith-nephew.com](http://www.smith-nephew.com)
Development Chemist
Tracerco, Billingham, Cleveland

Salary commensurate with qualifications and experience (£25-35k), plus benefits package consistent with a top international company: profit related bonus, final salary pension, company share-save scheme.

Tracerco is part of Johnson Matthey PLC, a UK multi-national FTSE 100 company. A truly international business in its own right, Tracerco delivers a range of process diagnostic services, specialist measurement solutions and sophisticated taggart products to the global process industry.

Formed over 40 years ago, Tracerco has established a strong reputation for customer service across its international client base. With over 120 highly trained and experienced personnel, Tracerco is focused on adding value throughout the whole hydrocarbon chain - from reservoir optimisation through to fuel brand protection solutions.

The Tracer Technology Centre provides Analytical and Product Development support to the global Tracerco business, applying a diverse range of laboratory based and portable technologies including GC, MS, ICP/MS, Fluorescence Spectroscopy, HPLC and many others.

The centre has a vacancy for an experienced analytical chemist / biochemist to support current analytical programmes and to assist in the development of new chemical tracer techniques which can be applied within the oil and gas supply chain.

Key requirements:
• Degree in Chemistry or Biochemistry.
• Demonstrable experience of analytical technologies.
• Minimum of 5 years relevant industrial experience.
• Highly self-motivated and innovative.
• Willing to travel with possible short-term work off-shore.
• Strong interpersonal and communication skills.

Please send CV’s including current salary details to Ms Sue Magson at recruitment.tracerco@matthey.com. Please quote vacancy reference no.: SM/DC_01. Applicants are encouraged to include details of relevant past experience and achievements. Once cv’s are received, applicants will be asked to complete an application form
Closing date: Friday, 17th June 2005

Johnson Matthey Catalysts
THE QUEEN’S AWARDS FOR ENTERPRISE: INTERNATIONAL ENTERPRISE 2005
[2502-006 (2005) : 56]
East Malling Research is the principal UK contractor for horticultural research and development in the perennial crop sector, with an increasing interest in the complementary areas of environment and landscape research. With a 90-year history of technology and knowledge transfer in this field, East Malling Research is a registered charity, operates from two sites in Kent and employs 100 staff. East Malling Research currently has a vacancy for an:

**Entomologist**

An Entomologist is required to join a research team at EMR to assist with and take responsibility for aspects of applied research and development on arthropod pest control and spray application to fruit crops in the UK. The work involves scientific investigation of the biology, chemical ecology, crop damage assessment and methods and biological, biotechnological and chemical control of pests of fruit crops and their natural enemies, the development and evaluation of Integrated Pest Management programmes and safer, more efficient methods of spray application.

Qualifications: An honours degree in Applied Biology, Biological Sciences or a related subject. Previous experience in relevant laboratory and field work is required. An MSc or PhD and/or experience of horticulture or agriculture would be advantageous. Driving licence essential.

Salary will be in the range £17,613 - £25,767 dependent on qualifications and experience. Benefits include a final salary pension scheme and flexible working hours.

For an application pack please ring 01732-523718 or send your details to recruitment@emr.ac.uk

Closing date: 17 June 2005

[2502-007 (2005) : 56]
MAKE A VISIBLE DIFFERENCE TO OUR CLINICAL PLANNING.

Competitive salaries & benefits - Slough

UCB and Celltech have come together to form one of the world's leading biopharmaceutical players, specialising in CNS, inflammation, immunology and oncology. Our merger has led to a considerable expansion of our drug pipeline, making this an extremely exciting time to join us.

Both of these newly created roles sit within Global Clinical Planning, part of our Development Business Operations and Strategy department. In this critical clinical development area, we devise the commercial strategies that enable us to prepare drug candidates for Phase I-IV trials. As such, you will have the chance to play an important and visible role in our strategic decision-making.

Clinical Drug Supply Coordinator

You will play a key advisory role to our trial managers, ensuring that their preferred protocols comply with regulatory requirements and contributing to the design of the Investigational Medicinal Product. As such, your input into labelling, packaging design and instructions for use will help guarantee that Investigational Medicinal Products are patient- and investigator-friendly. Plus, as the primary contact on all drug supply matters, you will liaise with other parts of the business on a global basis to forecast and achieve the timely, high-quality, cost-effective supply of products for trials.

Your three or so years in clinical development and/or clinical supplies will have given you a keen familiarity with GCP and European and international IMP legal requirements, ideally along with experience of working with NBES. A highly analytical thinker, preferably with a Masters degree, you must have strong computer literacy and be comfortable working under pressure. Ref: SL232

Clinical Planner

Working with our Clinical Trial Management System, you will ensure that for each phase 1-IV trial conducted on a global basis, a robust project plan is managed and maintained. This will involve defining the initial framework and working with project and clinical leaders to ensure all relevant information is input accurately. Additionally, you will provide operational support and training to users and have the creativity and initiative to suggest improvements to the system.

You will have gained a general understanding of the pharmaceutical industry from your three to five years in clinical development. In addition to sound IT knowledge (Excel, Access, databases), you will have the interpersonal skills to train and support colleagues at all levels and be an effective problem solver. Ref: SL196

For your chance to make a real and highly visible impact on a major pharmaceutical player, send your CV and covering letter, quoting the appropriate reference to: HR Administrator, UCB Celltech, 208 Bath Road, Slough, Berkshire SL1 3WE. Email: sloughrecruitment@ucb-group.com

www.ucb-group.com
[2502-008 (2005) : 57]
Elsevier is part of the Reed Elsevier Group. Young, progressive and rapidly expanding, we are a major name in global health sciences and science and technology information, as well as a leading innovator in online publishing.

ELSEVIER

THE LANCET Neurology
The Lancet Neurology is a monthly neurology journal aimed at all professionals working in neurology, either in clinical practice or in research. The content includes peer reviewed articles, news, commentaries, editorials and other material relevant to a broad international readership.

Due to the expansion of the journal to include primary research, applications are being invited for the position of Senior Editor.

You must have a degree in medicine or a PhD in a neurology or neuroscience-related subject. Research experience in a clinical setting and previous editorial experience would be a distinct advantage. Responsibilities will include arranging peer review, commissioning, writing, editing and other responsibilities of producing a print and web journal. Some foreign travel to attend conferences will be required.

This is an exciting opportunity to be involved at the forefront of neurology publishing as the journal expands to incorporate primary research under the banner of one of the world's most prestigious medical journals.

To find out more, contact the Editor, Rebecca Love (Tel +44 (0)20 7424 4957; email rebecca.love@lancet.com). To apply, please send your full CV, together with a letter explaining why you feel you are suitable for the job to: Rebecca Love, The Lancet Neurology, 32 Jamestown Road, London NW1 7BY, UK.

The closing date for applications is Monday, 13th June 2005.

[2502-009 (2005) : 57]
**Senior Scientists with Business Flair**

**Occupational Health/Health Sector**

Posts are fixed term for 3 years (with the possibility of extension or permanency)

c.£30,000 Buxton, Derbyshire

The Health and Safety Laboratory (HSL) enjoys a national and international reputation as a centre of excellence for research, incident investigation and recommendations into safe and healthy workplace practice. The work of the laboratory is varied and challenging, and directly contributes to improving the health and safety of working life in the UK.

The Health and Safety Executive, our parent body, is our primary customer but as a business focused organisation, we are increasingly developing our customer base throughout the public sector and private industry.

We are looking for dynamic and highly motivated individuals with a scientific/healthcare background, who can develop and deliver business in the occupational health and health sectors. In particular, we are looking individuals to help us develop business in the following areas:

- Environmental Microbiology: including on site assessment and microbiology consultancy.
- Occupational Health Services: including development of health surveillance, hand arm vibration assessments and biological monitoring for commercial clients.
- Other Specialist Services: including epidemiology, statistics and toxicology skills.

Whatever your background, you should be able to operate in a commercial environment to develop scientific solutions to real life problems.

- A good degree in a relevant discipline and at least four years’ relevant experience.
- A proven track record of developing and delivering business in a commercial environment (possibly from time spent in consultancy).
- Excellent communication skills.
- Ability to work with others.
- A clear commitment to offering high standards of professional service.

As a growing laboratory, with a secure and expanding customer base, we can offer a first-class range of benefits including the choice between an excellent public sector final salary pension scheme and a choice stakeholder pension. Subject to business need limited financial assistance may be available towards relocation.

For an application pack (quoting ref BD02) please contact Alistair Walsh, Health and Safety Laboratory, Harpur Hill, Buxton, Derbyshire SK17 9JN, tel: 01298 218626, fax: 01298 218619, email: alistair.walsh@hsl.gov.uk or visit our website.

Closing date: 23 June 2005.

New Product Developer
£30,000 p.a. West Yorkshire

We are small, highly motivated group working for, but at arms length from, a multinational food business. Our objective is to develop new high science products and services for pets.

We now need a flexible like-minded individual to join our group, to develop pet care products from concept to readiness for manufacture. The jobholder will:

• Investigate and develop new and existing product formats that provide pet owners with an easy and enjoyable way of administering functional active ingredients.
• Evaluate product performance, for example stability and palatability.
• Take responsibility for the production of trial batches of product.

We are looking for candidates educated to degree or higher level in food science or a related science area with at least 2 years experience in developing food products. You need to be a creative problem solver with a passion for achieving results through a well-organised approach. The position gives the job holder the opportunity to make a real difference in an exciting new business area.

The position will be based in a modern manufacturing unit with excellent pilot plant facilities in West Yorkshire.

Salary (dependent on experience) will be negotiable up to £30,000 p.a.

If you wish to apply send your CV to rogerblanshard@ycs-net.com

Closing date June 18th

[2502-011 (2005) : 58]
CC
Campden & Chorleywood Food Research Association Group
Opportunities at CCFRA
We are a major independent food research organisation, specialising in scientific and technical research, development, contract and advisory services tailored to the needs of industry world-wide.
We have the following vacancy:

**Biochemist - Food Applications**
A biochemist/chemist is being sought to join our Biochemistry Section to undertake research work and liaise with clients. Suitable candidates are likely to have postgraduate qualifications or experience in a food research environment in which they will have proven scientific authorship and research management skills. If you are interested in applying your knowledge to new and challenging situations, then this will appeal to you.

The Biochemistry Section undertakes research and contract activities to support the food industry in producing safe and high quality products. This involves the use and development of enzyme assay, immunoassay, spectrophotometry and molecular biology techniques and the investigation of new techniques. An interest in the application of protein biochemistry-mass spectrometry is desirable but not essential. Current areas of research include food allergens, enzymes for time temperature integrators and molecular biology techniques for variety and species identification.

Salary will be dependent upon qualifications and experience
Excellent benefits package offered to all employees.
For an application form and job description, please contact the Personnel Department, CCFRA, Chipping Campden, Gloucestershire GL55 6LD, telephone +44(0)1386 842091, personnel@campden.co.uk See [http://www.campden.co.uk](http://www.campden.co.uk) for information on CCFRA.
Closing date: Friday 17th June 2005.

[2502-012 (2005) : 58]
Pharmaceutical Scientist
Competitive salary • final salary pension scheme • private healthcare • continuing professional development • share scheme • employee assistance programme

Abbott Laboratories Ltd, a $20 billion turnover international healthcare organisation with interests in over 130 countries and over 55,000 employees, discovers, develops, manufactures and markets innovative solutions across the spectrum of healthcare.

Based at our UK manufacturing site in North Kent, the Oral Drug Products Group, part of Global Manufacturing Science & Technology, provides the vital link between R & D and worldwide commercial manufacturing plants by ensuring the smooth transition of all new oral drug products, processes and technology. It also provides key support for currently marketed products in terms of compliance improvements, reformulation and process/method optimisations.

We are now looking for a talented individual with the ability and experience to make an immediate impact as a Pharmaceutical Scientist. As well as liaising extensively with other parts of the group, you can expect to travel internationally, both within Europe, the US, South-East Asia and the Indian subcontinent.

Working in a multi-disciplinary team, you will be involved in formulation and processing studies in support of the development and improvement of new and existing pharmaceutical products. The work will encompass early phase work at the laboratory and pilot plant scale through to full-scale technology transfers and worldwide Affiliate support.
You will need a sound scientific / technical background including significant knowledge and experience in drug product formulation development, pharmaceutical technology, process development and relevant GMPs/GLPs.

In addition to a good first degree in pharmacy or a related science (and possibly a relevant PhD) you should have proven formulation and process experience, particularly encompassing oral solid dosage forms.

Key requirements include:
• Practical experience and aptitude necessary to work with pharmaceutical manufacturing equipment and laboratory instrumentation.
• The initiative to work independently and meet defined schedules.
• Excellent interpersonal skills and an ability to operate within multidisciplinary and international teams.
• Excellent computer, written and verbal communication skills.

If you feel you have the right attributes to tackle this role please apply with a full CV, including current salary details and quoting reference number MS&T9002/05, to Moyra Hills, Senior HR Advisor, Abbott Laboratories Ltd, Queenborough, Kent ME11 5EL.
Closing date: 17 June 2005.

ABBOTT LABORATORIES
Quality Health Care Worldwide
INVESTOR IN PEOPLE
THE QUEEN’S AWARDS FOR ENTERPRISE 2005
A unique opportunity at a time of change

**Medical Writers - Licensing Division**
c£30,000 • LONDON

The Medicines and Healthcare products Regulatory Agency (MHRA), an Executive Agency of the Department of Health, is responsible for safeguarding public health by ensuring that all medicines, healthcare products and medical equipment meet the appropriate standards of safety, quality, performance and effectiveness.

The Licensing Division is responsible for the thorough evaluation of all new medical products to be authorised for the UK. It's a growing area which is why we are now looking for more experienced medical and scientific writers to help compile assessment reports and assist in related administrative tasks. Whether providing complete assessment reports for Outgoing Mutual Recognition Procedures or updating existing reports in the light of new information, you will work within tight timeframes, liaising with the European Licensing Support Unit and supporting the professional assessors as necessary. This will also involve contacting applicants on behalf of the assessors to discuss any discrepancies and conducting advisory meetings.

A graduate in an appropriate scientific discipline or with three years equivalent experience, you'll have at least two years' exposure to medical or scientific writing and editing and therefore be well used to working to deadlines. Your attention to detail and interpersonal skills should go without saying.

This is a great opportunity to gain a detailed knowledge of drug registration and European licensing procedures at a time of major change within the pharmaceutical market.

Please note that the full salary range for this position is £27,528 - £40,807. The benefits package includes 30 days' holiday and civil service pension scheme.

Please contact the Human Resources Department for an application pack by emailing: hrenq@mhra.gsi.gov.uk or fax 020 7084 2522. Alternatively, write to MHRA, Market Towers, I Nine Elms Lane, London SW8 5NQ.

The closing date for applications is: 17th June 2005. [www.mhra.gov.uk](http://www.mhra.gov.uk)

As an Equal Opportunity employer the Department welcomes applications regardless of gender, race, disability or sexuality. We operate flexible working patterns within a non-smoking environment.

WORLD-CLASS DRUG DISCOVERY

Biologist and Chemist Marie Curie Fellowships Cornwall • United Kingdom

Already the world's leading pharmaceutical companies have come to our world-class research and development centre, in the beautiful heart of rural Cornwall. They come here for one reason - at Tripos we have pushed the boundaries of drug candidate discovery, with genuinely cutting-edge computer modelling and chemistry which is transforming the process with unparalleled precision. Now we are working to continue our growth. Thanks to funding under the Marie Curie Transfer of Knowledge programme, we are now looking for four exceptional scientists - from outside the UK, but within the EU.

You will help us to develop our commercial offerings to the pharmaceutical industry and implement in-vitro biological screening in-house thus increasing the scope of the research services that we offer. Perhaps you have an academic background and are now ready to move to a leading commercial organisation, or it may be that you have gained some relevant experience in industry and are now looking for increased responsibilities and opportunities to develop.

**Biologists**

You will be a biologist with at least three years' post-doctoral experience of protein kinase or GPCR assays in either an academic or industrial environment. Being responsible for the development of a new biology facility within Tripos, you will require the knowledge to both develop this facility and take an active part in the day-to-day running of the screening capability, entailing interaction with medicinal chemists and using your practical hands-on experience of appropriate biochemical and cell based assay development, and screening of compounds using robust assays.

**Chemists**

You will be a synthetic organic chemist with at least two years' post-doctoral experience in either an academic or industrial environment, with a strong background in medicinal chemistry and drug discovery. You will join one of our chemistry teams where you will work with computational and other medicinal chemists to design and synthesise novel, biologically targeted compounds as part of dynamic discovery and optimisation programmes.

For more information about these fellowships or the Marie Curie scheme, please see the website at: [http://mc-opportunities.cordis.lu/](http://mc-opportunities.cordis.lu/)

To apply please send your CV and a covering letter to Leona Marsh, Human Resources, Tripos Discovery Research Ltd, Bude-Stratton Business Park, Bude, Cornwall EX23 8LY or email tdr-jobs@tripos.com

OptiNose
DRUG DELIVERY DEVICES
Be part of a new approach to drug delivery in the heart of Wiltshire

OptiNose is a young company founded to commercialize a novel nasal drug delivery system. The technology is unparalleled in its ability to effectively deliver drugs to specific sites within the nose, whilst uniquely preventing drug distribution to the long. Our mission is to combine our patented technology with drug substances to create products with superior clinical performance. To drive our portfolio forward two new positions are being created:

**Project Co-ordinator:** With a background of 3-5 years in the industry you will be looking to move into project management. You will be a Team player, have excellent interpersonal skills, attention to detail, the ability to grasp disparate subjects and be familiar with Microsoft Project. An understanding of the activities involved in formulation and device development would be an advantage.

**Head of Clinical Operations:** With a background of 5-10 years in the pharmaceutical industry you will have already managed multiple clinical studies to successful completion. Motivated and with strong technical skills you will be able to coordinate all aspects of clinical trials from gathering medical input, protocol development, ethics submissions, monitoring the study and writing the final report.

To apply please send your CV and a cover letter specifying details of your current salary and benefits package to:
Sue Jones, OptiNose UK, Berkeley House, South Marston Park, Wiltshire SN4 9PB.

A CULTURE OF VISIBILITY... A ROLE OF REAL INFLUENCE

**Experienced Toxicologist**  
Competitive salary & benefits - Slough

Celltech and UCB have come together to form a global biopharmaceutical player, specialising in CNS, inflammation/immunology and oncology. We have fostered a unique culture in which scientists enjoy unusual levels of visibility and independence. In this role, you will be planning your own workload to tangibly shape our toxicological strategies and making presentations to senior management, while interacting with a larger team based in the UK and Belgium.

Sustained pipeline investment is now bringing new drugs close to development. You will act as the non-clinical specialist on project teams for development candidates from our existing portfolio of novel chemical and biological entities - your work may also involve defending mature products. This will entail managing all aspects of outsourced non-clinical studies including placement, monitoring and report review. Contributing to subsequent regulatory documents (such as IND, IMPD) and Clinical Investigator's Brochures, and possibly taking part in Regulatory Agency meetings, will complete your remit.

You should hold a higher life sciences degree and/or professional qualifications in toxicology, and have spent at least five years in regulatory toxicology. Experience of the complete drug development process gained within the pharmaceutical industry would be an advantage, as would some experience of safety pharmacology and DMPK.

In addition to a role of real scientific influence, you can expect an attractive remuneration package that will fully reflect the substantial contribution you will make to our business.

To apply, please send your CV and covering letter, quoting reference SL178 to: HR Administrator, UCB Celltech, 208 Bath Road, Slough, Berkshire SL1 3WE. Email: sloughrecruitment@ucb-group.com

The North West London Hospitals
NHS Trust
NHS
DEPARTMENT OF CLINICAL BIOCHEMISTRY

Trainee Biomedical Scientist
£15,971 p.a. inc.

The Department of Clinical Biochemistry is looking for Trainee Biomedical Scientists to join this dynamic and forward thinking department, which has both CPA and HPC accreditation. The Trust serves a local population of approximately 0.8 million and we provide a service to the Hospitals, GP's through Primary Care Trusts, Community Trusts, and other clients including epidemiology work, and receives approximately 425,000 requests per year. The Department has been selected by the Department of Health as an exemplar site of a modern pathology service.

The Department has two laboratories, one at Northwick Park Hospital and one at Central Middlesex Hospital. Both laboratories were refurbished in 2002 to provide an air-conditioned state-of-the-art environment with modern analytical equipment including a Tandem Mass Spectrometer and a new laboratory computer system. The successful candidates will have the opportunity to train and work in all sections of this vibrant department.

The successful applicants will have completed a BSc course in Biomedical Sciences or a related subject recognised by the Health Professions Council (HPC). They will be an enthusiastic well-motivated scientists with excellent communication skills who want to be part of our thriving team who provide essential support to our medical colleagues in their treatment of patients. Training is a priority to us. During your training period, you will receive the necessary tuition, experience and resources in order for you to obtain the HPC/IBMS Competency Certificate for a Biomedical Scientist. On completion of training, we actively encourage participation in further educational studies and will offer practical opportunities to progress your career tailored to your individual needs. The Trust provides additional in-house training with a variety of management and skills based courses available to all staff.

The North West London Hospitals NHS Trust is based in Brent and Harrow. Tube and British Rail stations are within easy walking distance of the Hospitals. Central London areas such as Camden, Covent Garden and Soho can be reached by a quick tube journey. Harrow itself has an extensive shopping and social culture. A parking scheme for staff is in operation within the Hospitals and the Trust runs a Nursery based at Northwick Park, taking children between the ages of six months and five years old. A similar nursery facility is planned to open on the Central Middlesex site. On site accommodation in modern flat share units may be available.

Successful candidates will have the opportunity to earn additional income by working supervised sessions in the early evening and weekends.

For further information or to arrange an informal visit, please contact Tim Hill on 020 8453 2293, email: tim.hill@nwlh.nhs.uk, Rory Browne on 020 8869 2123, email: rory.browne@nwlh.nhs.uk or Bert Ram on 020 8869 2123, email: bert.ram@nwlh.nhs.uk

Please call 0870 787 6857 to receive an application pack.

Please return your completed application form to the Human Resources Department, Northwick Park Hospital, Watford Road, Harrow, Middlesex HA1 3UJ

The Trust operates a no smoking policy. The Trust is committed to equal opportunities, Investors in People, IWL and offers a range of family friendly policies.

MRC National Institute for Medical Research

RESEARCH SUPPORT OPPORTUNITIES

Division of Mycobacterial Research     Ref: IMR/4578
http://www.nimr.mrc.ac.uk/mycobact/
Research Assistant position to work in a team studying the pathogenesis of Mycobacterium tuberculosis using a molecular genetic approach. You will provide a direct contribution to the scientific output of the group, participating in the design and execution of experiments investigating transcriptional regulation and the role of DNA repair in the pathogenesis of M. tuberculosis. In addition, you will be jointly responsible for the maintenance of a Category 3 containment laboratory.
You will possess a degree in Microbiology/Molecular Biology, with several years experience in the application of a range of relevant molecular techniques to the study of bacterial systems. Experience with mycobacteria and/or working in a containment laboratory would be an advantage.

MRC Biomedical NMR Centre     Ref: NMR/0677
http://www.nmrcentre.mrc.ac.uk
The Centre is a well-equipped multi-user NMR facility, focussed mainly on studies of biological macromolecules. In this Research Assistant position you will provide high-level advice and support to our users and will be responsible for day-to-day management of two of the Centre's four spectrometers. You will be expected to participate in research projects carried out at the Centre and to contribute to the general operation of the Centre.
You should have a degree or further qualifications in an appropriate scientific discipline and will have postgraduate experience in biological NMR.

Division of Immunoregulation     Ref: IIR/0312
http://www.nimr.mrc.ac.uk/immunoreg/
Senior Research Technician position to work in a team involved in understanding the regulation of the immune system by means of using mouse models and cells obtained from wild type or genetically modified mice.
You will have a biological sciences or veterinary degree possibly with further qualifications in an appropriate scientific discipline and will have experience/ working knowledge in mouse handling and experimental procedures, mouse breeding and genetics, a strong working knowledge of Animal (Scientific Procedures) Act 1986 or equivalent. Some knowledge in molecular biology and immunology techniques is preferred.
In addition to the particular qualifications and skills requirements set out above, for all positions good interpersonal and communications skills and the ability to work well within a team environment are essential.
Starting salary range for these permanent MRC Band 4 posts is from £25,858 to £31,343 inclusive of Location Allowance. MRC Pension Scheme available.
Application forms and full job descriptions can be downloaded from the Institute web site at: www.nimr.mrc.ac.uk/jobs. Alternatively, call 020 8816 2530, or write to the Personnel Office, National Institute for Medical Research, The Ridgeway Mill Hill, London NW7 1AA, quoting the appropriate reference number
The closing date for completed applications is 24th June 2005. The MRC is an Equal Opportunities Employer
CELL BIOLOGIST
Cell biologist/embryologist to expand preliminary positive studies on equine embryonic stem cells and to lead research on their characterisation and development to therapeutic application in horses. A chance to join a small, enthusiastic research group with superior purpose-built laboratory and horse handling facilities in Newmarket that would ideally suit a recent post-doc with equine interests.

ORGANISATION FOR THE PROHIBITION OF CHEMICAL WEAPONS

The Organisation for the Prohibition of Chemical Weapons (OPCW) is an international disarmament and non-proliferation organisation based in The Hague, the Netherlands. It has the objective of eliminating all existing stocks of chemical weapons and production capabilities; preventing use, development, production or transfers of such weapons under strict monitoring including on-site inspections. The OPCW was established over seven years ago and has currently 168 Member States. The OPCW is a non-career organisation with limited staff tenure. The total length of service for Professional staff shall not exceed 7 years.

OPCW is offering an attractive tax-free annual remuneration between US$ 78,507 to US$ 73,281 for an Inspector (Analytical Chemist) P-3 on a fixed-term contract of three years with a six-month probationary period who will perform the following duties:
1. Plans inspections activities by:
   • Assisting in pre-inspection planning, through review and analysis of available information;
   • Preparing list of analytical equipment for inspection and ensure that equipment is functioning properly;
   • Contributing to the sampling and analysis aspects of the pre-inspection plan;
   • Supporting inspection preparations in relation to health and safety, logistical and administrative/confidentially related matters;
2. Performs inspection activities by:
   • Reviewing the inspected State Party's analytical documentation in relation to inspections;
   • Observing sample preparation and sample analysis performed by State Party's personnel;
   • Assessing the capabilities of the State Party's analytical equipment;
   • Verifying the correctness of inspected State Party's sample collection and analysis procedures and results
   • Collecting and preparing samples for sample analysis, using inspection team (IT) equipment;
   • Performing sample preparation analysis, using IT or facility equipment;
   • Reporting on all aspects of sampling and analysis according to QA procedures and Chain of Custody;
   • Assisting in verifying that the State Party's safety monitoring equipment is functioning properly;
3. Reports on inspection activities by:
   • Preparing inspection debriefings;
   • Contributing to the writing of final inspection reports in the English language;
   • Maintaining confidentiality in relation to declaration and inspection related information;
4. Performs other duties as required.

Education, Knowledge and Experience
• A university degree (BS) or equivalent in Chemistry from a recognised institution;
• Proven knowledge and skills and hands-on experience in the use of sophisticated analytical instruments, in particular, GC-MS and FTIR;
• Good interpersonal skills;
• In addition, knowledge and proven skills in the following areas:
  a. Ability to communicate effectively, both verbally and report writing;
  b. Computer literacy in particular proficiency in MS Word and Excel;
  c. Adaptability and fitness for frequent travel and working in diverse environments;
• Personal qualities should include the ability to work harmoniously in a multi-cultural environment;
• Minimum seven years of relevant experience in a chemical laboratory either in an industry or a military environment.

Language
Fluency in verbal and written English is essential. Good working knowledge of one of the other official languages (Arabic, Chinese, French, Russian, and Spanish) is desirable.
The age limit for candidates is 55. All candidates aged between 50-55 will be required to undergo a special fitness test when recruited. Applicants must undergo a pre-employment physical to ensure adequate fitness level to wear respirators and Fully Encapsulated Protective Ensemble.
Detailed information about this vacancy, knowledge and skills requirements, as well as the appropriate application form is available on the OPCW website http://www.opcw.org. Only candidates who are citizens of a Member State of the Organisation will be considered for employment by the OPCW, which is an equal opportunity employer. Please refer to our web site for an up-to-date list of current Member States. OPCW encourages female candidates to submit their applications. When applying for the vacancy, please indicate where you have seen the advertisement: Closing date: 7 June 2005. [2502-027 (2005) : 63]

The BSDA, which represents the collective interests of the UK soft drinks industry, including fruit juices and bottled waters, is seeking a Technical Officer to support and take forward its work on technical, scientific and regulatory issues.

Reporting to the Technical and Environmental Executives, the ideal candidate will be a new graduate in Food Science or similar subject. Excellent administrative and communication skills are essential for managing a broad range of issues and projects and for liaising with Member companies and Government departments.

For further information on BSDA click on www.britishsoftdrinks.com

Written application with CV to be sent to:
British Soft Drinks Association Limited
20-22 Stukeley Street, London WC2B 5LR
Or email: bsda@britishsoftdrinks.com

Closing Date for applications 10 June 2005

[2502-033 (2005) : 65]
IPSEN
Innovation for patient care
Ipsen Biopharm
Wrexham, North Wales

Present in over 110 countries, with a total staff of nearly 4000, Ipsen recorded sales close to £800 million in 2004. The Group develops products in three targeted therapeutic areas: oncology, endocrinology, and neuromuscular disorders and is also engaged in developing certain biological derived products.

Ipsen have recently invested £4.5 million into a new "state of the art" QC laboratory facility at the Wrexham site, which will be occupied from the 2nd Quarter 2006, and will require technical transfer of all QC activities. We are now looking to recruit for the following positions:

**QC Microbiology Operations Manager**
Competitive Package
We require a person to develop and manage a fully functional and compliant Microbiology Team engaged in a range of microbiological testing. Technical responsibilities will include environmental monitoring of site aseptic facilities, utilities testing, in process and finished product testing to include sterility and endotoxin testing. You will also be involved in isolate identification, raw materials testing and site project activities requiring microbiology input.

With a degree in Microbiology or equivalent, you must have at least six years' experience in a Pharmaceutical Microbiology Laboratory, sound understanding of cGMP/GCLP and current regulatory FDA/MHRA requirements including development and implementation of new methodology. You will also possess demonstrable people management skills.

**QC Technical Support Manager**
Competitive Package
Further to the expansion of our new laboratory facilities we are looking to recruit for this new position. This person will provide technical support to the QC Analytical function for the introduction of novel or updated assays used in process of final product testing. This will involve the review and update of current methodology in accordance with change control procedures, the introduction of novel assay methodology post development and the management of biological assays performed by contract testing facilities. A key responsibility will be the management of the stability programme. You will possess a degree in Biochemistry/Pharmacology or equivalent, 10 years' experience of Pharmaceutical or GLP regulated industry, six years' experience in bioassay testing/development, knowledge of aseptic processing with expertise in the aspects of QC analytical control. Statistical experience in bioassay assessment would be advantageous.

**GMP Systems Specialist**
Competitive Package
To apply for this newly created position you will be able to take a lead role in optimising cGMP systems that include, but are not limited to, change control, incident investigations, corrective actions, recall, complaints in alignment with MHRA, FDA and other applicable international regulations and guidelines while fostering consistency of quality systems within the Ipsen Group. You will be degree qualified in a science discipline, and possess 5-10 years' QA experience in the Pharmaceutical industry in positions of increasing breadth and responsibility. You will also have an in-depth understanding of Quality Management Systems and a sound understanding of cGMP and current regulatory FDA/MHRA requirements gained preferably in a sterile manufacturing environment.

To be considered for all positions you will need to be a self-motivated person with the ability to identify the key issues within a complex environment and provide clear solutions to them. You will possess excellent man management skills and enjoy working as part of a team committed to exacting high standards.
You will appreciate the commercial world and how the application of your experience makes a valuable contribution.

To apply, please send your full CV stating current salary and benefits package, to:
The NR Department, Ipsen Biopharm Ltd, Ash Road, Wrexham Industrial Estate, Wrexham LL13 9UF
or alternatively email your application to wrexham.recruitment@ipsen.com
Closing Date: 3 June 2005

NHS
HELP DELIVER A WORLD CLASS SERVICE

Laboratory Manager
• Components Development • Brentwood, Essex
• £36,593 - £39,577 pa plus London ETM allowance

Amazing people
Located just outside the M25 in Essex, the Components Development Laboratory is the key site within the National Blood Service for scientific evaluation of new technologies and techniques in blood component production.

Your role will be to ensure that the laboratory continues to deliver work of the highest quality to fulfil our national objectives of improving the quality and safety of blood components for transfusion. An excellent Scientist and Leader, you'll be able to assist, advise and motivate your research team of seven Scientists to help them achieve their full potential whilst delivering key development projects.

As Manager of a small research and development team, you will have good project management skills and be able to demonstrate excellent skills in experimental design. Summarising, interpreting, reporting and presenting data will be a major part of your role. We'll also be looking for you to be proactive in making continuous improvements to the laboratory's processes and functions, within agreed frameworks. Above all, we need somebody who shares our commitment to the core values of the laboratory, from delivering high quality services to providing a positive learning and working environment.

To be considered you'll need a relevant PhD and at least five years' post-graduate experience in a similar laboratory environment, including acting in a supervisory capacity. With excellent organisational skills and attention to detail, you'll be experienced in haematology techniques such as flow cytometry and immunoassays.

For an informal discussion in relation to this position, please contact Dr Rebecca Cardigan, National Head of Components Development on 0122 354 8085 or 0771 144 7247.

In return for your valued skills we can offer a great range of benefits such as dynamic working environment, modern laboratories together with a competitive salary and an excellent pension scheme. For an application form and job description, please telephone 0114 203 4916 (24 hr answering machine) quoting the reference number 905-E1215. You can also apply online at www.blood.co.uk/careers and enter 905-E1215 in the search box.

NATIONAL BLOOD SERVICE
[2502-035 (2005) : 67]
GV Instruments
Reflecting 25 years experience in Mass Spectrometry

GV Instruments Ltd is entering an exciting growth period and we require additional technical personnel for both the UK and worldwide.

We are involved in the development, manufacture, sale and support of a wide range of mass spectrometers and our products cover a diverse range of applications within the scientific community.

**Test and Installation Engineers**
We require highly motivated Engineers for the Test and Installation of our innovative range of mass spectrometers.

You will be based at our factory in Manchester working within a dynamic, supportive team and enjoy the benefits of worldwide travel. The ability to communicate at all levels, whilst in the factory and with customers on-site, is key.

Ideally, you will have a degree in a physical science or engineering subject and be able to demonstrate a methodical approach to problem solving. Experience in the field of Mass Spectrometry and related techniques, such as vacuum technology or other scientific instrumentation, would be an advantage although not essential.

GV Instruments Ltd offers a varied, stimulating work environment, competitive salary, pension and 25 days annual holiday.

Please apply with a CV and covering letter to jobs@gvinstruments.co.uk or to Paul Wheeler, GV Instruments, Crewe Road, Manchester, M23 9BE.

Booking deadline 10 June 10:30 am.

New Scientist Jobs

[2502-037 (2005) : 67]
UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD
Department of Engineering Science

Research Assistant
"Hardware-in-the-loop" simulation for unmanned air vehicles
Starting salary: £19,460 - £23,643 p.a.

This project aims to develop a methodology and a hardware demonstrator applicable to the design and validation of control systems for unmanned air vehicles. The successful candidate will work on the development of a low-cost wind tunnel as the basis of a "hardware-in-the-loop" demonstrator for unmanned air vehicles. This position is available for 2 years.

The successful candidate will have a good first degree in engineering or physics. Previous experience in modelling or simulation of physical systems and carrying out experimental work and a good understanding of classical control theory are essential. A PhD, or equivalent experience, together with experience in instrumentation design, real-time control (in particular implementation using Dspace, QNX/Opal-RT or any POSIX-compliant RT extension are desirable.

Further particulars may be obtained from Mr C J Scotcher, The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ to whom written applications should be made enclosing a curriculum vitae and the names and addresses of two referees.
Please quote DF05037 in all correspondence.
The closing date for applications is 24th June 2005.
The University is an Equal Opportunities Employer.
[2502-038 (2005) : 68]
The Institute is seeking a well-motivated and forward-thinking individual to join an established team at the forefront of Equine and Animal Sciences teaching and research. You will be expected to contribute to the teaching of Equine and Animal Sciences and to further develop the research profile of the Institute in relation to Equine and Animal Sciences. You should have an established research record, preferably with a higher degree, a desire to further develop your research activities and an enthusiasm for contemporary approaches to learning and teaching.

The appointment will commence on 1 September 2005 or as soon as possible thereafter. Informal enquiries may be made to Professor Jamie Newbold on 01970 622242 or e-mail cjin@aber.ac.uk
Ref: IRS/05/07. Closing date: 24 June 2005.

For further details and an application form, please quote the reference and go to www.aber.ac.uk/personnel/vacancies.html or contact Human Resources. Tel: 01970 621586.
Email: personnel@aber.ac.uk

Working towards Equal Opportunities.
POSITIVE ABOUT DISABLED PEOPLE
[2502-039 (2005) : 68]
UCL
UNIVERSITY COLLEGE LONDON
Department of Electronic and Electrical Engineering

**Research Fellow**
The Electronic Materials and Devices Group is looking to recruit a postdoctoral research fellow (for three years from 4th July 2005) to work on the development of a silicon nanocluster-sensitised erbium doped planar optical amplifier. A first degree in Physics or Electronic/Electrical Engineering, with a subsequent PhD and a research track record of publications in the area of photonic materials is required. Experience in chemical vapour deposition and optical measurement techniques would be an advantage.

The post is graded RA1A, Point 7 (Starting salary £24,837 pa including London Allowance).

Questions about the post should be directed to Dr A. J. Kenyon (Department of Electronic and Electrical Engineering, University College London, Torrington Place, London WC1E 7JE, t.kenyon@ee.ucl.ac.uk, web site: www.ee.ucl.ac.uk).

Details of how to apply should be requested from: Vicky Coombes, Department of Electronic and Electrical Engineering, University College London, Torrington Place, London WC1E 7JE, Tel: 020 7679 7612 or via v.coombes@ee.ucl.ac.uk

The closing date for applications is Friday, 10th June 2005.

UCL Taking Action For Equality
[2502-040 (2005) : 68]
UNIVERSITY OF BRADFORD
INVESTOR IN PEOPLE
MAKING KNOWLEDGE WORK

**Research Assistant**  Ref: RCRU2305/NS
£79,460 - £21,640 per annum
2 Year fixed term
SCHOOL OF LIFE SCIENCES

This project is in collaboration with Professor Grigg, Leeds University and is focused on the biological assessment of novel anticancer medicines. Studies will involve a broad range of techniques including, enzyme biochemistry; cytotoxicity assays; analytical biochemistry and siRNA technology.

You will have a good honours degree in a life science subject, preferably biochemical or pharmacology related and ideally a higher degree such as a PhD. Experience in molecular cell biology, biochemistry and pharmacology would be an advantage.

Closing date: 17th June 2005.
How to apply: jobs@bradford.ac.uk, tel: 01274 233091 (minicom: 01274 235807). For more information see www.bradford.ac.uk/jobs
Applications submitted by agencies will not be considered.

Confronting Inequality: Celebrating Diversity
[2502-041 (2005) : 68]
Hybrid bio-functionalized surfaces

Six Postdoctoral Research Fellows (posts 1 - 6)
Cleanroom Technician (post 7) PhD Studentships

Biological evolution created molecules whose range of physical properties and chemical functions generally far exceed anything that can be designed or synthesized in the laboratory. However, notwithstanding this wealth of available biological functionality, the modern world is almost entirely reliant on technologies, the semiconductor industry in particular, built on inorganic fabrication. We believe that the next generation of disruptive technologies will spring from a marriage of the unique tools offered to us by biology with the powerful, highly developed discipline of digital microelectronics.

To address this challenge, four departments at the University of Leeds (Electronic and Electrical Engineering, Physics and Astronomy, Centre for Self-Organizing Molecular Systems (SOMS), and the Astbury Centre for Structural Molecular Biology) have received a four-year collaborative award from the UK Research Council’s Basic Technology Research Programme to develop generic approaches for the derivatization of patterned surfaces with molecules whose activity can be interrogated and/or programmed by underlying electronic circuitry.

For further information please visit www.bioelectronics.leeds.ac.uk

The following postdoctoral research fellow positions are available immediately and represent outstanding opportunities for enthusiastic and dedicated researchers. You must have, or be expecting to receive, a PhD in an appropriate discipline; a good track record of publications, and a proven ability to work on multidisciplinary projects are highly desirable. You will work collaboratively between the four Departments, augmenting the existing departmental research groups and drawing upon the outstanding infrastructure and facilities available.

A number of PhD studentships are also available to work on these projects; please contact Ms Barber at the address below for further details.

Post 1 Job ref 310478
You will develop semiconductor devices patterned on the sub-micron and nano-scale, which incorporate embedded electrodes and underlying circuitry for subsequent chemical and biological functionalization. Experience is required in semiconductor device processing using optical and/or electron-beam lithography.

Post 2 Job ref 310479
You will develop techniques to functionalize surfaces with biological molecules, develop assessment tools to analyse the functionalized surfaces, and tools to transduce chemical and biochemical events occurring on the surface to the underlying electronics, and vice versa. Experience is required in surface chemistry, self-assembled monolayers, and biologically functionalized surfaces. Experience in electrochemistry and molecular biology would be an advantage.

Informal enquiries about posts 1 and 2 to Dr Christoph Wälti tel +44(0)1133432023 email c.walti@leeds.ac.uk

Post 3 Job ref 310480
You will work on RNA and peptide aptamers selected robotically against a number of molecular targets that form the basis of the hybrid devices being constructed by the larger consortium. Targets include small molecular weight ligands, as well as inorganic targets, including semiconductors, carbon nanotubes etc. Experience is required in modern molecular biology, especially in vitro nucleic acid manipulation and molecular cloning. Previous experience of phage display or molecular enzymology would also be an advantage.

Post 4 Job ref 310481
You will work with Post 3 to develop catalytic electrode surfaces that can be controlled electrically - the ‘electric ribosome’. Catalytically active RNAs based on aptamers will be at the heart of the new technology. Experience is required in modern molecular biology, especially in vitro nucleic acid manipulation and molecular cloning. Previous experience of phage display or molecular enzymology would also be an advantage.

Informal enquiries about posts 3 and 4 to Professor Peter Stockley tel +44 (0)113 343 3092 email stockley@bmb.leeds.ac.uk

Post 5
You will develop technologies to fabricate lipid bilayers on various substrates, and tools to manipulate and separate membrane proteins. You should be a physical or biophysical scientist with postgraduate experience of working with organic thin films. Experience in any of the following would be advantageous: self-assembled monolayers; tethered lipid bilayers; membrane electrophoresis; AFM; fluorescence microscopy; cleanroom techniques.

Informal enquiries about post 5 to Professor Stephen Evans tel +44(0)113343 3852 email s.d.evans@leeds.ac.uk

Post 6 Job ref 310483
You will develop the synthesis of photo-cleavable and electrochemically-cleavable tethers, as well as other novel tethering technologies, novel fluorescent probes and new transition state model systems. This programme will underpin the surface-bound aptamer and surface-bound biomembrane studies. You must be an experienced synthetic chemist, and experience in organic photochemistry and/or surface science is also required.

Informal enquiries about post 6 to Professor Richard Bushby tel +44(0)1133436509 email r.j.bushby@leeds.ac.uk

Research IA (£19,460 - £29,128 p.a.)
The University is introducing a new reward framework which will facilitate the recruitment, retention and motivation of world class staff.
All positions are for up to four years dependent upon starting salary, and may be renewed for a further period or periods subject to the availability of funding.

Post 7 Job ref 310484
We also seek an experienced Cleanroom Technician to work with post 1 and other clean-room personnel. Please contact Ms Barber at the address below for further details.
University Grade 6 (£19,645 - £24,161 p.a.)
To apply online visit http://www.leeds.ac.uk and click on ‘job’. Application packs and further information from
Ms Marie Barber, School of Electronic and Electrical Engineering, tel +44(0)113343 7072, email m.barber@leeds.ac.uk

Closing date for all posts 30 June 2005

We welcome applications from all sections of the community. Textphone for deaf applicants only +44(0)113 343 4353
All information is available in alternative formats – please contact +44(0) 113 343 4146

WORKING TOWARDS EQUALITY AND DIVERSITY
UNIVERSITY OF LEEDS
[2502-042 (2005) : 69]
KING’S College LONDON
Institute of Psychiatry at The Maudsley

Research Technician
Centre for the Cellular Basis of Behaviour
The Institute of Psychiatry is a postgraduate medical school associated with the South London and Maudsley NHS Trust, and is a School of King’s College London. It has an outstanding international reputation in the field of research and in the most recent HEFCE Research Assessment Exercise was awarded the highest (5*) rating.

Our new Centre for the Cellular Basis of Behaviour invites applications for two posts funded for three years by the Department of Trade and Industry. The postholder will join a team of researchers lead by Professor Jack Price investigating the mechanisms whereby neural stem cells are able to bring about functional recovery in animal models of neurodegenerative disease. This project is part of a multidisciplinary collaboration involving both academic and commercial laboratories attempting to develop therapeutic agents from neural stem cells.

The successful candidate is required to have extensive experience in tissue culture.

Starting salary in the range £17,991 pa to £22,682 pa (inclusive of £2,456 pa London Allowance), depending on qualifications and experience. To obtain further particulars, equal opportunities statement and further information about Institute of Psychiatry, please see our website at http://www.iop.kcl.ac.uk/vacancies or alternatively email vacancies@iop.kcl.ac.uk Further particulars and equal opportunities statement can also be obtained by writing to (send a stamped self-addressed A4 envelope): Human Resources Office, Box 007, Institute of Psychiatry, De Crespigny Park, London SE5 8AF.

To apply: A CV including the names of two referees accompanied with a covering letter and an equal opportunities statement should be emailed to vacancies@iop.kcl.ac.uk or sent to the above address. All correspondence must quote reference number 05/TO1.

Closing date for applications: 21 April 2005.

Only candidates shortlisted for interview will be contacted.

Equality of opportunity is College policy
[2502-043 (2005) : 70]
Research Technician
Divisions of Cell Biology & Cellular Therapy

Applications are invited for the post of Research Technician, working in the Divisions of Cell Biology and Cellular Therapy. The successful candidate will contribute to a project aimed at developing stem cells for therapeutic use in eye disease. Duties will include tissue processing, histology and immunofluorescence staining, and applicants should have experience or knowledge in at least one of these areas, and have relevant academic qualifications up to degree level or equivalent.

Starting salary will be on to University Technical pay scale grade D, spine point 15 (£18,401 per annum including London Allowance). The post is funded by the European Commission and Wellcome Trust for 18 months initially with the possibility of extension to 4 years. Informal enquiries should be sent to cellbiol@uc.ac.uk tel: 020 7608 6859. A job description and an application form may be obtained through the Institute web-site: www.ucl.ac.uk/ioo/jobs or via email at education-ioo@ucl.ac.uk Please quote reference number: 127144. Closing date for the receipt of applications: 21 June 2005.

The Institute operates a no-smoking policy

We particularly welcome black and minority applicants as they are under represented at this level within University College London (Section 38 of the Race Relations Act 1976 applies).

Support Services Manager Ref: EPS/078/05
Salary up to £35,000 p.a.

You will provide technical leadership for a team of professional experimental officers and technicians providing support to core services and facilities within the MIB. There will be strong emphasis on technology from the physical sciences and engineering.

You will be responsible for the management of the MIB building (including maintenance and security of the building), in liaison with the University’s Estates Directorate.

Working together with the MIB technical staff, you will be responsible for the management and development of existing systems and for a pro-active programme to develop new types of experimental facilities.

This is a very broad-based and challenging role within a unique interdisciplinary environment, requiring a breadth of experience and expertise. Knowledge of a wide range of modern experimental methods, most importantly those that are physical science/engineering based. You will ideally have a degree in engineering or (physical) science and experience with, and management of leading-edge high-technology experimental facilities.

Application forms and further particulars are available from our website, alternatively, please email your request to the Human Resources Office, Eps-hrt@manchester.ac.uk or tel: + (0)161 275 8837.

Faculty of Life Sciences
Research Technician
Salary circa £17,500 p.a. Ref: LS/069/05

Under the direction of Dr Mark Ashe and Dr Graham Pavitt, the position will be within active, well-funded research groups that are investigating mechanisms that regulate protein synthesis in yeast.

The laboratory is part of a strong multi-disciplinary program in cell signalling and gene expression and is situated in a new state-of-the-art research facility.

You will be capable of providing high quality research and organisational support for the groups working in areas that include yeast cell culture, molecular biology and biochemical analysis of proteins.

You must be educated to at least ONC level (or equivalent) in any biological science discipline, together with an employment history in a research laboratory.

The post, available from 1 August 2005, is tenable for 12 months in the first instance.

Application forms and further particulars are available from our website or Victoria Kelly, Faculty of Life Sciences, The University of Manchester, The Michael Smith Building, Oxford Road, Manchester M13 9PT.
Closing date: 16 June 2005.

Research Technician Ref: LS/070/05
Salary circa £15,000 p.a.
Applications are invited for a highly motivated Research Technician to work in the laboratory of Dr Finbarr Hayes in the Faculty of Life Sciences, based at the University’s Sackville Campus in central Manchester.

You must be educated to at least ONC level (or equivalent) in any biological science discipline, together with an employment history in a research environment. You should have a well-developed sense of responsibility, be able to work independently, be interested in learning new techniques and have excellent communication skills. A practical knowledge of molecular biology, nucleic acid and protein purification/manipulation would be an advantage. You must have the ability to analyse and present data both verbally and in written form and be able to organise and manage your own time and experimental protocols.

The position is available from 1 August 2005 and is tenable for one year in the first instance.

Further information on Dr Hayes’ research can be found at the following link: [link]

Application forms and further particulars are available at from our website or Caroline Grimshaw, Faculty of Life Sciences, 3.614 Stopford Building, The University of Manchester, Oxford Road, Manchester M13 9PT. E-mail caroline.grimshaw@manchester.ac.uk

Closing date: 16 June 2005.

For all posts, please quote the relevant reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

Promoting Diversity and Equal Opportunities throughout the University
[2502-048 (2005) : 71]
Applications are invited for the above post working under the supervision of Dr Simon Jackman, Professor Chris Knowles and Dr Hong Li. The project is funded by the BBSRC via a follow-on-fund grant for one year, in association with EKB Technology Ltd. The project concerns the development of novel uses of electrokinetic bioreactions using a range of hydrolytic enzymes. The successful candidate must have a PhD and experience in microbial biochemistry or physiology, or biochemical engineering. The starting salary for this post will be on the scale RS1A £19,460- £29,128. The starting date is negotiable between July and October 2005.

For further details of the project, please contact Dr Simon Jackman (simon.jackman@earth.ox.ac.uk or tel +44 (0)1865 274591) or Professor Chris Knowles (chris.knowles@earth.ox.ac.uk or tel. +44 (0)1865 274589). For details of the application procedure please contact Nicky Maunder (nickym@earth.ox.ac.uk or tel. +44 (0)1865 272042, quoting reference DG/05/007).

The deadline for applications is 24th June 2005. Interviews will be held week commencing 11th July 2005.

The University is an Equal Opportunities Employer.

[2502-049 (2005) : 71]
Imperial College London
Genome Centre
Division of Medicine

**Research Technician**
Salary £21,541 - £24,593

The Imperial College Genome Centre encompasses a range of genetics and genomics facilities based at the Hammersmith Hospital located in East Acton. It is headed by Prof Philippe Froguel, who also holds the Chair of Genomic Medicine in the Division of Medicine and is Theme Leader for Genetics and Genomics across the whole Faculty of Medicine.

Applications are invited for the post of Research Technician which is based within the Genome Centre and is available for two years. The principal role of the postholder will be to conduct high-throughput genotyping of SNPs based on separation of primer extension products in a mass spectrometer (Sequenom MassArray). Other work, such as implementation of novel protocols on this system, is anticipated in 2005.

The successful candidate will be expected to be strongly committed to the production of work of the highest quality with excellent communication and organisational skills. He/she will have a BSc or equivalent in genetics, biochemistry or a relevant discipline.

For informal enquiries, please contact Dr Andrew Walley by emailing a.walley@imperial.ac.uk

An application form and job description may be obtained from the following web link http://www.imperial.ac.uk/employment/index.htm Alternatively, for an application pack, please contact the Human Resources Division, Imperial College London, Hammersmith Campus, Commonwealth Building, Du Cane Road, London W12 0NN, quoting reference number HJ 846.

Closing date: 20 June 2005.

Valuing diversity and committed to equality of opportunity
[2502-050 (2005) : 72]
KING’S College LONDON
Postdoctoral Research Associate in Genetics

The project links three major national institutions, Guy’s Hospital Clinical Transplantation Laboratory, The Wellcome Trust Sanger Institute, and the Bacterial Microarray Group at St George’s Hospital Medical School. The postholder will identify novel SNPs in human innate immune genes and design a microarray for rapid screening of these SNPs from human DNA samples.

The successful applicant must have a PhD or equivalent research experience in Bioinformatics, Genetics, Immunology or similar, and be able to travel between the three sites.

This is a full-time post available for 18 months. Starting salary will be in the range £19,460 to £24,820 per annum plus £2,323 London Allowance per annum.

For informal enquiries, please contact Dr Robert Vaughan PhD FRCPath, Clinical Transplantation Laboratory Guy’s Hospital, London SE1 9RT, email: robert.vaughan@kcl.ac.uk tel. 020 7188 1534.

For further details please visit www.kcl.ac.uk and click on ‘Jobs’. Alternatively send a CV self-addressed envelope to Alice Harding, Personnel Department, 4th Floor, Capital House, 42 Weston Street, London SE1 3QD, quoting reference W1/ML/385/05.

The closing date for applications is 17 June 2005.

Equality of opportunity is College policy

The University of Edinburgh
THE UNIVERSITY OF EDINBURGH

The University of Edinburgh is an exciting, vibrant, research-led academic community offering opportunities to work with leading international academics whose visions are shaping tomorrow’s world.

The Royal (Dick) School of Veterinary Studies boasts modern well equipped research laboratory facilities and an international reputation for research. As part of the College of Medicine and Veterinary Medicine the School offers unparalleled opportunities for groundbreaking interdisciplinary research in the bio-medical Sciences.

**Research Fellow & Research Associate** £19,460 - £29,128 and £19,460 - £21,640 respectively
You should have research experience, a PhD or degree in a biological subject and an interest in utilising behavioural and physiological approaches, to develop novel methods to assess fatigue in sheep after transportation. These posts are fixed-term for 12 months.
Refs: 3004524NS (Research Fellow) / 3004525NS (Research Associate).

**Research Associate**
£19,460 - £21,640
With research experience, you will have a degree in a biological subject and an interest in studying behavioural responses of cattle and pigs to road transportation. Quantifying journey characteristics and assisting in the production of a training DVD to demonstrate relationships between driver behaviour, driving events and the responses of the animals to these events is also part of your remit. This post is fixed-term for 18 months.
Ref: 3004526NS.

Apply online, view further particulars or browse more jobs at our website. Alternatively, telephone the recruitment line on 0131 650 2511. Closing date: 14 June 2005.

THE UNIVERSITY OF EDINBURGH

Four PhD studentships and a postdoctoral fellowship are available from 1 September 2005 to join a UK Cystic Fibrosis Microbiology Consortium, led by Professor JRW Govan, on a multi-centre, multiprogramme study entitled: “Superbugs and life-threatening lung infections in Cystic Fibrosis”. The consortium is funded for three years in the first instance by the Cystic Fibrosis Trust with a research grant from the Big Lottery Fund.

PhD Studentships
£12,000
Genetic factors contributing to the success of CF superbugs in the UK. (Ref MbC 01) Based in the Dept of Microbiology, University of Liverpool and Health Protection Agency London. Principal investigators: Dr Craig Winstanley (c.winstanley@liverpool.ac.uk) and Dr Ty Pitt (HPA).

Burkholderia cenocepacia, Burkholderia multivorans and Pseudomonas aeruginosa in diminishing host responses in the CF respiratory tract. (Ref MbC 02) Based in the School of Pharmacy, Queens University Belfast. Principal investigator. Dr A McDowell (a.mcdowell@qub.ac.uk).

Antimicrobial resistance and novel antimicrobial targets of CF pathogens: Mechanisms of biocide resistance and action. (Ref MbC 03) Based in Cardiff School of Biosciences, Cardiff University. Principal investigator. Dr E. Mahenthiralingam (mahenthiralingham@cardiff.ac.uk).

Novel antimicrobial agents. (Ref MbC 04) Based in the School of Chemistry and Centre for Infectious Diseases. University of Edinburgh. Principal investigators. Dr D Campopiano (dominic.campopiano@ed.ac.uk) and Professor J Govan.

PhD candidates with a relevant first degree should send a CV together with the names and address of two referees to the appropriate principal Investigator from whom further particulars can be obtained.

Postdoctoral Researcher
£19,460 - £29,128 (Ref: 3004510NS)

You will have a PhD in microbiology, immunology or a similar field and enjoy the challenge of participating with the Pls on a series of projects focussing on breakthrough research with direct clinical relevance as well as ensuring communication within the consortium. Based in the Centres for Infectious Diseases and inflammation Research, University of Edinburgh. Principal investigators: Professor J Govan (john.rw.govan@ed.ac.uk) and Dr J-M Sallenave in collaboration with clinical colleagues at the CF centres in Belfast, Wythenshawe Hospital, Manchester and Papworth Hospital, Cambridge.

Candidates for this postdoctoral post should send a CV together with the names and address of two referees to Professor J Govan, Medical Microbiology, Teviot Place, Edinburgh EH8 9AG, or email as above, to whom informal enquiries may also be addressed (tel: 0131 650 3164).

Please quote the relevant reference on your application.

Apply online, view further particulars or browse more jobs at our website. Alternatively, telephone the recruitment line on 0131 650 2511.

Division of Basic Medical Sciences

**Postgraduate Research Assistant**
3 years (PhD option) Ref: 110/05
Applications are invited for a Research Assistant to join a research team studying hyaluronan secretion into synovial joints. The project is funded by the Wellcome Trust and combines physiological cannulation and perfusion skills in an animal knee model with biochemical measurements of hyaluronan secretion by synoviocytes (HPLC/ELISA). There are regular group meetings and an allowance to attend national and international meetings.

Candidates should have or expect to get shortly, a good primary degree in Physiology, Pharmacology, Biochemistry, Cell-biology or similar area. A suitable appointee may be allowed to work towards a higher degree. The starting salary will be £21,783 pa inc. The post is available from Autumn 2005 and is fixed-term for 3 years. Closing date: 30 June 2005.

Division of Cellular & Molecular Medicine - Infectious Diseases

**Research Assistant**
Fixed term for 6 months Ref: 314/05
Applications are invited for a post as Research Assistant for a period of 6 months. The appointee will undertake a study investigating how malnutrition may affect lymphocyte proliferation and function. The study will involve cell culture and immunological techniques such as FACS plus measurements using a GCMS stable-isotope approach to monitor proliferation and metabolic activity of cells *in vitro*.

The successful applicant should have a good honours or masters degree in Immunology, Biochemistry, Biomedical Sciences or a related subject. Familiarity with cell culture techniques and FACS analysis would be an advantage. The salary will be up to £21,783 pa inc. Closing date: 16 June 2005.

For further information about both posts visit [http://www.sgul.ac.uk/](http://www.sgul.ac.uk/) or contact the Personnel Office on 020 8725 5020 (24-hour answerphone) or email: personnel@sgul.ac.uk

THE UNIVERSITY OF WARWICK
Department of Chemistry

Postdoctoral Research Fellow in Organic Synthesis
£19,460 - £29,128 pa Ref: 5301 6-055
Fixed Term Contract for 1 year

The University Values Diversity

Warwick is one of Britain’s leading universities with an enviable reputation for educational opportunities, first rate research and its commitment to the local community.

You will develop methods for the synthesis of natural products and intermediates in their biosynthesis. You must have a PhD and a published track record in organic synthesis.

Application packs are available from Personnel Services on 024 7652 3685 (24 hour answerphone), by email recruit@warwick.ac.uk, our website below or www.jobs.ac.uk/warwick. An application form MUST be completed if you wish to apply for this post.

Closing date: 9 June 2005

www.warwick.ac.uk/jobs
[2502-059 (2005) : 74]
The North West e-Science Centre, [www.esnw.ac.uk](http://www.esnw.ac.uk) requires a Research Associate to work on the GridOneD project [www.gridoned.org](http://www.gridoned.org) a project funded by PPARC, to develop the methodology for deploying signal processing algorithms relevant to pulsar and gravitational wave astronomy on Computational Grids. The second phase of the project, 2005-2007 will involve astronomers working in these fields and you will work closely with teams at Jodrell Bank Observatory and the Gravitational Astronomy group at the University of Cardiff.

The post will be based at ESNW, in a newly-furbished environment bringing together projects in advanced computation, information management, Grid computing, visualisation and multi-media technology. The post is available from September 2005 for two years and we are seeking someone who is enthusiastic and has a background in computational physics, coming from either a computer science or astronomy/physics background.

For informal enquiries, please contact Dr John Brooke on +44 (0) 161 275 6814 or e-mail: j.m.brooke@manchester.ac.uk

Application forms and further particulars are available from our website or The Directorate of Human Resources, The University of Manchester, Oxford Road, Manchester M13 9PL Tel: + (0) 161 275 2028 or e-mail: centralservices-hr@manchester.ac.uk

Closing date: 9 June 2005. Please quote the reference number.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community, combining the strengths of UMIST and The Victoria University of Manchester

[2502-060 (2005) : 74]
Following the appointment of Professor Peter Gregory as Director of SCRI, Dundee, we are seeking to appoint a Professor to lead and initiate research in Soil Science and teach in areas of Soil Science and Environmental Science from 1 January 2006 or as soon as is possible thereafter.

The Department of Soil Science together with the Departments of Archaeology and Geography forms the School of Human and Environmental Sciences. The Department of Soil Science has strong research links within the School, with other Schools in the University and a number of research institutes in the UK and abroad.

For an informal discussion or to arrange visits to the Department, please contact Professor Stephen Nortcliff on telephone +44 (0)118 3786559 (email: s.nortcliff@rdg.ac.uk) or his Secretary Mrs. S.M. Hawthorne on telephone +44(0)118 3788911 (email: s.m.hawthorne@rdg.ac.uk).

Application forms and further details are available from the Personnel Office, The University of Reading, Whiteknights, PO Box 217, Reading RG6 6AH; telephone +44 (0)118 3786771 (voicemail). E-mail: Personnel@rdg.ac.uk giving full name and address.
Closing date for applications: Friday 24 June 2005. Please quote reference number.
[2502-061 (2005) : 74]
The University of Reading
Department of Mathematics

**PhD Studentships** - full-time: 3 years
(October 2005 start)

NERC PhD studentship for research on “Multi-scale variational data assimilation for numerical weather prediction”

A PhD studentship is available in the Departments of Mathematics and Meteorology at The University of Reading, to work on data assimilation for very high resolution weather prediction. (Funding for 3 years by NERC, approx £12,000 pa plus fees and conferences paid.)

EPSRC Case Studentship with AWE Aldermaston for PhD research on Investigation of Mesh-Induced Errors in Computational Fluid Dynamics Simulations of Converging Compressible Flows. (Funding for 3 years by EPSRC and AWE approx £16,000 pa plus fees and conferences paid.)

**MSc Programmes** - full-time: 1 year (October 2005 start)

One-year MSc course in the Numerical Solution of Differential Equations which provides training in the theory and techniques of computational mathematics used in industry and research.

One-year MSc course in the Mathematical and Numerical Modelling of the Atmosphere and Oceans which provides training in the theory and techniques of mathematical and numerical modelling for atmosphere and ocean systems. (Joint course in the Mathematics and Meteorology Departments.)

Contact website
http://www.maths.rdg.ac.uk/postgrad.html

For further details and an application form please contact:
Postgraduate Secretary, The University of Reading, Department of Mathematics, PO Box 220, Reading RG6 6AX. Tel: 0118 378 8991, email: s.davis@rdg.ac.uk or http://www.rdg.ac.uk/pg/apply/apply.htm

The PhD awards are available to UK and EU students only (tuition fees only for EU applicants).
The minimum requirement for candidates is an Upper Second Class honours degree in mathematics or related discipline.
Closing date for applications: 30 June 2005.

[2502-062 (2005) : 75]
MSc Ecology
Funded Postgraduate Studentships

Studentships are available for the year long, full-time, course starting 3rd Oct. 2005. The course is composed of a modular taught component followed by a research project. The former includes behavioural ecology, community ecology, population ecology, molecular ecology and evolutionary ecology and an established, optional two week field trip to the Caribbean is planned. Closing date, 7th August 2005.

Application forms and further information from:
The MSc Administrator, School of Biological Sciences, University of Wales, Bangor, Gwynedd LL57 2UW, UK.
Tel: 01248 382314 Fax: 01248 371644
email: mscecolapps@sbs.bangor.ac.uk
[2502-063 (2005) : 75]
Applications are invited for research studentships within the Nanomaterials Group. The projects are interdisciplinary and may involve collaborative studies and use of facilities in Australia. Bursaries and travel funding are currently available for studentships in the following areas:

- Synthesis of materials for nanoscale devices
- Molecular self-assembly
- AFM/STM studies of molecular scale devices
- Molecular electronics
- Sensors

Applicants should possess a good honours degree in Chemistry or Physics or any related subject area and apply to: Professor G.J. Ashwell, The Nanomaterials Group, Cranfield University, Cranfield, Bedford MK43 0AL.
T: +44 (0)1234754684
F: +44 (0)1234752452
E: g.j.ashwell@cranfield.ac.uk

Cranfield University is an exempt charity offering a centre of excellence for research and education.
Two opportunities are announced for research in the farm, agricultural and rural management arenas leading to a PhD degree; one full-time for three years and one part-time for five years starting in October 2005.

The studentships include an annual stipend (similar to the Research Council awards), tuition and some research expenses. The awards will be reviewed annually and continuation depends on satisfactory progress by the recipients. Graduates from the UK/EU with an Upper Second Class degree in a management-cognate subject are invited to apply by submitting a research proposal (not exceeding 1,000 words) on a topical issue related to environmental, economic, social and ethical problems in managing agriculture and the countryside.

Further details are available from Dr Tahir Rehman, School of Agriculture, Policy and Development, Earley Gate, PO Box 237, Reading RG6 6AR. Tel: 0118 378 8480, E-mail: t.u.rehman@reading.ac.uk
Closing date for applications is 30th June 2005.

[2502-066 (2005) : 76]
Fully Funded PhD Research Studentships (3 years)
(Renewable/Sustainable Energy, Energy Efficiency & Building Technology)

The School of the Built Environment has a world-class reputation for teaching and research in sustainable energy and building technology. A multidisciplinary approach, encouraged through strong links with UK and international companies, guarantees the School’s graduates a high standing in the market place of employment, research training and professional recognition.

The School of the Built Environment has extensive laboratory and IT facilities for research and teaching as well as state of the art buildings including the Millennium Eco-House and the Sustainable Research Building, providing dedicated office space and laboratory services for research students.

Opportunities have arisen for new research work to be carried out on projects funded by the EPSRC, supported by industry, involving the investigation of renewable/sustainable technologies in the built environment. The successful students will have the opportunity to liaise with industry and other academic research institutions through the energy network the Integration of New and Renewable Energies info Buildings (INREB), in which the School is a pro-active member.

Studentships for suitably qualified UK (Home) students provide full university fees and up to £15,000 per year maintenance grant (including contribution from the industrial sponsor), depending on qualifications, experience and in accordance with EPSRC guidelines. The EPSRC guidelines for postgraduate studies are available at: http://www.epsrc.ac.uk. EU students may only be eligible for fees and will need to provide their own maintenance costs.

Within the School’s extensive Industrial Collaborative Programme, there is an opportunity for the successful students to work closely with companies (e.g. Baxi, E.ON, Gifford, Hoare Lea and Thermacore) in research areas including energy efficiency, renewable energy, energy conservation, and architecture technology.

Students should possess a first degree (minimum 2.1 or 2.2 with a MSc qualification) in the fields of mechanical engineering, building services engineering, chemical engineering, physics or other technical disciplines.

Informal enquiries may be addressed to Dr S Smith, telephone: 0115 951 3174. Further details about the School are available at: http://www.nottingham.ac.uk/sbe
Applications with a detailed CV, together with the names and addresses of two referees, should be sent to Mrs C Hardwidge, School of the Built Environment, The University of Nottingham, University Park, Nottingham, NG7 2RD. Closing date: 30 June 2005.

[2502-067 (2005) : 77]
PhD Studentships in WestCHEM
The Joint Research School in Chemistry of the Universities of Glasgow and Strathclyde

Up to 70 PhD studentships are available in WestCHEM, the Research School in Chemistry of the Universities of Glasgow and Strathclyde. WestCHEM, formed as part of the ScotCHEM initiative on pooling of Chemistry in Scotland, brings together the strengths of the two major chemistry research schools in the West of Scotland, to offer an outstanding opportunity for graduates to carry out research in a large, diverse and expanding chemistry research environment.

WestCHEM offers opportunities for research in all areas of modern chemistry, including functional materials chemistry, medicinal chemistry, organic and inorganic synthesis, structural chemistry, analytical chemistry, biological chemistry, chemical proteomics and heterogeneous catalysis. Details of specific projects available within WestCHEM for 2005 starts can be found on http://www.westchem.ac.uk and also through the individual departmental web-sites: http://www.chem.strath.ac.uk/applying.php?view=phd_studentships http://www.chem.gla.ac.uk/adverts.htm

As part of this initiative, WestCHEM graduate students have full access to facilities on both campuses within the City of Glasgow - a few minutes apart and linked by efficient local transport networks. Further facilities are also available throughout the Chemistry community in Scotland via the ScotCHEM arrangement.

Applications are invited for these positions. Most of our studentships are available for students from any country of the EU. Take this exciting opportunity to be involved in an innovative and expanding Chemistry Research School.

If you are (or expect to be) a well qualified graduate, you can obtain further details or make initial enquiries by contacting Professor John Murphy (Strathclyde: john.murphy@strath.ac.uk) or Professor Chick Wilson (Glasgow: e.c.wilson@chem.gla.ac.uk). [2502-068 (2005) : 77]
School of Chemistry

Fully funded **PhD Studentships**

The School of Chemistry is a large centre of outstanding research, rated 5 in all the RAE exercises, with excellent links to industry and research groups world-wide. A range of fully funded awards are available for doctoral studies for UK and EU students, with approximately 50 students starting each year. Highlighted research areas include:

- analytical and environmental chemistry
- combinatorial chemistry
- e-science - medicinal chemistry
- chemical biology
- electrochemistry
- organic synthesis
- organometallic and co-ordination chemistry
- solid-state chemistry
- supramolecular chemistry
- theoretical chemistry and molecular modelling
- surface and interfacial science

PhD students may enrol at any time during the year although most studentships commence in either October or February.

Details of research programmes can be found by following the links from [http://www.chem.soton.ac.uk](http://www.chem.soton.ac.uk)

Please contact Mrs. Jill Queen, School of Chemistry, University of Southampton, Highfield, Southampton SO17 1 BJ, email: jcq@soton.ac.uk

The London Graduate Recruitment Fair
Events
22 & 23 June, 2005

Business Design Centre, Islington, London, N1
The biggest graduate recruitment Fair in the UK.
A chance to meet over 100 companies keen to recruit you for their vacancies in a huge variety of employment sectors. A unique opportunity to get the inside story from the people who actually do the job you’re interested in.
Career seminars, employer presentations, occupational seminars and one-to-one CV checking are available.
Free to attend.
Pre-register now for fast-track entry at:

So much more...
An MSc qualification from Cranfield University means a whole lot more than other degrees. Check out our courses in:
Bioinformatics
Clinical Research
Environmental Diagnostics
Environmental Management for Business
Geographical Information Management
Land Reclamation and Restoration
Medical Diagnostics
Medical Technology Regulatory Affairs
Molecular Medicine
Natural Resource Management
Soil Management
Translational Medicine
Water Management

Studying at Cranfield University at Silsoe will bring you into more contact with colleagues from all over Europe and more beyond.
Our one-year MSc courses cover all the topics you need to become a “complete” graduate - language skills, personal development programmes and so much more.
Employers across the world are more likely to recruit Cranfield students - 97% are fully employed on graduating.
Our track record within the diagnostic and environmental science industry means it’s more likely you could carry out a research project with a potential employer.

If you would like to speak to a current student, discover which scholarships are available for 2005 or require any other information contact: Carla Watson, Student Enquiries, Cranfield University, Silsoe, Bedford MK45 4DT quoting ref no: NS/21/05.

Science, work and business

The UK government has spent millions on driving public sector research to market. Has it worked, asks Gaia Vince

A nice little earner

WHEN Richard Reid boarded a transatlantic flight with plastic explosive hidden in his shoe, he managed to slip through the terminal and onto the plane unchallenged by airport security. That was four years ago. Had Reid tried the same thing after the introduction of a new passenger screening technology developed in the UK, he would not even have reached the duty-free shop. So claims ThruVision, a company with roots in government-funded research that has built a scanner that can spot concealed items such as drugs, explosives or weaponry.

The company's technology analyses terahertz waves - radiation that lies between infrared and microwaves on the electromagnetic spectrum.

"The scanner is so sensitive it can detect objects hidden under clothing on a person who is 15 metres away," says Jonathan James, CEO of ThruVision, who already has customers in security queuing up.

And here is where the device truly breaks new ground: ThruVision is the 1-year-old spin-off of a public-sector research establishment (PSRE), Rutherford Appleton Laboratory. It is rare for research from a PSRE to yield marketable products, let alone in such a brief time, but if the scanner makes it, a portion of any profits generated will go back to its public sector inventors.

The UK government has ploughed millions into the public sector over the past few years to encourage the commercial exploitation of research, and the results are beginning to surface. The private sector has historically been reluctant to invest in the blue-sky research of the public sector, but government money aimed at turning that research into commercial products has helped institutions start to attract investment. ThruVision won the support of international venture-capital heavyweight Porton Capital, which invested £500,000, and other institutions are having similar success.

This is a far cry from the picture of the public sector painted by the 1999 Baker report to the Treasury which criticised PSREs for failing to exploit the first-class science they produced as universities do. One of the main frustrations PSREs faced, the report concluded, was that the private sector was unwilling to risk investing in early-stage, unproven ideas, yet the institutions could not afford to prove commercial viability. In this, they are in a different position from the universities. Robin Brighton, director of consultancy firm SQV, who evaluated PSRE commercialisation for the Department of Trade and Industry in February 2005, explains that PSRE funding is tied to specific activities, whereas universities have a block grant to use at their discretion. So while many PSREs carry out research with commercial value, they need dedicated funds to explore that potential.

In 2001, acting on the Baker report's recommendations, the government allocated money to commercialisation in the form of a new Public Sector Research Exploitation Fund (PSRE Fund). The DTI awarded 19 PSREs a total of £10 million of public venture capital to develop potential products to a stage at which they could be successfully marketed to the private sector. In 2004, a second round of funding allocated £15 million to a further 16 PSREs.

The Council for the Central Laboratory of the Research Councils (CCLRC) got the lion's share of the initial round, receiving £4 million. It used this to set up the Rainbow Seed Fund, a collaborative venture capital scheme. It was Rainbow money that allowed Rutherford Appleton Laboratory to set up ThruVision. "We secured £250,000 from the fund in 2004, which was invaluable in building the business. It enabled us to recruit our core team to research and develop early prototypes," explains James. "With the Rainbow money and another £500,000 from Porton we could move very, very fast, and as a result we're shipping our first orders already."

The technology behind the scanner dates back to the UK's space programme, when it was used to probe the atmosphere and was instrumental in detecting the ozone layer. But it's a long stride from a research tool to desirable product, especially when it comes to navigating the cultural chasm between the public-sector mindset and the short-term goals of the commercial world. "Men in suits can be viewed with suspicion, I've seen that myself," admits James. "But once it was established that there was no threat to the PSRE scientists' important public-research missions, I was amazed by their enthusiasm and the breadth of their creativity and interest in the technology's potential."
According to James, the government is on the right track with its drive to set up technology transfer companies in the public sector that trawl through research, looking "outside the box" for opportunities. The idea is not new - universities have been doing it for decades. However, such spin-offs have had mixed success and some doubt the wisdom of extending the scheme to PSREs. Jacqueline Senker at the University of Sussex's Science Policy Research Unit, one of the authors of a 2003 report for the European Commission on European technology transfer policy, claims that the Medical Research Council is the only success story in the UK so far. "Throughout Europe there are simply too many technology transfer organisations that don't know what they're doing, don't have the right expertise, know nothing about biotechnology, or about patenting and licensing and so are useless," she says. "Instead of pushing public-sector science to industry, we should be pushing industry towards the public sector. We need to put incentives in place for research demand, not supply."

At the Rowett Research Institute in Aberdeen, scientists are in no doubt as to the benefits of the new government money. The institute received £56,000 at the end of 2004 from the Genomia seed fund, which was set up with a £1.5 million PSRE Fund grant to share capital between four Scottish PSREs. Rowett is no stranger to success. A spin-off from the institute, Provexis, is behind a "nutraceutical" drink called Sirco that improves circulation. The drink is due to hit supermarket shelves later this year, but took five long, painful years to reach commercial production.

The institute's latest commercial venture is a family of patented modified flavonoid drugs for use immediately after someone has a stroke or to delay Alzheimer's symptoms. Since the institute received its Genomia grant, work on these products has progressed quickly along the commercial route. "The researchers are extremely proud and pleased to see the possibilities of taking genuine hardcore scientific research and turning that into products with real public health outcomes. And the profits are returned to the fund to help more public-sector research," says Alan Rowe, head of Rowett. The group hopes to attract private investment by September, and to start clinical trials within two years, which would be fast even by privatesector standards.

Donald McPhail, lead researcher on the flavonoids project, says the funding has been good for lab morale. "It's very satisfying for the whole team to see research going through a logical transition from bench to clinical trials. It allows UK researchers to see projects through to commercial success without being frustrated and considering leaving for the States," he says. Industry has been missing out on an untapped resource in the public sector, according to Andrew Jones, director of Porton Capital. Institutions are finally showing themselves capable of exploiting their knowledge. "PSREs have extraordinarily exciting, cutting-edge research, potentially years ahead of the market," says Jones. "There's a huge thrill of creating something immediately usable from blue-skies research. It's a phenomenally rewarding win-win partnership."

SEPA
Scottish Environment Protection Agency

SEPA aims to provide an efficient and integrated environmental protection system for Scotland, which will both improve the environment and contribute to the Government's goal of sustainable development.

Principal Policy Officer - Chemicals
From £32k
Corporate Office, Stirling Ref: SPDM9031

Reporting to the Emerging Issues Unit Manager, you will address the policy issues arising from current and future European and UK policy/strategy and legislation where the understanding of chemicals, their use, their environmental impacts and their control are key. You will also provide support to SEPA staff in relation to chemicals policy and regulation and will liaise with government departments, other agencies and stakeholder groups as SEPA's lead for chemicals policy. Your remit will also include working with other policy and technical staff on the environmental and human health impacts of chemicals, environmental liabilities and chemicals in ambient air. You will be involved in the developmental work on SEPA's policy on: environmental carrying capacity, the regulation of chemical substances (REACH), the control of chemicals under the Water Framework Directive, the control of biocides/pesticides, eco-design and environmental aspects of product standards including integrated product policy.

You must hold a honours degree or equivalent in a relevant discipline, while a postgraduate degree or qualification would be desirable. You must have good knowledge of the policies and laws relating to chemical policy in Scotland, UK and Europe and of relevant policy developments within the EU, UK and Scotland. Good networking, communication and influencing skills, both written and oral, are also essential.

Specialist Senior Scientist - Human Health £25,698 - £32,360
Corporate Office, Stirling initially and thereafter
East Kilbride Ref: SPEF9093

Reporting to the Sustainable Development Unit Manager initially, and thereafter to the Environmental Chemistry Unit Manager, you will lead the development and delivery of human health science in supporting environmental assessment, regulation and policy. You will act as a recognised scientific expert in the field of human health and the environment, providing support to staff throughout SEPA and representing SEPA in an official capacity externally. You will provide expert scientific information and advice on human health in contributing to the development of relevant environmental outcomes and measures. You will be expected to develop partnerships with external bodies and contribute to the identification, prioritisation and management of research and development in relation to human health and the environment.

You must hold a degree or equivalent in a relevant science discipline. A postgraduate degree or qualification and corporate membership of an approved scientific body would be desirable. An understanding of environmental protection and legislation and a minimum of 5 years' experience working in the field of human health and environment are essential. A high standard of written and oral communication is required and good influencing and networking skills are essential.

Closing date 15th July 2005 at 12 noon.

For an application form, please call 01786 452555 or email recruitment@sepa.org.uk

Send your SEPA application form to Recruitment SEPA Corporate Office, Erskine Court, Castle Business Park, Stirling FK9 4TR. Applicants must quote appropriate reference number. CVs will not be included as part of the application process.

SEPA is currently introducing a new Job Evaluation Scheme and Pay and Grading structure. All posts will be subject to Job Evaluation.
Details can also be found in the vacancy section on our website, www.sepa.org.uk

HEALTH & SAFETY EXECUTIVE  
Drawing on science to improve Health & safety  
Regulatory Scientists - Industrial Chemicals and Biocides  
£21,096 + attractive benefits

The opportunity to make a real difference. The chance to enjoy greater variety in your work. The scope to further improve your specialist skills and expertise. These are all things that the Health & Safety Executive can offer you.

A large and diverse organisation, we are responsible for regulating health and safety within almost all British industries. To help us in this important task and to play a major part in a new initiative that's set to take the UK's health and safety standards to even higher levels, we are now looking for more Regulatory Scientists to join us in the key areas of health effects of chemicals and a biocides permissioning scheme.

Opportunities exist within our Industrial Chemicals Unit and Biocides Unit which are part of our Field Operations Directorate. These units evaluate the hazardous properties of relevant substances to ensure that the risks they present may be properly controlled. They also offer specialist advice to our Field Inspectors, and help develop related policy and legislation.

You will be expected to assess the scientific validity, accuracy and adequacy of reports submitted by manufacturers and other regulatory bodies. You will also evaluate substances on the basis of their health or environmental effects. Please note that none of the work will be laboratory based.

As well as being a graduate in a Biological, Toxicological, Environmental or health-based discipline, or in Chemistry, you will have the ability to evaluate technical data, and compile in-depth reports. Able to work to tight deadlines, you will also need a strong team focus supported by good decision making and interpersonal skills.

HSE offers an attractive salary and benefits package which includes a generous annual leave entitlement, a final salary pension scheme and flexible working hours to help you combine your work and home life. We also offer good scope for training and development.

To download an information pack, and to apply online, please visit our website at www.hse.gov.uk Alternatively call Elaine Seagraves on 0151 951 3737.

The closing date for applications is Thursday 14th July 2005.

HSE is committed to equality of opportunity for all staff and applications from individuals are encouraged regardless of disability, gender, marital status, race, colour, ethnic or national origin, sexual orientation, age, working pattern, religion and/or belief.

[2506-003 (2005) : 54]
Realisation of a dream

**Laboratory Manager**
For a major new research institute in Cambridge
c. £48,000 p.a.

This is a once-in-a-lifetime moment for both of us. The opening of our new institute at Cambridge University gives us the opportunity to shape a unique venture that will combine world-class fundamental biology with translational research to develop new clinical applications. It also offers you the challenge of ensuring that the building and research facilities provide an environment to match the calibre of the scientific staff Cancer Research UK are recruiting.

The new building, which will house more than 300 people, is scheduled for handover in early 2006 with research commencing in May 2006. Before then, you'll focus on the specification, procurement and set-up of a substantial list of equipment, the design of operating systems, allocation of space and the recruitment of a new team of technical and support staff.

This role is vital to our success and we are looking for someone very special to fill it: a person with the energy and interpersonal skills to create a collegiate research environment and to provide outstanding leadership to our support team. Technical expertise in molecular biology and a postgraduate degree in a related discipline are essential.

To apply please send two copies of a covering letter and CV to Anne-Marie Arthurton, PO Box 123, London, WC2A 3PX or email: recruitment@cancer.org.uk quoting reference NS3336.

Closing date: 22nd July 2005.

For further information, please visit [www.cancerresearchuk.org/aboutus/](http://www.cancerresearchuk.org/aboutus/) and click on jobs. A culture of diversity. A focus on success

The Medicines & Healthcare Products Regulatory Agency (MHRA) is the Executive Agency of the Department of Health which protects and promotes public health and patient safety by ensuring that medicines, healthcare products and medical equipment meet appropriate standards of safety, quality, performance and effectiveness, and are used safely.

**Senior Medical Device Specialists**
Biosciences and Implants - 4 posts: implantable medical devices, *in-vitro* diagnostic medical devices or biological safety assessment

**STARTING SALARY** c. £32,000 (DEPENDENT ON EXPERIENCE) • LONDON

We have four posts in the Biosciences and Implants (B&I) Unit of the Device Technology and Safety (DTS) division of MHRA. DTS has responsibility for providing technical advice and investigating adverse incidents involving medical devices. Within DTS, B&I deal with a range of medical devices/technologies including: active and non-active implants, *in-vitro* diagnostics, decontamination/sterilization, biological safety and tissue engineering.

In this challenging role, we will look to you to be the focus of technical expertise in your product areas and to act as team leader. You will take the lead in investigating adverse incident reports from healthcare professionals, manufacturers and patients, or to carry out biological safety assessments for medical devices. This will involve carrying out reviews and identifying alternative approaches to resolve recurring device problems. You will also lead the drafting of Medical Device Alerts and other guidance documents and advise the Department of Health, users and manufacturers on medical device safety and regulation. In addition to representing the MHRA at external meetings/conferences and on government advisory groups, you will handle government correspondence and Parliamentary questions. You must also develop and maintain good communications networks with individuals and organisations relevant to the work, and maintain a high level of knowledge of medical products/technologies, including their manufacture, development and use.

With a degree or equivalent qualification in a relevant discipline, you will have at least 5 years' experience of working in a healthcare industry or regulatory environment. You will also have the ability to successfully lead, motivate and influence a team to delivery objectives. Working under your own initiative and as part of a team, you will have the ability to communicate confidently and diplomatically. Effective organisational skills are essential, along with the ability to prioritise your work according to business need.

In addition to a competitive salary, we offer 30 days' holiday, 10.5 public/privilege days, civil service pension and season ticket loan. Please note that the full salary range for this position is: £27,528-£40,807.

Please contact the Human Resources Department for an application pack by emailing: [jobs@mhra.gsi.gov.uk](mailto:jobs@mhra.gsi.gov.uk) or fax 020 7084 2522. Alternatively, write to MHRA, Market Towers, 1 Nine Elms Lane, London SW8 5NQ.

The closing date for applications: 18 July 2005.

As an Equal Opportunity employer the Department welcomes applications regardless of gender, race, disability or sexuality. We operate flexible working patterns within a non-smoking environment.

Safeguarding public health

[2506-005 (2005) : 55]
Institute for Animal Health

Help us shape the future of animal health in Britain

The Institute for Animal Health operates at the forefront of innovative research, and is currently spearheading major programmes. Joining a 450-strong team backed by a £multi-million budget, you and our dedicated teams will help take our studies forward and contribute significantly to the future. Within these exciting and forward thinking projects, we require bright and enthusiastic individuals to fulfil the following roles across our Pirbright and Compton sites.

**Postdoctoral Scientist**
Ref: 05/0723 • Compton
You will join a high profile project within the Veterinary Training Research Initiative, aimed at encouraging student and practising vets to become involved in groundbreaking research to combat bovine tuberculosis. This project combines the application of techniques, with studies into the roles of both bovine T cells and antigen presenting cells in mycobacterial infection.

Qualified to PhD level, you will be experienced in a range of molecular biology techniques, particularly the use of microarrays, and ideally familiar with the handling of micro-organisms. The position will involve extensive work at category 3 level, for which comprehensive training will be provided.

**Virologist**
Ref: 05P/2049 • Pirbright
You will support the Principal Scientific Officer on an applied research project with the key role of developing and validating tests to facilitate use of vaccines in control of foot-and-mouth disease (FMD) outbreaks. This will involve cloning and expressing FMD virus proteins and investigating assays that can detect infection in vaccinated animals.

Together with a good Biology degree, you will bring experience of cell culture, ELISA, RT-PCR and molecular cloning techniques, plus a careful and methodical approach to record keeping. In return, we will provide full training in all techniques, including emergency outbreak training.

**Research Assistant**
Ref: 05P/2051 • Pirbright
Joining our Pathogenesis of Vesicular Disease Group, you will study the persistence of foot and mouth disease virus (FMDV) in cattle. This will involve the laboratory analysis of samples (including sample processing), virus isolation and PCR-based techniques, and you will assist with the collection of samples from experimental cattle, sheep and pigs and the maintenance of laboratory records.

You will require a scientific degree, backed by experience of standard molecular biology or cell culture and proven ability to record data accurately. A higher scientific qualification would be a major asset, as would experience of virology, but this is by no means essential.

We offer highly competitive salaries, a comprehensive package of benefits and plenty of scope to develop your career.

Further details and an application form are available from:
Compton: Mrs. R. Day, Human Resources, Institute for Animal Health, Compton, Newbury, Serks RG20 7NN (tel: 01635 577203; e-mail iah.vacancies@bbsrc.ac.uk) quoting 05/0723.

[2506-007 (2005) : 56]
EXTREME ENVIRONMENT SCIENTIST/ENGINEER
Salary up to £34,163 (VN2725/NS)

ISIS is a world leading research facility, providing materials scientists with cutting edge instrumentation. A challenging and exciting opportunity exists for a Leader of the Sample Environment Team. You will provide a customer focused service, supplying and developing state of the art environments such as wide temperature and pressure ranges and magnetic fields to the scientific community.

You will have a degree in a relevant subject and have extensive knowledge of mechanical engineering and the properties of materials. Knowledge and experience of thermal systems and cryogenics is essential. Experience of project management and managing technical teams would also be highly advantageous.

For an informal discussion about the post, please contact Dr Uschi Steigenberger on (01235) 445145 or email u.e.steigenberger@rl.ac.uk

For more detailed information about the CCLRC and an application form please visit www.cclrc.ac.uk or contact: Operations Group, HR Division, CCLRC, Chilton, Didcot, Oxfordshire, OX11 0QX, Telephone (01235) 445435 (answerphone) or e-mail: recruit@rl.ac.uk quoting reference number VN2725/NS.

Closing date for applications is 6 July 2005.

Interviews will be held on 15 July 2005.

[2506-008 (2005) : 56]
NATIONAL BLOOD SERVICE

At Bio Products Laboratory our aim is to develop and process life-saving biological products that offer the very best in patient care. We are committed to using the latest technology to ensure the integrity of our products. This, combined with the dedication of our workforce, ensures our ability to provide first-class service to hospitals throughout England and Wales.

**Research Assistant**

£17,796 p.a. to £23,768 p.a. plus £267 London Weighting*

As a Research Assistant in our R&D Department, you'll be part of a team involved in product development, from inception to market launch and beyond. You will be working on process design, development, or scale-up, using techniques for protein purification and analysis within the regulatory environment of a pharmaceutical facility. With the benefit of BPL’s established track record, you will play an important role in the development cycle for new biopharmaceutical products.

You are literate, numerate, articulate and enthusiastic, with a degree in a biochemical science. Knowledge/experience of protein purification and analysis, and experience in a pharmaceutical environment would be an advantage. You enjoy the challenge of practical laboratory work and can work well in an established team, which is committed to meeting agreed targets.

You should have a degree/MSc in Biochemical or Biological Sciences. Practical experience of the design and accurate execution of experiments within a pharmaceutical laboratory environment would be an advantage.

For an application form, please apply in writing to the Personnel Department, Bio Products Laboratory, Dagger Lane, Elstree, Herts WD6 3BX or email us at [vacancies@bpl.co.uk](mailto:vacancies@bpl.co.uk) quoting reference RA/A3.

Closing date for completed applications: 28th July 2005. Interviews will be held on 18th & 19th August 2005.

**Technicians - Manufacturing Unit**

£21,622 p.a. to £25,433 p.a. inclusive*

These roles are a chance for newly qualified graduates or individuals with some relevant experience to gain new skills in a sophisticated technical environment.

Based within our manufacturing operation, you'll carry out activities connected with the preparation of therapeutic products - including operating large-scale process equipment, sampling batches and performing in-process checks for formulation. In addition, you'll play a vital role in improvement initiatives.

We are keen to hear from ambitious and highly motivated graduate calibre individuals who are eager to further develop their potential. Good communication and problem solving skills are essential, as is the ability to demonstrate a mature and professional attitude to your work.

In return we offer a competitive remuneration package with benefits including final salary pension scheme and subsidised restaurant and café, as well as excellent training and a superb working environment situated in a countryside setting.

Hours of work are as follows: 6am - 2pm and 2pm - 10pm.

For an application form, please apply in writing to the Personnel Department, Bio Products Laboratory, Dagger Lane, Elstree, Herts WD6 3BX or email us at [vacancies@bpl.co.uk](mailto:vacancies@bpl.co.uk) quoting reference TT/05.
CV's will only be accepted if accompanied by a completed application form. Closing date for completed applications: 14th July 2005.

*BPL in common with other NHS organisations is implementing the NHS Agenda for Change - a programme which will introduce new terms and conditions of employment. Therefore the salary of these posts are under review. Further details will be given at interview.

MINISTRY OF DEFENCE
NUCLEAR WEAPONS INTEGRATED PROJECT TEAM
ABBEY WOOD, BRISTOL

The Nuclear Weapons Integrated Project Team is responsible for maintaining the United Kingdom's nuclear warhead capability. We are looking for two individuals with bright lively minds, qualified to degree level in a relevant scientific specialism. As experts in your field you will have at least four years' experience and be able to work on your own initiative to meet challenging objectives. Excellent communication and influencing skills and the determination to achieve results and deliver to the customer are essential. You will be a strong team player with proven project management skills.

Senior Scientist • Ref: 308898
• £26,626 - £38,563 pa (a starting salary of of £34k will be available for exceptional candidates). This post will also attract an allowance of £2k pa for Nuclear Suitably Qualified and Experienced Personnel, paid on qualification

You will be a material scientist or a physical chemist responsible for management oversight of AWE's Science and Technology Materials Research Programmes, ensuring that the MOD's interests are looked after as cost effectively and efficiently as possible. That means managing all elements of the materials research programme in accordance with the principles of smart procurement, the requirements of the Customer Supplier Agreement and in line with agreed business plans. You'll also undertake strategic and technical assessments of the programme, providing reports to stakeholders on its materials science and technological aspects.

Senior Physicist • Ref: 308900
• £26,626 - £38,5563 pa (a starting salary of £34k will be available for exceptional candidates). This post will also attract an allowance of £2k pa for Nuclear Suitably qualified and Experienced Personnel, paid on qualification.

Take this role on and you'll be involved with the management oversight of AWE's Science and Technology Physics Research Programmes, making sure they are properly equipped to support the UK's nuclear weapon. Managing the programme in accordance with the principles of smart procurement, you'll undertake strategic and technical assessments of the programme, providing reports and briefings to stakeholders on the physics research programme.

For further information and to apply on-line: visit www.mod.uk/careers quoting the appropriate reference number. If you need any further assistance please telephone our 24 hour answer line on 0117 913 0498.

Closing Date: 22 July 2005.

The Ministry of Defence is an equal opportunities employer and seeks to reflect the diverse community it serves. Applications are welcome from anyone who meets the stated requirements.

You will assist with the coordination and implementation of monitoring work undertaken by SNH Maritime Group for the suite of marine SACs (Special Areas of Conservation) and intertidal SSSIs (Sites of Special Scientific Interest) in Scotland. This work forms part of a wider Common Standards Monitoring’ programme being undertaken by the UK conservation agencies. Responsibilities will include management and fieldwork aspects of marine survey work in conjunction with specialist external contractors. You will also be responsible for identifying where additional specialist skills are required and for the subsequent management of contractors to provide these services. A diving qualification to HSE Part IV, CMAS 3* or equivalent, with practical experience and knowledge of survey techniques and in-situ marine species identification in the Scottish marine environment are essential, as are experience of boat-based survey work and small boat handling skills.

MARINE ADVISORY OFFICER (NORTH-WEST) REF: AC87NI

You will provide advice and support in relation to a wide range of developments and activities, affecting the marine environment in north-west Scotland. You will be the first point of contact for all marine casework arising in these regions, excepting that relating to fisheries and marine renewables. You will also have responsibility, nationally, for casework arising from aquaculture activities and developments.

Responsibilities will include development, management and delivery of research contracts relating to these issues, as well as providing training in this area. You will also be required to contribute to the development of marine aquaculture policy and guidance, and to represent SNH on a range of working groups relating to this subject. Experience of providing casework responses for developments affecting Scotland's marine environment as well as delivering staff training events or programmes is essential for this post. A sound understanding of Scottish marine aquaculture legislation as well as experience of boat-based survey work and a diving qualification are desirable.

For both posts you will be degree qualified, with at least two years' relevant postgraduate experience. You will be an effective communicator with experience in all aspects of research project management from initiation to final report production. A current driving licence is essential.

A working knowledge of the diversity of Scotland's maritime natural heritage together with knowledge and an understanding of Nature 2000 - the Habitats and Birds Directives - and relevant UK legislation and policies would be a distinct advantage.

In return, we are offering a remuneration package including a starting salary of £21,376, with guaranteed progression based on satisfactory performance, generous leave allowance and a choice of final salary and stakeholder pension.

For further information and an application form please contact Amanda Hossack at Penna, our recruitment partners on 0131 446 2024 (24hrs) or e-mail snhge-penna.com quoting the relevant reference number and your address details. The date for receipt of completed applications is Friday 15th July 2005. Interviews will be held on Tuesday 16th August, in Edinburgh.

SNH encourages applications from all sectors of the community

INVESTOR IN PEOPLE

[2506-012 (2005) : 58]
The Scottish Executive is the devolved Government for Scotland. Our Environment and Rural Affairs Department works to improve the environment and helps rural communities benefit from services and enterprise, especially agriculture and fisheries. A wide range of science features in that work and the Department is looking to strengthen scientific leadership across all its business areas by appointing a Chief Scientific Adviser.

Effective policy development and delivery is increasingly dependent on the quality of the evidence on which it is based. Our Department is a significant funder of scientific research in a number of relevant scientific disciplines spending almost £100m annually directly and through its agencies. The approach to the funding of research is undergoing change as the Department seeks to maximise the policy relevance and quality of the research it funds. The appointment of a Chief Scientific Adviser will ensure leadership of those processes and comprehensive co-ordination of the Department's scientific interests. This will be fundamental to securing improved linkage between science and policy. Research is funded through a number of programmes and agencies but up to £6m of the overall funding will be subject to direct control by the Chief Scientific Adviser.

The Role:
• Develop a single science strategy to be applied throughout the Department and its agencies and non-departmental public bodies, to ensure that advice to Ministers and the delivery of programmes is well-founded in science and evidence.
• Explain and communicate the science behind the Department's work, within the Executive and more widely to stakeholders and citizens.
• Provide professional reassurance for research funded by the Department (especially the long term investment programmes).
• Be the professional leader for scientific staff throughout the Department.
• Provide excellent liaison with external funders and relevant UK research bodies.
Help to shape Scottish Executive and UK science policy.

The Candidate:
• A proven track record in the conduct and strategic management of scientific research in a relevant discipline and knowledge transfer.
• An outstanding communicator capable of addressing a wide range of scientific issues and disciplines.
• Proven leadership skills and the ability to develop a programme of knowledge transfer of research outcomes.
• Familiarity with the process of Government policy development.
• Ability to lead a mixed team of scientists and administrators.
• Established networking and public presentation skills.
• Familiarity with financial and contractual systems.

As Chief Scientific Adviser you will be required to maintain active links with the research community in Scotland.

Appointment will be for 3 or 4 days per week on a 4 year fixed term basis. Alternatively secondment from your existing employer would be welcomed. There is flexibility in determining starting salary, particularly for an exceptional candidate. Relocation expenses may be available.

You may access an information pack and apply online at
www.scotland.gov.uk/government/careers. Alternatively, please write to Helen MacPherson; Scottish Executive, Recruitment and Promotion Team, T-Spur, Saughton House, Broomhouse Drive, Edinburgh EH11 3XD (or Email: helen.macpherson@scotland.gsi.gov.uk providing your full postal address). We regret that we are unable to accept telephone requests. Completed applications must be returned by Friday 22 July. We will not normally accept applications after that date.

We welcome applications from all suitably qualified people and aim to employ a diverse workforce which reflects the people of Scotland.

PhD STUDENTSHIP

A studentship is available at the Institute of Orthopaedics & Musculoskeletal Science, UCL, in the Centre for Biomedical Engineering to investigate the early sequence of events at the tissue-implant interface of porous calcium phosphate materials used for bone repair. The student should be interested in biomaterial science and would examine the sequence of events using histology, immunohistochemistry and biochemical techniques. This project is funded by ApaTech Ltd. for 3 years and will be supervised by Professor Gordon Blunn and Dr Karin Hing. This studentship provides a standard stipend and tuition fees at the home/EU rate.

Enthusiastic graduates with a first or upper 2:1 degree in biological sciences interested in this opportunity should send a full CV, including three referees and letter of application to:
Professor Gordon Blunn
Head of Centre for Biomedical Engineering
Institute of Orthopaedics & Musculoskeletal Science, UCL
Royal National Orthopaedic Hospital Brockley Hill, Stanmore HA7 4LP Tel: 020 8954 0636
Email: g.blunn@ucl.ac.uk

Deadline: 3 weeks after publication.

Pre-registration/ Registered Scientist

If you are in Manchester already then we don't have to tell you what an outstanding city it is to live and work in. If not then it's time you discovered the fastest growing city outside London. New developments in the National Genetics Reference Laboratory, the North West Genetics Knowledge Park, the Centre for Integrated Genomics Research, the UK Biobank and Bioinformatics are only part of the investment in a fast growing genetics and science hub focussed on the newly unified University of Manchester.

We are offering two career development posts for ambitious scientists in a highly motivated team working in a modern, advanced and forward looking clinical genetic centre. The Regional diagnostic laboratory has recently benefited from extensive refurbishment and re-equipment and links directly to the informatics and service delivery programmes of the National Genetics Reference Laboratory in Manchester (www.ngrl.org.uk).

Post 1: Ref: SMH267
This is a key role for a scientist with the ability to innovate in a group translating research findings into new diagnostic tests and developing prototype reference materials within the National Genetics Reference Laboratory programme.

Post 2: Ref: SMH268
This is a chance for you to join the core diagnostic team working alongside a new high throughput genotyping facility to develop and improve patient services.

We are looking for ambitious, motivated and hard working scientists to join our group. A first degree in biological sciences and the Clinical Molecular Genetics Society training certificate OR equivalent and relevant post-graduate experience are the minimum qualifications we need for appointment at the pre-registration level.

Starting salary will be in the range £22,857 - £25,709 pa according to qualification and experience.

The posts are for three years in the first instance.
Closing date: 8th July 2005.

(Apply online, or contact us on 0161 276 6666 quoting the ref number.

[2506-017 (2005) : 60]
NOVOCELLUS
Novocellus Embryo Metabolism Clinical Study

Two HPLC Technical Officers
Leeds General Infirmary & St Mary's Hospital Manchester
Initial 1 Year NHS Fixed Term Contract
Continued Employment By Novocellus At End Of Study
Salary scale MT03
Full time

Background
Novocellus is a UK based diagnostic company engaged in the development of a potentially revolutionary clinical diagnostic test for use in IVF.
The test, which measures the amino acid turnover of an embryo, may for the first time enable embryologists to select only the most viable embryos for transfer back to the uterus. It is hoped that the use of this test will improve the live birth rates achieved via IVF. A pilot study demonstrated the potential clinical utility of the test and a new, much larger multi site study is now planned for late summer 2005.

The Post
Two new posts have been created specifically to contribute to this research on embryo health and the biology of assisted reproduction, one post at the Leeds General Infirmary, and the second at St Mary's hospital, Manchester. The two post holders will be responsible for the routine HPLC analysis of amino acid levels in spent embryo culture medium as part of a clinical trial of this new analytical method for selecting embryos in IVF clinics. They will also be responsible for the maintenance of records, HPLC and related equipment and the analytical laboratory to quasi-GLP standards. In addition, post holders will assist the clinical embryologists with the maintenance of adequate stocks of all materials required for the trial.
The post at each site will be a fixed one year, full time contract in the first instance. Novocellus will offer the post holders permanent full time employment on normal private sector/commercial terms on successful completion of the clinical study. The ongoing role is open to further discussion with post holders but is likely to be in a technical or customer service role.
The post holders will need to be flexible to meet the needs of the service and the research projects. They must be technically competent, diligent and possess excellent communication skills. They must also be adaptable to change and be able to work independently as well as within a team.

Minimum qualifications
Candidates will possess an HNC/Degree in Biochemistry or Chemistry. Experience in the operation of HPLC equipment and/or working in a GLP environment highly desirable.
The successful applicant will be provided with formal training in the correct operation and maintenance of the HPLC instrument, the operation of the Novocellus test procedure and the working practises associated with conduct of HPLC analyses in an NHS Clinical Service IVF Laboratory, licensed by the HFEA.
For an application form and detailed job description please write to Amanda Leigh-Jones (or email: aljones@novocellus.com) enclosing a current CV and quoting reference HPLC 201E. Please state your preferred location(s). Applications should be received by 15th July 2005.

Ahlstrom

Innovative Project Managers - Nonwoven Manufacturing

Ahlstrom is a 150 year old Finnish company producing innovative materials solutions at 15 sites in Europe, the Americas and Asia. The company's products comprise a wide range of speciality papers and nonwoven fabrics including glassfibre reinforcement webs, teabag tissue, domestic and industrial wipes, air and oil filters, viral barrier medical fabrics, and many, many others. The one common feature of these products is innovation. In 2004, worldwide product sales approached €2 billion.

To support the company's growth in nonwovens, the New Technology Group is expanding. Two vacancies exist for talented and innovative scientists or engineers to work as Project Managers, reporting to the Director of New Technology. Their prime role is to identify, evaluate technically and financially, and help install and commission new manufacturing processes, technologies and/or equipment, usually at the cutting edge of nonwovens technology. Working with customers in the design and development of new products is another important function. Whilst the Project Managers will be based in the UK, their projects may be aimed at operations in other countries.

The positions require highly self-motivated and organised individuals capable of managing several projects simultaneously, and interacting successfully with people of different disciplines and at many levels, both within and outside the company. They will be responsible for planning projects, and managing activities, timelines and costs to a successful conclusion. Effective communication and teamworking skills are essential. Overseas travel will account for about 25% of their time, although this is variable.

Qualifications required:
A minimum of a 2:1 in a science subject, or paper, chemical or polymer engineering, preference given to Ph.D. degree holders. A proven track record of successful project management in a manufacturing environment, either in product or process development. A proven track record of innovation. Good presentation skills. Fluent in English. Ability in other languages would be an advantage.

Ahlstrom believes in developing its employees, and has several training programs to support this. Opportunities for progression exist within the entire Ahlstrom organisation.

Please send your CV to Mrs Seonaid Lough, Personnel Manager, Ahlstrom Nonwovens, Chirnside, Berwickshire TD11 3JW quoting current salary
Email: Seonaid.lough@ahlstrom.com

Staff Scientist(s)
Cell and Molecular Biology
Cambridge Science Park £Competitive + Benefits

One of the world’s foremost biotechnology companies, Genzyme is dedicated to making a positive impact on the lives of people with serious diseases. The newly established Genzyme Europe Research facility, located in Cambridge, UK, is focused on the discovery and characterisation of novel and next-generation therapeutic antibodies for a wide range of target diseases. We now seek two team players for key support roles in Cell and Molecular Biology, which offer the opportunity to make an impact in an exciting and fast-paced new venture.

Your role will be pivotal to the selection and screening teams within the Antibody Technology group; you will be responsible for the maintenance and supply of newly-derived and established cell lines, primary cell culture, and the timely supply of validated cells to other teams within the group. You will also be involved in assay development where your experience in cell-based techniques will aid you in innovating and optimising appropriate assays in response to a varied range of targets.

In addition to expertise in cell-based assays (including proliferation, reporter gene and receptor-ligand binding) you will be computer literate, display meticulous attention to detail and have excellent communication and organisational skills. Experience of using antibodies including scFv and Fab; HTS and/or automation; flow cytometry; molecular biology including cloning would be an advantage. Candidates will either have a BSc plus 2-4 years’ relevant experience or a lower qualification plus 4-6 years’ relevant experience. Industrial experience is desirable.

E-mail your CV with current salary details to CareersUK@genzyme.com or post it to HR Department, Genzyme, 37 Hollands Road, Haverhill, Suffolk CB9 8PU quoting H05/108/PD/NS.

Closing date: 21st July 2005.

Making medicines safe for everyone.

**Assistant Pharmacovigilance Scientist**  
c. £18,667 LONDON

The MHRA is an executive agency of the Department of Health and is responsible for safeguarding public health by ensuring that medicines, healthcare products and medical equipment meet appropriate standards of safety, quality, performance and effectiveness. Making sure that all medicines and medical equipment are entirely safe is an essential part of the function we serve, and this role is of the utmost importance in supporting that aim. You will need to be both conscientious and enthusiastic, as well as happy to work as part of a highly professional team. You will be at the forefront of processing Adverse Drug Reaction reports, thus safeguarding the public, whilst gaining invaluable experience of working within the drug safety field.

A graduate in Life Sciences, or a graduate with relevant pharmacovigilance experience, you must be organised under pressure with the ability to meet tight deadlines. Being both self-motivated and used to working on your own initiative, your eye for detail and excellent communication skills will stand you in good stead in this exacting and challenging role. Please note that the full salary range for this position is £18,667 - £23,071. The benefits package includes 30 days holiday, 10,5 public/privilege days, civil service pension scheme and a season ticket loan.

Please contact the Human Resources Department for an application pack by emailing: jobs@mhra.gsi.gov.uk or fax 020 7084 2522. Alternatively, write to MHRA, Market Towers, 1 Nine Elms Lane, London SW8 5NQ.

The closing date for application is: Friday 15th July 2005

POSITIVE ABOUT DISABLED PEOPLE

[2506-021 (2005) : 62]
At smith&nephew we do pioneering work in many important areas, including adult stem cells and tissue engineering. We’re looking for people who share our passion for science that makes a difference.

Research Centre, York

Bioengineering/Biologist

You will work in our Cell Based Therapies Programme, applying your technical expertise to research activities. You’ll also be involved in setting up and managing substantial contracts with the industrial and academic contractors who contribute to our work.

Your first degree will be complemented by research experience in cell biology and bioengineering, preferably including the development of medical products or processes. You will have excellent people skills and experience of leading research teams.

Biology Research Scientist

Working in our Cell Based Therapies team, you will contribute innovative ideas and practical skills in cell biology and biochemistry to research aimed at regenerating orthopaedic tissues. This will include designing, planning and executing detailed experimental studies and reporting back your conclusions.

Adept at problem solving, degree educated in Biology and with technical laboratory experience, you will have an understanding of fundamental cell biology procedures and be willing to transfer your skills to other areas such as histology and molecular biology.

Biochemist

Joining our Wound Management Research Programme, you will contribute your practical skills in biochemical-based analysis of cells and their products. Your experimental results will be used to support our programme in next-generation tissue engineering for chronic wound repair.

Educated to degree level in a relevant biological science, you’ll be able to demonstrate creativity and excellent problem-solving skills. This position would particularly suit a new or recent graduate.

Cell Biologist (two positions)

You will work in our Wound Management Research Programme contributing new ideas within the area of tissue engineering/regenerative medicine. You will focus on applying your knowledge and experience of cell biology procedures to conduct experiments which solve problems posed by project objectives. You will need excellent problem-solving skills to translate laboratory findings into commercialised products for chronic wound treatment.

You will have a first degree in a biological science, which should include a substantial cell biology component. It’s likely that you will be a recent graduate.

To apply, please send your CV to Helen Shakeshaft, Senior Human Resources Advisor, Smith & Nephew Research Centre, York Science Park, Heslington, York Y010 5DF, or alternatively email Helen.shakeshaft@smith-nephew.com

Closing date: Friday 15th July 2005

OCTEL
RESEARCH CHEMISTS
TECHNICAL SERVICE CHEMISTS ANALYSTS

DEVELOP YOUR TALENT AND MAKE A DIFFERENCE

Building on over 60 years of expertise in fuel additives, Octel is a flourishing specialty chemicals business with a turnover of $480m and around 820 employees based in 21 countries. The Petroleum Specialties business is one of the world’s leading suppliers of petroleum additives in our chosen markets, offering technical solutions to the refinery, transportation, heating and power sectors in more than 65 countries around the world.

We recently announced that UK based research and technical service activities for Petroleum Specialties will be concentrated at our Ellesmere Port site. The research facility will focus on developing products for the additives market throughout the world. The technical service facility will primarily support customer projects and field trials for the Europe, Middle East and Africa region.

The consolidation of these facilities at Ellesmere Port has created a number of challenging new opportunities:

Research
Research into Fuel Additives is concentrated on technology platforms such as Surfactancy, Organometallics and Stability. A Platform Leader has responsibility for heading each area of technology.

**Platform Leader (Ref G1)**
You will be responsible for planning and delivering the agreed research programme for the technology platform. This will involve the management of research projects and the development of teams and individuals to achieve programme objectives. You should be qualified to degree level in Chemistry or a relevant scientific discipline, and should have a minimum of 5 years’ relevant experience in fuel additives, or a related product area.

**Research Chemist & Analysts (Ref G2)**
The roles will be predominantly laboratory based and will include testing and synthesis of fuel additives and formulations. You should be qualified to degree level in Chemistry or a relevant scientific discipline, and should have about 3 years’ relevant experience.

Technical Service
In order to enhance the value to our customers of the technical service and sales support we can deliver globally and regionally, we are creating a single technical service organisation for the Europe, Middle East and Africa region.

**Technical Service Co-ordinator (Ref S3)**
You will be responsible for providing technical solutions to our customers. This is a hands-on role and your main tasks will be to plan, implement and document technical service work and to present your recommendations to the sales team and to customers. This will involve travel around the region. You should be qualified to degree level in Chemistry or other relevant discipline, and should have a minimum of 5 years’ relevant experience.

**Technical Service Chemist (Ref S4)**
You will be responsible for undertaking testing to support our customers in a timely fashion. The roles will be laboratory based and may involve some travel. You should be qualified to degree level in Chemistry or other relevant discipline, and should preferably have 2 years’ industrial experience.
Each of these demanding positions offers the competitive salary and benefits package expected from a progressive organisation. For more information on Octel, visit our website on www.octel-corp.com

Please send your CV and current salary details, indicating which position you are interested in, by email to Nicky Harmes at harmesn@octelcorp.com

PO Box 17, Oil Sites Road, Eliesmere Port, Cheshire. CH65 4HF
[2506-023 (2005) : 64]
Formulation Scientist and Registration Manager

Agropharm is an international pesticide manufacturer that has been established for over 30 years. The business is expanding rapidly and to underpin this growth we require the following staff. These are key positions in Agropharm and require experienced personnel. Salaries will depend on experience and ability but will be competitive.

Formulation Scientist
This position requires a person with experience of developing pesticide formulations and scale up to production. He/She will have a minimum of 10 years experience in pesticide formulations and knowledge of EC, ME, EW, SC, WP and CS formulations. This position will be based at our manufacturing plant in Telford, Shropshire.

Registration Manager
This position requires a person with experience of registration processes in the UK/Europe, Africa and the Middle East. Experience with pesticide registrations is essential and a knowledge of working practices in the target countries is desirable. He/She will be responsible for preparing dossiers for the products of interest and liaising with counterparts in registration departments. This position will be based at the Head Office in the village of Penn, Buckinghamshire.

Interested
More information about the vacancies and Agropharm in general can be found on the website http://www.agropharm.co.uk/vacancies.asp. Applications with full CV and covering letter stating current salary and notice conditions should be emailed to sales@agropharm.co.uk and marked for the attention of Mrs G Walker. Closing date for applications is 22nd July 2005.

Agropharm Ltd

Invitrogen 
ONLY FIVE PEOPLE HAVE THE BACKGROUND FOR THESE ROLES

Invitrogen is a $billion company at the cutting edge in the Life Science Industry. Our products have been instrumental in the discovery of the AIDS virus, mapping the human genome and advancements in cancer treatment.

**Quality Systems Manager.**  
Inchinnan, Scotland. Competitive salary plus excellent benefits.

In the Life Science Industry, quality is a life or death issue and your role is improving every aspect of our quality systems by planning, developing and managing strategic quality and compliance evaluations. You’ll develop relationships with critical customers to help achieve their expectations, and our own. Down to earth, approachable to people of all cultures, at all levels your honesty and integrity are above question. Above all, you’ll be a tireless worker in the quest for quality.

**Technical Services Manager**  
Europe and Scotland. Competitive salary plus excellent benefits.

Your role is managing our Technical Services across multiple business units including recruitment, performance evaluation and monitoring and ensuring the availability and effective use of resources.

You’ll also monitor departmental operations. Developing departmental goals and objectives, you’ll meet business needs and priorities and set and keep to budgets.

Maintaining the highest levels of customer satisfaction and directing the flow of information to worldwide Technical Services will be your goal.

**Six Sigma Specialist**  
Inchinnan, Scotland. Competitive salary plus excellent benefits.

Your role involves the continued development of our program and services including tools, training and project mentoring. You’ll develop and execute supply chain optimisation programs and in service process improvements supporting stronger Client Service and fulfilment of engagements. Customer and supplier partnering to lead project opportunity definition and project selection, you’ll develop and define success criteria and metrics. You’ll act as team leader, coach project team members and train suppliers.

**Distributor Sales Manager**  
Inchinnan. Competitive salary plus excellent benefits.

This is a senior role in which you’ll manage distributors in markets we serve directly and those we serve indirectly via distributors. You’ll consistently meet or beat the area sales plan while monitoring and analysing performance. You’ll communicate and implement sales strategy and tactics in line with sales and marketing plans and use your commercial and marketing knowledge to direct the distributors.

The sales performance of every Invitrogen brand will be your responsibility.

**Marketing Manager for Emerging Markets**  
Inchinnan. Competitive salary plus excellent benefits.

Focusing on new technologies/acquisitions and working with the Direct and In-Direct Invitrogen Commercial teams across Europe you will develop an intimate understanding of regional business opportunities in emerging markets.
With previous commercial experience gained in areas such as the diagnostic and/or pathology markets you will be required to provide strategic direction in the positioning of Invitrogen key technology platforms within these areas.

As you’ll be joining a $billion company, the rewards package, in each role, reflects this. As well as a competitive salary, you can expect an excellent benefits package.

The RSC is the largest organisation in Europe for advancing the chemical sciences. Supported by a network of 45,000 members worldwide and an internationally acclaimed publishing business, our activities span education and training, conferences, science policy and the promotion of the chemical sciences to the public.

Opportunities in Publishing
Cambridge

The Royal Society of Chemistry (RSC) is a major publisher of books and journals such as ChemComm, the Analyst, PCCP, Chem Soc Reviews and J Materials Chem.

If you have a good honours or masters degree or PhD in a chemical or related science and are interested in a career in scientific publishing, then we want to hear from you. We will provide the successful graduates with training in Editorial/Production Publishing and insight into Marketing, Sales and other RSC activities. Your role will be working in a team with Editors where you will enjoy day to day challenges and responsibilities.

We seek excellent communicators and team-workers who are comfortable making decisions. You must be organised and able to work under pressure, handling high workloads whilst maintaining best standards. Other essential qualities include excellent English and a keen eye for detail. A background in Chemical Biology would be an advantage but not essential.

Starting salary will be £18,979. Benefits include pension, life assurance and private health insurance.

Further information about the RSC and these posts is available on our website at www.rsc.org where you can download our application form. Alternatively, phone 01223 432238 (24 hours), or email hr@rsc.org Please send applications only and quote vacancy ref. no. 35.

Closing date: 29th July 2005; the positions are available immediately. The assessment centre will be on 6th September 2005.

Quintiles is the market leader in providing a full range of integrated product development and commercialisation services to the pharmaceutical, biotechnology and medical device industries. Quintiles is also a leader in the electronic data interchange and healthcare informatics industry and provides healthcare policy consulting to governments and other organisations worldwide.

Clinical Physiologist (Neurophysiology)
3-6 month fixed term contract

Guy’s Drug Research Unit, Quintiles’ UK Phase I Unit, is one of the world’s leading drug research units which specialises in Phase I clinical drug studies, particularly in first administration to man. We have been involved in the development of dozens of new compounds over many years and we will be continuing to advance drug therapies into the future. Ideally we are seeking a motivated and reliable Clinical Physiologist (Neurophysiology) to work on a variety of exciting clinical projects. You will be available on a flexible basis to assist with the collection of EEG data ensuring that the Phase I clinical trial runs smoothly and equipment performs to specification. With additional training, other tests may be performed within the unit, including pharmaco-EEGs and a variety of evoked potentials. Consideration will also be given to applicants who are not specialist in Neurophysiology but have a broader background in physiological measurements and / or experience in clinical trials.

We offer an excellent training and development programme for all members of staff.

You should be qualified to HNC, MPPM or degree level and have your ECNE part one exam. Likely to be from a hospital background, this position would suit someone who is both flexible and adaptable.

For more information, please contact Diane Sawyers, Head of Clinical Physiology on 020 7910 7716 or diane.sawyers@quintiles.com

To apply, please write enclosing a detailed CV and current salary details, stating the position for which you are applying, to Nadia Zarin, HR Adviser, 6 Newcomen Street, London SE1 1YR. Alternatively, please email it to nadia.zarin@quintiles.com

OPEN TO INNOVATE

You don’t set the pace in pharmaceutical research by following others. You do it by challenging convention, exploring new possibilities and creating new pathways to drug discovery. If you’re ready to help shape the future of respiratory medicine, it’s time to join our state of the art research facility in Horsham, UK.

**Cell Signalling Scientist - 6372BR**
**Scientific Associate - 6373BR**

We’re looking for a Cell Signalling Scientist to engage in a wide range of activities. These will include characterising signalling pathways, identifying signalling proteins as targets, subjecting them to molecular and functional analysis and profiling new chemical entities. You must be a post-doc or experienced graduate with a track record in one of the following: *in vitro/cell based assays* to analyse cell signalling events; molecular biology and protein biochemistry; and assay development.

We also need a Scientific Associate to help us identify, characterise and develop novel therapeutic targets. You’ll be involved in target discovery and validation, the development of *in vitro* assays and the provision of support for drug discovery programmes. This role calls for a BSc/MSc, not a PhD, and three or more years’ practical research experience - ideally including expertise in cell culture and molecular techniques.

To find out more, view descriptions of all open positions and to apply online, visit [www.novartis.com](http://www.novartis.com) quoting the relevant reference number.

Closing date: Wednesday 20th July.

SENIOR EDITOR

An exciting opportunity to join a rapidly expanding publishing team has arisen at Future Medicine, a publisher of high-quality review journals for the biomedical specialities. We are looking for a Senior Editor to assist in the development and management of our portfolio.

Working closely with the Editorial Director, the Senior Editor will be involved in the commissioning process, content evaluation and presentation, and new product development. The role requires an ability to communicate effectively, both with international opinion leaders in science and with members of the in-house publishing team.

We are seeking ambitious, organized and energetic candidates with excellent interpersonal skills. Ideally applicants should have a good life science degree and at least 2 years’ editorial experience.

To apply for this position, please send CV and covering letter to Elisa Manzotti, Editorial Director, Future Medicine Ltd, Unitec House, 2 Albert Place, Finchley Central, London N3 1QB. E-mail: e.manzotti@future-drugs.com; Tel.: +44 (0)20 8349 2033

Advance ENVIRONMENTAL

Consultant in Legionella Control
(Opportunities throughout the UK)

Advance Environmental Ltd work in the field of water and air quality in the built environment and our core business is the prevention or Legionnaires’ disease in buildings. Our reputation for a quality service is key to the success of the company and has brought us strong contracts with many major NHS Trusts and blue-chip companies that have led us to be a leading light in our industry.

We require consultants to join our team and commit 100% to the growth of the company and be involved in all areas our work activities.

The majority of your work will be carrying out legionella risk assessments and the monitoring for legionella control. It will be your responsibility to produce the reports that will include details of your inspections of water storage tanks, hot water boilers and air conditioning systems, with schematics of the pipework.

You will work from home and travel to our customer sites. Some travel and occasional overnight stays may be expected.

You should be a science graduate or similar and ideally have some experience in building water systems and/or some knowledge in the control of legionella bacteria but full training will be provided. It would be advantageous have some understanding of water distribution pipework and/or domestic plumbing but a practical mind and responsible attitude is essential.

These are permanent and full time positions with a starting salary in the region £19 - 25K per annum dependent on experience. You will have a company car and access to our pension scheme.

This is an opportunity to join a team where you count as an individual, your effort is recognised and the work you do matters.

If interested please forward a CV, expected salary and a hand written letter to:

ST
[2506-037 (2005) : 68]
UNIVERSITY OF OXFORD
Mathematical and Physical Sciences Division
Department of Physics
Fixed-term Departmental Lectureship in association with St John’s College
plus a College stipend

The Department of Physics proposes to appoint a person with a proven record of research to a fixed-term, until 30th September 2010. Departmental Lectureship in the sub-department of Atomic and Laser Physics. The post will be held in conjunction with a supernumerary Fellowship at St John’s College and will begin on 1st October 2005 or as soon as possible thereafter.

Preference will be given to candidates with recognised expertise in quantum optics and in light-matter interactions in the quantum regime, including applications in quantum technology, such as information processing. He or she will be expected to contribute to an internationally excellent research effort and be an effective teacher at both the undergraduate and postgraduate levels. It is expected that the successful candidate will work with existing experimental programmes in the department. (See http://www.physics.ox.ac.uk/al/index.htm for a description of current research in the Department).

The combined University and College salary will be according to age, in addition to which the College pays a number of allowances as described in the Further Particulars. Further Particulars are available on the departmental website or from Professor Ian Walmsley, Department of Physics, Clarendon Laboratory, Parks Road, Oxford OX1 3PU, tel. (01865) 272205, fax: (01865) 272375, l.walmslevl@physics.ox.ac.uk The application procedure is described therein. Applications, quoting reference number DU05/021, should be submitted by 5th September 2005.

The University of Oxford and St John College are Equal Opportunities Employers.
The University of Sheffield

Supporting excellence, expanding horizons...

**Contracts Manager - Research Support Office**
£28,850 - £36,546 p.a. depending on experience Ref 04K0794

The University of Southampton is one of the UK’s top 10 Research Universities with an excellent reputation for innovation & enterprise. The team at the Research Support Office (RSO) work closely with academics and researchers across the University providing support, advice and assistance on research funding, contract and policy matters.

As one of a team of three Contract Managers you will be responsible for reviewing and negotiating contracts for research and consultancy to ensure we obtain the best possible terms for the University and our academics, whilst maintaining the RSO’s reputation for delivering an efficient and professional service. You will gain:
- a portfolio of contracts - from small consultancy projects to multi-million pound international collaborations;
- primary responsibility for a number of Schools across a variety of disciplines;
- the opportunity to work with academics who are international experts in their field;
- the experience of dealing with many leading technology and pharmaceutical companies and government organisations worldwide.

No two days will be the same but they will be equally challenging and stimulating.

Are you....... a commercially astute, confident individual educated to degree level or equivalent, who is a self-starter, excellent communicator and a real team player?

Do you… have extensive experience in research contracts or grants from within higher education, industry or legal practice? Do you come from a scientific (especially bioscience, chemistry or medical) background? Or do you have the skills, drive and ability to rapidly learn in order to undertake the Contract Manager role as training will be given? If so we would like to hear from you.

For an informal discussion, contact Dr Peter Hooper Director of Research Support. tel + 44 (0)23 8059 4695, email: peterhooper@rso.soton.ac.uk

An application form and further particulars may be obtained from the Human Resources Department (K), University of Southampton, Highfield, Southampton SO 17 1BJ, tel: 023 8059 2750, email: recruit@soton.ac.uk or minicom: 023 8059 5595. Alternatively visit our website at www.jobs.soton.ac.uk. Closing date for applications 14 July 2005. Please quote reference number 04K0794.

Interviews will be held on 27 and 28 July 2005.

University of Southampton

Working for Equal Opportunities
University of Southampton - at the cutting edge of innovation

[2506-040 (2005) : 69]
Senior Research Associate: Palaeoceanography (Rapid Climate Change Programme)
£19,460 to £21,640 per annum   Ref: RAI76

Applications are invited for a 3 year fixed-term, full-time appointment as Senior Research Associate within the 5** School of Environmental Sciences at UEA, to research aspects of rapid climate change associated with the operation of the Atlantic Ocean’s Thermohaline Circulation. The project seeks to assess the extent to which palaeoceanographic changes and allied changes in the North Atlantic region are involved in instabilities in the Earth’s climate system during the Holocene. Research will focus on high-resolution reconstructions of changes in surface and deep hydrography deduced through analysis of deep sea sediment cores.

Applicants must have completed a PhD in Marine Geoscience and have a strong interest in palaeoceanography and expertise in taxonomy and geochemistry of calcareous microfossils. Expertise in foraminiferal taxonomy and familiarity with stable isotope analysis are needed and use of LA, ICP and MS is desirable.

The position is funded through the Rapid Change thematic programme of NERC, and is available immediately for a period of up to 36 months.

Appointment salary will be dependent on experience and qualifications for appointment on the above scale. August 2005 pay award pending.

Informal enquiries should be sent to Dr Mark Chapman (m.chapman@uea.ac.uk)

Further particulars are available at http://www.uea.ac.uk/env/vacancies.html

An application form should be obtained from the Personnel Office, University of East Anglia, Norwich NR4 7TJ (Internet: http://www.uea.uk/personnel/jobs/ or email: personnel@uea.ac.uk or answerphone: 01603 593493), to be returned by 22 July 2005 quoting reference RAI76.

Interviews will be held in early August 2005

POSITIVE ABOUT DISABLED PEOPLE
[2506-041 (2005) : 70]
UNIVERSITY OF SALFORD
Nanotechnology at Salford
An opportunity to be at the start of a world-beating project

SEM on a chip

Two postdoctoral researchers, starting in October 2005, are required for research and developments in nanotools. A joint project between NFAB, a nanotechnology company, and the Institute for Materials Research (IMR) at Salford has recently been established to develop patented cutting-edge nanotechnology. The aim of the 2-year project is to establish the feasibility of making a low voltage, atomic resolution SEM (scanning electron microscope) on a chip. This is potentially world-beating technology and is an opportunity to be at the beginning of a very exciting project. The main thrust of the work will be to use the Salford state-of-the-art FIB (focused ion beam miller to manufacture structures, such as electron lenses, at the nanoscale.

Experience with FIB systems, ion beams, electron microscopes or MEMS would be an advantage but not to the exclusion of good candidates who have demonstrated an ability to work successfully at the cutting edge of technology – particularly in some aspect of nanotechnology. Experience in electron optics and vacuum technology would also be useful.

The successful candidate will be employed by NFAB but will work in the IMR at Salford University. An initial salary in the range £22,000 - £26,000 will be payable. The project is for two years and employment contracts are initially for one year with an extension for a further year. A successful outcome of the project may lead to further opportunities for candidates who have demonstrated their competence and commitment.

Send a CV, including the names of two referees, with a covering letter stating why you feel that you are the right person for one of these positions to Prof Derek Eastham, NFAB Ltd, OptIC Technium, Ffordd William Morgan, St Asaph Business Park, St Asaph, Denbighshire, LLI 70JD, UK. Closing date is July 29/05 and interviews will be held shortly afterwards.

[2506-042 (2005) : 70]
The University has established an Electronics Design Centre for Heterogeneous Systems. We require:

**Lecturer** (two posts)
£23,643 - £35,883

**Lecturer/Senior Lecturer/Reader** (one post)
£23,643 - £42,573

You will join the Centre at Lecturer, Senior Lecturer or Reader level depending on experience. During the first five years of the appointment, at all levels you will have a much reduced teaching load. You must have a proven track record in research in innovation in electronic design. The posts are in, but not exclusive to, the following fields:
- Ref 11345/HRP/A1 - VLSI design and integration with microsystem technologies, biomedical systems and/or bioMEMS, sensor systems and applications.
- Ref 11346/HRP/A1 - Millimetre wave and microwave integrated circuits and subsystems.
- Ref 11347/HRP/A1 - Sub-circuit to system modelling with deep sub-micron technologies liaising with semiconductor device modelling and electromagnetic theory and modelling.

**Research Fellow/Research Technologist**
£19,460 - £35,883

You will join the Centre in the role of a Research Fellow/Research Technologist. As well as the day-to-day work of managing the laboratory you will be expected to develop your own research and develop industrial and academic collaborations, potentially as a consultant. Experience in electronic design in one of the following would be an advantage: nanoelectronics; VLSI design and Microsystems; compact modelling for deep sub-micron technologies; computational electromagnetics in electronics. This post is available for five years. Ref 11348/HRP/A3.

For an application pack, please see our website or write quoting appropriate reference to the Recruitment Section, Human Resources Department, University of Glasgow, Glasgow G12 8QQ.

Closing date: 4 August 2005.

The University is committed to equality of opportunity in employment.

UNIVERSITY of GLASGOW
www.gla.ac.uk
[2506-043 (2005) : 70]
UNIVERSITY OF ABERDEEN
1495
School of Medicine
Department of Obstetrics and Gynaecology
Research/Clinical Embryologist
£19,460 - £29,128 per annum

You will undertake clinical and research work within the embryology laboratory of the Assisted Reproduction Unit. Clinical activities will involve oocyte recoveries, semen preparation, intra-cytoplasmic sperm injection (ICSI), embryo culture, embryo transfer and cryopreservation of embryos. A number of embryology research projects funded by the MRC and the Wellcome Trust are underway within the unit. You will be expected to take an active role in an ongoing project investigating the morphology and metabolism of human embryos up to the blastocyst stage.

This post is available for a period of two years in the first instance. Informal enquiries to Dr Siladitya Bhattacharya (tel: 01224 553267, e-mail: s.bhattacharya@abdn.ac.uk) or Lorna Bell (tel: 01224550567, e-mail: l.m.bell@abdn.ac.uk).

Online application forms and further particulars are available from www.abdn.ac.uk/jobs. Alternatively, e-mail: jobs@abdn.ac.uk or telephone (01224) 212127 (24 hour answering service) quoting reference number Y06039R for an application pack. Closing date: 14 July 2005.

Promoting Diversity and Equal Opportunities throughout the University [2506-044 (2005) : 70]
University of Newcastle upon Tyne
EU-funded Design Study: Developmental Gene Expression Analysis Centre

This exciting new 3 year project brings together developmental biologists, bioinformaticians, computer scientists and ethicists to develop the laboratory, informatics and ethical frameworks to undertake large-scale gene expression studies during early human development.

The research will be housed within the Institute of Human Genetics (see http://www.ncl.ac.uk/ihg), the Policy, Ethics and Life Sciences Research Centre (see http://www.ncl.ac.uk/peals/) and the National e-Science Centre (see http://www.nesc.ac.uk/). The IHG was opened in 2001, as part of the International Centre for Life, and has excellent research and educational facilities. The Institute staff achieved the highest possible rating (5**A) in the recent UK Research Assessment Exercise. PEALS Research Centre was established in 1999 as a partnership between the Universities of Durham and Newcastle and the International Centre for Life. PEALS aims to promote research and debate on the social and ethical aspects of genetics and other life sciences. The National e-Science Centre aims to stimulate and sustain the development of e-Science in the UK and to contribute significantly to its international development. In August 2001, the e-Science Institute at the University of Edinburgh opened as the focus of their operations.

There are 8 posts available: project manager; senior post-doctoral researcher; two post-doctoral researchers (biologist and ethicist/social scientist); senior computer scientist; bioinformatician and secretary (all in Newcastle) computer scientist (Edinburgh).

The closing date for applications for the Newcastle posts is July 8 2005 and interviews are expected to be arranged in the week of 18 - 22 July 2005. The closing and interview dates will be later for the Edinburgh post.

Further information on the Newcastle posts can be obtained from Dr Susan Lindsay, e-mail: s.lindsay@ncl.ac.uk and on the Edinburgh post from Gill Maddy, e-mail: gill@nesc.ac.uk

Details on the applications process for all posts are available on the respective University web sites, http://www.ncl.ac.uk/vacancies/list.phtml?category=Research and https://www.jobs.ed.ac.uk/ or contact: Tonya Allison, Institute of Human Genetics, International Centre for Life, Newcastle upon Tyne NE1 3BZ, telephone (0191) 241 8616, fax: (0191) 241 8666, e-mail: tonya.allison@ncl.ac.uk

THE UNIVERSITY of York
DEPARTMENT OF BIOLOGY

Part-time Skills Development Co-ordinator
We are seeking an enthusiastic, creative person to co-ordinate, promote and in some cases deliver a programme of transferable skills and career development training for graduate students and postdoctoral researchers. You will work with academics, individuals and their supervisors to identify training needs, and will develop a network of contacts with career information sources and training providers to identify the best means of meeting those needs.

A graduate with experience in delivering training or teaching at some level, you will have outstanding interpersonal skills to form effective partnerships within and outside the department. A background in science or a teaching or training qualification (or part-qualification) would be an advantage.

Informal enquiries about the post (for application instructions see below) may be made to Janina Pirozek, Biology Personnel Manager, email: biol-personnel@york.ac.uk tel: 01904 328506 or Professor Ottoline Leyser, email: h moll@york.ac.uk

Salary will be within the range £19,460 - £29,128 p.a. (reduced pro-rata). This post is available for an initial period of two years. The hours of work are part-time, and may be up to 22 per week.

For further particulars and details of how to apply, please see our website http://www.york.ac.uk/admin/persnl/jobs/ or write to the Personnel Office, University of York, Heslington, York YO10 5DD, quoting reference DH05258.

Closing date: 21 July 2005.

The University of York is committed to diversity and has policies and developmental programmes in place to promote equality of opportunity. It particularly welcomes applications from ethnic minority candidates.

[2506-046 (2005) : 71]
SAC
SAC is a Scottish organisation dedicated to innovation and the transfer of knowledge to the land based industries. Our 900 staff provide consultancy, research, education & training services to rural businesses and communities via a nation-wide network of around 40 business units.

RESEARCH AGRONOMIST R&D/CS/141/04
This is an excellent opportunity, within SACs Crop and Soil Research Group at Aberdeen for a research agronomist to join the Organic Farming Team. The successful candidate will take responsibility for applied ecological and agronomy elements and help to run an interdisciplinary research programme on organic farming systems. You will also be involved in teaching on the postgraduate course in Organic Farming.

Applicants should have a PhD in research relevant to farming systems and experience of developing and running research projects in agroecology. Experience of organic farming is desirable but not essential. A track record of attracting research funding, project management skills and an excellent publication record are essential requirements for this post.

The salary will be in the region of £26,853 - £30,384 per annum. A final salary Pension Scheme is in operation.

Application packs are available from Human Resources, Scottish Agricultural College, West Mains Road, Edinburgh EH9 3JC. Tel: (0131) 535 4343 (answering machine), Fax: (0131) 535 4322, HumanResources@sac.co.uk or our website http://www.sac.ac.uk/jobvacancies.
Closing date: 14 July 2005.

INVESTOR IN PEOPLE
[2506-047 (2005) : 71]
Postdoctoral Research Assistant
(Molecular Pharmacology) 2 posts
£19,640 - £27,116 dependent upon experience
24 months fixed term

INSTITUTE OF CANCER THERAPEUTICS Ref: RCRU23O7/NS

You will have a PhD in molecular biology, genetics, pharmacology or a similar discipline. Experience in cancer research, molecular pharmacology, gene targeted protein expression and creation of experimental tumour models will be a distinct advantage. These Cancer Research UK funded positions are required to drive the development of clinically relevant human tumour models for the evaluation and assessment of novel tumour targeted medicines. Studies will involve a broad range of molecular and pharmacological based techniques including DNA manipulation, protein expression, proteomics, mammalian cell culture, in vivo tumour model development and molecular pharmacology. Successful candidates will be encouraged to take a leading role in the advancement of non-invasive methodology for preclinical pharmacology studies.

Postdoctoral Research Assistant
£19,460 - £29,128 per annum
36 months Fixed term

INSTITUTE OF CANCER THERAPEUTICS Ref: RM2223/NS

Evaluation of pharmacodynamic endpoints for novel anti-cancer agents. The post has been created to establish pharmacodynamic endpoints for the assessment of novel anti-cancer agents which have been assessed preclinically utilising the Hollow Fibre Assay.

You will have a PhD in molecular biology, cell biology, biochemistry, pharmacology or a similar discipline. Postdoctoral experience of working within a molecular cell biology, biochemistry and/or pharmacology laboratory would be a distinct advantage. You will also be highly motivated and able to organise your own work to meet agreed targets and deadlines, and have good communication and teamwork skills.

Research Technician Grade D
£16,171 - £19,050 per annum
24 months fixed term

INSTITUTE OF CANCER THERAPEUTICS Ref: NCRU4066/NS

This Cancer Research-UK funded position has been created to provide technical laboratory support for the increased activity of the clinical drug development team. The work will focus mainly on support in preclinical and clinical pharmacokinetic and pharmacodynamic areas. You will be responsible for assisting in the development of methodologies for analysis of pharmacokinetic and pharmacodynamic endpoints in both clinical trials and preclinical systems. You will have a degree in a life science subject and will preferably have postgraduate research experience in drug analysis, enzyme kinetics or other molecular biology techniques. You will be highly motivated and able to organise your own work to meet agreed targets and deadlines. You will have good communication and teamwork skills and should also be able to communicate scientific information to technical and non-technical groups.

Closing date for all posts: 15th July 2005

How to apply: jobs@bradford.ac.uk, tel: 01274 233091 (minicom: 01274 235807). For more information see www.bradford.ac.uk/jobs
Applications submitted by agencies will not be considered.
Are you interested in preparing for a career in the Pharmaceutical Industry?
The School of Pharmacy offers 2 full-time MSc degrees starting in September 2005:
• MSc in Drug Delivery
• MSc in Drug Discovery

Entry requirements: First degree in Pharmacy, Pharmaceutical Sciences, Pharmacology, Physiology, Physical Science, Biochemistry, Biotechnology, Chemistry, Chemical Engineering, Genetics, Materials Science and other related subjects.
Fees for 2005/6: £4,085 (Home/EU) £11,995 (Overseas)
Course details: Full course descriptions and the application form can be found at www.ulsop.ac.uk/admissions

MRC
Medical Research Council
MRC Dunn Human Nutrition Unit, Cambridge

Career Development Fellowship - Uncoupling Proteins

The MRC Dunn Human Nutrition Unit wishes to appoint a post-doctoral biochemist to undertake research on the mechanisms and importance of the regulation of mitochondrial uncoupling proteins by free radicals and other metabolites. You will have a PhD in an appropriate subject, preferably with an interest and proven expertise in mitochondrial bioenergetics and enzymology.

This is a three year training and development position for a post-doctoral scientist who has either recently completed doctoral studies, is moving into a new research discipline or has limited previous experience of key transferable skills. It provides opportunities to develop research project skills and develop collaborative links with colleagues in the Medical Research Council and elsewhere. The research group is housed in the Dunn Human Nutrition Unit, a world-renowned centre for Bioenergetics research.

The starting salary will be in the range of £24,501 - £25,500 per annum, depending on qualifications and experience. This is supported by a flexible pay and reward scheme. We can offer 30 days annual leave entitlement and an optional MRC final salary Pension Scheme.

Informal enquiries should be addressed to Dr. Martin Brand via e-mail martin.brand@mrc-dunn.cam.ac.uk or phone 01223 252800. A full job description and additional information about the Unit can be found at www.mrc-dunn.cam.ac.uk

Please send a CV and covering letter stating how you meet the role requirements, also detailing the names and addresses of two professional referees who can be contacted prior to interview.

Please quote job reference DHNU/605/10 and e-mail your application to: recruit@mrc.centre.cam.ac.uk or post to: Recruitment Office, Personnel Department, MRC Centre, Hills Road, Cambridge CB2 2QH. Closing date: 21 July 2005.

For further information about MRC visit www.mrc.ac.uk

‘Leading Science for Better Health’

[2506-050 (2005) : 72]
pose: Research Assistant in Post-Genomic Analyses of Streptococci
School of Applied Sciences - Ref APS04/06

A one-year Research Assistant position is available within Northumbria University’s Chemical Biology Research Group, starting October 2005. It is essential that you have experience of streptococcal proteome analysis and mass spectrometry (nano-spray and MALDI).

You should also be familiar with two dimensional gel analysis software and mass spectrometry data systems and have relevant experience in bioinformatics, with a strong background in other molecular biology techniques.

You will contribute to on-going research projects within the group and should have, or shortly expect to be awarded a PhD.

For informal enquiries, please email Dr Gary Black gary.black@northumbria.ac.uk
Salary: Research Assistant £14,751 - £17,601 per annum
Closing Date: 18th July 2005

Applications can only be accepted when made on the official application form which you can request from our website http://humanresources.northumbria.ac.uk/vacancies, by telephoning (0191) 227 4321 during office hours or by writing to Recruitment Services, Human Resources, Northumbria University, Ellison Place, Newcastle upon Tyne NE1 8ST
Please quote reference number APS04/06.
Equal opportunities employer
[2506-051 (2005) : 73]
Research Scientist/Engineer
Salary will be within the RA1A/B scale: £19,460 - £29,128 pa or the RFII scale: £27,116 - £35,883 pa plus £1,990 pa London Weighting according to qualifications and experience Ref: DCL0196-1

A Research Scientist/Engineer is required to join the newly formed ISTA Group and e2v Centre for Electronic Imaging to work on the development and application of new CMOS imaging sensors for scientific applications. The work is part of the UK Research Council’s Basic Technology Programme – M13, which is formed from a consortium of 11 UK research institutes and universities. The successful candidate will form part of a team at Brunel investigating the uses of new detector technology for a range of applications, and will work closely with other groups around the UK. The successful candidate will be responsible for testing and characterisation of new imaging sensors to both X-ray and optical stimulation, and will be involved in the evaluation of the detectors in diverse applications including space science instrumentation, life science optical fluorescence and medical X-ray systems. This post will be for a period of 3 years and represents an exciting opportunity to get involved with world-class research in a dynamic area of sensor development.

For a downloadable application form and further details of the post, please visit Brunel Web pages on www.brunel.ac.uk/about/job
Alternatively for an application form email to the address below. Closing date for receipt of applications: 14 July 2005. Interviews will be held on 21 July 2005.

RecruitDEA, Human Resources, Brunel University, Uxbridge, Middlesex UB8 3PH or email: recruitdea@brunel.ac.uk

POSITIVE ABOUT DISABLED PEOPLE
Committed to equal opportunities and representing the diversity of the community we serve
Brunel
UNIVERSITY WEST LONDON

http://www.brunel.ac.uk/about/job/
[2506-052 (2005) : 73]
Applications are invited from enthusiastic researchers seeking to develop their career in an exciting, challenging and internationally competitive environment. You should possess a degree in a biological science and will play an important role in a project investigating the mechanisms underlying the genetic causes of disorders of tooth development.

You will become an integral member of a team addressing the genetic basis of facial disorders and will use a range of state-of-the-art techniques including genetic analysis of human DNA samples, expression profiling and biochemical analysis; experience in molecular biology would therefore be an advantage. This Wellcome Trust-funded position is available from 1 September 2005 for a period of one year in the first instance but may be extended for up to five years. Starting salary from circa £16,000 according to age and experience.

Informal enquires may be made to Professor M.J. Dixon on +44(0) 161 275 5620 or 5217; e-mail: mike.dixon@manchester.ac.uk

Application forms and further particulars are available from our website or the Human Resources Office, Room G101 Stopford Building, The University of Manchester, Oxford Road, Manchester M13 9PL Tel: +44(0)161 275 2380.

Closing date: 14 July 2005. Please quote the reference number.

The University will actively foster culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.
UNIVERSITY of PAISLEY  
School of Engineering & Science

**Lecturer in Immunology/Microbiology**  
£24820 - £35883 (Pay award pending from 1/8/05)

The School of Engineering & Science offers a number honours programmes in the sphere of life and health sciences each containing strong elements of Immunology and Microbiology. The School is rapidly enhancing its portfolio of academic provision with emphasis in areas of Health and Applied Science.

You will have a good honours degree and preferably a higher degree in an appropriate subject area. You will also have excellent communication skills and be keen to develop research, consultancy and/or collaborative projects.

Informal enquiries will be welcomed by Professor Roger McLean, Dean of the School of Engineering & Science, (Tel: 0141 8483118, email: roger.mclean@paisley.ac.uk).

Recruitment packs from the Department of Human Resources, Tel: 0141 8483693 (24 hour answering service) or by e-mail from jinette.liley@paisley.ac.uk quoting Ref: 05/056.

Closing date: 15 July 2005.

[2506-054 (2005) : 73]
**KING’S College LONDON**

**Business Development Manager**
KCL Enterprises

£34,989 to £41,437 pa (inclusive of London Allowance)

KCL Enterprises (KCLE) is the wholly owned business development and commercialisation company of King’s College London (KCL). KCLE is responsible for protecting and commercialising Intellectual Property developed within the College as well as the marketing, negotiation and financial administration of research and consultancy activities.

KCL is in the top five universities for research earnings with income from grants and contracts of more than £100 million (2003-2004), and has an annual turnover of £350 million. KCL is one of the largest centres for medical and health-related research in Europe. The disciplines of Medicine, Dentistry Psychiatry, Biomedical Sciences, Health & Life Sciences and Nursing & Midwifery there are 17 integrated divisions that invested a combined £85 million in research in 2003-2004. As a result King’s College London is a major international focus for pioneering developments in a range of sectors including pharmaceuticals, medical technologies and biotechnology. Our partner NHS Trusts are Guy’s and St Thomas’, King’s College Hospital, University Hospital Lewisham and the South London and Maudsley Hospital which serve a diverse patient population in excess of one million people.

We are currently seeking to recruit a resourceful and motivated individual to an exciting role as a Business Development Manager at King’s. As part of the Business Development Team, the postholder will play a pivotal role in fulfilling King’s mission to transfer knowledge to business and the wider community, by creating new partnerships and strengthening existing relationships with industry. You will engage with world-class scientists across a range of divisions in the Health Schools at King’s to facilitate relationship-building with external partners in the pharmaceutical and biotechnology sectors to generate new business. Divisions in your portfolio will include:

- Cardiovascular
- Wolfson Centre for Age-related Diseases
- Randall Division of Cell and Molecular Biophysics
- MRC Centre for Developmental Neurobiology
- Asthma, Allergy and Lung Biology

The successful candidate will ideally have experience of business development gained either in industry or in the HEI sector. The ability to work strategically and operate confidentially in a high-level environment is essential, as is the ability to work as part of a team. Applicants should have a proven track record in project-management, relationship-building, strategic and business planning, and marketing/promotional activities, with a rounded knowledge of the relevant business sectors.

This is a fixed-term 2-year post funded by the Higher Education Innovation Fund for a specific project.

Closing date: 13 July 2005

To obtain further information about King’s College, please see our website at [www.kcl.ac.uk/depsta/pertra/vacancy](http://www.kcl.ac.uk/depsta/pertra/vacancy). You can obtain a job pack by emailing recruitment@kcl.ac.uk or by writing to the Personnel Department, Central Administration and Support Services, Room 7.20, James Clerk Maxwell Building, 57 Waterloo Road, London SE1 8WA, quoting reference E4/QV/89/05.

Equality of opportunity is College policy [2506-055 (2005) : 74]
TEACHING ASSISTANT (TWO POSTS)
£22,507- £29,128 • Fixed term for 12 months initially
Based in the Centre for Forensic Science, this is an exciting opportunity to enhance your knowledge and experience at an internationally recognised centre. You will be involved in the provision of training, teaching and casework consultancy. A good honours degree in chemistry, or a biological science that includes molecular biology is required. Experience in forensic science is desirable.

For application form and further particulars (available on request in alternative formats for applicants with a disability) visit Vacancies at our website www.strath.ac.uk or contact the Personnel Office, University of Strathclyde, Glasgow G1 1XQ, Tel 0141 553 4133 (24 hour Voicemail Service) quoting Ref: 74/05.

The Faculty of Aerospace Engineering at the Delft University of Technology (TU Delft) seeks an Assistant Professor within the Aerospace for Sustainable Engineering and Technology (ASSET) Chair. As Assistant Professor, you will be responsible for carrying out research, theoretical and experimental, in the field of controlled kites and their application. In addition, you will be tasked with supervising PhD students in the relevant research areas and giving lectures in the field of sustainable development based on ASSET projects.

Qualifications:
PhD or its research equivalent and broad knowledge and experience in the field of aerodynamics in lightweight, flexible structures (e.g. kites, parapentes, etc.). A solid track record in research as evidenced by international publications and proficiency in lecturing at the university level. You are skilled at constructing and maintaining an international network of scientific and industry contacts. Good communicative skills are a must.

Multidisciplinary projects:
Research is conducted in the field within the context of which aerospace technologies are used for sustainable development in energy and transport. The initial activities of the ASSET Chair, which was founded in September 2003, are channeled by three projects namely: smart (controllable kites and ladder mills, Nuna solar race car and the super bus (fast public transportation). These projects are multidisciplinary. Specific subject areas are aerodynamics, lightweight composite structures, energy-saving and electrical systems, and stability and control. A Kite Lab has been set up with huge masts mounted on the roof of the Aerospace Faculty Building to study the behaviour of (remotely controlled) kites.

We offer:
A temporary appointment for a period of at most two years with the prospect of a permanent appointment conforming to the Collective Employment Agreement (CAO) of the Dutch Universities. The maximum salary is €4,580, - (gross per month) for full-time employment i.e. 38 hrs a week. The salary is based on qualification and skills/experience.

To apply:
Quoting vacancy number LR05.02.VK send application to: Personnel Department, Faculty of Aerospace Engineering TU Delft, Kluyverweg I, 2629 HS Delft, The Netherlands

Extra information:
Call Professor W.J. Ockels (Chair) or Ms. Nana O. Saaneh (Management Assistant) at +31 - 15-2789576 / +31 - 15-2785176 or send an e-mail to: w.j.ockels@Lr.tudelft.nl or n.o.saaneh@Lr.tudelft.nl. [2506-061 (2005) : 75]
A position is available in the Nuclear Medicine Group for an experienced Research Assistant. The appointee will be a member of the Institute of Cancer and the Cancer Research UK Centre at Barts and the London’s School of Medicine and Dentistry, and will be based at St Bartholomew’s Hospital, West Smithfield in the City of London.

The appointee will be responsible for organising and assisting with all the in vivo biodistribution studies undertaken by the group. This will involve the use of a new state-of-the-art small animal SPECT imaging system as well as other animal imaging modalities that may be required. They should have experience and working knowledge of mouse handling and experimental procedures, including a strong working knowledge of Animal (Scientific Procedures) Act 1986. Experience in imaging would be an advantage but is not essential as training will be provided.

This post has funding until October 2009. Future funding of the post is determined by 5-yearly performance review of the entire programme by Cancer Research UK.

Appointment will be made on the Research Grade Scale, with a starting salary in the range of £21,594 - £27,833 per annum inclusive of London Allowance, depending on experience.

The benefit package for this post includes 30 days’ annual leave plus 4 College closure days, a contributory final salary pension scheme and an interest-free season ticket loan.

For further information and an application form please contact our 24-hour recruitment line on 020 7882 6149 or email: csq-recruit@qmul.ac.uk quoting the reference number 05216/KM. Alternatively visit the Human Resources website on http://www.admin.qmul.ac.uk/humanresources/vacancies/

The deadline for return of completed application forms is 5pm on 31st August 2005.

Forms should be returned via email to: csq-recruit@qmul.ac.uk or by post to: Recruitment Office, Campus Management Team, Barts and The London School of Medicine and Dentistry, Queen Mary University of London, The Lodge House, Charterhouse Square, London EC1M 6BQ. Applications must not be sent directly to the Centre for Cancer Imaging.

Working towards equal opportunities
[2506-062 (2005) : 75]
Rentokil Initial

ENTOMOLOGIST/BIOLOGIST

Rentokil Pest Control is the world’s leading pest control service company and has a unique opportunity for a scientist to become an authority on insect control. You will be an entomologist / biologist, preferably with a higher degree or 2-3 years relevant practical experience. The successful applicant will be responsible for research into the detection and control of urban insect pests such as cockroaches, ants, flies and pests of stored foodstuffs. Areas of research include the development of novel insecticides and the design and evaluation of physical methods of insect detection and control. Applicants must be computer-literate, strongly self-motivated, and have good verbal and written communication skills with the confidence to liaise effectively with all levels of management. A commercial outlook and an enquiring mind are essential. Benefits include a free staff restaurant, free parking and a company car. Contact the R&D Secretary, Rentokil Initial, Felcourt, East Grinstead, West Sussex, RH19 2JY, telephone 01342 830287 or email jobs@r-d.rentokil-initial.co.uk [2506-063 (2005) : 75]
The University of Reading

PhD Studentships: Metabonomics of Microbial-Mammalian Co-metabolic Axes in Health and Disease

Two PhD studentships open to UK/EU students only are available with effect from 1st October 2005 to investigate gut microbial-human metabolism interactions. One based at Imperial College London (Professor J Nicholson and Dr E Holmes) and one based at University of Reading (Professor G Gibson and Dr K Tuohy). One post will be primarily responsible for metabolic studies using high-field NMR and LC-MS (Imperial), whilst the other will develop and apply genomic approaches for gut microflora diversity studies (Reading). Samples for analysis will be provided from various human studies on insulin resistance, diabetes, coronary heart disease, colorectal cancer and inflammatory bowel disorders with the aim of identifying diagnostic mammalian/microbial metabolite signatures. The projects will interface with a larger programme on microbial-mammalian interactions in both Institutions. Students will receive training from both institutes.

A first-class honours or upper 2nd class degree in appropriate biological sciences is required. Applicants should send a CV and names of two academic referees to Professor G R Gibson, g.r.gibson@reading.ac.uk Closing date for applications is Friday 29th July 2005.

[2506-064 (2005) : 76]
Applications are invited for positions on two new projects, funded by the ESRC and the AHRC, to start on 1st October 2005.

1) MR imaging of speech movements (29 months, RS1A salary scale, range £19,460- £29,128 pa.). Applicants should have a relevant higher degree and experience in one or more of: experiments with human subjects, acoustics, MRI, signal processing, data analysis and mathematical modelling.

2) Survey of technologies for automatic search and annotation of on-line speech resources (9 months, RS2 II, range £27,116 - £35,883 p.a.). Applicants should have an understanding of current speech technologies and excellent communication skills. A relevant higher degree is preferred.

Informal enquiries may be addressed to Greg Kochanski (greg.kochanski@phon.ox.ac.uk) or John Coleman (john.coleman@phon.ox.ac.uk). Further particulars concerning these openings, and information about how to apply may be found on our website at http://www.phonox.ac.uk/jobs

Applications must be received no later than 20th July 2005.

The University is an Equal Opportunities Employer.

International Graduate Research School
Molecular basis of dynamic cellular processes

The Westfälische Wilhelms-Universität Münster invites applications from highly qualified and motivated individuals of any nationality for

4 PhD studentships
to commence in January 2006. Successful candidates have the possibility to pursue a research project for their PhD thesis in one of the following groups:
Molecular motors and the actin cytoskeleton (Bährer)
The role of scaffolding proteins in membrane organization and dynamics (Gerke)
Development of the olfactory system in Drosophila (Hummel)
Genetic analysis of neuron-glia interaction in Drosophila (Klämbt)
Function and dynamics of nuclear pores (Oberleithner)
Molecular basis of cell polarity and neuronal differentiation (Püschel)
The function of cadherins in endothelial cell contacts (Vestweber)

Successful candidates will receive a tax-free fellowship of 1300 Euro per month for 2 years with the possibility of an extension for 1 additional year.

The deadline for the application is August 31, 2005, Application forms, further information about the International PhD-Program and the research projects can be found at celldynamics.uni-muenster.de

[2506-069 (2005) : 77]
Applications are invited for the above position funded by British Aerospace plc. This post is available initially for 12 months with an anticipated continuation of up to three years.

The successful candidate will have a doctoral degree in sensing, estimation, mobile robotics or a closely related area with an understanding of the SLAM problem and contemporary approaches. You will have expertise in sensor data processing. You will have excellent proven skills in C++ and the ability to write real-time code, work as part of a team and to plan and execute data collection experiments. Demonstrated experience in validation of algorithms using real data and the ability to work to deadlines are essential. Excellent Matlab skills for data analysis and proven experience in systems engineering are desirable. The starting salary will be in the RA1A scale £19,480 - £23,643 p.a.

Postdoctoral Research Assistant in Mobile Robotics “Non-linear Techniques in SLAM”
Ref: DF05046

Applications are invited from suitably qualified candidates for the above position. This post is available initially for 12 months with an anticipated continuation of up to three years.

The successful candidate will have a doctoral degree in estimation, mobile robotics, computer vision or a closely related area in computer science and an understanding of the Simultaneous Localisation and Mapping (SLAM) problem and contemporary approaches. You will also need to have a strong familiarity with optimisation techniques especially those commonly used for tasks in computer vision. Excellent proven ability in software writing and debugging skills in C++ and Matlab, demonstrated ability to work as part of a team, experience in validation of algorithms using real data and the ability to work to deadlines are essential. A background in computer vision, robotics and proven experience and knowledge of systems engineering, SEIFS, EKF and FastSLAM techniques are desirable.

The starting salary will be in the RA1A scale £19,460 - £23,643 p.a. Further particulars may be obtained from Mr C J Scotcher, The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ, or by email to administrator@eng.ox.ac.uk to whom written applications should be made enclosing a curriculum vitae and the names and addresses of two referees. Please quota the job reference in all correspondence. The closing date for applications is 18th July 2005. The university is an Equal Opportunities Employer.

PhD STUDENTSHIP
A studentship is available at the Institute of Orthopaedics & Musculoskeletal Science, UCL in the Centre for Biomedical Engineering to investigate the early sequence of events at the tissue-implant interface of porous calcium phosphate materials used for bone repair. The student should be interested in biomaterial science and would examine the sequence of events using histology, immunohistochemistry and biochemical techniques. This project is funded by ApaTech Ltd. for 3 years and will be supervised by Professor Gordon Blunn and Dr Karin Hing. This studentship provides a standard stipend and tuition fees at the home/EU rate.

Enthusiastic graduates with a first or upper 2:1 degree in biological sciences interested in this opportunity should send a full CV including three referees and letter of application to:
Professor Gordon Blunn, Head of Centre for Biomedical Engineering, Institute of Orthopaedics & Musculoskeletal Science, UCL Royal National Orthopaedic Hospital Brockley Hill, Stanmore HA7 4LP
Tel: 020 8954 0636
Email: g.blunn@ucl.ac.uk
Deadline: 3 weeks after publication.

Water Processes – Advanced Professional Masters MTech

Looking for a water industry career?
Need a relevant qualification?
Need money?

Cranfield’s innovative two year Advanced Professional Masters course provides company sponsorship for suitably qualified UK students of £10,500 per year. Not only will you benefit from a professional Masters qualification, you will progress to chartered engineering status, and being embedded in your sponsoring company means your career prospects in the water and environmental sector will be accelerated.

UCL
UNIVERSITY COLLEGE LONDON
“Fast Track to a Bioindustry Career”

The UCL Department of Biochemical Engineering holds studentship awards from both BBSRC and EPSRC to support students on its MSc Biochemical Engineering innovation programme. The course aims to provide talented individuals with the necessary grasp of the bioscience, biochemical engineering and entrepreneurship required to deliver the next generation of human medicines and therapies. Fully funded studentships are available for suitably qualified graduates (2(i) and above) with backgrounds in biological science, process engineering and related disciplines.

UCL, one of the top UK multifaculty research universities, hosts the Advanced Centre for Biochemical Engineering. The Centre is examining fundamental issues related to bioprocessing of materials for human therapies such as genes, cells and tissue, vaccines, recombinant antibodies, and complex chiral pharmaceuticals. Aspects especially crucial to the new bioindustry are delivered to postgraduate students alongside participants already working in it.

For further details please send your CV quoting reference NS-06/05 to: Dr D. O. Bracewell, Department of Biochemical Engineering, University College London, Torrington Place, London WC1E 7JE, UK or e-mail to: d.bracewell@ucl.ac.uk (see also www.ucl.ac.uk/biochemeng).

Kew
PLANTS PEOPLE POSSIBILITIES

Species Conservation Assessment Officer
Salary from £17,505 per annum
(depending on qualifications and experience, pay award pending)
Based in the Herbarium, your role will include carrying out species conservation assessments in line with the priorities of Kew's science strategy and particular projects such as the Sampled Red List Index. You will also facilitate the production of species conservation assessments from Herbarium data by training other members of staff. Additionally, you will act as a focal point for the dissemination of conservation assessments produced by herbarium staff.

With a degree or equivalent in Botany or a related subject, you will have experience in handling collections together with data and a broad understanding of plant conservation issues. Confident and well-motivated, you will have excellent communication skills and experience of scientific or museum orientated work, in particular curation and/or data gathering. Ref: 776.

Spatial Information Scientist
£17,505 per annum (pay award pending)
Working in the Herbarium with the Geographic Information Systems (GIS) Unit, you will assist with attaining and recording habitat conservation assessments, and help to meet the present demand for short-term projects in different parts of the world by providing remote sensing and vegetation mapping. You will also be partly responsible for producing and updating GIS website project pages and developing GIS web mapping.

You will be educated to degree level, with an MSc in GIS or a related discipline, and experience of using GIS in a botanical and/or environmental context. A sound understanding of GIS technologies is essential, as is a working knowledge of ESRI and ERDAS Software. You will be a confident communicator, with good organisational and IT skills. Ref: 777.

Assistant Botanists
£14,285 per annum (pay award pending)
We are looking for motivated and innovative individuals to join our Regional and Systematic teams, based within the Herbarium.

Your role will include the curation of herbarium collections, i.e. preparing and filing away mounted specimens, rearranging and recurating material according to newly published revisions and digitising collections. You will deal with the selection and processing of loans from other institutions and will be involved in general research and section support when required, liaising with research visitors and students.

With GCSEs at Grade C or above in Biology/Botany, Mathematics and English, you will be an excellent communicator with good general IT skills. Experience of scientific or museum orientated work, especially curation, would be a distinct advantage, as well as having some knowledge of plant diversity and experience of dealing with visitors/customers. Ref: AB4

All posts are fixed-term contracts of three years and benefits include a choice of final salary or stakeholder pension and generous annual leave.

Application packs are available from our website www.kew.org (click on the 'about us' icon). Alternatively, please contact the HR Department, RBG Kew, on 020 8332 5184/5150 (24 hour answerphone).

Please quote the appropriate Ref in all correspondence.
Closing date: Friday 2 September 2005.

Committed to equality through diversity. Selection is on merit alone.

Roche Pharmaceuticals
Lead innovation.
£Competitive + Benefits

Leadership, innovation and a powerful entrepreneurial spirit. Qualities you'll bring to Roche's state-of-the-art Biostatistics department - and qualities you share with this outstanding global organisation. We combine cutting-edge technology and creative thinking to drive medical breakthroughs that enrich lives across the world. Now with a strong pipeline of new medicines and a series of advanced clinical trials, we need more ambitious professionals to join us. For you, this is a unique opportunity to impact on a truly international level as you take your career forward in this dynamic and people-focused culture.

Head of SAS Programming
Location: Welwyn Garden City
This is an excellent opportunity to play a lead role in the development of this world-class computing environment. Managing an experienced and highly-effective group of SAS programmers, as part of a global team you'll ensure the delivery of exceptional software support for global clinical trials and regulatory submissions.

The Head of SAS Programming ensures all work within Biostatistics is carried out to the highest quality, ensuring the highest standards are met from reporting clinical trials to maintaining a high calibre SAS programming Team. He/she will ensure consistency within projects and between projects and also that the local site (Welwyn) is consistent with the other sites working on a global scale liaising with other site Heads of Programming. It will be he/she’s responsibility that the team of programmers verifies adherence to Biostatistics coding and validation standards and SOPs. Allocate resources according to project priorities, working with Project Programmers providing advice and ensuring teams are kept up to date of important decisions, issues and priorities.

Strong communication skills are essential, as you will work in close collaboration with statisticians and colleagues in drug development. You must bring at least 10 years' pharmaceutical industry experience with good knowledge of international clinical research and drug development. Previous management skills are essential, a degree level qualification, strong SAS skills and the proven ability to lead a team in the delivery of exceptional results.

Senior Programmer
Location: Basel, Switzerland or Welwyn Garden City
This vital role will see you provide high-quality software support for the presentation of data and results of international clinical trials. This will include producing SAS datasets in relevant formats, validating and documenting data tabulations, graphics and statistical evaluations, maintaining project documentation and liaising with members of the Biostatistics and Clinical Teams to assess programming requirements. The Senior Programmer will need to have the ability to plan programming systems across study and project environments. Qualified to degree level with a good working knowledge in SAS, you must have at least three years' pharmaceutical industry experience. Excellent communication skills are also essential, whilst an understanding of database interfaces and UNIX would be welcomed.

Biostatistics Computing Environment Application Manager
Location: Welwyn Garden City
Joining a global team of nine applications managers, you will deliver high-quality technical support to all Biostatistics Computing Environment users encompassing SAS, other third-party software and the in-house developed applications. As well as providing consultancy to help us achieve best practice and maximum efficiency, you'll develop and deliver effective training for end-users. At least five years' programming, business analysis or technical support experience is essential, ideally gained in the pharmaceutical sector. In addition, you should bring an expert knowledge of UNIX, SAS and the software development process. The flexibility to travel internationally is also important.
If one of the above profiles fits your background and experience and you are interested in a challenging new role, please send your applications to: http://careers.roche.com/uk

With continued growth, Roche is looking for more ambitious people to join its teams in a wide range of areas. If you have the vision and energy to be part of our future, register in the Roche Talent Pool now. Visit http://careers.roche.com/uk

FORENSIC SCIENTIST - CHEMISTRY
(1 post, drugs analysis) (Ref: CID3.7a)
£20,523 - £30,906 per annum

Grampian Police Laboratory provides a forensic science service for the North of Scotland, an area comprising Aberdeen, Aberdeenshire, Moray, the Highlands, the Western Isles, Orkney and Shetland. Based in Aberdeen, re-housed in new premises in 1997 and expanded in 2004, the laboratory is staffed and managed by Police Support Staff. A permanent vacancy has occurred for a drugs analyst.

This is an exciting opportunity for a bright and able graduate, perhaps already working in forensic science, to develop rapidly in the drug analysis section of a small busy laboratory. Our methods of close supervision and emphasis on training and opportunities for learning mean that you will quickly be dealing with a very wide variety of drug cases, often involving serious crime. In this challenging environment, you will soon gain reporting experience and should be aiming to achieve registration with the Council for the Registration of Forensic Practitioners within five years of appointment.

This post requires at least a 2nd Class honours degree, or equivalent, in chemistry or a related subject. We are looking for someone with laboratory experience who has developed excellent observational and analytical skills, who has good communication skills in oral and written work, especially in presentations to a lay audience and who is able to cope with pressure, is highly self-motivated but also a good team player. Experience in a forensic laboratory in the area of drugs analysis or general chemistry, quality management, report writing and giving evidence in Court is particularly desirable.

Placing on the salary scale will be determined by qualifications and experience.

Interviews and aptitude tests will be held week commencing 19th September 2005.
Closing date for applications is 26th August 2005.

Application forms and further information can be downloaded at www.grampian.police.co.uk or alternatively by calling 0845 600 5 700
www.grampian.police.uk

GRAMPIAN POLICE
POSITIVE ABOUT DISABLED PEOPLE
[2511-007 (2005) : 54]
The Burton Centre for Reproductive Medicine is a purpose built unit providing investigation and treatment for both NHS and fee paying clients. Within our highly specialised team an opportunity has arisen for an experienced, highly motivated and committed senior embryologist. With responsibility for the management of embryology and andrology services in this state of the art facility, you will have a proven track record in facilitating education and training for trainees and be a HFEA licensed ICSI practitioner. Working together with the Fertility Services Manager and the Medical Director, the Senior Clinical Embryologist will take an active role in maintaining and improving standards of service. It is anticipated that you will have a minimum of five years' post registration experience.

You will ideally be a state registered scientist, with an established career in all aspects of clinical embryology, excellent communication and interpersonal skills and demonstrable ability to manage the IVF laboratories and associated embryology/andrology staff.

Informal enquiries should be made to Mr Kevin Artley, Medical Director or Paula Cox, Fertility Services Manager on (01283) 593098.

Application forms and job descriptions are available from: Recruitment, Human Resources Department, Queen's Hospital, The House, Belvedere Road, Burton upon Trent, Staffordshire DE13 0RB telephone (01283) 593232.

Please quote reference number: B16305.
Closing date for applications: 18 August 2005.
A revised system of Terms and Conditions of Employment (including pay) has been introduced across the NHS with effect from 1st December 2004. The above post will, therefore, be subject to review under Agenda for Change and any amendments back dated to the date of commencement.
If you have any agenda for change queries, please contact the Agenda for Change office.
All applicants who have a disability and meet the minimum criteria for the job will be interviewed. Burton Hospitals NHS Trust is an Equal Opportunities employer and operates a no smoking at work policy.

[2511-009 (2005) : 54]
Applications are invited for the post of Research Assistant in a group researching the mechanisms of biological molecular motors.

We are seeking an enthusiastic Research Assistant to join a friendly and productive group researching the mechanisms of interaction of kinesin family molecular motors with microtubules. This project involves purification and biochemical characterisation of tubulin from the fission yeast S. pombe. A background in protein purification would be advantageous but is not essential as training will be provided for the right candidate. More information about the Marie Curie Research Institute and about our work can be found on our web site at http://www.mcri.ac.uk/motorhome.html.

Applicants should be highly motivated, enthusiastic individuals, and have an undergraduate degree in a relevant subject. Competitive salary will depend upon age, qualifications and experience.

Candidates should submit a full C.V., including the names and addresses of two referees, to Dr Rob Cross, Molecular Motors Laboratory, Marie Curie Research Institute, The Chart, Oxted, Surrey RH8 0TL, UK. E-mail r.cross@mcri.ac.uk

The Marie Curie Research Institute is committed to equal opportunities in employment
Dartford, Kent

**Computer Systems Validation Co-ordinator**

At GSK, one of the world's leading research based pharmaceutical and healthcare companies, we're committed to the development and delivery of ethical, effective products that enable people to do more, feel better and live longer.

As part of GSK's global supply network, Dartford is responsible for manufacturing over 29 active pharmaceutical ingredients for our customers around the world and is also a "new product introduction" site. Our focus is on ensuring the supply of high quality competitively priced bulk actives and on driving continuous improvements in Primary technologies and processes.

We are looking for an experienced Computer Systems Validation Co-ordinator to join the QA function. This is an exciting opportunity for a technical specialist to work within the QA Product and Systems Introduction team. You will have at least 2 years' full-time experience in at least one of the following areas: Process Control Equipment, Laboratory Equipment or Instrumentation.

Key responsibilities include:

- Supporting computer systems validation activities on the site
- Preparing and issuing Validation Master Plans, Protocols, summary Reports and assisting in the preparation and review of documentation associated with validation of computer systems, as appropriate for each validation exercise
- Assisting with Impact Assessment of systems, including production of Compliance Determination Statements.

You will have the interpersonal skills required to work with people from a wide range of disciplines and seniority across the site. You must be proficient in the use of standard desktop packages such as MS Word, Lotus Notes and PowerPoint, and have the organisational skills to work on a number of projects simultaneously.

The rewards are excellent. In addition to attractive salaries we offer an excellent range of benefits and further opportunities for career development throughout the Group.

If you want to join GlaxoSmithKline's fight against disease, please apply in confidence with full CV to [www.gsk.com/join/gsk_frame-uk.htm](http://www.gsk.com/join/gsk_frame-uk.htm) Closing date: 18th August 2005.

**POSITIVE ABOUT DISABLED PEOPLE**

GSK is proud to promote an open culture, encouraging people to be themselves and giving their ideas a chance to flourish. GSK is an equal opportunity employer.

Together we can make life better

GlaxoSmithKline

Formulation Technologists
Packaging Technologists
Nottingham £Competitive salary + excellent benefits

At Boots Manufacturing, a vital part of Boots The Chemists we produce and package some of the UK's favourite cosmetics, toiletries and healthcare products.

Our ambition is to drive change and become a World Class Manufacturer. Here you could join a successful and energetic team, supporting the introduction and production of over 2000 different healthcare and personal care products for Boots The Chemists, Boots Healthcare International and 3rd Party Customers.

Working as a Formulation Technologist you will use knowledge of formulation together with enthusiasm for factory operations, to implement and support commercial manufacture of new products to satisfy customer requirements. You will be a catalyst in the wider team, find creative solutions for continuous improvement of existing products, and to solve production problems.

Working as a Packaging Technologist you will use knowledge of factory operations to guide the development team on LEAN product design and factory capability. You will manage risk and balance the demands of implementing multi-product launches to challenging timescales, liaising with key stakeholders across the business.

You're likely to be a science or design technology graduate, or someone with some previous experience of formulation or packaging technology. Above all applicants need to show commercial awareness, with the confidence and flexibility to interface with a range of internal and external stakeholders.

For more information please call Paul Newton on 0115 968 6425 or John Smith on 0773 405 6769.

Further details on how to apply can be found at: www.Bootsjobs.com
Closing date: Friday 19th August 2005

POSITIVE ABOUT DISABLED PEOPLE
[2511-012 (2005) : 55]
AGRI-FOOD AND BIOSCIENCES INSTITUTE
BEEF PRODUCTION RESEARCH SCIENTISTS - 2 POSTS - HIGHER SCIENTIFIC OFFICER/SENIOR SCIENTIFIC OFFICER
PERMANENT APPOINTMENTS
LOCATION: AGRICULTURAL RESEARCH INSTITUTE OF NORTHERN IRELAND, HILLSBOROUGH
SALARY: £16,821- £28,007 (HIGHER SCIENTIFIC OFFICER) £20,463 - £35,438 (SENIOR SCIENTIFIC OFFICER)

The Agri-Food and Biosciences Institute (AFBI) will be established on 1 April 2006, following a period of shadow operation from September 2005. AFBI will be a Non-Departmental Public Body (NDPB), sponsored by the Department of Agriculture and Rural Development (DARD), and will incorporate the functions of DARD’s Science Service and an existing DARD NDPB, the Agricultural Research Institute of Northern Ireland (ARINI).

As the appointment process is likely to be completed prior to the full operation of AFBI, the initial appointment will be to ARINI.

Applications are invited for 2 posts of Higher/Senior Scientific Officer, based at the Agricultural Research Institute of Northern Ireland, Large Park, Hillsborough, Co Down, BT26 6DR. The appointees will join a progressive research team in beef production and will initiate and undertake research and prepare scientific and technology transfer outputs on all aspects of beef production to include: applied nutrition, all aspects of economically sustainable beef production systems (including suckler cow systems and cow fertility), genotype comparisons, grassland management, forage production and utilisation, over wintering accommodation of beef cattle and factors affecting meat eating quality.

Applicants must possess, by the closing date for applications:
(i) at least a 2:2 Honours degree in Agriculture, Agricultural Science, Animal Science or a relevant biological science; and for appointment as Senior Scientific officer
(ii) at least 4 years’ post graduate experience in ruminant production, animal science or a related subject.
or for appointment as Higher Scientific Officer
(ii) at least 2 years’ post graduate experience in ruminant production, animal science or a related subject.

Applications will also be considered from candidates with relevant formal qualifications considered to be of an equivalent or higher standard to those stated.

An application form together with more detailed information including the duties and responsibilities of the post as well as the further criteria to be used during the recruitment process, may be obtained from the Institute, Telephone (028) 9268 2484. Completed applications should be submitted not later than 3.00 pm on Friday 2nd September 2005.

We are committed to equality of opportunity and welcome applications from all suitably qualified people irrespective of religious belief, gender, disability, race, political opinion, age, marital status, sexual orientation or whether or not they have dependants.

ALL APPLICATIONS FOR EMPLOYMENT ARE CONSIDERED STRICTLY ON THE BASIS OF MERIT
[2511-013 (2005) : 56]
**Senior Scientist - Immunologist**

POWDERMED

We are seeking an experienced immunologist, a PhD with 5-10 years in the development of immunological assays, and in particular, CMI assays in the biopharmaceutical industry.

Applicants must have the skills and experience to manage scientific groups engaged in assay development and study outsourcing.

Experience in the field of vaccines and/or Q/C would be advantageous.

Key responsibilities will include immunology assay design, the management of pre-clinical and clinical immunology-assays at contract research organisations and document generation to support regulatory submissions.

12 month term, attractive salary, part time option.

Please send full c.v. to: John Forsaith, HR & H&S Manager, PowderMed Limited, 4 Robert Robinson Avenue, Oxford Science Park, Oxford OX4 4GA

Closing date 31st August 2005.
Human Fertilisation and Embryology Authority

The Human Fertilisation and Embryology Authority (HFEA) is the government body that regulates and inspects all UK clinics providing IVF, donor insemination or the storage of eggs, sperm or embryos. The HFEA also licenses and monitors all human embryo research being conducted in the UK.

The Authority is now looking to appoint 4 new members

As a member of HFEA you will deal with issues of great sensitivity that often have a high public profile. You will also help to provide the Government with advice and information on issues arising from developments in assisted conception and embryology.

In addition to your analytical ability, integrity and experience of working in a multi-disciplinary environment, you will also be able to demonstrate your expertise in one of the following fields:

• Ethics (a Bioethicist or Moral Philosopher)
• Finance and financial management
• Psychology or other social science
• Human clinical genetics (preferably with expertise in or familiarity with embryonic stem cell research)

The appointments will be for a maximum of three years. On average, Members spend up to three days a month on authority business. They are paid a daily allowance of £176 plus travel and subsistence expenses. The authority's executive is based in London and meetings are held there.

If you think you have the qualities we require, and are interested in applying for one of these posts, please call 0870 240 3802 during office hours or go to www.appointments.org.uk/vacancies, quoting the reference number NAT176, for an information pack and application form (which are available in large type or Braille or on tape).

The closing date for returning applications is 26 August 2005.

OCPA REGULATED

The NHS Appointments Commission is committed to equality of opportunity for all and the principle of appointment based on merit following an open and transparent process and independent assessment.

Please note this is a public appointment, not employment

European Respiratory Society Journals Limited publishes a number of European and International Respiratory Journals and is currently wishing to appoint a Technical Editor with a Ph.D. in Biological Sciences or a related subject. This is a challenging opportunity and the position entails:

- Working with a small team and with Editors and Authors worldwide.
- Researching, producing and editing books and electronic publications.

Candidates should:

- Have good presentation and excellent interpersonal, written and verbal communication skills.
- Be a team player with self-motivation and able to act on own initiative, who is also efficient, well organised and able to work under pressure.
- Have an excellent grasp of and proven affinity for the English language, with meticulous attention in detail and the ability to work to strict deadlines.

Candidates with publishing experience are particularly encouraged to apply.

We are unable to acknowledge all applications and only those short-listed will be contacted. Closing date: Friday 12th August 2005.

We offer a competitive salary, pension scheme, health insurance and a minimum of 25 days annual leave with flexible working hours.

Please apply with CV and current salary to Dr J.L. Arnold, Suite 2.4 Hutton's Building, 146 West Street, Sheffield, S1 4ES. E-mail admin@ersj.org.uk Website: www.ersnet.org
we’ve built a global reputation for innovation…
you’ll build our UK business

**Forensic Business Development Manager**
Attractive Salary + Benefits

Orchid BioSciences is a global leader in the profiling of genetic uniqueness and its application in a range of accredited genotyping and DNA analysis services. For almost two decades, we have driven innovation in DNA testing across the fields of forensic science, paternity testing, agricultural genotyping, - now you will build on our success and spearhead the next phase of our growth.

Focusing on the development of the Orchid DNA forensic business, you will promote our services to police forces across the UK - proactively identifying and exploiting business opportunities, implementing joint strategic plans with our strategic business partner Forensic Alliance, and representing the company at high profile forums. At all times, you will maximise sales and profitability, whilst driving account management service standards and partnering our US forensic business unit and central Marketing function to deliver a visionary and effective UK marketing plan.

Probably qualified to degree level in biosciences or forensics, you will bring significant experience of selling into the forensic DNA sector, including the management of field sales and key account teams. You will naturally be familiar with dealing with public sector and/or police customers and working with strategic partners, and will bring broad knowledge of the forensic genotyping process. Above all, you are able to present and negotiate at the highest levels, coach and motivate colleagues - and deliver impressive commercial results.

If you're ready to advance our business and enjoy the substantial rewards of success, please send your CV to... Mark Johnson, Director Human Resources Europe, Orchid Cellmark, PO Box 265, Abingdon, Oxon, OX14 1DY or email to [UKHR@Orchid.com](mailto:UKHR@Orchid.com)
NC3Rs
National Centre for the Replacement, Refinement and Reduction of Animals in Research

Advancing the 3Rs for Animals and Science

The National Centre for the Replacement, Refinement and Reduction of Animals in Research (NC3Rs) is a newly established, independent organisation focusing on the development and application of the 3Rs - the principles which underlie the humane use of animals in scientific research. The Centre is funded by the MRC, BBSRC, Wellcome Trust, Home Office and the ABPI.

Communications Programme Manager
London W1 To £41,000 pa

This is a new post and we are looking for an enthusiastic, forward thinking science communicator with the skills to forge links and collaborations between various stakeholders and to raise awareness of the NC3Rs.

You will need to possess proven experience of communicating effectively and persuasively with a broad range of stakeholders, including scientists and lay audiences, via written, presentation and ideally web formats. Your duties will include producing promotional material (e.g. annual report, newsletters) and ensuring that the NC3Rs website is up-to-date and continually evolving. There will also be the opportunity for media work and event co-ordination.

An ability to plan and prioritise work and meet deadlines is vital, a knowledge of the use of animals in research and the 3Rs is important and a PhD is desirable, although not essential.

A three-year fixed term contract will apply in the first instance.

For an information pack and further details, please call 020 7670 5331 or email enquiries@nc3rs.org.uk quoting the reference: B3/PMC2/2005.

More information on the NC3Rs can be found at www.nc3rs.org.uk

Closing date: 19th August 2005

MINISTRY OF DEFENCE  
ANALYTICAL CHEMIST  
INSTITUTE OF NAVAL MEDICINE, GOSPORT, HANTS

BACKGROUND/MAIN DUTIES: The Institute of Naval Medicine which is located in an attractive setting close to Stokes Bay on the Hampshire coast provides operational medical support to the Royal Navy, carries out biomedical research and conducts training in all aspects of naval occupational medicine and allied subjects. The Institute has a vacancy for a Band D scientist (formerly Scientific Officer grade) to undertake a range of analytical chemistry work including the determination of trace metal contaminants by ICP MS. Experience with this technique would be an advantage but full training in this, and other techniques will be provided if required.

This is a reserved post, therefore, only UK nationals may apply

QUALIFICATIONS/EXPERIENCE: Essential: Degree in chemistry or a related subject, or HNC/HND or degree standard membership of professional institution plus relevant experience.

Desirable: Experience of trace metal analysis.

SALARY/BENEFITS: The salary range for the grade (Band D) is £16,672 to £26,002, which rises with annual increments and the possibility of additional annual bonus payments. Subject to prior approval, assistance with relocation expenses may be available to the successful applicant. The hours are 42 Gross per week. A choice between a final salary pension (with a contribution rate of 3.5%) and a defined contribution or 'Partnership' pension, giving you the flexibility to choose the pension that suits you best. Twenty five days annual leave, rising to 30 days after 5 years' service plus 10.5 days public holidays and special leave provisions. Excellent training, development and advancement opportunities. Free on-site parking.

CLOSING DATE: The closing date for receipt of applications is 19th August 2005 and it is anticipated that the interviews will take place week commencing 5th September 2005.

Please note that all information received in connection with this advert will be treated in accordance with the Data Protection Act 1998.

CONTACT DETAILS: Further information may be obtained from Mr J Holden, Tel: 02392 768075. We actively encourage on line applications using Requisition No 309125, by applying on line at www.mod.uk you can be sure that your application has been received on time. If however you are unable to apply on line contact Regional Personnel Centre, Room G08, Building 1/88, South Office Block, HM Naval Base, Portsmouth PO1 3LU. Telephone 023 92724312 and quote ARO/05/06/28. Only MOD application forms will be accepted for this post.

The Ministry of Defence is an equal opportunities employer and seeks to reflect the diverse community it serves. Applications are welcome from anyone who meets the stated requirements.

MRC
Human Nutrition Research
MRC Collaborative Centre for Human Nutrition Research, Cambridge

**Senior Laboratory Analyst**, Ref: HNR/705/7
Nutritional Biochemistry Laboratory (NBL)

The NBL provides analytical support to HNR and its many collaborators, both national and international. It comprises two sections: Clinical Chemistry and Chromatography.

A vacancy has arisen for a Senior Analyst to assist in the management of a Nutritional Biochemistry laboratory with an emphasis on HPLC and GC-FID Chromatography, ICPMS and ICP CES.

You will be educated to at least BSc in a relevant scientific discipline and have at least five years experience in an appropriate analytical laboratory. Experience of project and staff management is required. An appreciation of the mission and objectives of HNR would be desirable.

This is a full-time (36 hours per week) permanent position. The starting salary will be in the range of £24,746 - £30,945 per annum, depending on qualifications and experience. This is supported by a flexible pay and reward policy. We offer 30 days annual leave in addition to statutory Bank holidays, an optional MRC final salary Pension Scheme, excellent working conditions and free on-site parking facilities.

For further information and a full job description please visit our website. For an informal discussion about the post please telephone Mrs Oorvanshi Joshi (Head of NBL), on 01223 437632. An informal visit is encouraged.

To apply, please quote reference HNR/705/7 and include a covering letter and CV with the names and addresses of two professional referees who can be contacted prior to interview.

E-mail your application to: recruit@mrc-centre.cam.ac.uk or post to: Recruitment Office, Personnel Department, MRC Centre, Hills Road, Cambridge, CB2 2QH.

Closing date: 26 August 2005

MEDICAL RESEARCH
RESEARCH TRAINING FELLOWSHIPS

Action Medical Research is creating a healthier future for everyone by supporting a broad spectrum of medical research. Our objective is to prevent disease and disability and to alleviate existing physical disability with an emphasis on clinical research or research at the clinical/basic interface. (Please note that cancer, cardiovascular and HIV/AIDS research do not fall within our remit.)

Applications are invited from medical and non-medical graduates for these prestigious Research Training Fellowships. The awards provide the opportunity for up to 3 years (salary and consumables) to train in research techniques and methodology, in subjects relevant to the overall objectives of the Charity, including the field of bioengineering.

Am I eligible to apply?
It is essential that you visit the Action Medical Research website to check your eligibility to apply: www.action.org.uk (look for Research Projects then Research Training). Before you apply, you should have discussed the basis of your research training programme with your intended supervisor.

How do I apply?
Please fill in the Research Training Fellowship outline proposal form available on our website and send by e-mail to rtf@action.org.uk by:

MONDAY 5TH SEPTEMBER 2005
If your outline proposal is accepted, an application pack will be emailed to you. Successful candidates can take up their awards from April 2006 onwards.

BUSINESS INFORMATION MANAGER
STIRLING Medical Innovations
Competitive Salary + Relocation Assistance

Stirling Medical is a new start-up company set up by Inverness Medical Innovations to identify technologies and develop near-patient and home tests for the diagnosis and management of cardiovascular diseases.

We currently have a truly exceptional opportunity for a high calibre and experienced Business Information Manager based at our newly established site in Stirling. Working within a team to grow and develop the business, the purpose of this role is to identify and analyse business relevant information.

Key responsibilities include:
• Develop competitive strategy based on internal and competitor analysis
• Access and Analyse strategic information
• Create strategy for Innovation and Project development process
• Provide tactical analysis to R and D Project teams
• Commercial acumen regarding IP, Business news and scientific literature

Being involved at start up phase is an outstanding opportunity and we are looking for unique, high-energy individuals. With a strong background and experience in working within Intellectual Property, you will be degree qualified with 5 years industry experience or PhD and experience in relevant industry sector and scientific area.

There's no doubt about it - this role has challenge, excitement and the chance to make a real difference. This is a fantastic opportunity to make an impact on the culture of our organisation at the early stages. As you would expect for a company at the forefront of medical device development we are offering a highly competitive remuneration package coupled with excellent relocation assistance.

To apply please contact our retained consultants Paul Leishman and Louize Purves on 01506 461445 or email your CV to stirlingmedical@go-escape.com

[2511-022 (2005) : 58]
Join a leading biopharmaceutical company that provides innovative products and services designed to help enhance the lives of individuals with serious chronic illnesses as:

**Medical Science Liaison**
Flexible location within the UK Attractive blue chip package

Reporting to the Head of Medical Science (Oncology), you will provide scientific expertise and support for key company products, principally in oncology, to both external and internal 'customers'.

This high-profile, stimulating role requires a high level of technical expertise coupled with strong communication skills. With a PhD or Medical qualification and specialist knowledge of the cellular biology of cancer, you must understand the specific nature of clinical trials in oncology and be able to confidently discuss complex data with Key Opinion Leaders. You will also provide high-level technical support to colleagues in Medical Information and also to those in commercial roles.

Previous experience within the pharmaceutical industry, although useful, is not essential. Key to success will be your technical knowledge, flexible approach and excellent communication and presentation skills. You will be recognised and rewarded for the contributions you make and enjoy excellent opportunities for career development and to raise your professional profile.

In order to register your interest in this exciting opportunity, please send your CV and covering letter to 05485@pharmarecruit.com for the attention of Jackie Lawrence. Alternatively call first for a brief, confidential discussion. Please quote Ref: 05485NS.

Working Together for a Safer London
[2511-026 (2005) : 60]
Plymouth Marine Laboratory

Remote Sensing Scientist
£18,256 - £24,345 • Plymouth, Devon

Plymouth Marine Laboratory (PML) is a dynamic, highly innovative, independent and impartial provider of scientific research and advice on the marine environment.

Delivering internationally respected research of the highest quality, PML's research base is diverse and stimulating in many marine science disciplines, concentrating on integrating fundamental discoveries to understand the complexity of marine systems and developing sophisticated ecosystem models.

PML Remote Sensing Group is looking for a graduate scientist to develop and support remote sensing data analysis and novel web and Grid based data access and visualisation methods. You will undertake research and data processing, develop the group website and participate in the NERC DataGrid project with the aim of making Earth Observation data available via an e-Science portal in near-real time. Working in a community of approximately 20 remote sensing scientists, modellers, bio-optical oceanographers and computer programmers, you will have access to extensive high performance computer processing, storage and communications resources.

You will be a highly motivated graduate from a numerate discipline, with experience in remote sensing, image processing, GIS or spatial analysis. You should have experience in computer programming in C, C++, IDL, java or Perl preferably in a Unix environment and ideally knowledge of SQL, XML and website scripting.

PML staff benefit from excellent working conditions, and a vibrant, challenging and highly stimulating environment, including first class research laboratories and instrumentation, the latest computer networking and communications technology, and access to sea-going vessels.

For additional information and an application form for the post shown above, please contact Miss J Weeks, Human Resources Department, Plymouth Marine Laboratory, Prospect Place, Plymouth PL1 3DH. Tel: (01752) 633 100. Fax: (01752) 633101. Email: vacancies@mail.pml.ac.uk

The PML is a charitable research organisation and as such operates an equal opportunities policy and welcomes applicants from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome. We operate a Guaranteed Interview Scheme for disabled candidates who hold the minimum qualifications for the post.

POSITIVE ABOUT DISABLED PEOPLE
[2511-027 (2005) : 61]
POST-DOCTORAL RESEARCHER – Ref MA31/05
3-year position investigating the development of tools to use as physical evidence through the integration of state-of-the-art soil characterisation with National soil databases, for forensic purposes.

Candidates should have a PhD in quantitative biology or statistics, with some expertise in statistical software. Experience of computer programming, database manipulation or forensic science would be advantageous. Starting salary, depending upon qualifications and experience, will be normally within the range £22,351 - £25,767 per annum.

AQUATIC ECOLOGIST - Ref MA33/05
Senior researcher to lead a team which is seeking to elucidate the impact of land use and environmental change on aquatic ecosystems. The main aim of this research is to elucidate the link between hydrochemical change and ecological impacts in different receiving waters. Candidates should have a PhD or equivalent experience in aquatic ecology or related subject and have research interests that include aquatic biodiversity, eutrophication, and assessing the impacts of environmental change on aquatic ecosystems.

Starting salary, depending upon qualifications and experience, will be normally within the range £26,780 - £39,366 per annum.

Pensionable appointments. Further particulars and application forms (quoting appropriate reference number) can be obtained from Human Resources, The Macaulay Institute, Craigiebuckler, Aberdeen, AB15 8QH. Tel 07224-498200, Fax 01224-311556, E-mail: Personnel@macaulay.ac.uk to whom completed application forms must be returned by 15 August 2005.

INVESTOR IN PEOPLE
[2511-028 (2005) : 61]
Post-doctoral Research Assistant

Funded by the Horserace Betting Levy Board, you will join a project which focuses on the evaluation of a vaccine candidate for protection against Equine herpesvirus-1.

The three year programme aims to investigate the Major histocompatibility complex class I haplotypes of Thoroughbred horses which respond to EHV-1 and a specific protein which has been identified as a target for cytotoxic T lymphocytes (CTL). It will utilise established techniques which measure interferon gamma synthesis by lymphocyte subpopulations, cytotoxic T lymphocyte activity and serological haplotyping. However, novel techniques involving molecular methods of MHC class I typing are under development and these will be characterised and applied to this project. The antigenic regions of the CTL target protein will also be studied by sub-fragment cloning. The project will build on existing collaborations with the local veterinary practices and stud farms in the Newmarket area.

You will have skills in molecular biology and in particular experience of gene cloning and sequencing techniques. An interest in cellular immunology would be an advantage, but is not essential. You must have submitted your PhD thesis prior to commencement of this project. Your starting salary will be from £22,400.

The Centre for Preventive Medicine is an internationally recognised centre of excellence for equine respiratory infectious diseases with a strong molecular, immunological and virological skills base.

Informal enquiries to Dr Julia Kydd (email: julia.kydd@aht.org.uk) or Dr Nick Davis-Poynter (email: nick.davis-poynter@aht.org.uk) or telephone: 08700 502460. Application forms are available from the Director of Human Resources, Animal Health Trust, Lanwades Park, Kentford, Newmarket, Suffolk CB8 7UU. Tel: 08700 502424 or email: rosemary.london@aht.org.uk

Quest Diagnostics
Keeper of the Herbarium - Botany Department
Full time, C. £26,500
Wisley, Surrey

The RHS holds one of the world's largest collections of cultivated plant specimens and has led internationally in the introduction of standard portfolios for new cultivars. The herbarium comprises over 80,000 specimens, is still actively increasing and will soon be fully data based. It also contains an increasing number of plant portrait images, integral to the collection, that it is intended to manage and make available electronically. In this role you will contribute to the other activities of the Botany Department, having an active interest in horticultural taxonomy, and will be expected to represent the Herbarium and the RHS in national and international meetings and organisations. You will also be responsible for managing staff and a team of keen volunteers.

You should have a degree in plant sciences and be well grounded in horticultural taxonomy and herbarium management and curation. Experience in handling scientific information in a database is also essential. Knowledge of botanical and/or cultivated plant nomenclature and experience with scientific publications would be helpful.

For more information and an application form please call 0207 8213093 or email recruitment@rhs.org.uk quoting reference number 467.

Animal Health Division

Senior Regulatory Affairs Manager

Schering-Plough Animal Health is a division of Schering-Plough Ltd., a wholly owned subsidiary of the Schering-Plough Corporation, USA, one of the world's largest pharmaceutical companies. Within the Animal Health Division in the UK a vacancy has arisen for a Senior Regulatory Affairs Manager to deal with products authorised under the European Union's centralised procedure as well as dealing with other procedures including the mutual recognition procedure.

Based at Harefield and reporting to the Director, International Regulatory Affairs, you will take responsibility for the preparation and submission of dossiers to the European Medicines Agency (EMEA). You will build up a rapport with the EMEA and become involved in discussions relating to submissions. You will be self-motivated and possess excellent communication skills and be a team player.

For this pivotal post you will have:
• A degree in veterinary medicine, life sciences or equivalent, preferably with an advanced qualification
• Experience in dealing with centralised procedure applications, preferably with pharmaceutical products
• A minimum of 5 years experience within regulatory affairs in the veterinary sector, particularly with centralised procedure applications

In addition to a competitive salary and benefits package, we offer the opportunity to develop your skills and potential with our support and training, in return for your growing contribution to the work of the regulatory team.

Please apply in writing, enclosing a current CV and salary details by 31st August 2005 to:
David Strong
Schering-Plough Animal Health

GREATER EXPOSURE, GREATER OPPORTUNITY

**Pharmaceutical Scientist - NCE Preformulation**
£Competitive + benefits - Granta Park, Cambridge

UCB and Celltech have come together to form one of the world's leading biopharmaceutical players, specialising in CNS, inflammation, immunology and oncology. Join us at this exciting time and you can expect significant visibility, the opportunity to influence and full recognition for your efforts.

As part of our rapidly growing Preformulation team within the Pharmaceutical Sciences Department, you'll play a key role in preformulation in support of NCE Discovery, Research and Development programmes. This will call for a high level of competency in non-clinical formulation development and a working knowledge of HPLC, but the scope of this role means you'll have plenty of opportunities to support physicochemical characterisation, as well as advancing your career within an expanding team.

You'll need 3-5 years' experience in the development of non-clinical formulations for discovery compounds, while some exposure to other preformulation and analytical techniques (e.g. thermal analysis, moisture sorption) would be advantageous. You must also be highly organised, an excellent communicator and able to work well with other departments in the UK and Belgium.

To apply, please send your CV and covering letter, quoting reference number C932 to HR Officer, UCB Celltech, Granta Park, Great Abington, Cambridge CB1 6GS.

DESIRE THE RIGHT
FALKLAND ISLANDS GOVERNMENT

Fisheries Stock Assessment Scientist
• Salary range £22,356 - £32,994 + 25% Gratuity
• 2 year contract
• Relocation grant

The Fisheries Department of the Falkland Islands Government invites applications for the post of Fisheries Scientist (stock assessment). This position is vital for the continued development of assessment capabilities of squid and fish stocks within the Department.

Candidates should have the ability to apply standard fish stock assessment techniques and develop new approaches. The successful applicant will be expected to contribute to the development of fishery management policy on the basis of the assessments. Candidates should be capable of working as part of a small, dedicated team and be prepared to fill a flexible role, including participation in research cruises.

Candidates should ideally be qualified to PhD level in an appropriate biological, fisheries or mathematical discipline with at least two years’ experience of fisheries stock assessment or other relevant discipline, such as population dynamics. A high level of competence with computers and modern statistical methods is essential. Experience in one or more of the following areas would be advantageous: mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming, database design.

The contract package includes
• fares to and from the Falklands at the beginning and end of contract;
• mid contract leave return passage;
• end of contract gratuity of 25% of salary
• generous relocation grant; and
• education allowance if applicable.

For further information, a full job description and an application form please contact:
The Recruitment Officer, Falkland Islands Government, Falkland House, 14 Broadway, Westminster, London SW1H 0BH.
Telephone: 020 7222 2542
Facsimille: 020 7222 2375
Email: recruitment@falklands.gov.fk

Completed application forms should be returned to the above address no later than Wednesday 31st August 2005.

STUDY DIRECTOR POSITION

Charles River Laboratories is a successful and highly regarded preclinical research organization, offering innovative research techniques and safety testing services to the pharmaceutical, chemical and biotechnology industries. Our Montreal facility is situated on the West end of Montreal Island, Canada and employs over 1500 personnel.

Due to our continued growth we are looking for individuals with experience in managing preclinical safety studies as Study Director or Study Supervisor. Our foremost requirement is for scientists with expertise in the following areas:

* Reproductive Toxicology
* Inhalation Toxicology
* Intravenous Infusion Closing
* Chronic Toxicology

These positions have been created following significant expansion to our current facilities and increases in the volume and complexity of the work. Following appropriate training, our Study Directors take direct responsibility for all aspects of preclinical studies from initial client contact, through protocol design to data interpretation and reporting. In addition, we encourage cross-training in other areas of toxicology as part of career development and we support the publishing or presentation of work at scientific meetings.

The successful candidate should possess at least three years of relevant experience that includes protocol preparation, study set-up, monitoring and report writing. In all cases, they must enjoy responsibility, have the ability to prioritize and have significant interpersonal skills.

This post offers a competitive remuneration package relative to level of experience.

For further information about this and other posts, please visit the Charles River Laboratories web-site at www.criver.com or submit your CV of the address below.

GE Healthcare
New pathways to explore in Research.

We are a $14 billion global leader. With nearly 43,000 people worldwide, we serve healthcare professionals and patients in over 100 countries.

As we break new ground in in vivo diagnostics and invest heavily in expanding our research programmes in Neurology, Oncology and Cardiology, now is the ideal time to exercise your intellect and expertise by joining our globally renowned Medical Diagnostics Research team in Amersham, UK. By discovering new molecular diagnostics in the fields of nuclear medicine, MRI and X-ray, we are making possible the diagnosis and characterisation of disease at an earlier stage than ever before. We are now looking for committed scientists from a range of backgrounds, who can challenge constructively and drive forward our research.

**Radiochemists**
You need a PhD in Synthetic or Radiochemistry, and/or significant F-18 radiochemistry experience. We prefer PET radiochemistry expertise but will consider all applications. Job no. 397022

**Medicinal Chemists**
You need an MSci or PhD in Synthetic or Medicinal Chemistry. We particularly welcome industrial experience in the application of medicinal chemistry. Job no. 418376

**Research Biologists**
Whether newly qualified or expert, you need a BSc or PhD in Biology (or similar). Practical experience in biomarker or signalling cascade validation, disease model validation and in vitro screening systems development is essential, industrial R&D experience an advantage. Job no. 429714

For the full details and to apply, visit [www.gecareers.com](http://www.gecareers.com) and enter the relevant reference number in the 'Search by Job' field. We will offer a competitive package including final salary pension scheme to the right candidates.

[2511-038 (2005) : 64]
Current Science Group

Current Science Group is one of the world’s leading scientific publishing groups, serving the medical and scientific community and the consumer market. We aim to take the lead in finding innovative and experimental solutions to the scientific communication challenges of today and the future.

ASSISTANT EDITOR (Ref: GB/AE)

Genome Biology Ltd is seeking a well-organised literate life sciences graduate or PhD to join its editorial team as an Assistant Editor. Genome Biology (http://genomebiology.com) is an online journal that publishes review, commentary and original research articles aimed at keeping biological researchers informed of advances in genomics and in all of biology.

The successful candidate will, together with other members of the editorial team, identify research articles suitable for Genome Biology’s scope and interest level and make decisions on publication on the basis of referees’ advice. Additional responsibilities of the team include the commissioning of reviews, meeting reports and comments, and copy-editing. Computer literacy and a keen eye for detail are essential; editorial experience would be an advantage, but is not essential for candidates who have editorial aptitude and a relevant science background. Informal enquiries may be made to the deputy editor, Michaela Torkar Michaela@genomebiology.com

Start date: As soon as possible.

ASSISTANT EDITOR (Ref: BMC/AEI)

BioMed Central Ltd, the leading Open Access publisher, is seeking an Assistant Editor to help develop new online-only, Open Access biomedical journals. The role involves setting up new journals in liaison with external editors. The successful candidate will have recently graduated with a degree in a relevant subject, will be a clear communicator both in writing and in person, and keen to work as part of a team. The position requires excellent organisational skills and the ability to show initiative. Please see http://biomedcentral.com/independent/

ASSISTANT EDITOR (Ref: BMC/AE)

BioMed Central Ltd is also looking for an Assistant Editor to join the team responsible for the peer-review process of published articles in a wide range of life science and clinical research areas. The key task is to provide a high quality and objective peer review service through liaison with reviewers, editorial boards and authors. A recent PhD in a relevant subject is desirable, background in clinical research or bioinformatics would be an advantage. Excellent English language, analytical and organizational skills are essential.

EDITORIAL PROJECTS ASSISTANT (Ref: SPIS/EPA)

Current Medicine Group Ltd provides online medical content and web development services to the pharmaceutical industry. We require an Editorial Projects Assistant to work with our editorial team on a range of specialist and consumer websites. Reporting to the Editorial Director, you will undertake general editorial support and administration duties. The successful candidate will have a biomedical degree, a good knowledge of Microsoft Office, be comfortable with online content and research, and be able to work to strict deadlines. Experience with internet projects and html would be an advantage.

Please send CV and covering letter, quoting job reference, explaining briefly your interest in the post, when you would be able to start, and stating salary expectations to: Rhys Howells, CSG, 34-42 Cleveland Street, London W1T 4LB, or by email to jobs@sciencenow.com Closing date: 26/08/05. [2511-039 (2005) : 65]
Institute for Animal Health
The future of animal health is in our hands. And yours.

The Institute of Animal Health operates at the forefront of innovative research into the full spectrum of animal health issues.

**Study Investigator**
Compton • £26,780 - £31,186 + Benefits • Ref: 05/0726

In this key role, you will design, develop and conduct trials to evaluate the efficacy, safety and close response of new animal health products for pigs, poultry or cattle to enable registration to EMEA requirements. This will involve developing infection models for scientific research and product development, managing a diagnostic laboratory and small team, and ensuring compliance with ISO 9001 and GLP standards.

Ideally with a PhD in a farm science/health topic and at least five year's experience, you will have a proven ability to meet deadlines and work on your own initiative. A track record in scientific writing would be a major advantage, as would a background in project or people management and scientific research or diagnostics. Closing date: 25th August 2005.

Further details and an application form are available from Mrs. R. Day, Institute for Animal Health, Compton, Newbury, Berks RG20 7NN (Tel: 01635 577203; e-mail: iah.vacancies@bbsrc.ac.uk) quoting reference number 05/0726. The IAH is an equal opportunities employer. [www.iah.bbsrc.ac.uk](http://www.iah.bbsrc.ac.uk) [2511-040 (2005) : 65]
SEPA
Scottish Environment Protection Agency

SEPA’s main aim is to provide an efficient and integrated environmental protection system for Scotland that will both improve the environment and contribute to the Scottish Ministers' goal of sustainable development. One of SEPA's environmental outcomes is to ensure that land quality, of which soil is a part, is protected, maintained and restored.

SEPA has a key role in soil protection through a number of legislative controls and this role is expected to increase in the future. SEPA therefore wishes to recruit a total of 5 scientists with specialist knowledge of soil primarily, but also with a good understanding of the interactions between soil water and air.

These posts will be based within SEPA's Environmental Science Directorate and will contribute to the delivery of corporate targets for land including informing SEPA policy and providing scientific advice to regulatory staff.

**Senior Soil Ecologist** £25,698 - £32,360
Stirling Ref: OPEA3655
You will have a strong background in soil biological processes and an ability to translate this understanding into soil quality assessment procedures. Awareness of the policy context and legislation relating to soil protection is highly desirable.

**Senior Soil Chemist** £25,698 - £32,360
Aberdeen, Edinburgh, East Kilbride or Dingwall Ref: OPEA3654
You will have experience in undertaking soil survey or monitoring programmes, including the design and implementation. You should also have experience of specifying, undertaking and interpreting soil analysis. Awareness of the policy context and legislation relating to soil protection is highly desirable.

**Soil Chemist** £18,642 - £28,602 Aberdeen Ref: OPEA3179
You should have experience in undertaking soil monitoring programmes and of specifying, undertaking and interpreting soil analysis.

**Soil Hydrogeologists** (x2) £18,642 - £28,602
Stirling Ref: OPEA3657/Ref: OPEA3656
You will have experience in diffuse pollution, soil hydrological processes and contaminant fate and transport in soils and groundwaters.

You should possess a minimum of a degree in a relevant subject, with 2 years' post qualifying experience for the scientist posts and 5 years' post qualifying experience for the senior scientist posts.

SEPA is currently undergoing a Job Evaluation Exercise and new Pay and Grading structure, all posts are subject to this process.

Closing date for applications Friday 12th August 2005 at 12 noon.

For specific details on these roles, to download an application form or to find further information about SEPA, please visit [http://sepa.org.uk/vacancies](http://sepa.org.uk/vacancies)

Alternatively you can call 01786 452555 or email recruitment@sepa.org.uk to receive these in printed format. Please quote the relevant reference number(s) in any correspondence.

CVs will not be accepted as part of the selection process.

[2511-041 (2005) : 65]
Manage the information that underpins our defence capability

**Information Scientists**
£19,000 to £24,000 (depending on skills and experience) plus benefits Porton Down, Salisbury

Dstl, the Defence Science and Technology Laboratory, is the prime source of scientific advice to the Ministry of Defence (MOD) and wider government. Working in a unique information-based environment, your key tasks will include abstracting and indexing scientific and technical reports and conducting literature searches of both 'defence controlled' and 'open literature' sources across a wide range of subject areas.

You should have a scientific background and be qualified to degree level or equivalent with experience and/or qualifications in Information Science. There are a number of opportunities available, which call for varying levels of experience. As part of your role, you will get involved in information management projects that include database content development, information analysis and technology profiling. Initiative, team spirit and excellent written and verbal communication skills are essential, as is a good level of IT literacy. Most importantly, you will have the ability to identify and extract key information from complex scientific reports.

Training and development is given the highest priority and as a civil servant you'll enjoy a competitive benefits package. This includes a choice of stakeholder or final salary pension schemes, generous holiday allowance, childcare vouchers, relocation assistance where appropriate, and good sports and leisure facilities.

Applicants who reach a suitable standard in this campaign, but are not appointed, may be considered for other vacancies.

Dstl is a committed equal opportunities employer and recruits on the basis of specified competencies and skills.

These permanent posts are only open to UK Nationals. Applicants must be willing to undergo and satisfy the current Government/MOD Security Vetting procedures prior to a formal offer of employment being made.

For an application form, job and competency profile, please contact, quoting reference 020811NS, Response Solutions, aia*, 5 St John's Lane, London EC1M 4BH. Email: response@aia.co.uk Tel: 020 7553 9120 (9.30am - 5.30pm). If you have a hearing impairment we are happy to accept Typetalk calls. Closing date: 19th August 2005.

*aia is a recruitment advertising agency and is handling the response to this advertisement on our behalf. Your details will be sent to Dstl only and will not be used for any other purpose.

Dstl is part of the Ministry of Defence
[2511-042 (2005) : 66]
The Health Protection Agency (HPA) is an independent body that protects the health and well-being of everyone in England and Wales. The Agency plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. We also prepare for new and emerging threats, such as a bio-terrorist attack or a virulent new strain of pathogen.

The Centre for Infections at Colindale, NW London is an internationally renowned centre of excellence for expertise, reference and research, surveillance and epidemiology in relation to micro-organisms that affect human health. The modern purpose built centre is well equipped and staffed and provides excellent Library, Occupational Health and Refectory facilities. There is also a Nursery on site.

All Posts are based at Colindale, NW London

Public Health Scientist (Epidemiology) HIV and Sexually Transmitted Infections £34,291 - £36,951 inclusive of London Weighting

The HIV and AIDS reporting section, within the HIV & STI department has undertaken world class surveillance of HIV in the UK since the epidemic began in the early 1980s. The information, data interpretation and expert advice from the section are used to guide and inform policy, funding and research throughout the UK.

You will take the scientific lead and be the deputy head for the HIV and AIDS reporting section working closely with the consultant epidemiologist section lead. You will oversee three main surveillance activities: New diagnoses reporting for HIV, AIDS and deaths in HIV infected individuals, the annual surveys of prevalent diagnosed infection and surveillance of incident HIV infection.

Duties within the section involve guiding scientific output including both routine surveillance outputs and novel scientific analyses prepared for peer-reviewed publication; taking a strategic overview of surveillance developments to keep pace with the changing epidemic and ensuring that information collected remains relevant; making sure that section activities integrate within the wider HIV and STI department and the Centre for Infections, and liaising with external collaborators such as the institute of child health, academic researchers and NGOs working in the field of HIV. You will be expected to provide expert advice to policymakers, stakeholders and the media. Keeping abreast of relevant changes and challenges to the delivery of sexual health services in England, you will identify opportunities for HIV surveillance and prevention activities. You will take on the role of programme manager for the Sexual Health programme.

You will have a higher degree in a relevant subject and at least 5 years' postgraduate work experience in epidemiology and/or surveillance, and have previous management experience. The post requires excellent oral and written communication skills and a good understanding of relational databases, handling of large complex datasets and statistical techniques for epidemiology. Knowledge of HIV and STIs would be an advantage. For more information about this post, please contact Dr Valerie Delpech, Consultant Epidemiologist at valerie.delpech@hpa.org.uk
Ref: 634S017

Scientist Virus Reference Department/ Gastrointestinal Disease Section £24,599 - £26,466 inclusive of London Weighting

30 month Fixed Term contract

This post is funded through an EU project and involves maintaining and developing an epidemiological surveillance network for foodborne viruses in several European countries. This includes running a web-based reporting scheme (see http://www.eufoodborneviruses.co.uk) and the consolidation and analysis of data obtained through the project. The post is suitable for candidates with an interest in epidemiology and there is an opportunity to undertake a PhD in this post.
For an informal discussion prospective candidates are welcome to contact Dr. David Brown, Director of Virus Reference Department on 020 8327 6016 and/or Dr. Bob Adak on 020 8327 7551. Ref: 460S027.

**Medical Technical Officer**  
Virus Reference Department  
£22,873 - £26,466 incl London Weighting  
1 year Fixed Term contract  
A post has been funded as part of the Millennium Cohort Study and the post holder will join a multidisciplinary research team involved in determining the acquisition of common childhood infections in early life. The study involves the collection of saliva samples from children, their processing and subsequent testing for antibodies to a range of viral infections.

Duties include the development of novel and innovative immunoassays for the detection of antibodies in saliva to a range of childhood infections, the supervision of technical and support staff of the project and involvement in the analysis and reporting of results.

Candidates should have a Btec or equivalent qualification in biological sciences and a minimum of 3 years' experience of molecular and immunological methods.

For further information contact Dr Jim Gray on 020 8327 6025 or by email at jim.gray@hpa.org.uk. Please ensure to address all of the essential criteria in a covering letter when applying.

AWE
[2511-044 (2005) : 68]
Thames Water Utilities is the UK's largest water and wastewater services company with over 4,000 employees providing service round the clock to 13 million customers.

Test the water for 13 million customers

**Microbiological Analysts**
£15,000 - £16,000 p.a. + 10% shift enhancement
Spencer House Laboratories, Reading

Testing and analysis is critical to the business, and our state-of-the-art laboratory in Reading provides a comprehensive service, conducting over 600,000 microbiological analyses every year. It's the perfect environment to learn in, where you'll test samples alongside some of the most talented scientists in the business. Day-to-day, you'll use a whole range of stringent techniques, including defined substrate technologies, pour and spread plate, membrane filtration and media and biochemical analysis, ensuring everything is up to the high standards of our regulatory bodies.

Your hours will vary according to shift patterns and will include some evening work, and possibly weekends. Specific water experience isn't essential, as long as you have around three months' laboratory experience and an HNC (or equivalent) in a biological discipline. It'll be a great start to your microbiology career; where you'll get a broad grounding, and fantastic opportunities to expand your knowledge in the field of water microbiology.

To apply, please send your CV, quoting ref: 2239 to HR Service Centre, Thames Water Recruitment Team, Clearwater Court Ground West, Vastern Road, Reading RG1 8DB or email sharedserviceshr@thameswater.co.uk

Closing date: 11th August 2005.

If you have not had a response by 25th August 2005, please assume that on this occasion your application has been unsuccessful.

Thames Water is an equal opportunities employer.

[2511-045 (2005) : 69]
HMR

**Head of Statistics and Data Management**

An exciting opportunity for a statistician in one of Europe's largest Contract Research Organisations specialising in Phase I clinical trials ([http://www.hmrlondon.com/](http://www.hmrlondon.com/)).

Your responsibilities would include:

- leading a small team of data managers and SAS programmers
- representing the group at audits and at meetings with potential new clients
- advising on the statistical aspects of study design
- writing and reviewing the statistical sections of study protocols and reports
- writing statistical analysis plans
- statistical analysis using SAS
- ensuring the quality of databases and statistical output
- directing the validation of data management systems
- ensuring that the department remains GCP compliant
- preparing scientific publications

The ideal applicant would have an MSc in Statistics, and several years' experience, preferably in the pharmaceutical industry. The position would suit a highly motivated individual with excellent written and verbal communication skills. There would be plenty of opportunity for the right candidate to get involved in the wider aspects of early drug development.

Informal enquiries are welcome, and should be addressed to Kathy Baisley on 020 8963 4524 (email: kbaisley@hmrlondon.com)

Please, no agency referrals.

Fellowship by Examination 2005-2006
The College proposes to elect, in February 2006, one or two Fellows by Examination.

Candidates should have a good Honours degree or its equivalent and have completed, or be near to completing, a doctorate or other postgraduate research. They will already have demonstrated outstanding promise in their chosen field. In any event the candidate must not have completed more than four years' graduate study by 1st October 2005. There is no restriction on the number of times an applicant may apply for this post.

Each Fellowship is tenable for three years at a stipend starting at £15,508 p.a. rising annually on 1st October. The Fellow is a member of the Governing Body of the College and is entitled to free lunches and dinners, to a research allowance, and either to free single accommodation, or to a discretionary housing allowance, currently set at £8,000 p.a. It is likely that successful candidates will be required to live within a certain radius of Oxford during the period of their appointment.

Application forms and further particulars can be obtained from the Administrative Secretary, Magdalen College, Oxford OX1 4AU, tel. +44 (0)1865 276060, e-mail: elizabeth.martin@magd.ox.ac.uk or at www.magd.ox.ac.uk/vacancies/ The closing date is 3rd October 2005.

The College exists to promote excellence in education and research, and an Equal Opportunities Employer

[2511-054 (2005) : 71]
School of Physics and Astronomy  
Optical Fibre Picorheology  
Research Fellow

This post is available as soon as possible for three years (depending upon starting salary). The project involves the development of the technique of optical fibre picorheology with respect to two biopolymer systems; fibrin blood dots and phase separating biopolymer mixtures. You will have a strong background in experimentation and theory of complex fluids. Ideally you will have experience with scattering and rheology techniques such as diffusing wave spectroscopy, drag flow rheometry or neutron scattering. You will be expected to demonstrate good communication and organisational skills in this cross disciplinary project.

Research IA (£19,460-£29,128 p.a.) depending on experience

The University is introducing a new reward framework which will facilitate the recruitment, retention and motivation of world class staff
Informal enquiries to Dr Tom Waigh email t.a.waigh@leeds.ac.uk  Application packs from Maureen Thompson tel 0113 343 3810 email m.thompson@leeds.ac.uk

We welcome applications from all sections of the community. Textphone for deaf applicants only 0113 343 4353. All information is available in alternative formats - please contact 0113 343 4146.

WORKING TOWARDS EQUALITY AND DIVERSITY

UNIVERSITY OF LEEDS  
[2511-055 (2005) : 71]
US
University of Sussex
join us
School of Life Sciences

**Technical Services Manager**  Ref: 111
£32,666- £39,114 pa (pay award pending)
Start date January 2006 or earlier

The School of Life Sciences is one of five schools of study established at the University from August 2003 and contains the departments of Biology and Environmental Sciences, Biochemistry, Chemistry and Psychology. The School is large, with a budget of some £10m, and some 200 staff. It has inherited a strong reputation in both teaching and research which it is committed to building on.

Responsible to the School Administrative Manager, and the Dean, you will lead in the management of technical support within the School (there are currently the full-time equivalent of close to 70 technical staff in the School), on local premises issues, and on space planning. The School has considerable involvement on Health and Safety issues, and whilst you have the support of a dedicated full-time Safety Advisor, you will be expected to play a leading role in this area. The successful candidate will be able to demonstrate considerable experience in all of these areas.

The creation of the new schools was designed to foster a quicker and more flexible response to new academic opportunities. Whilst the major structural changes have been successfully implemented, the aim of greater flexibility means that change management is an ongoing requirement. Working within a challenging environment you will need to be open to change and innovation.

Informal enquiries may be made to Chris Leech, the outgoing post-holder, tel: 01273 678053, email: C.Leech@sussex.ac.uk (available Wednesdays and Thursdays) or Peter Clements, School Administrative Manager, tel: 01273 872742, email: P.N.Clements@sussex.ac.uk (on leave until 18 August).
Closing date: 25 August 2005
Interviews are planned for 8/9 September 2005

Application details are available from and should be returned to Human Resources, Sussex House, University of Sussex, Falmer, Brighton BN1 9RH. Tel: (01273) 678706, fax: (01273) 877401, email: recruitment@sussex.ac.uk

GONVILLE AND CAIUS COLLEGE, CAMBRIDGE
RESEARCH FELLOWSHIPS

The Council intend to elect to a number of Research Fellowships, open to men and women, tenable for four years from 1 October 2006. Fellowships are restricted to graduates of, or research students in, a University of the British Isles who will have completed not more than four years of full-time research (or part-time equivalent) by 1 October 2005.

Full particulars can be obtained by writing to The Research Fellowship Competition, Gonville and Caius College, Cambridge CB2 1TA; email: rfc@cai.cam.ac.uk fax 01223332336; or via http://www.cai.cam.ac.uk Telephone enquiries cannot be taken. Completed applications (12 copies) must be received by Friday 28 October 2005. Interviews will be held in January 2006.

[2511-057 (2005) : 72]
Harper Adams
UNIVERSITY COLLEGE

**Postdoctoral Researcher in Plant Physiology**
Crop and Environment Research Centre

The post holder will investigate the environmental stimuli for pre-maturity alpha-amylase (PMA) formation in wheat grain and develop a plant breeder's screen for PMA as part of a collaborative LINK project funded by DEFRA, HGCA and the agri-food industry. The post is available from 1st October 2005 for up to three years. Candidates should have a PhD (or equivalent research experience) in plant or crop physiology with experience of research in controlled environments. Familiarity with enzyme assays is essential. An appreciation of the applications of the work in the plant breeding industry and evidence of good oral and written communication skills in previous academic-industry research are desirable.

Salary £19,645 - £21,467 per annum (under review) depending on experience.
Closing Date: 19 August 2005.

Science
Chemical & Pharmaceutical Sciences

Lecturer/Senior Lecturer in Analytical Chemistry
£25,424 - £38,209 pa inc
Fixed term from 1st October 2005 - 30th June 2006

We are seeking to appoint a Lecturer or Senior Lecturer to lecture in analytical chemistry. Analytical Chemistry is a particular strength of the School and it is taught at all levels both in our undergraduate and postgraduate courses.

We wish to attract applications from individuals with some experience in teaching and use of analytical methods. Areas of experience could be in spectroscopic methods and/or methods of separation and/or quality management. You will be expected to join an existing group of staff with wide experience in the teaching of analytical chemistry.

For an informal discussion please contact Dr W J Bland or Dr S. Barton on 020 8547 2000 ext 62944 or email w.bland@kingston.ac.uk or s.barton@kingston.ac.uk

For further information or to download an application pack visit our website www.kingston.ac.uk/jobs or alternatively call the recruitment line on 020 8547 7153 quoting reference 05/222.

If you are a minicom user, please phone 020 8547 7169. Closing date: 12 noon on 22nd August 2005. Interview date: 5th September 2005.
embracing diversity - committed to equality
Kingston University London

[2511-060 (2005) : 73]
KING'S College LONDON

EM Technician
Centre for Ultrastructural Imaging (CUI)

The CUI is the core EM facility for King's College London providing EM services mainly for the Biological Sciences. The unit is equipped with 3 TEMs and 2 SEMs and state-of-the-art preparation equipment including cryo.

The current vacancy is at the Technician/Senior Technician level. Applicants will be expected to assist with specimen preparation, operation of the microscopes and data processing. Experience in EM work especially ultrathin sectioning will be an advantage and will be a necessary requirement for appointment at the Senior Technician level.

The salary will be on the NTEC 5 or 6 salary scale, depending upon skills and experience, and will range from £20,226 - £26,327 (NTEC 5) or £26,327 - £30,738 (NTEC 6) per annum including London Allowance of £2,456 per annum.

For an application pack, please contact Personnel Department, Room 1.26, Henriette Raphael House, Guy's Campus, London SE1 1UL or email biomed-recruitment@kcl.ac.uk

**Technician** - Environmental Engineering Research Centre (2 posts)
Ref: 05/C417B
School of Civil Engineering, Architecture and Planning

One post available for 18 months, and one post available for 12 months, to assist with research carried out in the Environmental Engineering Research Centre.

Applicants must hold a minimum of an HNC (or equivalent) in analytical chemistry, physical or life science or other relevant discipline. At least one years relevant laboratory experience in one or more of the following is also essential: stable isotope mass spectrometers, gas chromatography, HPLC or wet chemistry. Additional criteria are available in the further particulars for the post.

Salary scale: £16,071 - £19,050 per annum (under review)
Closing date: 4.00 pm, Friday 19 August 2005

Please visit our website for further information and to download the application pack - [www.qub.ac.uk/jobs](http://www.qub.ac.uk/jobs) or alternatively contact the address below.

The University is committed to equal opportunities and to selection on merit. It therefore welcomes applications from all sections of society.

Fixed term contract posts are available for the stated period in the first instance but in particular circumstances may be renewed or made permanent subject to availability of funding.

[2511-064 (2005) : 73]
Cranfield UNIVERSITY

Cranfield University is a distinctive, postgraduate university committed to creating and transforming world-class technology, management and science into viable, practical, environmentally desirable solutions. Cranfield is a centre of excellence that enhances economic development and the quality of life.

Step up to the Grand Challenge
Cranfield University is part of a major EPSRC funded and industry backed ‘Grand Challenge' research initiative that includes the design and manufacture of 3-D miniaturised integrated products. We are currently looking for suitably qualified individuals to join a multidisciplinary research team based in the School of Industrial & Manufacturing Science that offers an exclusively postgraduate environment in which to develop research related careers. The opportunities available are:

**Research Officer**
The appointment is initially for four years The starting salary between £23,575 - £28,138 per annum You will focus on the design and manufacture of 3-D miniaturised integrated products with the opportunity to additionally contribute to research into fabrication of diamond micro-tools. Ideally you will possess a PhD or equivalent qualification in a related field. Previous experience in microinjection moulding technology and/or simulation would be a valuable contribution to the four-person project team.

For informal discussions, please contact Professor David Allen on + 44 (0) 1234 750111 ext. 4058, E: d.allen@cranfield.ac.uk Application forms and further details for the Research Officer post only are available from the Human Resources Department, Cranfield University, Cranfield, Bedford MK43 0AL. E: hr@cranfield.ac.uk Alternatively, telephone our 24 hour Recruitment Line on +44 (0)1234 750111 extension 2000. W: www.cranfield.ac.uk/hr quoting reference number C/5079A.

**PhD Research Studentships x 3**
The 'Grand Challenge' research activity will be complemented by PhD students who will undertake research into:

- Microinjection moulding of 3-D components
- 3-D Mintegration (The design and manufacture of 3-D miniaturised integrated products)
- Tool performance in micromachining

You should have materials science, materials processing, manufacturing technology or related engineering or scientific background and have or expect to obtain a minimum of a First or Upper Second Class (2:1) UK Honours degree or equivalent. Funding is only available to citizens from the UK and other EU states. You are advised to check out the website for the funding offered in relation to each project as this varies.

For further information and application forms for PhD opportunities please contact: SIMS Enquiries T: +44 (0)1234 750486 E: sims.enquiries@cranfield.ac.uk W: www.cranfield.ac.uk/sims/studentships

Closing date for receipt of applications: 18th August 2005.

PhD Research Studentships
Biomedical and Pharmaceutical Sciences Research Group (BPSRG)

Funds are available to support a number of research studentships across the BPSRG. Each studentship will include payment of fees for qualifying UK or EU residents, and a maintenance grant of around £13,000 per annum. High calibre students who have recently graduated with a first or upper second class honours degree in an appropriate discipline are being sought. Candidates must also demonstrate commitment and enthusiasm for conducting quality research in a stimulating environment, with modern laboratories and equipment.

Studentships will be available from 1st October 2005. General areas of research carried out by the BPSRG are:

• Biomedical Sciences: haematology, oncology, immunology, nutrition, microbiology, parasitology and vector biology, medical physics and sports science.
• Pharmaceutical Sciences/Pharmacy: organic synthesis of bioactive molecules, medicinal chemistry, drug action and drug delivery, and pharmacology.

Applicants should identify their area(s) of interest and send a current c.v. with the names of two academic referees to: Professor Declan Naughton / Professor Angela Russell, BPSRG Research Studentships, School of Life Sciences, Kingston University Penrhyn Road, Kingston, Surrey KT1 2EE by 30th August, 2005. Informal enquiries can be made by email to Dr. Sabbir Ahmed (s.ahmed@kingston.ac.uk)

PhD Studentships

Mathematical/computational modelling applied to sustainable nuclear power technology

"Keeping the Nuclear Option Open" is a major EPSRC-funded initiative, with the involvement of Imperial College and several other universities. It is a four-year programme supporting a wide range of research addressing different aspects of nuclear power production. From this autumn onward Imperial College, as part of this programme, will be seeking to appoint PhD students in the linked computational, mathematical and engineering physics modelling of the safety performance of 'Generation IV' nuclear power plant. This research will be linked with UK industry in the context of the international Gen IV programme. The studentships (offering transferable skills in finite elements, CFD, radiation and large scale computation) will be tenable in the Applied Modelling and Computation Group of the Department of Earth Science and Engineering. The Group offers an exciting multidisciplinary environment with research in progress applicable to energy, waste, oceanography, earth imaging and numerical mathematics.

Both bursary and fee support are only available to UK citizens (special rules apply for other EU countries).

If you think you may be interested please email a CV and covering letter as attachments to c.pain@imperial.ac.uk These emails will be screened electronically, so the email must include the text KNOO in the subject line and attachments must be in the form of pdf files, and named in the form YOURNAME.CV.pdf and YOURNAME_COVER.pdf.

There is no formal closing date, as we expect to be conducting a rolling programme of recruitment over the next 12 months, but early application is advisable.

Valuing diversity and committed to equality of opportunity

Engineering Doctorates available at
The Centre for Formulation Engineering, in Chemical Engineering
• A four-year postgraduate qualification carrying out industrially relevant research, supported by the EPSRC.
• Based in industry, not in the University.
• Includes taught modules in science, engineering, business and management.
• Open to UK nationals with a good first degree in (Bio) Chemical Engineering, Chemistry, Physics, Mathematics or Material Science (upper second or better).
• Tax-free bursaries of £15,500 rising to £17,000 (in 2006).
• Projects available with:
  Ross Ceramics - Disposable ceramic cores for the manufacture of turbine blades
  Unilever - Late customisation of structured liquids
  Procter & Gamble - Wall build up in the spray drying process
  Unilever/John Boone Ltd - Mixing and coating of detergent powders
  Johnson Matthey - Extrusion of catalytic formulations.

Please email your CV to Dr Richard Greenwood: R.W.Greenwood@bham.ac.uk (Tel: 0121 414 7234).
[2511-073 (2005) : 77]
Applications are sought from home or EU graduates with a first or upper second class honours degree or equivalent for a PhD studentship starting in October 2005. Applications should be sent to Margaret Stone, Registrar, The School of Pharmacy, 29/39 Brunswick Square, London WC1N 1AX, tel 020 7753 5958, fax 020 7753 5829, e-mail phd@ulsop.ac.uk. Electronic applications will only be accepted in RTF format.

Phytochemical and Antibacterial studies on the Lamiaceae

The project will investigate poorly studied members of the Lamiaceae (mint) family for activity against drug-resistant bacteria. This will involve the isolation and structure determination of active metabolites and their testing against various bacteria, including methicillin-resistant and multidrug-resistant strains of *Staphylococcus aureus*. Plant material will be extracted and active natural products isolated by a variety of chromatographic techniques (column, TLC, HPLC). Structures will be elucidated by a combination of high-field NMR spectroscopy and mass spectrometry. Activities of metabolites will be assessed by minimum inhibitory concentration determination against a panel of sensitive and resistant strains. This post is open to graduates interested in natural product chemistry and biology. Candidates with a chemistry, pharmacy or biochemistry background are encouraged to apply. Informal enquiries can be made to Dr Simon Gibbons (simon.gibbons@ulsop.ac.uk).

[2511-074 (2005) : 77]
INVITATION FOR GRANT APPLICATIONS

In the context of its Environment programme, Cefic-LRI is requesting grant applications from research institutes in the areas of:
Evaluation of fish embryo and fish cell line tests for their potential use as alternatives to fish acute studies
Establishing a bio-concentration factor (BCF) gold standard database

Project specifications, budget details and application forms can be found on the Cefic-LRI website: http://www.cefic-lri.org Deadline for application is November 4th, 2005. Only proposals that fit the project specifications and are submitted in the official LRI application form will be considered.

The European Chemical Industry Council (Cefic) is dedicated to supporting the advancement of science while ensuring the safety of its products. Through its Long-range Research Initiative (LRI), Cefic fosters progress into understanding the impact of chemicals in human health and the environment by funding research led by internationally-recognised, independent scientists. LRI-funded projects are overseen by the External Science Advisory Panel, made-up of experts from European academia and research institutes, and are published in peer-reviewed journals.

Requests for further details should be sent to Dr Monique Marrec-Fairley mfa@cefic.be

CEFIC-LRI, Avenue E. Van Nieuwenhuyse 4, B-1160 Brussels, Belgium.

Funded research opportunities

Cranfield University's School of Industrial & Manufacturing Science has funding available to support research students.

Recognised globally for our multi-disciplinary approach to research in the three key areas of manufacturing, materials and sustainable systems, our focus is on fundamental research and its application to meet the needs of industry and society. Many of the School's industrial partners are global organisations able to offer international career opportunities for Cranfield graduates.

We are now looking for high-calibre individuals interested in PhD level research. If you are from the UK or other EU States, possess a 1st or 2:1 UK honours degree or equivalent, significant funding is available to support you as you develop as a researcher*.

Research studentships currently available include:

Advanced Materials, Microsystems and Nanotechnology
- Nanostructured surfaces for switchable DNA binding
- Multifunctional materials incorporated into MEMS piezoelectric actuators and sensors
- Interfacial phenomena in novel micro solid oxide fuel cells
- Next generation low-environmental impact ferroelectric and piezoelectric thin films for MEMS
- Microsystem for measuring ion currents In cells - patch clamping
- Non-silicon MEMS actuators
- Advanced microwave devices for frequency-agile applications: RF-MEMS
- Damage detection and damage tolerance in advanced carbon fibre aircraft structures
- Ultra precision reactive atom plasma machining
- Development of bonded crack retarders for aircraft structures
- Microinjection moulding of 3D components
- Environmental degradation and protection of gas turbines and heat exchangers
- Metal injection moulding (MPM) of titanium

Medical
- Design and fabrication of novel modular system for the control of urinary incontinence

Water Sciences
- Anaerobic digester foaming causes and control
- Cost and performance attributes of novel side-stream air-lift MBRs

Welding
- High power laser welding

Waste Management
- Amenity impacts from landfill odour omission and community monitoring
- Organic waste treatment processes: biodegradability measurement
- Application of full-scale aerobic treatment technology for achieving landfill

Enterprise Integration
- Intelligent rolling systems design using soft computing

Manufacturing
- Ultra precision measurement of free form surfaces
- Ultra precision diamond machining of complex shape infra red optics
- Ultra precision reactive atom plasma machining
- 3D-MIntegration: the design and manufacture of miniaturised integrated products
- Tool performance in micromachining

UCL
UNIVERSITY COLLEGE LONDON
"Life At The Cutting Edge"

UCL, one of the top UK multifaculty research universities, hosts The Advanced Centre for Biochemical Engineering. The Centre is examining fundamental issues related to bioprocessing of materials for human therapy such as genes, cells and tissue, vaccines, recombinant antibodies, and complex chiral pharmaceuticals. Aspects especially crucial to the new bioindustry are delivered to postgraduate students alongside participants already working in it.

The UCL Department of Biochemical Engineering holds studentship awards from the BBSRC, EPSRC and industry to support students on its MSc, PhD and EngD Biochemical Engineering Innovation Leadership programmes. Fully funded studentships are available for suitably qualified home students with backgrounds in biological science, process engineering and related disciplines.

For further details please send your CV quoting reference NS-08/05 to: Mrs P Markey Department of Biochemical Engineering, University College London, Torrington Place, London WC1E 7JE, UK or e-mail to: p.markey@ucl.ac.uk (see also, www.ucl.ac.uk/biochemeng).

Pursuing Excellence in Education and Research

[2515-001 (2005) : 51]
LIKE countries the world over, the UK has little grip on the biggest environmental problem, climate change. It does, however, have firm and tightening regulatory control over the second-tier issues that affect us all, such as noise pollution, air quality, environmental impact assessments, contaminated land remediation, and waste management.

Unfortunately, and unexpectedly, there are not enough people with the crucial five to 10 years of experience that jobs in these high-growth areas usually require - and the shortage is expected to get worse over the next five years.

European and national legislation has increasingly obliged local authorities, manufacturers, developers and others to monitor and deal with any effects their activities may have on the environment. As a result, the UK’s environmental sector has grown from virtually nothing 30 years ago into an employer of more than 170,000 people, with an annual turnover of £16 billion-plus.

But the supply of scientific staff to do the research, monitoring and consultancy has not kept up with the growth in demand. “Over the next five years,” says Jacob Tompkins, policy development adviser to industry association Water UK, “our members will have to implement the requirements of the European water framework directive on integrating river basin management. That will create a need for hydroecologists. As far as I can see, not only do we not have these people, there are not even the university courses that we need to produce them.”

The skills shortage affects both public and private-sector employers, but environmental consultancies are generally reckoned to be hardest hit. Many of these mostly small organisations have sprung up over the past decade to provide services such as environmental impact assessments. Local authorities are almost certain to demand that an EIA be carried out before large development projects receive planning permission.

Clients’ requirements have also become more rigorous, says Penny Anderson, who runs a Derbyshire-based ecology consultancy. “Twenty years ago, assessments used to be pretty basic and were only needed for sites where there were protected species such as bats or great crested newts, or sites of special scientific interest. But now a local authority is much more likely to ask for an ecological survey and that will need to look at everything.”

Anderson says the shortage of suitably trained ecologists is severe but adds that it has not yet started to cause expensive delays to major development projects. “People cope. It means that senior staff are under an awful lot of pressure, but we get by,” she says.

For many companies in the broader environmental field, the solution is to buy in trained staff from abroad, says Nick Reeves, executive director of the Chartered Institution of Water and Environmental Management, one of the main professional associations. That the UK needs to import expertise in environmental sciences is curious, as it produces so much of the raw material at home. Over the past two decades, broad-based courses have developed into popular first-degree courses offered by many institutions.

In 2004, a total of 3157 UK students were accepted on courses in “physical and terrestrial geography and environmental sciences” - the University and Colleges Admissions Service’s “F8” category. Some will leave the field after graduation, but many are highly motivated students who want to do something positive for the environment. So why is there a shortage of professionals with five to 10 years’ experience?

The problem is that while there is plenty of work for experienced professionals, newly qualified candidates are unlikely to be accepted for a post at the levels where skills shortages are most acute, no matter how good their degree. “Technical ability is only half the story. These jobs need a wide range of other skills that can only be gained with experience, like communicating with clients, making presentations and knowing how to meet deadlines,” says Paul Seeley, from recruitment agency Eden Recruitment in Selkirk.

So it is difficult for graduates without the right experience to get their first jobs, yet they can’t get that vital experience any other way. Many consider changing fields because of this catch-22. But some of
the people responsible for generating the supply of graduates don’t accept the cycle is inevitable or unbreakable.

William Hale, admissions tutor for the University of Bradford’s department of geography and environmental science, takes a tough view. “If the consultancies want experienced people, they should be prepared to take on more placement students,” he argues. “We run a four-year course in which students work outside during the third year. It should give the student excellent training and the employer the chance to find out what they can do. But we have tried to find students placements with these consultancies, and the response has always been very poor.”

But it is hard for a consultancy to find the relatively short-term duties suitable for a student, counters Malcolm Pratt, an air pollution expert and technical director at the Cheshire branch of consultancy Entec UK.

“The sort of work we are doing requires substantial amounts of judgement and experience, and it is very difficult to find meaningful work for someone who doesn’t have that yet. I would fight strongly against bringing a young person in for a year only to give them a glorified clerical job.”

Pratt points out that the field is highly competitive, and small firms are surviving on narrow profit margins. Few would be able to support temporary members of staff over a long period. And if fee-earning senior staff devote a lot of time to training new staff, profitability is likely to suffer, he says.

Another factor is the attitude of employers towards degrees that provide a broad but relatively shallow education. “Employers like candidates with a good grounding in the basic sciences or in engineering,” says Seeley.

However, employers will have to cast a wider net if they want to fill their vacancies. “There are simply not enough students wanting to take the more traditional science and engineering degrees. Bright young people feel that they can get better jobs in other areas, such as law and financial services. So it is up to the employers in the field to make their jobs much more attractive,” argues Reeves.

Clearly, there are no simple solutions to the skills shortage. Lester Lockyer of Dorset-based recruitment company Allen & York, which specialises in jobs for environmental scientists, believes that both employers and job-hunters have to be flexible. Recent graduates have to show that it is worthwhile for companies to offer them in-house training. In many cases, by acquiring further qualifications, recent graduates may persuade companies that they have the specific skills and the maturity for this sort of technically demanding career.

Equally, employers must maximise the career opportunities and salaries of their junior employees, so graduates are persuaded to pursue the environmental science career they are trained in rather than drift to other fields with stronger incentives like teaching or computing. By establishing a clear career path for graduates, employers will soon gain the experienced professionals it needs further down the line.

In the meantime, employers must accept that it is not always possible to find the perfect candidate. They could fill a vacancy with a graduate who has only some of the skills needed, or someone currently working in a related area of the environmental sector, and accept the task of filling experience gaps.

“While some period of adjustment may be required, this could easily be shorter than the amount of time many roles remain unfilled today,” Lockyer says. “Hiring people from other sectors that employ environmental professionals can only create greater career opportunities, fresh challenges and the loss of fewer candidates who seek career satisfaction outside the profession.”

London Gateway Port Limited

Is it time for your next step?
P&O, a major international logistics and transport company recently received government agreement in principle to develop London Gateway Port, a major UK port on the Thames estuary. To reflect P&O’s commitment to the application of the highest environmental standards we are looking to recruit an environmental advisor.

This is an opportunity to work at the leading edge of environmental monitoring on a high profile development with a team of recognised experts. The role will provide considerable potential to work with a range of both marine and terrestrial issues and to liaise with public regulators and other interest groups.

ALLEN & York
ENVIRONMENT GROUP

Environmental Co-ordinator Salary c.40K p.a
London Gateway Port (LGP) Thumock, Essex/Central London
As a member of a professional team you will;
• be experienced in complex environmental, regulatory and development project management issues,
• have a background in ports/coastal or construction related sectors, and
• be highly organised with superior communication skills

Your primary objective will be;
• advising on regulatory matters whilst supporting the Executive team with interactions between construction and environmental issues,
• planning, developing and coordinating mitigation strategies for aquatic and terrestrial aspects of the port development,
• overseeing the effective implementation of LGP’s mitigation, compensation and monitoring obligations, and
• acting as a key liaison between neighbouring land owners, contractors, external consultants, key interest groups and regulatory bodies.

Given the nature of this role would expect the following credentials;
• graduate in Environmental Science, Engineering or similar
• at least 6 years postgraduate work experience within the Ports industry and with environmental regulators
• Masters qualification in a marine or a coastal discipline

If you feel that this highly challenging and rewarding role is for you then please forward a detailed CV and salary expectations to londongateway@allen-york.com or contact our managing consultant, Andy Seddon, on 0870 870 8986 for more details.

[2515-003 (2005) : 54]
Cascade Consulting is a multi-disciplinary environmental consultancy with offices in Manchester, East Grinstead and Swindon. We are a growing company specialising in water management policy development, EIA, and R&D within the water sector and have built up a strong project portfolio and a good reputation. We have recently won a number of major projects for clients including water companies, UKWIR and the Environment Agency. We are now looking to recruit enthusiastic professionals who are keen to develop their careers in a young and progressive company. Vacancies include:

**Senior Water Manager**  
MSc or PhD and 5 years experience in the following areas:  
- Catchment modelling (FEH, ISIS, etc)  
- Flooding and low flow assessments  
- Integrated assessment of hydrology and ecology

**Senior EIA Project Manager**  
MSc or PhD, Registered EIA Practitioner with IEMA and 5 years experience in the following:  
- EIA team building and management of specialists  
- Strategic environmental planning and alternatives assessment  
- Design and management of consultation programmes  
- Development of integrated mitigation and monitoring strategies

**Senior Aquatic / Terrestrial Ecologist**  
MSc or PhD and 5 years experience in one or more of the following areas:  
- Freshwater ecology for flooding and low flow assessments  
- Terrestrial ecology (particularly botany) and habitat management

**Environmental Scientist**  
BSc and/or MSc and 1-3 years experience in one or more of the following areas:  
- River or coastal development studies  
- Ecology (terrestrial/aquatic)  
- Environmental impact assessment

You will need to work well both independently and as part of a team and have the initiative to be able to solve problems when they arise. Good communication and IT skills are essential. Membership of a relevant recognised professional organisation would be an advantage. Attractive working conditions and benefits are offered. Please forward a CV and covering letter by the 30th September 2005 to:  
Jenny Simms, Cascade Consulting, Felcourt Farm Business Park, Felcourt, East Grinstead, West Sussex, RH19 2RR

Environment Agency
promoting a rich, healthy and diverse environment.

are you ready to play your part?

At the Environment Agency we’re passionate about ensuring that air, land and water are looked after by everyone in today’s society, so that tomorrow’s generations inherit a cleaner, healthier world.

With offices across England and Wales, we carry out Government environmental policy, inspect and regulate businesses and react when there’s an emergency - such as a flood or pollution incident, joining us places you at the forefront of efforts to protect and enhance the environment. Whether developing top level strategies or providing back office support, everyone who works with us makes a valued contribution to protecting today’s environment for future generations.

**Principal Officer - Conservation & Biodiversity**
Peterborough • starting salary £25,300 - £28,700 (pay award pending)
More creatures and better habitats indicate a healthy environment. And they’re also your goal as part of a team co-ordinating projects to deliver biodiversity improvements, joining our Anglian Region, you’ll focus on an area with incredible environmental diversity, but equally diverse challenges from agriculture, development, water demands and changing coastlines. With a Biodiversity award from the Wildlife Trust already under our belts, you’ll be part of a team that’s already making a positive impact.

Through your field experience in practical conservation and biodiversity, along with your sound understanding of the natural environment, you’ll develop strategies and plans to promote biodiversity. You’ll work within regulations and with our partners, operating collaboratively and using your influencing skills to ensure environmental improvements. Ref: 9342

**Field Monitoring & Data Officer - Hydrometry**
Reading, Berks • starting salary £19,300 - £23,100 (pay award pending)
6-12 month contract (maternity cover)
Could you take the lead on validation and hydrometric techniques across the Thames catchment area and provide quality-assured data to a wide range of internal and external customers? In this varied role, you’ll be part of a team ensuring good practice is applied consistently within the Region and will be our internal expert on specialist IT systems and other areas of hydrometry.

As an experienced hydrometric officer, you’ll probably be a graduate or equivalent in an appropriate discipline or will have relevant experience. Several years’ working with hydrometric data is essential. Ref: 9586

**Regulatory Officer - Waste**
Wallingford, Nr Oxford • starting salary £19,300 - £23,100 (pay award pending)
The UK produces 400 million tonnes of waste each year, which makes our role in waste regulation so important. To help us prevent environmental pollution you’ll technically assess waste applications, develop licence conditions and produce concise reports to support your decisions. You’ll also work closely with people applying for licences, educating and encouraging re-use and recycling.

Ideally you’ll have a degree or equivalent in an Environmental Science subject and relevant experience - but if you don’t, and have strong skills in a related area, we might consider training you for this role. Either way, you’ll need to be great at organising and working to tight deadlines as part of a team. In addition you will need to have strong computer literacy skills - as well as holding a full UK driving licence. Ref: 9510

**Regulatory Officer - Water Resources**
Frimley, Surrey • starting salary £19,300 - £23,100 (pay award pending)
Working within the Regulatory Water Resources team in Frimley, you will be responsible for the determination of water resources permits and authorisations throughout the South East Area of the Thames Region. You’ll also team up with others to undertake a range of hydrology projects.

You’ll ideally have a degree or equivalent, preferably in Environmental Science or Geography, and a working knowledge of water resources, as well as GIS. You’ll have a high level of written and oral communication skills, needed for influencing and consulting with a wide range of people including Environment Agency specialists, English Nature and the general public. You’ll have strong organisational skills to be able to prioritise effectively and meet deadlines. Ref: 9509

**Regulatory Officer - Water Resources**

Brampton, Cambs • starting salary £19,300 - £21,900 (pay award pending)

As part of our Regulatory Water Resources team, you’ll be responsible for the project management and production of catchment Abstraction Management Strategies (CAMS) in the central area of our Anglian Region.

With a degree in Environmental Sciences, Geography or a numerate discipline and experience of water resources issues including permitting, you’ll have strong project management and organisational skills and an analytical approach to problem-solving. The ability to influence and negotiate with people both within and outside the organisation is essential, along with experience in giving clear concise presentations. For this role you will need a full driving licence. Ref: 9610

All positions attract great benefits including contributory final salary pension scheme (with life cover), flexible working hours, family friendly provisions and at least 25 days’ holiday.

For a full information pack and to apply, please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs) If you don’t have internet access call 01925 542141 for an application pack quoting the appropriate reference.

Closing date for applications: 15 September 2005.

We are committed to making our organisation as diverse as the environment

Natural choice

The postgraduate university
If you are looking to change or enhance your career, Cranfield’s unique, international postgraduate atmosphere could be right for you. With environmental issues rising rapidly up the political agenda, Cranfield graduates are well-placed to take advantage of increasing career opportunities in this dynamic sector.

External collaborations
Cranfield has excellent links and generates the 3rd highest commercial and industrial research income of any UK university. Our modular courses are kept relevant by industrial panels, so you can be sure that your Cranfield Masters course will meet the needs of environmental sector employers.

Our range of full-time and part-time postgraduate environmental courses can be studied on the Cranfield and Silsoe campuses:

Cranfield
• MSc Design for Sustainability
• MSc Integrated Waste Management
• MSc Water and Wastewater Technology (part-time only)
• MSc Water Pollution Control Technology
• MSc Water and Wastewater Engineering
• MSc international Water Technology & Management
• MTech Water Processes - Advanced Professional Masters
E: sims.enquiries@cranfield.ac.uk
T: +44 (0) 1234 754086

Silsoe
• MSc Environmental Diagnostics
• MSc Environmental Management for Business (EMB)
• MSc Professional Masters in EMB
• MSc Geographical Information Management
• MSc Land Reclamation and Restoration
• MSc Natural Resource Management
• MSc Soil Management
• MSc Water Management
E: StudentEnquiries.silsoe@cranfield.ac.uk
T: +44 (0) 1525 863319

For further information on all courses please quote ref no: NSE03/09.

W: www.cranfield.ac.uk/prospectus/environment

EPSRC bursaries are available on some programmes to suitably qualified full-time MSc students from the UK and other EU states. Industrial sponsorship is available for the MTech. Part-time students are normally supported by their employers.

Cranfield UNIVERSITY
[2515-006 (2005) : 56]
LANCASTER UNIVERSITY

The Lancaster Environment Centre is an international centre of excellence in Environmental and Biological Sciences (www.lec.lancs.ac.uk)
You will receive first-class training designed to maximise your career prospects.

We are holding Open Days in the afternoon of 9th November, 11th January, 22nd February and 22nd of March.
Contact es.pg@lancaster.ac.uk for details and to book.

We offer full time programmes including:
• MRes Science of the Environment
• MSc Ecology and the Environment
• MSc Environmental Pollution and Protection
• MSc Environmental Technology
• MSc Waste Science and Management
• MSc Contaminated Land and Remediation
• MSc Environmental Modelling and Forecasting
• MSc Environmental Science
• MSc Water Science
• MSc Environmental Hazards
• MSc Environmental Impact Assessment
• MSc Hydrology and Water Quality
• MSc Plant Biotechnology
• MSc Environmental Biotechnology
• MSC Environmental and Biochemical Toxicology
• MSc Biomedicine (2006 start)

For further information on these programmes please visit our websites www.es.lancs.ac.uk and biol.lancs.ac.uk or email on es.pg@lancaster.ac.uk

JSC i
Opportunities in Toxicology and Ecotoxicology

JSC is a well-established team of regulatory scientists with a proven track record in the registration of agrochemicals, biocides and veterinary medicines with our integrated approach to risk assessment and problem solving.

We have vacancies for regulatory and scientific experts including:

**Toxicologist**: As the principal source of toxicology expertise in JSC to provide advice to clients on toxicological issues

**Ecotoxicologist**: To work closely with other members of the team providing expert advice on ecotoxicology and environmental risk assessment.

Both posts involve the evaluation of data, study monitoring, dossier preparation and close liaison with clients and regulatory authorities.

Successful candidates will have been trained to MSc or PhD level and have at least 5 years’ practical experience in toxicology or ecotoxicology as a study director or in a comparable position. An ability to interpret data from a range of studies is essential and experience of preparing overviews is desirable. The successful applicant will also need good interpersonal skills and be a good team worker.

JSC offers an exceptional package of benefits, with a salary commensurate with experience.

If you are interested in working at JSC, please apply in writing with your CV to: Jackie Hall, JSC International Ltd., Simpson House, Windsor Court, Clarence Drive, Harrogate, HG1 2PE.
++44 1423 520245, or by email to: Jackie.Hall@jsci.co.uk
[2515-008 (2005) : 56]
**Senior Survey Geologist**

The Natural Environment Research Council is an equal opportunities employer and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome. All sites have a no-smoking policy in all buildings.

The British Geological Survey is an investor in People organisation. There is a guaranteed interview scheme for suitable candidates with disabilities.

**INVESTOR IN PEOPLE**  
**POSITIVE ABOUT DISABLED PEOPLE**

£27,940 to £32,960 per annum depending on qualifications and experience

The British Geological Survey, part of the Natural Environment Research Council, is the UK’s premier geoscience strategic mapping and research organisation. We have a vacancy for a senior survey geologist at our headquarters in Keyworth.

You will carry out geological field surveys overseas and in the UK, principally of ‘basement’ Precambrian and Lower Palaeozoic successions, metamorphic / igneous rocks, and Quaternary deposits through field mapping, interpretation of remote sensing imagery, core logging and other data collection, to produce geoscientific interpretations and 3D models in support of science budget or commissioned research.

You will be a graduate with a first class or upper second class Honours degree and a Ph.D. or experience equivalent to a Ph.D. in geology or earth sciences. You will have proven field mapping skills and some project leadership experience gained in developing and developed countries especially in ‘basement’ terrains. In addition, you should also have at least ten years’ experience in geological mapping projects in Africa or the Middle East, and be prepared to spend extended periods on overseas fieldwork. Fully conversant in MS Office applications, you must also be familiar with interpretation of remote sensing imagery and the use of GIS. Fluency in French is highly desirable, although a sound knowledge of the language and a willingness to study it further would be considered.

You will be willing to travel and work under demanding physical conditions in the UK and overseas. Therefore a current driving licence is essential.

The starting salary will be from £27,940 per annum to £32,960 per annum (pay award pending) depending on qualifications and experience. Overseas working attracts an additional honorarium. Normal working hours will be 37 per week. A generous benefits package is also offered, including a company pension scheme, childcare allowance. 25 days’ annual leave plus 10.5 days’ public and privilege holidays.

For an application form, to be returned by 28th October 2005, contact Personnel Recruitment, British Geological Survey, Keyworth, Nottingham NG12 5GG, UK. Tel: 0115 936 3209. Please ensure that the reference number SSO/KW/05/02 is quoted when applying for an application form. Further details can also be obtained by accessing our web page at [www.bgs.ac.uk](http://www.bgs.ac.uk)

[2515-009 (2005) : 57]
Syngenta is the leader in crop protection and the third largest seeds business worldwide, with sales in 2004 of around US$7.3 billion. We are a young company for the 21st century, yet we have years of innovation behind us. This is your chance to join a team of more than 19,000 people in over 90 countries, all of whom are committed to helping farmers feed the world today and tomorrow. Come and help us grow.

**Herbicide Biokinetics Experimentalist**  
£20k-£25k dependent on experience  
Jealott’s Hill, Bracknell

Our Biokinetics Group influences the development and understanding of new active ingredients and promotes the science behind established products. As an integral part of this process, you will generate and manage experimental data on the uptake, movement and metabolism of our new active ingredients and formulations for weed control using $^{14}$C-labelled and unlabelled techniques.

Qualified to degree level or equivalent in a biological discipline you will need good communication skills, be able to think innovatively and work well as part of a team.

In return, we can offer you the opportunity to work in a world-leading environment with all the benefits you would expect from an international company.

To apply, please send a full CV to: HR Central Support, Syngenta, Jealott’s Hill International Research Centre, Bracknell, Berkshire RG42 6EY quoting ref: JHBIOSCIEN/10 or email: uk.recruitment@syngenta.com

Groundbreaking multi-functional materials research

Scientific Research
Teddington, Middlesex

NPL is the UK’s national standards laboratory. We carry out fundamental research and develop measurement technologies, vital to improving quality of life, trade competitiveness and protecting the environment.

Opportunity to understand and manipulate materials at the nanoscale, research includes: Application of nano-phase reinforcements in thermoset-based systems, MEMS, MOEMS, and micro-electronics encapsulation materials, micro and nano-fluidics, nano-layered coatings, nano-indentation.

**HIGHER RESEARCH SCIENTIST**
£24k-29k Ref DEPC/AB4
Needed to carry out an experimental study of the relationships between nano-structure and materials properties, encompassing mechanical, thermal, optical effects, as well as the realisation of novel nanocomposites. Experience in this field of materials science necessary.

Key to the role is experimental, software control and acquisition skills. The group is expanding and you will need to contribute to defining new opportunities and areas for development. You will be able to demonstrate understanding of the application context for research and represent NPL at conferences and industrial consortia.

A BSc/Masters in Physics or Materials Science is essential and a related MSc desirable. Expertise with nanostructured materials or films is advantageous.

Opportunities to advance Functional Materials Science, Piezoelectrics and multiferroics, research includes:
Magnetic/piezo/strain coupling, high power non-linearity, MEMS/NEMS integration, nano-scale functionalised AFM probes, modelling for piezoelectrics, and measurement of films displacements at 0.2µm resolution.

**SENIOR RESEARCH SCIENTIST**
£30k+ depending on experience
Ref DEPC/AB1
Help define and develop new techniques for the measurement of functional materials in film and bulk form. Experience in this field of materials science necessary.

Key to the role is experimental, software control and acquisition skills. The group is expanding and you would contribute to defining new opportunities and areas for development. You will understand the application context for research, and liaise with industrial consortia representing NPL.

A PhD and BSc/Masters in Physics or Materials Science are required or a mechanical engineering MSc with proven skills in electromechanical stress analysis will also be considered. Expertise with nanostructured functional materials such as ferroelectric thin films or carbon or other nano-tubes is advantageous.

**RESEARCH SCIENTIST**
£19k-23k Ref DEPC/AB2
Join a vibrant team researching new techniques for the measurement of functional materials, in a scientific role but with strong industry links.

Key to the role is experimental, software control and acquisition skills for practical application in a laboratory environment. In addition the group is expanding and as such you can have immediate impact helping to define new opportunities and areas for development.

The position is likely to be filled by an honours degree/Masters level Physicist or Materials Scientist. Any experience with functional materials such as ferroelectric thin films, carbon or other nano-tubes is of interest.

Full details and online application at www.npl.co.uk/recruitment/current or email your CV, quoting appropriate reference, to recruitment@npl.co.uk

Closing date: 15\textsuperscript{th} September 2005. NPL is committed to equal opportunities.

POSITIVE ABOUT DISABLED PEOPLE
JM
Johnson Matthey
Johnson Matthey Catalysts is one of the world's leading catalyst companies with strengths in process catalysis, environmental catalysis and fuel cell technologies.

At Johnson Matthey Catalysts, our people are our strength. Going beyond simply providing products and services, we develop tailored solutions for challenging opportunities. Our in-depth practical knowledge enables us to optimise the performance of our products in the customer's plant by applying a unique blend of process, design and engineering skills. Our dynamic groups of scientific and commercial personnel are the catalysts for your competitive advantage.

**Analytical Spectroscopist** Teesside
Catalyst Characterisation Team,
Process Catalysts & Technologies Division
Responding to a technology leader in this discipline, you will provide a reliable service in support of new product introduction, catalyst applications and process development, utilising a range of spectroscopic techniques available within the department. These will include; vibrational methods (IR and RAMAN), electronic methods (UV-vis), molecular probing (NMR) and surface sensitive (XPS) methods. Of particular value will be the development of *in-situ* procedures enabling the application of vibrational spectroscopy to reveal both surface activity and bulk properties of catalytic materials.

Ideally, you will have an honours degree in one of the physical sciences, Chemistry, Physics and variants thereof, or the Biological Sciences where analytical chemistry formed a major subject, or hold an HNC accompanied by at least three years' industrial experience in the application of spectroscopy.

To apply, please email your CV, with cover letter to [JMCAS@uib.srg.co.uk](mailto:JMCAS@uib.srg.co.uk) or write to Daniel Younger, SRG, The Grainger Suite, Dobson House, The Regent Centre, Newcastle Upon Tyne NE3 3PF. Tel: 0191 284 6768.

Closing date: 30 September 2005.

[2515-015 (2005) : 60]
The Academy of Medical Sciences

POLICY OFFICER

The Academy of Medical Sciences was established in 1998 to promote medical science across traditional disciplinary boundaries. The Academy Fellowship brings together doctors and scientists from across the academic spectrum - from laboratory to clinic.

This is a new post and the post holder will play a key role in developing Academy policy on academic medical research and the many public policy issues that involve the biomedical sciences, and will also enable the Academy to be more proactive in its relations with government and other national bodies. Working within a small team in central London, the post holder will gather information on specific issues, produce reports, make recommendations, and provide administrative support for Academy study groups.

The successful applicant will hold a science degree, have excellent analytical and communication skills, a clear writing style, and time management and IT skills. General knowledge of higher education or health care sectors in the UK, together with 1-3 years experience in a similar role, is desirable.

To apply for this post, send a CV and covering letter indicating how you meet the criteria of the job statement to apollo@acmedsci.ac.uk

Further information is available on the Academy web site: www.acmedsci.ac.uk or may be obtained from the Academy office by sending an email to apollo@acmedsci.ac.uk

The closing date for receipt of applications is Friday 23 September 2005. Interviews will be held in central London on Wednesday 28 September 2005.

[2515-016 (2005) : 60]
We seek 3 enthusiastic individuals to contribute scientifically and technically to our work providing radiation safety and radiology physics services, delivering radionuclide therapies as part of an internationally recognised multidisciplinary team, and contributing to the NHS Breast Screening Programme. There will be opportunities for teaching, research and development.

**Medical Technical Officer** (Radiation Safety) MT04/3
£23,986 - £31,771 p.a. inc. Ref: CCMD065
Providing technical support for radiation safety legislation compliance and radioactive substance control - with direct involvement in patient radionuclide therapy treatments - the work includes patient and environmental radiation monitoring, thermoluminescent dosimetry and radioactive waste control. You should hold BTEC/SCOTVEC/HNC or equiv., and four years' relevant experience (less for MT03 appointment).

**Principal Clinical Scientist**, B 17-19
£35,382 - £38,036 p.a. inc. Ref: CCMD067
Focusing mainly on radiology physics, this post covers optimising patient radiological procedures, plus acceptance, commissioning and QA for interventional radiology, mammography, CT, and digital radiography. Suitable for a Registered Clinical Scientist with six years' radiology physics and/or radiation safety experience. Applicants with less experience may be considered for lower grade appointment.

**Medical Physicist**, B 8-10
£25,708 - £27,570 p.a. inc. Ref: CCMD066
Covering radionuclide therapies, diagnostic radiology physics and general radiation safety - with direct involvement in patient treatment, X-ray equipment testing and radioactive substances management - this post should suit a physicist who has completed the basic Training Scheme.

The Royal Free Trust, employing over 4,000 staff, is close to Central London but pleasantly located near Hampstead Heath. To visit informally, contact the team on 020 7830 2158 or email c.skinner@medsch.ucl.ac.uk

All grades and salaries are subject to review as part of the implementation of the new NHS pay system.

Application packs are available from the Human Resources Department, Lower Ground Floor, Royal Free Hampstead NHS Trust, Pond Street, London NW3 2QG. Tel: 020 7830 2249, quoting the appropriate reference or email: hr@royalfree.nhs.uk (quoting the reference number in the subject box). Closing date for all posts: 23rd September 2005.

For further information about the Trust and other vacancies available visit our website [www.royalfree.nhs.uk](http://www.royalfree.nhs.uk)

Applications are welcome from people wishing to job share or work flexible patterns. Committed to Equal Opportunities.

**POSITIVE ABOUT DISABLED PEOPLE**
[2515-017 (2005) : 60]
I want to advance medicine. Macclesfield

If you're looking for the perfect environment for your energy, imagination and expertise, welcome to AstraZeneca. Our Pharmaceutical and Analytical Research and Development (PARD) group offers a dynamic range of challenges, thanks to the high volume of innovative drugs currently progressing through our development pipeline and emerging from the Discovery phase. This is your chance to join us - and play a key role in accelerating the pace of innovation in a number of important areas of medical need.

Senior Scientist, Drug Delivery
You will join our multidisciplinary Product Development team that focuses on investigating new drug delivery technologies and demonstrating the technical feasibility of these new developments. Providing a mixture of technical and strategic input, you will also manage collaborations with external partner organisations. An outstanding track record of innovation and success in drug delivery is essential, as are a relevant PhD and expert knowledge of oral delivery mechanisms. Ref: PARD0022

Associate Principal Scientist, Process Engineering
We're looking for a senior-level individual to join our Research and Technology team, and provide expert manufacturing process support to various project teams, especially in the area of granulation. You will also lead technological and scientific developments in this key area, and drive your own mix of internal and external research programmes. A PhD-qualified scientist or engineer, you will bring expertise in pharmaceutical solids processing or process modelling plus knowledge of modelling particulate systems. Ref: PARD0018

Senior Scientist, Solid & Parenteral Dosage Forms
This is an exciting opportunity for an experienced pharmaceutical scientist to play a leading role in projects which will ensure we continue to deliver high-quality, robust and innovative dosage forms. Whether you have a degree and four years' relevant product development experience or a PhD plus two years' industrial experience, you will certainly have expertise in formulation design and manufacturing process development of either oral or parenteral dosage forms. Ref: PARD0019

Associate Principal Scientist, Compaction and Tabletting
In this position of technological and scientific leadership, you will provide expert support to project teams in our Product Development group - and ensure that we achieve best practice in our solid dosage forms and manufacturing processes. A PhD-qualified scientist, you will bring experience that includes material science, pharmaceutical processing, compaction simulation and computer simulation systems. Ref: PARD0021

To apply, please visit our recruitment website at www.astrazeneca.com/azcareers/searching under the appropriate vacancy reference code.

Closing date: Friday 16th September 2005.

GET YOUR COAT!
You’ve found your match. New Scientist is the right place to find the perfect job.
New Scientist Jobs
www.newscientistjobs.com
Schering-Plough Animal Health is a division of Schering-Plough Ltd., a wholly owned subsidiary of the Schering-Plough Corporation, USA, one of the world's largest pharmaceutical companies. Within the Animal Health Division in the UK a vacancy has arisen for a Pharmacovigilance specialist to deal with Periodic Safety Update Reports (PSURs) for products authorised under the European Union's centralised and mutual recognition procedures as well as dealing with other aspects of pharmacovigilance.

Based at Harefield and reporting to the Director, International Regulatory Affairs, you will take responsibility for the preparation and submission of PSURs to European regulatory authorities and to the European Medicines Agency (EMEA). You will be self-motivated and possess excellent communication skills and be a team player.

For this pivotal post you will have:
A degree in veterinary medicine, life sciences or equivalent, preferably with an advanced qualification
A qualification in pharmacovigilance would be an advantage
Experience in dealing with European procedures for the authorisation of medicines
A minimum of 5 years experience within drug safety or regulatory affairs, preferably in the veterinary sector

In addition to a competitive salary and benefits package, we offer the opportunity to develop your skills and potential with our support and training, in return for your growing contribution to the work of the regulatory team.

Please apply in writing, enclosing a current CV and salary details by 30th September 2005 to:
David Strong
Schering-Plough Animal Health
A Division of Schering-Plough Ltd
Breakspear Road South, Harefield,
Uxbridge, Middlesex,
UB9 6LS
Or by e-mail to: david.strong@spcorp.com
WebSite: www.schering-plough.com

Schering-Plough is an Equal Opportunities Employer.
The JAC operates two of the world's most powerful telescopes on Mauna Kea on the Island of Hawaii: the United Kingdom Infrared Telescope (UKIRT) and the James Clerk Maxwell Telescope (JCMT).

SCUBA-2 is a revolutionary new instrument for JCMT, currently under construction at the UK Astronomy Technology Centre (UKATC) in Edinburgh. Scheduled for delivery in 2006, SCUBA-2 will use a number of technological and operational innovations. You will be based at the UKATC for up to one year to participate in assembly and test of the instrument; you will then transfer to the JAC for a minimum of 3 years to participate in installation and commissioning and to be responsible for scientific and technical support of the instrument.

Required: Bachelor's Degree from accredited college/university in physics or engineering. Minimum 4 years postgraduate participation in troubleshooting, designing and/or building complex instrumentation. Experience with low temperature experimentation, and combination of superconductor physics, detector physics, optics, electronics and data acquisition.

Desirable: Experience with data reduction, astronomy or astronomical observing, preferably in the submillimetre range. Experience with continuum submillimetre or infrared instrumentation. For an applicant with a Masters or Ph. D. degree in Astronomy, a research allocation is negotiable.

Includes a relocation package and comprehensive benefits. Salary commensurate with qualifications and experience.

Details: Dr Per Friberg, JAC (808) 969-6522, p.friberg@jach.hawaii.edu or Dr Wayne Holland UKATC, +44 (0)131 668-8389, wsh@roe.ac.uk or go to http://www.jach.hawaii.edu/admin/employment/

Application forms obtainable from the JAC website above or call Susan O'Neal (808) 969-6527 (s.oneal@jach.hawaii.edu). Completed forms should be sent to: Ms L Wardale, PPARC, Polaris House, North Star Ave. Swindon SN1 1SZ, UK

Risk Assessment Modeller  
Buxton, Derbyshire

Have you recently graduated with a good honours degree in Chemistry, Mathematics, Physics or other relevant scientific discipline? If so, why not apply your skills to health and safety within the Health and Safety Laboratory (HSL) at our new state-of-the-art laboratory near Buxton?

HSL is an international centre of excellence in solving problems of health and safety at work. Our Scientists are involved in a wide range of projects, often working within multi-disciplinary teams, contributing directly to improving the lives of the workforce in the UK.

We are looking for highly motivated, well-organised individuals with effective communication skills, with the confidence to take forward new initiatives and be adaptable and flexible in working across a wide range of activities at HSL. In return we will provide a learning environment in which graduate-level researchers can progress their professional development and apply their knowledge and skills.

Working as a Risk Assessment Modeller you will provide technical support to HSE in the use of computerised models for describing the consequences and risks from a major hazard chemical plant. This will involve:
- The maintenance and development of computerised risk analysis methods.
- Physical modelling, particularly of chemicals following a release.
- Data analysis and manipulation.
- Research supporting data for model implementation.

You will need:
- A good honours degree (or equivalent) in either Physics, Mathematics, Chemistry or other relevant scientific discipline.
- Programming experience, for example which may have formed part of your degree.
- A keen interest in applying your scientific or mathematical knowledge to risk assessment or physical modelling.

As a growing laboratory, with a secure and expanding customer base, we can offer a first class range of benefits including the choice between an excellent public sector final salary pension scheme and a stakeholder pension.

For an application pack (quoting reference E39) please contact Alistair Walsh, Health and Safety Laboratory, Harpur Hill, Buxton, Derbyshire SK17 9JN, tel 01298 218626, email alistair.walsh@hsl.gov.uk or visit our website.

Closing date: 15 September 2005.

[2515-022 (2005) : 63]
We're on target for tackling these issues with
OPERATIONAL RESEARCH
Salaries to £25,000 for Graduates
And to £39,000 for Experienced Analysts
Hastings, Leeds, London, Manchester, Sheffield & Telford

In central Government, Operational Research is active at the heart of society. Your modelling and analysis, and the meaningful conclusions you draw from it, could influence Government policies and programmes on anything from combating cancer to cutting crime. And as you progress into a senior role, you could find yourself briefing Ministers on high-profile projects that hit the headlines.

There is scope for huge variety as you can cross over between departments, and the intellectual challenge is considerable. Solving strategic problems using Operational Research requires a special kind of intelligence, combining creativity, practicality and analytical rigour, so whether you join us as a graduate or experienced researcher, our standards are high.

At the very least, we'll be looking for numerate graduates with a strong interest in Operational Research and public service, an inventive, creative approach to solving problems and an ability to provide convincing advice based on sound analysis. Because in very many areas, the difference between your success and failure could affect millions of people.

To request an application pack, please write to GORS CMU, Room S15, Somerset House, Strand, London WC2R 1LB, or telephone 020 7084 5586 To download a form or to apply online: www.operational-research.gov.uk email: dan.filson@hmrc.gsi.gov.uk

Closing date for October 2005 interviews is 16 September 2005 2006 interview rounds will be held in March, July and October; apply at any time for consideration at the next appropriate round.

[2515-023 (2005) : 63]
British Energy
Barnwood, Gloucester
£30,000 - £40,000 dependent on skills and experience

**Periodic Safety Review Project Engineer**
British Energy is the largest generator of electricity in the UK, supplying energy to industrial and commercial clients. Employing more than 5,000 people, our core business is nuclear generation. We own eight nuclear power stations in the UK with a combined capacity of 9600MW and a 2000MW coal fired plant in Yorkshire. These stations supply 20% of UK electricity.

The Periodic Safety Review (PSR) Group, part of the Engineering Division, is responsible for carrying out and supporting each British Energy nuclear installation in the periodic and systematic review and reassessment of their safety cases. PSR is a significant and important activity for the company, which enables the stations to maintain the highest levels of nuclear safety and secure agreement from the regulator for continued operation.

Key responsibilities of this post are:
- Planning and managing PSR projects on a day to day basis, resolving technical issues and ensuring the project is delivered to time, cost and quality.
- Identifying, agreeing and programming appropriate resources.
- Ensuring effective communications within the project team and with its customers and suppliers.

You will have knowledge of project management best practice with a track record of achievement driven through personal motivation. You will have the ability to prioritise conflicting demands with a challenging attitude but with a flexible and proactive approach to achieve results. You will also possess the ability to develop relationships with key customers and suppliers and manage stakeholders' expectations.

Educated to degree level, or equivalent, in an engineering or physics discipline, you will be a chartered engineer or have relevant experience that could lead to chartered status. You will be safety aware and have an understanding of the key significance of nuclear safety. Knowledge and/or experience of nuclear power and its practical operation would be advantageous but not essential.

Please note, British Energy do not accept CVs. Application forms, obtainable from the British Energy website [www.british-energy.com](http://www.british-energy.com) or by telephoning the Resourcing Team on 01355 262727, should be returned to the Resourcing Team to arrive as soon as possible and no later than 8 September 2005. Please quote reference number BWD/83123.

British Energy is committed to equality of opportunity. We aim to reflect the diversity of the community and encourage applications from minority ethnic and disabled groups and women, as they are underrepresented amongst our staff.

POSITIVE ABOUT DISABLED PEOPLE
[2515-024 (2005) : 64]
Research Assistant or Advanced Research Assistant
Salary range up to £24,000 dependent on experience

The Wellcome Trust Sanger Institute leads the world in genomic research, with an expanding scientific programme dedicated to understanding the role of genomes in biological systems.

The research aims of the Molecular Otology Group and Ion Transport Group focus on using a variety of genomic technologies and experimental methodologies to yield a better understanding of hearing and balance disorders (for further information see www.sanger.ac.uk/Teams/Team88).

This is a varied role that allows you to undertake your own project work (with the supervision of the lab head), to run experiments from start to finish, and to interpret the results. You will also have partial responsibility for ensuring that the lab and its resources are well managed.

You will be a bright, motivated individual with a degree in a biological discipline. You will have practical laboratory experience in molecular biology or a related field and be skilled in keeping accurate records. It would be to your advantage to have experience in laboratory management and/or hearing biology and in setting up, running, and interpreting experiments independently. We will, however, consider outstanding candidates with less practical experience if you have the willingness and ability to learn new techniques quickly.

More senior candidates will be considered at a higher grade by exception.

This post initially carries a two year fixed-term contract. Benefits include 25 days annual leave, final salary pension scheme, optional private healthcare (on successful completion of probation period), permanent disability insurance, life assurance, childcare voucher scheme, on-site restaurant, café, gym and an active sports and social scene.

To apply for this position please email your CV (including two referees) and current salary details, quoting reference NS1008, to: recruit@sanger.ac.uk
Or post your application to: Human Resources Department, The Wellcome Trust Sanger Institute, Genome Campus, Hinxton, Cambridge CB10 1SA

The closing date for applications is 23rd September 2005. It is expected that interviews will be held during the week commencing 17th October 2005
www.sanger.ac.uk

wellcome trust sanger institute
Genome Research Limited is a Registered Charity No. 1021457
[2515-025 (2005) : 64]
Our products change lives. Yours included.

UK Radiopharma is a joint venture between Schering and IBA to supply FDG (a radiopharmaceutical used in Positron Emission Tomography (PET) imaging) to the NHS and private healthcare sectors in the UK. PET imaging can detect the presence of disease earlier than conventional imaging methods and, although in its infancy here, is widely used in Europe and the USA.

With both parent companies having considerable experience in supplying FDG and establishing European and USA production sites, UK Radiopharma is ideally placed to take advantage of the growing demand for FDG in the UK.

As part of this ongoing development we are seeking to recruit a Site Production Manager and Site Engineer for each of our new UK Radiopharma sites based in Dinnington and Guildford.

**Site Production Manager**
We are looking for someone with a degree in chemistry, biology, pharmacy, microbiology, radiopharmacy or engineering, and at least two years of sterile manufacturing experience (ideally with 12 months in Radiopharmaceuticals). Experience of managing a small team of people would be advantageous.

Your first three months will be spent training on the continent at an FDG manufacturing site, preparing you for the effective management of the process and production site. Responsibilities will include ensuring the product is supplied in accordance to customer demand while adhering to company, GMP and safety legislation.

**Site Engineer**
You need to be an experienced Electro Mechanical Technician or newly qualified Engineer with proven practical experience. Your ability to work alone and solve problems under pressure will be essential, as will a high level of computer literacy and knowledge of MS Office tools. Experience of cyclotron technology would be an asset but is not essential.

Your first 2-3 months will be spent training on the continent to help provide you with the range and depth of specialist knowledge required to perform this role effectively. Once settled in the role, you will be responsible for the daily activity of the cyclotron including all routine maintenance.

Both roles will enjoy a competitive salary, benefits package and ongoing training. They also involve working unsociable hours and will require a degree of flexibility - for further information on this please contact Rachel Davies, HR Executive, on 01444 232323.

If you are looking for a stimulating environment, working at the forefront of medical imaging, then apply by sending your CV and covering letter to Rachel Davies, HR Executive, SCHERING, The Brow, Burgess Hill, West Sussex RH15 9NE or email rdavies@schering.co.uk Please state clearly which role you are applying for.

Closing date: Friday 30th September 2005.

SCHERING are acting as recruitment agents for UK Radiopharma.

Wyeth
Wyeth Research
South Hampshire
£ Highly competitive
www.wyeth.com

Making the difference
At Wyeth people work together - collaborating and co-operating to create breakthrough therapies. Currently we are one of the fastest growing pharmaceutical companies, achieving 8 to 10 new drugs into clinical trials every year. This will help us to meet our ultimate goal of two NDA's year-on-year, many of which are best-in-class and first-in-class drugs.

**Pharmaceutical Development Scientist**
If you're practical, innovative and ambitious, this is an outstanding opportunity to get involved in the entire formulation process from development to clinical trials manufacture. With a PhD or BSc in Chemistry, Pharmacy or Life Sciences as well as hands-on experience, you should have a good knowledge and proven track record of solid dosage form development. This will include a strong desire to drive the science of formulation forward to develop challenging compounds into manufacturable dosage forms with good bioavailability. A working knowledge of cGMP is essential.

**Analytical Research Scientist**
We are looking for an Analytical Chemist, to support the development and analysis of new chemical entity solid dosage formulations for Phase 1 Clinical Trials. As a BSc or PhD qualified Chemist, you will make a positive contribution to the group and have a background of at least three years' practical pharmaceutical analysis. You should have experience of developing and validating analytical methods using HPLC to determine the strength, purity, and analysis of dissolution of samples. A good knowledge of cGMP is a must and experience of impurity/ degradant characterisation using LC-MS or NMR would be an advantage.

Wyeth offers the opportunity to develop your skills and career potential in an open, progressive culture where your contribution can be globally recognised. Both roles are located in Gosport, Hampshire.

Please send your CV, stating current salary package to: Michelle Abrahart, HR Officer, Wyeth, New Lane, Havant, PO9 2NG. Email wahvjob@wyeth.com

Be the science behind Britain's favourite pints

**Chemists, Microbiologists & Biochemists**
Competitive salaries + benefits
Tadcaster - NorthYorkshire

As the UK’s leading brewer, Scottish Courage produces great brands. Our portfolio includes Foster’s, Kronenbourg 1664, John Smith’s and Strongbow, all of which continue to grow strongly ahead of the market. But we are not standing still. As part of our aim to become the best European beer-led drinks company, our central analytical and microbiological laboratories will move into new, state-of-the-art premises. We are now looking for talented Chemists, Biochemists and Microbiologists with a passion for brewing to work on some of the finest beers and ciders in the world.

Essentially, our central laboratory provides an expert chemistry, microbiology, yeast and fermentation service for our UK manufacturing sites, as well as other internal customers and franchise brand owners. On top of ensuring that our products and processes are of the highest quality, our specialists also benchmark and develop the technology we use to make them. The laboratory is also the curator of our culture collection, and provides industry-leading best-class practice in starter yeast cultures.

We have a range of vacancies throughout the department. Ideally for all roles you’ll have some brewing, food or beverage experience, but it’s essential that you have a relevant degree. For Senior Chemist/Biochemist roles, we are looking for specialist expertise such as chromatographic and spectroscopic techniques including HPLC, GC or GC-MS. The Senior Microbiologist role will be responsible for managing the microbiology team at the central laboratory and provide expert microbiological, water hygiene and yeast service for the Group. Whichever role you join us in you’ll bring excellent organisation and team skills, and a strong customer focus too.

Please email your CV and covering letter stating the position you’re applying for, your current salary details and explaining why you are suitable for the role, to Sheron Barker at recruitment@scottish-courage.co.uk quoting UK Laboratory Roles and the relevant job title in the subject heading. Closing date: 16 September 2005.

We are an equal opportunities employer.

Post Doctoral Opportunities with the ISIS Muon Facility

ISIS is a world leading facility for condensed matter research using neutron scattering and muon spectroscopy, with a strong scientific user programme and extensive international links. The ISIS Muon Group operates three spectrometers which use implanted muons to study atomic-level behaviour across a wide range of systems. The facility is the world's brightest source of pulsed muons for condensed matter studies, and attracts a wide variety of users from the UK, Europe and further afield. Further details can be found at [http://www.isis.rl.ac.uk/muons/](http://www.isis.rl.ac.uk/muons/).

Two post-doctoral positions are available in association with the ISIS Muon Group:

Construction of a high magnetic field muon spectrometer (VN2757/NS). A three-year post funded through the University of Oxford but based at ISIS. We are seeking someone with experience in developing instrumentation, preferably with familiarity with the muon technique or of other magnetic resonance methods. You are likely to have a research track record in condensed matter physics or materials science and will be wanting to continue to develop a personal research programme involving the muon method.

Chemical applications of muon magnetic resonance (VN2759/NS). A two-year post based principally at ISIS but funded through the University of East Anglia and with the opportunity to spend time at the University on related laboratory or theoretical work. We are seeking someone to work with and support a collaboration of groups applying the muon spin resonance method to a number of problems in chemistry and chemical physics, particularly to probe radical states and chemical reaction kinetics. You will hold a PhD in an appropriate physical science, preferably with experience of applying magnetic resonance methods to chemical spectroscopy.

The salary for both posts will be on the Research and Analogous 1A scale at spine point 8.

Further details for either post can be obtained from Dr. Stephen Cottrell at the ISIS Facility (s.p.cottrell@rl.ac.uk). All applications must be returned by 22 September 2005. Interviews will be held mid October 2005.

Real-Time Software/Scientist - Image Processing (VN2706R/NS)
(1 Post Fixed Term For 3 Years)
The CCLRC is one of Europe's largest multidisciplinary research organisations supporting scientists worldwide. We are currently looking to recruit a Real-Time Software/Scientist to join our team of electronic engineers, hardware programmers, laser and microscopy experts within the Laser Facility and Instrumentation Department and bio-scientists from nearby research institutes.

The applicant, preferably from a software and hardware programming background, will work within a multi-disciplinary team to develop an advanced real time imaging system for 3-dimensional manipulation of single molecules using optical traps (optical tweezers). The aim of the three-year project is to build an ultra sensitive molecule/particle force measurement instrument to address key questions in the growing field of proteomic science. The successful applicant will be responsible for designing and developing a dedicated user interface and control packages to track and control several laser traps via a 10 kHz laser feedback system built around a unique fast readout 2D imaging array sensor. The candidate should be a self-motivated and a well organised team player with good communications skills. A good BSc or MSc degree is essential. A PhD or equivalent in relevant computing with experience in LabVIEW, C++, Matlab or FPGA programming would be beneficial.

Salary is in the range £22,605 to £26,911 (pay award pending) dependent on experience. In addition we offer an excellent index-linked final salary pension scheme and generous annual leave allowance.

For more detailed information contact Dr Mike Towrie on (01235) 446141 or email M.Towrie@rl.ac.uk

2902
Closing date for applications is 22 September 2005. Interviews will be held on 5 October 2005.

Application forms for either of the above posts can be obtained from: HR Operations Group, CCLRC, Chilton, Didcot, Oxfordshire, OX71 0QX. Telephone (01235) 445435 (answer phone) or email recruit@rl.ac.uk quoting the appropriate reference number.

Creativity, vision and the courage to challenge convention - these have made Novartis into one of the world's leading research environments. Our mission is simple. To meet the challenges of drug discovery by using new technologies to understand the science of human biology and disease. So join our state of the art research facility in Horsham, Sussex and you won't just be at the frontier of medical science. You'll help us define it.

We are looking for an experienced Immunologist or Pharmacologist to join our multidisciplinary Immunopharmacology team as a Scientific Associate. Along with a relevant BSc or MSc, you will need at least three years' experience in the use of current immunological assays - particularly ELISA, flow cytometry and cellular immunological techniques such as cell purification, proliferation and intra-cell cytokine studies. Any exposure to in vivo inflammatory models - particularly respiratory models - would be an advantage, although full training will be provided.

To find out more, view descriptions of all open positions and to apply online, visit www.novartis.com quoting the reference number 7503BR. Closing date: 30th September.

[2515-033 (2005) : 67]
Extend the boundaries of your influence

**GCP and Pharmacovigilance Inspectors**
£40,000-£45,000 • LONDON, HERTS, YORK

With substantial academic and practical experience (ideally five years or more) in a good practice environment, you're already something of an authority in your chosen field. You're capable and confident dealing with the complex technical issues of clinical trials and/or pharmacovigilance systems; equally confident in your working relationships, winning personal as well as professional respect and exercising a real influence on decisions and outcomes.

You'll be looking for significant further progress in your career: you'll find it with a move to the MHRA - the ultimate authority on all safety, quality and efficacy issues and an organisation whose professional reputation and influence extends beyond the UK.

Depending on your own background, you'll either inspect clinical trials activities or Marketing Authorisation Holders to ensure their full compliance with their obligations, travelling frequently and working on your own initiative for extended periods. You'll further develop your already considerable scientific and professional competence; you'll enhance the interpersonal and influencing skills that have underwritten much of your success in your scientific career. And you'll be making a real, personal impact right at the heart of one of the most rigorous and robust regulatory regimes in Europe.

Please note that the full salary range for these roles is £31,534 to £54,950. The benefits include full travel expenses, six weeks holiday (plus a further 10.5 public/privilege days) season ticket loan and full membership of the Civil Service pension scheme.

To make the first move towards a career with MHRA, email: jobs@mhra.gsi.gov.uk or fax 020 7084 2522 or write to MHRA, Market Towers, 1 Nine Elms Lane, London SW8 5NQ.

The closing date for applications is: 19th September 2005.

[www.mhra.gov.uk](http://www.mhra.gov.uk)

As an Equal Opportunity employer the Department welcomes applications regardless of gender, race, disability or sexuality. We operate flexible working patterns within a non-smoking environment.

COMING NEXT WEEK THE INSIDER SCANDINAVIA 10 SEPTEMBER 2005

SCANDINAVIA

COMING NEXT WEEK

How do the latest developments in research policy and funding in Scandinavia affect universities, research institutions and science-based industries?

The Insider will focus on Denmark, Sweden, Norway and Finland, exploring these issues in detail.

This comprehensive coverage makes the report a must-read for anyone employed within the scientific community in Scandinavia, as well as those wanting to move to this world class region.

Check out the very latest job opportunities in Scandinavia in a dedicated recruitment section.

New Scientist Jobs
[2515-035 (2005) : 68]
Unipath is a world leader in women's health diagnostics. Unipath researches, develops and manufactures its products at a purpose-built factory in Bedford, which employs over 450 people.

**Team Leader - Standards and Stability**
Salary circa £25,000 per annum (dependent on skills and experience)

Reporting to the Product Quality Manager you will be responsible for a small team of technicians that produce standard materials and perform stability studies on Unipath's range of immunodiagnostic devices.

The job holder will be expected to work closely with R&D project teams to determine the most appropriate method of calibration for new analytes and to develop and implement the systems required to manufacture standards for device testing. In addition the job holder will be responsible for ensuring that validated standards are always available for Production use and that the programme for product stability trials is managed effectively.

The skills required for this role are broad ranging. Candidates must show a practical hands-on approach combined with an aptitude for problem solving and the ability to work within regulatory guidelines and project timescales. Clear and concise verbal and written communication skills are essential.

The successful candidate is likely to be educated to degree level or equivalent in an appropriate subject, and this will be coupled with at least five years' practical experience in the field of immunoassay/diagnostic development or manufacture. Experience of assay standardisation methods would be of particular advantage.

Closing Date: 7th September 2005

[2515-036 (2005) : 68]
NALCO

Nalco is the leading provider of integrated water treatment and process improvement programs for industrial and institutional applications. The Company has a global presence with over 10,000 employees operating in 130 countries, supported by a comprehensive network of manufacturing facilities, sales offices and research centers. The Energy Services Division provides speciality chemical products and services to the Oilfield, Refining and Petrochemical industries. Our research group supporting operations in Europe, Africa and the Middle East is located at Fawley, near Southampton. This group now has vacancies in the petroleum refining and petrochemicals industry segments for:

**Senior Chemists/ Senior Research Chemists**

To fill these roles we are looking for self-motivated, independent and innovative problem solvers to support a wide variety of technological activities. This will include applied research, product development, product line maintenance and providing technical support to our sales force. Laboratory research will be required to identify effective solutions, as well as the investigation and resolution of customers' problems in the field. Good diagnostic and problem solving skills are essential.

The position will involve a moderate amount of domestic and international travel and will require direct contact with other research groups, sales representatives, and importantly with our customers. For this reason, strong oral and written communication skills and the ability to work as a part of a team are essential. Successful candidates will have an MSc or PhD in chemistry (physical, organic or inorganic) and will preferably have related experience.

Nalco is a major international company and its compensation packages reflect this. We offer competitive salaries, a flexible benefits package including options such as private medical insurance and up to 30 days holiday, a profit sharing plan, plus additional benefits.

Nalco offers a stimulating working environment and opportunities to progress within the organisation for those who demonstrate the required qualities.

Please send CVs and covering letters to Mrs Jenny Stocker, Nalco., Block 102, Cadland Road, Hardley, Hythe, Southampton, SO45 3NP to arrive no later than Friday 16th September, 2005 tel: 023 8088 3766 email: jmstocker@nalco.com

[2515-037 (2005) : 69]
The department of Bioanalysis has an international reputation and over 30 years' experience in the development and validation of new or existing bioanalytical methods for the analysis of drugs and metabolites in biofluids and is one of the leading European contract bioanalytical departments.

Further expansion in this important analytical field has resulted in exciting opportunities for bioanalysts to join the Immunoassay group and build on its international reputation for excellence. Work involves the development and validation of antibody-based analytical methods, which are subsequently used to determine the concentration of analytes in a variety of biological matrices from different species in both non-clinical and clinical studies.

The analytes are primarily biopharmaceuticals, but also include new chemical entities and endogenous markers of biological activity. An essential function of the group is the ability to design immunoassay formats to monitor the potential immunogenicity of the test compounds prior to the administration to man during clinical trials.

Applicants should ideally hold a life sciences degree or equivalent MLSO qualification (although training will be given in immunoassay and liquid handling). For the senior position you should have an additional 3-5 years' practical work experience validating immunoassay-based technologies. You will need to be conscientious, have excellent communication skills and be able to organise your time effectively. Experience of working within a GLP environment would be a distinct advantage.

To apply for this position, please contact the Human Resources Department, Huntingdon Life Sciences, Woolley Road, Alconbury, Huntingdon, Cambs PE28 4HS or telephone 01480 892500.

The closing date for applications is 15th September 2005.

Targeting cancer
Pre-Clinical Cancer Product Development
SW17, London
Attractive Salary + Share Options + Excellent Benefits
BIOANALYST/RESEARCH SCIENTIST
Drug Evaluation

Antisoma is an established biopharmaceutical company focusing on the development of novel therapies against cancer.

If you would enjoy the challenge of working in an innovative and evolving Company and want to make a real contribution in the development of new anti-cancer drugs, this is a chance to become a key member of an expanding team.

You must be familiar with HPLC analytical techniques and their application in analysing biological samples. A good working knowledge of HPLC method development and validation is essential. Experience with mass spectrometry techniques, use of WinNonLin and pharmacokinetic/pharmacodynamic modelling would be beneficial. Knowledge of in vitro and in vivo techniques involved in assessment of drug metabolism is highly desirable.

Ideally, you will have worked in a GLP laboratory and will be fully conversant with preparation and maintenance of analytical methods, SOP’s and expert reports for internal and external use.

Please send your CV and a letter of application (including your salary expectations) to: Applications, Antisoma Research Limited, West Africa House, Hanger Lane, Ealing, London W5 3QR or email: personnel@antisoma.com

We thank all candidates in advance for their interest and would appreciate all responses by our closing date Friday 23 September 2005. Interviews will be conducted in the week beginning Monday 26 September 2005.

Oakdene Hollins is a consultancy which serves the wastes management sector, central and regional Government, other public bodies and the investment community. We provide for our clients authoritative economic and technical analysis of markets, technologies, and policy options. Sustainable and clean technologies are a particular area of expertise. Due to an increase in the demand for our services we wish to add to our team one technical consultant and one technical researcher.

For the post of Technical Consultant we expect you to offer post graduate qualifications and relevant work experience. Your expertise should be relevant to at least one of the following: sustainable and clean technology R&D; LCA methodology; environmental economics; or wastes management. It is especially important that you demonstrate excellent writing and data analysis skills. As part of this role you will be required to present to senior managers and conferences.

For the post of Research Consultant we expect you to offer post graduate qualifications and a minimum of 2 years' work experience.

Whilst we operate to ISO 9001 standards we place a high value on our flexible employment terms, sustainable life-style and small-business freedoms. We offer a high-quality working environment from our town centre offices.

Salary £38k - £43k for the Technical Consultant, £25k to £28k for the Research Consultant. A modest discretionary annual bonus is also available.

Closing date for applications September 30th 2005

CSIRO
CSIRO Textile & Fibre Technology
Research Opportunities

The Commonwealth Scientific Industrial Research Organisation (CSIRO) is Australia's largest, most
diverse, and most successful scientific research institution. Based in Belmont, Geelong, CSIRO Textile
& Fibre Technology employs approximately 180 staff and has a proven record of scientific innovation
and leadership.

Exciting developments are occurring in fields of nanotechnology, polymer science and biomimetics.
Current and proposed research includes the development of electronic textiles, hybrid and modified
fibres, novel dyeing technologies, composite non-woven structures, high-tech active sportswear and
next-generation protective apparel. We are now seeking innovators from a range of disciplines to join
our dynamic teams introducing these technologies into our research programs and to our customers.
Your relevant tertiary qualifications or equivalent professional expertise is required in both of the
following areas:

Research Physicists/Engineers
Ref No: 2005/893
Your broad knowledge of physical and mechanical systems, instrumentation and computing will assist
you to initiate and conduct research within a dynamic R&D environment and to interact with project
staff, customers and senior management. In addition, your demonstrated competencies for planning and
conducting research, oral and written reporting, and/or advanced software engineering will be sought.
You will enjoy being a part of this initiative to meet evolving industry needs in the processing of textile
fibres. What a creative and challenging role!

Textile Technologists
Ref No: 2005/894
Bring your specialist expertise in textile materials, or for applying physical technologies to textile
materials, to this exciting role. You will use your knowledge to develop innovative technologies that
enhance the functional and aesthetic properties of textile products and to champion projects with major
external customers and internally funded CSIRO projects. You will maintain an awareness of worldwide
industry trends and contribute to project objectives and outcomes as part of a multi-disciplinary team.
Dynamic, exciting and rewarding - is this for you?

Don't miss your opportunity to work in an environment with world-class research and testing facilities,
international strategic research alliances, a team of highly skilled professional and technical staff, and
enjoy great career advancement opportunities. Attractive salary packages, including assistance with
relocation, will be negotiated with successful applicants.

For selection documentation and details on how to apply visit www.csiro.au/careers

[2515-041 (2005) : 70]
NIAB

**Associate Leader Plant Pathology**

Background & description
NIAB is seeking an outstanding candidate for a new role as Associate Leader for its Plant Pathology Group in Cambridge. The successful person will be required to initiate innovative work programmes on the genetic control and molecular characterisation of durable host plant resistance traits and how this knowledge can be used to enhance resistance in desirable host backgrounds. The role provides an opportunity to lead, develop and promote a new research programme at NIAB and to contribute to NIAB's future strategic development. The successful candidate will be expected to establish national and international collaborations, and manage research projects and teams.

NIAB is engaging in a major new activity in the area of pre-breeding for food, non-food and ornamental plants. Resistance to pests and diseases will be a significant trait for inclusion in many species. It is expected that a portfolio of work reflecting NIAB's strategic interests will be developed; this will include wheat diseases as a major focus, but the role will also be required to develop similar work with other species.

The successful candidate will have a strong track record of achievement in genetics of host plant resistance and resistance mechanisms, and proven abilities in project management.

Salary will be negotiable. Further details and an application form can be obtained from the PPD Office, NIAB, Huntingdon Road, Cambridge CB3 0LE, Tel. 01223 342282, email jobs@niab.com, quoting Ref. no. SC/A864.

For informal discussion contact Prof. Wayne Powell, Tel. No. 01223 342280, email wayne.powell@niab.com or Dr Jane Thomas, Tel: 01223 342251, email: jane.thomas@niab.com.

Closing date for applications 5 September 2005.

INVESTOR IN PEOPLE

[2515-044 (2005) : 71]
BSI Join market leader

BSI is the world's leading certification body, due to an internal promotion and the continuing expansion of our medical devices business we are seeking additional specialists. BSI performs certification activity as a Notified Body under the European Medical Devices Directive and offers complete registration services for ISO13485, including for the manufacture of terminally-sterilised devices.

Medical Device Specialists (Ref NB1)
We are seeking dynamic individuals experienced with polymeric, electronic, orthopaedic, cardiovascular, ophthalmic or latex devices to work within the Notified Body. Candidates with a strong background in general devices or implants will also be considered. As part of the overall client management responsibilities, successful candidates will be competent to review critical design data (including risk analyses, biocompatibility, clinical investigation data, and post-market surveillance information), to prepare recommendations for EC certifications. With at least five years in-depth medical device experience within an industrial, academic or clinical background, a candidate's qualifications should reflect a thorough understanding of the technological considerations and manufacturing processes relevant to the fields in which he/she has worked. The position is based at our Hemel Hempstead office however occasional UK and overseas travel will be required.

Whilst familiarity with the European medical devices approvals would be an advantage for these roles, full regulatory and auditing training will be provided.

All positions offer a competitive salary, pension and benefits, with a car for the home-based positions. Interested and qualified candidates should submit a copy of their CV, together with their current remuneration package and the appropriate reference number for the vacancy.

Applications to Laura Baird, British Standards Institution, Human Resources Dept, Maylands Avenue, Hemel Hempstead, Hertfordshire, HP2 4SQ. Email: laura.baird@bsi-global.com Telephone: 01442 230442

BSI shape the future
[2515-045 (2005) : 71]
Oxford BioMedica plc develops gene-based medicines for the treatment of cancer and neurodegenerative disease. Two cancer products are in clinical trials and products for the treatment of Parkinson's disease, blindness and motor neuron disease are completing their pre-clinical evaluation. Due to the increase in the number of our clinical trial sites, we are now looking to strengthen our Clinical Development Group with a Drug Safety Officer, to help meet the future regulatory challenges of our expanding clinical portfolio.

- The postholder will be responsible for the processing of adverse events from our clinical studies. This will involve data entry, data verification, coding, and raising queries on serious adverse events. The position will involve the preparation of safety reports to be submitted to regulatory agencies and ethics committees within regulatory timeframes. Responsibilities will include liaison with monitoring CRO's and clinical investigators.
- The post will also be responsible for reviewing regulatory/pharmacovigilance publications and information sources, to keep updated on current regulations, practices, procedures and proposals.

We are looking for someone with a BSc or appropriate qualification and at least 12 months previous pharmacovigilance experience, who can demonstrate a good working knowledge of safety databases. The applicant should have a keen eye for detail and excellent communication skills. We offer attractive salaries, which are aimed at attracting the best people with recognised relevant experience. We are family friendly, and offer a share option scheme, generous holiday allowance, and a company pension scheme, combined with a rewarding working environment.

To apply, please send your CV to:
s.lorimer@oxfordbiomedica.co.uk

Closing date for applications is 22nd September 2005.

Please see our web site for more information: http://www.oxfordbiomedica.co.uk
[2515-046 (2005) : 71]
FISHERIES RESEARCH SERVICES
STATISTICAL EPIDEMIOLOGIST

Based at the FRS Marine Laboratory, Aberdeen, you will carry out research on the epidemiology of a range of infectious diseases of fish and make analysis of data relating to the transmission of disease. You will also make recommendations on the use of statistical and other epidemiological methods in research to progress understanding of fish diseases and their control. In addition you will manage and implement statistical software to be used by the epidemiology group and provide epidemiological advice to a wide range of research projects and applied disease control.

You will have at least three years research experience in human or animal epidemiology as well as an Honours degree or equivalent training, involving statistics as a main subject. You should have demonstrable knowledge of a wide range of statistical epidemiological applications and principles. With a proactive approach to work, you will also have advanced ability with statistical or modelling software. You will be innovative, with experience in exploiting diverse sources of information to solve problems and be able to provide easily understood information from complex situations. You will be capable of working effectively within project teams as well as independently. Working on a number of research projects, you will be experienced in establishing and maintaining effective working relationships with colleagues and customers.

The starting salary for this permanent post is £21,292 per annum. Salary is performance related, offering progression to a maximum of £26,278 and bonuses to high achievers. A pay award is pending. The Civil Service offers a choice of final salary and stakeholder pension, giving you the flexibility to choose the pension that suits you best.

For further details and an application form contact: Human Resources on 01224 295689 or by emailing HR@marlab.ac.uk

The closing date for all applications is 30th September 2005.

Fisheries Research Services is an Agency of the Scottish Executive. We welcome applications from all suitably qualified individuals and aim to employ a diverse workforce which reflects the people of Scotland.

INVESTOR IN PEOPLE
[2515-047 (2005) : 72]
Exponent® International Limited

Exponent International Ltd is a scientific consultancy specialising in human and environmental risk assessments and regulatory issues for plant protection products, biocides and veterinary medicines. We now have vacancies for a Biocides Specialist and a Junior Pesticide Residues Scientist at the European office in Harrogate, UK.

**BIOCIDES SPECIALIST**

This post will involve providing advice to clients and colleagues on European regulatory requirements for biocides, project management (ensuring that projects are completed to time, budget and regulatory/client requirements) and working with senior scientists in study summarisation and the preparation of environmental and human health risk assessments.

The successful applicant will have a minimum of a BSc in chemistry, biology or closely related field together with experience of working in a regulatory environment in industry or government. In-depth knowledge of EU biocide requirements and the regulatory framework would be a distinct advantage.

Salary is negotiable and will be commensurate with your experience and qualifications.

**JUNIOR PESTICIDE RESIDUES SCIENTIST**

Your duties will include assisting senior scientific staff in the evaluation and summarisation of studies relating to pesticides/contaminants in food and the preparation of human health exposure assessments.

Successful candidates will have obtained a BSc in chemistry or a closely related field and must be enthusiastic with a desire to learn. Knowledge of the EU requirements for plant protection products and the regulatory framework is not essential as on the job training will be provided. Salary will be in the range of £16,000-20,000 depending on your experience and qualifications.

Exponent responds rapidly to clients' needs, so the work environment is one of stimulation and teamwork. It will be necessary for you to work well with clients and colleagues and excellent written and communication skills are essential.

You will be able to function well as a member of a team but also lead projects (biocides post only). The posts may involve occasional travel away from the office.

Exponent offer an attractive and competitive employment package including 25 days annual leave and health insurance. A relocation package may also be available.

To apply, write or e-mail with your CV including details of two referees and a covering letter stating why you feel you can be a part of Exponent’s future development.

INVESTOR IN PEOPLE

[2515-051 (2005) : 73]
Sigma-Aldrich is a world leader in the manufacture and distribution of research chemicals and biochemicals. The Corporation is also rapidly developing a presence in fine chemical custom development and manufacturing to Pharmaceutical customers. Our extensive, modern facility is situated in Gillingham in the heart of the beautiful and stunning countryside of North Dorset. We currently have vacancies for the SAFC Pharma production facility at Gillingham as follows:

**PRODUCTION SHIFT LEADER**

An experienced individual is required to lead our small flexible teams of six Process Operators and a Shift Chemist. The primary purpose of these positions is to co-ordinate the shift team's day-to-day production activities in order to maintain process continuity and achieve the production schedule whilst maintaining quality, safety and environmental compliance.

The main responsibilities for this position are to:

- Lead a productive, well-trained and effective team of operators and chemist.
- Plan and manage the shift team's day-to-day activities alongside process equipment allocation with resources, production schedule and equipment qualification requirements.
- Ensure that all work within the Production Plant is carried out in compliance with the appropriate standards and Health and Safety.
- Liaise and co-ordinate production activities and requirements with shift teams and other internal departments in order to achieve the production schedule.
- Prepare, issue and manage Permit to Work certificates for engineering activities within the plant by both Sigma Aldrich and external contract engineers.
- Review and approve completed production batch records.

You will be a highly organised and disciplined individual with a minimum of 3 years supervisory experience in a chemical manufacturing environment. You must also possess good problem solving skills, be highly motivational, able to communicate effectively and possess a strong customer appreciation, for both internal and external customers.

The above position requires you to work within a Monday to Friday time period on a rotating 3-shift of 12.25 hour shifts. This is equivalent to 40 hours per week, for which a shift allowance is paid in addition to basic salary. Your schedule will average 3.3 shifts per week, leaving generous time off.

Sigma-Aldrich also reward you with a package which includes a comprehensive induction and training period to cGMP standards, a final salary pension scheme including Life assurance and Long-term disability benefits. We also have an Employee Assistance Programme and the opportunity to join the HAS healthcare scheme through Payroll subscription.

Due to the nature of the work involved we do require successful candidates to reside in the locality, therefore if relocation is necessary a package will be provided.

If you are interested in applying for the above position, please send your CV and covering letter to: Human Resource Department, Sigma-Aldrich Company Ltd, The Old Brickyard, New Road, Gillingham, Dorset, SP8 4XT or e-mail GBRHumanRes@europe.sial.com

We are Committed to the Success of our Customers, Employees and Shareholders through Leadership in Life Science, High Technology and Service

OCTEL
GRADUATE RESEARCH CHEMISTS & GRADUATE TECHNICAL CHEMISTS Circa £18,000 - £23,000

This is a chance to join Octel, a flourishing specialty chemicals business based at Ellesmere Port. The company is one of the world's leading suppliers of petroleum additives in our chosen markets, offering technical solutions to the refinery, transportation, heating and power sectors in more than 65 countries around the world.

If you are looking for your first, or maybe second job in the chemical industry, we are looking for chemistry graduates to join Octel's Petroleum Specialties Team.

The roles offered are either within our Research or Technical Service Departments and will be predominantly laboratory based. The Research roles will include synthesis and testing of fuel additives and formulations and the Technical Service roles will involve undertaking testing to support customers, involving close contacts with sales.

We are looking for keen, organised, creative people who enjoy hands on work. Industrial experience will be an advantage.

Each of these exciting positions offers the competitive salary and benefits package expected from a progressive organisation. For more information on Octel, visit our website on www.octel-corp.com

Please send your CV and current salary details to research@griffonmanagement.com or by post to Christine Hart, Griffon Management Ltd., Tower House, Fishergate, York YO10 4UA.

Please indicate whether you are applying for the Research or Technical roles.

[2515-053 (2005) : 73]
PARADIGM THERAPEUTICS
turning targets into drugs

Paradigm Therapeutics Limited is a drug discovery company specialising in identifying, validating and marketing novel drug targets derived from the human genome. The company has a unique mix of proprietary biology and chemistry capabilities and has recently signed two major revenue generating collaborations with blue chip pharmaceutical companies. The company has laboratories in Cambridge and Singapore.

Intellectual Property Manager
We are currently seeking to recruit an experienced IP professional to manage our intellectual property portfolio. The role involves responsibility for dealing with patent applications, liaising with patent attorneys and relevant authorities, maintenance of literature/competitor intelligence and budget monitoring.

Candidates should be methodical and organised in their approach, with excellent interpersonal and communication skills. Possessing a primary law and/or life sciences degree, a post-graduate degree in physiology or pharmacology would also be advantageous. Familiarity with biotechnology based patent process is essential, as is at least 3 years experience in a similar role.

The company offers competitive salary, options and benefits packages. For further information about Paradigm, please visit our website at www.paradigm-therapeutics.com.

Please send a covering letter, your c.v. and the names of two referees to: Human Resources, Paradigm Therapeutics Ltd, 162. Cambridge Science Park, Cambridge, CB4 0GP
Tel: +44 (0)1223 477910, Fax: +44 (0)1223 477911 email: hr@paradigm-therapeutics.com

Milton Keynes General
NHS
NHS Trust
Haematology

**Biomedical Scientist Team Manager**
Band 7
£22,768 TO £35,527 P.a. inc.
Full Time, 37.5 Hours per week

The Blood Transfusion Department requires a Biomedical Scientist who will take a leading role in the daily running of the department and be committed to the introduction and implementation of new techniques. You will rotate through all areas of the laboratory and work closely in conjunction with the Lead Consultant Haematologist, Blood Bank Manager, Transfusion Nurse and the Hospital Transfusion Team.

We require an experienced Registered Biomedical Scientist with FIBMS, MSc or equivalent experience with current HPC registration. Excellent interpersonal and communication skills are required as you will be responsible for team leadership in the Blood Transfusion section of the department.

We would like you to join our team in this busy, well equipped CPA (conditional at present) and HPC Accredited Laboratory. The modern and well-equipped laboratories are fully air conditioned with a new computer system due to be installed in 2006.

All staff are encouraged to participate in CPD activities and funding support is available. Participation in the out-of-hours rota is expected, for which an additional fixed sessional payment is given.

The terms and conditions of this post have been assimilated under "Agenda for Change”, a new national pay system for the NHS.

To request an application pack please contact (0870) 7870092 and quote reference PER2983. Applications by CV will not be accepted.

Closing date for receipt of applications: 23rd September 2005.

Some departments are moving towards a seven-day work pattern. We welcome applications from people of all ages, including those over 65. We are committed to equal opportunities, all applicants with a disability who meet the minimum criteria for a post will be guaranteed an interview. We operate a No Smoking Policy.

[2515-056 (2005) : 74]
BioFocus Discovery Ltd is a leading company working with international pharmaceutical and biotech companies in the drug discovery area. We focus on innovative early stage drug discovery and have a broad, integrated technology base encompassing biology, medicinal chemistry and informatics.

**PURIFICATION SCIENTIST (BIO076)**

We have an opportunity for an experienced purification scientist to join the Analytical Team within Medicinal Chemistry at BioFocus. The position is predominantly practical and laboratory based. If you are excited by the challenge of efficiently purifying and characterising diverse small, drug like molecules, we would like to hear from you.

We can offer you a chance to make a real contribution to projects designed to identify new drug therapies. In return we expect you to have at least five years' analytical, preparative HPLC experience and knowledge of SPE and other purification techniques. Some experience of chiral chromatography would be considered advantageous.

**SCIENTIFIC ASSISTANT/SCIENTIST VACANCIES, BIOLOGY (BIO086)**

The positions open are for two laboratory based scientists to develop and run high throughput screens in the early stages of the drug discovery process. Applicants will be expected to have a knowledge and understanding of assays for biological targets of importance to the pharmaceutical industry. Previous experience of laboratory automation and laboratory data management will be advantageous.

Applicants should be a life sciences graduate with one or two years practical laboratory experience in a drug discovery environment which may have been obtained through industrial placements.

**MEDICINAL CHEMISTS (BIO087)**

The positions available are for four laboratory based synthetic organic chemists with at least two years' relevant practical experience. Your primary role will be the synthesis of novel, biologically targeted compounds as part of a multidisciplinary team.

As we work for a diverse range of international companies, the positions available offer the opportunity to work on varied chemistries across multiple therapeutic targets thus providing an environment to learn and develop rapidly. You will hold a degree or PhD in Chemistry with some relevant experience which may have been gained in an industrial placement.

We offer a stimulating, varied and open working environment and levels of responsibility few others can match. We believe in our people and reward them accordingly with a competitive benefits package as well as the opportunity to continuously develop themselves and their careers.

The closing date is Friday 9 September 2005 and we would prefer to receive applications by email. Therefore please send your CV and covering letter stating the appropriate reference to recruitment@biofocus.com

Alternatively, if this is not possible, please send your application to:

Human Resources Department
Chesterford Research Park
Saffron Walden, Essex CB10 1XL

[2515-057 (2005) : 74]
APPLICATIONS CHEMIST

A position has arisen for an Applications Chemist within the Polymer Characterisation Technical Support Group at Polymer Laboratories. The position involves sample analysis by chromatography, data interpretation and reporting, and general laboratory upkeep to support the activities of the group. A degree in chemistry (BSc) is required along with the ability to comply with safety regulations (COSHH) and the ISO 9001 Quality Management System. A background in polymer chemistry and/or analytical techniques, particularly chromatography, would be an advantage. A neat and methodical approach to practical laboratory work and documentation is essential.

Situated in the town of Church Stretton, Shropshire, and having recently built and commissioned a new 20,000 sq ft production laboratory facility, Polymer Laboratories is a dynamic and expanding company specialising in polymer analysis and manufacturing high technology polymers. We offer an excellent career for the successful applicant and full training will be given in all aspects of the position.

To apply, send copy of CV to Dr Greg Saunders, quoting ref 044/NS/GDS. For further information, please call 01694 723581 or email Greg.Saunders@polymerlabs.com. Closing date: 16 September 2005.

[2515-058 (2005) : 75]
Elsevier is part of the Reed Elsevier Group. Young, progressive and rapidly expanding, we are a major name in global health sciences and science and technology information, as well as a leading innovator in online publishing.

ELSEVIER

Trends in Immunology Assistant Editor
London

We have an opportunity for a talented individual to join our Scientific Editorial Staff working on Elsevier's flagship Trends and Current Opinion journals in our London office. Over the past three decades, our department has built up a portfolio of some of the highest-impact life-science review journals. We now publish 14 Trends and 10 Current Opinion titles that together form one of the most trusted and comprehensive sources of information and opinion on the latest developments in scientific research.

As the Assistant Editor of Trends in Immunology, you will copyedit and enhance the text and figures of manuscripts commissioned by the journal Editor and written by some of the world's leading scientific researchers. You are therefore expected to have recent relevant experience in immunology, preferably to MSc or PhD level, although this is not essential, together with an excellent grasp of English language and grammar. You will work closely with the journal Editor and Editorial Coordinator to meet publication deadlines and to maintain the excellent standards of this high-impact journal.

As you will liaise with a wide range of internal and external contacts, including authors and production staff, a well-organised and personable approach is vital. Copy-editing experience would be a bonus, although we will provide full training.

You will be able to express written and illustrated scientific concepts clearly and concisely, have a keen eye for detail, display excellent time-management skills and be capable of working on-screen. You will also be able to demonstrate a keen interest in immunology.

Please note that this role is not a writing position.

This position is an ideal opportunity to use your scientific expertise in a dynamic publishing environment and to embark on a new and rewarding career with a leading scientific publisher. We offer a competitive benefits package, including final salary pension scheme, 25 days' holiday, private healthcare after one year, and season ticket loan scheme, plus good personal development opportunities.

Please send your CV and covering letter quoting job ref TI1, stating your salary expectations and why you think you are suitable, to R.Fuller@elsevier.com

Closing date: 15th September 2005.

Owing to the anticipated high levels of interest, we regret that it will not be possible to contact all applicants. Those who successfully reach the next stage of recruitment will be contacted within two weeks of the closing date.

Defra (the Department for Environment, Food and Rural Affairs) was created in June 2001 to drive forward the Government's programmes on the environment, food and rural affairs.

We work for the essentials of life - food, air, land, water, people, animals and plants. Our remit is the pursuit of sustainable development - weaving together economic, social and environmental concerns.

**Scientific Officers (SO)/Higher Scientific Officers (HSO)**

SO: £21,892  HSO: £25,797 per annum  Ref: RCRE280

Senior Scientific Officer (SSO)

£31,344 per annum  Ref: RCRE281

Pesticides Safety Directorate  Based in York

You will be responsible for the production of technical evaluations of data submitted in support of applications for approval, and for the reviews of existing approvals in accordance with both the Control of Pesticides Regulations 1986 and the Plant Protection Products Regulations 1995. In addition, you will assist in the provision of advice and guidance on matters relating to the regulatory process and specific scientific discipline.

You will have a degree or equivalent in a relevant subject for the SO post and for the HSO post you would also need relevant postgraduate experience. The ability to establish good working relationships with both internal and external bodies is essential, along with demonstrating flexibility in responding to rapidly changing work demands. You will be an effective and concise communicator, with excellent report writing skills and the ability to summarise complex scientific information clearly and succinctly. These posts are in the areas of chemistry/residues, operator exposure and project management.

For the SSO post, as well as all the above qualifications and experience, you should also preferably have regulatory and staff management experience. You would also need to be a good leader and team builder. This post is in the chemistry/residues discipline.

To find out more, please visit our website [www.defra.gov.uk](http://www.defra.gov.uk)

If you would like an application form and job description, please contact Resource Centre, Defra, HR Unit, Government Buildings, Whittington Road, Worcester WRS 2LQ. Tel: 01905 768818 (24 hour answerphone) or email: ResourceCentre@defra.gsi.gov.uk quoting the appropriate reference. Closing date: 22 September 2005.

As an Equal Opportunities employer the Department welcomes applications regardless of gender, race, disability, age, religion or sexual orientation. We operate a family-friendly policy including flexible working patterns. The posts are open to British, Commonwealth and EU Nationals.

**INVESTOR IN PEOPLE**

[2515-061 (2005) : 76]
Science
Life Sciences

Principal Lecturer in Forensic Science
£40,184 - £46,169 pa inc.

The School of Life Sciences at Kingston University is recognised for its excellent teaching quality. New laboratory facilities have recently been built and all staff are actively engaged in research/consultancy. The School has recently acquired a new "scenes of crime" facility on campus which will allow Forensic Science students to carry out detailed analysis of both indoor and outdoor crime scenes.

We are seeking to appoint a Forensic Scientist as a Field Leader who will complement our current teaching team and contribute to the management and delivery of our rapidly expanding BSc (Hons) in Forensic Science and Investigative Analysis and BSc (Hons) in Forensic Biology courses. You will be expected to underpin and lead further developments in the Field which would allow the courses to diversify, particularly through the creation of more specialised Level 2 and 3 modules within the candidates own research areas and through the supervision of student projects and dissertations. We would welcome applications from individuals with professional experience or with an academic/research background in forensic science.

In particular we would welcome applications from individuals who have experience in one or more of the following areas:
• Human biology, anatomy or physical anthropology, forensic applications of DNA.
• Forensic palynology or forensic entomology and their relation to environmental profiling.
• Drugs of abuse related to analytical chemistry or toxicology.
• Materials, particularly related to fibres, documents, arson and firearms.

You will be expected to contribute to teaching and to the development of research in your particular area of expertise.

For an informal discussion please contact the Acting Head of School, Dr Alan Seddon, on 020 8547 7557 or email A.Seddon@kingston.ac.uk

For further information or to download an application pack visit our website www.kingston.ac.uk/jobs or alternatively call the recruitment line on 020 8 547 7153 quoting reference 05/219. If you are a minicom user, please phone 020 8547 7169.

Closing date: 12 noon on 12th September 2005.
Interview date: 28th September 2005.

IBLS UNIVERSITY of GLASGOW
DEPARTMENT OF ELECTRONICS & ELECTRICAL ENGINEERING AND INSTITUTE FOR BIOLOGICAL AND LIFE SCIENCES (IBLS)

Research Assistants (four posts) in a cross Disciplinary IRC in Proteomic Technologies
Lab-on-Chip, Optical Tweezers, Cell Biology, Fluorescence Microscopy, Spectroscopy, and Proteomic Technologies
£19,460 - £27,116

RASOR (http://www.rasor.org.uk) is a unique research programme to advance proteomics and its application in the life sciences and biomedical research. The project will draw upon interdisciplinary and complementary skills in any of the following methods: lab-on-a-chip, microfluidics, fluorescence microscopy, cell biology, proteomic measurement technologies, assay development and spectroscopy. The aim of the project is to build teams of researchers who are able to design new analytical methods and equipment that will solve cutting edge proteomics research challenges, both within the University of Glasgow, and with our collaborators in the Universities of Edinburgh and Dundee.

The posts will be available to work in the laboratories of Professor Jon Cooper for three years in the first instance. You should hold a good honours degree and hold a doctorate degree in any of the relevant discipline (described above). If you are in the process of submitting your PhDs you should also apply. If you wish to be considered for more than one position you should make this clear in your letter of application.

POST 1: INTERFACING SINGLE CELL METHODS, LAB-ON-CHIP AND MASS SPECTROSCOPY (REF 11596/DPP/A3)
POST 2: DEVELOPMENT OF FLUORESCENCE/SPECTROSCOPIC PROTEIN ASSAYS IN MICROFLUIDIC FORMATS (REF 11597/DPP/A3)
POST 3: INTRACELLULAR IMAGING OF SINGLE CELLS WITHIN MICROFLUIDIC TECHNOLOGIES (REF 11598/DPP/A3)
POST 4: OPTICAL TWEEZERS IN MICROFLUIDIC BASED BIOLOGICAL APPLICATIONS (REF 11599/DPP/A3)

Further information and informal enquiries are available from Professor Jon Cooper, tel: +44 (0) 141 330 4931, email j.cooper@elec.gla.ac.uk or to Dr Andrew Pitt, tel: +44(0) 141 330 2500, email a.pitt@bio.gla.ac.uk.

Further details can be found at: http://www.elec.gla.ac/content/vacancies.html

Applications (two copies), including a CV, list of publications and the names and addresses of two referees, should be sent to Professor Jon Cooper, Department of Electronics, University of Glasgow, Glasgow G12 8LT.

All applications must be accompanied by an Equal Opportunities Monitoring Form which is available at http://www.gla.ac.uk/services/humanresources/recruit/equalop.htm

Closing date: 30 September 2005.
The University is committed to equality of opportunity in employment.

KING’S College LONDON
Lecturer in PET Radiochemistry / Senior PET Radiochemist

The PET Imaging Centre at St Thomas’ Hospital

The PET Imaging Centre at St Thomas’ is seeking an experienced, enthusiastic and pro-active senior radiochemist to develop and produce tracers for a wide range of clinical and research applications. The successful candidate will play a key role in developing the PET radiochemistry facilities as part of a major initiative to develop molecular imaging within the School of Medicine. For an appropriately qualified candidate the appointment will be made at lecturer level.

Current projects include production of Copper-64 labelled tracers. Fluoro-misonidazole and Fluorothymidine. New developments will include 11C and 18F labelled compounds for applications in oncology, cardiology and neuropsychiatry.

You must have a first degree in chemistry or biochemistry and 3 years’ PET radiochemistry experience. For appointment in the lecturer level, a PhD is required. The post is initially for 3 years. Salary will be in the range £25,966 - £38,206 per annum (including £2,323 per annum London Weighting Allowance).

Informal enquiries to Paul Marsden or Margaret Dakin on 020 7188 4988 (paul.marsden@kcl.ac.uk, margaret.dakin@kcl.ac.uk http://www-pet.umds.ac.uk).

For a job description and application form, please send a self-addressed A4-sized envelope to Adrian Pulle, GKT School of Medicine Personnel Department, 4th Floor, Capital House, 42 Weston Street, London SE1 3QD or tel: 020 7848 6902. email: adrian.pulle@kcl.ac.uk Ref: A1/MRS/479/05.

Closing date for applications: 15 September 2005.

Equality of opportunity is College policy
[2515-064 (2005) : 77]
An enthusiastic and highly motivated scientific administrator is sought for this new post made possible following the creation of a new Institute for Women's Health as a joint venture between UCL and UCLH (University College London Hospital). This is an exciting development and the appointee will have a key role in coordinating and facilitating the clinical and basic research team as well as responsibility for research governance issues. The appointee will work closely with the Director of the Institute and the Research Governance Lead.

Applicants should have at least a first degree in biological sciences or in a related discipline, proven IT experience, and excellent written and verbal communication skills, and be able to work effectively in a multidisciplinary academic and clinical environment.

The appointment will be for 2 years in the first instance.

The starting salary will be in the range £23,643 to £25,699 on the RA1 A scale which rises to £29,128, plus £2,330 London Weighting.

For further details and an application form, please email: shahina.mohamed@ucl.ac.uk. Completed forms should reach her at the Institute of Women's Health, Elizabeth Garrett Anderson Hospital, Huntley Street, London WC1E 6DH by Friday, 9th September 2005.

Closing date: 9th September 2005.

UCL Taking Action for Equality

McGill University
Department of Psychology
Canada Research Chair (Tier 1) in Behavioural Health

The Department of Psychology of McGill University seeks applicants for a Canada Research Chair (Tier 1) in the area of behavioural health. Applicants should have an international reputation in research related to the development and maintenance of health related behavior, and have demonstrated excellence in teaching. Specific research areas of interest include, but are not limited in, treatment adherence, motivation toward behavioural rehabilitation, and the study of interactions between patients and health-care professionals. It is expected that the incumbent will participate in the development of inter-disciplinary health research and clinical training in the McGill University Hospital Centre. The primary appointment will be at the senior associate or full professor level in the Department of Psychology, Faculty of Science, and it is anticipated that the candidate will hold a cross-appointment in the Department of Medicine of the M.U.H.C.

Review of applications will begin immediately. Applicants should present evidence of a record of significant, externally-funded research productivity and excellence in undergraduate and graduate teaching. Applicants should arrange for three confidential letters of recommendation to be sent to the address below. A curriculum vitae, description of current and proposed areas of research, selected reprints of published or in-press research articles, a description of areas of teaching competency, interest, and approaches, and other relevant material, should also be sent to:

Behavioural Health Search Committee
Department of Psychology
McGill University
1205 Dr. Penfield Avenue
Montreal, Quebec, Canada H3A 1B1

All qualified candidates are encouraged to apply, however Canadians and permanent residents will be given priority. McGill University is committed to equity in employment.

[2515-067 (2005) : 78]
The University of Reading
School of Chemistry

Two Lectureships in Physical Chemistry Ref. AC0533

Lecturer A £23,643 to £27,116 or Lecturer B £27,989 to £35,883 p.a. Full-time, Permanent

Applications are invited for two permanent Lectureship positions in the School of Chemistry. For one post we are seeking candidates with research interests in the physical chemistry of soft condensed matter, nanomaterials or polymers, to build on major new investment at Reading in these areas and to take advantage of the forthcoming Diamond Synchrotron facility nearby. For the second post, we are seeking candidates with research interests in physical chemistry that should ideally complement existing research activities in the School.

The School will consider applicants with backgrounds in experimental and/or computational physical chemistry for both posts. Candidates should submit an outline of their current research and proposals for future work. Successful candidates will have, or expect to establish, internationally recognised reputations for research excellence, and will be required to teach physical chemistry at all levels, to attract external research funding, and to supervise graduate students.

Informal enquiries prior to application can be addressed to Professor H.M.Colquhoun, Head of School (h.m.colquhoun@rdg.ac.uk) or to Professor M.G.B. Drew, Head of Physical Chemistry (m.g.b.drew@rdg.ac.uk).

Application forms and further particulars are available from the Personnel Office, The University of Reading, Whiteknights, PO Box 217, Reading, RG6 6AH, telephone 0118 378 6771 (voicemail) giving full name and address. Application forms and further particulars are also available from www.reading.ac.uk/Jobs. Closing date for applications: 21 September 2005. Please quote reference number.

POSITIVE ABOUT DISABLED PEOPLE
[2515-071 (2005) : 79]
**Microbiology Technician**
Salary £23,178 - £27,663 per annum

A Microbiology Technician (Band 2) is required in the Science Technical Support Unit to provide laboratory support for practical work in the Science laboratories.

The postholder will work in a team of technicians but should have particular skills and knowledge in the area of Microbiology. Extensive experience of laboratory work in a University or teaching environment with particular reference to Microbiology will be required. In addition, you will be educated to at least A Level standard in a science subject. Organisational skills and an ability to work unsupervised are essential.

Work is well underway for the completion of brand-new purpose-built science laboratories for the summer of 2006. This facility will include Category 3 microbiological suites and prior experience of co-ordinating the organisation and set-up of microbiological services will be an advantage.

In the first instance further details and an application form can be downloaded at [www.londonmet.ac.uk/vacancies](http://www.londonmet.ac.uk/vacancies) or e-mail recruitment@londonmet.ac.uk or write to London Metropolitan University, London City campus, Human Resources, 31 Jewry Street, London EC3N 2EY. Please quote the reference number 638PN.

Closing date for applications is 15 September 2005.

Please note we do not accept CVs.

London Metropolitan University is an equal opportunities employer.

LONDON metropolitan university
[2515-072 (2005) : 79]
Applications are invited for a Research Assistant for this post which has been created to enable testing of sera from patients with Chronic Fatigue Syndrome (CFS) / myalgic encephalomyelitis (ME) and controls using SELDI-PC, to identify biomarkers of this disease. These will be identified using 2D electrophoresis, liquid chromatography and mass spectroscopy in order to develop a diagnostic test for CFS/ME.

You should have a PhD in a relevant subject and significant experience in proteomics.

The post is funded for one year in the first instance up to 3 years. Starting salary will be in the range £21,783 - £24,830 per annum inclusive.

For further information, visit http://www.sgul.ac.uk/ or contact the Personnel Office on 020 8725 5020 (24 hour answerphone) or email: personnel@sgul.ac.uk

Closing date: 21 September 2005.

St George's is an Equal Opportunities Employer

[2515-073 (2005) : 79]
Applications are invited for a Post Doctoral Research Fellow to join the Healthcare/Textiles Group within the Centre for Materials Research and Innovation (CMRI) at The University of Bolton.

The Centre for Materials Research at The University of Bolton, which was awarded a grade 4 in the 2001 Research Assessment Exercise (RAE), is one of the Centres of Excellence in the UK for research, consultancy and enterprise activities in advanced materials and medical and technical textiles, and has a strong national and international reputation. In addition to general infrastructure in medical textiles research, the centre is equipped with specialised instruments for characterisation of wound care materials. CMRI has an established track record of funding for collaborative and multidisciplinary research and innovation activities and facilities from HEFCE, Research Councils (EPSRC), DTI, EU and industry sources.

The Post Doctoral Research Fellowship is part of a 3-year research project ‘Design and Development of Novel Compression Therapy Regimes for the Treatment of Venous Leg Ulcers' funded by the Engineering and Physical Sciences Research Council (EPSRC). Applicants should hold a good Honours Degree and a Doctorate in a relevant Engineering, Science or Textile related discipline. A background in medical and textiles research is essential.

Prospective candidates can contact:
Dr Subbiyan Rajendran Tel: 01204 903559, email: S.Rajendran@bolton.ac.uk or
Prof Subhash Anand Tel: 01204 903507, e-mail: sca1@bolton.ac.uk
for an informal discussion relating to this opportunity.

A full job description and person specification for this post can be viewed on our website: www.bolton.ac.uk by highlighting the 'Staff' link and clicking on ‘Vacancies'.

Salary in the range of £18,777 - £20,540 p.a.

Closing date for applications is Thursday 15th September 2005. Interviews are likely to be held on or around Friday 30th September 2005.

Application forms and further details are available on request by telephoning our 24 hour answering service on 01204 903579, or by e-mail to personnel@bolton.ac.uk (Please leave your home address details - no CVs accepted). When contacting The University of Bolton about a vacancy, please remember to quote the post reference number.

The University strives to achieve equality of opportunity
Creating a Taxonomic e-Science

The Natural History Museum, Royal Botanic Gardens, Kew and Imperial College London have been jointly funded as part of NERC's e-Science initiative to develop novel means of doing taxonomy on the web. We seek two people to join a team working on a model animal and plant taxonomic web site.

Position 1 Postdoctoral (or equivalent)
We seek someone with a strong IT background and an interest in biodiversity to take primary responsibility for the IT development of the project. You should have good knowledge of data design and web technologies, especially of XML and related schema, and of issues concerning the semantic web. You will be based at Imperial's Silwood Park Campus though will work closely with the Museum and Kew.

Position 2 Postgraduate (or equivalent)
We seek someone with a taxonomic background to research, assemble and curate the digital content for a taxonomic website on the plant family Araceae. You should have enthusiasm for web-based taxonomy and be at ease with managing data and IT Team-working skills are important. You will be based at the Herbarium, Royal Botanic Gardens, Kew.

The three-year appointments will be on the Imperial College scale R&E B (£22,870-£33,330) and (Position 2) Kew Band D (from £20,688) depending on qualifications and experience (pay award pending).

For further details and application forms contact:
(Position 1) Sarah Snellin, CPB, Imperial College London, Silwood Park Campus, Ascot, Berks SL5 7PY Tel: 020 7594 2346; e-mail: s.snellin@imperial.ac.uk or (Position 2) www.kew.org ('about us' icon), or HR Dept, RBG Kew. Tel: 020 8332 5184/5150, quoting Ref: eAroids.

Applications to be received by 5.00pm 23rd September 2005

Valuing diversity and committed to equality of opportunity

[2515-075 (2005) : 80]
Postdoctoral Research Assistant (Marie Curie Fellowship)

Multi-scale modelling and characterisation for phase transformations in functional/advanced materials

47,640 euros (including enhancements)

You will play a major role in characterising the magnetic and structural properties of thin films using transmission electron microscopy. A number of thin film systems will be studied for materials in which interesting phase and structural transformations have been identified. Experience of magnetic imaging, magnetic thin films or electron microscopy is desirable. This post is part of a European-funded Research Training Network MULTIMAT and is available for 24 months. Specific nationality and residency conditions apply.

For an application pack, please see our website at [http://www.ssp.gla.ac.uk/](http://www.ssp.gla.ac.uk/) or write quoting Ref 11520/DPL/A3 to Dr S McVitie, Department of Physics and Astronomy, University of Glasgow G12 8QQ. Closing date: 23 September 2005.

The University is committed to equality of opportunity in employment.
Science
Life Sciences

**Lecturer/Senior Lecturer in Molecular Biology**

£26,193 - £39,362 pa inc.

The School of Life Sciences at Kingston University is a thriving department comprised of 38 academic members of staff. The School is recognised for its excellent teaching quality in the area of Biosciences (QAA 24/24 points) and many of the staff are research active and are members of the Biomedical and Pharmaceutical Sciences Research Group (BPSRG, PE 3A).

We are seeking to appoint a molecular/cell biologist to help in the delivery and management of a range of both undergraduate and postgraduate biomedical/bioscience courses within the School. You will be actively encouraged to engage in the research activities of the BPSRG. You should possess a PhD in molecular/cell biology or a closely related area and should have some experience of teaching in higher education. Applications are invited from candidates with expertise in any area of Molecular and Cell Biology but applicants with additional expertise in either molecular genetics or bioinformatics would be particularly welcomed.

For an informal discussion, please contact Dr Alan Seddon, Acting Head, School of Life Sciences, on 020 8547 2000 or email: A.Seddon@kingston.ac.uk

For further information or to download an application pack visit our website [www.kingston.ac.uk/jobs](http://www.kingston.ac.uk/jobs) or alternatively call the recruitment line on 020 8547 7153 quoting reference 05/257. If you are a minicom user, please phone 020 8547 7169.

Closing date: 12 noon on 15th September 2005.
Interview date: 30th September 2005.

[2515-077 (2005) : 80]
Computing Research Officer: climateprediction.net
Salary: £19,460 - £29,128 p.a.

We are seeking to appoint a Computing Research Officer to provide support for the network of servers collecting data from climateprediction.net - a project using volunteer computing to undertake global climate research - and to undertake research in how to employ grid technologies to make this data available to climate physicists. You will be responsible for interactions between climateprediction.net and the Berkeley Open Infrastructure for Network Computing (BOINC) developer and participant community, including the SETI@home project. This position is for one year in the first instance, funded by the Natural Environment Research Council.

You will be experienced in Unix/Linux systems administration together with object-orientated design and development, preferably in C++/Java, as well as PHP and web development. Relational database and DBA experience with Oracle/MySQL and a degree in a numerate subject or equivalent experience are also desirable.

Further details on our project along with information about the department can be obtained from our website http://www.climateprediction.net/project/jobs.php For informal enquiries contact Carl Christensen (carlc@atm.ox.ac.uk).

Applications including a CV and the contact details of two referees should be sent to the Senior Administrator, Department of Physics, Clarendon Laboratory, Parks Road, Oxford OX1 3PU by 20th September 2005 and quoting reference number DC05/027.

The University is an Equal Opportunities Employer.
[2515-078 (2005) : 81]
KING’S College LONDON
Lecturer in PET Radiochemistry / Senior PET Radiochemist

The PET Imaging Centre at St Thomas’ Hospital

The PET Imaging Centre at St Thomas’ is seeking an experienced, enthusiastic and pro-active senior radiochemist to develop and produce tracers for a wide range of clinical and research applications. The successful candidate will play a key role in developing the PET radiochemistry facilities as part of a major initiative to develop molecular imaging within the School of Medicine. For an appropriately qualified candidate the appointment will be made at lecturer level.

Current projects include production of Copper-64 labelled tracers. Fluoro-misonidazole and Fluorothymidine. New developments will include 11C and 18F labelled compounds for applications in oncology, cardiology and neuropsychiatry.

You must have a first degree in chemistry or biochemistry and 3 years’ PET radiochemistry experience. For appointment in the lecturer level, a PhD is required. The post is initially for 3 years. Salary will be in the range £25,966 - £38,206 per annum (including £2,323 per annum London Weighting Allowance).

Informal enquiries to Paul Marsden or Margaret Dakin on 020 7188 4988 (paul.marsden@kcl.ac.uk, margaret.dakin@kcl.ac.uk http://www-pet.umds.ac.uk).

For a job description and application form, please send a self-addressed A4-sized envelope to Adrian Pulle, GKT School of Medicine Personnel Department, 4th Floor, Capital House, 42 Weston Street, London SE1 3QD or tel: 020 7848 6902. email: adrian.pulle@kcl.ac.uk Ref: A1/MRS/479/05.

Closing date for applications: 15 September 2005.

Equality of opportunity is College policy

UNIVERSITY OF DUNDEE
Experimental Haematology Laboratories
Division of Pathology and Neuroscience

POST-DOCTORAL RESEARCH ASSISTANT
Salary Scale RA1A/B (19,460 - £21,640)
(Depending on qualifications and experience)
Fixed-term for 36 months

Applications are invited for a position based in the Division of Pathology and Neuroscience at Ninewells Hospital & Medical School in a multidisciplinary research group investigating the responses of the haemopoietic system to ionizing radiation, the influence of genetic factors on these responses and the mechanisms underlying the development of longer-term pathological changes. The successful applicant will be required to use specialized cell culture techniques together with a variety of immunocytochemical and immunoassays to investigate inter-cellular signalling between haemopoietic stem/progenitor cells and their stromal microenvironment including the specific role of macrophages in such responses. The position is funded by Children with Leukaemia for three years and a background in haematology/immunology would be advantageous but is not required. The successful applicant will be an appropriately experienced graduate or someone who has recently completed relevant PhD studies. The University of Dundee is internationally renowned for research in biomedical sciences and the area provides a high quality affordable living environment.

Informal enquiries may be directed to Prof Eric Wright. e.mail: e.g.wright@dundee.ac.uk, tel: (01382) 632169.

Further details and an application pack are available from our website: http://www.jobs.dundee.ac.uk/ Alternatively, contact Personnel Services, University of Dundee, Dundee DD1 4HN, tel: (01382) 344817 (answering machine). Please quote reference number MD/961/NS.

Applicants will only be contacted if invited for interview. Closing date: 8 September 2005.

The University of Dundee is committed to equal opportunities and welcomes applications from all sections of the community.

[2515-080 (2005) : 81]
As a result of £8.3m of recent funding, the University of Liverpool is launching a new Research Centre in the area of accelerated materials discovery. This Centre will focus on the use of automated techniques for the discovery of materials with novel properties for a broad range of applications. We seek a dynamic team of individuals to fill the following positions. The posts are available for three years and applicants should have a PhD in Chemistry, Materials Science or other relevant subject.

**Business Development Manager**
£30,607 - £38,772 pa (under review)
Applicants should have experience in a commercial or business development capacity and should have relevant knowledge of the materials sector. We seek an entrepreneurial individual to promote the growth and development of a commercial high throughput materials research activity in Liverpool and to engage with SMEs in the Merseyside region. Quote Ref: B/565/NS

**Laboratory Operations Manager**
£30,607 - £38,772 pa (under review)
Applicants should have strong interpersonal skills and extensive experience of managing a research laboratory, preferably in the area of materials chemistry. The successful applicant will organise the day-to-day running and experimental facilities in the new Centre and will manage a small team of Experimental Officers. Quote Ref: B/566/NS

**Experimental Officer**
£25,633 - £31,544 pa (under review)
Applicants should have relevant postgraduate research experience in the area of Materials Chemistry, ideally with some knowledge of automated synthesis or automated characterisation techniques. The successful applicant will have a strong interest in experimental research and will be involved in a broad range of projects involving both industrial and academic groups. Quote Ref: B/567/NS

Informal enquiries for all posts to Professor Andrew Cooper, Director, Centre for High Throughput Materials Discovery on 0151 794 3548, email: aicooper@liv.ac.uk

Closing date for all posts: 3 October 2005.

Further particulars and details of the application procedure should be requested from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on 0151 794 2210 (24 hr answerphone), via email: jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html

COMMITTED TO EQUAL OPPORTUNITIES
[2515-081 (2005) : 82]
Imperial College  
London  
Department of Mechanical Engineering  

**PhD Studentship in Tribology**

Applications are invited for a research studentship in the field of Tribology (friction, lubrication and wear), leading to the award of a PhD degree. The post is supported by a bursary and fees (at the UK/EU student rate) provided by Infineum UK Ltd which is one of the world’s largest lubricant additive manufacturers.

In modern diesel engines, very large amounts of soot can build up in the engine oil between drain intervals, which can lead in turn to increases in engine wear and friction. This PhD project will explore the mechanisms by which soot promotes engine wear and investigate how additives present in engine lubricant can control this. Also of interest will be the influence of soot on friction and thus on engine fuel economy.

You will be an enthusiastic and self-motivated person who meets the academic requirements for enrolment for the PhD degree at Imperial College. You will have a background in Chemistry, Chemical Engineering, Mechanical Engineering or a related field and an enquiring and rigorous approach to research together with a strong intellect and disciplined work habits. Training will be given in tribology and investigative techniques including optical interferometry and surface topography. You will become a skilled communicator, comfortable in an international situation.

For further details of the post contact Professor Hugh Spikes; h.spikes@imperial.ac.uk  
+44 (0)20 7594 7063. Interested applicants should send an up-to-date curriculum vitae to Professor Spikes.

Closing date: 13 September 2005.

Valuing diversity and committed to equality of opportunity  
[2515-082 (2005) : 82]
Three PhD Studentships in Proteomics

Following the recent award of substantial EPSRC funding, applications are invited for three PhD studentships in proteomics to be held at the Universities of Manchester (Prof SJ Gaskell), Liverpool (Prof RJ Beynon) and Cambridge (Dr KS Lilley). Each student will be based primarily at one of the collaborating universities but will spend substantial periods in the partner laboratories, thereby benefiting from a wide range of expertise in the invention, development and application of proteomics methods.

In addition to the close interaction between the three lead laboratories, each is at the hub of extensive collaborative research networks bringing analytical chemical and biochemical skills to bear upon the characterisation of proteomes from microbes to higher plants and animals.

Relevant websites are at [http://www2.umist.ac.uk/chemistry/cms/](http://www2.umist.ac.uk/chemistry/cms/), [http://www.liv.ac.uk/pfg/](http://www.liv.ac.uk/pfg/) and [http://www.bioc.cam.ac.uk/uto/lilley.html](http://www.bioc.cam.ac.uk/uto/lilley.html).

Applications should be made to one of the partner universities by Friday, 16 September 2005, any enquiries may be made to any of the principal investigators (simon.gaskell@manchester.ac.uk; r.beynon@liverpool.ac.uk; k.s.lilley@bioc.cam.ac.uk).

Studentships will begin in early October. Please note that eligibility for full funding (tuition fees and stipend) is restricted to UK students only although EU citizens will be eligible for payment of fees.

Awards to Newly Appointed Lecturers in Science, Engineering and Mathematics 2006

The Trustees of the Nuffield Foundation are offering a limited number of awards of up to £6,000 to newly appointed lecturers in Science, Engineering and Mathematics Departments of Higher Education Institutions within the United Kingdom.

The awards aim to assist new lecturers to develop innovative research projects during the early stages of their independent research careers. They may be used flexibly to provide, for instance, small items of equipment, consumables, occasional research or technical assistance, or contribute towards travel.

Awards will be made competitively and preference will be given to lecturers wishing to explore novel and original lines of research that may not yet be at a stage suitable for Research Council support. 85 awards were made in 2005.

Eligibility

Applications must be newly appointed to full-time university lectureships in Departments of Science, Engineering and Mathematics. Biomedical and Social Science lecturers are no longer eligible. Lecturers appointed or taking up their post on or after 1 August 2004 are eligible to apply. Applicants should not hold external grants of more than £15,000 in total and their salary should not be provided by research councils, charities, industry or other sponsorship.

How to apply

The closing date is Thursday 27th October 2005. Applications must be on the new forms for 2006. Further details and application forms may be downloaded from our website at [www.nuffieldfoundation.org](http://www.nuffieldfoundation.org) or by post from The Nuffield Foundation, 28 Bedford Square, London WC1B 3JS. Tel: 02075807434(24 hour answerphone) Ref: JC/NAL

Science, work and business
The insider **Engineering**

They're happy and they know it

Engineers are the happiest UK professionals. But looking at the job conditions abroad, should the UK engineer be smiling? Definitely, says Nadya Anscombe.

ARE you an engineer? Are you happy? Well you should be, according to two surveys published last year. The City & Guilds Happiness Index, which is compiled to track the satisfaction of the UK's workforce, found that chartered engineers are the happiest professionals around. When it comes to job satisfaction, they beat lawyers, scientists, architects and accountants. This career contentment is echoed in a report from the Training and Development Agency for Schools that found the graduates least bored with their jobs work in engineering and healthcare.

It can be hard to convince outsiders that engineering is a worthwhile profession, however. Perhaps that's because the name "engineer" has come to be attached with men (rarely women) in overalls, fixing phones or mending bits of machinery. It's a familiar story for engineers: you are at a dinner party or family gathering and someone asks you what you do. When you tell them, their eyes glaze over and they quickly change the subject. This wouldn't happen in much of the rest of Europe, where the perception of engineers is quite different. In Germany, France and Italy, for example, engineers are respected in the same way as doctors or lawyers, and engineering is associated with ingenuity, hard work and intelligence.

"In some European countries, engineering is thought of as the top job," says Barry Cleasby of the UK's Engineering and Technology Board (ETB). "There is a standard that is maintained by all engineers. In Germany, for example, you have to be registered with an institution in order to practise as an engineer, rather as doctors in the UK have to be registered with the General Medical Council. You can be struck off for malpractice. This again helps to raise the public's perception of engineers.'

It's a similar story in Italy, according to Aeneas Massara, a British engineer who spent a year working there. 'You get a lot of respect and even a title, like in Germany. They call you Engineer Massara, instead of Mr Massara.'

British engineers can take some solace from the fact that their American colleagues suffer from a similar negative public perception.

In the US, scientists are thought of as more prestigious than engineers, according to the American Association of Engineering Societies (AAES). A survey last year showed that the public perceives engineers as "building and planning" rather than "inventing, discovering, researching or pioneering" as scientists do. In the American public mind, engineers don't save lives, don't work in space, and they are not involved in creating innovative materials. Clearly both nations have work to do on improving the public image of engineers (see "Changing perceptions", page 52).

So why are UK engineers so happy with their lot? Salary is the obvious first place to look, and the pay of a British engineer appears competitive. The average salary for a chartered engineer in the UK is an impressive £53,000, according to the ETB's 2005 Survey of Registered Engineers (see Graph, below left). "I think this figure is higher than most people would have expected and shows how well engineers in the UK can earn," Cleasby says. 'We are very pleased with the increase in engineers' salaries since 1995...This is a result of companies waking up to the fact that we are in a global marketplace, and that in order to keep their best engineers they have to offer competitive salaries.'

Cleasby recognises, however, that the vast majority of the survey's respondents were over 45 years old; chartered engineers in their 30s would be lucky to be earning this kind of money. Nevertheless, starting salaries for engineers are comparable to, and often beat, those in law, accountancy or IT, according to Association of Graduate Recruiters (see Chart, page 52). Chemical engineers are the highest-paid graduates of all the engineering disciplines, closely followed by mechanical and electronic engineers. A chemical engineering graduate can expect their salary to at least double over 20 years, and the median salary is £40,000, according to the Institution of Chemical Engineers (IChemE). "There are relatively fewer chemical engineering graduates, compared with the rest of engineering, and demand is high at the moment, especially in the oil, gas and process industries," Cleasby says.
Despite salary hikes in the past decade, there remains a widespread perception among UK engineers that they are paid less than engineers abroad, according to the Engineering and Physical Sciences Research Council (EPSRC). This observation came from a review panel of 26 prominent industry and academic engineers from the US, Europe and Asia who were invited by the EPSRC to assess the quality of engineering research in the UK. The delegates were impressed by what they saw, but lamented that engineering, computer and materials researchers around the country complained of lower pay compared with other industrialised countries. Whether this view is accurate or ill-founded, the UK engineering sector should take steps to address the perception of low pay to avoid a graduate brain drain overseas, the panel concluded.

The validity of this view is, it turns out, tricky to prove. It may be straightforward to compare individual salaries like for like, but factors such as cost of living, tax and social security will determine if an engineer really is better off in another country. The net salary and relative buying power better reflect how well off somebody will be in a new location.

In Italy, for example, a marginally higher gross salary leaves you with less buying power than you would have in a similar job in the UK, according to an international salary survey carried out this year by human resources consultancy ECA International. Unless engineers pick their location wisely, they could find themselves worse off than they would be back home.

Massara, who is now a product engineer at Cambridge Silicon Radio, developing single-chip wireless devices for mobile phones, found little to tempt him to go abroad again when he looked at jobs in a number of European countries. UK salaries, he discovered, matched those he saw in Europe. "There were plenty of job opportunities for me here and I am very happy with my salary at the moment," he says.

Massara's electronics skills could have landed him a highly paid job in the US, but those jobs tend to be in Silicon Valley, where the cost of living is also higher. While UK salaries have a long way to go to match the US, he feels the gap in real terms is narrowing. "In the UK we are heading towards the American working model, where there is a high staff turnover and companies offer high salaries to try and attract and keep staff."

A recent salary survey of chemical engineers revealed a similar picture. The median salary for a US chemical engineer is $92,150 (£50,200), according to the American Institute of Chemical Engineers' 2005 salary survey. This is £10,000 more than the UK median salary but take a closer look and it appears that some UK engineers are starting to earn a comparable wage. For the age range 46 to 50, for example, the median salary in the US is $105,000 (£57,000), only £3000 more than the median salary in the UK for the same age range. Rosemary Harper, a 28-year-old manufacturing process engineer at chemical company Solvay in Warrington, Cheshire, earns nearly £35,000, a figure she says she would struggle to find elsewhere. But pay isn't everything, and she cites other factors as the reason she chose the UK after graduating as a chemical engineer in New Zealand. "The real advantages for me are the conditions here in the UK," Harper says. "I get more holidays, a better pension and have more opportunities to develop within the industry." She believes that young engineers rate promotion prospects, challenging work and training just as highly as the salary offered.

This may be at the root of why UK engineers seem so content with their careers. While those prepared to travel can no doubt find better pay, engineers have chosen to follow their careers in the UK despite the drawbacks. Their positive outlook can be traced back to when they left university, Cleasby says. "If you've become an engineer...you may have turned down city job offers with high salaries in order to go into engineering and actually apply the knowledge you have gained at university," he says. "This means you are more likely to be happier in your job, because it is something you really want to do and you are not just doing it for the money."

So while UK engineers have to cope with the occasional frustrating dinner party conversation and a salary that could probably be bettered, the range of opportunities and the challenging work that engineering can provide mean that UK engineers should be very happy people indeed. Go on, smile. Nadya Ancombe is a freelance journalist based in Bristol, UK

"In Italy a slightly higher salary leaves you with less buying power than a similar job in the UK"

The opportunity to apply the knowledge gained at university contributes to engineers' job satisfaction

Changing perceptions
A misguided public image of UK engineering doesn't just dent the vanity of today's engineers; it puts at risk the future of the profession by potentially cutting down the flow of new graduates. For now, there is no shortage of students choosing engineering at university, but just because there are a large number of engineering graduates, that does not mean there are a large number of engineers, says Barry Cleasby of the UK's Engineering and Technology Board. Many engineering graduates are being drawn to city or finance jobs, he says, where the high starting salaries soon quash any dreams the students had of becoming an engineer.

"Only around 40 per cent of engineering graduates actually go into engineering," Cleasby says. "When you are an engineering graduate with huge debts, it is hard to turn down a £45,000 job offer from a finance company that is willing to pay that amount of money for graduates with logical thinking and problem-solving skills."

In Germany and many other European countries it is almost inconceivable not to practise as an engineer after studying the subject.

It takes around seven years to qualify as an engineer in Germany - around the same time it takes to become a doctor, an architect, a vet or a lawyer. This may be one reason engineers get the same level of admiration and respect as doctors.

But in the UK, it is possible to qualify as an engineer in only three years, and public regard for the profession is correspondingly lower. Chartered engineer status is the closest thing the UK has to the German system, but only around 20 per cent of engineers have trained for it, Cleasby says. "Encouraging more engineers to take up chartered status could raise the profile of engineering," he says. "Getting chartered status should be seen as an investment, but it is only the larger firms that tend to offer this to their employees."

Universities are taking steps in the right direction, however, and are now offering four-year MEng courses to bring the UK closer into line with the five-year European courses. In addition, increasing numbers of UK engineering graduates are studying for higher qualifications after their bachelor's degree. There has been a 400 per cent increase in the number of engineering master's and PhD degrees completed.
in the last 10 years, and around 20 per cent of engineering and technology undergraduates now go on to do a master's degree, more than with most other subjects.

"The increase in higher degree completions in engineering and technology can be seen as one of the most important trends in engineering education," Cleasby says. "This means a better-qualified workforce, which can only have a positive effect on UK plc."

However, employers need to do more to reward those with higher academic qualifications to ensure the trend continues. The Engineering and Physical Sciences Research Council (EPSRC) has expressed concern over the employment potential of students with higher degrees. Graduates with PhDs and master's degrees perceive no additional advantage from their qualifications when applying for jobs in industry, according to a report on UK engineering research published earlier this year.

This certainly appears to be the case in chemical engineering. In fact, when directly comparing age groups, chemical engineers with a bachelor's degree tend to earn more than those with higher qualifications, according to the Institution of Chemical Engineers. In a survey this year, the IChemE found that chemical engineers with PhDs earn less than their BEng colleagues of the same age, and those with master's degrees do only slightly better than that. Graduates with higher qualifications are likely to catch up later in their careers, but the expense of extra years of study with no dear advantage in the industry may deter graduates from taking up higher qualifications in the first place.

Cleasby accepts that making the changes needed to shift the public image of engineers will not be easy, and will take time to have an effect. "Changing the public's perception of engineers and engineering will take a major economic change in manufacturing in the UK to bring it in line with countries such as Germany. But that is not going to happen overnight."

Absolutely. I'm sure computer modelling has transformed the tumble dryer industry.

Make your skills count for more

MANUFACTURING ENGINEER, IMAGE ANALYSIS SCIENTIST, COLLATERAL EFFECTS ANALYST - ALDERMASTON, READING

Whatever your specific field of expertise, you owe it to yourself to put your hard-earned skills to work in an environment where they can make a real difference. Here at the Atomic Weapons Establishment, you could help us maintain the UK's nuclear deterrent. And, let's face it, responsibilities don't get much greater than that. To find out where your skills fit in and to apply online visit www.awe.co.uk or call 0118 982 9009 for an application form.

AWE welcomes applications from women and men, regardless of disability, sexuality, racial or ethnic origin, age (up to 65) or responsibility for dependants. Successful candidates will be selected solely on their ability to carry out the duties of the post. Because of the nature of the work undertaken at AWE, these posts are required to meet special nationality rules and therefore are only open to British Citizens. All selected candidates will be required to undergo security clearance.

POSITIVE ABOUT DISABLED PEOPLE

AWE
Without a long term of flood risk…

…we’re sunk

Flood Risk Management Opportunities (Chartered Civil Engineers to Flood Scientists) Nationwide To lead our teams - up to £36,500 • To specialise - up to £29,600 • Team Members ambitious to progress - up to £24,800
Plus benefits + London weighting (where appropriate)

As a Scientist you’re probably attracted to the wealth of exciting projects on the horizon. However, we’d like you to look at the bigger picture. The fact that, with or without climate change, it’s our job to manage the risk that many of our major cities could go under water. With over five million people currently living in flood risk areas, it’s our job to inform and educate; to build and manage flood defences; as well as to lead during flood emergencies.

It’s no surprise that we’re currently investing hundreds of millions to make this happen.

Wouldn’t you like to get involved? To use your skills where it really counts? Working in flood forecasting and strategic planning, you’ll have the chance to do something worthwhile for future generations. And you’ll be doing it with professionals who care.

If you are a Scientist, Planner or Modeller with an interest and expertise in the flood forecasting and flood hydrology field you can find out more at www.fluidfacts.com If you do not have internet access call 01925 542193 for an application pack. Closing date: 14 October 2005.

We are committed to making our organisation as diverse as the environment

[2519-007 (2005) : 56]
NUCLEAR PHYSICIST
Paris, France

We are looking for a Physicist or Engineer, specialized in radiation measurement, to work on R&D projects in our industrial laboratory in Paris, France.

We are: a dynamic multinational company with offices in over 55 countries, employing 4,500 people. We are growing rapidly and developing new technologies to meet our clients' needs.

You are: an Engineer or Physicist with a PhD in experimental nuclear physics. You have very good knowledge of radiation interaction including the associated electronics and instrumentation including pulse-shaping and spectroscopy electronics. You have good familiarity with sources and detector physics, in particular scintillation counters. Work experience in development of radiation detection systems, including detectors, photomultiplier tubes, signal conditioning and spectroscopy is an advantage.

The job is: to be in charge of the development of instrumentation for radiation measurements in challenging environmental conditions. This includes system specification and definition including detector and shielding, and the organisation of experiments for validation of prototypes, including the interpretation of associated results.

We offer a competitive salary and benefits package to the right applicant, and assistance with relocation to Paris.

Reply, with your CV, in complete confidence, to: Box Number 7716, c/o Reed Business Information, Quadrant House, The Quadrant, Sutton, Surrey, SM2 5AS.

[2519-009 (2005) : 56]
Take off to the opportunity of a lifetime

BAE Systems is now recruiting for current and future opportunities in Metrology and Calibration in support of Project Al Yamamah in Saudi Arabia.

We offer an excellent compensation and benefits package to include:
• Competitive salaries  • Excellent leisure and recreation facilities
• Generous leave & ticketing allowances  • Pension scheme
• Two year open ended contract  • Free medical care in Saudi Arabia
• Free food  • Free accommodation  • Personal Accident Insurance

**Senior Metrologist**  
(Electrical, Mechanical or Optical specialisation)  
UK Nationals £109,910 over two years, plus benefits

In support of the Chief Metrologist, Primary Standards Laboratory, you will be responsible for the calibration and repair of precision test, measurement and diagnostic equipment within the Type I (Primary Standards) Laboratory. Duties include the computer based analysis of measurement results and production of calibration reports.

You will have at least five years' practical experience with the Metrology and Calibration field, two years' being within a Type I (Primary Standards) Laboratory. You will hold a university degree in an appropriate technical subject.

**Calibration Technician**  
(Electrical or Mechanical)  
UK Nationals £76,315 over two years, plus benefits

You'll carry out the calibration and repair of a wide range of test, measurement and diagnostic equipment at one of several Royal Saudi Air Force Calibration Laboratories within Saudi Arabia. Duties may additionally include on-the-job training of Saudi nationals.

You will have at least five years' practical experience within the Metrology and Calibration field including at least two years' in the performance of diagnostic and rectification work to component level. You must be educated to ONC level, or equivalent, in an appropriate discipline (for UK nationals), or High School Graduation with further military or civilian technical school training (for US nationals).

If you have the appropriate skills we are looking for and want to find out more then visit our web site at: [www.projectay.co.uk](http://www.projectay.co.uk) or alternatively please send a comprehensive CV quoting reference number 761 to: Tina Cookson, KSA Resourcing, BAE SYSTEMS, Mill Lane, Building W386, Warton Aerodrome, Preston PR4 1AX or e-mail: tina.cookson@baesystems.com Telephone: + 44 (0)1772 854017 Fax: + 44 (0)1772 852096.

We are committed to equal opportunities but, as these positions are based in Saudi Arabia, we are only able to consider male applicants.

BAE SYSTEMS

[2519-010 (2005) : 57]
OXFORD bioMedica

TWO SENIOR POSITIONS IN NEUROBIOLOGY:
Grade 5 (senior scientist with 5 years research experience) or Grade 6 (principal scientist with five years research and relevant scientific or clinical management experience, preferably from an industry background)

We are expanding our research and development in the area of gene therapy for neurodegenerative diseases, particularly Parkinson's disease and motor neurone disease. We wish to increase our understanding of the early pathological and symptomatic stages of Parkinson's disease and to assess the relative potential of gene-based dopamine replacement and neuroprotective strategies for the treatment of patients at early stages in the disease. We are also modelling clinical protocols to determine the optimum mode of delivery and dosage regimen of gene therapy treatments for CNS and PNS disorders.

Suitable applicants will have a strong interest in the clinical applications of gene therapy and will have undertaken at least five years research, preferably including the use of in vivo models, into some mechanistic aspect of the function of the mammalian nervous system in health and/or disease. A good understanding of molecular and/or cellular biology methods would be a considerable advantage but hands on experience of gene therapy is not essential. You will join an internationally recognised team that collaborates with other world leaders and receives considerable support from external agencies. You will be expected to initiate new research programmes as well as to contribute to the ongoing development of our clinical products, ProSavin and MoNuDin, that are expected to enter phase I/II clinical trials in 2006 and 2007.

Oxford BioMedica provides comprehensive staff training and we encourage all staff to participate in external meetings and to publish significant findings. Salaries are aimed at attracting the best people and recognise relevant experience. We offer share option and company pension schemes, generous holiday allowance, and a rewarding working environment.

To apply please send your CV and a brief letter indicating how you could contribute to the clinical development of gene therapy and identifying which grade best suits your experience, to:
Sian Lorimer
Oxford Biomedica Plc
Medawar Centre, Robert Robinson Avenue, The Oxford Science Park, Oxford OX4 4GA [s.lorimer@oxfordbiomedica.co.uk].

AMS SCIENTIST

If you are interested in joining a growing hi-tech specialist analytical services company that is changing the way drugs are developed we would like to hear from you. Xceleron is the first company in the world to offer commercial services based around AMS to pharma and biotechnology companies. Your role would be to support the AMS Manager in running a 5 million volt accelerator mass spectrometer (AMS) based at the DEFRA Laboratories Sand Hutton, York. Applicants will have a minimum of a science degree or equivalent in either physics or chemistry and preferably two years commercial experience in mass spectrometry as either an engineer or running a mass spectrometer. You should be a team-player and be able to work under pressure. Salary for this position would be negotiable together with company pension and life insurance, private health insurance and access to sports facilities.

Please provide two copies of your CV, together with the names of two referees, to Human Resources, Xceleron Ltd, The Biocentre, Innovation Way, York YO10 5NY. Please quote ref AMS/1/05.

Closing date for applications is 04 November 2005. Applications for this position will not be acknowledged. Xceleron has a no smoking policy.

[2519-012 (2005) : 58]
UK Resource Centre for Women in Science, Engineering and Technology

If you are inspired and committed to gender equality for women in SET visit our website (www.setwomenresource.org.uk) for full details of the following exciting opportunities and further information about the Project.

**Partner Relations Manager**
circa £25,000. Fixed term until June 2007, 37 hours

**Employer Liaison Co-ordinator**
circa £26,000. Fixed term until May 2007, 37 hours

Closing date for applications: 6 October 2005

Subject to operational requirements, consideration will be given to fractional appointments, including job share and part time working, flexible working, home or off site working and we welcome applications from under represented groups.

For application form, visit Bradford College Website: [http://www.bradfordcollege.ac.uk](http://www.bradfordcollege.ac.uk) or write, requesting an application form, enclosing a self-addressed A4 envelope (no postage required), clearly marked with the post reference number to:
The Recruitment Section, Personnel Department, Bradford College, Great Horton Road, Bradford BD7 1AY. E-mail recruit@bilk.ac.uk

[2519-013 (2005) : 58]
RESEARCH SCIENTIST AGRICULTURE AND THE ENVIRONMENT DIVISION

A molecular microbial ecologist is sought for a BBSRC-funded project to investigate the impact of heavy metals on soil microbial diversity. Postgraduate expertise in community DNA extraction and analysis using PCR and DGGE or tRFLP is required. Experience of BIOLOG and PICT, for analysis of community activity, and quantitative PCR techniques is desirable.

Some knowledge of working with soil is required, and experience of using other methods for measuring microbial community activity in soil will be an advantage.

The post will be responsible for writing reports and papers from the project and presenting the work at scientific meetings.

Funding is available for 3 years at band 6-PD level, which has a salary range from £22,351 to £25,767 per annum (pay award pending).

Apply by application form only, available with further particulars from our website www.rothamsted.bbsrc.ac.uk or from the HR Group, Rothamsted Research, Harpenden, Herts, AL5 2JQ.

Isotope Climate Specialist
Research Leader and/or Research Team
Attractive Salary Package

The Australian Nuclear Science and Technology Organisation, ANSTO, is a leading Australian multi-disciplinary research and development organisation focussed upon delivering the benefits of nuclear science and technology to community and industry.

The Institute for Nuclear Geophysiology of ANSTO is seeking a dedicated scientist with strong interests in applications of radio- and stable isotopes in a range of current and emerging climate and environmental issues.

The Institute has projects aimed at applications of isotopes in the hydro- and geo-sphere and focused on climate change, paleoclimate and water resources. We have a wide range of instruments including three accelerators, a SIMS and various radioanalytical facilities. The successful candidate is expected to make significant contributions to this research. Also, you will be expected to maintain existing and develop new services sought by clients and stakeholders.

You will have experience in using isotope techniques to interpret high-resolution records (e.g. in groundwater, corals, ocean sediments, speleothems, tree rings, pollen). You will lead a team of radiochemists using diverse research tools including alpha, beta, and gamma spectrometry and applying analytical methods eg U/Th via TIMS and/or ICP-MS, to stable isotopes (particularly del 18-0 and del 13-C) of terrestrial origin. An interest in climate model validation eg in paleoclimates using applications of 14C dating/tracing over the period 0-60 ka and/or applications of cosmogenic studies (10Be+26AI activities) related to the last glacial cycle for landscape change and chronology of earth system processes would also be valuable.

ANSTO is particularly interested in attracting a small team into the Institute for Nuclear Geophysiology. Candidates who are able to bring one or more co-workers with them are encouraged to seek additional details on this.

You should have a PhD, preferably in Earth Sciences or experimental physics with a strong experience in a range of radio- and stable isotope measuring techniques. A sound knowledge of Quaternary science is desirable. You should be experienced and efficient in project management and have a strong record of successful leadership of research groups.

An attractive salary package will be offered depending on qualifications and experience. To be eligible for engagement, applicants will require a medical and security assessment.

Selection criteria for the role can be found on our homepage at www.ansto.gov.au or by contacting Ms Deanne Wood on +61 2 9717 3993 or e-mail Deanne.Wood@ansto.gov.au

Your application must address the selection criteria, include a C. V. and the details of three professional referees, and should be forwarded to Ms Deanne Wood by e-mail or mail to The Institute for Nuclear Geophysicsy, ANSTO, PMB 1, Menai, NSW 2234.

Applications close 21 October 2005.

Australian Government

Nuclear-based science benefiting all Australians
HIMASCAS5494

Australian Nuclear Science and Technology Organisation
ANSTO is an Equal Opportunity Employer.
We are seeking a highly motivated individual with a record of research achievement in irrigation science and/or water re-use to join and provide leadership within the CSIRO Land and Water group researching sustainable land and water management in irrigated landscapes. We seek applicants with a PhD or equivalent qualifications and extensive experience in a branch of environmental engineering, chemistry, hydrogeochemistry or the physical sciences with preferred specialisation in waste water reuse and water quality modelling.

The successful person will be required to conceive, plan, and implement biogeochemistry research that emphasises the role of biogeochemical processes in irrigated landscapes, and factors controlling biogeochemical processes in the landscape. Experience in the wine industry would be advantageous. You will need to have well-developed leadership, oral presentation and written communication skills, and possess personal attributes to work cooperatively with colleagues in CSIRO, universities, governments and private agencies.

This position is for a term of 5 years. Applications close 9th October 2005.

New Scientist Jobs
www.newscientistjobs.com
[2519-019 (2005) : 60]
Johnson Matthey Catalysts is one of the world's leading catalyst companies with strengths in process catalysis, environmental catalysis and fuel cell technologies.

POSITIVE ABOUT DISABLED PEOPLE

At Johnson Matthey Catalysts, our people are our strength. Going beyond simply providing products and services, we develop tailored solutions for challenging opportunities. Our in-depth practical knowledge enables us to optimise the performance of our products in the customer's plant by applying a unique blend of process, design and engineering skills. Our dynamic groups of scientific and commercial personnel are the catalysts for your competitive advantage.

Due to the continuous expansion of the Business the following vacancies exist:

**Senior Materials Scientist**
An opportunity exists in the Process Catalysts and Technology Research Department at Billingham for a Senior Materials Scientist.

You will be a senior member of a small multi-disciplinary research team working within the Manufacturing Science Group, which aims to provide support across the business. The work entails the design and delivery of research work programmes, in order to develop new manufacturing technology in support of the development of new products. The diverse nature of the job also requires interactions with a wide range of business functions including manufacturing, commercial and R&D. This challenging work requires the jobholder to provide a high degree of technical advice to customers and suppliers.

You will be a materials science graduate ideally with at least 5 years' experience in a R&D environment. Results-focused, with the ability to think analytically, you will possess the ability to plan, organise and prioritise projects over a range of time horizons. An in-depth knowledge of materials science including ceramic forming processes is essential. With excellent communication skills, an understanding of catalysts, supports and their applications would be advantageous.

**Catalyst Forming Development Scientist**
An exciting opportunity has arisen within Process Catalysts & Technologies (Billingham) to fulfil the role of Catalyst Forming Development Scientist as part of a multi-disciplinary Manufacturing Science Team. You will carry out research into forming catalyst particles for use in reactors, where particles need to meet specific size and shape requirements and to be both porous and strong. Options for manufacturing routes and formulations will be assessed and developed.

The diverse nature of the role also requires a range of raw material, intermediate and product characterisation techniques to be employed. This challenging work will involve the operation of specialised equipment at both laboratory and pilot plant scale.

Experimental programmes are on a project basis (typically 6 - 12 months), usually to tight time scales and designed to meet business requirements. The work includes the development of experimental techniques in order to produce data and small-scale samples for initial screening. Successful materials may require production in larger quantities.

You will be self-motivated with good practical skills and an honours degree in materials science, chemical engineering or chemistry. You will be able to effectively analyse and report experimental results. An understanding of ceramic forming processes and strength development would be an advantage, but training will be provided for use of the more specialised equipment.
To apply for one of these positions, please email your CV, with covering letter to jmcmats_ns@uib.srg.co.uk or write to Probier Chatterjee, SRG, The Grainger Suite, Dobson House, The Regent Centre, Newcastle-upon-Tyne NE3 3PF. Tel. 0191 284 6768.

Closing date: 28 October 2005.

LET'S GROW TOGETHER

Pharmacology Team Leader, Inflammation/Immunology
Competitive Salary + benefits - Cambridge, UK

UCB and Celltech have come together to form one of the world's leading biopharmaceutical companies, specialising in CNS, inflammation, immunology and oncology. Join us at this exciting time and experience significant visibility, the opportunity to influence the therapeutic strategy and be recognised for your contribution.

This new role is ideal for an existing team leader looking to broaden their exposure and as part of a career path into more senior management roles. Supporting the Head of Pharmacology who is taking additional responsibilities outside the department, you will have significant responsibility and visibility through membership of a core team, leading a high calibre group and as a key representative of the function.

An enthusiastic scientist with 5-10 years' post-doc in vivo drug discovery experience with a PhD in Pharmacology, Physiology or a related discipline, you will be scientifically credible with significant experience of drug discovery in a biotech or pharmaceutical environment and a track record of delivery on NCE projects as part of a multidisciplinary team. Project leadership experience would be an advantage, as would experience of contributing as author or editor to formal regulatory documents. Experience of working with and understanding the demands of related functions is essential.

A sound working knowledge of the mechanisms underlying human diseases such as rheumatoid arthritis, multiple sclerosis, Crohn's disease, psoriasis and SLE is required.

To apply, please send your CV and covering letter, quoting reference number C938, to HR Officer, UCB Celltech, Granta Park, Great Abington, Cambridge CB1 6GS. Email: CambridgeRecruitment@ucb-group.com

Closing date: 20th October 2005.

3 PhD Studentships in Seed Biochemistry, Ecology and Cryobiology

We have three PhD Studentships immediately available in our Seed Conservation Department at Wakehurst Place, West Sussex. Your main responsibility will be to personally conduct innovative research, including experimental work, as well as data recording, evaluation, and written and oral presentation. You will also contribute to the scientific publication output of the Department by writing scientific papers and producing a PhD thesis.

A dynamic and effective communicator, you will be highly organised and self-motivated, with excellent presentation and interpersonal skills. You will have at least an upper second class BSc degree or equivalent in biology, biochemistry or ecology and relevant laboratory experience. Specific knowledge of plant physiology, seed biology and mathematical modelling is also desirable.

A 3-year maintenance grant, starting at £11,800 per annum, is available. Benefits include a book allowance, institutional support to personal development and a stunning work environment.

Application packs are available from our website www.kew.org (click on the 'about us' icon). Alternatively, please contact the HR Department; RBG Kew, on 020 8332 5184/5150 (24 hour answerphone).
Please quote Ref PHD3.
Closing date: 17 October 2005: Interview date: 7 November 2005.

Committed to equality through diversity. Selection is on merit alone.

The MRC Virology Unit is seeking to appoint an experienced research assistant to run our centralised cell culture service. This will involve maintaining high quality, fully characterised cells stocks for our research groups and high density cell culture systems for production of virus and viral proteins. In addition you will maintain our low temperature storage facilities and provide support to our media production service and Containment Level 3 facility.

A Degree or equivalent qualification in an appropriate scientific discipline together with wide ranging experience of cell culture techniques in a research environment is essential. Previous experience in the culture of human viruses and of the baculovirus system is desirable along with database management skills.

We can offer a starting salary in the range £19,048 to £21,941 per annum for this Band 5 post (band maximum is currently £26,555 per annum), together with membership of the MRC Pension Scheme.

Application forms and further particulars are available from
Mrs Agnes Simpson, Unit Administrator, MRC Virology Unit, Institute of Virology, Church Street, Glasgow G11 5JR.
Tel: 0141 330 4644 (answering service) or email: f.graham@vir.gla.ac.uk

Closing date for return of completed applications is 28 October 2005. The Medical Research Council is an Equal Opportunities Employer.
'Leading Science for Better Health'.
QC Manager
Haverhill, Suffolk
£Competitive + Benefits

Genzyme Corporation is a global biotechnology company with more than 7,000 employees around the world, all united by a common and constant commitment to patients. A £55 million investment in our state-of-the-art bulk pharmaceutical manufacturing facility at Haverhill has created an international centre of excellence to help meet the ever growing demand for Renagel™ - a major advance in the treatment of renal disease. We now seek a motivated, organised QC professional with good problem solving, motivation and communication skills who would enjoy working across a wide range of QC activities, with the very latest equipment, in new laboratories.

You will manage the day-to-day activities of our protein therapeutics QC and microbiology groups, providing a testing service that meets the needs of our European market. This will involve reviewing analytical raw data, ensuring systems, procedures, processes, laboratory environment and equipment are maintained in compliance with cGMP as well as taking responsibility for approval of final test results.

You will also maintain and review QC performance indicators, evaluate and improve procedures as well as motivate, develop and train your team.

A graduate in chemistry biochemistry molecular biology or a related science subject, your minimum of five years in the QC of pharmaceutical products, ideally in finished dosage form analysis, will include working to cGMP and managing a team. You will also have good technical knowledge of common chemical analytical techniques, including HPLC and UV spectrometry project management experience and a good understanding of microbiology.

In return for your commitment we offer extensive benefits, including private healthcare, pension and share schemes.

Please send your CV quoting reference HO5/153/QC/NS to Cathryn Starling, HR Officer, Genzyme, 37 Hollands Road, Haverhill, Suffolk CB9 8PU. E-mail: CareersUK@genzyme.com.

We would appreciate all applications by our closing date of 14th October 2005.

PROVA

Analytical Chemists/Technicians
(Camberley, Surrey)
Salary negotiable, depending upon experience

Prova is an independent contract development organisation providing chemistry and pharmacy support to the pharmaceutical industry. We provide a service to over 40 companies including multinationals, biotechnology and veterinary. Our services include pharmaceutical analysis, formulation development and regulatory affairs.

We are currently looking to recruit analytical chemists or technicians to work in Prova's pharmaceutical analysis department. The group carries out a diverse range of activities including method development, validation, stability testing and release testing on both drug substances and formulated products. Working with a wide range of companies in the healthcare sector, projects cover a broad variety of compounds and formulation types. The work principally involves chromatographic analysis combined with other mainstream pharmaceutical analysis techniques such as dissolution testing, FTIR, KF, particle size, rheology etc.

Positions exist both for analytical chemists or technicians who have appropriate academic qualifications, ideally combined with at least two years' experience working in a pharmaceutical analysis laboratory, in a regulated environment. The positions offer a great opportunity for applicants to extend their experience and careers in the pharmaceutical sector and make their mark working in a productive and growing independent organisation.

If Prova is the kind of organisation which is offering the sort of role you are looking for, please send your CV to:
Mrs S Mills, HR Executive, Prova (R&D) Ltd Units 1-4 Craven Court, Stanhope Road, Camberley, Surrey GU15 3BW Tel: 01276 678870; email: smills@prova.co.uk web: www.prova.co.uk

defra
the Department for Environment Food, and Rural Affairs

ADVISORY COMMITTEE ON HAZARDOUS SUBSTANCES

APPOINTMENT OF FOUR SCIENTIFIC MEMBERS TO THE GOVERNMENT'S EXPERT COMMITTEE ADVISING ON HAZARDOUS CHEMICALS IN THE ENVIRONMENT

Ministers wish to appoint four new members to the Advisory Committee on Hazardous Substances (ACHS) to represent persons engaged in carrying out scientific work. The posts require expertise in one of the following areas: ecotoxicology; environmental chemistry; fate and behaviour of nano-materials in the environment; hazard and risk assessment of nano-materials. One of the posts is reserved for candidates with experience of industrial or commercial chemical undertakings.

The ACHS is the statutory scientific and technical committee consisting of independent experts which advises the Government and the devolved administrations on the potential risks to the environment and human health via the environment from hazardous chemicals.

Successful candidates for membership will be experts in their field and able to contribute to the formulation and delivery of advice. They will have strong communication skills and will be conversant with ongoing debates on chemical, nanotechnology and environmental issues.

The post will be initially for three years. There are currently four meetings a year in London. An attendance fee is available and all legitimate expenses are fully reimbursed.

The appointments will be made strictly on merit in accordance with the Commissioner for Public Appointments' guidance on appointments to public bodies. Selection will be in accordance with the Government's equal opportunities policies.

If you are interested, further details and an application pack may be downloaded from http://www.defraweb/environment/chemicals/achs/index.htm or obtained from Dr Tom Pickerell, Department for Environment, Food and Rural Affairs, 3/E7, Ashdown House, 123 Victoria St, London SW1E 6DE. Telephone 020 7082 8507 or e-mail achs@defra.gsi.gov.uk

[2519-027 (2005) : 63]
The North West London Hospitals NHS
NHS Trust
NORTH WEST THAMES REGIONAL GENETICS SERVICE
KENNEDY GALTON CENTRE, HARROW

MOLECULAR GENETICS LABORATORY
CPA ACCREDITED LABORATORY

Two posts are available in the Clinical Molecular Genetics Laboratory.

The laboratory is part of an integrated Regional Medical Genetics Department based at the Northwest London Hospitals NHS Trust in Harrow. The laboratory comprises eight Clinical Scientists, five Medical Technical Officers (MTOs) and two Medical Laboratory Assistants (MLAs).

The lab has a major specialist interest in inherited colorectal cancer syndromes and provides specialist services for FAP, HNPCC, MAP as well as a number of rarer inherited cancer syndromes and in addition a range of common genetic disorders including CF, FraX, and haemochromatosis. The laboratory is undergoing expansion and is partway though a significant programme of investment in automation and high-throughput DNA analysis.

Principal Clinical Scientist in Molecular Genetics
Ref: 337 PAT 155
This is a key post in the lab for a state registered Clinical Scientist with a proven track record in molecular genetics service delivery. The post is to head a small team including registered and pre-registration scientist and MTO staff responsible for service delivery for a group of related disorders. The post will include line managerial and supervisory responsibilities and could be an exciting opportunity for an experienced molecular geneticist.

Technical Development Officer in Clinical Molecular Genetics
MTO3: £22,831 p.a. inc. Ref: 337 PAT 154
This is a fixed-term two-year post funded through a program of investment and modernisation in genetics laboratories announced in a recent government White Paper. You will play a key role in introducing robotics and automation for high-throughput genetic analysis to the laboratory.

You will hold a BSc degree in a relevant subject and should have experience of molecular genetic technology and ideally experience with automation, robotic systems and electronic data management.

For informal enquiries, please contact Stewart Payne, email: s.j.payne@imperial.ac.uk or telephone 020 8869 3188.

CYTOGENETICS LABORATORY
CPA ACCREDITED LABORATORY

The Cytogenetics Laboratory is part of the North West Thames Regional Genetics Service. We provide a comprehensive cytogenetics service to NW London, Bedfordshire and Hertfordshire, including Prenatal, Postnatal, Haematological and Molecular Cytogenetics. We are looking for two motivated and enthusiastic clinical cytogeneticists to join our team at Principal grade level. The successful candidates for both posts will be registered with Health Professions Council as a Clinical Scientist in cytogenetics, and have MRCPath Part 1. They will have experience of supervising and training of junior staff. They will be active participants and organisers of the educational activities of the department.

Principal Clinical Cytogeneticist in Constitutional Cytogenetics
Ref: 337PAT169
You will be expected to lead a subsection in the postnatal or prenatal section on a rotational basis with other staff. The successful candidate will be involved in the introduction of new technologies into the laboratory. He/she will have worked in diagnostic cytogenetics laboratory as a clinical scientist for a minimum of three years.

Less experienced clinical scientists who are interested are encouraged to apply and could be considered for a post at a lower grade.

**Principal Clinical Cytogeneticist, Deputy in Haematological Cytogenetics**

(B17-19): £34,227 - £36,881 pa inc.
Ref: 337PAT120

This is a growing section and is currently involved in the development of a centralised lymphoma service in collaboration with the Hammersmith Hospital. The successful candidate will be expected to deputise for the Head of Haematological Cytogenetics section and to aid in the development of the new service. He/she will have worked in leukaemia cytogenetics for a minimum of three years.

For further information, please contact Dr Beverley Bewes (Constitutional post) or Mrs Sarah Ryley (Haematological post) on 020 8869 3107 or Mrs Katie Waters, Head of Cytogenetics Service on 020 8869 3187.

Apply on-line at [www.nwhl.nhs.uk/jobs](http://www.nwhl.nhs.uk/jobs) Alternatively, call 0870 787 6857 to receive an application pack.

Lines are open 8am-7pm Monday to Friday and 9am-2pm on Saturday. Please quote the appropriate reference number.

Please return your completed application form to the Human Resources Department, Northwick Park Hospital, Watford Road, Harrow, Middlesex HA1 3UJ. Closing date for all posts: 28th October 2005.

The NHS is currently implementing a programme of pay modernisation. These posts will join all Trust posts in being evaluated across a national scheme and you will be advised when this happens. Details of this can be found at [www.doh.gov.uk/agendaforchange](http://www.doh.gov.uk/agendaforchange)

The Trust operates a no smoking policy. The Trust is committed to equal opportunities, Investors in People, IWL and offers a range of family friendly policies.

[2519-030 (2005) : 64]
Thames Water Utilities is the UK's largest water and wastewater services company with over 4,000 employees providing service round the clock to 13 million customers.

Increase your influence, expand your impact.

**Principal Scientist - Drinking Water Quality** Reading
Up to £40,000 p.a.
With more than 8 million customers, our Drinking Water Quality team has to address challenges, which are unique in scale and scope. As part of this small but highly influential group, you'll review and interpret the legislative framework surrounding water quality and work to influence the development of regulations and guidelines. As a regulatory, scientific and technical expert, you'll be our representative on external forums and a key adviser on projects such as our proposed new desalination plant.

For this highly visible role, you'll need in-depth knowledge of UK water quality regulations, public health issues and environmental impacts on the water industry. This expertise can only have been gained through a minimum of five years' experience in the water supply sector and a relevant science degree. As an adviser to all parts of the business and working with the Drinking Water Inspectorate and other key stakeholders, including the media and our customers, you'll also need excellent communication skills.

In return you'll receive a range of benefits, including 26 days' holiday, pension scheme and share plan. But more importantly, you'll have the chance to take on a new challenge and make a bigger contribution.

To apply, please send your CV, quoting ref: 2174 to HR Service Centre, Thames Water Recruitment Team, Clearwater Court Ground West, Vastern Road, Reading RG1 8DB or email sharedserviceshr@thameswater.co.uk

Closing date: 28th October 2005.

If you have not had a response by 11th November 2005, please assume that on this occasion your application has been unsuccessful.

Thames Water is an equal opportunities employer.

[2519-031 (2005) : 65]
Institute for Animal Health
The future of animal health is in our hands. And yours.

The Institute for Animal Health operates at the forefront of innovative research into the full spectrum of animal health issues. Joining a 450-strong team backed by a budget of £30 million, you will take our studies forward and contribute significantly to the future of animal health in Britain. We have an opportunity for a bright and enthusiastic individual to join our team in Pirbright, Surrey.

**Modeller**
£22,351 - £25,767 + Benefits • Ref: 05P/2033
You will undertake modelling of the epidemiology of bluetongue, aimed at reducing the risk to UK livestock now and in the future. This will involve participation in: the design and operation of field studies, analysis of data from these studies and, the development of remotely-sensed and weather-driven models, in close collaboration with project modelling teams at IAH and, Oxford and Cambridge Universities.

To join us you will require a PhD in Epidemiology or a related discipline and experience in one or more of the following: GIS-modelling, satellite imagery, statistical analysis, insect vectors, vectors competence, arboviruses. If you have worked as a member of a modelling group, so much the better, and a track record of scientific publishing would be an advantage - but it's your self-motivation, team spirit and ability to innovate that matter most.

Closing date: 14th October 2005

We offer a comprehensive package of benefits and all the scope you need to develop your career at the cutting edge of science.

Further details and an application form are available from: Clare Williams, Human Resources, Institute for Animal Health, Pirbright Laboratory, Ash Road, Pirbright, Surrey GU24 0NF (tel: 01483 232441; e-mail: clare.williams@bbsrc.ac.uk) quoting the appropriate reference. FUGRO GEOS (www.geos.com) is part of the Fugro Group (www.fugro.com) and is one of the world's leading companies specialising in oceanographic and meteorological measurement, assessment and consultancy. The company is based in new purpose-built offices in Wallingford. Fugro GEOS has regional offices in the UK, Singapore, Houston, Norway, the UAE and Malaysia.

FUGRO

Oceanographic Manager
We have an interesting and rare opportunity for an Oceanographic Manager to become a core member of our Measurement and Consultancy Division. The successful individual will contribute towards maintaining and improving the Division's excellent reputation for producing high quality, technically accurate oceanographic measurement reports.

The key focus of this role is efficiently managing the process of producing client reports from receipt of initial data, to overseeing quality control and ensuring thorough and accurate technical content and ultimately production of the reports. To achieve this, you will have a group of 6 technical staff for whom you will have line management responsibility. In addition, the role involves responsibility for the efficient use, and on-going development, of our suite of in-house data processing software.

The ideal candidate will demonstrate the following attributes:
• Educated in marine science with interest/experience in physical oceanographic data analysis.
• At least 5 years experience within the marine sector.
• Familiarity with metocean data review.
• Experienced in client liaison.
• Line management experience and excellent inter-personal skills.
• Exposure to, and awareness of, commercial business practices would be advantageous.

Benefits within our interesting and unusual Company include a competitive salary accompanied by an attractive package including contributory pension scheme, life assurance, private health care, 24 days annual leave, subsidised in-house restaurant and an active sports and social club.

Deadline for all applications is 14th October 2005. In the first instance, please apply with a CV and covering letter to: Mary Smith, Fugro GEOS Ltd, Fugro House, Hithercroft Road, Wallingford, OX10 9RB, or email m.smith@geos.com

This post is UK-based. Only candidates entitled to work in the UK without a work permit should apply.

NO AGENCIES PLEASE
No other company offers the same range of Geotechnical, Survey and Geoscience services.

Editorial Assistant (Ref. BR/EA)
Biology Reports Ltd is looking for an Editorial Assistant to join a friendly team working on its award winning on-line literature review service, Faculty of 1000 Biology (www.f1000biology.com). The successful candidate will be a well-organised and literate graduate in the life sciences who enjoys interacting with people. This position involves editing short pieces in all of Biology for online publication and liaising with top level authors, and would suit someone seeking a career in science publishing. Aptitude is more important than experience as full training will be given. Start date: October-November 2005.

Please send CV and covering letter quoting relevant reference, explaining briefly your interest in the post, when you would be able to start, and stating salary expectations for: Recruitment, Current Science Group, 34-42 Cleveland Street, London W1T 4L8, or by email to: jobs@sciencenow.com Closing date: October 17th 2005.
[2519-035 (2005) : 66]
Bioinformatics Opportunities
Central London

The vision of Cancer Research UK is to conquer cancer through world-class research. We are the world's leading independent organisation dedicated to cancer research, spending £213m a year on cutting-edge research into treating, preventing and curing cancer.

The Bioinformatics and BioStatistics Service provides support to Cancer Research UK-funded scientists primarily in the areas of expression data analysis, sequence analysis, genomics and biostatistics. We are currently looking for two people to join this group.

**Senior Bioinformatics Officer** (Ref: 3616) £29,650 - £36,000 inclusive
You will develop expertise and methods in analysis, statistics, visualisation and data integration for the Bioinformatics and BioStatistics Service support of array-based SNP and genotyping projects across Cancer Research UK.

You should have a higher degree in bioinformatics, statistics, computational biology or computer science; in-depth knowledge of statistical analysis, data visualisation and numerical computation (eg R or MATLAB); the ability to program in a higher-level language; and 5 years' relevant experience. Familiarity with cancer biology, genetics or molecular biology would be advantageous. The post will initially entail a 12-18 month secondment to the Molecular Oncology group at St Barts and The London.

**Bioinformatics Officer** (Ref: 3609) £24,000 - £28,000 inclusive
You will provide microarray data analysis support for CR-UK scientists. The principal responsibility will be to perform expert analysis of microarray data and other high-throughput genomic data, using a wide range of biological and bioinformatic methods and resources.

You should have a degree in a biological science or bioinformatics; in-depth knowledge of molecular biology, genetics and analysis techniques for expression data; and 2 years' relevant experience. Good knowledge of available microarray analysis software would be advantageous.

Both posts will involve working closely with laboratory staff and collaboration with other bioinformaticians so you are expected to have good communication skills.

For further information and to apply online, please visit [https://jobs.cancerresearchuk.org/](https://jobs.cancerresearchuk.org/)
Alternatively to apply, please send two copies of both your CV and covering letter, quoting the appropriate reference, to Resourcing, PO Box 123, London WC2A 3PX or email: recruitment@cancer.org.uk

Closing date: 14th October 2005.

NPL
National Physical Laboratory

Scientific Leader
£35-£50 – Teddington, Middlesex

Radioactivity & Neutron Metrology

NPL is the UK's national standards laboratory. We carry out fundamental research and develop measurement technologies, vital to improving quality of life, trade competitiveness, and protecting the environment.

We are seeking an experienced physicist to lead the research strategy of a team developing measurement methods to support radiation protection, nuclear medicine and environmental monitoring. It is an exciting opportunity to help develop and expand a world-leading team.

As a member of the management team, you would be expected to determine the scientific direction of the work; to mentor, encourage and train members of staff; to contribute to the scientific strategy of NPL; to engender a culture of scientific excellence; and to develop partnerships with industry and universities. You would also propose and carry out your own research, and represent NPL on national and international committees.

A degree plus PhD (or equivalent experience), and a track record in academic or industrial research are essential. Extensive experience of radioactivity metrology, neutron metrology, nuclear physics or a related subject is required.

Full details and on-line application at www.npl.co.uk/recruitment/current or email your CV quoting reference QL/015 to recruitment@npl.co.uk

Closing date: 13th October 2005.
NPL is committed to equal opportunities.
PPD is a leading global provider of discovery and development services, market development expertise and compound partnering programs to biopharmaceutical, medical device, academic and government organisations.

**Biostatistics Manager**  
**Hampshire**

We pride ourselves on the quality of the work we produce and the ability of the staff we employ. We follow through on training and the support of our staff to help meet these goals. This philosophy has helped us build a large portfolio of clients comprising pharmaceutical, biotechnology and medical device companies who value our contribution to their research.

As our Biostatistics department continues to expand we now have an opportunity for a Biostatistics Manager to join us in our office north of Southampton.

You will manage Statisticians and Statistical Programmers so as to deliver all statistical aspects of clinical development from protocol design and statistical analysis plans; through validated programming of analyses and all statistical outputs; to final report. You will represent the Biostatistics department in interactions with clients for both business development support as well as project work discussions.

You should expect to grow your team to support our proven, continuous growth and you will be part of our European Biostatistics management team developing and implementing departmental strategies.

You will need a strong knowledge of Clinical Biostatistics, knowledge and experience of FDA/ICH guidelines, a team orientated approach and strong interpersonal skills to communicate at all levels and with colleagues across multiple functions.

With our growth, scale and reputation for quality, we can offer you a variety of opportunities for a challenging and rewarding career along with a competitive salary and a range of benefits. If you have at least ten years' relevant experience in a clinical trial environment and line management experience then we'd like to hear from you.

To apply, please send us your CV by email to: hr.uk@europe.ppdi.com or alternatively to the Human Resources Department, PPD, Granta Park, Great Abington, Cambridge CB1 6GQ.

For more information on PPD please refer to our website at www.ppdi.com
The Health and Safety Laboratory (HSL) is the UK’s leading health and safety facility with an enviable international reputation for multidisciplinary research and investigation. With a new purpose-built laboratory, excellent scientific facilities and highly qualified staff, HSL has a sound foundation for further growth.

Buxton, Derbyshire

**Senior Explosion Control Scientist**
c.£30,000  Ref: E42

**Explosion Control Scientist**
c.£22,000  Ref: E42

The Explosion Control Section carries out a number of incident investigations in a range of industrial, commercial and domestic environments for both the Health and Safety Executive (HSE) and non-HSE customers. Further increase in our non-HSE industrial customer base has meant that we are looking to expand our team of Explosion Control Scientists. You will concentrate on explosions and hydrogen/alternative fuel related work whilst working alongside some of the most respected and experienced scientists in their field. You will also participate in a range of research projects in this area, often collaborating with other laboratories in Europe and commercial organisations such as oil companies.

You will be expected to contribute both to the experimental and desk based work of the section and provide advice to customers on all aspects of gas and dust explosions.

You will need:
- A good degree, or equivalent, in chemical engineering, physical science or a closely related scientific discipline.
- For the more senior position at least four years’ relevant experience gained in an industrial sector; for the other position relevant postgraduate experience would be an advantage.
- A good understanding of physics and/or chemistry together with experience of applying theory to practical situations.
- Experience of finding practical solutions to experimental challenges.
- Experience of delivering a quality service within specified timescales.

You will also be a team player with excellent verbal and written communication skills at all levels.

**Development Opportunity for a Fire Safety Scientist**
c.£22,000 Ref: E41

The Fire Safety Section provides research and close-up support for both the Health and Safety Executive (HSE) and for non-HSE customers. Due to the expansion of our non-HSE customer base, an interesting and challenging opportunity has arisen for a Fire Safety Scientist to undertake a varied portfolio of work alongside some of the most respected and experienced scientists in their field. You will be expected to contribute to both the experimental and desk-based work of the section and to provide advice to customers on all aspects of fire safety.

You will need:
- A good degree, or equivalent, in chemical engineering, physical science or a closely related scientific discipline.
- To be able to demonstrate a good understanding of the physical and chemical basis of fire and the underlying mathematics of the subject.
- Experience of finding practical solutions to experimental problems and/or skills in computerised data logging/analysis.
- Experience of delivering a quality service within specified timescales. Relevant post graduate experience would be an advantage. You will also be a team player with excellent communication skills at all levels.
As a growing laboratory with a secure and expanding customer base we can offer a first class range of benefits including good support for professional development, the opportunity to publish your work where appropriate, and the choice between an excellent public sector final salary pension scheme or a stakeholder pension.

For an application pack (quoting the appropriate ref) contact Lisa Randall, Personnel Section, Health and Safety Laboratory, Harpur Hill, Buxton, Derbyshire SK17 9JN, tel 01298 218622, email recruitment@hsl.gov.uk or visit our website.

RESEARCH PROJECT SUPPORT

The MRC Virology Unit is seeking to appoint an experienced research assistant to join a team headed by Dr Nigel Stow investigating the mechanisms by which herpesvirus DNAs are replicated and packaged into the virus particle. Initially, the role will involve characterising the structure and function of proteins involved in the packaging of herpes simplex virus DNA.

Experience in protein purification and biochemistry, molecular biology and tissue culture of viruses is required. In addition, the applicant must have experience in the planning and performing of experiments and the recording and interpretation of data.

A degree in an appropriate scientific discipline is essential. Starting salary for this Band 4 post will be £24,746 per annum. Benefits include membership of the MRC Pension Scheme.

Application forms and further particulars are available from Mrs Agnes Simpson, Unit Administrator, MRC Virology Unit, Institute of Virology, Church Street, Glasgow G11 5JR. Tel: 0141 330 4644 (answering service) or email: f.graham@vir.gla.ac.uk

Further information on the Virology Unit can be found on our website: www.vir.gla.ac.uk/staff/mrcresgrp.shtml

Closing date for return of completed applications is 30 September 2005. The Medical Research Council is an Equal Opportunities Employer.

Leading Science for Better Health.

[2519-042 (2005) : 68]
Serology Operations Manager  
based at Addlestone, Surrey

The Veterinary Laboratories Agency is a world leader in the investigation and diagnosis of animal diseases. A vital part of this work is provided by teams working in new purpose built facilities at the VLA Weybridge. As part of this team you will be leading a group of scientists carrying out a large portfolio of serological tests from a range of animal species. We are looking for a dynamic person who would like to be responsible for day to day testing operations and be pro-active in the introduction of new tests and laboratory technology. The workgroup has UKAS accreditation and you would have a major role in ensuring this accreditation is maintained. Applicants must have a Science degree, experience of managing a laboratory team and knowledge of serological tests.

This is a permanent, full-time post in Pay Band D £22,300 - £32,100 per annum. The Civil Service offers a choice of final salary and stakeholder pensions, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working and annual pay reviews.

Applications are welcome from all sections of the community irrespective of race, ethnicity, religious beliefs, marital status, gender, sexual orientation, disability or age.

An Executive Agency of the Department for Environment, Food and Rural Affairs.

Veterinary Laboratories Agency  
Further details and an application form can be obtained from the VLA website www.vla.gov.uk or by writing to: Personnel (JAJ), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting reference ADP 3511.

The closing date for receiving completed application forms is 14 October 2005.

[2519-043 (2005) : 69]
CAMBio
Centre of Applied Marine Biotechnology
Letterkenny Institute of Technology
Institiuid Telcneolaiochta Leitir Ceanainn

A multidisciplinary research team at Letterkenny Institute of Technology, Ireland have successfully secured funding from Enterprise Ireland to develop a new Centre of Applied Marine Biotechnology and undertake research on three projects: (1) Identification of bivalve larvae using fluorescence in-situ hybridisation (FISH) techniques, (2) Development of high-value products from crustacean processing waste and (3) Development of multiplex real-time PCR techniques for the detection of Listeria, Salmonella and E. coli in marine products. Applicants with suitable qualifications and experience in biotechnology, microbiology, molecular biology, biochemistry or a closely related subject are invited to apply for the following positions to join the CAMBio research team.

**Senior Postdoctoral Researcher** (3 year)
**Postdoctoral Researcher A** (2 year)
**Postdoctoral Researcher B** (2 year)
**Research Technician** (2.5 year)

The track record and calibre of the person to be appointed as Senior Postdoctoral Researcher is critical to the future development of the Centre of Applied Marine Biotechnology. This person will undertake research on one of the above projects with support from the research technician and serve as overall Project Manager responsible for the other two research projects. Salary for the Senior Postdoctoral Researcher will commence at €45,000 per annum rising to €53,000 per annum in year 3, salaries for the two Postdoctoral Researcher posts will be €35,000 per annum and for the Research Technician post €26,500 per annum.

Closing date for applications October 14th 2005. Starting date from 1st December 2005.

Further details on these vacancies and research projects are available at [www.cambio.ie](http://www.cambio.ie)

Applicants should forward their completed Application Form available from the Human Resources Section, their Curriculum Vitae and List of Publications, together with not more than three selected reprints of their recent work to:

CyBio

Technical Sales Specialist
South East UK

CyBio, a successful biotechnology firm, develops, produces and markets technology platforms for drug discovery. Our portfolio covers a broad range of instrumentation including liquid handling, incubation and imaging readers. The Northern European operation is seeking a Technical Sales Specialist to cover the South East and London.

Main Responsibilities include:
• Develop an in depth understanding of the applications related to CyBio products
• Give compelling technical and scientific demonstrations and presentations
• Introduce product portfolio to new and existing customers and work closely with clients in key projects.

Qualifications:
• Minimum of BSc 2.2 in life sciences.
• Experience in liquid handling, cell biology, use of luminescence and fluorescence based assays is advantageous
• Must have excellent communication and presentation skills
• Working knowledge of applications deployed in pharmaceutical R&D is advantage but not essential
• Must be based in South east and be wiling to travel in UK and Europe
• Sales experience an advantage but not essential as we are seeking hard working, individuals who can develop an understanding of client needs

This is a challenging and rewarding role and in return we offer a competitive package including company car and pension.

Please send your CV and covering letter to:
HR Administrator, CyBio Northern Europe Ltd., 8 James Whatman Court, Turkey Mill, Ashford Road, Maidstone, Kent ME14 5SS.

Feed your ambition

At the Food Standards Agency Scotland, we're building a reputation as Scotland's most reliable source of advice and information about food safety and standards. And our Science Branch has been key to achieving this, taking responsibility for commissioning research, collaborating with other professional organisations, and providing timely and impartial advice.

**Scientific Adviser - Food Safety**
£22,150 pay award pending Aberdeen

A confident team player, you will provide scientific advice on food safety and food-borne illness, with particular emphasis on microbiology and natural toxins. You'll ensure that policy development colleagues receive expert support by managing research and surveillance projects. The role will also involve drafting briefings for Scottish ministers, preparing policy papers and advising members of the public.

Your honours degree in microbiology or a related biological science will be complemented by an up-to-date understanding of food safety issues.

Analytical and organised in your approach, you will have the ability to manage numerous projects simultaneously and summarise complex information concisely and accurately. You will also bring strong relationship-building and drafting skills.

For an application pack, please contact the Food Standards Agency Recruitment Team on 020 7276 8197 (24 hour answerphone) or email: recruitment@foodstandards.gsi.gov.uk quoting reference 10242.

Completed applications must be returned by 20th October 2005.

Further information can be found on our website: [www.food.gov.uk](http://www.food.gov.uk)

The Food Standards Agency is an equal opportunities employer and we are committed to recruit a more diverse workforce that reflects the people we serve. We operate a Guaranteed Interview Scheme for people with disabilities who meet the minimum published criteria.

PHARMACEUTICAL FORMULATION SCIENTISTS
LOCATION: MIDLANDS
£NEGOTIABLE + EXCELLENT PACKAGE

pSivida is a global nanotechnology company with their key focus on the development and commercialisation of a novel biomaterial for drug delivery and other applications in healthcare.

pSivida has openings for pharmaceutical scientists to undertake research and development of new pharmaceutical formulations. You will also be involved in the physical and chemical testing of liquid and semi-solid formulations for controlled release, targeted delivery and enhanced solubility. A strong background in physical and analytical chemistry with laboratory research and industrial formulation experience is a pre-requisite.

Experience in pharmaceutical pre-formulation and formulation development of therapeutic compounds, as well as experience in developing novel drug delivery systems would also be highly desirable.

These are hands-on positions requiring someone who can simply get things done in a structured and timely manner. You will need to be positive, organised and enthusiastic with the desire to drive the science of formulation forward to develop challenging compounds into dosage forms.

pSivida will offer you the opportunity to develop your skills and career potential in an open and progressive culture where your contribution can be recognised.

HMR
Hammersmith Medicines Research requires a
Clinical Project Manager and a Medical Writer

We are one of Europe's largest Contract Research Organisations specialising in clinical pharmacology studies in healthy subjects and patients. We have 70 beds, and laboratories and offices, in attractive, newly-equipped and self-contained premises within an NHS hospital.

The Clinical Project Manager will provide scientific and managerial input into our clinical teams, and liaise with pharmaceutical companies, other research laboratories and hospital departments.

The Medical Writer will prepare reports and other study documents to match the best medical and scientific journals in terms of clarity and standard of presentation.

There will be plenty of opportunity to develop new skills and to pursue a career in our young and dynamic company. You will work alongside experts in data management, statistics, clinical pharmacology, and pharmacokinetics.

Candidates should have a background in a life science, chemistry, pharmacology, or medicine, and excellent writing skills. An understanding of clinical trials, including basic statistics, would be a distinct advantage; attention to detail and proficiency in word processing are essential.

THE QUEEN'S AWARDS FOR ENTERPRISE: INTERNATIONAL TRADE 2002
[2519-056 (2005) : 71]
MRC National Institute for Medical Research

**Animal Facility (Operations) Manager**
Biological Services Division

Applications are invited for the post of Animal Facility (Operations) Manager in the Biological Services Division of the MRC's National Institute for Medical Research. The Division provides an integrated laboratory animal and technical resource to the NIMR, managing several multidisciplinary animal facilities that include the breeding and supply of SPF rats and mice, housing of animals in containment levels II, III and IV, maintenance of several aquatic species and the production of genetically altered rodents and associated techniques.

As the Animal Facility Manager the successful candidate will be responsible for managing the day-to-day operations of the facility to ensure the provision of a fully effective, efficient and cost-effective laboratory animal science resource. This will involve technical and financial management and provision of support for Biological Services relating to personnel, safety and training issues. Contribution to the subcommittees of the Institute's Ethical Review Process and knowledge of the statutory framework within which the Division operates are an important part of the post holder's tasks.

Reporting to the Head of Division the successful candidate will be educated to degree level or hold a fellowship of the Institute of Animal Technology or equivalent. Experience in facility, staff and financial management and knowledge of the Animals (Scientific Procedures) Act 1986 are essential.

Prospective applicants are encouraged to contact Dr Kathleen Mathers, tel: 020 8816 2608; email: kmather@nimr.mrc.ac.uk

The salary range for this MRC Band 3 position is from £35,972 to £43,715 inclusive of Location Allowance. MRC final salary Pension Scheme available.

An application form and full job description can be downloaded from the Institute web site at: www.nimr.mrc.ac.uk/jobs Alternatively, call 020 8816 2530, or write to the Personnel Office, National Institute for Medical Research, The Ridgeway, Mill Hill, London NW7 1AA, quoting reference ABSA/0160

The closing date for completed applications is 14th October 2005.

Norbrook VACANCY

**SITE TECHNICAL MANAGERS (REF: TD 2340905)**

He/she will be experienced in facility design, manufacturing, quality control/assurance and worldwide regulatory requirements for active ingredient and finished pharmaceutical product manufacture. Considerable experience participating in inspections and the maintenance of professional relationships for site inspections particularly with the UK Medicines Inspectorate, the US Food and Drug Administration and toll-manufacturing customers is essential.

Reporting to the Company's Director of Environmental and Regulatory Compliance (Production) and located at our factory sites in Newry, the successful candidates will have a minimum of 5 years experience at Management level. Candidates should possess a degree in either of the following: Chemistry, Biological Science or Pharmacy. Previous experience in the Pharmaceutical or fine chemical, QA or Technical field would be advantageous.

If you are interested in the above position and consider you have the necessary qualifications and experience, please telephone or write for an application form to: The Human Resources Department, Norbrook Laboratories Limited, Station Works, Newry BT35 6JP.
Tel: (028) 3026 4435. E-mail: human.resources@norbrook.co.uk

Application forms can be downloaded from the jobs section of our website on www.norbrook.co.uk

The closing date for receipt of completed application forms is Friday 21st October 2005.

THE QUEEN’S AWARDS FOR ENTERPRISE
INTERNATIONAL TRADE 2002
[2519-058 (2005) : 72]
For our client, one of the world's leading and most successful agribusiness companies with its headquarters in the German part of Switzerland, we are seeking a

**Head Insect Control Research**

In this position you will manage a group of approx. 35 academic and technical staff with the objective to conduct and manage global research biology programs in international project teams in the field of insecticides. Thereby, new products are profiled with sophisticated screens at an early stage and supported with scientific expertise at a later stage. As a global enterprise, you will lead and manage research biology programs jointly with research, development and marketing. The position entails all phases from new molecules/formulations through field testing, product development to support for range products.

This challenging position requires a university degree in natural sciences such as a PhD in biology, zoology, agronomy or similar.
A sound knowledge of agronomy and crop protection chemicals is advantageous. Additional know-how in plant pathology would also be an asset.

The ideal candidate will have evidence of effective leadership and has led projects to success. He or she will be capable of networking with experts in diverse disciplines across multiple sites and has highly developed interpersonal communication skills.
Fluency in English is a must, German is highly desirable. The challenges of agricultural research ask for openness to new research paradigms.

If you feel attracted by this position, please send your application with CV and letters of reference to:

Job ref 214007 Closing date 20 October 2005
Clinical Trial Associate
You will undertake all aspects of study monitoring and some elements of data management for multi-centre randomised trials in oncology and cardiovascular disease. You will work closely with trial coordinators, collaborators, including pharmaceutical companies where applicable and be required to travel within UK and Ireland (some overnight stays may be required). Additional duties may be set within the trial co-ordination section in the event of a temporary reduction in the workload of the Clinical Trials Associate.

You should have at least a science degree or equivalent relevant qualification, e.g. nursing or considerable relevant experience (e.g. monitoring, trial data management or trial co-ordination). Knowledge of clinical trials and ICH GCP, preferably gained from a background as a Clinical Research Associate or Data Manager is essential along with excellent organisation, communication and IT skills. You should be reliable and work with attention to detail. You will be required to visit participating centres on a regular basis and therefore a current, valid driving licence is essential. Job ref 033001

University Grade 6 (£19,645 - £24,161 p.a. pay award pending) depending on qualifications and experience

Appointments will normally be made below the gateway. Progression beyond the gateway will be available dependent on the role holder meeting the requirements and developing within the role

Informal enquiries to Vicky Napp tel 0113 343 1496
Application packs from Catriona Healy tel 0113 343 1477 email c.healy@leeds.ac.uk

Closing date 20 October 2005

Trial Co-ordinator
The Clinical Trials Research Unit (CTRU) invites applications from individuals to join our team and take responsibility for the data management and co-ordination of specific clinical trials. This will involve the collection, computerisation and validation of data, and participation in meetings with researchers.

Applicants should have at least a science degree or equivalent relevant qualification, e.g. nursing or relevant experience of data management. For the position, the following qualities are important: attention to detail, organisation, communication and interpersonal skills, computer experience and reliability. Job ref 023006

University Grade 5 (£16,452 - £19,073 p.a. pay award pending) depending on qualifications and experience

Informal enquiries to Vicky Napp tel 0113 343 1496

WORKING TOWARDS EQUALITY AND DIVERSITY
UNIVERSITY OF LEEDS
[2519-060 (2005) : 73]
Disce Doce
RERUM COGNOSCERE CAUSAS
The University of Sheffield
The Achievement Of Excellence.

Academic Unit of Radiology.
Division of Clinical Sciences South
Research Assistant / Associate
£19,480 per annum Ref. R3752
The post holder will be familiar with Magnetic Resonance Imaging (MRI) hardware and software including imaging sequence design. Knowledge of electronics is desirable although not essential. Experience in data management and understanding principles of programming in languages such as C, MATLAB and LabView are advantageous. Candidates should hold or be working towards a PhD in Physics or Electronics Engineering. The post is available immediately until 30 September 2007.

Department of Animal and Plant Sciences
Contract Research Technician
£16,946 per annum Ref. S5845
The post holder will work with Prof Roger Butlin to investigate the evolution of smell and taste genes during speciation in Drosophila flies. This is part of a NERC-funded project with partners in St Andrews and London. The Sheffield component primarily involves PCR amplification and DNA sequencing. Applicants should have as a minimum qualification a HNC/HBTEC, in Biology or a related subject and must have a good grounding in molecular genetics laboratory techniques, preferably in an evolutionary biology context, and the ability to work independently but also to collaborate in a larger team. The post is available for 1 year initially, renewable up to a maximum of 30 months, subject to confirmation of funding.

Genomic Core Facility, Division of Genomic Medicine
Genomic Core Facility Technician
£13,953 -£16,071 per annum Ref. S5839
The post holder will perform genotyping and Real Time PCR reactions utilizing various technologies including TaqMan. Applicants should have at least one year professional experience in a molecular biology laboratory. This post is available from September 2005 and is tenable until September 2006, with the possibility of renewal, subject to confirmation of funding.

Closing Date for all posts: 14 October 2005

Committed to equality through diversity.

[2519-061 (2005) : 74]
Research Associates

Applications are invited for the following postdoctoral positions:
Ref: VBS/150/05

A postdoctoral researcher is required to work on an EU-funded project for up to three years. The project will investigate the influence of environmental parameters on the development of the musculoskeletal system in various fish species. It is part of a larger project within Europe, which is aimed at reducing malformations in farmed fish species. Applicants should hold a PhD in a relevant subject area. Experience in development and growth (especially of the muscles), and of molecular biology and histology techniques, would be an advantage. The post is offered for up to three years.

Ref: VBS/151/05
A postdoctoral researcher is required to work on a BBSRC-funded project which will investigate the 'Effects of the pre-hatch environment on musculoskeletal development in the chicken, and the consequences for post-hatch growth and welfare'. The project forms part of a larger collaborative research programme on animal welfare. Applicants should hold a PhD in a relevant subject area. Experience in avian development and growth (especially of the musculoskeletal system), molecular biology and histological analysis would be an advantage. The post is initially offered for three years but may be renewed for a further two years, subject to continuation of funding and satisfactory progress having been made.

The salary for both posts will be in the range £24,423 - £26,486. The successful candidates will be based at the College's Camden Campus in London, but there will be a requirement to undertake some work at our Hawkshead Campus near Potters Bar in Hertfordshire, in the latter stages of the second project.

To make informal enquiries about either position, please contact Professor Neil Stickland on 020 7468 1200, or email: nstickland@rvc.ac.uk

For application packs, please contact: Helen Stradling, HR Administrator, The Royal Veterinary College, Royal College Street, London NW1 0TU. Alternatively, please call 020 7468 5265, email: hstradling@rvc.ac.uk or download an application pack from: www.rvc.ac.uk/jobs/vacancies Please quote the relevant job reference on all correspondence.

Closing date: 14th October 2005 (5pm).

We are committed to Equality of Opportunity and welcome applications from ethnic minority and disabled members of the community.

Medicine, Biomedical Sciences, Health and Social Care Sciences
St George’s
University of London
Faculty of Health and Social Care Sciences

Senior Research Fellow Ref:612/05
Health and Social Care Sciences (Rehabilitation)
(Fixed term for 2 years in the first instance)

We are seeking to recruit an established researcher with a track record of publication in health and social care sciences, and experience of applied health research, to undertake research on rehabilitation.

The Faculty is developing a programme of research into the rehabilitation of patients with chronic conditions, such as Chronic Obstructive Pulmonary Disease, and malignancies such as breast cancer. Of particular interest is the integration of different approaches to our understanding of the effects of exercise in patients with chronic conditions and malignancy, and the measurement of physiological, psychological and immunological outcomes. The postholder will work closely with the relevant units in St George’s Healthcare NHS Trust and surrounding Primary Care Trusts. The post would suit a health professional with experience in health services research and an interest in rehabilitation.

The starting salary will be in the range £29,439 - £38,206 per annum inclusive (depending on skills and experience).

If you wish to discuss the post please contact Dr Andy Jewell, email: ajewell@hscs.sgul.ac.uk or Dr Rachel Garrod, tel: 020 8725 0377 or email: rgarrod@hscs.sgul.ac.uk

For further information, visit http://www.sgul.ac.uk/ or contact the Personnel Office on 020 8725 5020 (24 hour answerphone) or email: personnel@sgul.ac.uk

Closing date: 14 October 2005.
Please quote reference 612/05.

[2519-065 (2005) : 75]
The FMRIB Analysis Group is a large, dynamic group of engineers, mathematicians and programmers, generating new research and software for use in analysis of brain imaging data from structural and functional MRI. We require a postdoctoral researcher to carry out research in mathematical modelling of functional MRI data, in the areas of timeseries analysis, spatial processes, independent component analysis and Bayesian methods. This research will form part of an ongoing project to fuse model-based methods with model-free (such as ICA) approaches in order to better understand the ricin spatiotemporal signal and noise processes in FMRI data.

The successful applicant will have a first and a higher (e.g. doctoral) degree in a relevant engineering-oriented subject, with strong research and programming experience. The post is to start in November or December 2005, and will run initially for 3 years, with the possibility of extension. The starting salary will be in the range £27,116-£30,363 p.a. (University Grade RS2 II), however less experienced scientists will also be considered and if successful will be appointed on University Grade RS1(A) (starting salary £20,540 - £25,699 p.a.).

Further particulars are available from the Departmental website www.clneuro.ox.ac.uk For more information regarding the FMRIB Analysis Group's research see www.fmrib.ox.ac.uk/analysis Applications, including a CV and details of three referees who may be contacted prior to interview, should be sent to Mrs Marilyn Goulding, FMRIB Centre, John Radcliffe Hospital, Headley Way, Oxford OX3 9DU, fax: (01865) 222717, e-mail: marilyn@fmrib.ox.ac.uk quoting HM-05-009. The closing date for applications is 21st October 2005.

Department of Chemistry
Centre for High Throughput Materials Discovery

**Research Fellowship**

£25,633 - £29,715 pa (under review)

As a result of £8.3M of recent funding, we are launching a new Research Centre in the area of accelerated materials discovery. This Centre will focus on the use of automated techniques for the discovery of materials with novel properties for a broad range of applications. You will carry out research, training, and teaching in the Centre and you should have a strong publication record in a relevant area of materials chemistry such as synthesis/materials characterisation. Experience with automated methods would be advantageous. The post is available for three years initially.

Informal enquiries to Professor Andrew Cooper, Director on +44 (0) 151 794 3548, email: aicooper@liv.ac.uk

Quote Ref: B/593/NS  Closing Date: 24 October 2005

School of Biological Sciences

**Technician Grade D**

£16,452 - £19,073 pa (under review)

To support an ongoing project investigating the role that Shigatoxin-encoding bacteriophages play in the spread of zoonotic disease. This project is part of a larger DEFRA/HEFCE funded multidisciplinary programme investigating food borne pathogens in farm environments. You should have a minimum of seven years' relevant experience and be qualified to BTEC Higher level or equivalent. Applications from graduates in microbiology or a related discipline will be welcome.

The post is available for three years in the first instance. The project will involve some field-work but the successful candidate will be primarily responsible for laboratory-based analysis of bacteriophage epidemiology.

Quote Ref: B/592/NS  Closing Date: 14 October 2005

Further particulars and details of the application procedure should be requested from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on +44 (0) 151 794 2210 (24 hr answerphone), via email: jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html
The Department of Chemistry invites applications for a probationary (tenure-track) position at the rank of Assistant Professor with an anticipated start date of July 1, 2006. Candidates with an excellent research background in computational or theoretical studies in any area of chemistry will be considered. The successful candidate will be expected to establish an independent, externally funded research program, and to develop and teach innovative courses in chemistry at the undergraduate and graduate levels. The Department of Chemistry (www.uwo.ca/chem) is a large research intensive department with strong programs in many areas of chemistry and with good interdisciplinary links to research groups in other departments in the Faculties of Science, Engineering and Medicine and Dentistry.

Interested candidates should send their curriculum vitae, names of three referees along with a description of research accomplishments, and a 5 page research proposal with an appropriate budget to:
Dr. K. M. Baines, Chair
Department of Chemistry
The University of Western Ontario
London, Ontario, Canada N6A SB7 (kbaines2@uwo.ca)

The deadline for applications is December 1, 2005.

Position is subject to budget approval. Applicants should have fluent written and oral communication skills in English. All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority. The University of Western Ontario is committed to employment equity and welcomes applications from all qualified women and men, including visible minorities, aboriginal people and persons with disabilities.

[2519-068 (2005) : 76]
Bournemouth University

Research Officer in Motion Capture
£18,777 - £28,360 per annum

The National Centre for Computer Animation (NCCA) within the Bournemouth Media School is seeking a Research Officer to develop software for the Centre's motion capture facility.

With a first degree in a related topic and a Masters degree in Computer Animation, you possess strong programming and mathematic skills, knowledge of 3D computer graphics and a sound knowledge of a computer animation system. Experience of motion capture is desirable. You will be part of a team helping to develop the School's research and knowledge transfer agenda.

The NCCA was awarded a 5 in the last RAE, thus achieving the highest Computer Animation research grade in the UK.

This post is available as a three year fixed-term contract in the first instance.

BOURNEMOUTH UNIVERSITY

[2519-070 (2005) : 76]
6 Postdoctoral Positions in Materials Chemistry
£25,633 - £29,715 pa (under review)

Positions are available in inorganic, organic and hybrid materials synthesis and characterisation. Specific areas of interest are: physics of new electronic and magnetic materials; oxide film growth by pulsed laser deposition; ionic (oxide and proton) and mixed conducting materials; synthesis of new fulleride materials; synthetic oxide chemistry; high pressure synthesis; polymer synthesis; surfactants; chemometrics; organic synthesis; supercritical fluids; nanoparticles and colloids as "building blocks" for higher-order structures; metal-organic and inorganic nanoporous materials. It should be noted that applications from well-qualified candidates with interests in other areas are also encouraged. A PhD in chemistry, materials science or physics and an excellent publication record are essential, with skills in the specific areas identified above desirable. The appointments will be for one year in the first instance with possible extension of up to two years.

Quote Ref: B/582/NS   Closing Date: 21 October 2005

Further particulars and details of the application procedure should be requested from the Director of Personnel, The University of Liverpool, Liverpool L69 3BX on 0151 794 2210 (24 hr answerphone), via email; jobs@liv.ac.uk or are available online at http://www.liv.ac.uk/university/jobs.html

COMMITTED TO EQUAL OPPORTUNITIES
[2519-071 (2005) : 76]
Due to the impending retirement of the current postholder, we are seeking to appoint a Head of the School of Pharmacy and Chemistry (previously Chemical and Pharmaceutical Science). Applications are welcome from those whose academic focus is in chemistry and/or pharmacy. The School has an excellent track record in both teaching and research with popular undergraduate and taught postgraduate programmes and a large and growing number of PhD students. Major research groups within the School include pharmacy, pharmaceutical science, materials and analytical chemistry.

You will be an innovative, enthusiastic and inspirational academic leader with a proven track record in teaching and research. You will be required to develop and grow all the various cognate disciplines within the School, this will include overseeing and facilitating the success of the Department of Pharmacy which resides within the School and working closely with its Head.

The title of Professor may be awarded to a suitably qualified individual.

For an informal discussion please contact the Dean of Science, David Mackintosh, on 020 8547 7424/7421 or email d.mackintosh@kingston.ac.uk

For further information or to download an application pack visit our website www.kingston.ac.uk/jobs or alternatively call the recruitment line on 020 8547 7153 quoting reference 05/282. If you are a minicom user, please phone 020 8547 7169.

Closing date: 12 noon on 14th October 2005.

Interview date: 2nd November 2005.

embracing diversity - committed to equality
Kingston University London
www.kingston.ac.uk
[2519-072 (2005) : 77]
We are looking to appoint a research assistant to work on a joint project between several departments in Oxford University and GE Healthcare looking at opportunities to improve the quality of Colorectal Cancer (CRC) patient management by developing an integrated approach to staging, treatment and response monitoring of the disease using a combination of MR imaging and genomic profiling.

The successful candidate will have a higher degree, preferably a doctorate in a relevant subject such as computing science, engineering science, physics, mathematics or a suitable aspect of biology. Experience of designing and implementing computer-based systems in a modern computing environment (eg Matlab, C++) under Linux/Windows, ideally to support decision making, is essential. Experience of conducting user-requirements specifications, knowledge of artificial intelligence techniques to support decision making and the ability to work as part of a team are desirable. A demonstrated ability to write clear, correct and concise English and a willingness to contribute to the supervision of graduate students and an undergraduate project would also be beneficial. The starting salary will be in the RA1A scale £19,460 - £21,640 p.a. (national pay award pending).

Further particulars may be obtained from Mr C J Scoucher, The Senior Administrator, University of Oxford, Department of Engineering Science, Parks Road, Oxford OX1 3PJ; or to administrator@eng.ox.ac.uk to whom written applications should be made enclosing a curriculum vitae and the names and addresses of two referees. Please quote DF05060 in all correspondence. The closing date for applications is 20th October 2005.

The University is an Equal Opportunities Employer.

[2519-073 (2005) : 77]
The Institute of Cancer Therapeutics (ICT) at UoB wishes to appoint a key position to facilitate its core activity in cancer medicines discovery; from concept to clinic. This post is funded through Yorkshire Cancer Research who have agreed to support this major initiative at the ICT. The Institute already enjoys significant Cancer Research UK funding and both charities will be working together to facilitate this programme.

**Reader/Senior Lectureship in Medicinal Chemistry**

£38,772 - £43,638 per annum (up to a max of £46,296 per annum for Readers)

Ref: ACRU0310/NS

To oversee and add significantly to the medicinal chemistry capability of the ICT. You should have at least 6 years’ postdoctoral experience in organic synthetic chemistry and already have a significant track record in the design and synthesis of potential therapeutic agents or probes as judged by publications and significant grant success. You should already show innovation with respect to development of therapeutic molecules and/or routes to their synthesis.

How to apply: jobs@bradford.ac.uk, tel: 01274 233091 (minicom: 01274 235807). For more information see www.bradford.ac.uk/jobs

INVESTOR IN PEOPLE

Applications submitted by agencies will not be considered.
The UCL National Translational Cancer Research Network (NTRAC) Centre is closely involved in the
dynamic process of developing and maintaining the standards of GCP in translational research and
works closely with regulatory and advisory bodies to define quality criteria for novel therapeutic and
diagnostic agents, laboratory and imaging investigations and trial designs.

Applications are invited for the post of NTRAC GCP Compliance Officer who will assist the Quality
Assurance Manager and work with the clinical trial staff on all three sites of the UCL NTRAC Centre
to maintain GCP standards. These standards are required for compliance with the Clinical Trials

The post, funded for 1 year in the first instance, is on the AR2 grade. Salary: £23,182 - £30,003 plus
London Allowance £2,400 per annum (according to experience).

For application details please contact Dr Helen MacColl, on 020 7472 6576, or email:

h.maccoll@medsch.ucl.ac.uk.

For informal enquiries please contact Ms Lisa Smith, NTRAC QA Manager on 020 7472 6783.

Closing date: 21st October 2005.

UCL Taking Action For Equality

[2519-075 (2005) : 77]
University Lecturership/Tutorial Fellowship in Orthopaedic Biomechanics

Applications are invited for the above post, tenable from 1st March 2006, or as soon as possible thereafter. Candidates should be able to teach a range of topics in Mechanical and Biomedical Engineering within a 4-year Engineering Science syllabus, and have research interests in orthopaedic biomechanics. The Lecturership is associated with a Tutorial Fellowship at St Hilda's College or Wadham College. If the appointee is a man he will be elected a Fellow of Wadham; the statutes of St Hilda's College permit the appointment only of women fellows, so if a woman is appointed, she will be offered the choice of accepting a fellowship at either Wadham College or at St Hilda's College. The combined University and College salary will be according to age on a scale up to £45,707 p.a. (under review), plus other benefits.

Application procedures, and the duties and benefits attached to both the University and College appointments, are at www.eng.ox.ac.uk where other information about the Department of Engineering Science will also be found.

Applications should be sent to Professor R C Darton, FREng, Head of Department, Department of Engineering Science, University of Oxford, Parks Road, Oxford OX1 3PJ, fax: (01865) 283310, e-mail: head@eng.ox.ac.uk including a plan for proposed research and the names and addresses of three referees, to arrive no later than 4th November 2005. Please quote Ref. No. DF/05/067 in all correspondence.

[2519-078 (2005) : 78]
The University is seeking to appoint the inaugural Director of The James Martin 21st Century School.

The School is a major new enterprise funded from a multi-million pound benefaction by the computing pioneer, James Martin. The aim of the School is to be at the forefront of research to find solutions to the most pressing problems facing the 21st century.

These problems include global climate change, demographic shifts, extreme inequalities in wealth across countries and continents, the risk of infectious disease epidemics, new disruptive technologies, and the effects of rapid technological change.

We are looking for a dynamic individual who has the energy and the visionary ability to be able to inspire and lead a unique research initiative engaging with Institutes, departments and individuals across the University.

The individual will be able to interact with world opinion-formers, will have an ability to raise further substantial funds, will have a track record of successful leadership, and will have a good media presence.

The post is established at the most senior level for academic-related staff in the University (ALC6). Salary will be internationally competitive.

Further particulars, including details of how to apply, are available from http://www.admin.ox.ac.uk/fp/ or from the Registrar, University Offices, Wellington Square, Oxford OX1 2JD. The closing date for applications is 14th November 2005.

As an Equal Opportunity employer, we positively encourage applications from people of all backgrounds.

[2519-079 (2005) : 78]
MSs IN SCIENCE
Build on your BSc with a Masters Degree in Science from The Open University. Our MSc in Science enables you to explore broad scientific topics at postgraduate level, while still pursuing your career.

The two main themes are Science Studies and Frontiers in Medical Science, with courses including Science and the Public and Issues in Brain and Behaviour - see our website for a full list of courses. Our taught programme includes study of some of contemporary science's most pressing issues and develops the full range of skills associated with master's level study.

• Study wherever and whenever you like
• Flexible, modular programme
• Project work - no examinations

Courses start in February 2006, so apply now to secure your place.

**CBRN**
Science & Technology Review Conference
Improving CBRN response through Science & Technology

Call for Delegates 02 December 2005, London

Following last year’s successful initial call for proposals we will be holding a one-day conference in December in Central London in order to inform on progress of the Government’s civilian CBRN science and technology programme and to outline possible future research directions.

The focus will be on research and development aimed at improving UK resilience to incidents involving chemical, biological, radiological and nuclear (CBRN) materials. The emphasis remains on improving the civilian response including the emergency services, local authorities and others involved in management, and recovery from a major CBRN incident. The programme covers a broad range of disciplines across the physical, life and behavioural sciences.

To register your interest in this event, please visit: [www.cbrn-scienceandtechnology.co.uk](http://www.cbrn-scienceandtechnology.co.uk) to obtain registration details.

Numbers are limited, so early application is recommended.

Home Office
BUILDING A SAFE, JUST AND TOLERANT SOCIETY
[2524-001 (2005) : 16]
A well-funded drug discovery company, we are using our proprietary ion channel capabilities to develop a pipeline of ion channel drugs molecules across a number of indications - focusing on the cardiovascular, neurology and metabolic disease areas. We now seek people who would thrive on the challenges and opportunities of working in an underexploited, but expanding, area of drug discovery as key members of a company with very ambitious plans.

**Senior Electrophysiologist**
You will manage and co-ordinate a small group of electrophysiologists to build an effective assay group and will be involved in the design and building of drug discovery programs focused on ion channels. There are opportunities to manage programs, develop and implement a drug discovery strategy in a multidisciplinary environment.

A PhD with several years' postdoctoral experience, preferably in industry you will have good electrophysiology skills and, preferably a background in a cardiovascular, endocrine or CNS area. Comfortable working independently and co-ordinating with a multidisciplinary team, you will have excellent scientific ability and communication skills. Experience with automation of electrophysiology would be useful.

Please email your CV with a covering letter to john.ford@xentioon.com, using "Xention Biologists" in the subject line. Closing date: November 18th 2005.
Medicinal Chemists
You will design and synthesize small molecule ion channel ligands, working in a multidisciplinary environment interacting with scientists from other disciplines.

You will have a minimum of two years' post-graduate or postdoctoral medicinal chemistry experience gained in an industrial or academic laboratory. Familiar with modern drug discovery techniques, you will have practical experience of a wide range of synthesis, purification and analysis techniques as well as excellent communication skills and scientific creativity. Experience of ion channel medicinal chemistry would be an advantage.

Please send your CV and a covering letter to david.madge@xention.com using "Xention Chemists" in the subject line. Closing date: November 18th 2005.

www.xention.com

LIONEL HITCHEN (Essential Oils) LIMITED

Lionel Hitchen (Essential Oils) Limited, a leading supplier to the food, beverage, flavour and fragrance industries is actively seeking the following of its premises in Barton Stacey near Winchester.

**Analytical Chemist**
The successful candidate will be required to assist in the running of the Company's instrumental/chromatography laboratory and routine analysis of samples.

Candidates who have a degree in chemistry or equivalent and have an good knowledge of chemistry and analytical instrumentation are invited to apply. Previous experience working in Flavour or related industries would be an advantage.

**Quality Control Chemist**
The successful candidate will be required to assist in the routine analysis of raw materials and finished goods.

Candidates who have a degree in chemistry or equivalent and have good knowledge of chemistry and laboratory procedures are invited to apply. Previous experience working in Flavour or related industries would be an advantage.

**Quality Assurance Chemist**
The successful candidate, reporting to the Quality Assurance Manager will be responsible for the maintenance of the quality standards and the investigation of technical production issues and customer complaints.

Candidates who have a degree in Chemistry or equivalent and are computer literate and have knowledge of analytical techniques are invited to apply. Previous Technical/ Production experience working in Flavour or related industries would be an advantage.

Attractive salary packages are available for the right candidates.

Please apply in writing with full CV to: Mike Tyrrell, Technical Director, Lionel Hitchen (Essential Oils) Limited, Gravel Lane, Barton Stacey, Winchester, Hampshire SO21 3RQ.

[2524-003 (2005) : 52]
Proximagen Limited is a drug discovery and development company focused on the treatment of age-related neurodegenerative illnesses. We are looking for individuals with energy and a determination to succeed who will contribute to the significant unmet medical needs of patients with neurodegenerative disease.

Proximagen provides an exciting and rewarding environment for individuals wanting a challenging career in the pharmaceutical industry. We offer highly competitive salary and benefits packages.

Proximagen is expanding through the following appointment:

**SENIOR SCIENTIST**
The candidate will have hands-on experience investigating treatments for neurodegenerative diseases. The job responsibilities include designing and executing experiments, defining realistic timelines for studies, and supervising the activities of research associates, as well as analyzing, recording and interpreting data, compiling and maintaining data and communicating results to multi-disciplinary teams. The individual should be highly motivated, demonstrate initiative and good analytical, organizational and multitasking skills. Additionally, good interpersonal and communication skills will be particularly important due to the collaborative nature of this job.

Qualified candidates should have a Ph.D. in Life Sciences, Neuroscience, Pharmacology, or related discipline. A minimum of 3-5 years of relevant post-doctoral experience is required. A working knowledge of drug development practices and pharmaceutical or biotechnology industry experience will be an advantage. Candidates should have solid foundation with behavioural and biochemical determination of drug activity; tissue preparation for biochemical; molecular and immunohistochemical studies; HPLC; in-situ hybridization; Western Blotting; PCR; other biochemical determinations as they arise and a background in neurodegeneration (Alzheimer's or Parkinson's disease. Preferred candidates will have experience in contributing to cross-functional drug development teams.

**SENIOR ANALYST**
Your primary role will be to set up, run and manage our analytical facility to support our inhouse drug discovery programs.

Applicants should have at least two to three years industry experience of LC-MS method development in a drug discovery setting, analysing PK-ADME samples in a variety of matrices. Familiarity with alternative detectors (electrochemical, diode array) is important. Previous experience of working within a GLP environment is an advantage.

Proximagen is conveniently based near London Bridge station in central London. We are confident that the salaries and benefits packages are amongst the best in the industry.

Applications may be emailed to: hr@proximagen.com or posted to: Proximagen Limited, Attn: Delia Wilson, Hodgkin Building, King's College London, London, SE1 1UL.

I want to go further

**Graduate In Vivo Pharmacologists**
Alderley Park, South Manchester - Cheshire

If you want a career that offers more of the things that really count, welcome to AstraZeneca. We turn good ideas into effective medicines and our innovation enhances the lives of patients around the world. An important part of the drug discovery process is the assessment of the pharmacological effects of new drugs in disease models.

Right now we're looking for graduates to join the teams that undertake this research, which is conducted to the highest standards - being governed by UK Home Office regulations and subjected to stringent ethical review. As a key part of our scientific community, you will be involved in a wide range of activities including the design, conduct and interpretation of pharmacology studies.

Educated to degree level in Pharmacology or a related discipline, you will be a self-motivated individual with a creative approach and good practical laboratory skills. You will also have an interest in animal models of disease, and a desire to deepen your understanding of their role within the drug discovery process.

In return, you will enjoy a culture that is focused on rewarding and inspiring exceptional performance, plus a competitive package which includes an annual bonus scheme, healthcare, pension, generous holiday allowance and highly flexible benefits.

Cambridge Environmental Assessments

**Principal Consultant/ Senior Risk Assessor**
Salary and location negotiable

Cambridge Environmental Assessments are leaders in regulatory environmental risk assessments for chemicals.

We provide problem-solving skills for industry and research capability for government agencies, providing a wide range of services from desk-based investigations to field studies.

In line with our sustained growth we wish to strengthen our core business and new developments through appointments at a senior level. We are keen to recruit individuals with expertise in one or more of the following disciplines:

- Ecological Risk Assessment
- Probabilistic Risk Assessment
- Population modelling and statistical analysis
- Exposure modelling
- Aquatic and terrestrial ecotoxicology

Ideally, candidates will have a research degree with 5-10 years experience in a regulatory environment. A key element of the job will be the promotion of CEA and its business both nationally and internationally. CEA, as a member of the ADAS group of companies, is a flexible and supportive employer, hence the location of this post is negotiable.

Interested? then please send your CV, details of current salary, and a letter of application stating why we should consider you for this position, to Dave Arnold, CEA, Battlegate Road, Boxworth Cambridge CB3 8NN, UK.

Email: dave.arnold@cea-res.co.uk or telephone +44 (0) 1954 268250 for further details.

Closing date for applications: 11th November 2005.
Institute for Animal Health
The future of animal health is in our hands. And yours.

With 450 people and an annual budget of £30 million, the Institute of Animal Health operates at the forefront of innovative research into animal health. Our research is aimed at understanding the molecular mechanisms underpinning host-pathogen interactions, combining genetics, cell biology and protein biochemistry. You will be at the centre of everything we do.

**Proteomics Facility Manager**
Compton • £22,351 to £25,767 + Benefits • Ref: 05/0745
Providing comprehensive facilities management, you will ensure upkeep of mass spectrometric, HPLC and 2-D gel equipment, allocate instrument time and assist with project planning and user training. You will also be responsible for routine instrument use within the facility.

To join us, you should be a science graduate with a PhD in mass spectrometry/proteomic research or equivalent experience. Ideally this will have given you knowledge of modern proteomics techniques, such as 2-dimensional chromatographic, 2D-PAGE, data acquisition and database searching, plus proven ability to work without supervision and disseminate results.

**Postdoctoral Research Scientist**
Compton • £22,351 to £25,767 + Benefits • Ref: 05/0741
You will develop separation techniques for protein analysis from murine neural tissue, and analyse differentially expressed proteins via mass spectrometry, disseminating your results through presentations at scientific forums and the preparation of academic papers.

You will preferably hold a PhD in mass spectrometry and/or proteomic research, but this is not essential if you possess a strong research background. You must bring a proven record of method development using proteomics techniques, spanning 2-D chromatographic, 2D-PAGE, data acquisition and database searching.

Closing date: 18th November 2005.

Further details and an application form are available from Mrs. R. Day, Institute for Animal Health, Compton, Newbury, Berks RG20 7NN (Tel: 01635 577203; e-mail: iah.vacancies@bbsrc.ac.uk) quoting appropriate reference number. The IAH is an equal opportunities employer. www.iah.bbsrc.ac.uk

HEAD OF BUSINESS DEVELOPMENT & REGULATORY AFFAIRS, UK
The Acta Group EU Ltd. is a consulting firm established to control the spiralling costs and inefficiencies encountered by clients seeking approvals to market chemicals, biocides, products of biotechnology and nanotechnology, and medical devices. Acta manage products from concept to approval, utilizing the skills and experience of professionals who have worked in the specific product areas in government and industry.

This is a rare and exciting opportunity to provide strategic input and leadership to the business development and regulatory activities of The Acta Group in the EU. In this newly created role, you will contribute to the overall business as a member of the central management team and take responsibility for initiating and co-ordinating product and solution development across the European operations. You will be working with a small technical team in the UK supported by Acta Group experts in the US. These activities are critical in providing ongoing registrations and a product pipeline to ensure continued growth of the business in the EU.

The requirement is for a rounded professional with a strong scientific background at degree/PhD level. Pan-European product development experience incorporating a thorough understanding of both regulatory and commercial functions is essential. Experience of Toxicology and Environmental Fate studies is desirable, whilst knowledge of the 914/14 Biocides Directive and current ‘REACH’ legislation would be a distinct advantage. This expertise should be complemented by a flexible working style that is attuned to a multicultural environment, excellent people management skills and the ability to communicate to a high standard with both written and spoken English.

Competitive salary and benefits package offered with the possibility of flexible working practice.

To apply please send your full CV in confidence to:
Steve Hern, Jobs in Science, Leonard House, 12-14 Silver Street, Tamworth, Staffordshire B79 7NH.
Email: steve@jobsinscience.com Tel. 01827 312394.

ACTA
Jobs in Science
[2524-009 (2005) : 54]
In 2005, the John Templeton Foundation established a fellowship program that enables ten print, broadcast, or online journalists to pursue an intensive two-month course of study in issues of science and religion. The fellowship includes three weeks of seminars at the University of Cambridge in the U.K. featuring eminent authorities in the field. Fellows will be paid a stipend in addition to expenses, including travel, for Cambridge.

The fellowship seeks to promote a deeper understanding and a more informed public discussion of the creative interface of science and religion. Potential areas of study include comparison of the methods of science and religion, neuroscience, quantum uncertainty, and spirituality and health.

Applicants must demonstrate an interest in the field, originality of thought displayed in previous writings, and a superior record of journalistic achievement. The awards are open to journalists with a minimum of three years' experience, priority will be given to mid-career and senior journalists. The fellowship program is looking for journalists who show promise of making a significant contribution to the public's understanding of the complex issues of science and religion.

The application deadline is Thursday, December 15, 2005.

For more information, or to apply for the fellowships, go to the website www.templeton-cambridge.org [2524-010 (2005) : 55]
MRC Medical Research Council

Senior Programme Manager of Africa Group
London Based
Salary £38,396 p.a. inclusive of allowances

The Medical Research Council (MRC) is a public funded body with the overall aim of improving and maintaining human health through an integrated programme of research. The MRC Clinical Trials Unit (CTU) was set up in 1998 by combining the groups undertaking clinical trials and epidemiological studies in HIV & Cancer.

The Africa Group is a newly formed group in recognition of the growing number of trials that CTU is co-ordinating in Africa. The CTU HIV Group has focused on both preventing infection and optimising the long-term use of effective therapies for those who are infected. The principal activity is to initiate, design, conduct, analyse, present and publish national and international clinical trials addressing scientifically important questions in adults and children.

We are looking to recruit a Senior Programme Manager, who will project manage a number of different trials for the Africa Group in addition to representing the group to internal and external stakeholders such as Pharmaceutical Companies and other academic institutions. Although the post will be based at the MRC Clinical Trials Centre, London, the postholder would be expected to occasionally travel to Africa.

This is an exciting opportunity and would suit someone who is passionate and committed to contributing and impacting on global health issues.

We would like to hear from you if you have:
• a background in managing the performance of both individuals and of projects in a diverse and complex research environment.
• proven project management and administrative skills and experience.
• a proven ability to network successfully.
• excellent interpersonal, management and influencing skills as the postholder will be working across several teams and line managing staff, as well as liaising directly with trial managers, administrative and finance staff at a number of other institutions.
• knowledge of clinical trials, and ideally with experience of clinical trials of investigational, unlicensed products within the guidelines would be an advantage.

The duration of this appointment is for three years.

Benefits include 30 days annual leave days per year, a contributory pension scheme and an interest free season ticket loan. The salary is dependent on previous experience and may be negotiable for exceptional candidates.

Further information about the Clinical Trials Unit can be obtained from our website www.ctu.mrc.ac.uk

Closing Date: Friday 18 November 2005

For an application pack, please contact Nicole Shead on 020 7670 4633 or email: recruitment@centre-london.mrc.ac.uk quoting ref: 304/ctu

Avidex
Targeting T Cell Receptors

**LICENSING MANAGER**
to work within the Business Development Team

Avidex, a biotechnology company based near Oxford, requires a Licensing Manager to lead the negotiation and execution of Avidex’s new in-licensing and material transfer agreements and to assist the Chief Business Officer in the management of out-licensing projects. You will have first-hand experience of negotiating and implementing licensing transactions, ideally gained over a number of years within a university technology-transfer office environment or within a corporate licensing role. You will bring strong attention to detail, sound project management skills and, as a natural team player, the ability to liaise easily and smoothly on technical, legal and commercial issues with internal and external colleagues.

As the successful candidate you will have a strong scientific background in immunology or molecular biology, ideally to postgraduate degree level.

Please send a letter of application together with your full CV to: Avidex Ltd, 57c Milton Park, Abingdon OX14 4RX or by email to busdev@avidex.com For the attention of Hilary Boardman [2524-012 (2005) : 56]
Trainee Donor Care Physiologist
Ref: TX431 Band 6 £21,448 - £30,247 pa Full time 37.5 hrs pw

In 2004 Papworth Hospital introduced an innovative role within the Cardiothoracic Transplant Team. This Donor Care Physiologist (DCP) role has substituted the Anaesthetic SpR on the Donor Retrieval Team. The DCP now plays a key role in the care and management of organ donors during donor retrieval operations, under the supervision of a Surgical Fellow.

We are looking for three candidates to join the existing DCP Team. You will complete a 15 month supernumerary training programme leading to the qualification of Diploma in Donor Management.

You should have excellent communication and team building skills, along with the enthusiasm to continue to develop this role. You may have been working within Theatres, Critical Care or Anaesthetics or be a science/technology graduate with experience in the healthcare field.

You will commence the 15 month training programme on the 6 February 2006.

For further information or to arrange an informal visit please contact Ann-Marie Ingle on 01480 364577 or bleep 334.

Application form and role profile available by contacting the Employee Services Department direct Recruitment Line on 01480 364251, Papworth Hospital NHS Foundation Trust, Papworth Everard, Cambridge CB3 8RE, quoting the relevant reference number.

Closing Date: 11 November 2005.
