Roslin Institute is a world renowned centre for research in genetics, molecular biology and developmental biology, with strong transport links and located within minutes of the centre of the beautiful, historical and cultural capital of Scotland, Edinburgh.

**PhD Studentship opportunity**

Title: CASE studentship "Genetics of Vaccination". Identifying genes controlling vaccine response may lead to improvements in vaccine efficacy. The final assembly of the bovine genome together with other bovine genome resources provides new opportunities to discover the genes and pathways underlying variation in response to vaccines. This project will explore the underlying genetic basis of such variability by combining quantitative genetic and molecular approaches.

Supervisor: Dr E.J Glass
University: University of Edinburgh
Email address: liz.glass@bbsrc.ac.uk
Funded by Pfizer Animal Health

Applicants should have or expect to obtain a first or upper second class degree in genetics, immunology or related disciplines.

Applications including a full CV and the names and addresses (including email addresses) of 2 academic referees should be sent to Human Resources, Roslin Institute (Edinburgh), Roslin, Midlothian, EH25 9P5. Tel 0131-527-4481 email Roslin.HR@bbsrc.ac.uk by 16 November 2006.

[2576-054 (2006) : 79]
Research Assistant
Starting salary in range £18,142 to £20,538 p.a. (pay award pending)

The Babraham Institute is a charity which is world renowned for its research in life sciences that leads to new medicines and treatments for human diseases.

A Research Assistant is required to work on a project which aims to understand how imprinted genes control fetal growth. This project deals with a new concept based on our work that imprinted genes acting in the placenta are key genes controlling the supply of maternal nutrients to the fetus. (see Nature 2004 432:53-57). We are looking for an enthusiastic candidate with a degree in biological sciences, preferably with experience in molecular biology and with a keen interest in developmental genetics and physiology as applied to biomedical questions. Informal enquiries are welcome to miguel.constancia@bbsrc.ac.uk. Funding for this post is available until 30 September 2009.

Starting salary will be according to qualifications and experience. Benefits include pension scheme. Further information about the Institute can be found on our website (www.babraham.ac.uk). Application forms and further details available from the Personnel Office, The Babraham Institute, Babraham Research Campus, Cambridge CB22 3AT. Tel. 01223 496000, e-mail: babraham.personnel@bbsrc.ac.uk. On applying please quote reference DU/ST. Closing date for completed applications is 30 November 2006.

POST DOCTORAL SCIENTIST
CHEMOMETRICS/BIOINFORMATICS SPECIALIST

We are seeking an informaticist, with experience in computational biology and/or chemometrics to work with analytical chemistry datasets generated in the BBSRC-funded National Centre for Plant and Microbial Metabolomics at Rothamsted Research (www.metabolomics.bbsrc.ac.uk).

Using data, generated by other members of the team, from mass spectrometry and NMR instrumentation, your duties will involve multivariate analysis (such as PCA and PLS-DA) and biochemical pathway interpretation. In addition, you will be involved in data manipulation and curation of database entries as well as in the development of methodologies and software to relate metabolite data to biochemical networks and gene expression microarray data.

You will need a PhD that has involved computational science in a chemical context together with experience of handling large datasets. Experience in statistics, multivariate analysis, database design and website construction is desirable.

Funding is available to support this post initially for two years at Band 6-PD level which has a salary range of £23,022 to £26,541 per annum (pay award pending).

Apply by application form only, available with further particulars from our website www.rothamsted.bbsrc.ac.uk or from the HR Group, Rothamsted Research, Harpenden, Herts, ALS 2JQ.

Please quote reference 917.

Closing date: 17 November 2006

An Equal Opportunities Employer
ROTHAMSTED RESEARCH
HARDWARE AND SOFTWARE ENGINEER (FBU058)

An exciting opportunity exists for a highly-motivated software developer to contribute to the new developments of world leading laser spectroscopy facilities. The position will be based at the Central Laser Facility at the CCLRC Rutherford Appleton Laboratory in Oxfordshire, UK.

The job holder will join a cross-disciplinary team and will be responsible for developing software applications for advanced laser spectroscopy, imaging, data collection, data processing and instrument control. Training in relevant spectroscopic techniques will be provided.

The job requires a highly motivated software developer with solid programming skills, good working knowledge of modern computer architecture and practical experience in PC operating systems and hardware interfacing. Good knowledge of analogue and digital electronics and experience in multithread programming, real time operating systems and/or embedded systems is also beneficial. The candidate should hold at least a BSc degree or have an equivalent practical experience. They also should have good communication skills and an independent outlook, be capable of working in a team and deliver to tight deadlines. The candidate should have interest in physical sciences. Experience in programming in C++ is essential and the knowledge of Labview and Visual Basic beneficial.

Salary is in the range £24,638 to £27,998 per annum, dependent on skills and ability. An excellent index linked pension scheme and generous leave allowance are also offered.

For an informal discussion about the post, please contact Prof Anthony Parker on (01235) 445109 or email A.W.Parker@rl.ac.uk

Application forms can be obtained from our website at www.cclrc.ac.uk following the links to the vacancies page. Alternatively, you may wish to contact us by email at recruitment-FBU@rl.ac.uk or phoning +44(0)1235 446677 (24 hour answer phone) quoting reference number FBU058.

For more detailed information about CCLRC please visit www.cclrc.ac.uk

Closing date for applications is 24 November 2006. Interviews will be held on 6 December 2006.

FRAME
Fund for the Replacement of Animals in Medical Experiments

PRODUCTION EDITOR

FRAME (Fund for the Replacement of Animals in Medical Experiments), founded in 1969, is a scientific charity with its own scientific research programme, aimed at developing and promoting the Three Rs (Reduction, Refinement and Replacement) alternatives to animal experimentation.

FRAME is seeking a Production Editor to help with all aspects of in-house publications, in particular the prestigious international bimonthly journal, Alternatives To Laboratory Animals (ATLA). The work entails close liaison with editors, authors, referees and editorial board members; scientific and copy editing; proof-reading; overseeing design and print stages involving desk-top publishing and writing news-type articles.

The following qualifications are essential:
• a degree in Biological Sciences or a related discipline;
• a genuine interest in the field of alternatives research;
• an ability to work accurately and to tight deadlines.

In addition, skills in scientific and production editing would be a distinct advantage. There will also be an opportunity to assist with the writing, production and editing of scientific literature for FRAME’s publications, educational and publicity material. This post would suit someone with a first degree in the life sciences, with an interest in the communication of scientific information.

This is a permanent position at FRAME’s offices in the centre of Nottingham, subject to a six-month probationary period, and it will start as soon as possible, with salary dependent on qualifications.

Further details and an application form are available from FRAME 96-98 North Sherwood Street, Nottingham NG1 4EE Tel: (1115 958 4740 Fax: 0118 950 3570 www.frame.org.uk

Following on from its successful launch in 2006, the New Scientist Careers Guide 2007 will be published on 10 February.

Your presence in the Careers Guide 2007 secures your organisation year-round exposure in print and online:

- The Careers Guide will be sent to all UK & Ireland subscribers with 10 February issue of New Scientist - over 58,000 recipients.
- It will be distributed at all events attended by New Scientist Jobs in 2007.

The Careers Guide will be supported by a tailored marketing campaign, to include extensive email and online activity, which will ensure exposure of your entry to the scientific community during 2007.

For further information and to reserve your space in this vital reference tool, please contact the New Scientist Jobs Sales team on 020 8652 4444 or sales@newscientist.com. Booking deadline 15 December 2006, 10.30am.
Her Majesty's Government Communications Centre

HMGCC produces leading-edge communications equipment to protect Her Majesty's Government's interests at home and abroad. We design, implement and manufacture innovative and practical solutions to the challenging and ever-changing problems of protecting our information.

**Senior Engineer - Battery Technology**  
**Salary: Competitive**

As Senior Battery Engineer, you will provide a crucial support note throughout the whole of a product's lifecycle. You will advise HMGCC's development engineers on the best available technology to meet their power requirements. You will be involved in designing and testing batteries to ensure that the end product meets our customers' needs. You will assist in managing the manufacturing processes to incorporate batteries into equipment. You will also play an important role in ensuring that Health & Safety standards are met throughout the process.

Successful candidates will have:
- Training in battery technology, power sources, electrochemistry or materials chemistry to degree level or equivalent.
- Ability to present credible, informed advice to customers.
- Good communication skills (both written and verbal); good organisation and prioritising skills.
- Ability to work with minimal supervision and to work effectively with others when required.
- Ability to apply knowledge and find solutions to problems in an unfamiliar environment.
- A flexible approach and the ability to work under pressure.
- Ability to work accurately and apply appropriate attention to detail.

Successful candidates will ideally have:
- Knowledge of battery chemistries and their characteristics.
- Skills in battery test methods and practices.
- Familiarity with the MACCOR battery test systems.
- Experience of battery pack designs and charging regimes.
- Knowledge of the Health & Safety issues involved with handling batteries.
- Experience in carrying out risk assessments and implementing their findings.
- A qualification in Dangerous Goods Transport and an understanding of the requirements for transporting batteries.

Candidates showing the aptitude to learn and apply these skills will also be considered.

For an application pack and further information on the role and benefits, please visit [www.hmgcc.gov.uk](http://www.hmgcc.gov.uk) or apply to:

FALKLAND ISLANDS GOVERNMENT

FISHERIES SCIENTIST
(TOOTHFISH)
Salary range £19,000 - £22,000 + 15% Gratuity 2 year contract

The Falkland Islands Government Fisheries Department is seeking a scientist to work on and help co-ordinate research on the Patagonian toothfish (Dissostichus eleginoides). This is a small but valuable fishery in the Falkland Islands and its surrounding waters.

The successful candidate will have a Ph.D. in an appropriate area of biological or fisheries science.

Experience should include:
• a sound knowledge of fish biology, fisheries and the environment.
• experience in histology and previous experience in fecundity would be an advantage but not essential as would any experience in fish age and growth.
• experience in the application of modern statistical methods.
• good competence with computers and computer software.

For further information, a full job description and an application form please contact Recruitment Officer, Falkland Islands Government Office, Falkland House, 14 Broadway, Westminster, London SW1H 0BH
Tel: 020 7222 2542 Fax 020 7222 2375 E-mail recruitment@falklands.gov.uk
Completed application forms and CVs should be returned to the above address no later then Tuesday 21st November 2006.

Analysts / Development Analysts
Early Development Analytical Development and Control

Merck Sharp & Dohme Ltd is the UK subsidiary of the global, research-driven pharmaceutical company Merck & Co., Inc. Merck & Co. Inc discovers, develops, manufactures and markets a range of products to improve human health.

We are looking for Analysts and Development Analysts to join us at our Development Laboratories, based at our UK Headquarters in Hoddesdon, Hertfordshire.

As part of the Analytical Development team, you will be dedicated to supporting the development of new drug candidate formulations, supporting early phase drug development. The job calls for initiative, commitment and enthusiasm and involves the development of analytical methods suitable for investigating the quality and stability of novel formulations, utilising a wide range of spectroscopic and chromatographic techniques.

We are looking for candidates for positions at both graduate (2:1 and above) and PhD level in chemistry or a related subject. Positions are available for applicants with or without relevant experience.

Excellent practical abilities, an eye for detail and good problem-solving skills are essential. You must have a willingness and flexibility to work cross functionally with a team-orientated approach to support multiple functional areas. As a company dedicated to pursuing development within a team environment, strong communication skills are essential.

Please email, attaching a full CV and covering letter, quoting the reference ADC06B as the subject, to: devlabrecruit@merck.com

For more information on MSD visit our website at www.msd-uk.co.uk

MERCK SHARP & DOHME
Research Scientists
JL3 £24,480 - £37,454
JL4 £17,837 - £27,289

Met Office
These posts are offered on a permanent basis unless otherwise stated
Please note the standard rate of pay for new entrants is the relevant pay range minimum.

At the Met Office, we not only predict the weather for the forthcoming week, we're also at the forefront of environmental research - monitoring and modelling weather and climate change to increase our understanding and ability to predict the natural environment and to mitigate potential disaster.

We are one of the world's leading centres in numerical weather prediction and climate research, utilising the most sophisticated mathematical models, run on high performance supercomputers within one of Europe's most powerful networks - and employ some of the finest minds in environmental research.

Working at the forefront of international science, you could become involved in developing world-leading models of the earth's environmental systems, atmosphere, oceans, cryosphere, ecosystem, carbon cycle and atmospheric chemistry, or in evolving new ways of exploiting earth and space-based observations. You could also become involved in developing capability to deliver products and services to customers.

To join us, you will normally require a 2.1 degree (although on occasion a 2.2 will be acceptable) in Maths, Physics, Computer Science, Oceanography, Chemistry or Meteorology, plus some knowledge of programming in Fortran or Unix. But above all, you will be enquiring, imaginative and creative in your approach to solving problems on a global scale.

For more information about the variety of posts we have available, and how to apply, please visit www.metoffice.gov.uk

Please note, new vacancies will be advertised each month, but details will only be available on the Met Office website.

If you require an application pack to be sent to you, please contact Recruitment, Met Office, Fitzroy Road, Exeter EX1 3PB.

The Met Office is an equal opportunities employer

**Trainee Clinical Embryologist**
Band 7 £27,622 - £36,416
(initial salary will be 60% of top of band)

The assisted conception programme is fully NHS funded and performs approximately 700 cycles of IVF/ICSI, 400 cycles of frozen embryo replacements and 100 intra-uterine inseminations annually. In addition to IVF and ICSI long-term sperm storage for oncology referrals and infertility cases are routine procedures. The laboratory also provides an Andrology function to support the outpatient service. The Department is also active in a number of areas of research including human embryo development, embryo selection and embryo culture biotechnology.

Graduates in a Life Science are invited to apply.
Initial training will include completion of the Association of Clinical Embryologists Postgraduate Certificate. You should be an effective team player as the role necessitates a close working relationship with other members of the team to improve and extend the high standard of services available. An ability to communicate effectively with patients and colleagues is essential. Opportunities may exist for further training and research would be encouraged.

For informal enquiries, please contact Mr G Horne on 0161 276 6889 or email greg.horne@cmmc.nhs.uk

Apply online or call the Recruitment Office on 0161 276 6666 for an application form. Please quote ref: SMH407.

Closing date: 9th November 2006.

[2576-074 (2006) : 85]
Health and Human Sciences

Graduate Assistants (2 posts)
Fixed-term for 4 years
Salary: £14,208 per annum bursary

We seek to appoint two Graduate Assistants in the field of Biomedical Sciences. Each Graduate Assistant will be expected to spend 3 months per year on the teaching and supervision of MSc (and occasionally undergraduate) students, mainly during the months of June-August inclusive, when the MSc students will be engaged on their research projects.

Each Graduate Assistant will, after discussion with the Project supervisors, select a research project for studies leading to the degree of PhD from one of the following areas:

- Human complement system (with particular emphasis on the use of complement regulators in ameliorating autoimmune disease)
- Human molecular genetics in health and disease. Fields available for study are that of obesity, diabetes and contributory conditions, congenital heart defects in Down Syndrome or foetal growth and health as determined by maternal genes

The Graduate Assistants will be required to prepare research findings for publication in peer-reviewed journals and for presentation (poster/oral) at national/international conferences.

The posts will be held for a 4-year term, subject to satisfactory progress in the research project. Tuition fees will be paid by the University.

For further information about this post applicants should contact Dr Jameel Inal (j.iнал@londonmet.ac.uk) or Dr Una Fairbrother (u.fairbrother@londonmet.ac.uk).

In the first instance further details and an application form can be downloaded at www.londonmet.ac.uk/vacancies or e-mail recruitment@londonmet.ac.uk or write to London Metropolitan University, London City campus, Human Resources, 31 Jewry Street, London EC3N 2EY. Please quote reference number C0951FXN.

Closing date for applications is 16 November 2006.

Please note we do not accept CVs.

CENTRE FOR REPRODUCTIVE MEDICINE BRISTOL

The University of Bristol Centre for Reproductive Medicine currently performs approx 800 IVF/ICSI cycles per year. With the anticipated increase in local NHS provision of infertility services, there are exciting plans afoot for the eventual transfer of the Centre to a new, purpose-built unit, financed by the NHS on a local hospital site.

**Experienced Embryologist**

We require an experienced embryologist to join our friendly and successful team. You should ideally have significant experience in a clinical IVF setting, be a licensed ICSI practitioner and be in possession of, or working towards, the ACE Certification in Clinical Embryology and State Registration. You should be enthusiastic, a good communicator and enjoy working as part of a close team. Please quote reference 12718.

**Trainee Embryologists**

We are also seeking to recruit two trainee embryologists, one permanent post (reference 12719) and one temporary (for 12 months in the first instance) (reference 12720). Both posts require as a minimum, a degree in biological science. To be considered for the permanent post you will ideally have laboratory experience in a clinic setting. Full training will be provided and you will be expected to undertake the ACE Certification in Clinical Embryology.

The appointment will be made on the University Other Related Scale (Grades I/2 - £20,842 - £31,525) depending on experience. A flexible approach to the working week is expected for these posts and will include participation in the weekend and on-call rotas for which payment or time off in lieu will be given.

Informal enquiries can be made to Mr Paul Wilson, Laboratory Director, telephone (0117) 902 1100, e-mail paul.wilson@reпромед-bristol.co.uk or Mrs Corrina Gibbons, Laboratory Manager, telephone (0117) 902 1100, e-mail corrina.gibbons@reпромед-bristol.co.uk

These posts are exempt from the Rehabilitation of Offenders Act 1974 and all applicants who are offered employment will be subject to a criminal records check by the Criminal Records Bureau. A criminal record will not necessarily preclude employment, but its relevance to the duties of the post will need to be assessed before the appointment is confirmed. Further information about the criminal records check process can be found at www.disclosure.gov.uk

Further details and an application form (submitted via the University Recruitment team only) can be found at www.bristol.ac.uk/vacancies

Alternatively you can telephone (01 17) 954 6947 or e-mail recruitment@bristol.ac.uk quoting the appropriate reference number.

The closing date for applications is 9.00am, 20th November 2006.

EXCELLENCE THROUGH DIVERSITY

www.bristol.ac.uk
Department of Engineering
Mechanics, Materials and Design Division

Applications are invited from suitably qualified candidates for two University Lectureships, one in Solid Mechanics and the other in Engineering Design. Both lectureships are within the Mechanics, Materials and Design Division of the Engineering Department. The successful candidates will take up the appointments as soon as possible.

Hibbitt Lectureship in Solid Mechanics
The Lectureship in Solid Mechanics has been recently endowed by David and Susan Hibbitt, and the aim is to attract a high calibre researcher with a record of scholarship and research in experimental, computational and/or theoretical solid mechanics. Expertise is required in the mechanics of materials (structural, biological or energy materials, for example) and the successful candidate is expected to make a significant contribution to the Department's teaching and research activities and to build a strong, externally funded research programme. The activity will fit within the Cambridge Centre for Micromechanics, which is an inter-departmental, inter-disciplinary research group housed within the Engineering Department.

Informal enquiries about the Hibbitt Lectureship in Solid Mechanics should be made to Professor Norman Fleck (telephone +44 (0)1223 748240 or email naf1@eng.cam.ac.uk).

University Lectureship in Engineering Design
Candidates for the Engineering Design post should have a proven research record in the area of Engineering Design, and will be expected to contribute directly to the research and teaching of the Engineering Design Centre (EDC). The EDC enjoys an international reputation for high-quality, innovative and industry-relevant research and is particularly active in the aerospace, healthcare and product design sectors. It currently has secure funding as an EPSRC-funded Integrated Manufacturing Research Centre (IMRC), however, the successful candidate will also be expected to build a strong, externally funded research program.

Informal enquiries about the Lectureship in Engineering Design should be made to Professor John Clarkson (telephone +44 (0)1223 748246 or email pjc10@eng.cam.ac.uk).

The appointments will each be for 5 years in the first instance with the possibility of reappointment to the retiring age subject to satisfactory performance. The current pensionable scale of stipends is in the range of £32,471 - £41,133 per annum.

Further particulars and an application form may be obtained from http://www.eng.cam.ac.uk/admin/jobs.shtml or from the Head of Department's Office (Personnel), Department of Engineering, Trumpington Street, Cambridge CB 2 1PZ, UK (tel +44 (0) 1223 332615, fax +44 (0) 1223 766364, email enghead@eng.cam.ac.uk) applications should be sent to this address no later than by Friday 15 December 2006 and include a completed form, a curriculum vitae, a list of publications, and a one-page statement of research interests and future plans.

UNIVERSITY OF CAMBRIDGE

The University offers a range of benefits including attractive pension schemes, professional development, family friendly policies, health and welfare provision, and staff discounts. The University is committed to equality of opportunity.

[2576-077 (2006) : 87]
Postdoctoral Statistician  Ref: MHS/423/06

You will be required to help develop a robust clinical tool to measure the long term effects of cancer treatment on normal tissue. Based on an extensive database of over 1,000 patients, you will contribute to the refinement of questionnaire-based late effects scoring with the aim of producing an internationally accepted scoring system. You will be expected to provide knowledge and expertise in the analysis and interpretation of data arising from clinical studies.

This post would particularly suit applicants who have an interest in the practical application of clinical research data and will provide the opportunity to work within a large and vibrant multi-disciplinary clinical research group and for international collaboration with experts in the field.

Funding is available until 31 May 2009.

For further information, please contact Dr Susan Davidson on +44 (0) 161 446 3330 or email: susan.davidson@christie.tr.nwest.nhs.uk or Dr Jo Cresswell on +44 (0) 161 446 8268 or email: jo.cresswell@manchester.ac.uk or visit www.medicine.manchester.ac.uk/cancerstudies/research/radiationoncology/outcomemeasures

Application forms and further particulars are available from our website. If necessary, you can obtain them from +44 (0) 161 275 8835 or email: Mhs-hr@manchester.ac.uk

Closing date: 24 November 2006.

Faculty of Life Sciences
Research Technician  Ref: LS/157/06
Salary £21,467 - £24,886 pa.

You will assist with establishing a Protein Expression Core Facility. This post will be associated with a highly active biochemistry research group. You will work under the direction of Drs Richard Kammerer and Edward McKenzie in state-of-the-art research facilities. You will be required to work in a multi-disciplinary team of postgraduate scientists and students within a larger multi-user research lab.

You must be educated to at least HNC (or equivalent) in any biological science discipline. You must be able to work independently, be interested in learning new techniques and have excellent communication skills.

You must be able to demonstrate experience of working in the field of Protein expression. Work will involve molecular biology, bacterial, insect and mammalian cell culture and protein purification. Practical experience of these is essential.

This post is available from January 2007 and is tenable for two years.

Application forms and further particulars are available from our website. If necessary, you can obtain them from +44 (0) 161 275 3909 or email: gary.porteous@manchester.ac.uk

Closing date: 24 November 2006.

For both posts, please quote the reference number.
The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

[2576-078 (2006) : 87]
www.cardiff.ac.uk/jobs
CARDIFF UNIVERSITY
PRIFYSGOL CAERDYDD

Research Associate
Welsh School of Pharmacy
Tenovus Centre for Cancer Research

You will be required to perform analysis of Affymetrix microarray data to explore resistance mechanisms in breast cancer in vitro. You will be responsible for subsequent gene annotation and for co-ordinating verification and functional studies (including performing gene knockdown and overexpression) based on the identified gene signature.

This 2 year AstraZeneca funded appointment will build on a well established collaboration between the Tenovus Centre for Cancer Research and this pharmaceutical company examining signalling mechanisms underlying response, failure and disease progression during therapy with AstraZeneca developed anticancer agents, where the goal is to identify new therapeutic targets and predictive biomarkers.

It is envisaged that you will join the Tenovus Gene Discovery team based in the Welsh School of Pharmacy in Cardiff but would liaise with the AstraZeneca bioinformatics group in Alderley Park. Expertise in bioinformatics and/or SiRNA approaches is highly desirable. This post is fixed-term for 2 years.

Salary: £26,402 - £31,525 per annum

For further details please contact Dr JMW Gee, gee@cardiff.ac.uk at the Tenovus Centre for Cancer Research.

For an application pack and details of all our vacancies, visit www.cardiff.ac.uk/jobs Alternatively email vacancies@cardiff.ac.uk or telephone + 44 (0) 29 2087 4017 quoting vacancy number 671.

Closing date: 16 November 2006
Research Fellow in Microbiology
The postholder will explore the mechanism of modulation of antibiotic resistance in methicillin-resistant Staphylococcus aureus (MRSA) by naturally occurring polyphenols. The work will involve investigation of the structure and biosynthesis of cell wall macromolecules and determination of biophysical characteristics of bacterial membranes. Research experience in these areas would be an advantage.

The position is for three years and the initial salary will be in the range £26,626 to £30,475 inclusive of London Allowance depending on experience.

For an informal discussion, contact Professor Peter Taylor (020 7753 5867; petertaylor@pharmacy.ac.uk).

For application details for this position, please view the School's website http://www.pharmacy.ac.uk/jobs.html or telephone the Personnel Office on +44 (0) 20 7753 5813. Please quote reference: RF-PC(PT).

Closing Date: 24 November 2006.

The School of Pharmacy is committed to equality of opportunity and selection on merit
Non-clinical Research Assistant
Division of Genetics & Molecular Medicine, Guy's Campus
Department of Medical & Molecular Genetics

A Research Assistant position has become available in the research group of Professor Gillian Bates in the Department of Medical & Molecular Genetics. The appointee will join a team that is working to investigate the therapeutic potential of compounds directed against newly defined therapeutic targets.

Huntington's disease (HD) is an inherited neurodegenerative disorder for which the mutation is a CAG repeat expansion.

The isolation of the HD gene in 1993 has allowed valuable disease models to be generated and led to a greater understanding of the early molecular events that occur in this disease.

Applicants must hold an honours degree in the biological sciences. The post will be for one year. Starting salary will be in the range £20,645 - £22,958 per annum plus £2,323 per annum London Weighting Allowance on grade RAI B.

For an informal discussion please contact Professor Gillian Bates on 020 7188 3722 or gillian.bates@genetics.kcl.ac.uk

For an application form and a job description, please visit the King's College London website www.kcl.ac.uk/jobs Completed application forms should be sent to: Mrs Esther Huntbach, Divisional Manager, Divisional Manager, Department of Medical & Molecular Genetics, 8th Floor, Guy's Tower, Guy's Hospital, London SE1 9RT, quoting reference W0/MGA/690/06. Alternatively, you may e-mail the completed forms to: Penny.Mander@genetics.kcl.ac.uk

Closing date for applications: 5.00 pm Friday 24 November 2006.
Interview dates: 4 & 5 December 2006.

KING'S College LONDON
University of London
Equality of opportunity is College policy
SALUTIFER ORBIS
THE SCHOOL OF PHARMACY
University of London
Nanomedicine Laboratory
Centre for Drug Delivery Research

Postdoctoral Research Fellow

A postdoctoral position is available for one year that can be extended to two years, commencing in December 2006 or as soon as possible thereafter studying the development, characterisation and biological study of carbon nanotubes as delivery systems. You should already hold a PhD in physical or engineering sciences and ideally have experience in the preparation, chemical modification, characterisation and handling of carbon nanotubes or fullerenes. Experience with electron microscopy will be of additional value.

The salary will be between £26,626 - £30,475 per annum including London Allowance.

For background information about the Nanomedicine Laboratory, Centre for Drug Delivery please see: http://cddr.pharmacy.ac.uk:main3.html For informal enquiries, please contact Dr. Kostas Kostarelos at kostas.kostarelos@pharmacy.ac.uk

Closing Date: 30 November 2006

The School of Pharmacy is committed to equality of opportunity and selection on merit

College of Medicine, Dentistry & Nursing  
Division of Pathology and Neuroscience  
Experimental Haematology Research Laboratories

**GRADUATE / POSTGRADUATE SCIENTIFIC OFFICER (TWO POSTS)**

Salary Scale Grade 6, £20,842 - £25,633  
Grade 7, £25,633 - £31,525

Fixed-term for 12 months in the first instance

Applications are invited from graduates having degrees with substantial components of relevant subjects such as cell and molecular biology, genetics and immunology and from postgraduates who have recently completed a relevant PhD for positions in the experimental Haematology Research Group. This is a multidisciplinary group based in the Division of Pathology and Neuroscience at Ninewells Hospital and Medical School investigating the responses of the haemopoietic system to stress and injury (particularly ionizing radiation) the influences of genetic factors on these responses and the mechanisms underlying the development of longer-term pathological changes, particularly leukaemia.

For post reference MD/1536/NS, the successful applicant will use cell culture techniques together with a variety of immunocytochemistry and spectrophotometric assays to investigate the damage and damage signalling responses of haemopoietic cells to the direct and indirect effects of ionizing radiation. For post MD/1537/NS, the successful applicant will use flow cytometry and immunocytochemistry techniques to characterize macrophage subsets with respect to immunophenotype and cytokine/chemokine profiles in haemopoietic tissues at various times after irradiation and the genotype-dependent phenotypic alterations associated with clearance of apoptotic cells. Both positions are funded by a Specialist Programme Grant of the Leukaemia Research Fund.

The University of Dundee is internationally renowned for research in biomedical sciences and the area provides a high quality affordable living environment. Informal enquiries may be directed to Prof Eric Wright (e.g.wright@dundee.ac.uk). We regret that we are unable to accept applications by email.

Further details and an application pack are available from our website [www.jobs.dundee.ac.uk](http://www.jobs.dundee.ac.uk)  
Alternatively, contact Personnel Services, University of Dundee, Dundee DD1 4HN, tel: (01382) 344817 (answering machine). Please quote the appropriate reference number. Closing date: 9 November 2006.

Applicants will only be contacted if invited for interview.

The University of Dundee is committed to equal opportunities and welcomes applications from all sections of the community.

**Proteomics Technician**
£22,111 - £25,633

You will be primarily responsible in helping to run a proteomics analysis service which involves interaction with members of the Wellcome Trust Centre for Cell Biology. Experience of working with proteins is desirable. Experience of using mass spectrometers would be useful but not essential as training could be given.

The post is funded by the Wellcome Trust, is fixed-term for four years and is under the direction of Professor Adrian Bird (Director of Centre).

Apply online, view further particulars or browse more jobs at our website. Alternatively, telephone the recruitment line on 0131 650 2511. Ref: 3006462NS. Closing date: 24 November 2006.

Committed to Equality of Opportunity

www.jobs.ed.ac.uk
[2576-084 (2006) : 89]
University of Southampton
School of Electronics and Computer Science

**Clean Room Manager**
£30,606 - £38,772 pa

Applications are invited for the post of Clean Room Manager in the Nanoscale Systems integration (NSI) Group within the School of Electronics and Computer Science (http://www.ecs.soton.ac.uk/). The School is the largest of its kind in the UK and it was awarded the top grade (5*) for its research in Electronics and Computer Science in the 2001 national assessment of research in UK universities.

The NSI Group is internationally recognised as a centre of excellence in the field of nanostructured materials and optoelectronic devices. Current research topics include NEMS devices, spintronics, Silicon-based optoelectronics, optoelectronic applications of polymers, Nanoelectronics and RF electronics.

The successful candidate will manage a new state-of-the-art Silicon nanofabrication clean room facility, located on the Highfield Campus, which is currently at the approval stage for estimated completion end 2007 - early 2008. Future research pursuits include the application of nanostructured materials and devices to quantum optoelectronics.

You should have a good degree in a relevant area, knowledge of all fundamental Silicon fabrication processes together with familiarity with the equipment that carries out these processes. Experience of working in a microfabrication clean room environment is essential and previous experience in managing a clean room facility would be an advantage.

For informal enquiries about the post please contact Professor Greg Parker, email gip@ecs.soton.ac.uk or Professor Peter Ashburn, email: pa@ecs.soton.ac.uk

To find out more about us and the roles we have on offer visit www.jobs.soton.ac.uk and apply on-line. Alternatively telephone 023 8059 2750. The closing date for this position is 1 December 2006. Please quote reference number 0367-06-E on all correspondence.

[2576-086 (2006) : 89]
WOLFSON CENTRE FOR MATERIALS PROCESSING

RCUK Academic Fellowship in interfaces of polymers/organics and inorganics
Vacancy Ref: HMA00545G

Applications are invited for an RCUK Fellowship in the Wolfson Centre for Materials Processing. You will be expected to work closely with the current Wolfson Centre staff to tailor the surfaces of inorganic particles to facilitate their integration in polymeric materials. You will need to have a strong drive for academic achievement, a recognised track record in an area related to the interface of organics/inorganics and be able to show evidence of academic leadership and the ability to be a team player. Experience in synthetic organic/polymer chemistry would be advantageous. Although the emphasis is on research, as the scheme progresses there will be an increasing amount of teaching, project management and outreach to schools to try and enthuse the future generation.

This position is made available by a RCUK academic fellowship award and top-up funding from the University. This is a 5 year fellowship with an intention to convert to a permanent academic position at the end of the award, subject to satisfactory progress, providing a career path from a research focussed post into an academic position.

The Wolfson Centre was part of a grade 5 RAE 2001 submission and currently has international reputations both in polymer processing and light emitting inorganic materials. You will work at the interface of these two areas.

The starting date is 1st January 2007, or soon after. Salary will be within the range £31,015 - £40,938 per annum including London Weighting.

[2576-087 (2006) : 90]
University of Brighton

Business Development Manager, School of Pharmacy and Biomolecular Sciences
Circa £36,500

The University of Brighton is a leader in medical and pharmaceutical research and its commercial exploitation. If you have a degree or similar qualification in bioscience, plus either a proven track record in technology transfer/business development or a higher degree in bioscience research, this is an ideal opportunity for you to turn scientific innovations into profits. We are looking for a commercially astute and technologically aware self-starter who can work with the academic and research community to identify, help protect and exploit technology innovations. You will conduct market research, manage intellectual property and patenting issues, prepare business plans and drive negotiations with pharmaceutical or biotech companies. The post is fixed-term for 2 years because funding is currently limited to this period. Job sharers welcome.

Working for equality of opportunity

POSITIVE ABOUT DISABLED PEOPLE
[2576-088 (2006) : 90]
Influenza Sequencing Co-ordinator (SRA Position)
Cambridge Infectious Diseases Consortium
Department of Veterinary Medicine
£32,471 - £41,133 per annum
Limit of Tenure: Two years

A Senior Research Associate position funded by the Wellcome Trust, is available to work within a collaborative project to sequence and analyse a large number of human and animal influenza viruses. The sequencing collaboration involves the National Institute for Medical Research (NIMR), the Health Protection Agency (HPA), the Wellcome Trust Sanger Institute (WTSI), the Cambridge Infectious Disease Consortium (CIDC), and the Veterinary Laboratories Agency (VLA).

This challenging and exciting role will involve co-ordinating the sequencing at WTSI of samples from the CIDC and other members of the consortium, and playing a central role in the phylogenetic and bioinformatic analysis of the resulting data. The role will be based between the CIDC, based at the Department of Veterinary Medicine, University of Cambridge and the WTSI, spending time in each location depending on the specific demands of the project.

The ideal candidate will have experience in both the molecular and bioinformatic analysis of influenza viruses, and be confident in interacting with multiple collaborators in several centres.

For an informal discussion about this position, please contact Dr James Wood on 01223 764666 jlnw2@cam.ac.uk). Further information is also available at www.vet.cam.ac.uk/news/.

For an application form (PD18), please contact the CIDC Office on 01223 764962 or download the form from www.admin.cam.ac.uk/offices/personnel/forms/pd18 completing Parts 1 and 3 only.

Completed forms together with a letter of application should be sent to Mrs Mala Jayasundera, CIDC Secretary, Department of Veterinary Medicine, Madingley Road, Cambridge CB3 0ES, or email cidc@vet.cam.ac.uk

Closing date is Monday, 20 November 2006.

UNIVERSITY OF CAMBRIDGE

The University offers a range of benefits including attractive pension schemes, professional development, family friendly policies, health and welfare provision, and staff discounts. The University is committed to equality of opportunity.

University of Brighton

**Lecturer/Senior Lecturer in Biology**
from £28,010 to £33,465 at Lecturer level
from £34,448 to £38,772 at Senior Lecturer level

The Biology and Biomedical Sciences division of the School of Pharmacy and Biomolecular Sciences are looking for a flexible and enthusiastic person to contribute to the teaching of ecology and conservation on undergraduate degree programmes in biological sciences, ecology, biogeography and environmental sciences. In addition, you will be involved with the ongoing development of postgraduate and professional courses.

You should have a good (1 or 2:1), relevant degree preferably in biology or ecology and a higher degree (MSc or PhD) or equivalent in a related subject. The post is fixed-term for one year to cover the absence of other members of staff. Appointment to either Lecturer or Senior Lecturer level will be dependent upon experience.

Job sharers welcome.

Call (01273) 642849 (24 hours) or visit [www.brighton.ac.uk/vacancies](http://www.brighton.ac.uk/vacancies)

**POSITIVE ABOUT DISABLED PEOPLE**
Working for equality of opportunity

[2576-090 (2006) : 90]
Medical Research Council
Clinical Trial Service Unit & Epidemiological Studies Unit (CTSU)
UNIVERSITY OF OXFORD
UNIVERSITY OF OXFORD

Senior Project Manager
MRC Band 3: Salary £34,933 - £42,754 p.a.

The CTSU is one of the world's leading centres for research into the causes, prevention, and treatment of chronic diseases (such as cancer and heart disease) that are major causes of death. Currently, the unit is undertaking two large international collaborative projects in China of the environmental and genetic causes of common chronic disease. One is a large-scale prospective cohort study, aiming to recruit 500,000 participants over a period of 4-5 years, and the other is a large-scale case-control study of 20,000 MI / Stroke patients and 10,000 controls from about 100 hospitals.

We are seeking an experienced person to join a team of epidemiologists, clinicians, administrators and computer programmers to help co-ordinate these two large projects collaborated between Oxford and two major medical institutes in China. You will be responsible for taking over the role of overall project management in Oxford for the on-going prospective study that is currently taking place in 10 regions in China and for the co-ordination of the planning and development of systems and documentation for the casecontrol study of MI and stroke that will be starting during late 2007.

You must have an advanced degree (or equivalent experience), and have at least 5 years' relevant experience in a medical research field. It would also be advantageous to have experience of working on an international, multi-centre trial or epidemiological study and to be familiar with various computing software packages and programming languages.

For details on how to apply please see [http://www.ctsu.ox.ac.uk/jobs/](http://www.ctsu.ox.ac.uk/jobs/) or contact the Admin Office on (01865) 743867 or e-mail recruit@ctsu.ox.ac.uk Please quote reference 06/30/ZC.

Closing date for applications is 20 November 2006.

**PEACE Data Systems Support Scientist**

Applications are invited for a position in the PEACE Operations Team at the Mullard Space Science Laboratory (University College London). Six PEACE electron spectrometer instruments (ten sensors) are currently collecting data on the ESA Cluster and CNSA/ESA Double Star magnetospheric research spacecraft.

The successful candidate will join a team responsible for all aspects of PEACE operations, from routine commanding and instrument performance evaluation, through data handling activities and in-flight instrument calibration, to providing accurate electron moments data (density, velocity and temperature). A background in space plasma physics, experience of handling large datasets, and familiarity with any of the following would be an advantage: Perl, C/C++, LINUX, IDL. The appointment will start as soon as possible and last one year. Salary in the spine point range 24-31, i.e. £22,111 - £27,193 depending on experience.

Applications, including a CV, names and addresses of three referees and a brief description of experience and aspirations, should be sent to Mrs E.A. Daghorn (ead@mssl.ucl.ac.uk), Mullard Space Science Laboratory, University College London, Holmbury St Mary, Dorking RH5 6NT U.K.

UCL Taking Action for Equality.

Closing date: 15th November 2006.

UEA NORWICH
School of Environmental Sciences Climatic Research Unit

Senior Research Associate
NERC Flood Risk from Extreme Events project
£26,402 per annum Ref: RA338

The Climatic Research Unit, within the 5** School of Environmental Sciences at UEA, seeks a highly motivated researcher to investigate the changing occurrence of precipitation extremes in the UK and Europe and to attribute such changes to variations in the atmospheric circulation and natural or anthropogenic climate change. The Senior Research Associate will work with Doctors. Tim Osborn and Nathan Gillett, analysing observations and existing climate model simulations using extreme value theory and statistical techniques developed for the detection of anthropogenic influences on climate.

The successful candidate will have a PhD or equivalent experience in a quantitative science, preferably in an area related to climate, meteorology or hydrology, together with proven statistical and computer programming skills.

The post is funded through the NERC Flood Risk from Extreme Events (FREE) science programme, with climate and hydrological collaborators at other UK institutions.

The post is for two years from 1 January 2007.

Closing date: 17 November 2006.

Interviews of short-listed applicants are expected to be held before the end of December 2006.

Further particulars and an application form can be obtained from the University's web page at: http://www.uea.ac.uk/hr/jobs/ or by e-mail at: hr@uea.ac.uk or by calling the answerphone on 01603 593493 or by mail to the Human Resources Division, University of East Anglia, Norwich NR4 7TJ.

POSITIVE ABOUT DISABLED PEOPLE
NTNU - Innovation and Creativity

The Norwegian University of Science and Technology (NTNU) in Trondheim represents academic eminence in technology and the natural sciences as well as in other academic disciplines ranging from the social sciences, the arts, medicine, architecture to fine arts. Cross-disciplinary cooperation results in innovative breakthroughs and creative solutions with far-reaching social and economic impact.

Available PhD position in marine modeling/cybernetics

The Department of Engineering Cybernetics at the Norwegian University of Science and Technology (NTNU, www.ntnu.no), Trondheim, Norway have in cooperation with SINTEF Fisheries and Aquaculture (www.sintef.no/fish), a PhD position available in marine modeling/cybernetics. The PhD student will work with mathematical modeling and simulation of integrated aquaculture systems. This will give the student an excellent opportunity to work with exciting problems at the intersection between biology and physics. The focus of the research will be to develop a coupled hydrodynamic and ecological model system that simulates ocean physics and biological processes in integrated aquacultures including interaction between fish, mussels and plankton.

The model aims to be a tool for assessing environmental effects of aquaculture and to design optimal integrated aquaculture installations and management strategies.

The candidate must be qualified to undertake a PhD and must have good skills in mathematical/numerical modeling or cybernetics. Some background in marine biology/ ecology is desirable, but is not a requirement.

Candidates are encouraged to send their CV, details of 3 referees and contact information to phdintegrate@itk.ntnu.no for further assessment no later than Dec. 1 2006. Qualified candidates will be invited to participate in the subsequent format application procedure. Salaries, employment conditions and more information about the project can be found at www.sintef.no/integrate.

SINTEF
NTNU

PhD Student Opportunity

Babraham Institute

The Babraham Institute is an international focus for innovative research in post-genomics studying gene function in cells, organs and systems, supported principally by the Research Councils. It is a recognised postgraduate teaching Department of the University of Cambridge. Starting either immediately, or in January 2007, a further studentship (in addition to those already awarded via our Open Day in January 2006) will be available at Babraham leading to a University of Cambridge PhD degree.

Eligibility for Funding: UK nationals and EU nationals with 3 years residency in the UK will have their academic fees paid and will be provided with a research council personal support stipend. Other EU and EAA nationals should consult the following website for details of eligibility and funding ([http://www.bbsrc.ac.uk/funding/training/eligibility.pdf](http://www.bbsrc.ac.uk/funding/training/eligibility.pdf)). Students will join a thriving scientific community situated on an attractive parkland campus near Cambridge. Our 70 students are all members of Cambridge Colleges and participate fully in University social and academic life ([www.bio.cam.ac.uk/gradschool](http://www.bio.cam.ac.uk/gradschool)).

Details of our scientific programmes can be found on [www.babraham.ac.uk](http://www.babraham.ac.uk). The Institute is fully equipped for state-of-the-art biological research including: innovative molecular biology, stem cell manipulation and transgenics, real-time laser scanning confocal microscopy, fluorescence sorting of cells, gene targeting and knockouts, mouse models of disease, mouse behavioural testing and proteomics. Selected students will be invited to the Institute to discuss their research interests and to view the Institute's facilities as soon as possible after the closing date.

The project available is detailed below; supervisor welcomes informal enquiries:
Dr Miguel Constancia ([miguel.constancia@bbsrc.ac.uk](mailto:miguel.constancia@bbsrc.ac.uk)) (BBSRC Strategic Research 4 year Studentship)
- Unravelling amino-acid transport System A: how does it contribute to development and disease?

Travel expenses will be paid to those invited to attend the Institute. Applicants should submit a full Curriculum Vitae with a covering letter indicating their interest in the project and ask two referees to write to the Institute on their behalf before the deadline. Please send your applications to Ms Linda Notton, Graduate Studies Programme, The Babraham Institute, Babraham Research Campus, Cambridge, CB22 3AT, Tel: 01223 496000, Fax: 01223 496022 or e-mail: Babraham.graduate@bbsrc.ac.uk, as soon as possible but ideally by 20 November 2006.

An equal opportunities employer. An Institute supported by the Biotechnology and Biological Sciences Research Council.

PhD Studentship

Targeted Cancer Therapy using Hybrid Viral/non-Viral Gene Delivery Vector Systems

Applications are sought from candidates with a first or upper second class honours degree or equivalent for a PhD studentship starting as soon as possible. Candidates with a degree in chemistry, pharmacy, biochemistry or chemical engineering are encouraged to apply. Due to funding restrictions only home or EU candidates are eligible for this studentship.

For further information please see: http://www.pharmacy.ac.uk/880.html

Applications containing a CV, three letters of recommendation and a cover letter should be sent to Dr. Kostas Kostarelos, The School of Pharmacy, 29/39 Brunswick Square, London WC1N 1AX, tel: 020 7753 5861, fax: 020 7753 5942, e-mail: kostas.kostarelos@pharmacy.ac.uk

The deadline for receipt of applications is 25 November 2006.

The School of Pharmacy is committed to equality of opportunity and selection on merit

Three PhD studentships available at UCL in ‘analysis of radar images’

All three studentships are suitable for candidates with a good first degree in Maths, Physics, Computer Science, Electrical Engineering or other mathematical science disciplines; or a relevant masters.

Applicants should send a CV to c.baker@ee.ucl.ac.uk with the subject line ‘radar studentships’. [2576-097 (2006) : 92]
DIVISION OF INFECTION & IMMUNITY
UCL

MRC STUDENTSHIPS
PhD studentships are available in the following groups:

Prof Arne Akbar  T cell memory
Prof Benny Chain  Dendritic cells
Prof Mary Collins  Gene therapy
Dr Michael Ehrenstein  Autoimmunity
Prof Vincent Emery/  Cytomegalovirus
Prof Paul Griffiths  infection
Dr Ariberto Fassati  HIV nuclear entry
Dr Michael Jacobs  Dengue haemorrhagic fever
Dr Paul Kellam  Kaposi sarcoma virus
Dr Mala Maini/  Hepatitis B virus
Dr Claire Dunn  immunity
Dr Emma Morris/  Tumour immunology
Prof Hans Stauss
Dr Mahdad Noursadeghi  HIV-1 & innate immunity
Prof Deenan Pillay  HIV-1 drug resistance
Dr Jürgen Roes  Immune regulation
Dr Yasu Takeuchi  Xenotransplantation
Prof Greg Towers  Antiviral host factors
Prof Patricia Woo  Juvenile idiopathic arthritis
Prof Alimuddin Zumla  International health

For full details please see:
www.ucl.ac.uk/medicalschool/infection-immunity/studentships.htm

CLOSING DATE: 30th NOVEMBER 2006
Action cancer  
Fighting for Freedom from Cancer

**Action Cancer PhD Studentship**  
Centre for Cancer Research & Cell Biology

Applications are invited for the Action Cancer Studentship within CCRCB, available immediately. The title of the project is "The role and regulation of osteopontin in breast cancer metastasis".

Applicants should hold a 1st class or upper 2nd class honours degree (or equivalent for overseas applicants) in a relevant biological science.

Further details on the studentship and an application form for postgraduate admission are available from the School of Biomedical Sciences website:  
[http://www.qub.ac.uk/schools/SchoolofBiomedicalSciences/Education/Postgraduate/PostgraduateResearchStudentships/](http://www.qub.ac.uk/schools/SchoolofBiomedicalSciences/Education/Postgraduate/PostgraduateResearchStudentships/)

Completed application forms should be submitted to the Admissions Office, Queen's University, Belfast BT7 1NN, Northern Ireland along with an up-to-date CV (which should include, in particular, information that is not reflected on the Application Form).

Note: CVs will not be considered unless accompanied by a completed application form.

Closing date: 24 November 2006. For further details on the project please contact: Dr M K El-Tanani (e-mail: m.el-tanani@qub.ac.uk).

Q  
Queen's University Belfast  
2 Sheina Marshall Research Students

Two fully-funded Ph.D. Studentships are available for research on the behaviour and fisheries ecology of:

a) Norway lobster (Nephrops norvegicus)
b) Common prawn (Palaemon serratus)

UMBSM is the National Facility for Marine Biology Fieldwork, situated on the Isle of Cumbrae in the Firth of Clyde. Applications by 10th November 2006.

For further details see www.gla.ac.uk/Acad/Marine

EUR7193
How can we produce more energy but lower carbon emissions?

Livio Accattatis has an answer.

Shell believes that most global businesses could significantly reduce their energy consumption and carbon emissions. And to prove it, we started with our own. Livio Accattatis is Principal Consultant on EnergiseTM, a Shell initiative designed to drive energy efficiency and reduce emissions across our businesses globally. Livio and his team have already cut CO2 emissions by 620,000 metric tonnes* a year from eight Shell manufacturing plants alone. It's about satisfying the growing demand for energy across the globe, without sacrificing our environment in the process. Find out how we're reducing greenhouse gas emissions at shell.com/livio

Islam and science: beyond the troubled relationship
Public Lecture
Tuesday, 12 December at 6.30pm
Professor Ziauddin Sardar

The Qur'an and the traditions of the Prophet Muhammad place great importance on science. Why is science so conspicuously absent from Muslim societies today? Ziauddin Sardar argues that science belongs at the very heart of Islamic culture and the survival of Muslim civilisation itself is intrinsically linked to this troubled relationship with science.

Supported by The John Templeton Foundation

Science, work and business
The insider Scandinavia

Northern highlights
Scandinavian science at its best ranges from robotic Christmas trees to drugs from sea sponges and a great line in embryonic stem cells. Nancy Bazilchuk investigates

FINLAND
In 1984, long before the Finnish cellphone company Nokia was a household name, the company's then chief executive Jorma Nieminen observed: "When an inventor in Silicon Valley opens his garage door to show off his latest idea, he has 50 per cent of the world market in front of him. When an inventor in Finland opens his garage door, he faces three feet of snow."

Finland may still have its deep snow, and the Baltic Sea may freeze at Helsinki's doorstep, but the country's current ranking by the World Economic Forum as the world's most competitive country economically suggests that investors are unlikely to care. The country's rags-to-riches success over the past two decades, the result of targeted public funding for R&D, has taught the Finnish government the value of planning ahead. The result is that investors and career seekers don't need a crystal ball to see what the government plans to support: in the summer of 2006 the Finnish government released not one but two foresight studies, one detailing shorter-term R&D investments and the other longer-term goals a decade away.

"Any government coalition has understood that R&D investments are key to our future development," says Martti af Heurlin, deputy director general of Tekes, the Finnish Funding Agency for Technology and Innovation. Even Nokia does its part: one-third of the country's R&D investment comes from the company.

At the top of Finland's near-term list is boosting national spending on R&D from 3.5 per cent to 4 per cent of GDP by 2011 (see Chart, right). The increase in government funding will be used to support five new alliances between research groups, called strategic centres of excellence. They will focus on energy and environment, metal products and mechanical engineering, forestry, health, and information and communication.

These centres will capitalise on Finland's resources and cater for its needs, says Heurlin. For one, alternative energy sources that make use of the country's extensive forests and peatlands are a priority. The hope is that the centres will help advance technology to the point at which it is in demand overseas, and duplicate Nokia's global success.

Some of the Finnish government's funding priorities could seem either counterintuitive or far-sighted, depending on your point of view. For example, Finland will continue to put money into the biotech sector in spite of weak international interest in investing in Finnish biotech. A recent Tekes review of the country's pharmaceutical industry noted only one significant investment in the first part of 2005, when a company called Ipsat Therapies in Helsinki, working on bacterial resistance, closed a €7 million deal.

Looking east
The country is also looking east for foreign investment, to Russia, China and Japan as expanding markets; in fact, many of the Tekes web pages have been translated into Chinese and Japanese in addition to English. The Finns are also interested in importing expertise: a joint programme between Tekes and the Academy of Finland, which funds university research, is designed to lure foreign researchers to Finnish universities for as long as five years, by offering to pay for costs such as moving family members in addition to

Behind Stockholm's medieval centre and old-world charm, there's some world-beating science funding the researcher's project. Finland's focus on applied rather than basic research means that competition is intense among university researchers to find support for their work. The Academy of Finland, which is responsible for funding basic research, commands an annual budget of just €200 million, or half of Tekes's annual €429 million for applied research.
Dennis Bamford, an Academy professor and head of the Finnish Centre of Excellence in Virus Research at the University of Helsinki, says one major problem for Finland's basic research is the university system, which has too few research spots for young PhDs and postdocs. Young researchers can be awarded an Academy Research Fellowship for five years, but this fellowship is non-renewable. Although this is also a common problem in other countries, it is exacerbated in Finland by the fact that there are few permanent university positions at all between postdocs and professors, and the latter tend to hold their appointments until they retire. "When the fellowship runs out, you are in deep trouble," says Bamford. "We lose talent."

Concerns about the Finnish brain drain have not fallen on deaf ears. In June, the prime minister's science and technology policy council proposed providing more research-specific posts for young scientists at the country's research institutes and universities.

SWEDEN
Stockholm's charming medieval centre and boat-bedecked waterfront exude old-world charm, but make no mistake - there's big science going on here and throughout the rest of the country. By one measure at least, Sweden leads the world in investing in science and technology. It has an enviable 4.27 per cent of its GDP committed to research and development, which is well above the European Union average.

To see this in action, you need look no further than the Swedish Human Proteome Resource Programme. One of the country's most visible success stories, it is the nation's largest research project, with a budget of 540 million Swedish krona ($75 million). Based at the Royal Institute of Technology (KTH) in Stockholm and Uppsala University, the project is gearing up to publish the second instalment of its Human Protein Atlas this October. This will provide images of where and how proteins are expressed in healthy and cancerous tissue, to help biochemists understand how newly discovered proteins work. "It's my dream project," says the programme director, biochemist Mathias Uhlén of the KTH.

The Human Proteome Resource Programme illustrates a common characteristic of Sweden's R&D. Only 25 per cent of its funding comes from the Swedish government; the EU gives another 5 per cent, but the rest comes from the Knut and Alice Wallenberg Foundation, a charitable trust. In fact the majority of the nation's R&D is paid for by businesses and private foundations.

Uhlén, who has served as an adviser to the Swedish government, says he has tried to send a consistent message to politicians. Government spending, at less than 1 per cent of GDP, is simply not enough. "This makes us just average in Europe." The magic number? "1.5 per cent," he says. "Sweden has a very good tradition and a history with science, but I think that we excel in the industry side rather than on the university side."

While this may mean that academic scientists have to work harder to win funding, there are plenty of opportunities for researchers in Swedish industry particularly in the life-sciences sector. In 2005, biotechnology and medical technology accounted for nearly one-third of all venture-capital investment in Sweden, according to the Stockholm-based Swedish Private Equity and Venture Capital Association. That investment has helped Sweden's biotech industry to become the fourth largest in Europe in terms of number of companies.

Thanks to Swedish law, one area in particular is benefiting from the life-sciences boom. Biotech companies working with

human embryonic stem cells have greater freedom compared with many other countries, and have
tapped markets in countries with stricter legislation. The Gothenburg-based company Cellartis, the
world's largest supplier of human embryonic cell lines, signed an agreement this summer with US
company Invitrogen to develop novel engineered embryonic stem-cell lines.
Sweden's welcoming business environment and bioscience know-how also means that it is attractive to
international companies. GE Healthcare has its Life Sciences business global headquarters in Uppsala,
45 minutes from Stockholm, where the company has a Centre of Excellence in Protein Science, along
with a world-class research programme on molecular imaging using PET scanners.
The science is strong enough to draw researchers from China, India and North America, but another
attraction is Sweden

itself, says Peter Ehrenheim, CEO of GE Healthcare's Life Science business. Sweden's research hotspots
may be located in cities such as Uppsala or Stockholm, but researchers can still choose whether to live
in the city or the country. Choose the right community
Case study
Sarah Butcher, 38, is a British-born virologist who studied for her PhD at the European Molecular Biology Laboratory in Germany. She is currently an Academy of Finland research fellow and heads a research group in the University of Helsinki's Institute of Biotechnology.

WHAT’S IT LIKE BEING AN EXPAT IN FINLAND?
I love the country, the nature, the social system, the safety and the relaxed lifestyle, with four weeks' summer holiday...not necessarily in that order! The weather is great in the summer, and I like outdoor sports so the winter is OK. And then there's the sauna... the great equaliser. If you want to get a Finn to talk to you, take a sauna with them.

HOW HARD HAS IT BEEN FOR YOU TO LEARN FINNISH?
We speak English in the laboratory, but I do speak Finnish and that is certainly an advantage. If I don't know a word in Finnish, I just throw in the English word and it seems to work.

HOW DO SALARIES COMPARE WITH THE UK?
My gross salary is about €40,000 a year, and I pay 32 per cent tax. This includes cover for social security and pensions, free healthcare and subsidised child care. This last one is a big plus, I only pay €200 a month for my son. And there's the parental leave - up to three years and it can be shared between parents.

WOULD YOU CONSIDER MOVING BACK TO THE UK?
Given the right offer, I would certainly consider it, but it will be hard to beat the location and lifestyle we have at the moment.

and you can go skating from right outside your door, or boating in the summer among the 24,000 islands that make up the archipelago outside Stockholm, says Ehrenheim. "For people who want to be in the outdoors in their spare time, it's a great place to live."

DENMARK
Denmark is a natural incubator. In one area the size of Silicon Valley, the country boasts a cluster of eight universities, six university hospitals and more than 140 biotech companies. Public funding for R&D in Denmark has remained relatively flat over the past few years, but researchers say the current government is making good on its pledge to pump up public funding from just under 0.8 per cent of GDP to 1 per cent. Among the government's first steps towards this has been the creation of a body to finance university-industry collaborations. In its first year, the Danish National Advanced Technology Foundation has awarded 200 million Danish kroner ($34 million) to 12 projects. There were some surprises in the foundation's decisions. One group won 3.8 million kroner ($640,000) for its efforts to grow the perfect Christmas tree using a technique that brings together robotics and genetics. "[The project] is a combination between biotech, where they try to modify the structure of the trees at the cellular level, and robot technology to plant the trees," says Thomas Sinkjaer, who is on the foundation's board. "It's a combination of two worlds." The decision is slightly less surprising once you realise that Danish trees are big business. The country's landscape – rolling fertile fields on the mainland of Jutland with a scattering of 400 islands to the east – is peppered with tidy forests that supply nearly a fifth of the 70 million Christmas trees sold in Europe each year. Most of the other projects are less esoteric, and build on the country's traditional strength in biomedical research. Danish biotech researchers lead the world in the number of biotech patents per capita. One thing that has fuelled this is the willingness of the Danish population to participate in clinical trials. "There is a tradition in Denmark, where the need for research with human trials is acknowledged," says Sinkjaer. "People know this has to be done to move forward."

Small, but welcoming
Sinkjaer's own research group at the Centre for Sensory-Motor Interaction (SMI) at Aalborg University shows this in action. "We have really been able to progress quite quickly to clinical investigations," he
says. At his centre, engineers and neurologists are working side by side (interdisciplinary collaboration is common as a result of Denmark's compact research scene) to restore impaired sensory-motor functions in the brain, be it in people who have been paralysed by strokes or in the development of advanced prostheses for amputees.

Denmark's relatively small research community is not exclusive however – researchers from overseas are in demand. Lars Arendt-Nielsen, co-director with Sinkjaer of SMI and a professor at Aalborg University says that when the centre was first established, researchers recognised that they would have to attract international students to fill at least half of the research positions. "We knew we would run short of qualified researchers," he says. It's an effort being mirrored across the country as universities recruit more aggressively on the international market for researchers and graduate students. "We often invite [researchers] for a visit," says Sinkjaer. "When they realise how many other foreign PhD students there are here, it's a strong motivator for them to come."

NORWAY

Deep fjords and a 22,000-kilometre crenulated coastline mean that Norwegians are master mariners. The North Sea has played a major part in the country's economy for many years - in particular providing its oil and gas industry, which has had a strong influence on the R&D the country has chosen to support. Some day the oil will run out, though, and Norwegians are making a conscious effort to look beyond petroleum. Norway has traditionally remained cautious about channelling its oil wealth back into the economy, and at present the country spends just 1.73 per cent of its total GDP on R&D, the lowest of the Scandinavian nations and below the European Union average (Norway is not a member of the EU).

In June this year, the Norwegian minister of trade and industry, Odd Eriksen, signalled a commitment to change. "We have more legs to stand on than just oil and gas," he said. He was speaking at the announcement of an eight-year, 1.12-billion kroner ($170 million) programme to help nurture Norway's science. This money will be used to build 14 new centres for research-based innovation, where businesses and scientists will collaborate at the country's universities or research institutes. Some will nod towards the country’s nautical experience, with research on aquaculture technology for farming marine plants and seafood, and a new ocean-life prospecting centre hosted by the University of Tromso will screen marine organisms for compounds that could lead to new drugs. Others will explore research such as stem-cell tumour therapy, while at a telemedicine centre in northern Norway scientists will team up with partners such as IBM's Zurich.

Researchers are studying marine life from the fjords for compounds that could be developed into drugs laboratories to develop equipment such as smart sensors for elderly or chronically ill people who wish to live at home.

Meanwhile, Norway's foray into functional genomics, FUGE, is four years old and thriving, with funding recently extended to 2011. The programme will develop national proficiency in genomics in relation to basic biology, medical and marine research. FUGE's backbone facilities cover 11 areas of expertise, from a transgenic-animal development lab to a bioinformatics centre. The centres have been spread across the country's academic institutions, in Oslo, Bergen, Trondheim, Tromso and As, as part of government's policy to build collaboration between universities and keeping all parts of the country economically vibrant. This year, government spending on FUGE topped 170 million kroner ($27 million), says Ole Petter Ottersen, chair of FUGE's programme board and director of the Centre for Molecular Biology and Neuroscience at the University of Oslo.

Despite all this investment across wide areas of science, for now petroleum remains the critical driver for the Norwegian economy. With oil prices topping $70 a barrel, it is no surprise that Norway continues to pour money into R&D in the oil and gas industry.

In 2007 Norway's state-owned oil company Statoil, is due to open an enormous gas field in the Barents Sea called Snohvit. Norwegian companies are keen to get the edge on bidding for contracts in nearby Russia using the new technology developed for Snohvit, as the Russians gear up to develop the Shtokman gas field, one of the largest unexploited gas fields in the world.

Scandinavia's largest independent research firm, SINTEF, is based in Norway and is benefiting from oil fever. This is well illustrated by the 80-metre-long water test tank at the firm's Marintek research headquarters in Trondheim, 500 kilometres north of Oslo. This year, the tank has been in continual
demand, says Tor Einar Berg, principal research engineer with Marintek. Engineers are testing scale-model designs for everything from oil platform supply ships to the special barges designed to carry materials to the Barents Sea for the Snohvit development.

NIVA

Vacant position: Research Scientists,
Aquatic Ecotoxicology and Risk Assessment

The Norwegian Institute for Water Research (NIVA) is an internationally oriented competence centre for water-related research and development activities on environment and resources, such as monitoring, feasibility studies and integrated water resources management. NIVA provides information regarding water-related issues at the national and international levels to authorities, the private sector and the public. NIVA is a private research foundation, and is the largest interdisciplinary applied water research centre in Norway. The NIVA Group, comprising NIVA and its four regional offices in Norway, the subsidiary consultancy company Akvaplan-niva in Northern Norway as well as Geomor-NIVA in Poland and AquaBiota Water Research AB in Sweden, has a total staff of 220 and an annual turnover of €22 million.

NIVA's Aquatic Ecotoxicology and Risk Assessment section has a diverse and international portfolio of research and consultancy activities in both the freshwater and marine environments. Work focuses on the fate and effects, environmental hazard and risk assessment as well as the monitoring of priority and emerging contaminants.

The section has a sound and proven track record in the use of bioassays biomarkers, environmental chemistry and their integration to identify the causes of toxicity. We work closely with colleagues from NIVA’s other scientific sections to provide interdisciplinary solutions to complex environmental problems.

We invite applications from interested ecotoxicologists and/or risk analysts with a successful track record of research and project acquisition. We are particularly interested in candidates with an interest in developing their own portfolio, particularly in the regulatory (e.g. REACH), risk analysis or molecular areas. Candidates will be expected to have a PhD or equivalent qualification and/or relevant experience within the environmental sciences.

The deadline for application is the 15th December 2006.

For more information and details, please see www.niva.no/english

Borealis is a leading, innovative provider of plastics solutions. Its technology shapes daily life products and forms the basis of next generation innovation and creative development in plastics.

With EUR 4 billion revenue in sales and 4,500 employees, Borealis has more than 40 years of experience as a reliable supplier of polyethylene (PE) and polypropylene (PP) products. Borealis today is a partner to its customers manufacturing and developing products such as food packaging, diapers, appliances, normative parts, distribution pipes for water, gas and sewage, power cables, sporting equipment and medical devices.

Borealis is headquartered in Vienna, Austria with innovation centres, customer service centres, and main production sites in Europe and the Middle East. Borealis has representative offices and operations in Asia, North and South America.

At its heart, the company’s four values of Responsible, Respect, Exceed and Nimblicity™, define its way of doing business. For Borealis, success is driven by responsiveness, operational excellence and innovation.

Borstar® is the proprietary process technology supporting differentiated PE and PP products and is a registered trademark of Borealis A/S Denmark.

Researcher Spectroscopy
InnoTech Operational Services, Bamble, Norway

Role purpose
In order to further develop Borealis' analytical expertise in Spectroscopy, InnoTech Analytical & Physical Testing in Bamble is recruiting a researcher. The Researcher reports to group leader analytical testing.

Contribution
- Utilize and develop spectroscopy techniques, technical expert in FT-IR area
- Development of existing/new characterisation methods able to differentiate our polymers from those available on the market
- Characterise Borealis' polymer grades according to specific FT-IR techniques, establish and maintain a common product database together with other analytical researchers
- Active participation to Borealis' patenting strategy involving standard and "non standard" polymer characterisation techniques
- Active role in solving difficult analytical problems (e.g. development work, support to customers both internal and external and claims handling)
- Internal networking with other research areas (polymer design) and business units (Film & Fiber, Moulding, production)
- External networking with universities, research institutes
- Scientific presentation at international conferences and publication of articles in scientific journals
- Continuous literature survey in spectroscopy area

Skills
- University degree, minimum M.Sc. in chemistry/polymer science and preferably PhD level
- 5-6 years of industrial or university experience in techniques described in the job description
- Excellent theoretical and practical knowledge of FT-IR analytical technique (experience with polyolefin films regarded as an asset)
- Fluent in English and excellent communication

Behaviour
• Impact and influence  • Analytical and conceptual thinking.
• Achievement orientation  • Building interpersonal relationships and teamwork
• Innovation  • Expertise  • HSE awareness

Other information
Duration of assignment: Permanent position
Location: Bamble, Norway
Application deadline: December 18, 2006

For more detailed information please contact Heidi Bryntesen,
+47 35 57 75 38/ +47 959 34 716 or Henning Baann, + 47 35 57 74 39 / + 47 915 50 935

If you are interested in this role and meet most of the above criteria, please email your application / CV marked Researcher to Norway.Jobs@borealisgroup.com

ECTS
European Calcified Tissue Society

Grants & Awards
ECTS promotes excellence in research into the field of calcified tissues within Europe, and ensures the findings are disseminated to enable benefit to patients with bone disease. A "Grants and Awards" programme is available for ECTS young members. For more details, and to become a member visit the ECTS website at: www.ectsoc.org

The Alliance for Better Bone Health Iain T Boyle Award
DEADLINE 8 DECEMBER 2006
The Alliance for Better Bone Health Iain T Boyle award is open to young scientists who are within 10 years of completing their PhD and have made significant contribution to the field of bone and calcified tissue.

ECTS-Career Establishment Award
DEADLINE 8 DECEMBER 2006
This award is open to ECTS members with an established track record of research into basic or clinical aspects of bone disease who are within 3 years of being appointed to a faculty position in a higher educational institution. It aims to help develop an independent research program with a grant of up to €50,000, over a 2-3 year period.

ECTS Young Investigator Awards and Travel Grants
ABSTRACT DEADLINE 8 DECEMBER 2006
34th European Symposium on Calcified Tissues, 5-9 May 2007, Copenhagen
The ECTS Young Investigator Awards and Travel Grants are available to members of ECTS who are aged 35 or under. These awards are given to the highest-scoring abstracts submitted to ECTS annual meetings.

ECTS-AMGEN Fellowship
AMGEN
DEADLINE 23 FEBRUARY 2007
Applications are invited from scientists at the beginning of their research career who wish to conduct research into basic or clinical aspects of bone disease. Applications in all relevant areas of bone biology will be considered, but those which increase understanding of the role of RANK, RANKL or OPG in bone biology would be particularly welcome. Successful candidates will be awarded a fellowship of 3 years duration with a value of €125,000, based at a higher educational institution within Europe.

ECTS Exchange Scholarship Grants
NO DEADLINE
The primary aim of these grants is to enable researchers to spend time in another laboratory to learn a technique not used in the home laboratory. Applications are accepted throughout the year.

34th European Symposium on Calcified Tissues
5-9 May 2007
ABSTRACT DEADLINE 8 DECEMBER 2006
COPENHAGEN DENMARK

[2580-008 (2006) : 57]
University of Iceland in collaboration with the Fishing Company VSV Ltd and Rutgers University are offering a PhD fellowship that will focus on problems attached to the lobster fishery in Iceland.

The project will be based at the Institute of Biology, University of Iceland in Reykjavik Iceland and the Vestmannaeyjar Research Center (in Vestmannaeyjar islands south of Iceland). It will be conducted in collaboration with VSV Ltd (a fishing company located in Vestmannaeyjar), Prof. Kenneth Able, Rutgers University and Prof. Mark Sullivan, Stockton College, NJ USA.

The Fellowship will last for three years. The successful applicant is expected to commence in spring 2007. The grant will start at SK 2,000,000 per year (-$27,000/year). An initial relocation and an annual travel allowance is also included.

The main objective is to explore the life history and behaviour of the Norway lobster (Nephrops norvegicus) as well as the influence of fishing activities on the quality and sustainability of the catch in an effort to improve the gain of the lobster fishery in Iceland. The profit of the lobster fishery in Iceland suffers from low shell condition. Generally, 20-30% of the catch contains individuals with damaged shells or claws. The aim of the project is to explore all potential causes including the effects of fishing activities on the lobster and their habitats as well as seasonal and daily behavioural patterns.

The applicant should possess: Solid background in biology, statistics and ecology, excellent English skills and good scientific writing skills. The level of education should be MS or similar.

Applications including a letter of application, a full curriculum vitae including documentation for academic degrees and a minimum of two references should be submitted as soon as possible and sent to: Prof. Gudrun Marteinsdottir (e-mail: runam@hi.is; http://www.hi.is/~runam), Institute of Biology, The Natural Science Building Askja, Sturlugata 7, 107 Reykjavik, Iceland.
NTNU - Innovation and Creativity

The Norwegian University of Science and Technology (NTNU) in Trondheim represents academic eminence in technology and the natural sciences as well as in other academic disciplines ranging from the social sciences, the arts, medicine, architecture to fine arts. Cross-disciplinary cooperation results in Innovative breakthroughs and creative solutions with far-reaching social and economic impact.

Centre for Quantifiable Quality of Service in Communication Systems, Centre of Excellence

Up to 8 PhD scholarships

The Centre invites promising PhD candidates to work with challenging research tasks in a stimulating and international working environment. Applicants should have a honours masters degree or equivalent within relevant areas.

Vacant Positions for Postdocs and Visiting Professors/Scholars

The Centre deals with Quality of Service (QoS) issues in heterogeneous, multilayered networks where packet switching technology is employed. The Centre works within the following areas: new network structures, wireless networks included, multimedia signal processing, dependability, traffic and security as applied to multiparty communication between stationary and mobile users.

For further information see the Centre's website at http://www.q2s.ntnu.no or contact the Director of the Centre, Professor Svein Johan Knapskog, phone: + 47 735 94328, email: knapskog@q2s.ntnu.no.

The application deadline is 15 January 2007.
Our people drive our energy business forward…

...bringing innovation and inspiration to the way we work

We are a dynamic, integrated energy company. with 9,000MW of low cost coal, oil and gas fired power stations, along with wind, hydro and cogeneration plants. Set alongside our generation strength is our retail brand, npower, which is one of the UK’s largest energy suppliers, with around 6 million customers.

Environmental Specialist
Interaction of Power Stations and the Aquatic Environment
Swindon £30,000 - £50,000 + Excellent Benefits
In this vital role, you will provide expert technical advice to all our business units, focusing on the interaction of thermal power plants with the aquatic environment. In particular, you will apply industry standard modelling packages and analyse and interpret results in depth, contributing significantly to power plant development projects.

A good degree in a numerate discipline will have given you impressive mathematical and analytical skills, and you will bring a proven track record in applying hydrodynamic and water quality models and developing environmental impact assessments for fresh, estuarine and marine waters. Most importantly, you will be skilled in the application of at least one of Mike11/Sobek, Delft-3d/Mike2l/Mike3/Telemac or similar packages, and ideally familiar with managing offshore hydrographic and plume field survey contracts.

To apply for this position, please email your CV, quoting reference SN215, to sharedserviceshr@rwenpower.com If you do not have access to email, please fax your application to 0845 166 3251 or post it to RWE npower, HR Service Centre, Clearwater Court, Vastern Road, Reading RG1 8DB. Closing date for applications is Friday 8th December 2006.

RWE npower is fully committed to equal opportunities and diversity. We particularly welcome applications from those of ethnic origin, those with a disability and women, as these groups are under-represented across the recruiting division. Appointments are made to suitable individuals solely on the basis of their ability. We operate a no smoking policy.
HEAD OF WILDLIFE DISEASE ECOLOGY TEAM
BAND 7       REF: CSP 2999PERMANENT

We are looking for a dynamic and experienced scientist with a track record of excellence to lead and manage the work of the Wildlife Disease Ecology Team at CSL. This Team undertakes applied research on the role of wildlife in zoonotic diseases of concern to human and animal health. This includes a research portfolio currently valued at £2.5 million per annum and over 30 staff conducting research on wildlife disease issues. Long-term field studies and research include TB epidemiology and rabies contingency planning. The post will be based at our field station and long-term study site near Gloucester.

The ideal person will have a minimum of ten years research or policy related experience in a suitable field. A strong and detailed understanding of issues relating to wildlife and wildlife diseases in the UK and experience of leading, motivating and developing a team of scientists and advisors is also necessary.

The post will involve close liaison with Defra policy staff to present and interpret the findings and conclusions of research on wildlife disease issues. Experience of working at the interface of research and policy and of presenting the outputs of science to policy makers at a senior level will be of value.

Closing date for applications is 21 December 2005.

For an application pack call 01904 462302 or email jobs@csl.gov.uk. Further information and an application form are also available on the CSL Internet site at www.csl.gov.uk.

CSL is an Equal Opportunities Employer. We operate flexible working practices and the York site includes various staff facilities.

CSL
Science Serving Agriculture, Food and the Environment

The Central Science Laboratory (CSL) is an Executive Agency of the Department for Environment, Food and Rural Affairs (Defra). The Agency provides policy advice and technical support underpinned by high quality R&D to help Defra and other customers safeguard food supplies, protect consumers and the environment.

[2580-012 (2006) : 58]
OPEN TO INNOVATION

Scientist

Innovation takes imagination and vision. It also takes an openness to explore new ideas and approaches. Join us as a Scientist at our state-of-the-art research facility in Horsham, West Sussex, and you'll have the freedom to do just that.

In this challenging position, you will be part of a large multi-disciplinary team conducting exploratory research to identify and validate targets for cystic fibrosis and COPD. Predominantly laboratory based, you will focus on in vivo model development and compound profiling, with the flexibility to undertake in vitro work as required. Educated at least to BSc/MSc level, you will need extensive experience in in vivo pharmacology- specifically in the areas of respiratory and inflammation - while histological experience would be a distinct advantage. As you will be presenting results both internally and externally and preparing reports for a variety of journals, you will need to be professional and co-operative with excellent communication skills.

To find out more, view descriptions of all open positions and to apply online, visit www.novartis.com quoting the reference number 22592BR. Closing date: Friday 22nd December 2006.

NOVARTIS
NOVARTIS INSTITUTES FOR BIOMEDICAL RESEARCH
The New Pathway to Drug Discovery
Two Research Associates/Assistants at the
MRC Laboratory of Molecular Biology, Cambridge

Two Career Development Fellows are required for a three year research project, working in Murray Stewart's Structural Cell Biology Group. You will undertake research projects focusing primarily on the structure of protein complexes related to nuclear transport and related areas. The interdisciplinary nature of these projects will require the integration of structural, cellular, molecular and biochemical methods. Recent work from this research group includes: Science, 302:1405, Nature, 432:872, Nature, 435:693 and EMBO J. 24:3681. For further information, please visit: http://www2.mrc-lmb.cam.ac.uk/SS/Stewart_M/group. One Fellow will concentrate on the expression, purification and characterization of proteins and complexes involved in nuclear trafficking and mitosis, whereas the other Fellow will concentrate on their structure and function.

You should have a PhD or equivalent experience, a strong publication record, and should have experience in protein expression, purification and characterization, or in Structural Biology. Experience in a relevant area of Cell Biology would be an advantage. Informal enquiries to Dr Stewart (email: ms@mrc-lmb.cam.ac.uk) are welcome.

The starting salary will be in the range of £24,993 - £26,024 per annum (depending on qualifications and experience) supported by a flexible pay and reward scheme and optional final salary pension scheme. We can offer 30 days annual holiday entitlement plus public holidays and excellent sports and social facilities are available on site.

To apply, please send a cover letter, a full CV with publication list, and the contact details of two professional referees who can be approached prior to interview. In your cover letter please outline your career goals and state how you would be able to contribute to the group's research effort.

Quoting job reference CAM 145, please email your application to the Recruitment Team: recruitment@ssc.mrc.ac.uk.

Closing date: 22nd December 2006.

Investing in People and Ideas
[2580-015 (2006) : 59]
Clinical Scientist in Haematology Genetics
Band 7 £27,622 - £36,416 Full-time

Joining our team of healthcare scientists and clinicians, you’ll share our collaborative approach to providing haematology molecular diagnostic services. In return, you’ll enjoy every opportunity to shape this all-new post, contribute to HMD service development and build your experience by playing a key role in what is a rapidly evolving specialist area of clinical diagnosis.

Services continue to expand in line with the newly funded “Haematological Malignancy Diagnostics” (HMD) initiative, which is being established to provide central specialist diagnosis for haematological malignancies across the Greater Manchester and Cheshire Cancer Network.

Primarily providing high-quality haematology molecular diagnostic services, you’ll work closely with the Principal Clinical Scientist to establish assays for the isolation of genetic material from lymphoma tissues. State of the art technology will then be used to study gene rearrangements which contribute to the cancer phenotype. These assays will be offered as a diagnostic tool in the identification and classification of the haematological malignancies. Located in the recently refurbished and equipped Molecular Diagnostics Centre at the Manchester Royal Infirmary, areas of molecular oncology service provision from the laboratory presently include the leukaemias and myeloproliferative disorders, including monitoring of minimal residual disease (MRD) in patients with CML, AML and APL. Expansion to HMD will require development of molecular diagnostic techniques for lymphomas.

We welcome applications from HPC-registered Clinical Scientists in haematology or genetics, as well as pre-registration clinical scientists in these disciplines who have completed their formal training programme and are presently working to develop their portfolio for submission to the Association of Clinical Scientists and subsequent HPC-registration. To discuss the opportunity informally, please call Dr Abida Awan on 0161 276 4137 or Dr Tony Cumming on 0161 276 4880 or email abida.awan@cmmc.nhs.uk or tony.cumming@cmmc.nhs.uk

Apply online or call the Recruitment Office on 0161 276 6666 for an application form.

Please quote ref: CSS476.

Closing date: 7th December 2006.

We are an equal opportunities employer.
We welcome applications on a full or part time basis.

POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE
**Business Manager/Associate Business Manager**  
**Glasgow/Central London**

Cancer Research Technology (CRT) is a specialist commercialisation company which aims to develop new discoveries in cancer research for the benefit of cancer patients. CRT is owned by the charity, Cancer Research UK.

CRT's role is to identify, protect, develop and commercialise intellectual property from both Cancer Research UK and institutions worldwide, to deliver patient benefit. CRT works closely with cancer researchers and their institutes to protect the intellectual property arising from their research and to establish links with commercial partners. CRT facilitates the discovery, development and marketing of new cancer therapeutics and diagnostics.

CRT now wishes to recruit a member to the Business Management team, who will be involved in all aspects of intellectual property management and commercialisation at the Beatson Institute of Cancer Research in Glasgow. The position will include liaising with cancer researchers to identify promising technologies, performing patent and commercial searches, managing the patent process and helping to formulate and carry out commercialisation.

The successful candidates will be qualified to PhD (or equivalent) level, preferably with experience in oncology and/or commercial drug discovery/development. Appointment to Business Manager level requires relevant experience in technology transfer and/or licensing. You will be proactive in dealing with commercialisation activities and have excellent communication and organisation skills.

The position will require the individual to be located for at least an initial 6 months in our London office, prior to being located in Glasgow. It will involve regular travel to our London office plus other centres in Scotland, as well as within the UK and possibly overseas.

The salary, depending on experience will be £29,700 - £43,000 per annum

To apply for this position, please send two copies of your CV and a covering letter, quoting the reference number Glasgow 1106, to the HR Manager, CRT, Sardinia House, Sardinia Street, London WC2A 3NL or by email to crtrekrutment@cancertechnology.com

FERRING PHARMACEUTICALS
MEDICINE ON THE BODY’S OWN TERMS

Ferring Pharmaceuticals is a speciality, research-driven bio-pharmaceutical company active in the global market. The company identifies, develops and markets innovative products in the fields of urology, gynaecology, gastroenterology and endocrinology.

High-throughput Organic Chemist
We are seeking a highly motivated synthetic organic chemist to join our drug discovery team. The post will be focused on the provision of high-throughput chemistry, both in terms of technology development and synthesis of compound libraries. It will utilise and build on existing parallel synthesis technologies already installed at Ferring. The successful candidate will be responsible for the ongoing development of Ferring’s compound libraries.

Specific requirements are:
• Good degree in chemistry
• Excellent high-throughput and traditional organic chemistry skills
• Relevant experience in a drug discovery environment
• Demonstrable abilities to interact effectively with medicinal chemists
• Proven abilities to take initiative an development of new technology
• Masters or PhD level qualification will be an advantage

We offer the successful applicant an inspiring and innovative inter-disciplinary environment located within the pleasant surroundings of a green-field science park. Also we offer a competitive benefits package including attractive salary, non-contributory pension scheme, group income protection and health insurance cover.

Applications in writing together with CV should be sent to:
The Personnel Office, Ferring Research Limited, Southampton Science Park, Southampton SO16 7NP, UK.
Email: admissions@ferring-research.co.uk.

Dstl is part of the Ministry of Defence

Where site safety becomes a matter of national safety

Chemical Safety Advisor
£32,000 + benefits - Porton Down, Nr. Salisbury

Dstl, the Defence Science and Technology Laboratory, is the centre of scientific excellence for the Ministry of Defence. At Porton Down, some of the country's most talented scientists and engineers are addressing matters of national security-which means health & safety at the site can never be compromised.

As part of our SHEF team, you'll work at the cutting edge of chemical science, inputting to a range of research programmes and support services. You'll be advising scientists working with extremely hazardous materials. This will involve reviewing risk assessments, delivering specialist training, carrying out audits and inspections and conducting accident investigations.

A graduate or equivalent in chemistry or chemical science, you'll have experience of working with toxic substances gained in a field trials or lab-based role. Knowledge of COSHH regulations will ideally be supported by an NVQ Level 3 qualification or equivalent. The communication skills to liaise with people at all levels will also be important.

In addition to a stimulating and rewarding career with real development potential, as a civil servant you'll enjoy a competitive benefits package. This includes a choice of pension schemes, generous holiday allowance, childcare vouchers (for pre-school children), relocation assistance where appropriate, good sports and leisure facilities and flexible working hours.

Applicants who reach a suitable standard in this campaign, but are not appointed, may be considered for other vacancies.

Dstl is committed to diversity and recruits on the basis of specified competencies and skills. This permanent post is only open to UK Nationals who are willing to satisfy Government / MOD security vetting procedures.

For an application pack, please contact, quoting the reference 021006, Response Solutions, aia*, 5 St John's Lane, London EC1M 4BH. Email: response@aia.co.uk Tel: 020 7553 9120 (9.30am - 5.30pm). If you have a hearing Impairment we are happy to accept Typetalk calls.

Closing date: 31st December 2006.

*aia is handling the response to this advertisement on our behalf. Your details will be sent to Dstl only and will not be used for any other purpose.

PUBLISHING EDITORS x2

We are: an international publisher of scientific journals and magazines, and a world leader in electronic publishing.

We seek: friendly, confident and dedicated team players with strong communication, organizational and interpersonal skills plus excellent scientific judgment to join our busy, expanding Journals Publishing Department.

One position will require a keen interest in physics and/or mathematics and the other in physics and/or nanoscience.

You will: play a key role in the scientific assessment of papers submitted for publication, selecting reviewers, taking decisions at key stages of the peer-review process and assisting with the development of one of our most prestigious journals. The job will also involve contributing to journal development strategy; identifying and exploiting publishing opportunities, supporting the publisher at board meetings, representing the journal at conferences and visiting key academics around the world. This is an excellent opportunity for someone to begin a career in scientific publishing with a rapidly growing organization.

You should: have a first degree in physical science, mathematics or a related subject. We also welcome candidates with a PhD or other further qualification.

The starting salary will be in the £17,258 - £18,336 range.

Attractive benefits include generous holiday entitlement, pension, life assurance and medical insurance.

For an application form, which should be returned by 15 December, contact Lisa Palmer, Human Resources Assistant, Institute of Physics Publishing, Dirac House, Temple Back, Bristol BS1 6BE. Tel: 0117 929 7481.

Closing date: 7 December 2006

An Equal Opportunities Employer

ROTHAMSTED RESEARCH
An exciting vacancy has arisen that offers the opportunity of working with the major supporter of cancer research in UK institutes, universities and medical schools. The vision of Cancer Research UK is to work together to beat cancer. We are the largest volunteer-supported cancer research organisation in the world with a dedicated team of 3,000 staff and an annual scientific spend of more than £200 million.

Senior Research Manager (Institutes Funding & Scientific Events) - the purpose of this job is to take a lead role in the implementation of Cancer Research UK's strategy with respect to Institutes, particularly the development of the funding relationships with the Institutes, and to manage, in partnership with another Senior Research Manager, the organisation of Institute Reviews to the four core funded Institutes, including the newly established Institute in Cambridge. We have recently undertaken a review of the management and funding of our Institutes, and the review of one of the four core-funded Institutes is currently in the planning stage. You will also be responsible for the scientific aspects of the organisation of the Senior Researchers' Meeting and for developing Cancer Research UK's portfolio of researchers' meetings and you will manage the process for reviewing senior scientific salaries.

You will have obtained a PhD in a bio-medically-related area and will have completed a period of postdoctoral research of at least one year. You will have experience in research administration, preferably in a research funding agency or in university administration, plus experience of managing and supervising staff. You should have an understanding of the issues currently affecting funding in the Institutes sector.

You must have excellent written and oral communication skills and an organised and adaptable approach is essential. The ability to think strategically, to put information in context and to interpret complex information is also important. Strong IT skills are essential (including familiarity with Microsoft Office and with internet-based searches) as is the ability to deal calmly with people at all levels. In this role you will be expected to work closely with other research managers within the Directorate in order to deliver your set objectives. These roles demand the ability to work both independently and as part of a team.

For further details and to apply online, please visit https://jobs.cancerresearchuk.org/

Alternatively please send in a copy of both your covering letter and CV to: Cancer Research UK, PO Box 123, Lincoln’s Inn Fields, London WC2A 3PX. Please quote the reference number 5842 on all correspondence.

Closing date: 7th December 2006
Interviews to be held 3rd - 5th January 2007

BPB
SAINT-GOBAIN

Analyst - BPB Group Research and Development
BPB is the world leading manufacturer of gypsum-based products, and a member of the Saint-Gobain group. Saint-Gobain is the world's largest building materials company, with 200,000 employees worldwide and annual sales of €35 billion. Present in 52 countries, Saint-Gobain designs and manufactures a wide range of products including glass, insulation, plasterboard and high performance plastics, as well as distributing building materials through over 3300 outlets across Europe.

In the UK alone, Saint-Gobain employs 20,000 people in over one thousand locations, with annual sales in excess of £3.3 billion.

The R&D department of BPB undertakes the research necessary to ensure we remain No 1 in our field. We study and manipulate the physical and chemical characteristics of the gypsum mineral to enable us to provide the technology required for new and improved products. We develop alternative technologies to enable us to implement process improvements in our manufacturing plants worldwide. We constantly investigate new analytical techniques to ensure we have the technology available to us to enable these developments.

A vacancy has arisen within Group R&D for an analyst with XRF experience to work within the analytical team. Your main responsibilities will be method development and validation of XRF techniques. Additionally you will be required to use, develop and validate other techniques such as atomic absorption spectroscopy, ion chromatography and thermal gravimetric analysis on a day to day basis.

You will have:
A higher degree in Chemistry or Physical Science and/or experience in XRF method development.
Experience of AA spectroscopy preferred but not essential.
Experience of method validation.
An enquiring mind
A practical aptitude with strong safety awareness
Strong communication, analytical and presentation skills

If you are interested in this role and wish to develop your career within a highly successful international group, please forward your CV together with a covering letter including your current salary details to:
Mrs Christine Martin, Group Technical Centre, BPB plc
East Leake, Loughborough, Leicestershire LE12 6JS
or by e-mail to christine.martin@bpb.com

Closing date: 8th December 2006

[2580-026 (2006) : 63]
THE MACAULAY INSTITUTE

MATHEMATICAL ECOLOGIST
EPIDEMIOLOGICAL MODELLING

We are seeking a researcher to join a team studying mechanisms regulating wildlife populations. This post is also part of a Centre of Excellence funded by the Scottish Executive Environment and Rural Affairs Department in the area of Epidemiology, Population health and Infectious disease Control (EPIC). This exciting initiative involves Biomathematics and Statistics Scotland (BioSS), Moredun Research Institute, Scottish Agricultural College (SAC), and the Universities of Edinburgh and Glasgow.

As one of six post-doctoral workers in the Centre of Excellence your main activities will be to build spatial epidemiological models for tick borne diseases, in particular Louping-ill virus, and liver-fluke infection and gastro-intestinal nematode infection. These will i) quantify spatial and temporal variation in disease risk in relation to environmental heterogeneity, ii) develop spatial models of disease spread, iii) predict risk and consequences of disease for wildlife, under scenarios of environmental change.

Candidates should have a PhD either in applied mathematics/statistics or biology/ecology with demonstrable experience in modelling both spatial and temporal population processes.

Starting salary within the range £23,022 - £26,541 per annum (pay award pending) with excellent employee benefits.

Stirling Medical Innovations (SMI) is a new cutting-edge research and development organisation dedicated to enhancing the lives of people suffering with chronic heart disease.

Set in Stirling in the heart of Scotland, SMI is situated amongst some of the most beautiful scenery in the country, with the city boasting excellent transportation links, a thriving business and commercial sector dynamic cultural, leisure, sport and recreational facilities.

We have opportunities for first-rate individuals who are passionate, enthusiastic and dedicated to making a difference, to supplement our existing team and share our vision that it's not about 'what we will do, it's about 'what and how we will do it'!

**Development Scientists**
We have a number of roles requiring differing levels of experience.

You will be working hands on as part of a team responsible for the design, execution and development of scientific projects leading to the launch of cardiac diagnostic products. You will carry out analytical experiments on standard laboratory analysers and custom made electrochemical detection systems.

You will be familiar with assay development in a highly regulated environment and utilise your skills and knowledge for the implementation of experimental development plans, creating development awareness and contributing to the successful launch of a new electrochemical assay based platform.

You will have worked in the field of analytical biochemistry and its application in medical diagnostics, or with electrochemical biosensors.

**Electrochemist**
You will provide electrochemistry expertise and support to a project team, working in a laboratory environment alongside scientists and engineers developing novel biosensor technology. You will contribute to delivering test strips for cardiac diagnostic products, initially for IMA and NTproBNP. You will also take ideas from invention, through feasibility and product development and into production.
(Previous applicants may be considered for this role).

If you are interested in any of these positions, please submit your CV together with a letter of application to: Ian Grant, Maxwell Bruce, 26B Renfield Street, Glasgow. G2 1W, iang@maxbruce.co.uk

Closing date for all positions: 8th December 2006.

STIRLING

Healthcare Network
north east england
cels
where bioscience means business

The Centre of Excellence for Life Sciences is looking to expand its current team. The CELS mission is to grow the North East England Life Sciences economy by at least £1 billion over the course of the next ten years. This growth will be driven by the identification of new technologies and market opportunities, driving inward investment projects and working closely with the five regional universities in identifying research work that has a strong potential for commercial and economic success.

We are currently seeking to recruit:

**Programme Delivery Manager** (3 positions) £30,000 to £50,000
You will be responsible for driving forward and project managing major pan-regional strategies for the development of a specific healthcare sector. You will have experience of working collaboratively across the academic, commercial and public sectors with backgrounds in medical technology, regenerative medicine and assistive technology.

**Business Support Manager** £35,000 to £40,000
You will be responsible for services to existing users of CELS facilities (small labs, office space), as well as seeking and supporting new start-up businesses, new facilities and developing the services offered by CELS.

**Researcher - Markets and Technologies** £20,000 to £25,000
You will use your strong healthcare/ life science market research background to find and present information that supports and enables the delivery of CELS' strategy.

**Platform Development Manager** £35,000 to 40,000
Experienced in market research and strategy development in the healthcare industry, you will develop innovative and leading-edge strategic programmes that are commensurate with the CELS’ business plan and also lead the development of CELS’ market and technology research resources to deliver CELS’ regional and commercial goals.

**Healthcare Network Team Member** £25,000 to £40,000
An additional team member is required to make a substantive contribution to the Healthcare Network team. The team improves the region's healthcare economy by increasing turnover and growing jobs in healthcare companies, and holds major conferences and events.

For more details including a role profile please see the CELS web site [www.celsatlife.com](http://www.celsatlife.com) or contact Andrea Thompson at [andrea.thompson@celsatlife.com](mailto:andrea.thompson@celsatlife.com). For an informal discussion about any of these positions please phone 0191 211 2626 and you will be put through to the appropriate manager.

To apply for any of these positions please send a CV or any other format that includes CV information, equal opportunities form available from the web site, and covering letter stating how you meet the skills and experience required to [andrea.thompson@celsatlife.com](mailto:andrea.thompson@celsatlife.com). Your CV will be cleared of all personal details before short listing.

The deadline for applications is 9am on Monday 27 November 2006. Interviews will be held during December.

Develop processes that will secure our success and we'll do the same for you.

**Senior Data Management Scientist** (Ref: REG00017) Circa £30,000 pa + Excellent Benefits

Anglian Water is committed to delivering clean drinking water every time one of our four million customers turns on a tap. Producing a billion litres of drinking water daily is no small challenge and our teams of scientists in Huntingdon perform a vital role in ensuring we maintain the highest possible standards.

As pivotal member of the Water Quality and Environmental Performance Team, you will have direct contact with our water quality regulator, the Drinking Water Inspectorate. You will take a lead in ensuring that regulatory requirements are correctly translated and interpreted into appropriate water quality monitoring programmes. You will also be involved in monitoring water quality compliance, producing statutory regulatory data returns and reports to strict deadlines whilst providing internal customers with up-to-date information on water quality compliance trends.

You may be a statistician or data analyst who has previously worked within a regulated environment or a scientist with a particular aptitude for data development.

Educated to degree level (mathematical or scientific discipline preferable), you will have proven experience of working with and producing complex statistics as well as using IT for data interrogation and manipulation. Ideally this will be supported by a thorough understanding of database packages, knowledge of Access databases and Visual Basic programming in particular would be advantageous.

This is no ordinary role and you must have a high degree of numeracy and the ability to think conceptually. An aptitude for IT and the ability to maintain and develop bespoke packages is desirable.

If you're ready to join an industry leader that will reward your commitment with opportunities to progress, please apply online at [www.work-together.co.uk](http://www.work-together.co.uk). If you do not have Internet access, please send your CV to HR Service Centre, Anglian House, Ambury Road, Huntingdon, Cambs PE29 3NZ, quoting the above reference number.

Closing date: 18th December 2006.

anglian water

Anglian Water values diversity and welcomes applications from all sections of the community – committed to equal opportunities.

Some things are meant to work together

Post Doctoral Researcher
Applied Mathematics or Engineering
Two year fixed term contract - Cambridge, UK

Schlumberger is the world's leading supplier of technology, project management and information solutions to the oil and gas industry. We employ over 60,000 people of more than 140 nationalities working in 80 different countries. Schlumberger was founded on breakthrough technology over 80 years ago and today our commitment to technology innovation continues. The Company has an unwavering commitment to Research and Development that will allow you to concentrate on the science, knowing that you have the resources to make a difference.

We are currently seeking to recruit a Post Doctoral Researcher in the field of Applied Mathematics or Engineering, to work on projects solving Oil and Gas production problems. The aim of this research project is to develop a technique which combines hydraulic fracture modeling with microseismic data in order to determine the state of the fracture in real-time.

You will have a Ph.D. in the field of mathematics or engineering with expertise in rock and solid mechanics.

This project is funded by the Marie Curie Research Training Network and you must meet the following requirements: Non EU citizens must have been resident in EU for more than four years in the last five years. UK citizens must have worked outside the EU for more than four years in last five years. No applicant should have been resident in UK for more than 12 months in last 3 years.

To apply or request further information please send a detailed CV to Darren Miller at scr-recruit@slb.com quoting "GRASP RTN" in the subject line.

Closing date for the application is 30 December 2006.
Schlumberger is an equal opportunities employer

TAKING SPECIALIST RECRUITMENT FURTHER

*conditions apply

[2580-035 (2006) : 65]
Micropropagation Assistant

Working within the Micropropagation Unit, based in the Horticulture and Public Education Department, you will propagate orchids and carnivorous plants using *in vitro* techniques.

Plants will be propagated for conservation initiatives and to enhance Kew's living collections, which are used for scientific research and education. The work will include seed sowing under sterile conditions, initiation of sterile cultures, media preparation, preparation of plantlets for weaning, assisting with potting up and monitoring of laboratory raised plants, contributing to research to improve propagation methods and helping to demonstrate micropropagation techniques to students.

With a Diploma or BSc in a Biological Science, preferably including plant biotechnology, you will have proven micropropagation experience. You will have the ability to work well in a team environment, along with good presentation and communication skills and the ability to write up scientific experiments.

Salary is £14,714 per annum and benefits include a choice of final salary or stakeholder pension, generous annual leave and a stunning work environment.

Application packs are available from our website www.kew.org (click on the link at the bottom of the homepage). Alternatively, please contact the HR Department, RBG Kew, on 020 8332 5184/5150 (24 hour answerphone).

Please quote Ref 1117.

Closing date: 9am, 18 December 2006.
Interview date: 9 January 2007.

Committed to equality through diversity. Selection is on merit atone.
Graduates with an interest in Occupational Hygiene

Sypol is one of the UK’s leading HSE consultancy providers. Established in 1979, the company has offices in Scotland and England. We are currently looking to extend our COSHH consultancy team and need to recruit enthusiastic life scientist with an interest in occupational hygiene to join our team in Aylesbury, Bucks.

Ideally you will have:
• a life science degree
• an interest in health, safety and environment
• an open attitude to customers
• a professional telephone manner
• a drivers licence

Previous COSHH experience is an advantage but not essential as full training will be given. Come join our proven career development programme.

[2580-037 (2006) : 66]
Molecular Biologist
based at Addlestone, Surrey

A new post has arisen as part of a collaborative project on Bovine TB in the developing world. Duties will include technology typing transfer of molecular typing from the VLA to the Armauer Hansen Research Institute (AHRI), Addis Ababa, microarray and functional analyses of selected strains and Quality Control of typing results and data. Project management will include liaison with Principle Investigators and work package leaders, and regular site visits to assess progress.

You should have a degree and preferably a PhD in Molecular Biology or a related discipline. Experience of working with Mycobacteria and knowledge of molecular genotyping is required. Experience of project management, using databases and proved technology transfer would be an advantage.

This is a 3 year Fixed Term Appointment (with the possibility of extension or permanency) post in Pay Band D £22,300 - £32,100 per annum. The Civil Service offers a choice of final salary and stakeholder pensions, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working and annual pay reviews.

Applications are welcome from all sections of the community irrespective of race, ethnicity, religious beliefs, marital status, gender, sexual orientation, disability or age.

An Executive Agency of the Department for Environment, Food and Rural Affairs.

Veterinary Laboratories Agency

Further details and an application form can be obtained from the VLA website www.vla.gov.uk or by writing to: Personnel (CH), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting reference ADP 3898.

The closing date for receiving completed application forms is 22nd December 2006.

INVESTOR IN PEOPLE
[2580-038 (2006) : 66]
Sirius

Sirius is a UK manufacturer of innovative instruments for chemical analysis, with customers in the pharmaceutical and wine industries. Some 80% of our products are exported, to Europe, the US and Japan.

Applications Chemist
As one of our chemistry team, you could be involved in many different activities, ranging from analysing customer samples, giving applications help to users, demonstrations, training, installations, writing papers and manuals, doing research into new applications and techniques and helping to specify and test new products. You would need a degree or equivalent qualification in chemistry, laboratory experience and an inquiring mind. We are located in Forest Row in England's beautiful county of East Sussex. We offer a competitive salary, company-funded life insurance, and option to join a pension scheme to which the company also contributes.

To apply, email your CV with a covering letter to john.comer@sirius-analytical.com, or send it to SIRIUS ANALYTICAL INSTRUMENTS LTD., Riverside, Forest Row Business Park, Forest Row, East Sussex RH18 5DW, UK.

Cardinal Health

Health Care and Life Sciences

Development
Manufacturing
Packaging
Distribution
Automation
Consulting

The Martindale(tm) Products and Specials business of Cardinal Health is considered to be one of Europe’s leading manufacturers of specialist, prescription pharmaceutical products. With a strong commitment to product quality and customer service, our future strategy revolves around the development and marketing of an ever increasing range of niche, value added products to the global health care industry. We currently have the following vacancies available within our Quality Control Laboratory.

**Senior Quality Control Analyst**

Working closely with other Senior Analysts and the QC management team you will apply your analytical skills and knowledge to ensure that raw materials are tested and made available to production against agreed deadlines. This is a supervisory position of a team of five and also requires liaison with other departments.

**Senior Microbiology Technician**

Working closely with the QC management team you will apply your microbiological skills and knowledge to ensure that raw materials and finished products are tested against agreed deadlines. This is a supervisory position, requiring the daily supervision of the technicians, the checking of data and liaison with other departments.

**Quality Control Analysts**

Working within a team in the QC laboratory you will be required to test a variety of materials and products against defined specifications. Results must be recorded accurately against current Good Manufacturing Practice (cGMP). Chemical analysis will include a variety of instrumentation, including HPLC.

You will already be a graduate, analytical chemist or microbiologist in the pharmaceutical industry. Ideally for the senior positions you will already possess supervisory skills and experience from a controlled environment. Strong communication skills and a responsible attitude are essential for all these roles.

Please apply in writing, stating the position for which you are applying, to: Sarah Newitt, HR, Martindale Products and Specials, Bampton Road, Harold Hill, Essex RM3 SUG. Alternatively you may email your CV to sarah.newitt@cardinal.com or telephone for more information on 01708 386660.

Recruitment of one specialist member
The Chair of the Food Standards Agency invites applications for the post of one new specialist member with expertise in medical microbiology. This post will become vacant from 1 April 2007.

The ACMSF is the statutory expert committee which advises the Agency on the microbiological safety of food.

Vacancy for ACMSF specialist member
One new member is to be appointed with expertise in medical microbiology. Candidates must be strong team players with common sense, good analytical skills, and impartiality. Putting consumers first and being able to recognise the impact of ACMSF advice on the public are extremely important requirements.

General
Appointments to the ACMSF are made strictly on merit, in accordance with the Code of Practice for Ministerial Appointments to Public Bodies issued by the Office of the Commissioner for Public Appointments. Selection will also reflect the Government's Equal Opportunities policy.

If you are interested in being considered for this post, an information pack and application form may be obtained from:

Ms Sarah Butler, ACMSF Secretariat Room 808C Aviation House, 125 Kingsway, London WC2B 6NH
Tel: 020 7276 8947
Fax: 020 7276 8907
E-mail: sarah.butler@foodstandards.gsi.gov.uk

The closing date for receipt of completed applications is 21 December 2006.

Information about the ACMSF can also be found on the Food Standards Agency's website at: http://www.food.gov.uk/science/ouradvisors/microbiogsafety

info@henderson-morley.com

We seek a postdoctoral research scientist with experience in molecular biology of the herpes simplex virus genome. The project seeks to incorporate certain non HSV genes into the HSV genome, to demonstrate gene expression and further to demonstrate incorporation of selected gene products within the virus particle.

Experience in fundamental virological techniques an advantage. Salary scale point commensurate with qualification, age and experience, for two years in the first instance.

[2580-047 (2006) : 69]
POST DOCTORAL RESEARCH SCIENTIST VACANCIES

2 X MOLECULAR CELL BIOLOGIST

1. A post doctoral research scientist is required for a project in plant disease resistance to soil-borne viruses in barley from April 2007. The candidate will take part in the 3 year BBSRC-funded project within the "Innovation in crop science – exploitation of genetics for sustainability" initiative. This is a collaborative project between Rothamsted Research (RRes) and Warwick HRI (WHRI) and is in consultation with the breeders at CPB Twyford.

The project is to identify and characterise novel superior alleles of eukaryotic translation initiation factor 4E (eIF4E) which has recently shown to direct immunity to soil-borne viruses causing 'yellow mosaic' disease in barley.

The candidate will (i) investigate natural and chemically induced allelic variation in eIF4E through direct mRNA and genomic DNA sequencing, and a TILLING approach, and (ii) develop broadly applicable, transferable molecular markers for superior eIF4E alleles in barley.

An ideal candidate will have a PhD and be highly motivated with qualifications and proven experience in general molecular techniques and genetic marker technologies. A good general knowledge in the area of disease resistance to plant pathogens and at least some experience in plant virology would be desirable. Good communication and organisational skills are also essential, along with the ability to write reports and publications for international journals, present and disseminate project's results at national and international meetings.

Informal enquiries about the position are encouraged via Kostya Kanyuka (kostya.kanyuka@bbsrc.ac.uk) or Kim Hammond-Kosack (kim.hammond-kosack@bbsrc.ac.uk)

Please quote reference 951.

Closing date for this post. 4 January 2007

2. A post doctoral research scientist is required to join a team studying the control of wheat grain development. The scientist will use a range of approaches including light and confocal microscopy, in situ hybridisation, bioinformatics and qPCR in order to identify wheat gene expression patterns, while Genome Walking will be employed for promoter isolation.

The work forms part of a new multi-site project under the BBSRC Innovations in Crop Science Initiative.

Applications welcome from candidates holding a PhD in biology, biochemistry or a related subject, and preferably with some post doctoral research experience, including standard molecular biology procedures (including plasmid construction, RNA/DNA isolation, and PCR). Experience in light microscopy (fixation, embedding, sectioning and imaging) is also essential.

Informal enquiries in the first instance may be made to Dr Alison Huttly (alison.huttly@bbsrc.ac.uk) or alternatively to Professor Peter Shewry (peter.shewry@bbsrc.ac.uk).

Please quote reference 955.

Closing date for this post. 21 December 2006

INSECT MOLECULAR BIOLOGIST
A post doctoral research scientist is required for a BBSRC Industrial Partnering Award to investigate possible mechanisms of resistance to neonicotinoid insecticides in insect pests. This is a collaborative project with Dr Neil Millar's laboratory at University College London, and although an employee of Rothamsted Research, the post-holder will be expected to conduct experiments at both sites. This will be facilitated by an excellent rail link (c. 25 minutes from Harpenden to Central London).

Principal duties will be the molecular characterisation of genes encoding nicotinic acetylcholine receptors (the target-site of neonicotinoids) to identify possible resistance-causing mutations, and pharmacological experiments with radio-ligands and recombinant receptors.

This full-time position is available for three years from early 2007. (Exceptionally, it might be possible to accommodate two part-time posts, one based at each site.)

Please quote reference 957.

Closing date for this post: 21 December 2006

All of these appointments will be at Band 6-PD level, which has a salary range normally between £23,022 to £26,541 per annum (pay award pending) depending on the profile and experience of the candidate.

For all positions, apply by application form only, available with further particulars from our website www.rothamsted.bbsrc.ac.uk or from the HR Group, Rothamsted Research, Harpenden, Herts, AL5 2JQ.

[2580-052 (2006) : 71]
Diamond Light Source is currently building the largest scientific research facility to be built in the UK for 30 years. The Diamond synchrotron will produce extremely intense light beams, mainly as X rays, that can penetrate deep inside all kinds of matter from proteins to plastics to support world class research. The synchrotron is being built 10 miles south of Oxford and the first beamlines will be operational in early 2007.

World leading facility requires world class scientists

**Detector Group Leader**
Ref. DIA0269/SB

**Detector Scientist**
Ref. DIA0270/SB

The Detector Group in Diamond is responsible for the specification, procurement, installation and commissioning of detector systems. These systems will ensure that the superb capabilities of the beamlines can be fully exploited to deliver high quality data to users. The Detector Group is also responsible for a detector development programme which will have significant benefits for beamline operation.

**Advanced dichroism experiments (BLADE) Beamline Scientist**
Ref: DIA0271/SB

We are looking for a world-class scientist who can contribute to the detailed design, construction and operation of the advanced dichroism beamline. The beamline will operate in the soft X-ray region and will be equipped for both x-ray and electron spectroscopy. It will be a key resource for both UK and international scientists working in the field of magnetism in low dimensional systems.

We offer a competitive salary (dependant upon qualifications and experience), comprehensive benefits, a final salary pension scheme and flexible working hours.

Please visit [www.diamond.ac.uk](http://www.diamond.ac.uk) for further information about our vacancies. Electronic application forms are preferred. These are available from our website and should be submitted to recruitment@diamond.ac.uk. Application forms are also available by telephoning our recruitment line on 01235 778218 (answerphone) or by faxing 01235 778171, quoting the appropriate reference number.

“A major milestone on CAT’s journey towards creating an outstanding biopharmaceutical company”
Dr Hamish Cameron, Chief Executive

This is how our new Chief Executive described the recent acquisition of Cambridge Antibody Technology (CAT) by AstraZeneca.

CAT, with its distinctive science and culture, is central to AstraZeneca’s plans to establish a major international presence in the research and development of biological therapeutics. To help us sustain our goal of leadership in biopharmaceutical development, we have several exciting opportunities to join the CAT team.

**Senior Research Scientist, Respiratory & Inflammatory Biology**
You will play a key role in the discovery and development of novel therapeutics, liaising with cross-functional teams to drive multiple projects forward. You will work in a stimulating and challenging environment, leading the intellectual development and practical implementation of agreed *in vitro* and *in vivo* biology packages to enable essential project decisions. You will be an experienced PhD-level (or equivalent) scientist and Home Office licence-holder. You will also have experience in the respiratory and/or inflammation therapeutic area(s), preferably gained in a fast-moving, collaborative, industrial research environment. Ref: 061060NS

**Senior Research Scientist, Oncology Biology**
You will play a key role in the discovery and development of novel therapeutics, liaising with cross-functional teams to drive multiple projects forward. You will work in a stimulating and challenging environment, leading the intellectual and practical development of *in vivo* tumour modelling from conception to implementation. You will establish and validate multiple disease-relevant endpoints, enabling essential project decisions. You will be a PhD-level (or equivalent) scientist and Home Office licence-holder, with prior experience of working in a fast-moving, collaborative, industrial research environment. Ref: 061061NS

**Research Assistant, Bioanalytical Development**
You will develop, validate and execute assays for the bioanalysis of CAT’s monoclonal antibody products. You will have a degree in a life sciences subject, with practical analytical expertise in ELISA or similar immunoassays. Experience in a regulated environment would be an advantage. Ref: 061062NS

**Research Assistant, Bioprocess Quality Control**
You will assist in the development and optimisation of QC assays for CAT’s monoclonal antibody therapeutics. You will have a degree/HNC/HND or equivalent qualification in a life sciences subject. Practical experience in SDS-PAGE, Isoelectric Focussing, HPLC, UV-vis Spectrophotometry and/or ELISA would be an advantage. Ref: 061063NS

**Research Assistant, Bioprocess Quality Control Tissue Culture**
You will perform product analysis on CAT’s monoclonal antibody therapeutics and provide cell culture services to the QC function, supporting cell based assays. You will have a degree/HNC/HND or equivalent qualification in a life sciences subject. Practical experience in cell culture, SDS-PAGE, Isoelectric Focussing, HPLC and/or UV-vis Spectrophotometry would be an advantage. Ref: 061064NS

**Research Assistant, DNA Chemistry**
With a degree/HNC/HND in a life sciences subject, you will perform DNA Sequencing activities in support of CAT’s drug development programmes. You must be experienced in a laboratory environment. Familiarity with DNA Sequencing, PCR, Taqman and Oligonucleotide synthesis is desirable. Ref: 061065NS
To apply, please e-mail your CV and covering letter to CAT@theRSAgroup.com, clearly stating which position you wish to be considered for, or call James Perry on +44(0)1707259333 for an initial confidential discussion.

Join the world leader in generics

Competitive salaries and benefits - Harlow

We may not have big brands yet, but when it comes to generics, no-one does it bigger or better. Teva is a truly global pharmaceutical business with a presence in the field of generics, respiratory and innovative medicines. Teva has operations in 60 countries and has approximately 25,000 employees worldwide. Over 100 years we've built a market leading profile within the healthcare industry based on innovation, quality and professionalism. Our continued growth in the UK has now created a number of exciting new opportunities.

Regulatory Affairs Officers/ Senior Officers
With over 530 existing products within the UK alone and a healthy pipeline of planned launches across Europe, the work of our Regulatory Affairs team is challenging and varied. To join this expanding team, you'll need good regulatory affairs knowledge and for more senior roles, a thorough understanding of EU licensing procedures. Commercial awareness and the ability to achieve results against tight deadlines will be important to your success. This is an excellent opportunity to develop your career in a fast-moving environment.

Medical Information Manager/ Senior Medical Information Officer
You will be helping to shape and develop a new function that will provide a full Medical Information Service to healthcare professionals and patients in accordance with UK regulations. You'll need a proven record in Medical Information, in particular the development of educational programmes and proactive initiatives aimed at maximising patient benefit and safety. At Manager level, some team leadership experience is also essential.

Medical Writer
You will generate documentation in support of regulatory submissions across the EU. With a life sciences degree or equivalent and strong written communication skills, you will ideally have relevant experience within the pharmaceutical industry.

Pharmacovigilance Officer
In this key new role, you will be responsible for the processing and reporting of safety events in compliance with internal procedures and regulatory requirements. We will consider candidates with a degree or equivalent qualification in life sciences or pharmacy, a nursing qualification or relevant clinical research experience. Ideally you will have experience in post marketing pharmacovigilance, although equally important is an enthusiastic, flexible attitude and willingness to learn new skills.

Teva is moving into new state-of-the-art offices in Harlow in the New Year. So alongside an attractive salary and benefits package, you can look forward to a high quality working environment including superb onsite gym and restaurant facilities. Although we're a large company, we pride ourselves on providing a friendly and supportive environment that encourages everyone to contribute.

To apply, please email your CV as follows:
Regulatory Affairs/Medical Information/Medical Writer: Julie@mosaicrecruitment.co.uk
Pharmacovigilance Officer: info@tevapharma.co.uk

[2580-057 (2006) : 73]
SEPA’s main aim is to provide an efficient and integrated environmental protection system for Scotland which will both improve the environment and contribute to the Scottish Ministers’ goal of sustainable development.

We currently have several new duties posts available within Chemistry, Ecology and Water Regulation to support implementation of the Water Framework Directive (WFD).

SEPA
Scottish Environment Protection Agency

**Chemist (Metals)**
Salary from £19,388
With £19,388 being the minimum of the band
East Kilbride Ref OPEA3398

As an experienced chemist, preferably skilled in using ICP-MS/ICP-OES techniques and dealing with complex tasks, you will assist in the development and implementation of suitable methods of analysis of metals in environmental media, carry out routine analysis and provide expert technical and professional advice to meet changing legislative requirements.

Interviews will take place 19 January 2007.

**Chemist (Field/ECU)**
Salary from £19,388
With £19,388 being the minimum of the band
Edinburgh Ref OPEA3397

As an experienced environmental chemist, skilled in assessing and interpreting data, you will join our field chemistry unit assisting in the operation of water quality monitoring stations and assessing the data collected during diffuse pollution studies. You will also provide expert technical and professional advice where appropriate. Initially the post will be seconded to the environmental chemistry unit (ECU) to assist with implementation of WFD & Diffuse Pollution initiatives including the development of a water diffuse pollution monitoring strategy for chemistry.

Interviews will take place 18 January 2007.

**Chemists (Trace Organics)**
Salary from £19,388
With £19,388 being the minimum of the band
Aberdeen & Edinburgh Aberdeen Ref OPEA3400 Edinburgh Ref OPEA3399

As an experienced organic chemist, preferably with proven GCMS skills, you will assist in the development and implementation of new methods for organic contaminants in environmental media, carry out routine analysis and provide expert technical and professional advice to meet changing legislative requirements.

Interviews will take place 9 and 10 January 2007.

**Assistant Chemist (2 posts)**
Salary from £15,524
With £15,524 being the minimum of the band
Aberdeen & Edinburgh Aberdeen Ref OPEA3402 Edinburgh Ref OPEA3403

We are looking for enthusiastic analytical chemists who want to help improve Scotland’s environment. You will carry out chemical analysis of water and other environmental samples using automated techniques in modern analytical laboratories. You will also assist in maintaining and troubleshooting instruments, as well as developing new analytical techniques and reporting on environmental data. You will have experience of analytical techniques, including QA Systems.

For post OPEA3402 (Aberdeen), experience in automated analysis for nutrients pH, BOD, is desirable. For post OPEA3403, (Edinburgh) experience in trace organic analysis is desirable.
Marine Ecologist (Phycology)
Salary from £19,388
With £19,388 being the minimum of the band
Aberdeen
As an experienced marine ecologist, skilled particularly in the collection and identification of marine and estuarine algae, you will be expected to work as part of a multidisciplinary marine team, participating in field survey work, laboratory analysis, assessing & interpreting data including the analysis of remotely collected images and use of GIS. You will also provide technical & professional advice to internal and external customers where appropriate. The post will also require a good level of reporting skill.
Interviews will take place 12 January 2007.

Ecologist
Salary from £19,388
With £19,388 being the minimum of the band Ref OPEA3405
Dingwall, Aberdeen, Perth, Edinburgh, Galashiels, East Kilbriide and Dumfries.
As an experienced ecologist skilled in the identification of freshwater biota, you will undertake ecological surveys of inland waters, interpret and report ecological data and provide information and advice on its ecological significance.
All candidates must expressly state on the front of their application their preferred location

Assistant Ecologist
Salary from £15,524
With £15,524 being the minimum of the band Ref OPEA3410
Dingwall, Aberdeen, Perth, Edinburgh, Galashiels, East Kilbriide and Dumfries
You will assist with the ecological surveying of inland waters, the interpretation and reporting of ecological data and the provision of information and advice on its ecological significance. You will have some experience of identifying freshwater flora and/or fauna.
All candidates must expressly state on the front of their application their preferred location.

Specialist II (Water Resources)
Salary from £26,726
With £26,726 being the minimum of the band East Kilbriide Ref SPWR9042
With experience in water environment regulation and proven communication skills, you will join a regional regulatory team and will be tasked with implementing the new Controlled Activities Regulations. You will be expected to develop guidance and procedures associated with the regulation of abstractions and impoundments, act as a point of specialist advice to regulatory staff, and be directly involved in the regulation of more complex sites.

Specialist II (Water Resource Planning)
Salary from £26,726
With £26,726 being the minimum of the band Ref OPER3411
Stirling, Aberdeen, Dingwall, East Kilbriide or Edinburgh (all these locations can be considered)
With experience in water resource management and proven communication skills, you will join a highly motivated team tasked with implementing the new Controlled Activities Regulations. You will be expected to undertake a key strategic role in planning environmental improvements with the major sectors involved in water resource management including Scottish Water and other major sectors.

Principal Policy Officer (Water Quality)
Salary from £31,511
With £31,511 being the minimum at the band
Stirling Ref SPW9035
With experience of environmental science, you will be responsible for developing SEPA’s approach to protecting the water environment from pollution and in particular the control of point source discharges. This high profile post will be expected to liaise with the Scottish Executive and other Agencies and stakeholders to ensure the effective development of guidance and policy. You will be part of a Water Policy Team which also covers water resources and morphology of the water environment.

**Senior Consultant (River Basin Planning)**

Salary from £26,726
With £26,726 being the minimum of the band
Dingwall Ref OPEA3412

With experience of collaborative, environmental or other relevant planning you will join a dispersed team of river basin planning coordinators charged with implementing river basin planning in Scotland. You will coordinate the work of Area Advisory Groups and contribute to the ongoing development of policy and innovative approaches to practical implementation. You will have excellent communication skills and be at the forefront of delivering and developing this new planning process.

SEPA is currently undergoing a Job Evaluation Exercise and new Pay and Grading structure, all posts are subject to this process.

The closing date for application is Friday 8th December 2006 at noon.

For specific details on these posts, to download an application form or to find further information about SEPA please visit [http://www.sepa.org.uk/vacancies](http://www.sepa.org.uk/vacancies)

Alternatively you can call 01786 452555 or email recruitment@sepa.org.uk to receive these in printed format. Please quote the relevant reference number(s) in any correspondence. CVs will not be accepted as part of the selection process.

[2580-058 (2006) : 74]
DATA SCIENTIST (SPBU022)
SSTD

This post in the Earth Observation and Atmospheric Science Division of Rutherford Appleton Laboratory will be closely associated with the British Atmospheric Data Centre and the NERC Earth Observation Data Centre. These two data centres are together responsible for preserving and improving access to in excess of 100 TB of environmental data, and are both renowned for providing high-quality, large-scale data curation and a wide range of services in support of UK and international science. A vacancy currently exists for a dynamic, motivated and knowledgeable team player, able to tackle key tasks critical to the delivery of BADC’s high-quality services.

• Management of observation data from the Met Office, including data from radiosondes, surface stations, and long term climate records. Tasks include producing documentation for datasets, answering related queries from users and writing robust scripts to automate data ingestion processes.

• Management of the BADC helpdesk and co-ordinating user support activities. The helpdesk provides the public face of the BADC and answers queries on technical and scientific matters related to its datasets and services. The role of helpdesk manager involves triage and allocation of queries to the team member with the specific knowledge or skills required: this could be you!

Applicants are expected to possess a solid scientific background, with a postgraduate qualification in a relevant discipline, or meteorology degree. Candidates should possess excellent communication skills in oral and written English, and be familiar with Linux, and scripting languages.

Salary will be in the range £24,638 to £27,998 dependent on experience. In addition we offer an excellent index-linked final salary pension scheme and generous leave allowance.

Further information can be obtained from Dr Sam Pepler, email: S.J.Pepler@rl.ac.uk

All applications must be returned by 2 January 2007.

Interviews will be held on 12 January 2007.

ENVIRONMENTAL DATA VALIDATION SCIENTIST (SPBU023)
Fixed duration, up to 2010
Earth Observation and Atmospheric Science Division, Space Science Technology Department, Rutherford Appleton Laboratory.

This post in the Earth Observation and Atmospheric Science Division (EOASD) of Rutherford Appleton Laboratory will be funded by the Natural Environment Research Council (NERC). It will be closely associated with the British Atmospheric Data Centre and the NERC Earth Observation Data Centre. These two data centres are together responsible for preserving and improving access to in excess of 100 TB of environmental data. As part of their activities, a research programme exists both to develop new applications of the data and ensure close contacts with the research community.

EOASD is part of the Earth Observation and Atmospheric Science Division of the Space Science and Technology Department. Within this department there is expertise on all stages of the development and exploitation of satellite instruments observing the Earth.

The Earth's climate system (atmosphere and oceans) is now observed routinely by a complex array of ground based, airborne and orbital instruments. The end users of this data require not only that it be accessible and well catalogued but also some indication of the quality of the data, both in absolute and comparative terms. Research satellite missions over the past 15 years have gathered large amounts of data with varying error characteristics: some instruments giving good spatial coverage for short periods, others giving relatively poor coverage over longer observing periods. The appointee will work primarily
with remote sensing observations of stratospheric ozone, methane and water vapour, using additional sources to provide ground truth.

Trajectory calculations are widely used in the interpretation of atmospheric observations, as they allow measurements taken at different times to be compared meaningfully. At EOASD we provide an online service, allowing our users to access trajectory calculations through a web interface. The appointee will also exploit and develop the trajectory code as a tool for analysing atmospheric observations.

The post requires some knowledge of scientific programming, of atmospheric physics. Experience of communicating scientific results would be advantageous.

Salary will be in the range £24,638 to £27,998 dependent on experience. In addition we offer an excellent index-linked final salary pension scheme and generous leave allowance.

Further information can be obtained from Dr Martin Juckes, email: M.N.Juckes@rl.ac.uk

All applications must be returned by 2 January 2007.

Interviews will be held 10 January 2007.

Application forms for any of the above positions can be obtained from Valerie Gilbert, Science Programmes, CCLRC, Chilton, Didcot, Oxfordshire OX11 0QX, telephone +44 (0)1235 445872, or e-mail recruit-spbu@rl.ac.uk. Please quote the appropriate reference number.

More information about CCLRC is available from http://www.cclrc.ac.uk

The CCLRC is committed to equality of opportunity for all and is a recognised Investor In People. A no smoking policy is in operation.

[2580-059 (2006) : 75]
St George’s University of London
Medicine, Biomedical Sciences, Health and Social Care Sciences

St Georges's Healthcare NHS
St George’s University of London in collaboration with St George’s Healthcare NHS Trust

Local Research Network Clinical Trials Nurse/Co-ordinator

The UK Stroke Research Network (www.uksrn.ac.uk) is being established through eight local research networks across England. A collaboration of stroke clinicians and researchers have successfully obtained funding to establish the South-East England Local Research Network. The primary aim is to facilitate the conduct of randomised trials and other well-designed studies in stroke, including those for prevention, diagnosis and treatment. The administrative base for this Network is St George's in South London.

This post offers an exciting opportunity to become involved in clinical research as part of the South-East Local Research Network. It would be suitable for a nurse with an interest in research or a graduate with clinical research experience. There are four posts in total; two based in South-West London covering St George's, St Helier, Croydon and Chertsey Hospitals, and two based in South-East London covering Kings, Guys and St Thomas' and Lewisham Hospital.

The Clinical Trials Nurse/Trials Co-ordinator will be responsible for recruiting to, and following up, patients within studies adopted by the UK Stroke Research Network. This includes both randomised clinical trials and other high quality clinical studies. This will involve close working with multidisciplinary clinical teams in each centre, other researchers both employed by the network and employed in the individual centres and the co-ordinating centre and Stroke Network Manager at St George's. Applicants will be required to travel to a number of hospitals within South London and Surrey.

Employment for these posts is either on an NHS scale (Agenda for Change Band 6) or the equivalent university scale (SGUL5/SGUL6 dependant on experience),

The Network has funding for this post for three years in the first instance although it is envisaged the funding will be longer term.

The salary range for this post is £20,841 - £31,524 dependant on experience plus equivalent London Allowance or high cost area supplement.

For further information, visit www.sgul.ac.uk/jobs or contact the Personnel Office on 020 8725 5020 (24-hour answerphone) or email: personnel@sgul.ac.uk Please quote reference 428/06.

Closing date: Monday 18th December 2006.
Interview date: Week commencing 8th January 2007.

St George’s is an Equal Opportunities Employer

[2580-060 (2006) : 76]
Research Technician
£18,517 p.a. Ref: LS/175/06
You will work in the laboratory of Professor Andrew Loudon on the neuroendocrine control of energy metabolism, using mammalian models. You should have a well-developed sense of responsibility, be able to work independently and be interested in learning new techniques. Excellent communication skills are essential. A practical knowledge of molecular biological methods including standard PCR technologies, gene cloning and western blotting would be an advantage. Experience in in vivo research would also be desirable. You must have the ability to analyse and present data, both verbally and written and be able to organise and manage your own time and experimental protocols.

You must be educated to at least BSc level (or equivalent) in any biological science discipline, together with relevant experience of working in a research environment.

The position is tenable for four years in the first instance.

Application forms and further particulars are available from our website or by contacting +44 (0)161 275 5408 or renee.holland@manchester.ac.uk quoting the reference number.

Research Technician
£16,023 - £17,978 p.a. Ref: LS/177/06
This new, exciting research led by Dr Paula Kover, is connected with the genetics basis of complex traits on A. thaliana and aims to characterise molecular and phenotype variations in natural accessions of A. thaliana and the creation of new mapping lines. These lines will provide a unique recourse to study the genetic basis of complex traits such as plant development, architecture and disease resistance.

You will undertake scientific research and be responsible for aspects of managing our multi-user facilities as directed by associated academic staff and the Chief Technician. Willingness to grow and phenotype large number of plants, familiarity with modern genetic techniques, an aptitude for managing the group's equipment facilities and excellent team working skills are essential.

You must hold at least an ONC (or equivalent) in biological sciences and demonstrate relevant experience.

This position is tenable from January 2007 for up to two years.

Application forms and further particulars are available from our website or by contacting +44 (0) 161 275 3909 or gary.porteous@manchester.ac.uk quoting the reference number.

Closing date for both posts: 14 December 2006.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community [2580-061 (2006) : 76]
School of Biological and Conservation Sciences

**PROFESSOR: PARASITOLOGY**
Durban Centre (Ref. SA54/2006)

UNIVERSITY OF KWAZULU-NATAL

The School, based at the Durban and Pietermaritzburg centres, is well established with one of the strongest research records in the University and a substantial graduate school. Its research facilities are rapidly expanding and modern instrumentation is available.

The School seeks a leader for the subdiscipline of parasitology, who will contribute actively to research, curriculum development and teaching in the field. The successful candidate will have an exceptional record in parasitology, preferably utilising molecular techniques. Research supervision at all levels and establishment of a strong independent research programme will be essential. The appointee will also be responsible for coordination of the undergraduate degree programme in Biomedical Sciences in collaboration with the School of Health Sciences and Nelson R Mandela School of Medicine.

Minimum requirements: • A PhD focussing on parasitology • An excellent record of independent research evidenced by current publication in the peer reviewed international parasitology literature • Proven ability to attract competitive research grants • A substantial record of successful supervision of doctoral students • Proven academic leadership in teaching and research • Experience in academic administration.

Advantages: • Research interest in medical parasitology • Experience in undergraduate curriculum development • Experience in the application of modern molecular techniques.

The position is available from 01 July 2007. Short-listed candidates will be required to make a presentation.

For further information see the School website at [http://www.ukzn.ac.za/biology](http://www.ukzn.ac.za/biology) or contact Dr Jenny Lamb at lambj@ukzn.ac.za

The remuneration package offered includes benefits and will be dependent on the qualifications and/or experience of the successful applicant. The selection process will commence on 12 January 2007 and will continue until a suitable candidate is appointed or a decision is taken not to fill the post.

Applicants are required to submit a covering letter highlighting their experience in and providing evidence for each of the minimum requirements and advantages listed above, with a detailed CV including the names, full addresses, fax numbers and e.mail addresses of three referees, to: Mrs S Gellately, Human Resources Administration, Howard College Campus, University of KwaZulu-Natal, Durban 4041, fax: +27 (0)31 260-2139 or e.mail: Gellatel@ukzn.ac.za

**Stuart Chair of Science Communication**  
Centre for Science Communication

UNIVERSITY OF OTAGO  
SAPERE AUDE  
Te Whare Wänanga a Otago

Applications are invited for an appointment for the Stuart Chair of Science Communication, the endowed foundation Professor of a newly formed Centre for Science Communication at the University of Otago. The Centre is administratively located in the Division of Sciences but will have strong links to the other three academic divisions. The Chair will be the senior academic leader and Director of the Centre, charged with its national and international development and with ensuring that the Centre is committed to excellence in all its activities.

The successful appointee will be passionate about communicating science and its promotion and popularisation in the community. They will have an exemplary international research reputation, a capacity to provide academic vision and strategic leadership, and the ability to work with staff from diverse academic and cultural backgrounds. It is expected that links with other academic units throughout the University will be initiated and fostered, and that strong associations with the appointee's primary research area will be maintained to promote continued scholarship there as well as publications directed at science communication.

Further information about the University of Otago can be found at [http://www.otago.ac.nz](http://www.otago.ac.nz)

Specific enquiries may be directed to Professor Vernon Squire, Pro-Vice-Chancellor, Sciences, Tel 64 3 479 7977, Email vernon.squire@otago.ac.nz

**APPLICATION INFORMATION**

With each application you must include an application form, an EEO Information Statement, a covering letter, contact details for three referees and one copy of your full curriculum vitae. For an application form, EEO Information Statement and a full job description go to: [www.otago.ac.nz/jobs](http://www.otago.ac.nz/jobs) Alternatively, contact the Human Resources Division, Tel 84 3 479 8269, Fax 64 3 419 8219, Email job.applications@otago.ac.nz

SENIOR PHYSICS TECHNICIAN

We require a Senior Laboratory Technician to work mainly in the Physics department, for GCSE, AS and A2 courses.

The post is permanent and full time and involves supervising the work of another Physics Technician. A competitive salary and benefits package including a stakeholder pension scheme, school fees remission (after qualifying period), use of the leisure and recreational facilities, free lunches and four weeks holiday per annum are provided.

Further details may be obtained from Job Opportunities at www.stpaulsschool.org.uk or email personnelsat@stpaulsschool.org.uk or telephone the Personnel Manager on 020 8746 5493.

St Paul's is committed to safeguarding and promoting the welfare of children and the successful applicant will be subject to an enhanced disclosure through the Criminal Records Bureau.

Closing date 14th December 2006.

Charity No.312749
[2580-066 (2006) : 78]
Applications are invited from fresh PhD graduates or experienced post-doctoral scientists to join Professor Barry Halliwell’s research team in the area of free radical and antioxidant biology (http://medicine.nus-edu.sg/bioweb/acad_staff/barry_halliwell.html).

Current projects include:
1) Determination and evaluation of specific biomarkers of oxidative stress in human studies
2) The role of metals and oxidative damage in atherosclerosis and neurodegenerative diseases
3) Basic mechanisms of ageing – the importance of oxidative damage and the impact of antioxidants
4) Isolation, development and therapeutic use of natural antioxidants.

The Department of Biochemistry has teaching commitments to medical, dental and science students. These are three major research interests in the Department namely Neurobiology, Molecular and Cellular Mechanisms underlying Human Diseases and Molecular Mechanisms of the action of toxic agents. Within these areas, we are particularly anxious to strengthen the area of Oxidant and Antioxidant Biology. The Department has a strong research tradition and active collaboration with other research institutes in Singapore and with many leading Universities worldwide. In conjunction with the Office of Life Sciences (OLS), the Department has also launched a world-class Neurobiology Programme. The Department has excellent facilities for research in biochemistry and molecular and cell biology. Prof Halliwell’s group is located in excellent purpose-built accommodation at the new Centre for Life Sciences building in the Neurobiology group (http://www.ols.nus.edu.sg/index.shtml).

Salary range are as follows: -
• Research Fellow (B): S$3,400 to S$7,050 per month (all-inclusive).
• Research Fellow (A): S$4,000 to S$7,910 per month (all-inclusive)

(Travel Assistance / Setting-in Allowance and housing allowance may be given at the discretion of the Principal Investigator).

Interested parties should submit their applications, supported by a resume and names of three external referees to:

Professor Barry Halliwell
Department of Biochemistry
Yong Loo Lin School of Medicine
National University of Singapore
8 Medical Drive, MD7 #02-03
Singapore 117597
Fax: (+ 65) 6 779 8842
E-mail: bchbh@nus.edu.sg

Only short-listed candidates will be notified.

The research group also has space for well-qualified undergraduates to undertake PhD programmes with generous scholarship funding (http://www.nus.ed.sg/ngs/index.shtml).

[2580-067 (2006) : 78]
ASSOCIATE PROFESSOR IN QUANTUM INFORMATION SCIENCE
(Secondment Opportunity)
(Full-time (fixed-term))
Ref. 20725

The Department of Physics seeks applicants to join its Quantum Information Science (QIS) research
group. This research-only appointment is funded by DEST (contributing to our participation in an EC
FP6 research project "Qubit Applications" (www.qubitapplications.com), and the ARC funded Centre
for Quantum Computer Technology and may be undertaken full-time, or for various shorter-term periods
(eg. six months) within a two-year period.

The QIS group engages in theoretical investigations of the use and applications of quantum information.
The project will contribute to the development, in a more hardware independent manner; of potential
applications for small-scale quantum processing devices. Potential research areas can be quite broad but
might include: quantum estimation, quantum open systems, quantum multi-party protocols, quantum
games, quantum control, and quantum algorithms. As QIS research can be multidisciplinary, applicants
with appropriate backgrounds in mathematics, computer science, engineering etc., in addition to physics
and mathematical physics are welcome.

Essential Selection Criteria: PhD in Physics, Mathematics or Computer Science in Quantum Information
Science; proven record of leadership for research in Quantum Information Science with a focus in
quantum mechanics/field theory as demonstrated by international reputation, research publications and
presentations, external research grants, or other relevant indicators; record of successfully attracting and
supervising research students.

Enquiries: Professor Jason Twamley on +61 2 9850 8908 or jtwamley@ics.mq.edu.au

For further information about quantum information science at Macquarie visit www.ics.ma.edu.au/qis

The position is available on a full-time (fixed-term) basis for a period of up to 2 years or as a shorter
period (no fewer than one six month period) as secondment opportunity.

Package (Level D): From $116,633 pa, including base salary $98,556 to $108,517 pa, annual leave
loading and up to 17% employer's superannuation.

The appointment is currently governed by the terms of the Macquarie University Enterprise Agreement
2006-2009. The successful applicant will be offered the choice of an Australian Workplace Agreement.

Please visit www.jobs.mq.edu.au to apply online.

Closing date: 31 December 2006.

CELEBRATING 50 YEARS OF NEW SCIENTIST
50 1956 - 2006
[2580-069 (2006) : 78]
The University of Edinburgh

The University of Edinburgh's School of Engineering and Electronics is the largest in Scotland, and one of the largest in the UK; most of the School was rated as 5 at the last RAE and a substantial proportion was 5*. The University of Edinburgh and Heriot-Watt University form the £28M SFC funded Edinburgh Research Partnership in Engineering.

HERIOT WATT UNIVERSITY
THE UNIVERSITY OF EDINBURGH

Chair in Micro and Nano Systems
The salary will be within the professorial scale

The Edinburgh Research Partnership is a joint Edinburgh/Heriot-Watt University collaboration, with six joint research institutes, and this is one of 12 new Chair positions funded by it. We require a world ranking leader for new research in Micro and Nano Systems. Our research is expanding in all areas of micro/nano fabrication and design - particularly MEMS, the interface between silicon, biology and medicine, sensor and actuator devices and integrated photonics. Applications will be welcomed from a wide range of research interests. This is an exciting opportunity if you have a research vision that develops the interface between the powerful science and engineering base of the University and industrial needs.

This Chair will be held in one of the UK's premier engineering schools, which comprises 150 salaried researchers, 150 PhD, 100 MSc and 1,000+ undergraduate students. The majority of staff were rated in 5/5* categories in the 2001 research assessment exercise and we have an "excellent" teaching rating. The School's annual external research grant spend is £5 million and recent annual income exceeds £7 million.

Apply online, view further particulars or browse more jobs at our website. Alternatively, telephone the recruitment line on 0131 650 2511. Ref: 3006678NS. Closing date: 12 January 2007.

[2580-070 (2006) : 79]
Senior Air Pollution Scientist

Applications are invited for the above position within the Environmental Research Group. The ERG is part of the School of Biomedical and Health Sciences at King's College London and has a growing reputation for the measurement, prediction and management of air pollution in the UK. ERG's clients include DEFRA, Transport for London, GLA, Local Authorities, the Health Effects Institute and the private sector.

This is an exciting opportunity to develop considerable skills and experience in the field of air pollution modelling, emissions inventory development and health based research. The post holder will be required to have an honours degree in a relevant science subject (e.g. physics or engineering) or a subject related to environmental sciences and meteorology. In addition, the post holder will ideally have more than 1 year's post graduate experience of air pollution related topics, within a university, private company or environmental consultancy. Finally, the successful candidate must be highly motivated, have the ability to organise their own work, have good report writing and data analysis skills and be able to work under pressure to tight deadlines.

Salary within the ORS1 salary scale: £20,645 to £22,958 plus £2,323 London Allowance per annum. The position is available for one year.

For a job pack please send a large self-addressed envelope to the Personnel Department, King's College London, 4th Floor, Capital House, 42 Weston Street, London SE1 3QD or e-mail personnel-applications@kcl.ac.uk quoting reference number D1/GLY/22/06.

Closing date for receipt of applications is 14 December 2006.

**CL3 Microbiology Technician**

Salary: £24,615 - £30,786 per annum inclusive

A Microbiology Technician is required in the Science Technical Support Unit to provide laboratory support with special responsibility for the operation of Containment Level 3 (CL3) laboratories.

The postholder will work in a team of technicians but should have particular skills and knowledge in the area of Microbiology with knowledge or prior experience of CL3 facilities. Experience of laboratory work in a University or teaching environment in addition to appropriate qualifications will be required. Organisational skills and an ability to work unsupervised is essential. Work will be based in brand new purpose built science laboratories which have recently been occupied.

In the first instance further details and an application form can be downloaded at www.londonmet.ac.uk/vacancies or e-mail recruitment@londonmet.ac.uk or write to London Metropolitan University, London City campus, Human Resources, 31 Jewry Street, London EC3N 2EY.

Please quote the reference number B0946PN.

Closing date for applications is 14 December 2006.

Please note we do not accept CVs.

London Metropolitan University is an equal opportunities employer.

A centre for postgraduate excellence, Cranfield University has an unrivalled reputation for transforming cutting-edge technology, management and science into practical, life-enhancing solutions. It’s where people dare to think differently. It's where history is made. It’s where tomorrow is already taking shape.

DEFENCE COLLEGE OF MANAGEMENT AND TECHNOLOGY
DEPARTMENT OF INFORMATION SYSTEMS

Research Assistant (2 posts)
£16,171 - £18,025 per annum

We are looking for two Research Assistants to be employed on the Department’s work packages for the Human Factors Integration Defence Technology Centre (HFI-DTC), and the USUK International Technology Alliance (USUKITA).

Both programmes are human-factors related, and the work in each would suit a recent graduate in psychology or cognitive engineering. The posts are each initially for one year, with the possibility of renewal, on a year-by-year basis, for a further two years. Publication of work results is encouraged, and applicants will be encouraged to register for a higher degree.

Please apply online at www.cranfield.ac.uk/hr or alternatively, application forms and further details may be obtained from the HR Department, Cranfield University, DCMT Shrivenham, Swindon, Wiltshire SN6 8LA. Tel: (01793) 785758 quoting reference R/DIS65.

Closing date for receipt of applications: 7th December 2006.

Valuing People
[2580-075 (2006) : 80]
The Centre of Excellence for Life Sciences is looking to expand its current team. The CELS mission is to grow the North East England Life Sciences economy by at least £1 billion over the course of the next ten years. This growth will be driven by the identification of new technologies and market opportunities, driving inward investment projects and working closely with the five regional universities in identifying research work that has a strong potential for commercial and economic success.

We are currently seeking to recruit:

**Programme Delivery Manager** (3 positions) £30,000 to £50,000
You will be responsible for driving forward and project managing major pan-regional strategies for the development of a specific healthcare sector. You will have experience of working collaboratively across the academic, commercial and public sectors with backgrounds in medical technology, regenerative medicine and assistive technology.

**Business Support Manager** £35,000 to £40,000
You will be responsible for services to existing users of CELS facilities (small labs, office space), as well as seeking and supporting new start-up businesses, new facilities and developing the services offered by CELS.

**Researcher - Markets and Technologies** £20,000 to £25,000
You will use your strong healthcare/life science market research background to find and present information that supports and enables the delivery of CELS' strategy.

**Platform Development Manager** £35,000 to 40,000
Experienced in market research and strategy development in the healthcare industry, you will develop innovative and leading-edge strategic programmes that are commensurate with the CELS’ business plan and also lead the development of CELS’ market and technology research resources to deliver CELS' regional and commercial goals.

**Healthcare Network Team Member** £25,000 to £40,000
An additional team member is required to make a substantive contribution to the Healthcare Network team. The team improves the region's healthcare economy by increasing turnover and growing jobs in healthcare companies, and holds major conferences and events.

For more details including a role profile please see the CELS web site [www.celsatlife.com](http://www.celsatlife.com) or contact Andrea Thompson at [andrea.thompson@celsatlife.com](mailto:andrea.thompson@celsatlife.com). For an informal discussion about any of these positions please phone 0191 211 2626 and you will be put through to the appropriate manager.

To apply for any of these positions please send a CV or any other format that includes CV information, equal opportunities form available from the web site, and covering letter stating how you meet the skills and experience required to [andrea.thompson@celsatlife.com](mailto:andrea.thompson@celsatlife.com). Your CV will be cleared of all personal details before short listing.

The deadline for applications is 9am on Monday 27 November 2006. Interviews will be held during December.

CELS is an equal opportunities employer.

SCHOOL OF BIOSCIENCES

PhD Studentships for January 2007
Six BBSRC/Charity funded PhD studentships are available in the following areas:

• Developing biocatalysts for enhanced selenate bioremediation (Dr C S Butler)
• Role of metacaspases in the apoptotic cell death response of Candida albicans (Dr M Ramsdale)
• Control of cell shape in the human fungal pathogen Candida albicans (Dr S Bates)
• Investigating eukaryotic cell evolution using comparative genomics (Dr T A Richards)
• Investigating the role of glutathione-S-transferase in cancer (Professor J A Littlechild)
• The role of pyroglutamyl modification of peptides in Alzheimer’s (Professor J A Littlechild)

Deadline for applications is Monday 18 December 2006

Applicants should possess at least a 2:1 Honours degree, or equivalent, in biological sciences, molecular biology, biochemistry or genetics.

For further information telephone Sarah Mudge on 01392 263706 or email BS-PGadmissions@exeter.ac.uk stating the relevant project title(s).

UNIVERSITY OF EXETER

[2580-077 (2006) : 81]
Three PhD studentships available at UCL in ‘analysis of radar images’

All three studentships are suitable for candidates with a good first degree in Maths, Physics, Computer Science, Electrical Engineering or other mathematical science disciplines; or a relevant masters.

Applicants should send a CV to c.baker@ee.ucl.ac.uk with the subject line ‘radar studentships'.
DEPARTMENT OF BIOLOGICAL SCIENCE
PhD Scholarship and Graduate Teaching Assistant:
Brown Hare Ecology

We are seeking to recruit a Graduate Teaching Assistant (GTA) to undertake a PhD and assist with teaching at the University of Hull, Department of Biology Scarborough campus. The student will work towards a PhD on the ecology of the Brown Hare with Dr Philip Wheeler in the Scarborough campus and Dr Alastair Ward in Central Science Laboratory.

The post includes student fees and a generous stipend as well as opportunities to participate in overseas field trips. GTAs are required to teach (as designated by the Head of Centre) 180 hours per year and are treated as staff members in the department. As such they have access to excellent office and library facilities within the department and across the University.

You will possess a first class or a high 2:1 Honors degree or Masters, specializing in a relevant area of study. You should be able to demonstrate experience of research, for example an undergraduate dissertation, preferably in a subject relevant to terrestrial ecology and conservation. Alongside teaching or presentation experience relating to ecology you should have experience of practical field ecology. You must be self motivated with the ability to work as a member of a team. A full, clean driving licence is essential. It would be advantageous to have experience with GIS and a variety of statistical software.

Salary £ 12,300 pa.

Informal enquiries should be directed to Dr Phil Wheeler (p.wheeler@hull.ac.uk; tel: 01723 357281).

For an application pack, tel: (01482) 465557 (textphone for applicants with a hearing/speech impairment: 01482 466851), fax: (01482) 466660, or email: science-recruitment@hull.ac.uk (quoting ref. FS05).

Closing date: 15 December 2006.
Interviews will be held on 8 January 2007.
For online information see www.hull.ac.uk

We promote diversity in employment and welcome applications from all sections of the community.

THE ROYAL SOCIETY
CELEBRATING 350 YEARS

Royal Society 2009
Medals and Awards
Nominations open

The Royal Society’s Medals and Awards are an important part of our work in recognising excellence in science across the disciplines and exist to reward those who have made outstanding achievements.

The deadline for all 2009 nominations is 23 February 2009.

Prize lectures awarded in 2009 will be delivered in 2010.

Biological Sciences
Copley Medal, Royal Medal, Croonian Lecture, Francis Crick Lecture.

Physical Sciences

Interdisciplinary Sciences
Royal Medal, Gabor Medal.

Women in Science
Rosalind Franklin Award.

Science Communication
Michael Faraday Prize and Royal Society Kohn Award.

Philosophy and History of Science
Wilkins-Bernal-Medawar Lecture

International
Royal Society and Académie des sciences Microsoft Award and Royal Society Pfizer Award.

Full details of all awards can be found at:
royalsociety.org/awards

Issued: December 2008 RS1435

DARWIN 200
The evolution of society

Monday 19 and Tuesday 20 January 2009

Synopsis
The meeting will synthesise our understanding of the evolution of social behaviour and cooperation in microorganisms, invertebrates, vertebrates and man, providing a unified conceptual overview of the mechanisms involved in the evolution of societies, the causes of variation in their structure, the contrasts and similarities between the processes operating in animals and man and the principal questions still unresolved.

Registration
This meeting is free to attend, but pre-registration (online) is essential. The online registration form and programme information can be found at: royalsociety.org/events

twenty ten and beyond
350 years of excellence in science
Diamond Light Source is a new synchrotron and a leading scientific facility of its type in the world. Located on the Harwell Science and Innovation Campus in South Oxfordshire, we host research facilities supporting cutting-edge research in all fields of science.

**Beamline Scientist**

Salary: Circa £31k

A permanent scientist position is currently available at the Surface and Interface Structural Analysis (SISA) beamline at Diamond. The beamline is presently in its design phase and is scheduled to have its first user experiment in April 2011. It will provide undulator radiation of both soft (200 - 2100 eV) and hard (2.1 - 20 keV) x-rays for a wide-range of experiments applying photoelectron spectroscopy, x-ray standing waves, photoelectron diffraction, near edge absorption spectroscopy, x-ray fluorescence spectroscopy and x-ray reflectivity. The research activities will be focussed on the studies of structural, chemical, electronic and magnetic properties of surfaces, interfaces and thin films. You should have a Ph.D. in physics, physical chemistry, materials science or related fields with synchrotron research experience. Additional experience in surface science and ultra-high vacuum instrumentation, in particular soft x-ray or VUV photoelectron spectroscopy, is desirable.

**Postdoctoral Research Assistant**

Salary: £27k - £31k

A vacancy exists for a talented postdoctoral fellow to develop seamless integration of data acquisition, reconstruction and analysis for synchrotron based x-ray tomography. In 2009, Diamond will bring into operation a world leading facility for x-ray tomography. Manchester University is a leading proponent of image reconstruction and the application of tomographic imaging to material science and engineering. The person appointed to this post will help create a unique partnership between Diamond and the University of Manchester that will produce a state-of-the-art instrument for the users of synchrotron tomography. You would be based at Diamond but would be part of a large and dynamic team. You will develop further the experimental technique, tomography data-analysis and visualisation.

We offer a competitive salary (dependant upon skills, qualifications and experience), comprehensive benefits, an index-linked pension scheme and flexible working hours.

For further information and an application form please visit our website at [www.diamond.ac.uk](http://www.diamond.ac.uk) telephone our recruitment line on 01235 778218 (answerphone) or write to us at the address below, quoting the appropriate reference number.

NewScientist Jobs
[2689-004 (2009) : 46]
Oxford NANOPORE Technologies

Oxford Nanopore Technologies is a dynamic and fast-moving company that is developing a revolutionary DNA sequencing technology. The technology is expected to have a profound effect on genome research, with benefits in human health, agriculture, energy, security/defence and many other areas.

Following significant recent scientific progress, the Company is rapidly expanding and seeks to recruit excellent candidates for the following positions:

**Principal Applications Scientist**

We seek a senior level scientist who has pioneered new applications development on current next-generation sequencing platforms. This means both theoretical knowledge and practical experience of novel experimental design, appropriate sample prep methodologies (DNA isolation, fragmentation etc) and appropriate analysis leading to new ways of measuring biological phenomena.

Typically a geneticist or genomicist who has worked as part of a multi-disciplinary sequencing team encompassing the whole experimental cycle from sample collection through to high quality publication, the ideal candidate needs to be an innovative thought-leader and scientific risk taker, probably also having links to other key people in the field. He/she will also have done or supervised some bioinformatics work, or have links to clinical or translational environments.

The candidate needs to be able to talk credibly to senior lab-heads at the top institutes about how a sequencer might fit into their current or future scientific environment. Yet they also need to be able to talk to ground-level scientists who will use the machine, and develop robust experimental protocol applicable to use in the wider broad access research community.

**Protein Modification Scientists**

Ideally a masters student in Biochemistry, Molecular Biology or similar, with 1-2 years of experience working in an industrial environment, the ideal candidate will be able to demonstrate experience of handling, modifying and manipulating proteins / enzymes along with good working knowledge of protein purification methods. Some organic chemistry knowledge or experience would be advantageous.

**Molecular Biologist**

Ideally a masters student in Biochemistry, Molecular Biology or similar, with 1-2 years of experience working in an industrial environment, the ideal candidate will be able to demonstrate general skills in working with and handling DNA and proteins (Agarose gel electrophoresis, SDS-PAGE etc), DNA isolation and purification, PCR, common cloning techniques, random and directed mutagenesis, in particular point mutation work.

**Research Scientist - ExoPore testing**

This practical based role focuses on developing our Nanopore platform for identifying DNA bases at the single molecule level. Novel protein constructs (`exopores`), which form the core of our technology, will be evaluated and optimized using in-house techniques. Suitable candidates will be qualified to degree level in a scientific discipline, possess excellent practical skills and have a keen eye for attention to detail.

**Protein Biochemist**

A graduate with 1-2 years experience, the ideal candidate will have worked on E.coli protein expression on a research scale. Good knowledge of protein purification techniques (ion exchange, tagged, affinity, gel filtration) is essential, experience of automated systems such as AktaExpress/FPLC is desirable.

**Lab Technician**
Experienced lab technician required, ideally with experience of working with DNA or proteins. The successful candidate will have responsibility for the day to day organization of maintaining lab stocks (buffers, gels, clean glassware, pipette calibration, consumables etc).

**Development Engineer**  
Requiring a high level of interaction between multi-disciplinary teams, this role interfaces the design of the instrumentation with the needs of the customer and our internal scientists and engineers. Through building, testing and developing the overall instrument systems this position is a key part of the design of a successful product. Candidate should have degree level engineering, physics or equivalent plus three years development experience. Methodologies for system level specification, design and evaluation. Product development and transfer to manufacturing.

**Lead Mechanical Engineer**  
With responsibility for the mechanical design of an exciting new instrumentation platform, this role provides important design and development resource from an overall system level, down to piece part design. The DNA sequencing system being developed includes fluidics, electronic interfaces, automated mechanisms and product industrial design. Candidate should have five years relevant mechanical engineering. Methodologies for system level specification and detailed design. Fluid handling and mechanism design advantageous. Ability to use CAD packages (Solidworks, ProE, iDEAS) to their full potential. Product development and transfer to manufacturing.

**Computational Biologists and Informaticians**  
We are seeking highly motivated individuals to join our rapidly growing informatics team developing our revolutionary DNA sequencing system. Opportunities include Instrument Software Team Leader, and various positions for the development of new sequencing applications, analysis controls, tools and algorithms, analysis and interpretation of data sets. We seek candidates who respond well to a dynamic working environment.

Apply at [www.nanoporotech.com/vacancies](http://www.nanoporotech.com/vacancies) or email careers@nanoporotech.com with a CV and cover letter. For more information please visit our website at [www.nanoporotech.com](http://www.nanoporotech.com) [2689-005 (2009) : 47]
We are looking to recruit an enthusiastic and motivated Clinical Physiologist to join our team based in the GI Physiology Unit at The Royal London Hospital. This renowned and long-established Unit is one of the busiest centres for the physiological investigation of gastrointestinal disorders in the UK, and provides a clinical service for in excess of 2,000 patients per year. Consequently, we also have an active research programme. All areas of GI measurement are covered, although the focus is on anorectal and oesophageal function tests.

In line with an exciting period of Unit expansion, your primary role will be to provide improved clinical service delivery, by contributing to the day-to-day running of the Unit, and by undertaking a range of diagnostic GI physiological investigations. You will also help to co-ordinate and support further development of the anorectal physiology service. In addition, you will be expected to train and supervise both hospital-based and visiting professionals. Furthermore, you will be involved in providing research support by playing an integral role in running our specialised gamma camera facility.

Ideally you have proven experience in this field, are an Accredited Independent Practitioner with the Association of GI Physiologists, and will be eligible for State Registration with the Registration Council for Clinical Physiologists. This is initially a one year post (extendable, subject to funding and performance) with a salary at the appropriate point for experience on AfC Band 7.

Informal enquiries can be made to Dr Mark Scott, Manager of the GI Physiology Unit, Centre for Academic Surgery on 020 7377 7194 or email m.scott@qmul.ac.uk Alternatively, please contact Professor Qasim Aziz, Director of the Wingate Institute, Centre for Gastroenterology on 020 7882 2630 or email g.aziz@qmul.ac.uk

To apply please visit www.jobs.nhs.uk searching under reference number 259-4901.

Closing date: 25th January 2009.

Staff benefits are a priority at Barts and The London. They include interest free season ticket loans, excellent pension scheme, sports and leisure facilities, flexible working, holiday play schemes and free counselling with many more to follow.

Committed to equal opportunities.

POSITIVE ABOUT DISABLED PEOPLE
NIBSC

Business Support Officer
Commercial Department
Hertfordshire • £27,000 to £30,500 per annum, dependent on experience

NIBSC is an internationally renowned body devoted to improving Public Health through ensuring the quality of biological medicines.

We are seeking to recruit an enthusiastic and professional Business Support Officer to play an important role in the Institute's Commercial Department. Responsibilities will include co-ordinating the internal assessment of income generation proposals, drafting and negotiating business-related legal agreements and handling customer enquiries. The role also covers marketing communications activities including the maintenance of customer databases and preparation of promotional materials.

The role provides an exciting opportunity to apply an interest in biological sciences within a business discipline. A real commitment to providing an excellent service level to both internal and external customers is essential.

For a full job description please see our website www.nibsc.ac.uk

To apply, please submit a full CV (2 copies), including the names and addresses of two referees, to the HR Dept, NIBSC, Blanche Lane, South Mimms, Potters Bar, Herts EN6 3QG or email HR@nibsc.ac.uk

Please quote reference AD.057.2 clearly on your application.

Closing date for applications is 19 January 2009

Assuring the quality of biological medicines

[2689-007 (2009) : 48]
Applications are invited for the post of cell culture technician to join a team researching the effect of heparin upon the genomics/proteomics of breast cancer. A degree in a relevant scientific discipline is required together with a good level of experience in mammalian cell culture techniques. Experience with FACS analysis would be an advantage.

Salary will be on the research scale and in the range £25,829 to £32,365 (plus LW). The post will be for a two year period with the possibility of a permanent position for the right candidate.

The Thrombosis Research Institute is an academically linked establishment based in Chelsea which is dedicated to clinical and basic research into thrombosis. Applicants should send a covering letter, CV and names, e-mail addresses and telephone numbers of three referees to the Institute Secretary, Thrombosis Research Institute, Emmanuel Kaye Building, Manresa Road, London SW3 6LR or email cv@tri-london.ac.uk

Closing date for applications is 6th February 2009
[2689-008 (2009) : 48]
NHS
Blood and Transplant

Our work in Stem Cells and Immunotherapies (SCI) is central to the provision and improvement of haemopoietic stem cell transplants. It enables us to support almost half of those carried out in England each year through a network of GMP grade laboratories and is at the forefront of clinical improvements in these transplants. NHS Blood and Transplant also supplies blood and blood components and manages 5,500 organ and cornea transplants every year.

**Head of SCI Laboratory**
£52,007 - £64,118 per annum
Birmingham Ref: b1710

This prestigious role offers you the chance to lead and inspire all scientific, technical and clerical staff at the SCI laboratory in Birmingham. You will develop and manage relevant translational research and clinical trials activities aimed at improving transplant outcomes, communicating and collaborating with academic and clinical colleagues within the Birmingham region.

You will also be responsible for all aspects of this high quality Service Laboratory, acting as the focal point for the service and providing a comprehensive support to haemopoietic stem cell Transplant programmes. Working to best practice, you will ensure the service stays at the cutting edge of patient-focussed care.

To qualify, you will need to be an HPC registered Clinical Scientist with a Ph.D. and have significant relevant post-doctoral experience in stem cell processing or research. Your technical credentials will be complemented by excellent communication, training and leadership skills. An honorary contract with the University of Birmingham would also be available, allowing the NHSBT laboratory to cement collaborative studies with the Institute of Cancer Studies and other departments.

Informal enquiries can be made to Dr Suzanne Watt via email: suzanne.watt@nbs.nhs.uk

For full details please visit www.nhsbtcareers.co.uk Click on current vacancies and enter the reference number in the search box.

Closing date: Monday 5th January 2009.

BIOSENSING & CELL DIAGNOSTICS

Research Scientists (all levels)
Cambridge

Philips Research creates innovations in the areas of healthcare, lifestyle and enabling technologies. With Laboratories in five different countries, we are one of the world's major private research organisations and we are committed to the development of people to their full potential. The UK laboratory in Cambridge has capabilities spanning consumer electronics, tele-monitoring, bioelectronics and healthcare. The multidisciplinary team combines innovative experimental work on biochemistry and electrochemistry as well as electronic design and testing. We're looking for newly qualified and experienced hands-on innovators to join us to create biosensing technologies for clinical and consumer applications.

Microfluidics
Developing complete microfluidic systems for biosensing devices
With a degree or Ph.D. in Biochemistry, Biophysics or Engineering, you may also have R&D experience of the design (including using simulation), manufacture and testing of microfluidic systems.

Biosensors
Developing biosensors for various applications including clinical and consumer diagnostics
With a degree or Ph.D. in Biochemistry, Biophysics or Engineering, ideally you will have several years' hands-on experience in electrochemistry biochemical assay development and microfabrication.

Cell Diagnostics
Delivering specialist cell biology knowledge to multidisciplinary teams creating biosensing devices
With a degree or Ph.D. in Cell Biology, Biochemistry or Immunology, you will have hands-on experience in flow cytometry, mammalian cell handling and purification protocols.

We're offering a competitive package and the opportunity to join a highly motivated team who have recently relocated to state-of-the-art laboratory facilities in Cambridge.

Please apply indicating which opportunity interests you at www.philips.com/careers using JOB ID: 56824.

For more details, contact m.mcLeod@philips.com
Closing Date: 21st January 2009.

[2689-010 (2009) : 49]
Oncology Scientific Advisor
Hoddesdon, Hertfordshire

Merck Sharp & Dohme Limited (MSD) is the UK subsidiary of Merck & Co., Inc., of Whitehouse Station, New Jersey, USA, a leading research-based pharmaceutical company that has a track record of discovering, developing, manufacturing and marketing a wide range of leading-edge, innovative pharmaceutical products in a wide range of exciting therapy areas.

The company has an acclaimed product pipeline and in order to prepare for its realisation, and to align itself to the business franchises, our UK Medical Department is restructuring and expanding. We are seeking an experienced Scientific Advisor as part of this expansion.

Reporting to the Director of Medical Affairs, you will support the company's products in the Oncology area to ensure scientific credibility and high corporate ethical standards.

In this non-promotional role you will be focussed on providing scientific and medical expertise to healthcare professionals and scientists, with emphasis on regional and national medical and scientific leaders. You will also provide an internal resource collaborating with marketing teams to ensure smooth and successful launch of new products and management of existing products. You will support Medical Information in the review of promotional material, including ensuring adherence to all aspects of the Code of Practice and other relevant regulations.

You will hold a Ph.D., Pharmacy or a similar Clinical qualification. You will be able to demonstrate excellent Medical Affairs skills and the ability to work collaboratively across external and internal networks. You will have a demonstrable ability to understand the ABPI Code of Practice and have expert knowledge in the Oncology therapy area.

MSD is highly committed to training and development and has a good track record of career progression, both in the UK and internationally. In order to attract and retain the best talent available the company offers an excellent remuneration package including very competitive salaries, bonus, car allowance and a final salary pension.

For a confidential discussion, please telephone our retained consultant - Philippa Shiels at AXESS Ltd on 020 8560 2300. To apply, please send your CV to jobs@axess.co.uk quoting 3612.

MERCK SHARP & DOHME
[2689-011 (2009) : 50]
European Respiratory Society
The European Respiratory Society in Lausanne is seeking a
Press Officer

Mission
The role of the press officer will be to promote and publicise awareness of the European Respiratory Society, its products (with a main focus on the European Respiratory journal and the ERS Annual Congress) and services to all target audiences whilst maintaining a positive working relationship with the media, through reporting, writing and copywriting.

You will act as the official media contact and will liaise with media to identify opportunities, handle media enquiries, organise press conferences, organise the ERS Annual Congress media centre and all press releases for the event, deal with requests for information about the society, attend press visits and carry out background research. Maintaining up-to-date awareness of topical issues and competitor activity will also be an important part of the role.

Your Profile
• Experience as scientific and medical writer in a large media aimed at general public
• Familiar with press conferences held on scientific matter
• Scientific or medical background
• Awareness of key media
• Entrepreneurial personality with a keen team spirit
• Flexibility to travel
• Excellent knowledge of English required

Apply for this position by email at michele.lehmann-kim@ersnet.org

Identibac Field Sales Representative & Business Development Manager
based at Addlestone, Surrey

The VLA is an international centre of expertise in animal health science, and provides a broad range of specialist veterinary services and products to Governments and commercial customers across the world.

Identibac Field Sales Representative
The VLA has launched a range of genotyping microarrays (www.Identibac.com) into the human and veterinary markets. You will be responsible for direct sales of the products into the UK and Europe, spending most of the time demonstrating and selling the product, and the balance in providing post sales support to customers. You should have a strong academic background with a good life science degree and knowledge of molecular laboratory techniques; proven sales success within the diagnostics or laboratory equipment market and able to provide input into sales and marketing planning processes. Extensive travel within the UK and Europe will be required, therefore you must have a valid driving licence, or be able to call upon suitable alternate means of transport. Ref ADP4676

Business Development Manager
You will build new business and generate income for the VLA by marketing and selling our services for disinfectant testing, for pre and post registration work on veterinary vaccines and for other VLA commercial research. You will develop sales with existing customers and expand the customer base through customer service and by exploring new markets. You should have a science degree with further qualifications in Business Administration, Marketing or Customer Relations an advantage. You must have a valid driving licence, or be able to call upon suitable alternate means of transport as some travel to visit customers will be required. Ref ADP4679

The posts are both 3-year Fixed Term Appointments, with the possibility of extension and/or permanency, in Pay Band D £23,150 - £32,100 per annum. The Civil Service offers a choice of either an Occupational Pension Scheme or Stakeholder Pension Scheme, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working and annual pay reviews.

Applications are welcome from all sections of the community irrespective of race, ethnicity, religious beliefs, marital status, gender, sexual orientation, disability or age.

An Executive Agency of the Department for Environment, Food and Rural Affairs.

Veterinary Laboratories Agency®

Further details and an application form can be obtained from the VLA website www.vla.gov.uk or by writing to: Personnel (AMK), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting the relevant reference.

The closing date for receiving completed application forms is 16 January 2009.

NewScientist Jobs
[2689-015 (2009) : 51]
Plymouth Marine Laboratory

Plymouth Marine Laboratory (PML) is a dynamic, highly innovative, independent and impartial provider of scientific research and advice on the marine environment. PML is a NERC Collaborative Centre and independent business with charitable status which has been an integral part of the UK’s strategic marine sciences & technology capability for over 30 years.

**Marine System Scientist / Modeller (Carbon Cycles)**
Plymouth, UK · Permanent appointment - Salary £26,319 pa

We require an enthusiastic and highly motivated individual to join our marine ecosystem modelling team to work on the application of data assimilation schemes to marine ecosystem/carbon cycle models. Our goal is to understand the feedbacks between physical and biological processes in the carbon cycle and climate, in order to predict future changes in carbon fluxes and dynamic carbon reservoirs of coastal seas. PML acting as a part of the National Centre for Earth Observation (NCEO) is seeking to achieve this through a combination of marine ecosystem modelling and earth observation data merged using data assimilation to make re-analysis simulations.

You will have a Ph.D. or equivalent postgraduate level research experience. In particular we are looking for experience in data assimilation, hydrodynamic and/or ecosystem modelling, the marine carbon cycle and marine chemistry. Strong programming and computer skills with good mathematical and statistical skills are essential. Experience of the OPA/NEMO hydrodynamic model, ERSEM type models, parallel computing and FORTRAN & LINUX will be an advantage. The project benefits from access to our in house 320 processor cluster and national computing facilities.

For an application form email Mrs C Tutte, at: vacancies@pml.ac.uk quoting reference number: PML75/08.

The closing date for applications is Thursday 8th January 2009. Interviews will be held in late January with a view to the appointment commencing as soon as possible.

Providing innovative software solutions to scientific, engineering and technical problems

**Scientific Software Developers and Consultants**

We are looking for Scientists and Engineers with proven programming abilities (in C, C++, C#, Net or Java) to join our successful and growing business. You will be provided with extensive training and will have the opportunity to gain experience over a diverse range of projects in a variety of industries, including:

- Drug discovery & clinical trials
- Explosion modelling & risk assessments
- Environmental modelling
- Forensic data analysis
- Space mission design

Opportunities exist for new graduates (minimum 2:1) and candidates with commercial experience. Applicants with Masters or Ph.Ds are welcome.

Please visit [www.tessella.com/careers](http://www.tessella.com/careers) for more information and how to apply.

ASSISTANT EDITOR
Industrial Minerals

Industrial Minerals, a monthly magazine, from mine to market the world's authority on non-metallic minerals supply and demand, seeks an Assistant Editor to join its dynamic publishing team.

Post involves researching, investigating, writing, and editing news, on-line news, and features to exacting deadlines in a demanding environment. Duties include international travel and event chairing and attendance.

Applicants must be well organised, demonstrate investigative flair and a gift for networking. A proven talent for writing, careful planning, attention to detail, a passion to unearth stories and information, and excellent communication skills are essential.

Education and/or experience in earth sciences/minerals and business/commodities journalism/research would be beneficial.

Development Scientist

Vivacta

Vivacta is specialising in the development of innovative in-vitro diagnostic devices using our novel patented piezofilm technology (see our website www.vivacta.com). We are based at the Kent Science Park, situated between Maidstone and Sittingbourne.

We are looking to recruit a Development Scientist. Prospective candidates should have a strong background in physics or a related field and educated to at least degree level or higher with 3+ years experience in IVD medical devices or biosensor systems development. Experience with electronics, signal processing, optics and scientific instrumentation is essential. Excellent communication skills are a pre-requisite as the position involves interacting with a team of multidisciplinary scientists and external contractors.

We are looking for innovative, enthusiastic and flexible people with the skills and foresight to ensure our success. We guarantee an open and challenging working environment in which your role and responsibilities can develop as the company expands.

Please send your CV and covering letter explaining how you can help our aggressive plans to succeed and your salary expectations to: Paul Monaghan, fax: 01795-419401, email: pmonaghan@vivacta.com

[2689-019 (2009) : 52]
The BIPM (International Bureau of Weights and Measures) in Sèvres, France, is an intergovernmental scientific organization whose mandate is to provide the basis for a coherent system of measurements throughout the world, traceable to the International System of Units (SI). It has an international staff of over 70 and an annual budget of about 10 million euros. Further information about the BIPM can be found on the website: [www.bipm.org](http://www.bipm.org)

The BIPM has the two following vacancies:

**Research Fellow - Postdoctoral Research Assistant**  
**Development of stable mass standards**

**Duties**

The BIPM has responsibility for conservation and use of the physical object presently used to define the kilogram in the International System of Units (SI). Plans are being made to redefine the kilogram with respect to a fundamental constant of physics. To advance this programme, the BIPM will create a bank of new 1 kg artefacts whose physical properties and surface finish are optimised for mass stability at the part in $10^9$ level. The artefacts will be stored and used under vacuum or in an inert atmosphere.

The successful candidate will carry out research and development aimed at creating storage and handling facilities as well as supervising the construction of the artefacts themselves. The best design solution will be guided by results of surface studies as a function of storage environment for various candidate materials. This work will be validated by using precision mass comparators maintained at the BIPM and through collaboration with other research institutes.

The BIPM offers a full-time 19 months fixed-term appointment starting 1 April 2009.

**Qualifications**

Applicants should have:

- a Ph.D. in physics:
- experience in surface science and vacuum systems:
- a fluent level of spoken and written English:
- ability to work in a multicultural environment and to maintain good working relations inside and outside the organization.

Requests for additional information may be addressed to  
Dr. R. Davis, Head of the Mass Section: rdavis@bipm.org  
Please quote reference RFM

**Research Fellow - Postdoctoral Research Assistant**  
**Laser-based ozone cross section and concentration measurements**

**Duties**

The BIPM has a vacancy for a Research Fellow, postdoctoral research assistant for the characterization of a laser-based standard reference photometer system operating in the UV for accurate determinations of ground-level ozone concentration.

The BIPM offers a full-time 2 years fixed-term appointment.

The successful candidate will undertake a project to improve the laser-based photometer system performance, with a view to providing highly precise and accurate measurements of ozone.
concentration. A second part of the project will result in the modification of the system to perform new measurements of ozone absorption cross-sections within the UV.

Applicants should have:
• a Ph.D in physics or physical chemistry;
• experience in laser spectroscopy of the gas phase;
• a fluent level of spoken and written English;
• ability to work in a multicultural environment and to maintain good working relations inside and outside the organization.

Previous experience with lasers based measurement systems operating in the UV would be an advantage.

Requests for additional information may be addressed to Dr Robert Wielgosz, Head of the Chemistry Section: rwielgosz@bipm.org

Please quote reference RFC.

Employment conditions
The BIPM offers salaries and terms of employment in accordance with its Staff Rules, which are comparable to those of other international organizations based in France, operates its own contributory pension scheme and subscribes to a private medical insurance for its staff and their families.

Applications
The BIPM encourages applications from both women and men with relevant qualifications. A full Curriculum Vitae (C.V.) and covering letter should be sent by paper mail to the Director, BIPM, Pavillon de Breteuil, F-923 12 Sèvres Cedex, France by 15 January 2009 quoting the reference of the job vacancy. Applications may also be submitted by email to: fjoly@bipm.org

Applications should include the names of two referees who will be asked to comment upon the candidate’s suitability for the post.

[2689-020 (2009) : 53]
Head of Biology (Cancer Immunology)
Competitive Package
Cambridge, UK

This is a unique opportunity to join a leading, highly innovative biotechnology company. Focussed on the development and commercialisation of products that address medical needs in areas such as infectious disease, oncology, and respiratory and autoimmune disease, MedImmune primarily employs antibody and vaccine technologies in its product development. With a strong and diverse R&D pipeline and an impressive portfolio of marketed products, the organisation has approximately 3,000 employees across the US, UK and the Netherlands.

In this new, high-profile position, you will play a key role in defining and refining the top-level strategy focussed on harnessing the immune system in order to identify novel cancer immunotherapies. As head of biology (cancer immunology) you will be responsible for creating and delivering the biology strategy, including the generation of an in vitro T-cell assay platform involving complex cellular immunology assays for multiple research projects. Ideally, you will also contribute to the development of pharmacology models addressing immune function and the search for predictive biomarkers and surrogate markers to facilitate the transition of NBEs into clinical development.

You will provide high-quality leadership to a small team of in vitro scientists and, via a matrix system, will direct the activities of an additional team of pharmacologists. For suitably senior candidates, there is the opportunity to take online management responsibility for these additional staff.

Educated to degree or Ph.D. level, you will bring to the role a broad understanding of human immunology, with a specific focus on T-cell systems. You will have in-depth practical experience of immune cell assays and models relevant to the development of oncology therapeutics. In this senior-level role, you will demonstrate the ability to clearly define and lead strategy and utilising an open, collaborative working style, engage with key governance bodies within the organisation and external networks to bring this to fruition.

To apply, please e-mail your CV to 08946@theRSAgroup.com Alternatively, call Dr Kay Wardle on +44 (0)1707 259333 for an initial, confidential discussion.

RSA, The Melon Ground, Hatfield Park, Hatfield, Herts AL9 5NB Tel +44 (0)170 08946@theRSAgroup.com 08946@theRSAgroup.com www.RSAjobs.com [2689-021 (2009) : 54]
EXECUTIVE SECRETARY OF THE COMMISSION FOR THE CONSERVATION OF ANTARCTIC MARINE LIVING RESOURCES (CCAMLR)

The Commission for the Conservation of Antarctic Marine Living Resources (CCAMLR) invites applications for the position of Executive Secretary.

CCAMLR is an international organisation, with Headquarters in Hobart, Australia, responsible for giving effect to the objectives and principles of the Convention on the Conservation of Antarctic Marine Living Resources which provides for the conservation and rational use of marine living resources in waters adjacent to Antarctica.

The Executive Secretary manages a small administrative, technical and scientific staff; presents and manages the Commission budget; and organises the meetings of the Commission and its ad hoc and standing committees.

Applicants must be citizens/nationals of a Member of the Commission: (Argentina, Australia, Belgium, Brazil, Chile, People's Republic of China, European Community, France, Germany, India, Italy, Japan, Republic of Korea, Namibia, New Zealand, Norway, Poland, Russian Federation, South Africa, Spain, Sweden, Ukraine, United Kingdom of Great Britain and Northern Ireland, United States of America, Uruguay).

Selection Criteria
• Experience or detailed knowledge of the operations of international, regional and/or intergovernmental organisations.
• Demonstration of a high level of managerial and leadership experience and proven competence, in such areas as:
  - the selection and management of administrative, technical and scientific staff;
  - the preparation of financial budgets and the management of expenditures;
  - the organisation of meetings and provision of secretariat support for high level committees;
  - oversight and management of computer services and information technology.
• Familiarity with Antarctic affairs.
• Familiarity with fisheries and/or ecosystem management.
• Language skills.

Salary and Allowances
The appointment will be for a term of four years with the possibility of one additional four-year appointment. Present salary is in the range of US$129,304 to US$ 150,341 p.a. gross. Allowances are based on the UN system and include post adjustment, removal costs, installation grant, repatriation allowances, home leave allowance every two years, social security and child education benefits.

Availability
The individual chosen for the post of Executive Secretary must be available starting 15 February 2010 for a two-week period of transition with the incumbent Executive Secretary and will assume the post on 01 March 2010.

Additional Information
Please consult the CCAMLR website at www.ccamlr.org for complete information on duties, selection criteria and the application process.

Equal Employment Opportunity CCAMLR is an equal opportunity employer.

Closing
The closing date for applications is 17h00 (Australian Eastern Standard Time) 30 April 2009. Applications should be submitted electronically to recruit@ccamlr.org
A copy of the application should also be sent to the Member Country contact (see the CCAMLR Website for details).

EPFL  
ECOLE POLYTECHNIQUE FEDERALE DE LAUSANNE  

EPFL Center for Neuroprosthetics  
Faculty Positions at the interface of  
Neuroscience and Bioengineering at Ecole Polytechnique Fédérale de Lausanne (EPFL)

The Brain-Mind Institute and the Institute of Bioengineering at EPFL invite applications for faculty positions at all ranks, from tenure track assistant professor to full professor, for the newly-launched Center for Neuroprosthetics. The Center, situated between the School of Life Sciences and the School of Engineering, seeks outstanding individuals working in the man-machine interface for motor control with invasive and noninvasive sensing and stimulation, in audition, in vision, and in spinal cord repair. The open faculty positions are offered in an environment of both theoretical and experimental research, rich for the development of novel enabling technologies as well as for seeking deeper understanding of fundamental mechanisms underlying the field of neuroprosthetics.

The Brain-Mind Institute offers a broader context of neuroscience, with strengths in cognition, behavior, cellular and molecular neuroscience, computational neuroscience, and neurodegeneration, among others. The School of Engineering and the Institute of Bioengineering offer strength in areas that include bio-MEMS/NEMS, bioelectronics, robotics and learning, integrated systems, biomaterials, biophotonics, molecular and computational systems biology, and stem cell biotechnology.

Excellent experimental infrastructure are available including core facilities in animal physiological and behavioral phenomics, animal and human imaging, quantitative light microscopy, genomics and proteomics, micro- and nano-fabrication, and electron microscopy and surface analysis.

Successful candidates are expected to initiate independent, creative research programs and participate in undergraduate and graduate teaching. Internationally competitive salaries, start-up resources and benefits are offered.

Applications should include a curriculum vitae with a list of publications, a concise statement of research and teaching interests, and the names and addresses (including e-mail) of at least five referees. Applications should be uploaded to:  
http://neuroprosthetics-rec.epfl.ch

The deadline for applications is 28 February 2009.

Enquiries may be addressed to:  
Prof. Jeffrey A. Hubbell,  
E-mail: neuroprosthetics-rec@epfl.ch

For additional information on EPFL, the Schools of Engineering and Life Sciences, the Institute of Bioengineering, and the Brain-Mind Institute, and Institute of Bioengineering, please consult the web sites:  

EPFL aims to increase the presence of women amongst its faculty, and qualified female candidates are strongly encouraged to apply.
[2689-023 (2009) : 55]
Johnson & Johnson Pharmaceutical Research & Development (J&JPRD), a member of the Johnson & Johnson Family of Companies, is recruiting for an experienced ADME Project Expert located in Beerse, Belgium.

Research and development areas encompass novel targets in psychiatric and neurologic disorders, pain, oncology, infectious disease, diabetes, haematology, metabolic disorders, immunological disorders, and reproductive medicine.

JANSSEN Pharmaceuticals
www.janssenpharmaceutica.be/jobs

Johnson & Johnson PRD, a division of Janssen Pharmaceuticals N.V

ADME Project Expert
Discovery ADME/Tox Department

The Discovery ADMET group plays a critical role in drug discovery within J&J PR&D, with the goal of evaluating ADMET properties of compounds from a very early stage, through lead optimization to compound selection. Our multi-disciplinary department is well equipped with state of the art instrumentation and the latest technologies and models to assess both in vitro drug metabolism, in vivo pharmacokinetics, and in vitro genotoxicity. As part of the Beerse RED unit, our responsibilities are wide ranging, from supporting Discovery Project teams in the selection of new druggable lead candidates to streamlining the transition of NMEs to the Early Development phase.

This successful candidate will be responsible for representing the ADMET group on multi-disciplinary Discovery project teams, providing appropriate ADMET scientific input and actively contributing to the decision making process involved in the design, evaluation and selection of pre-clinical candidate molecules. In addition, the role involves leading a small team to further develop and integrate the use of pharmacokinetic prediction models (both empirical and physiologically based (PBPK)) into the local Discovery process and in collaboration with our worldwide initiative. As a member of the European ADMET team you will also interact with the Global Pre-Clinical Development, ChemPharm and Clinical PK/Advanced Modeling and Simulation organizations to ensure project progression. The successful applicant will also be a member of the Discovery ADMET Management Team, which is responsible for the overall strategic and scientific planning for the team.

Key Responsibilities
- Provide scientific ADMET leadership and guidance to drug discovery projects through the identification and management of ADMET related issues, strategic decision making, PK SAR and the use of PK/PD models.
- Work closely with colleagues in a cross-departmental matrix and multi-disciplinary team environment.
- Work with the Department and Leadership team to drive scientific and technical innovation
- Lead the Discovery research into the use of empirical and PBPK methodologies (Gastoplus, Simcyp) to predict absorption, clearance and distribution of molecules in pre-clinical models and in humans

Profile:
- Ph.D. (Chemistry, Pharmacology, Pharmaceutical Sciences) degree or equivalent with a minimum of 5-7 years relevant pharmaceutical industry experience.
- Excellent oral and written communication skills, strong quality awareness, enthusiastic and highly motivated, flexible and willing to interact across multi-disciplinary teams.
• An excellent understanding of the drug discovery process including delivery of compounds from
discovery into the development phase.
• Project experience with an ability to influence decision-making at the strategic level. Experience in
CNS projects will be a distinct advantage.
• Experience in PK prediction is preferred but full training will be given where necessary.
• Proven effectiveness as a team leader and a team player.
• Ability to lead, influence and motivate others in a matrix environment. Additional info:
• J&JPRD, Beerse, Belgium is offering a competitive salary package and a scientific challenging
environment with state-of-the-art equipment
• J&JPRD is proud to be an equal opportunities employer.

If you are interested in this opening, please apply via our website:
www.janssenpharmaceutica.be and search for the corresponding requisition number 811840

Progress through innovation

Johnson & Johnson
PHARMACEUTICAL RESEARCH & DEVELOPMENT
DIVISION OF JANSSEN PHARMACEUTICA NV
[2689-025 (2009) : 56]
The University of Nottingham
School of Veterinary Medicine & Science
Leading the way...

The University of Nottingham's School of Veterinary Medicine and Science is the first new veterinary school to open in the UK for 50 years. The School is research driven and is already achieving international acclaim in the five research themes (Comparative Medicine, Reproductive Biology, Population Health, Infection and Immunity and Veterinary Education). We are developing a novel and cutting-edge teaching curriculum designed to equip graduates with the diagnostic, medical and surgical skills required to succeed in a changing world. We aim to provide a progressive, dynamic environment which will deliver an outstanding learning experience drawing upon leading-edge teaching methods and the latest research advances. We plan to offer an exciting and innovative five-year degree course which is designed with clinical outcomes in mind and is based upon excellence in teaching and scientific research.

Applications are invited for Associate Professors and Lecturers with research interests in the following areas:
• Host Pathogen Interactions
• Bioinformatics
• Molecular and Cellular Biology
• Molecular and Quantitative Genetics
• Developmental Biology

The School is divided into three clinical divisions each responsible for teaching the basic clinical sciences as well as clinical subjects. We expect the new academic staff to share our vision, be dynamic and be able to innovate and seize opportunities. A willingness to collaborate with other Schools within the University and to play a key role throughout the academic community at Nottingham is essential. Appointments to senior posts will be required to promote and facilitate teaching and research in their discipline and maintain an international reputation, possess leadership skills to develop new initiatives and contribute to, and enhance, existing research programmes.

Salary, depending on qualifications and experience, will be within the range:
• Non-Clinical Lecturer scale: £35,469 - £43,622 pa (salary can progress to £50,569 pa, subject to performance).
• Non-Clinical Associate Professor scale: £46,278 - £55,259 pa (salary can progress to £65,965 pa, subject to performance).

It is a condition of these posts that satisfactory enhanced disclosure is obtained from the Criminal Records Bureau.

Informal enquiries may be addressed to Professor G England, tel: 0115 951 6411 or Email: Gary.England@Nottingham.ac.uk.

For more details and/or to apply on-line please access: http://jobs.nottingham.ac.uk/CJ264505X2. If you are unable to apply on-line please contact the Human Resources Department, tel: 0115 951 3262 or fax: 0115 951 5205. Please quote ref. CJ/264505X2.

Closing date: 30 January 2009.

GRESHAM COLLEGE
Funded 1597

Gresham Professor of Physic

For over 400 years Gresham College has provided free public lectures, seminars and conferences in the City of London. Applications are invited for the Gresham Professor of Physic, which can encompass any branch of the biological sciences.

The appointment is part time from August 2009 and normally for three years. Gresham Professors must offer six lectures each year. Gresham lectures attract large audiences and are also archived and made available through the internet, so candidates should have an interest in reaching a wide audience. An annual fee of £6,250 is payable.

More information about Gresham College is available at www.gresham.ac.uk

Further details from: Professor Sir Roderick Floud FBA, Provost Gresham College, Barnard's Inn Hall, Holborn, London EC1N 2HH Telephone 020 783 1 0575, fax 020 7831 5208, registrar@gresham.ac.uk

Applications to be returned by mid-day 19 February 2009
Interviews will be held on 19 March 2009
[2689-030 (2009) : 58]
Vaccine Programme Coordinator
£28,839 - £35,469 pa

Nuffield Department of Clinical Medicine - ORCRB Division

Applications are invited from scientifically qualified candidates, ideally with clinical trial experience, to work with the clinical trials team on the administration and coordination of this extensive research programme from vaccine construction through to overseas clinical trials.

The Jenner Institute (www.jenner.ac.uk) houses a large programme of vaccine research and development spanning vaccine design and construction, preclinical evaluation and testing in Phase I and II clinical trials. Vaccines are being developed for malaria, tuberculosis (TB), 'flu and hepatitis C virus. Clinical trials with these new vaccines are in progress in the UK and in several African countries. The group now seeks a vaccine programme coordinator to support the vaccine development programme.

The post is based at the Centre for Clinical Vaccinology and Tropical Medicine, Churchill Hospital, Oxford (www.ccvtm.ox.ac.uk). There are strong links with other research centres in the University division of medical sciences and with overseas field sites.

The post is available for two years in the first instance, although this may be extended and is funded by the Oxford Radcliffe Hospitals Biomedical Research Centre.

Informal enquiries to Dr Alison Lawrie (Tel 01865 857382; email alison.lawrie@ndm.ox.ac.uk) or Dr Helen McShane (Tel 01865 617606; email helen.mcshane@ndm.ox.ac.uk).

An application form and a job description are available from the web link: http://www.ndm.ox.ac.uk/ndmorcrb/vacancies or from the Personnel Officer, ORCRB, University of Oxford, Old Road Campus, Off Roosevelt Drive, Headington, Oxford, OX3 7DQ (Tel: 01865 617604 or email: orcrb.personnel@ndm.ox.ac.uk). Please quote the reference HC-08-037-VTM. The closing date for applications is Friday, 9 January 2009.

THE GLASGOW SCHOOL OF ART
DEPUTY DIRECTOR
Digital Design Studio
Competitive Salary

We have ambitious plans for our future - can you help us realise them?

The Digital Design Studio at Glasgow School of Art is a leading-edge research and academic centre within UK Higher Education and has become a flagship for advanced 3D digital technologies.

Our aim is to enhance our international standing with a significant investment in our premises, and by continuing to build on our successes, developing new areas of research and commercial activity with a range of partners and research collaborators. We need a strategic visionary to join us as Deputy Director, to lead on commercial and visualisation activity in order to help us realise our ambitions.

Building on our existing track record and your own track record in research, knowledge transfer and commercialisation - you will embrace our ambitions and play a key role in realising our development targets. Your ambition, leadership, excellent research profile, influencing skills and drive will be key to achieving success.

FOR AN INFORMAL DISCUSSION, PLEASE CONTACT: Paul Andersom on +44 (0)141 353 4719 or email p.anderson@gsa.ac.uk

CREATIVE EDUCATION & RESEARCH
[2689-032 (2009) : 59]
The University of Luxembourg, established in 2003, invites applications for the position of founding a new interdisciplinary centre being established by the University

**Director of the Centre for Systems Biology.**
Luxembourg (CSBL) (M/F)

The CSBL will be an autonomous, highly interdisciplinary unit within the University of Luxembourg whose Director will develop the vision, participate in the recruitment of key faculty and establish its research programs.

The Centre is intended to provide a research focus for the development of the future biological sciences in the University, and its Director will report directly to the Rector of the University.

Candidates must have extensive experience in leading significant academic research units, with experience in building and maturing new units, have an outstanding record of scientific achievement and have a focus on an innovative systems approach to biological research. Substantial experience in recruiting, leading the integration of multiple scientific disciplines into a coherent program and the multidisciplinary (biology, mathematical and computational biology, and new technologies) development of research teams is mandatory. Candidates from related disciplines are welcome to apply. The new Director will lead in the establishment and growth of the CSBL that is expected to achieve prominence among European research institutions over the next decade, and contribute substantially to the application of research to understanding human disease. The candidate may also expect to spend significant time within the institute of our research partner in the United States.

The scientific vision, people skills and the managerial and scientific maturity of the successful candidate are critical. The University of Luxembourg has established a strong collaborative research program with the Institute for Systems Biology, Seattle Washington, USA, and the new Director will have the responsibility to lead this collaborative research effort while building the CSBL and forging this joint international collaborative effort. The successful candidate will have access to resources from the University and from competitive third parties to accomplish the ambitious goals of the establishment and development of a visible centre of true excellence in research related to the systems biology of human disease. Further, a strong interest in translating research into practice would be an important advantage.

Candidates should forward a CV and a statement of vision for the development of the Centre for Systems Biology, Luxembourg to: Prof. Dr. Eric Tschirhart • University of Luxembourg • 162a, avenue de la Faïencerie • L-1511 Luxembourg

Applications must be sent before January 14th, 2009

The University of Luxembourg is an equal opportunity employer. Applications will be handled in strictest confidence

University of Reading
School of Pharmacy
New 4-year BBSRC-funded Ph.D. programme in Pharmacy

The Reading School of Pharmacy has a strong research base and was recently awarded Ph.D. studentships by BBSRC as part of a 4-year programme. Students will gain experience of several of the constituent disciplines of Pharmacy before embarking on their Ph.D. project and we hope to
appoint high calibre students to these positions. The following projects (with names of supervisors) are available from October 2009.

Cognitive effects of anticonvulsant cannabinoids in a seizure model (B Whalley)
Interaction of arrestins with G-protein-coupled receptors (C Krasel)
Synthesis and Evaluation of Chloride Channel Activators as Potential Therapies for Cystic Fibrosis (A Cobb)
Engineering novel polymeric nanomaterials for ocular drug delivery (V Khutoryanskiy, C Connon, H Osborn)
Development of new nanomaterials for drug delivery (H Osborn, F Greco)
Development, molecular modelling and novel formulation of metal-based anti-cancer drugs (K Strohfeldt, C Rawlinson)
Semi-automated reconstruction and quantitative statistical analysis of dendritic spines (B Whalley, G Stephens)
Cannabinoid receptors as therapeutic targets in neuropathic pain (G Stephens)
Bioavailability and stability studies on special paediatric drug formulations (P Donyai, C Rawlinson)

Applications for these studentships are encouraged from dynamic and enthusiastic applicants with suitable qualifications (2i or First Class degree or those expecting to graduate with such degrees, UK/EU applicants only).

Applicants should send a CV with the names of two academic referees to Pam Smart (p.j.smart@reading.ac.uk) by the closing date of January 30 2009 indicating a preference for two projects.

Informal enquiries can be made to the supervisors listed above or to the Director of Research (Prof Philip Strange, RG.Strange@reading.ac.uk).

Further details are also provided on our website www.reading.ac.uk/pharmacy [2689-034 (2009) : 60]
www.manchester.ac.uk/jobs
The University of Manchester
MANCHESTER 1824
Faculty of Medical and Human Sciences
School of Clinical and Laboratory Sciences

**Research Technician** (0.50 Fte)
£20,833 - £23,449 p.a. pro rata Ref: MHS/81400

The work of the group focuses on alleviating chronic/relapsing low back pain by investigating the underlying cell biology of disc degeneration in order to develop cell-based tissue engineering and regenerative strategies for its treatment. You will aid development of a model of human disc degeneration in order to test therapies for IVD regeneration and be responsible for culture of primary human cells and tissues, histology, molecular biology and protein biochemistry techniques.

Experience of cell and tissue culture, histology and molecular biology techniques is required. Experience of working with cartilaginous tissues or the intervertebral disc would be advantageous, but not essential.

The post is available immediately and tenable for 18 months.

**Research Associate**
£28,839 p.a. Ref: MHS/81401

The work of the group focuses on alleviating chronic low back pain by investigating the underlying cell biology of disc degeneration to develop cell-based tissue engineering and regenerative strategies for its treatment.

You will develop a model of human disc degeneration in order to test novel cell-based tissue engineering therapies for IVD regeneration and working independently, design and execute complicated experiments, work flexible hours and supervise Ph.D. students and research technicians.

Experience of culture of human cells and tissue explants, histology, molecular biology and protein biochemistry techniques is required as is a Ph.D. or equivalent in a subject related to cell or molecular biology. Significant research experience, preferably working in the area associated with the intervertebral disc or cartilage biology is required.

Informal enquiries for either of the above posts may be made to Professor Judith Hoyland Tel: +44 (0) 161 275 5425, E-mail: Judith.Hoyland@manchester.ac.uk or Dr Stephen Richardson Tel: +44 (0) 161 275 5299, E-mail S.Richardson@manchester.ac.uk

Application forms and further particulars can be obtained at http://www.manchester.ac.uk/news/vacancies. If you are unable to go online you can request a hard copy of the details from Barbara Milnes, Tel: +44-161-275-1190. E-mail: barbara.milnes@manchester.ac.uk.

Closing date: 9 January 2009.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

Applications are open for this exciting new programme designed to reflect the depth and breadth of research within the recently formed UCL Cancer Institute.

The aim of the programme is to look at the biology behind the disease processes which lead to cancer.

Students will learn about the cutting-edge research methods and techniques used to advance our understanding of this disease and design better treatment strategies.

This one year full-time taught course with a laboratory research project is designed for those with an undergraduate qualification in biomedical or life sciences, scientists, clinicians, people in industrial or healthcare settings or those contemplating a Ph.D. or medical studies in cancer.

Please visit our website for more detailed information: [http://www.ucl.ac.uk/cancer/msc-cancer/index.htm](http://www.ucl.ac.uk/cancer/msc-cancer/index.htm)

NewScientist Jobs
[2689-038 (2009) : 61]
Wellcome Trust funded 4-year Ph.D. Programme in Pain Research: from molecules to Perception

Join the London Pain Consortium’s vibrant community of over 20 postgraduate and postdoctoral scientists, on their well established Ph.D. Programme in Pain Research.

Pain is not only a major clinical problem, demanding new mechanistic insights for better drug development, but also a marvellous model system to study information processing in the nervous system. Mechanisms of synaptic plasticity, CNS regulatory circuits, sensory transduction, human and mouse genetics, functional imaging and bioinformatics are all research components of the LPC that are taught both on introductory courses in the first year and form the basis for full Ph.D. projects.

The programme
Year one involves a number of courses and three rotation projects, learning a wide range of neuroscience techniques. Students then choose a full research project in pain and a supervisor for the subsequent three years from Consortium and associated laboratories.

All Ph.D. projects involve collaborations between at least two internationally competitive and well-funded laboratories, with topics covering the whole range of neuroscience related to pain mechanisms and their control: molecular biology, cellular mechanisms, integrated systems neuroscience and human neurophysiology.

Funding
There are a number of Ph.D. studentships available funded by sources including the Wellcome Trust, MRC - CASE studentships with Pfizer and some College funded places, with a stipend and UK fees included.

A University of Fairness and Diversity

POSITIVE ABOUT DISABLED PEOPLE
THE UNIVERSITY OF WARWICK
Centre for Scientific Computing

MSc in Scientific Computing

Are you interested in learning computing from the perspective of more than just one scientific discipline? The Centre for Scientific Computing (CSC) at Warwick offers an exciting interdisciplinary taught Masters course in Scientific Computing, i.e. the use of computers to solve problems in science and engineering. This course is largely lecture based, but also involves a dissertation component. Opportunities exist for entry in September each year.

The programme offers the following advanced modules:
• Foundations of Scientific Computing
• High Performance Computing
• Computational Linear Algebra
• Data Structures and Algorithms
• Monte Carlo Methods
• Computational PDEs

In addition to this taught component there is a long project which can be in any area of Scientific Computing. This will enable you to apply the techniques you have learnt to real problems in your area of scientific specialisation.

Applicants should possess, or hope to obtain, a 1st or 2i honours degree in one of the following sciences: Biology, Chemistry, Computer Science, Engineering, Mathematics, Physics and Statistics. Applicants from closely related disciplines will also be considered.

Details can be found on the University of Warwick's Centre for Scientific Computing (CSC) web page http://www.csc.warwick.ac.uk [2689-042 (2009) : 62]
The University of Edinburgh
THE UNIVERSITY OF EDINBURGH
GeoSciences Masters Programmes

Exploration Geophysics (New for 2009)
Covering the fundamentals in Exploration Geophysics and their applications to hydrocarbon and mineral exploration, this programme is designed for science and engineering graduates seeking an advanced qualification for careers in the Resources industry (oil, gas, minerals, water, subsurface waste and CO2 storage), as well as for those already in the industry wishing to enhance their technical skills and qualifications.

Carbon Capture and Storage (New for 2009)
This new multi-disciplinary programme will provide high-level training in all aspects of carbon capture and storage, as well as an overview of global carbon management.

Designed for geosciences and engineering graduates seeking an advanced qualification for careers in the energy industry, specialisation is possible through choice of optional courses from a wide selection.

Ph.D. Studentships in Semiconductor Physics and Space Instrumentation, PSSRI
Faculty of Science
Full-time, 3 year Ph.D. studentship (to start as soon as possible)
Based in Milton Keynes
CASE Studentships funded by STFC and e2v technologies.

The e2v Centre for Electronic Imaging (CEI) at the Open University campus in Milton Keynes is currently able to offer full-time Ph.D. CASE studentships funded jointly by industry (e2v) and the UK Science and Technology Facilities Council.

The Co-operative Awards in Science and Engineering (CASE) studentships are designed to give students experience outside a purely academic environment; use joint supervision of the student by the Open University and e2v technologies; and provide guidance from an experienced engineer with industrial relevance.

Students finishing the Ph.D. training all possess transferable skills and the expertise gained leads to successful careers within industry, academic research and space agencies.

Studentships cover the field of radiation damage in image sensors, sensor development, detector development for X-ray astronomy and planetary science and semiconductor device modelling. You will have or expect a good honours degree in physics or a related subject.

Informal enquiries are encouraged to Prof. Andrew Holland (a.d.holland@open.ac.uk)

For detailed information and to apply email k.t.guyler@open.ac.uk or telephone 01908 655169. Details of the department can be found at http://pssri.open.ac.uk and of e2v at www.e2v.com

Closing date: 30 June 2009.

Equal Opportunity is University Policy

The Open University
[2689-044 (2009) : 62]
Ph.D. Studentships available for 2009-10

The School is pleased to offer a range of 3-4 year funded studentships to commence in September/October 2009 funded by BBSRC, EPSRC, NERC and the College.

Research interests within the School cover the whole spectrum of biological and chemical sciences, with internationally acclaimed work in ecology, behaviour, evolutionary biology, genetics, protein structure and function, and molecular synthesis and catalysis.

Applications are invited from candidates with, or expecting to obtain, at least an upper-second class honours degree in an area relevant to the project.

The application closing date is 2nd February 2009.

Full details of the projects offered and application procedures can be found on our website (see below)

Masters Programmes
The following Masters Programmes are offered by the School for which applications are accepted all year round:

MSc in Chemical Research
MSc in Freshwater and Coastal Sciences
MSc in Marine Ecology and Environmental Management
MSc in Bioinformatics

Further details and application procedures can be found on our website: www.sbcs.qmul.ac.uk or call 020 7882 3012.

The Gatsby Charitable Foundation

Sainsbury Ph.D. Studentships in Plant Science

Enhanced postgraduate studentships, each for four years, starting in October 2009, will once again be awarded by the Gatsby Charitable Foundation, one of the Sainsbury Family Charitable Trusts. Each of the supervisors below will select a candidate who will then compete at interview, with Sainsbury Undergraduate students, for one of up to four Sainsbury Ph.D. Studentships. Interviews will be held in London on Friday, 6 March 2009. It would be expected that the studentship holder spend 6 months during their 3rd or 4th year at another University/Institute to gain additional experience.

Interested applicants should write, attaching a CV, before 23 January 2009, to one or more of the following:

- Genetics and cell biology of nutrient sensing
  Dr Anna Amtmann, Plant Science Group, Bower Bldg Faculty of Biomedical and Life Sciences University of Glasgow. Glasgow G12 8QQ
  Email: a.amtmann@bio.gla.ac.uk

- Understanding the function of reactive oxygen species during the cell wall stress response in Arabidopsis thaliana
  Dr Thorsten Hamann, Sir Alexander Fleming Bldg (Rm 609), Imperial College London, South Kensington Campus. London SW7 2AZ
  Email: t.hamann@imperial.ac.uk

- The protein import machinery of chloroplasts: using genetics to identify novel components of the TOC/TIC system
  Dr R Paul Jarvis, Dept of Biology, University of Leicester, University Road, Leicester LE1 7RH
  Email: rpj3@leicester.ac.uk

- How will plants deal with a changing environment: plasticity and evolvability in Arabidopsis thaliana
  Dr Paula Kover. Faculty of Life Sciences, University of Manchester, Oxford Road, Manchester M13 9PL
  Email: Paula.X.Kover@manchester.ac.uk

- Circadian clock control of primary metabolism in Arabidopsis
  Professor Alison Smith Innes Centre, Norwich Research Park, Norwich NR4 7UH

LEADERBOARD BANNER SKYSCRAPER

GIVE YOUR BRAND SOME COLOUR

To communicate your brand to jobseekers and drive traffic to specific areas on your website use Leaderboards, Banners or Skyscrapers on www.NewScientistJobs.com. For further information, contact the team on 020 8652 4444 or recruitment.services@rbi.co.uk.

NewScientist Jobs
[2689-048 (2009) : 63]
Established in 1970, the main role of the Veterinary Products Committee (VPC) is to advise the Veterinary Medicines Directorate on applications for new and renewal Marketing Authorisations (MAs), provisional MAs and variations, and Animal Test Certificates.

The VPC also has two sub-committees: the Appraisal Panel which evaluates all reports of suspected adverse reactions to veterinary medicinal products in humans and the Medical & Scientific Panel (MSP) which evaluates current research on organophosphate sheep dip products. We are looking to appoint ten new members for the VPC (including a nominee of the FSA), five for the Appraisal Panel and four for the MSP from January 2010 to December 2013. The VPC meets six times a year, the Appraisal Panel three times and the MSP twice. Meetings are held at VMD offices in Surrey lasting a day in each case.

To be considered, you must be a renowned expert in your particular specialism with a proven track record of applying your knowledge to develop strategy and policy. Experienced in working independently as well as within a committee structure to arrive at sound, balanced and timely decisions, you will also be able to communicate fluently at the highest levels.

Veterinary Products Committee
VPC 1 - Lay Member
VPC 2 - Molecular Biologist/Geneticist
VPC 3 - Parasitologist (food animal species)
VPC 4 - Pharmacist
VPC 5 - Pharmacologist
VPC 6 - Risk Analyst
VPC 7 - Veterinary Surgeon (large animal)
VPC 8 - Veterinary Surgeon (poultry)
VPC 9 - Virologist
VPC 10 - Food safety risk assessor to consumers (Food Standards Agency nominee)

Appraisal Panel
Appraisal 1 - Physician (accident & emergency medicine)
Appraisal 2 - Dermatologist
Appraisal 3 - Hand Surgeon Appraisal
4 - Pharmacologist Appraisal
5 - Veterinary Nurse

Medical and Scientific Panel
MSP 1 - Neurologist
MSP 2 - Clinical Neurophysiologist
MSP 3 - Pharmaceutical Researcher
MSP 4 - Public Health Epidemiologist

Remuneration for all roles is £146 per meeting with £74 for preparation time.

For further information and an application pack, please email publicappts@defra.gsi.gov.uk or telephone 020 7270 8417 quoting reference PAPPT71.
The closing date for applications is 12 noon, 23\textsuperscript{rd} March 2009.

These appointments will be governed by the principle of public appointment based on merit with independent assessment and transparency of process. Candidates may come from a wide range of background and experience although the successful candidates will need to have a proven track record in at least one of the areas outlined above.

The UK Government and devolved administrations are committed to improving the diversity of their public bodies and welcome applications irrespective of race, ethnic or national origin, sex, marital status, disability, sexual orientation, religion, religious beliefs or similar philosophical belief, age, gender re-assignment or community background.

We would particularly welcome candidates from under-represented groups, for example, women, people with disabilities and members from Black and Minority Ethnic communities.

Regulated by The Commissioner for Public Appointments

Working for public and animal health
Veterinary Laboratories Agency ®

The VLA is an international centre of expertise in animal health science and provides a broad range of specialist veterinary services and products to Government and commercial customers across the world.

The Centre for Epidemiology and Risk Analysis (CERA) is based in this modern building near Addlestone, Surrey, 30 minutes from central London:

**Technical Data Manager**
Salary £33,000 - £48,075 (Pay Band C)
Senior responsibility within a multi-disciplinary team for surveillance data management for VLA’s Food and Environmental Safety programme. Must be experienced in developing relational databases & data quality; knowledge of Business Objects and XML helpful. ADP 4721

**Database Manager**
Salary £20,250 - £27,350 (Pay Band E)
You will manage disease control databases, including BSE and National outbreaks e.g. Avian Influenza, with responsibility for data quality and creating epidemiological outputs. Experience of data manipulation and relational databases would be advantageous. ADP 4723

**Database Developers**
Salary £20,250 - £27,350 (Pay Band E)
You will deliver database solutions for diseases including BSE, TB and National outbreaks. Knowledge of relational database development is required (ideally in SQL Server and MS Access), Business Objects and XML would be an advantage. ADP47Z3

**Epidemiologists**
Salary £33,000 - £48,075 (Pay Band C)
Experienced in quantitative epidemiology in animal or public health, you will lead multi-disciplinary research and/or surveillance project teams in challenging areas including food-borne zoonoses and TSEs. Excellence in communicating science and in project delivery demanded. ADP 4714

**Epidemiological Scientist**
Salary £20,250 - £27,350 (Pay Band E)
As a member of a multi-disciplinary team, you will support successful delivery of research and/or surveillance projects through tasks including descriptive data analysis, managing implementation of fieldwork and questionnaire design. Interest in animal health and epidemiology essential. ADP 4720

For more details and an application form, please visit [www.vla.gov.uk](http://www.vla.gov.uk) or write to: Personnel, Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting the relevant reference.

The closing date for receiving application forms is 14th February 2009.

We offer you a choice of either an Occupational Pension Scheme or Stakeholder Pension Scheme, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 pays annual leave, an on-site nursery, flexible working and annual pay reviews.

The VLA is committed to equality and diversity in the workplace.

Syngenta is one of the world's leading companies with 22,000 employees in over 90 countries dedicated to one purpose: bringing plant potential to life. We contribute to addressing some of the planet's most critical issues such as the rising demand for food from a growing population. Syngenta employees have a major impact on the health and well-being of communities all around the world. They work in a focussed, highly collaborative culture and benefit from the training, development and inspirational colleagues that you’d expect to find in a fast growing, international company. There's never been a better time to join Syngenta. For more information on working for Syngenta, please visit www.syngenta.com/careers

Exciting opportunities for versatile ADME specialists

Excellent packages - Jealott's Hill, Bracknell, Berkshire

We have two positions for experienced scientists who are motivated by the challenge of leading our ADME activities in an exciting multi-disciplinary environment. Working alongside experts in related toxicology and metabolism disciplines, the successful candidates will have the opportunity to extend their own experience whilst making a critical contribution to the selection and development of new agrochemicals.

**Senior Technical Expert - ADME**
With responsibility for leading the development and application of our ADME capabilities, you will lend your expertise to a range of projects. Versatile and flexible in your approach, you will find yourself involved in forming scientific strategy, designing and delivering innovative ADME study packages using third-party suppliers and representing the company in scientific discussions with government regulators and industry bodies. With a degree and, ideally, a Ph.D. in a field of study relevant to ADME, you'll have substantial relevant experience, expertise in pharmacokinetics and a sound grasp of mammalian toxicology.

**Technical Expert - ADME**
You will take responsibility for the design, delivery and interpretation of ADME study packages using third-party suppliers, as well as making a key contribution to the further development of our ADME capabilities. You will also enjoy the challenge of broadening your role to include related aspects of metabolism in other biological systems whilst maintaining your ADME focus. Educated to at least degree level in a relevant discipline, you will bring significant ADME experience and sound background knowledge of mammalian toxicology.

The successful candidates for both positions will ideally have experience of working in an appropriate industry, in-depth knowledge of global regulatory guidelines and will be able to demonstrate strong leadership, team working and communication skills.

To apply online please visit www.syngenta.com and navigate to our current vacancies via the career page.

Closing date: 14th February 2009.

syngenta
Bringing plant potential to life.

[2694-003 (2009) : 52]
Agriculture and Horticulture Development Board

The Agriculture and Horticulture Development Board (AHDB) is a new Non-Departmental Public Body whose £50m annual programme of work is funded by statutory levies. Our role is to help improve the efficiency and competitiveness of six agriculture and horticulture sectors in parts of the UK representing about 75% of total UK agricultural output - pig meat in England, beef and lamb in England, commercial horticulture in GB, milk in GB, potatoes in GB, cereals and oilseeds in the UK. AHDB headquarters will be located in Stoneleigh, Warwickshire from 2009.

We are currently restructuring the business and have created a new sector structure to deliver the strategy for our levy payers.

Director of the HDC Sector
Stoneleigh, Warwickshire

AHDB is seeking an adaptable high calibre plant scientist, ideally with both research and commercial experience to head up our Horticulture Division.

As part of the AHDB Senior Team, the Director of the HDC Sector is responsible for managing the horticulture sector team to deliver the HDC strategy. This will be achieved by supporting the HDC Board effectively with the development and implementation of its strategy in line with the AHDB Corporate Plan, evaluating the performance against targets and advising the HDC Board accordingly. In particular the post holder will be expected to input technical advice into the horticulture section of the AHDB Corporate Plan.

Key aspects of the role are to provide a focal point for the horticulture sector, to drive change through the effective engagement with levy payers and key stakeholders and to ensure that the work being undertaken for the sector achieves maximum benefit to the horticulture levy payers in Great Britain.

This will involve:
• The line management of the staff undertaking R&D, Knowledge Transfer and Sector Communication in the horticulture division, who collectively manage a research programme of over 200 projects with an annual budget of £3.5m.
• Working with colleagues in the AHDB centralised functions and other sector divisions.
• Liaising with relevant stakeholders, levy payers, funders and relevant Defra staff.

A job description and application form can be downloaded from www.ahdb.org.uk
Email bernadette.garvey@ahdb.org.uk, alternatively write to Bernadette Garvey, Agriculture and Horticulture Development Board, Stoneleigh Park, Warwickshire, CV8 2LZ.

Closing date: 23rd February 2009.

www.ahdb.org.uk
[2694-004 (2009) : 52]
UCB is a leading biopharmaceutical company, dedicated to the discovery, development and commercialisation of innovative pharmaceutical and biotechnology products in the fields of CNS, immunology and oncology. UCB is committed to developing an industry-leading Research DMPK function. In line with this strategy, a number of key roles have been created for forward-thinking DMPK Scientists, to be based within the CNS Research Hub in Brussels:

**Senior DMPK Bioanalytical Scientist & Laboratory Manager**
You will be responsible for the provision of quantitative analysis of drugs and metabolites in biological matrices in support of drug discovery programmes. Leading a team of technical staff, you will efficiently manage the laboratory, introducing new methodologies to increase efficiency and quality of sample analysis. Educated to degree or Ph.D. level, you will demonstrate a detailed understanding of HLPC and LC-MS - including method development, analytical quality control, trouble-shooting and reporting. Your technical knowledge will be complemented by several years of pharmaceutical/biopharmaceutical industry experience, gained within a Research DMPK environment. Ref: 081128@theRSAgroup.com

**Senior Scientist, *in vitro* Metabolism**
You will be responsible for the provision of practical and strategic *in vitro* DMPK support to all CNS drug discovery projects. Using your extensive practical skills, you will play a key role in developing and implementing new assays and methodologies, mentoring junior staff in these areas. You will represent the department on project teams and will liaise closely with colleagues across a range of disciplines. Educated to degree or Ph.D. level, you will bring to the role several years' industrial experience, gained within a Research DMPK environment. You will demonstrate a successful track record in a range of *in vitro* DMPK methodologies, including CYP inhibition and induction, stability assays in microsomes or hepatocytes and protein binding, combined with a solid understanding of *in vivo* DMPK methodologies. Ref: 081129@theRSAgroup.com

**Senior Scientist, *in vivo* PK and PK/PD**
You will be responsible for the provision of practical and strategic PK and PK/PD support to all CNS drug discovery projects. You will take a leading role in the provision of DMPK support to project teams, defining the strategy and providing input into study design and data interpretation, with a particular emphasis on PK and PK/PD. Educated to degree or Ph.D. level, you will bring to the role several years' pharmaceutical or biotechnology industry experience, gained within a Research DMPK environment. You will demonstrate a strong technical background in a range of *in vivo* and *in vitro* DMPK methodologies and a successful track record of representing your department on project teams. Ref: 081130@theRSAgroup.com

**Scientist, Bioanalysis**
You will provide high quality bioanalytical support to *in vitro* and *in vivo* studies, developing and applying LC-MS methodologies to the quantitative and qualitative analysis of NCEs and their metabolites in biological samples. An industry-experienced Bioanalyst, you will bring to the role a detailed knowledge of HPLC and LC-MS techniques, gained within a Research DMPK environment. Ref: 09068@theRSAgroup.com

**Scientist, *in vivo* PK**
You will be responsible for the planning, management, analysis and reporting of *in vivo* PK studies in support of drug discovery projects. An industry experienced scientist, you will demonstrate solid experience of DMPK, bioanalytical techniques and PK tools as applied to drug discovery. Ref: 09069@theRSAgroup.com
All roles require pro-active and flexible team players with excellent organisational and communication skills who will welcome the challenges of this fast-paced entrepreneurial environment. To apply, please e-mail your CV to the relevant address. Alternatively, call Dr Kay Wardle on +44 (0)1707 259333 for an initial, confidential discussion.

THE RIGHT CHEMISTRY

WILEY-VCH, a subsidiary of the distinguished publishers John Wiley & Sons Inc. New Jersey, is an international science publisher based in Germany with over 80 years experience of producing high-quality professional magazines, scientific journals, books and electronic media in Chemistry, Physics, Materials Science and Life Sciences.

As part of the development of our chemistry portfolio we are about to launch ChemCatChem covering all areas of catalysis. ChemCatChem is a sister journal to Angewandte Chemie, and we are now offering the following position:

Associate Editor (f/m)

As an Associate Editor you will be responsible for peer-review procedures and the acquisition of journal content. This will involve close interaction with Editorial Board members as well as with authors and referees from all over the world, and representing the journal at international conferences. In addition, you will be involved in all aspects of the editing and publishing process.

Applicants for this position should have a broad interest in chemistry, be self-motivated, have excellent organizational and communication skills (written and verbal), be diplomatic, flexible, familiar with text and graphics computer applications, and have an excellent command of the English language. Fluency in German and previous publishing experience would be advantageous.

The Editorial Office is based at WILEY-VCH in Weinheim, a lively small town within short distance of the vibrant urban centres of Heidelberg and Mannheim in southwest Germany. Applicants should send their full CV with a covering letter describing their suitability for the post to:

WILEY-VCH Verlag GmbH & Co. KGaA Human Resources
Christiane Rabe Boschstrasse 12 69469 Weinheim Germany
E-mail: Christiane.Rabe@wiley.com

BURGOYNES
DR BURGOYNE & PARTNERS LLC
CONSULTING SCIENTISTS AND ENGINEERS

Forensic Fire and Explosion Investigation

Burgoynes has been established for 40 years, specialising in the forensic investigation of fires, explosions, traffic accidents and engineering related failures for insurance, engineering/manufacturing companies and legal clients. Burgoynes has a network of offices in the UK and overseas (USA, Singapore and Hong Kong).

We currently have a number of vacancies in our UK offices (London, Basingstoke, Kenilworth, Manchester, Ilkley and Glasgow) for scientists and engineers to train in the forensic investigation of fires and explosions. These positions offer excellent prospects and represent an opportunity to enter a unique profession offering a wide variety of technical challenges and scientific interest in a commercial environment.

The Ideal Candidate will have:
- A good honours degree in a science or engineering discipline.
- Post-graduate experience in a technical role.
- An aptitude and enthusiasm for problem solving.
- The ability to communicate clearly both orally and in writing.

Benefits include Company Car, Contributory Pension Scheme, Medical and Other Insurances, Relocation Package, 5 Weeks Holiday.

Further information about the vacancies is on our web site www.burgoynes.com and application forms are available from: recruitment@burgoynes.com (please include your postal address) or from Miss S Ambrose-Kemp, Dr JH Burgoyne & Partners LLP, 11-12 Half Moon Court, Bartholomew Close, London, EC1A 7HF

www.burgoynes.com

Dr JH Burgoyne & Partners LLP (Burgoynes) is an Equal Opportunities Employer.

[2694-008 (2009) : 54]
Merck Sharp & Dohme Limited (MSD) is the UK subsidiary of Merck & Co., Inc., of Whitehouse Station, New Jersey, USA, a leading research-based pharmaceutical company that discovers, develops, manufactures and markets a wide range of innovative pharmaceutical products to improve human health.

Our Development Laboratories, part of our worldwide R & D function, are now looking for Synthetic Organic Chemists to join our Process Research Group in Hoddesdon, Hertfordshire. This department is responsible for the discovery, development and scale up of synthetic routes to pharmacologically active compounds and the supply of bulk drug for safety assessment studies and clinical trials.

**Ph.D. Chemists in Process Research**  
(Organic Chemistry)  
With a Ph.D. and some relevant post-doctoral experience, the successful candidate for this position will have a proven track record of innovative problem solving in a high performance environment. In addition to excellent practical skills and top-tier knowledge of synthetic organic chemistry, a creative ability for planning and executing assignments in a multidisciplinary environment is essential. Good written and oral communication skills are also key attributes, as is the ability to collaborate and work as part of a team.

**Chemistry Graduates in Process Research**  
(Organic Chemistry)  
As an enthusiastic chemist, you will play an important role in one of our teams which are responsible for the discovery and development of new chemistry leading to our drug candidates. The position involves laboratory scale development of synthetic routes and their subsequent implementation on larger scale. Applicants should have a BS/MS degree in chemistry, preferably with industrial experience and an aptitude for practical organic chemistry.

Both these permanent positions offer an excellent opportunity to broaden your knowledge of process chemistry and develop your technical skills in a stimulating environment within a unique facility in the industry. Working as part of an international team you will interact with other scientists in all aspects of the drug development process. MSD has a strong commitment to ongoing training and personal development. We provide first-class facilities and encourage our staff to maximize their potential through published work and conference participation. We also offer an attractive salary and a first rate benefits package.

If you are interested in applying for one of these positions, please email hoddesdonrecruit@merck.com, enclosing a full CV and cover letter quoting reference DevlabPR/2009.

The closing date for applications is 20th February 2009.

For more information please visit the following websites: www.msd-uk.co.uk and http://www.merck.com/mrl/

Due to anticipated high levels of interest we will not be able to respond to individual applications, however if you are successful at this stage, we will contact you to arrange a first interview.

MERCK SHARP & DOHME  
[2694-009 (2009) : 55]
The Biotechnology and Biological Sciences Research Council (BBSRC) is the principal public funder in the UK for research on underlying processes in biology, including genetics, cell and tissue biology and plant and animal sciences.

Joining our Innovation and Skills Group, you will bring drive and determination to increasing the economic and social impact of the research and training we support. In particular, you will play a vital role in engaging with partners and organisations to maximise the impact of our activities.

**Strategy & Policy Manager**  
(Bioscience Skills and Careers)  
c. £33,000 Ref: JRU 15/09  
Leading the development of agreed policy and strategy initiatives in the areas of bioscience skills and careers, you will actively work with partners in developing strategic, evidence-based interventions in the skills pipeline.

Your ability to plan and progress a diverse range of projects will be backed up by excellent organisational, analytical, networking and communication skills. You will also have a strong base of knowledge gained by a degree or equivalent in a biological or related subject and/or relevant experience.

**Senior Business Interface Manager**  
c. £33,000 Ref: JRU 16/09  
Managing and delivering BBSRC strategy for business engagement and activities in a designated area, you will build relationships with a range of organisations and stakeholders. The post includes management and development of two Business Interface Managers.

**Business Interface Manager**  
c. £26,000 Ref JRU 17/09  
Increasing the breadth and depth of our interaction with business, you will facilitate greater exchange with UK-based life science companies to create partnerships and help to manage joint research programmes.

For both the above Business Interface roles, your understanding of biological sciences will be underpinned by a relevant academic qualification. Quick to learn and flexible enough to manage a diverse and rapidly changing portfolio of projects, you'll be able to analyse and present complex information, work to deadlines and build relationships.

For an application form and further details, please visit the JRU website to download the application documents - [http://jru.rcuk.ac.uk/AllVacancies.htm](http://jru.rcuk.ac.uk/AllVacancies.htm)

Alternatively please contact Laura Hay via email; [jru-recruitment@ssc.rcuk.ac.uk](mailto:jru-recruitment@ssc.rcuk.ac.uk) or telephone 01793 416464 quoting the job reference number.

The BBSRC welcomes applications from all sections of the community irrespective of race, ethnic origin, religion, sexual orientation, disability, age or gender. As users of the disability symbol, we guarantee to interview all disabled applicants who meet the minimum criteria for the vacancy.

Tracerco

Physicist / Development Engineer
Up to £35k (dependent on experience)
(Benefits include defined benefit company pension scheme, bonus scheme and share incentive plan)

A global business employing over 250 highly qualified staff with headquarters in Teesside, Tracerco delivers world-class diagnostic measurement services and specialist instrumentation to international customers in the Oil, Gas and Chemical Industries.

An exciting opportunity has arisen in Billingham for a motivated and creative Physicist / Development Engineer to work in our product development department, helping to deliver the next generation of Tracerco instruments.

You will be a proficient experimentalist with excellent mathematical skill and be able to demonstrate an innovative approach to problem solving, modelling and conducting experiments, alongside building and trialing prototypes.

Possessing a degree (or equivalent) in Physics or a related engineering discipline, the successful candidate should ideally have prior technical development experience. Recently qualified candidates, with the desire to develop in a fast moving commercially focussed environment, will also be considered. Knowledge of radiation and instrumentation would be beneficial.

To apply, please send your CV, a covering letter and current salary details to Tracerco.Recruitment@tracerco.com by 27th February 2009. Shortlisted applicants will be contacted within three weeks of the closing date, after which you must assume that on this occasion your application has been unsuccessful.

We know you’re out there

New Frontiers Manager
(Strategic Innovation)
£35 - £45 + Benefits, Hampshire

Our client has built a reputation as one of the world’s leading fast moving consumer goods companies. As New Frontiers Manager you will help identify, investigate and assimilate new technologies that will drive future trends in research and development. You will direct and manage this research, ensuring that innovations are captured and translated into tangible results which impact on products, and influence future strategies.

Key Accountabilities
• Define long-term (10-20 years) consumer and societal trends, and identify and investigate emerging technologies which will meet the needs of the consumer and the business.
• Define future product solutions which will directly influence the strategic direction of our client’s project portfolio.
• Manage and deliver projects, predominantly with external companies, to investigate the potential for the new technologies to be developed into concepts/prototypes.

Knowledge, Skills and Experience
• Educated to degree level in a scientific or technical discipline.
• Experience of uncovering innovative solutions and incorporating new technologies/methodologies.
• Experience of managing projects involving external parties.
• Establishment and management of expert network across sectors and industries.

As well as a competitive salary our client offers an excellent benefits package and fully expensed relocation support.

Please contact Alison Fisher at Hudson Shribman Scientific Recruitment on +44 (0)207 421 5200 or +44 (0)7814 547 440, or apply via email to: newfrontiers@hs.scientific.co.uk

Closing date: Friday 20th February 09.
The Fisheries Department of the Falkland Islands Government invites applications for the post of Fisheries Scientist (stock assessment). This position is vital for the continued development of assessment capabilities of squid and fish stocks within the Department.

Candidates should have the ability to apply standard fish stock assessment techniques and develop new approaches. The successful applicant will be expected to contribute to the development of fishery management policy on the basis of the assessments. Candidates should be capable of working as part of a small, dedicated team and be prepared to fill a flexible role, including participation in research cruises.

Candidates should ideally be qualified to Ph.D. level in an appropriate biological, fisheries or mathematical discipline with at least two years’ experience of fisheries stock assessment or other relevant discipline, such as population dynamics. A high level of competence with computers and modern statistical methods is essential. Experience in one or more of the following areas would be advantageous: mathematical or statistical modeling, fisheries acoustics, spatial statistics, GIS, computer programming or database design.

The contract package includes:
- Fares to and from the Falklands at the beginning and end of contract
- Mid-contract leave return passage
- End of contract gratuity of 25% of salary
- Generous relocation grant
- Education allowance if applicable

For further information, a full job description and an application form please contact:

DEPARTMENT OF CLINICAL PHYSICS AND BIOENGINEERING - COVENTRY

CLINICAL SCIENTIST IN RADIOThERAPY PHYSICS
Starting salary up to £29,021 (Band 7) depending on qualifications and experience   Ref: JB-AHP-658

As part of a new initiative in Coventry to attract high quality scientists into healthcare, applications are sought from enthusiastic physicists who have an approved MSc in Medical Physics or a Ph.D. in radiotherapy or medical imaging to train and work as Clinical Scientists in Radiotherapy Physics at the Arden Cancer Centre, University Hospital, Coventry.

Following a well developed and IPEM approved training programme, you will be trained in all aspects of radiotherapy physics including treatment planning, machine quality control, unsealed source therapy and brachytherapy. For a further two years you will work under supervision in the clinical environment until you achieve state registration whereupon you will become an independent Clinical Scientist working on both the routine and development aspects of radiotherapy physics. Those entering with an MSc will be encouraged to follow a programme which includes doctoral research.

The Centre has five Elekta megavoltage machines with MLC and EPID, delivering 4MeV to 20MeV beams and step and shoot IMRT. There is an active program to develop IMRT technically and clinically at the Centre as well as research into adaptive treatment. CT, MRI and PET imaging and Prosoma virtual simulation along with standard simulation with single slice CT is available. Dose prediction is done with the XVplan open platform and XIO planning systems. There is one Gulmay 250kV orthovoltage unit and a dedicated 5MeV Betatron for Total Skin Electrons. Brachytherapy is provided with iridium implants and a Nudetron HDR unit. Unsealed Source therapy is also provided by the Radiotherapy Physics Section which has 11 scientists and 14 technical staff and is one part of the Department of Clinical Physics and Bioengineering.

The Centre is located on the University Hospital site at Walsgrave which is on the edge of historic Coventry with convenient transport to the City and easy access to rural Warwickshire, the M6 and the M69 motorways.

For further information please contact Dr John Mills, Department of Clinical Physics and Bioengineering on 02476 967258.

POSITIVE ABOUT DISABLED PEOPLE

[2694-016 (2009) : 58]
Research Development Leader and Deputy Team Head
£33,118 minimum  Swindon

The Economic and Social Research Council (ESRC) is the UK’s leading research agency for the social sciences. The studies and research we undertake are vital in enabling government, business and the public to learn about social and economic change and understand the reasons behind it.

Making a significant contribution to the development and delivery of research investments, you will identify outstanding opportunities for research in order to maximise the potential of Council investments. Identifying appropriate modes of funding for research, opportunities for knowledge sharing and strategies for commissioning research will be part of your role.

With a degree and postgraduate level knowledge and experience within the field of psychology, you will have a thorough understanding of current scientific agendas and methodological issues in social sciences. Essential to this role is the ability to form effective partnerships and establish collaborative links with a range of contacts, using excellent interpersonal, influential and communication skills.

Bringing plant potential to life

**Research Leader – NMR Spectroscopist**

£ competitive + benefits – Jealott’s Hill, Bracknell, Berks

As part of our Analytical Sciences group, you will lead the future development and delivery of NMR spectroscopy for Crop Protection Research and work with your colleagues to develop and maintain Open Access facilities. You will also be jointly responsible for investigating new NMR methods through research collaborations and introducing them into Syngenta. Currently, our group has three NMR spectrometers including a 600MHz system equipped with a cryo-cooled probe and LC-NMR.

You will hold a relevant Ph.D. or BSc with significant practical experience in the application of NMR spectroscopy to small organic molecules or natural products. An excellent understanding of organic chemistry is essential, and experience of working as a provider of Open Access NMR analysis would be an advantage. You should demonstrate the ability to develop analytical strategies to help direct chemical synthesis and to influence Syngenta scientists to make best use of our analytical resources. Additionally we expect excellent communication skills, both written and spoken, along with a high degree of computer literacy.

To apply online please visit [www.syngenta.com](http://www.syngenta.com) and navigate to our current vacancies via the career page.

Closing date: 23rd February 2009.

Interviews are likely to be held the week beginning 16th March 2009.

TIME YOU STARTED READING THE PAPERS?

**Toxicologists** £ competitive + relocation allowance + benefits  Bristol

And every other product in our world-class portfolio for that matter. This is an exciting opportunity to join the UK's undisputed market leader. Due to our impressive business growth, our close knit team of professionals has rapidly expanded. Proof that, even in the current climate, we’re well placed to continue our success and yours. Collaborating with our suppliers, scientists and operational personnel across the globe, you'll visit other European sites as necessary. Your expert advice will help govern the composition of everything we make and sell. And because we operate in over 160 countries, your influence will be felt far and wide.

You'll either have an MSc or equivalent postgraduate experience in Toxicology, plus some experience in a commercial or regulatory environment. Or, if you're newly qualified, you'll need a BSc (or equivalent) in a biological or biochemical science.

In return, we'll provide you with a generous package, including a significant relocation allowance, industry leading support and real scope for progression. To apply, please email your CV and covering letter to CorporateCentre.HR@uk.imptob.com or post to Corporate Centre HR, Imperial Tobacco Ltd, Upton Road, Bristol BS99 7UJ. Closing date: 3rd April 2009.

Imperial Tobacco

[2694-019 (2009) : 59]
Health Protection Agency/ NIBSC Regulatory Oversight Committee

The Health Protection Agency is a unique organisation of over 3000 talented people with the remit to protect the health of the general public from infectious disease, radiation, chemicals and environmental hazards. From April 2009 its remit is to be extended to include the setting of standards for biological medicines when it merges with the National Institute for Biological Standards and Control.

This function involves provision of regulatory advice and carrying out independent quality assurance testing on batches of manufactured products. The Regulatory Oversight Committee (ROC) will provide assurance internally and externally that any potential conflicts of interest are managed properly, and will have delegated authority from the HPA Board.

The committee
The committee will comprise three non-executive members, two of whom will be completely independent of the HPA. The third will be a non-executive member of the HPA Board. Committee members will be appointed by the HPA Board Chairman on the basis of their expertise in the field of biological medicines and regulatory experience. The members of the committee will act independently of the HPA and HPA Board. The chair will be appointed by the HPA Board Chairman from one of the two independent committee members. The quorum will be two members, at least one of which should be an independent HPA committee member.

Time commitment and location
Meetings will be held not less than once a year and more frequently as circumstances dictate. The decision to call additional meetings will be taken by the committee chair.

Members will serve on the committee for a period of four years; appointments will be renewable for not more than a further four years. Meetings may be held at the National Institute for Biological Standards and Control or at the HPA Head Office in Holborn, central London.

Remuneration
Non-executive members of the ROC will be paid at rate of £279 per day in-line with the current HPA daily rates for non-executive Board and sub committee members. Expenses will be met in accordance with Appointments Commission rates of reimbursement for committee members.

How to apply
For more information, a candidate application pack is available from www.appointments.org.uk or by calling 0870 240 3802 quoting the reference DH9006. This advertisement and the candidate pack are available in a range of formats.

Closing date: 23rd February 2009.

The Appointments Commission is committed to equality of opportunity for all and the principle of appointment based on merit following an open and transparent process and independent assessment.

Please note this is a public appointment, not employment.

See www.appointments.org.uk or www.sector1.net for more public appointments being filled by the Appointments Commission

[2694-023 (2009) : 60]
Committed to innovation.
New medicines through strong science.
World leader in the development of breakthrough treatments.

Think what's possible.

A global healthcare leader, Novartis has one of the most exciting product pipelines in the industry today. A pipeline of innovative medicines brought to life by diverse, talented, performance-driven people. All of which makes us one of the most rewarding employers in our field. Due to development opportunities for existing associates and some expansion we have several opportunities within our Metabolism & Pharmacokinetics Group at Novartis Horsham Research Centre, UK.

**Drug Discovery DMPK Scientist**

In this role you will provide expert DMPK support to the drug discovery efforts in our Respiratory and Gastrointestinal Disease Areas. This will involve meeting with colleagues on drug discovery project teams and identifying ADME needs of each project, directing and, if necessary, performing in silico/*in vitro*/*in vivo* experiments to aid the characterisation of the ADME properties of new chemical entities. You will also analyse results and report back to project teams with expert opinion, conduct research to continually develop the organisations DMPK skill base and mentor other associates in the Metabolism & Pharmacokinetics Group. You will have significant DMPK experience gained within a drug discovery environment in which time you will have worked with respiratory disease projects, particularly those intending to use the inhaled route of administration.

In terms of qualifications, you should have a Ph.D. (or equivalent) in a DMPK related topic. First class communication and interpersonal skills are essential as you will be working with multidisciplinary teams. Ref: 48481BR.

**Senior Bioanalyst**

You will provide high quality bioanalytical support for *in vitro* and *in vivo* pharmacokinetic studies conducted in the Metabolism & Pharmacokinetics section. This will involve the development and application of methods for the quantitative analysis of novel low molecular weight drugs in biological samples and will be accomplished through the use of state of the art sample extraction systems and LC-MS/MS instruments. You will also manage the bioanalytical work schedule, supervise and mentor a small group of other bioanalysts. Along with a BSc. (or equivalent) in Chemistry/Biochemistry or related field, you will need at least three years' experience in quantitative analysis using LC-MS/MS in support of ADME studies. Experience in the use of Tecan liquid handlers and supervision of other associates would also be advantageous. With good communication and interpersonal skills, you will be adept at troubleshooting assays/analytical instruments and able to perform routine maintenance. Ref: 47139BR.

**Bioanalyst**

Reporting to the senior bioanalyst you will be responsible for the development and application of methods for the quantitative analysis of novel low molecular weight drugs in biological samples originating from *in vitro* and *in vivo* pharmacokinetic studies. To be considered for this position you will need previous experience in quantitative analysis using LC-MS/MS, ideally gained through a year in industry or a final year project. Educated to BSc level (or equivalent) in Chemistry/Biochemistry or related field, you will be a quick learner, with good communication and IT skills and ability to work accurately. Ref: 47138BR.

These roles attract a competitive salary and are based at our research centre in Horsham.

For more details about all these roles and to apply, please visit [www.NIBRcareers.com](http://www.NIBRcareers.com) or email NIBR.careers@novartis.com

NOVARTIS
Your vision will be a breath of fresh air

Principal Air Quality Advisor
Starting salary £43,412 - 50,846 Ref: VV1453

Air Quality Advisor
£29,356 (more may be available for exceptional candidate): VV1455

Both posts available in Exeter, Birmingham, Manchester, Dorking, Leeds, Bristol and Bedford.

This year, the Highways Agency will invest significantly in maintaining and improving motorways and trunk roads in England. Our projects range in scale and complexity, from multi-million pound engineering works to safety awareness campaigns in schools.

One of our biggest challenges is our responsibility to the environment. Air quality is an area that is more important today than it has ever been. Measuring carbon generation, predicting growth and developing tools and policies to improve conditions are some of our key activities. And it’s work that effects the lives of every person in the UK.

There are two levels of opportunity available. Both the Principal Air Quality Advisor and Air Quality Advisor will carry out work that will be extremely influential at national level and have a genuine impact on the environment.

Leading the department, the PAQA will need to be particularly responsive to the challenges involved and will need real vision to overcome them. The team will provide expert advice to government bodies such as the Department for Transport and DEFRA – both which rely heavily on the information we provide. There’s also potential for the growth of a larger team and to provide real guidance at a European level.

For further information and to apply, please visit www.highways.gov.uk/jobs or contact Dawn Snedden on 0113 283 4861 or email Dawn.Snedden@highways.gsi.gov.uk quoting the relevant reference.

Closing date: 5th March 2009.

NewScientist Jobs
[2694-026 (2009) : 62]
New Scientist

Multimedia Researcher

New Scientist, the world's leading science and technology publisher, needs a multimedia researcher to develop visual content for the recently redesigned NewScientist.com website.

We need a creative, flexible and tech-savvy person to help our busy editorial and art teams find and prepare photographs, graphics and videos. You'll need strong visual sense, an eye for detail and the ability to work to tight deadlines.

You'll probably already be working in online publishing, although recent graduates with strong portfolios will also be considered. A scientific background would be an advantage. Photoshop experience is a must; working knowledge of Final Cut or Flash would be a bonus.

To apply send a letter and CV before 28 February to Amy Galloway, New Scientist, Lacon House, 84 Theobald's Road, London WC1X 8N5 or to amy.galloway@newscientist.com

NIBSC

Scientist - Biotherapeutics Group
Hertfordshire • £26,776 to £36,708 per annum, dependent on experience

The National Institute for Biological Standards and Control is a multidisciplinary scientific establishment whose purpose is to safeguard and enhance public health by standardising and controlling biological substances used in medicine.

We are seeking to recruit a scientist who will work primarily on the testing and standardisation of blood products and antithrombotics as part of a team within the Haemostasis Section of the Biotherapeutics Group. In addition the post holder will also be required to work independently and collaborate on related research projects.

Applicants should have a Ph.D. (or equivalent) in biochemistry or a related discipline with relevant haemostasis laboratory experience in the health service, industry or academia. Candidates with a first degree with extensive experience in coagulation/haemostasis will also be considered.

For full details see our website www.nibsc.ac.uk

To apply, please submit a full CV (2 copies), including the names and addresses of two referees, to the HR Dept, NIBSC, Blanche Lane, South Mimms, Potters Bar, Herts EN6 3QG or email HR@nibsc.ac.uk

Please quote reference BL.543 clearly on your application.

Closing date for applications is 19 February 2009.

Engineering Opportunities
Gloucester

British Energy is a FTSE 100 company and is the UK’s largest generator of electricity, supplying more than one-sixth of the nation’s needs and is the lowest carbon emitter of the major UK generators. With a clear focus on safe, dependable energy generation and an ethos of service excellence, we pride ourselves on delivering far more than just power. Based at our central engineering support function, these roles present exciting opportunities to join an industry with a bright future.

**PWR Fault Studies Specialist**

BWD/134046

£45k - £54k + excellent benefits

You’ll support the safety case for Sizewell B Pressurised Water Reactor (PWR) by carrying out assessments of the reactor core under fault conditions. Previous experience in PWR fault studies is essential. The role is technically challenging and offers significant opportunity for personal and career development.

**Structural Integrity Engineer**

BWD/141975

£34k - £54k + excellent benefits

Talented engineers required with experience of and an interest in the application of structural integrity assessment methods to real plant problems. You should hold a relevant degree (or equivalent) and should have attained or be working towards membership of a relevant professional institute.

**Mechanical Engineer**

BWD/142037

£34k - £54k + excellent benefits

Working within our Fuel Route Systems branch, this role offers diverse challenges in mechanical design, fault studies, safety assessment and operational support as well as significant involvement in our major investment programme. You should be degree level educated (or equivalent) and chartered (or working towards).

For further information and to apply online, please visit our website [www.british-energy.com/careers](http://www.british-energy.com/careers) or call 01452 653740, quoting the reference, if you do not have internet access. Closing date: 11 February 2009. Successful applicants will be contacted within 4 weeks.

**Head of Restoration Ecology**  £ Internationally competitive salary

The Royal Botanic Gardens, Kew, is an internationally recognised and highly successful research institute and visitor attraction, with World Heritage status.

We are seeking an exceptional individual to lead and drive Kew's ground-breaking activities in the discipline of restoration ecology. You will address the ecology of the restoration of plant communities and the repair and reconstruction of habitats damaged by human activities or natural phenomena.

You will supervise and produce research on aspects of restoration ecology, such as autecology, community ecology, invasion biology, plant population genetics and climate change. Your success in raising funds will secure the future of your growing research team in the first three years. You will create and build strong links with research groups and submit proposals to research councils, government agencies and other funders in the EU and international community.

Your role is to ensure that Kew's expertise in restoration ecology is translated into practical outcomes, with the focus on developing initiatives for sustaining this work long-term and building on an established network of international collaborative partnerships and agreements.

To succeed in this demanding role, you will need a Ph.D. and experience in a similar role in restoration ecology or a related field. You will have an in-depth knowledge of research methods and specialist background literature, as well as an extensive publication record in high-impact scientific journals or books. Exceptional project and change management skills are essential, as is a proven track record of leadership, team and external stakeholder management and fundraising success for science and conservation projects.

Application packs are available from our website [www.kew.org/aboutus/jobs](http://www.kew.org/aboutus/jobs). Alternatively, please contact the HR Department, RBG Kew, on 020 8332 5184 or 5150 (24 hour answerphone). Please quote reference 1335.

Closing date: 27 March 2009.
Interview date: w/c 27 April 2009.

PLANTS PEOPLE POSSIBILITIES
[2694-033 (2009) : 64]
Health Protection Agency

Director – Centre for Radiation, Chemical and Environmental Hazards
Six figure salary with excellent benefits Chilton, Oxfordshire

The Health Protection Agency is a non-departmental public body that protects the health and well-being of everyone in the United Kingdom. The Agency plays a critical role in protecting people from a wide range of potential threats, whether infectious diseases or preventing harm involving chemicals or radiation. The Centre for Radiation, Chemical and Environmental Hazards (CRCE), based in Oxfordshire, addresses a diverse range of issues associated with health risks resulting from exposure to radiation, chemicals, poisons and other environmental factors.

We are now looking for an exceptional individual to replace Dr Roger Cox as Director of the Centre. You will take overall responsibility for providing outstanding leadership, as well as directing and managing the Centre in the provision of advice, R&D and services. You will be required to provide high quality evidence-based advice on radiation, chemical hazards and poisons to the Government, devolved administrations, NHS and the public ensuring all advice is supported by a high quality R&D and scientific review programme.

As member of the Executive Management Team and reporting to the Chief Executive, you will be responsible for promoting staff development and managing the scientific, clinical, and administrative staff within the Centre. You will also represent the Agency to national and international partners and institutions on all relevant areas within the Centre's remit.

Candidates should demonstrate:
- An international reputation for scientific work on the health consequences of exposure to radiation and/or chemicals, with a solid understanding of the associated public health issues
- Excellent leadership and management skills to drive motivation and continual performance improvement within highly professional teams
- An ability to command credibility amongst senior stakeholders and to promote the HPA and constructively engage internal and external partners
- Strong decision-making and analytical skills with a focus on delivering impressive results, innovative solutions and an ability to add to the commercial development of the Centre’s activities

This is a unique opportunity to lead an internationally recognised centre of expertise in health protection.

Harvey Nash is a global executive search consultancy.

Complying with the BERR: We are an Employment Agency.
Biological Safety Officer - Ref: 80278
£27,316 to £37,690 dependent on experience

The Wellcome Trust Sanger Institute is a world leader in genomic research, with an expanding scientific programme dedicated to understanding gene function in health & disease.

The Institute is seeking a Biological Safety Advisor to work as part of the Health & Safety Team in order to develop and influence safety culture. You will be required to engage with the scientific community as a peer professional providing advice, guidance and support to ensure that they achieve compliance with good research practice, health and safety and related regulatory requirements.

Essential Skills
You will have worked in a scientific research environment preferably both as a Biological Safety Advisor / Officer and a senior researcher and will be able to demonstrate significant experience of practical application of legislation and the ability to influence at a senior level. Preferably you will have studied to Post Graduate level but as a minimum you will have attained a degree in a Biological discipline.

Ideal Skills
A relevant health and safety qualification would be an advantage although support and training in this area will be provided.

Other information
If you would like to find out more about this excellent opportunity, please telephone Ian Seng, Interim Head of Health and Safety, on 01223 494780 for an informal discussion or make contact via ijs@sanger.ac.uk.

Benefits
Salary from £27,316 to £37,690 per annum dependent on experience.

We offer a comprehensive range of benefits including a final salary pension scheme and excellent on-site facilities. Further details can be found on our website https://jobs.sanger.ac.uk

Natural Leader?

**Climate System and Biodiversity Theme Leaders**
Part-time roles • £ attractive • Flexible Locations. 3 year appointments, with the opportunity to extend.

The Natural Environment Research Council (NERC) is the main funder of environmental science research in the UK. To drive the delivery of our ‘Next Generation Science for Planet Earth’ strategy, we are seeking to attract highly influential leaders in climate science and biodiversity to drive these areas forward and promote collaboration. Theme Leaders advise NERC on the implementation of our Science Themes. You will propose action plans to respond to NERC strategy, be a focal point for the community and promote strategic partnerships. With excellent leadership and people skills and the ability to facilitate and negotiate, you will work with other Theme Leaders and the NERC Executive ensuring cohesion and the delivery of all NERC strategic targets.

In return, we offer a highly attractive and flexible remuneration package. Also, we are happy for our Theme Leaders to base themselves at a location of their choice.

If you are a Scientist of international standing with a clear strategic vision, please contact Susan Lloyd, Corporate HR, NERC Swindon for further information on how to apply for these exciting roles, either via email sllo@nerc.ac.uk or by telephone on 01793 442592.

Closing date: 5.00pm, Monday 16th February 2009.

Interviews will be held at NERC Headquarters in Swindon on Friday 20th March 2009.

Reducing risks from major hazards

The Health and Safety Laboratory (HSL) enjoys an international reputation as a centre of excellence for research, incident investigation and recommendations into safe and healthy workplace practice. We have a wide portfolio of work for HSE and commercial organisations and unique large scale experimental facilities alongside a new purpose built laboratory in the heart of the Peak district.

**Major Hazards Engineer**
Attractive salary + benefits
Fire and Process Safety Unit, Buxton, Derbyshire

You would work closely with colleagues in the chemical, pipelines, offshore and nuclear sectors and be involved in projects of national strategic importance. You will also provide input to our increasing portfolio of work for non-HSE clients, especially in the energy sectors. There will be an opportunity for skill and career development and support given in achieving Chartered status. Responsibilities will include consequence modelling and risk analysis for the major hazard industries and the opportunity to contribute to our unique experimental work for investigating incidents, research & testing. You must have a degree (or equivalent in chemical engineering, physics or similar; and interest in applying your knowledge to reducing risks from major hazards.

A postgraduate qualification or relevant experience would be an advantage, but is not essential. You will need to work flexibly as part of a team, combining analysis of complex data with excellent communication skills.

For further information and to apply, please visit: [www.hsl.gov.uk/recruitment](http://www.hsl.gov.uk/recruitment) or [www.hse.gov.uk/careers](http://www.hse.gov.uk/careers) and click on job profiles and current vacancies. Closing date: 16 February 2009.

**Senior Efficacy Specialist - Fungicides**
Pesticides Safety Directorate (PSD) York
Attractive salary plus excellent benefits including civil service pension

An Agency of the HSE, the PSD provides controls on pesticides used in agriculture, horticulture and in the garden. We authorise the safe use of pesticides, take action against illegal use, provide advice, safety reviews and work to standardise EU regulations.

Working in the Environment Branch, one of PSD's two specialist branches, you will be responsible for leading the evaluation of data submitted to support the efficacy of fungicides. Over time you will be expected to evaluate data supporting any pesticide. Your excellent communication skills will allow you to prepare written summaries of data, manage and train other staff and defend your decisions to stakeholders.

You will have experience working in pesticide efficacy ideally with fungicides, or in a closely related scientific/regulatory field. You must be able to work collaboratively and make sound decisions in the delivery of quality and timely results.

A first class benefits package, generous leave allowances, opportunities for professional development and a pioneering working environment are waiting for the successful applicant.

To apply or find out more, please visit [www.hse.gov.uk/careers](http://www.hse.gov.uk/careers) and click on job profiles and current vacancies. Closing date: 13 February 2009.

Merck Sharp & Dohme Ltd, the UK subsidiary of Merck & Co., Inc., Whitehouse Station, NJ, USA is one of the world's leading pharmaceutical companies. Merck & Co., Inc., discovers, manufactures and markets a broad range of products to improve human health. We have opportunities in pharmaceutical research and development at our UK headquarters in Hoddesdon, Hertfordshire.

Analytical Chemists

We have a number of positions available within our Analytical Development Department for both recently qualified and experienced Analytical Chemists. As part of the analytical team you will be dedicated to supporting the development of new drug candidate formulations in early phase drug development. The job calls for initiative, commitment and enthusiasm and involves the development of analytical methods suitable for investigating the quality and stability of novel formulations, utilising a wide range of spectroscopic and chromatographic techniques.

Successful candidates will be a graduate or Ph.D. in Chemistry or a related subject with a 2.1 or above. Applications are particularly welcome from candidates with demonstrable experience in pharmaceutical analysis. Ref: PAC0901.

Formulation Scientists

We are currently seeking Pharmaceutical Scientists and Chemical Engineers to join our Formulation Development Department. Aiding in the design of capsules, tablets and controlled release technologies for formulation development and clinical trials, you will be responsible for supporting formulation activities ranging from small-scale experimental work through to pilot scale preparation of clinical supplies. The job also involves performing equipment trials and packaging of products for stability testing, as well as the opportunity to train others in the operation of process equipment and facilities.

Successful candidates will be a graduate or Ph.D. in Pharmaceutical Sciences/ Chemical Engineering or related degrees with a 2.1 or above. Candidates with relevant experience, recent graduates/Ph.Ds or students who will be graduating in the summer of 2009 are all encouraged to apply. Ref: FD0011.

For these roles, excellent practical abilities, an eye for detail and good problem-solving skills are essential abilities. You should have a willingness and flexibility to work cross functionally in a team-orientated approach to support multiple functional areas. As a company dedicated to pursuing development within a team environment, strong communication skills are essential.

Please email, attaching a full CV and covering letter, quoting the appropriate reference as the subject to: hoddesdonrecruit@merck.com

Due to anticipated high levels of interest we will not be able to respond to individual applications, however if you are successful at this stage, we will contact you to arrange a first interview.

OPPORTUNITIES IN PHARMACEUTICAL RESEARCH AND DEVELOPMENT
[2694-039 (2009) : 67]
Imperial College London
Division of Surgery, Oncology, Reproductive Biology and Anaesthetics
Department of Biosurgery and Surgical Technology

Research Manager

An exciting opportunity has arisen for a Research Manager to work for Professor Ara Darzi in the Faculty of Medicine, based at the St Mary's Hospital Campus in Paddington.

The post holder will help Professor Darzi develop and implement the strategies of his research portfolio and that of the Department and Division. Collaborative inter-disciplinary research has high potential for future research developments and the Department wishes to strengthen its support to develop such initiatives. You will play a key role supporting the Hamlyn Robotic Centre and research portfolio in moving the Department and Division forward to achieving their strategic objectives and in assuring continued excellence in research. The role has both strategic and operational elements requiring close and productive working relations with staff at all levels.

You will have a degree or equivalent with experience of working in research and development administration, preferably in a research funding organisation, a Higher Education Institute, an NHS authority or a commercial R&D facility. This post may suit an active researcher wanting to work in research administration. You will be familiar with recent developments within the biomedical medical research and UK healthcare sections. The ability to produce concise written material for scientific or administrative purposes to tight deadlines and experience in using IT, including databases, will be essential. A Ph.D. or equivalent and knowledge of the academic research environment and of the complexity of NHS interactions would be advantageous.

This post is full time and available for one year in the first instance.

An application form and job description, along with further details, may be obtained from: www.imperial.ac.uk/employment You can send your completed application to the HR Assistant, Faculty of Medicine, Imperial College London, St Mary's Campus, Medical School Building, London W2 1PG or by e-mail to: smrecr@imperial.ac.uk, quoting reference number: SM013/09.

Closing date: 19 February 2009.

INVESTOR IN PEOPLE
[2694-041 (2009) : 68]
Six New Academic Posts in Functional Materials

The result of the 2008 Research Assessment Exercise confirms Exeter’s position as one of the UK’s leading research-intensive universities. Almost 90% of our research is at internationally recognised levels and every single subject submitted included world-leading (4*) research. When adjusted for the 95% of staff submitted, Exeter ranks among the top 15 in the UK for research out of 159 higher education institutions. The Times Higher Education described Exeter as ‘a rising star among research-intensive institutions’.

As 2007/08 Times Higher University of the Year, Exeter also rose four places to 13th in the Times league table of UK universities and ranks 14th to 19th in tables published by the Guardian, Sunday Times and Independent. Our Exeter Streatham campus is widely regarded as one of the most attractive in Britain.

In April 2008 the University of Exeter announced plans to invest £80 million in science, engineering and medicine, building on existing areas of excellence. An initial £30 million of existing funds will be spent on new appointments, infrastructure and studentships in five groundbreaking interdisciplinary research themes.

Functional Materials - from Fundamentals to Manufacture is one such theme. Our vision is for a multidisciplinary and interdisciplinary approach to the understanding and application of functional materials, exploiting world-leading materials knowledge to deliver new concepts, processes and products. Three major sub-themes provide the focus for investment, namely nanoscale materials, structured metamaterials and photonic materials.

Under the overall leadership of Professor David Wright in Engineering and Professor Bill Barnes in Physics, the Functional Materials theme encompasses much of the work of a community of 24 permanent academics and over 70 Physics and Engineering researchers. Both Physics and Engineering performed particularly well in the recent RAE 2008 exercise. Physics’ grade point average of 2.7 placed them 12th in the UK rankings, while 74% of Engineering’s research outputs were given the top 4* or 3* ratings.

http://www.exeter.ac.uk/research/excellence/keythemes/functionalmaterials/

All of these posts are available from 1st September 2009 with a start date by mutual agreement. Appointments will be made within the following salary range:

Research Fellow/ Lecturer £31,513 - £35,469 pa with access to further contribution points rising to £38,757
Senior Lecturer £38,757 - £44,930 pa with access to further contribution points rising to £52,086
Associate Professor £50,816 - £53,650 pa with access to further contribution points rising to £64,060

Professorial salaries will be by negotiation.

We are now seeking to appoint a further 6 permanent academic staff in the areas of: Graphene-related research, Electromagnetic materials, Metamaterials and Nanoscale materials.

**Graphene-related research - 3 posts (2 in Physics, 1 in Engineering)**
Three of the appointments will be part of a new Centre for Graphene Science being established in a collaboration between the Universities of Exeter and Bath following the award of a £5 million grant from the EPSRC / HEFCE ‘Science and Innovation Awards’scheme.

The research of the Centre will focus on three main areas: methods of producing graphene and nano-structured graphene systems; experimental and theoretical studies of graphene structures and devices; development of new graphene-based electronic devices and sensors. Applications from those with expertise in these or related areas will be most welcome.
Appointments will be made to the posts of Lecturer/Research Fellow, Engineering (Ref 1947) and Lecturer, Physics (Ref 1946) and Associate Professor (Ref 1945) or Chair in Graphene or Electromagnetic Materials (see sub theme below), Physics (Ref 1969).

These posts form part of a total of 7 new academic and 15 researcher appointments in graphene that will be made by Exeter and Bath, with the remaining posts to be advertised in the coming weeks.

Electromagnetic Materials, Metamaterials and Nanoscale Materials – 3 posts (2 in Engineering, 1 in Physics)

For these posts, applications will be most welcome from those with research expertise related or complementary to existing materials research at Exeter. This includes the topics of thermo-mechanical metamaterials, (including anomalous properties such as negative Poisson’s ratio, thermal expansion coefficient and stiffness, and novel manufacturing methods such as Additive Layer Manufacturing), electromagnetic metamaterials, plasmonics, spintronics, data storage/memory materials and devices and THz photonics.

Appointments will be made to the posts of Chair Engineering (Ref 1968), Lecturer, Engineering (Ref 1699) and Lecturer, Physics (Ref 1920).

Generous relocation assistance will be available for all of these posts.

Full details of all of these posts, including the application procedure can be found on our website at www.ex.ac.uk/jobs

Applications should be submitted electronically to hradmin@exeter.ac.uk.

The closing date for applications is noon on Friday 20 March 2009.

The University of Exeter is an equal opportunity employer and promotes diversity in its workforce and, whilst all applicants will be judged on merit alone, is particularly keen to consider applications from groups underrepresented in the workforce.

JOINT UCLH/UCL BIOMEDICAL RESEARCH UNIT
RESEARCH NETWORK COORDINATORS (Ref: WA-677-MW)
AfC Band 7, £34,909 - £44,290 p.a. inc.

The Joint UCLH/UCL/Royal Free Biomedical Research Unit is undergoing an exciting period of expansion and development and is responsible for managing a large, internationally-recognised portfolio of research activity in close conjunction with UCL-affiliated research active NHS Trusts.

To help coordinate research activities at UCLH/UCL/Royal Free and other UCL-affiliated Trusts, up to four talented and motivated individuals are sought to help facilitate high quality, biomedical research projects that will deliver patient benefit and enhance clinical services. Each of the post-holders will be responsible for supporting research activities in defined parts of the research portfolio - two posts with a particular focus on UCLH/UCL or Royal Free research activities, another on the Royal Free and Whittington Hospitals, whilst a fourth post will focus mainly on the research portfolio for the RNOH and North Middlesex Hospitals.

You will have excellent organizational skills, be pragmatic and have the proven ability to communicate effectively with senior clinicians, academic staff and other health service professionals. You will have an excellent working knowledge of research governance and legal requirements such as the Research Governance Framework and the Human Tissue Act, and an understanding of UKCRN priorities. A background in research management / governance in the NHS and / or academia is highly desirable.

For further information, please contact:
Dr Nadeem Khan, General Manager (tel. 0845 1555 000 x5694) or email nadeem.khan@uclh.nhs.uk
Dr Nick McNally, Divisional Manager (tel. 020 7380 9825).

To apply visit the Jobseekers pages of the UCLH website:

Closing Date: Mon 23 Feb 2009
[2694-043 (2009) : 70]
You will undertake a research project designed to further characterise a number of novel peptide antibiotics that have proven activity against staphylococci. The work will involve peptide purification and characterisation, identification of genetic apparatus required for production of the peptide and determination of the mode and spectrum of activity of the agents.

You will join a group actively investigating novel peptide antibiotics that are active against a range of key bacterial pathogens and work under the supervision of Dr Mathew Upton, Lecturer in Medical Microbiology.

You should have a Ph.D. in Microbiology and have a strong background in molecular biology and analysis of peptides with a sound understanding of bacteriology.

This post is available for a period of one year from 1st March 2009.

Informal inquiries to Dr. Mathew Upton on +44 (0)161 276 8828, or e-mail: m.upton@manchester.ac.uk

Application forms and further particulars are available at www.manchester.ac.uk/vacancies or from Sue Hookway, e-mail: sue.hookway@manchester.ac.uk

Closing date: 13 February 2009.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.
Postgraduate Diploma
Physician Assistant Studies

This two year, full-time course prepares students to work as members of the professional health care team alongside experienced clinicians in the exciting new role of Physician Assistant. Theoretical foundations for practice are complemented by a wide-range of clinical placements. You should be graduates from bioscience, life or health science degrees with excellent communication skills.

For further information about the Physician Assistant role, full details of the course, applications forms and details for forthcoming open evenings, please see our website: www.sgul.ac.uk/physicianassistant or e-mail: physicianassistant@sgul.ac.uk or phone 020 8266 6347.

Open evenings will be held on:
- 10 February 2009
- 10 March 2009
- 7 April 2009
- 12 May 2009
- 16 June 2009.

[2694-045 (2009) : 70]
SINAPSE  
Scottish Imaging Network – A Platform for Scientific Excellence

Chairs in Imaging
Aberdeen, Dundee, Stirling

SINAPSE is an alliance of six universities in partnership with the Scottish funding Council and the Chief Scientist Office of the Scottish Government Health Department. These universities are amongst the best in the UK and include the UK's top medical school in RAE 2008. Our vision is to create a shared, comprehensive, network of excellence in brain imaging, focussing on magnetic resonance, molecular imaging, and electrophysiology, to fulfil the opportunities provided by this strong academic environment.

Research Professors in Neuroimaging

We seek to appoint outstanding Research Professors in Radiology, Imaging Physics, Molecular Imaging and Image Analysis to augment the established strengths in these themes.

Interests in neuro, vascular or oncology imaging, complementary to our considerable existing research strengths in these disciplines, are particularly desirable.

Successful applicants will have established internationally excellent research in imaging and will make significant contributions to enhance world leading quality research through imaging in Scotland.

Vacancies exist in Aberdeen, Dundee or Stirling.

Appointment at Senior Lecturer/Reader may be possible for a promising candidate.

Potential applicants must contact directly the University where they would like to work to discuss their interests and arrange a visit.

University of Aberdeen: Professor Mike Greaves m.greaves@abdn.ac.uk, Tel: +44 (0)1224 553015
University of Dundee: Professor Mike Coughtrie m.w.h.coughtrie@dundee.ac.uk, Tel: +44 (0)1382 632166
University of Stirling: Professor Ian Simpson i.a.simpson@stir.ac.uk, Tel: +44 (0)1786 467013

APPLICATION DETAILS

Further particulars, including details of universities' interests, application forms and submission details please visit www.sinapse.ac.uk Applications should be made to the individual universities and copied to sinapse.centre@ed.ac.uk

For general enquiries regarding these positions please contact SINAPSE Director Professor Joanna Wardlaw, jwardlaw@staffmail.ed.ac.uk, Tel: +44 (0)131 5372943

Closing date for full applications: 30/04/2009

Scientific Engineering Manager
£35,700 - £47,280 pa

National Marine Facilities Division, National Oceanography Centre, Southampton Scientific Research Vessels provide the scientific platform to support the UK’s world-wide oceanographic research programme.

National Marine Facilities – Sea Systems (NMF-SS) is part of the National Oceanography Centre, Southampton, a collaboration between the Natural Environment Research Council (NERC) and the University of Southampton. NMF-SS is responsible for the operation and management of two NERC owned vessels and providing wider support in the co-ordination and management of the NERC Marine Facility Science programme.

Following an extensive management review, a dedicated senior team is being developed to provide management and leadership to the programme. These challenging and innovative new roles offer an exciting opportunity to join a unique organisation, which combines ship operations with scientific research.

Leading the Scientific Engineering group is a key role that will demand an excellent track record and a strong background in management to enable the delivery and development of engineering services and support.

As Scientific Engineering Manager, you will be responsible for delivering sustainable policies, plans and processes. This role will ensure that the organisation meets its future economic and environmental responsibilities. You will manage and lead the forward planning and prioritisation of scientific engineering activities. This will involve working across the organisation to ensure requirements for safety, quality and value for money to agreed targets are met.

As a member of the senior management team, you will deputise for the Head of NMF-SS as required.

You will be professionally qualified or hold a relevant degree qualification in an engineering or science subject, knowledge in the area of marine science would be an advantage. The role demands an excellent track record in your field. You will have energy drive and commitment to fulfil the vision and objectives of the organisation and be able to lead, develop and support multi-disciplined teams. Excellent communications at all levels and the ability to exercise effective judgement are key to the role.

Benefits include RCUK pension scheme and up 30 days leave and 10 ½ public/privilege days.

If you wish to discuss the position further then please contact Jessica Ritson, Head of HR on 023 8059 8559.

The role will include periods of travel both within the UK and internationally.

For further information on this position and to download an application pack, please visit www.oceanography.ac.uk/jobs or alternatively contact Lorraine Gray for an application pack; tel: 023 8059 6604 or email: loraya@noc.soton.ac.uk The closing date for completed applications is 28 February 2009 and it is proposed that interviews will take place during week commencing 9 March 2009. Please quote reference number NOCS 66/09 on all correspondence.

NATURAL ENVIRONMENT RESEARCH COUNCIL
Faculty of Life Sciences
Research Technician
£20,833 - £23,449 p.a. Ref: LS/90073

We seek a technician to work on a collaborative research project on the NMR of outer membrane proteins from the bacterial pathogen Neisseria meningitidis. You should have a degree in Biochemistry or a related discipline, and experience in recombinant protein expression and purification. You will join a growing structural biology group, which has a particular focus on membrane protein structure determination. The project will be based in the Smith Building within the University's South Campus in central Manchester.

The post is available from 1 March 2009 for a period of 3 years.

Informal enquiries may be addressed to Dr Jeremy Derrick. Tel: +44 (0) 161 3064207 or Email: JeremyDerrick@manchester.ac.uk

Application forms and further particulars can be obtained at www.manchester.ac.uk/aboutus/jobs/ or from The Directorate of Human Resources. Tel: + 44 (0) 161 275 8836. Email: Lifesciences-hr@manchester.ac.uk

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

Lectureship
£31,513 p.a. rising to £33,432 p.a. (with potential progression to £35,469 p.a.)

Based in the School of Chemical Engineering & Advanced Materials a Lectureship position is available in support of the recently awarded EPSRC Engineering Doctoral Centre in Biopharmaceutical Process Development. The post will underpin the statistical data analysis and experimental design content of the Centre and contribute to the provision of industrial statistics and its role in process engineering to the School undergraduate and postgraduate taught programmes. You should have a Ph.D. (or equivalent) in Chemical/ Biochemical Engineering or related area and have a strong background in the practical application of statistics, in an industrial environment. You must be able to demonstrate your commitment to excel in research, including the ability to publish at an international standard and ability to work collaboratively. Exposure to process engineering fundamentals and industrial practice will be an advantage.

Informal enquiries can be made to Professor Elaine Martin, tel. +44 (0) 191 222 6231 or e-mail: e.b.martin@ncl.ac.uk

Please apply on line at http://www.ncl.ac.uk/vacancies/
Closing date: 20/02/09.
Interview date: 25/03/09.

New Scientist Jobs
[2694-051 (2009) : 72]
The University of Edinburgh
British Heart Foundation
THE UNIVERSITY OF EDINBURGH

The University of Edinburgh is an exciting, vibrant, research-led academic community offering opportunities to work with leading international academics whose visions are shaping tomorrow’s world.

**BHF four year Ph.D. Programme**
and BHF Centre of Research Excellence Ph.D. Studentship

The Cellular and Molecular Basis of Cardiovascular Disease
The University of Edinburgh, one of the UK's leading institutions for biomedical research, has established two four year Ph.D. programmes in cardiovascular science sponsored by the British Heart Foundation. The next studentships will be starting in September 2009.

**BHF Four Year Ph.D. Programme (4 Studentships)**
Under this studentship the first year of training involves three research projects to develop key research skills and a taught module to develop critical reading and scientific presentation. The first semester focuses on the development and function of the heart and the second semester concentrates on the molecular biology of cardiovascular disease and a main research project. Students can then make an informed choice of the research area and complete their Ph.D. within the four year period.

The programme provides broad based research training in biomedical science with a focus on the molecular basis of cardiovascular disease. Excellent research facilities are available and experimental approaches include molecular genetics, cell biology, pharmacology, physiology and bioinformatics with an emphasis on the integration of these skills to provide a better understanding of the main cause of death in the UK.

**BHF Centre of Research Excellence Ph.D. Studentships (3 studentships)**
In April 2008 the University of Edinburgh, along with three other UK universities, received a BHF Research Excellence Award. With the prestigious award (£7.6m) the University has developed a radical new research and training programme to improve the prevention and treatment of heart and circulatory disease, which affects millions of people in the UK.

The four year Research Excellence Award Ph.D. studentships are open to applicants with a background in the physical sciences who wish to establish a career in cardiovascular research. We wish to encourage students from non-biomedical backgrounds and applicants from any appropriate discipline (including physics, engineering, mathematics, chemistry computing and informatics) are invited to apply. Whilst some prior exposure to biological research would be an advantage, it is not essential.

Both the Four Year and Research Excellence Award studentships are for outstanding students wishing to pursue a career in cardiovascular research. A generous tax-free stipend (currently £17,442), research costs and tuition fees at the home/EU rate are provided. Students with a BSc Hons (at least upper second class) or MSc in any appropriate discipline are invited to apply for the Programme. Further details, including eligibility criteria are available at [http://www.cvs.med.ed.ac.uk/training](http://www.cvs.med.ed.ac.uk/training)

Informal enquiries to Dr Matthew Bailey, Centre for Cardiovascular Science, Queen’s Medical Research Institute, 47 Little France Crescent, Edinburgh EH16 4TJ. Tel: +44 (0) 131 242 6720. Fax: +44 (0) 131 242 6783. Email: MatthewBailey@ed.ac.uk

[2694-054 (2009) : 74]
Masters in Environmental Sustainability
• How can we improve the situation of the world's poor without threatening the ecological processes that support the economy?
• How should we restructure our economy and energy systems to combat climate change?
• What policies foster sustainability?
• How can we encourage the necessary changes in the behaviour of businesses and individuals?

This programme explores these issues, and encourages students to link knowledge from different disciplines to gain a holistic view of sustainability. The programme will equip you to work effectively in a wide range of roles in environmental consultancy, government, NGOs, business or education.

Masters in Integrated Resource Management
• Why are natural resources frequently over-used?
• How can we manage them better?
• Who or what gets priority treatment?

Integrated Resource Management is a big picture approach to resource use. It recognizes that interactions between resources, as well as between resource users, have a significant impact on any management solution. It therefore seeks to balance the social, economic and environmental demands on resources such that their use is more sustainable and conflicts are reduced.

[2694-055 (2009) : 74]
Applications are now invited for places on these two innovative new Masters programmes for Autumn 2009.

The MSc in Translational Clinical Science provides training in state-of-the-art biomedical science, and could lead to a Ph.D. programme at UCL. The course is aimed at doctors, other health care professionals, and graduates in biomedical sciences at any stage of their careers who want to advance their knowledge, develop research skills, and earn a degree from a world leading University in biomedical research. Core modules include research methodology, statistical methods, study design, and ethics & governance of health research, with streams specialising in drug discovery or translational science. Students will also have the opportunity to design and undertake a research project in a field of their own choice.

Further details are available at http://tinyurl.com/32hp75, by emailing sarah.edwards@ucl.ac.uk, or phoning +44 (0)20 7679 9025.

The MA in Philosophy, Politics and Economics of Health is the first of its kind in the world and is aimed at individuals wanting to specialise in this area with a background in medicine, social science, health economics or philosophy. It will appeal equally to recent graduates and those already working in public or private sector health care whether in clinical or managerial roles.

Further details are available at http://www.ucl.ac.uk/cpjh/MAprogramme or by emailing j.wolff@ucl.ac.uk.

Either programme can be followed full-time over one year or part-time over two years. Bursaries are available through the UCLH/UCL Comprehensive Biomedical Research Centre.

[2694-056 (2009) : 74]
Starting in 2009, we have three studentships available in \textit{in vivo} mammalian physiology or pharmacology. In this doctoral programme students will take an introductory Masters year before deciding on their substantive Ph.D. project to pursue in years 2-4. Students will obtain a Home Office licence and carry out two \textit{in vivo} laboratory based projects in Year 1 (MRes). Potential supervisors are drawn from the faculties of Biomedical and Life sciences, Medicine and Veterinary Medicine within the research areas of neuroscience, cardiovascular science and immunology. This is a unique and excellent opportunity for students wishing to pursue a career in the pharmaceutical industry or academic research, where experience in \textit{in vivo} skills is extremely advantageous. The stipend will be up to £15,290 per year and studentships are tenable for a maximum of four years, subject to annual progress review.

Eligibility
Candidates must have, or expect to gain in the summer of 2009, at least an upper second class honours degree or equivalent in physiology or a related area. Candidates also must be eligible by residence for a UK research council studentship. (Candidates from EU countries outwith the UK are eligible for a full award if they have completed three years' full time education, or employment in the UK.)

Candidates from outwith the EU are not eligible for MRC studentships. However, we can consider applications for this programme from candidates with external funding.

Fuller details are at \url{www.glasgow.ac.uk/faculties/fbls/gs/phdstudentships/}

Informal enquiries (subject: \textit{in vivo} MRC studentships) to: \texttt{imb-glasgow@bio.ac.uk}

Applications must consist of a current CV, contact details of at least two academic referees, evidence of degree performance, and a completed application form from: \url{www.glasgow.ac.uk/postgraduate/howtoapplyforaresearchdegree/}

Candidates are encouraged to complete the online application, but also to send their CV and associated documents direct to the Graduate School:

Graduate School of Biomedical and Life Sciences, Bower Building, University of Glasgow, Glasgow G12 8QQ, Tel: +44 (0)141-330-5800 Fax: +44 (0)141 330 6093,

E-mail: \texttt{biograd@gla.ac.uk} (please type "\textit{in vivo} MRC studentships" in the subject box of e-mails).

Deadline for applications: 28 February 2009.

BRITISH ACADEMY

Talent and autism
Panel discussion

Thursday 12 March 2009 at 6.30pm
Chair: Uta Frith, University College London
Moderator: Daniel Glaser, The Wellcome Trust
Speakers include:
Francesca Happé, Kings College London;
Mark Lythgoe, University College London
John Sloboda, Keele University
Joan Freeman, Middlesex University.

Organised in partnership with the British Academy

Extraordinary talent remains one of the big unexplained puzzles, which will only be solved by a true collaboration between sciences and humanities. One key to the puzzle might be provided by the raised incidence of exceptional talent in individuals with autism.

Are great artists fundamentally different from the rest of us? Is talent mainly nature or nurture? Is there a price to pay for exceptional ability in one domain? Does having 'a little bit of autism' predispose to talent?

The panel will open discussion on these and similar questions. Please visit royalsociety.org/events to find the webpage for this event and more details about the speakers.

CARBON TRUST
[2698-003 (2009) : C4]
From battlefield electronics, communications and emergency construction, to military labs and software development back home, defence engineering is one of the best training grounds there is, reports Helen Thomson.

IMAGINE building a 20-metre bridge that can support the weight of a tank - in just minutes. How about designing a supersonic plane that lands vertically and doesn't show up on radar? Or a robot that can clear explosives under enemy fire?

Every day, an elite group of soldiers puts such engineering feats into action, supported by the behind-the-scenes work of thousands of engineers in industry and academia.

Keith Cima is well placed to explain what life is like for the military's front-line engineers. He is president of the Institution of Royal Engineers and served for more than 30 years in the Corps of Royal Engineers. "The military offers an engineer a unique environment, as well as giving you plenty of opportunity to travel," he says.

Cima spent a lot of his early years in Northern Ireland building concrete observation posts and defensive structures from ballistic concrete blocks, steel stanchions and corrugated sheeting. There he learned that being top of the class doesn't guarantees success. It's no easy task creating store lists – complicated shopping lists for engineering supplies – and getting concrete trucks in the right order in a hurry and in an area where an enemy could strike at any time. Logistical skills and thinking on your feet turned out to be as important as technical knowledge. And you had to be ready to move at a moment's notice. 'You could go from implementing a water supply at Mount Pleasant in the Falklands to fixing the electrical supply at a base in Cyprus,' he recalls.

Good judgement is also invaluable, as Cima found out when he helped build schools and roads in Africa. "We'd be trying to apply British standards to a situation where you had to use local materials, so we had to make compromises to the design without compromising safety," he says. "You must have the technical knowledge to realise what judgements you need to make, and the courage to actually make those judgements in the field.'

For graduates, an army career can progress quickly. After a year's training at Sandhurst, plus a six-month young officer's course with the Royal Engineers, it's off to a unit where you'll be expected to command a troop of 30 to 40 soldiers. "There's nothing like commanding soldiers on operations to teach you about leadership," Cima says. Whether leading a troop into an area devastated by a natural disaster or building a bridge under enemy fire, engineers have little choice but to think laterally. That, says Cima, "is the joy and delight of military engineering".

Away from the front line, there are plenty of opportunities to provide engineering and technology back-up. At the UK Ministry of Defence's (MOD) Defence, Science and Technology Laboratory (DSTL), based at sites throughout the UK, engineers work on cutting-edge research. For example, the lab's chemical engineers have developed a colourless spray which becomes coloured as it reacts with chemical warfare agents, clearly identifying contaminated surfaces, while its software engineers are developing missile targeting programs.

Teamwork is key, says Mark Cullen, who is group leader for technology support at the DSTL. His team has been working on gadgets that make military vehicles safer. "Our engineers will sit with the technologists who come up with the ideas, then talk to materials scientists and specialists in industry about how to make those ideas a reality." If you're looking for a fast-turnaround you're in the right place, says Cullen. 'At times we're looking at seeing the results in the field within days.' Sometimes these projects end up in the civilian world, too. The DSTL has a technology transfer company called Ploughshare whose task it to identify and develop projects with this "dual-use" potential. "It's important for us to see what civilian uses our military technology has," says Alex Sparks, Ploughshare's head of PR. "If we can help the public, we will." And successful patents can mean bonuses for employees through a share in the profits. DSTL, which already employs some 150 graduates a year, is also starting an apprentice scheme aimed at people with an aptitude for the practical side of
making things work. "We're looking for enquiring minds," says Cullen. "The enthusiasm to find solutions is just as important as the practical skills and knowledge."

Another route is to join an academic lab working on defence research. Cranfield University is one of the UK's top military engineering institutions, bringing together academics and officers from the armed forces to teach defence science, technology and management. Other institutions, such as the University of Bristol and the University of Durham, offer Ph.D.s and postdoc positions which are sponsored by the MOD and by companies that have a strong interest in defence engineering, such as Rolls-Royce. If you relish having a foot in both academic and industrial camps, the MOD offers graduate-entry courses. Its defence engineering and science group is now recruiting environmental specialists, surveyors and mathematicians as well as engineers and scientists. The scheme includes in-house work placements, secondments to industry, and formal training courses, ranging from combat, weapons and explosives, to naval architecture and nuclear systems. And if the navy appeals, you can supplement the course with a part-time MSc in marine engineering or naval architecture at University College London.

Even if you'd rather keep the action at arm's length, you might consider encouraging the next generation of engineers for the armed services. The UK's newly established Engineering and Technology Board has launched an "Engineers Make it Happen" campaign, which offers a route to invaluable science communication training. "Scientists are trained by experienced public speakers to give motivational talks to school and college students and inspire them to become engineers," says project director Martin Thomas.

The British armed services, along with the companies that provide the kit they and other countries need, are recognised as among the world's elite when it comes to engineering training opportunities. They also fund some of the most innovative research. So that high-calibre specialist training by top-notch military professionals also gives you a sackful of transferable skills. Being involved with military engineering tests you personally and professionally," says Cima, "but with a great system of support and advice, anything is open to you."

"From coping with natural disasters to building under fire, engineers have little choice but to think laterally"

Case Study Graham Lee, troop commander, the Royal Corps of Signals

After four years as a communications engineer in the Royal Corps of Signals, Graham Lee has learned a thing or two about expecting the unexpected.

After a maths degree at the University of Cambridge, Graham joined the army as an officer. After 18 months of training, he became a troop commander. "The greatest skill I’ve learned is managing people," Graham says, a skill he hopes will land him a management role the civilian world later on. During active service, Graham spent seven months in Afghanistan, where his troop was in charge of radio communications. 'We provided communications in the range 3 megahertz to 90 megahertz, which allowed localised communications between small areas on the battlefield.' Being an engineer in a foreign country, you must be ready to adapt to your surroundings, says Graham. "We had to work with satellite systems because communications can be difficult because of the terrain." And he was never far from the front line, going out with the soldiers on patrol.

Yet Graham's most memorable experience was not of danger but of working closely with the Afghan National Army. "There was a big initiative to train the Afghan people so they could take charge." That landed him the responsible new position of communications mentor for the Afghan army in Helmand Province. "It definitely departed from the job description, but that's what made it interesting. There are hundreds of jobs you find yourself doing so you have to be prepared for a complete change of circumstance. If you like variety, it’s for you.'

[2698-004 (2009) : 48-49]
Imperial College London  
Department of Bioengineering  

**MSc in Biomedical Engineering**

Applications now being accepted for October 2009 entry

Biomedical Engineering is an exciting and rapidly expanding discipline that endeavours to apply engineering principles to challenges faced in biology, life sciences and medicine. It is interdisciplinary by nature and at Imperial College London encompasses a number of diverse areas of research. Such research has led to novel and varied scientific breakthroughs such as the development of the first brain controlled wheelchair able to operate in a building environment, novel tools to measure and analyse the mechanics of rowing that now form part of the standard training for British Olympic rowers and a tissue perfusion sensor for intelligent wound dressing.

We are currently accepting applications for our MSc in Biomedical Engineering for entry in October 2009. We deliver sound training in this highly interdisciplinary subject and include core modules such as systems physiology, statistics and data analysis, physiological monitoring, biomedical imaging, and modelling in biology.

You can select your own area of specialisation by taking one of our three streams:

- **Medical Physics stream** - you can tailor your course to include modules such as advanced medical imaging, radiotherapy and radiobiology, nuclear medicine, image processing or computational neuroscience.
- **Biomechanics stream** - choosing from modules covering biomechanics, biomaterials and tissue engineering, neuromuscular control or micro-systems and nanotechnology.
- **Neurotechnology stream** - modules include computational neuroscience, brain machine interfacing, and advanced biological modelling.

You will also complete a research project where you can apply your knowledge of bioengineering to solve problems of biological or medical significance. These projects are many and varied in nature allowing you to actively pursue your particular area of interest.

Why study Biomedical Engineering at Imperial College London?  
Our MSc course is well established, having first been offered in 1991. Changes are made to the syllabus on a continuing basis to take new developments in the field into account. Our graduates have gone on to work in a wide range of professions including hospital based engineering, work in medical device companies, or to carry out further research by undertaking a Ph.D. Imperial College London was ranked 6th in the Times Higher Education World University Rankings 2008. The Department of Bioengineering achieved excellent results in both the 2001 and 2008 Research Assessment Exercises, confirming our position as the leading Department of Bioengineering in the UK.

The minimum requirement for entry is an Upper Second Class Honours Degree, or equivalent, in engineering, physical sciences or mathematics. Applicants from a medical or life sciences background are also encouraged to apply provided they have proven mathematics ability.

For further details of this course please contact the Postgraduate Administrator, Department of Bioengineering, Imperial College London, London SW7 2AZ; email: p.smith@imperial.ac.uk; tel: +44 (0)20 7594 5101; website: [www.imperial.ac.uk/bioengineering](http://www.imperial.ac.uk/bioengineering)

Application deadline: 31 May 2009; later applications may be considered - please contact the Postgraduate Administrator.

Valuing diversity and committed to equality of opportunity
For over 20 years our Engineering divisions have specialised in the recruitment of permanent and contract engineers of all levels for the Pharmaceutical, Biotechnology, FMCG, Healthcare, Food, Cosmetic and Contract Research industries throughout the UK.

Our team of specialist consultants offer a totally flexible service to meet each clients needs, covering the full spectrum of disciplines within the Engineering sector, including:

- C&I Engineers
- Project Engineers
- Project Managers
- Quality Engineers
- Process Engineers
- Facilities Engineers
- Validation Engineers
- Maintenance Engineers
- Health & Safety Officers
- Commissioning Engineers
- Piping Designers / Engineers
- PLC / SCADA / DCS Engineers

EPSRC Doctoral Training Centre in Sustainable Chemical Technologies, University of Bath

4-Year Ph.D. Studentships at the interface of Chemistry and Chemical Engineering

UNIVERSITY OF BATH

An award from the EPSRC for a Doctoral Training Centre in Sustainable Chemical Technologies is centred on a four-year Ph.D. programme aimed at graduates of Chemistry, Chemical Engineering and related disciplines who already have or expect to obtain a first or upper second class honours degree. The Doctoral Training Centre is based within the interdisciplinary Centre for Sustainable Chemical Technologies. The Centre is offering up to ten fully-funded four-year Ph.D. studentships with an enhanced stipend (ca. £14,500 tax free pa) starting in October 2009.

Students will also undergo a taught programme of research training in scientific, societal and business aspects of sustainability individually tailored to their Ph.D. research project. All projects will have co-supervisors in Chemistry and Chemical Engineering and will also have an industrial or an international partner.

The scientific areas in which we will offer research projects cover a broad spectrum of chemical sciences relating to issues of sustainability including:

• Renewable Resources - biofuels, biopolymers, biorefineries, platform chemicals
• Clean Energy - hydrogen storage, fuel cells, lithium batteries, solar energy conversion
• Clean Processes - non-thermal activation, process intensification, new solvents and separations, flow chemistry, catalysis, chemical reaction engineering
• Pharmaceutical and Wellbeing - environmental and medical sensors, clean synthesis of pharmaceuticals
• Life-cycle Impact Reduction - heavy-metal replacement catalysts, CO₂ mitigation

Interviews will be held between February and April 2009.
For more details and how to apply see [www.bath.ac.uk/cset](http://www.bath.ac.uk/cset) or contact Professor Matthew Davidson, Director of the Centre for Sustainable Chemical Technologies, Department of Chemistry, University of Bath, BA2 7AY, UK, m.g.davidson@bath.ac.uk.

WITS UNIVERSITY, JOHANNESBURG

HEAD – SCHOOL OF CHEMICAL & METALLURGICAL ENGINEERING

The Faculty of Engineering and the Built Environment invites applications for the Headship of the School of Chemical & Metallurgical Engineering. The appointment is for a fixed period of five years, though this period may be shortened by mutual agreement to no less than three years.

The Head will lead the School in establishing and maintaining a position of excellence. S/he will need vision, strong managerial skills and senior experience. The Head should also have standing as a researcher and an academic or professional. The ability to fund raise and liaise with industry is strongly recommended. Professional registration is an advantage.

The School of Chemical & Metallurgical Engineering has a substantial undergraduate enrolment, and provides supervision for postgraduates in highly active world class research groups.

ENQUIRIES & TO APPLY: Please send a letter of application and CV with the names and contact details of three referees, as well as certified copies of degrees/ diplomas and SA Identity Document/ foreign Passport to: Maxine Lewin, Human Resources Manager, Faculty of Engineering & the Built Environment, University of the Witwatersrand, Private Bag 3, Wits 2050, South Africa.
• Tel: +2711 717-7077/8
• Fax: +2711 717-7021
• E-mail: maxine.lewin@wits.ac.za
• Closing Date: 30 April 2009

The University reserves the right to verify qualifications and credit standing.

FIND YOUR PATH
YOUR FUTURE BEYOND THE FORCES

MECHANICAL DESIGN ELECTRICAL ELECTRONIC ASSURANCE SAFETY CASE QUALITY HEALTH & SAFETY FACILITY MANAGEMENT FACILITY ENGINEERING MANUFACTURING MAINTENANCE PRODUCTION CHEMICAL COMMISSIONING

Nr Reading, Berkshire

Leaving behind your life in the forces can be a daunting prospect. But rest assured, at the Atomic Weapons Establishment, we'll do everything we can to ease your transition into another exciting and fulfilling career.

Responsible for the UK's nuclear deterrent, we work closely with the Ministry of Defence. As such, we have a clear affinity with the Forces and a unique offering for the people who operate within them. People like you.

The scale and scope of our organisation presents a vast array of opportunities. Many are closely aligned to roles within the Forces - particularly those in the engineering field. But there are also plenty of other options in areas like Project Management, IT and Business that enable you to transfer your skills and take your career in a whole new direction.

To find out more about our work and the various career paths open to you, visit www.awe.co.uk

POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE

AWE promotes diversity in employment. We welcome applications from women and men, regardless of disability, sexual orientation, racial or ethnic origin, or age. Applications from women and ethnic minorities are particularly encouraged. Successful candidates will be selected solely on their ability to carry out the duties of the post. The normal contractual retirement age at AWE is 65. Because of the nature of work associated with these posts, they are subject to special nationality rules and are open only to British citizens. All selected candidates will be required to undergo security clearance.

[2698-010 (2009) : 52]
Academic Staff, Research Fellowships, Ph.D. Studentships and a Programme Manager Position in Clean Fossil Fuels

Major long-term funding by Qatar Petroleum and Shell International through the recently established Qatar Carbonates and Carbon Storage Research Centre (QCCSRC) is enabling Imperial College London to expand significantly its research into Clean Fossil Fuels - aimed in particular at improving the energy efficiency of oil and gas recovery closely coupled with reducing greenhouse gas emissions through advanced carbon capture and storage technologies.

An experienced Programme Manager is sought to co-ordinate the research projects within QCCSRC, under the direction of the Programme Director, Professor G C Maitland, FREng. The successful candidate will have several years' research project management experience in the industrial or academic sector, preferably with a background in oil and gas technology.

Applications are also invited for 3 Lectureships and up to 10 Research Fellowships/Associateships from candidates with a proven world-class research track record who wish to build major new research activities in this area. A background in one or more of the following would be especially beneficial:

- The physics, chemistry and engineering of fluid flow in porous media;
- Fluid thermophysical properties, especially in extreme conditions;
- Burial diagenesis, structure and characterisation of fractured carbonate oil and gas reservoirs;
- Mineral-fluid interactions and reactive flow, especially in carbonate-based systems;
- Process modelling especially in the context of carbon storage and/or oil and gas recovery;
- Enhanced oil recovery processes.

Appointments at a more senior level will be considered for candidates with appropriate experience. Fully-funded Ph.D. studentships are also available to work in these areas.

Academic staff appointees will be expected to pursue their own research interests, to contribute to the teaching and administration in one or both Departments and to be active and take on an academic leadership role in the activities of the QCCSRC. Exciting opportunities exist for evaluation of engineering applications in a field environment. Significant funding for research staff, studentships and equipment will be available. Appointees will also have the opportunity to contribute to the multidisciplinary Energy Futures Lab and the Grantham Institute for Climate Change and to work closely with scientists and engineers in Shell and Qatar Petroleum.

For Ph.D. Studentships, applications from Qatari citizens and neighbouring areas are particularly encouraged, although the call is open to candidates of all nationalities. Applications for Research Fellowships will be considered from both candidates with recent doctorates (or equivalent) and more experienced researchers having a Ph.D. (or equivalent). Ph.D. candidates should have, or expect to receive, a first or upper second class honours degree (or equivalent) in a relevant engineering, physical or earth science discipline. All researchers will work in multidisciplinary teams in the QCCSRC and have close contact with the Energy Futures Lab and the Grantham Institute for Climate Change.

On-line applications can be made through the College's employment website: http://www3.imperial.ac.uk/employment/howtoapply Further information on salaries, job descriptions and person specifications is also available on the website. Please direct any enquiries about these positions to Ann Sewell by email to: a.sewell@imperial.ac.uk or, for Ph.D. applications, to Susi Underwood by email to: s.underwood@imperial.ac.uk
Closing date for applications: Tuesday 31 March 2009. (There is no closing date for Ph.D. applications).

[2698-011 (2009) : 53]
**Survey Geologist**

£19,150 - £28,830 p.a. depending on qualifications and experience

The British Geological Survey, (BGS) part of the Natural Environment Research Council (NERC), is the UK's premier geoscience strategic mapping and research organisation.

You will be initially based at the BGS Keyworth Office but may possibly be expected to move to the BGS Cardiff Office at some point in the future. You will be available to carry out geological mapping and research on stratigraphically and/or structurally complex sedimentary terranes, in the UK and overseas, and to produce scientific interpretations and 3-D models in support of Science Budget and/or Commissioned Research projects, through field mapping, computer modelling, stratigraphical and sedimentological analysis, core logging, and other geological data analysis in the field and office.

You will have proven research skills in a range of complex geological terranes, particularly sedimentary basins (including student thesis work) and have a minimum 2:1 BSc (Hons) in Geology/Earth Sciences. The role requires you to work in a variety of geological projects, therefore you must be highly flexible. In addition you must be proficient in MS Office and have good presentational and writing skills. Experience of GIS, remote sensing and/or 3D modelling software would be an advantage.

Working hours will be 37 per week excluding lunch breaks. A generous benefits package is also offered, including a company pension scheme, childcare allowance, 30 days annual leave plus 10.5 days public and privilege holidays.

For an application form contact Personnel (Recruitment), British Geological survey, Keyworth, Nottingham, NG12 SGG. (Tel: 0115 936 3209). Further details can also be obtained by accessing our web page at [www.bgs.ac.uk](http://www.bgs.ac.uk). Applications must be returned by 20 March 2009. Please quote reference no.SO/KW/09/03 when applying for an application form.

The Natural Environment Research Council is an equal opportunities employer and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome. The British Geological Survey is an Investors in People organisation. There is a guaranteed Interview Scheme for suitable candidates with disabilities.

THE MACAULAY INSTITUTE
Reducing Emissions from Deforestation and Degradation (REDD)

SOCIAL ECONOMIC SYSTEMS MODELLER

A post is available in an interdisciplinary team working in a new EU Framework 7 project evaluating approaches to reduce net global greenhouse gas emissions through avoided deforestation in the tropics. The post will focus on evaluating mechanisms for ensuring national-level benefits are distributed equitably, effectively and sustainably to stakeholders at a range of levels.

Applicants must have experience in modelling social and economic processes, and in integrated analysis of socioeconomic and biophysical information. Understanding of the processes of tropical deforestation, and a knowledge of current REDD discussions in various global fora, would also be advantageous. Experience of inter-disciplinary working, and a track record in publishing peer-reviewed papers and generating external funding are all desirable.

As this opportunity is funded through the EU Framework 7 project, this is a Limited Term position of 3 years duration. Starting salary within the range £26,088 - £28,986 per annum with excellent employee benefits.

[2698-015 (2009) : 55]
Formed in 1986 and comprising 22 European member states, EUMETSAT's role is to establish, operate and exploit European meteorological satellite systems. Data from these systems are essential for precise and accurate weather forecasting; they also assist global earth observation and climatological programmes and directly benefit national economies by enabling marine, agricultural, aviation and other industries to plan and act more effectively.

Currently the systems include two generations of geostationary Meteosat satellites whose global overview is now complemented by the detailed observations provided by polar orbiting MetOp satellites and Jason-2.

**User Support Officer**  
Ref: VN-09/06

In this role, you will be responsible for the provision of an operational information service to the EUMETSAT user community, which comprises National Meteorological Services, academia, commercial and private users. You will also manage the User Service Helpdesk team to ensure the efficient and effective provision of a helpdesk service to all users.

To be successful you should have a university degree or equivalent in a relevant discipline, as well as several years' experience in a User/Customer interface environment, preferably gained in a scientific, academic or similar environment. Some knowledge of using Customer Relations Management systems or equivalent is required. You should be capable of communicating to different target audiences, ranging from scientists to the general public and have excellent writing skills. The official languages of EUMETSAT are English and French. The working language for the post is English and therefore candidates must be able to work effectively in this language and have knowledge of the other.

Based in Darmstadt, Germany, the post is offered on an initial four-year contract. Further information on the position, salary and benefits, and how to apply can be found on the EUMETSAT web site: [www.eumetsat.int](http://www.eumetsat.int). Please note that only applications from nationals of one of the EUMETSAT Member States can be considered.

Closing date: 1 April 2009

Member states: Austria, Belgium, Croatia, Denmark, Germany, Hungary, Finland, France, Greece, Ireland, Italy, Luxembourg, The Netherlands, Norway, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom

[2698-018 (2009) : 56]
The Biotechnology and Biological Sciences Research Council (BBSRC) is the principal public funder in the UK for research on underlying processes in biology, including genetics, cell and tissue biology, plant and animal sciences.

The Genome Analysis Centre (TGAC) is an exciting new initiative, to be funded by BBSRC, in conjunction with the East of England Development Agency (EEDA) and local authorities in Norfolk and Norwich. It will focus on development of new non-biomedical applications of genome research to meet the growing requirements of the scientific community. TGAC will also foster collaborations with industry to promote practical applications of genomic science. Hosted at the John Innes Centre on the Norwich Research Park, TGAC will establish a sequencing platform to deliver new reference genome resources and data for comparative and functional genomics studies and a bioinformatics platform for data analyses.

**Head of Genome Technology**

£53,495 - £59,438  
Norwich  
Ref: 33/09

As Head of Genome Technology, you will establish and manage a high-throughput state-of-the-art DNA sequencing facility to deliver sequence resources to meet current and future demands. You will be equally at home undertaking basic research or working with innovative or technology based approaches and will oversee the evaluation and development of new technology platforms and applications in conjunction with bioinformatic scientists. You will build and lead a team to operate the sequencing facility and play a key role in the overall management of the Genome Analysis Centre.

With a background in genomics/genome biology, you will have solid experience in molecular biology and bioinformatics in relation to high-throughput DNA sequencing, demonstrated through a strong publication record and proven ability to secure research funding. Proven management, leadership and team working skills should be matched by the ability to network and influence at the highest levels.

**Business Development Director**

£53,495 - £59,438  
Norwich  
Ref: 34/09

As Business Development Director, you will lead our skills, innovation and enterprise agenda. Overseeing a trading subsidiary company and a small business development team, you will interact with everything from large multi-nationals to small enterprises and start-ups to create and develop opportunities. There will be a particular emphasis on nurturing business-oriented innovation.

You will combine an understanding of the biological or life sciences coupled with a strong track-record in business development. In particular, you will need experience of operating within the early stage biotech community. You will combine entrepreneurial insight with a pragmatic approach.

**Head of Bioinformatics**

£53,495 - £59,438  
Norwich  
Ref 35/09

As Head of Bioinformatics, you will be responsible for developing our IT Infrastructure and research to support the sequencing and analysis platforms and will establish a dynamic team of bioinformaticians for data analysis. This will include provision of software tools and resources for assembly and analysis of DNA sequence, genome-wide analyses of integrated data sets and new applications of genome biology. There will be emphasis on developing collaborative
programmes with academic groups and with industry and stimulating new strategic initiatives involving both public and private sector organisations.

Expertise in bioinformatics should be matched by significant experience of managing and delivering solutions related to high-throughput DNA sequencing and integration of large data sets to provide high utility resources and deliver novel science. You will have demonstrated your ability to manage both people and projects and will be capable of networking and influencing at the highest levels.

For further information about any of these posts or for an informal discussion please contact Dr Jane Rogers, TGAC Director on 01 603 450830, email: jane.rogers@bbsrc.ac.uk

For an application form and further details, please visit the JRU website to download the application documents - [http://jru.rcuk.ac.uk/AIVacancies.htm](http://jru.rcuk.ac.uk/AIVacancies.htm) Alternatively please contact Fiona Mitchell via email: fiona.mitchell@scc.rcuk.ac.uk or jru-recruitment@scc.rcuk.ac.uk or telephone 01793 867240 quoting the job reference number.

Closing date: 27 March 2009.

Interviews will be held w/c 13 April 2009.

The BBSRC welcomes applications from all sections of the community irrespective of race, ethnic origin, religion, sexual orientation, disability, age or gender.

As users of the disability symbol, we guarantee to interview all disabled applicants who meet the minimum criteria for the vacancy.

MACS
Miltenyi Biotec

Miltenyi Biotec is a world leader in Cell and Biomolecule Separation Technology. Due to outstanding growth in the UK, the company is looking to recruit several positions to join its existing team.

TECHNICAL SALES CONSULTANT

The position is for a field sales consultant, covering London/Surrey/Kent. Previous sales experience of Pharmaceutical, Biotech or University accounts along with relevant work experience in an Immunology/Haematology focussed laboratory for a minimum of 2 years is essential. Applicants must live in London/Outer London/South London.

TECHNICAL SALES REPRESENTATIVE

The position is for a field sales representative, covering the Birmingham to Newcastle area. Work experience in an Immunology/Haematology scientific laboratory for a minimum of 18 months essential. Applicants must live in the Manchester / Sheffield / Leeds area.

Both positions require you to be qualified with a degree in a biomedical/biological / immunology subject or Ph.D., with cell separation experience preferable. CV's required by the latest 20th March.

FLOW CYTOMETRY SPECIALIST

The position is for a field flow cytometry specialist covering the whole of the UK. Qualified to Ph.D. level with a 1st degree in a biomedical/immunology subject or can prove exceptional equivalent experience in flow cytometry. Extensive practical experience of multi parameter flow cytometry is essential. Informal enquiries for this position please contact JohnC@miltenyibiotec.co.uk

CV's required by the latest 23rd April.

All positions require you to be a well organised individual with good interpersonal skills and some commercial flair. A good team player you should be confident in handling existing customer accounts and have the ability to develop new business. Your scientific background will enable you to demonstrate all of the company's products and provide strong technical support to Miltenyi customers.

All positions offer competitive salary, O.T.E bonus scheme, benefits and a company car. Recruitment will commence in March/April for appointment immediately.

If you are interested please forward a copy of your CV stating clearly which position you are applying for to Sandra Barrett, Miltenyi Biotec Ltd, Almac House, Church Lane, Bisley, Surrey GU24 9DR or E-mail to sandrab@miltenyibiotec.co.uk.

CONTROLLED THERAPEUTICS (SCOTLAND) LTD
FORMULATION SCIENTIST

Controlled Therapeutics (Scotland) Limited is an established and profitable drug delivery company situated in East Kilbride. The company manufactures and distributes controlled release products to worldwide markets.

The company is seeking to recruit a Formulation Scientist to develop novel pharmaceutical products using CTS's proprietary polymer technologies. Reporting to the Senior Formulation Scientist and working within a small team, the position would include product and process development as well as clinical and stability batch manufacture.

The ideal candidate would be a pharmacist or life science graduate with a Ph.D. in pharmaceutics or a BSc/MSc graduate in pharmacy or life sciences with 2-3 years experience in the pharmaceutical industry in a Formulation role. The successful applicant should be innovative, possess good scientific knowledge and have first-rate laboratory skills and an awareness of cGMP. In addition, he/she should have excellent oral and written communication skills, be able to work within a team environment and manage their time effectively.

If you are interested in applying for this position please send your CV to Eleanor Campbell, Controlled Therapeutics (Scotland) Ltd, 1 Redwood Place, Peel Park Campus, East Kilbride G74 5SPB. Applications can also be e-mailed to Eleanor.Campbell@ctscotland.com For further information on the company please visit our website: www.ctscotland.com

ECHA
European Chemicals Agency

The European Chemicals Agency (ECHA) is the hub of REACH, a new regulatory framework for chemical substances in the European Union. REACH aims to improve the protection of human health and the environment while maintaining the competitiveness and enhancing the innovative capability of the EU chemicals industry.

ECHA is now recruiting the following staff:

- **Scientific Officers in Ecotoxicology**, Environmental fate, (Q)SAR
- **Scientific Officers in Epidemiology**
- **Scientific Officers in Immunotoxicology**
- **Scientific Officers in Toxicology**

The successful candidates will join a dynamic team engaged in establishing and operating the new regulatory framework, managing the technical, scientific and administrative aspects of REACH, ensuring consistency at Community level in its application and providing the Member States and the EU institutions with the best possible scientific and technical advice on chemicals.

They will work in ECHA's headquarters in Helsinki, Finland, where they will be employed as Temporary Agents under article 2 a) of Conditions of Employment of Other Servants of the European Communities. ECHA is an equal opportunities employer.

The deadline for applications is 31 March 2009.

For more details, please consult our job opportunities on the ECHA website at:

[2698-023 (2009) : 58]
The MHRA (Medicines and Healthcare products Regulatory Agency) is a Government Agency that plays a key role in safeguarding public health. MHRA does this by ensuring that all medicines and medical devices are effective, safe and of acceptable quality.

MHRA

Inspectors - Good Manufacturing Practice
£41,681 - £59,961 with world-wide travel
Starting salary in the region of £47,500
You'll work to reduce risk and improve the quality of medicines, blood products and blood components for patients.

Working across a wide range of medicinal products, you'll perform inspections at manufacturing sites, importers, wholesale dealers and hospital sites in the UK and around the globe. You'll liaise with industry and other regulatory bodies to ensure medicinal products are manufactured in compliance with EU GMP and national marketing authorisations.

A proven manufacturing/quality control background will be essential, ideally within the pharmaceutical industry. It's a role with real autonomy, so you'll need excellent organisational skills, enabling you to manage your time and caseload effectively. It's also a role which requires flexibility, pragmatism and the ability to make decisions. An in-depth understanding of relevant legislation and regulations and auditing experience will also be important.

Inspectors - Good Distribution Practice
£30,690 - £35,731
Starting salary in the region of £32,531
You'll work to reduce risk and improve the quality of medicines by inspecting the pharmaceutical distribution supply chain in the UK. You'll liaise with industry and other regulatory bodies to protect the public from the possibility of counterfeit medicines.

A background in the pharmaceutical industry and auditing experience is important, as is knowledge of quality systems and relevant legislation and regulations. It's a role with real autonomy, so you'll need excellent organisational skills, enabling you to manage your time and caseload effectively. It's also a role which requires flexibility, pragmatism and ability to make decisions.

NC3R
National Centre for the Replacement, Refinement and Reduction of Animals in Research

Programme Manager - Research Funding (Maternity Cover)
£39,000 - £47,000 per annum (inc. Allowances)
Using the 3Rs to support science, innovation and animal welfare

The National Centre for the Replacement, Refinement and Reduction of Animals in Research (NC3Rs) provides a UK focus for the development and application of the 3Rs - the principles of which underpin the humane use of animals in scientific research and testing. The Centre was established in 2004 and is funded by the Government, industry and the charitable sector. Based in London W1, the Centre drives advances in the 3Rs which support science, innovation and animal welfare. To help us achieve this objective, we are looking to recruit a Programme Manager.

This is an exciting one year post which combines research funding management with identifying and exploiting new technologies in the 3Rs. We are looking for an enthusiastic and forward thinking team player to manage the Centre's research funding activities and advance the NC3Rs capacity in this area by identifying novel opportunities for collaboration and innovation.

You will have experience of managing research funding schemes and the skills to network effectively with a range of stakeholders. A Ph.D. is required and an ability to plan and prioritise work and communicate effectively is equally important. A good understanding of the use of animals in research and the 3Rs is essential.

Please note that final appointment will be subject to pre-employment screening.

Applications for this role should be made online at http://jobs.mrc.ac.uk If you do not have internet access or experience technical difficulties please call 01793 301 154 quoting the reference number H009/104. Please ensure you include your CV, covering letter and contact details for three professional referees within your application.

More information on the NC3Rs can be found at www.nc3rs.org.uk

Closing date: 19 March 2009.

NewScientist Jobs
[2698-029 (2009) : 60]
Formed in 1986 and comprising 22 European member states, EUMETSAT's role is to establish, operate and exploit European meteorological satellite systems. Data from these systems are essential for precise and accurate weather forecasting; they also assist global earth observation and climatological programmes and directly benefit national economies by enabling marine, agricultural, aviation and other industries to plan and act more effectively.

Manager Communications and outreach
REF: VN-09/04

The Communication and Information Services (CIS) Division promotes the activities of EUMETSAT to relevant target audiences through the provision of external communications such as press releases and publications and the organisation of conferences, events and visits. As a member of the CIS team, your role will be to define, facilitate and coordinate EUMETSAT internal and external communications and outreach activities.

To be considered you should have an appropriate qualification in communication and outreach management in addition to a University Degree in a relevant discipline. At least five years experience of implementing and coordinating communications and outreach projects with a special focus on media liaison and event organisation is required. Experience of the application of internal communications programmes in a multi-discipline (scientific/technical/administrative) and mixed cultural environment is a prerequisite. Experience in managing small teams and excellent interpersonal skills with an ability to interact with senior management and employees at all levels are essential. The ability to work with minimum supervision as well as excellent verbal and written communication skills are essential. A meteorological/technical/scientific background is desirable. The official languages of EUMETSAT are English and French. Candidates must be able to work effectively in one of these languages and also have a working knowledge of the other. A working knowledge of German would be an advantage.

Based in Darmstadt, Germany, the post is offered on an initial four-year contract.

Further information on the position, salary and benefits, and how to apply can be found on the EUMETSAT web site: [www.eumetsat.int](http://www.eumetsat.int). Please note that only applications from nationals of one of the EUMETSAT Member States can be considered.

Closing date: 27 March 2009

Member states: Austria, Belgium, Croatia, Denmark, Germany, Hungary, Finland, France, Greece, Ireland, Italy, Luxembourg, The Netherlands, Norway, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom

UK resource centre for women in science, engineering & technology

New Year, New Skills
Are you a woman looking to work in Science, Engineering or Technology?
Need to update your technical skills?

The UKRC Training Grant is a new scheme to help women progress in Science, Engineering and Technology (SET).

The grants may help with:
- Moving from a support role to a technical role
- Returning to a professional / technical role after a break
- Moving up within technical and professional career paths

The aim is to support women who want to re-train or acquire a specific SET-related skill to help their careers take off.

Training at NVQ level 4 or equivalent is eligible within the scheme. Awards of up to £500 are available.

For more information and to find out if you are eligible visit www.ukrc4setwomen.org or call us on 09274 436485
[2698-031 (2009) : 61]
abpi

R&D POLICY OFFICER
(fixed term contract)

The ABPI is the voice of the innovative pharmaceutical and biopharmaceutical industry, working with Government, regulators and other stakeholders to promote a receptive environment for a strong and progressive industry in the UK, capable of providing the best medicines for patients. A part-time secondment and expansion of R&D related activities in the ABPI mean that a Fixed Term Appointment (12 months) is required to support the Scientific, Technical, Medical and Regulatory Team (STRM).

The Role and Responsibilities
Reporting to the R&D Policy Manager, the role will be to support the STRM Team in pursuing ABPI objectives to enhance UK competitiveness on science, technology and R&D in particular providing Secretariat support for a number of "pay-to-play" groups. Overall the appointee will support the ABPI objective to sustain and enhance the UK biomedical and clinical research base through a number of activities, including the following:

- Secretariat and support functions for the Pharmaceutical Industry Security Forum (tasks available on request.
- Support the Chief Executive of Stem Cells for Safer Medicines (SC4SM), providing Secretariat support, organisation of meetings and administration of calls for research proposals and coordination of network activities.

The Person
Previous experience, or a strong interest of science, technology and/or R&D policy is desirable, as is a graduate degree, and/or a relevant qualification in the biomedical or life (biological) sciences. Direct experience of the pharmaceutical industry and R&D would be helpful, but not essential.

This is an exciting opportunity, giving high visibility in the UK and European arena. An attractive package is offered. A full job description is available and interested candidates should contact the HR Strategy & Development Manager on jwallace@abpi.org.uk. Closing date for applications is 20 March 2009.

[2698-032 (2009) : 61]
wellcome trust

PORTFOLIO ANALYST – TECHNOLOGY TRANSFER
£30,000 - £40,000 p.a. depending on experience

The Wellcome Trust is one of the world's largest biomedical research-funding charities and its mission is to foster and promote research with the aim of improving human and animal health.

The Technology Transfer Division maximises the impact of this research on health by managing funds for translation projects across the spectrum of biomedical science.

You will assist the management team in monitoring the portfolio of both past and present awards in order to provide data to enable the business development and legal and operations teams to achieve the best possible outcomes for their projects. This will include profiling the awards in terms of R&D deliverables, the IP and its market opportunities, and the sustainability and competencies of the organisations managing the assets.

You will be educated to degree level in either science, business, economics or finance, with demonstrable experience in an analyst role, including experience in a financial or business administration position. You will also have some experience or knowledge of biomedical science and healthcare markets. In addition, you will possess:

- excellent communication skills;
- the ability to meet objectives within a defined period;
- highly developed interpersonal/relationship skills;
- the ability to work as part of a team but be capable of independent judgement and action.

Experience in a biomedical science company or in health policy would be desirable.

For more information and to apply online visit: www.wellcome.ac.uk/jobs

Alternatively send a CV and covering letter explaining how you meet the criteria for this post to: HR, Wellcome Trust, Gibbs Building, 215 Euston Road, London NW1 2BE.

Application deadline: Friday 13 March 2009.
MRC
Dunn Human Nutrition Unit

**Laboratory and Health & Safety Manager**
£35,635 - £43,614 per annum
(depending on qualifications and experience)

The MRC Dunn Human Nutrition Unit is a world-renowned centre for Bioenergetics and Nutrition research (Director: Professor Sir John Walker). You will oversee the provision of technical support services, research facilities and equipment and act as the Unit's Safety, Security and Environment Co-ordinator. You will have a scientific degree or equivalent professional qualifications and experience in Health & Safety management.

Your salary is supported by a flexible pay and reward policy, 30 days annual leave entitlement and an optional MRC final salary pension scheme.

This position is subject to pre-employment screening.

Additional information about the Unit can be found at [www.mrc-dunn.cam.ac.uk](http://www.mrc-dunn.cam.ac.uk)

Applications for this post must be made online at [http://jobs.mrc.ac.uk](http://jobs.mrc.ac.uk) inputting the reference number DUNN09/077. Please include a CV and covering letter with your application, along with the names and addresses of two professional referees who can be contacted prior to interview. If you do not have access to the internet, or experience technical difficulties, please contact 01793 301157.

Closing date: 20 March 2009.

[2698-038 (2009) : 63]
UCB is a leading biopharmaceutical company, dedicated to the discovery, development and commercialisation of innovative pharmaceutical and biotechnology products in the fields of CNS, immunology and oncology. UCB is committed to developing an industry-leading Research DMPK function. In line with this strategy, a number of key roles have been created for forward-thinking DMPK Scientists, to be based within the CNS Research Hub in Brussels:

**Senior DMPK Bioanalytical Scientist & Laboratory Manager**
You will be responsible for the provision of quantitative analysis of drugs and metabolites in biological matrices in support of drug discovery programmes. Leading a team of technical staff, you will efficiently manage the laboratory, introducing new methodologies to increase efficiency and quality of sample analysis. Educated to degree or Ph.D. level, you will demonstrate a detailed understanding of HPLC and LC-MS - including method development, analytical quality control, trouble-shooting and reporting. Your technical knowledge will be complemented by several years of pharmaceutical/biopharmaceutical industry experience, gained within a Research DMPK environment. Ref: 081128@theRSAgroup.com

**Senior Scientist, in vitro Metabolism**
You will be responsible for the provision of practical and strategic in vitro DMPK support to all CNS drug discovery projects. Using your extensive practical skills, you will play a key role in developing and implementing new assays and methodologies, mentoring junior staff in these areas. You will represent the department on project teams and will liaise closely with colleagues across a range of disciplines. Educated to degree or Ph.D. level, you will bring to the role several years' industrial experience, gained within a Research DMPK environment. You will demonstrate a successful track record in a range of in vitro DMPK methodologies, including CYP inhibition and induction, stability assays in microsomes or hepatocytes and protein binding, combined with a solid understanding of in vivo DMPK methodologies. Ref: 081129@theRSAgroup.com

**Senior Scientist, in vivo PK and PK/PD**
You will be responsible for the provision of practical and strategic PK and PK/PD support to all CNS drug discovery projects. You will take a leading role in the provision of DMPK support to project teams, defining the strategy and providing input into study design and data interpretation, with a particular emphasis on PK and PK/PD. Educated to degree or Ph.D. level, you will bring to the role several years' pharmaceutical or biotechnology industry experience, gained within a Research DMPK environment. You will demonstrate a strong technical background in a range of in vivo and in vitro DMPK methodologies and a successful track record of representing your department on project teams. Ref: 081130@theRSAgroup.com

**Scientist, Bioanalysis**
You will provide high quality bioanalytical support to in vitro and in vivo studies, developing and applying LC-MS methodologies to the quantitative and qualitative analysis of NCEs and their metabolites in biological samples. An industry-experienced Bioanalyst, you will bring to the role a detailed knowledge of HPLC and LC-MS techniques, gained within a Research DMPK environment. Ref: 09068@theRSAgroup.com

**Scientist, in vivo PK**
You will be responsible for the planning, management, analysis and reporting of in vivo PK studies in support of drug discovery projects. An industry experienced scientist, you will demonstrate solid experience of DMPK, bioanalytical techniques and PK tools as applied to drug discovery. Ref: 09069@theRSAgroup.com
All roles require pro-active and flexible team players with excellent organisational and communication skills who will welcome the challenges of this fast-paced entrepreneurial environment. To apply, please e-mail your CV to the relevant address. Alternatively, call Dr Kay Wardle on +44 (0)1707 259333 for an initial, confidential discussion.

UKAS
United Kingdom Accreditation Service

Assessment Managers
• Organic Chemistry - Environmental
• Chemistry
• Forensic Science (any analytical discipline)
Competitive salary + benefits - office based or UK home based

UKAS is looking for Assessment Managers to be responsible for laboratory assessments in the above disciplines, to lead assessment visits, make technical appraisals and to implement accreditation policy. The applicants will:
• Have a number of years practical experience and detailed technical expertise in the relevant sector
• Be educated to degree level in a relevant discipline.
• Exhibit excellent interpersonal skills, being able to communicate effectively with laboratory staff and management at all levels.
• Ideally have some experience of laboratory/internal auditing.

The successful applicants will be responsible for managing the assessment of laboratories throughout the UK and will appoint and lead assessment teams, participate in assessment visits and provide support on both technical and policy issues. These positions require travel mainly within the UK with some overnight stays.

If you would like to discuss the details of this vacancy please contact:
• For the Organic Chemistry - Environmental vacancy - Jeff Ruddle on 020 8917 8519 or jeff.ruddle@ukas.com
• For the Chemistry/Forensic Science vacancies - Rob Bettinson on 020 8917 8521 or rob.bettinson@ukas.com

For more information about UKAS and to download an application form please visit our website at www.ukas.com. Please post documents to the HR Manager at UKAS, 21-47 High Street. Feltham, Middlesex, TW13 4UN, Fax: 020 8917 8663 or humanresources@ukas.com

The United Kingdom Accreditation Service (UKAS), a company limited by guarantee, is the sole body recognised by Government to assess and accredit the competence of laboratories, certification bodies and inspection bodies.

building confidence, enabling choice
[2698-040 (2009) : 65]
SENIOR POLICY MANAGER - SCIENCE IN SOCIETY
£33,118 - £36,798

With your commitment, drive and desire to influence people’s perception and understanding of science, you will relish the opportunity to join the Research Councils’ Science in Society team.

Our mission is to raise public awareness and engagement in science and innovation and we work closely with business areas of the seven UK Research Councils, from knowledge transfer to research programmes. We have a vital role to play in the success of the UK’s Research Councils and so will you.

You will be responsible for delivering, co-ordinating and facilitating the development of a portfolio of team projects, as well as overseeing the organisation of events and various contracts. You will provide substantial innovative input in terms of generating ideas and you will work successfully with colleagues, external agencies, researchers and others in raising the profile and impact of the Research Councils.

With a good track record of project management including managing contracts, grants and budgets, you will have a proven ability to network, negotiate, influence and facilitate. You will also be strategic and innovative in your thinking and skilled in identifying and evaluating opportunities.

COMPLETE MEDICAL GROUP
A FUSION of evidence and inspiration

Complete Medical Group works in partnership with the pharmaceutical industry, providing a wide range of innovative and class-leading services. We work on some of the most exciting healthcare products globally and provide a positive and challenging working environment for our staff. Recent growth of our business means we are currently looking to recruit in both our Glasgow and Macclesfield teams:

**Medical Writers Senior Medical Writers Editorial Team Leaders**

For a Medical Writer role, you will need the right blend of writing flair and talent to produce high-quality medical communications, and the skills and confidence to liaise directly with clients and clinical experts. Applicants must have a life science degree (preferably a Ph.D.); previous writing experience would be an advantage. For our more senior editorial roles you will have a background in medical/scientific writing within the pharmaceutical industry or an agency, a clear understanding of our business, plus the ability to mentor and motivate junior members of the team and co-ordinate the delivery of editorial projects.

We are particularly looking for individuals familiar with at least one of the following therapy areas: oncology, cardiology, diabetes, psychiatric disorders and viral infection.

We offer an excellent remuneration and benefits package and work hard towards providing long-term career choice and development. If you are passionate about excelling at your job and developing your career in a dynamic medical communications company, please apply in writing before Friday 27th March 2009, sending your CV and covering letter (stating the position you wish to apply for and current salary details) to:

UNIVERSITY OF CAMBRIDGE
A world of opportunities
www.cam.ac.uk/jobs/

Assistant Director of Research
Department of Materials Science & Metallurgy
University Technology Centre on Steels
(Director: Professor H K D H Bhadeshia)

Rated in the Research Assessment Exercise 2008 as one of the top UK departments in any science/engineering discipline, the Department of Materials Science & Metallurgy provides an outstanding environment in which to pursue forefront materials research. It will be home to a University Technology Centre (UTC) on Steels established by the SKF Group (Sweden) and the University of Cambridge. SKF is a world leader in the manufacture and technology of bearings, and the University is renowned for its expertise in the physical metallurgy of steels. This major collaboration will conduct innovative and long-term research on steels relevant for bearing technologies.

Applications are invited for the post of Assistant Director of Research (ADR) serving as Deputy Director of the UTC. The post, funded by SKF, is for five years in the first instance, subject to satisfactory completion of a probationary period of three years.

The successful candidate for this position is likely to have a Ph.D. degree, an outstanding record in research with postdoctoral experience, a strong background in the physical metallurgy of steels, and demonstrated leadership qualities. The ADR will need to interact well with senior staff at SKF, and will report to the Director of the SKF UTC at Cambridge, Professor Harry Bhadeshia, and to the Head of the Department of Materials Science & Metallurgy. The ADR will be expected to supervise research students and postdoctoral research assistants, and to contribute to teaching at Bachelor's, Master's or doctoral levels. The appointment will be from June 2009, or as soon as possible thereafter.

The pensionable scale of stipends for an Assistant Director of Research is £36,532 to £46,278 per annum. An application, electronic or single-sided hard copy, should include a curriculum vitae, publications list and contact details for three professional referees, should be accompanied by a completed form PD18 (Parts I and III), (http://www.admin.cam.ac.uk/offices/hr/forms/pd18/), and should be sent to Mrs Christine Carey, Dept. of Materials Science & Metallurgy, Pembroke street, Cambridge, CB2 3QZ, UK (cmse2@msm.cam.ac.uk).

Further information is available from Professor Harry Bhadeshia (hkdb@cam.ac.uk). General information on the Department's research and teaching is available at http://www.msm.cam.ac.uk/

Closing date: 20 April 2009.

The University of Cambridge values diversity and is committed to equality of opportunity.

The University of Cambridge has a responsibility to ensure that all employees are eligible to live and work in the U.K.

the realisation of research

Business Manager: Energy and Environment Sectors

UCL Business PLC is responsible for the delivery of University College London's commercial-facing knowledge transfer activities.

We are seeking an experienced and motivated individual to join the physical science & engineering team, who will take responsibility for developing knowledge transfer activities across the energy and environment sectors with the twin objectives of delivering significant growth in technology transfer activity and assisting in the development of strategic partnerships between UCL and relevant commercial/governmental organisations.

You will be able to demonstrate a clear understanding of both the supply and demand side issues affecting the environment and energy sectors, together with an educational background in a relevant discipline. In addition you will have commercial experience of engaging with organisations active in the energy and environmental sectors and possess the communication and organisational skills necessary to lead opinion and operate effectively at the interface between academia and industry.

The salary, depending on experience will be £35,000 - £50,000 per annum. There is also a contributory pension scheme and performance-related bonus scheme.

Further details about the post can be obtained from Ms Catherine Sims, UCL Business PLC, The Network Building, 97 Tottenham Court Road, London W1T 4TP Tel: 020 7679 9000, e-mail c.sims@uclb.com or from the UCL Business website (www.uclb.com).

The closing date for applications is 20th March 2009.

UCL Business PLC is an equal opportunities employer.

NewScientist Jobs
[2698-046 (2009) : 67]
Faculty of Medical and Human Sciences  
School of Translational Medicine  

Research Associate  
Ref: MHS/90296

You will undertake a period of research within a strong and disciplined research environment. This post is focussed on the role of airway nerve sensitization in chronic cough and is ideal for someone who has just finished a Ph.D. with a strong publication record, or an experienced post-doctoral scientist with a strong publication record. The length of the funding associated with this post will allow you to establish a reputation in the field.

You will be based predominantly in the Respiratory Research Group in the University Hospital South Manchester and will work closely with staff in the Cough Research Team. This post will be under the direct supervision of Professor Ashley Woodcock and Dr Jacky Smith. In RAE 2008, UoM was 3rd in the UK on research power, and Respiratory Research in Manchester was "commended".

For further information or to arrange an informal visit contact Professor Woodcock on +44(0) 161 291 5873 or email ashley.woodcock@manchester.ac.uk

Photobiology Research Associate  
Ref: MHS/90203

This post has been developed in collaboration with the Greater Manchester Comprehensive Local Research Network (CLRN) and the University of Manchester, to promote and facilitate a portfolio of high quality well designed clinical research studies in the area of photobiology / photodermatology. This is an exciting opportunity for a high calibre individual to develop a research career in photobiology/photodermatology. This is suitable for a researcher with Ph.D. in a relevant subject and experience of the clinical research environment. You will join Professor Lesley Rhodes' team in the Photobiology Unit, Dermatological Sciences, based at Salford Royal Foundation (Hope) Hospital. The Unit is a combined clinical and academic facility with a strong research programme into health aspects of the interaction of ultraviolet and visible radiation in sunlight with human skin.

The position requires some flexibility regarding working hours.

Application forms and further particulars are available at www.manchester.ac.uk/vacancies or from The Directorate of Human Resources, Faculty of Medical and Human Sciences. Tel: +44(0) 161 275 8835 or email: mhs-hr@manchester.ac.uk

Closing date for both posts: 20 March 2009.

Please quote relevant reference.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

LEICESTER
[2698-049 (2009) : 68]
Lecturers in Materials Science
Department of Materials Science & Metallurgy

The Department of Materials Science & Metallurgy (DMSM) at Cambridge seeks to appoint two Lecturers to start in the academic year 2009-10. Rated in the Research Assessment Exercise 2008 as the top materials department and one of the top UK departments in any science/engineering discipline, DMSM provides an outstanding environment in which to pursue forefront materials research. Candidates are sought who can further enhance DMSM's international research profile, and who will play an active part in curriculum development and teaching at Bachelor's, Master's and doctoral levels.

Appointments are to the retiring age, subject to satisfactory completion of a probationary period. The pensionable scale of stipends for a University Lecturer is £36,532 to £46,278 a year.

An application, electronic or single-sided hard copy, should include a curriculum vitae, a publications list, contact details for three professional referees, and a statement (up to six pages) covering the applicant's research experience to date and research plans for the future. This should be accompanied by a completed form PD18 (parts I and III) available from http://www.admin.cam.ac.uk/offices/hr/forms/pd18/), and should be sent to Dr REM Ward, Academic Secretary, Department of Materials Science & Metallurgy, Pembroke Street, Cambridge, CB2 3QZ, UK (lectureships2009@msm.cam.ac.uk). The closing date for receipt of applications is 30 April 2009.

General information on DMSM's research and teaching is available at http://www.msm.cam.ac.uk/. For informal enquiries, and to obtain further particulars, prospective candidates may contact the Head of DMSM, Professor AL Greer (alg13@cam.ac.uk).

The University of Cambridge has a responsibility to ensure that all employees are eligible to live and work in the U.K.

The University is committed to Equality of Opportunity.
[2698-050 (2009) : 68]
Up to nine three-year positions are available for Project Scientists to work as members of a team in the Knowledge Centre for Materials Chemistry (KCMC). The KCMC is a Northwest Regional Development Agency-funded activity uniting Chemistry Innovation Ltd, Science & Technology Facilities Council and the Universities of Liverpool, Manchester and Bolton to focus on delivering industry-led projects.

By engaging with regional and UK businesses the KCMC is supporting sector development across key industries in the North West and the wider UK through contract research, knowledge transfer, and product & process innovation.

Applicants should have an excellent research track record and expertise in one of the research areas defined below, experience in working with industry is desirable. You must have excellent communication and interpersonal skills with the ability to interact with persons at all levels within the academic and business communities.

Areas of scientific expertise required are:

The University of Liverpool: Deposition of thin films by CVD and ALD Ref: R-569318
Physical property characterisation of thin films, particularly by probe microscopy and related methods Ref: R-569319
Polymer synthesis and characterisation Ref: R-569320
Organic synthetic and catalytic chemistry with experience in high-throughput methods Ref: R-569321
Oxide materials discovery and electroceramic property measurement Ref: R-569322

SCRI

living technology

SCRI is Scotland's leading Institute for research on plants and their interactions with the environment, particularly in managed ecosystems. Our mission is to conduct excellent research in plant and environmental sciences. Our vision is to deliver innovative products, knowledge and services that enrich the life of the community and address the public goods of environmental sustainability, high quality and healthy food.

QUANTITATIVE CROP PHYSIOLOGIST
Salary Scale: £26,088 - £36,798 (Post Ref: EPI/1/9)
A Quantitative Crop Physiologist is required to extend our research capability in resource acquisition and utilisation by crop plants through an intimate knowledge of plant interactions with light and water. They will be expected to develop and execute work that will complement ongoing research in the Environment Plant Interactions Programme at SCRI. It is expected that the work will focus on genetic, physiological and environmental factors that improve light- and water-use efficiency in cropping systems in the context of environmental change, adopting appropriate molecular, physiological, laboratory, glasshouse and field based approaches as necessary. The post holder is expected to contribute generally to research on resource utilisation by plants and to develop an independent research programme through innovation and collaboration with scientists both within and outside SCRI funded by external grant income.

Informal enquiries only can be directed to: Prof Philip White e:mail Philip.White@scri.ac.uk

RHIZOSPHERE MICROBIOLOGIST
Salary Scale: £26,088 - £36,798 (Post Ref: EPI/2/9)
A Rhizosphere Microbiologist is required to extend our research capability in plant-soil interactions. They will be expected to develop and execute work that will complement ongoing research in the Environment Plant Interactions Programme at SCRI. The research will bridge between the characterization of plant root exudates, soil process studies and molecular biological approaches to determine microbial community structure and activity. It is envisaged that the appointee's research will focus on understanding microbially-mediated fluxes of carbon and mineral elements through the rhizosphere, and their consequences for microbes, soils and plants. The post holder is expected to contribute generally to research on rhizosphere processes, and to develop an independent research programme through innovation and collaboration with scientists both within and outside SCRI funded by external grant income.

Informal enquiries only can be directed to: Dr Paul Hallett e:mail PaulHallett@scri.ac.uk

Further information on the above posts is available on the SCRI website at http://www.scri.ac.uk/careers/vacancies

To apply, please send a CV (including the names and addresses of 2 referees) and a covering letter quoting the relevant reference number to HR Office, SCRI, Invergowrie, Dundee, DD2 5DA by Friday 13th March 2009.

The Institute is an equal opportunities employer.

[2698-055 (2009) : 70]
Research Opportunities at the Institute for Systems Biology and at the University of Luxembourg

The University or Luxembourg and the Institute for Systems Biology (ISB) are pleased to announce funded research opportunities for qualified researchers.

The University or Luxembourg (UL) is a recently created multilingual academic institution focussing on research. The University and the Institute for Systems Biology are developing a 5-year partnership within the Health Technologies plan from the Government of Luxembourg to enhance collaboration and transfer knowledge.

ISB is an internationally renowned non-profit research institute in Seattle, Washington (USA) dedicated to the study and application of systems biology. ISB’s goal is to unravel the mysteries or human biology to identify strategies for predicting and preventing diseases such as cancer, arthritis and other complex diseases.

Call for applicants
the University of Luxembourg is funding 12 research assignments at ISB to enhance collaboration, develop new techniques and methods and transfer knowledge between the institutions that will have an important effect on the future of health care. After an initial 2-year research assignments in ISB, the selected candidates will be located for a 3-year research period in Luxembourg within the new center for Systems Biology – Luxembourg.

We are seeking professional researchers to work in systems biology from a variety of disciplines including bioinformatics (expertise in computational biology and mathematics included), proteomics, genomics, genetics, biochemistry, molecular biology and biophysics. Qualified applicants must have a minimum of a MS Degree in one of the above mentioned disciplines (Ph.D. preferred) and at least two years of experience in a research capacity in one or more of the disciplines listed above.

Postdoctoral fellows, Research Scientists, Senior Research Scientists, Core Facility Managers, Software Developers and related personnel are invited to apply. Successful applicants must be able to commit to a two year term or research effort in ISB and three year in Luxembourg. Applicants, if selected, must be eligible to work in the United States with visa sponsorship.

Another call will be issued for applications as Ph.D. students in the framework of this UL-ISB collaboration.

About the UL
Situated in the Grand Duchy of Luxembourg at the heart of Europe, the University of Luxembourg places particular emphasis on multilingualism within the scope of its activities. The University of Luxembourg currently conducts its activities on three sites: Limpertsberg, Kirchberg and Welferdange. In the future, the University of Luxembourg will base the Faculty of Sciences, technology and Communication and the Faculty of Language and Literature, Humanities, Arts and Education at its new site in the Esch/ Belval science complex. The University has selected a few high priority scientific focus areas in order to achieve international excellence in these fields. Systems Biology is the research priority which federates Life Sciences at the UL.

About ISB
Scientists at ISB are pioneering a new approach to studying all of the genes and biological systems in an organism simultaneously. This new approach called systems biology has transformed science and has brought us closer to predictive, preventive and personalized medicine. The amount and complexity of biological information is enormous, making it essential that we develop new computational and mathematical approaches and high-throughput automated research platforms. ISB is focussing on developing tools for capturing, integrating, displaying, analyzing and modeling large data sets composed of diverse types of biological information. ISB’s mathematicians and computer scientists use the data sets created through discovery science and other research to create powerful computer algorithms to
understand complex systems. This requires large data set analysis, integration of genomic, proteomic and other types of biological information, graphical display of the integrated data, and the development of mathematical models of biological complex systems. ISB also has a major commitment to transferring knowledge to society. It does this through a commitment to inquiry-based science education in local schools, through the creation of spin off companies, through a commitment to third world medicine and by hosting world class scholars, scientists and graduate students from around the world.

Research Projects
Two multi-faceted research projects make up this large program. These two projects are described more fully on the UL website under « jobs ». Project 1 is focussed on genomic and genetic methods for characterizing the effects of genetic variation on phenotypes using model systems new methods are being developed that will enable the analysis of human genetic data in new ways informed by the insights of systems biology. In addition, new methods, like whole genome sequencing or individual genomes, is being explored in order to understand genetic variation and its relation to complex human phenotypes. Project 2 is focussed on the systems biology of complex disease. Model systems are being exploited, and human systems (including primary cells in culture) being analyzed in order to build systems models of disease pathogenic processes. Diseases of the organ systems being analyzed include: brain, lung and liver. The integration of the scientific insights and results of the two projects is a long-term goal of this program. Another important goal is to discover diagnostic molecular profiles and methods that can enable new medical insights and application for medical practice.

Benefits and Opportunities
Selected candidates will be paid by the University of Luxembourg and have medical, dental and vision benefits provided for them and their families by ISB. They will enjoy a state of the art facility located on Seattle’s Lake Union, a biotech hub, with over 65,000 square feet of research and development space. Of course, candidates will have the opportunity to collaborate with the top scientists on cutting-edge research projects. Seattle is a picturesque city surrounded by beautiful natural environment and outdoor activities including skiing, boating, hiking and cycling.

Karolinska Institutet invites applications for

**Postdoctoral positions** in Cancer Biology
Hedgehog Signalling in Cancer
At the Department of Biosciences and Nutrition, Karolinska Institutet.

Postdoctoral positions are available in the laboratory of Rune Toftgârd. The scientific interest of our laboratory is to understand the molecular mechanisms of Hedgehog signalling and the role of this signalling pathway in cancer development and control of stem cell proliferation and maintenance (see Jaks V et al., Nature Genetics 40, 1291-99, 2008, Lauth M et al., PNAS 104, 8455, 2007 and Svard J et al., Dev Cell 10, 187-97, 2006). Characterization and functional analysis of skin and mammary stem cells and applying a chemical biology approach to Hh-signalling are areas of particular interest. We use advanced *in vivo* mouse models as well as *in vitro* systems.

Applications are welcome from talented scientists that have a background in cell- and molecular biology. Experience from work with FACS and/or genetically modified mouse models is valuable. Good communication skills in English are essential.

A postdoc scholarship may be awarded for two years to a foreign citizen who has obtained a doctorate or the equivalent outside Sweden.

For further details of the appointment please contact; Rune Toftgârd, rune.toftgard@ki.se +46-8-6089152. Union representative, Joseph Rafter, joseph.rafter@ki.se +46-8-58583717.

Karolinska Institutet is one of the largest medical universities in Europe. In providing education, research and information, Karolinska Institutet contributes to the improvement of human health. Each year, the Nobel Assembly of Karolinska Institutet nominates the winner of the Nobel Prize in Physiology or Medicine. Karolinska Institutet offers 20 study programmes in the medical and healthcare field and conducts more than 40 per cent of all academic medical research in Sweden. In its capacity as innovation centre for the life sciences, Karolinska Institutet also contributes to the welfare and prosperity of Sweden and the Stockholm region. The first post is an EPSRC project "Efficient Spin Voltage/Current Generation in a Ferromagnetic/Semiconductor Lateral Spin Valve." This is funded under the joint EPSRC/Japan Science and Technology (JST) programme and will involve measurements at York and materials fabrication at Tohoku University in Japan. The person appointed will spend up to 3 months per year in Sendai. Details of the project are at: www.users.york.ac.uk/~ah566/members/vacancies

Apply at: www.elec.york.ac.uk/gsp/apply
Enquiries to: Dr A Hirohata: ah566@ohm.york.ac.uk

The second post is an EPSRC project entitled "Simulation of Spin Transport, Diffusion and Injection into Semiconductors." This project involves theoretical modelling of spin dynamics and spin injection for future spintronics devices. Details of the project are at: www.users.york.ac.uk/~ida500/#jobs

Apply at: www.york.ac.uk/depts/phys/gsp/applying
Enquiries to: Dr I D'Amico: ida500@york.ac.uk

Both posts provide tuition fees for EU nationals only. Applications will close when suitable candidates are found.

[2698-062 (2009) : 73]
A one year full time postgraduate course consisting of 180 credits, 60 credits taught modules (compulsory and optional) and 120 credits research project.

Optional modules cover: Pharmaceutical processing and Food processing

Projects available:

- Electric fields to generate structured materials
- Refrigeration with eutectics
- Use of eutectic materials for energy storage
- Effects of heat transfer and shear upon the micro-structure and function of modern cosmetics (supported by Boots plc)
- Rheological tailoring for optimum texture of novel healthy foods
- Blending of rheologically complex fluids

In order to be eligible for the EPSRC bursary you must have (or expect) a 2.1 Honours degree in a relevant Physical Science or Engineering programme and be a UK national. Candidates with relevant industrial experience are encouraged to apply. Please forward your CV to l.m.draper@bham.ac.uk

For more details please visit www.eng.bham.ac.uk/chemical/study/postgrad/mres.shtml

A University of Fairness and Diversity

POSITIVE ABOUT DISABLED PEOPLE

[2698-063 (2009) : 73]
Ph.D. Studentships

The School of Veterinary Medicine and Science at the University of Nottingham has a dynamic, vibrant and highly stimulating teaching and research environment with an international blend of students and researchers who are committed to innovative learning and scientific discovery.

Various Ph.D. studentship opportunities are now available - please see: http://jobs.nottingham.ac.uk for more details.

http://jobs.nottingham.ac.uk

John Innes Centre
UEA
University of East Anglia

**Ph.D. studentships in Sustainable Agriculture and Environmental Change**

The John Innes Centre (JIC) and University of East Anglia (UEA) have formed a unique multi-disciplinary alliance, integrating world-class expertise in biological, earth and social sciences to tackle the challenges posed by a changing climate. The JIC has recently been awarded priority studentships from the Biotechnology and Biological Sciences Research Council (BBSRC) to support this collaboration and we are offering 4 studentships in the following areas:

Crop breeding, Plant biology, Population genetics, Microbial ecology, Rhizosphere biology, Bioinformatics, Climate change, Elemental cycles, Greenhouse gases

Both JIC and UEA have excellent research facilities and distinguished reputations for basic and applied research in plant, microbial and environmental science using multidisciplinary approaches. They offer a dynamic, stimulating and friendly environment for Ph.D. training amongst a thriving research community. Students will be registered through a School of Study at UEA.

Deadline for Applications is Friday 27th March 2009

Studentships to start October 2009. BBSRC Studentships are normally available to UK nationals (EU nationals fees-only) but please check to confirm eligibility.

For further details of possible projects and an application pack please visit [http://www.jic.ac.uk/STUDENTS](http://www.jic.ac.uk/STUDENTS)

Ph.D. STUDENTSHIP
(Ref 03/02/09) - Bovine mastitis - host response to infection and re-infection

Mastitis is one of the major endemic diseases of cattle worldwide, causing significant economic and welfare concerns. A Ph.D. Studentship is available to undertake investigation of bovine mastitis, with a view to assess the response to infection and re-infection with host-adapted and non-adapted pathogens. The project will involve microbiological, molecular, and immunological approaches in vivo and in vitro and will provide the appointee the opportunity to collaborate across the scientific groups within the Institute. Applications are invited from graduates with at least a 2i (Hons) or M.Sc. in an appropriate biological science; or those with a veterinary degree. This Studentship is only available to EU citizens, and full tuition fees and a standard Ph.D. stipend will be provided.

If you would like to know more about these posts, please visit: www.moredun.org.uk or telephone 0131 445 5111.

Closing date extended to Friday 13th March 2009.

[2698-068 (2009) : 75]
University of Malta
Applications are invited for six Fellowships in the following areas: Bioinformatics, Biotechnology, Particle Physics, Marine Software and Systems Engineering, Alternative Energy and Science and Technology Transfer.

Applicants are expected to have completed a Ph.D. in the relevant area and will be required to kick start the relevant discipline through the development of curricula and research in the respective area. Moreover, they will supervise undergraduate research projects as well as initiate postgraduate research projects in the relevant discipline. All lecturing is conducted in English at the University. The appointees will be required to take up their positions within the respective faculties and become members of the appropriate department.

The positions are available for a period of up to 3 years and are part financed by the EU structural funds. European Social Fund (ESF), Malta 2007-2013.

Salary is in the range of Euro 55,000 - 65,000 per annum depending on experience and the contract is one of a fixed term.

Further information about the University may be obtained at www.um.edu.mt or directly related to these positions by contacting Professor Richard Muscat at richard.muscat@um.edu.mt or telephone (356) 2340 2053.

Applications with CV and the names of three referees should be sent to: The Director for Human Resources Management and Development, Room 216, Administration Building, University of Malta, Msida, MSD 2080, MALTA.

GeoSciences Masters Programmes

Exploration Geophysics (New for 2009)
Covering the fundamentals in Exploration Geophysics and their applications to hydrocarbon and mineral exploration, this programme is designed for science and engineering graduates seeking an advanced qualification for careers in the Resources industry (oil, gas, minerals, water, subsurface waste and CO2 storage), as well as for those already in the industry wishing to enhance their technical skills and qualifications.

Carbon Capture and Storage (New for 2009)
This new multi-disciplinary programme will provide high-level training in all aspects of carbon capture and storage, as well as an overview of global carbon management.

Designed for geosciences and engineering graduates seeking an advanced qualification for careers in the energy industry, specialisation is possible through choice of optional courses from a wide selection.

We’re Talking About the Future of Biotech.
You Should Have a Seat at the Table.

Heal, Fuel, Feed The World

From supporting cleaner and more efficient manufacturing to developing biofuels and discovering new sustainable materials, biotech innovations play a major role in solving the world’s biggest energy challenges. Yet current economic realities demand new investment models. Never before has effective partnering and licensing been so critical. Join us in Atlanta for the 2009 BIO International Convention. The BIO Business Forum will host more than 14,000 partnering meetings among 1,500 business development and financial professionals. More than 60 countries will be represented. Access the expert knowledge and resources you need to respond to today’s dynamic global economy, strengthen your business for tomorrow and help deliver on biotech’s promise to fuel the world.

Register and reserve housing online today.

Get the bug for bacteria
From detecting poisons to building microchips, the applications of bacteria are emerging as a front runner for biotech bucks, Julia Pierce finds out how tiny bugs are making a big impression

SOME can sprout wire-like appendages that conduct electricity, others protect against high doses of radiation, many can flavour food and some are even being used to create self-cleaning clothes. They are all types of bacteria - the next big thing in biotech and one of the most interesting trends to emerge in recent years.

Bacteria often get a bad press thanks to their ability to produce toxins and cause disease. But now that their potential in a variety of applications is increasingly being recognised, bacteria are proving their worth as a useful tool in a vast range of disciplines. Which means the market for bacteria-based technologies is on the up.

"Traditionally biotechnology has tended to focus on the healthcare sector, but it is now diversifying," says Tim Hart of ISIS Enterprise, part of the University of Oxford's technology transfer company ISIS Innovation. He points out that bacteria can be exploited in environmental and industrial settings, and even in biosensing. "The development of functional foods [claimed to have health benefits] and probiotics is also growing, and we are much closer to large-scale market uptake than we once were."

Take the example of Lactobacillus. Earlier this year, Jeremy Nicholson and colleagues at Imperial College London fed strains of Lactobacillus to mice whose gut microbes had been replaced by those that live in the human gut. The team found that Lactobacillus altered the content of bile acid, increasing the proportion of certain enzymes that reduce the amount of fat absorbed into the body. This suggests that adding this bacterium to food may one day have an impact on human obesity.

Given the potential for using bacteria across so many areas, it is no surprise that big business is keen to join forces with academia. Naturally, such ventures allow academics to gain experience of the commercial world and represent a chance to impress potential employers.

One organisation fostering such collaborations is the University of Manchester's new Centre for Excellence for Biocatalysis, Biotransformations and Biocatalytic Manufacture (CoEBio3). The centre is designed to provide a world-class scientific environment for research to create new biocatalyst-based processes to meet the changing needs of industry. "We are working closely with companies including AstraZeneca, Pfizer, BASF and Shell to develop ways to get bacteria to make certain chemicals," says Nicholas Turner, the centre's director. This "white biotechnology" is key to developing technology such as new fuel additives, he says. One of the biggest growth areas is biofuels, using bacteria to convert biomass to high-value bioethanol or biodiesel on a large scale. "However, our remit also covers cosmetics, flavour and fragrance," says Turner.

Researchers wishing to stay within academia can access several streams of funding, particularly from the Biotechnology and Biosciences Research Council (BBSRC). "Those interested in this area have access to a number of fellowships across our remit," says Avril Ferris, the BBSRC's policy implementation manager. This includes David Phillips fellowships, which offer five years' support for independent research with the aim of securing a permanent academic position at the end.

As part of its activities, the BBSRC has also set up the Bioprocessing Research Industry Club (BRIC). A £14 million, five-year partnership between the BBSRC, the Engineering and Physical Science Research Council and a consortium of leading companies such as GlaxoSmithKline and Pall Life Sciences, it aims to fund innovative biotechnology-related research across several universities.

Meanwhile, those looking for a position in a commercial organisation may find that gaining industry-specific training will open many doors. "There's a perception that not enough people are skilled in this area of biotechnology," says Turner. "We can help with training so they are ready to take jobs in the sector."

For those considering striking out on their own, taking part in a programme such as the UK-wide Biotechnology Young Entrepreneurs Scheme (Biotechnology YES) can help. On this particular scheme, participants hear from leading figures about all aspects of technology transfer and commercialisation. They then enter a competition to create an imaginary biotech start-up and present their ideas to a panel of judges. Previous winners include Martin Wickham, a research fellow
at the Institute of Food Research in Norwich, who is trying to turn his YES idea - a probiotic spray to prevent MRSA infection - into a pioneering new company, and Tim Hart, founder of Cybersense Biosystems (see case study).

Despite a bleak outlook for many sectors of biotechnology, there seems to be a consensus that people with certain skills in this field will be in high demand. "There is a lot of interest in synthetic biology - engineering bacteria to carry out interesting tasks such as producing drugs," says Jeff Errington, director of Newcastle University's Institute for Cell and Molecular Biology, which was formed in 2004 with the aim of studying a wide range of model organisms, including bacteria and protozoa, in order to advance our understanding of fundamental cell science. "In the past few decades, however, people have moved out of bioengineering to work on things such as pathogenic bacteria," he says. "That means there is huge potential for people coming into this area.'

From the creation of biofuels to cleaning up toxic waste, micro-organisms are now being studied and manipulated with a view to solving many problems in a cleaner, low-cost manner. Whether as part of a university, business or new research-based venture, opportunities for those interested in working in this area should not be hard to find.

Julia Pierce is a London-based freelance writer

Case Study: Making a killing with bacteria

Tim Hart’s interest in commercialising biotechnology began after he took part in the Biotechnology Young Entrepreneurs Scheme competition in 1997. He later took to market the idea for the company he conceived as his competition entry. "While I was doing my postdoc I got engaged in courses on topics such as commercialising science - it really lit a fire in me;" he says. He now juggles two jobs: he is a project manager for the University of Oxford's technology transfer subsidiary ISIS Innovation, as well as managing director of one of its break-out firms, Zyoxel, which develops simple microbioreactors, devices that enable cost-effective 3D cell culture. "Only a few people are insane enough to be entrepreneurs," he says. "I was 28 when I spun out my first company." That company was Cybersense Biosystems, which produces a portable system using bioluminescent bacteria to detect contaminated land and measure toxicity levels.

Having seen the product to market, Hart sold Cybersense. "If you really work hard at it, you soon reap the rewards. I’m not a millionaire yet but I’m doing okay," he says, adding that the time is perfect for those wishing to follow his path. "The current economic climate is disruptive - which makes this a wonderful time to be an entrepreneur," he says. "The rules change when the economy is unsettled and though getting investment may be tougher, customers are more receptive to new ideas."

U.BEL HAEUSER/SCIENCEFOTO/GTY

"The economic climate is disruptive - which makes this a wonderful time to be an entrepreneur"

WHAT’S HOT

Micro-slaves

Even the smallest robots built so far are too big to be able to imprint nanoscale patterns onto microchips. But if Jan Liphardt at the University of California, Berkeley, and colleagues have the right idea, it may be possible to create "slave" bacteria to do the job instead. The idea is to create stripped-down bacteria with enough of a genome to perform certain tasks - for example, swimming along a chemical trail using their flagella, secreting certain chemicals as they go. Thousands of these "biobots" could carve out tiny features on microprocessors to improve their performance.

An unusual protector

A life-saving drug is the last thing you’d expect to come from salmonella, but researchers at the Roswell Park Cancer Institute in Buffalo, New York, have found that this bacterium can protect against radiation. People die from radiation sickness because radiation kills cells lining the gut and in bone marrow. The flagella of a benign salmonella species can protect against cell death by activating an immune-signalling chemical called NF-kappa-B. Doses of flagellar protein could one day protect patients undergoing radiotherapy and rescuers entering a radiation-contaminated area.
The sweet smell of bacteria
Readers of a sensitive nature may want to look away now: bacteria can be used to eat away smelly armpit sweat. Eventually, the garments in your wardrobe may contain harmless strains of E. coli designed to feed on sweat and the proteins that cause body odour. Such "living fabric" could lead to self-cleaning clothes. Other bacteria might be used in fabric to secrete protective coatings that would extend the life of clothing, or to produce antiseptic for bandages.
Helen Thomson
[2702-005 (2009) : 46-47]
“I can create, I can innovate, I can try things. Right from the beginning, I've had the freedom to come up with new ideas, have them listened to, something from scratch and run with it.”

TECHNOLOGY TRANSFER at the Wellcome Trust invites academic researchers and companies to apply for translational funding

TRANSLATION AWARDS
These are available for applied R&D projects that address an unmet need in healthcare, offer a potential new solution and have a realistic expectation that the innovation will be developed further by the market.

The spectrum of technologies funded includes: diagnostics, enabling technology, regenerative medicine, therapeutics, vaccines and medical devices. Deadline for preliminary applications: 15 May 2009

www.wellcome.ac.uk/techtransfer/newscientist

SEEDING DRUG DISCOVERY
This £91 million initiative facilitates early-stage small-molecule drug discovery in areas of unmet medical need. The awards help applicants with a potential drug target or new chemistry to embark on compound discovery and/or lead optimisation.

Previous awards have been made for projects tackling obesity, MRSA, Gram-negative bacteria, cancer and Alzheimer's disease.

Deadline for preliminary applications: 22 May 2009

Nycomed is one of the biggest pharmaceutical companies in Germany, where we employ approximately 3,000 people in all. Located in 50 countries worldwide, our 12,000 colleagues make an important contribution to improving medical care and the quality of life for people all over the world. Our products range from highly innovative drugs and inexpensive generics to over-the-counter products for self-medication. Our innovations originate either out of our own research or through cooperation with external partners. The German market is very important for Nycomed. At the same time, a major share of our research and production takes place here. Germany thereby plays a central role for the overall company. Flat hierarchical structures and streamlined decision-making channels open up outstanding development opportunities for motivated and successful employees.

Within the department Exploratory PK in Konstanz, we are currently seeking a **Senior Pharmacokineticist**, Lab Head f/m

**Code 20183568**

Nycomed GmbH
Human Resources Germany Byk-Gulden-Str. 2
78467 Konstanz, Germany
Tel. + +49 (0)75 31/84-54 06 - Sonja Sauter
www.nycomed.de/de/Menu/Karriere

**Main tasks**
- As a Ph.D. or Masters or other related degrees with more than 5 years in industry experience in pharmacokinetic you will work in the field of lead structure optimization and selection of preclinical development candidates
- You will head a Laboratory in vivo PK team, serve as a preclinical PK expert and represent the DMPK in interdisciplinary project groups

**Qualifications**
- Practical experience in execution of in vivo PK studies (study design, staff instruction, automated laboratory processes (LIMS), data analysis and interpretation, quality control (QMS)
- Sound knowledge of PK modeling software and database such as WinNonlin and PKS doing compartmental analysis and modelling
- Experience in writing regulatory documents in a document management system such as NovaManage or Mandarin
- Experience in interaction with contract research organizations and external partners
- Strong understanding of in vitro PK topics like liberation, permeation, free fraction, drug transport, metabolic clearance
- Good knowledge on transformation of in vitro PK information into in vivo PK profiles using physiology based modeling software like Symcyp, GastroPlus or PK-Sim to support in vivo study design and formulation development.
- Experience in the development of mechanistic PK/PD models like direct and indirect response model, biodistribution model, transduction model or tolerance and rebound model to characterize the relation of drug concentration and the effect and to give guidance for early drug development decisions
- Strong understanding of discovery processes and drugability aspects of new entities as well as of translational drug development and effective knowledge integration
- Good team playing and communication skills, excellent command of English language (spoken and written) and good IT skills and know how of standard software like Microsoft Office, Sigma Plot, Spotfire, MS Project, Visio etc.

We offer a challenging position in a professional environment with a very good team spirit. You will have good opportunities to develop your professional as well as personal competencies via on-the-job and off-the-job training. We will inform you in detail of the related responsibilities, our contractual arrangements and attractive benefits (support in obtaining accommodation, reimbursement of removal costs, a competitive salary and a company pension scheme).

Are you interested? Please apply per email to: sonja.sauter@nycomed.com, code 20183568. Please let us know your salary expectations and earliest entry date.

The Biotechnology and Biological Sciences Research Council is the UK's leading funding agency for academic research and training in the non-clinical life sciences. The diverse, ground-breaking projects we finance frequently lead to world-leading advances in drug design and help generate improvements in high profile areas such as animal health and the biological processes used in industrial manufacturing.

Assistant Data and Policy Analyst
Part-time, 22.5 hours per week Swindon

The Biotechnology and Biological Sciences Research Council (BBSRC) is responsible for over £420M of bioscience funding every year, driving bioscience research and post-graduate training in UK universities and institutes to underpin agriculture, food, healthcare and other related sectors.

You will work in a small team within BBSRC Corporate Policy and Strategy. In response to requests for scientific information from Government, academics, industrialists, media, BBSRC colleagues and other research funders, you will carry out analyses of the BBSRC research information database and interpret the results. You will also help to create other information resources based on this data - vital to decision making for staff, directors and stakeholders alike. Other activities include providing input to policy analyses, assisting in the management of annual project returns from BBSRC-sponsored Institutes and inputting to the provision of data for other research databases.

You must have strong data analysis skills and be familiar with spreadsheet and database software - preferably Excel and Access. Accuracy and attention to detail are crucial, as are excellent communication, teamwork and interpersonal skills. A degree in a biological or related subject is desirable.

This is a great opportunity to contribute to the varied and exciting work supported by the Council. In return for your experience and commitment BBSRC offers excellent benefits and unrivalled career development and training opportunities.

The Scientific Committee on Antarctic Research (SCAR) seeks an Executive Director to manage the Secretariat, oversee SCAR affairs and finances and generate new income. As part of the International Council for Science (ICSU), SCAR facilitates and coordinates Antarctic research and brings key scientific issues to the attention of policy makers (for details see http://www.scar.org). The Executive Director aids the Board of Directors (EXCOM) in developing and implementing the vision for SCAR, and oversees the development and implementation of all of SCAR’s activities. The Secretariat is based in the Scott Polar Research Institute, Cambridge, England. This is a permanent full-time appointment, with a 6 months probationary period. Salary is negotiable dependent on experience. The successful candidate is expected to assume the post by 1 January 2010.

Candidates should have a Ph.D. degree (or equivalent work experience) in a scientific discipline relevant to research in Antarctica or the Southern Ocean; an established track record as a scientist and/or as a manager of scientific activities; extensive experience in international scientific research and collaboration; and excellent communication and organizational skills. The job requires a high level of computer literacy and proficiency in English (competence in other languages is an advantage). Previous experience with registered charities would be useful. Applicants will be required to undertake significant overseas travel and must be able to do so. Send applications, detailing experience, including a full CV and the names of three referees by e-mail on or before 1 June 2009, to info@scar.org. Further particulars are available from the web site.
Science Communicator
Circa £20,500 Ref 01/03/09

We are seeking an enthusiastic and motivated individual to join a multidisciplinary team delivering a range of knowledge exchange activities aimed at different stakeholder groups and areas pertinent to the Moredun group, including: Scientists, Veterinarians, Farmers, Policy, Education and Public. This is a varied and challenging role with an excellent opportunity to become involved in many aspects of science communication.

You will have a degree or equivalent in biological science or agriculture and have excellent communication skills. Experience in science communication would be an advantage.

For application details please visit www.moredun.ac.uk/jobs or contact us on 0131 445 5111. Closing date: Friday 1 May 2009.

**Commercial R&D Specialists**  
Full time / consultancy  
c. £95,000 package

UK Trade & Investment is the Government organisation that helps overseas and UK based companies succeed on the world stage. UK Trade & Investment's R&D Programme aims to persuade some of the world's largest companies that the UK continues to represent the world's best location to undertake their R&D. Key to the success of this Programme is the expertise of a team of R&D Specialists - experts in technologies and industry areas.

We are now seeking high-calibre Commercial R&D Specialists in the fields of: Low Carbon and Sustainable Energy, IT Electronics and Communications ideally with knowledge of Homeland Security; and the Pharmaceuticals Sector ideally with knowledge of medical electronics.

The roles
Through wider client account teams the specialists will
• provide access to the full range of R&D resources in the UK on behalf of clients provide up-to-date information on the latest R&D policies, initiatives and opportunities  
• promote UK excellence in R&D  
• work closely with UK Trade & Investment and other Government staff in the UK and overseas

The candidates
• will have a proven track record in negotiating and winning R&D-based business and inward investment, along with experience of working overseas  
• are self-starters, with excellent organisational skills and freedom to travel extensively in the UK and overseas  
• highly credible and strong communicators, possibly with fluency in additional languages  
• hold a higher degree, along with experience in key areas of UK R&D

The rewards
Working from home on a fixed-term basis with one of the world's foremost international trade and investment organisations brings an excellent remuneration package. This includes pension, healthcare and business class international travel. Applications to work on a consultancy basis will be considered from strong candidates.

To apply
The R&D Programme is managed by Pera. To apply, send your CV to julie.cole@pera.com quoting ref. NS/RD/03 Closing date: 10 April 2009

For further information about UK Trade & Investment, please visit www.uktradeinvest.gov.uk

Your experience and expertise will ensure that the Scottish Environment Protection Agency (SEPA) continues to enhance and protect the environment.

**Specialist I (2 posts)**  
Radioactive Substances Unit (EPI National)  
Starting salary £38,244  
Ref: EP76364

You'll provide specialist advice and guidance to SEPA staff, local authorities, The Scottish Government and other external customers on the application, administration and enforcement of environmental legislation. This will involve carrying out and reporting on inspections, as well as investigating incidents and making recommendations for enforcement action. With an honours degree or equivalent in physical or natural sciences or engineering or a closely related discipline, you should have specialist knowledge in one or more areas relevant to radioactivity and dose assessment. You'll also need significant experience and knowledge of the Radioactive Substances Act 1993, HASS Regulations and Exemption Orders, and supporting EU Directives. Good influencing and advocacy skills are also essential.

**Scientist (Environmental Quality)**  
Based Aberdeen  
Starting salary £24,955  
Ref: E575828

You will undertake a wide range of environmental monitoring, assessment and reporting work. This will include the analysis and provision of environmental data, the production of pollution reduction programmes and the annual reporting of water quality classification data. You will also participate in regular reviews of our environmental monitoring programmes and will occasionally operate GIS-based modelling software to calculate loadings of nutrients to freshwater lochs.

This role calls for a degree (or equivalent) in a scientific discipline along with significant post-qualification experience. Ideally, you should have a general understanding of the Water Framework Directive and other EC directives relating to water quality. Experience of working with GIS (specifically ESRI ArcGIS) and Oracle database querying tools would also be an advantage.

Closing date: Thursday 16 April 2009.

Successful applicants will be asked to provide a Basic Disclosure Scotland Certificate. To find out more or to apply visit our website [www.sepa.org.uk/vacancies](http://www.sepa.org.uk/vacancies) or call 01786 452555

Eisai
hhc
human health care

EISAI LONDON RESEARCH LABORATORIES
Eisai London Research Laboratories Ltd. (ELL) is part of Eisai Co., Ltd., a major Japanese pharmaceutical company. Opened in 1992, ELL focuses on the development of innovative medicines for the treatment of neurodegenerative diseases.

An opportunity is now available for a highly motivated Research Operations Manager/Health & Safety Officer and Research Support Technician to support our expanding research group at brand new facilities in Hatfield, due to open in the Summer of 2009.

Research Operations Manager (H75/2009)
Reporting to the Director, Research Operations, you will assist in the setting up and on-going day-to-day running of the technical and scientific support services of the new laboratories currently under construction.

You will be expected to provide expertise in and be responsible for all areas of ELL's Health and Safety, not only in our scientific activities but also in other aspects of general ELL H&S. In addition, implementation of existing ELL H&S policies and liaison with support staff at ELL's laboratories based on the campus of University College London are key aspects of the role.

Working closely with scientists across a number of disciplines and other operations and technical staff, you will manage a small number of research support staff providing core services to assist the research activities being undertaken in the new laboratories, which forms part of a new large multi-function campus. You will also need to liaise with contractors and other service providers working on the site, particularly for facilities management.

The ideal candidate will be highly motivated and pro-active with a track record of managing hands-on, day-to-day research support/technical services of the facility. Excellent interpersonal and communications skills is essential, as is the ability to work in a multi-disciplinary team. Education to degree level or equivalent is desirable. You should have as a minimum the NEBOSH General Certificate. Knowledge of research operations SOP's, H&S legislation and COSHH is essential.

Research Operations Technician (H76/2009)
Reporting to the Research Operations Manager and working as part of a small team, you will provide day-to-day support for our laboratory based scientific/research staff in a multidisciplinary role.

Laboratory support tasks will include monitoring/provision of glassware, solvents, piped gases and liquid nitrogen. Waste disposal (including hazardous/clinical waste) from the laboratories to the appropriate treatment areas will also be part of the support function. You will be familiar with glass washing and sterilisation equipment and their use.

Purchasing will form a part of your responsibilities, ordering and maintaining stocks of laboratory supplies being an important aspect of the role. This responsibility will be closely linked to maintenance of the stores facility, both for bulk chemicals, solvents and laboratory glassware. Ensuring that supply meets demand will require a methodical approach to receiving, booking-in and distribution of deliveries from external suppliers.

General portering duties, both within the building and also elsewhere on site, will be required from time-to-time.
The ideal candidate should be able to demonstrate a flexible can-do attitude and should preferably have experience in a similar role. Competent interpersonal and communications skills is essential, as is the ability to work in a multidisciplinary team.

To apply, please send your curriculum vitae, a covering letter and details of two professional referees to: Recruitment H75/2009 or H76/2009, Eisai London Research Laboratories Limited, Bernard Katz Building, College London, Gower Street, London, WC1E 6BT or by email to ELL Recruitment@eisai.net.

The deadline for receipt of applications is 20 April 2009.
For more information about our company, please visit www.eisai.co.uk

Global Value Chain Specialist
Life Sciences (Healthcare, India) c £90,000 p.a. (pro rata)

An opportunity has arisen for an exceptional individual to join the UK Trade & Investment (UKTI) Sector Champions Team. The successful candidate will have an in-depth sector knowledge and will be passionate about the UK’s world-class life science industry, promoting the hugely impressive track record of innovation and commercial development. A particular ability to support internationalisation through emerging global value chain opportunities in India is essential.

The role:
• Provide knowledge and experience in the bio-pharmaceutical, medical technology and healthcare fields to supplement existing expertise within UKTI, the Department of Health, the Department for Business Enterprise and Regulatory Reform (BERR) and UK regions;
• Assist at least 100 UK companies in identifying and developing opportunities where they have a global comparative advantage;
• Gather market demand intelligence from overseas markets in support of international trade development;
• Work directly with UK companies to identify relevant global supply and customer networks, focussing particularly on relations with India;
• Liaise with UKTI colleagues in British diplomatic posts to define tailored trade developments strategies;
• Support UKTI activities aimed at the implementation of the UK Life Science marketing strategy

The candidate:
• Highly credible, strong communicator at all levels;
• A networker, capable of building excellent working relationships with industry, government and stakeholders both domestically and overseas;
• A strategic thinker, with the ability to link trade development and inward investment opportunities to UK Government strategy;
• Graduate in a relevant field, independent self-starter with several years’ experience in export sales and distribution networks;
• Excellent organisational skills, fully self-sufficient and able to work from home;
• Enthusiastic, driven and committed;
• Flexible, as the role will require UK and overseas travel.

The contract is based on a 3-day per week fixed term, will primarily be home-based within the UK, with occasional client meetings in Cambridge and London. For further information about UKTI please visit www.tradeinvest.gov.uk. The UKTI Sector Champions programme is managed by Pera.

To apply, please request an application form from Sally Fryer, e-mail: sally.fryer@pera.com, tel: 01664 501501 quoting ref NS0309 Closing date: 20 April 2009

POLICY AND RESEARCH OPPORTUNITIES

c. £35,000 p.a. depending on experience plus excellent benefits

wellcome trust

The Wellcome Trust is the largest charity in the UK. It funds innovative biomedical research, in the UK and internationally, with the aim of improving human and animal health. The Trust has two vacancies within its Strategic Planning and Policy Unit - an Evaluation Adviser and a Policy Adviser. The Unit leads on strategic planning and provides research, evaluation, analysis, policy development and advocacy to help ensure that the Trust can achieve its mission in the most effective way.

EVALUATION ADVISER
You will play a lead role in portfolio evaluation at the Trust, ensuring high quality and timely analysis of specific areas of the Trust’s work and funding schemes. Educated to degree level in a relevant discipline, you will be able to demonstrate:
• significant experience of conducting science and/or research evaluation;
• good knowledge and experience of qualitative and quantitative social research methods.

POLICY ADVISER
You will lead a range of policy activities focussing particularly on support for the UK research base, higher education, technology transfer and innovation. Educated to degree level in a relevant discipline, you will be able to demonstrate:
• significant experience in policy development and advocacy;
• good knowledge and understanding of the research and innovation processes.

For both positions we are seeking experienced project managers with excellent analytical and communication skills and you will be enthusiastic team players with a track record of working proactively.

For more information and to apply online visit: [www.wellcome.ac.uk/jobs](http://www.wellcome.ac.uk/jobs)

Alternatively send a CV and covering letter explaining how you meet the criteria for these posts to: HR, Wellcome Trust, 215 Euston Road, London NW1 2BE.
Application deadline: 24 April 2009
Interviews: w/c 11 May 2009

THE WELLCOME TRUST IS COMMITTED TO BEING AN EQUAL OPPORTUNITIES EMPLOYER. THE WELLCOME TRUST IS A CHARITY REGISTERED IN ENGLAND, NO. 210183 [2702-024 (2009) : 57]
The Health Protection Agency: Protecting the nation's health.

Health Protection Agency
Regional Microbiology Network

The Health Protection Agency (HPA) is an independent body that protects the health and well-being of everyone in England and Wales. The Agency plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. We also prepare for new and emerging threats, such as a bio-terrorist attack or a virulent new strain of disease.

The Food, Water and Environmental (FW&E) laboratories provide specialist microbiology services that are essential to support Local Authorities and the Food Standards Agency in carrying out relevant statutory functions.

The FW&E Network is entering a period of enormous change and has recently been reconfigured in order to improve service delivery. We are seeking a number of dynamic individuals capable of leading the Network forward and inspiring those around them to achieve the overall vision of the organisation. The posts available are:

**Head of Unit** • £53,256 - £65,657
Three separate posts based in Birmingham, Bristol and Newcastle
These posts are crucial in ensuring the strategic delivery of FW&E services within the region and maintaining alignment with national objectives for the Network. You will be responsible for the overall service, strategic and wider public health delivery of regional FW&E laboratory services. You will have a postgraduate qualification to Ph.D. level with a major component of public health, medical microbiology, food and water or environmental microbiology and be able to demonstrate management experience from within either an FW&E or clinical laboratory.

Ref: 919-RMN-MM-5541760 (Bristol)
Ref: 919-RMN-MM-5541761 (Newcastle)
Ref: 919-RMN-MM-5541759 (Birmingham)

**National Quality Manager** • £37,996 - £45,596
Location to be agreed
You will take a national lead for the co-ordination and support of all staff within the Food, Water and Environmental Microbiology Network's 12 laboratory sites and achieve a consistent culture of continuous quality improvement for all aspects of the work, this will include maintenance of ISO 17025 accreditation (assessed by UKAS). You will liaise with the FW&E Quality Support Team, including Quality Managers throughout the Network, manage the quality budget for the FW&E Network and provide support and advice to staff throughout the Network on quality issues to improvements. You will hold a first degree in microbiology, biology or science degree equivalent and have extensive diagnostic laboratory experience within an accredited laboratory or quality environment. As this is a National role you must be willing to travel to other sites across the HPA Network.

Ref: 919-RMN-MM-5541759 (Birmingham)

**Laboratory Manager** • £37,996 - £45,596
Two separate posts based in Bristol and Newcastle
These posts are responsible for managing the provision of Food, Water and Environmental services for the Region, ensuring that the laboratory delivers an efficient and cost effective service to its customers. You will manage and support all laboratory staff and ensure that appropriate training and development is offered in order to maintain service delivery, as well as manage the laboratory budget.
Educated in Biological Sciences to postgraduate level, you will also hold a management qualification or have significant management experience and it is essential that you have extensive financial and commercial management skills.

Ref: 919-RMN-MM-5541757 (Newcastle)
Ref: 919-RMN-MM-5109790 (Bristol)

**Out-posted Scientist • £37,996 - £45,596**

East Midlands Region

This post will support the wider co-ordination and delivery of FW&E microbiology laboratory services to partners in public health delivery in the East Midlands. You will liaise with all local partners in health protection both within and outside the HPA and have an active role in assisting and providing advice in all aspects of provision of FW&E services (including training) both within and outside of the FW&E Laboratories serving the Region. You will have a postgraduate qualification equivalent to MSc with a major component of public health, medical microbiology, food, water or environmental microbiology and be eligible to be a Food Examiner. It is essential that you have experience in the investigation of infections transmitted through food, water or the environment as well as experience of data collection and analysis including that for surveillance of infection and disease.

Ref: 919-RMN-MM-5544411

For further information, please contact Jim McLauchlin on 020 7759 2767 or jim.mclauchlin@hpa.org.uk Please quote relevant reference number. To find out more and apply visit our website: www.hpa.org.uk/careers

Closing date for all posts: 16th April 2009.

The Health Protection Agency promotes diversity in the workplace and is an equal opportunities employer. If you require this document in large print, please email: hpa@tmpw.co.uk

Environment Agency
The challenges run deep.

**Technical Specialist (Groundwater)**
Anglian Region • £30,000 + benefits

We’re responsible for protecting and improving the environment across England and Wales. Currently, we’re taking forward the Anglian Groundwater Programme, a challenging programme of groundwater investigation and modelling which is crucial work for the Region. The programme involves carrying out investigations and setting up hydrological monitoring (particularly in relation to wetlands), together with regional groundwater model development. All of which enables us to assess the environmental impacts of abstraction and to appraise alternative options for water resources development. Now, we’re looking for a groundwater professional to help us progress even further.

You'll join our Technical Projects team, which is responsible for project initiation, project management and supporting the uptake of project outputs - including the interpretation of model output. Ideally you'll have an Earth Sciences or Water Resources degree (or equivalent), with a higher degree in Hydrology, Hydrogeology or Water Resources. What's more, you'll have an impressive track record in the field of groundwater resources assessment. Experience with project management and contract supervision would be an advantage. With that kind of background, you'll be able to understand and assess complex groundwater environments. Ideally, you'll also have knowledge of water resources legislation. But, of course, as a senior project manager it's just as important that you're a highly credible and effective leader, being able to motivate a team of consultants and to work successfully with internal and external stakeholders.

For more information, and to apply, please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs) Alternatively, please call 0845 601 2233 or email anglian.recruitment@environment-agency.gov.uk quoting reference IRC41436 for an application pack. If you are a disabled applicant meeting the minimum criteria, we will guarantee you an interview. Closing date: 17 April 2009.

We are committed to making our organisation as diverse as the environment
ASSISTANT EDITOR – Biomedical Publishing

Future Medicine is at the forefront of biomedical publishing, with a portfolio of journals covering a wide range of therapeutic areas

As part of the continued expansion of our titles, a position has arisen in our North London office for an Assistant Editor within our dynamic Editorial team. The ideal candidate will be a motivated and enthusiastic life science graduate keen to establish a career in biomedical publishing.

This varied role will allow you to experience all aspects of the Editorial process, specifically:
• The opportunity to work with the latest information in modern medicine across a range of successful titles
• Responsibility for ensuring the quality and consistency of the journals
• Liaison with leading international researchers and clinicians
• Involvement in the creative direction and development of key titles

No previous editorial experience is necessary as full training will be provided, with objectives set to encourage career progression. Future Medicine is the ideal place to begin and develop your career in publishing.

Closing Date: 20\textsuperscript{th} April 2009

Please submit a CV with cover letter explaining your interest in the position and salary expectations to: k.rowland@futuremedicine.com

NHS
Blood and Transplant

Research Assistant
• £24,103 - £32,653 per annum with pay award pending plus High Cost Area Supplement
• Colindale
• Fixed-term for one year • Ref: 918-C1991

Our work is vitally important to the NHS. We ensure that 8,000 units of blood are collected and made ready for use every day. We hold 9 days of blood stocks and provide a constant supply to hospitals. Our work also enables 5,500 organ and cornea transplants every year. Alongside this we manage the nation's Organ Donor Register of nearly 13 million names and the British Bone Marrow Registry. We retrieve and store other tissues, like skin and bone, ready for use in life-saving and life-improving situations, as well as manufacture and provide plasma products such as clotting factors.

A vacancy has arisen for a suitably experienced Molecular Scientist with sound molecular biology theoretical knowledge, practical skills and experience, to join the National Transfusion Microbiology Laboratories as part of a small team performing research and development.

We are looking for a motivated individual with an in-depth understanding of molecular biology to assist in a number of studies investigating various aspects of transfusion transmitted infections. These are new projects and will be carried out in collaboration with the Health Protection Agency.

You should have an honours degree in a relevant biological subject e.g. Biology, Microbiology, Virology and must have sound molecular knowledge and experience including real-time amplification techniques and sequencing. You should also have experience with sequence analysis databases including using BLAST and FASTA and the use of alignment packages such as CLUSTAL.

The post is a one year fixed-term position working 37.5 hours per week and banded at 6 under Agenda for Change. You will be appointed on the scale in accordance with NHS Blood and Transplant and NHS AfC policy.

The post will be based at both NHS Blood and Transplant and the Health Protection Agency, both of which are within close proximity to Colindale tube station.

Closing date: 9 April 2009.

Informal enquiries should be made by e-mail to Kate Tettmar (kate.tettmar@nhsbt.nhs.uk).

Protecting the environment through scientific excellence

The everyday use of chemicals brings many benefits to society but can also result in unwanted consequences for the environment.

SEPA aims to ensure that such chemicals of concern are identified and controlled through effective environmental monitoring, assessment and regulation.

We are seeking to appoint a professional scientist in our Environmental Chemistry Unit to strengthen our work in this field.

This post offers an excellent career opportunity to ambitious scientists wishing to join SEPA at this challenging and exciting time.

**Senior Environmental Chemist**  
Starting Salary £30,170  
East Kilbride Ref: E572273

As a member of a dynamic inter-disciplinary science team, you will provide expert advice on the behaviour, fate and effects of chemical substances in the environment with particular respect to informing front-line regulatory decisions. You will play a leading role in the assessment of contaminated land, waste and water environments and contribute to the delivery of a national chemicals advisory service and information network.

Relocation assistance may be available.

Closing date: Thursday 23 April 2009.  
Successful applicants will be asked to provide a Basic Disclosure Scotland Certificate.

To find out more or apply visit our website or call 01786 452555.

Moorfields Eye Hospital
NHS
NHS Foundation Trust

**Clinical Physiology Technician** (Visual Electrophysiology) Ref: D21208
(Band 5) £24,270 - £31,348 pa inc. 37.5 hours per week

Moorfields Eye Hospital NHS Foundation Trust is one of the world's largest centres for ophthalmic treatment, teaching and research. The organisation has an internationally recognised brand and has a reputation as a centre of excellence.

After a suitable period of training you will be involved in the diagnostic testing of the eyes and visual function of a wide range of patients using a variety of both electrophysiological and psychophysical techniques.

You should have science 'A' Levels, a science degree or other relevant qualification. Some experience in a laboratory or hospital environment, ability to use spreadsheet, database and word-processing packages would be desirable. You must have good communication skills, good manual dexterity, and an ability to work well with a wide range of patients and staff.

For an informal discussion of the post please telephone Mr Chris Hogg on 020 7566 2120. Applicants can view the job description and apply for this position online at [www.jobs.nhs.uk](http://www.jobs.nhs.uk) where you can download the job description and person specification.

POSITIVE ABOUT DISABLED PEOPLE

Working Towards Equality of Opportunity
[2702-034 (2009) : 63]
Exciting opportunities for enthusiastic scientists and engineers to help secure the future of the UK environment

• Do you care about the environment and want to see it protected and enhanced now, and for future generations?
• Do you want to be able to make a real difference to our world?
• Do you have a good degree-level qualification in a scientific or engineering subject?
• Have you thought about working for Defra?

The Department for Environment, Food and Rural Affairs (Defra) has a remit "to secure a healthy environment in which we and future generations can prosper". We care about the environment and want to see it protected and enhanced.

To deliver effectively, our policies must be underpinned by the best quality evidence - and we need excellent scientists and engineers to help us do this.

We are looking for a number of high-calibre scientists and engineers to help us achieve our aims. We have vacancies across a wide range of specialist interests - from climate change adaptation, through air, water and soil quality, to animal health and welfare. We also have vacancies in science policy, helping to direct the department's entire R&D portfolio. Why not visit our website and see for yourself the variety of posts available?

Most of the posts are based in central London, although you may need to be able to spend time with Defra stakeholders elsewhere in the UK.

Salary offered ranges:
Higher Scientific Officer - £29,191 to £34,326 (London); £25,991 to £30,496 (Bristol).
Senior Scientific Officer - £34,336 to £41,851 (London).

The above are pro rata for part-time posts.

Full job descriptions for the available posts are on Defra's website [http://www.defra.gov.uk/corporate/recruit/index.htm](http://www.defra.gov.uk/corporate/recruit/index.htm), from where application packs can be requested. Or to be sent a list of vacancies, job descriptions or application packs please email boardapplications@defra.gsi.gov.uk. For job descriptions and application packs please quote the appropriate RCRE code for the vacancy (or vacancies) in which you are interested. If you do not have access to email, please call 0845 603 72672.

The closing date for applications is 19 April 2009.

These appointments will be governed by the principle of public appointment based on merit with independent assessment and transparency of process. We would particularly welcome candidates from under-represented groups, for example women, people with disabilities and members from Black and Minority Ethnic communities.

Regulated by The Commissioner for Public Appointments

Diamond Light Source is a new synchrotron and a leading scientific facility of its type in the world. Located on the Harwell Science and Innovation Campus in South Oxfordshire, we host research facilities supporting cutting-edge research in all fields of science.

**Principal Beamline Scientist, Soft X-ray Microscopy Beamline 108** Ref: DIA0487/SB
Salary: Circa £45k, depending on previous experience and qualifications.

We are currently building a state-of-the-art Scanning X-ray Transmission Microscopy Beamline (STXM) using radiation in the energy range 250 to 3000 eV, with image resolution approaching -20 nm. Your role will see you encouraging users from new areas of science and planning future developments of the beamline to ensure it continues to meet scientific requirements.

You will be required to design, build and operate the beamline to tight cost, capability and timescale targets, plus developing the specification for the overall beamline layout and the detectors. In addition to a strong track record in synchrotron research and radiation science and an in depth knowledge of beamline design, we'll be impressed by your ability to solve problems quickly, engage others and develop your team.

**PDRA, Advanced Magnetic Dichroism Studies** DIA0508/SB
Salary: Circa £33k, depending on previous experience and qualifications.

The Magnetic Spectroscopy Group has a vacancy for a physicist to develop and explore state-of-the-art techniques for time resolved measurements and ferromagnetic resonance using x-ray magnetic dichroism as a detection technique.

We are committed to equality of opportunities for all and offer a competitive salary (dependent upon skills, qualifications and experience), comprehensive benefits, an index-linked pension scheme and flexible working hours.

For an application form and further information including work visa requirements please visit our website at www.diamond.ac.uk or telephone our recruitment line on 01235 778218 (answer phone) or write to us at the address below, quoting the appropriate reference number.

Closing dates: please see www.diamond.ac.uk for details.

**Nanotechnology Strategic Advisor**

Attractive terms

Research Councils UK
Nanoscience
Through Engineering to Application

At the Research Councils we know that small is beautiful. If you agree, we might have just the job for you. We are looking for a new strategic advisor to act as an advocate in the exciting field of nanoscience.

Each year the Research Councils invest around £2.8 billion in research, training and knowledge transfer covering the full spectrum of academic disciplines. The Research Council's Nanoscience programme is led by the Engineering and Physical Sciences Research Council (EPSRC) and will commit £39 million to the area over the period 2008/09 to 2010/11.

Nanoscience is a rapidly maturing field with the potential to revolutionise society. Harnessing the possibilities it creates could lead to environmental, healthcare and energy benefits, and major advances in materials, optics and computing. A key challenge for the programme will be to build on previous research and investment to bring together the elements in a coherent, directed way that assists taking basic research through to application.

Coming from a well established position in industry or academia you will have extensive knowledge of nano-related research and exploitation in the UK and worldwide. An excellent communicator, you will be able to shore your passion for nanoscience issues with a wide variety of audiences.

The position is offered through the EPSRC; on behalf of Research Councils UK, part-time for 3 years and could be on a secondment basis from your current employer.

Closing date: 23rd April 2009.

Candidates should be available for interviews during mid-May 2009 at the Research Council offices in Swindon.

To request further information and an application form, please contact Johanne.Bunce@epsrc.ac.uk or 01793 444406
For further information on the Research Councils UK and EPSRC, please see: www.rcuk.ac.uk and www.epsrc.ac.uk

**POSITIVE ABOUT DISABLED PEOPLE**

The Research Councils are an equal opportunities employer and seek to employ suitable people regardless of disability, age, sex, marital status, sexual orientation, race, colour, ethnic or national origin.

There is a guaranteed interview scheme for suitable candidates with disabilities.

Gene Therapy Advisory Committee  
DH  
Department of Health

Opportunities to help shape Government policy on cell and gene therapies

4 members - 2 Expert and 2 Lay

The Gene Therapy Advisory Committee (GTAC) is a Department of Health Ministerial advisory body and the UK national research ethics committee for clinical trials using gene therapy and stem cell therapies. The Committee has the responsibility for ethical assessments of proposals from doctors who wish to conduct research on human subjects. This summer we will appoint four new members.

We are looking for two expert members who have a proven track record in either paediatrics or cell therapy. The lay members should have a proven track record in patient advocacy, ethics, governance or the life sciences. Both expert and lay members should have the ability to consider complex issues around cell and gene therapies, ethics and clinical research.

The Committee meets five times a year for full-day meetings (10.00 - 17.00) in central London. Members may be asked to attend additional sub-group or other meetings, and be available to support GTAC operations throughout the year by phone and e-mail. Members will receive £149 for each meeting attended. Reasonable travelling expenses will be paid at Department of Health rates. All appointments will be for periods of three years.

If you would like to find out more about these posts, a candidate information pack is available from www.appointments.org.uk, or by ringing 0870 240 3802 quoting reference DH9017. Let us know if you would like a pack in large type, Braille or tape.

Further information about the Committee is available from: http://www.advisorybodies.doh.gov.uk/genetics/gtac/

Closing date: 16th April 2009. Interviews for candidates shortlisted will be held in London in mid May.

We value and promote diversity and are committed to equality of opportunity for all and appointments made on merit. We particularly want to hear from women and people from black and minority ethnic communities who are able to make a real contribution to this organisation.

Please note this is a public appointment, not employment.

See www.appointments.org.uk or www.sector1.net for more public appointments being filled by the Appointments Commission

This European masters programme brings together 3 internationally renowned Universities (Versailles, Bergen and Edinburgh) and world leading research institutes to train students in the area of climate change. Climate change is a result of the close interaction between human activities and the Earth system. Solutions and accurate predictions of climate change will evolve from a good understanding of both components. This masters programme is the first of its kind to bring together climate science and social science expertise within its staff.

The programme is designed for geoscience, physical and social science students seeking advanced qualifications for research and administrative careers in the area of climate change.

Senior Research Fellow/Senior Lecturer in Epidemiology
Reference: YPU072A

An experienced epidemiologist, you will join and help lead the Impact Research Group. This group is focussed on strengthening the evidence-base for improving maternal health in developing countries.

To be successful in this role, you should have a Ph.D., MD or equivalent in Epidemiology, Demography, Public Health or other numerate health-related discipline. In addition, you must have substantial experience in the design and conduct of epidemiological research relevant to maternal or reproductive health in developing or transitional countries. Experience of collaborative research partnerships, with national governments and international agencies, and proven leadership and organisational abilities, are further essential requirements.

This post will be offered for a period of five years.

Salary will be at the appropriate point on the Grade 8 salary scale (£44,930 - £52,086 per annum), with placement according to qualifications and experience.

The appointment will be as a Senior Research Fellow or a Senior Lecturer depending on your experience.

Should you require a visa to undertake paid employment in the UK, you will be required to fulfil the minimum points criteria to be granted a Certificate of Sponsorship and Tier 2 visa.

As appropriate, at the time an offer of appointment is made, you will be asked to demonstrate that you fulfil the criteria in respect of financial maintenance and competency in English. Please do not hesitate to contact Sacha Madennan, HR Adviser (tel: 01224 555754), for further information regarding the UKBA point based system.

Informal enquiries to Professor Wendy Graham (tel: +44 (0)1224 553924, e-mail w.graham@abdn.ac.uk) or Mr Alec Cumming (tel: +44 (0)1224 554477, e-mail: alec.cumming@abdn.ac.uk).

Closing date: 17 April 2009.

[2702-049 (2009) : 67]
THE JOHN GOLDMAN CENTRE FOR CELLULAR THERAPY

Senior Principal/Consultant Clinical Scientist
Band 8b/c £50,338 - £71,737 pa inc.
Ref. 290-CIS-P-28

Senior Clinical Scientist
Band 7 £35,869 - £45,353 pa inc.
Ref. 290-CIS-P-27

Cellular therapy is becoming an increasingly important part of mainstream medicine. In collaboration with Imperial College Faculty of Medicine we are now expanding our translational research capacity aimed at developing and introducing new cytotherapies into clinical practice. This newly built centre is well equipped and only one of a few in the UK to hold full accreditation (JACIE and HTA) and authorisation for the manufacture of Investigational Medicinal Products (IMPs).

We require two enthusiastic scientists to enable our expansion into clinical trials; both posts are initially funded for two years with the possibility of renewal.

The growing role of stem cells.

The Senior Principal /Consultant will take the lead role and should hold a relevant Ph.D, have experience of cellular therapy in a clinical environment and specific knowledge of Good Manufacturing Practice, immunoselection technology, cell culture, flow cytometry and in vitro functional assays. An understanding of clinical trials regulation would be an advantage.

The Senior Clinical Scientist should also hold a relevant higher degree and ideally be experienced in cellular therapy production, cell culture and associated quality assurance procedures.

For further information about the posts, or to arrange an informal visit to the laboratory, contact John Davis, Centre Director on 020 8383 2056, or e-mail john.davis@imperial.nhs.uk

You can apply online at www.jobs.nhs.uk using the appropriate reference number. To learn more about the trust, you can visit www.imperial.nhs.uk

We are the UK’s first Academic Health Science Centre delivering breakthroughs in medical research directly to its patients.

The closing date for applications is Friday 17th April.

KING’S College LONDON  
Ph.D. Studentship: Role of salivary films in assessing the quality of foods  
4 year BBSRC CASE studentship with secondments to Unilever (Colworth)  
Salary: £15,100 p.a.  
Supervisor: Dr Guy H Carpenter  
Co-sponsor, Unilever

Project description:  
This project focuses on the physiology of assessing food quality through the interactions with saliva which exists as a film within the mouth. The composition and rheology of the salivary film will be investigated before, during and after interaction with various food components. How food interacts with this salivary film is basic research that is poorly understood and yet is central to our understanding of how we perceive food. The successful student will be based at King’s College London but will also have the opportunity to develop new skills and techniques whilst on secondment to Unilever (Colworth).

Person Specification  
Applicants should hold or expect to obtain a first-class or upper second-class Honours degree in a relevant discipline.

Value of the Award and Eligibility  
Due to funding criteria, this award is only available to UK and EU applicants. The award for UK students covers fees and a stipend. Candidates must have been permanently resident in the UK since April 2006 for educational or employment reasons.

Closing date for applications (CV plus covering letter) will be April 24th 2009. Please send applications to Dr Guy Carpenter (guy.carpenter@kcl.ac.uk), Salivary Research Group, Floor 17, Tower Wing; King’s College London Dental Institute. SE1 9RT. Tel no. 0207 188 7460

[2702-051 (2009) : 68]
Post-doctoral Research Associate: Crystal engineering and organic solid state chemistry
Department of Chemistry
£27,183 - £35,469 pa

The funds for this post are available for two years in the first instance.

Applications are invited for a post-doctoral research associate to work with Professor Bill Jones in association with the Pfizer Institute of Pharmaceutical Materials Science (http://www.msm.cam.ac.uk/pfizer/index.html).

The project will be in the area of crystal engineering and cocrystal formation, focussing on developing strategies, principally using experimental approaches, for the selection of cocrystal formers in the design of pharmaceutical cocrystals.

Experience and knowledge in the areas of crystal engineering and organic solid state chemistry is essential.

The post is available immediately. Applications should include a CV, publications list, contact details for three professional referees, and a completed form PD18 Parts I and III (downloadable from http://www.admin.cam.ac.uk/offices/hr/forms/pd18/). Candidates must provide a covering letter detailing precisely their research experience to date in the area of crystal engineering and organic solid state chemistry.

Applications should be sent to Professor Bill Jones, Department of Chemistry, Lensfield Road, Cambridge CB2 1EW (email: wj10@cam.ac.uk).

Further details can be obtained from Professor Jones.

The University is committed to Equality of Opportunity.

[2702-052 (2009) : 68]
City of Westminster College is at an exciting stage of its development. With a thriving student population, a strong and growing business portfolio and a new build in progress, we are poised to become the first choice College in London for students and staff. Located in the heart of London, City of Westminster College provides a wide range of qualifications at Further and Higher Education levels. The College is committed to offering the best possible education and training opportunities for staff and students to enable them to achieve their personal and professional goals.

The City of Westminster College is one of the largest providers of training in the UK for the NHS in the field of Clinical Physiology, with an intake of about 100 students per year. We have over 30 years' experience in the delivery of high quality courses in this professional area, and are justly proud of our national reputation in this regard. We are seeking a suitably qualified person to join our existing team of clinical specialists contributing to the high quality of provision in our Foundation Degrees, BSc and MSc in Clinical Physiology which are validated by Middlesex University.

To be successful in this role, you should be an enthusiastic specialist in Technical Cardiology, ready to make a valued and significant contribution to the organisation, teaching and assessment of the curriculum within the School of Medical Technology. In addition to a relevant degree, you will have substantial post-qualification professional experience working in the field of Technical Cardiology. What's more, you will also have developed the qualities required to earn you the respect of other members of your profession. You will have developed sound organisational, interpersonal and presentation skills, and hold a keen and genuine interest in student training, education, assessment and welfare. Your experience and knowledge in cardiology-related topics will be essential, and experience in pacing and echocardiography an advantage.

You will either have a recognised Level 4 teaching qualification (PGCE, CertEd) or display a willingness to work towards a Diploma Level 5 teaching qualification (supported by CPD) upon appointment.

This position attracts a clinical experience supplement to bring the salary to a level comparable to NHS posts.

Ref: LTC

In return, we can offer benefits which include generous annual leave, a contributory final salary pension scheme, access to our subsidised gym, interest free season ticket loan, support with ‘Golden Hello’ and ‘Key Worker Housing Initiative’ applications, enhanced maternity and paternity leave schemes and many other benefits.

If you're ready to join a College that has the mission and passion to develop the talents of both students and staff, email us now on recruitment@cw.ac.uk or call us on 020 7258 2938 (24 hour voicemail) for an information pack and application form, quoting the relevant job reference.

Postdoctoral Scientist
£28,839 p.a. Ref: MHS/90443

Located both on the University of Manchester main campus and at University facilities at Salford Royal Foundation (Hope) Hospital, this is an exciting opportunity to develop the highest quality international research in cancer epidemiology. You will be working as part of an established team in Dermatological Sciences and have close affiliation to the Cancer Studies Research Group. You will be involved in ongoing nutritional photoprotection research and will contribute to the leadership and development of new projects relating to cancer including childhood cancers. This position may include some travel to Australia.

You will need a Ph.D. in a relevant discipline, i.e. epidemiology or biostatistics, and expertise in working with large, health-related datasets. You will be responsible for working with key senior scientists and clinicians to design and execute projects in several areas, overseeing the compilation of databases and conducting statistical analyses using standard software packages, and supervising Ph.D. students. You will ideally be an epidemiologist with some knowledge of cancer and its biology.

Informal enquiries can be made to Professor Adele Green, email: adele.green@qimr.edu.au or Professor Lesley Rhodes, Tel: +44(0)161 206 1150, email: lesley.e.rhodes@manchester.ac.uk

Application forms and further particulars are available at www.manchester.ac.uk/jobs or from Mrs Vivien Robinson, Tel: +44 (0) 161 206 1152, email: vivien.robinson@manchester.ac.uk

Closing date: 17 April 2009.
Interviews will take place on the 27 or 28 April 2009.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

[2702-054 (2009) : 69]
west cheshire college

Programme Leader - Applied Science
£24,181 - £34,055

Are you a scientist with outstanding practical skills and experience of working in a professional laboratory environment? If so there could be an exciting opportunity to play a major role in the establishment of a new vocational curriculum area to be located in the College's new Science and Technology Campus in Chester. You would contribute to the development of the Applied / Vocational Science curriculum including the new Forensic Science provision and existing programmes for Pharmacy Technicians and Dental Nursing.

Ideally you will have a degree, HND or equivalent in Science and a teaching qualification.

Closing date Friday 3rd April 2009

Please send a CV and letter of application to hr@west-cheshire.ac.uk or HR & Development Team, Capenhurst Campus, Capenhurst, Chester CH1 6ER, quoting ref: A628. Please see www.west-cheshire.ac.uk for further information.

[2702-055 (2009) : 69]
The BHF 4 year Graduate Programme at Oxford is aimed at basic science graduates who want to undertake advanced research in cardiovascular science.

The first year of graduate study will be undertaken in at least two different laboratories in one of the research themes listed below. Students will also be required to undertake taught coursework in medical sciences within the University of Oxford.

Applications are invited from undergraduates with a strong academic record (expected 2:1 minimum or equivalent) and a strong commitment to undertaking biomedical research. Applicants must comply with BHF residency requirements i.e. should normally be a national of the EEA. Applicants whose first language is not English are required to achieve a satisfactory standard of English in one of the approved languages tests (IELTS, TOEFL) prior to admission.

Research themes
• Cardiac development, cardiac imaging and stem cells
• Cardiovascular epidemiology, genetics and gene transfer
• Cardiovascular signaling, vascular inflammation and pharmacology
• Integrated Physiology and systems biology
• Myocardial biology and myocardial disease

Further information regarding research themes and supervisors, together with application details and residency requirements, is available on: http://www.cardioscience.ox.ac.uk/graduate-studies/bhf-4-year-graduate-programme.

Informal enquiries can be made to Dr. David R. Greaves by email: david.greaves@path.ox.ac.uk.

Application letters, with full CV and details of two academic referees, together with your choice of one research theme or two potential supervisors, are to be emailed to bhf4yearstudentships@path.ox.ac.uk by Friday 1 May 2009 (you do not apply through the Oxford on-line application system at this stage). Interviews will be in mid May 2009.

The BHF award funds University and College fees and in addition the studentship stipend is currently £17,442 (tax-free) per annum.

Please note that clinically qualified candidates are not eligible for this programme. Details on Clinical Research Training Fellowships in Cardiovascular Medicine can be found at: http://www.cardioscience.ox.ac.uk/graduate-studies/clinical-research-fellowship-programme.

As an Equal Opportunity employer, we positively encourage applications from people of all backgrounds.

Committed to equality and valuing diversity [2702-056 (2009) : 70]
The Estonian Ministry of Education and Research and Estonian Science Foundation announce that have opened
Call for applications for the positions of top researcher in researcher mobility programme "Mobilitas"
Closing date: April 29th 2009.

Further information and guidelines may be obtained from www.etf.ee
Space School UK and Senior Space School UK will be celebrating a 10th Anniversary at the University of Leicester this summer. These residential courses are a unique opportunity for students, aged 13-15 and 16-18, to learn more about Space Exploration from the experts. No prior knowledge is required, and we welcome all students willing to join in the varied activities. The primary theme of Space School 2009 is again Space Exploration, covering current and planned missions to the Moon and Planets, and reviewing the latest results on extra-solar planets, gamma ray bursts and black holes.

UNIVERSITY OF CAMBRIDGE
UCL
Doctoral Training Centre in Photonics Systems Development

Studentships available and open for applications

The University of Cambridge and University College London (UCL) have recently established an exciting new Doctoral Training Centre in Photonics Systems Development. The Centre provides doctoral training using expertise drawn from a range of disciplines including: Electrical and Electronic Engineering, Civil Engineering, Manufacturing Engineering, Materials Science, Computer Science, Physics, Medical Physics, Nanotechnology, Bioengineering/Biotechnology and Business.

We currently have funding available for UK and EU students eligible for Engineering and Physical Sciences Council (EPSRC) awards for students to start in September 2009. We expect demand for the limited number of places on this programme to be very high and strongly recommend potential applicants complete the Pre-Application Screening Form available on the Photonics DTC Website.

Please address all enquires to: photonicsdtc@ee.ucl.ac.uk

SCOTTISH ASSOCIATION FOR MARINE SCIENCE (SAMS)

RESEARCH STUDENTSHIP
SAMS invites applications for a NERC-funded Ph.D. Studentship, from October 2009

1. Benthic oxygen exchange across soft and hard-bottom surfaces using in situ technology: Case studies from the tropics to the Arctic.
2. Linking methanogen physiology with their environmental relevance: A new twist in the oceanic methane paradox.
3. Towards a new approach for reconstructing palaeo-fluid dynamics in the deep ocean.
4. New perspectives in ocean mixing.

Applicants should have, or expect to obtain, a first class or upper second-class honours degree in an appropriate discipline. NERC eligibility rules will apply.

For further information please contact Polly Crooks, The Scottish Association for Marine Science, Oban, Argyll PA37 1QA; Polly.Crooks@sams.ac.uk.

Project descriptions and the application form are also posted on our web site: http://www.sams.ac.uk. Deadline for applications is Friday 10th April 2009.

Interviews will be held on Tuesday 5th May 2009

[2702-062 (2009) : 71]
Does evolution explain human nature?

Totally, for a Martian.
Humans bear the stamp of a fascinating evolutionary past, and theories elucidating our biological origins immensely enrich our understanding of what it is to be human. But, no, evolution does not "explain human nature." In fact, the power of evolutionary theory to illuminate our humanity derives importantly both from what it is able to penetrate and from what remains opaque to it.
So what does evolutionary theory explain well? For starters, it provides one-stop shopping for many of the universal or nearly universal features of our species. It presents compelling accounts of our intense need to give and receive parental and social care; of our wide-ranging emotions and the ability to recognize them facially; of our shared cognitive biases, phobias, and desires; and of our capacities to form lifelong social attachments and aversions, to fall in love, and to envision not just the future but also other minds, including supernatural minds...
CONTINUED ONLINE.

Jeffrey Schloss is distinguished professor and chair of biology at Westmont College. He is the co-editor of several books on evolutionary themes, including the Believing Primate: Scientific, Philosophical, and Theological Perspectives on the Origin of Religion (with Michael Murray).

Quite well.
Ever since Bishop Wilberforce asked, in a debate with Thomas Huxley, whether it was from his grandmother or grandfather that he claimed descent from a monkey, the sufficiency of evolutionary theory to explain humanity's spiritual and moral qualities has been in question. Then, as now, the evolution of humans was a touchy subject, and after the publication of On the Origin of Species, Darwin devoted a separate work, The Descent of Man, to untangling how evolutionary understanding could be applied to humans and their special traits.
Since his account of "descent with modification" leaned heavily on natural selection of the individual, Darwin wondered how moral behaviors - which focus on others - evolved. When lying, cheating, manipulation, greed, and other less than admirable qualities seemed to benefit those individuals who practiced them, how could their opposites evolve?...
CONTINUED ONLINE.

Lynn Margulis is Distinguished University Professor in the Department of Geosciences at the University of Massachusetts-Amherst and, currently, the Eastman Professor at Balliol College, Oxford. A member of the National Academy of Sciences, she is the author of, among other books, Acquiring Genomes and Dazzle Gradually (both with Dorion Sagan).

Only up to a point.
Evolution explains human origins. We know that humans share recent ancestors with the apes. Our lineage separates from that of the chimpanzees, our closest living relatives, six or seven million years ago. Scientists call members of this lineage "hominins." The first fossil of a hominin was discovered on the island of Java in 1894, twelve years after the death of Charles Darwin, who had predicted that such remains would eventually be found. That hominin belonged to the species Homo erectus and lived more than a million years ago.
Over the past century, thousands of other hominin fossils have been discovered. The oldest of these belong to species quite different from modern humans, classified with exotic names that usually refer to where they were unearthed. Sahelanthropus tchadensis, found in Chad in Central Africa, lived between six and seven million years ago. Australopithecus afarensis, found in the Afar region of East Africa, lived between three and four million years ago...
Yes, but... we have to qualify what we mean by "human nature," by "explain," and by "evolution."

If, like Aristotle, we see "human nature" as something that depends on a basic animal nature, which in turn depends on a nature that is common to all living things, then the answer to the question is long and complicated. It has to include the evolution of the goal-directed, teleological systems underlying the origin of life and the acquisition of a mentality that endows every animal with a will, as well as the evolution of the unique aspects of the human mind. An answer would amount to re-writing Aristotle's De Anima using a 21st-century evolutionary framework.

But I think that the question being asked is a more modest one, highlighting the uniqueness of human nature as compared, for example, with the nature of our evolutionarily close relative, the chimpanzee... CONTINUED ONLINE.

Eva Jablonka is an evolutionary biologist and a professor at the Cohn Institute for the History and Philosophy of Science and Ideas at Tel Aviv University. Her books include Animal Traditions (with Eytan Avital) and Evolution in Four Dimensions (with Marion Lamb).

Regulatory Affairs Officer

Resolution is the Active Pharmaceutical Ingredient (API) arm of the rapidly expanding Arrow International Group of Pharmaceutical Companies. Our portfolio of products includes steroids, prostaglandins and cannabinoids. Such products are difficult to synthesise and the development programme may require novel routes to avoid patents. The chemistry we undertake is limitless and enables us to produce APIs which are both important to the group and unavailable elsewhere.

The position will provide you with comprehensive training in all aspects of Drug Master Files and other regulatory documents and is an ideal opportunity to develop a career in Regulatory Affairs. As part of a small team you will quickly be able to make a positive contribution reviewing, updating and submitting regulatory applications.

The successful applicant will have a good first or postgraduate chemistry degree, be proficient in communicating scientific information, enthusiastic about detail and quality and be committed to a career in Regulatory Affairs. Previous regulatory experience would be an advantage, but is not essential.

Based in Stevenage (Hertfordshire), as well as a competitive salary you'll be eligible to participate in our discretionary bonus scheme, be eligible for medical insurance, contributory pension scheme, life assurance and 23+ days holiday. Relocation is available for eligible candidates.

If you feel you have what it takes to fulfil this demanding role and would like to join resolution please email your CV to applications@resochem.com telling us why you fit the bill, or call 01438 743900 for an application form.

Closing date 21 May 2009 No agencies please

Exponent International Limited

Head of Food Safety/Regulatory Affairs
Regulatory Affairs Services and Safety/Nutrition Assessments for the Food Industry
Yorkshire/Derbyshire, UK Attractive salary & benefits

Exponent International Ltd is a major scientific-based consultancy business with a well established and highly reputed chemical regulatory affairs consultancy division, operating across Europe from its base in Harrogate, UK. The significant resources of the US parent company now provide a platform for further growth of the European operations. The regulatory areas which Exponent undertakes for clients include dietary intake assessments; health claims; food & feed additives; novel foods and food safety assessments. An experienced food regulatory affairs/safety assessor is sought to lead and develop our European services to compliment our US food team. Initially, this will require the development and execution of a strategic vision, implementation and the development of a new team of food safety advisors, risk assessors and regulatory strategists. The successful candidate will also be a recognised technical expert in the area of food regulation/safety and or nutrition and will continue to apply this knowledge to clients' problems.

To meet these demands you will have a relevant degree, MSc or Ph.D. with at least 15 years of food industry or regulatory expertise and be recognized expert in a high profile area relating to food safety and/or nutrition.

Exponent responds rapidly to clients' needs, so the work environment is one of stimulation and teamwork. It will be necessary for you to work well with clients and colleagues and to have excellent oral and written communication skills. The post will be located at our Harrogate or Derby UK offices and will include occasional travelling away from the office.

Exponent offer an attractive and competitive employment package including 25 days annual leave and health insurance. You would be eligible to be part of the annual bonus scheme. A relocation package may also be available.

To apply, write or e-mail with your CV including a covering letter stating why you feel you can be a part of Exponent's future development.

New Scientist Jobs
Environment Agency
Let your world shape ours.

Science Manager (Ecosystems)
Wallingford • £48,200 - £53,700 + benefits

As one of the most important environmental bodies in the UK, it’s our job to protect the air, land and waterways of England and Wales and improve them for future generations. Clear policy and practical guidance driven by genuine scientific research drives all we achieve. Managing our Ecosystems team, you’ll create scientific understanding that will translate into effective and powerful evidence-based policies.

You’ll manage a team of 15 motivated scientists with a real blend of skills. Your research will improve our understanding of environmental pollutants and the risks they present to ecology, covering marine, freshwater and terrestrial environments. As well as providing confident scientific leadership, you’ll apply your excellent people management skills, both internally and externally. You’ll also develop a strategic overview on environmental biology and ecotoxicology science.

This important role will demand considerable experience in the field of ecotoxicology, environmental biology or ecology. And, with a relevant postgraduate degree and membership of a professional body, you'll have fostered an excellent reputation amongst your peers. You'll quickly grasp the issues relating to your team's work and the way we deliver our science.

For more information and to apply, please visit www.environment-agency.gov.uk/jobs Alternatively, please call 0845 6012233 or email jobs@environment-agency.gov.uk for an application pack quoting reference 14048. If you are a disabled applicant meeting the minimum criteria, we offer a guaranteed interview. Closing date: 15 May 2009.

Key Forensic Services is a new breed of forensic service provider. Our aim is simple; to exceed our customers' expectations at every opportunity. We are a fast-growing, dynamic and energetic organisation with a passion for forensic science.

Our expansion strategy in these challenging times underlines our commitment to becoming the UK Criminal Justice System's first choice of forensic service provider.

Right now we are seeking a number of experienced practitioners in the disciplines of Firearms, Documents & Computer examinations. In addition to these specific roles we are also actively seeking individuals with various levels of experience (graduates, assistants and experts) in a range of forensic disciplines:

• Drugs (Coventry)
• Biology (Coventry, Norwich & Warrington)
• DNA profiling (Warrington & Norwich)
• Mark & Traces (Coventry & Warrington)
• e-forensics (Coventry & Warrington)

This is a great opportunity to play a pivotal role in an organisation which is helping to shape the new forensic landscape and challenging conventional thinking. In addition to an excellent team working environment, we offer competitive salaries, pension scheme and the opportunity to invest in the company via our unique EMI staff share scheme.

If this sounds like an environment which would bring out the very best in you, where innovative thinking, a ‘can do’ attitude and your passion for forensic science will command respect and if you enjoy working directly with a variety of law enforcement customers then please email your CV and a covering letter indicating which role you are suitable for to:

The VLA is an international centre of expertise in animal health science, and provides a broad range of specialist veterinary services and products to Governments and commercial customers across the world.

Veterinary Laboratories Agency®
Working for public and animal health

**Head of Mammalian Virus Investigation**
£33,000 - £48,075 p.a. • Addlestone, Surrey
You will lead and develop the Mammalian Virus Investigation Unit, managing and directing a group conducting specialised diagnostic and investigative studies on mammalian viruses. Through the work of this team you will deliver results on statutory diseases and contribute to our disease preparedness. You should have a degree in veterinary medicine and a Ph.D. in Virology with post doctoral experience. Reference: ADP 4805.

**Veterinary Scientist, Deputy Director of Reference Laboratory for Rabies**
£33,000 - £48,075 p.a. • Addlestone, Surrey
You will deputise for the Director of OIE, WHO, and FAO Reference Laboratory for Rabies and the workgroup leader increasing the international profile of the group whilst strategically re-focussing the group's activities to include other viral zoonoses, with a special focus on emerging viral infections, particularly tick and mosquito borne viruses. You should have a degree in veterinary science, a Ph.D. and experience of working with viral pathogens high containment facilities would be highly beneficial. Reference ADP 4811.

**Avian and Mammalian Influenza Project Leader**
£26,000 - £32,100 p.a. • Addlestone, Surrey
You will act as Project Leader, with responsibility for management and assistance involving research into influenza viruses affecting avian and mammalian hosts, classical virology, molecular biology, serology and disease pathogenesis, including extensive in vivo work with multiple species. Support for disease contingency plans for Avian influenza and Newcastle Disease will be required. A relevant degree, with post graduate qualifications (MSc, Ph.D.), virology and in vivo experience would be an advantage. Reference ADP 4796.

The Civil Service offers a choice of either an Occupational Pension Scheme or Stakeholder Pension scheme, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working and annual pay reviews.

Further details and an application form can be obtained from the VLA website [www.vla.gov.uk](http://www.vla.gov.uk) or by writing to: Personnel (1H), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting the relevant reference. The closing date for receiving completed application forms is 18th May 2009.

ICRISAT
Science with a human face

International Crops Research Institute for the Semi-Arid Tropics (ICRISAT) seeks a dynamic and experienced person to be the **Principal Scientist / Global Theme Leader - Agro-Ecosystems**, to be based at its Head Quarters near Hyderabad, Andhra Pradesh, India.

The Job: To provide global leadership across sub-Saharan Africa and south Asia to a diverse and active group of scientists and partners in natural resource management research focussed on alleviating poverty and improving the well being of poor rain-fed farming communities in the dry tropics. The person will also be expected to lead a significant research effort in one of the major challenges being addressed such as mitigating the impacts of current climate-induced risk and adapting to future climate change, reducing land degradation or enhancing farm diversification of production.

The Person: Should have a commitment to serve the poor, a Ph.D. degree in basic or applied agricultural or biological sciences in one or more of the fields - soil and water management, soil fertility management, agronomy or agro-climatology. At least 10 years of relevant experience, including international exposure, is required. An outstanding track record of scientific achievement, successful grant development and management, and leadership is essential. Skills and experience in working with multi-disciplinary and multi-cultural teams and team building are also required. Fluency in spoken and written English is essential and knowledge of French is an advantage. Please visit [www.careers.icrisat.org](http://www.careers.icrisat.org) for a detailed position announcement.

General. Please submit your application before 31 May 2009, by email to icrisatjobs@cgiar.org (stating the position title in the subject column). The application should include a recent curriculum vitae, a statement of the competencies and experiences for the position, date of availability and the names and addresses (including phone/e-mail) of three referees.

Regulation with the human touch

**Regulation Manager x 6**

£35k to £47k + excellent benefits  
Central London

The Human Tissue Authority (HTA) is the national regulator responsible for licensing organisations that store and use human tissue for purposes such as research, patient treatment, post-mortem examination, medical education and public exhibitions.

We also regulate organ and bone marrow donations from living people. The HTA is widely recognised as a class leader in the regulatory field. Our statutory remit is growing rapidly and we need the right people to match this growth.

We really would like to hear from you if you have a background in a scientific, medical or clinical field and you feel you have the creativity and adaptability to turn this into good regulation.

As a Regulation Manager you will contribute to the high performance of our regulatory function, leading inspections and investigations and making evidence-based licensing decisions. In addition to giving advice and guidance to individuals and groups, you will lead or contribute to projects, and develop and implement regulatory policy. Excellent communication and presentation skills are essential, and you will know how to manage resources, analyse complex information and identify key issues.

As a Regulation Manager at the HTA, you may be required to travel up to 3 days per month outside London. You will have access to excellent benefits such as training through our Learning and Development programme and 6 weeks annual leave.

For more information on the recruitment process and an application pack, contact Vickie Evans, HR Advisor on 020 7211 3436 or vickie.evans@hta.gov.uk

Closing date: 30 April 2009.

Testing will take place on 7 and 8 May 2009. Interviewing will take place on 11 and 13 May 2009.

The HTA is an equal opportunities employer.

www.hta.gov.uk  
[2706-019 (2009) : 54]
The British Geological Survey, (BGS) part of the Natural Environment Research Council (NERC), is the UK’s premier geoscience strategic mapping and research organisation. We are looking for following people based at Keyworth, Nottingham.

**Metallic Minerals Geologist**

£24,380 - £36,390 p.a. depending on qualifications and experience  
Ref: HSO/KW/09/04

You will work chiefly in the Minerals for Development team contributing mineral-related information, services and advice to a range of BGS projects and customers in the UK and overseas. A key role will be the conduct of research on the genesis of metallic mineral deposits. This will involve development of new research ideas, establishment of partnerships with other parts of BGS and UK academia, and the identification of new opportunities/additional sources of funding in this section. You will also contribute to BGS activities related to minerals intelligence gathering and analysis of the global, European and UK minerals industries, with emphasis on topical issues such as security of supply and sustainable minerals development. You will produce peer-reviewed and other outputs from these activities for a wide range of stakeholders in the UK and overseas.

You will have a first degree in Geosciences together with a Master level qualification in a relevant area of economic geology, and have an understanding of the genesis of mineral deposits and how to explore for them. In addition you should have knowledge of modern research techniques (geological, geochemical, isotopic, mineralogical and geophysical) used in metallogenic studies.

The role requires you to develop links with outside stakeholders and, therefore, you must have good presentational and written skills. In addition, you must have a flexible approach to work, strong self-motivation, and have the ability to generate new ideas for metallogenic research. You must be willing to undertake field studies in the UK and overseas.

**Mineral Resources Geologist**

£19,150 - £28,830 p.a. depending on qualifications and experience  
Ref: SO/KW/09/04

As well as assisting in the development of our knowledge base in UK mineral resources, you will develop expertise to help maintain and enhance our status as a respected and authoritative mineral statistics and commodity information provider. This will include acquisition and compilation of a wide range of mineral commodity data and analysis for a range of end-users. You will also be expected to make a significant contribution to a range of existing and new web-based, digital and hard-copy commodity-based outputs. You will also help to develop our expertise on the relationship between mineral extraction, security of supply and sustainable development issues.

You will have a first degree in Geosciences together with an understanding of the geology and mineral resources of the UK. The role requires you to develop links with outside stakeholders and, therefore, you must have good presentational and written skills.

For both posts, working hours will be 37 per week excluding lunch breaks. A generous benefits package is also offered, including a company pension scheme, childcare allowance, 30 days annual leave plus 10.5 days public and privilege holidays.

For an application form contact Personnel (Recruitment), British Geological Survey, Keyworth, Nottingham, NG12 5GG. (Tel: 0115 936 3209).

Please ensure that the relevant reference number is quoted when applying for an application form. Further details can also be obtained by accessing our web page at [www.bgs.ac.uk](http://www.bgs.ac.uk). Applications must be returned by 29 May 2009.

The Natural Environment Research Council is an equal opportunities employer and welcomes applications from all sections of the community. People with disabilities and those from ethnic
minorities are currently under-represented and their applications are particularly welcome. The British Geological survey is an Investors in People organisation. There is a guaranteed Interview Scheme for suitable candidates with disabilities.

[2706-021 (2009) : 55]
The Bioinformatics Group within the Centre for Mathematical and Computational Biology is seeking a Bioinformatics Scientist with a background in software engineering. The group has major research interests in data integration and visualisation and in the analysis of biological networks.

The position will involve some system administration duties including maintaining databases for multi-omic datasets, and developing the associated data analysis methods and user-interfaces. It will also involve working with biologists as part of ongoing collaborations.

The candidate should have an MSc or Ph.D. in Bioinformatics or Computer Science and experience of software development for biological/bioinformatics applications in a mixed UNIX/Windows environment.

A two-year, full time contract is offered, depending upon qualifications and experience at either Band D or Band E (starting salary within the range of £33,118 to £36,798 for Band E, or £26,088 to £28,986 for Band D per annum).

Apply by application form only, available with further particulars from our website www.rothamsted.ac.uk or from the HR Group, Rothamsted Research, Harpenden, Herts, AL5 2JQ e-mail: rres.hr@bbsrc.ac.uk.

Please quote reference 1094.

Closing date: 11 May 2009.

POSITIVE ABOUT DISABLED PEOPLE
ROTHAMSTED RESEARCH
[2706-022 (2009) : 55]
Probably the largest single source of medical innovations in the world…

Every year thousands of new ideas are generated by staff in the NHS. Many of these innovations result in significant improvements in medicine and patient care. Formed in 2005, NHS Innovations London services over 100 NHS hospitals in the London area to evaluate, protect, develop and commercialise new medical technologies and inventions. With a wide range of pharmaceutical, diagnostic, device and IT products in development, clinical trials or commercialisation, there is an exciting future ahead. We are now seeking professional, dynamic staff to increase the output of our team even faster.

**Product Marketing Manager**
Medical Products • £40k - £55k + Bonus + Car Allowance

An experienced Product Marketing Manager in medical devices and/or diagnostics is required to interface between clinicians, product development managers and contractors, market research organisations, sales channels and customers. You will have experience of working with R&D and previous success in marketing, licensing and sales development. Good customer interfacing skills are required and OEM contracting experience would be useful. The ability to carry out or commission market research, prepare marketing materials, write business cases and negotiate and prepare licences/contracts is required. Scientifically or technically qualified, you should have at least five years of success working in a fast moving international product management and/or marketing environment.

**Product Development Manager**
Medical Devices • £40k - £55k + Bonus

A professional R&D Project Manager with at least three years' industry experience is required to manage a range of medical device development projects with third party vendors worldwide and NHS Trusts including prototype design/development and preclinical work. You will also liaise closely with research governance and regulatory groups and will have intellectual property know-how and experience. A successful track record in rapidly taking medical device products through development and trials to market is essential. A Ph.D. in biomedical engineering or a related discipline is necessary and experience of contract R&D would be beneficial.

**Intellectual Property Manager**
Technology Transfer (One year fixed term)
£35k - £50k + Bonus

You will identify, evaluate, validate and protect new medical technologies and innovations using the company's Xpedite Innovations Management process. A Ph.D. in a life sciences discipline is required together with three years' experience in managing IP or technology transfer. The ability to rapidly take projects through to proof-of-concept including virtual early-stage product development is needed. Commercial industry experience is essential along with the ability to assess the market potential for products and prepare business cases quickly. Project management experience would be beneficial as would a sound knowledge of IP law. Excellent organisational skills and attention to detail are prerequisites.

**Trust Clinical Liaison Manager**
£30k - £45k + Bonus

Customer service orientated individuals are required to build close working relationships with senior clinicians, scientists, inventors and management at the highest levels. The role involves the identification and documentation of new pharmaceutical, medical device, diagnostic or healthcare IT innovations as well as building awareness in London hospitals of our best practice Xpedite Innovations Management capability. The role requires creativity in the development of novel marketing, communications and customer relationship activities in the Trusts. Experience of developing and presenting training and technical seminars would be beneficial. A Ph.D. or healthcare background is preferable.

All positions require team players with excellent interpersonal, writing, presentation, IT, lateral thinking and solution selling skills. NHSIL is sited at newly refurbished, air conditioned offices in central London. To apply please complete an application form which can be found online at
www.nhsinnovationslondon.com/about-us/vacancies-and-opportunities/ and send to recruitment@nhsinnovationslondon.com together with a comprehensive CV. Closing date for all posts is 11th May 2009. Interviews will be held throughout May 2009.

NHS Innovations London is committed to appointing on merit, seeking candidates from a diverse range of backgrounds and taking full account of equal opportunities.

The VLA is an international centre of expertise in animal health science, and provides a broad range of specialist veterinary services and products to Governments and commercial customers across the world.

Veterinary Laboratories Agency®
Working for public and animal health

Quality Assurance Assessor

An opportunity has arisen within Quality Management for a Quality Assurance Assessor. As an Assessor, reporting to the Group Quality Manager, you will be responsible for conducting internal audits across the VLA 17025 Group Network. You will provide support to the Group Quality Management office for the maintenance of the VLA’s 17025 multi-site accreditation and ISO 9001 certification. The successful applicant may be based at any VLA site. You should have a relevant degree or HNC/HND in a scientific discipline, preferably microbiology. There will be a significant level of travel required to Regional Laboratories; therefore a full current driving licence or access to an alternative means of transport is necessary.

Further details and an application form can be obtained from the VLA website www.vla.gov.uk or by writing to: Personnel (EC), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting reference ADP4799. The closing date for receiving completed application forms is 11th May 2009.

The Civil Service offers a choice of either an Occupational Pension Scheme or Stakeholder Pension scheme, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working and annual pay reviews.

The VLA is committed to equality and diversity in the workplace.

KNOWLEDGE TRANSFER LEADER
APPLIED CROP SCIENCES
BROOM’S BARN RESEARCH, SUFFOLK

With the imminent retirement of our current Senior Liaison Officer, Broom’s Barn is seeking a highly motivated person to lead its knowledge transfer work.

The candidate will have a good knowledge of arable crop agronomy, be a good communicator and be able to understand and interpret scientific advances to facilitate uptake by farmers and advisers. The post is partly funded by the UK sugar beet industry and a knowledge of the crop is desirable but not essential, as the current post-holder will be working part time to provide training as required.

The post involves close liaison with all levels of the industry, both in the UK and overseas. Practical experience of applied field research would be an advantage as the candidate would be expected to spend a proportion of their time developing their own trial portfolio. They would be expected to play a role on the Broom's Barn management team and to take an interest in the station's developing links with schools and the public.

This is a permanent position, and is offered at either Band F (starting salary £41,930 - £46,589) or Band E (starting salary £33,118 - £36,798) depending upon qualifications and experience.

Apply by application form only, available with further particulars from our website www.rothamsted.bbsrc.ac.uk or Brooms Barn Research Centre, Higham, Bury St Edmunds, Suffolk, IP28 6NP Tel: 01284 812102, e-mail: brooms.barn@bbsrc.ac.uk

Senior Research Fundraiser
Salary Range: £35,000 - £40,000 pa
Inclusive of London Weighting and Cost of Living Allowance
Post is full time (36 hours pw)

The primary purpose of the Senior Research Fundraiser is to generate voluntary income on behalf of the Neuro-disability Research Trust in order to drive forward research carried out by the Institute, RHN clinicians and other members of staff. This post is also responsible for contributing towards the overall fundraising income target, which underpins the Royal Hospital's provision of therapy and long-term care to people affected by Neuro-disability. This post is offered initially on a twelve-month fixed-term basis and is subject to review.

The candidate is expected to have at least three years experience in a medical research/ health charity fundraising environment with a proven track record in meeting and exceeding income targets. Extensive experience in Raiser's Edge and Microsoft Office is essential. Ideally, the candidate would come with good contacts within the scientific community and the business sector and would be confident in exploiting them for fundraising purposes.

The hospital has national and international links and offers excellent opportunities for learning and research support. We will provide line management supervision and developmental opportunities.

We offer:
A good work-life balance, free on-site parking, accommodation, lovely grounds, subsidised staff restaurant, friendly working environment, good team work, staff pension scheme and excellent training and personal development opportunities.

Application packs, information and informal visits:
Informal visits are welcomed. To arrange an informal visit please contact Irene Deredas, Departmental Administrator on telephone 020 8780 4567 or email: ideredas@rhn.org.uk

For application packs and information for all posts, please contact Irene Deredas as above.

Closing date: 15 May 2009

Interviews will take place during June.
Are you a clear, concise and convincing science communicator?

Oxford PharmaGenesis™ Ltd is a successful healthcare communications company. Working with doctors and researchers, we provide information on the latest developments in medicine on behalf of the world's largest pharmaceutical companies.

**Trainee Medical Writer**

Owing to continued growth, we are looking for a trainee Medical Writer who has a flair for clear, accurate and evidence-based written and verbal communication. The required qualification is a good honours degree in a scientific subject (preferably life sciences), ideally complemented by a Ph.D. and postdoctoral research experience. You will need to be a team player and dedicated to providing outstanding client service. Evidence of an interest in written communication would be beneficial.

This position offers you an opportunity to embark on a stimulating and rewarding career that uses your scientific knowledge and skills.

We offer an attractive working environment based in converted Grade II listed barns on the outskirts of Oxford, a competitive salary, a profit-related bonus and further benefits.

A vacancy has arisen for a suitably experienced HPC registered scientist, with sound blood-borne virology theoretical knowledge and practical skills and experience, to join the National Transfusion Microbiology Reference Laboratory as part of the small team performing the routine reference and confirmatory testing and some specialised screening.

NTMRL is the NHSBT's national reference laboratory responsible for the confirmation of screen reactivity identified in the range of donation types handled by NHSBT. In addition NTMRL has the responsibility for the mandatory screening, serological and molecular, of cadaveric tissue donations as well as a number of other non-blood donations handled by NHSBT.

You must have a sound knowledge of blood-borne viruses and, ideally, other transfusion transmissible infectious agents, and experience of performing serological techniques for the detection of the infectious agents and the infections they cause. Experience of molecular techniques is advantageous but not essential. You should also have a clear understanding of performing such work to GMP standards as required by NHSBT.

You will be part of the team responsible for the reference/confirmatory testing, working closely with other laboratory staff both in NTMRL and other parts of the organisation. Although supervision of junior staff is required, there is no line management associated with this post. The laboratory currently works Monday - Friday, standard working hours. Out of hours working is not normally required, but you will be expected to ensure that NTMRL’s stated turnaround times are met at all times. The post is a permanent position and banded at 7 under AfC. You will be appointed on the scale in accordance with NHSBT and NHS AfC policy.

You are invited to contact Dr Alan Kitchen, Head of NTMRL, or Julie Newham, Deputy Head of NTMRL, on 020 8258 2733 to discuss the post and visit the laboratory prior to application. The laboratory is sited at NHSBT Colindale, next to Colindale tube station.

Closing date: 29th May 2009.

Two Post-Doctoral Research Assistant posts: tropical forests and climate change
£30,594 - £32,458 pa
School of Geography and the Environment, University of Oxford

Applications are invited for two fixed-term three-year postdoctoral research assistants to start June 2009 or as soon as possible thereafter, based in the Ecosystems Group of the Environmental Change Institute, School of Geography and the Environment, University of Oxford, South Parks Road, Oxford, OX1 3QY.

i) The first post researches dynamics and carbon implications of fires in the Andes and will conduct a detailed evaluation of the spatial and temporal dynamics of fire at the Andean treeline, and a quantification of their carbon emissions. The successful candidate will have a Ph.D. in a quantitative environmental science, remote sensing and GIS skills, availability and enthusiasm to spend 3-5 months each year in Peru and either proficiency in Spanish or a clear ability to rapidly become proficient, and excellent field leadership skills. Closing date is noon on Friday 15 May 2009.

ii) The second post will work on modelling the ecophysiology and dynamics of Amazonian forests. It will involve compiling existing field data on forest function and dynamics and then using these to parametrise and improve the UK community vegetation model, JULES. The ultimate goal of this modelling effort is to better simulate the response of Amazonian vegetation to climate change. The successful candidate will have a Ph.D. or equivalent experience in a relevant field, experience in running one or more of vegetation atmosphere models, biogeochemical models, and dynamic vegetation models and experience in programming or model development. There are likely to be opportunities to travel to the Amazon to participate in field data collection. Closing date: Noon on Wednesday 20 May 2009.

For further information please see our website on http://www.geog.ox.ac.uk/news/jobs/ or contact the HR Office on 01865 285082. Informal enquiries to Professor Yadavinder Malhi (yadvinder.malhi@ouce.ox.ac.uk).

Committed to equality and valuing diversity
[2706-037 (2009) : 61]
Are you conducting research into the sustainable use of renewable natural resources? Do you want to contribute to the solution of urgent environmental problems, especially in developing and emerging countries?

If yes, then we would like to invite you to apply for the

**Robert Bosch Junior Professorship Research** into the Sustainable Use of Renewable Natural Resources

together with a German university or research institution of your choice. Applicants of all nationalities are welcome.

**Areas addressed**

We are looking for an outstanding young scientist whose research areas concern the sustainable use of renewable natural resources relating to agriculture, forestry, fisheries, use of biodiversity (animal and plant genomic resources) and water. Research approaches may be based in the natural sciences as well as in the social, economic, political, medical and public health sciences. The research should focus on developing and emerging countries.

We welcome applications from all areas of research. For this year’s call for applications, we would especially like to encourage applications in the following area of research:

**Global Environmental Change and Health**

Increased environmental change caused by drivers such as climate or land use change, environmental pollution or urbanization has consequences for human health that are poorly understood. Studies should focus on the effect of such a change on the epidemiology of (a) human disease(s) and the potential for adaptation.

Applicants must show that their planned research is a confident and genuinely innovative step into new areas in their field. It should be obvious from your application that you are developing your own scientific profile. Research concepts should be interdisciplinary and integrate research methods that explore interconnections between global and regional environmental problems.

**Scope**

The successful applicant will be awarded a grant worth up to 1 million euros for a five year period, in order to set up a research group in a German research institution or university. The funds can be allocated flexibly towards covering the candidate's and personnel salaries as well as towards meeting research costs (working lab space, access to resources, equipment, travelling, consumables).

If the successful applicant is interested in a tenure track position, the host institution is expected to guarantee the post. This means that it assumes the obligation to install a regular professorship ad personam after expiry of the grant and after a successful evaluation of the performance of the Junior Professor.

**Candidate profile**

- excellent doctorate degree, completed no more than 5 years prior to the application deadline of 10 June 2009 (adjusted for documented parental leave)
- compelling independent past scientific achievements and publications in peer-reviewed journals
- international research experience
- excellent proficiency in English
- potential to obtain a leading position in his/her research field
- non-German applicants should be prepared to learn German.

How can I apply?
The application deadline is 10 June 2009. The earliest possible date for a successful applicant to take up the position is 1 February 2010.

For application guidelines, please visit our website at www.bosch-stiftung.de/juniorprofessorship

Robert Bosch Stiftung
[2706-038 (2009) : 61]
Appointment of **Senior Research Administrator**  
Office of the Deputy President (Research and Technology)  
National University of Singapore

The Office of the Deputy President (Research & Technology) at NUS (Website: [http://www.nus.edu.sg/dpr/](http://www.nus.edu.sg/dpr/)) is responsible for facilitating, regulating and developing research and technology in a wide range of disciplines and cross-disciplinary areas. We now seek to appoint a senior experienced research administrator to facilitate and simplify the functions of the Division of Research Administration (DRA). DRA administers research grants from government, industry and other bodies. DRA presently has 14 employees and in 2008 administered over 500 grants.

Responsibilities
1. To develop a strong administrative organisation that is "researcher focussed", blending flexibility with accountability.
2. To lead the implementation of computerised grant handling systems that simultaneously serve the needs of researchers and the administrative requirements of NUS Senior management.
3. To take a leading role in reorientating the policies of DRA to create a strong customer focus.
4. To assist the Deputy President (Research & Technology) in engaging with supporters of NUS research.

The successful candidate will have wide experience of research management in academia, industry and/or granting bodies. Salary is commensurate with experience and qualifications.

Applications (with a full CV and names of at least three referees) and informal/ confidential enquires can be sent to:

Professor Barry Halliwell  
Office of the Deputy President (Research and Technology), NUS University Hall, Lee Kong Chian Wing, UHL #05-02H  
21 Lower Kent Ridge Road, Singapore 119077  
Email: bchbh@nus.edu.sg

Closing date for applications: 15 June 2009

NUS  
[2706-039 (2009) : 62]
Senior Research Associate • Ref: RA567

Anthropogenic Impacts on the Oceanic Nitrous Oxide Cycle
£29,704 to £35,469 per annum

The postholder will contribute to a NERC funded project to investigate human impacts on the oceanic nitrous oxide cycle, including the development and evaluation of a representation of the oceanic N\textsubscript{2}O cycle in a 3-D global ocean biogeochemistry model, and the subsequent development of numerical simulations to quantify anthropogenic impacts on oceanic N\textsubscript{2}O. There will be close collaboration with national and international project partners making measurements of the oceanic nitrogen system. You must have a Ph.D. (or equivalent) in a relevant area, have scientific programming experience, possess good organisational skills and have the ability to work collaboratively.

Closing date: 12 noon on 5 May 2009.

POSITIVE ABOUT DISABLED PEOPLE

Further particulars and an application form are available on our website: www.uea.ac.uk/hr/jobs/ or Tel. 01603 593493.

Two Post-Doctoral Research Assistant posts: tropical forests and climate change
£30,594 - £32,458 pa
School of Geography and the Environment, University of Oxford

Applications are invited for two fixed-term three-year postdoctoral research assistants to start June 2009 or as soon as possible thereafter, based in the Ecosystems Group of the Environmental Change Institute, School of Geography and the Environment, University of Oxford, South Parks Road, Oxford, OX1 3QY.

i) The first post researches dynamics and carbon implications of fires in the Andes and will conduct a detailed evaluation of the spatial and temporal dynamics of fire at the Andean treeline, and a quantification of their carbon emissions. The successful candidate will have a Ph.D. in a quantitative environmental science, remote sensing and GIS skills, availability and enthusiasm to spend 3-5 months each year in Peru and either proficiency in Spanish or a clear ability to rapidly become proficient, and excellent field leadership skills. Closing date is noon on Friday 15 May 2009.

ii) The second post will work on modelling the ecophysiology and dynamics of Amazonian forests. It will involve compiling existing field data on forest function arc dynamics and then using these to parametrise and improve the UK community vegetation model, JULES. The ultimate goal of this modelling effort is to better simulate the response of Amazonian vegetation to climate change. The successful candidate will have a Ph.D. or equivalent experience in a relevant field, experience in running one or more of vegetation atmosphere models, biogeochemical models, and dynamic vegetation models and experience in programming or model development. There are likely to be opportunities to travel to the Amazon to participate in field data collection. Closing date: Noon on Wednesday 20 May 2009.

For further information please see our website on http://www.geog.ox.ac.uk/news/jobs/ or contact the HR Office on 01865 285082. Informal enquiries to Professor Yadvinder Malhi (yadvinder.malhi@ouce.ox.ac.uk).

Applications Invited for **Five Doctoral Studentships** in Regenerative Medicine Translation

A new Initiative is offering five, funded doctoral training studentships with London's leading stem cell researchers. Funded by the UK Stem Cell Foundation (UKSCF) in association with the London Regenerative Medicine Network (LRMN), the London Regenerative Medicine Initiative (LRMI) will fund a cohort of five doctoral training studentships under the EPSRC Industrial Doctoral Training Scheme leading to the award of a prestigious Engineering Doctorate (EngD) degree.

The aim of the Initiative is to help address the significant skills gap that is hindering the translation of stem cell science into safe, effective and affordable therapies for patients.

Commencing in September 2009, the LRMI doctorates will be for a duration of four years. They will involve advanced research and training at the following participating centres:

1. Prof. Martin Birchall - Royal Throat Nose and Ear Hospital/ Royal Free Hospital  
   Dr. Mark Lowdell - Cellular Therapeutics Laboratory, Royal Free Hospital  
   “Scale-up of tissue-engineered airways using adult mesenchymal stem cells”

2. Prof. Pete Coffey - The London Project to Cure Blindness  
   Mr. Lyndon da Cruz (Surgeon) Moorfields Eye Hospital  
   “Scale-up of human embryonic stem cell-based therapies for age-related macular degeneration”

3. Prof. Paul Sharp - King's College London/Odontis Ltd  
   "Stem cell-based tooth regeneration and repair"

4. Prof. Nagy Habib - Hammersmith Hospital Trust /OmniCyte Ltd.  
   "Characterisation of microRNAs for stem cell expansion and regenerative medicine”

5. Dr. Anthony Mathur - Bart's and the London NHS Hospital Trust  
   "Translation of bone-marrow derived therapies for routine clinical practice of cardiac disease”

Applicants should have/expected to obtain a first or upper second class degree in life-science, engineering or medicine. EPSRC eligibility rules apply.

The UKSCF - LRMI awards will cover fees and student stipends at £19,363 (tax free) per annum with EPSRC providing full tuition and training support.

Application letters with a two page cv and details of two academic referees must be emailed to lil.shortland@ukscf.org no later than 11th May 2009. Interviews will take place from 18th May 2009.

For further information, please contact: Lil Shortland at the UK Stem Cell Foundation on 0207 670 5370 or Prof. Chris Mason at the Industrial Doctoral Training Centre, Advanced Centre for Biochemical Engineering, University College London on 020 7679 0140.

“The Great British Refurb”: Housing for a low carbon energy future

STORY OF LONDON
Public lecture
Tuesday 9 June 2009 at 6.30pm
Professor Tadj Oreszczyn
University College London
Chaired by: Professor Chris Rapley, Science Museum

Almost half of the UK's energy is used in buildings to provide a safe, comfortable and fun environment. As we look to tackle climate change, most scenarios assume we can achieve significant reductions in carbon emissions with changes to our built environment. Historically however such reductions have not materialised. Major changes to research, development and government policy are required.

How will London and the UK's housing have to change in a low carbon future? Why does energy use increase sometimes when we improve the energy efficiency of buildings? Can we fix the problem with technology alone?

twenty ten and beyond
350 years of excellence in science
AHDB Agriculture & Horticulture DEVELOPMENT BOARD
HGGA

HGCA, which is part of the Agriculture and Horticulture Development Board (AHDB), is an industry funded body whose mission is to improve the production and marketing of UK cereals and oilseeds and provide independent information across the grain chain.

Three exciting opportunities have arisen within HGCA's Knowledge Transfer team, which co-ordinates delivery of output from the research portfolio to levy-payers using channels including field demonstrations, workshops and conferences, publications, web-tools and articles in the farming press.

For all three roles we are seeking motivated individuals with a good understanding of the cereals/oilseeds industry and the ability to interpret scientific information and communicate this in the best format for our levy-payers' use on-farm, on time and within budget.

Preferably with a degree in a scientific subject and an interest in science communication, you will have excellent communication and organisational skills, a flexible approach to tackling a range of tasks, the ability to prioritise competing demands and demonstrate excellent attention to detail.

**Publications Manager**
Salary: £25 - 35k per annum + excellent benefits
The Publications Manager is responsible for the relevant and timely published output from the research portfolio, including project reports, research reviews, and writing and co-ordinating production of guides, fact sheets, posters, CDs and e-Newsletters.

**Research Communications Executives (2)**
Salary: £18k - £25k per annum + excellent benefits
The Research Communications Executives (RCE) will develop and co-ordinate the technical content for agronomy focussed events through liaison with researchers, the advisory sector and stakeholders, and will assist with delivery and the evaluation of success. They will also contribute to e-communications and maintaining website content.

Job descriptions + application form can be found at [www.hgca.com/recruitment](http://www.hgca.com/recruitment)
Please send your application, together with a covering letter, to Alex Colvin at alex.colvin@ahdb.org.uk

Closing date: 19 June 2009.
[2711-003 (2009) : 50]
The Centre for Ecology & Hydrology (CEH), part of the Natural Environment Research Council (NERC), is the UK's Centre of Excellence for research in the terrestrial and freshwater environmental sciences.

CEH
Centre for Ecology & Hydrology
NATURAL ENVIRONMENT RESEARCH COUNCIL

We are seeking applicants for the following exciting job opportunities:

**Earth Observation Scientist**
Ref: CEH317
Wallingford
£30,710 to £37,120

You will take a lead in the development and implementation of EO research activities in the area of atmospheric gas retrieval. You will establish how these measurements can help test and inform new developments in land surface, climate and atmospheric modelling. You will take a proactive role in developing research proposals (both within CEH and externally) and in the implementation of resulting programmes.

Closing date for applications is 17th June 2009.

**Data Analyst**
Ref: CEH327
Lancaster
£30,710 to £37,120

You will develop data systems for the discovery, exploration and long-term curation of data. You will develop and maintain data models for storage and combination of diverse environmental data sets. You will work in close liaison with the other data systems staff and develop and maintain quality processes and procedures for data management within the EIDC.

Closing date for applications is 15th June 2009.

**Environmental Water Chemist**
Ref: CEH309
Wallingford
£30,710 to £37,120

You will strengthen and develop the hydrochemistry at CEH, focussing on river basins from ‘Source to Sea’. You will initiate independent lines of research, develop analytical methods and publish the findings. You will develop commissioned research proposals to win income. You will collaborate with related fields such as catchment science, in-stream chemical processes, sediment dynamics and ecological response.

Closing date for applications is 12th June 2009.

**Data Manager**
Ref: CEH326
Lancaster
£26,180 to £29,410

You will implement the long-term curation of digital data within the EIDC. This will involve working with data from research projects inside and outside CEH. You will enable supply and capture of data.
for curation within the data centre and have responsibility for contact with researchers to support effective management and availability of data.

Closing date for applications is 15th June 2009.

Bioinformatician
Ref: CEH328
Oxford (Relocating in 2010 to Wallingford)
£26,180 to £29,410

As a Bioinformatician with the NERC Environmental Bioinformatics Centre (NEBC), you will undertake bioinformatics analyses and participate in development projects including the Bio-Linux computing platform, to support NERC researchers who generate and use biomolecular datasets.

Closing date for applications is 12th June 2009.

NERC offer a pension scheme, 30 days' annual leave and 10 ½ days public and privilege holidays per annum. We offer a flexible and supportive working environment and with our Investors in People accreditation will encourage and support your continuing professional development.

For further details and application packs for the above posts please visit our website at: www.ceh.ac.uk/personnel/currentvacancies.htm or telephone: 01491 692668.

POSITIVE ABOUT DISABLED PEOPLE
[2711-004 (2009) : 51]
Bristol-Myers Squibb (BMS) is one of the world’s leading health-care companies with annual sales of $20 billion. BMS markets major products providing critical treatments for conditions ranging from cardiovascular and metabolic disease to affective disorders, HIV-AIDS and cancer therapies. The UK Moreton site has close links with R&D centres in the USA and undertakes all aspects of formulation development and clinical supply operations for a range of new and existing chemical entities.

To support the development of new pharmaceutical products we currently have the following opportunity for an enthusiastic, highly motivated individual to join the newly established Exploratory Biopharmaceutics group within Bristol-Myers Squibb Research & Development at Moreton.

**PHARMACEUTICAL MATERIALS SCIENTIST**
(North West England)

A new position exists due to expansion of the recently created Exploratory Biopharmaceutics Group within the Moreton formulation team. This group has been created to study, in detail, the components of solid oral dosage forms (API's and excipients), with the aims of providing better knowledge on performance to support the utilisation of future optimised materials for this purpose.

The laboratories employ a variety of modern instrumental techniques and the organisation is committed to a high-level of investment in the modelling of relevant pharmaceutical systems, based on data generated locally and throughout the Company's network of data providers. The group is also committed to partnering with universities and companies to ensure the most appropriate data and knowledge is generated in the most suitable environment, internal and external to the Company.

You will be expected to carry out appropriate sampling and 'material sparing' physical testing of formulation components. Your role will require knowledge of the fundamental principles of pharmaceutical sciences essential for the understanding of dosage form development and manufacturing; the ability to plan, execute, summarise and evaluate experiments relating to characterisation and optimisation of materials; the ability to construct and analyse datasets by chemometric, or equivalent, techniques and the ability to utilise data sets to develop models relevant to pharmaceutical performance of formulation components. You will require good verbal and written communication skills, and an ability to work with internal and external partners to achieve goals.

The successful candidate will have an undergraduate degree, probably in the fields of Chemical Engineering, Materials Science, Pharmacy, or equivalent discipline, which will be augmented by a higher degree (Ph.D., EngD) or significant recent experience (>4 years) in the field. Candidates who expect to receive a higher degree soon in these fields are encouraged to apply.

A competitive salary and benefits package including contributory pension, private medical cover and flexible working hours are provided.

Applicants should send their CV including details of Materials Science experience, with a covering letter to The Human Resources Department, Bristol-Myers Squibb, Research & Development, Reeds Lane, Moreton, Wirral, Merseyside, CH46 1QW, United Kingdom, quoting reference number 319.

Closing date for receipt of applications is Friday 19th June 2009.

Bristol-Myers Squibb
Research & Development
[2711-005 (2009) : 52]
The Academy of Medical Sciences

**Policy Officer**

**Salary:** £22-25k p.a.

The Academy of Medical Sciences promotes advances in medical science and campaigns to ensure these are translated into healthcare benefits for society. The Academy's Fellows are the UK's leading medical scientists from hospitals, academia, industry and the public service.

The Policy Officer will play a key role in developing Academy positions on the many public policy issues that involve the biomedical sciences. Working within a small team in central London, the post holder will work closely with Academy Fellows to gather information on topical issues, draft papers and position statements, and provide support for Academy study groups.

The successful applicant will hold a science degree; have excellent analytical and communication skills, a clear writing style, and first class time management and IT skills. General knowledge of higher education or medical science sectors in the UK, together with 1-3 years experience in a similar role, is desirable.

Further details and an application pack are available from [www.acmedsci.ac.uk](http://www.acmedsci.ac.uk) or by emailing info@acmedsci.ac.uk. The closing date for applications is 30 June 2009. Interviews will be held in central London on 8 July 2009.

New Scientist Jobs
[2711-007 (2009) : 52]
Assistant Portfolio Manager/ Public Health Scientist

£33,890 - £35,731
Wellington House, London SE1

In this interesting and involved role within the Infectious Diseases and Blood Policy branch, you will provide scientific input and general support to the development of policies and implementation strategies on infectious disease contingency planning, with particular emphasis on zoonotic, new and emerging diseases.

You will be required to maintain an up to date knowledge of infectious diseases and review scientific and technical papers and assist in preparing papers for expert advisory committees. Good oral and written skills are essential for this post.

Your microbiology or related bioscience degree will be complemented by at least five years' post-graduate experience in a relevant field. Able to analyse complex scientific issues and interpret them to non-technical colleagues, you will also bring sound project-management and Internet research skills.

In addition to an excellent salary, we offer 30 days' annual leave, the chance to join the civil service pension scheme and season ticket loan.

Please apply online at www.dhcareers.co.uk quoting reference 09/0168. Closing date: 18th June 2009.

DARWIN INITIATIVE

defra
Department for Environment Food and Rural Affairs
Support biodiversity in developing countries
Influence policy at an international level

Up to six new members for the Darwin Advisory Committee

Funded by the Department for Environment, Food and Rural Affairs (Defra), the Darwin Initiative aims to draw on the wealth of biodiversity expertise in the UK to work with local partners in developing countries to protect and enhance their biodiversity.

We are now seeking up to six new members to join the Darwin Advisory Committee which advises the Secretary of State for Environment, Food and Rural Affairs on the principles and aims of the Darwin Initiative grant programme and on the selection of projects for funding.

You must be able to bring either scientific expertise or equivalent professional experience in a field related to biodiversity, conservation or the environment. In addition, you will have experience of working with or within countries in which the Darwin Initiative operates; familiarity with conservation work in Overseas Territories will be desirable.

Your personal qualities will include excellent communication and analytical skills, together with the ability to work constructively with others and participate in collective decision making. You will also have proven expertise in providing impartial and pragmatic advice and identifying priorities for funding.

As a committee member, you will be required to attend four to six meetings per year in addition to Darwin Initiative events and you will spend additional time on preparation for meetings. You must also be willing to travel to meetings within the UK.

The appointment is initially for three years and will commence in Autumn 2009. Members do not receive any payment but are reimbursed for travel and subsistence expenses incurred.

If you think you have the expertise to play a vital part in the work of this important and influential committee, then we would like to hear from you.

For further information and an application pack, please contact publicappts@defra.gsi.gov.uk or telephone 020 7270 8417 quoting reference PAPPT86/09.

The closing date for applications is: 12 noon, 22 June 2009.

The UK Government and devolved administrations are committed to improving the diversity of their public bodies and welcome applications irrespective of race, ethnic or national origin, sex, marital status, disability, sexual orientation, religion, religious beliefs or similar philosophical belief, age, gender re-assignment or community background. We would particularly welcome candidates from under-represented groups, for example, women, people with disabilities and members from Black and Minority Ethnic communities. All public appointments are based on the principle of merit.

INVESTOR IN PEOPLE

Forestry Commission

Regulatory Affairs Manager and Pesticide Residues/Consumer Risk Assessment Specialist

Regulatory Affairs Services and Safety Assessments for the Agrochemical Industry
Harrogate and Derby, UK/Zurich, Switzerland

Exponent International Ltd is a scientific consultancy specialising in human and environmental risk assessments and regulatory issues for plant protection products, biocides, and industrial chemicals/REACH. Due to our continued development, we now have vacancies for specialists in pesticide residues/consumer risk assessment and regulatory managers at our offices in Harrogate or Derby, UK or Zurich, Switzerland.

REGULATORY AFFAIRS MANAGER
There is now a need for an experienced regulatory affairs manager to join our pesticides/biocides team. The successful candidate will have experience of relevant legislation and regulatory submissions and will continue to apply this knowledge to clients' problems. Your duties will involve preparation of regulatory submission including co-ordination with specialist scientists and regulatory authorities.

PESTICIDE RESIDUES/CONSUMER RISK ASSESSMENT SPECIALIST
This post relates to the areas of pesticide residues and metabolism, MRLs/import tolerances and consumer exposure assessment. Your duties will involve assessment of data and conducting human health risk assessments for regulatory submission, providing scientific and strategic advice to clients and colleagues on European regulatory requirements, study monitoring and some project management.

The successful applicants will have a minimum of a BSc. in chemistry, biology or closely related field together but, more importantly, experience of working in a regulatory environment. In-depth knowledge of EU pesticide, biocide or industrial chemical/REACH requirements and the regulatory framework would be a distinct advantage.

These posts are demanding but offer excellent career progression opportunities within a well established but rapidly expanding consultancy.

The salary is negotiable and will be commensurate with your experience and qualifications.

Exponent responds rapidly to clients' needs, so the work environment is one of stimulation and teamwork. It will be necessary for you to be a team player and work well with clients and colleagues. Excellent written and communication skills are essential. You will be able to function well as a member of a team but also lead projects. The post may involve occasional travelling away from the office.

Exponent offer an attractive and competitive employment package including 25 days annual leave, health and travel insurance.
A relocation package may also be available.

To apply, write or e-mail with your CV including details of two referees and a covering letter stating why you feel you can be a part of Exponent's future development.

Applications to be received by: 21 June 2009.
Dr Caroline Harris, Exponent International Ltd
The Lenz, Hornbeam Park, Harrogate, Yorkshire HG2 8RE, UK

The MRC Mitochondrial Biology Unit in Cambridge (Prof Sir John Walker, Director) wishes to appoint a Research Officer in the Mitochondrial Carriers group of Dr. Edmund Kunji. This post will provide support for a research programme on the family of transport proteins in the mitochondria, including uncoupling proteins. You will assist in the crystallisation and crystallography of mitochondrial transporters and uncoupling proteins. The major aim is to understand the substrate recognition and transport mechanism of these transporters by obtaining the molecular structures of transport intermediates.

The MRC Mitochondrial Biology Unit (formerly Dunn Human Nutrition Unit) is a world-renowned centre for mitochondrial research. Additional information can be found at: [www.mrc-mbu.cam.ac.uk](http://www.mrc-mbu.cam.ac.uk)

You will have, or be about to obtain, an MSc or Ph.D. in Biochemistry, Molecular Biology or Structural Biology and have relevant experience of molecular and structural techniques.

Expertise in protein purification, molecular techniques and X-ray crystallography is essential. Experience with structural biology of membrane proteins will be a distinct advantage.

This is a permanent position. Benefits include a flexible pay and reward policy, 30 days annual leave entitlement and an optional membership of MRC’s final salary pension scheme.

Applications for this post must be made online at [http://jobs.mrc.ac.uk](http://jobs.mrc.ac.uk) inputting the reference number MBU09/254. Applications should include a cover letter, full CV, list of publications and the names and addresses of three professional referees who can be contacted prior to interview.

Closing date: 26 June 2009.

[2711-015 (2009) : 56]
Senior Molecular Biologist

Expertise
Experience
Excellence

Keele (Ref: KMB02)
The Molecular Biology group at Cobra Biomanufacturing Plc requires a microbial molecular geneticist who ideally possesses an M.Sc. or Ph.D. in biological or biomedical sciences, and is skilled in the construction of plasmids for gene expression and genetic modification of bacteria. The successful candidate will be required to work on a number of interesting projects: primarily the construction of Bacillus subtilis spores and attenuated Salmonella for delivery of protein and DNA vaccines targeting HIV, influenza, malaria and TB. The successful candidate will also work on improving our genetic expression technology for the benefit of our clients.

For further information on the role and details of how to apply please refer to the Company website:
www.cobrabio.com/careers
[2711-016 (2009) : 56]
Scientist
Division of Bacteriology
Hertfordshire • £21,745 - £28,180
(inc fringe allowance) dependent on experience

This is an opportunity to join the National Institute for Biological Standards and Control, a centre of the Health Protection Agency, to work as a Scientist in the Division of Bacteriology.

You will contribute to batch release, standardisation and research in the area of typhoid, anthrax and cholera vaccines under the guidance of the study director. Batch release tests comply with ISO 17025.

Research will focus on the effects of various bacterial antigens (e.g., cholera toxin) on immune cells with a view to delineating their interactions with the human immune system. You will also take part in studies that determine immunogenicity of experimental vaccines and assist with collaborative studies to validate new antibody standards as part of international standardisation and reference programmes.

You will have a BSc (Honours) and / or an MSc degree in a Biological Science, or equivalent with evidence of extensive laboratory experience. Expertise / experience in (RT-)PCR, DNA/RNA isolation, immunoassays and cell culture would be advantageous.

Enthusiastic and well organized, you will possess the ability to solve problems. Good interpretive skills for data collection and interpretation are essential as are excellent communication and time management skills. Experience of working within a quality system is beneficial.

To find out more and to apply please visit our website www.nibsc.ac.uk

Closing date: 12 June 2009.

Proposals Writer
Hemel Hempstead
Competitive Salary & Benefits, Plus Bonus Opportunity

Fulcrum Pharma is a professional service company providing clients with expert solutions for the development of therapeutic products in the pharmaceutical and biotechnology industry. We have a market leading proposition in a growing and fast moving marketplace and, following recent re-organisation, the role of Proposals Writer has been created.

Reporting to the Contracts and Proposals Director, the role fits within a critical function within Fulcrum and one which requires working closely with Operations, BD, Finance and the teams within the US and Japan.

The role requires experience in creating high quality, professional, accurate proposal documentation to present the services of Fulcrum Pharma in line with client needs and expectations.

The Proposal Writer will be responsible for:
• Developing a clear understanding of client needs and expectations
• Supporting and co-ordinating the proposal from initial enquiry/lead to final submission
• Gathering information from many sources to generate accurate proposal documents
• Communicating the company services and core abilities and presenting these in a professional document

Ideally you will have been working in a CRO and will have:
• Minimum of a BA/BSc in Sciences or Technical Discipline or equivalent knowledge
• Excellent use of the English language and strong accurate writing and presentation skills
• Excellent skills with MS Office software - notably, Microsoft Word, Excel and PowerPoint to produce final proposals in a demanding timeframe
• Excellent organisation/time management skills.

To apply, please send your CV, covering letter and details of your current remuneration, to: Email: HR@Fulcrumpharma.com

Closing date: 3rd July 2009

Perfectly placed to further your career.

Synergy provides scientific outsourcing services to the Pharmaceutical and Healthcare industries. Our business is growing as companies realise that using Synergy to staff and operate their laboratories is a more effective, responsive and cost effective alternative to traditional options. With Synergy project teams now in place throughout the UK, we are an organisation that is both creative and practical in providing customers with on-site scientific services that meet their needs.

Synergy™
Perfectly placed for scientific outsourcing

www.synergyoutsourcing.com

Synergy is in a great position to help further your career. We are running scientific and laboratory projects on behalf of some of the world's leading pharmaceutical and healthcare companies. When you join us, you get the benefits of working in a responsive, dynamic, people focussed business and the experience of working in the best environments for developing both technical and interpersonal skills.

Recently we were awarded a new contract to support the development of products, which help in the treatment of respiratory illnesses. As part of that contract we are now looking to expand the team further to help ensure our client maintains its position as the leading supplier of generic pharmaceuticals in the UK. Therefore we are now looking for:

**Synergy Project Analysts** (x2)
£ attractive + benefits, North West England

Degree or equivalent in Chemistry. Experience of cGMP/GLP desirable, exposure to analytical method development and HPLC an advantage

For full details, and to apply visit the "Careers" section on our website.

[2711-019 (2009) : 57]
SOILS MODELLER

We seek to recruit an innovative post-doctoral scientist to strengthen our capacity in modelling the multi-functional behaviour of soils and how they respond to environmental change. The ideal candidate should have a background in environmental sciences, ecology or biology and relevant experience in mathematical, systems or meta-modelling. The candidate should also be familiar with data assimilation, have knowledge of pedological and/or ecological processes and be willing to work as part of an interdisciplinary team. Skills in GIS and spatial modelling are desirable but not essential.

The post is focused on the development and application of a soil system model from a pedological perspective which will require the mathematical integration of physical, biological and chemical soil process models at a range of temporal scales.

Starting salary within the range £26,088 - £28,986 per annum with excellent employee benefits.

North Middlesex University Hospital NHS
NHS Trust

The North Middlesex University Hospital is undergoing a phase of rapid development, with the building of a new £118 million hospital and expansion of our clinical services, to support the Trust's strategy of being a major acute hospital and achieving Foundation Trust status.

**Clinical Respiratory Physiologist** (Respiratory Physiology Department)
Band 5, £24,049 - £30,865 p.a. inc

Due to the expansion of Respiratory Services to incorporate a comprehensive Sleep Disordered Breathing Unit, an opportunity has arisen to work within our small but dedicated department of friendly Clinical Respiratory Physiologists. The department provides an extensive respiratory testing service for patients referred by medical staff at the North Middlesex University Hospital. The department has a very close link with the chest clinic at the hospital, and there are a small number of referrals from other hospitals.

Applications to be made on-line at [www.northmid.nhs.uk](http://www.northmid.nhs.uk) or [www.jobs.nhs.uk](http://www.jobs.nhs.uk).

North Middlesex University Trust is situated in North London at the junction of the A10 and the A406.

The Trust provides a smoke free-work environment. We value diversity and are committed to equal opportunities. We welcome applicants from people who wish to work flexibly, including job share applicants. The post that you are applying for involves access to vulnerable adults as defined by the Criminal Records Bureau. It will therefore be necessary to apply to the CRB for a Disclosure check on the successful applicant.

New Scientist Jobs
[2711-022 (2009) : 58]
The VLA is an international centre of expertise in animal health science, and provides a broad range of specialist veterinary services and products to governments and commercial customers across the world.

Veterinary Laboratories Agency®
Working for public and animal health

**Workgroup Leaders**

£33,000 - £48,075 p.a.

The Laboratory Services Department's primary role is testing samples for the diagnosis of farm animal diseases, for surveys, in support of export certification and to demonstrate freedom from disease. At VLA Regional Laboratories (RLs) we work alongside our veterinary colleagues to provide a high quality service, accredited to ISO17025.

As a Workgroup Leader you will be responsible for the leadership and management of the Laboratory Services Team at a RL. In addition to having experience in, and up-to-date awareness of, veterinary diagnostic testing, especially microbiology and parasitology, you will be responsible for the financial, quality and safety management of the workgroup.

Based at Starcross near Exeter

The workgroup has 14 staff with an additional 4 based at a small laboratory in Truro, Cornwall. Experience of working with Mycobacterium and at ACDP Containment Level 3 is desirable. Molecular diagnostic testing and test development experience would be an advantage. Reference No: ADP 4848.

Based at Harlescott, Shrewsbury

The workgroup totals 34 staff including 14 in the VLA's Clinical Chemistry Unit. A sound knowledge of clinical chemistry and haematology is required to support and develop the Clinical Chemistry Unit. Experience of test validation and accreditation would be an advantage. Reference No: ADP 4847.

**Risk Analyst**

Addlestone, Surrey • £20,250 - £27,350 p.a.

• Do you want to put your quantitative skills to good use? • Are you interested in biological systems, animal health and/or food safety, and would you find the challenge of these complex issues stimulating? • Are you a team player with excellent communication and written skills? • Do you want to help inform Government policy in the area of animal health and food safety?

If you can answer yes to all these questions, then why not consider a career as a Risk Analyst at the Veterinary Laboratories Agency? Using your existing and newly acquired knowledge you will assist in the development of risk assessments, write project reports and scientific papers, give oral presentations and keep up to date with developments in selected areas of the risk analysis discipline. You must have a degree in a quantitative subject or a degree that includes a substantial quantitative element. Experience in risk assessment/mathematical modelling would be desirable but not essential as on the job training will be provided. Reference No: ADP 4826.

The Civil Service offers a choice of either an Occupational Pension Scheme or Stakeholder Pension scheme, giving you the flexibility to choose the pension that sits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working and annual pay reviews.

Further details and an application form can be obtained from the VLA website www.vla.gov.uk or by writing to: Personnel (JH), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting the appropriate reference number. The closing date for receiving completed application forms is 19th June 2009. The VLA is committed to equality and diversity in the workplace.

[2711-027 (2009) : 60]
MRC Centre Cambridge

**CONTRACTS MANAGER**
Part-time (3 days/26 hours approx per week)
£35,635 - £43,614 per annum pro rata

The MRC Centre in Cambridge seeks an experienced Science Administrator to work in a team with an existing full-time Contracts Manager to manage contractual issues concerning research grants, collaborations and knowledge transfer on behalf of the MRC units in Cambridge.

The MRC places great importance on the protection and exploitation of its intellectual property and the appointee will play a key part in ensuring MRC’s aims are met. Active promotion of MRC’s intellectual property policies will be an important aspect of this role, which the appointee will undertake alongside MRC Technology, MRC’s IP management company. You will also support compliance with research governance and ethics policies and guidance through advice to MRC units or staff.

The post will be based within the MRC Cambridge Centre, which provides administrative and technical infrastructure support to the eight MRC research establishments in the Cambridge region covering a wide range of the MRC’s research activities, including those renowned for pioneering work in molecular biology and for the application of basic research to medicine and the commercial sector.

You should have a minimum of degree level education in the biological sciences, ideally a Ph.D. You should preferably be experienced in vetting and approving agreements, negotiating terms and explaining policies and procedures, however applications from post-doctoral scientists with an appropriate aptitude who are wishing to develop a career in the management of research contracts and intellectual property are also invited.

Sound judgement in weighing the needs of MRC against the requirements of third parties, good communication skills, a friendly and persuasive personality and a willingness to develop an understanding of the science in key areas are also important requirements.

The starting salary for the post will be in the range £35,635 to £43,614 (pro rata) depending on qualifications and experience. Annual leave entitlement is 30 days plus 10.5 days for privilege and public holidays. An MRC pension scheme, staff restaurant and excellent sports facilities are available.

Applications for this role must be made online at [http://jobs.mrc.ac.uk](http://jobs.mrc.ac.uk) inputting reference CEN09/230. If you do not have internet access or experience technical difficulties please call 01793 301157.

No agencies please.

BioFocus DPI
A Galapagos Company

BioFocus DPI, the service division of Galapagos, a dynamic and innovative biotechnology company, is itself one of the leading integrated drug discovery companies in the UK. Our ADME/PK Laboratory works with a number of pharma companies, major biotechs and other organisations on a range of projects covering multiple therapeutic areas. Projects range from Hit Discovery through to late stage Lead Optimisation and require innovative ADME and pharmacokinetics support and problem solving skills.

Team Leader (ADME/PK) CRP166
We have a vacancy for a Team Leader who can demonstrate excellence in ADME/PK. Managing 2-3 members of staff, the role combines lab-based work with client-facing activities and involves working in multidisciplinary teams with close interaction with client companies, dealing with a rapidly changing workload whilst working to tight deadlines.

A practical working knowledge of in vitro and in vivo ADME/PK support, and expert interpretation of ADME data is required together with good communication skills. You will be experienced in the use of mass spectroscopy to generate ADME and bioanalytical data. You will be self-motivated and flexible, with strong communication skills and a 'can do' attitude. We are looking for innovation, creativity and a practical hands-on approach.

You should hold a Ph.D. in Chemistry or appropriate biological discipline; or hold a good first degree with relevant industrial experience. Line management experience would be an advantage, but is not essential.

We aim to hire highly motivated people with integrity and excellent interpersonal and organisational skills. Besides a competitive remuneration package, we offer a dynamic, enthusiastic work environment that maximizes your potential. Our culture is one of expected achievement through enjoyment of what we do, and we are looking for individuals who thrive by working in a team-oriented environment.

Benefits include private medical insurance and non-contributory pension. We are based at Chesterford Research Park, a 250 acre low density parkland setting, where there is a range of on-site facilities, including restaurant/bar, gym and 7-hole golf course.

If you have the right qualifications for the job, are eligible to work in the UK and are willing to face the challenge of joining a highly motivated entrepreneurial team, please send your CV and a covering email, stating where you saw the advert, to jobs@glpg.com

UCL
UCL Department of Civil, Environmental & Geomatic Engineering

Lecturer in Photogrammetry, Remote Sensing and Scanning

The UCL Department of Civil, Environmental & Geomatic Engineering is making a number of strategic academic appointments in September 2009. As part of this initiative we are seeking a creative, dynamic and inspiring Lecturer who can contribute to our driving force in Photogrammetry, Remote Sensing and Scanning.

The appointee will work with Professor Stuart Robson to build upon an international reputation for excellence in basic and applied research in the non-contact measurement technologies at scales from the micron to planet level. The group has a track record in undertaking an extremely diverse range of projects and offers an exciting interdisciplinary environment for collaborative research utilising a wide range of sensing systems and platforms.

This opportunity is the chance to develop a career in the area at one of the world's best universities (UCL is currently ranked 7th in the world). Challenge us to invite you to have this opportunity!

A Ph.D. in a related area is essential. Starting salary will depend on qualifications and experience but will be in the range of: UCL Grade 7, £32,458 - £35,469 pa (lecturer A) or UCL Grade 8, £36,532 - £43,622 pa (lecturer B). Both salaries have additional London Weighting of £2,781 pa.

Further details and how to apply can be found at (www.cege.ucl.ac.uk/jobs)

We particularly welcome applications from black and minority ethnic candidates as they are under represented within University College London at this level. This is in line with section 38 of the Race Relations Act 1976.

The closing date for applications is: Friday, 26th June 2009.

Lecturer in Accessible Systems

The UCL Department of Civil, Environmental & Geomatic Engineering is making a number of strategic academic appointments in September 2009. As part of this exciting development, we are investing in our highly successful Accessibility Research Group and we are looking for a creative, dynamic and inspiring Lecturer who can contribute to our driving force in this domain.

The appointee will work with Professor Nick Tyler (who heads the ARG) and will be able to make use of the ARG's facilities such as the world's only multisensory pedestrian environment laboratory and its national, international and multidisciplinary connections. Routinely working with Government, NGOs, user groups and numerous academic and industrial partners from all over the world, we are pushing the frontiers of scientific, intellectual and practical knowledge in this rapidly developing field and we expect this appointment to help us push these boundaries even further.

This opportunity is the chance to develop a career in the area at one of the world's best universities (UCL is currently ranked 7th in the world). Challenge us to invite you to have this opportunity!

The candidate should have a Ph.D. in a subject related area.

Applicants should refer to (http://www.cege.ucl.ac.uk/jobs) and follow the links for further details including the application process.

Based on academic attainment the appointment will either be on UCL Grade 7, £32,458 - £35,469 pa or Grade 8, £36,532 - £43,622 pa (plus London Allowance of £2,781 pa).

The closing date for applications is Tuesday, 30th June 2009.

[2711-039 (2009) : 63]
Head of Genomics Services
£49,096 - £62,196 pa
this could be increased for an exceptional candidate
The Wellcome Trust Centre for Human Genetics

As part of our expansion strategy we wish to appoint a scientist with experience of providing high volume scientific production services to manage our genomics service activity that provides experimental services for the ~400 scientists in the Wellcome Trust Centre for Human Genetics (WTCHG) and for external users, including high-throughput sequencing, genotyping and array technologies. The Centre is one of the leading international research groupings working on the genetics of common human diseases, and this appointment comes at a time of considerable excitement and progress in the field including our developments in high-throughput sequencing. Predicted annual turnover on these activities is £1M rising to £2M over a period of ten years.

The person appointed will have overall responsibility for all aspects of the service and production, from determining need, writing business plans, marketing the service, recruiting, training and managing staff, and setting and achieving rigorous service standards, all within the financial constraints that the service must at least break even. He/she will manage a (growing) team of scientists working on these activities within the Centre's Genomics Core. In parallel, the postholder will also work closely with the Head of Genomics Research on technology development.

The successful candidate will be a scientist with a Ph.D. in a relevant discipline and a thorough understanding of the purpose and operation of different analyses so as to be able to advise the most appropriate technique. He/she will have significant experience of marketing and managing a high quality, high volume scientific service and will have the interpersonal skills to forge effective working relations with customers and staff, together with the financial acumen to set and deliver budgets. Above all, he/she will have a demonstrable enthusiasm for facilitating human genetics research.

The post is tenable at the Wellcome Trust Centre for Human Genetics, Roosevelt Drive, Oxford, OX3 7BN. It is funded by the Wellcome Trust, currently until 31 March 2011, but with the expectation that funding will continue to be renewed every five years.

For further details of how to apply, please consult the further particulars on the vacancy section of the Centre's website www.well.ox.ac.uk

Closing date: Friday 26 June 2009.

Committed to equality and valuing diversity

New Scientist Jobs
[2711-041 (2009) : 64]
**Reader in Human Nutrition**  
Department of Food Biosciences  
This appointment is full-time, permanent  
Grade 8 - £46,278 to £52,086 per annum

We invite applications from internationally recognised researchers in the area of diet, human health and risk of chronic disease to complement and enhance research strengths within the Hugh Sinclair Human Nutrition Group (see [www.reading.ac.uk/foodbiosciences](http://www.reading.ac.uk/foodbiosciences)). The successful applicant will play a major role in the future development and success of the University's research in nutrition and health.

We will particularly welcome applications from researchers with experience in the area of nutrient-gene interactions in relation to obesity, CVD, metabolic disease, cancer or neurodegenerative disease. The ability to secure funding from research councils and other funding bodies is vital.

You will have:  
• international recognition for excellence in your research area  
• an excellent publication record  
• the expectation to lead an active research group at the University of Reading  
• the ability to apply your research expertise across disciplines, and work closely with other researchers  
• previous experience of gaining high level research funding

The ability to liaise with the food industry for research support would be an advantage.

Informal enquiries: contact the Head of the Hugh Sinclair Nutrition Group, Professor Ian Rowland on +44 (0)118 378 8703 or email i.rowland@reading.ac.uk  
Closing date: 12 June 2009

Further information and application forms are available at [www.reading.ac.uk/jobs](http://www.reading.ac.uk/jobs), or from:  
Human Resources, University of Reading, Whiteknights, PO Box 217, Reading RG6 6AH, Telephone +44(0)1183786771 (voicemail)  
Please quote reference number RD09001

We value a diverse workforce and welcome applications from all sections of the community

THE QUEEN’S ANNIVERSARY PRIZES 2005  
[2711-042 (2009) : 64]
Leeds Institute of Molecular Medicine
UNIVERSITY OF LEEDS

Faculty of Medicine and Health
Clinical Trials Research Unit

**Head of Trial Management**
(Clinical Trials Research)

The Clinical Trials Research Unit (CTRU) has a national reputation for excellence in multi-centre clinical trials. It is part of the Leeds Institute of Molecular Medicine (LIMM) and has a national and international reputation for conducting complex, multi-centre clinical trials.

You will lead the Trial Management team of a large CTRU portfolio of approximately 10-15 ongoing projects with a total current grant income to the CTRU of £3 - £5 million. The portfolio comprises large, multi-centre international projects which are centrally coordinated by the portfolio Trial Management team at CTRU and regional co-ordination projects where CTRU collaborate with other NCRI accredited trials units or other international academic groups. You will ensure international standards in trial management for the developing portfolio by supervising complex trials and associated trial co-ordination staff across the therapeutic area.

You should have at least a science degree or equivalent relevant qualifications/ experience and substantial experience in trial co-ordination/trial management in multi-centre trials.

Effective communication, presentation and organisational skills and knowledge of the regulatory and governance environment relating to clinical trials are essential, along with experience in staff management and development.

This post is fixed-term for three years.

University Grade 8 (£36,532 - £43,622 p.a.)

New Scientist Jobs
[2711-044 (2009) : 65]
Applications are invited for a postdoctoral Research Assistant to join our active multi-disciplinary group consisting of members of the Fetal Medicine Unit (Professor Thilaganathan) and the Reproductive and Cardiovascular Research Group (Professor Whitley and Dr Cartwright). This programme of research will study the cell and molecular biology of utero-placental cells from pregnancies at high risk of developing the pregnancy disorder pre-eclampsia. A number of methodologies will be employed including time-lapse and confocal microscopy, 3D and ex-vivo cell and tissue culture.

You should possess a Ph.D. in a biological science and be able to demonstrate success at a post doctoral level. An interest in cellular and reproductive biology is essential. In addition the post requires good communication skills, a flexible and meticulous approach to experimental work, ability to work as part of a team as well as independently, and high levels of enthusiasm and motivation.

The salary for the role will be within the range of £32,477 - £38,242 inclusive of London Allowance.

For further information, about this position and to apply, visit [http://jobs.sgul.ac.uk](http://jobs.sgul.ac.uk) General enquiries can be made to the Recruitment Team on 020 8725 5020 (24-hour answerphone) or email: [jobs@sgul.ac.uk](mailto:jobs@sgul.ac.uk)

stream
The Industrial Doctorate Centre for the Water Sector

Training tomorrow’s water engineers

Funded Research Engineer opportunities exist within stream, the Industrial Doctorate Centre for the water sector. Enhanced spend of £19,000 rising to £20,000 for the final two years.

Could you be an engineering leader of the future, delivering usable science to drive a step-change in the sustainability of water services for people, agriculture, industry and the environment? If so, the stream programme offers an opportunity to pursue your ambition.

This four year postgraduate training programme of research and training leads to an EngD degree, and is delivered by five collaborating universities. This year’s research topics include:
- Climate change impacts on treatment and assets
- Drinking water quality
- Flood risk and treatment failure analysis
- Novel investment and project appraisal methods

Funded Ph.D. Studentships.
Veterinary Laboratory Agency®
Working for public and animal health

The Veterinary Laboratories Agency - Weybridge, is an internationally recognised centre of excellence, delivering research for animal and public health. In conjunction with top rank academic partners, VLA is now offering two Ph.D. studentships in the following subject areas:

• Characterisation of proteomic biomarkers of host response to lyssavirus infection with particular focus on rabies virus.
  (Prof. M. Sauer: m.j.sauer@vla.defra.gsi.gov.uk. Academic partner: Prof. J Wastling Faculty of Veterinary Science, University of Liverpool)

• Probing the host response secretome of vaccinated and TB infected cattle to define biomarkers of protection.
  (Dr M. Weeks: m.weeks@vla.defra.gsi.gov.uk. Academic partner: Prof. A. Lalvani, St Mary's Hospital, Imperial College, London).

We are seeking candidates with a background in the biological, veterinary or medical sciences to investigate molecular interactions between disease agents and the host. These fully-funded Ph.D. studentships will exploit some of the most exciting recent developments in genomic and proteomic technologies. Full training will be provided in state-of-art technologies, including mass spectrometry (LC-MS) and bioinformatics. The experience will equip the candidates with a range of highly competitive skills in infection biology and genomics that would be transferable to a future career in research in the public or private sector.

You will be based in the Metabolism and Proteomics Group at the VLA-Weybridge site in Surrey. Students will be expected to make regular visits to the registering universities to review progress and to apply complementary techniques. The studentships are open to EU nationals only and commence October 2009 onwards. Stipend will be £15,750 - £17,000 p.a. Applications should be sent by e-mail to the relevant address above: deadline Friday 19th June.

Your skills can help develop the next generation
Chemists, biologists, psychologists, research scientists, accountants, financial services professionals, and others

Have you ever thought how valuable your maths or science skills might be to others? We're looking for experienced people like you to move into further education and pass on what you know to the next generation of workers in your field.

You may not have considered teaching in further education before but it has a lot to offer, including stable career prospects, flexible hours and the chance to progress to a salary of up to £39,000* - plus the personal rewards of passing on what you know to help others achieve. You don't always need teaching experience - it's your skills and knowledge that employers value, and they could help you get all the training you need.

So if you’re looking for a rewarding new career direction, visit www.passonyourskills.com or call today for more information.

Pass on Your Skills is delivered by Lifelong Learning UK, which promotes skills for learning professionals as part of the Skills for Business network.

*Teacher and trainer salary range £18,000 - £39,000 – Association of Colleges recommended pay scale for 2008/09. Equivalent to £18 - £29 per hour part time.
Campden BRI is a major independent research organisation with an international reputation for its work with the food and drink industry. Within the group, the Cereals and Cereal Processing Division supports the global milling and baking industries through the provision of research, contract testing and technical consultancy. To further develop the services offered to its clients, Campden BRI is currently looking for:

**Head of Department, Cereals & Milling**  
£40,000 - £46,000, Company Car  
This is a unique opportunity to lead a well established and respected team where communication, training, recognition and motivation are vital for success. You should have drive to initiate and manage commercial contracts and research projects including liaison, negotiation, development and marketing plans.

Working with the Divisional Director to implement strategies to develop and grow the Department, you will also work with funding bodies to build long term relationships and will be required to reach both technical and financial targets. Planning of the Department budget to enhance financial performance will play a key part of the role.

A degree in a relevant science or technology is required and a high level of business acumen with the ability to influence strategic business decisions. You will also need proven ability to deliver against technical and financial targets. Good oral and written communication is essential plus ability to adapt quickly to changing business focus.

**Senior Research Scientist**  
£26,000 - £33,000  
Due to the expanding portfolio of research projects requiring skills in image, analysis, colour and texture measurements and NIR spectroscopy, a Scientist is required with project management skills who can communicate results and commercial benefits of applied research to food professionals.

You will carry out scientific research with responsibility for development of key methods and apparatus in your area. With evidence of experimental planning you will need to ensure that work is achievable within budgets and timescales and funding can be secured for future projects and contracts.

A degree in a relevant science or technology is required along with a good understanding of technical and commercial issues relevant to the food sector. A confident communicator at all levels you will act as a representative in meetings and committees. Report writing skills are necessary plus good time management and organisational ability.

Campden BRI  
food and drink innovation  
Carlisle Staffing plc trading as SRG is an employment business / agency  
In addition to the attractive salary packages, Campden BRI offers generous holiday allowances, and a benefits package including pension and private medical insurance schemes. They also have a subsidised restaurant on site and day nursery facilities.

To apply please forward your CV to rhianne.tsai@srg.co.uk or call Rhianne Tsai on 0121 222 5333 for further information.

Research in Real Life Ltd is a private research company with established academic collaborations including Universities of East Anglia and Aberdeen and the International Primary Care Respiratory Group.

**Post-doctoral Research Fellow or Senior Lecturer**

Fed up with teaching/short-term contracts? Looking for something different?

Do you have experience in clinical epidemiological or respiratory research and able to lead research studies from study design through to publication.

You will need to manage several ongoing projects, present to external funders and attend international meetings/conferences.

This is a permanent position. Salary is negotiable.

Interested applicants should send their CV and cover letter to sarahmorterpa@researchinreal-life.org

[2715-006 (2009) : 50]
“My work directly supports departments that research the drugs that may help improve and save lives.”

“This is My MedImmune.”

- Jane, Ph.D. Internal Communications, R&D

Making a real-life difference. MedImmune people do it every day. They are more than dedicated.

They are passionate. Because they know their work is too important not to give everything, every day. MedImmune people also see the positive results of their work - that's where the exceptional satisfaction comes in.

We invite you to join us at MedImmune, as our pipeline of research and products continues to grow – and as we impact more lives more often, around the world.

**Research Scientist and Research Assistant**

Biochemistry/High throughput screening

MedImmune, the global biologics unit of AstraZeneca, is committed to developing medicines that help people live healthier and longer lives. Focussing on the areas of infection, respiratory and inflammatory disease, oncology and neuroscience, we've two marketed products plus a robust pipeline of promising new product candidates. Our state-of-the-art Cambridge site (formerly Cambridge Antibody Technology) is home to around 400 employees, and serves the company's European hub for research and development.

As a biochemist within our Technology team, you will be actively engaged in the identification and implementation of new technologies to support our monoclonal antibodies platform and new protein therapeutics.

**Research Scientist**

You will have a degree (or equivalent) in biological sciences, and be able to demonstrate experience of independent research such as that carried out during a Ph.D. Also important will be a track record of developing and implementing high quality, biochemical assays, ideally based in the pharmaceutical industry or similar. Experience developing enzyme assays, in particular those measuring protease activity or specificity, would be advantageous. Strong communication and organisational skills, plus a pride in data quality and productivity will all be vital.

**Research Assistant**

You will have a first degree, HND/HNC (or equivalent) in Biological Sciences, and will have gained experience of working with high throughput screening, ideally in the pharmaceutical industry or a similar environment. You will also have strong communication and organisational skills, and take pride in data quality and productivity.

Nova Laboratories Ltd

Nova Laboratories Limited is one of the fastest growing privately owned businesses in the UK and is involved in the development, manufacture and testing of pharmaceutical and biotechnology products and medical devices.

As a result of continued business growth opportunities, we are now looking for pharmaceutical scientists to make an immediate impact in our Non-Sterile Compounding Unit which supplies ‘specials’ and investigational medicinal products to hospitals and healthcare professionals.

Team Leader
Non-Sterile Compounding Unit
Starting salary £35k - 40k plus performance related bonus dependent on experience

Pharmaceutical Scientist
Non-Sterile Compounding Unit
Starting salary £20k - 25k plus performance related bonus dependent on experience

Working in a state-of-the-art compounding facility, you will be responsible for the formulation and manufacture of a variety of different dosage forms to meet the needs of patients and healthcare professionals.

In the team-leader role, you will also be accountable for running the non-sterile compounding unit, including:
- Day to day management, training and development of your team
- Scheduling of compounding activities to meet customer expectations and business objectives
- Ensuring that products are manufactured in compliance with all relevant policies, procedures and Good Manufacturing Practice

You will have previous experience of managing and motivating a small group of direct reports, with evidence of achievement in the role. This will include of change management and continuous improvement. A good understanding of the principles and application of cGMP is also essential.

Key requirements for both roles will be a degree in the pharmaceutical sciences coupled with the aptitude needed to work with small-scale pharmaceutical manufacturing equipment.

You will have competency in the formulation of oral and topical drug products, gained either in hospital pharmacy or the pharmaceutical industry. You will have the drive to succeed in a fast-paced environment but with a commitment to quality that ensures Nova’s products are manufactured to the highest standards.

For informal discussions and more details on either post, please contact Dr Richard Houghton, Production Director on 0116 223 0100. Alternatively, if you feel you have the potential to meet the challenges of these positions, please send a covering letter and CV to:

Tracy Brown - HR Manager

SUCCESS… the key to life

Share our mission to enable customers to make the world healthier, cleaner and safer. With more than 30,000 employees around the globe, we are the world's largest provider of analytical instruments, equipment, reagents and consumables, software and services for research, analysis discovery and diagnostics.

**PCR Senior Key Accounts Manager**
£30k pa + company car & commission - SW UK
In this highly strategic role you will build our branded molecular biology consumables business within the South West UK - including some very high profile accounts. Nurturing relationships with key opinion leaders, procurement and key end-users, you will develop a strategy for each account. You must be based within this territory, with experience of handling key UK customers and using Molecular Biology tools. Ref: AM/NS

**RNAi Sales Specialist**
£27k neg. pa + company car & commission - East UK, London & SE
This is a high profile role for the promotion and revenue growth of our Dharmacon and Open Biosystems products, in which you will interact with opinion leaders to formulate strategic business plans. Whilst looking after key customers, you will contact and establish relationships with potential prospects, co-operating with fellow account managers and sales specialists to bring in new business and build market share. Previous sales experience in RNAi/ Molecular Biology is required, plus managing of key accounts. Ref: SS/NS

Both roles require a great communicator with a highly motivated approach, the drive to succeed in a very challenging environment and the ability to exceed sales targets. We attach great importance to personal attitude and characteristics. You will need a BSc or equivalent in a life science subject, with good knowledge of molecular biology. Benefits include 25 days holiday per annum, training and development opportunities, pension and Thermo Fisher employee recognition awards.

Please email your CV & covering letter quoting appropriate ref. to: debbie.mant@thermofisher.com

Closing date: 17th July 2009.

ThermoFisher SCIENTIFIC
The world leader in serving science
Environment Agency

Every river. Every lake. Every coastline. Every day.

**Head of Water Quality**
Bristol or London - Up to £65,000 + bonus + exceptional benefits

Expert, Heavyweight, Specialist. When it comes to the area of water quality, you’ll have been described as them all. Which means you’ll be perfectly equipped to help us in our mission to create a better place. We’ve already helped reduce water pollution to its lowest level in 200 years. But we still face serious and immediate environmental challenges. With your quality and long-term vision, we’ll tackle them.

With oversight of a budget of £135 million, you'll lead a team which sets the strategic agenda for water quality policy, as well as shaping all our activities and actions in this area. You'll work closely with senior colleagues, government and industry, meeting the targets set by the European Water Framework Directive. Your work will influence everything from national policy to chemical discharge and will impact upon every river, lake and coastline in England and Wales. Alongside improving the environment for today's and future generations, you'll also demonstrate the economic benefits of our work, helping to drive £ billions of investment in the private sector.

A savvy policy operator with a strong vision, you’ll have exceptional strategic leadership and influencing skills, and in-depth knowledge of the water industry.

The environment cannot be effectively managed unless we succeed in taking an integrated approach to water management. With a strong academic background and passion for our planet, you'll be dedicated to ensuring we do.

For more information and to apply please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs) Alternatively, please call 0845 601 2233 or email executivemanager@environment-agency.gov.uk, quoting reference 14164 for an application pack. If you are a disabled applicant meeting the minimum criteria, we will guarantee you an interview.

AT THE CENTRE OF BIOTECHNOLOGY IN EUROPE
[2715-013 (2009) : 56]
Plymouth Marine Laboratory (PML) is a dynamic and highly innovative, leading-edge provider, recognised nationally and internationally for the excellence of its research and in the provision of technologies and advice across the marine sciences, PML is an independent organisation with charitable status, privileged to be a NERC Collaborative Centre and an integral part of the UK’s strategic marine sciences & technology capability for over 30 years.

Remote Sensing Scientist - Earth Observation

An opportunity has arisen in our Remote Sensing Group, a dynamic group consisting of scientific and technological staff, which has been extremely successful in winning new contracts in recent years and increasing resources. This new post offers an exciting opportunity for a non-marine scientist to join this group and work on the Earth Observation Data Acquisition and Analysis Service (NEODAAS), a NERC funded contract;

You will lead the development and implementation of terrestrial, earth or polar science applications of remote sensing within NEODAAS and in so doing, will work with existing staff with marine, atmospheric and terrestrial expertise. You will develop links and collaborative projects with scientists in the UK community, notably in the NERC Centre for Earth Observation and will also have the opportunity to be involved in the wider research and development activities in the group.

Relevant good experience in remote sensing, image processing or the specified science applications is essential and demonstrable skills in computer programming in C, C++, IDL, Java or Perl preferably in a Linux environment is also required. You should have a Ph.D. or a minimum of three years postgraduate research experience and be a highly motivated individual, confident and fluent at presenting and communicating with a range of audiences.

For an application form, contact Miss J Weeks, at: vacancies@pml.ac.uk quoting reference number: PML79/09 (Remote Sensing Scientist)

The closing date for applications is Thursday 23 July 2009. Interviews (which will include a programming exercise) will be held in mid August 2009 with a view to the appointment commencing as soon as possible.

[2715-015 (2009) : 57]
Help shape the marine environment of tomorrow today

**Chair and Members** of the Science Advisory Panel to provide scientific advice on the selection of Marine Conservation Zones under the Marine and Coastal Access Bill.

The Science Advisory Panel (SAP) is a new advisory non-departmental public body. The SAP is being created to provide independent scientific advice to the Regional Projects charged with the delivery of a network of Marine Conservation Zones (MCZs). MCZs are a new tool for creating marine protected areas under the Marine and Coastal Access Bill currently progressing through Parliament. Natural England and the Joint Nature Conservation Committee are currently establishing the Regional Projects that will take this work forward. MCZs together with existing protected area designations will form an ecologically coherent network of protected sites in the marine area that will contribute to achieving the Government's vision of, 'Clean, safe, healthy, productive and biologically diverse oceans and seas'.

We are looking to appoint eight members of the Panel and a Chair to take forward this important work. Collectively the panel will combine a range of relevant expertise. Applicants for members of the Panel and its Chair must be able to commit to working as part of the Panel for 25 days a year.

To be considered for the role of panel member, you must possess an impressive track record in one or more of the following four areas of expertise:

- UK Marine Ecology
- Marine ecosystem processes and the ecosystem approach
- Marine conservation tools and conservation planning
- Marine Protected Areas and network design

More details about each area are contained in the pack which will be sent on request to potential applicants.

For the position of Chair of the Panel expertise in one of the above areas would be desirable but is not essential. Essential criteria for this role include:

- a proven track record in leading independently minded expert groups to consensus and delivery
- experience of influencing effectively at a senior level within Government, the private or the third sectors
- well-developed interpersonal skills, including experience of communicating with conviction and clarity in the face of tough negotiation or challenge

The work of the Panel will begin in November 2009 and is expected to conclude, subject to review, in October 2011.

Interviews will be held from on the 1 October 2009 to the 6th of October 2009 in Defra's London offices.

A per diem allowance for Chair and members will be payable. Further information, including detailed role descriptions for both roles, remuneration details and application forms, are available from Ashley Smith, email - ashley.smith@defra.gsi.gov.uk, or telephone 0117 372 8335.

Your completed application forms should be returned to the following address by the closing date: noon 11th August 2009. Email to ashley.smith@defra.gsi.gov.uk or post to Ashley Smith, RM 1/05, Temple Quay House, 2 The Square, Temple Quay, Bristol BS1 6EB. Further information can be obtained by contacting the above address or by phoning 0117 372 8335. Email correspondence is preferred.

These appointments will be governed by the principle of public appointment based on merit with independent assessment and transparency of process. Candidates may come from a wide range of
background and experience although the successful candidates will need to have a proven track record in at least one of the areas outlined above. The UK Government and devolved administrations are committed to improving the diversity of their public bodies and welcome applications irrespective of race, ethnic or national origin, sex, marital status, disability, sexual orientation, religion, religious beliefs or similar philosophical belief, age, gender re-assignment or community background. We would particularly welcome candidates from under-represented groups, for example, women, people with disabilities and members from Black and Minority Ethnic communities.

Clinical Biochemistry (2 posts) and Microbiology (1 post) Higher Specialist Trainees Agenda for Change Band 7

Clinical Scientists play a significant role in the provision and development of clinical laboratory services within the NHS. With support from NHS Education for Scotland, a small number of Higher Specialist Training posts in Clinical Biochemistry and Microbiology have been created to develop future consultant level Clinical Scientists and potential service leaders.

You must be well qualified and highly motivated HPC Registered Clinical Scientists. HST posts are funded for 3 years fixed term, during which time trainees will be expected to complete Fellowship of the Royal College of Pathologists by examination. The scheme is co-ordinated by NHS Lothian for Microbiology and NHS Tayside for Clinical Biochemistry. Trainees will work from a base hospital approved for training within Scotland to FRCPath standard and is not predetermined for Microbiology. One of the biochemistry posts will be in Paediatric Clinical Biochemistry in Lothian and the second post based in Grampian or Tayside dependent upon the candidates preference.

POSITIVE ABOUT DISABLED PEOPLE
[2715-018 (2009) : 58]
Japanese-speaking Research Associate
Starting salary £20,225 - 24,103 (depending on experience) + estimated 6-10% for unsocial hours

We are an independent contract research organisation (CRO) with a worldwide reputation for early clinical trials of new medicines, mainly in healthy volunteers but also in patients. Our unit has 100 beds in newly refurbished premises.

We require life science graduates or medically or scientifically qualified equivalents to assist us to manage clinical pharmacology studies in healthy Japanese subjects. You'd be responsible for taking blood samples and physiological measurements - ECG, blood pressure etc. You'd need to be fluent in Japanese to communicate study procedures to Japanese people, and have a good standard of English to describe any side effects to English-speaking medics.

We provide an extensive training and induction programme leading to a University Certificate in Clinical Pharmacology Practice, for which we have received a National Training Award. So, previous research experience, though desirable, is not required. Training includes aspects of clinical pharmacology and drug development.

Closing date 24 July 2009

DH
Department of Health
Human Fertilisation and Embryology Authority (HFEA)

3 members
The HFEA ensures safe and appropriate practice in fertility treatment, the handling and processing of sperm, eggs and embryos and embryo research. It sets standards for, and issue licences to, fertility clinics and provides authoritative information for the public and health professionals.

We are looking for 3 members to deal with sensitive and high profile issues, who will also help to provide the Government with advice and information on issues arising from developments in assisted conception and embryology.

Successful candidates will have an interest in the wider implications of assisted reproduction and embryo research, a high level of analytical skills, be a good team player with excellent communication skills and will be specialised in one of the following fields:

- clinical embryology - senior embryologist in a HFEA licensed establishment, within clinical practice;
- biological sciences - scientist specialising in a biological discipline (e.g. cell biology) working outside the fertility sector;
- faith ministry or theology - open to applicants of all faiths and beliefs.

Time commitment, remuneration and location
On average, members are required to spend up to three days a month on Authority business. They are paid a daily allowance of £189 plus travel and subsistence expenses. The Authority's executive is based in London and most meetings are held there. All appointments will be for a maximum of 3 years.

How to apply
For more details about the posts, please call 0870 240 3802 during office hours or go to www.appointments.org.uk, quoting reference DH9055, for an information pack and application form (which are also available in large type or Braille or on tape).

The closing date for returning applications is Monday 27 July 2009.

AMEC is a leading supplier of high-value consultancy, engineering and project management services to the world's energy, power and process industries. Employing over 22,000 people in more than 30 countries, and with annual revenues of over £2.6 billion, we design, deliver and maintain strategic and complex assets for our customers.

As the UK nuclear industry's largest provider of technical and engineering consultancy, we offer unique opportunities within our Laboratory & Technology Services business; we provide innovative technical solutions to nuclear reactor operations and nuclear decommissioning that range from option studies through to hands-on experimental work in our laboratories and rig halls.

The business is experiencing rapid growth and we now need professionals who can contribute to our expansion in the following key areas: Chemistry (which includes PWR primary water chemistry, AGR gas chemistry, ion exchange technology, analytical chemistry and radiochemistry); Metallurgy (including pressure vessel steels and their welding together with high temperature properties, fatigue/creep and fracture mechanics) and Waste Technology (materials engineering, radioactive waste treatment and immobilisation technologies, cement / geological chemistry).

To be part of our team, you'll need to have a significant and relevant track record in your chosen field. You'll combine outstanding communication skills with a demonstrable ability to devise innovative, problem-solving approaches to technical issues – together with a good first degree and, ideally, a postgraduate qualification. Many projects are multi-disciplinary, so a working knowledge of engineering would also be advantageous.

To apply, please email your CV and a covering letter to Steve.Rylett@amec.com

UNIVERSITY OF SURREY  
Faculty of Health and Medical Sciences

**Systems Biology Research Fellow**  
£28,839 - £32,458 per annum  
Temporary contract from 1 September 2009 to 31 August 2012

We require a Postgraduate Research Fellow to work on a project aimed at modelling biomass degradation and fuel ethanol production using *in silico* genome scale metabolic networks in a three year, BBSRC funded project.

You will produce a web based package that will contain *in silico* cell representations (genome scale metabolic networks) of four potential lignocellulose degrading micro organisms and four potential bio alcohol producers. Your work will also include screening combinations of degrader/producer for optimum ethanol production for a given raw material, identifying potentially valuable by-products from each pairing, optimising the raw material composition, identifying mutation strategies for yield optimisation, and mass transfer modelling for raw material degradation.

You will have strong computing skills, including experience with writing code and implementing existing packages on new platforms. Interest and/or experience in linear programming, optimisation, network simulation and web interface development are desirable, but not essential as tuition in the relevant skills will be provided.

Informal enquiries may be directed to Professor Mike Bushell +44 (0) 1483 689277, e-mail: m.bushell@surrey.ac.uk

Our benefits package includes generous annual leave, final salary pension scheme, relocation provision, childcare assistance and leisure facilities.

You can apply online at [www.surrey.ac.uk/jobs](http://www.surrey.ac.uk/jobs) Alternatively, for an application pack contact Mary Cooper on 01483 684596 (24 hour answer phone) or email FHMS_HumanResources@surrey.ac.uk quoting job reference 7093.

Closing date: 9 July, 2009.

We acknowledge, understand and embrace diversity

Research Fellow - Horizon Scanning Fellow
RESPONSIBLE INNOVATION PLATFORM
Fixed Term - 2 Years

JOINT APPOINTMENT INFORMATICS/BIOSCIENCES
Cavendish Site
Salary £32,967 - £37,698 (Inc. LWA) (Pay Review Pending)

Improving foresight to promote responsible innovation.

The Responsible Innovation Platform at Westminster is an exciting new initiative, developing high quality research and guidance that promotes responsible innovation. As part of this we are looking for someone to develop a research theme that couples the acquisition of real time, web-based information on emerging innovations (technology, financial) to risk identification and management. You will lead on setting this up and then take the outputs to help end users in both the public and private sectors to translate these into better decision making.

You will need to have skills not only in how to harness information from the web and software optimisation, but very strong knowledge management and communication abilities. You will need a Ph.D. in computing and knowledge management, or similar research experience. This is initially a 2 year position, but with strong possibility for extension, and will be based in our Central London campus near Regent Street, between the Schools of Computing and Life Sciences.

Reference Number: 50023540.

Closing Date: Friday 7th August 2009.

Interviews will be held week commencing 14th September 2009.

Applicants must apply online by visiting our website at: www.wmin.ac.uk/vacancies

Please note CV's in isolation or incomplete application forms will not be accepted.

UNIVERSITY OF WESTMINSTER
Embracing diversity and promoting equality
[2715-028 (2009) : 61]
Living with Environmental Change
LWEC

UEA
University of East Anglia

LIVING WITH ENVIRONMENTAL CHANGE

The Living With Environmental Change (LWEC) partnership is a major new research initiative bringing together 20 UK organisations funding, undertaking and using environmental research. The specific aim is to bring together researchers, policy makers, business and other organisations to co-design research so that their needs in addressing the urgent challenges posed by environmental change can be more specifically met. Activity within the first five years of this ten year programme will be in the order of £1 billion.

In support of this initiative, the Partners' Board has established a directorate to support the Director in promoting and co-ordinating the various LWEC programmes and activities. The posts are based at the University of East Anglia, host to the Director and LWEC Directorate. All three posts are available immediately for a fixed term period until 29 February 2012.

Senior Research Associate and Head of Directorate  Ref: RA592
£37,651 per annum

The postholder will work closely with the LWEC Director to support and implement the research programme and to establish, manage and be responsible for the LWEC Directorate's operation. He/she will lead the communication strategy and duties will include representing the programme at meetings, liaising with partners and other relevant organisations, organising and servicing meetings, reporting on LWEC's outputs, achievements and impacts, quality assurance and maintaining an oversight of LWEC expenditure by the Partners. Possessing a directly relevant first degree, you must have a strong track record in scientific co-ordination supported by experience of environmental change research. You must also have experience of working in multi and interdisciplinary scientific partnerships and excellent communication, administrative and management skills.

Senior Research Associate (Communications/ Information Specialist)  Ref: RA593
£29,704 to £35,469 per annum

The postholder will implement the communications strategy relating to public engagement, knowledge exchange and general communications. He/she will ensure that key messages about the activities and objectives of the LWEC Programme are communicated effectively to a wide range of stakeholders, will co-ordinate the preparation of reports on LWEC activities, outputs and outcomes and disseminate examples of LWEC best practice. You must have a minimum of a BSc or BA plus either a relevant postgraduate degree or equivalent level of directly relevant experience in a directly transferable role. You must also be a self motivated scientific communications professional with extensive experience of strategic communications and a track record of achievement in a communications role, excellent scientific writing and editing skills and experience of the development and delivery of innovative approaches to communications with a wide range of audiences and across the full range of channels. You will be able to manage multiple projects and campaigns within tight time scales and be able to work with other communication specialists.

Research Associate (Programme and Partnership Support)  Ref: RA594
£23,449 to £28,839 per annum

Working with the Head of Secretariat you will facilitate work between the Partners and support co-ordination between LWEC research programmes and activities. You will also play a key role in the planning and preparation of LWEC meetings, workshops, conferences and other functions (e.g. in the Parliaments and Assemblies of all the countries and regions of the UK) and in helping to identify and map activities and gaps within the LWEC framework. You will also assist on communications and be responsible for the maintenance of the Secretariat budget. Possessing a degree in a relevant area of expertise, you must have experience of working across a range of disciplines, team working and good communication skills.

Closing date: 12 noon on 15 July 2009.
Further particulars and an application form are available on our website: www.uea.ac.uk/hr/jobs/ or Tel. 01603 593493

POSITIVE ABOUT DISABLED PEOPLE
Applications are invited for the post of Director of the Environmental Sustainability Knowledge Transfer Network. We are seeking candidates who have a strong background in the area of environmental sustainability, and with proven leadership capability. He/she will develop and implement the knowledge transfer strategy of the KTN, enhance the service to business, academia and other stakeholders, to drive innovation in environmental sustainability for the benefit of UK Plc.

The Environmental Sustainability KTN stimulates innovation by working with businesses and other stakeholders involved in the management of environmental sustainability, especially in Key Priority Areas. The network operates at a national and potentially international level to enhance business competitiveness. It is funded by the Technology Strategy Board (via the Department of Business, Innovation and Skills). The KTN operates in association with C-Tech Innovation Ltd.

Applications, including a full CV together with the names and addresses of three referees, should be addressed to Mrs Sue Ling, Department of Earth Sciences, Parks Road, Oxford OX1 3PR or by email to sue.ling@earth.ox.ac.uk and should arrive by Friday 24 July 2009. Further particulars are available on line at:
http://earth.ox.ac.uk/vacancies/director_eskttn.

THE QUEEN’S ANNIVERSARY PRIZES 2005
[2715-035 (2009) : 63]
Technical Resources Manager  
£36,532 - £43,622 per annum

An exciting opportunity has arisen for an enthusiastic individual to join the School of Sport, Exercise and Health Sciences. The person appointed to this key position will be responsible for overseeing the safe and efficient running of the research and teaching laboratories throughout the School, and providing line management for technical staff. Essential requirements are experience of human biology laboratory practice along with excellent interpersonal skills and a high level of personal initiative and judgment. The successful applicant will be qualified to degree level or equivalent in a relevant discipline and have substantial experience in a technical support role.

See website for further information and an application form. Closing date: Friday, 24th July 2009. Please quote reference HS/1822/5588.

Genetics and Biochemistry

**Technical Tutor** £27,183 - £35,469 per annum

An enthusiastic, self-motivated individual is required to work as part of a team of specialist technical staff, supervising the day-to-day running of human biology teaching and research laboratories, and assisting with the teaching of undergraduate and postgraduate students and supervision of research staff.

The successful applicant will have at least a BSc in Human Biology or a related discipline.

See website for further information and an application form. Closing date: Thursday, 16th July 2009. Please quote reference HU/1840/5588.

CELEBRATING 100 YEARS OF EDUCATION AND INNOVATION

POSITIVE ABOUT DISABLED PEOPLE

[2715-036 (2009) : 63]
Oak Foundation Scientific Leadership Fellow
£42,351 - £49,096 pa
Nuffield Department of Clinical Medicine
Centre for Tropical Medicine

The Nuffield Department of Medicine (NDM) is a large multi-disciplinary Department that links high quality basic biological science with medical application. Its current annual research and research support expenditure is over £100m. In addition to its Oxford activities, the Department supports researchers based at a number of Major Overseas Programmes in Tropical Medicine in Thailand, Vietnam and Kenya and at numerous sites in S-E Asia and Sub-Saharan Africa (www.tropicalmedicine.ox.ac.uk).

The position comes with pump priming research funding and the Leadership Fellow will build an independent research programme in one of the following fields based in either Kenya or Thailand:
• Tropical Pharmacology
• Medical Informatics
• Tropical Environmental Health

The post-holder will take a senior role in the Department, running a productive research group, supervising post graduate research workers and mentoring graduate students, and winning funds to support the group in the future. The post holder will contribute to the overarching activities of the Major Overseas Programme including training and capacity building.

This post provides an entry point for basic scientists wishing to establish a career as a principal investigator within a clinical setting. This post will suit a highly talented researcher with postdoctoral experience.

The post is available for three years

An application form and a job description are available from the Senior Personnel and Finance Officer at CCVTM, Churchill Hospital, Old Road, Oxford OX3 7LJ (tel: 01865 857413, email: bethany.valentine@ndm.ox.ac.uk) or from the web site http://www.tropicalmedicine.ox.ac.uk/jobs. Please quote the reference HB-09-054-CM. Closing date for applications Friday 10 July 2009.

Committed to equality and valuing diversity
[2715-037 (2009) : 64]
The postholder will work within the International Project Office (IPO) of SOLAS to implement the project (see http://www.SOLAS-int.org). He or she will assist the Scientific Steering Committee, liaising with project sponsors and other organisations. The postholder will represent the project at international meetings and interact with SOLAS national committees and groups, completing the SOLAS Implementation Plan document. You must have a BSc in a relevant discipline, and appropriate postgraduate experience, with excellent communication, interpersonal and presentation skills. The post is available from 18 September 2009 until 31 March 2010.

Closing date: 12 noon on 15 July 2009.

Further particulars and an application form are available on our website: www.uea.ac.uk/hr/jobs/ or Tel. 01603 593493.

POSITIVE ABOUT DISABLED PEOPLE
[2715-038 (2009) : 64]
Medicine, Biomedical Sciences, Health and Social Care Sciences
St George’s University of London

Cardiac and Vascular Sciences

**Study Co-ordinator**
(Research Associate)
20 month fixed-term appointment

This is an exciting opportunity to join one of the leading stroke research groups in the UK. The successful applicant will play a leading role in co-ordination of UK wide studies establishing DNA banks from stroke patients, which involves collecting detailed clinical information. The job is based at St George's but will involve liaising with centres throughout the UK. The department has an international reputation for studies in the genetics of stroke and is leading a major international study looking for new genes for stroke.

We are looking for someone with previous experience of clinical research, preferably in managing clinical trials or multicentre studies. Previous experience in stroke research is not essential. The successful applicant will have excellent interpersonal skills and will be keen to work as a team player. St George's has a large clinical stroke research group and there are excellent opportunities for career advancement.

The salary for this position will be up to £35,000

For further information, about this position and to apply, visit [http://jobs.sgul.ac.uk](http://jobs.sgul.ac.uk) General enquiries can be made to the Recruitment Team on 020 8725 5020 (24-hour answerphone) or email: jobs@sgul.ac.uk

Please quote reference: 418/09.
Closing date: 14 July 2009.

No agencies please.

Applications for this position can only be processed if made through the SGUL website [http://jobs.sgul.ac.uk](http://jobs.sgul.ac.uk)

Up to 1.65 Million EUR for Research in Germany
Alexander von Humboldt
Stiftung / Foundation

The Sofja Kovalevskaja Award enables young researchers to spend five years in Germany working on high-profile, innovative research. Application is open to all nationalities and disciplines. Applicants must have completed a doctoral degree with distinction within the past six years and have published in prestigious international journals or academic presses.

The funding – up to 1.65 million EUR per award – enables exceptional junior scientists and scholars with outstanding research records to concentrate on high-level research in Germany, virtually free from administrative constraints. Funding, provided over five years, allows recipients to:

• Conduct independent research.
• Finance a research team at a German university or research institution of their choice. • Cover their living expenses.

The application deadline is October 15, 2009; up to eight awards will be granted in 2010. For application forms and detailed information, see: www.humboldt-foundation.de

[2715-050 (2009) : 67]
Do you have a low carbon technology that needs help to grow?

If you have an innovative, carbon-saving technology with commercial potential we can help you cultivate it. Our Business Incubator provides up to £70,000 of hands on support to help start ups get the early stage investment, licence agreements and partnerships they need to grow.

We also offer grants of up to £500,000 and expert advice to any business, university or research institution with a compelling low carbon technology idea. Applications for the Applied Research Scheme are being accepted until 17th September 2009.

Visit www.carbontrust.co.uk/innovations for more information.

ACT ON CO2
Join the low carbon world
The Carbon Trust is funded by the UK Government
CARBON TRUST
[2719-001 (2009) : 11]
ADVERTISING FEATURE

Wanted: your smartest ideas

The world is on the cusp of a low-carbon revolution: the threat of global warming means we must dramatically reduce our emissions of greenhouse gases, especially carbon dioxide. The Carbon Trust wants UK researchers and companies to be prime architects of that low-carbon world. The UK has never been short of novel ideas, and the trust’s role is to help develop them into products and bring them to market – and to do it quickly. The Carbon Trust Innovation Awards turn the spotlight on the best of UK ingenuity. So if you are developing, providing or using low-carbon technology in an innovative way, now is your chance to gain recognition and help transform the way the world consumes energy.

JASON HAWKES/CORBIS
SETH GOLDFARB/PHOTONICA

ENTER THE AWARDS
There are six categories

Power
Technologies that will help to replace existing power supplies with low-carbon alternatives

Buildings
Ways to reduce demand for energy in buildings and to generate power or heat on site

Transport
Solutions for travelling farther on less energy

Industry
Low-carbon technologies that can benefit a wide range of industrial users

Private sector end-users
Innovative thinking in the application of low-carbon technologies, whether in a large or small business

Public sector end-users
Novel application of low-carbon technologies in a public sector or not-for-profit organisation

A CAUSE FOR CELEBRATION
If you win, you gain the chance to showcase your ideas to buyers, investors and providers. The awards also attract media coverage worth some £50,000.

That recognition has proved to be a real boon for past winners. In 2005, two academics from the University of Oxford won an Innovation Award for creating catalysts that make it easier to produce clean fuels. “It was great to have our profile raised and to gain an endorsement from a solid, expert organisation” says Will Barton, Chief Operating Officer at what is now Oxford Catalysts. On the back of the award, the company launched its public offering. Today it employs 90 people and has diversified into many areas of clean-fuel production.

WHO CAN APPLY?
The awards are open to individuals, teams, departments and entire organisations. You may be in a university, R&D organisation, company – large or small – or a public sector organisation.

For more information and to enter, go to www.carbontrust.co.uk/awards

The closing date for entries is 9 October 2009
"By 2015 the UK Clean Tech sector could be worth £127 billion and employ more than a million people. Can you afford to miss such an opportunity?"

Guy’s and St Thomas’ NHS Foundation Trust

**Senior Medical Technologist**
Band 6, £29,797 - £39,516 pa inc.

**Medical Technologist**
Band 5, £24,852 - £32,207 pa inc.

Guy's and St Thomas' Hospital, Department of Clinical Physiology provides the technical support service to critical care, comprising of an adult intensive care unit (one of the largest in Europe), paediatric and neonatal intensive care and high dependency units. These units have a worldwide reputation for clinical excellence in tertiary care provision.

This is a unique opportunity to work in a technical department that supports all these disciplines of critical care. We are looking for enthusiastic and motivated technologists to join our expanding team.

Duties will involve maintaining all medical equipment within these increasingly high-tech areas, including testing, calibration of equipment, performing physiological measurements, assisting in diagnostic procedures and supporting an extensive research programme. There will be a requirement to work nights and weekend shifts.

For the senior position, you will have to demonstrate relevant work experience or a proven track record in critical care. The junior position will require a degree in a relevant science subject and a major interest in instrumentation and technology. Computer literacy would be an advantage. All necessary training will be provided; this may also include release to university for society and professional exams. Progression to the senior grade is possible after training, completion of our log book and a period of consolidation.

For any queries or to arrange an informal visit, contact David Pierre, Head of ICU Technical Services, on 020 7188 3037 or Gary Thomson, Chief Medical Technologist, on 020 7188 1616 bleep 2619.

For further information and to apply online, please go to [www.gstt.nhs.uk/jobs](http://www.gstt.nhs.uk/jobs) quoting reference number APS0341 for the Senior Medical Technologist or APS0342 for the Medical Technologist.

AdInstruments
making science easier

AdInstruments manufactures the PowerLab range of computer based data acquisition and analysis systems, used by scientists in universities and research institutes worldwide. Since its inception in 1988, AdInstruments has become one of the leading manufacturers of hardware and software for life science research and education; we are respected throughout the world for our innovation and exceptional quality.

AdInstruments is expanding and currently requires three enthusiastic self-motivated individuals to join our European education sales team, working for the UK office.

Education Sales Specialists (x3)
UK South - (reference ADI -136)
UK North - (reference ADI - 137)
France - (reference ADI -138)

As an education sales specialist for AdInstruments you will be expected to sell, advise and train our education customers on the full range of teaching products, including the innovative LabTutor software. Our teaching equipment is used in the majority of UK universities including Cambridge, Oxford, Birmingham, and London University.

Key Duties / Responsibilities:
• Sell AdInstruments education product range into higher education
• Develop appropriate selling skills consistent with the company philosophy, policies and procedures
• Advise and train our existing and new educational customers, on our hardware and software
• Promotion of LabTutor into new education markets,
• Maintain market awareness, develop and present new ideas and opportunities in the education sector.
• Develop and execute an annual sales plan for managing assigned territory, updated quarterly.
• Assist with educational customer training workshops.

Required Qualifications and Skills:
Applicants should have a passion for science and hold a science-based degree (ideally in life science), or have several years experience working in the science higher education sector. Previous experience of AdInstruments hardware and software is an advantage but not essential as full training will be provided. This is an exciting and diverse role where personal impact counts; the key to success will be your applicable scientific knowledge, flexible approach and excellent communication and presentation skills along with your ability to influence others. To apply for the position in France, applicants must be fluent in both English and French, and preferably be of French nationality.

Location and Terms of Offer
The UK south position will be based out of our offices in Oxfordshire. The UK North and French positions are both field based, and applicants should already reside within their required territory. All positions will involve regular travel throughout the required territory, a company car will be provided. Salary for all positions will be dependent on relevant qualifications and experience, but will be in the range of £19 - 24,000 basic, forming part of a package commensurate with a field based sales position.

Please apply in writing (state the reference of the job you would like to apply for), enclosing your CV and current salary to:
General Manager, AdInstruments Ltd, 56 Monument Business Park, Chalgrave, Oxfordshire, OX44 7RW. e-mail: jobs.uk@adinstruments.com

**POSITIVE ABOUT DISABLED PEOPLE PRACTICE**
Saving lives together
As global demand for food and fuel continues to rise, we are dedicated to our purpose: Bringing plant potential to life. Syngenta is one of the world's leading companies with more than 24,000 employees in over 90 countries. We work in a collaborative and inspiring culture where personal contribution is rewarded and growth and development are at the heart of our culture. Through our world-class science, global reach and commitment to working with our customers, we help to increase crop productivity, protect the environment and improve health and quality of life.

There's never been a more important time to join Syngenta.

Experience complexity. Achieve your potential.

Jealott's Hill, Bracknell, Berkshire, United Kingdom

**Analytical Trait Physiologist**  
£28,000 - £34,500 + excellent benefits  
A new role has been created to help expand our capabilities to support key breeding programmes. If you have a higher degree in biochemistry or food sciences and a proven ability to work with and analyse complex datasets in a plant nutrition/biochemistry or food science research context, this could be a turning point in your career. You will be responsible for coordinating and managing studies across a range of vegetable crops to enhance nutritional value whilst supporting the team with data interpretation and analysis. Some international travel can be expected.

We also have two exciting opportunities for scientists who are motivated by the challenge of developing and applying xenobiotic metabolism expertise in a stimulating multi-disciplinary environment. Working alongside experts in related toxicology and metabolism disciplines, the successful candidates will have the opportunity to develop their own expertise further whilst making a critical contribution to the selection and development of new agrochemicals.

**ADME**  
£34,000 - £42,000 + excellent benefits  
You will take responsibility for the design, delivery and interpretation of ADME study packages as well as making a key contribution to the further development of our ADME capabilities. You will also enjoy the opportunity of broadening your role to include related aspects of metabolism in other biological systems. Ideally, you have post-doctoral, or equivalent, experience in a field related to ADME or DMPK with a background in pharmacy, pharmacology, biological or medicinal chemistry.

**Biotransformation**  
£34,000 - £42,000 + excellent benefits  
Ideally you have post-doctoral, or equivalent, experience in organic, analytical, medicinal or natural products chemistry and are keen to use this as the foundation for a career in metabolism. You will gain broad experience in the design, conduct and interpretation of xenobiotic metabolism studies in plants, animals and environmental systems and will have an outstanding opportunity to develop and apply your chemistry expertise in elucidating biotransformation pathways of candidate agrochemicals.

Exceptional candidates with similar backgrounds to those described but with less experience will also be considered.

In return, you can look forward to an attractive rewards package and excellent opportunities for career development.

To apply online please visit [www.Syngenta.com](http://www.Syngenta.com) and navigate to our vacancies via the career page.

ACCELERATING DRUG DEVELOPMENT. ARE YOU INTERESTED?

Stevenage, UK or North Carolina, US

GSK's approach to drug development is at the forefront of industry thinking and within our global Chemical Development group, scientists and engineers have a real impact on one of the most promising drug pipelines in the industry.

We are continuously evolving and now want to develop new approaches to our Active Pharmaceutical Ingredients (API) and excipient(s) in order to enhance the performance of our medicines. Through our commitment to a deep understanding of the underlying science we also wish to implement technological solutions aimed at simplifying our manufacturing processes with particular emphasis on the interface between API and Drug Product preparation.

To progress these exciting areas we are looking to enhance our current skills in:

Physical Chemistry: with the aim of gaining better fundamental understanding of new approaches to make API particles, expertise in nano-particles design and/or processing including work with high pressure systems (e.g. homogenization) and harvesting of nanoparticles is of particular interest.

Material Sciences: with the aim of gaining a better understanding of how mechanical and surface properties can be used in the design of our drug substance and Drug Products. Expertise in solid state thermodynamics (e.g. glass transition for amorphous and plasticization in hot melts, and molecular modelling) and in formation and use of lipids/emulsions is of particular interest.

Crystallography: with the aim of using fundamental molecular understanding to better design API characteristics. Expertise in preparation and characterization of co-crystals and molecular dispersions to enhance solubility is of particular interest.

Chemical Engineering: In this area we are interested in hearing from you if you have experience of Process/Mechanical/design engineering applied to understanding and industrializing new equipment types with emphasis in high pressure systems for materials of construction_SCALEABILITY/robustness.

Additionally, you could have expertise in Process control engineering with experience in the development and implementation of control systems/software for laboratory, pilot plant and full scale equipment.

For each of these roles, ideally your experience would also include the design, scale-up and optimization of processes and technologies supporting Drug Substance and Drug Product development and manufacture.

These roles can be based at either of our research sites in Stevenage in the UK or Research Triangle Park, North Carolina in the US. We have opportunities both for high level technical experts and also for those who additionally have leadership experience. We would anticipate that your expertise would have been gained either in an industrial setting or within a key academic group and you will probably have been educated to Ph.D. level.

GlaxoSmithKline is dedicated to an innovative workplace and supports you with career-long opportunities and learning. We offer competitive benefits and a compensation package designed to attract and retain the very best.

If any of the above areas are of interest to you then please apply online and in full confidence at www.gsk.com/careers referencing Req ID 54766.
GSK is proud to promote an open culture encouraging people to be themselves and giving ideas a chance to flourish. We are an equal opportunities employer and welcome applications regardless of gender, age, ethnicity, disability, sexual orientation, country of origin or country of application.

Together we can make life better.

POSITIVE ABOUT DISABLED PEOPLE
[2719-009 (2009) : 51]
Investigator Scientist

Investigations into the mutagenesis of a novel binding site at the N-terminal domain of the GluR2 subunit on the AMPA receptors.
£25,622 - £31,358 per annum
Fixed term for 2 years
Ref: ANU09/368

Applicants are sought for a research position to work with Dr R.A.J. McIlhinney at the Anatomical Neuropharmacology Unit in Oxford. The post is funded by a two year MRC GAP funding initiative and is to determine the functional role of a novel binding domain identified in the Amino Terminal Domain (ATD) of the AMPA receptors. The successful applicant will carry out site directed mutagenesis of this domain and determine the consequences of these on receptor assembly, trafficking and function. Experience in molecular biology and cell culture is essential and some experience in measuring intracellular calcium or determining ligand binding would be advantageous.

The successful applicant will liaise with Dr Radu Aricescu (Wellcome Centre for Human Genetics) and use his structural information to guide the mutagenesis.

For an overview of the group's work, see web site [http://mrcanu.pharm.ox.ac.uk](http://mrcanu.pharm.ox.ac.uk)

We offer optional membership of MRC pension scheme and 30 days annual leave.

Candidates holding a degree or doctoral degree in cell biology, molecular biology or biochemistry and with relevant experience are invited to apply.

Closing date: 21 August 2009

Deputy Manager of BMSU plus Research Support

£19,624 - £26,043 per annum pro rata Ref: ANU09/355

We are seeking a person to act as deputy in our BMSU and to provide research support to the group of Dr Marco Capogna ([marco.capogna@pharm.ox.ac.uk](mailto:marco.capogna@pharm.ox.ac.uk)) studying the physiological and anatomical properties of specific regions of the brain.

This is a part time position covering 27 hours per week. The role is broken down approximately as follows: up to 60% BMSU duties, 40% neuroscience research including immunohistochemical experiments, preparation of neuronal cultures, maintenance of tissue culture areas plus additional laboratory management.

For an overview of the Unit's work, see web site [http://mrcanu.pharm.ox.ac.uk](http://mrcanu.pharm.ox.ac.uk)

This is a permanent post with an initial probationary period. We offer optional membership of MRC pension scheme and 30 days annual leave.

Candidates with a degree or equivalent in a relevant field and/or IAT qualifications are invited to apply.

For further information about the MRC please visit [www.mrc.ac.uk](http://www.mrc.ac.uk)
Closing date: 7 August 2009.

Applications for these roles must be made online at http://jobs.mrc.ac.uk Please ensure you include a copy of your CV, covering letter and contact details for three professional referees within your application. If you do not have internet access or experience technical difficulties, please contact 01793 301049 quoting the relevant reference number.

Opportunities at the Sanger Institute

The Wellcome Trust Sanger Institute has an expanding scientific programme dedicated to using natural and experimental genetics to understand the role of genes in health and disease.

We are currently seeking candidates for the following positions:

- Computational Biologist/Software Developer Experimental Genetics of Malaria
- Postdoctoral Fellow - Computational Genomics
- Postdoctoral Fellow - Experimental Genetics of Malaria
- Postdoctoral Fellow - Statistical/Computational Biologist
- Postdoctoral Fellow - Neurobiologist
- Research Associate - Computational Genomics (maternity cover)
- Senior Programmer - Genome Annotation Software - Ref. 80400/80387

For all of our positions, we offer a comprehensive range of benefits including a final salary pension scheme and excellent on-site facilities.

For more details on any of the positions above and to submit your CV and apply online please go to [https://jobs.sanger.ac.uk](https://jobs.sanger.ac.uk).

Novacta BIOSYSTEMS

Novacta Biosystems Ltd., based in Welwyn Garden City UK, is a leading antibacterial research and development company with a successful industrial biotechnology division providing innovative bioprocess development services.

We seek to fill a number of positions in our therapeutics research and industrial biotechnology divisions:

Senior Microbiologist
This is an outstanding opportunity for an experienced microbiologist to lead Novacta's antimicrobial evaluation activities. You will be a senior member of the scientific team reporting directly to the CSO. You will have a Ph.D. in a relevant discipline together with several years of experience in antibacterial drug discovery and development.

Development Programme Manager
Reporting to our Director of Therapeutic Projects you will coordinate and manage external research activities in Novacta's preclinical and clinical development programmes. You will be responsible for establishing detailed development plans, managing relationships with CROs and monitoring and reporting progress. Experience working as a Project manager in Pharmaceutical Development and a relevant scientific background are essential.

Medicinal Chemist
You will be responsible for the design and synthesis of new antibacterial agents based on natural products. A Ph.D. or equivalent experience in synthetic organic or peptide chemistry is essential. Previous experience of working in a medicinal chemistry environment would be an advantage.

Natural Product Chemist
You will be responsible for the isolation and characterisation of natural products. Experience of analytical and preparative hplc is essential together with strong mass spectroscopy skills. The ideal candidate will have a Ph.D. or equivalent skills and a background in natural products research.

Microbiologists
You will be responsible for small scale fermentation, analysis and antimicrobial testing. A degree in an appropriate discipline together with laboratory experience is required.

Molecular Biologists - Metabolic Pathway Engineering
You will have a Ph.D in biochemistry or a related discipline and join a team involved in the genetic engineering of microorganisms for the production of natural products, biofuels and commodity chemicals. You must have experience of cloning and manipulating genes preferably in microbial systems. Experience with yeast would be an advantage but is not essential.

Chemists - Biocatalysis Team
You will be responsible for the development of biocatalytic processes and isolation of reaction products. Experience of analytical hplc and preparative chromatography would be beneficial. You will have a BSc or Ph.D. in chemistry, analytical chemistry or a related discipline and strong mass spectroscopy skills.

Biochemists - Biocatalysis Team
You will be responsible for the identification of biocatalysts by screening microorganisms and for the development of biocatalytic processes using whole cells or isolated enzymes. You will have a BSc or Ph.D. in biochemistry or a related discipline. An interest in chemistry would be beneficial.

Please send your CV and covering letter electronically to the Human Resources Manager at mail@novactabio.com
Daresbury Science & Innovation Campus

Developing Daresbury as a National Science and Innovation Campus – Next Generation

Already a centre of excellence delivering world-class science. Daresbury Science and Innovation Campus is moving into a new and exciting phase.

This high profile development will bring together high-tech businesses, universities, research organisations and industrial partners with the business support and investor community, to create more than 10,000 jobs.

Campus stakeholders include the Science & Technology Facilities Council (STFC), one of the seven UK research councils. As part of an overall £104 million government investment earmarked for Science and Technology Gateway Centres, more than £60 million is planned for investment in the Daresbury Campus for STFC to establish centres for detector systems and computational science and engineering.

The Campus is home to nearly 100 companies (based in the Daresbury Innovation Centre) typically from the biomedical, digital/ICT and advanced engineering sectors, which grew sales at an average of 67% last year. Plans are underway, for a 35,000 sq ft 'grow-on' facility enabling existing companies to grow and attracting new companies onto Campus.

For further information please contact Paul Aldridge, Partner, King Sturge Consultancy on 0161 238 6232 or Paul.Aldridge@kingsturge.com or visit www.daresburysic.co.uk/thejointventure

Joint Venture Opportunity
STFC along with the other stakeholders Northwest Regional Development Agency and Hafton Borough Council, is now seeking a partner to develop the potential of the Campus. This is a unique, long-term opportunity for a private sector business or consortium to develop up to 1 million square feet of space for business, research and innovation, provide facilities management and other services to the Campus and potentially realise commercial services and investment opportunities with the Campus companies.

It is expected that the joint venture company will be in place and ready to move forward with the next stage of the development by May 2010.

[2719-016 (2009) : 54]
The Coca-Cola Company is the global leader in nonalcoholic ready-to-drink beverages providing more than 1.3 billion servings per day in over 200 countries around the world. To accelerate innovation and business expansion, we are enhancing our research capabilities with the following positions:

**Senior Scientist, Fermentation Research**
- Responsible for supporting strategic objective-setting, recommending tactical research approaches, driving execution of experimental goals, and leading fermentation research projects/team.
- Ph.D. in Industrial Microbiology/Fermentation, Microbial Biochemistry, or Food Chemistry/Science is preferred. A MS degree with significant experience in relevant area(s) will be considered.
- 2-5 years practical fermentation experience in the Food and Beverage (preferably not in beer brewing industry) or Pharmaceutical industry is preferred. Lesser experienced candidates with outstanding education and training will be considered.

**Technician, Fermentation Research**
- Responsible for supporting laboratory-based execution of fermentation research goals including performing internal research, routine laboratory procedures/maintenance (strain curation, media preparation, fermentation process, HACCP monitoring and record keeping), and laboratory management/up-keep.
- BS/MS or a Technical High School degree in Microbiology, Industrial Microbiology or Microbial Physiology.
- Training and background must include hands-on microbiological experience, preferably in an industrial setting.

The above positions will be based at our Fermentation Center of Excellence in Au, Germany (Bavaria). Applicants should have demonstrated technical leadership skills paired with strong attention to team work, excellent communication and strategic thinking. All candidates should be fluent in English.

Coca-Cola offers a competitive salary, excellent benefits and an opportunity to work in an exciting interdisciplinary team environment.

For consideration, please submit your resume on-line by going to [www.thecoca-colacompany.com](http://www.thecoca-colacompany.com), click "Careers", click "Career Opportunities", click "Europe", click "Go" to search jobs, in the Search box type the respective JOB TITLE above for the opportunity you wish to submit your resume, click search.

There is no single formula for passion; what defines The Coca-Cola Company's people is the ability to convert their passion into action. It's how they push the world's greatest brands to new heights.

What’s your secret formula?

NewScientist Jobs
[2719-018 (2009) : 56]
Health Protection Agency

The Health Protection Agency (HPA) is an independent body that protects the health and well-being of everyone in England and Wales. The Agency plays a critical role in protecting people from infectious diseases and in preventing harm when hazards involving chemicals, poisons or radiation occur. We also prepare for new and emerging threats, such as a bio-terrorist attack or a virulent new strain of disease.

Principal Healthcare Scientist • £44,258 - £54,714
Addenbrooke's Hospital, Cambridge

An opportunity has arisen for an experienced post-doctoral scientist to carry out and oversee innovative research, enabling our expansion into molecular diagnostics targeting bacterial pathogens and their associated antibiotic resistance profiles. You will be equally at home undertaking basic or applied research and your work will support the development and testing of new diagnostics, facilitate research carried out by all members of staff and expand upon existing academic collaborations.

In partnership with Cambridge University, the recent establishment of the first academic unit of medical microbiology in Cambridge offers an unrivalled opportunity for research collaborations.

You must have a Ph.D., a keen interest in clinically applied research and a strong background in molecular biology/microbial genetics with particular experience in molecular epidemiology and diagnostics. Knowledge of bioinformatics, comparative genomics, micro-arrays and whole genome sequencing would be a considerable advantage. Experience of leading a small research team and applying for funding is essential. You must be flexible and committed, possess excellent communication skills, have the ability to organise your own work to meet objectives and be capable of working both independently and as part of a team.

Post ref: 919- RMN-MM-1332824.
Closing date: 14 August 2009.

Principal Radiation Protection Scientist • £37,996 - £45,596
Centre for Radiation, Chemical and Environmental Hazards (CRCE), Chilton

You will lead a small scientific team that operates UK's leading radon measurement laboratory, providing measurement, inter-comparison and validation services. You will be responsible for applying and developing computational methods for mapping radon in homes. You will be expected to take responsibility for, developing and managing research projects including planning, experimental design, data analysis etc.

You should have a good honours degree in a relevant scientific subject, preferably physics, and a higher science degree or equivalent experience; proficiency in computational programming; and experience in managing a scientific team.

For an informal discussion, please contact the Group Leader, Jon Miles on 01235 822797 or by email: jon.miles@hpa.org.uk

Post ref: 919-CH-NF-6032367.
Closing date: 13 August 2009.

For further information about either role, and to apply, please visit our website www.hpa.org.uk/careers

The Health Protection Agency promotes diversity in the workplace and is an equal opportunities employer. If you require this document in large print, please email: hpa@tmpw.co.uk

[2719-019 (2009) : 57]
**Senior Hydrogeologist**
£30,710 - £37,120 p.a. depending on qualifications and experience

The British Geological Survey, part of the Natural Environment Research Council, is the UK's premier geoscience strategic mapping and research organisation. Based at our offices in Belfast, Northern Ireland, this post is established under a Service Level Agreement between Geological Survey of Northern Ireland (GSNI) and the Northern Ireland Environment Agency (NIEA).

You will provide technical and regulatory hydrogeological advice and support to NIEA Water Management Unit and the GSNI and will be responsible for instigating and managing a broad range of hydrogeological projects. In addition you will also provide professional support and mentoring for the GSNI hydrogeologist.

You will have an honours degree in Geology or an Environmental/Engineering degree with a major geological component together with an MSc or Ph.D. in Hydrogeology, or able to demonstrate significant experience in the understanding and use of a wide range of hydrogeological data and information. You should also have experience in a consultancy, academic, governmental or regulatory position where use, analysis and understanding of hydrogeological information was/is a major part of day-to-day duties. In addition you should have an ability to learn new concepts and approaches as required, to deliver the appropriate level of service to customer/clients.

Working hours will be 37 per week excluding lunch breaks.
A generous benefits package is also offered, including a company pension scheme, childcare allowance, 30 days annual leave plus public and privilege holidays.

For an application form contact Personnel (Recruitment), British Geological Survey, Keyworth, Nottingham, NG12 5GG. (Tel: 0115 936 3209). Further details can also be obtained by accessing our web page at [www.bgs.ac.uk](http://www.bgs.ac.uk). Applications must be returned by 7 August 2009. Please quote reference no.550/BL/09/01 when applying for an application form.

The Natural Environment Research Council is an equal opportunities employer and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome. The British Geological Survey is an Investors in People organisation. There is a guaranteed Interview Scheme for suitable candidates with disabilities.

University of Surrey & Sony Computer Entertainment Europe
EPSRC Industrial Doctorate Centre (IDC)
Engineering Doctorate (EngD) in Sustainability for Engineering and Energy Systems
Life-cycle energy management of games consoles

With increasing public and political concern over climate change, legislation aimed at limiting and reducing energy use is increasing. Starting from a focus on reducing greenhouse gas emissions within the life-cycle of PlayStation products, the aim of this four year research project is to identify opportunities for reducing greenhouse gas emissions in the life-cycle of gaming products and services. The successful candidate will be based at Sony Computer Entertainment's European Headquarters in London, which is responsible for the sales, marketing and distribution of PlayStation products in 109 countries world-wide, and will have direct involvement in the company's projects in this area.

Subject to EPSRC eligibility, the EngD Research Engineer will receive a tax-free stipend in excess of £18,000. Candidates should have a good 1st/2i or MSc) science or engineering degree, and an aptitude for systems-based thinking. While not essential, previous industrial experience would be an advantage, as would specific experience and knowledge of climate change, life-cycle assessment, and / or environmental regulations affecting products and packaging.

The closing date for applications is 3rd August with interviews held on the 10th and 11th of August. The successful candidate will commence their EngD in September.

For an EngD information pack, full project details and an application form, please contact:

We welcome applications from all sections of the community. People from ethnic minorities are currently under-represented and their applications are particularly welcome. There is a guaranteed interview scheme for suitable candidates with disabilities.
MRC T
MEDICAL RESEARCH COUNCIL TECHNOLOGY
BUSINESS MANAGER
CENTRAL LONDON £42-47K

Medical Research Council Technology (MRCT) is the technology transfer company of the UK Medical Research Council (MRC) and is responsible for the development and commercialisation of some of the finest biomedical research in the world.

MRCT is seeking an experienced Business Manager, to join the Intellectual Property and Business Development division.

You will be a Business Manager educated to post-doctoral fellowship level with post-doctoral research experience in the field of genetics, biochemistry or cell biology. A background in biomedical sciences within a large, complex organisation is highly desirable. You will have proven experience in the evaluation and commercial development of new opportunities, including identification and management of intellectual property, together with an in depth knowledge of the patent process. You will also have a track record of interaction with industry involving creative deal making and project management.

Ideal candidates will have an excellent knowledge of the patenting process, extensive experience of liaising with industry or will have worked in industry in a technology transfer, business development or academic liaison capacity.

Your salary will be determined by qualifications and experience, in addition MRCT offers a final salary pension scheme, private health insurance and 28 days paid holiday per year.

The position will involve frequent travel within the UK and occasionally abroad.

To apply please email your CV and covering letter to: recruitment@tech.mrc.ac.uk or by post to Recruitment, MRC Technology, 1-3 Burtonhole Lane, London NW7 1AD (electronic applications preferred).

For further information visit: www.mrctechnology.org
Closing date: Friday 7th August 2009
[2719-033 (2009) : 61]
**Delivery Leader**, Statistics
From £29,000 to a target rate of £37,000 with opportunity to rise to a Higher Performance ceiling of £39,750
Leeds, Peterborough or Cheltenham • Ref: IRC 40457

Natural England works for people, places and nature, to enhance biodiversity, landscapes and wildlife in rural, urban, coastal, and marine areas; promoting access, recreation and public well-being and contributing to the way natural resources are managed so that they can be enjoyed now and in the future.

The post is part of the Evidence team, which provides a national expert service for natural and social sciences across Natural England and to our external partners. We support delivery across Natural England through application of our specialist expertise and services.

You will play a key role in leading Natural England's use of statistics nationally and developing our capacity to use statistical evidence effectively and appropriately as part of our drive to deliver environmental leadership. You will work closely with and support other analysts in Evidence dealing with social, economic and natural environment data.

**Key responsibilities:**
• Project manage survey work
• Statistical quality assurance of commissioned data collection, reports and analyses
• Lead for Natural England on compliance with the Statistics Act
• Provide advice and guidance to others using statistics and statistical analyses
• Provide training and develop a network of statistics users in Natural England
• Lead the adoption of appropriate statistical techniques in Natural England – including spatial statistics.

To receive an application pack please email: ssd.nerecruitment@defra.gsi.gov.uk Email correspondence is preferred. Please quote the appropriate reference. Alternatively, contact Natural England Recruitment, Shared Services Directorate, Room 212, 2nd Floor, Foss House, Kings Pool, 1-2 Peasholme Green, York YO1 7PX. Tel: 0845 603 7262.

Closing date: 20th August 2009.
Interview date: w/c 31st August 2009.

Natural England is an equal opportunities employer and welcomes applications regardless of gender, race, disability, age, religion or sexual orientation.

**POSITIVE ABOUT DISABLED PEOPLE**
[2719-034 (2009) : 61]
In the Netherlands, two marine research institutes, NIOZ Royal Netherlands Institute for Sea Research and the Centre of Estuarine and Marine Ecology of the Netherlands Institute of Ecology (NIOO-CEME), have decided to join forces in 'FOKUZ' to further strengthen their already prominent international positions in fundamental marine research.

Within the cooperation programme FOKUZ, 'Fundamenteel Onderzoek Kust en Zee' (Fundamental Research on Seas and Coasts), the two institutes will develop a joint research programme on the following topics:

- The physics, biogeochemistry and ecology of small particles in the North Sea.
- Biogeochemical cycles in relation to climate change and eutrophication.
- The role of biodiversity in ecosystem functioning.

For more information consult the websites: [www.fokuz.nl](http://www.fokuz.nl)  [www.nioz.nl/scienceplan](http://www.nioz.nl/scienceplan)  [www.nioo.knaw.nl/science](http://www.nioo.knaw.nl/science)

Acquisition is not appreciated.

NIOZ Royal Netherlands Institute for Sea Research is a research institute part of the Netherlands Organization for Scientific Research NWO. NIOZ was founded in 1876 and is one of the oldest marine institutes in Europe. Its mission is to gain and communicate scientific knowledge on seas and oceans for the understanding and sustainability of our planet, and to facilitate and support marine research and education in the Netherlands and Europe.

The Department of Biological Oceanography (BIO; head of department Dr. M.J.W. Veldhuis) performs research on chemical and microbial processes in the marine environment, and is composed of approximately 30 people. We offer a Tenured position for a

**MICROBIAL ECOLOGIST (M / F)**

with a strong research interest in marine biogeochemical fluxes, or molecular/functional microbiology.

In particular, we are looking for a highly qualified and motivated candidate with a Ph.D. degree in microbial ecology or a closely related field, with at least 4 years of post-doctoral research experience. The applicant is expected to create an internationally highly visible focal point of marine microbiology at NIOZ and initiate new projects in this field by acquiring external funding. Preferably the applicant has a scientific profile complementary to the existing staff. Examples are expertise in biogeochemical fluxes of major and minor elements to and from organisms of the lower trophic levels, the efficiency of the microbial food-web and biological regulation and physiochemical forcing of microbial dynamics.

The applicant should have both theoretical and practical knowledge of the microbial processes in the oceanic food-web and a good general knowledge of ocean ecology and biogeochemistry. Experience with modern techniques in molecular ecology is required. The applicant should build up an own research team within the BIO department in cooperation with existing staff. Since NIOZ is a multidisciplinary institute, collaboration with geologists, biogeochemists and physicists is encouraged.

The applicant should have a keen interest in both laboratory and sea-going research and experience with supervision of Ph.D.’s, undergraduates and technicians. The position is a tenured one at the level of senior scientist. Criteria for evaluation comprise a track record of publications that is well
above average, the ability to acquire funding, and building of an international network and reputation.

Further information on this position can be obtained from Dr. Marcel Veldhuis (e-mail: marcel.veldhuis@nioz.nl), phone: 0031 (0)222 36 95 12. More information about the research and our institute see: www.nioz.nl

We offer a permanent scientific staff position. The salary and terms of employment are in accordance with the "CAO-Onderzoeksinstituten" and also based on qualifications. The salary will include an incremental raise for each subsequent year. Besides the salary, NIOZ offers attractive and flexible terms of employment, like a collective health insurance, pension-fund, and initial help with housing for foreigners.

Applications, consisting of a cover letter, a curriculum vitae, a list of publications, a list of references and a short description of (future) research interests, should be sent at the following address: Mrs. Jolanda Evers (Personnel & Organization), P.O. Box 59, 1790 AB Den Burg, Texel, The Netherlands, e-mail: jobs@nioz.nl.

Closing date: 1 September 2009 or until a qualified candidate is identified.

New Scientist Study
[2719-037 (2009) : 63]
UNIVERSITY OF CAMBRIDGE
JM
Johnson Matthey Catalysts

Ph.D. CASE Studentship
Carbon Nanotube Growth Mechanisms and Applications

Carbon nanotubes are nanometer diameter tubes of carbon over a thousand times as long. They are a new nanosized form of carbon with fascinating properties making them interesting and important future materials. They are light, yet immensely strong with good heat transfer properties and electrical conductivity. Their electronic properties mean they have potential applications in electronic devices. With a suitable catalyst, carbon nanotubes can be grown from gaseous hydrocarbons. However, although intensely researched, the growth mechanism is not completely understood.

This project will elucidate the mechanisms of carbon nanotube formation from gaseous hydrocarbons using metal catalysts. The delivery of carbon to growing nanotubes will be explored theoretically and with a variety of modern techniques including high resolution electron microscopy. Particular conditions will be defined for making desirable types of carbon nanotubes, and they will be examined in electronic devices and as supports in platinum group metal catalysts. Here high surface area, controllable porosity, and possible functionalisation by ligands will be important parameters investigated. This exciting multi-disciplinary project will involve working in laboratories in Johnson Matthey and the University of Cambridge Engineering Department, where advanced research on nanomaterials has a high international reputation.

Candidates should have a first degree in chemistry, physics, materials science, or electrical engineering. The Studentship is EPSRC funded for UK students and for EU students resident in the UK for the last three years for educational purposes. Remuneration will be attractive at the EPSRC studentship rate with an additional industrial top-up. Please contact Professor John Robertson (tel 01223 748331, jro@eng.cam.ac.uk) with your CV before 22 August 2009, at Electrical Engineering Division, Engineering Department, 9 JJ Thompson Avenue, Cambridge, CB3 0FA. The studentship is available now, but a starting date up to and including 1 January 2010 is acceptable.

The University is committed to Equality of Opportunity.

University of BRISTOL

The Eglinton Ph.D. Scholarship
Bristol Biogeochemistry Research Centre

This prestigious studentship will be based in the Organic Geochemistry Unit of the School of Chemistry. The research will seek a better understanding of the molecular level phenomena which result in the preservation of biogenic organic compounds over geological time in sediments and fossil matrices.

Applications sought from suitably qualified chemists/biochemists with interests in environmental organic geochemistry and instrumental analysis, particularly chromatography and mass spectrometry applied to complex mixtures.

The studentship is fully funded and available from the 1st October 2009 to both UK and EU students. Stipend (tax free): £13,290 pa.

Reviewing applications begins on the 17th August.

Submit applications as a 3 page CV with covering letter to: Professor R Evershed (r.p.evershed@bristol.ac.uk) or by mail to: School of Chemistry, University of Bristol, Cantock's Close, Bristol BS8 1TS, UK

Dealing with the past protecting the future

The Nuclear Decommissioning Authority (NDA) is a public body charged with delivery of safe, sustainable and publicly acceptable solutions to the challenge of nuclear clean-up and waste management. The work we do is of vital importance and has positive long-term implications for the environment.

The Radioactive Waste Management Directorate is in the initial stages of implementing its work programme for the development of a geological disposal facility for radioactive waste, and we are seeking a highly experienced individual to provide authoritative scientific advice on this programme.

**Chief Scientific Advisor**

£70,000 pa plus bonus and relocation Harwell, Oxfordshire/Berkshire border

This role covers a comprehensive range of high level activities including reviewing and challenging the scientific programme to ensure that it is appropriate in direction, content and timing. Making significant inputs into the research and development strategy, the disposal system safety case, waste packaging studies, waste management strategies, site selection process and disposal system optimisation will be key elements.

You will be responsible for critical review of the research programmes to ensure that they provide a sound scientific basis for the development of disposal concepts and waste packaging proposals. This will include review and challenge of the safety assessment models to ensure they are recognised widely as being robust and balanced.

To undertake this role you will hold high level professional qualifications from respected institutions, which may include a Ph.D. Your background and proven ability of working on the scientific basis for radioactive waste management and your experience of geological disposal programmes will enable you to provide authoritative information on previous and present geological disposal programmes in the UK and overseas to regulators and Government officials with whom you will be an important interface. An independent, impartial and critical approach utilising the breadth and depth of your generic research experience will be key.

NDA

ASSISTANT EDITOR – Medicinal Chemistry and Bioanalysis

Future Science specializes in the publication of high-quality commentary and analysis in today’s key areas of research endeavour including Medicinal Chemistry and Bioanalysis.

Are you a qualified chemist or biochemist with an interest in science communication? We have created a new position for a trainee Assistant Editor to join our dynamic Editorial team working on our recently established titles in chemistry and pharmaceutical analysis. This position is a great opportunity for a motivated and enthusiastic graduate to establish a career in science publishing.

This role involves:
• The opportunity to work with the latest information across a broad range of areas including chemistry and bioanalysis
• Liaison with leading international researchers
• Management of the peer review process
• Interaction with internal functions and the commissioning team

No previous editorial experience is necessary as full training will be provided. An understanding of the importance of scheduling and an ability to work to strict deadlines is essential. The role is based in our North London offices, conveniently located close to Finchley Central tube station on the Northern Line.

Closing date: 22nd September 2009

Please submit a CV with cover letter explaining your interest in the position and salary expectations to the Editorial Director, Elisa Manzotti: e.manzotti@future-science.com

FUTURE SCIENCE

[2724-007 (2009) : 53]
PROJECT MANAGEMENT OFFICER
BT0
(Salary between £18k & £28k)

The British Trust for Ornithology is currently reviewing its project development team and seeking the right individual to take on a portfolio of responsibilities in the areas of project management, system development, quality assurance, project proposals and contract management. Candidates should have a minimum of a first degree or equivalent experience preferably with an academic background appropriate for working in a scientific organisation. At least two years project management experience is essential. This is initially a two-year post with a salary within the range of £18k to £28k. The precise role and the commensurate salary will depend on the skills and experience that the successful individual can bring to the team.

Closing date for receipt of applications is 1pm on Friday 18 September 2009. Further details from Sophie Foulger (Tel: 01842 768247; email jobs@bto.org) or from our website: www.bto.org/vacancies. Please quote reference NS/09-5.

[2724-008 (2009) : 53]
Head of Groundwater Science

Part of the UK Natural Environment Research Council, the British Geological Survey are looking for a visionary scientific leader to join our senior team in implementing a new strategy to consolidate and enhance our position as a world leading geological survey and environmental science research organisation. You will be expected to develop and communicate a near and long term vision for the Groundwater Science area, covering a range of activities from public policy to scientific research. You will have a good grasp of developing funding opportunities and strategies in research councils, government agencies and the private sector and should be able to act as a forward-looking spokesperson for BGS in the area of Groundwater Science.

You will have a track record of collaborations with academia, industry, government and other NERC centres. You should also demonstrate evidence of successfully developing Commissioned Research with a variety of clients, and be able to demonstrate an involvement in science and science policy through engagement with professional bodies, representation on advisory bodies, scientific evaluation boards etc. In addition you should ideally have experience of working overseas and be a chartered member of a relevant professional institution.

If you are interested, further details and an application form are available from Marion Squires, British Geological Survey, Keyworth, Nottingham, NG12 5GG. (Tel: 0115 936 3512, email masq@bgs.ac.uk). Further details can also be obtained by accessing our web page at www.bgs.ac.uk. Please quote reference HoS/KW/09/1 when applying.

Closing date for applications will be 30 September 2009. Interviews are expected to be held beginning of November.

The Natural Environment Research Council is an equal opportunities employer and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome. The British Geological Survey is an Investors in People organisation. There is a guaranteed Interview Scheme for suitable candidates with disabilities.

NATURAL ENVIRONMENT RESEARCH COUNCIL
POSITIVE ABOUT DISABLED PEOPLE
INVESTOR IN PEOPLE
WE HELP KEEP THE WORLD MOVING
[2724-009 (2009) : 53]
Innospec is an international specialty chemicals company with almost 1,000 employees in 23 countries and a turnover of $600 million. We divide our operations into three distinct business areas: Fuel Specialties, Active Chemicals and Octane Additives.

We have invested heavily in our people and our research and development facilities to encourage innovation at all levels of our business. Our aim is to create an environment that supports innovation and inspires people.

To support our ongoing development we now have several opportunities for Scientists in R&D.

**Polymer Scientist**  
c. £50,000  
You will be a technical expert within the field of Polymer science, with the expertise and knowledge to discover new polymers and take them from concept through to manufacture, and to develop and improve existing products; in line with current and future business opportunities.

A Ph.D. in polymer science (or equivalent), you will have a broad range of generalist polymer knowledge and ideally expertise in two different areas of polymer science. You will be a standalone expert within the company and externally, with the ability to liaise with academics and universities in the field of polymer science. Ref: 3408217

**Analytical Chemist (Registrations)**  
c. £33,000  
You will be responsible for identifying, co-ordinating and running appropriate test methods needed to support product registrations and subsequently reporting them in an appropriate form for submission to regulatory agencies. You will be responsible for running and validating analytical methods for impurity profiles and determining physical constants.

With a degree in Chemistry/Analytical Chemistry (or equivalent) you will have experience within a GLP environment and practical skills in chromatography and/or physical constant measurements. It is essential that candidates have experience in regulatory submissions for new products. This experience should include the identification of appropriate test methods. Ref: 3408221

**Synthetic Chemist**  
c. £32,000  
As a Synthetic Chemist, you will be required to research and design new molecules based on mechanisms of action, and be able to take them from concept through to reality. You will have the ability to manage experimental programmes, refine and improve current processes using appropriate literature and resources, and interpret findings for future developments.

With a BSc or Ph.D. in Chemistry (or equivalent), you will have relevant experience within synthetic organic chemistry, and the ability to supervise. Ref: 3408223

**Analytical Chemist**  
c. £29,000  
As an Analytical Chemist you will be required to provide skilled expertise in analysis of complex mixtures and products. Responsibilities will include the provision of data and characterisation of complex mixtures. You must have demonstrable ability to develop, validate and document analytical methods and particularly in operation and interpretation of GC/MS data.
With a degree in Chemistry/Analytical Chemistry (or equivalent), you will have relevant experience in a developmental analytical function with investigatory responsibilities, not QC and be able to demonstrate experience of working with complex mixtures.

Ref: 3408218

To find out more about these roles please apply or contact warrington.scientific@reedglobal.com or call 01925 424202.

Please be aware that all 3rd party applications will be forwarded to Reed Scientific.

Cadbury
srg
Placing People First

Cadbury work together to create magic and brands people love - are you expert enough to join them?

**Senior Scientist**, Chocolate & Cocoa Science
Competitive + On Target Bonus + Excellent Benefits
This role requires the delivery of world-class scientific understanding in the chocolate science and ingredient functionality in order to facilitate subsequent delivery of chocolate innovations and improvements to the Cadbury business. You will be developing ideas that can have an impact on the activities of Cadbury research and must validate these ideas by performing research and investigating external/internal sources.

Significant research experience in an area related to food science, either academia or in a FMCG company, is essential. You must possess the scientific knowledge and ability to become an expert in understanding ingredient functionality and its impact on texture and rheology and be capable of leading complex research projects with multiple stakeholders.

**Polymer Chemist**
Competitive + On Target Bonus + Excellent Benefits
Do you have extensive investigative Polymer Chemistry experience? Could you apply this to Confectionery & Chewing Gum? Would you like a challenging career by being responsible for leading and managing the Polymer competency to deliver radical innovation in process and product forms?

A background in physical/chemical sciences is essential, along with significant experience in scientific research project management with application of polymer chemistry within a FMCG environment. A proven track record of commitment in driving projects to a successful outcome and transferring the result into the mainstream manufacturing business is required. A Ph.D. or MSc is not essential but would be advantageous.

If you have the qualifications, experience and drive for either of these roles then apply now to Lisa Patient, Operations Manager – lisa.patient@srg.co.uk

Carliste Staffing plc trading as SRG is an employment business/agency.

Astex Therapeutics

Astex Therapeutics Ltd, based in Cambridge, UK is a world-leading biotechnology company utilising fragment-based drug discovery (FBDD). Astex has successfully progressed its first three oncology compounds into clinical trials and has recently extended its technology to anti-viral drug discovery. As a result of this continuing success we are now seeking to fill the following scientific positions:

**Senior Assay Biologist**
The role involves developing enzyme-based screening assays and the characterisation of compounds from Astex's drug discovery programmes. Candidates should be educated to Ph.D. level and/or have equivalent industrial experience. (Quote AB-09)

**Assay Scientist**
The role involves running enzyme-based screening assays. Candidates should be educated to degree level in a biology or chemistry-related subject and/or have equivalent industrial experience. (Quote AS-09)

**Bio-Chemoinformatics Scientist**
The role involves developing new scientific methodologies in the structural bioinformatics and chemoinformatics area and maintaining applications around our proprietary database platform. Candidates should have a relevant Ph.D. and several years of relevant industrial or academic experience. (Quote BCS-09)

**DMPK Scientist**
The role requires experimental competency in LC-MS/MS based bioanalysis and *in vitro* methodologies, plus an understanding of ADME principles and PK interpretation. An appropriate degree is required. (Quote DMPK-09)

**Postdoctoral Structural Biologists**
These roles are for contractual (one year renewable for a second year) scientists required to join our structural biology department, representing a tremendous learning experience at the start of a career in drug discovery. Candidates will have a Ph.D. and broad skills in molecular biology, protein science and protein science determination. (Quote SB-09)

Please send your application to: HR, Astex Therapeutics Ltd, 436 Cambridge Science Park, Milton Road, Cambridge CB40QA or email hr@astex-therapeutics.com

The closing date for applications is 25th September 2009.

A more detailed description of the vacancies can be found on the website: [http://astex-therapeutics.com](http://astex-therapeutics.com) [2724-012 (2009) : 55]
Exponent® International Limited

**Ecotoxicologist / Environmental Risk Assessment Specialist**
Regulatory Affairs Consultancy and Safety Assessments
Harrogate and Derby, UK / Switzerland
Attractive salary and benefits

Exponent International Ltd is a scientific consultancy specialising in human and environmental risk assessments and regulatory issues for plant protection products, biocides, and industrial chemicals / REACH. Due to our continued development, we now have a vacancy for a specialist in ecotoxicology / environmental risk assessment at our offices in Harrogate, UK, Derby, UK or in Switzerland.

Your duties will involve assessment of ecotoxicological data and conducting environmental risk assessments for European regulatory submissions, providing scientific advice to clients and colleagues on European regulatory requirements, study monitoring and some project management.

The successful applicant will have a minimum of a BSc. in biology, chemistry, or a closely related field together with experience of working in a regulatory environment. In-depth knowledge of EU pesticide, biocide or industrial chemical / REACH requirements and the regulatory framework would be a distinct advantage.

The post is demanding but offers excellent career progression opportunities within a well established but expanding consultancy.

The salary is negotiable and will be commensurate with your experience and qualifications.
Exponent responds rapidly to clients' needs, so the work environment is one of stimulation and teamwork. It will be necessary for you to be a team player and work well with clients and colleagues. Excellent written and communication skills are essential. You will be able to function well as a member of a team but also lead projects. The post may involve occasional travelling away from the office.

Exponent offer an attractive and competitive employment package including 25 days' annual leave, health and travel insurance. A relocation package may also be available.

To apply, write or e-mail with your CV including details of two referees and a covering letter stating why you feel you can be a part of Exponent's future development. Applications to be received by 27 September 2009.

Dr Tim Jarvis, Exponent International Ltd, The Lenz, Hornbeam Park, Harrogate, Yorkshire HG2 8RE, UK

NewScientist Jobs
[2724-014 (2009) : 56]
As global demand for food and fuel continues to rise, we are dedicated to our purpose: Bringing plant potential to life. Syngenta is one of the world's leading companies with more than 24,000 employees in over 90 countries. We work in a collaborative and inspiring culture where personal contribution is rewarded and growth and development are at the heart of our culture. Through our world-class science, global reach and commitment to working with our customers, we help to increase crop productivity, protect the environment and improve health and quality of life.

There's never been a more important time to join Syngenta.

Aligning technology with breakthrough R&D

Jealott's Hill, Bracknell, Berkshire or Basel, Switzerland

As part of a transformation of our R&D IS organisation we have created several new roles to support the evolution of R&D and the next generation of scientific breakthroughs. This is your chance to make your mark in our global R&D environment.

**Senior IS Project Manager**

£43,000 - £53,000 + benefits

You'll plan, manage, implement and monitor the progress of IS projects and programmes of varying complexity - projects will usually have international scope and financial responsibility up to USD 3-5 Mio.

Ideally from a life sciences background, you must have proven experience of managing complex IS projects and international stakeholder relationships within R&D. A familiarity with PMI processes and the know-how to exploit them for successful delivery is needed. PMP certification would be useful.

**Information Domain Specialist**

£33,000 - £53,000 + benefits

This is an exciting opportunity to help define the scope, strategy and methods for the Information Connection unit - a new area for Syngenta. Involved in projects, networks, consultancy and support, you'll deliver the strategy for one of the information domains, ensuring data is exploited to its full potential.

Your strong background in life sciences R&D will have given you an excellent understanding of R&D data, relevant data management techniques and the project lifecycle. A strategic thinker with good influencing and negotiating skills, you should be able to work as part of dynamic global teams across projects and networks.

**Solution Architect**

£33,000 - £53,000 + benefits

You'll help to define the architecture for new systems as well as the upgrade of existing systems, driving cohesive design and the integration of information. As well as acting as the key link between the Design Coherence Network and R&D IS projects, you'll work with other architects to survey externally emerging technologies. International travel can be expected.

You must be fully conversant with IT processes that support global R&D activities and the different types of data in this environment. A strategic thinker able to communicate across cultures, your IT/IM background will have a strong focus on systems design and development.

**Business Analyst**

£33,000 - £41,000 + benefits

You'll be working on global IT projects as well as on strategic R&D initiatives; your main responsibility being to understand, challenge and document business processes and system requirements. As well as managing stakeholder communications, you'll support Product Managers with the change control of existing services.

A graduate or equivalent in a scientific discipline, you'll need experience of providing business analysis in life sciences (preferably R&D). A strong team player capable of leading global teams and managing other
business analysts, you must have the interpersonal skills to influence both technical experts and senior stakeholders.

**Information Services Exploitation Specialist**

£33,000 - £41,000 + benefits  
(Option of working from Stein, Switzerland, as well as Jealott's Hill or Basel)  
In a new role that you can shape, your aim will be to ensure our R&D community knows how to use and, more importantly, derive maximum value from our information systems to support innovation. You'll be championing and delivering best practice training and business change models that ensure existing and new systems fully deliver on their promise.

We're looking for a background in training and system deployment / exploitation and you should be fully conversant with processes that support global R&D activities. An innovative 'big picture' thinker, you'll be highly motivated and comfortable working in diverse global teams.

In all cases, we offer an attractive rewards package and excellent opportunities for progression in our fast-evolving IT / IS environment.

To apply online, please visit [www.syngenta.com](http://www.syngenta.com) and navigate to our current vacancies via the career page.

Closing date: 18th September 2009.

Environmental Quality Officer (EQO)
Environmental Science
Edinburgh
Full time, temporary - 6 month contract (with possible extension to 9 months)
Starting salary £24,955 Ref: ES86090

We are seeking a responsible and motivated individual to join our busy South East Environmental Quality (EQ) team in Edinburgh. You will contribute to the crucial Water Framework Directive (WFD) by providing data entry and technical support for the WFD measures database, in support of our objectives, measures and classification. You will also provide checks on classification results in the area, support data enquiries and interpretation and handle a wide range of other duties, including data support for EC Directives, monitoring plans and environmental action plans. You will support SEPA's work and objectives in respect of environmental monitoring and analysis, and you will have a great opportunity to further develop your scientific skills and contribute to protecting and nurturing Scotland's environment.

Coming from a scientific background, you will have a good science/environmental degree and a sound understanding of SEPA and what we do. Excellent communication and team working skills are essential as is IT literacy, particularly with spreadsheets and databases. Skills in Oracle Discoverer and GIS would be particularly advantageous. Lastly, you will have excellent data entry skills with the ability to pay close attention to detail and ensure that data is correctly inputted.

Closing date: Thursday 10 September 2009.

Successful applicants will be asked to provide a Basic Disclosure Scotland Certificate.

To find out more or to apply visit our website www.sepa.org.uk/vacancies or call 01786 452555.

Please quote reference number in any correspondence.

[2724-017 (2009) : 58]
UNEP WCMC
Head of One Ocean Programme
Ref: AD640
Salary scale: £39,125 to £52,167

We are currently seeking an experienced and qualified leader to manage our expanding portfolio of work on marine and coastal biodiversity. Applicants will be highly motivated self-starters, with an appropriate balance of enthusiasm and realism for finding solutions to global marine and coastal challenges. Having a proven track record for fund raising, they will use their experience and understanding to contribute to international biodiversity-related research, analysis activities and initiatives. Applicants will be competent at working both independently and in leading a team within a large network of varied external partners and organisations.

With excellent attention to detail and ability to write and present clearly, the successful applicant will also have proven organisational skills, being comfortable in addressing a wide range of scientific and technical issues. They will be flexible and proactive in prioritising their work and taking advantage of emerging opportunities.

This is a permanent role and will be based with WCMC 2000 at the UNEP-WCMC offices in Cambridge, UK. International travel is a requirement of this position. To apply, please complete and send an application form attaching your CV and a one-page covering letter identifying your specific skills and knowledge in relation to this vacancy to recruitment@unep-wcmc.org.

We welcome applications from all nationalities. Prospective candidates should note that this is not a UN post.

For further information on this role, including the application form, please visit the jobs page on our website www.unep-wcmc.org.

Closing date: Monday 14th September 2009
[2724-018 (2009) : 58]
The Wellcome Trust is the largest charity in the UK. It funds innovative biomedical research, in the UK and internationally, with the aim of improving human and animal health.

The Technology Transfer Division maximises the impact of this research on health through the development of innovations to the point at which they can be further developed by the market. To do this, Tech Transfer manages funds for translation projects across the spectrum of biomedical science and this year has committed in excess of £60M to product discovery and development in both academia and industry.

Achievements include product launches, company IPOs and transactions with multi-nationals. In excess of £400M has been raised in co- or follow-on investment.

As a result of expansion in funds Tech Transfer is seeking to appoint a Business Analyst. The role will require you to work as part of a team promoting Tech Transfer's translation activities and be responsible for undertaking due diligence of proposals, evaluating their anticipated commercial exits and project managing the Trust's interests in key projects. You will use databases, business/scientific media and a network of internal and external scientific, legal, regulatory and commercial experts to support your analyses and you will become involved in intellectual property management and transaction negotiation.

You should possess a Ph.D. in the biomedical, physical or digital sciences with subsequent R&D experience in a relevant life science or medical environment. Business Analysts need to have good interpersonal and communication skills and be capable of working both independently and as part of a team. This is a demanding role; you will need to be able to engage in critical analyses of applied research projects, manage complex stakeholder situations and possess a creative approach to problem solving. You must demonstrate an enthusiasm for delivering healthcare outcomes.

For more information and to apply online visit: www.wellcome.ac.uk/jobs

To apply, please send a full CV, along with a covering letter, outlining your current salary package and indicating how you meet the above criteria to Human Resources, Wellcome Trust, 215 Euston Road, London NW1 2BE or to hr@wellcome.ac.uk

Application deadline: 23 September 2009.

Discover why today’s most talented professionals are saying –
“This is My MedImmune.”

MedImmune, the global biologics unit of AstraZeneca, is committed to developing better medicines that help people live healthier, longer and more satisfying lives. The company is focussed on the areas of infection, respiratory and inflammatory disease, oncology and neuroscience, with two marketed-products and a robust pipeline of promising new product candidates. MedImmune's state-of-the-art Cambridge site (formerly Cambridge Antibody Technology) is home to around 390 employees, and serves the company's European hub for research and development.

MedImmune Cambridge, with its distinctive science and culture, is central to AstraZeneca's plans to establish a major international presence in the research and development of biological therapeutics.

We are currently looking for three Research Scientists (two of the posts will be 12 month fixed-term contracts and one will be a permanent opportunity) to join our Lead Generation Team, an exciting growth area for MedImmune. For each of these roles we are looking for similar experience:

**Research Scientist** - Lead Generation, Cambridge
You will be responsible for the generation of therapeutic antibodies and other protein therapeutics for multiple projects from the initial isolation via phage or ribosome display libraries, to affinity, specificity or effector function engineering. You will also play a key role in the identification and implementation of new technologies and process improvements for antibody isolation and protein engineering.

You will have a Ph.D. or equivalent in a relevant field and have demonstrable experience in antibody or other protein engineering, phage or ribosome display. You will possess technical skills in microbiology, molecular biology/DNA manipulation, protein chemistry, ELISA, assay or screening work, bioinformatics/molecular biology software. In addition, you will have excellent communication skills together with the ability to work collaboratively as part of a team.

For more details about these exciting roles, please visit our website at [www.medimmunecareers.com](http://www.medimmunecareers.com) and apply directly to job numbers 63, 85 or 91.

COMMISSIONING EDITOR – Proteomics and Diagnostics (Maternity cover)

Expert Reviews is at the forefront of biomedical publishing, with a portfolio of journals covering a wide range of therapeutic areas.

Are you a motivated, enthusiastic scientist with a strong interest in protein science and genetics? We have an exciting opportunity for you to use your interpersonal skills and scientific knowledge in support of our Medline-listed Expert Review publications in proteomics and molecular diagnostics.

In the first instance, this is a fixed contract for maternity cover. There is however, the opportunity for the right candidate to develop a long-term career in a dynamic organization at the forefront of biomedical publishing.

This key role involves:
• Responsibility for content acquisition
• Ability to work to deadlines
• Strong communication skills
• Enthusiasm for liaison with leading international scientists
• Strategic planning of special focus issues and supplements

No previous editorial experience is necessary as full training will be provided. An understanding of the importance of scheduling and an ability to work to strict deadlines is essential. The role is based in our North London offices, conveniently located close to Finchley Central tube station on the Northern Line.

Closing Date: 22nd September 2009

Please submit a CV with cover letter explaining your interest in the position and salary expectations to the Editorial Director, Elisa Manzotti: e.manzotti@expert-reviews.com

Environment Agency
Protecting human health and the environment.

Principal Scientist
Wallingford, Oxfordshire or Olton, Solihull
£39,100 - £41,200 + benefits

Two roles available - one permanent and one temporary until 31 March 2010.

As part of our mission to create a better place, we're redoubling our efforts to understand environmental pollutants and protect people from their effects. This is a chance to take up one of the most challenging roles in the country.

As our leading toxicologist, you'll deal with the toxicology and carcinogenicity of substances found in air, water and particularly soil. Initially, you'll have huge input in completing our Contaminated Land Exposure Assessment (CLEA) model. You'll be an in-house expert working closely with relevant government bodies such as the Health Protection Agency and you'll represent the Environment Agency on key national committees. Exercising your influence, you can be a leading expert on the management of land contamination and former industrial sites in England and Wales - and internationally.

With stand-out experience in the field of human toxicology, you'll have membership of a professional body and a good scientific reputation among your peers. You will also be confident explaining your ideas both in written reports and in-person presentations.

For more information and to apply, please visit www.environment-agency.gov.uk/jobs Alternatively, please call 0845 6012233 or email jobs@environment-agency.gov.uk quoting reference 14300 for an application pack. If you are a disabled applicant meeting the minimum criteria we offer a guaranteed interview. Closing date: 30 September 2009.

GRADUATE SOS

New Scientist’s Graduate Careers Special is aimed at final year students, the perfect audience for your graduate vacancies.
• Available in over 100,000* UK and European copies of New Scientist on 24 October 2009
• Extensive bonus distribution to top universities and major graduate recruitment fairs including the National Graduate Recruitment Exhibition
• All vacancies will be posted online – that’s an opportunity to attract 10 applications per job*

Available as a print and digital edition, the Graduate Careers Special is supported by specifically target email promotion allowing you to maximise the exposure of your ad.

To advertise, please contact the team on +44 (0) 20 8652 4444 or email: recruitment@services.rbi.co.uk

NewScientist Jobs
NewScientist Study
[2724-038 (2009) : 66]
Five post-doctoral Research Associate positions are available in the Optoelectronics Group at the Cavendish Laboratory in the area of organic electronics. The group is one of the world's leading centres for research in solution-processed semiconductors, and has recently been awarded a Programme Grant from the EPSRC to develop this field of research across several project areas.

Post 1: Ultrafast optical spectroscopy of organic semiconductors
Working with Professor Richard Friend, this project is to develop a new ultrafast laser system that will be used to observe the transient optical absorption and photoluminescence of photoexcitations in organic semiconductor device structures.

Post 2: Structures and properties of heterojunction semiconductor diodes
Working with Professor Richard Friend, this project is to develop new heterojunction architectures for photovoltaic diodes that will optimise the long range separation of photogenerated charges.

Post 3: High pressure studies
This project in the group of Professor Neil Greenham will investigate the properties of polymer semiconductor devices under high pressure, allowing the effect of intermolecular interactions on charge transport and optical properties to be studied.

Post 4: Charge transport physics
This project in the group of Professor Henning Sirringhaus will develop new optical spectroscopy techniques to study the molecular-scale processes that govern the charge transport physics of high-mobility organic semiconductors in transistor structures.

Post 5: Intrachain transport in polymer semiconductors
This project in the group of Professor Henning Sirringhaus will aim to improve the charge carrier mobility of polymer semiconductors by making better use of the fast intrachain transport along the polymer backbone.

Candidates should have a Ph.D. in physics or a related area, with research experience relevant to the proposed project, and a strong track record of high-quality publications. The positions are available immediately.

Enquiries about posts 1 and 2 should be sent to Professor Richard Friend: rhf10@cam.ac.uk, for post 3 to Professor Neil Greenham: ncg11@cam.ac.uk, and for posts 4 and 5 to Professor Henning Sirringhaus hs220@cam.ac.uk

Applications should be sent to: Group Secretary, Optoelectronics Group, The Cavendish Laboratory, JJ Thomson Avenue, Cambridge CB3 0HE, UK or by email to: oe-secretary@phy.cam.ac.uk, making clear which position(s) are of interest. Applications should include a full CV, a PD78 cover sheet (see: http://www.admin.cam.ac.uk/offices/personnel/forms/pd18/pd18.pdf), a list of publications and the names and contact details of at least two referees

We require a Post-Doctoral Research Fellow for a project aiming to measure the effects of climate on the release of carbon dioxide from 'historical' organic matter in European soils. The project will measure $^{13}$C natural abundances of soil- and root-derived CO$_2$ at forest sites in Italy, Germany and Finland and relate the resulting CO$_2$ fluxes to climatic variables. The project will be based in the School of Biological Sciences at the University of Aberdeen and at the Macaulay Institute, Aberdeen. This post is an exciting opportunity for an enthusiastic researcher to play a leading role in an ambitious project.

You should have experience of running ecosystem experiments in field campaigns, be prepared to spend extended periods travelling to and from field sites and working at the sites with a research assistant, and be able to work effectively and efficiently as part of a team. Experience in stable isotope work would be an advantage. As this post is funded by the Natural Environment Research Council (NERC), it will be offered for a period of up to 30 months.

Salary will be at the appropriate point on the Grade 6 scale (£29,704 - £32,458 per annum), with placement according to qualifications and experience.

Informal enquiries may be made to Prof David Robinson (david.robinson@abdn.ac.uk) or Prof Peter Millard (p.millard@macaulay.ac.uk)

Should you require a visa to undertake paid employment in the UK you will be required to fulfil the minimum points criteria to be granted a Certificate of Sponsorship and Tier 2 visa.

Closing date: Thursday 24 September 2009.
University of Reading

Postdoctoral Research Assistant
Department of Chemistry
This appointment is full-time, fixed-term from 1 October 2009 - 30 September 2012 Grade 6-£27,183 to £29,704 per annum

We are seeking an enthusiastic postdoctoral atmospheric chemist, who can carry out research with a high level of independence. The research project is funded by NERC and is fixed term for 36 months; it is laboratory-based and focuses on important aspects of the formation and ageing of atmospheric aerosol.

You will have:
• a Ph.D. in atmospheric science
• excellent experimental skills in physical chemistry
• experience of some or all of the following techniques: flow-tube methods, GC, GC-MS, FTIR, SMPS, particle levitation, Raman spectroscopy
• basic computer literacy (word processing and chemical drawing skills, database searching, ability to use e-mail and the internet)
• the ability to work independently and as part of a team
• the ability to work to deadlines

The successful applicant will be able to take advantage of the University's excellent staff training opportunities.

Informal enquiries: contact the PI, Professor George Marston on +44(0)118 378 6343 or email g.marston@reading.ac.uk Alternatively contact the Co-PI, Dr Christian Pfrang on +44(0)118 378 8789 or email c.pfrang@reading.ac.uk

Closing date: 25 September 2009

To formally apply please visit www.reading.ac.uk/Jobs or contact Human Resources, University of Reading, Whiteknights, PO Box 217, Reading RG6 6AH. Telephone +44(0)118 378 6771 (voicemail)

THE QUEEN’S ANNIVERSARY PRIZES 2005

[2724-041 (2009) : 68]
Research Associates in Organic Electronics
Department of Physics
£27,183 - £35,469 pa
Limit of tenure: 31 October 2012

A Research Associate position is available in the Optoelectronics Group at the Cavendish Laboratory in the area of organic electronics. The group is one of the world’s leading centres for research in solution-processed semiconductors. The research project will use scanning probe microscopy techniques, such as high-resolution Scanning Kelvin Probe Microscopy, to investigate the charge transport and photoconductive properties of organic semiconductors on a molecular length scale. The project involves a close collaboration with a research team at Cornell University.

Candidates should have a Ph.D. in physics, chemistry, materials science or a related area and a strong track record of high-quality publications. Specific research experience in ultrahigh vacuum scanning probe microscopy/spectroscopy techniques is desirable. The position is available immediately.

Enquiries should be sent to Professor Henning Sirringhaus (hs220@cam.ac.uk). Applications should be sent to Mrs. Melanie Hills (mfh33@cam.ac.uk). Applications should include a full CV, a PD18 cover sheet (see: http://www.admin.cam.ac.uk/offices/personnel/forms/pd18/pd18.pdf), a list of publications and the names and contact details of at least two referees. Please quote reference: KA05610. Closing date: 30 September 2009.

The University is committed to Equality of Opportunity.

Faculty of Medical and Human Sciences
School of Cancer and Imaging Sciences

**Research Associate** (1 FTE)
£28,839 - £32,458 p.a. Ref: MHS/91030

You will be responsible for achieving the aims of oncology MR/CT research projects by performing image data analysis and for the development and integration of MR/CT methodology and image analysis into our programme of multi-modality human imaging studies.

You will build up a suite of standard MR and CT data analysis methods and coordinate and support the time planning, data collection and analysis needs of a number of oncological projects. You will also provide support and training in the use of existing and new software to clinical and biological scientists involved in the projects.

You will have a maths or science degree (2.1 or above) or equivalent and either have or be working towards a Ph.D., or have equivalent work experience in one or more of the areas of medical data/image analysis, informatics and statistical evaluations. Experience of clinical research, medical imaging or programming is desirable.

Application forms and further particulars are available from our website [www.manchester.ac.uk/jobs](http://www.manchester.ac.uk/jobs) If you are unable to go online you can request a hard copy of the details from The Directorate of Human Resources, Room 3.50 Simon Building, Brunswick Street, Manchester, M13 9PL.

Closing date: 11 September 2009.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

The Faculty of Social and Behavioural Sciences of Leiden University invites applications for the position of

**Full Professor** in Science and Innovation Studies  
Vacancy number 9-017

The Center for Science and Technology Studies (CWTS) has a vacancy for a full professor in Science and Innovation Studies (tenured position). The candidate is expected to supervise and further develop the current CWTS R&D program, in science-technology linkages and science-innovation relationships, into one of the world's leading groups in this field, with an emphasis on quantitative measurements and large-scale bibliometric studies. The candidate will also actively contribute to departmental senior management and perform administration tasks. The teaching duties involve the development of courses at graduate or post graduate levels (in Dutch and English) both in this area and interrelated issues in the field of science policy and research evaluation. The candidate is expected to supervise Ph.D. students (CWTS participates in the Netherlands Research School of Science, Technology and Modern Culture).

We expect the candidate to hold a Doctorate degree in science studies, science and technology studies, or in relevant fields such as innovation-oriented economics. He or she should have in-depth knowledge of science, technology and innovation (STI) systems, extensive experience in the design and implementation of performance measurements within (Dutch or European) STI policy settings, as well as indicator-based evaluations of research performance. We expect a proven capacity to acquire external (research) funding - either in the Netherlands or elsewhere.

Salary is in accordance with the Collective Labour Agreement of the Dutch Universities. The maximum salary is € 7.142 gross per month.

Project Manager - Worldwide
Antimalarial Resistance Network
Grade 8: £36,532 - £43,622 p.a.
Centre for Tropical Medicine
Nuffield Department of Clinical Medicine

More than 500 million become severely ill with malaria every year and more than 1 million die from the effects of the disease. The Worldwide Antimalarial Resistance Network (WWARN), funded by the Bill & Melinda Gates Foundation, will set up a global drug resistance information resource so that more of the right drugs can get to the right people at the right time, and the drugs will last longer. Details can be found at www.wwarn.org

The WWARN Project Manager is a new role, which will be key to the successful establishment of the Worldwide Antimalarial Resistance Network. You will be part of the Oxford-based management team and will be responsible for managing a support team including a finance officer, IT/logistics officer and assistant. You will work closely with members of the Network in each continent as well as key stakeholders such as the WHO. You will develop an operational structure for WWARN and will monitor progress on WWARN's stated objectives.

You will have experience of managing a large clinical surveillance or epidemiological projects, or comparable experience. Strong diplomatic skills and the ability to communicate with a variety of people working in different cultures is essential, as is the availability to travel. You will have exceptional organisational skills and experience of managing large budgets. Fluency in French, Spanish or Portuguese is highly desirable.

The post is available to 31 December 2012 in the first instance.

An application form and a job description are available from the website (www.tropicalmedicine.ox.ac.uk/jobs) or by contacting the Senior Personnel Officer, Centre for Clinical Vaccinology & Tropical Medicine, Churchill Hospital, Old Road, Oxford OX3 7LJ (tel: 01865 857413; email: bethany.valentine@ndm.ox.ac.uk). Please quote the reference B9-09-005-PG. The closing date for applications is Friday 11 September 2009.

Fellowship by Examination 2009 - 2010

The College proposes to elect, in February 2010, one or two Fellows by Examination. Candidates should have a good Honours degree or its equivalent and have completed, or be near to completing a doctorate or other post-graduate research. They will already have demonstrated outstanding promise in their chosen field. In any event the candidate must not have completed more than four years' graduate study by 1 October 2009. There is no restriction on the number of times an applicant may apply for this post. Applications are encouraged from all countries and all Universities in all subjects.

Each Fellowship is tenable for three years at a stipend starting £19,704 per annum with increments in the second and third years. The Fellow is a member of the Governing Body of the College and is entitled to free lunches and dinners, to a research allowance, and either to free single accommodation, or to a discretionary housing allowance, currently set at £10,000 p.a. It is likely that successful candidates will be required to live within a certain radius of Oxford during the period of their appointment.

Application forms and further particulars can be obtained from the Administrative Secretary, Magdalen College, Oxford OX1 4AU (telephone: +44(0)1865 276060, e-mail: elizabeth.martin@magd.ox.ac.uk) or to download at www.magd.ox.ac.uk/vacancies/ The closing date is Monday, 12 October 2009.

BBSRC CASE Ph.D. Studentship with GlaxoSmithKline (GSK)  
Discovery of Innate Immune Signalling Molecules that Trigger Wound-healing and Tissue Fibrosis

The Tissue Fibrosis and Repair Research Group in the Institute of Cellular Medicine at Newcastle University in collaboration with GlaxoSmithKline, is pleased to offer this prestigious studentship from September 2009. This four-year studentship offers outstanding candidates a one-year MRes in Medical and Molecular Biosciences followed by a three-year Ph.D.

Wound-healing is a critical physiological response that promotes the repair and regeneration of damaged tissue. The goal of the studentship is to discover molecules released by damaged epithelia that trigger wound-healing signalling as these may be exploited to promote more effective tissue repair.

The student will join a large group of fibrosis researchers in Newcastle that span multiple organ systems. It is also anticipated that core GSK technologies will be applied to the project where appropriate. Accordingly the successful candidate will spend a period of their Ph.D. studies working with industry scientists at the GSK R&D headquarters in Stevenage.

Further information is available from Professor Derek Mann derek.mann@ncl.ac.uk
and via the University website (http://www.ncl.ac.uk/postgraduate/funding/search/list/icm47) where application and eligibility details can be found.

Cognitive enhancing drugs: neuroethical issues
Public lecture
Tuesday 13 October at 6.30pm
Professor Barbara Sahakian
University of Cambridge

Cognitive enhancing drugs are used to treat disorders such as Alzheimer's disease, schizophrenia and attention deficit hyperactivity disorder. However, cognitive enhancement has ethical implications for society, particularly with regard to the increasing use of cognitive enhancing drugs in school pupils, students, and University academics.

It is important to consider the potential harms of these drugs (such as substance abuse or unknown effects on the developing brain). This lecture aims to explore the potential risk weighed against the great benefits in the use of safe and effective cognitive enhancing drugs to many sectors of society, including the ageing population and people with neuropsychiatric disorders and brain injury.

twenty ten and beyond
350 years of excellence in science
[2728-002 (2009) : 24]
On seeing the bigger picture
THERE ARE MANY SOURCES OF ENERGY, BUT NOT ONE OF THEM IS THE SOLUTION.
THERE ARE MANY SOURCES OF ENERGY, AND THAT IS THE SOLUTION.

Affordable, reliable, low carbon energy

The perfect source of energy is affordable, reliable and low in carbon emissions. The problem is, it doesn't exist. No single source ticks all three boxes. This is not so much a dilemma, as a ‘trilemma’: Nuclear power is low carbon, but the power stations are relatively expensive to build. Fossil fuels are more economical, but will continue to produce carbon until we can perfect ways to capture and store most of it. Wind is carbon-free, but if it doesn't blow, the turbines don’t turn. That’s why we believe that the future lies in producing energy from a variety of sources - and why we continue to invest in them all. To have your say, visit our YouTube channel and get involved in the great energy debate.

[2728-003 (2009) : 25]
Drug companies are trying to shake off a bad rep by donning their best ethical colours. Is it convincing, and how can you decide which of them is the best to work for? Richard Lim finds out.

"If scientists want to do good for the developing world, it's hard to think of an industry where they're going to make more of a contribution," So says Guy Willis, director of communications at the International Federation of Pharmaceutical Manufacturers and Associations (IFPMA) in Geneva, Switzerland. It's a bold claim, one based on the industry's own estimate of its philanthropic contributions towards achieving the health aspects of the UN's Millennium Development Goals. While pharmaceutical firms do give substantially towards the building of healthcare infrastructure in poor countries, they have also been accused of overpricing, attempting to patent drugs based on traditional remedies and being indifferent to finding cures for diseases of the developing world. What's more, the companies seem to hit the headlines just as often for mis-selling drugs or misrepresenting the results of clinical trials as for their therapeutic discoveries. Yet it's hard to ignore the allure of working in the industry. It's well remunerated and offers the chance to do potentially ground-breaking research. So can you work for big pharma with a clear conscience, and how do you figure out which firms shine in the ethical credibility stakes?

Two obvious starting points are the Covalence Ethical Rankings, an index of multinationals published by a Geneva-based company, and the 2008 Access to Medicine Index, issued by a charity in Haarlem, the Netherlands. The AMI assesses pharmaceutical companies on their performance in areas like equitable pricing and the licensing of drugs to developing countries so that affordable versions can be made locally. Useful though both league tables are, making rigorous judgements in this area is tricky, and both lists rely partly on submissions from the companies themselves as well as media reports.

Nevertheless, there's plenty from the drug companies themselves to get your teeth into. "The 'Responsibility' part of our website makes up over a third of gsk.com," says Julia King of GlaxoSmithKline, which topped the AMI and was also the best-ranked pharmaceutical firm in the most recent Covalence ranking. It's not just about working "in partnership with society", she says, but about recruiting and motivating top-notch staff. "You're not just competing on salary and benefits now, you're competing on how your business is seen."

What about the accusations of misconduct, misrepresentation and worse often levelled at big pharma? "If a company isn't prepared to report on, for example, the publication of clinical trial data, then one has to question how prepared it is to be called to account publicly," says King. For its part, GSK has an online "clinical study register" to publish the results of trials it sponsors. Another top tip, she says, is to ensure a company you might want to work for has a robust sales and marketing code and that it is prepared to document breaches and ensuing disciplinary action. Usefully, the "Ethical promotion" section of the IFPMA website publishes member companies' codes in addition to the federation's own marketing practices code, which binds members in countries with little or no regulation of their own. "That means a lot of the developing world," says Willis.

Then there's pricing and patenting-two complex, interrelated areas, with different companies adopting different strategies in each market. It's a mixed picture here, highlighted by the case of the leukaemia drug Glivec, made by the Swiss firm Novartis. Willis says the drug can be administered for free under the company's means-tested programme, but also points out that Glivec has been the subject of a controversial failed patent application by Novartis in India. Clearly, the tussle between multinationals and national regulators won't go away any time soon.

At least big pharma's growing commitment to researching the diseases of poorer nations is relatively uncontentious. "There's going to be even more funding and more opportunities. Philanthropists like Bill Gates are pushing very strongly in that direction, and also international organisations like the WHO," says Martin Pan, a researcher at GSK's Tres Cantos research centre near Madrid, Spain. It's one of several big pharma labs and institutes operated in partnership with NGOs, where you will find opportunities to work on treatments for diseases such as malaria and sleeping sickness. For their part, the NGOs provide some of the funding and also the chance to get involved in field trials, with all the logistical and cultural complications those entail.
"The concept of informed consent is well understood in the western world," says Pan. 'A lot of people have participated in those trials during their student life. In other cultural settings, this is maybe not that usual.'

GSK is also investing in the development of a malaria vaccine - called RTS,S - even though it is unlikely to be a big money-spinner. "People are not going to be queuing up for the jabs at our travel clinic," says Colin Sutherland, a malaria specialist at the London School of Hygiene and Tropical Medicine (LSHTM). The reason is simply that the vaccine confers only modest protection. Even so, it will be a boon to poor countries, as people who contract malaria despite being vaccinated will experience milder symptoms and are much less able to spread the parasite to uninfected mosquitoes, so reducing transmission of the disease.

So you can make a difference in big pharma or, for that matter, in a health NGO or contract research organisation, to which drug companies farm out projects such as clinical trials. There's no standard route in, though (see "One job, two paths", above). "It is very multidisciplinary, the whole area of global health research, drug access, delivery and quality assurance," says Shunmay Yeung, who also works on malaria at LSHTM. That said, a life sciences or biomedical background is often required, and these days postgraduate qualifications are increasingly important, though not necessarily in a purely scientific discipline. Whatever your route in, there certainly seems to be a growing number of opportunities to be a part of the pharma industry while keeping your conscience clear.

Case study

One job, two paths
Both Manica Balasegaram and Sally Ellis are staff at the Drugs for Neglected Diseases initiative, an NGO in Geneva, Switzerland, working on clinical trials involving visceral leishmaniasis, the second-largest parasitic killer in the world after malaria. Yet they have had very different career paths.

"I stumbled into it,' says Balasegaram, who worked as a medic in a UK hospital A&E department before heading to east Africa with Médecins Sans Frontières. His experiences there of treating visceral leishmaniasis and other diseases made him "frustrated with the limited treatment options, which were quite toxic and in some cases not particularly effective". That spurred him to work on tropical diseases.

Ellis, on the other hand, has worked for big pharma. She got into the industry through a lucky break. Having graduated in immunology at King's College London, she wrote to a company asking about work experience and was invited to a job interview instead. Her present role often takes her to east Africa and south Asia where, she says, "you're much more aware of the help that you're giving" in improving medical treatment. "You can get that sense from the pharmaceutical industry as well but, for me, it was never quite as apparent"

The Uganda Malaria Partnership Programme, funded by GSK, provides much-needed education

"You're not just competing on salary and benefits, you're competing on how your business is seen"

c. £95,000 package

UK Trade & Investment is the Government organisation that helps overseas and UK based companies succeed on the world stage. UK Trade & Investment's R&D Programme is part of UKTI's work to increase levels of investment in R&D in the UK by helping a targeted group of overseas-owned R&D intensive companies to undertake (more) R&D in the UK. A major component of the R&D Programme is the deployment of a team of 'R&D Specialists' with business development backgrounds who have detailed knowledge and understanding of leading-edge technologies and of the UK's R&D capabilities.

We are now seeking three high-calibre Commercial R&D Specialists in the fields of:

**Pharmaceuticals**

Candidates should have international knowledge of drug development in key areas of research, such as CNS, cardiovascular and oncology. Experience in dealing with large pharmaceutical companies, ideally in the USA, would be an Advantage.

**Food and drink research**

Candidates should have international knowledge of scientific research and development into food and drink formulation, manufacture and contamination control.

**R&D in electronic-based products and services**

Candidates should have a broad background in R&D related to the design, introduction and commercial application of e-based products and services (e-commerce, e-health, e-government, etc.) ideally across the user/provider/participant interfaces and on an international basis.

**The roles**

The candidates will have international business development experience; will have a proven track record in negotiating and winning R&D-based business and inward investment, along with experience of working overseas; are self-starters, with excellent organisational skills and freedom to travel extensively in the UK and overseas; will be able to work with UKTI teams around the world and lead or steer relationships with target companies; are highly credible and strong communicators, possibly with fluency in additional languages; and hold a higher degree, along with experience in key areas of UK R&D.

**The rewards**

Working from home on a fixed-term basis with one of the world's foremost international trade and investment organisations brings an excellent remuneration package. This includes pension,
healthcare and business class international travel. Applications to work on a consultancy basis will be considered from strong candidates.

To apply
The R&D Programme is managed by Pera. To apply, send your CV to julie.cole@pera.com quoting ref. NS09/09 Closing date: Friday 23 October 2009

Research & Development at Lonza
Lonza

Why work for only one biopharmaceutical company when you can work for many more?

Due to the initiation of new projects we are looking to recruit talented individuals into our state of the art R&D facilities based in Slough, UK and Winnersh, UK

Cell Culture & Process Development (ref: CC/0609/NS)
Working with a broad range of pharmaceutical and biotechnology companies, the Cell Culture Process Development group constructs and develops cell lines and bioreactor processes that deliver the latest biopharmaceutical therapeutics. We are looking for talented graduates, Ph.D.s, and other candidates with a proven track record in this sector. Ideally you will have knowledge of mammalian protein expression systems and/or operation and optimisation of bioreactor processes. The Cell Culture Process Development department provides a challenging and rewarding environment that encourages scientific and personal development.

Analytical Development (ref: AD/0609/NS)
The Analytical Development department is involved in supporting core activities on site, which involves the testing of in-process and purified samples, protein stability studies, protein characterisation, technology transfer, assay evaluation and assay validation. Candidates will need to have relevant working knowledge [e.g. protein chemistry, immunology, analytical biochemistry], be able to work independently as part of a busy team and have practical experience in some or all of the following techniques: SDS electrophoresis; isoelectric focussing, ELISA, HPLC (for example RP-HPLC & SEC). For specific characterisation and bioassay roles, experience in protein or carbohydrate mass spectrometry and cell based bioassays respectively would be required.

Purification Development (ref: PD/0609/NS)
Purification Development is responsible for the development of manufacturing processes for therapeutic proteins. Staffed by biochemists, protein chemists and biochemical engineers, the department works closely with our Analytical Development colleagues to ensure products meet high purity standards and with our Manufacturing colleagues to ensure our processes can operate in Lonza's large scale GMP purification facilities. We are looking for graduate scientists with a biochemistry degree (or equivalent) plus some experience in protein purification. Candidates will need to have experience of running chromatography and ultrafiltration systems; previous experience in performing virus clearance validation studies would be a bonus. A meticulous approach to the performance and recording of laboratory experiments and the ability to multi-task are essential.

Lonza is one of the world's leading suppliers to the pharmaceutical, healthcare and life science industries. Its products and services span its customers' needs from research to final product manufacture. We welcome applications from candidates from a range of disciplines and experience and we will be recruiting into temporary and permanent positions.

To apply please send your covering letter and CV to careers.slough@lonza.com quoting the relevant reference number in the subject field.

**PRACTICE PLUS**

Saving lives together

[2728-008 (2009) : 56]
The Food and Environment Research Agency’s role is to support and develop a sustainable food chain, a healthy natural environment, and to protect the community from biological and chemical risks. The Agency employs over 700 scientists and experts and works with over 1000 partners in 102 countries world-wide.

**Research Assistant**

YORK

Band 3 Ref: CSP 3436 Permanent

from £20,493 pa

The Applied Entomology team at Fera works to understanding agricultural ecosystems, including bee research, crop pests and diseases, beneficial insects and the impacts of climate change and agricultural policy and practices. A Research Assistant is required to support the varied programme of applied entomology including bee research, invertebrate identification and pest management solutions for indigenous and non-indigenous pest species. Duties include collecting samples of honey bees, diagnosing pest and diseases and collating and recording data. Also the maintenance of live cultures of pests and routine handling of live insects.

Effective interpersonal and communication skills, with the ability to build sound working relationships and a practical understanding of microbiology and/or molecular biology is essential. A degree in a science based subject or equivalent qualification in a relevant subject is required. Candidates without this level of qualification will need to demonstrate relevant experience. In addition you will have practical IT skills in particular MS Word, Excel and PowerPoint.

Fera is an Equal Opportunities Employer. Benefits include a choice of valuable pension arrangements and we operate flexible working practices.

Closing Date: 15 October 2009

Join the constellation at Eden Biodesign – our stars are our people
Liverpool

Eden Biodesign designs and develops valuable biopharmaceutical medicines by the application of good science: from day one

Our business is to develop our clients' research into the reality of new medicines. This means that in addition to being world class development scientists, we need to forge successful client partnerships. Lasting relationships depend on honesty and integrity and it stands to reason that we seek these character traits in anyone joining our team.

Eden Biodesign is a globally-integrated biopharmaceutical company offering consultancy, biopharmaceutical design and cGMP manufacturing services to leading biotech and pharmaceutical clients. We have successfully completed commercial assignments for clients in Europe, North America, Asia, Africa, Australasia and Latin America. From our Liverpool, UK facility, we provide state of the art process development, cGMP manufacturing and analytical development for every significant biopharmaceutical product technology. To cope with steeply increasing demand for our services, we are now recruiting for a number of roles.

**Process Development Fermentation Team Leader** Ref EBD34
You will be responsible for leading the development, optimisation and scale-up of cell lines/strains and processes for the production of a wide range of biopharmaceuticals using microbial and mammalian expression systems. Extensive expertise in bioreactor-based fermentation process development is necessary, ideally coupled with cGMP manufacturing experience. This is a hands-on leadership role and requires a minimum of a Bachelor's degree in a life sciences or biochemical engineering discipline.

**Fermentation Development Scientists** Ref EBD33
You will be required to develop, optimise and scale-up cell lines/strains and processes for the production of a wide range of biopharmaceuticals. Experience of upstream process development is essential, preferably with a track record of using a broad range of mammalian, microbial and/or viral expression systems and techniques. Ideally you will have a minimum of a Bachelor's degree (or equivalent) in a life sciences discipline.

**Clinical Production Scientists / Operators** Ref EBD31
You will perform a wide range of activities associated with the manufacture of cGMP biopharmaceutical Investigational Medicinal Products (IMPs) for clients within the Production Facility at Eden Biodesign. Ideally candidates for this position will have hands-on technical experience within a biopharmaceutical or pharmaceutical production or development environment.

**Experienced Clinical Production Scientists / Operator for Upstream Processing**
Ref EBD39
You will be responsible for the technical transfer of bioreactor processes into the Production group and the manufacture of products in compliance with cGMP requirements. You will have considerable hands-on experience running mammalian and/or microbial bioreactors for the manufacture of cell-based products. Experience in the technical transfer of projects between R&D and Production and trouble-shooting technical issues associated with bioreactor processes will be advantageous.

**Purification Development Scientists**
Ref EBD35
You will be responsible for the design and execution of experiments to develop and optimise downstream processes for the recovery and purification of biopharmaceuticals including, but not limited to, proteins, DNA and viruses. Ideally you will have experience of downstream processing and practical experience in a broad range of purification techniques. A minimum of a Bachelor's degree (or equivalent) in life sciences is required.
**Analytical Development Scientists** Ref EBD36
You will be responsible for developing analytical methodologies for the characterisation, QC and in-process/batch release testing of a wide range of biopharmaceutical products. Ideally candidates will have experience working in the biopharmaceutical industry within Development or QC. You will have a Bachelor's degree (or equivalent) in a life science discipline, with experience in the design/optimisation of biological / biopharmaceutical assays.

**Quality Control Microbiology Scientists** Ref EBD37
You will be required to perform Quality Control Microbiological tests necessary to support all aspects of the facility and manufacturing operations. Experience of cGMP in a microbiological laboratory and microbiological analysis of pharmaceutical / biopharmaceutical products is required. Ideally you will have a minimum of a BSc Science degree (or equivalent) preferably in Microbiology/Biology.

Begin with the end in mind

To explore a new beginning, please visit www.edenbiodesign.com where you will find more information on all of the above roles.

If you think you have what we are looking for and would like to join us - please send a comprehensive CV, including your current salary package and notice period, together with brief details of why you believe you would be an asset to the Eden team to: annette.england@edenbiodesign.com and quote the appropriate reference number. The closing date is 30th October 2009.

[2728-011 (2009) : 57]
The UK Astronomy Technology Centre (UK ATC) is the national centre for the design and production of world leading astronomical telescopes, instruments and systems. It is playing a major role in the planning and development for the next generation of Extremely Large Telescopes (ELT) and their instrumentation. Already highly important for current very large telescopes, adaptive optics (AO) will be an indispensable element of an ELT.

**Adaptive Optics systems Engineer/ scientist**  
£33,780 - £37,534 pa  
dependent on qualifications and experience

We require a scientist or engineer to lead the adaptive optics modelling, systems analysis and technical aspects of its work.

Working with instrument scientists and engineers in design studies, systems analysis and modelling, including contributing the AO input to integrated end-to-end modelling, you will contribute fully as AO expert for the UK ATC in one or more major projects.

You will also take a leading role in AO related technology development activities across STFC.

Working with business development staff, you will look for new opportunities for application of AO systems and technologies in collaboration with non-astronomy based institutions, in particular industrial partners and other research groups.

A degree, or equivalent, in a physical science or engineering with either considerable post-graduate or Ph.D experience in AO, is essential.

Our benefits include a generous leave allowance, a healthcare package and choice of pension benefits. Where appropriate, assistance with relocation expenses will be available.

For further information and application form please call our Recruitment line on 01 31 668 8100, email us at atcrecruitment@roe.ac.uk quoting reference 01/09 or visit our website at www.roe.ac.uk/ukatc/jobs

Closing date for applications: Friday 16 October 2009.  
Applications from agencies will not be accepted.

Water Quality Scientist
£20,000 - £25,000 Frimley, Surrey or Snodland, Kent

South East Water supplies drinking water to 2.1 million customers across Kent, Sussex, Surrey, Hampshire and Berkshire. That means more than 565 million litres every day along more than 14,000 kilometres of water mains – and demand continues to grow. We are now seeking an exceptional Scientist to join the busy Water Quality team.

With responsibility for the development and maintenance of the company's Drinking Water Safety Plans (DWSPs), you will monitor the operational sampling programme, facilitate DWSP workshops, provide water quality advice to the business and undertake site audits.

Educated to degree level in an applicable science, you will ideally have worked in the water industry and have water treatment/quality experience. You should also have a full clean driving licence.

To apply, please e-mail your CV and cover letter to jobs@southeastwater.co.uk quoting the position you are applying for.

Closing date for application: 8 October 2009.

A great opportunity in Pharmaceutical Research and Development

Mundipharma Research Ltd provides world class research services to the Mundipharma/ Napp Group of independent associated pharmaceutical companies throughout Europe. With an international reputation for innovative research, we successfully improve the lives of patients by discovering and developing new therapeutic products.

**Scientist - Pharmaceutical Development**  
Based on the Cambridge Science Park

This is an excellent opportunity to utilise your skills in a vibrant research environment. Working as part of a team, you will play an integral part in providing theoretical and practical support in the formulation and process development of pharmaceutical products.

The role is challenging and varied and you will be involved in all aspects of the dosage form development process from particle characterisation to product scale-up, using a wide range of techniques and equipment. Your main responsibilities will be to provide scientific input and have an active practical involvement in optimising and manufacturing pharmaceutical formulations, and contributing to the evaluation of preformulation, formulation, analytical and other scientific data as necessary. You will also provide support in the planning and manufacture of appropriate batches for product development, stability testing, pre-clinical testing and clinical testing at development and pilot scale.

You will ideally be educated with a science degree or equivalent, and will have a relevant industry related background, preferably in the formulation of drug products. Excellent planning, interpersonal skills, self motivation and an organised, methodical approach with attention to detail, will be key to your success. This role offers opportunities for personal development and career advancement. In return, we offer a competitive salary, contributory pension scheme, discretionary annual bonus scheme and private medical care.

Please send your CV and covering letter, stating your current salary package, to Jacki Skelding, HR Department, Mundipharma Research Limited, Cambridge Science Park, Milton Road, Cambridge, CB4 OAB or email jacki.skelding@mundipharma-rd.eu

Closing date for applications is Monday, 12 October 2009.

wellcome trust

SCIENCE PORTFOLIO ADVISOR
PATHOGENS, IMMUNOLOGY AND POPULATION HEALTH

Salary will be on a scale from £30,000 per annum depending on experience

The Wellcome Trust is the largest charity in the UK. It funds innovative biomedical research, in the UK and internationally, with the aim of improving human and animal health.

We are currently seeking to appoint a Science Portfolio Advisor to join the Department of Pathogens, Immunology and Population Health. Working within the Populations and Public Health stream, the post-holder will be responsible for developing the Trust’s portfolio of public health research into communicable and non-communicable diseases.

This exciting role within the Trust’s Science Funding Division, involves keeping abreast of relevant scientific fields, liaising with internal and external stakeholders and developing and managing defined aspects of the Trust’s funding portfolio. It will include contributing to the development of new initiatives and may involve working in partnership with other funders. The role also involves working with Funding, Interview and Strategy Committees when required, organising the peer review of research proposals and documenting committee discussions.

You will be a biomedical or health science graduate with a higher degree (Masters, Ph.D.) and/or substantial research experience relevant to public health. Experience gained in an academic or funding agency environment is desirable. In addition you will be able to demonstrate:

• Ability to see the ‘big picture’ and identify scientific potential and opportunities.
• Evidence of communicating science effectively and confidently with individuals and groups both internally and externally.
• The ability to work effectively both independently and within a team/matrix structure.

For more information and to apply online visit: www.wellcome.ac.uk/jobs

Alternatively send a CV and covering letter explaining how you meet the criteria for this post to: HR, Wellcome Trust, Gibbs Building, 215 Euston Road, London, NW1 2BE.

Application deadline: 16 October 2009.

Interviews will be held in the week beginning 2 November 2009.

[2728-017 (2009) : 60]
Senior Contaminant Hydrogeologist

£30,710 - £37,120 p.a. depending on qualifications and experience
Fixed term appointment, initially for 12 months and may be extended subject to review

The British Geological Survey, part of the Natural Environment Research Council, is the UK’s premier geoscience strategic mapping and research organisation. Based at the Northern Ireland Environment Agency (NIEA) office in Belfast, Northern Ireland, this post is established under a Service Level Agreement between the Geological Survey of Northern Ireland (GSNI) and the NIEA.

You will provide technical and regulatory hydrogeological advice and support to the NIEA Land & Resource Management Unit and the GSNI, in particular to the development and remediation of brownfield and contaminated land sites. Responsibilities will range from reviewing planning applications and providing technical assessments of all relevant site information (site investigation data, risk assessments, remediation plans etc) to the provision of advice to the NIEA on the effectiveness and verification of remediation treatments in managing risk. You will also be responsible for instigating and managing a broad range of hydrogeological projects.

You will have an honours degree in Geology or an Environmental/ Engineering degree with a major geological component together with an MSc or Ph.D. in Hydrogeology, or able to demonstrate significant experience in the understanding and use of a wide range of hydrogeological data and information. You should also have experience in a consultancy, academic, governmental or regulatory position where use, analysis and understanding of hydrogeological information was/is a major part of day-to-day duties. In addition you should have an ability to learn new concepts and approaches as required, to deliver the appropriate level of service to customer/clients.

Working hours will be 37 per week excluding lunch breaks. A generous benefits package is also offered, including a company pension scheme, childcare allowance, 30 days annual leave plus public and privilege holidays.

For an application form contact Personnel (Recruitment), British Geological Survey, Keyworth, Nottingham, NG12 5GG. (Tel: 0115 936 3209). Further details can also be obtained by accessing our web page at www.bgs.ac.uk.

Applications must be returned by 16 October 2009. Please quote reference no. SSO/BE/MEH/09 when applying for an application form.

The Natural Environment Research Council is an equal opportunities employer and welcomes applications from all sections of the community. People with disabilities and those from ethnic minorities are currently under-represented and their applications are particularly welcome.

Science & Technology Facilities Council

The Science and Technology Facilities Council (STFC) is the UK’s provider of large scale interdisciplinary research infrastructures and their supporting technologies, which enable UK researchers to investigate the world we live in and understand the building blocks of the universe.

**Business Development Managers (VND429/09)**

£33,780 - £37,534 per annum  
Based in Cheshire and Oxfordshire

STFC Innovations Limited supports STFC by identifying and brokering potential deals that exploit STFC's intellectual property (IP) through licence agreements and shareholder agreements with start-up companies; and managing all aspects of STFC's IP rights including registering, maintaining, protecting, building and defending its IP portfolio.

STFC Innovations Ltd is looking to recruit several talented and experienced Business Development Managers (BDMs) to work within STFC to help it to deliver its overall Commercial Interaction Plan. This Plan is made up from the separate Plans of each of the operating Departments across the STFC.

The BDMs will be embedded within these operating Departments and will be expected to participate in the preparation and delivery of the Departmental Commercial Interaction Plan in both strategic and tactical matters. These plans describe the offerings, facilities and activities of each Department and the strategic partnerships and collaborations that each desires. The BDM will be the prime mover behind the implementation of each of these plans.

In order to help create and effectively deliver these Plans, the BDMs should have a degree in and a good understanding of maths, science or engineering or relevant industrial experience. Candidates will also have a broad experience of diverse industrial sectors. Experience in sales, marketing or technology transfer will be essential. Experience of working in an R&D environment, of working outside the UK and of interacting with the EU would all be advantageous.

For more detailed information about the roles and how to apply please visit [www.scitech.ac.uk](http://www.scitech.ac.uk) telephone 01925 603467 or e-mail recruit@dl.ac.uk quoting reference number VND429/09.

Closing date: 18 October 2009.

NO AGENCIES

STFC is an equal opportunity employer and promotes diversity in its workforce. We are particularly keen to consider applications from groups currently underrepresented in the workforce and we are positive about disability.

Oxford BioMedica develops gene-based medicines for the treatment of cancer, neurodegenerative and ocular diseases. A number of products are being tested in clinical trials including a cancer vaccine and a gene therapy for Parkinson's disease. We are now recruiting scientists to contribute to the development of our established products, to accelerate the transition of our product pipeline into clinical programmes and to investigate new product opportunities.

**Translational Scientist in Ocular Gene Therapy**
Ref: OB09-01

The successful candidate will play a key and challenging role in moving four ocular gene therapy programmes from the proof of concept stage through to clinical application in First in Man clinical studies, following a recently announced partnership with sanofi-aventis. Candidates should have 3-6 years research and/or development experience in a relevant field and ideally an understanding of ophthalmic diseases including retinal dystrophy, macular degeneration and corneal graft rejection.

You will contribute both to the laboratory research, the research and clinical strategy and support liaising with key opinion leaders in the field both in the academic and clinical setting. Good communication, organisational and written skills are essential as well as an ability to integrate multiple facets of a translational programme to ensure focus and success.

**Product Analysis Scientists**

There are two positions available:

- **Ref: OB09-02**
  You will have a high level of technical competence in cell and molecular biology techniques and knowledge of virology/gene therapy would be an advantage. Prior experience of qPCR and working in GLP/GMP environments would be highly beneficial.

- **Ref: OB09-03**
  You will have a high level of technical competence in cell and molecular biology techniques and knowledge of virology/gene therapy would be an advantage. You should have a degree in a relevant biological topic and some laboratory experience.

**Product Development Scientist**
Ref: OB09-04

The successful candidate will contribute to the development and optimisation of upstream manufacturing processes for the large scale manufacture of the company's lentiviral vector based products. You will have a high level of technical competence in cell and molecular biology techniques and knowledge of virology/gene therapy would be an advantage. You will use bioassays and qPCR screening methods to identify and characterise suitable production systems, such as producer cell lines, and will also help to optimise vector yields in static and suspension culture. Prior experience in the development of upstream manufacturing processes for biologicals and knowledge of downstream purification strategies for biological products would be highly beneficial.

We offer competitive salaries, which are aimed at attracting and retaining the best people with recognised relevant experience. We also offer a share option scheme, company pension scheme, generous holiday allowance, childcare voucher scheme, health cash benefit plan and life assurance.
To apply, please send your CV to: HR Manager, Oxford BioMedica (UK) Limited, Medawar Centre, Robert Robinson Avenue, The Oxford Science Park, Oxford, OX4 4GA. hr@oxiordbiomedica.co.uk.

Closing date for applications is 16 October 2004.
[2728-022 (2009) : 62]
The Paterson Institute is offering first rate international graduates the chance to train for a four year Ph.D. in one of our world class research groups. The Institute is a leading cancer centre of excellence, core-funded by Cancer Research UK and is at the heart of the Manchester Cancer Research Centre.

Project areas on offer include:

DNA Damage Response, Cell Cycle, Cell Division, Stem Cell Haematopoiesis, Computational Biology, Inosotides and Cell Signalling.

All students benefit from the dynamic research environment within the Institute, in which they can draw on the wide expertise of our scientists and clinicians and make use of our modern laboratories and state-of-the-art service units. Our training programme aims to improve effectiveness in research, provide professional and management skills and enhance career development.

Informal enquiries should be addressed to Dr Crispin Miller, the Postgraduate Tutor at: pgt@picr.man.ac.uk

To find out more about our research, full details of the projects, plus application forms, please visit our website www.paterson.man.ac.uk

The deadline for receipt of applications is 24 October 2009
Applications received after this date will not be considered

Two day interviews will be scheduled between 26 November and 1 December 2009

MRC
Medical Research Council
Leading Science for Better Health

Career development opportunities for Clinical Scientists, including specialty training grades, GPs, dentists, veterinarians investigating human health, nurses, midwives and members of the allied health professions.

Applications are invited for:

Clinical Research Training Fellowships Round I

MRC’s Clinical Research Training Fellowships train and develop outstanding medically and other clinically qualified professionals as rigorous scientists, able to relate their research to clinical medicine and to the improvement of health and wellbeing.

Many MRC CRTFs will eventually become research leaders in their own right. Others will pursue a predominantly clinical career, applying to clinical practice lasting insights that they have gained through their research training.

Applicants will demonstrate a record of challenging pre-doctoral research. They will have an ambitious and rigorous approach to research and to their own development as researchers. They will be learning in an environment with strong multidisciplinary research and a broad range of basic, translational and clinical research training.

Applications are encouraged across all areas of the MRC’s remit. However, individuals whose research interests include public health should note MRC operates a separate competition for Population Health Sciences Fellowships.

Fellowships provide support for up to three years (four years for patient-orientated research). This includes a personal salary (up to, but not including, a consultants salary) and an annual travel allowance of £450 per year. For pre-doctoral applicants, a research training support grant of up to £15,000 per year is available.

At post-doctoral level, the fellowship provides the full economic costs of the project. The scheme offers an opportunity to train for up to one year outside the UK, in UK industry or a 2nd UK Research Centre.

Fellows are required to register for a research degree, normally a Ph.D., based on the research undertaken during the fellowship. Individuals who obtained their Ph.D. some time in the past and wish to pursue further research training in the biomedical sciences are also eligible to apply.

MRC awards jointly funded pre-doctoral/entry level clinical research training fellowships in partnership with a number of Royal Colleges and other organisations to promote research of relevance to each partner. Jointly funded fellowships carry additional eligibility criteria; further details are on the MRC website.

The deadline for applications for the above Fellowships is 4.00pm on 22nd January 2010.

As part of the Council’s Equal Opportunities policy, consideration will be given to applicants returning to science following a career break. There are no age limits for any of our schemes and all fellowships may be held part-time to accommodate domestic responsibilities. All applicants should note that residence eligibility criteria apply to this scheme and applicants would normally be required to demonstrate a relevant connection to the UK (or EEA) and to be employed in the UK at the time of application.
Further information and guidance on applying for this award and other funding opportunities provided by the MRC can be found on our website at www.mrc.ac.uk/Fundingopportunities/Fellowships/index.htm

Specific enquiries can be sent by e-mail to: Fellows@headoffice.mrc.ac.uk

'Research CHANGES lives'
[2728-025 (2009) : 63]
The Max Planck Society invites applications from outstanding young scientists in all fields of research pursued by the Max Planck Society (Biology and Medicine; Chemistry, Physics and Technology; Humanities, Social Sciences and Law).

We also explicitly encourage applications from candidates with an interdisciplinary background.

The successful candidates will be offered a Max Planck Research Group Leader position for a period of five years (W2; equivalent to associate professor level) including a five-year grant (research positions, budget, investments) at a Max Planck Institute of their choice.

Applications should include a CV, a list of publications, copies of three publications, a one-page summary of scientific achievements, and a two-page research plan.

For further information and detailed application instructions see [http://www.mprg.mpg.de](http://www.mprg.mpg.de)

The Max Planck Society has established a tenure track policy for new leaders of Max Planck Research Groups; more details are available on the website above.

The Max Planck Society is committed to equal opportunities and to employing individuals with disabilities.

The deadline for application is November 17, 2009. [2728-026 (2009) : 64]
Graduate Trainee

An opportunity exists to join a small and friendly team of Chemists engaged in pesticide residue and formulation analysis. The ideal candidate must have a formal qualification in Chemistry, preferably a degree. This role will suit a recent graduate as full training will be given. Experience is not essential, of more importance is an enthusiastic and flexible approach. In return we offer a competitive salary with additional benefits including an annual bonus and gym membership.

Please email your CV to: - David Norris Analytical Laboratories Ltd, Dartford, Kent kirsty@dnal.net

New Scientist Jobs
[2728-028 (2009) : 64]
MRCT CENTRE FOR THERAPEUTICS DISCOVERY

SYNTHETIC CHEMIST, MOLECULAR MODELLER AND IN VITRO ADME SCIENTISTS

MRCT CENTRE FOR THERAPEUTICS DISCOVERY - CHEMISTRY

Medical Research Council Technology (MRCT) is the technology transfer company of the UK Medical Research Council (MRC) and is responsible for the development and commercialisation of some of the finest biomedical research in the world. Within the MRCT the Centre for Therapeutics Discovery (CTD) is focused on expanding current capability and capacity to provide the UK with a national drug discovery resource with the critical mass to progress high quality projects towards clinical benefit.

As part of the growth we are looking to expand Synthetic Chemistry, Molecular Modelling and in vitro analytical ADME capabilities to support the growing number of in-house drug discovery projects. Working as key members of cross functional project teams these openings provide excellent opportunity to work on cutting-edge novel research at the interface between academia and industry.

Requiring excellent communication and team working skills, successful candidates will enjoy thinking "outside the box" and presenting results and ideas in a fast paced team environment. Often working on multiple projects, the positions will suit highly organised individuals with excellent skills in time management.

**Synthetic Chemist** (SC oct09): With a BSc or equivalent in chemistry together with industrial experience gained in a pharmaceutical or biotech organisation, the successful candidate will have a proven record in synthetic organic chemistry, demonstrated through theoretical knowledge and practical ability. The capability to design and execute synthetic routes and the confidence to work independently and efficiently are key requirements for the role. An understanding of the basic principles of medicinal chemistry would be an advantage.

**Molecular Modeller** (MM Oct09): In this role you will analyse data and use a variety of in silico methods including pharmacophore design, homology modelling and docking. You will rationalise binding modes, develop predictive models and suggest new compounds for synthesis, making a direct impact on drug discovery. You will have a first degree in organic chemistry together with proven experience of using modelling to direct drug design and development, either through postgraduate studies or from industrial experience in a pharmaceutical setting. Ideally you will be knowledgeable in both ligand and structure based design methods. Experience of any programming languages would be a plus.

**In Vitro ADME Scientist** (ADME oct09): We are seeking a lab based scientist with experience of running ADME and DMPK in vitro assays to support drug discovery programmes, and recent experience of working in a multi disciplinary drug discovery environment. You will have knowledge and experience of physicochemical property measurement (including Log D, solubility), and ideally have some familiarity with Agilent LC/MS and LC/MS/MS systems. Additional experience of using LC/MS systems in purity assessment and purification roles would also be an advantage.

Your salary will be determined by qualifications and experience, in addition MRCT offers a final salary pension scheme, private health insurance and 28 days' paid holiday per year.

To apply please email your CV and covering letter, stating the job reference, to: recruitment@tech.mrc.ac.uk or by post to Recruitment, MRC Technology, 1-3 Burtonhole Lane, London, NW7 1AD (electronic applications preferred).

For further information visit: www.mrctechnology.org
Tmo RENEWABLES

It's rare that a commercial corporation can stand up and announce new science that will transform an industry.

Yet our momentous breakthrough doesn't stop there: it has profound implications for the generation of energy on the global scale-sustainable, low carbon energy that can be produced from a broad range of raw materials, including recycled waste.

TMO Renewables is a leader in the development of green, second generation biofuels. Focussing on novel proprietary technology we have developed a groundbreaking method for producing ethanol from almost any type of biomass or biowaste. The bioethanol industry is leading the way as the next renewable liquid fuel and the potential for the TMO technology is vast.

We now require a number of outstanding individuals to join our dynamic team in Guildford, Surrey and make a significant contribution in this rapidly expanding field.

**Microbiology Team Leader** - Process Biotechnology up to £40k
We are seeking a talented Ph.D. microbiologist to lead a productive research team responsible for optimising key aspects of our novel world leading technology for the production of sustainable advanced biofuels. Specifically you will provide technical expertise and practical leadership in optimising the preparation of ligno-cellulosic waste, together with developing and optimising small scale fermentation conditions. To deliver in the role, you will have significant research experience together with leadership skills. Importantly, you will be a creative thinker with a proactive and positive attitude to problem solving, and an ability to interact flexibly and effectively in cross functional teams.

**Microbiology Research Scientist** - Process Biotechnology up to £30k
We require a graduate or Ph.D. level microbiologist with relevant research experience to join the Process Biotechnology team, in which you will design and undertake experiments to explore and optimise the preparation of ligno-cellulosic waste together with developing and optimising small scale fermentation conditions. The role requires an inventive scientist who can reflect and apply their knowledge of bacterial physiology and biochemistry in a practical way. Also important is the ability to work enthusiastically and flexibly in cross functional teams.

**Molecular Genetics Research Scientist** - Strain Development up to £30k
We are searching for an experienced Molecular Geneticist to join our expanding team, working to design and undertake experiments to develop and optimise novel thermophilic bacteria using classical adaptation/mutagenesis techniques as well as leading-edge molecular genetics approaches. You will be a Ph.D. scientist with research experience gained in an academic or industrial environment, and importantly can apply your knowledge and experience of strain development and improvement in a practical and innovative way. Ideally you will be able to demonstrate practical success in a strain development project.

**Analytical Scientist** up to £30k
We are seeking an analytical chemist to join our team who are researching and developing analytical methods to increase knowledge and understanding of ligno-cellulosic biomass and its conversion to ethanol via fermentation. You will be a graduate or Ph.D level scientist with practical experience in HPLC/IC analyses, and be adept at maintaining systems and associated hardware/software. The role requires a resourceful scientist who can apply their knowledge of fundamental chemistry and analytical expertise in an innovative and practical way. Also important is the ability to work flexibly in cross functional teams to achieve company goals. An understanding of carbohydrate chemistry would be advantageous.

**Intellectual Property & Technical Information Officer** up to £30k
The major focus of the role will be to coordinate TMO's intellectual property portfolio including our patent, trademarks and know how. You will be working closely with patent lawyers and in house technical experts to draft and file new patents and will gather, evaluate and disseminate technical and commercial information. You will be a life sciences graduate with strong IT skills, an interest in the emerging Cleantech sector and previous industrial experience in patent work would be a strong advantage.

Salaries in line with experience + bonus & excellent benefits

To apply for these positions please e mail your CV to: Sally Emmett - Cranleigh Scientific

Scientific & Renewable Energy Recruitment
[2728-030 (2009) : 66]
International Whaling Commission

SECRETARY TO THE COMMISSION

The post of Secretary to the International Whaling Commission (IWC) will fall vacant in July/August 2010.

The IWC is composed of 88 member governments and is the body responsible for the conservation of whale stocks and the management of whaling.

The Secretary heads the Commission’s Secretariat and is responsible for implementing the decisions of the Commission and for the efficient discharge of Commission business.

The person to be appointed will have proven management and administrative abilities. Experience in the international arena (particularly with intergovernmental organisations) and dealing with scientific issues would be an advantage.

English is the official language of the IWC. Working languages are English, French and Spanish.

The post is graded at the equivalent of the D.1 level on the United Nations salary scale.

For further details see website and/or contact (in confidence): The Chair The International Whaling Commission The Red House, 135 Station Road, Impington, Cambridge, UK, CB24 9NP Email: vacancies@iwcoffice.org Tel: +44 (0)1223 233971; Fax: +44 (0)1223 232876 www.iwcoffice.org

Closing date for applications: 16 November 2009

[2728-031 (2009) : 66]
An international, not-for-profit organisation involved in all aspects of combating oil and chemical spills in the marine environment is seeking a Technical Support Coordinator to join its small London-based team. ITOPF's work is varied and challenging. It involves giving advice world-wide on the most effective methods for responding to oil and chemical spills from ships, minimising their impact on economic resources and the environment, and the provision of compensation. Further details of ITOPF's activities can be found on the web site at [www.itopf.com](http://www.itopf.com).

As a Technical Support Coordinator you will be responsible primarily for the assessment of claims arising from pollution damage and for preparing reports and letters to facilitate payment of claims. Management and interpretation of technical information held on ITOPF databases, particularly on response equipment and response techniques, will also be an important part of your remit. It is expected that you will be able to gather and input data, interact with data providers and deal with technical queries from third parties, as well as work on specific projects as they arise and provide invaluable office support to our team of Technical Advisers whilst they are attending oil/chemical spills.

As a prospective candidate you should possess a degree in a scientific or technical discipline and be highly computer literate, especially in the use and development of databases. The ability to analyse and present technical data is important, as is a working knowledge of geographical information systems (GIS). Numeracy and a good command of written and spoken English are essential.

Starting salary would be in the region of £34,000 per annum, plus a generous benefits package including pension scheme and private medical insurance.

If you feel you meet the above criteria and would like further details and an application form, please contact:
Carol Remnant, ITOPF Limited, 1 Oliver's Yard, 55 City Road, London EC1V 1HQ Tel: +44 (0)20 7566 6999 Fax: +44 (0)20 7566 6950
email: carolremnant@itopf.com
[2728-032 (2009) : 66]
Barts and The London School of Medicine and Dentistry
Genome Centre, William Harvey Research Institute

**Bioinformatician**

£33,492 - £35,355 per annum          Ref: 09360/MB

An exciting opportunity exists to work as a Bioinformatician within the Genome Centre in the William Harvey Research Institute at Barts and The London School of Medicine & Dentistry. The centre is a growing organisation providing genetics and genomics technologies, focussing on next generation sequencing and micro-array, to a variety of academic researchers within the school and the wider London academic community. You will work closely with academics both in design and analysis of experiments utilizing these cutting-edge technologies.

This demanding role requires you to possess a broad portfolio of skills including an extensive genetics/genomics knowledge, programming, databasing and system administration. You should ideally have a Ph.D. in a relevant discipline or equivalent experience.

The post is full-time for three years starting from 1st November 2009 or as soon as possible thereafter. Starting salary will be in the range £33,492 - £35,355 per annum inclusive of London Allowance. Benefits include 30 days' annual leave, final salary pension scheme and interest-free season ticket loan.

You must be able to demonstrate your eligibility to work in the UK in accordance with the Immigration, Asylum and Nationality Act 2006. Where required this may include entry clearance or continued leave to remain under the Points Based Immigration Scheme.

Details about the Genome Centre can be found at [www.smd.qmul.ac.uk/gc/](http://www.smd.qmul.ac.uk/gc/)

Informal enquiries should be addressed to Charles Mein at c.a.mein@qmul.ac.uk or on 020 7882 2055. For information about William Harvey Research Institute, brochures are downloadable from [www.whri.qmul.ac.uk](http://www.whri.qmul.ac.uk)

Further details and an application form can be found at [www.hr.qmul.ac.uk/vacancies](http://www.hr.qmul.ac.uk/vacancies)

Completed application forms, quoting reference 09360/MB, should be returned by email to cssq-recruit@qmul.ac.uk or by post to Charterhouse Square Recruitment, Barts & The London School of Medicine & Dentistry, c/o SMD Management Offices, The Lodge House, Charterhouse Square, London EC1M 6BQ.

The closing date for the applications is 12 noon on 14th October 2009.

Valuing Diversity & Committed to Equality

[2728-033 (2009) : 67]
UNIVERSITY OF Southampton
School of Electronics and Computer Science

Professor of Nanotechnology

The University has recently made a £100m investment in a state-of-the-art Nanofabrication Centre and a further £50m in a new Institute for Life Sciences. It now seeks to appoint a new Professor to lead an international research activity in this research space.

The 1900m$^2$ clean room complex is newly completed and equipped with e-beam and optical lithography, epitaxy, chemical vapour and atomic layer deposition, He ion microscopy, FIB, SPM, Raman and a full cryogenic characterisation capability. The research of the Centre covers a wide spectrum of activity including nanoelectronics, quantum information technology, lab on a chip, nanophotonics, photovoltaics and microsystems technology.

We offer the scope for a dynamic individual to contribute to the further development of this internationally recognised Centre in creative and enterprising ways by pursuing your own research interests in nanofabrication technologies.

You will be expected to have good contacts with government funding agencies and industrial companies. An established network of contacts in the field, a track record in academic and industrial research and good management ability are all essential. Applications from candidates with multi-disciplinary interests spanning micro and nanotechnology for healthcare, energy and/or "green" technologies would be particularly welcomed.

If you are looking for a challenging position, at a senior level, within one of the highest ranking research-led Universities in the UK, then this could be the ideal opportunity for you to realise your vision.

Advice on the technical area may be obtained from Professor Ashburn, tel: +44 (0)23 8059 2886 or email: pa@ecs.soton.ac.uk

To apply online visit www.jobs.soton.ac.uk Alternatively telephone 023 8059 2750. Please quote the reference number 3601-09-E on all correspondence. The closing date for this position is 5 November 2009 at 12 noon.

At the University of Southampton we promote equality and value diversity.

www.jobs.soton.ac.uk

POSITIVE ABOUT DISABLED PEOPLE
[2728-034 (2009) : 67]
Faculty of Science Pharmacy and Chemistry

Do you want to enhance your academic cancer leading research in a School of Pharmacy? Are you interested in developing the next generation of pharmacists, chemists and pharmaceutical scientists?

The School of Pharmacy and Chemistry at Kingston is a vibrant, recently established School of Pharmacy built on a long tradition of chemistry. The Kingston MPharm Course is now at steady state and the priority is to grow and further develop our current research programmes.

We are looking for two individuals who have the experience, drive and vision to lead our research activities in medicinal chemistry and pharmaceutics whilst providing a clear focus for research led teaching for the MPharm and other academic programmes. Applicants will preferably have academic experience in a School of Pharmacy or similar, and will have a strong interest in teaching and research in their specialist field within Pharmaceutics or Medicinal/Pharmaceutical Chemistry as appropriate.

Successful candidates will be encouraged to maintain contact with the academic, industrial, hospital or community pharmacy sectors.

**Chair in Medicinal/ Pharmaceutical Chemistry**
£51,459 to £66,794 pa inc. (Ref: 09/313)
The post will provide an exceptional opportunity for a chemistry, pharmacy or similar academic with a proven research track record and teaching experience to further advance their career. The successful applicant will lead future teaching, research and development in their specialist area and the Chair in Medicinal/Pharmaceutical Chemistry will also contribute to the development of further undergraduate and postgraduate courses.

**Chair in Pharmaceutics**
£51,459 to £66,794 pa inc. (Ref: 09/314)
The post will provide an exceptional opportunity for a pharmacy-related academic with a proven research track record and teaching experience to further advance their career in our thriving pharmaceutics team.

The successful applicant will, in addition to being the field leader for pharmaceutics and setting the tone and direction of future teaching, lead research and development in the subject. It is envisaged that the Chair in Pharmaceutics will also contribute to the development of further undergraduate and postgraduate courses within Kingston School of Pharmacy and Chemistry.

Potential applicants for either of these important posts are encouraged to contact either Professor John E Brown (Head, School of Pharmacy and Chemistry) j.e.brown@kingston.ac.uk on 020 8417 2006 or Prof. Chris Cairns (Head of Department of Pharmacy) c.cairns@kingston.ac.uk on 020 8417 2022 for further information or an informal discussion.

For further information and to apply online, please visit our website at www.kingston.ac.uk/jobs Alternatively you can email recruitment@kingston.ac.uk for an application pack, or if you do not have access to the internet, please call the recruitment line on 020 8417 3 153, quoting the appropriate reference number. If you are a textphone user, please dial 18001 followed by the recruitment line number to access the Typetalk service.

Closing date: 12 noon on 26 October 2009. Interview date: W/C 16 November 2009.

embracing diversity - committed to equality
Kingston University London
www.kingston.ac.uk

[2728-035 (2009) : 68]
Applications are invited for the above positions within the Environmental Research Group. ERG is a part of the School of Biomedical and Health Sciences at King’s College London and has a growing reputation for the measurement, prediction and control of air pollution in the UK. ERG clients include Defra, Transport for London, GLA, Local Authorities and the private sector. Within ERG there is an exciting opportunity to develop considerable skills and experience in the field of air quality monitoring and analysis.

Both posts are full-time. The Assistant Air Quality Analyst post is a fixed-term contract covering maternity leave. This will be for an initial period of nine months or until the return of the substantive post holder, whichever is the sooner. The Senior Air Quality Analyst post is permanent.

For both posts you will be required to have an honours degree in a relevant science or environmental subject. You must be highly motivated, have the ability to organise your own work, with good report writing and communication skills. You will also be expected to work closely with the Monitoring team and be able to work under pressure, to tight deadlines and with minimal supervision.

**Senior Air Quality Analyst**
The Senior AQA post requires postgraduate experience of air pollution related topics, within a university, private company or environmental consultancy including the operation of air quality monitoring equipment. You will be required to manage monitoring and data analysis contracts. You will also be responsible for undertaking air pollution monitoring duties, including field work, data analysis, interpretation and reporting. There will be considerable liaison with clients and equipment engineers. Salary will be offered within the Grade 6 salary scale currently ranging from £32,917 - £38,855 per annum inclusive of £2,323 London Allowance, subject to skills, knowledge and experience. Ref: N5/JGA/345/09-DB.

**Assistant Air Quality Analyst**
You will be responsible for undertaking air pollution monitoring duties, including field work, data analysis and interpretation. There will also be liaison with local authority clients and equipment engineers. This post is developmental and therefore it is anticipated that the duties and responsibilities will change over time to reflect the successful implementation of the work.

Salary will be offered within the Grade 5 salary scale currently ranging from £27,946 - £32,027 per annum inclusive of £2,323 London Allowance, subject to skills, knowledge and experience. Ref: N5/JGA/344/09-DB.

Further details and application packs are available on the College's website at [www.kcl.ac.uk/jobs](http://www.kcl.ac.uk/jobs) or by emailing hsrecurr4@kcl.ac.uk quoting the relevant reference number.

Closing date: 21 October 2009.

UNIVERSITY OF COPENHAGEN
SIGILUM UNIVERSITATIS HAFNIENSIS

Professor with Special Responsibilities within Plant Nutrients

Faculty of Life Sciences, Department of Agriculture and Ecology, wishes to appoint a professor in Plant Nutrients: Novel measurement techniques and management of plant nutritional status.

A Professorship with Special Responsibilities is limited to a five years employment, with the possibility of a 3-year extension. Upon expiry of the professorship, the appointee is ensured employment and remuneration as an associate professor.

The professorship comprises research and teaching in Plant Nutrients within one or more of the following areas:

• Methods for diagnosis of plant nutritional status and characterisation of bio-active nutrient pools in plants
• Plant nutritional metabolomics, including high-throughput elemental analysis technologies and their integration with tools in bioinformatics and molecular genetics
• Stable isotopes as indicators for tracing authenticity and nutritional sources of vegetable food products
• New methods for assessment of soil pools of bioavailable nutrients.

Employment and remuneration will be according to the Agreement between the Danish Ministry of Finance and the Danish Confederation of Professional Associations.

In order to apply for the post, please refer to the complete job advertisement. The advertisement is available at www.life.ku.dk/English/positions.

The deadline for application is 2 November, 2009 at 12.00 noon.

The Faculty of Life Sciences is one of Europe's leading university environments in the areas of food, health, plants, biotechnology, natural resources, the environment and related academic areas. Our research and degree programmes are centred on knowledge and tools that can help secure a brighter future for humans, animals and plants.

We are looking for a highly-motivated postdoctoral fellow to join our research group studying the role of cardiac developmental genes in adult myocardial biology and homeostasis.

Applicants should have a Ph.D. in a relevant subject and have substantial expertise in one or more of the following areas: in vivo murine cardiac surgical models, cardiac ultrasound, hemodynamic monitoring, and in myocardial pathology. Ideally they should have a UK Home Office Licence.

The successful candidate will be well-organised and able to work independently and contribute conceptually to the overall research programme of our multidisciplinary group.

This departmentally funded post is initially for five years and is available immediately.

Further particulars, which detail the application procedure, should be obtained from [http://www.cardiov.ox.ac.uk/vacancies](http://www.cardiov.ox.ac.uk/vacancies)
Informal enquires may be made to cvm_recruitment@cardiov.ox.ac.uk (please quote vacancy reference HS/09/017).

The closing date for applications is Friday 23 October 2009. Interviews will be held on Monday 9 November 2009.

Discover a brighter career with a Cranfield MSc

A Cranfield Health MSc will enable you to significantly strengthen your future career prospects, and allow you to pursue a wide variety of career opportunities.

All our courses are developed in collaboration with industry and delivered by leading academics in our unrivalled facilities. Each course includes an often industry-based research project allowing you to develop your knowledge and actively apply it in the ‘real-world’.

Cranfield's extensive industry links provide excellent networking opportunities with potential employers - 93% of our graduates enter relevant employment or further study within six months of graduation.

Come along to our Open Day 11 November

Cranfield UNIVERSITY

Full and part-time Masters' programmes include:
• Analytical Biotechnology MSc
• Applied Bioinformatics MSc
• Clinical Research MSc
• Food Chain Systems
• MSc Health and the Environment
• MSc Medical Diagnostics
• MSc Molecular Medicine
• MSc Nanomedicine
• MSc Organisational Knowledge
• MSc Translational Medicine MSc

* Conditions apply. Details on application.
[2728-040 (2009) : 70]
Veterinary Laboratory Technician
Oxford University Veterinary Services

An enthusiastic individual is required for a full time post working within the Veterinary Laboratory. Working as part of a small team, you will handle the microbiological, parasitological and serological examination of samples for diagnosis and health monitoring. Additional responsibilities include some media preparation, stock control and operation of the department's two autoclaves.

A minimum qualification of BTEC HNC or equivalent together with proven experience of immuno-assays is essential. Experience of diagnostic microbiology procedures is desirable.

Further particulars, and an application form can be obtained from [http://www.vet.ox.ac.uk](http://www.vet.ox.ac.uk) or The Assistant Administrator, OUVS, c/o Sherrington Building, Parks Road, Oxford OX1 3PT (tel: 01865 618439, email: enquiries@vet.ox.ac.uk). Application forms should be completed and posted together with a C.V. and the names and contact details of two referees to: The Assistant Administrator at the above address. Closing date for applications is noon Friday 2 October 2009.

This post does not meet the minimum requirements for work permit employment; we can therefore only accept applications from those who can prove their eligibility to work in the UK.

Committed to equality and valuing diversity

TECHNOLOGY TRANSFER at the Wellcome Trust invites academic researchers and companies to apply for translational funding

TRANSLATION AWARDS
These are available for applied R&D projects that address an unmet need in healthcare, offer a potential new solution and have a realistic expectation that the innovation will be developed further by the market.

The spectrum of technologies funded includes: diagnostics, enabling technology, regenerative medicine, therapeutics, vaccines and medical devices.

Two calls for preliminary applications per year.
Deadlines for 2010: 8 January and 23 July.

www.wellcome.ac.uk/techtransfer/newscientist

SEEDING DRUG DISCOVERY
This £91 million initiative facilitates early-stage small-molecule drug discovery in areas of unmet medical need. The awards help applicants with a potential drug target or new chemistry to embark on compound discovery and/or lead optimisation.

Previous awards have been made for projects tackling obesity, MRSA, Gram-negative bacteria, cancer and Alzheimer’s disease. Forthcoming deadlines for preliminary applications: 9 November 2009 and 21 May 2010

The Wellcome Trust is a charity registered in England, no. 210183.
Four Research Opportunities in Plant Cell-Wall Biochemistry

The Edinburgh Cell Wall Group ([http://homepages.ed.ac.uk/sfry/](http://homepages.ed.ac.uk/sfry/)) wishes to fill 4 newly funded positions exploring the metabolism and evolution of plant cell-wall polysaccharides:

- Ph.D. studentship on the evolution of wall polysaccharides in bryophytes and their charophytic algal ancestors (Leverhulme Trust).
- Ph.D. CASE studentship on the discovery of novel growth-regulating enzymes in land-plant cell walls (Bayer BioScience / BBSRC).
- Postdoctoral research on mechanisms of pectic polysaccharide cross-linking via borate bridges (BBSRC).
- Postdoctoral research on new enzyme activities that remodel wall polysaccharides in charophytic algae (Leverhulme Trust).

The work involves chromatography, enzyme assays and *in-vivo* radiolabelling ([*New Phytol.* 161, 641]). Each post is approx 3 years, starting January 2010 or as soon as possible thereafter. You should have experience of ‘wet biochemistry’ or plant physiology. Studentships include a stipend (at least £13,290 p.a.) and tuition fees for EU citizens. The postdoc positions have a salary range of up to £32,458 per annum.

For studentships please contact Prof. S.C. Fry ([s.fry@ed.ac.uk](mailto:s.fry@ed.ac.uk)).
For postdoctoral posts see our website quoting ref: 3011716 & 3011717.

Closing date: 22 October 2009.
Committed to Equality and Diversity

The University of Edinburgh is a charitable body, registered in Scotland, with registration number SC005336.

We're putting a lot more than petrol into a car.

At ExxonMobil, our scientists and engineers are working on more than the petrol that goes into your tank. We're also supplying innovation.

We're collaborating with car makers and other partners on an array of new technologies to improve efficiency while reducing emissions – like advanced lightweight car plastics, new liners to keep tyres properly inflated longer and our lithium-ion battery separator film that could speed the adoption of hybrid vehicles. Looking ahead, our on-board hydrogen fuel system would convert conventional fuels – like petrol, diesel and ethanol – into hydrogen, right on board the fuel cell vehicle. This could reduce greenhouse gas emissions up to 45%.

Because when our cars are fuelled by innovation, we can all drive farther and more efficiently than ever before.

[2733-003 (2009) : 22]
NTNU is Norway's leading science and engineering university, located in Trondheim at 63° north. We may work at Europe's outer edge – but our research is cutting edge. Here's one example:

**Bullets that save lives**

They’re round, of perfectly equal size, microscopic, and kind of strange...but they could save your life.

The creation of tiny monosized polymer beads – so small that 25 of them could line up across a human hair – has long been the holy grail for polymer scientists. NTNU Professor John Ugelstad took up the challenge – and concocted a batch in his laboratory.

These perfectly uniform microscopic beads have enormous medical applications. Doctors use them to treat cancer, diagnose HIV, and reduce the likelihood that transplant patients will reject their new organs.

Now Ugelstad beads are moving from medical technology into nanotechnology. NTNU researchers are continually finding new ways to put the beads to work. Flat-screen TVs and computer monitors are a first step, with other applications soon to come. Ugelstad beads may not be magic bullets – but they’re a good start.

Top research demands brilliant minds – we’re always looking for the best.

Visit [www.ntnu.edu](http://www.ntnu.edu)

NTNU
Norwegian University of Science and Technology

**RESEARCH THAT MAY CHANGE YOUR WORLD**

The Norwegian University of Science and Technology (NTNU) is Norway's premier academic institution for technology and the natural sciences, with equally strong programmes in the social sciences, the arts and humanities, medicine, architecture and fine art. The university's cross-disciplinary research results in innovative breakthroughs and creative solutions with far-reaching social and economic impact. Visit [www.ntnu.edu](http://www.ntnu.edu)

[2733-004 (2009) : 26]
FOR THE NEW ENERGY FUTURE WE NEED TO TURN MORE IDEAS INTO ACTION

The world needs more energy and less CO₂. To meet that challenge we need to turn bright ideas into workable solutions – and then make those solutions a reality.

We’re working on a range of innovative projects. Some are still on the drawing board – like developing ways to produce fuel from algae and straw. Others are already being delivered to our customers in many parts of the world – like cleaner cool technology.

At the same time we are making our existing fuels cleaner and more efficient, and working on technology to manage CO₂ emissions.

To find out how Shell is helping prepare for the new energy future visit [website link]
Swiss paradise

Beautiful ski trails, spotless cites, stunning mountain scenery - and top-class labs. Switzerland offers an attractive mix of career options and lifestyle choices, says Kate McAlpine

WITH picturesque Alpine villages, vast expanses of skiable terrain, and delectable fondue, Switzerland is a popular holiday destination. But those same mountains also spur innovative engineering and provide exciting research opportunities in snow and climate studies. Down in the cities, with clean streets, punctual buses and fine chocolate, you'll also find top industrial research centres and well-equipped scientific institutes.

As funding is readily available through the Swiss National Science Foundation, and with salaries as high as £160,000 for full professors, might this country be a researcher's paradise? New Scientist investigates.

Willkommen in Zürich

Zurich is home to the University of Zurich, an IBM research centre and one of the two Swiss Federal Institutes of Technology. About 30 kilometres west of Zurich, the Paul Scherrer Institute (PSI) makes up the third in the suite of three government-funded research centres.

The Swiss Federal Institute of Technology in Zurich (ETHZ) covers science from all angles. In addition to natural sciences, social sciences and maths, the institute boasts several strong engineering departments - from architecture to biosystems.

As a geotechnical engineer at ETHZ, one of Sarah Springman's areas of research is unstable soil in the mountains. Since rockfalls and landslides dare to obstruct Switzerland's famously well-run rail system, these studies go well beyond the laboratory.

Springman first visited ETHZ in 1994, while working at the University of Cambridge. "My chin nearly hit the ground when I saw the wonderful laboratories, she recalls.

She considers the teaching schedule to be demanding: "I teach much more than I would expect to teach at Cambridge". But the responsibilities come with benefits: money to support a scientific group, and joint teaching and research assistants to share the task of preparing and marking assignments.

A short journey north-west of ETHZ will take you to PSI, the home of many top scientists. It's fitting that this year's chemistry prize has been awarded to Venkatraman Ramakrishnan, who used the institute's £95 million Swiss Light Source for his prize-winning studies on the structure of the ribosome.

The SLS is one of PSI's primary facilities, providing super-bright photon beams to teams seeking to understand chemical and magnetic properties of materials, or create detailed images of animal tissues.

Not all Swiss chemists work in the lab, though. Some, such as Margit Schwikowski, who leads the analytical chemistry group, use their surroundings. "We work with ice cores from high Alpine glaciers," she says. Her focus is past climate variability and pollution. In addition to the main laboratory north of Zurich, PSI collaborates with an international high-altitude research station at Jungfraujoch, 3580 metres above sea level.

Bern entdecken

The University of Bern is a sprawling intellectual behemoth, covering all the sciences and liberal arts and boasting more than 25 institutes focussed on maths and science research.

Irving Dindoyal started at the University of Bern in August, working as a postdoc on medical imaging. "I think the people are very friendly. They're very welcoming to outsiders," he says.

Swiss medical-data laws protect patient anonymity, yet Dindoyal has still found it easier to obtain data for his research in Switzerland than in the UK.

Dindoyal has already experienced Swiss collaboration, regularly meeting with a group at the Swiss Federal Institute of Technology in Lausanne. The short distances between Switzerland's cities
promotes collaboration, says Schwikowski. "It's nice that you can easily go to a seminar in Zurich or Bern."

Bienvenue à Genève
Just west of Geneva lies CERN, the nuclear and particle physics centre whose famous particle accelerator rings cross the border with France.
The laboratory's real estate may be shared with France, but Switzerland houses the headquarters.
The Large Hadron Collider (LHC), the world's most powerful particle accelerator (when it's working), is designed to explore the most fundamental aspects of matter – the particles that make up everything we know and the forces that govern them. UK residents can get in on the action through universities at home, or by applying for employment at CERN.
Many of its resources are focussed on the proton-smashing LHC and its experiments, but the centre also runs an antiproton ring whose prime purpose is to study the intriguing physics of antimatter. Two of these experiments aim to make and trap anti-hydrogen atoms for close comparison with ordinary hydrogen – a glimpse into the anti-world.
Those working at CERN can choose to live in the city or the French countryside, and the laboratory boasts one of the best ski clubs in Geneva.
Most institutes provide help with any necessary documents, initial housing and even support for getting spouses settled. Expats are in good company: 40 to 80 per cent of faculty and scientists in Swiss institutes have been lured from other nations.
Some UK researchers find ways to bring pieces of British culture along. Springman misses the unspoken competition between students to ask the most difficult question in a technical seminar. "One tries to recreate that a little bit with one's Ph.D. students, to help them think on their feet and ask key questions," she says. "They all quite like a silly English sense of humour."

REACHING NEW HEIGHTS
Fancy flying around the world in a solar-powered plane? Even the 70 members of the Solar Impulse team think it's crazy, but it doesn't keep them – and 80 expert consultants – from trying.
The programme, based in Dübendorf and Lausanne and led by Bertrand Piccard and André Borschberg, has now produced its first prototype. HB-SIA is set to take off for a historic first crewed night flight in 2010.
With a night-and-day average of only 8 horsepower available, the aircraft combines the wingspan of an Airbus A340 with the weight of a mid-sized car. Solar cells don't just cover the tops of the wings – they're an integral part of the structure.
Space is very tight on board and there is only room for a single pilot and enough provisions for a 36-hour flight. The long flight times inspired the team to design a warning system which is integrated into the pilot's clothing, so that at times of rest they needn't rely on lights and alarms on the dashboard. "In very long flights, when the pilot is resting and maybe not fully concentrating, he will feel this information through vibrations," says Borschberg, and so be able to react quickly to any problems.
Next spring, the team will be seeking out new talent to help design the next model, intended to circumnavigate the globe, powered by nothing but sunshine.
"My chin nearly hit the ground when I saw all the wonderful laboratories"

What's hot?
Swiss Cube
Launched on 23 September, the Swiss Cube satellite marked Switzerland's first satellite foray into the final frontier. The probe, produced at the Swiss Federal Institute of Technology in Lausanne, is designed to map the brightness of the night-glow in the upper atmosphere. Each of its sides measures just 10 centimetres. The main aim of the project, which involves 200 students, is to teach young researchers.

2000-Watt Society
A group of professors at ETHZ has dreamed up a model for sustainable energy-consumption: the 2000-Watt Society. Their goal: to reduce the energy consumption of people in developed nations, from over 5000 watts to the global average of 2000. The institute is researching efficient buildings and transport, testing them out on the eco-friendly population of Basel.

SenseSoar
This solar-powered project aims to find people lost in wild terrain or buried under rubble. ETHZ’s uncrewed "SenseSoar" is a winged plane that will fly autonomously over the terrain in question, beaming infrared data that its scanners have detected back to base. Its infrared sensors and batteries will allow it to continue a search in darkness, when crewed flights would be brought to a halt.

DNA Dating
This matchmaking site has the laws of attraction down to an exact science. Zurich-based GenePartner takes a Swiss researcher's "sweaty T-shirt study" to a marketable level. Claus Wedekind's 1995 experiment found that women prefer the scents of men whose immune systems are considerably different from their own. The company provides DNA compatibility profiles for couples or singles.

Heading for the top?

Think Swiss!
© Studio Monte Rosa, Prof. Andrea Deplazes, D-ARCH, ETH Zürich

World-class institutions, a great quality of life, dynamic labs bursting with innovative research... Switzerland offers all this and more to enterprising scientists who wish to further their careers in an international, English-speaking environment.

World leaders in research
• Researchers in Swiss labs publish more and better papers than in any other country worldwide.
• Switzerland boasts the best university in continental Europe (ETH Zurich) and is in the top ten countries worldwide for academic excellence as ranked by the Times Higher Education (THE) 2009 survey.

An English-speaking, international environment
• Swiss institutions offer nearly 200 Master's courses that are taught primarily in English, boosting the country's attractiveness for foreign students to do their research in an international environment.
• Students benefit from a truly global mix on Swiss campuses, where about half of all postgraduates, researchers and professors come from abroad.

Inspiring innovation
• Switzerland is an international scientific hub not just for academics but also for companies benefiting from strong high-tech industries, a competitive economy and excellent infrastructure.
• Innovators in Switzerland are also ‘patent world champions' and the country topped the Innovation Performance list in the 2008 European Innovation Scoreboard.

Think Swiss!
Knowledge and innovation are Switzerland's most important resources. The country invests heavily in education and research and its excellent higher education environment is a magnet for global talent.

The highly international faculty at the 12 research universities offer a wide range of Master's courses taught predominantly in English (www.crus.ch) and seven of these institutions made it into the THE top 200 list (ETH Zurich, EPF Lausanne, Universities of Geneva, Zurich, Basel, Lausanne and Bern). Topical academic networks ensure that the best people in major fields work together and these centres of competence act as useful gateways for scientists interested in a particular area of research (www.snf.ch).

For students with more vocational interests, seven public Universities of Applied Science offer Bachelor and Master's degrees.

Academic excellence is also a strong driver for Switzerland's fertile innovation environment. Particular strengths are in Biotech, Med-tech, Nano and Microtechnology and Cleantech, where a mix of businesses from innovative start-ups to global companies such as Novartis, Roche, Merck Serono or ABB provide good career options for scientists and engineers.

And while the German-, French- and Italian-speaking regions of the country offer different cultural flavours, they all share stunning natural beauty, a multicultural environment and a high standard of living.

Schweizerische Eidgenossenschaft

Discover how the universe began.
Not bad for a day job.

Each and every person at the world's biggest experiment is seeking answers to life's toughest questions. This is a place where engineers rub shoulders with computer scientists; where technicians swap ideas with physicists; and where a quick chat over coffee might just give you the breakthrough you've been looking for. Whatever you're doing at CERN, you'll share in world-changing, awe-inspiring, mind-expanding work. It's amazing what can happen when great minds come together. Apply at cern.ch/dayjob

CERN
[2733-008 (2009) : 63]
The Department of Environmental Sciences at ETH Zurich invites applications for two professorships in evolutionary biology and plant ecology at the associate (tenure) or assistant (tenure track) level:

**Assistant Professor / Associate Professor** of Evolutionary Biology
Candidates with outstanding scientific track records in any related field will be considered, but preference may be given to applicants working on animal population biology and/or natural host-parasite systems. The candidate is expected to establish a world-class research group and to integrate into research activities in related fields at ETH Zurich.

**Assistant Professor / Associate Professor** of Plant Ecology
Candidates with outstanding scientific track record in the general field of plant ecology will be considered, but preference may be given to candidates working on plant population or community ecology. The future professor is expected to establish a world-class research group and to integrate into research activities in related fields at ETH Zurich. The successful candidate will contribute to the teaching of undergraduate and graduate level courses for students of the Departments of Environmental Science and Biology.

He or she will be expected to teach undergraduate level courses (German or English) and graduate level courses (English). The professorships will be equipped with a generous personnel and operational budget, but the candidate will be expected to obtain further funds for research through competitive grants.

Assistant professorships have been established to promote the careers of younger scientists. The initial appointment is for four years with the possibility of renewal for an additional two-year period and promotion to a permanent position.

Please submit your application together with a curriculum vitae and a list of refereed publications to the President of the ETH Zurich, Prof Dr. Ralph Eichler, Raemistrasse 101, 8092 Zurich, Switzerland, no later than January 31, 2010. With a view towards increasing the proportion of female professors, ETH Zurich specifically encourages female candidates to apply.

[2733-009 (2009) : 63]
The Swiss Centre for Applied Human Toxicology (SCAHT) has recently been established by the Swiss Federation at the universities of Basel and Geneva. Its mission is to be a leader and focal point for human toxicology in Switzerland through carrying out essential research projects, providing educational and regulatory activities and helping to build a knowledge platform in human toxicology.

To strengthen our ability to support regulatory authorities in risk assessment and risk management decisions, we are seeking for our location at the University of Basel a full-time

**REGULATORY TOXICOLOGIST**

In this role you will prepare independent scientific opinions on all aspects of chemical and drug safety on behalf of regulatory authorities and other SCAHT clients. You will also research, document and disseminate new insights and developments in applied human toxicology and advise on the need for their integration into the regulatory decision making process. Your work will form a vital link between the SCAHT research projects and the regulatory community, helping to translate their findings into the risk assessment process.

Apart from providing prompt, effective replies to queries, you will also build up and interact with a network of experts across a number of toxicological disciplines from within and beyond the SCAHT research community who can be called upon to support the regulatory decision-making process. In close collaboration with regulatory authorities you will represent Swiss toxicology in national and international scientific expert groups (e.g. ECETOC, ILSI-HESI).

In addition to your regulatory toxicology work you will contribute to the organisation, establishment and delivery of the educational programme of SCAHT, in particular the master courses in toxicology planned in Basel and Geneva.

For this position you need to be a Ph.D. level toxicologist with at least 3 years post-doctoral work experience and an appreciation of drug safety or chemical risk assessment processes. Excellent networking and communication skills in an international context are essential. You are fluent in English and either German or French, with a willingness to acquire a working knowledge of the other language.

Do you enjoy working in a small but dedicated team in a university environment? Are you excited by the prospect of creating a new centre of excellence in Swiss Toxicology? If so, we'd like to hear from you. The position is initially funded until the end of 2011 with the possibility of extension subject to continued funding.

For further information, please contact the SCAHT Director, Dr Martin Wilks, on +41 61 265 3331. Please send your application, CV and list of publications to martin.wilks@unibas.ch or by mail to Swiss Centre for Applied Human Toxicology, University of Basel, Klingelbergstrasse 23, CH-4031 Basel, Switzerland.
We offer several postdoctoral positions in both experimental and computational biology for an integrated effort that aims to decipher the transcriptional regulatory circuitry of cellular differentiation.

Our joint project aims to identify general principles through which chromatin state, epigenetic modifications, and transcription factors cooperate to achieve cellular differentiation in mammals. Using functional genomics approaches we will obtain quantitative time courses of transcription and epigenetic states genome-wide in well-defined mouse differentiation systems. Data will be analyzed in close collaborations between computational and experimental groups. Predictive models will be tested by targeted genetics and genomics experiments.

Participating laboratories include:
Gerhard Christofori, Georg Holländer, Anton Rolink, Erik van Nimwegen and Mihaela Zavolan; University of Basel Patrick Matthias, Antoine Peters, Dirk Schübeler and Susan Gasser; Friedrich Miescher Institute for Biomedical Research

Successful applicants will work in a highly stimulating research environment, and will be offered training in theoretical and practical techniques. All member laboratories lie in close proximity within Basel, Switzerland, a city boasting academic and cultural excellence, located in the heart of Europe.

For further information visit our website www.cellplasticity.org. Applicants interested in joining this exciting initiative should send their CV, a brief statement of motivation and three letters of reference to cellplasticity@fmi.ch.

Review of applications will start December 15, 2009.
[2733-011 (2009) : 64]
SIB
Swiss Institute of Bioinformatics

Our Client, the SIB Swiss Institute of Bioinformatics, is an academic non-profit foundation whose mission is to provide core bioinformatics resources to the national and international life science research community and to coordinate the field of bioinformatics in Switzerland.

To develop and reinforce its corporate image as well as its internal and external communications, the SIB is looking for a:

COMMUNICATIONS MANAGER

This position, located in Lausanne, will report directly to the SIB Executive Director. Its principal role will be the organization, planning and implementation of the internal and external communication of the SIB, as well as the further development of the communication strategy.

The main responsibilities are:
• Lead and coordinate global communication concept and strategy
• Participate in the diffusion of the SIB company culture
• Write/translate internal and external documentation
• Ensure coordination of communication activities within the SIB
• Release information to the media, related political departments and partner Institutions
• Develop and formalize contacts with Swiss and foreign journalists
• Establish and maintain press files
• Coordinate information flow among SIB groups, SIB partners and SIB management
• Define and supervise SIB institutional website(s)
• Organize punctual events

The position requires:
• University degree in communication
• Knowledge or at least strong interest in the scientific environment
• 3-5 years in similar position
• Previous experience in writing scientific articles aimed at a general public, an asset
• Previous experience working with the media
• Perfect spoken and written English, fluent French (German an asset)
• Swiss nationality or valid work permit

If your profile and qualifications meet these requirements, please send us your CV with a cover letter, only by e-mail to job@lmrh.ch. Every candidacy will be treated with total confidentiality.

HOW FAR CAN WE TAKE YOU?

**Project Managers & Clinical Data Managers**  
Central Laboratory Services, Geneva

Covance is one of the world's largest and most comprehensive drug development services companies with revenues in excess of $1.5 billion, global operations in over 22 countries, and over 9,500 employees working from 33 offices. Covance provides innovative and practical solutions to the challenge of drug development, enabling biotechnology, pharmaceutical and agrochemical companies to get their products to market sooner. With extensive experience and expertise in every stage of drug development, Covance is a recognised industry leader.

At Covance, we help make the miracles of medicine reality. Helping our clients turn discoveries into marketed products, we are a catalyst that enables medicines to change and save lives.

Covance Central Laboratory Services, our European laboratory based in Geneva, is the leading central laboratory in Europe, dedicated to clinical laboratory testing. We offer opportunities to work on diverse, challenging projects with bright, interesting colleagues while building a flexible and rewarding career. So if you like the challenge of working in a fast-paced, results-driven organization, Covance is the place for you.

**Project Managers**
You'll interact with clients and internal departments to develop customized protocol specifications, taking full accountability for the deliverables, monitoring running studies according to the needs of the customer.

**Clinical Data Managers**
Interacting with clients' Data Management departments, you’ll translate and transfer the Covance database into an electronic clinical file using a customized format that meets the needs and expectations of the customer.

If you want to start a rewarding career within a diverse global culture, why don't you take a look at all our opportunities at [www.covancecareers.com](http://www.covancecareers.com)

Bial is a leading and rapidly expanding Portuguese pharmaceutical company located in the outskirts of Oporto. Modern facilities include a well-equipped R&D department housing state of the art instrumentation and an international team of scientists fully committed to the discovery and development of new therapeutic agents. An opportunity has arisen within of pharmacology department for a

**PHARMACOLOGIST**

You will help design, conduct, interpret and report *in vitro* and *in vivo* pharmacology studies principally in the cardiovascular and central nervous systems. Scope will also be given to perform investigative studies, including the development and implementation of new models and to conduct research to improve understanding of the pharmacodynamic and pharmacokinetic properties of drug candidate molecules.

The successful candidate for this exceptional opportunity will have a Ph.D. in the area of pharmacology or related sciences and preferably hands-on experience of both *in vitro* and *in vivo* research techniques. Excellent communication and organizational skills are essential.

Please apply to our website www bial.com - Working with Bial [2733-016 (2009) : 66]
The Biotechnology and Biological Sciences Research Council is the UK's leading funding agency for academic research and training in the non-clinical life sciences. The diverse, ground-breaking projects we finance frequently lead to world-leading advances in drug design and help generate improvements in high profile areas such as animal health and the biological processes used in industrial manufacturing.

Innovation and Skills Programme Manager
C. £26,600

Working within our Innovation and Skills Group, you will help drive, promote and encourage high-level skills for research, innovation and knowledge exchange. This includes management of BBSRC's prestigious Innovator of the Year competition and working with bioscience departments to help promote culture change in achieving wider impact from research through BBSRC's flagship Excellence with Impact programme. You will help manage our involvement in the long-established Biotechnology Young Entrepreneurs Scheme, and manage our Policy Placements scheme for Ph.D. students.

Wide-ranging complementary responsibilities include liaison with internal and external organisations such as leading universities, institutes and business, regarding BBSRC funding opportunities. Planning, preparing and implementing new policy for innovation, skills and training programmes is also part of your remit.

You will need at least a Degree or equivalent in a biological or related subject and/or relevant experience, ideally in a commercial context. Your ability to plan and progress a diverse range of projects to deadlines, manage conflicting priorities, and analyse and present complex information is vital. A self-starter, you are a well-organised, IT-literate team player, with good networking and communication skills and are now looking for a role that will allow you to grow and develop as it does. Some UK travel with occasional overnight and weekend absences will be required.

In return, we offer a good salary, excellent pension, free health screening and other benefits.

For an application form and further details, please visit the JRU website to download the application documents – http://jru.reuk.ac.uk/AllVacancies/27409.htm

Alternatively please contact Amy Large via email; RCUKjobs@ssc.reuk.ac.uk or telephone 01793 967225 quoting the reference number JRU 274109.

Closing date: 23 November 2009.
Interview date: 8 December 2009.

The BBSRC welcomes applications from all sections of the community irrespective of race, ethnic origin, religion, sexual orientation, disability, age or gender. As users of the disability symbol, we guarantee to interview all disabled applicants who meet the minimum criteria for the vacancy.

Account Executive – Medical Education

An innovative and dynamic Medical Education company based in North London has an exciting opportunity for an Account Executive. Evolving Medicine specializes in the development of medical education projects in diverse media and is looking for an ambitious individual to join their expert team. We are seeking an Account Executive to oversee the editorial development, client management and production of sponsored projects within this program.

Responsibilities will include:
• Project management - work with our business development team and clients to create bespoke project specs. You will liaise with all parties, from project conception onward, to ensure that projects are delivered on schedule and to budget.
• Content development, production and multimedia - brief medical writers, printers and other parties, such as multimedia companies, as projects require. You will manage these ongoing relationships and obtain competitive quotations.

Suitable candidates for the role will have a life science degree and ideally some experience in medical education/communication; however, this is not essential as full on-the-job training will be provided. You will also demonstrate excellent communication and organization skills.

The Account Executive will work within a small, friendly and entrepreneurial team. The position is based within our North London offices, located close to Finchley Central tube station.

Please submit a CV with cover letter explaining your interest in the position to Elisa Manzotti, Editorial Director: e.manzotti@evolving-medicine.com

Salary is negotiable, depending on experience.

Closing Date: 27th November 2009

Following an extremely successful period, Qioptiq is planning a major investment programme. Exciting opportunities exist to join our large team. Further company information may be found at www.qioptiq.co.uk

Vacancy: **Process / Analytical Chemist**

Location: St Asaph, North Wales - relocation package may be available

Salary: £25,000 per annum

Job Outline:
We are seeking to recruit an analytical chemist to support the chemistry department in providing a comprehensive chemical service to all areas of our business.

The main duties with this position will include:
- The key analytical role in the daily control of our glass melting processes.
- Raw material sampling and analysis using atomic absorption spectrometer and X-ray fluorescence spectrophotometers.
- Process monitoring and analysis.
- Operating Lab-scale processes and treatments.
- Specialist waste handling and disposal.
- Health, Safety and Environmental monitoring routines.

Applicant Specification:
Candidates will be educated to HND level or degree equivalent chemistry qualifications. Ideally applicants will already have some work experience in a precision, analytical role and possess a strong foundation in ‘wet analytical’ chemical techniques. A working knowledge of Atomic absorption and X-Ray fluorescence spectrometry for glass analysis would be advantageous as would an interest in chemical safety and environmental impact.

Applicants will be motivated, methodical and have an independent working style. Training, as required, will be provided in the form of formal courses and on-the-job tuition.

The role will need flexibility of working hours and the ability to work under pressure to meet demanding deadlines, along with availability to work overtime to meet business needs.

We will offer you the opportunity to develop your skills in a dynamic and technically demanding environment.

Due to the nature of the work we undertake we would generally require candidates to fulfil the following criteria: you must be a born or naturalised British citizen and one of your parents must be a British citizen or have substantial ties to the UK. Candidates must normally have been resident in the UK for five years immediately prior to their application; this is particularly important if you were born outside the UK.

Applications:
Please complete an application form and return to Maun Hughes, HR Department, or via e-mail to Maun.Hughes@uk.qioptiq.com by 4.00pm on Friday the 27th of November 2009. Application forms can alternatively be downloaded from our website: www.qioptiq.co.uk
The National Institute for Health Research (NIHR) is a distributed organisation established by the Department of Health to deliver the Government's R&D strategy, Best Research for Best Health. The Institute has a total budget of c£1 billion, of which approximately £0.5 billion per annum is spent on clinical research infrastructure.

A new NIHR Office for Clinical Research Infrastructure (NOCRi) is being established to create greater coherence and functional integration of the clinical research infrastructure which NIHR funds and hence maximise its impact. NOCRi will facilitate more rapid, informed and productive interactions with investigators who are interested in working with the NIHR-funded infrastructure, as well as strengthening enduring relationships between the NIHR, NHS, NHS/university partnerships and the biotech, medtech and pharma industries. NOCRi will promote and enhance the nation's reputation as a world-class centre for applied clinical research.

We are looking to appoint three outstanding individuals to join the NOCRi team, which will be based within the NIHR Central Commissioning Facility located at the science-based company LGC in Teddington, Middlesex. The posts will be for three years in the first instance, with the possibility of extension; a secondment for a minimum of one year would be considered. The posts will all involve frequent travel throughout the UK.

**Head of Communications**
Circa £40 - £60k + benefits
We are seeking to recruit an experienced individual to lead the communications functions of NOCRi, working as part of a wider NIHR Communications team. The postholder will provide expert advice to the NOCRi team on all aspects of communication, including media handling issues, liaising closely with press colleagues from the Department of Health/NIHR. The post will have a key role in extending awareness and understanding of the NIHR-funded clinical research infrastructure with stakeholders including the research community, other research funders including charities, the NHS and universities, global life sciences industries and their trade associations, and other Government Departments (especially UK Trade and Investment).

A proven track record in a communications management role in a complex multi-disciplinary public sector organisation, operating in a highly political environment, is essential. The postholder will also need to demonstrate experience of media handling, preparing and delivering communications plans, and tailoring and targeting messages to a range of different audiences, including the life sciences industries.

**Project and Stakeholder Liaison Managers**
Circa £40 - 60k + benefits
We are seeking to recruit two Project and Stakeholder Liaison Managers who will provide information to those working in the NIHR-funded clinical research, infrastructure and to those who wish to access the infrastructure, and will have responsibility for managing specific initiatives being taken forward under the auspices of NOCRi. The posts will require engagement with a range of stakeholders in the Department of Health, NIHR, other funders of research, including the Medical Research Council, and research charities, and the life science industries.

A good biomedical science degree is essential, ideally supported by a Ph.D. in a relevant discipline. Significant experience of effective external liaison with organisations involved in clinical research, including the life sciences industries, is essential.
Please send a letter of application by 13th November 2009, detailing your salary expectations and CV, to Tracey Wallace, LGC, Queens Road, Teddington, TW11 0LY (tracey.wallace@nihr-ccf.org.uk), from whom job descriptions can also be obtained.

General information about LGC, the NIHR CCF and NIHR can be obtained at www.lgc.co.uk, www.nihr-ccf.org.uk and www.nihr.ac.uk.

[2733-023 (2009) : 68]
wellcome trust sanger institute

The Wellcome Trust Sanger Institute is a world leader in genomic research, with an expanding scientific programme dedicated to understanding gene function in health & disease.

Research Administrator Encode - ref: 80470
Salary range £27,316 - £37,690pa dependent on experience
We are currently looking to recruit an experienced Research Administrator primarily to provide high level support on the coordination of the ENCODE annotation project, held by Dr Tim Hubbard, Head of Informatics and member of the Institute's Board of Management (BoM). Additionally, the post holder will provide scientific administrative support to Dr Hubbard in his role as BoM member; this will involve close working with the wider group of Informatics team members and with the central administrative services.

You will be responsible for organising and planning project events for the ENCODE consortium including teleconferences and networking meetings of the consortium members, preparation and delivery of the events' reports etc. To support communication with collaborators you will maintain an internal ENCODE web page, assist in the preparation and delivery of activity, scientific and management reports, and provide updated implementation and financial plans, and supplementary reports as required.

Finally you will also be required to monitor the budget for ENCODE and the department's other grants and projects, liaising with Finance over financial cost recording and reporting, with HR regarding staff appointments and acting as the key link between accounts/purchasing for the Head of Informatics.

Essential Skills
With a degree in the biological sciences, you will either have held a similar position in the research/academic sector or you will be looking to use your scientific background in a research management role. You will be a confident and accomplished communicator with well-honed influencing and negotiating skills. Exceptional organisational abilities are also called for including the capacity to synthesise large volumes of information. You will be able to demonstrate the ability to develop high quality technically accurate written materials ranging from management and scientific reports to financial statements. Having the ability to work independently managing your own workload and progressing projects effectively is essential, as is the ability to temper this approach with sound judgement, knowing when to seek guidance from the project leader.

Executive Assistant to the Director - Maternity Cover
ref: 80472 Salary range £36,772 to £48,459 dependent on experience
We are also looking for an Executive assistant to the Director to cover maternity leave. The role will provide high level support to Allan Bradley in all aspects of his role as Director of the Wellcome Trust Sanger Institute (WTSI) and more broadly to the Board of Management (BoM) in its capacity as the primary decision-making body for the Institute. As part of the above, the role holder will direct and co-ordinate the activities of the Director's office with particular emphasis on the management of communication both internally and with key external stakeholders including the Wellcome Trust.

The role holder will work independently and through others to help manage a complex web of interactions and interfaces, both inward and outward facing, and to ensure appropriate focus on key strategic and policy issues affecting the Institute. The role will involve working across the Institute to co-ordinate input on many fronts, developing briefing material, positioning issues for consideration by the BoM, ensuring dialogue between relevant parties and generally supporting the decision-making framework. Working in partnership with key personnel at all levels within the Wellcome Trust to ensure appropriate channeling of information on WTSI policies and activities will be another important focus.

Essential Skills
Applicants should have a strong scientific background and preferably a good working knowledge of the WTSI scientific portfolio. They will need a sound understanding of, and previous involvement in, science management/policy and direct experience of providing advice and guidance at a senior level within a
research/academic environment. Individuals will need to be confident and accomplished communicators with well-honed influencing and negotiating skills. Exceptional organisational abilities are also called for including the capacity to synthesise large volumes of information.

Ideal Skills
Direct experience of academic and scientific organisations would be a distinct advantage.

Other information
This is a fixed-term maternity cover position and will continue until the post holder returns to work after her period of maternity leave. Due to the nature of the contract no minimum or maximum period of employment can be guaranteed. The maximum period of maternity leave available to our employees is 12 months.

Benefits
The Institute has excellent purpose built facilities on the Genome Campus, Hinxton on the outskirts of Cambridge. We offer a comprehensive range of benefits including a final salary pension scheme and excellent on-site facilities. Further details can be found on our website https://jobs.sanger.ac.uk

For further information on the organisation please visit: www.sanger.ac.uk.

To apply
To submit your CV and a covering letter for either of these jobs please go to https://jobs.sanger.ac.uk, to register and apply online. The closing date for applications for both positions is 13 November 2009 [2733-024 (2009) : 69]
The Wellcome Trust is the largest charity in the UK. It funds innovative biomedical research, in the UK and internationally, with the aim of improving human and animal health.

To help achieve our mission through our science funding activities, we are currently seeking to appoint two Science Portfolio Advisors in the area of Molecular and Physiological Sciences (MPS).

These exciting roles, within the Trust’s Science Funding Division, involve keeping abreast of relevant scientific fields, liaising with internal and external stakeholders and developing and managing defined aspects of the Trust’s funding portfolio. They will include contributing to the development of new initiatives and may involve working in partnership with other funders. The roles also include interacting with grant holders, scientific advisory committees, and managing the peer review of strategic research proposals and documenting committee discussions.

Candidates will have a Ph.D., and post doctoral experience in a relevant field within the broad remit of the molecular and physiological sciences. Applications from individuals who have experience in working at the interface between the biological sciences and physical sciences or those with a strategic interest in supporting scientific careers are particularly encouraged.

In addition you will be able to demonstrate:
• The ability to see the 'big picture' and identify scientific potential and opportunities.
• Evidence of effective communications and organisational skills.
• The ability to work effectively both independently and within a team/matrix structure.

These posts are being offered on a contract of up to one year to cover for maternity leave.

Please send a full CV and daytime telephone number, with a covering letter stating how you meet the above criteria and outlining three major challenges to the Trust in the current funding climate.

To apply online visit: www.wellcome.ac.uk/jobs or alternatively send your application to the HR Department, Wellcome Trust, 215 Euston Road, London NW1 2BE or email hr@wellcome.ac.uk

Application deadline: 20 November 2009.
Interview date: 3 December 2009.

THE WELLCOME TRUST IS COMMITTED TO BEING AN EQUAL OPPORTUNITIES EMPLOYER THE WELLCOME TRUST IS A CHARITY REGISTERED IN ENGLAND, NO. 210183 [2733-025 (2009) : 70]
Bial is a leading and rapidly expanding Portuguese pharmaceutical company located in the outskirts of Oporto which is committed to the discovery and development of new therapeutic agents. With a number of proprietary medicines either launched or in clinical development, an opportunity has arisen within the R&D department for an

**Active Pharmaceutical Ingredient (API) Production Manager/CMC Manager**

Playing an essential role during the life-cycle from route-scouting, process development and validation to commercial manufacture of API's, principal responsibilities will involve the management of outsourced production of API's at contract manufacturing organisations for use in both pre- and post-approved products, as well as the development and implementation of cost-effective API manufacturing processes.

The successful candidate for this exceptional opportunity will hold an appropriate chemistry-related qualification, should have at least five years experience within the pharmaceutical industry and be able to demonstrate a proven track-record and thorough cross-functional knowledge of relevant API production activities, including:

- Current Good Manufacturing Practice for API's
- ICH and FDA guidelines relevant to quality and production of API's
- REACH legislation
- Drug Master File compilation
- Raw materials sourcing
- CMO qualification
- Cost of goods estimations
- Logistics
- Intellectual property

Excellent communication skills, fluency in English (both written and spoken) and computer skills are essential, as is availability to travel.

Applications for this position should be made through our web site at [www.bial.com](http://www.bial.com) – Working with Bial.

Mathematical Epidemiologist
Pirbright, Surrey £26,610 - £29,566 p.a. Ref: 09P/008
As a Mathematical Epidemiologist you will develop and analyse mathematical models to predict the spread and control of vector-borne diseases in the UK, in particular, bluetongue and African horse sickness. A Ph.D. with a substantial mathematical modelling component is essential for this role.

For additional information and an application form please telephone or write to the Institute for Animal Health, Pirbright Laboratory, Ash Road, Pirbright, Woking, Surrey, GU24 0NF. Tel: 01483 232 441 or email: pirbright.hr@bbsrc.ac.uk quoting the reference number. Closing date: 23rd November 2009.

www.iah.ac.uk IAH is an equal opportunities employer
[2733-028 (2009) : 70]
Angewandte Chemie together with its sister journals, offers an Editorial Trainee position (f/m).

We offer extensive training in scientific publishing in an attractive working environment. The candidate will gain on-the-job experience in many different aspects associated with the production of high-quality science journals, such as managing the scientific peer-review system of articles, editing and preparing manuscripts for content management, writing scientific news, development of journal content, coordination of freelance work as well as compiling marketing materials.

The training period is 12 months, after which adoption into a permanent position may be possible. You will receive focused, on-the-job editorial training from experienced staff and will also be made familiar with the related areas of publishing, including production, marketing and finance. Your role will be working in a team with editors where you will enjoy day to day challenges and responsibilities.

Applicants should have the desire to contribute to the further development of the leading chemistry journal and should be self-motivated and innovative.

For our editorial department we are looking for candidates with an academic background and a broad education in the area of chemistry. As the work involves close ties to authors and scientific editors from all over the world, applicants should have an excellent command of the English language. Furthermore excellent organizational skills, diplomacy, and flexibility are needed. Accuracy and a keen eye for detail are also essential as well as very good knowledge of text and graphic PC programs. Previous publishing experience is not required but you should have good interpersonal and communication skills, good scientific judgment, and a strong commitment to the communication of science.

The Editorial Office is based at WILEY-VCH in Weinheim, a pleasant small town near Heidelberg in southwest Germany. We offer competitive financial and career rewards, training and career development.

Interested? Applicants should send their full CV with a covering letter describing their suitability for the post to: WILEY-VCH Verlag GmbH & Co. KGaA Christiane Rabe, Human Resources Boschstrasse 12, 69469 Weinheim, Germany E-mail: Christiane.Rabe@wiley.com

therakind™ LTD
RESEARCH PROJECTS SCIENTIST

Company Profile
Therakind is a young innovative company, a spin out from the renowned London School of Pharmacy and focussed on the development of paediatric medicines. Due to its success in product development the company is looking to expand its core team.

The Role
The successful candidate will be involved in all aspects of clinical trials design, initiation and monitoring. The role will also require the ability to analyse scientific literature and input into general research programmes. The position will be office based in north London but there will be some UK travel involved. This will be a one year contract in the first instance.

The Person
Candidates must be qualified to higher degree level in life sciences and have some experience in research and clinical or pharmaceutical development obtained in either an academic or industry setting. The company is looking for a proactive person with initiative and flexibility and who is a team player.

Rewards
Besides being part of a team which is developing drugs in an area of real unmet need - paediatrics - the salary will be competitive and reflect the seniority and experience of the successful applicant.

Please send CV and covering letter to: Human Resources, Therakind Ltd, 2 Winston House, Dollis Road Finchley, London N3 1HG

Closing date: 16th November 2009

Centre for Low Carbon Futures

The Centre for Low Carbon Futures is a new initiative created to harness the internationally recognised research strengths of Yorkshire's universities, and deliver knowledge and solutions designed to optimise carbon efficiency within businesses, organisations and communities. Its aim is to provide the means to shape a positive response to climate change within and beyond the region, to influence policy, improve business competitiveness, and strengthen society. Recently established as a flagship initiative of the Yorkshire Universities - Yorkshire Forward Strategic Alliance, the Centre is looking to recruit ten post-doctoral research associates (PDRAs) and three business development managers (BDMs). The PDRAs will be based within leading research groups in the Universities of Hull, Leeds, Sheffield and York working across four multi-disciplinary/university projects. The translation of the research output to the private and public sector will be facilitated by the business support posts (from April 2010).

Towards a low carbon resilient economy - Climate policy impacts and mitigation, based at University of Leeds.
Towards a low carbon resilient economy - Climate impacts and adaptation, based at University of Hull.
Towards a low carbon resilient economy - Economic modelling of climate impacts and mitigation scenarios, based at University of York.
Energy Conversion – Energy Conversion: specification and design, based at University of Sheffield & University of Leeds.
Low Carbon Supply Chain – Low carbon supply chain modelling based at University of Sheffield.
Low Carbon Supply Chain – Low carbon technology evaluation on supply chain (part-time) based at University of Sheffield.
Low Carbon Supply Chain – Low carbon supply chain interventions design based at University of Hull.
Low Carbon Supply Chain / Biorenewables – Sustainable supply chains and biorenewables based at University of York & University of Sheffield.
Biorenewables – Optimising plant fibres for biorefinery applications, based at the Universities of Sheffield, York and Leeds.

For further details of these posts please contact the Centre for Low Carbon Futures (info@lowcarbonfutures.org, 01904 432084, www.lowcarbonfutures.org) or by accessing the jobs pages of the Universities listed above (York for details of the BDM posts although these can be located at any one of the Universities).

The Intelligent Systems Research Centre (ISRC) is a major research unit within the Faculty of Computing and Engineering at the Magee campus. The ISRC is dedicated to the creation of intelligent computational systems, taking inspiration from, and learning from, biology, psychology and neuroscience. The work of the Centre is directed at achieving a greater understanding of biological signal processing and the translation of critical aspects of that knowledge into computational systems that are capable of learning, evolving, adapting, self-organising, and communicating effectively with humans and other machines. We now wish to expand our research team by the following appointment(s).

**Research Fellow / Research Associate / Research Assistant** in Computational Neuroscience Ref: J09/174/R Base: Magee
Salary: £37,650 - £44,956 Research Fellow
£24,891 - £36,553 Research Associate
£24,891 - £29,721 Research Assistant

Closing date: 13 November 2009

The post(s) are related to computational modelling of brain and cognitive disorder, and neurodegeneration. The postholder(s) will investigate high level behavioural or functional software modelling of relevant brain component areas. Expertise in computational modelling of biological signals at various levels of abstraction and information processing in humans is essential.

t: 028 7032 4072
e: jobs@ulster.ac.uk

The University is an equal opportunities employer and welcomes applicants from all sections of the community, particularly from those with disabilities. Appointment will be made on merit.

[2733-039 (2009) : 74]
Graduate Research Assistant
Department of Cardiovascular Medicine
Small molecule screening project

We are looking for a highly motivated graduate research assistant to join our multidisciplinary research group studying the role of myocardial high-energy phosphate metabolism in the development of cardiac hypertrophy and heart failure (for background see Neubauer N Engl J Med 2007;356:1140).

The post is funded for one year by a BHF Centre for Research Excellence pump-primer award in collaboration with the Departments of Chemistry and Pharmacology, and the outcome may be used as the basis for further funding. The post holder will use an existing cell-based assay to screen a chemical library of drug-like compounds for specific pharmacological activity. They will perform follow-up experiments on promising compounds to determine mechanism of action, and to examine activity in heart tissue. They will be responsible for maintenance of cell lines, for carrying out assays using radiolabelled substrate, and for data acquisition, analysis and documentation. The successful candidate will therefore hold a degree in a relevant discipline, and previous experience of cell culture and working with radioactivity is considered essential. They will be well-organised with good attention to detail, and will be able to interact with post-doctoral scientists, technical staff and graduate students within our own and collaborating groups.

Further particulars, which detail the application procedure, should be obtained from http://www.cardiov.ox.ac.uk/vacancies Informal enquiries may be made to Dr Craig Lygate by email: craig.lygate@well.ox.ac.uk

The closing date for applications is Friday 13 November and interviews will be held on Wednesday 25 November 2009.

Committed to equality and valuing diversity

[2733-040 (2009) : 74]
Applications are invited for a postdoctoral research position on an EPSRC funded research project entitled "Managing Uncertainty in Complex Models" (MUCM), and held jointly with the Universities of Sheffield, Aston, Southampton and Durham. This is a multi-disciplinary project concerned with quantifying and reducing uncertainty in the predictions of complex models across a wide range of application areas, including basic science, environmental science, engineering, technology, biosciences and economics.

You should have a Ph.D. (or should expect to submit a thesis for Ph.D. before 31st December 2010), preferably in Statistics or a related field. However, applicants are invited from a wide range of backgrounds, including machine learning and areas in which complex models are used, subject to having strong statistical skills.

Further details of the project can be found at: [http://mucm.group.shef.ac.uk](http://mucm.group.shef.ac.uk)

Applications are invited for the position of research assistant on an NERC funded research project "End-to-end Quantification of Uncertainty for Impacts Prediction" (EQUIP), a collaborative project involving 11 UK universities and research institutions.

You will work on new approaches for extracting decision-relevant information from climate models. You will work closely with users of climate and climate model, information both within the EQUIP project and beyond in the insurance, water and energy sectors.

You should have a Ph.D. or equivalent in statistics, mathematics, computer science, physics or a related discipline. Programming skills and experience in data processing and analysis are required. Previous experience in climate science, non-linear systems and decision making would be beneficial. Meteorological expertise would be a bonus.

Further details of the project can be found at: [http://homepages.see.leeds.ac.uk/~earadequip.html#Vacancies](http://homepages.see.leeds.ac.uk/~earadequip.html#Vacancies)

A full application pack can be obtained at [www.lse.ac.uk/jobsatLSE](http://www.lse.ac.uk/jobsatLSE). If you cannot download the pack, email hr.recruit.res@lse.ac.uk or call 020 7955 7859 quoting the relevant reference number above.

Closing date for receipt of applications for both of the above posts is 7th December 2009. Interviews are expected to take place in January 2010.

**Postgraduate Studentship: Relating Climate Models and Reality**

A funded Ph.D. studentship is available as part of the NERC RAPID RAPIT programme at the Centre for the Analysis of Time Series and the Grantham Research Institute on Climate Change and the Environment. You will carry out research on methods to quantify the spatial and temporal scales on which climate models can provide quantitative information about the real world. It will be founded in the study of complex non-linear systems while providing a basis for the interpretation of climate models as an input to a wide range of societal decisions.
For further details please visit: www.lse.ac.uk/colledions/catshesearchVacancies.htm To apply please send your CV and covering letter explaining your interest and expertise relevant to this subject to Lyn Grove at l.grove@lse.ac.uk

Closing date for applications for the Ph.D. studentship is 30th November 2009.

We value diversity and wish to promote equality at all levels

[2733-047 (2009) : 76]
GRADUATE TEACHER OF CHEMISTRY

St Paul's School is one of the UK's top independent schools and we are currently looking for an enthusiastic and innovative teacher of chemistry to join our outstanding department. No professional teaching qualification is necessary and the school has an induction programme to provide qualified teacher status, valid for both the independent and maintained sectors. We have a hugely successful track record in training staff from non-teaching backgrounds including academic research, industry, the media and the city.

St Paul's salary scale is substantially above the national scale and subsidised accommodation will be provided if required. Private health insurance is offered and fee concessions are currently offered to children of established members of staff, subject to competitive entry procedures, at St Paul's School, Colet Court, and St Paul's Girls' School.

Further details and an application form can be obtained from the School’s website: www.stpaulsschool.org.uk or by email from the High Master's PA on HMSec@stpaulsschool.org.uk

St Paul's School, Lonsdale Road, Barnes, London SW13 9JT Telephone: 020 8748 9162 Fax: 020 8746 5353

The closing date for all applications is Friday 27th November 2009.
Interviews will take place in early December 2009.

St Paul’s School is committed to safeguarding and promoting the welfare of children and the successful applicant will be subject to an enhanced disclosure through the Criminal Records Bureau. St Paul's School is a charitable company limited by guarantee registered in England at Lonsdale Road, London SW13 9JT Registered Company Number 6141973. Registered Charity Number 1119619.

[2733-048 (2009) : 76]
Ph.D. Studentship Programme
Animal and Veterinary Public Health Research Opportunities at the Veterinary Laboratories Agency
Risk factors for Crimean-Congo haemorrhagic fever

Veterinary Laboratory Agency®
Safeguarding public and animal health

Applications are invited for a Ph.D. position to study the epidemiology of Crimean-Congo haemorrhagic fever virus (CCHFV) and identify risk factors for disease, plus the risk of pathogen spread, with emphasis on the role of livestock and application of spatial approaches. The studentship will be based at the Veterinary Laboratories Agency (VLA) Weybridge with some time at the Health Protection Agency (Porton Down) and the University of Southampton (Prof. Peter Atkinson).

CCHFV is transmitted by ticks and wildlife reservoirs are important. Therefore a zoology/veterinary background and an understanding of epidemiology, spatial modelling and/or risk assessment are required, together with a broad interest in environmental change. There may be an opportunity to participate in field studies in Kosovo and it is important that the student can operate and communicate well in a team.

The Studentship is available from February 2010. Interviews are to be held at VLA Weybridge on 17 December 2009. Please e-mail a covering letter and CV to Morag Mitchell (m.j.mitchell@vla.defra.gsi.gov.uk). The stipend is £15,750 p.a.

Due to funding criteria this award is only available to UK and EU applicants. Closing date: 30th November 2009

The VLA is committed to equality and diversity in the workplace.

TECHNOLOGY TRANSFER at the Wellcome Trust invites academic researchers and companies to apply for translational funding

TRANSLATION AWARDS
These are available for applied R&D projects that address an unmet need in healthcare, offer a potential new solution and have a realistic expectation that the innovation will be developed further by the market.

The spectrum of technologies funded includes: diagnostics, enabling technology, regenerative medicine, therapeutics, vaccines and medical devices.

Two calls for preliminary applications per year. Deadlines for 2010: 8 January and 23 July

SEEDING DRUG DISCOVERY
This £91 million initiative facilitates early-stage small-molecule drug discovery in areas of unmet medical need. The awards help applicants with a potential drug target or new chemistry to embark on compound discovery and/or lead optimisation

Previous awards have been made for projects tackling obesity, MRSA, Gram-negative bacteria, cancer and Alzheimer’s disease. Forthcoming deadlines for preliminary applications: 9 November 2009 and 21 May 2010

REQUEST FOR EXPRESSIONS OF INTEREST

Environmental and Social Impact Assessment

Arcelor Mittal

Arcelor-Mittal Liberia is preparing to develop iron ore mines in the mountains of north-western Nimba County in Liberia. The company has undertaken extensive environmental and social studies, amassing a broad body of information. While this forms the bulk of an environmental baseline, it is not complete and it has not been interpreted as to the likely impacts from the proposed mining scheme. The accompanying environmental management plan also needs to be developed.

Expressions of Interest are now invited for consideration in the provision of consultancy services between December 2009 and June 2011, for completion of ESIAs in line with Liberian law and international standards for two project phases. The main technical areas to be covered are: rural socio-economics, community liaison and dynamics; West African cultural issues; botany and zoology of the Guinea region rainforest types and the West African coast; tropical soils; geotechnics; hydrology; hydrogeology; marine geomorphology; air quality and emissions control; noise and vibrations; urban water supply, sanitation and wastewater management; landscape and visual amenity.

Applicants should be able to demonstrate ESIA expertise in these technical fields, as well as in the sector and region.

Further details may be obtained from: www.NewScientistjobs.com or from:
Sandeep Kumar < Sandeep.Kumar@arcelormittal.com > or
John Howell < John.Howell@arcelormittal.com >

The latest date for receipt of submissions is 5 pm (GMT) on Sunday 15 November 2009.

You may not be attending Copenhagen, but you can still play your part.
Sizewell B. Britain’s largest low CO₂ Power Station

We’ve signed The Copenhagen Communiqué.

Just under a third of Britain's CO₂ emissions are caused by the production of electricity for businesses and homes. Decarbonising that electricity is therefore critical. Nuclear generated electricity is one of the lowest carbon forms of energy. So, with eight nuclear power stations generating over 15% of the nation's power, EDF Energy is Britain's largest producer of low carbon electricity. Why not think about switching to us today, and join us in opting for a low carbon tomorrow.

Sign up at edfenergy.com

Save today. Save tomorrow.
EDF ENERGY

[2737-001 (2009) : 4]
FOR THE NEW ENERGY FUTURE WE NEED TO THINK THE IMPOSSIBLE IS POSSIBLE.

The world needs to tackle CO$_2$ emissions. Carbon Capture and Storage (CCS) technology aims to capture CO$_2$ and store it safely underground.

At Shell, we’re working on several different projects around the world, including CO$_2$SINK in Ketzin, Germany, a demonstration facility that is operated in collaboration with the European Union.

Perfecting CCS won’t be easy, but we believe it is needed to tackle CO$_2$ emissions. To find out how Shell is helping prepare for the new energy future visit [www.shell.com/newenergyfuture](http://www.shell.com/newenergyfuture)

CO$_2$
How can we work towards a better future?
More time in the fields
More time in the classroom

syngenta

Education is vital to reducing rural poverty. But every year, children in developing countries miss many days of school to help on the farm. At Syngenta, we believe that the answer lies in the boundless potential of plants. Our high-quality seeds and products increase yields and protect crops from insects, weeds and disease. They enable farmers to spend less time in the field and allow their children to spend more time in the classroom. It’s just one way in which we’re helping growers around the world to meet the challenge of the future: to grow more from less.

Heineken

Premium brand and consumer focussed innovation: Heineken Supply Chain is looking for a Sr. Scientist (f/m)

Heineken is easily associated with fun. As an employer, Heineken is able to extend this association to the workplace. With its multitude of aspects and opportunities, and its variety of challenges, Heineken is an inspiring and challenging organization and a pleasure to work for.

Heineken Supply Chain is our international knowledge centre, located in Zoeterwoude, the Netherlands; next to one of our largest breweries. Our knowledge centre provides support to all our breweries worldwide and is responsible for the execution of the global Research & Innovation (R&I) programme. Within our R&I programme we work on the latest developments in yeast and brewing, as understanding of our raw materials is crucial for producing a top quality beer. Our laboratory is well equipped and participates with leading external research groups. Within the section Brewing Science we are looking for a Sr. Scientist Yeast having a solid base in yeast physiology and / or genomics.

Job description Sr. Scientist Yeast. This post-doctoral position at Heineken Supply Chain is available immediately in the R&I Brewing Science Departmental.
In this position your responsibility will be to define, initiate and execute R&I projects involving industrial yeast strain genetics and fermentation in order to innovate and improve processes and products and to maintain and generate knowledge in this area of expertise. You will deliver support in your area of expertise throughout the company. You will also take part in the development of project proposals / plans according to the vision of Heineken’s Innovation Committee.

Competence requirements Sr. Scientist Yeast: The successful candidate should have a Ph.D. in microbiology, biochemistry or molecular biology. Experience with industrial yeast strains, fermentation design, fermentation modeling and fermentation monitoring would be an advantage.

Information and application: If your skills and qualifications match the description above, we offer you a challenging job in a dynamic Innovation environment and facilities for personal and professional development under excellent employment conditions.

Candidates are invited to send their letter of application and curriculum vitae to Heineken Supply Chain, B.V. Personnel & Management Services, for the attention of Mrs. S. van Ruitten, post office box 510, 2380 BD, Zoeterwoude, the Netherlands, or to mail to sandra.vanruitten@heineken.com

For further details on the job, you are welcome to contact Mr. W.J.J.M. van Waesberghe, Manager Brewing Science, telephone +31(0) 71-5457058, e-mail willem.vanwaesberghe@heineken.com [2737-004 (2009) : 56]
MARKETING OPPORTUNITY
PAA
THE CELL CULTURE COMPANY
Location – South West

Are you working within a Life Sciences Laboratory maybe doing Cell Culture?
Looking to develop your career in an exciting new direction?

PAA is a leading manufacturer and supplier of Cell Culture consumables to the Research, Bioproduction
and Diagnostics communities. We are looking for an enthusiastic, creative individual with excellent
written and verbal communication skills are a must.

You will be involved in all aspects of the marketing process including liaison with product development,
creation of online as well as traditional promotional materials, exhibition organisation, pricing and the
implementation of new product launches.

Interested? If so please send your current CV to our recruitment experts: 1376.yeovil@adecco.co.uk or
call 01935 472453 for more details.

Direct applications to PAA will not be considered.

Can you help us understand how Climate Change affects bird populations?

BTO

PRINCIPAL ECOLOGIST
Thetford, Norfolk, UK (£37,057 - £41,175 plus pension)

The BTO is seeking a dynamic scientist to lead Climate Change research throughout the organisation and to maintain strong links with policy makers and conservation planners. The successful candidate will lead a dynamic team of five Ph.D. level scientists undertaking research on population ecology and modelling. Candidates should have at least five years post-doctoral experience, a strong publications record in a relevant ecological field, experience of developing research programmes and a desire to work collaboratively to tackle complex research issues.

Closing date for receipt of applications is 1pm on Tuesday 22 December 2009.

Further details are available from Vicky Percy (Tel: 01842 768215; email jobs@bto.org) or from our website: www.bto.org/vacancies. Please quote reference NS/09-7.

New Scientist Jobs
[2737-009 (2009) : 56]
Plymouth Marine Laboratory (PML) is a dynamic, highly innovative, independent and impartial provider of scientific research and advice on the marine environment.

**Earth Observation Scientist**  
Plymouth, UK • Salary range £27,109 - £33,740 p.a

We require an enthusiastic and highly motivated Earth Observation Scientist to join our busy team. You will initially undertake Earth observation research for quantification of ocean biogeochemistry and carbon fluxes, with the areas of inherent optical property model development; phytoplankton functional type and primary production algorithm development; biogeochemical time series analysis and ocean provinces. You will also research bio-physical interactions and air-sea CO$_2$ fluxes, particularly algorithm development for investigating surface ocean CO$_2$ variability, through combined use of *in situ* and satellite observations.

Application deadline: 1200hrs on 22 December 2009.  
Proposed interview date: 28 January 2010 for a start as soon as possible  
For additional information and an application form, please contact: Mrs E Matthews, HR, Plymouth Marine Laboratory, Prospect Place, Plymouth, PL1 3DH, UK

CERAM
Join CERAM at the business end of science!
Ceram is a global expert in materials consultancy, testing and analysis. Our accredited laboratories, a byword for quality and integrity, deploy technologies such as XRF, ICP, GC-MS, AA, IC.

Three key roles in our expanding Test division located in North Staffs. Excellent pay and benefits.

**Head of Chemistry**
leading capability in analytical chemistry
We seek an experienced chemist to fill this new role, key to our development plans. You will direct the development of work methods to provide best outcomes for the constant flow of new challenges we receive as well as ensuring the accuracy and precision of data provided to clients. You will also play a central role in ensuring our technology is fit for the future. Leading a small team of development scientists, you will have the resources to maintain our proud record of innovation.

**Head of Physics/ Material Science**
leading capability in physical testing
A parallel role to Head of Chemistry in physical testing.
Candidates must have at least a good 1st degree or equivalent in the relevant discipline, with proven experience and expertise in a range of analytical/testing techniques.

**Laboratory Operations Manager**
leading efficiency in test data delivery
With over 40 technologists and technicians, a broad range of chemical and physical test methods and equipment, from bench chemistry to highly automated instrumentation, the role presents an interesting and exciting challenge.
We are looking for a candidate with expertise in performance and efficiency improvements. Understanding the science involved is critical, so a 1st degree in a hard science subject is a must.
To learn more about us visit [www.ceram.com](http://www.ceram.com)
To apply email your cv and covering letter to julie.parker@ceram.com with the words "Head of Chemistry," "Head of Physics" or "Operations Manager" in the subject line.
[2737-012 (2009) : 57]
R&D SCIENTIST
£Competitive – Epsom, Surrey

Share our mission to enable customers to make the world healthier, cleaner and safer. With more than 30,000 employees around the globe, we are the world's largest provider of analytical instruments, equipment, reagents and consumables, software and services for research, analysis discovery and diagnostics.

Part of a multisite team providing solutions to scientists working in genomic research, this laboratory based role supports new product development, product application notes and custom research, focussed on PCR and qPCR reagents and consumables. It will encompass areas of molecular biology, cell biology and biochemistry.

Regularly presenting to colleagues, you will also help with wet lab training and offer scientific support to the technical services and reagents manufacturing teams. With a Doctoral degree (Ph.D.) or equivalent in biology, chemistry or a related field, you will have excellent laboratory skills and relevant experience. Your technical writing and statistical analysis should be excellent.

We attach great importance to personal attitude and characteristics. Benefits include 25 days holiday, training and development opportunities, pension and ThermoFisher employee recognition awards.

Please email your CV and covering letter quoting ref. RD/NS to: debbie.mant@thermofisher.com

Closing date: 31st December 2009.
An equal opportunities employer.
Totaljobs.com attracts the widest choice of unique jobseekers from 32 industry sectors across the UK. Immunocore is a biotechnology company focussed on the development of engineered monoclonal T-cell Receptors (mTCRs) as the next evolutionary step after monoclonal antibodies. We are developing a platform of mTCR-based therapeutics for the treatment of cancers, type I diabetes and HIV. We are looking to recruit enthusiastic, self-motivated scientists able to work in a fast-paced environment, to fill the following positions:

Immunocore
Targeting T Cell Receptors
Milton Park, Oxfordshire • www.immunocore.com

**Cell Biologist - Microscopy** (1 year contract): Position 1
There is a one-year vacancy for a cell biologist/immunologist to work in our T cell biology group, to validate mTCR cellular targeting using fluorescence microscopy, although the successful candidate will be involved in other research projects. Suitable candidates will have a first degree in immunology, cellular biology or biochemistry, with an MSc or Ph.D. in a related discipline, and be experienced in mammalian cell culture and fluorescence microscopy. Experience of any of the following would be an advantage: T cell isolation and culture, ELISA, Elispot assays, CTL killing assays and flow cytometry.

**Protein Engineer- Directed Molecular Evolution** (permanent): Position 2
We will consider a range of candidates from new MSc or Ph.D. graduates to scientists with several years' postgraduate experience for this position. Prospective candidates should have an MSc or Ph.D. with relevant experience in Protein Engineering, ideally directed molecular evolution. The successful candidate will carry out research using molecular cloning, site-directed mutagenesis, library construction, protein expression and purification, molecular modelling and directed molecular evolution technologies so experience in any of these areas would be an advantage.

**Scientist/Technical Assistant** (1 year contract initially): Position 3
The successful candidate will primarily support the work of scientists in the assay and process development groups. The role entails running routine assays (UV spec, pH, conductivity and electrophoresis), preparation of reagents and buffers, shipments to external parties, sample preparation for formulation, characterisation and stability studies and maintenance of records. The position covers maternity leave for 12 months with a possibility for contract extension. Candidates should ideally hold a degree in a related biological science, although less qualified candidates with appropriate experience will be considered.

CARDIFF UNIVERSITY
PRIFYSGOL CAERDYDD
Knowledge Transfer Partnership
KTP Associate in Cellular Biology / Immunology: 3 year position
£25,000 - £28,000 incl. pension (will be increased for an exceptional candidate)

The Knowledge Transfer Partnership is a shared venture with Cardiff University and will be jointly supervised by Professor Andy Sewell (www.tcells.org). The Associate funded by this prestigious award will transfer novel technology developed at Cardiff to Immunocore, with the objective of designing mTCR reagents with increased specificity for cancer cells. In addition, the Associate will spend at least 10% of their time on personal and professional development; the award includes training leading to a Diploma in Management.

The successful candidate must have an ongoing commitment to further learning, be enthusiastic and self motivated, and capable of taking ownership of this project. Strong communication and team working skills are essential, coupled with an ability to analyse and solve problems.

You will have an MSc or Ph.D. in Cellular Biology, Immunology or a related discipline, and be experienced in mammalian cell culture. Experience of any of the following would be an advantage: T
cell isolation and culture, ELISA/Elispot assays, CTL killing assays, flow cytometry and fluorescence microscopy.

This post will be based at Immunocore, but the successful candidate will be required to undertake any travel necessary to manage the partnership element of the project.

Further information about Knowledge Transfer Partnerships can be found on www.ktponline.org.uk

Benefits include:
- Diploma in Management
- £4,500 Travel Budget
- £4,000 Training Budget
- £3,000 Equipment Budget
- Full membership of Cardiff University including generous pension scheme

If you would like to be involved in therapeutic research programs and work in a friendly and interactive environment, please send us your CV and a brief covering letter. Salaries are competitive. Benefits include pension scheme, life insurance and private health insurance.

Closing date: 31\textsuperscript{st} December 2009
Interviews from: 11\textsuperscript{th} January 2010
Please reply to: Corin Canuto, Immunocore Ltd, 57C Milton Park, Abingdon, Oxon OX14 4RX, or email to corin.canuto@immunocore.com.
[2737-015 (2009) : 59]
The VLA is an international centre of expertise in animal health science, and provides a broad range of specialist veterinary services and products to governments and customers across the world.

Veterinary Laboratories Agency®
Safeguarding public and animal health

**Research Scientist**
Addlestone, Surrey • £20,710 - £27,630 p.a

An opportunity has arisen for a research scientist to assist in developing and undertaking innovative research aimed at improving fundamental knowledge of Brucella with particular focus on molecular epidemiology. You will be responsible for overseeing and developing VNTR based work and for the development and maintenance of the group’s molecular typing Bionumerics database as Database Manager.

The successful applicant must have a relevant degree or HNC/HND in a scientific discipline. A postgraduate qualification, experience in microbiology and an interest in bacterial molecular biology with particular experience in molecular typing and bacterial molecular epidemiology would be an advantage.

The Civil Service offers a choice of either an Occupational Pension Scheme or Stakeholder Pension Scheme, giving you the flexibility to choose the pension that suits you best. Other benefits include 30 days annual leave, an on-site nursery, flexible working and annual pay reviews. Further details and an application form can be obtained from the VLA website [www.vla.gov.uk](http://www.vla.gov.uk) or by writing to: Human Resources (EC), Veterinary Laboratories Agency, New Haw, Addlestone, Surrey KT15 3NB quoting the reference number ADP5008.

The closing date for receipt of applications is 18th December 2009

The VLA is committed to equality and diversity in the workplace.

**INVESTORS IN PEOPLE**
regulated by Civil Service Commissioners

An Executive Agency of the Department for Environment, Food and Rural Affairs

[2737-016 (2009) : 59]
Technology Strategy Board
Driving Innovation

Define the shape of things to come

**Lead Technologists** - Sustainable Agriculture and Food (2 positions)
To £60,500 + excellent benefits including performance bonus, defined benefit pension + relocation support * Based Swindon

Acting as a catalyst, we help businesses to develop and exploit great ideas and new technology. Investing time, money and expertise, we bring together business, researchers and policy makers to find innovative solutions to some of the major challenges facing society. We invest in areas of scientific and technological development that will place the UK at the forefront of world innovation.

One of the biggest issues facing the world today is how to feed a growing population whilst minimising the environmental impact of the agriculture and food chain. Leading a new Innovation Platform in Sustainable Agriculture and Food, you will play a key role in helping the UK develop and promote the use of new technologies and new ways of working, enabling Britain's agri-food industry to meet this challenge head on.

With extensive experience in farming (crops or livestock), food production or the associated supply chains, you will see making environmental improvements as a commercial opportunity and be excited about the chance to help develop and run effective technology programmes to meet the challenges facing the industry. You will use your strong analytical skills, your business understanding and grasp of the relevant technologies to design and make effective technology interventions. Just as importantly, you will be an articulate and persuasive communicator with the ability to work with and influence people from across the agri-food sector.

These are exceptional opportunities to influence the UK's sustainable agri-food agenda.

HOW FAR CAN WE TAKE YOU?

**Project Managers & Clinical Data Managers**  
Central Laboratory Services, Geneva

Covance is one of the world's largest and most comprehensive drug development services companies with revenues in excess of $1.5 billion, global operations in over 22 countries, and over 9,500 employees working from 33 offices. Covance provides innovative and practical solutions to the challenge of drug development, enabling biotechnology, pharmaceutical and agrochemical companies to get their products to market sooner. With extensive experience and expertise in every stage of drug development, Covance is a recognised industry leader.

At Covance, we help make the miracles of medicine reality. Helping our clients turn discoveries into marketed products, we are a catalyst that enables medicines to change and save lives.

Covance Central Laboratory Services, our European laboratory based in Geneva, is the leading central laboratory in Europe, dedicated to clinical laboratory testing. We offer opportunities to work on diverse, challenging projects with bright, interesting colleagues while building a flexible and rewarding career. So if you like the challenge of working in a fast-paced, results-driven organization, Covance is the place for you.

**Project Managers**  
You'll interact with clients and internal departments to develop customized protocol specifications, taking full accountability for the deliverables, monitoring running studies according to the needs of the customer.

**Clinical Data Managers**  
Interacting with clients' Data Management departments, you'll translate and transfer the Covance database into an electronic clinical file using a customized format that meets the needs and expectations of the customer.

If you want to start a rewarding career within a diverse global culture, why don't you take a look at all our opportunities at [www.covancecareers.com](http://www.covancecareers.com)

**Global Value Chains Specialist**  
**Life Science Sectors - China**  
c. £110k (pro rata)

An opportunity has arisen to join the UK Trade & Investment (UKTI) Sector Champions Team. This programme is designed to support UKTI in raising the UK's profile overseas and marketing the UK's strengths and areas of expertise. The successful candidate will work as one of the Global Value Chain Specialists, supporting UK companies in accessing global value chain opportunities in China, working alongside current UKTI resources in delivery of a range of support activities.

**The role**  
- Assisting UK companies with a global competitive advantage in developing global value chain opportunities;  
- Identifying relevant opportunities and networks in China;  
- Identifying and maintaining extensive networks of contacts within the UK;  
- Providing tailored sectoral and value chain information, becoming an expert for access within the Chinese market;  
- Supporting the implementation of the UK Life Science international marketing strategy;  
- Gathering market demand intelligence from market to identify trends in relation to international trade development.

**The candidate**  
- Commercial and/or technology experience in the Life Science industries;  
- Knowledge of UK capability in the sector, with excellent networks;  
- An understanding of the Chinese Life Science value chain, a good grasp of the opportunities in China, and the Chinese regulatory environment;  
- Graduate in a relevant field, independent self starter with several years' experience;  
- Excellent organisational skills, fully self sufficient;  
- Enthusiastic, driven and committed;  
- Flexible, as the role will require some UK and overseas travel.

The position is offered as a part time consultancy contract, will primarily be home based, with client meetings in Cambridge and London. For further information about UKTI please visit [www.tradeinvest.gov.uk](http://www.tradeinvest.gov.uk). The UKTI Sector Champions programme is managed by Fera.  
To apply, please send your CV to Sally Fryer, quoting reference NSP/11/09, e-mail: sally.fryer@pera.com, tel: 01664 501501

Closing date for applications is 11 December 2009

PERA  
The Innovative Network  
[2737-021 (2009) : 63]
Research Associate in Pre-clinical PET Oncology
(1 FTE)
£28,839 - £35,469 p.a. Ref: MHS/91563

This role will be responsible for achieving the aims of preclinical PET imaging research projects through the development and scientific management of the preclinical oncology imaging research programme to develop/apply PET-based imaging biomarkers.

You will work with academic investigators and the Preclinical Team Leader to establish clinically applicable PET imaging biomarkers for use with novel therapeutics. You will contribute to the creative effort of the group, to understand subject background in the specific subject area and the wider field. You will take responsibility for data management planning and analysis for research studies as well as providing support to students and more junior staff.

You will have a biomedical degree (2:1 or above) (or equivalent), a Ph.D. (or equivalent) and experience in one or more of the areas of PET imaging, experimental tumour models, preclinical therapeutics, radiochemistry and/or imaging data analysis.

For further information please contact Kaye Williams on Tel: +44 (0) 161 275 2428 or email kaye.williams@manchester.ac.uk

Application forms and further particulars are available from our website www.manchester.ac.uk/jobs If you are unable to go online you can request a hard copy of the details from Rita Chow, email: rita.chow@manchester.ac.uk or Tel: +44 (0) 161 275 0039.

Closing date: 11 December 2009.
Wolfson Molecular Imaging Centre
Laboratory Technician (1 FTE)
(Maternity Leave Cover)
£18,027 - £20,226 p.a. Ref: MHS/91537

This is an exciting opportunity to be part of a new, world class research centre. The University of Manchester's Wolfson Molecular Imaging Centre is a state-of-the-art facility dedicated to the exploration of physiological processes via PET, with the primary focus being oncology and neuroscience.

Your main focus will be the Quality Control analysis of a range of short-lived positron emitting radiotracers for use in PET research, whilst adhering to the required Quality, Health and Safety and Radiation Protection Regulations.

You will have excellent organisational skills, an ability to communicate effectively and be computer literate. Out of hours work will be a requirement of the role. You will have laboratory experience, preferably using instrumental chromatographic techniques such as HPLC and GC in a GMP/GLP environment. A degree (or equivalent) in Chemistry, Analytical Chemistry or related degree is desirable.

For further information please contact Rebecca Moss on Tel: +44 (0) 161 275 0072 or email rebecca.moss@manchester.ac.uk

Application forms and further particulars are available from our website www.manchester.ac.uk/jobs If you are unable to go online you can request a hard copy of the details from Rachael Warrilow, email: rachael.warrilow@manchester.ac.uk

Closing date: 11 December 2009.

The University will actively foster a culture of inclusion and diversity and will seek to achieve true equality of opportunity for all members of its community.

New Scientist Jobs
[2737-023 (2009) : 64]
DO THE WORLD A FAVOUR.
ADVANCE YOUR RESEARCH CAREER IN SWEDEN

Any self-respecting university of technology might claim an interest in the future of the world. But Chalmers has taken the initiative. Building on eight strategically identified areas of advance, we are now seeking ambitious women and men for Assistant Professorships in fields that will further our vision of sustainability. Each researcher will have the chance to design a unique and autonomous programme networking with specialists, students and entrepreneurs across various borders. Additionally, successful candidates will receive a generous support package affording a Ph.D. student, relocation, a leadership programme, mentoring and more.

ASSISTANT PROFESSORS REQUIRED TO THE EIGHT AREAS OF ADVANCE

BUILT ENVIRONMENT
Are you exploring an advanced technology that could be harnessed with social insight to build a better home in the third world – or an engineering breakthrough to improve the supply of drinking water?

ENERGY
Could your research help cast new light on bioenergy, wind turbines, or perhaps carbon capture and storage? Maybe you know how to distribute electricity more efficiently?

INFORMATION AND COMMUNICATION TECHNOLOGY
You might have already heard about what we're doing at Chalmers GigaHertz Centre and the Chase antenna centre, or perhaps you're developing a software system that's safe and reliable?

LIFE SCIENCE
Where does humanity go with the genetic code? How can we harness the productivity of microorganisms in cell factories? What new tools and devices do we need to fight obesity and starvation?

MATERIALS SCIENCE
Are you in soft or hard materials? Are you going lighter, stronger, renewable, recyclable or perhaps even biodegradable? Perhaps you have an alternative to conventional plastics.

NANOSCIENCE AND NANOTECHNOLOGY
Where else could tracking chemical information in biological systems, developing quantum computers and creating artificial life forms be so natural? Here we invite you to turn today's science into tomorrow's technology.

PRODUCTION
Is there any type of production that can't be made more efficient with the help of virtual reality? How could tomorrow's production systems use consumer input to reduce waste?

TRANSPORTATION
Will your research programme help the world to move things or people in a way that is safe, economic and environmentally sustainable?

Chalmers is a highly progressive university situated in Göteborg, Sweden. From this beautiful and dynamic part of the world we have become known locally and globally for education, research and innovation with a wide range of applications. Our strengths are fuelled by numerous intimate relationships with partners in the business world – medicine, communication and the automotive industry to name a few. As we strive to use science and technology to advance sustainability in the world around us, we are reminded of the motto of our founder, William Chalmers. Avancez!

To know how you might qualify for one of these exceptional positions, please visit us at www.chalmers.se/advance
After all, everybody has to start somewhere.

CHALMERS UNIVERSITY OF TECHNOLOGY
AVANCEZ 1829
[2737-024 (2009) : 65]
Institute of Biological Environmental and Rural Sciences
EXTENSION OFFICER (£30,594 - £35,469)

An Extension Officer is required within the Grassland Development Centre of IBERS to join an experienced, dedicated extension team working across Wales and into England. Focused on delivering research outcomes as solutions for land managers, the team is based within a research organisation but maintains strong links to industry and teaching. The Grassland Development Centre team ‘bridges the gap’ between farmers and researchers through technology transfer programmes, ADAPTING the latest research outputs into effective farming practice. These are delivered through a range of extension methods including farmer and industry training, technical delivery, facilitating discussion and demonstration farm groups, supported by written material in electronic, web based and hard copy format.

The appointment will be for a fixed-term of 5 years initially.

New Scientist Jobs
[2737-027 (2009) : 66]
Chair in PET Radiochemistry
Division of Imaging Sciences

Following the award of CRUK/EPSRC Cancer Imaging Centre, the Division of Imaging Sciences, King's College London is seeking applicants for a new Chair in PET Radiochemistry. You will lead research into the development of novel PET radiopharmaceuticals, especially C-11 and F-18 labelled small molecules for cancer imaging and neuroligand receptor imaging, in collaboration with the Cancer Imaging Centre and the Institute of Psychiatry.

The Division of Imaging Sciences is a large multi-disciplinary department with a large basic science programme in imaging with particular focus on PET, SPECT and MRI, and has a large research team of imaging physicists, computer scientists, mathematicians and chemists. The Division also has two state-of-the-art clinical PET-CT scanners which are used for both clinical and research purposes with a primary focus on cancer. There are state-of-the-art 1.5T XMR, 3T MRI, 9.4 Tesla experimental NMR, nanoPET-CT and nanoSPECT-CT systems dedicated to research. The Division is mainly based in 1,000m² of new office and laboratory space at The Rayne Institute, St Thomas' campus, and in the PET Imaging Centre, with its cyclotron and radiochemistry facility in the same building.

As well as leading a research programme in PET radiochemistry complementary to current radiochemistry research in the Division, you will play a leading role in the design and project management of a planned major expansion and refurbishment of the PET Imaging Centre, including new expanded GMP radiochemistry facilities and their unification with the nuclear medicine radiopharmacy. You will also oversee the operation of the cyclotron and radiochemistry facilities by the PET laboratory manager and radiochemistry team.

You will be based in the KCL Division of Imaging Sciences but will collaborate with other Divisions within KCL and its associated NHS Trusts. The NHS Trusts and Kings' College London are forming an Academic Health Sciences Centre called King's Health Partners. This exciting development should further facilitate academic and clinical links. Guy’s and St Thomas’ Trust is also building a new Cancer Centre to enhance research and treatment of patients with cancer.

We are looking to recruit a high calibre international leader in the field and an attractive package will be negotiated with you including research support and facilities. The UK has a very strong track record in imaging research and continues to be an excellent environment for research in this area, due to a wide range of funding opportunities through the government research councils and medical charities.

Interested candidates should contact Professor Phil Blower, Professor of Imaging Chemistry on 020 7188 9513 or e-mail philip.blower@kcl.ac.uk

For an information pack please see our website at www.kcl.ac.uk/jobs or e-mail hsrrecruit2@kcl.ac.uk Please quote reference A/MRP/428/09-TP when applying and in all correspondence.

Closing date: 16th December 2009. "Creating a world-leading Academic Health Sciences Centre"

Imperial College London

MSc Science Communication  
MSc Science Media Production  

These courses are designed to help science and engineering graduates develop the necessary skills and knowledge to move into media and other science communication careers.

The Science Communication course is a general preparation while the Science Media Production programme is designed for those who specifically want to go into television or radio. Both courses are available full-time over 12 months, and Science Communication can be undertaken part-time over 24 months.

For more information contact Liam Watson, Science Communication Group Administrator. Tel: 020 7594 8753 Email: liam.watson@imperial.ac.uk  
Web: www3.imperial.ac.uk/humanities/sciencecommunicationgroup

Closing date: 26th of February 2010  
Valuing diversity and committed to equality of opportunity  
[2737-030 (2009) : 67]
The Graduate School at Aberdeen has a strong research culture in which students experience innovation and challenge with some of the world's finest scientists. We offer a dynamic postgraduate opportunity within a supportive environment which includes excellence in transferable skills training.

Aberdeen performed outstandingly in the UK's most recent Research Assessment Exercise (RAE 2008) with 89% of research activity assessed as international quality and 55% is ‘world-leading' or 'internationally excellent'. A number of the studentships are awarded on a competitive basis with the projects designed by students.

We have an extensive network of expertise including:
• molecular and cell biology research in a variety of fields with particular strengths in Bone and Musculoskeletal Biology, Cell and Developmental Biology, Immunology, Microbiology, Neuroscience and Systems Biology;
• health services research including large-scale multicentre randomised trials cohort studies, health economic research, health services research, and health technology assessment in a range of clinical areas e.g. pain, cancer, CHD, drug misuse.
• public health, international health and pharmacy practice
• biological and environmental sciences, including major programmes in integrative physiology, terrestrial and marine ecology, and biological interactions in soils;
• nutritional research to pursue cutting-edge science aimed at preventing disease and improving health through good nutrition;
• Cognition, Health and Industrial Psychology, Neuropsychology and Social Cognitive Neuroscience.

Funding for our studentships are at the UK/EU rate.

For further details on all studentships and the application process please contact:

Offre d'emploi Technicien(ne) bureau d'études et chiffrage h/f

Cartesio

Date de publication: 16.09.2014
Cabinet: Cartesio
Type de contrat: CDI

Fonction: Technicien(ne) bureau d'études et chiffrage h/f
Localisation: Romorantin
Secteur: Industrie de véhicules

ENTREPRISE
PME industrielle en très forte croissance (20 M€), spécialiste de la conception et fabrication de véhicules à haute valeur ajouté (bâtières, véhicules blindés), recrute son (sa) Technicien(ne) Bureau d'Etudes & Chiffrage.

› Voir toutes les offres du cabinet

POSTE
Rattaché(e) à la Direction Technique, vos responsabilités s'articulent autour des axes suivants :
- La réalisation et le suivi, du devis à la livraison, des pièces fabriquées pour les clients,
- La mise en place de méthodes et moyens industriels adaptés pour répondre aux besoins des clients,
- La mise en place d'outils de contrôle et de pilotage techno-économiques des affaires.

PROFIL
Issu(e) d'une formation BAC+2/3 ou d'une école d'Ingénieurs généraliste type Arts et Métiers, ou avec une spécialisation en mécanique, électronique ou de génie industriel, vous avez une première expérience réussie dans le secteur industriel où vous avez acquis des connaissances en tôlerie/carrosserie.

Nous étudierons également le parcours de candidats avec une première expérience minimum de 1 à 2 ans en chiffrage de pièces techniques, idéalement au sein d'une PME industrielle réalisant des petites et moyennes séries, ou dans un groupe sur des problématiques Méthodes/Process/Industrialisation.

Rigoureux(euse), vous êtes organisé(e) et réactif(f)ve, vous serez l'interface entre les clients et l'usine.
Emploi Ingénieur développement produit h/f - Bretagne sur CADREMPLOI.fr

Offre d'emploi Ingénieur développement produit h/f | Cadres & Tech

Date de publication: 15.09.2014
Fonction: Ingénieur développement produit h/f
Cabinet: Cadres & Tech
Localisation: Bretagne
Type de contrat: CDI
Secteur: Industrie papetière

ENTREPRISE

Cadres & Tech est spécialisée dans le recrutement de Dirigeants et de Profils Techniques Qualifiés.
Notre client est un Groupe Papetier international spécialisé dans la production et la commercialisation de papiers de spécialités techniques.
1,6 M$ de Chiffre d’affaires, 4 300 salariés, 10 sites industriels dans le monde...

Nous recherchons:
Un/Une Ingénieur Développement Produits

POSTE BASE EN BRETAGNE

POSTE

Rattaché hiérarchiquement au Responsable Développement Nouveaux produits Industriels de la division Composite Fibers votre objectif est de développer les activités produit d’un des segments d’application de cette famille de produits.

Vos principales missions sont les suivantes:

- Étudier le marché et comprendre les attentes des principaux clients.
- Piloter les études de faisabilité et le développement des nouveaux produits.
- Assurer l’assistance technique et la gestion des réclamations auprès des clients.
- Coordonner les essais nouveaux produits avec les équipes de production.
- Participer aux projets globaux de la division avec l’équipe Développement nouveaux Produits.
Annexe 1-1 Occurrences de "Frontier" dans CAEMS

1971 Ø

1995

1. Now building on identification of new therapeutic opportunities we are able to dedicate further resources to our R&D programme, helping us to extend the understanding of respiratory disease and molecular medicine to new frontiers.

2. Frontiers which we are inviting you to help us explore, developing both your career and your professional expertise in the process, while taking advantage of our culture which encourages personal responsibility and the acceptance of greater challenges.

3-6. SmithKline Beecham Pharmaceuticals
New Frontier Science Park

7. We are exploring a new frontier-applications for tiny, portable, wireless computers. To help with this exciting and demanding work, we are seeking a computer science researcher with a strong background in distributed systems and user-interface design to join our multi-disciplinary team.

8. Our purpose-built research laboratory at Terlings Park, near Harlow, is the centre of our drive to advance the frontiers of neuroscience.

2005

1. join our state of the art research facility in Horsham, Sussex and you won't just be at the frontier of medical science. You'll help us define it.

2-3 The two main themes are Science Studies and Frontiers in Medical Science, with courses including Science and the Public and Issues in Brain and Behaviour

2006

1. join our state of the art research facility in Horsham, Sussex and you won't just be at the frontier of medical science. You'll help us define it.

2. The successful candidates will have an outstanding record of research, or have demonstrated outstanding research potential, in the subject area and will be expected to take leading roles in a vibrant research programme at the energy and symmetry frontiers, in particular in the exploitation of data from the LHC.

3. Frontiers in Chemical Biology: Single Molecules

4-6 If you’re an innovative and inquisitive scientist or technologist keen to push back the frontiers of knowledge in your field within a world-class government organisation, find out more about current openings at www.dstl.gov.uk/careers

7. Challenging the status quo and promoting the establishment and implementation of new mass spectrometry techniques, above all you’ll be a tenacious problem solver who enjoys pushing frontiers within the field.

8. Research Frontiers Programme (RFP) supporting all areas of high-quality, novel exploratory research in the third-level sector, normally ranging up to €150,000 over three years.

9. This research is part of ongoing UCD participation in a number of projects which are at the frontier of research on materials science in space.
10. The aim is to combine **frontier** femtosecond optical and synchrotron technologies and enable new science in the emerging field of ultrafast x-rays. Future application to attosecond phenomena is envisaged.

2009

1. New **Frontier** Manager (Strategic Innovation)

2. As New **Frontier** Manager you will help identify, investigate and assimilate new technologies that will drive future trends in research and development. You will direct and manage this research, ensuring that innovations are captured and translated into tangible results which impact on products, and influence future strategies.

3. The Advanced Space Concepts Laboratory will conduct a five year programme of **frontier** research on visionary space systems.

4-5. Routinely working with Government, NGOs, user groups and numerous academic and industrial partners from all over the world, we are pushing the **frontier**s of scientific, intellectual and practical knowledge in this rapidly developing field and we expect this appointment to help us push these boundaries even further.

6. Routinely working with Government, NGOs, user groups and numerous academic and industrial partners from all over the world, we are pushing the **frontier**s of scientific, intellectual and practical knowledge in this rapidly developing field and we expect this appointment to help us push these boundaries even further.

7-10 **FRONTIER.AC.UK**

11-15 **Frontier** has been operating conservation research programmes throughout the tropics for 20 years.

16-18. **Frontier** Volunteers have contributed to some outstanding research leading to the formation of numerous National Parks and a host of effective community-led conservation programmes.

19. Launched on 23 September, the Swiss Cube satellite marked Switzerland's first satellite foray into the final **frontier**.

Here is a random selection of 50 solutions from the 867 found.

1. A7K 449 Frontier Youth Trust
2. A7K 850 They will be looking at frontier theology and practice.
3. A7K 896 Long-time Vicar of the Round Church in Cambridge, he was a strong supporter of Frontier Youth Trust in its early days.
4. A8M 179 Gerard confined himself to documentaries and it was while making a 90-minute update on South Africa, Back On The Frontier, for ITV in 1986, that he became fired up to press ahead again single-mindedly with the feature.
5. ANU 814 Most of the high technology services firms were working at the frontier of computer usage, developing new software packages or sophisticated interactive training models for business.
6. ANU 814 And so Mrs Zamzam's family, perhaps irrevocably split by nationalities, was living only 15 miles apart, divided by the Israeli–Lebanese frontier.
7. B20 2690 'On the body were discovered certain papers which made it only too clear to the marshal and me, though not to those halfwits at the frontier, thank God, that Fräulein Müller and her companion were not, as we had assumed, acting for the Austrians, but for our own High Police.'
8. B3K 2034 The northern frontier of Roman Britain was an outstanding piece of Roman military engineering.
9. BMV 67 in the eleventh and twelfth centuries the frontiers of Europe were being pressed outwards, and on Germany's eastern frontier, and to a lesser extent elsewhere, new land was being settled by peasants as well as by lords.
10. BMV 67 Indirect Rule, then, with its implicit exaltation of the man-on-the-spot over the man in the central office, set the seal of legitimacy on the centrifugal tendencies long at work in the British Colonial Service, and provided them with a rational institutional expression independent of the existence of a frontier.
11. CA4 1180 In Section 11.3, we described two possibilities: depth-first and frontier search.
12. CB0 1671 a wedding close to the frontier.
13. CCP 1464 Although the compact Mont Blanc range and the long frontier chain of the Pennine Alps boast higher summits, the Bernese Alps contain the largest area of glacier in the Alps and a concentration of great peaks.
14. CEH 2269 A hundred divisions pouring across the frontier.
15. EB9 125 One of these frontier issues was the concern for a New World Information and Communication Order (NWICO) which WACC embraced in 1980, albeit with some reservations.
16. EB9 125 Gascony and the Agenais were frontier areas; they were marches in the sense that the borders towards Scotland and Wales were to become marches, subject to their own customs and the jurisdiction of their two wardens.
17. EB9 125 The French Dragoons crossed the frontier with drawn swords, but the weapons served no purpose other than to dignify the moment with a suitable melodrama, for there was not so much as a single Dutch customs officer to oppose the invasion.
18. EB7 245 There is now a real hope that all the hard solid work John Gillam has put into the pottery of the northern frontier, will soon begin to shape into a much more reliable and closer chronology.
19. F9L 335 Mollified in the autumn of 1297 by these gestures on behalf of the king, entrusted with the custody of the charters and their additions, and convinced by the recent Scottish success that England
was in peril on that **frontier** at least, Winchelsey enthusiastically encouraged the clergy to grant the king a tenth.

23. **FA2 193** From Saint-Jean-de-Luz it is only seven miles to the Spanish **frontier**.

24. **FA2 379** Today it is reached by the main road, up the valley of the Petite Nive, through Arnéguy, which is the French **frontier** post, to the first Spanish village of Valcarlos and then Roncesvalles or, in its more familiar French form, Roncaveaux.

25. **FA2 488** a col, because it is no more than 1, 200 feet high, but from it in fact you can see a great distance to both north and south, over the low hills and wide, cultivated valleys in the direction of Orthez and Pau, or into the forests and middling mountains towards the **frontier**.

26. **FA2 632** The Spaniards have managed to build a supreme ugly restaurant-cum-souvenir-shop on their side of the **frontier**, in a style of architecture suggesting its easy conversion, should border warfare ever one day replace tourism, into a defence post.

27. **FAW 784** The right for women to vote for the President of the United States was introduced in Wyoming in 1869, when, according to Abler, Adams and Gould (1971, p.446) ‘**frontier** men and women chafed under archaic and undemocratic laws carried earlier from the East’.

28. **FB4 680** farther east on the southern **frontier**, the wars against the Buryats caused great turmoil up to the end of the seventeenth century, when the back-and-forth migrations of Buryat and Mongol clans was brought to an end by the closing of the **frontier** between the Russian Empire and Chinese ‘Outer Mongolia’.

29. **FSU 178** As its name implies, the Via Militaris was a major line of communication for the Roman armies defending the eastern **frontier**, and as a stage in one of the links between Italy and Byzantium it already had an important role to play in the vital intercourse between the eastern and western halves of the empire.

30. **FSU 518** The Hungarians attempted to create a marcher zone to protect their **frontier** against the Turks by supporting Bosnian resistance in the area between Jajce and the Sava, but after the battle of Mohács in 1526 these pockets of resistance soon collapsed and virtually all Bosnia and Hercegovina lay under the rule of the sultans until the late nineteenth century.

31. **FSU 968** At its greatest extent in the late eleventh century the Croatian kingdom reached down to the Neretva, where its **frontier** met that of medieval Serbia.

32. **G1X 208** They crossed into Russia, engaging at the **frontier** post a new guide, a large and bearded Kurd who claimed familiarity with the requirements of foreigners.

33. **H0A 1237** He had been Private Secretary to my uncle when he was Viceroy, and later Chief Commissioner of the North-West **Frontier** of India before he went to the Sudan.

34. **H9J 668** The individual budget constraint is then: where and the c 1 c 2 **frontier** is given by .

35. **HB2 1060** Chris Bird, exploration team leader of the Atlantic **Frontier** Programme said: ‘The success of the survey has accelerated the whole ‘204’ exploration and appraisal programme and at the same time enabled us to obtain additional data on the area.’

36. **HJ2 1918** Arms Control in Europe: As the ‘other **frontier**’ for the Soviet Union, Chinese and European security have inevitable links.

37. **HKU 1197** Speaking on May 4 he said: "Poland's current western **frontier** will remain unviolable.

38. **HL3 2091** The increase coincided with the escalation of pro-democracy protests and with political reform, and there were reports that border guards were no longer shooting on sight people caught attempting to cross the heavily fortified **frontier**.

39. **HPT 1802** To stake out part of his **frontier** he had spent Christmas 842 with Abbot Hugh at St-Quentin, and then moved on to Valenciennes.

40. **HR0 1203** Home-spun goods, attractive enough as a symbol of **frontier** self-sufficiency, can become wasteful of time and energy.

41. **HRE 168** Second was the **frontier** agreement between the two countries signed at the 1975 OPEC summit in Algiers.

42. **HRE 684** The KDPI, on the other hand, would make their way across the **frontier** into the Suleimaniyah area.

43. **HTJ 926** The **frontier** was only fifty miles further on.

44. **HTJ 1826** All over the camp in wild panic the huts were emptying as the remaining occupants scrambled for the safety of the hills and the Russian **frontier** beyond.

45. **HXK 264** The deadline of 1992 for the removal of **frontier** controls is therefore unlikely to be met.
46. **HXP 138 Frontier** workers, commuting from a country of residence to employment in another State, have a number of established rights, e.g. to social security benefits, but specific difficulties remain, particularly in regard to taxation.

47. **KBS 1640** And I see, as Hubert does, that the sea must be our **Frontier**, but within that **Frontier** we can and must be a unity.

48. **A1G 187** He expected his troops would take two more towns and said his fighters now controlled the whole of Highway 69, along the Thai **Frontier**, north of Sisophon.

49. **A4J 31** Van Der Meulen was an austere, patriarchal figure, deeply imbued with the rigidly Calvinist outlook he had acquired from his father, a schoolmaster in a small village near the German **Frontier**.

50. **A7K 500** It acts as a service agency for Christians working with youth, and is concerned to provide opportunities for education, and training, for consultation and referral, and to make known or available information, research and resources for **Frontier** work.

51. **A7K 906** We will be pleased to advertise job vacancies relating to **Frontier** youth work.

52. **A7K 908** **Frontier** Youth Trust National Administrative & Resources Officer

53. **AAT 85** The Pakistani army has arrested 86 people, bulldozed 20 houses and seized numerous heavy weapons in a sweep of the **Frontier** arms-trading town of Darra.

54. **ABJ 1364** Hundreds still cross the **Frontier** each day, mainly well away from the main **Frontier** posts controlled by Iraqi troops.

55. **ANR 80** The decision to use Strasbourg as a point of departure for this attempt was based upon a calculation that the strong army garrison in the **Frontier** city would respond to the name of Napoleon, but in fact the whole affair was a disaster and ended in ridicule with the Prince's arrest.

56. **ANR 1093** Although this meant the withdrawal of the Prussian garrison, it did not give Napoleon III the territory he had sought, and with it the **Frontier** rectification in France's favour.

57. **ARK 1535** The **Frontier** post spotted him from the photos we rushed to the western **Frontier**.

58. **B0K 1352** A century ago it was considered to be as good as the Normande, and better as a butcher's beast, but a combination of war and **Frontier** changes led to its deterioration; it was crossed with Danish Red as well as Belgian Red to form the Flemish Red, which is usually whole red, though some have mottled or blazed faces.

59. **B7K 1442** Take, for example, the **Frontier** role of American agriculture which laid the foundations for much of the country's prosperity.

60. **CAA 195** On the northern **Frontier** there are a series of mountain groups, culminating in the spectacular Tatras near the Polish border.

61. **CAK 893** Rajhara is like a tropical mid-19th century Rhondda — a **Frontier** town of chaotic shacks and cheap hotels.

62. **CFW 658** A report and data package was produced and sold to the hydrocarbons industry following the Department of Energy's announcement of a **Frontier** Licensing Round offshore of north-west Scotland.

63. **CJD 691** The Gulf of Tonkin and the Vietnamese **Frontier** is the arbitrary point at which South-East gives way to North-East Asia — the industrial powerhouse of the Pacific, the region that most economists and businessmen mean when they idly refer these days to ‘Asia’.

64. **CKN 351** Black/white, he argued, is a ‘preposterous **Frontier**’, being grossly over-simple, and the world needs far more discriminations than simple divisions between negro and white or Gentile and Jew.

65. **CKR 707** Anselm and the king met at Laigle on the **Frontier** of Normandy on 22 July, and agreed that Anselm's revenues would be restored.

66. **CLS 391** Griffith was never as mature an artist as Dickens and he was the product of the **Frontier** rather than a literary genius but he had a social theory of sorts, a gift to embody values in stories, and a mastery of technique which allowed him to make every setting dramatically and socially convincing.

67. **CLX 318** Remenkapff's First Army crossed the **Frontier** during 17–18 August, and on 19–20 August eight of his divisions encountered seven German divisions, forcing the Germans to withdraw.

68. **CLX 766** In February 1916, when the battle opened, the Western Front ran south from the Ostend area, east to Verdun and then roughly southeast to the Swiss **Frontier**.

69. **CS5 62** The most striking activity undertaken on a **Frontier** without consulting royal authority — perhaps the most striking event in the whole history of European expansion — was the conquest of
most of the American continent south of the Tropic of Cancer in the space of a single generation by a succession of Spanish military leaders.

70. **CSS** 660 After King Philip's War, a relatively serious struggle with Indians in New England in the 1670s, this had ceased to be any serious danger and the *frontier* had been reasonably peaceful.

71. **CS6** 603 His loneliness as a child had been reinforced by his years of solitary endeavour in the north-west *frontier* in India and Kenya, which made him the world's leading authority on the diseases of the camel.

72. **EB7** 241 John Gillam was one of the first to appreciate that in the military areas it was possible to be far more precise since many forts and *frontier* works were dated not only by historical sources, but by inscriptions, and he exploited this rich vein of information in his ‘Types’ (1957), a major contribution to our studies.

73. **EDA** 1398 They were filled with troops, moving east towards the Polish *frontier*.

74. **EDA** 1493 The Wehrmacht, he later wrote, had crossed the *frontier* in response to the occupation of the German radio station at Gleiwitz on 31 August by ‘a band of Polish desperadoes….”

75. **EDG** 1966 Kununurra — The Final *Frontier*

76. **EDK** 953 It is in the USA that residential preference has been invoked most as an explanation for decentralization (Berry 1976), perhaps partly as a return to old ideas of the *frontier* and the rural idyll, as Champion (1987) suggests.

77. **EDP** 848 As to their method of achieving their object, short of World War III beginning, I think they will adopt the well tried tactics of preparing the country from within rather than resort to open aggression, although *frontier* incidents ‘will doubtless continue.

78. **FA2** 339 Like other *frontier* peoples, the French Basques have not always seen eye to eye with Paris.

79. **FA2** 438 This last choice is desirable but it only delays things so far as getting home is concerned, since the road stops on the *frontier* some three miles away, and there you can but turn round.

80. **FB4** 26 Over the next hundred years a motley collection of military servicemen (voenno-sluzhilie lyudi , fur-hunters, merchants, government officials, Orthodox clergymen, fugitive serfs, entrepreneurs and tradesmen (promyshhenniki ), convicts, religious dissidents, foreign prisoners-of-war (generically known as Litva, ‘Lithuanians’), cossacks, artisans, adventurers and vagrants (gulyashchie lyudi ) steadily overwhelmed the indigenous Siberian native population and established a strongly defended network of wooden fortresses, outposts and stockaded population points, several of which swiftly grew from small military and administrative settlements into substantial, bustling *frontier* towns, a process described in more detail by David Collins in Chapter 2 of this book.

81. **FB4** 563 The Russians were pushed back northwards to the Stanovoi mountains, where the *frontier* fixed in 1689 by the Treaty of Nerchinsk was recognized until the nineteenth century.

82. **FBB** 671 For it is a prime fact about classical Macedon, and one that explains why so large and rich a country counted for so little until so late, that she was a *frontier* province of the Greek world; beyond lay Illyrians, Dardanians and Thracians, and beyond them the drifting pre-Celtic populations of central Europe, undisciplined fighters but unlimited in manpower.

83. **FE5** 522 The most serious problem remaining for 5 Corps was thus that posed by the approach of the main body of Croat troops (reported as being 200,000 in number), accompanied by huge numbers of Croat civilians, who were attempting to escape into Austria via Dravograd, towards the small town of Bleiburg just inside the Austrian *frontier*.

84. **FET** 1897 And the involuntary malice within the desperate attempts to remain on the safe side of the *frontier* of madness.

85. **FSU** 939 This last point was still valid two centuries later, as referred to in a report by the governor of the Varaždin district in 1737: ‘diese granitz nicht allein als ein antemurate contra Turcam, sed etiam contra Hungarum in casu rebellionis anzusehen ist’ (‘this *frontier* is not only a defensive outwork against the Turk, but can also be seen as protection in case of rebellion in Hungary’).

86. **GT2** 100 During World War I he was political agent with the Waziristan *Frontier* Force, and also held a temporary commission in the RAF as a pilot (1918), an experience which evidently instilled an enthusiasm for flying which he retained for the rest of his life.

87. **GX7** 140 Block 36, in North West *Frontier* Province, contains the Ramak prospect which has been developed by LASMO’s exploration department in Karachi.
88. **HHV 6865** If these matters were to pass into European competence in the way that the Liberal Democrats want, there would be an inevitable weakening of our controls and our **frontier** controls, which I am not prepared to accept.

89. **HLS 828** There were reports of serious disturbances in Punjab and the North West **Frontier** Province.

90. **HR0 1201** For all the pioneer ideology of **frontier** self-sufficiency which came to surround the early Americans, increasing in both numbers and wealth, they provided a market for consumer goods by 1740 which was not unlike that which had emerged in England itself.

91. **HR5 241** Screams beyond the **frontier**.

92. **HRE 1323** In addition, Iraq viewed Kuwait as having gradually eaten away patches of Iraqi territory in the border area between them over the years and also as draining reserves from part of Iraq's South Rumailah oilfield which straddled the **frontier**.

93. **HXC 1420** A **frontier** of skill had to be defended against dilution by the unskilled, including large numbers of women.

94. **HXK 221** These are the effects of: (a) reducing **frontier** controls; (b) reducing market entry barriers; (c) reducing cost-increasing barriers.

95. **HY7 41** Persian forces crossed the river Araxes in mid-July 1826 and forced Russia's **frontier** troops to fall back on the Georgian capital of Tiflis (Tbilisi).

1995

1. Smithkline Beecham
   As a forerunner in pioneering research its activities include the approval, manufacture and marketing of an extensive range of life-saving pharmaceutical products.

2. The Research Group at ARA has an international reputation for pioneering work in Computational Fluid Dynamics and we are looking for highly motivated staff who can maintain this standing.

3. At SmithKline Beecham, advanced genomics research joins the myriad of other disciplines needed to discover pioneering drugs, vaccines and diagnostic tests.

4. WARDEN/DIRECTOR OF STUDIES required for Dale Fort, the FSC's pioneering Marine Centre, to take the Centre into the 21st century as the lead provider of marine/coastal education in the UK.

5. Glasgow Caledonian University
   Join our internationally renowned team in their pioneering research to find a more environmentally friendly process to produce chromium deposits using high speed plating.

6. We have pioneered the development of Visual Computing for technical, scientific and creative professionals in every area of industry and commerce.

7. This new Agency, a corporate body within the NHS, is pioneering a unique arrangement for providing medical physics and clinical engineering services to health bodies in Northern Ireland.

8. The Agency, a corporate body within the NHS, is pioneering a unique arrangement for providing medical physics and clinical engineering services to health bodies in Northern Ireland.

9. This job is a unique opportunity to take forward the pioneering work on the Peterborough Natural Environment Audit jointly developed by English Nature, Peterborough City Council and the Peterborough Wildlife Trust.

10. Merck Sharp & Dohme, one of the world's most successful multinational pharmaceutical companies, is famous as a pioneer in drug research and development. Our achievements are based on the application of innovative fundamental research in pursuit of novel medicines.

11. The ORC is a large interdisciplinary research centre with an international pioneering reputation in lasers, guided-wave and fibre optics, optical communications, optical sensor technology, optical physics and solid state laser technology.

12. SCHERER DDS LTD

14. Our client, Baxter Healthcare Corporation, has become one of the world's foremost providers of pioneering health care products with a solid dedication to breakthrough research.
15. The Fire Research Station has won international acclaim for its pioneering work in the application of computational fluid dynamics.

2005

1. We are pioneering new approaches to integrated environmental design and the application of renewable energy technologies with projects across the UK, Europe and the Middle East. (Whitbybird)

2. Established 70 years ago, Yakult the pioneering international probiotic company is committed to educating and advancing research in areas of intestinal health.

3. The Triangle also brings under one umbrella the pioneering work of the Institute for Stem Cell Research and the optoelectronics expertise of the Heriot-Watt Research Park.

4. We seek to recruit an enthusiastic scientist with experience in functional brain imaging to develop and apply fMRI and MEG in understanding the functional neuroanatomy of pain perception in healthy subjects and in pioneering the application of these techniques to support diagnosis, management and treatment of patients with acute and chronic pain.

5. We are noted for our commitment to innovation and sustainable development, and are pioneers of new approaches to integrated environmental design and the application of renewable energy technologies.

6. At Smith&Nephew we do pioneering work in many important areas, including adult stem cells and tissue engineering.

7. As a result King’s College London is a major international focus for pioneering developments in a range of sectors including pharmaceuticals, medical technologies and biotechnology.

8. A survey last year showed that the public perceives engineers as "building and planning" rather than "inventing, discovering, researching or pioneering" as scientists do.

9. The School is a major new enterprise funded from a multi-million pound benefaction by the computing pioneer, James Martin.

10. For over half a century, Hexcel has pioneered the development of advanced composite materials for the commercial aerospace, space & defence, electronics, wind energy and the automotive industry.

2006

1. Sherwood has pioneered a broad range of exciting new coatings and additives

2. Domantis is one of the fastest growing biotechnology companies in the UK and is pioneering the development of the next generation of antibody molecules

3. Domantis is one of the fastest growing biotechnology companies in the UK and is pioneering the development of the next generation of antibody molecules

4. Domantis is one of the fastest growing biotechnology companies in the UK and is pioneering the development of the next generation of antibody molecules

5. This year we’ve established a new global centre of emphasis to pioneer this work and to support our drug discovery & development activities worldwide

6. Established 70 years ago, Yakult the pioneering international probiotic company is committed to educating and advancing research in areas of intestinal health.
7. We are world pioneers in innovations such as Flat Dynamic X-ray Detectors and the technology behind LCD TVs.

8. The R&D team at Lucite International has recently developed a pioneering new catalytic route to MMA which is expected to be a major driver for expansion of the business.

9. The University of Southampton is pioneering new developments in Complexity Science.

10. We have a high performance culture, which has enabled the company to pursue pioneering programmes of drug discovery and development.

11. The Voxar Product Group, based in Edinburgh, Scotland, was founded in 1995 and is a pioneer and market leader in the field of 3D medical imaging and integration with PACS.

12. Imperial has been a pioneer in this field, and the project is part of a major BSN collaboration involving a large multi-disciplinary team.

13. In fact, our pioneering KLIX® and FLAVIA® brands now lead the world in integrated drinks vending solutions.

14. Abbott

Pioneering. Achieving. Caring. Enduring

15. Smart Holograms is pioneering a new patented technology (Sensor Holograms) for diagnostic applications.

16. One of its pioneers, Scottish obstetrician Ian Donald, had developed an interest from his knowledge of sonar in submarines and shipbuilding.

17. by investing more money in R&D than any other company, enabling us to pioneer the discovery of new products.

18. Here at Cmed we’re proud that we stand out from the clinical research services crowd. Our pioneering approach, leading-edge intelligent Data Acquisition and Management (iDAM) patented technology and processes allow us to deliver all encompassing solutions that provide real advantages to our clients.

19. Here at Cmed we’re proud that we stand out from the clinical research services crowd. Our pioneering approach, leading-edge intelligent Data Acquisition and Management (iDAM) patented technology and processes allow us to deliver all encompassing solutions that provide real advantages to our clients.

20. This will be based upon the Optical Parametric Chirped Pulse Amplification (OPCPA) technique which the CLF has pioneered.

21. 3M has pioneered innovation since 1902 and, today, invests more than $1 billion a year in research and development, helping to invent the future.

22. Now the sector is at last beginning to look more healthy and stable, which is good news for smart people who want to work in biotech but who can do without the roller-coaster ride of excitement and disappointment of the pioneering days.

23. Today, small-molecule drugs dominate the best-selling drug tables, but more than 40 per cent of drug discovery is devoted to biologicals, a new kind of drug being pioneered by biotech companies.
1. We seek a senior level scientist who has pioneered new applications development.

2. A first class benefits package, generous leave allowances, opportunities for professional development and a pioneering working environment are waiting for the successful applicant.

3. Scientists at ISB are pioneering a new approach to studying all of the genes and biological systems in an organism simultaneously.

4. Martin Wickham, a research fellow at the Institute of Food Research in Norwich, who is trying to turn his YES idea - a probiotic spray to prevent MRSA infection - into a pioneering new company.

5. The post will be based within the MRC Cambridge Centre, which provides administrative and technical infrastructure support to the eight MRC research establishments in the Cambridge region covering a wide range of the MRC’s research activities, including those renowned for pioneering work in molecular biology and for the application of basic research to medicine and the commercial sector.

6. Study with experts from three leading UK universities pioneering new cell-based therapies.
Annexe 1-2-1 Occurrences de "PIONEER(ING)" dans RENEWABLE ENERGY

1. One of the pioneering works using the singularities method is attributed to A.M.O. Smith who, together with Hess, produced the Hess–Smith code in 1962 using the Neumann boundary condition and based on flat constant source panels. Initially meant for non-lifting potential flow, this code was added with constant doublet elements, to handle flow with lift. [23]

2. Hungary is a pioneer in geothermal energy, which is used for district heating in as many as nine towns. [33]

3. Since the pioneer concept of wind turbine optimisation provided by Betz, the techniques for optimising the design and operation of wind turbines have been intensely developed as the size, cost and number of wind turbines have increased. [55]

4. Alberta and Ontario are Canada’s ‘pioneers’ in terms of electricity industry restructuring: each has opened its electricity supply system to competition and market forces. [58]

5. Since the pioneering work by Angstrom [4], later modified by Prescott [16], the study of their relationship has been the object of a large amount of papers [7,17,10,13,8,9]. However, no universal relationship has been found. [67]
Here is a random selection of 50 solutions from the 574 found.

1. **A50** 703 Pioneering projects breaking fresh ground could receive up to £50,000.

2. **A6D** 1086 The two pioneering forces of modern sensibility are Jewish moral seriousness and homosexual aestheticism and irony.

3. **A6D** 706 Stephen Greenblatt draws upon several of the containment arguments outlined above (Chapter 6) in his pioneering study Renaissance Self-Fashioning.

4. **A6D** 1553 Edward Said's pioneering Orientalism offered a searching analysis of this phenomenon.

5. **A6G** 969 While there have been important pioneering studies, the hinterland of the Edwardian Conservative party and its ideological structures remain to be explored.

6. **A6Y** 1181 The creation of a private association to prosecute offenders and chivvy local and central government into action was a pioneering effort in Victorian middle-class moral interference in the lives of the poor.

7. **AAN** 335 Yet Hilton has approached the story from a refreshingly energetic and revealing standpoint, his exhaustive researches producing hitherto unrevealed nuggets about the pioneering years of the Honda's Formula One involvement.

8. **ABE** 1815 Primary schools are pioneering the most far-reaching shake-up of education in living memory.

9. **ABG** 2820 With a tiny staff (currently seven, including secretaries), the CPS sponsored pioneering work on many of the ideas that came to define Thatcherism — privatisation, the ‘enterprise culture’, a monetary explanation for inflation.

10. **ACN** 2116 The trick was simple; he made loops of Western rhythm tracks (by The B-52s, Talking Heads, The The and many others) and dubbed his own voice on to them, thus pioneering a sampling technique in the Soviet Union by using only two simple tape recorders.

11. **ADK** 1436 In 1979 we began pioneering the direct mail concept at constituency level with my wife Marlies at first typing and then working the word processor and computer.

12. **ADW** 1182 The army's pioneering role, its part in the coup of 1969, the military background of the members of the Revolutionary Command Council, were the chief reasons civilians did not control the army: after the first years of the revolution there was no ministry or secretariat for defence or aggression in Libya, and the National and local Assemblies did not discuss military affairs.

13. **ALW** 2005 The modern treatment of peptic ulcers started with the use of the triterpenoid drug carbenoxolone on the 1960s, following the pioneering work of the late Siegfried Gottfried.

14. **AM6** 18 A close associate of Peter Slade in their early pioneering days, Brian Way developed the philosophy and methodology of Child Drama along a broader front.

15. **APX** 1205 Prevention is invariably more satisfactory than cure (although flat roof refurbishment rather than replacement is now a totally viable concept) and pioneering this educational crusade has become paramount with BFRC.
16. **BP4** 1088 Back in the 1950s when Alfred Kinsey carried out his *pioneering* work very few married couples (in America at any rate) practised oral sex of any sort.

17. **CCR** 296 The communications infrastructure was extended and, following *pioneering* development of the electricity supply by West Ham corporation, motive power became available at rates cheaper than in any other metropolitan area.

18. **CEM** 794 But thanks to a team of *pioneering* transplant surgeons in America, Laura can look forward to a happy life.

19. **CH2** 6825 The four-bed unit at *pioneering* Addenbrooke's Hospital, Cambridge, was set up to treat some of the worst brain-damaged and head injury cases in the country.

20. **CHB** 2014 GRAM WAS a good-looking wastrel rich boy, reared in Georgia, who hung out with the Stones, played with The Byrds, discovered Emmylou Harris and released some glorious records — *pioneering*, sad-woozy tunes that have left their influence on ‘Let It Bleed’, ‘Dixie Narco’, ‘The Rockingbirds’ and with soon-to-be-popular Def American band The Jayhawks.

21. **CMU** 861 Their numbers in further and higher education colleges in the UK alone were estimated in 1985 to be more than 55,000, representing remarkable progress even by comparison with the situation 15 years earlier when none but a few *pioneering* colleges made any special effort to accommodate students with disabilities or learning difficulties.

22. **CU1** 585 A library of side-on film has existed in Australia for quite some time, but this study is *pioneering* the development of the 3D image.

23. **EBW** 648 Over half of the paintings now on display in Bassano were not represented in Pietro Zampetti's *pioneering* exhibition of the artist in Venice in 1957, and the same is true of many of the drawings.

24. **EEN** 13 Specialised studies of sex as a social experience have been appearing for almost a hundred years, since at least the time of the great *pioneering* sexologists and anthropologists of the late nineteenth century; and what appeared then were works which have been profoundly influential, not only in describing but in constructing and delineating the areas to be discussed.

25. **EER** 604 A.D.A.S. are once quoted as saying our land would grow nothing but Rhododendrons and Heather (and when their advice was free, we would call them out and go away and do the opposite) but in true *pioneering* spirit we have proved them all wrong!

26. **FBE** 10 This view first became popular during and as a consequence of the Scientific Revolution that took place mainly during the seventeenth century and that was brought about by such great *pioneering* scientists as Galileo and Newton.

27. **FES** 388 Despite Wilson's inclination to adopt what he considered to be a conciliatory approach to the shipowners he found himself, whether *pioneering* new branches or giving support to the work of the union's organizing delegates, in the role of agitator.

28. **FP4** 1314 We probably don't need Jan Pahl's *pioneering* research to tell us how fragile conjugal consensus is.

29. **FSY** 885 Another factor which may have been important in this first year of the reforms was the determination of these *pioneering* fundholders to ensure the success of the scheme.
30. **G0H** 1308 Here Wallace combined paleontological and modern evidence to throw light on the problem of migration, thus *pioneering* the technique later expanded by Matthew throughout the fossil record.

31. **G33** 583 Cited by WWF International President HRH The Duke of Edinburgh for his outstanding leadership in *pioneering* environmental conservation and education in Indochina and for his promotion of international co-operation and scientific exchange among all nations, Vo Quy is the architect of a groundbreaking agreement between Laos, Kampuchea and Vietnam, which calls for international co-operation in protecting rare and endangered migratory species and the establishment of transformer reserves, or peace parks, on their shared borders.

32. **G38** 123 Lever Brothers appears to be throwing its weight behind Wisk, its *pioneering* brand in the fiercely competitive liquid detergent market.

33. **GT4** 82 His *pioneering* interest was in Italian pictures of the fifteenth and early sixteenth centuries.

34. **GT8** 1010 He travelled under his new name to Afghanistan and embarked on a decade of *pioneering* travel and antiquarian investigation.

35. **GTA** 974 Helped by research grants and an association with All Souls College, Oxford, he wrote *pioneering* studies of social change in Africa which were published as Africa Emergent (1938, 1949) and used by Lord Hailey (first Baron Hailey, q.v.) in preparing the African Survey (1938).

36. **HA1** 138 His vital and *pioneering* poetry magazine, New Departures, had first been published in late 1959.

37. **HHV** 23748 Egypt's *pioneering* efforts in regard to peacemaking are well established and respected, and I do not consider such a line of questioning helpful.

38. **HTK** 217 The Board had from the start been conscious of its *pioneering* role.

39. **HWG** 63 The increase in wages, however, seems to have persisted even in periods when there was a dearth of money, and Hatcher is prepared to accept the general line of the arguments put forward in Postan's *pioneering* article of 1950 that population decline was the greatest single factor in bringing about these economic changes (75, pp.47–54).

40. **HXC** 818 Robert Malcolmson's *pioneering* researches have placed eighteenth-century recreations sociologically with a thoroughness and insight which can hardly be equalled in a general textbook.

41. **J18** 933 In Trinidad, 19 species of the *pioneering* Miconia (Melastomataceae) fruit successively, providing fruit for dispersing birds throughout the year and staggered batches of seedlings that avoid interspecific competition.

42. **JNF** 355 In seventy five years the fund has remained true to her principles and yet it is as *pioneering* as she ever was.

43. **K1E** 2214 (ANN) Teachers of the *pioneering* Peto system for children with cerebral palsy have hit back at the suggestion it may be a waste of money.

44. **K1N** 2743 A teenager who's been having *pioneering* medical treatment to help him grow, is back on his feet…and learning karate.

45. **K1N** 2786 Without the *pioneering* treatment, Jonathon would have been as tall as youngsters half his age.
46. **K1R** 1793 Best foot forward at a **pioneering** clinic.

47. **K3K** 62 A **pioneering** surgeon in America operated and removed 99pc of the tumour, but then more tumours were discovered on Helen's spine.

48. **K55** 3605 District and county councils have given the scheme their full support and hope the programme will meet with the same success as Darlington's **pioneering** Railside Revival scheme.

49. **K55** 3935 They are hoping the programme will meet with the same success as Darlington's **pioneering** Railside Revival scheme.

50. **K56** 320 In an appreciation, Emeritus Prof Robert Kenedi said yesterday: HIS **pioneering** initiatives, documented by his many publications, were in the areas of tissue immunology, burns, bio-engineering and various aspects of plastic surgery, including its history.

51. **K57** 1810 David Thomson: **pioneering** Borders farmer

52. **K59** 1472 Apart from North Sea projects on the drawing board, progress is expected during 1993 towards the development of the huge Mars discovery it shares with Shell in the Gulf of Mexico and the oil reserves it has established by **pioneering** exploration work in Colombia.

53. **KRH** 3573 One can read about, and see on television, schools which are **pioneering** and really are genuinely different, but I think they're very much the exception.

54. **KS1** 488 Thank you chair, erm many of you will perhaps know that the health authority did some **pioneering** work looking at different standard mortality ratios in different wards in Oxfordshire, and came up with some rather disturbing evidence that some of the wards had significantly higher incidents of death for people primarily in the forty-five to sixty-four age range than others, and Phil and myself wish to continue that work by targeting those wards with a range of measures designed to alleviate some of those health inequalities.

55. **ABD** 610 Yet it is Tacoma that is ahead of its time in its **pioneering** attempts to help drug addicts (rather a lot of them among its 160,000 inhabitants) from becoming AIDS sufferers as well.

56. **AHA** 720 All in all, then, a **pioneering** collection of very worthwhile and stimulating music, ideal for guess-the-composer quizzes.

57. **AHL** 6 **HUNDREDS** of thousands of dolphins could be saved from death thanks to **pioneering** work by British scientists.

58. **AJ5** 33 Health: The best care is at home Christine Doyle examines a **pioneering** scheme which cuts patients' time in hospital — and also saves money

59. **AL8** 438 Thus, in spite of the importance of the **pioneering** work in rural areas, it was apparent even as late as 1935 that the District had made little substantial and quantifiable impact in its rural counties and among its dispersed population.

60. **AL8** 883 The District became responsible for Terminal and Short courses extending over six to twelve meetings as well as a variety of informal, **pioneering** courses and discussion groups of fewer than six meetings; the last category attracting grant-aid for the first time.

61. **AR0** 930 Appropriately, such stations generally derived their inspiration from vernacular **pioneering** house styles, in the ‘Swiss chalet’, the ‘cottage orné’, the ‘stick style’, the ‘shingle lodge’, or, particularly in the West, the frame store or the log cabin.
62. **B0A** 410 John and Sebastian Cabot and Martin Frobisher set sail on their **pioneering** voyages from here.

63. **B7D** 1355 **Pioneering** entomologists undoubtedly saw Laboulbeniales quite frequently while examining insects, but mostly regarded these oddities as some sort of malformed exoskeletal growths.

64. **BM4** 2969 A **PIONEERING** study into why so many young men are unsafe drivers suggest that driver training should focus on attitudes and relationships as well as mechanics.

65. **BM6** 1604 Much has been written about the **pioneering** spirit of the men and women who left their homelands in times of primitive travel facilities and poor communications, to settle on virgin land of which they had little or no knowledge.

66. **BMA** 481 The book was a **pioneering** effort and has all the faults, as well as the merits, of such an enterprise.

67. **BMB** 1383 Men are more **pioneering**.

68. **BMB** 2469 By-products from the manufacturing processes of KP Foods and British Steel are key ingredients of a project **pioneering** environmental awareness in the north-east.

69. **CBY** 2182 Accountants are among the most sophisticated users of spreadsheet models, so it's no surprise to find them **pioneering** new products.

70. **CER** 840 J. David Jackson, a young Canadian theoretical physicist working at Princeton New Jersey, read about this discovery in his New York Times (plus ça change!) and within a month had made a **pioneering** and thorough evaluation of muon catalysed fusion, including studies of the ‘sticking probability’—namely the chance that the muon sticks to the emitted fusion fragments rather than being released to catalyse more fusion.

71. **CH2** 1614 Test tube tots say ‘thanks’ to **pioneering** doc

72. **CHW** 915 People still think in racial terms, whereas we are **pioneering** multi-racial rugby as a way of life.

73. **CT5** 362 As it turned out we accidently anticipated Xcelerated Systems trademarking the expression as the name for the technology underlying Liken, its **pioneering** two-year-old Mac-on-Unix product.

74. **EBT** 356 Lautner is best known for his **pioneering** of biomorphic styles, either in roadside, fast-food structures or on hillsides in the western United States.

75. **EC4** 445 For five years, the ensemble IXION has presented a day of **pioneering** music within the festival and this year they celebrate with anniversary greetings to Xenakis (70) and John Cage (80).

76. **FB4** 90 Conscious of his **pioneering** role in this respect, and in thereby ‘opening up’ Siberia to the prospect of a more orderly and civically developed future, Speranskii compared himself, rather immodestly, with the traditional ‘discoverer’of Siberia, Yermak.

77. **FP9** 1277 But in its **pioneering** way, and for several decades in the formative stage in the development of consumer culture, Butlins both represented and redefined core elements in working-class and mass leisure.

78. **FS6** 1373 For example, in education it is again pre-school nursery education that has been reduced; community work projects are being axed by hard-pressed social services departments, and **pioneering** psychiatric rehabilitation services are being closed down.
79. **FYW** 608 **Pioneering** NHS industrial units in large hospitals thus took on subcontracted work from local factories.

80. **G34** 348 Jo's **pioneering** work has changed the way people view their own worlds, and articulate their own experiences.

81. **GTB** 133 In the course of twenty-five years of persistent **pioneering** work, he was responsible for novel design features, such as the duplex condenser (1924), objective changer (1926), and cone condenser (1930), the last allowing for the first time ultraviolet, dark-ground photographs of viruses.

82. **GTF** 485 Nevertheless, her life's achievements in floral anatomy are considered the greatest effort since the early **pioneering** work sixty years previously, and her papers continue to be heavily cited.

83. **GTF** 1179 Among the other seven books she published are a fine **pioneering** critical study of Virginia Woolf (1932); The Astonishing Island (1933), a satire; a feminist treatise, Women and a Changing Civilisation (1934); Truth is Not Sober and Other Stories (1934); and a collection of poems, The Frozen Earth (1935).

84. **GTG** 705 That both kinds of Camphill therapeutic communities, schools and villages, increased in number in several countries both in and after König's lifetime — by 1987 there were over seventy centres in eighteen countries — is testimony to their success in answering a need, albeit continuously in **pioneering** mode and therefore not without mistakes; testimony also to the founder's vision, dynamic personality, and restless energy.

85. **GTG** 795 During this time Willans improved his designs and adopted advanced manufacturing techniques, **pioneering** the rapid assembly of engines from standardized, interchangeable components.

86. **GUC** 941 The company in question would be the first to admit that the analysis was a **pioneering** effort and that the estimates obtained were, in some cases, quite crude, as the accounting system could not readily provide all the relevant data.

87. **HOY** 2311 Le français fondamental is a great **pioneering** effort in the application of linguistics to language teaching.

88. **HTY** 951 This **pioneering** work continued throughout the 1950s and early 1960s, but the results remain largely unpublished.

89. **HHX** 16274 The Midland Centre for Neurosurgery and Neurology is the only centre in the United Kingdom able to provide such a **pioneering** operation which is only available through the N.H.S. If Mr. Thorpe had not been in a fortunate position of being able to register with a G.P. in a different Health Authority, he would not have had his operation.

90. **HJ2** 3446 Much has been written about the pure theory of public choice but, in spite of a few **pioneering** works (the best known being Downs, An Economic Theory of Democracy and Olson, The Logic of Collective Action) there have been few recent applications in political science.

91. **HR0** 797 The Darbys and Reynolds, ironmasters of Coalbrookdale, were active in getting the Shropshire Canal built (1788–92), and Richard Arkwright subscribed to the Cromford Canal (1789) which served his **pioneering** spinning mills in Nottinghamshire.

92. **HTK** 298 Modular degrees were to become more widespread in the 1970s as the colleges of education — including those validated by universities — diversified, but some of these substantial programmes introduced by polytechnics and gaining CNAA approval were **pioneering** new curricular patterns at the undergraduate level.
Pioneering scholarship in the 1960s by Rudé and Rose suggested that food rioting first occurred in Oxfordshire in the closing years of the seventeenth century and then spread over the South and West and into the Midlands, but were uncommon in the northern counties.

Ruth's just returned with Stephen from Moscow, where he underwent three months' intensive therapy at the pioneering Valentine Dikoul Clinic.
95. **K1V** 743 ' Most of us I'm sure agree that this kind of work, although *pioneering* and unproven, if it does some good that's super.

96. **K47** 75 Group Capt Gleave, who died on Saturday night in a Berkshire hospital, was one of hundreds of RAF pilots to become members of the Guinea Pig Club after *pioneering* surgeon Sir Archibald McIndoe rebuilt their badly burned faces.

97. **K4D** 39 A COUPLE have appealed to Merseysiders to help them raise £15,000 in three months to send their son to a *pioneering* medical clinic in the United States.

98. **K4W** 8014 Colleagues mourn *pioneering* surgeon Hospital colleagues are mourning a *pioneering* Cleveland surgeon who died at the weekend.

100. **K8Y** 1917 This may bring about degeneration of standards either through communication failures or because succeeding team members lack the *pioneering* zeal of the original staff.

1995

1. From our unique, purpose-built Research Centre at Terlings Park on the Herts/Essex borders, we are totally committed to Neuroscience Research and to the discovery of novel therapies for the treatment of central nervous system disorders. [1980-016 (1995) : 59]

2. The Location
Carlisle is based in North Cumbria which is near the border with Scotland and next to the Lake District. The city has easy access to the M6 and excellent rail links with the South and Scotland. [1993-032 (1995) : 60]

2005

1. The Council currently has 19 Member Countries bordering the North Atlantic and adjacent seas, and six Affiliate Members, mostly from the Southern Hemisphere. [2481-028 (2005) : 61]

2. It's not just beautiful countryside that makes researchers want to work north of the border. James Kingsland investigates [2485-001 (2005) : 54-55]

3. Our UK group is located at Terlings Park, set in picturesque parkland surroundings, on the rural Hertfordshire/Essex border. [2498-021 (2005) : 58]

4. DML is the largest marine facility in Western Europe, based on the bank of the Tamar River on the border of Devon and Cornwall. [2528-027 (2005) : 70]

2006

1. The quality of this method is revealed by our leading score in the top-5 of the worldwide citation indexes in our specialised field. We seek practical solutions based on high-quality technology. Guided by a commitment to society that does not stop at national borders. This is what sets the Wageningen approach apart. [2533-053 (2006) : 61]

2. Science, work and business; The Insider Switzerland; Beyond borders [2550-006 (2006) : 56-57]

3. It is in Swiss universities that a willingness to welcome researchers from outside its borders is most evident. [2550-006 (2006) : 56-57]

4. By working across borders and regions and adopting world-class processes, we focus our people, technology and brands to achieve these growth aspirations.
5-6. Dwr Cymru Welsh Water supplies water to 1.2 million customers across Wales and the English borders.

2009

1. Chief Scientific Advisor. c£70,000 pa plus bonus and relocation Harwell, Oxfordshire/Berkshire border [2724-004 (2009) : 52]

2. Just west of Geneva lies CERN, the nuclear and particle physics centre whose famous particle accelerator rings cross the border with France. [2733-006 (2009) : 60-61]

3. The Department for Employment and Learning as part of its cross-border research and development programme has allocated over £3 million funding to build additional and sustainable research capacity. [2733-046 (2009) : 76]

4. Any self-respecting university of technology might claim an interest in the future of the world. But Chalmers has taken the initiative. Building on eight strategically identified areas of advance, we are now seeking ambitious women and men for Assistant Professorships in fields that will further our vision of sustainability. Each researcher will have the chance to design a unique and autonomous programme networking with specialists, students and entrepreneurs across various borders. [2737-024 (2009) : 65]

1. A2X 400 ‘We told him it was a holiday in case he blabbed at the border,’ his parents explained.

2. A87 1 Stock Exchange rallies strongly in response to open border.

3. AA9 239 Their areas of expertise encompassed a wide range: Sandra Salmaso and Cinzia Mascherin from Italy devised a piece called No Man's Land, described by Mascherin as ‘an empty space, without border, beyond quiet’, based on work done with objects.

4. ABS 3120 Suddenly I say one of the ‘Stop Checkpoint’ signs that are ubiquitous in Ulster, but it was outside the Leggykelly, a pub just five hundred yards south of the border.

5. ACS 1390 The Korean War and several other border wars, backed by the super-powers, had been judged not worth pressing the nuclear button for and it was this consideration which had produced the British H-Bomb in 1957.

6. ACX 253 A few weeks ago I picked up a tray of plants from the greenhouse border and was delighted to see a baby toad sitting in a hallow in the soil.

7. ACX 2658 Gardening Time Central, Mondays at 5.10pm, repeated Sundays at 12.30pm; Tyne Tees, Thursdays at 1.50pm; Border and Ulster, Sundays at 12.30pm; HTV and Grampian, Fridays at 1.50pm.

8. AHX 952 Troops loyal to the breakaway faction, led militarily from the town of Nasir, on the Ethiopian border, by Cdr Riek Machar, are now on alert expecting an attack from the town of Malakal ‘at any time’, Dr Akol said.

9. AKY 904 Border police say they can only stand by helplessly as Poles, returning home with their stolen Mercedes and BMWs, suddenly accelerate past them.

10. BM6 370 In 1812, when war broke out between the infant U.S.A. and Britain over territorial disputes on the Canadian border, Eckford was asked by the U.S. Government to supervise the building of warships on the great lakes and to do so he gave up his own business.

11. BNB 274 On Monday 10 October ‘General’ Forster's little army reached Morpeth and were joined by some well-off Scots, riding their own horses, from across the Border, swelling their numbers to 300 but, lacking arms, Forster was unable to accept the volunteers who flooded in offering to serve as infantry.

12. BNB 282 Here a series of councils of war revealed that the Highlanders did not want to cross the Border into England, while Forster's Northumbrians were more interested in reclaiming England than Scotland for King James.

13. CFC 554 The town of Cerska, near the Serbian border, has been methodically shelled by the Serbs for the past year and has, at the same time, been denied food.

14. CR8 1102 They climb over in groups of 100, then quickly split up to evade the border guards.
15. **CS0 1385** The Ndembu fall within the so called ‘matrilineal belt’ stretching across Central Africa from the Congo into Zambia and Malawi and are cassava cultivators, living in what is now the western province of Zambia, close to the Congo **border**.

16. **E9X 715** One recent called in application was that for the Hemerdon tungsten tin open pit deposit on the **border** of the Dartmoor National Park.

17. **ECF 2030** Towards the French **border** lies Ventimiglia, with a fine medieval quarter, and over the **border** awaits Nice and Monaco.

19. **ED7 3079** In Tuva on the **border** with Mongolia the old tradition of byphonic throat singing has been revived.

20. **EEE 114** The first indication of the duke's new role was his appointment, at the end of October, to head commissions of array in the **border** counties of Shropshire, Gloucester and Worcester.

21. **EWG 1053** With UN approval MacArthur pursued them across the parallel and on towards the Yalu River which marked the **border** with Communist China.

22. **F9D 1543** STV and HTV, for example, have a joint sales company called TVMM, LWT and TVS cooperate through Laser, Yorkshire and Tyne-Tees in MAS, while Anglia, **Border** and Central are sold by TSMS.

23. **FBM 1360** What remains is released into an elaborate system of drains, penstocks, pumps, flumes, and concrete-sided irrigation ditches, from which it emerges at the Mexican **border**, severely depleted and laden with salts and pesticides.

24. **G27 158** This changed little right up to the Hungarian **border**, so it was decided, since there was no **border** crossing on the river, to start this trip just inside Hungary at Csenger, 200 km from Tokai.

26. **GXK 601** The big new fact on Rhodesia's **border** is independent Mozambique.

27. **H7Y 830** Nevertheless, a dedication slab from nearby Bowness indicates that merchants were in the area, and indeed, as a frontier town, Carlisle must have gained much of its wealth not only from the garrison on Hadrian's Wall but also from trade across the **border**.

28. **H89 2047** The traveller was then grilled by the corrupt Indian **border** officials: ‘Their custom was to take a quarter of everything brought in by the merchants and to exact a duty of seven dinars for every horse.’

29. **H91 582** An example of this procedure is the Declaration on **border** controls and immigration which Britain succeeded in appending to the Single European Act.

30. **HAW 176** We arrived at the **border** and ‘commenced battle’ with the Hungarian **border** guards who made their inevitable demand for ‘whisky, chocolates, etc etc’.

32. **HGG 1624** There's not a mile of that **border** safe if he turns his back now, and they know it.’

33. **HHX 14648** Although I appreciate that no one should at present, and on the Floor of the House, talk lightheartedly about the deployment of military forces in Northern Ireland, will my right hon. Friend bear in mind the considerable virtue that many would feel if the **border** with the Irish Republic were more effectively supervised hereafter?

34. **HJ1 13261** Through a Catalan valley in the eastern Pyrenees runs the French/Spanish **border** unlike its route elsewhere along high peaks.
Meanwhile, the use of selective internment on both sides of the border as a means of curbing the present spate of violence was rejected today by the Republic's Minister for Foreign Affairs, Dick Spring, and by the SDLP leader, John Hume.

Shortly afterwards ethnic violence was also reported in the nearby city of Samarkand, across the border in Uzbekistan, and there was a resurgence of attacks against the minority Meskhetian community in the Uzbek capital, Tashkent.

The incident brought to an end a month-long period of peace in Kashmir, and dashed hopes of a reduction in the border tension.

While assurances were offered that India had no war plans, the Pakistan representative expressed unease at India's refusal to alter the deployment of its forces in the Kashmir border area.

In discussions on this issue, which Poland also attended [see pp. 37302-03 for agreement that Poland should do so], Poland was offered a treaty, to be negotiated immediately following unification, restricted to the issue of the border, with a further treaty, to be negotiated later, to deal with other matters of German-Polish relations.

After a lull around the time of Ter-Petrosyan's negotiations in Moscow, on Aug. 19-22 there was a sudden escalation of armed clashes along the Armenia-Azerbaijan border, with regular Soviet troops fighting Armenian guerrillas who attacked villages inside Azerbaijan.

In late October there was an upsurge in fighting in the area between Kakitumba, just south of the Rwanda-Uganda border, and Gabiro, with several thousand people fleeing into Uganda.

The talks were also jeopardized by events surrounding plans by the South to open the border with the North for five days from Aug. 13; the North insisted that dissidents from the South should be allowed to attend a pro-unification rally in Panmunjom on Aug. 15 to celebrate the anniversary of Korean liberation from the Japanese rule [see p. 37657].

Hopes of a settlement had emerged after Li was quoted, in an interview in Beijing on Dec. 4, as saying that China would seek "mutual accommodation", and that "pending a resolution of the border issue, both sides should abide by the border lines under actual control".

The Turkish army claimed that it had killed at least 34 guerrillas in the operation in the Cudi Mountains of south-eastern Turkey, 50 km from the border with Iraq.

In January the government had launched a major offensive aimed at capturing the Karen headquarters at Manerplaw on the eastern border with Thailand [see pp. 38725; 38767; 38815].

The group escaped in a car and the killings occurred as the border police tried to stop it.

Separatist guerrillas of the Movement of Democratic Forces of Casamance (Mouvement des forces démocratiques de Casamance — MFDC) on Sept. 1 clashed with government troops at Kaguitt village in Senegal's southern province of Casamance, near the Guinea-Bissau border, leaving 50 guerrillas and two soldiers dead, according to army reports.

For a prestigious London client who requested anonymity, this close-up of a carpet border shows the details on one corner of the carpet laid within a large reception area.

The first indication of the duke's new role was his appointment, at the end of October, to head commissions of array in the border counties of Shropshire, Gloucester and Worcester.
51. **J2L 1430** The Chedworth mosaic also possesses an outer border of continuous swastika meander.

52. **K1R 2938** There was no one at his home at Thenford on the border of Northamptonshire and Oxfordshire today.

53. **K5J 4934** The referee, Malcolm McEwan (Hawick Harlequins), took no action against the Border club's players and apparently abandoned the match on the grounds of safety.

54. **KRT 4485** The A forty one, the road between Banbury and Bicester, there are temporary traffic lights between the Soldern turn-off, that's by the Bear public house and the Northamptonshire border; that's likely to cause some long delays.

55. **A45 149** Along the Thai border, the Khmer Rouge leaders can function with impunity, courtesy of the Thai Army which has supported them as its most effective weapon against Vietnam, Thailand's largest security concern.

56. **A4H 154** CHINA increased its patrols along the border with Hong Kong yesterday in an apparent effort to prevent an exodus of its people into the colony following a dispute over immigration procedures.

57. **A6T 1253** From Ritjemjokk our maps and information showed ferry routes along Sitasjaure to the Norwegian border.

58. **A88 70** It marked the western border of the Soviet empire.

59. **ACM 379** The sixth medium featured on the tape, recorded in January last year, said the dog she ‘saw’ had a short tail and was pushing her head into Tom's hand, which Tom confirmed as typical Border Terrier behaviour.

60. **AL3 1753** Although the visitors' centre at Furnace Creek, the scenically-stunning Zabriskie Point and the Death Valley National Monument are across the border in California, they are an easy drive from Las Vegas, the nearest major city.

61. **ANU 725** Ben Ami lies just five miles south of the Lebanese border, well within range of the Katyusha rockets which were then being fired by Palestinian guerrillas around Tyre and Rashidiyeh; there were concrete air-raid shelters with iron doors between the bungalows.

62. **AT3 163** We hoped it would be waiting at the post office at Tamanrasset, the last town before the Niger border.

63. **B7C 260** The products of mycotoxins have been found in tissues of alleged victims by both American and Canadian with an analysis of several ‘yellow spots’ gathered from leaves eight kilometres from the Kampuchean/Thai border.

64. **BN2 128** Prussian canal-building projects meant that by 1914 Danzig was linked to a network of waterways that allowed inland trade with the Rhine, Bordeaux, Le Havre, Brussels, Antwerpen, and northern Germany up to the Danish border.

65. **C92 1033** Sometimes the wet ink which is sprayed on to a horizontal board can spread out sideways, which results in a reasonably-uniform layer in the middle of the board, but an excessively thick border of ink around the edges of the board.

66. **CH6 5866** The RUC's blackest day was on February 28, 1985 when the IRA mortar-bombed the RUC station in the border town of
67. **CKY 674** When four Picassos stolen last year from the National Gallery were recovered (see The Art Newspaper No. 9, June 1991, p. 2; No. 11, October 1991, p. 2), one had already crossed the German **border** to Bayreuth.

68. **CUO 459** By the next day we had big, black frontpage headlines that suggested **Border**’s job was on the line over his angry reaction to the loss of his close mate and deputy.

69. **EDF 785** In **border** areas, dwellings which incorporated architectural features concerned with defence (the ‘maison-fortes’ of France) were both dwellings for a family and, in certain circumstances, they might provide some measure of protection for local people, in so doing underlining the nobleman’s responsibility for the defence of the people.

70. **EF2 1172** Taking advantage of the ebb and flow of state politics and power, **Border** reivers swept in force over the **Border** in the company of English refugees who were now their grateful allies.

71. **EFF 1770** The presidential decree is a defeat for the Brazilian military, which wanted to maintain control over all lands close to the Venezuelan **border**, which is regarded as a sensitive security area.

72. **EX0 167** Curvilinear designs are found in rugs produced throughout the entire oriental weaving area and usually employ naturalistic floral elements, which range from the essentially floral Shah Abbas, garden or vase compositions, to the incorporation of flower, leaf or stem motifs into the infill decorations or **border** arrangements of allover and medallion designs.

73. **FA2 632** The Spaniards have managed to build a supreme ugly restaurant-cum-souvenir-shop on their side of the frontier, in a style of architecture suggesting its easy conversion, should **border** warfare ever one day replace tourism, into a defence post.

74. **FE6 1365** The enveloping box is also retained, followed by a primary set of silhouettes constructed in each orthogonal direction by automatically driving a chain around the **border**.

75. **FP1 2116** His only real hope was to get Amaryllis to cross the **Border** with him.

76. **G1H 936** failed to understand that the UDR would also be charged with policing the **border** and the countryside and would, in fact, be somewhat more efficient in its vigilance against a dreaded IRA invasion.

77. **G2Y 921** D Badge of The King’s Own Royal **Border** Regiment, worn since 1970.

78. **GU9 837** On another occasion, Phil Morris knew that, had Laura been consulted, she would never have agreed to a particular print being produced with a **border**.

79. **HGW 171** You can buy one of the many reproduction plaster or fibre-glass cornices by the foot and have it added to your room just under the ceiling or, if you cannot afford this luxury, go for a stylish compromise with a paper **border**.

80. **HJ4 636** But, while **Border** expressed his delight with the form of strike bowler McDermott, Gooch admitted: ‘We were just not capable of splitting **Border** and Mark Waugh when we needed to.

81. **HKP 290** Elsewhere, the previously quiescent Oromo Liberation Front (OLF) claimed a series of successes in early January, reporting the capture of Asosa, Mendi, Begio and Bambesi, all Oromo province towns close to the Sudanese **border**.

82. **HKP 1953** Negotiations were also under way with Switzerland for a relaxation of that country’s ban on the 40-tonne lorries which were usual in all EC member states except the UK and Ireland, and Austria
was also being asked to upgrade rail and road transit routes, particularly over the Brenner Pass between Innsbruck and the Italian border.

85. **HKS 3074** Completion of Sino-Nepalese border inspection

86. **HKT 1908** Kenya lodged a strong protest after four Kenyan policemen were killed and four injured by Somali troops at the Hare-Hare border settlement on Sept. 20, 1989.

87. **HKV 579** India and Pakistan each withdrew troops from their common border in early June in an attempt to defuse tension caused by the unrest in Kashmir.

88. **HL2 333** Based across the border in Sudan, he had formed the MPS with Libyan backing, and had launched a series of offensives from Sudan's western Darfur region; the third (and finally successful) such offensive began on Nov. 10.

89. **HL2 1377** A new excise system was designed to replace border controls.

90. **HL7 839** On the border issue, both sides agreed to continue intensive discussions on the remaining disputed sectors.

91. **HLD 4306** Ochirbat visited China in May 1990 [see p. 37454], and co-operation agreements in the educational and legal fields were signed on Nov. 26 and on July 4, 1991; an agreement was signed on June 24 to increase to eight the border crossings between China and Mongolia from the hitherto sole crossing at Erenhot in the Chinese province of Inner Mongolia.

92. **HLE 1409** The fifth round of Sino-Soviet talks on troop reductions and confidence-building measures along the common border [see also p. 38575] ended on Dec. 2.

93. **HLS 895** Unconfirmed reports in late November said that Russia had agreed to sell 20 MiG-29 fighter aircraft to help India install a fourth squadron on its northern border with Pakistan.

94. **HLT 912** In the course of Yeltsin's visit the two sides signed 24 joint statements, documents and memorandums of understanding in areas including military and technical co-operation, space exploration, nuclear energy development, border security and armed forces reduction, trade and economic co-operation and educational and scientific exchanges.

95. **HWT 285** The catheter was then positioned to record motility 3, 8, 13, and 18 cm above the upper border of the lower oesophageal sphincter.

96. **K1E 3068** Braille Hill on the Oxfordshire Warwickshire border.

97. **K1G 1564** Mr Main, who's a plumber, was unavailable for comment when we called at his house near the Gloucestershire border.

98. **K3H 665** Border shared in a fourth wicket stand of 147 in 35 overs with Damien Martyn, who continued his impressive run.

99. **K47 554** By Echo reporter A BRITON has been jailed in Iraq after being arrested at gunpoint on the Kuwait-Iraq border.

100. **K59 3172** The other list is of hardy border plants, ferns, grasses and alpines.
Annexe 1-4 Occurrences de "BOUNDARY" dans CAEMS

Sens propre

Sens figuré

Spécialisé

1971

1. An interest in either the assessment of heat transfer from boundary layers at high speeds, or in thermal buckling would be required. [754-055 (1971) : 603]

1995

1. Wherever we're active, we're seeking to redefine the boundaries of technology - which is why we're now intent on recruiting high-quality, committed and ambitious professionals to every area of our operation. [1971-014 (1995) : 60-61]

2. Provides a detailed examination of the international law of the environment, emphasising the evolution of new legal principles on issues such as the protection of wildlife, eco-systems and biodiversity, transboundary impacts of pollution and Antarctica. [1976-098 (1995) : 86]

6. An ecologist with particular interest in plants is required to complete on-going research on the ecology and dynamics of different field boundary types, and their role in agricultural landscapes. [2002-069 (1995) : 75]

2005

1-2. The Academy of Medical Sciences was founded in 1998 to promote medical science across traditional disciplinary boundaries and brings together doctors and scientists from across the academic spectrum. [2481-008 (2005) : 56] [2515-016 (2005) : 60]

3. Harnessing the potential benefits in each and every natural ingredient we use - keeping the taste, texture and nutritional value at their optimum - is a wide-ranging and complicated science, to say the least. But it’s a challenge we’re tackling head on at Unilever - and we're enjoying substantial success. Now we're expanding our operations even further, pushing the boundaries of our research capabilities to maximise the natural goodness in our products, so that our consumers can look and feel their best. And we need your help. This is an exciting opportunity to join a group of scientists, expert in a wide variety of fields, providing scientific know-how throughout the Unilever business. [2489-013 (2005) : 64-65]

4. You’ll play an active role in multidisciplinary teams, applying advanced techniques and pushing scientific boundaries, all in the cause of protecting UK Armed Forces from the effects of toxic agents. [2498-005 (2005) : 51]
5. at Tripos we have pushed the boundaries of drug candidate discovery, with genuinely cutting-edge computer modelling and chemistry which is transforming the process with unparalleled precision. Now we are working to continue our growth. Thanks to funding under the Marie Curie Transfer of Knowledge programme, we are now looking for four exceptional scientists - from outside the UK, but within the EU. [2502-015 (2005) : 60]

7. Moving forward and breakthrough innovations has fuelled growth within the company. As a result we are able to offer the following excellent opportunity to work with a people-oriented organisation that is constantly striving to push out the boundaries of leading-edge technologies. [2515-051 (2005) : 73]

8. We’re pushing back the boundaries of knowledge in the defence arena and beyond. And coming up with solutions that affect the lives of millions. [2524-015 (2005) : 57]

9. You’ll also need to be dedicated to pushing the boundaries of scientific possibility - and committed to developing a reputation for yourself that's as distinguished as ours. [2528-038 (2005) : 74]

2006

1. Look behind our culture of science and you'll discover a team that challenges conventional thinking, pursues radical innovation and actively expands the boundaries of current scientific knowledge. That's what leadership is all about. [2545-027 (2006) : 69]

2. At Roche, we're driven by a passion to push forward the boundaries of what's possible. [2545-036 (2006) : 73]

4. You will also have a strong inter-disciplinary approach, with the ability to work with others across disciplinary boundaries. [2554-070 (2006) : 85]

5. The ability to work across organisational boundaries is also essential. [2563-011 (2006) : 54]

6. The boundary between biotech and pharma is becoming increasingly blurred. [2576-003 (2006) : 58-61]

7. Successful candidates will work across functions and national boundaries, overcoming a range of technical challenges, to bring new concepts to fast practical realisation. [2576-030 (2006) : 72]

8. The chance to work with a unique organisation which offers talented professionals the chance to transcend traditional scientific boundaries with leading R&D partners and make a direct contribution to Scotland's economy. [2576-044 (2006) : 77]

9. Boundaries are blurring in the scientific hierarchy, and nowhere more so than for the role of the technician. [2576-074 (2006) : 85]

2009

1-2. Routinely working with Government, NGOs, user groups and numerous academic and industrial partners from all over the world, we are pushing the frontiers of scientific, intellectual and practical
knowledge in this rapidly developing field and we expect this appointment to help us push these boundaries even further. [2711-034 (2009) : 62] [2711-038 (2009) : 63]

4. The Faculty of Science has a powerful reputation for innovation, excellence and working across the boundaries of different academic disciplines. [2733-052 (2009) : 78]

5. There's never been a more important time to join Syngenta. Push the boundaries in Research & Development [2737-020 (2009) : 63]
Annexe 1-4-1 Occurrences de "BOUNDARY" dans RENEWABLE ENERGY

1. System boundaries definition [8]

2. Data quality regarding raw materials and the main LCA initial assumptions (as system boundaries or impacts allocation) has been analysed. [8]

3. Transparency of the study (considering whether the study boundaries, inputs and outputs are clearly described); [8]

4. There are two major approaches to boundary setting: a process-based model developed most intensively by the Society of Environmental Toxicology and Chemistry (SETAC) and the US Environmental Protection Agency (EPA) ([7, 12]) and an economic input–output analysis-based model referred to as EIO-LCA ([10, 16]). [11]

5. In this step, the process system boundary is defined to include processes from raw materials extraction, energy generation, and disposal. [11]

6. The advantage of defining such an expanded global process system boundary is that input emissions together with their routes can be accounted for with output emissions forming an aggregated waste vector. [11]

7. Fig. 2. Definition of various life cycle boundaries (revised after Khan et al. [23]). [11]

8. As boundary conditions, the walls of the reservoirs are put at 12 and 0 kPa pressure, respectively. [12]

9. Using the boundary conditions Eqs. (2) and (3) can be solved analytically to get [13]

10. New velocity and thermal boundary layers were developed on downstream of the interruption. [19]

11. The development of boundary layers characterizes a greater heat transfer coefficient than in fully developed turbulent flow. [19]

12. A new velocity and thermal boundary layers build up at each encountered offset fin located downstream of interruption flow. [19]

13. 2.2. Initial and boundary conditions [20]

14. Boundary conditions [20]

15. Boundary conditions [20]

16-17. Extremely versatile boundary conditions, like the Dirichlet or the Neumann boundary conditions are frequently used for the creative modelling. [23]

18. One of the pioneering works using the singularities method is attributed to A.M.O. Smith who, together with Hess, produced the Hess–Smith code in 1962 using the Neumann boundary condition and based on flat constant source panels. [23]
19. Woodward later developed another code in 1967, using constant sources and linear doublet singularities distributions on flat panels, while applying the Neumann boundary condition. [23]

20. The choice of the type of singularities to use depends on the boundary conditions imposed. [23]

21. By choosing either the Dirichlet or the Neumann boundary condition, the incompressible and irrotational flow over an airfoil can be treated using either the velocity potential or the stream function. [23]

22. We consider an airfoil of boundary transverse to the wind direction [23]

23. In order to apply this boundary condition, sources are distributed on the airfoil contour [23]

24. By combining (4), (10) and (13), the boundary conditions can be written as [23]

25. The collocation point where the boundary conditions are applied is the centre of the \( i \)th receptor segment. [23]

26. We notice that the appropriate choice of the singularities in relation to the boundary conditions leads to the diagonal terms being dominant and the system of Eqs. (17) being well conditioned. [23]

28. particle boundary [25]

29. The related initial and boundary conditions are listed as: [25]

30. It is noted that, as the flow passes through the rotor disk, the stream tube expands similar to the shape depicted in Fig. 3 and the points in the close vicinity of the rotor radius (4.8 rotor diameter) remain near the boundary of the stream tube. [44]

31. The corresponding location of the main rotor located downwind of the auxiliary rotor as well as the possible boundary of the stream tube is indicated in Fig. 7. [44]

32. Boundary conditions [52]

33. Boundary conditions [52]

34. The first step in the determination of the passive solar (climate) design strategy involves the division of the country into architecturally meaningful climatic zones, many subtypes would have to be distinguished and even these would have no sharp boundaries, they would merge into each other and, would show many local variations. [66]

35. These are plotted on the 50% RH curve and the corresponding standard effective temperature (SET) lines form the side boundaries. [66]

36. The next step is the determination of the comfort zone boundaries. [66]

37. The aggregate lengths of climate lines above (LoZlength overheated) and below (LuZlength underheated) of these boundaries are then compared, to give an expression of the magnitude of overheating, as follows: the overheated fraction is given by [66]
38. The slope of the boundary is then determined by the standard effective temperature (SET) line at this temperature. [66]

39-40. The upper boundary is the 14-g/kg absolute humidity (AH) line, but only to the relative humidity (RH) corresponding to the upper limit of the comfort boundary. [66]

41. Therefore, 0.8 times the mean range is added to the upper temperature limit, to determine the control potential boundary. [66]

42. From our study, the humidity boundary was observed to be valid upward from the 0.012 humidity ratio level, up to the 90% relative humidity curve. [66]

43. Consequently, the baseline intercept will be halved for the boundary below 0.012 humidity ratios. [66]

44. Practical limitations, e.g. air flow rates and evaporation effectiveness restrict this cooling effect to about 12°C, thus the high temperature boundary of the evaporative potential zone will be shifted as shown in Fig. 4d for Nicosia obtained with ARCHIPAK. [66]

45. The upper humidity is the 14 g/kg absolute humidity line, but not beyond the relative humidity curve corresponding to the upper boundary of the comfort zone. [66]

Here is a random selection of 50 solutions from the 2016 found.

1. **A79 907** Selective demolition of some post-Victorian accretions (like the independent WC block on the western **boundary**) helped to make the building more suitable for its new use, but otherwise external alterations were very modest.

2. **ASL 524** It is as if the vegetal cells have set up a new **boundary** region for specifying positional information.

3. **B1E 79** In the former, shifting sand dunes have become more extensive due to overgrazing and injudicious cultivation causing the southern margin of the Mu-Us sandy region to extend beyond the northern **boundary** of the Loess plateau and the northern margin to extend into the Nobq Desert.

4. **B2K 488** It may thus be concluded that, if the leading terms in the expansions for the functions \( f \) and \( g \) are given by (10.34), then the **boundary** conditions that are required for the solution to describe colliding plane waves are satisfied if

5. **B2K 626** In practice, these **boundary** conditions are difficult to apply, basically because the condition that \( M \) be continuous is only indirectly applied to the functions \( V \) and \( W \), or \( Z \), or \( E \), that feature in the main equations.

6. **B2K 627** It is therefore often convenient to apply the **boundary** condition in the form (7.15) or (7.16).

7. **B2K 798** (12.53) With this restriction, the **boundary** conditions are satisfied, and

8. **C8L 972** Bob Hopkins quotes the view (see Church Planting II, Grove Books, page 21) that the parish **boundary** at its worst is ‘a line drawn round thousands of people to protect them from hearing the Gospel.’

9. **CAG 110** The ‘one-last-pushers’ of the Labour movement need to be reminded of the electoral mountain that remains to be climbed (a mountain which, thanks to the **Boundary** Commission, will be some 20 or so Tory seats higher by the time of the next election).

10. **CAG 114** The effects of the **Boundary** Commission changes would be enough to keep the Tories in power.

11. **CBK 337** The section completed for the Inspection on 10 August ran from Croydon/Wallington **boundary** to Ruskin Road.

12. **CCR 465** The direct influence of the LLP extended only as far as the metropolitan **boundary** at Bethnal Green; the West Ham Labour Party was autonomous.

13. **CCX 1330** If the flank wall is construction of materials which will resist the spread of fire for at least half an hour, then the wall can be sited on the **boundary**.

14. **CFW 265** A major late north-north-west thrust episode has been identified, possibly associated with movements on the **Boundary** Slide in adjacent areas.
15. **CJU 1151** The Earth's topography is the **boundary** condition on the solid Earth and is the surface on which we live.

16. **CRM 938** There is evidence of indirect readout of the CTAG sequence across the central **boundary** between met boxes, which is due to the overwound T-A dinucleotide step, and the binding of the displaced phosphate group by helix B. Mutation of the central T-A step to A-T or G-C results in 76-fold loss of affinity in gel retardation assays (T. McNally, personal communication), despite the lack of direct contacts between the repressor and these base pairs.

17. **E9S 45** ‘They would beat the **boundary** stones or other landmarks with willow wands and sometimes the adults would bump the children's heads gently on the ground to imprint the knowledge in their memories.’

18. **E9X 344** Minor Pb-Zn-Ag mineralisation was found by South West Consolidated Minerals Ltd at the Devonian — Carboniferous **boundary** in the Callington area north-west of Plymouth (MEG 212).

19. **EB3 211** Playing for Stockport against Oldham in the Central Lancashire League, Rohan Merry hit sixes off the first five balls of Howard Schofield's only over, but was caught on the **boundary** off the final ball, leaving the bowler with figures of 1–0–30–1.

20. **FA3 466** The first demarcation is between what is and is not ‘higher education’; this constitutes the general **boundary** within which knowledge and curricula are structured.

21. **FB2 1493** Where the park straddles a county **boundary**, two joint-planning boards were established, and these have operated successfully in both the Peak and Lake District regions.

22. **FCL 597** This is that for your Lordships' House to recognise such a principle would overstep the **boundary** which we traditionally set for ourselves, separating the legitimate development of the law by the judges from legislation.

23. **FMN 97** Likewise, the physical suitability or otherwise of a **boundary** as which does not exist, cannot arise.

24. **FMP 141** It's it's not the **boundary** that is important to look at, it's whether the land is open land, isn't it?

25. **FTU 1168** The road, now heading east once more, climbs onward to within a short walk's distance from that same awesome Rhone glacier before tackling the highest pass of the trip, the Furka (2,431m, 7,974ft), which forms the **boundary** between cantons Valais and Uri.

26. **FTU 1295** The cultural frontier that here lies between canton Bern and the original Four Forest Cantons has been described thus: "though not a **boundary** between language groups, it does form a more significant division in everyday affairs, separating one set of customs and traditions from others."

27. **G0K 657** The external walls of all buildings are therefore required to have the requisite period of fire resistance, unless the building is placed at, or more than a specified distance from, the **boundary**.

28. **G1E 1240** Most plant bodies are small and compact, allowing full advantage of warmth at the **boundary** layer between rock and atmosphere, and protection against wind erosion under a thin snow-covering.

29. **G1E 1264** Those of the low Arctic (within a **boundary** similar to that of Aleksandrova, discussed on p. 85) appear mainly to be boreal alpine species that have spread northward.
30. **G1H 916** Barricades were erected at the precise **boundary** of the two religious communities in an area of no-man's-land between a Catholic cathedral and a Protestant church, both rumoured to be threatened by attack.

31. **GYW 991** The conversion of land to urban uses involves considerable modification of the natural environmental system, particularly with respect to its geological and geomorphological bases, its hydrological characteristics and the nature of the **boundary** layer of the atmosphere...

32. **GW2 3427** He had now drawn several arcane symbols round the **boundary** of the circle in a shaky hand.

33. **H78 128** A remarkable feature of the first kind of Friedmann model is that in it the universe is not infinite in space, but neither does space have any **boundary**.

34. **H78 1327** I'd like to emphasize that this idea that time and space should be finite without **boundary** is just a proposal: it cannot be deduced from some other principle.

35. **H7k 944** Yet many palaeontologists and stratigraphers still talk of defining **boundaries** at "faunal breaks" as though there was a new creation at every stratigraphical **boundary** and the fossils above the **boundary** had no ancestors.

37. **H8U 381** It is worth paying considerable attention to the physical remains of a parish **boundary**, especially if an Anglo-Saxon charter with **boundary** clauses exists or the piece of land can be defined in its present outline at an early date.

39. **HGP 2029** This chapter deals with the **boundary** between the public sector and the private sector.

40. **HHW 6949** For instance, taking a semi-detached house worth £60,000 in Milton Keynes and a semi-detached house also worth £60,000 in Northampton, the household in Northampton would pay £88 more in tax simply because it happened to be across the regional **boundary**.

41. **HPK 1536** In view of problems experienced previously when consent was granted for a development on a site later discovered not to be in the ownership of the applicant, the Parish Council would like to draw your attention to the fact that the **boundary** of this site is currently in dispute with the neighbouring landowners (i.e. the R C Church Diocesan Surveyors).

42. **HR8 1879** During the last match, the Husayn twins had nearly beaten the Bosnian refugee to death with the stumps after he had refused to accept a **boundary** decision.

43. **HVK 155** the inspector hasn't reported on those, we don't know what he's going to say about sites er which were at issue, or on the need for flexibility between the inner er **boundary** of the greenbelt and the city,

44. **HWF 14774** This occurs irrespective of the setting of the inheritance **boundary**.

45. **J0T 225** The narrow zone marking the relative movement between two plates, which in most cases is fairly clearly demarcated by seismic activity, is termed a plate **boundary**, with the peripheral region adjacent to this **boundary** being referred to as a plate margin.

47. **J12 86** We may anticipate that there will be a stable length right at the start of the pipe (the Reynolds number based on **boundary** layer thickness being small here), followed by the unstable region, this being followed in turn by another stable region as the profile approaches Poiseuille flow.
48. The inner part of the **boundary** layer is thus sometimes said to be in ‘local equilibrium’, meaning that there is a local balance between the process supplying energy to the turbulence and that removing it.

49. We have looked at the effects of stratification on **boundary** layers primarily in terms of data for stabilizing stratification.

50. The major difficulty is that the SGSA 1982 has not sufficiently delineated the **boundary** between the situation where the supply of goods was incidental to the supply of services, so that liability is not strict, with the converse case.

**Here is a random selection of 50 solutions from the 2378 found.**

52. It is obviously convenient for line **boundaries** to coincide with byte **boundaries**, and the horizontal resolution of VDU screen is invariably a multiple of eight.

54. A boundary extension would require new electoral **boundaries**, and these could not easily be adjusted so as to retain Unionist minority control.

55. Even more than Sukenick's, Raymond Federman's novels repeatedly blur the **boundaries** between criticism and fiction.

56. ‘The chronotope’, according to Michael Holquist and Katerina Clark, ‘both defines genre and generic distinction and established the **boundaries** between the various intrageneric subcategories of the major literary types.’

57. They entered all three parts of the competition, but were rejected by Angell and Pownall as they went well beyond the site **boundaries** and the rooms were awkwardly shaped.

58. It is also of interest to note that the two solitonic terms that provide the continuity across the **boundaries** of the interaction region are in fact identical to the two separate terms in the Szekeres solution (9.4).

59. Thus, the occurrence of a quasiregular singularity in region IV can have nothing to do with the relaxation of the continuity conditions across the **boundaries**.

60. Similarly, because system **boundaries** are not synonymous with functional or organisational **boundaries**, difficulties can be encountered when defining the actors, owner(s) and customers of a Human Activity System.

62. SECTION 4 Feeling at Home: Dominant Ideologies, Social **Boundaries**, and Way of Life by Reginald Byron

63. The sharper the **boundaries**, the more likely the dynamic between them will be articulated through more of less formal, institutionalised modes of mediation: patrons, brokers, interpreters, committees, councils and the like.

64. As we tend to look inwards rather than outwards maybe the **boundaries** really lay in a shared level of ignorance about the outside world.

65. Moreover, UDCs have powers to operate outside their immediate **boundaries**, if they think it necessary to secure regeneration.

66. The government was essentially faced with the option of winding down MDC's operations or extending its **boundaries**.

67. It is noticeable that parents often react against their own experience so that, for example, if they were brought up in a too restrictive atmosphere with little spoiling, they may spoil and leave their children without enough **boundaries** and routine.

68. As **boundaries** between them, wide ‘hedges’ of natural woodland were often left, the ‘shaws’.

69. Very diffuse **boundaries** between its members indicate an enmeshed family who may be over involved; very rigid **boundaries**, with minimal involvement are a sign of the disengaged family.

71. It does not replace each nation's own system for the control of the export of ‘national treasures’ from its respective **boundaries**, but runs parallel with it, only affecting goods being exported from the EEC, not between member States.

72. During the time of Sigmar these chieftains became counts and the **boundaries** of their realms were formally established.

73. Because of the second world war, this never came to pass, but its generous **boundaries** have always been dear to the heart of Croatia's president, Franjo Tudjman.
This high level of homogamy converts the upper class from a mere social category (albeit with an economic reality) into an intermarrying group aware of its own social boundaries.

Tory or not, there is no evidence that St. Johnston, who himself became H. M. Chief Inspector of Constabulary in 1967, overstepped the boundaries of propriety.

A century ago there were empires whose boundaries were difficult for outside traders to penetrate; now exporters of communications products and services experience difficulties in entering the domestic markets of such large population nations as China, India, USSR, USA, Indonesia, Japan, and Brazil — nations which together have about half the world's people.

"English" came to extend its range of operations beyond any disciplinary boundaries to encompass all mental, imaginative, and spiritual faculties.

Those are the formal markers of the boundaries of this paratone.

Often these new boundaries followed a stream or a trackway that already existed, but very often they created their own boundary lanes or meres (from the Old English word 'gemaere', 'boundary').

The heavy black lines represent the boundaries of the separate allotments made to private owners by the enclosure commissioners.

She started with what other people could bring her; she crossed boundaries to do that.

It is vital that the caterer, hotelier or restaurateur and his or her staff work at all times within the boundaries of the law.

The degree of interference can then be checked by comparing these curves of intersection with the enclosed or surrounding curves of surface boundaries for the respective bodies.

The network of neighbourhood and town councils would operate within this structure, based on the ward currently under review by the Boundaries Commission.

Central government is there to set the boundaries to local government activity, to give advice, to set minimum standards and give financial assistance, especially to poorer areas, but local authorities have a distinct responsibility to develop services in their own way, setting their own priorities.

But if you're going to talk about countries like Turkey, for example, one of the provisions about membership is that there is no dispute as to boundaries, that there are no conflicts on your border, that you have a good human rights record.

For the latter, the additional time spent on reading words occurring at clause boundaries (in comparison with words not occurring at boundaries) was 73 milliseconds.

In most organisations, top down authority goes hand-in-hand with departmentalisation and the division of work, so that a senior manager in department A cannot tell a junior manager in department B what to do, because his authority does not cross department or sectional boundaries.

The requirements for new skills, changing roles and management styles, the erosion of traditional functional boundaries and the needs for training and staff development will give rise to conflict and accordingly focus attention on the role of the personnel function as a mediator.

Elsewhere in Wiltshire, particularly between the Roman towns of Verlucio (Sandy Lane) and Bath, parish boundaries follow the Roman road, so they could be Roman (possibly with a new area being colonised and estates being created) or later.

Many of the boundaries surrounding the village earthworks have been sectioned, and surprisingly some have turned out to be of prehistoric and Roman date.

This includes things like departmental boundaries, activity types, physical or geographical layout and product types.

Phases are separated from one another by physical boundaries known as phase boundaries (see figure 6.4).

However much both sectors might underline their commitment to high-quality education for students and other values of higher education as a whole, the struggle to define and remove boundaries at the same time led to uncertainty and ambiguity, tension and even 'ill-will' between the sectors.

Colleagues, the important thing about the agreement so far, is that we have already destroyed the myth, perpetuated by the employers, that joint work across national boundaries in Euro-
multinationals are inappropriate because of differences in trade union cultures, organization and systems of collective bargaining.

1971

Perform Ø
Performance Ø

1995

1. Starting salary is dependent on qualifications and experience, and increments thereafter are performance-related. [1959-019 (1995) : 49]

2. A limited number of merit increments will be awarded each year to reward outstanding performance. [1959-029 (1995) : 51]

3. We offer an excellent benefits package including performance-related bonus, health and pension plan and extensive sports and social facilities. Relocation assistance will be offered, if appropriate. [1959-040 (1995) : 55]

4. The salary on appointment is £11,361 per annum to £15,712 per annum, with further progression available via Performance Related Pay up to the maximum of Band 7, £20,063 per annum. [1959-087 (1995) : 66]

5. As one of the world’s leading pharmaceutical companies we operate in a progressive, innovative and highly-competitive environment in which individual performance is recognised and rewarded. [1963-066 (1995) : 65]

6. The salary is A$120,000 pa and a performance based payment of up to A$20,000 may be payable depending upon the achievement of agreed performance criteria. [1967-005 (1995) : 62]

8. A comprehensive benefits package includes non-contributory pension scheme, performance related pay and assistance with relocation expenses if applicable. [1967-020 (1995) : 69]

9. The salary on appointment is £13,286 per annum to £18,378 per annum with further progression available via Performance Related Pay up to maximum of Band 6 £23,470 per annum. [1967-024 (1995) : 70]

11. The post will be initially for one year, with a possible extension of one further year subject to satisfactory performance. [1967-076 (1995) : 83]

14. Enthusiastic, willing to learn and keen to develop your role, we offer a competitive salary and benefits package including performance related-pay, private medical insurance and life cover. [1971-042 (1995) : 69]

15. Increments thereafter will be performance related. [1980-087 (1995) : 76]
16. All positions require individuals with a nursing background or a life sciences degree and who are dedicated to the pursuit of excellence and team performance. [1984-020 (1995) : 59]

17. Further progression through the scale, and up to the maximum, will be performance related. [1984-045 (1995) : 66]

19. Further movement up the salary scale to a possible £29,117 will be dependent on performance. [1984-075 (1995) : 73]

21. The appointment will be for three years in the first instance (subject to satisfactory performance), and will be on the Lecturer B salary scale (£20,677 - £26,430 per annum). [1989-115 (1995) : 86]

22. A comprehensive range of benefits is provided including a performance related bonus and a company car. [1993-014 (1995) : 55]

23. Benefits include a competitive salary, performance related bonus, a company car, private healthcare insurance, pension scheme and 25 days annual leave. [1993-038 (1995) : 62]

25. Additionally, there are performance-related increments. [1998-007 (1995) : 74]

26. In return we offer starting salaries in the range of £13,542 to £18,589, according to experience, rising to £22,230 dependent on performance. [1998-045 (1995) : 87]

31. The appointments will be made initially for a period of 12 months, but this may be extended or made permanent dependent on workload and performance in the job. [2002-012 (1995) : 57]

32. The starting salary is in the range £11,766 - £19,669 depending on experience, with further progression occurring within a performance related pay scheme. [2002-018 (1995) : 60]

33. ADAS has a performance related pay policy for which personal performance is reviewed annually against agreed work objectives of the post. [2002-043 (1995) : 68]

34. The salary is £13,806, and provided your performance meets our expectations, you will be promoted to Higher Scientific Officer at a salary of £17,485 after completing the 2 years training. [2002-060 (1995) : 73]

35. At the end of the initial five-year contract, it is envisaged that, subject to satisfactory performance, you will become Observatory Scientist for the Liverpool Telescope [2002-082 (1995) : 78]
36. In return for your commitment to this challenging work, we offer an attractive salary and superb range of benefits including bonus, company car, pension and medical plans, performance-related pay, share-matching scheme, generous holidays, flexible working hours and good sports and social facilities. [2006-002 (1995) : 59]

37. Good organizational and communication skills, and a proven ability to perform under pressure are vital. [2002-006 (1995) : 55]

2005

1. The Academic Fellow will take up the appointment on 1st October 2005 and be appointed to a permanent academic post, subject to satisfactory performance, at the end of the five-year fellowship period. [2481-066 (2005) : 74]

2. Pay is performance related, offering progression and bonuses to high achievers. Salary will be pro rata for part-time. [2485-012 (2005) : 60]

3. Career advancement opportunities exist based on individual performance within this international group of businesses. [2485-032 (2005) : 68]

4. Annual salary increases are through automatic progression, subject to satisfactory performance. [2485-060 (2005) : 78]

5. c.£54,000 plus significant performance-related bonus [2493-033 (2005) : 66]

6. Academic Fellows will: be appointed to a permanent academic post, subject to satisfactory performance, at the end on the five-year fellowship period [2498-049 (2005) : 68]

7. In return, we are offering a remuneration package including a starting salary of £21,376, with guaranteed progression based on satisfactory performance, generous leave allowance and a choice of final salary and stakeholder pension. [2506-012 (2005) : 58]

8. We are offering a starting salary of £21,911 with guaranteed pay progression for satisfactory performance, plus a choice of final salary and stakeholder pension. [2515-013 (2005) : 58]

9. Salary is performance related, offering progression to a maximum of £26,278 and bonuses to high achievers. [2515-047 (2005) : 72]

10. In return, you will enjoy a culture that is focused on rewarding and inspiring exceptional performance, plus a competitive package which includes an annual bonus scheme, healthcare, pension, generous holiday allowance and highly flexible benefits. AstraZeneca [2524-005 (2005) : 53]

11. In return we are offering a starting salary of £21,911 with guaranteed pay progression for satisfactory performance, plus a choice of final salary and stakeholder pension. SCOTTISH NATURAL HERITAGE [2524-034 (2005) : 63]

12. Teamwork and performance under pressure are vital; an understanding of peer review and current issues in the field would be an advantage. Bbsrc [2528-026 (2005) : 70]

13. The post will be based in the School of Life Sciences and is renewable for up to three years subject to satisfactory performance. Kingston University London [2528-070 (2005) : 88]

14. We are looking for a scientist or engineer with 5 or more years' experience to perform a senior role within the group. QinetiQ [2485-051 (2005) : 75]
15. Your first 2-3 months will be spent training on the continent to help provide you with the range and depth of specialist knowledge required to perform this role effectively. UK Radiopharma. [2515-026 (2005) : 65]

2006

1. Salary is performance related, offering progression to a maximum of £26,278 and bonuses to high achievers. FISHERIES RESEARCH SERVICES [2537-053 (2006) : 75]

3. (salary can progress to £33,445 pa, subject to performance). The University of Nottingham. School of Biosciences [2537-059 (2006) : 78]

8. In return, we offer an excellent remuneration package, including pension scheme, a range of health care initiatives including private medical insurance and dental care scheme, share incentive plan, annual performance incentive scheme and flexible working hours. Sanofi Aventis [2558-021 (2006) : 66]

10. This is a senior management position on a 3 year appointment, subject to a performance agreement. [2563-006 (2006) : 52]

11. The salary will be in the range (£40,441) to (£58,887) with the possibility of performance related bonuses. FISHERIES RESEARCH SERVICES [2567-008 (2006) : 53]

13. Salary scale is £15,430 - £26,788 pa plus the possibility of a bonus depending on Company and individual performance. ADAS [2567-035 (2006) : 65]

15. Working for one of the most successful companies in the world, we offer a variety of benefits including; breadth of opportunity; a tangible career path, a challenging, results orientated working environment and a competitive, performance based rewards package. GlaxoSmithKline [2567-059 (2006) : 75]

16. The viability of the course will depend to a large extent on the fellow's initiative and performance. University of St Andrews [2567-064 (2006) : 77]

17. (potential progression on performance once in post to £18,051 per year). University of Birmingham [2567-068 (2006) : 78]
18. Salary is performance related, offering progression to a maximum of £27,640 and bonuses to high achievers. Fisheries Research Services [2572-039 (2006) : 76]

20. Our competitive salaries and performance related bonus of up to 9% of salary are supported by a comprehensive benefits package that includes the flexibility of either final salary or a stakeholder pension. Cefas [2576-042 (2006) : 76]

21. Starting salary will be £24,161 pa (salary can progress to £34,448 pa, subject to performance). The University of Nottingham [2576-053 (2006) : 79]

22. The appointments will each be for 5 years in the first instance with the possibility of reappointment to the retiring age subject to satisfactory performance. UNIVERSITY OF CAMBRIDGE [2576-077 (2006) : 87]

23. Initial training will be on site but further advanced training will be at IBA in Belgium to help provide you with the range and depth of specialist knowledge required to perform this role effectively. SCHERING [2545-028 (2006) : 70]

24. Producing a billion litres of drinking water daily is no small challenge and our teams of scientists in Huntingdon perform a vital role in ensuring we maintain the highest possible standards. Anglian Water [2580-033 (2006) : 65]
2009

1. This is initially a one year post (extendable, subject to funding and performance) with a salary at the appropriate point for experience on AfC Band 7. NHS [2689-006 (2009) : 48]

2. (salary can progress to £50,569 pa, subject to performance). The University of Nottingham [2689-026 (2009) : 57]

4. There is also a contributory pension scheme and performance-related bonus scheme. UCL Business PLC [2698-045 (2009) : 67]

6. To £60,500 + excellent benefits including performance bonus, defined benefit pension + relocation support Driving Innovation [2737-017 (2009) : 61]

To perform Ø

Acting déterminant

Here is a random selection of 50 solutions from the 2286 found.

1. A10 222 To take advantage of the lower charges, Age Concern England agreed to act as an agent for the movement.
2. A1B 906 We act as if the anti-Semitism comprehended the Fascism — which would be true only if all Fascists were anti-Semites (they aren't), and if all anti-Semites were Fascists (even less true).
3. A8R 75 ALPHA is a new master operating system designed to interconnect disparate and widely distributed systems to act as a single cohesive whole.
4. ABJ 3726 These are closest to the Japanese and German ways, but without a main bank to act as kingpin.
5. ABS 80 The Experience consists of four young men who look, talk and act as if they've grown up in good families, graduated from decent schools, and dress as if they shop at just the right places — Paul Smith, say, or Emporio Armani.
6. AHG 1069 Christopher Benjamin bumbles around agreeably as the virtuoso; Linda Marlowe puts on a powerful Vampirella act as his sex-hungry wife.
7. AHG 1130 One notes with approval the prominent place given to The Daily Telegraph in the order of daily reading; her ‘oldie’ taste for a Roberts radio, which she surely calls a wireless, and a telephone heavy enough to act as a doorstopper.
8. AHN 1613 And, by the way, Labour will replace the House of Lords with something which will ‘act as a senate’ to protect our rights.
9. AMS 26 As well as providing a dry and secure home for your car, garages may also act as a store for ladders, lawnmowers and kids’ bikes and maybe even a workshop utility room
10. APC 972 I feel I have nothing: no one to talk to, nothing personal to act as a comforter — not a photograph, not a letter:nada.
11. APE 797 Another approach to protecting the social element is to secure that there is an open and healthy political system through which citizens can act as watchdogs over their own social rights — this again highlights the importance of the political element of citizenship.
12. ARF 260 A rapid method of assaying samples was essential in order to discover which extracts were giving the best yields, and the sooner a stable crude preparation was obtained which could act as a standard, the better.
13. AYK 319 Avoid food and drink (particularly tea and coffee) last thing at night as these can act as a stimulant.
14. B19 722 For more than sixty years my poor old liver and kidney — I now had only one — had struggled valiantly to act as a purification plant and sewage works.
15. B1X 2333 Perhaps that was why Father Devlin had volunteered to act as match-maker, preferring to have him married rather than have him fornicate, as he had in the past, with the tinker women passing through the district.
16. B2A 516 Proposals put forward by Maynard et al (1986) for GP budgets would overcome this problem, since GPs would act as gatekeepers to their own budgets.
17. B3H 658 The particles of resin act as an acid resist, the acid attacks the plate between the resin granules producing minute irregular dots bitten into the plate, the tone of which can be controlled by the length of time the plate is allowed to remain in the acid.
18. B7G 482 A nurse who is trained in research methods is ideally placed, she believes, to act as a go-between between doctor and patient.
19. B7G 816 Alternatively, farmers could treat plants that act as alternative hosts for the pest and so reduce the number of pests migrating to a susceptible crop.
20. B7L 258 But one or two countries will act as leaders and organisers.
21. BLX 824 The black and white stripes of the skunks act as a powerful deterrent, even from a great distance.
22. **BNF 8** They act as a bond between people through providing amusement or an experience shared and believed to be held in common.

23. **BNI 234** A post office is invaluable because it can also act as a bank, not only during the week, but on Saturday mornings when normal banks are usually closed.

24. **BNN 210** The response was encouraging; over 500 offers came in, and though the inevitable, lengthy process of inspection deprived those on the early Kindertransporte of any immediate benefit, the principle of recruiting guarantors to act as foster parents was well and truly established.

25. **BPC 2058** THE EDINBURGH MILITARY TATTOO DOES NOT ACT AS AN AGENT ON BEHALF OF THE OPERATORS IN PUBLISHING THIS BROCHURE AND NO CONTRACTUAL RELATIONSHIP IS ESTABLISHED WITH OR THROUGH THE EDINBURGH MILITARY TATTOO WHEN YOU MAKE YOUR HOLIDAY ARRANGEMENTS WITH ANY OPERATOR WHOSE FACILITIES ARE ADVERTISED HEREIN.

26. **C9A 1377** But their feathers also act as insulators.

27. **C9B 778** Gandhi's injunction is that a married couple should act as if they are unmarried, and treat each other as brother and sister.

28. **CA1 1109** The sails have mainspars in their upper edges, and these act as pivots where they pass through the tube.

29. **CBF 6644** Shoppers are urged today to act as the ‘eyes and ears’ of the police after the IRA promised more carnage in the 21 days to Christmas.

30. **CBW 2243** W I Carr Pension Trustees act as trustee and administrator for the plan.

31. **CBX 4100** This creates opportunities for accountants to act as experts, preparing a report on the subject of the suit or prosecution and possibly giving evidence in court as an expert witness.

32. **CBY 2202** Now we have the opportunity to be more proactive, we’ll act as a clearing house for standard models from various parts of the company, and will develop our own standard models.

33. **CCC 585** The next problem was who should go to the hotel to act as a witness.

34. **CF4 1249** Ahmed : Being in at least two oppressed ‘specific interest’ groups we were able to mediate differences and act as a bridge between the two when necessary.

35. **CH1 234** But at all times I would prefer them to act as if they have non-speaking parts.

36. **CMA 955** In other cases though, it becomes more difficult to pinpoint what might or might not act as a reward without very extensive knowledge of the animal's previous experience.

37. **CMH 1213** For example, it is necessary to show mathematically that a DOG filter will act as a zero-crossing detector and that there are cells in the visual system that operate as DOG filters.

38. **CRK 384** And it also seems likely that Pius XII wanted the cardinals to act as papal legates, representatives of the pope in their different territories, ensuring through the bishops under their charge that true doctrine was taught to the laity.

39. **EB1 1627** Research has shown that hormones are released during exercise which act as natural anti-depressants (endorphins).

40. **EBR 103** To what extent do girls act as brakes on, or motivators of, delinquent behaviour in masculine adolescent gang-culture, for example?

41. **EBU 347** The Freie Akademie der Künste Hamburg will act as official ‘godparent’.

42. **EE8 187** Health professionals can act as a resource on adoption issues.

43. **F9B 1461** The controversial part of the report related to rights of audience, where the majority recommended the creation of a Rights of Audience Advisory Board which would recommend to The Law Society the licensing of suitably qualified solicitors to act as advocates in the Crown Court.

44. **FF9 1780** If the nest is attached by one side to a leaf, its support is clearly lop-sided, in which case the hummingbird may weave small particles of earth into a long extension of the nest, dangling beneath, to act as counterweights and level it.

45. **FAS 289** The executives agreed and asked that I act as the facilitator.

46. **FDS 54** And you cannot stop there, because I find it impossible to interpret the Act as meaning that the three years are to run from that date.

47. **FEV 1394** However, the journeys of smolts and mature salmon are often separated by several months, and so the smolts' odour would have to be very persistent to act as a guide.

48. **FP4 888** Unless firm steps are taken, the traditional residents of inner city areas are likely to become even more peripheral to mainstream national life and act as a drain on national economic growth rather than a resource contributing to it.
49. **FPR 719** The newcomers often act as easily identifiable scapegoats who can be blamed for many of the deprivations which the contemporary rural population suffers —; poor amenities, remoteness from the centres of private and public decision-making, and so on.

50. **FR7 369** Under U.S. law, an ocean freight forwarder cannot act as a common carrier or as an agent for such a carrier and thus cannot be a NVOCC.

51. **FS6 1502** This Act also included the notorious Clause 28, which prevented councils from supporting the activities of gay rights (including in many instances AIDS hotlines and counselling services) by outlawing any financial support for activities that were defined by the Act as promoting homosexuality.

52. **FST 45** The payments were part of a package of benefits which were to act as a carrot to persuade workers to accept being made unemployed.

53. **FT5 992** In general the ascorbic acid is thought to act as a free radical scavenger or by a direct antiviral effect.

54. **FTT 1143** The following Committee were appointed, viz. Misses Stirling and McGregor and Messrs Osborne, Christie, Borland, McKay, Brown and Macfadyen, the latter to act as Convener.

55. **G05 1361** adjacent to a major trading estate was designated to act as a regional growth magnet for South Durham.

56. **G1C 441** This expansionist financial relationship made it possible for central government ministers to use the rhetoric of partnership, while actually bribing local authorities to act as their agents.

57. **GIR 129** Such accords are all-important to Soviet officials in that they offer a clear indication of Latin American interest in trading with the USSR, act as the official sanction which enables the Soviet trade bureaucracy to move into action, and facilitate the organisation involved in the completion of transactions.

58. **GTB 554** He continued nevertheless to act as unpaid organizer and adviser to the Peelites up to 1852.

59. **GVK 783** Washington appeared to believe that Zahir Shah could act as a bridge between the mujahidin and the Marxists in Kabul.

60. **GXA 1066** Neighbourhood Watch A poorly attended meeting of the residents of Baberton Crescent was held but no one volunteered to act as co-ordinator.

61. **H0B 1275** His opinion was that such a reduction would act as a stimulus to further development work, and recommended its immediate implementation.

62. **H0Y 685** As a result, the copier (the student) becomes aware of the discriminative cues and so he is able to act as his own critic, thus advancing his learning with his own efforts, without further need of a teacher or critic.

63. **H7X 586** They in turn act as enzymes, machines that manufacture other compounds in the cells, the gene products.

64. **H83 129** Firstly, it was difficult to ensure that teachers would act as anticipated by those who had set the project objectives — changes were not internalized by teachers and made routine in their classrooms (Richards, 1983; Slater, 1985).

65. **H8Y 2725** For the headmaster he did a great act as the old-style schoolboy of the boys’ weeklies: ‘Play up, play up, and play the game’, and all that kind of thing.

66. **H91 126** Nowhere does this manifest itself more blatantly than in the way that the state, in most EEC countries, is allowed by EEC institutions to use the enterprises it owns or controls to act as vehicles for receiving and in some cases dispensing subsidies.

67. **HGW 842** Good arrangements and an eye for detail can only be achieved with practice, so it may help to have a few guidelines to follow in the first place, if only to act as a spring board for producing interesting and unusual ideas of your own.

68. **HJ5 4548** Smaller companies or companies not having made a previous acquisition will often ask us to act as intermediaries.

69. **HJA 2842** This technology hands control of the searching back to the searcher, without the need for a member of the Library staff to act as an intermediary.

70. **HL2 59** Gen. Vladimir Kryuchkov, the KGB chairman, made an unscheduled nationwide television broadcast on Dec. 11 in which he pledged that KGB troops would do their utmost to prevent the Soviet Union's collapse by continuing to "act as a barrier against those forces which seek to push the country towards chaos".
71. **HL7** 966 After the brief administration of Sosuke Uno, Kaifu was plucked from obscurity in order to act as caretaker Prime Minister until such time as the Recruit scandal had receded.

72. **HL1P** 1687 Vice-President Aleksandr Rutskoi, one of CU's leaders, said that CU did not intend to act as an opposition to the current authorities, but to "propose reasonable action and actively participate in the reforms".

73. **HTK** 925 The panel was initially established under the chairmanship of the late John Holden, Deputy Director of Manchester Polytechnic, to assist the Combined Studies (Humanities) Board in the consideration of ‘creative and performing arts components of combined studies or arts and humanities schemes’, and combined courses in the creative and performing arts, to act as a focus for discussion of interdisciplinary matters in the field, and to promote research.

74. **HTV** 1074 In one interesting analysis of this issue, Sauvant and Mennis (1980) argue that the TNCs act as transmission belts along which the contents of what they label the TNC ‘business culture’ are carried from the rich countries to the poor countries of the world.

75. **HU3** 2545 Sodium nitroprusside is able to act as a donor of NO.

76. **HWH** 1592 Brennan and Buchanan (1980) argue that, where there are competing political jurisdictions, ‘exit’ possibilities will act as an effective constraining mechanism; i.e. public expenditures should vary with the extent of fiscal decentralization.

77. **HTW** 2165 A further level of complexity to hepatocyte-matrix interaction results from the propensity of the matrix to act as a reservoir and presenter of cell growth factors and cytokines.

78. **HXB** 1075 No person shall be appointed or re-appointed or act as a Director unless he is a solicitor or a registered foreign lawyer.

79. **HXB** 684 (h)’solicitor’ means a person qualified to act as a solicitor under section 1 of the Solicitors Act 1974;

80. **HXD** 1559 A "product" is defined by the Act as being any goods including electricity and includes a product comprised in another product whether a component part or a raw material.

81. **HXX** 454 (7) Where an instrument under seal that constitutes a deed is required for the purposes of an Act passed before this section comes into force, this section shall have effect as to signing, sealing or delivery of an instrument by an individual in place of any provision of that Act as to signing, sealing or delivery.

82. **J0V** 1323 Thus, for a profession-orientated list server, messages may act as a record of the change in theory and practice and as such deserve good records management and perhaps long term retention.

83. **J3K** 426 Two Australian scientists have developed a chemical process which significantly increases the ability of clothing to act as a barrier against ultraviolet radiation.

84. **J7G** 170 4.2.1 act as an expert and not as an arbitrator

85. **J7D** 145 Where a person does not have reasonable cause to believe that there is a right to payment in these circumstances, it is an offence under s2 of the Act as amended to demand such payment.

86. **JY4** 2129 It was the only sensible way really, to act as if they were old friends and not old lovers.

87. **JY8** 3681 Only Lori could act as if she were meeting a bosom friend for tea and a chat, when the reality was something light-years removed.

88. **K24** 1111 It would act as an incentive.

89. **K2V** 365 Alliance councillor Larry Thompson warned that if such a motion was passed and implemented it would act as a catalyst encouraging other groups and organisations to apply for the same free waste collection.

90. **K3C** 1837 It is understood Mr Hooke has major institutions to act as equity and debt providers.

91. **K4S** 1235 Partner John Winram says his business will also act as a co-ordinator if the venture gets off the ground.

92. **K52** 6127 Organisers of the appeal want to raise £637,000 to build the day care centre, which will act as a meeting place for all old folk especially the lonely, frail and housebound and provide a range of services.

93. **K5D** 13860 In fact St Andrew's House will act as a kind of brokerage for grant applications.

94. **K5M** 8642 Malcolm Badenoch, 25, of High Street, Elgin, had brought in local youths, some still at school, to act as dealers for him in the sale of the drugs at all-night raves, Lord MacLean was told.

95. **K90** 322 Here again there is negligible waste of power, but unfortunately the range of frequencies over which a transformer will act as a potential or current divider is restricted by the behaviour of the core, there being both a lower and upper limit.
96. **K94 2046** Switzerland will remain outside the EC and will be the financial centre and **act as** the neutral protector of money;

97. **K96 1017** If clients are better able to use another office, the team will direct them to it rather than **act as** key workers.

98. **K9B 389** ‘The skills were there when we took over and Courtaulds's role was to **act as** an enabler — to allow those skills to be unleashed.

99. **KA1 1039** Most of them also use personal experience as Owen uses traumatic experiences of his during the war, to **act as** a base to what he is trying to say and to help to get his message across.

100. **KAC 131** However, Brownie Helper’s husband would **act as** chauffeur, so not being able to think of more excludes, I duly arrived at the appointed hour, to find a welcoming party of six little girls, all anxious to fetch and carry equipment.
Here is a random selection of 50 solutions from the 4765 found.

1. **A06 1312** At drama school, there is constant attention to a student's control of both voice and movement, and the different departments work at developing a student's overall acting technique.

2. **A06 170** RADA offers two to three scholarships per year for UK students, Webber Douglas offers two, RSAMD offer a small number of scholarships and Guildford School of Acting offers one to an acting student, for fees only.

3. **A06 2400** The acting profession has actually grown smaller since, say, 1900.

4. **A14 514** When the boil is over, the spent hops settle on the floor of the hop back, acting as a strainer for the wort.

5. **A3V 13** The following were present and took leave of The Queen and The Duke of Edinburgh: Field Marshal the Lord Bramall (Her Majesty's Lord-Lieutenant of Greater London), Mrs Mary Seet-Cheng (Acting High Commissioner for Singapore)

6. **A49 161** Lawyers acting on their behalf are seeking a judicial review.

7. **A64 1324** Certainly suspect committee members had attempted to go abroad, but the real reason was probably that the committee had served its purpose by acting as a bait to attract foreign relief organizations (the ARA drew up an agreement on 20 August).

8. **AAS 313** Details of the police inquiry into the death were given by acting inspector David Hall at the resumed inquest in Newcastle.

9. **AAE 83** ITV, paying £25,000 compared with £200,000 for a live broadcast, was accused earlier this week of acting outside the spirit of its £44 million contract with the League.

10. **ACJ 405** This might be the case with provocation, for example: there may be objections to some of the distinctions now drawn by the law of provocation, but a broader defence of extreme emotional disturbance might provide for reduction of the offence in cases of loss of self-control when caring for a baby or when arrested by a police-officer known to be acting lawfully, and some might feel that there are strong arguments against this.

11. **ACS 716** Her prestige could be gauged from the quality of her attendants: Miller, Lee Strasberg, her acting coach, guru of the fashionable Actors' Studio, and Laurence Olivier, her leading man in The Prince And The Showgirl, whom she infuriated by her 'unprofessionalism'.

12. **AM6 198** I have written elsewhere (Bolton, 1982) that the basic skill of acting is: ‘an ability to engage with something outside oneself using an ‘as if ’ mental set to activate, sustain or intensify that engagement' and I go on to say, ‘I am using the word ‘engagement’as a central feature because it implies a relationship at an affective level between a person and the world outside him' (p. 135).

13. **AN5 1056** The answer, in the light of the Mandla case, would appear to be that the school would be acting unlawfully.

14. **ARD 394** Eventually, though, he singles out Celia Johnson's acting followed by Lean's direction.

15. **B2E 591** He had a list of all the local acting talent.

16. **BMF 891** Almost effortlessly, our bodies acting as sails, the southwesterly surfed us along the coast of Vallay.

17. **BNP 1210** SOME SORT OF MOVEMENT is obviously at work to provide Sian Phillips with plays even more atrocious than her acting.

18. **BP5 1216** The Regulation also applies to the acquisition of joint control by a number of companies acting in concert.

19. **CBE 458** Only unhappiness is gained by acting in accordance with duty, or obligation, or guilt, or the desire to please others.

20. **CUU 1758** But he still conveyed an easy-going personality and had a deceptively casual acting style that differed from Dustin's volatile nature and the nervous intensity he invested in each role.

21. **CBF 8249** ‘It means asking the public what sort of service they want, then acting on that knowledge.’

22. **CBV 845** Mr Nearn persuaded Mr Chapman to carry on producing the Seven, acting as sole concessionaire.

23. **CCS 769** The army captain and the naval navigator practised swimming ashore at night, taking turns to act the part of a sentry while the other stalked around the acting guard until this could be done without the swimmer being detected.
24. **CDG 551** Acting, he told me, was ‘a wonderful job that gives me the opportunity to drink with some really good friends in exotic places around the world’.

25. **CDG 7** He’d studied acting with Stella Adler, a follower of Stanislavsky's principles, and with the Actors' Studio, bringing his 'method' acting to the New York stage as early as 1943.

26. **CDK 1338** When you feel like ‘beating yourself up’, observe how you are acting at the time.

27. **CEJ 2309** It means that he was acting as the Messiah, for ‘to do good’ is a Messianic action.

28. **CFB 838** The school's curriculum manager and **acting** vice-principal, Phil Dean, said there was a lot of uncertainty over the new number seven overlapping the old C and D grades.

29. **CHI 680** Ian Handford of the Federation of Small Businesses says: ‘The Chancellor of the Exchequer is acting like a kamikaze pilot.

30. **CHA 3116** Richard Pryor (who was never given another chance to explore this side of his acting ability), Yaphet Kotto and Harvey Keitel star as the workers who attempt to break the chains that bind with a break-in at their corrupt union's headquarters.

31. **CKU 665** Mark Francis, who had been acting as the museum's director, retains responsibility for the administration of the collection which comprises some 1,000 original paintings and drawings, including an important group of early works being given by the DIA Center for the Arts, one hundred sculptures, a complete collection of prints of Warhol's films, and an extensive archive of source material, audio and video tapes, correspondence and other papers.

32. **CL2 1229** There was both their backgrounds — a boy taken from a bleak past into a glorious future by a dedicated schoolteacher — and furthermore this acting business got him off duty, paid him as much cash as a miner's weekly wage for a few hours' easy work and had a satisfying tint of glamour...

33. **CL2 895** It was the source of his acting genius.

34. **CM0 231** In the short term, acting as a catalyst, there was the creation of a specific demand for executive search skills by a number of enterprising and determined individuals, working both at the behest of the Big Four and on their own personal initiative.

35. **CMU 431** Translation of policy into practice would mean acting upon specifics, such as the recommendations made in the recently-issued NUT Guidelines on Negotiating for Special Needs (1988):

36. **CRU 1046** Unless a deliberate attempt is to be made by society, acting through the agency of the law, to equate the sphere of crime with that of sin, there must remain a realm, a sphere of private morality and immorality which is, in brief and crude terms, not the law's business.

37. **EDH 322** This view remained dominant for a long time in sociology, but more recently other sociologists have become reluctant to view people as happy robots, acting out predetermined roles.

38. **EDL 888** An English solicitor might find it impossible to exercise the appropriate degree of supervision and control were the order to be executed abroad; and a local agent acting on his behalf might not be subject to the disciplinary jurisdiction of the English court to which the Court also attached weight.

39. **EF3 787** The Company was not acting on behalf of the government when it entered into the concession agreement.
Where the privacy of routine cases provides an effective screen to scrutiny, however, the field officer is freed from the need to cover himself by acting according to his perception of the organization's expectations.

Whereas using the device in the former genre displays acting skill advantageously, its use in the latter is not only more expensive and difficult but tends to draw attention to the technical device rather too obviously.

The confidence and effectiveness of individuals in acting out the roles of magistrate, priest or sovereign are enhanced by the esteem in which the precious substances embodied in the symbols of their offices are held in society at large.

In the court below she had also alleged that her husband was acting not only on his own behalf but as agent for the bank in obtaining her consent, that the bank was negligent and that there had been material misrepresentation, although the latter allegation was not pursued.

On the other hand, pressure of whatever character, whether acting on the fears or the hopes, if so exerted as to overpower the volition without convincing the judgment, is a species of restraint under which no valid will can be made.

The jurisdiction by this Act transferred to the High Court of Justice shall include (subject to the exceptions hereinafter contained) the jurisdiction which, at the commencement of this Act, was vested in, or capable of being exercised by, all or any one or more of the judges of the said courts, respectively, sitting in court or chambers, or elsewhere, when acting as judges or a judge, in pursuance of any statute, law, or custom, and all powers given to any such court, or to any such judges or judge, by any statute; and also all ministerial powers, duties and authorities, incident to any and every part of the jurisdictions so transferred.

In July, Fields sought an injunction, restraining Virgin Atlantic from ‘terminating or altering’ its agreement with him and restraining Branson from acting as a director.

He was acting in plays, he was writing his own plays, he was reading books, he was meeting other writers, making friends…

They're still acting.

Karim drifts uncertainly into an acting career, appearing as Mowgli in an experimental production of The Jungle Book, then joining a company which puts on an even more experimental production about class, race and sex.

He was a Slovene called Vlado from near Ljubljana, attached to the German Army; and as he spoke fluent German he was acting as an interpreter.

Five of the print dresses and a cloak were put into general production and the rest, acting as powerful crowd pullers, went on display at various Laura Ashley shops.

I'm acting for a friend of a friend.’

Many of its tasks — such as the directing of traffic and acting as emergency social services — have only the slightest political connotations, but at other times it is involved in politics in its role as defender of public order.

Individuals believe that acting in a certain way will lead to certain outcomes (the performance — outcome expectancy).

A person who harassed a neighbour with racist abuse would nevertheless have no defence that he was not acting in public if his words were,(as he knew) audible to the person next door.

Believable or not, the praise was echoed by his boss, acting Attorney-General William Barr, who, coupling their work with that of his own investigators, congratulated the team on a ‘brilliant and unrelenting operation’.

In my second year I didn't do very much work, but I did lots of acting and directing.

‘Although, for the record, I'm acting on Hanne's behalf as much as yours.

His examples are largely drawn from the world of business and the workings of private sector firms but the analysis of hierarchy is particularly associated with organizations acting on the authority of the state, that is with those in the public sector.

It would, it seems to be implied, have suggested that the forces of civilisation (the British police and legal system) were capable of acting as savages, seeking to punish people guilty only through shared racial origins in order to maintain the appearance of control and order which civilised societies require.
Clifford Geertz's widely known article on 'Deep Play: Notes on the Balinese Cockfight' which is both an account of the way cockfighting may be seen as a symbolically charged text acting as a 'carefully prepared' expression of Balinese life and an account of the processes by which Geertz becomes a knowing reader of this text, is a prime example of the way thick description works.

Two seats each went to The National Party (TNP), led by acting Prime Minister Ben Jones (five seats hitherto), and to the New National Party (NNP), led by former Public Works Minister Keith Mitchell (three seats hitherto).

In February 1989 Ghafar Baba had formally assumed the duties of acting Prime Minister in order to allow Mahathir to recuperate from cardiac surgery.

A Soviet team acting under the terms of the INF treaty undertook a final inspection of the UK Royal Air Force base at Greenham Common in Berkshire on May 28 following the removal of the last cruise missiles in March [see p. 38122].

Julio Montt Momberg was appointed as the new Health Minister on Nov. 2 replacing the acting minister, Patricio Silva Rojas [see also p. 39140].

So that's what privatization is about and how do we stop the privatization how do we really represent the members by attacking the legislation that prevents us from acting in a spontaneous manner, which will assist our members in their hour of need.

The position of the DBMS, acting as a cushion between the logical views of the data structure and the physical schema, is shown in Figure 4.1.

They argue that an important distinction is to be made between the capacities of capital and labour in recognising and acting on their best interests.

These regularly include at least one actor standing in a position intermediary between the dramatic characters proper and the audience by acting as a narrator or declaiming a prologue.

The purpose of such insurance is to provide cover against those types of warranty claims which arise out of simple errors made by vendors acting in good faith.

A person who has been admitted as a solicitor and whose name is on the roll shall, if he would not otherwise be taken to be acting as a solicitor, be taken for the purposes of this Act to be so acting [and therefore being required to hold a practising certificate] if he is employed in connection with the provision of any legal services (a) by any person who is qualified to act as a solicitor;(b) by any partnership at least one member of which is so qualified; or (c) by a body recognised by the Council of the Law Society under section 9 of the Administration of Justice Act 1985 (incorporated practices).

Where the contract is between a businessman and a party who is not a businessman, usually a consumer, it seems from s 1(3) (a) that the businessman will incur "business liability" (and hence is caught by s 2(1)), while the other party cannot incur "business liability" , since by definition he is not acting in the course of a business, and therefore will not be caught by the section.

Where solicitors are acting, the following or similar wording should appear on the particulars of claim below their signature: "AB (& Co) of...[address]solicitor(s) for the plaintiff, who at this address will accept service of all documents on his behalf".
87. **J79 72** The Law Society's rules of professional conduct do provide exemptions for this, but even so, a conveyancer should not be too quick to use those exemptions if acting for both sides might conceivably lead to a compromise or a difficult situation.

88. **J7E 396** Rule 37.1 provides that where a company redeems or purchases its own voting shares, with the result that the directors and any persons acting in concert with them hold 30 per cent or more of the voting rights, then a Rule 9 obligation to make a mandatory offer arises.

89. **JXM 1693** Immediately after the by-election Richard Acland took the responsibility of acting as "secretary for Progressive candidates".

90. **K1J 15** Today lawyers acting for 6 families asked the Oxford coroner to hear the inquest into their deaths with a jury.

91. **K39 120** Ring if for some reason you do not wish to register with the 150 different organisations banks, building societies, stockbrokers and others acting as share shops.

92. **K4W 9473 Acting Det Chief Insp** Barry Hill said: 'At this stage we will be making inquiries in relation to all his movements.'

93. **K5M 580** He told William Mackay, the solicitor acting for the dead man's family, that he discussed the shortage of drugs with other nurses.

94. **K8R 605** And occasionally she didn't even seem to be acting at all.

95. **K8W 2017** neither it nor anyone acting on its behalf promotes a packaged product of (or arranged by) a person outside the marketing group of that tied firm.

96. **K8W 513** The process involved is a direct one, lender and borrower deal with each other directly, although arrangements are often made through brokers acting as agents.

97. **K97 3986** Yesterday, a spokesman for the Shrewsbury-based agents acting for Hafodunos Estates said discussions were continuing.

98. **K97 4362** But any car number you can get if they're acting suspiciously please tell them.

99. **KRF 696** And maybe the external factor interacts with the immune system and the immune system acting, over zealously as it were, not only responds to the invader, but leads to a bystander damage of the nervous system in the process.

100. **KRL 1911** If they come up with a question maybe just find out what's being it erm not just reaction to a particular behaviour, but asking them how the feeling, you know maybe pointing to the bit in their body that's actually feeling butterflies or whatever and trying to help them to express the fears and, more importantly, to make them concrete in terms of play, drawing, or acting it out.
Dear George,

I was Acting Head of School from August 2004 until October 2007, because the substantive Head of School was on a long term secondment to another post within the University. He eventually resigned as Head of School in 2007 and I then applied for the substantive post, to which I was appointed in November 2007. I hope this clarifies this situation for your research.

Kind regards,

Alan

Dr Alan Seddon
Head of School
School of Life Science
FACULTY OF SCIENCE, ENGINEERING & COMPUTING
Kingston University London
Penrhyn Road, Kingston upon Thames KT1 2EE
Annexe 2-3 Occurrences de DEPUTY dans CAEMS

1971

322. New Scientist Jobs
323. [www.newscientistjobs.com](http://www.newscientistjobs.com)
324. Launched by Total jobs Group Ltd
325. Unfortunately, and unexpectedly, there are not enough people with the crucial five to 10 years of experience that **jobs** in these high-growth areas usually require
326. These **jobs** need a wide range of other skills that can only be gained with experience,
327. So it is difficult for graduates without the right experience to get their first **jobs**
328. I would fight strongly against bringing a young person in for a year only to give them a glorified clerical **job**.
329. Bright young people feel that they can get better **jobs** in other areas
330. So it is up to the employers in the field to make their **jobs** much more attractive,
331. which specialises in **jobs** for environmental scientists, believes that both employers
332. and **job-hunters** have to be flexible.
333. please visit [www.environment-agency.gov.uk/jobs](http://www.environment-agency.gov.uk/jobs)
334. and covering letter indicating how you meet the criteria of the **job** statement

Annexe 3-1-1 Occurrences de JOB dans BNC

Here is a random selection of 50 solutions from the 22195 found.

A7W 211 'As I said after the accidents at Clapham and Purley, my job as I see it is to make sure that we implement all the recommendations.'

AAG 24 A proportion of the farm — or for that matter all of it — is set aside, left fallow, mown once a year while the farmer draws a set fee per acre and manages on the rest or gets another job.

ABS 654 In Poland, of course, everybody has a second job.

AHA 1276 ‘It's the best job in the world.’

AN7 2581 ‘A little nervousness is only to be expected when you're starting a new job’

ANX 1572 Although he has had his feet under the desk only since January, he has been preparing for the job since last summer by meeting researchers and officials, visiting institutes abroad and drawing up an initial draft of his plans.

BME 708 Overall the practice should have a monthly report of the periodic and cumulative value of job completions with budget comparisons to assist general control of the business.

BNA 1748 Imagine each of the candidates actually doing the job and dealing with the problems which might arise.

C8G 208 Everything, every service, object, or person — hospital or job, could be bought and sold in a market place — freely and without check.

C8T 738 Mair suspected that she used her confidential job as his PA to preserve a deliberately intimidating reserve.

CA5 875 ‘I want to find a job that I really love.’

CA9 412 I love doing ‘New Faces’, but it's not a job many pros would take on.

CBC 4659 In many ways, you will have to throw away the rule book because the tried and tested that you have set so much store by will prove inadequate for the job.

CBF 4253 Besides, she had always hankered for a job in uniform.

CC5 91 On a personal note, could you pray for me as I am in the process of getting a job in Saudi Arabia myself and will need all the prayer support I can get.

CDX 1231 The male nurse was totally overwhelmed by his job and by his new trousers which, being a couple of sizes too large, kept threatening to drop to half-mast.

CH1 7950 When my ‘ex’ was sacked from his job some months ago they stopped altogether — though he has just spent two weeks in Spain with his girl-friend and new family.

CH2 4589 Since then Five Bellies, who is planning to live with his parents in Dunston until he flies to Rome, has been torn between his family and his Italian job with fun-loving Gazza.

CHA 3802 Anyway, James Brown — who ‘poached’ me from Sounds to procure information on ‘rock’ music, an alien genre to NME staff flourishing on a staple diet of Ecstasy and Ribena in the halcyon
daze of ‘indie dance’ in 1990 — ordered me out on my first ‘job’ to interview Page Three ‘model’ Maria Whittaker, whose debut single had stormed the UK Charts at Number 138… with Kevin Cummins.

**CHT** 1316 Transition and change, particularly major personal life changes and catastrophes, such as bereavement, separation, divorce, financial hardship, illness, the birth of a child (to include miscarriage and stillbirth) conflict in relationships at home or work, having ‘something to hide’, working to deadlines, taking up a new job, moving house, taking examinations.

**CJC** 678 Notching is a good way of checking that your stringer is doing a good job.

**CJF** 619 Twenty years in the House still hadn't dampened his extraordinary enthusiasm for the job and his not unappealing surprise that he should actually be there.

**EA8** 1001 This means that we should only add another layer of management if there was a unique extra job which would increase the value of the whole.

**ECN** 1402 The job of the chant leader is simply to make sure that ‘Shit!’ comes in at exactly the right time.

**FAC** 194 Nevertheless, she got the job in the end.

**FPY** 1794 Some protection of the position is afforded by the Church's legislation (see Appendix 3.1) and an intelligent job description will help employee and employer alike to avoid misunderstandings.

**FS8** 1194 You were doing the job.

**FUK** 488 gonna take forty five percent of our business at less than the cost to do the job, that don't make good business sense.

**FYX** 264 If we were to get married, I had to get a job, and to get a job I had to finish my Ph.D.

**G0F** 2332 You'll lose your job!

**G4X** 1408 Well it's a training needs analysis Jayne, so that everybody, you would say, first of all you would look at the job of a careers officer, and say, Right what competencies do they need to use that job.

**GUY** 489 It is much more than just the duties of the job.

**H8Y** 573 But you know, dear boy, the only possible reason for taking a job like this is to get away from school or family.’

**H92** 1351 People whose job could be equally well — and probably better — done by a tape recorder.’

**H9X** 844 Then, quite out of the blue, there had come the offer of a job at Marlborough; for although I had resolved to abandon teaching, I had found, like so many others, that of all the means of earning one's bread, freelance authorship was among the most precarious.

**HSC** 1548 How would you assess whether a manager or supervisor was good at his job?

**J8J** 290 it's got something to do with the fact that people have got nothing to do in those areas, and no cha, no prospects, no chance of getting a job and it's actually quite a purposeful way of spending your time.

**JA0** 848 Because I mean that would have been the first job offer.
JSD 89 There's no excuse for that and if we're er having as one of our major platforms of our business initiative's quality, then er the quality must be right one hundred per cent all the time er so I was somewhat bothered that we were an disappointed I suppose that we didn't get high ratings in the quality control reviews which were carried out, so to that end we were make make sure the next time we came round with a better score er so er we are looking at what's called hot reviews which is looking at an audit for example before it's finalised by somebody completely independent of the job carrying out a technical review of the way in which tha that audit has been conducted er we are looking at it after the jobs been finished and probably in the slack season in the summer get people to actually review as if they were doing a dry quality control review of the job er prior to us getting an external review er carried out.

JSH 122 Madam Speaker I wonder if the minister is aware that in the economically declining fishing port of Brixham in South Devon the second largest fishing port in the West Country that the employment service agency want to build a new building on a prime site in the centre of Brixham in order to put both the payout office and the job creation office in the same building and they're prepared to pay over the odds with government money and push out private enterprise who want to build that site.

JYM 1251 And if you're struggling my job is to help you overcome those struggles and I I want you to consider I'm here er as a service to you.

K1Y 1073 this is for fun…the Oxford board will decide but they watch central south so here's your chance…we've a shortlist of ten…first is Steve Coppell…he left Palace at the end of last season after nine years as manager…lots of experience…or how about Ray Clemence the ex England goalie…he lost his job at Spurs in the summer and would welcome a manager's job…he could work with Doug Livermore who was also pushed aside when Ossie Ardiles moved into White Hart Lane…

K25 3223 And for Doug, destroying animals is the worst part of his job.

K2R 246 The Ballymena man said: 'I'm really pleased about getting the job and I hope we can mark the occasion with a victory.'

KLV 306 So that then we can actually get somebody in there that can do the job properly.

KRY 438 erm There are job analysts who will help you, in addition to erm the kind of help informally that that erm that Phil could could offer once he's had his training.

Here is a random selection of 50 solutions from the 9588 found.

A30 268 ‘We cannot commit ourselves to sacking senior managers who have simply been doing their jobs.

A7W 679 A crippling recruitment and retention crisis has seen BR lose vital engineering staff to better paid jobs for example in British Telecom and Mercury, where senior technicians' rates are up to £60 a week more.

ANL 1966 Because of the competition for jobs, they are forced to accept low wages.

AT1 825 They set about their assigned jobs with a high degree of diligence.

CA9 1235 I made them wash and iron and do certain cleaning jobs to earn their spending money.

CK9 2344 ‘I would have thought there's plenty of lasses ready to jump into such jobs, ma'am, jobs of all kinds bein' scarce.'
CSL 498 **Jobs** said at Comdex that NeXTStep was created in answer to the problem of ever-increasing amounts of code necessary for today's increasingly complex applications — with NeXTStep's object-oriented development tools, custom applications can be written up to 10 times faster than for MS-DOS or Windows, have greater quality and reliability, 83% fewer lines of code, at a 90% cost saving.

CSM 36 Personal computer manufacturers like Compaq Computer Corp and Dell Computer Corp have been touted as potential OEM customers for NeXTStep 486 since details first emerged, but **Jobs** has nothing in writing yet.

CTL 321 OMG will bring him together with rivals Steve **Jobs** of Next, Joe Guglielmi of Taligent, Jim Allchin of Microsoft and Philippe Kahn of Borland.

CTV 159 A few hundred **jobs** are to go.

D95 554 Erm, these kind of group, kind of groups I'm talking about here are the West Essex Self Action Campaign the resident's groups, the homes and **jobs** campaign, school governors for 'em.

E9T 609 The trust has said savings can be made by ensuring nurses are not doing **jobs** for which they are overqualified.

EDK 832 Later it would become apparent that the decentralization of **jobs** was, in fact, following the drift outwards of the population and labour force.

F9G 1067 Table 4.2 shows that the decline in male employment in manufacturing involved the loss of 21 000 **jobs** and Table 4.3 shows that nearly 4000 female manufacturing **jobs** disappeared over the same period.

F9S 1756 They also acquired higher proportions of managerial and professional **jobs** than the other parts of the country.

FA0 976 Inner London and the inner areas of a number of industrial cities suffered first, but the loss of manufacturing **jobs** then spread to the outer areas of cities and to wider regions, such as the West Midlands and the North West, where these were based on manufacturing.

FB6 1977 If the number of managerial **jobs** does not continue expanding, more and more men may become trapped in the way that female clerks already are.

FP6 2261 And I know these people don't feel free, I know they're all hurrying along or sitting there worrying about their **jobs** or their mortgages or being late or an IRA bomb in the nearest litter-bin, but I look at them and feel a terrible sense of loss, because I think I've surrendered all this; the ordinariness of life, the ability just to be part of it and take part in it.

FS5 1096 letter-writing for **jobs**, the sending of

FUK 947 er all clients on all **jobs**.

G00 3293 Steve **Jobs** recently prophesied that desktop publishing as a separate market would be dead within two years and he's quite probably right.

9. in order to develop mathematical models (1 post).
10. For Senior Scientific Officer posts you must be 26
12. GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry.
13. A CHANGE FOR THE BETTER-if you consult I s. APPOINTMENTS specialists in scientific and industrial posts.
14. MAKERERE UNIVERSITY UGANDA Applications are invited for the following posts in DEPARTMENT OF CHEMISTRY
15. Applications are invited for the following posts:
16. Applications invited for this post in
17. Applications (three copies) for either post, together with the names of three referees, should be sent to the Registrar,
18. This is a new post in the Medical Teaching Centre associated with the Welsh National School of medicine
19. The post will be to assist the Reader in Physiology,
20. For these posts, qualifications, ranging from 'O' level to HNC/HND,
21. The Senate of The Queen's university of Belfast invites applications for the following posts from 1st april 1971,
22. Applications are invited for the post of Lecturer in process design in the Division of Public health Engineering
23. Applications are invited for the post of Experimental Officer
24. Applications are invited for the above post,
25. Applications are invited for two posts of Technician (male and female) in the Electronics Laboratory,
26. The post is concerned with clinical cytogenetics and survey work,
27. These posts are concerned with research and with teaching at graduate and undergraduate level.
28. Aldermaston for 2 posts in the RADIATION MEASUREMENTS Section
29. POST A GRADED AS ASSISTANT EXPERIMENTAL OFFICER
30. The post involves the use of radiations from machines and radio isotopes with a wide range of detector electronic equipment.
31. The post involves the extensive use of sealed radiation sources and X-ray sets.
32. Applications are invited for the post of SENIOR TECHNICAL LIBRARIAN.
33. No Fees G91 GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry.
34. Applications are invited for the above post in a small
35. preferably with O level chemistry and physics, for an interesting post in their radiochemistry laboratories at Hammersmith Hospital.
36. SENIOR TECHNICIAN I Required for new post in Department of Haematology.
37. Applications are invited for the post of LECTURER IN ENGINEERING MATHEMATICS.
38. Candidates for the present post should preferably have a statistical background and an interest in the application of Optimization methods.
39. Applications are invited for the post of Lecturer or Assistant Lecturer in Organic chemistry
40. Applications are invited from Graduates in Engineering or Physics for a post
41. The **post** is initially for 18 months.
42. Applications are invited for the above **post** from persons with suitable scientific and technical qualifications
43. The **post** is superannuable.
44. Applications are invited for the **post** of Junior Research Fellow in the Division of Biology.
45. Applications are invited for the **post** of Lecturer.
46. Applications are invited for the **post** of Biology Technician.
47. THE UNIVERSITY OF MANCHESTER Department of chemistry EXPERIMENTAL OFFICER
   Applications invited for this **post** in the faculty of science.
48. UNIVERSITY OF EDINBURGH Department of Veterinary Pathology LECTURESHIP IN VIROLOGY
   Applications are invited for the **post** of Lecturer in Veterinary Virology.
49. NOTICE TO CANDIDATES FOR VACANT **POSTS**
50. The closing dates for the acceptance of applications for the following **posts** will be extended to a date 10 clear days after the formal settlement of the postal workers
51. in Experimental Pathology and Cancer Research Ref. 45/9e Lecturer in the Department of Bacteriology Ref. 487e Lecturer in Forensic Medicine Ref. 59/5e Administrative **Post**
52. E. 3. 10 **Post** 24 G155 BEE RESEARCH ASSOCIATION Biology graduate required for information work concerned especially with production of Apicultural Abstracts.
53. A basic knowledge of Spanish, on arrival at **post** is required.
54. GK BUREAU specialises in the recruitment of junior and senior technicians for **posts** in hospitals, medical schools and industry.
55. Applicants for a **post** in the Council's Headquarters Office are invited from Science Graduates.
56. The **post** will initially be in the University's Grants and Training Awards Division.
57. Applications are invited for the **post** of DEMONSTRATOR in the Department of Geophysics.
58. Applications are invited for above **post** to take charge of the Electron microscope serving these two departments.
59. Two new **posts** are available at the lower end of the University Lecturers salary scales for:
60. The closing date for receipt of applications for the above **posts** will now be one week after resumption of normal postal services G174.
61. Applications are invited for the **post** of Reader in Materials in the Faculty of technology.
62. Candidates for the **post** should have specialist interests in the field of the structure/property relationship in materials and of its industrial applications.
63. Applications are invited for this **post** in the Computer science and Statistics division.
64. Applications are invited for the **post** of Lecturer or Assistant Lecturer in Pure mathematics in the Department of mathematics.
65. THE WORLD HEALTH ORGANIZATION invites applications for the **post** of TECHNICAL INFORMATION OFFICER to maintain
66. Applications are invited for the **post** of RESEARCH ASSISTANT in the Department of Biophysics.
67. HEALTH PHYSICISTS required at the Institute of Naval Medicine, Alverstoke near Portsmouth (2 **posts**)
68. and HM Dockyard, Chatham (2 **posts**).
69. Applications are invited for **posts** at the Institute of Geological Sciences in London.
70. Application forms from the Director, Institute of Geological Sciences, Exhibition Road, London SW7 stating for which **post** you are applying.
71. One **post** is likely to be of interest to people with up to five years' research experience in the application of Electron microscopy to the study of materials.
72. The second **post** is likely to be of interest to people with up to five years' research experience in the application of x-ray techniques to the study of versatile diffractionometers.
73. The **post** is tenable for two years, with the possibility of renewal for a third year.
74. Since the original advertisement for the **post** of Vice-principal, the College Governors have decided to create two positions and readvertise, as follows:
75. The salary scale for both **posts** will be in accordance with Burnham F. E. Report for a Vice-principal of a college in group 9.
76. Scale for **post** (i) Deputy Principal and Director of Higher Studies £3, 904 to £4, 259 plus L a.
77. Scale for **post** (ii) Assistant Principal and Director of Studies £3, 639 to £3,
are asked to indicate on their application forms the post for which they are applying.

Applications are invited for the post of Lecturer in Broadcast media Research in the Institute of Educational technology at the Open university.

Applications are invited for a post of Senior or Chief Technician level in the Physics laboratories.

Applications are invited for a post in the Department of MECHANICAL ENGINEERING LECTURER The appointment is primarily in the Production Engineering field,

Forms of application and further particulars of the post can be obtained by writing to the Registrar, The University, Leeds,

Applications are invited for two SRC posts concerned with the experimental study of electron

The posts are within a small group mainly concerned with low mobility transport problems and recombination mechanisms.

Applications are invited for the post of assistant to the Director of the Particle Science and Technology Information Service.

and the successful applicant will be required to take up the post as soon as possible.

Early applications are invited for the following posts to date from 1st september next.

Applications are invited for the post of LECTURER or TUTORIAL FELLOW in ELECTRONICS.

Applications are invited for the above posts.

Further particulars of these posts may be obtained from the Secretary and Registrar,

Applications are invited for a post of Assistant Experimental Officer or Experimental Officer in the Analytical Chemistry Section of the Chemistry department.

Applications are invited for the post of Demonstrator.

Applications are invited for three permanent and pensionable posts in the Forensic Science Division of the Department of Industrial and Forensic Science in the Ministry of Commerce

Applications are invited for the post of LECTURER IN ENGINEERING MATHEMATICS.

Candidates for the present post should preferably have a statistical background and an interest in the application of optimization methods.

Applications are invited for the post of TEMPORARY LECTURER in the Department of psychology for the session 1971-72.

Applications are invited for 2 posts of SENIOR LECTURER/LECTURER IN GEOGRAPHY.

The first post will be filled by an applicant with interests in ecology,

The second post will be filled by an applicant with interests in social geography and population.

Applications invited for this post in

GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry.

P., age 35) returning from work in France seeks interesting and demanding post of responsibility in Britain.

Research studentships and postdoctoral posts will be available for researchers in the new and expanding Department of Materials Technology.

and for senior posts from candidates who hold

Applications are invited for the following posts in the Nature Conservancy.

2 posts.

Application forms and future particulars from Establishment (s), Nature Conservancy, 19 Belgrave Square, London SW1X 8p, stating for which post you are applying

In addition similar posts on 1 year renewable contracts may also be available.

Candidates for this post,

Salary of post in London carries a supplement of £175 G289.

Applications are invited for the post of Deputy Protection of Water Officer

The post is superannuable.

or wanting a post for a year would be considered.

Applications are requested for the post of Deputy to the Head of the Cattle Blood typing Service.

The post is subject to review in five years

One post requires experience with mechanical testing and internal friction technique,

Applications are invited for the post of LECTURER in the above School,

Post No. 162-at age 25 £1, 328-£1, 558 (with good degree) and at age 35 £1, 958-£2, 522 (with good degree)
119. **Post** No. 167-in Experimental
120. or telephone for application forms, quoting relevant **Post** No. to:
121. The research **posts** are to support Professor J. H. Collings in a substantial industrially supported research programme
122. Further particulars regarding the above **posts** and details of the Department and its work can be obtained from Professor W E. J. Farvis, Department of Electrical engineering, King's Building Edinburgh, EH9
123. Applications are invited for the **post** of Lecturer in Physics.
124. Applications are invited for the following **posts** in the Cocoa Research Unit
125. GK BUREAU specialises in the recruitment of junior and senior technicians for **posts** in hospitals, medical schools and industry.
126. Permanent **post**, with initial salary according to age and experience on grade Junior Technical Officer £1, 160 to £1, 721 or Technical Officer £1
127. Applications are invited for this **post**
128. Applications are invited from suitable qualified or experienced persons for the **post** of Laboratory Technician
129. Applications are invited for the **post** of Programmer to work on a Modular I Computer
130. The **post** will be initially for one year
131. but there is a possibility of it becoming a permanent **post**:
132. Applications are invited for the following **posts**:
133. Applications are invited for a **post** on the Scientific Officer or Senior Scientific Officer scales for research with the Director's Group on the physiology of secretory epithelia.
134. Applications are invited for the **post** of Assistant Experimental Officer in the above Unit.
135. Applications are invited for the **post** of Chief Cardiological Technician in the Cardiovascular Unit.
136. Applications are invited for three **posts** of Careers Officer within the service
137. two new **posts** and one replacement.
138. and to obtain suitable **posts**.
139. Applications are invited for appointment to the **post** of Lecturer/Senior Lecturer w. e. f. October 1971. applicants will be required to teach Field Courses.
140. Applications are invited for the **post** of Research Assistant in the Cytogenetics Unit of the Nuffield Unit of Medical Genetics.
141. GK BUREAU specialises in the recruitment of junior and senior technicians for **posts** in hospitals, medical schools and industry.
142. Salaries of **posts** in London carry a supplement of £175 in Inner London and £90 in Outer London.
143. Applications are invited for the **Post** of Lecturer in Control Engineering within the above School.
144. Further particulars of this **post** may be obtained from the Secretary and Registrar,
145. Applications are invited for the **post** of Senior Technician in the Department of Pharmacy.
146. Applications invited for this **post**, Permanent **post**, with initial salary according to age and experience, on grade Junior Technical Officer £1, 300 to £1, 721,
148. Please quote **Post** Reference Number L/12/32/2 in all communications G399.
149. Applications are invited for the **post** of research assistant in the Palaeoecology Laboratory from graduates with some biological training and interests in one or more of the following fields:
150. Applications invited for this **post** from those with (preferably) a good Honours degree in Psychology and experience in the use of computers;
151. Applications are invited for the **post** of TUTORIAL STUDENT in CHEMISTRY,
152. Applications are invited for a **post** as TUTOR in GEOLOGY tenable from 1st october 1971,
153. This **post** would be suitable for a mathematician, physicist,
154. **SCIENTIFIC OFFICER CLASS POSTS**
155. Applications are invited from candidates with good Honours degree for the following **posts**:
156. The **post** will be tenable for a fixed period of 3 years
157. Applications are invited for the **post** of LECTURER in the above Department.
158. The **post** involves teaching pharmacology and chemotherapy to undergraduate and post-graduate veterinary students.

5576
or chemists for the post of Head of the Insecticides and Fungicides Department to succeed to Dr. C. Porter.

Duties of Post:

Applications invited for above post from graduates in Agricultural, Horticultural or Biological science.

Applications are invited for this post within the Department of Biochemistry.

The post is concerned with an investigation of the effects of industrial and domestic effluents on the diatom flora of rivers.

Applications are invited for the following posts in the Biology Section.

one post

Applications are invited for the following posts in the Department of Biochemistry.

two posts

Please quote appropriate post reference number in all communications G435.

Applications are invited for the post of LECTURER (salary scale £1, 491-£3

Applications are invited for the following posts in the Department of chemistry.

This post is in a group led by Professor R. N. Haszeldine, F. R. S,

Applications are invited from suitably qualified persons for an appointment to the post of LECTURER IN ENGINEERING GEOLOGY, Durban.

The annual salary scale applicable to the post is:

Applications are invited for the post of Temporary Lecturer or Assistant Lecturer in the Department of psychology for one year,

Applications are invited for this post in the Department of computer science.

Permanent post, with initial salary according to age and experience,

Applications are invited for the above post

Applications are invited for the following posts:

The post is available from October 1971

PLEASE STATE CLEARLY THE POST FOR

Applications are invited for the post of Technician in the Geology Department to start as soon as possible.

GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry.

Applications are invited for the above post in the School of engineering Science.

Well-qualified graduates are sought for the following research posts involving applications of ionising radiations.

Applications are invited for the post of Principal Officer of this Council

Forms of application and further particulars of the posts can be obtained by writing to The Registrar

Applications invited from graduates for the post of Research Assistant to work with Dr. J. A. Lee on the ecology of inland salt marshes.

The post, financed by N e. R c. is for one year in the first instance, from September 1st 1971 with possible extensions for a further two years.

Applications are invited for a permanent and pensionable post in the Biometrics Division of Ministry of Agriculture.

The post requires extensive knowledge and practical experience of modern techniques.

Applications are invited from Science Graduates or Technicians for the post of Experimental Officer in Electron microscopy.

Applications invited for the post of technician in the ENZYME TECHNOLOGY GROUP.

Applications are invited for the following posts from candidates with the Qualifications noted:

and the post provides an opportunity for interesting work in a worthwhile field.

but if under 30 and suitably qualified, would be considered for post of Junior Technical Officer.

GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals medical schools and industry.

Applications are invited for the post of SENIOR RESEARCH ASSISTANT

The post will be for two years in the first instance,

a post of Scientific Administrative Officer in the MRC Headquarters Office in London will be of interest to you.
200. The vacant post will be concerned primarily with part of the Council's nonclinical activities
201. and career details and explain why you consider that you may be suitable to fill this post.
202. Applications are invited for the post of Senior Technician in the Anatomy and Physiology Laboratory
203. of the DEPARTMENT OF OPHTHALMIC OPTICS AND VISUAL SCIENCE.
204. The post will be Grade V Physics Technician.
205. Applications are invited for the following posts:
206. The post is for three years,
207. Applications are invited for a post of LECTURER IN SOIL SCIENCE.
208. GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals
209. medical schools and industry.
210. and the London posts carry a supplement of £175.
211. whilst those wishing to be considered for the higher grade post must have experience of dealing with
212. archaeological material.
213. Please quote Post Reference Number F42/118 in all communications G583.
214. and treating disease for the posts of Lecturer (full-time) in the Department of Medicine.
215. Applications are invited for the above post to work with Professor D C. Burke
216. The post would be suitable for a biochemist with an interest in animal virology or for a virologist with
217. a good knowledge of biochemistry.
218. Applications are invited for the post of RESEARCH FELLOW the Department of Statistics
219. and research experience for a vacant post in the Institute's Department of Parasitology.
220. Applications are invited for the post of Principal Scientific Officer to lead a section concerned with
221. research into basic cultivations
222. Applications are invited for the post of JUNIOR SCIENTIFIC OFFICER to work on the biophysical
223. aspects of adhesion of polymeric films to tooth substance.
224. The posts are based at the West Ham Precinct, Romford Road, London, E15.
225. Applications are invited for the post of Demonstrator in Electronic Engineering
226. One of these posts is concerned primarily with the clinical applications of radioactive isotopes
227. Further particulars of these posts can obtained from the Chief Physicist,
228. Applications invited from graduates with a special interest in experimental plant taxonomy for the
229. post of Research Assistant
230. For one of the posts some experience in the servicing of physiology laboratories is desirable but not
231. essential.
232. The posts are based at the West Ham Precinct, Romford Road, London, E15.
233. Applications are invited for the post of Demonstrator in Electronic Engineering
234. One of these posts is concerned primarily with the clinical applications of radioactive isotopes
235. Further particulars of these posts can obtained from the Chief Physicist,
236. Applications invited from graduates with a special interest in experimental plant taxonomy for the
237. post of Research Assistant.
238. Applications are invited from Chemistry Graduates for the above post in the School of Chemical
239. science and Technology.
240. Post tenable for one year.
241. of Trinidad and tobago) for the post of Information Specialist with its Technical Information Service.
242. Applications are invited for the post of LECTURER in the above Department,
243. Applications are invited for the following posts:
244. in addition to the special qualifications where stated for the respective posts.
Duties will be those normally attaching to such a post.

The growth of research in the Department of Ergonomics and Cybernetics has made available at least one additional post of Research Associate on a fixed term contract.

Post tenable for one year in first instance and renewable.

Applications are sought from highly qualified persons for the newly established post of Reader in the Department of Biological sciences.

Post tenable for one year in first instance and renewable.

Applications are sought from highly qualified persons for the newly established post of Reader in the Department of Biological sciences.

Applicants for all these posts should be aged 25-35.

Applications are invited for this post from candidates with teaching

Applications are invited for the post of Experimental Officer to take part in interesting research programme.

The post will be orientated towards servomechanisms and mechanical and electromechanical problems.

Applications are invited for the post of Principal Scientific Officer

Applications are invited for the following posts

Applications are invited for the post of a Careers Adviser

GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry.

Applications are invited for the post of Research Assistant to work with Professor

The post is tenable for approximately three years (in the first instance)

MINIMUM EXPERIENCE required in hospital physics department in Grade III post for two years or at least five years previous relevant experience outside the Hospital Service.

UNIVERSITY OF THE WEST INDIES Trinidad Applications are invited for the post of (a) SENIOR RESEARCH FELLOW

Applications are invited for the post of RESEARCH ASSISTANT in the above Department,

The post

Applications are invited for the post of a Careers Adviser

GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry.

Applications are invited for the post of JUNIOR SCIENTIFIC OFFICER to work on the biophysical aspects of adhesion of polymeric films

The post will be tenable as soon as possible until 30, September 1974.

In addition to these posts the Department welcomes enquiries from candidates who may be graduating in 1972

Further studentships will be available as will a number of postdoctoral posts.

Applications for the posts immediately available are invited from candidates who hold good honours degrees (or equivalent professional qualifications) in chemical engineering, materials science, metallurgy, ceramics and glass technology.

Applications are invited for a range of scientific posts at the Institute of Coastal Oceanography and Tides, Bidston Observatory, Wirral.

The posts are:

a second post on theoretical studies from analytical and numerical models to understand the physics of tides,

This post is concerned with techniques for deployment of oceanographic instruments and initiation of design and evaluation of new methods and equipment.

Applicants for senior posts must also have undertaken appropriate postgraduate research work,

The Fellowship may be held in conjunction with an established post in a department of Oxford university;

GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry.

Applications invited for the post of junior technician to work in the pilot plant of the Enzyme Technology Group.

Applications are invited for the post of Assistant in the Electron microscopy section.

Applications are invited for the post of Lecturer in the Department of Genetics from candidates with suitable qualifications and experience in some branch of Genetics.

As the post necessitates also contacts with students a basic knowledge of French is necessary.

Applications are invited for a new post of Research Assistant to work on novel aspects of the fatigue of metals.
281. The post will normally be of 3 years' duration.
282. Applications invited for the post of DESIGN DRAUGHTSMAN in the Technical Department of the Institute in Great Portland Street.
283. including present post and salary to Personnel Officer, 224 Great Portland Street, London W1n 6aa G794.
284. GK BUREAU specialises in the recruitment of junior and senior technicians for posts in hospitals, medical schools and industry.
285. The prime requirement for the post is an aptitude for scientific research,
286. Applications are invited for the post of Research Officer
287. Applications are invited from suitably qualified candidates for the post of Lecturer in the Department of Geography.
1. The person appointed to this post will help create a unique partnership between Diamond
2. Applications are invited for the post of cell culture technician
3. The post will be for a two year period with the possibility of a permanent position for the right candidate.
4. The posts are both 3-year Fixed Term Appointments, with the possibility of extension and/or permanency.
5. Post involves researching,
6. Applications should include the names of two referees who will be asked to comment upon the candidate's suitability for the post.
7. The individual chosen for the post of Executive secretary must be available starting 15 February 2010
8. and will assume the post on 01 March 2010.
9. Appointments to senior posts will be required to promote
10. It is a condition of these posts that satisfactory enhanced disclosure is obtained from the Criminal records Bureau.
11. These high profile posts will deliver
12. The post is based at the Centre for Clinical Vaccinology and Tropical Medicine, Churchill Hospital,
13. The post is available for two years in the first instance,
14. The post is available immediately and tenable for 18 months.
15. Informal enquiries for either of the above posts may be made to Professor Judith Hoyland
16. Applicants should send their full CV with a covering letter describing their suitability for the post to:
17. The post includes management and development of two Business Interface Managers.
18. Government invites applications for the post of Fisheries Scientist (stock assessment.
19. This is a permanent post.
20. This post requires a driving license that enables you to drive in the UK.
22. This post is full time and available for one year in the first instance.
24. All of these posts are available from 1st September 2009 with a start date by mutual agreement.
25. 3 posts (2 in Physics, 1 in Engineering)
26. Appointments will be made to the posts of Lecturer/Research Fellow.
27. These posts form part of a total of 7 new academic and 15 researcher appointments in graphene
28. with the remaining posts to be advertised in the coming weeks.
29. 3 posts (2 in Engineering, 1 in Physics)
30. For these posts, applications will be most welcome from those with research expertise related or complementary to existing materials research
31. Appointments will be made to the posts of Chair Engineering (Ref 1968), Lecturer, Engineering (Ref 1699) and Lecturer, Physics (Ref 1920.
32. Generous relocation assistance will be available for all of these posts.
33. Full details of all of these posts, including the application procedure can be found on our website
34. Each of the post-holders will be responsible for supporting research activities in defined parts of the research portfolio-two posts with a particular focus on UCLH/UCL
35. whilst a fourth post will focus mainly on the research portfolio for the RNOH and North Middlesex Hospitals.
36. This post is available for a period of one year from 1st March 2009.
37. The post is available from 1st March 2009 for a period of 3 years.
38. The post will underpin the statistical data analysis
39. The post is funded by the Ralph Bates Pancreatic cancer Research Fund.
40. The post is available for 3 years.
41. Successful candidates will be selected solely on their ability to carry out the duties of the post.
42. Because of the nature of work associated with these posts, they are subject to special nationality rules
43. A post is available in an interdisciplinary team working in a new EU Framework 7 project
44. The post will focus on evaluating mechanisms for ensuring national-level benefits are distributed equitably, effectively and sustainably to stakeholders at a range of levels.
45. The working language for the post is English.
46. The post is offered on an initial four-year contract.
47. For further information about any of these posts or for an informal discussion please contact Dr Jane Rogers.
48. The post is offered on an initial four-year contract.
49. and covering letter explaining how you meet the criteria for this post to:
50. Applications for this post must be made online.
51. Applications are invited for the post of Assistant Director of research (ADR) serving as Deputy Director of the UTC.
52. The post, funded by SKF,
53. Further details about the post can be obtained from Ms Catherine Sims.
54. This post is focused on the role of airway nerve sensitization in chronic cough.
55. The length of the funding associated with this post will allow you to establish a reputation in the field.
56. This post will be under the direct supervision of Professor Ashley Woodcock and Dr Jacky Smith.
57. This post has been developed in collaboration with the Greater manchester Comprehensive Local Research Network.
58. Closing date for both posts:
59. For this vacancy please use the application form for Academic posts.
60. Eight posts (four staff appointments and four)
61. This post will be offered on a fixed-term contract for a period of 31 months.
62. Post Ref:
63. Post Ref:
64. Further information on the above posts is available on the SCRI website.
65. The post will focus on management of productive relationships between the University and external partners building on York's research strengths.
66. This post is fixed for a term period of 1 year.
67. Further details of the post can be found by visiting our website at http://www.liv.ac.uk/lstm.
68. If you are interested in applying for this post, 
69. and suitability for the post, together with the natures and contact details of 3 referees to:
70. (2 Posts)
71. The first post is an EPSRC project.
72. The second post is an EPSRC project.
73. Both posts provide tuition fees for EU nationals only.
74. If you would like to know more about these posts,
75. The successful candidate is expected to assume the post by 1 January 2010.
76. Specialist I (2 posts) Radioactive Substances Unit (EPI National)
77. Liaise with UKTI colleagues in British diplomatic posts to define tailored trade developments strategies;
78. and covering letter explaining how you meet the criteria for these posts to:
79. The posts available are:
80. Three separate posts based in Birmingham,
81. These posts are crucial in ensuring the strategic delivery of FW&E services within the region.
82. Two separate posts based in Bristol.
83. These posts are responsible for managing the provision of Food,
84. This post will support the wider co-ordination and delivery of FW&E microbiology laboratory services to partners in public health delivery in the East midlands.
85. Closing date for all posts:
86. The successful candidate is expected to assume the post by 1 January 2010.
87. The post is a one year fixed-term position working 37.5 hours per week.
88. The post will be based at both NHS Blood and Transplant and the Health Protection Agency, both
89. For an informal discussion of the post please telephone Mr Chris Hogg.
90. and see for yourself the variety of posts available?
91. Most of the posts are based in central London,
92. The above are pro rata for part-time posts.
93. Full job descriptions for the available posts are on Defra's website.
94. If you would like to find out more about these posts
95. This post will be offered for a period of five years.
96. For this vacancy please use the application form for Academic posts.
97. Both posts are funded initially for two years with the possibility of renewal.
98. For further information about the posts
99. The funds for this post are available for two years in the first instance.
100. The post is available immediately.
101. There is also an additional Clinical Experience Supplement Allowance attached to this post
102. This position attracts a clinical experience supplement to bring the salary to a level comparable to NHS posts.
103. 2 Posts
104. The first post is an EPSRC project
105. The second post is an EPSRC project
106. Both posts provide tuition fees for EU nationals only.
107. The post will be located at our Harrogate
108. For both posts, working hours will be 37 per week excluding lunch breaks.
109. Closing date for all posts is 11th May 2009.
110. The post is funded partly by the UK sugar beet industry

136. This post relates to the areas of pest control residue and metabolism,
137. These posts are demanding
138. This post will provide support for a research programme on the family of transport proteins in the mitochondria,
139. Applications for this post must be made online
140. The post is focussed on the development and application of a soil system model from a pedological perspective
141. The post that you are applying for involves access to vulnerable adults as defined by the Criminal records Bureau.
142. The post will be based within the MRC Cambridge Centre,
143. The starting salary for the post will be in the range £35
Applications are invited for the post of Laboratory. The post is tenable at the Wellcome Trust Centre for Human Genetics. This post is fixed-term for three years. In addition the post requires good communication skills.

The main purpose of the post is to advance cardiovascular research in the University of Glasgow. Industrial Minerals, the unique provider of global nonmetallic minerals intelligence from mine to market, is seeking a business journalist for the post.

For informal discussions and more details on either post, please contact Dr Richard Houghton.

Clinical Biochemistry (2 posts) and Microbiology

(1 post) Higher Specialist Trainees Agenda for Change Band 7

With support from NHS Education for Scotland, a small number of Higher Specialist Training posts in Clinical Biochemistry and Microbiology have been created to develop future consultant level Clinical Scientists.

HST posts are funded for 3 years fixed term.

One of the biochemistry posts will be in Paediatric Clinical Biochemistry in Lothian and the second post based in Grampian or Tayside dependent upon the candidates preference.

This post is a 3-year Fixed Term Appointment (with the possibility of extension). For more details about the posts, the posts are based at the University of East Anglia.

All three posts are available immediately for a fixed term period until 29 February 2012.

Applications are invited for the post of Director of the Environmental Sustainability Knowledge transfer Network. This post provides an entry point for basic scientists wishing to establish a career as a principal investigator within a clinical setting.

This post will suit a highly talented researcher with postdoctoral experience. The post is available for three years. An application form.

The post is available from 18 September 2009 until 31 March 2010.

The post is funded by a two year MRC GAP funding initiative.

This is a permanent post with an initial probationary period. This post is established under a Service Level Agreement between Geological Survey of Northern Ireland (GSNI) and the Northern Ireland Environment Agency (NIEA).

This post will support a range of plant pathology R&D projects. Industrial Minerals, the unique provider of global nonmetallic minerals intelligence from mine to market, is seeking a business journalist for the post.

This is a further new post created through service expansion. The post is part of the Evidence team.

This is initially a two-year post with a salary within the range of £18k to £28k.

The post is demanding. We are currently looking for three Research Scientists (two of the posts will be fixed 12 month-term contracts). Programme Manager (2.00 posts)

All posts are based in central Leeds.

Research Associates in Organic Electronics (five posts) Department of physics

Enquiries about posts 1 and 2 should be sent to Professor Richard Friend: for post 3 to Professor Neil Greenham: and for posts 4 and 5 to Professor Henning Sirringhaus.

This post is an exciting opportunity for an enthusiastic researcher to play a leading role in an ambitious project. As this post is funded by the Natural Environment Research Council (NERC), further details of the post and an application form are available on our website.

RESEARCH ASSISTANT IN PLANT BIOLOGY (2 POSTS) £24,877-£29,704 Ref: Closing date for both posts: The post is available to 31 December 2012 in the first instance.
190. There is no restriction on the number of times an applicant may apply for this post.  
191. and covering letter explaining how you meet the criteria for this post to:  
192. this post is established under a Service Level Agreement between the Geological Survey of Northern Ireland (GSNI) and the NIEA.  
193. The post of Secretary to the International Whaling Commission (IWC) will fall vacant in July/August 2010.  
194. The post is graded at the equivalent of the D.1 level on the United Nations salary scale.  
195. The post is full-time for three years starting from 1st November 2009 or as soon as possible thereafter.  
196. The post will provide an exceptional opportunity for a chemistry, 
197. The post will provide an exceptional opportunity for a pharmacy-related academic with a proven research track record  
198. Potential applicants for either of these important posts are encouraged to contact either Professor John E Brown  
199. Assistant and Senior Air Quality Analysts (2 posts) Environmental Research Group  
200. Both posts are full-time.  
201. For both posts you will be required to have an honours degree in a relevant science or environmental subject.  
202. This post is developmental  
203. In order to apply for the post,  
204. This departmentally funded post is initially for five years  
205. This post does not meet the minimum requirements for work permit employment;  
206. Each post is approx 3 years, starting January 2010 or as soon as possible thereafter.

201. The post would suit either a non-nurse healthcare professional or science graduate,
202. This post is subject to the successful candidate being asked to apply for Disclosure from the Criminal records Bureau (CRB) at Enhanced Level.
203. This new post
204. Salary for postdoctoral posts in the range £19,460-£29,128 per annum.
205. Application forms for the postdoctoral posts may be obtained from the Human Resources Department.
206. This is a permanent post, available immediately.
207. The post will be for two years in the first instance
208. Both posts are fixed-term for 3 years.
209. Further information for both posts may be obtained from Dr Ludgate by email
210. if you wish to be considered for this post.
211. An attractive salary, commensurate with experience, will be offered for this post.
212. Research Associate-10 Posts
213. For full post details/application pack visit:
214. 5 Academic posts:
215. Grade B posts in Biomaterials and Bioengineering
216. and posts.
217. A total of five posts is available, one at Chair, one at Senior Lecturer,
218. The chair plus a number of the other four posts are available in the area of materials applied to biological and medical systems.
219. The remaining posts are available in the areas of structures and fluids with applications in biological and medical systems.
220. the possibility of filling several of the posts by a preexisting group is available.
221. Areas of expertise relevant to the five posts include:
222. For informal enquiries about the posts please contact the Head of Department, Professor Nicos Ladommatos
223. Further particulars and information on how to apply for the posts can be obtained from Mrs Margaret Harrison
224. (including this post),
225. Flexibility is a key requirement for all of these posts.
226. The successful applicant will be required to undergo security vetting before taking up the post.
227. Health Sector Posts are fixed term for 3 years
228. The post is based in London
229. Starting salary range for these permanent MRC Band 4 posts is from £25,858 to £31,343 inclusive of Location Allowance.
230. Data Posts (£18-23k)
231. The post also entails selling to Pharmaceutical companies with a degree of travel overseas.
232. The post is graded RA1A
233. Questions about the post should be directed to Dr A j. Kenyon
234. Six Postdoctoral Research Fellows (posts 1-6)
235. Cleanroomtechnician (post 7)
236. Informal enquiries about posts 1 and 2 to Dr Christoph Wälti
237. Post 3
238. Post 4 Job
239. You will work with Post 3 to develop catalytic electrode surfaces that can be controlled electrically
240. Informal enquiries about posts 3 and 4 to Professor Peter Stockley
241. Post 5
242. Informal enquiries about post 5 to Professor Stephen Evans
243. Post 6
Informal enquiries about post 6 to Professor Richard Bushby

We also seek an experienced Cleanroom Technician to work with post 1 and other clean-room personnel.

Closing date for all posts 30 June 2005

Our new Centre for the Cellular Basis of Behaviour invites applications for two posts

Applications are invited for the post of Research Technician,

The post is funded by the European commission and Wellcome Trust for 18 months initially with the possibility of extension to 4 years.

The post, available from 1 August 2005, is tenable for 12 months in the first instance.

For all posts, please quote the relevant reference number.

This post is available for three years in the first instance.

The starting salary for this post will be on the scale RS1A £19,460-£29,128.

Applications are invited for the post of Research Technician

These posts are fixed-term for 12 months.

This post is fixed-term for 18 months.

The post is term-time only (38 weeks per annum)

Candidates for this postdoctoral post should send a CV

The post is a full-time position

For further information regarding this post please contact Dr Kathy Till,

This post is enhanced subject to an CRB disclosure.

All posts will be subject to 'Agenda for Change' terms and conditions.

This new post will support a project in collaboration with the National Cancer Institute of the United States,

This post is available from 1 October 2005 for three years.

The post is available from Autumn 2005

Applications are invited for a post as Research Assistant for a period of 6 months.

For further information about both posts visit

The post will be based at ESNW,

The post is available from September 2005 for two years

All posts will be subject to Job Evaluation.

We have four posts

For an informal discussion about the post, please contact Dr Uschi Steigenberger

Therefore the salary of these posts are under review.

This post will also attract an allowance of £2k pa for Nuclear Suitably Qualified and Experienced Personnel,

This post will also attract an allowance of £2k pa for Nuclear Suitably qualified and Experienced Personnel,

or programmes is essential for this post.

For both posts you will be qualified degree, with at least two years' relevant postgraduate experience.

Applicants for any post must be registered HPC

We are offering two career development posts for ambitious scientists in a highly motivated team

Post 1:

The posts are for three years in the first instance.

The Post

Two new posts have been created specifically to contribute to this research

one post at the Leeds General Infirmary,

The two post holders will be responsible for the routine HPLC analysis of amino acid levels

The post at each site will be fixed a one year

Further information about the RSC and these posts is available on our website

The post is based full time

The post will be held in conjunction with a supernumerary Fellowship at St John's College

The post is available immediately for a period of 36 months.
294. Lecturer (two posts)
295. Lecturer/Senior Lecturer/Reader (one post)
296. The posts are in,
297. This post is available for five years.

HST posts are funded for 3 years fixed term.
One of the biochemistry posts will be in Paediatric Clinical Biochemistry in Lothian.
and the second post based in Grampian or Tayside dependent upon the candidates preference.
This post is a 3-year Fixed Term Appointment (with the possibility of extension.
How to apply For more details about the posts,
The posts are based at the University of East Anglia.
All three posts are available immediately for a fixed term period until 29 February 2012.
Applications are invited for the post of Director of the Environmental Sustainability Knowledge transfer Network.
Lecturer/Senior Lecturer (2 posts)
This post provides an entry point for basic scientists wishing to establish a career as a principal investigator within a clinical setting.
This post will suit a highly talented researcher with postdoctoral experience.
The post is available for three years.
The post is available from 18 September 2009 until 31 March 2010.
The post is funded by a two year MRC GAP funding initiative.
This is a permanent post with an initial probationary period.
This post is established under a Service Level Agreement between Geological Survey of Northern Ireland (GSNI) and the Northern Ireland Environment Agency (NIEA).
This post will support a range of plant pathology R & D projects and the development of novel diagnostic methods based on PCR and real time PCR.
Industial Minerals, the unique provider of global nonmetallic minerals intelligence from mine to market, is seeking a business journalist for the post.
This is a further new post created through service expansion.
The post is part of the Evidence team.
This is initially a two-year post with a salary within the range of £18k to £28k.
The post is demanding.
We are currently looking for three Research Scientists (two of the posts will be fixed 12 month-term contracts.
Programme Manager (2.00 posts)
All posts are based in central Leeds.
Research Associates in Organic Electronics (five posts)
Enquiries about posts 1 and 2 should be sent to Professor Richard Friend:
for post 3 to Professor Neil Greenham:
and for posts 4 and 5 to Professor Henning Sirringhaus.
This post is an exciting opportunity for an enthusiastic researcher to play a leading role in an ambitious project.
As this post is funded by the Natural Environment Research Council (NERC),
Further details of the post and an application form are available on our website.
RESEARCH ASSISTANT IN PLANT BIOLOGY (2 POSTS)
190. Closing date for both posts:
191. The post is available to 31 December 2012 in the first instance.
192. There is no restriction on the number of times an applicant may apply for this post.
193. and covering letter explaining how you meet the criteria for this post to:
194. this post is established under a Service Level Agreement between the Geological Survey of Northern Ireland (GSNI) and the NIEA.
195. The post of Secretary to the International Whaling Commission (IWC) will fall vacant in July/August 2010.
196. The post is graded at the equivalent of the D. 1 level on the United Nations salary scale.
197. The post is full-time for three years starting from 1st November 2009 or as soon as possible thereafter.
198. The post will provide an exceptional opportunity for a chemistry,
199. The post will provide an exceptional opportunity for a pharmacy-related academic with a proven research track record.
200. Potential applicants for either of these important posts are encouraged to contact either Professor John E Brown
201. Assistant and Senior Air Quality Analysts (2 posts)
202. Both posts are full-time.
203. For both posts you will be required to have an honours degree in a relevant science or environmental subject.
204. This post is developmental
205. In order to apply for the post,
206. This departmentally funded post is initially for five years
207. This post does not meet the minimum requirements for work permit employment;
208. Each post is approx 3 years, starting January 2010 or as soon as possible thereafter.
209. For postdoctoral posts see our website quoting ref:
210. The posts will be for three years in the first instance
211. The posts will all involve frequent travel throughout the UK.
212. The post will have a key role in extending awareness
213. The posts will require engagement with a range of stakeholders in the Department of Health, NIHR,
214. These posts are being offered on a contract of up to one year to cover for maternity leave.
215. Applicants should send their full CV with a covering letter describing their suitability for the post to:
216. and public sector will be facilitated by the business support posts (from April 2010).
217. For further details of these posts please contact the Centre for Low Carbon Futures
218. for details of the BDM posts
219. The post is funded for one year by a BHF Centre for Research Excellence
220. Closing date for receipt of applications for both of the above posts is 7th December 2009.
221. More information about this post can be found at
222. however, for posts J09/156 and 109/158 consideration will be given to appointing at the level of Reader or Senior Lecturer.)
223. The successful candidates for the newly established posts will spearhead research initiatives associated with the projects
224. The post will be in the field of Homogeneous Catalysis.
225. The post forms part of a £2.3m investment to establish a centre of excellence for catalysis
226. This post will be based at Immunocore,
227. The post is funded by the Medical Research Council
228. For more information on this post please contact Professor Catharine West

Annexe 4-2-2 Mail Learning and Skills Council

Dear George,

Thank you for your enquiry.

Centres of vocational excellence ceased to exist more than 3 years ago and the Learning and Skills council was replaced by the Skills Funding Agency and the Education Funding Agency.

You may find it useful to have a look at the FE Choices website http://fechoices.skillsfundingagency.bis.gov.uk/Pages/home.aspx

This is the official site for comparing the performance of further education colleges and other organisations that receive Government funding to educate and train people over the age of 16.

I hope this is helpful.

Kind regards,

Skills Funding Agency
Annexe 4-3 Occurrences de VACANCY et VACANT dans CAEMS

1971

1. The immediate vacancy is in the Biology Division
2. AGRICULTURAL RESEARCH COUNCIL SCIENTIFIC ADVISER A vacancy has arisen in the Council's headquarters office for a Scientific Adviser to be concerned with the administration of research in Plant Physiology and Biochemistry.
3. AND RESEARCH ASSISTANT A vacancy exists for a RESEARCH FELLOW to join a group of experimental and theoretical physicists working on the structure and properties of solid surfaces.
4. A second vacancy exists for a postdoctoral RESEARCH ASSISTANT to work on a programme concerned with pseudomorphism and epitaxial growth, with particular reference to metal/metal and metal/oxide systems.
5. SCIENTISTS Beecham Group Research Unit Beecham Group Ltd has the following vacancies in its newly established multidisciplinary Research Unit for scientists interested in providing scientific support for internationally used proprietary products:
6. Research Scientist Food Industry A vacancy exists for a graduate,
7. G75 UNIVERSITY OF KENT AT CANTERBURY Electronics Laboratory-Vacancies for Graduates/Technicians Applications are invited for two posts of Technician (male and female) in the Electronics Laboratory, one for work in the clean
8. SK & F MEDICAL INFORMATION SCIENTIST Smith Kline and French Laboratories Limited, one of the leading international pharmaceutical companies, has a vacancy for a Medical Information Scientist to work in the company
9. Reading RG7 4pr quoting reference 3792/215 G87 British steel GENERAL STEELS DIVISION INFORMATION ASSISTANT A vacancy exists in the Information Unit of the Library
10. G. D. Searle & Co. Ltd. require Ph d. BIOCHEMIST We have a senior vacancy for a well qualified Biochemist to work on anti-virile substances.
11. Vacancies exist for qualified staff in the fields of glass technology, glass science and furnace technology.
12. Applicants for the technicians' vacancies should possess H. N e. or A levels in scientific subjects.
13. Applicants for the junior technicians' vacancies should be of O A level standard in scientific subjects
14. Vacancies also for engineer and chef on cruise schooner.
15. POSTDOCTORAL RESEARCH FELLOWSHIP The above vacancy exists for a research worker to carry out a biochemical investigation on the macromolecular components of secretions of the female genital tract in farm animals.
17. NATURAL ENVIRONMENT RESEARCH COUNCIL G197 UNIVERSITY OF SURREY RESEARCH FELLOW IN ION IMPLANTATION A vacancy exists within the ion implantation group of the Department of Electronic
18. There are vacancies for a Chemist-Biochemist, with interests in Haematology and Protein Chemistry
19. G. D. Searle & Co. Ltd. require Electron microscope Technician We have an interesting vacancy in our New Research Laboratories at High Wycombe for an experienced technician to work in the Electron microscope Unit.
20. Two vacancies in the Department of Metallurgy at the Lecturer level, for Physical, Metallurgists or Material Scientists.
21. THE UNIVERSITY OF MANCHESTER A vacancy exists for a TECHNICIAN in the Department of Metallurgy for an initial period of 5 years.
22. These vacancies provide an opportunity to join a stimulating project with early progression to key positions in the team.
23. SCIENCE RESEARCH COUNCIL ASTROPHYSICS RESEARCH UNIT CULHAM LABORATORY Vacancy for a Research Associate The work of the Astrophysics Research Unit covers Space Astrophysics and Laboratory Plasma Spectroscopy.
24. The Unit has a vacancy for a Research Associate to work in the Laboratory Plasma Spectroscopy Group.
25. CHEMISTRY SECTION Two vacancies Candidates should preferably have had several years' practical experience of laboratory work in general chemistry.

26. BIOLOGY AND PHOTOGRAPHY SECTION One vacancy Candidates should preferably have had several years' practical experience of laboratory work in one of the following specialisations:

27. Applicants should state for which vacancy they are applying and in

28. UNIVERSITY OF SOUTHAMPTON DEPARTMENT OF AERONAUTICS AND ASTRONAUTICS Wolfson Marine Craft Unit NAVAL ARCHITECT A vacancy exists for a young Naval Architect who has had experience

29. Materials Engineering and Materials Protection and vacancies will exist in all research groups.

30. 282 Ext. 105 G302 UNIVERSITY OF EDINBURGH DEPARTMENT OF ELECTRICAL ENGINEERING Vacancies will shortly occur in the following grades:

31. G. D. Searle & Co. Ltd. require Patents Officer This vacancy has arisen in the Information Department of the Searle group of companies,

32. CITY OF LONDON POLYTECHNIC SIR JOHN CASS SCHOOL OF SCIENCE AND TECHNOLOGY Department of Biological sciences SENIOR TECHNICIAN A vacancy exists for an experienced person

33. INFORMATION OFFICER A vacancy exists in the Drug Registration Department of Fisons Limited, Pharmaceutical Division for an Information Officer,

34. The vacancy would be of particular interest to a graduate in pharmacy or in one of the biological sciences.

35. There is a vacancy for a Research Officer (Ecologist) in the Planning Division.

36. specialists in timber protection, have a vacancy for a man aged 24-30 years.

37. Honours Science Graduate with practical experience in microbiology wanted for a vacancy in the Dissentery Reference Laboratory at Colindale.

38. THE CLARENDON PRESS has an immediate vacancy for a Science Editor for college textbooks.

39. SCHOOL LEAVERS, WITH EXPECTATIONS OF A LEVEL CHEMISTRY A Junior Technician vacancy will occur in August.

40. SCIENCE RESEARCH COUNCIL RUTHERFORD HIGH ENERGY LABORATORY SCIENTISTS FOR NEUTRON BEAM RESEARCH There are a few vacancies for neutron beam scientists in the Neutron Beam Research Unit

41. TECHNICIANS OR JUNIOR TECHNICIANS REQUIRED Two vacancies exist for suitably qualified persons to assist with Bacteriological and Pathological research work.

42. W. 2. immediately G425. e MATERIALS RESEARCH We have a vacancy for SENIOR SCIENTIFIC ASSISTANTS holding H. N c

43. 417) a vacancy for which will occur on 1st october 1971 in the above Department.

45. SHELL Graduates and Technicians Chemistry/Biochemistry Shell Research Limited, have a number of vacancies for graduates and technicians in the Chemical Toxicology Division of their Tunstall Laboratory at Sittingbourne, Kent.

46. INSTITUTE OF TREE BIOLOGY There is a vacancy for a forester at the Institute of Tree Biology, with F. S. S. U. Applications with curriculum vitae and the names of two referees should be submitted to the Institute Secretary quoting Vacancy No. 128 not later than 23rd July, 1971 G447.

48. FRESHWATER BIOLOGICAL ASSOCIATION Vacancy for resident manager river experimental station near Puddletown, Dorset

49. The Agricultural Research Council invites applications for a vacancy at its Headquarters office in London for a Scientific Adviser to the Secretary of the Council in the fields of Soil Science and Plant Nutrition, with particular reference to plants

50. DEPARTMENT OF BIOLOGICAL SCIENCES SENIOR LECTURER/LECTURER II A vacancy either at the Senior Lecturer or Lecturer Grade II level exists in the Department.

51. UNIVERSITY OF NEWCASTLE UPON TYNE CHEMICAL ENGINEERING RESEARCH A limited number of vacancies exist for graduates in pure

52. RESEARCH STUDENTSHIPS Basic and Molecular Virology Two vacancies are available for October,
Vacancies exist for suitably qualified graduates for RESEARCH LEADING TO THE DEGREE OF PH D Topics

Applications are invited for vacancies in the following Departments:

- Scanning Electron Microscopist Probe Analyst
- Technical Assistants Grade 1
- CHEMIST
- SCIENTIFIC OFFICERS/SENIOR SCIENTIFIC OFFICERS
- SK&F Organic chemistry Research
- Experimental Biologist
- Experimental Officer
- Senior Experimental Officer
- TECHNOLOGIST (Scientist with statistical skills)
- BOTANIST/HORTICULTURALIST

For more information about this vacancy write to the address provided.
80. ROTHAMSTED EXPERIMENTAL STATION Harpenden, Herts The Soil Survey of England and Wales has a **vacancy** for a Scientific Officer to assist with works on soil micromorphology and mineralogy.

81. This **vacancy** would be suitable for a young person qualified to H. N c. or H. N d. level in Applied Biology.

82. If there are **vacancies**.

**1995**

1. A **vacancy** exists for a postdoctoral Research Assistant to continue ongoing work characterising coherent and incoherent imaging systems in the presence of speckle.

2. A **vacancy** has arisen recently for a Project Leader to take responsibility for several technicians involved in the planning, execution and delivery of toxicokinetic and pre-clinical-clinical pharmacokinetic studies to GLP standard.

3. We currently have a **vacancy** for a qualified technician who holds a BTEC National Certificate in Science, BTEC HNC in Science (Applied Biology) or equivalent.

4. Leiston, Suffolk, IP16 4ur RESEARCH CHEMIST STABLE ISOTOPE ANALYSIS Chemistry department A **vacancy** exists in the Chemistry department for a Research Chemist (Band 6) to synthesise.

5. and currently has two **vacancies**.

6. Southampton Oceanography Centre The new SOC opens next summer as part of the University of Southampton incorporating the Institute of Oceanographic Sciences (IOS). These **vacancies** will be based at SOC.

7. Closing date for all the above **vacancies**:

8. Two **vacancies** exist in the following areas. 1 THERMOPHYSICAL PROPERTIES:

9. A **vacancy** exists in our Medical Oncology Unit based at St Bartholomew's Hospital for a Scientific Officer to join a group engaged in the analysis, in vitro treatment and cryopreservation of progenitor cells for autografting patients haematological malignancies.

10. COURSES & EVENTS LANCASHIRE UNIVERSITY SHORT COURSES OFFICER A temporary **vacancy** exists in the Institute of Environmental & Biological sciences (Division of Biological sciences), Continuing Vocational education for a short course development officer to work with Dr Sarah

11. We now have **vacancies** for three Scientists:

12. A **vacancy** has arisen to assemble a high quality compilation of the deep sea physical oceanographic data collected by UK laboratories in the World Ocean Circulation Experiment (WOCE), a ten-year experiment.

13. Undergraduates and post doctoral candidates are invited to apply for a variety of training **vacancies** within the NHS, starting in September 1995, in the following disciplines:

14. Through staff promotion we have a **vacancy** for a Senior Research Scientist to lead a group of five researchers researching pheasant behaviour, parasitology, sustainable harvesting, habitat management and feeding ecology.

15. An equal Opportunities Employer An International Centre for Education and RESEARCH UNIVERSITY OF OXFORD UNIVERSITY OF OXFORD Inorganic chemistry Laboratory Postdoctoral Research Assistant There is a **vacancy** from 1 April 1995,

16. We now have a **vacancy** for a graduate

17. Queen Margaret College EDINBURGH established 1875 UNIVERSITY OF CAMBRIDGE Technical Officer in the Department of Engineering A **vacancy** exists for a Technical Officer in the Department of Engineering's Electronics Development Group.

18. Due to continuing investment and expansion at our West Malling and Maidstone sites, we have **vacancies** for the following positions:

19. and are interested in hearing from applicants with appropriate experience for **vacancies** planned for the near future.

20. Two **vacancies** exist as follows:

21. If you have any queries regarding this **vacancy**, contact Claire Fisher, Tel:

22. Pharmacology Applications are invited for the following research **vacancies** investigating the pharmacology of cytotoxic drugs. 1. Research Assistant (Grade 1a)- Salary up to £17
23. Currently we have a number of vacancies for individuals who would enjoy the challenge of solving complex problems to generate leading edge products.

24. As a result of continued expansion, the following vacancies now exist within this dynamically growing Company.

25. Related Pay Two vacancies exist for state registered Biomedical Scientists and Trainees within the Biochemistry Department at Wexham Park Hospital.

26. 13 April 1995 NLBTC operates a No Smoking Policy WORKING TOWARDS EQUAL OPPORTUNITIES NORTH LONDON BLOOD TRANSFUSION CENTRE POSITIVE ABOUT DISABLED PEOPLE OPPORTUNITIES AT CAB INTERNATIONAL

27. The Department of Medical Microbiology presently have two vacancies for individuals who are committed to excellence in health care. The Microbiology Department is a progressive, well-equipped, fully computerized laboratory.

28. NRA Anglian & Southern Region MRC Medical Research Council LABORATORY OF MOLECULAR BIOLOGY CAMBRIDGE Graduate/Postgraduate Research Assistant Protein and Nucleic acid Chemistry Division A vacancy.

29. At present there is a vacancy in the Organic Analysis Section of the laboratory for a Technician.

30. PAD/09 A vacancy has arisen for a Biomedical Scientist Grade 1 in this busy department.

31. We are seeking top quality scientists to fill the following vacancies in our Product Development and Quality Control areas.

32. TEAM MEMBER, FORMULATION The second vacancy exists for a graduate formulation scientist to join one of the teams.

33. There are currently two vacancies for qualified pharmacists or chemists in our Quality Control Department.

34. QUALITY CONTROL OFFICER The other vacancy is for a QC Officer.

35. RECKITT & COLMAN PRODUCTS The University of Auckland-New Zealand Senior Lectureship/Associate Professorship in Science education Department of Education Vacancy UAC. 575.

36. 14 July 1995 Joint Lectureship in Education and Science Faculties of Arts and Science Vacancy UAC. 580 Applications are invited for a joint Lectureship in Science education.

37. Lectureship (non medical) in Toxicology (Limited Term-5 Years) Department of Pharmacology and Clinical Pharmacology School of Medicine Vacancy UAC. 583 Current Research in the Department of Pharmacology.

38. 5 July 1995 Lectureship in Biological Anthropology department of Anthropology Vacancy UAC. 574

39. The University of Auckland seeks a biological anthropologist for a tenable Lectureship in the Department of Anthropology. Applicants should have a Phd at the time of appointment.

40. Closing date 19 June 1995 Conditions & Procedures for All Vacancies Commencing salary (per annum) will be established within the ranges.

41. Please quote relevant Vacancy Number in all correspondence W B NICOLL.

42. And control scientific data in compliance with applicable regulatory requirements. In a vacancy for a Records Manager/Archivist has arisen in the Records Management Section.

43. And University Assistant Lecturers Vacancies exist for University Lecturers which vacancy it applies.

44. NAME ADDRESS POSTCODE AGE ARMY OFFICER BE THE BEST CLRC Research Assistant (18 month fixed term appointment) We have a vacancy for a Research Assistant as part of the Human Capital.

45. Has a vacancy for an Entomologist to head the small Entomology Section.

46. We currently have vacancies for the following positions;

47. Until then we have a vacancy for a Field Ecologist within CSL's Conservation.

48. The above vacancies are with TOP MULTINATIONAL COMPANIES and offer additional benefits.

49. DEPARTMENT OF CLINICAL LABORATORY SCIENCES Research Assistant A vacancy exists for a suitably qualified graduate to work on an MRC-funded research project.

50. We have several other pharmaceutical vacancies with international research based companies.

51. The Institute operates a no-smoking policy. MATERIALS SCIENCE GRADUATE Northamptonshire SATRA has a vacancy for a graduate with a materials science.
52.0181 362 6110 quote reference D5730. ih Institute of Hydrology Natural Environment Research Council HYDRO-ECOLOGIST The Institute has a vacancy for an innovative, 53. We also have vacancies in a range of disciplines in our other divisions. 54. but is appointed not may be considered for other specialist vacancies. 55. Vacancies often arise in the food industry 56. E-mail cais@ucl.ac.uk The University of Auckland Director, Nuclear resonance Facility Department of chemistry Vacancy UAC. 614 The Department of chemistry is seeking to appoint a Director for its Nuclear Magnetic resonance (NMR) Facility. 57. Lectureship in Environmental Chemistry School of Environmental & Marine Science Tamaki Campus Vacancy UAC. 599 The University wishes to appoint a Lecturer in Environmental Chemistry at its new Tamaki Campus 58. Conditions & Procedures for All Vacancies Commencing salary per annum will be established within the range NZ$41,000-NZ$55,000 (Director) or NZ$39,500-NZ$50,000 (Lecturer). 59. Please quote the relevant Vacancy Number in all correspondence. 60. As a result of an internal group transfer a vacancy has arisen for a SCIENTIST To work on the development of new surfacing materials and processes for advanced coatings for internal combustion engine components. 61. ENGINEERING AND MEDICAL PHYSICS Biomedical Scientist/Engineer A fixed term vacancy, two year period, has arisen for a Biomedical Engineer to design 62. We currently have four vacancies at our R&d centre in Cambridge, within our Polymer and Analytical Chemistry laboratories. 63. All UBHT vacancies are suitable for Job Share arrangements 64. There are vacancies in the current year for two Trainee Clinical Scientists who will spend three years undergoing training in various PHLS laboratories. 65. ADAS FOOD, FARMING, LAND & LEISURE VACANCIES FOR CONSULTANTS Resource Planning Team, Reading ADAS is a leading consultancy to the land-based industries of England and Wales. 66. We have two vacancies for consultants in our Resource Planning Team at ADAS Reading. 67. The vacancy has arisen within the Surface Technology Department, 68. Assistant Conservation Officers English Nature currently has two vacancies for Scientific Officers based at the Taunton office. 69. and are currently looking to fill the following vacancy: 70. we currently have two vacancies in statistical computing: 71. and covering letter, quoting relevant vacancy number(s) to Miss A. Gallagher, Personnel Officer, Westlakes Research Institute, The Princess royal Building, Westlakes Science & Technology Park, Moor Row 72. Vacancy exists for the following position: 73. ANIMAL WELFARE SCIENTIST Worplesdon from £16,168 We have a permanent senior scientific vacancy in our Conservation and Environmental Protection Group. 74. These vacancies provide an ideal opportunity for suitably qualified scientific staff to join the leading UK contract research and development group in the UK, 75. A vacancy for a FORENSIC BIOLOGIST with at least five years experience in the examination of body fluids, fibres, hair etc. 76. Sales Vacancies Sales experience not essential for a wide range of laboratory plastics aimed mainly at life science research-UV/vis 77. Pursuing Excellence in Education and Research Working Toward Equal opportunity The University of Reading Structural Materials Research A vacancy exists for a Research Fellow to work in the Rope Research Group at The University of Reading 78. We also have vacancies in a range of disciplines in our other divisions. 79. but is appointed not may be considered for other specialist vacancies. Alternatively, 80. SCIENTIFIC OFFICER £11,138-£19,669 We have a vacancy in our Biomarkers of Intake and Trace element Studies team 81. UNIVERSITY OF ST ANDREWS School of Biological and Medical sciences RESEARCH TECHNICIAN A vacancy exists for a Research Technician, 82. HAWAII The Royal Observatories have a vacancy for an experienced scientist
83. St Andrews British Antarctic Survey Cambridge GEOGRAPHIC DATA ANALYST The Survey has a vacancy in its Mapping.

84. ASSISTANT GEOGRAPHIC DATA ANALYST Cambridge The Survey has a vacancy in its Mapping and Geographic Information centre for a graduate to assist with the research and analysis of geographical data for the compilation of new Antarctic topographic maps.

85. and toiletries formulation to fill several vacancies within top multinational companies As a specialist employment agency we are also keen to hear from industrially experienced chemical and biochemical scientists.

86. We currently have a vacancy at our R&D centre in Cambridge POLYMER APPLICATIONS TEAM LEADER Reporting to the Laboratory Manager you will play a key role in a dynamic laboratory handling a wide range of research & development projects.

87. and we now have a vacancy within this division for a SYNTHETIC ORGANIC CHEMIST to work on new products and processes.

88. Land and Mineral Resource Engineers have a vacancy for a Senior Environmental Chemist at each of our Stourbridge (post 1)

89. with a salary in the range of £16-20 K. If you are interested in these vacancies.

90. NORTHWICK PARK AND ST MARK'S NHS TRUST DEPARTMENT OF CLINICAL CHEMISTRY TRAINEE/MLSO 1 £7, 773-£9, 816 P. A. INC. We have a vacancy for a Trainee MLSO.

91. There exist for CLINICAL SCIENTISTS to join the tissue typing team.

92. ANALYTICAL CHEMIST A vacancy exists for a graduate with a minimum of 3 years experience in pesticide residues analysis. Candidates should have practical knowledge of extraction.

93. The R&D Department has four vacancies in its Product Development, Pilot Plant and Virus Safety Units.

94. Albumin and Immunoglobulin Product Development A Research Assistant vacancy exists for a graduate in life sciences to work on the characterisation.

95. Pilot Plant A vacancy exists for a biological.

96. have a vacancy for a PROJECT ASSISTANT Development Department to work as part of a team in the Company's Development Department.

97. LONDON SCHOOL OF HYGIENE & TROPICAL MEDICINE LONDON SCHOOL OF HYGIENE & TROPICAL MEDICINE GEOGRAPHICAL INFORMATION SYSTEMS SPECIALIST IN THE ODA MALARIA PROGRAMME We have a vacancy for a specialist in Geographical Information systems (GIS).

98. We have a vacancy at our Basingstoke site for a Development Chemist/Biochemist who will be involved predominantly in ongoing product development of our culture media product range.

99. The Center requires highly competent and motivated individuals to fill the following positions and expected vacancies for its Bangladesh Office:

100. ICLARM BANGLADESH OFFICE/SENIOR AQUACULTURE SPECIALIST (Expected Vacancy) The Officer-In charge will manage ICLARM's Bangladesh Office.

101. a vacancy has occurred for a Research Fellow in the area of Microwave Properties and Applications Of high Temperature Superconductors.

102. and Research MLSO1 Immunohaematotogy Department NATIONAL BLOOD SERVICE We have a vacancy for a Medical Laboratory Scientific Officer (MLSO1) in the busy and active department at the North London Blood transfusion Centre.

103. publishing division of the Institute of Physics, has a vacancy in its Production Department for a Desk Editor to work, under the supervision of a Production Editor, on a range of physics and physics-related international research journals.

104. Basingstoke, Hampshire, RG21-6zy (01256) 332220 or Fax (01256) 3332021 SANDOZ Sandoz Pharma Ltd has a vacancy for a LABORATORY HEAD in the Analytical R&D Department at its headquarters in Basle, Switzerland.

105. A job share partnership could be considered for this vacancy.

106. The Natural history Museum currently has a vacancy for a Junior Research Fellow in the Insect-Plant Division of the Entomology Department to undertake original research on the coevolutionary relationships between insects and their hosts.

107. ALLMAN@BBSRC. AC. UK. WWF UK (World Wide Fund For Nature) the leading international conservation organisation has a vacancy for an AID.
108. £8,627 to £11,253 A **vacancy** exists for an experienced MLSO 1/Cytoscreener in our busy integrated department.

109. HELIX RECRUITMENT specialises in placing technically skilled people with commercial aspirations in exciting sales oriented roles MOLECULAR BIOLOGISTS SALES **VACANCIES** Molecular biology-Scotland Molecular biology-London/E

110. These are immediate **vacancies**

111. A **vacancy** exists for an Information Scientist in the Legislation Department,

112. The **vacancy** is at Higher Scientific Officer level

113. Following restiting of the Drug Information Department to Welwyn Garden City, we now have a **vacancy** in this area.

114. We have several **vacancies** for experienced graduate scientists.

115. The more senior of these **vacancies** will probably require a Phd

116. The following **vacancies** are currently available:

117. 183 The Institute has **vacancies** for graduates with experience in molecular biology techniques and basic computing.

118. KISR has a **vacancy** for a:

119. Bioanalyst We have **vacancies** for recently qualified scientists who are looking to develop a career in bioanalytical science primarily using state-of-the-art LC-MS/MS. The work will involve the development and validation of assay methods and the analysis of samples of clinical or other

120. We will soon have a **vacancy** in our small but busy Environmental Health Division.

121. UNIVERSITY OF CAMBRIDGE Department of Engineering University Lecturer or Assistant Lecturer in Heat Transfer A **vacancy** exists for a University Lecturer

122. We have a **vacancy** in this busy haematology department.

123. allowances paid for shift working There are **vacancies** for Technicians in our Immunoglobulin Processing Section (Reference:

124. No. 94357 The Aberdeen Royal Hospitals NHS Trust has a **vacancy** for an experienced physicist to act as its head of radiation protection service.

125. A **vacancy** has arisen for an experienced Quality assurance auditor in the Quality assurance Department.

126. A **vacancy** has arisen for a Microbiology Technician who will have sole responsibility for maintaining a microbiology suite and terrestrial research laboratory

127. The **vacancy** is for five years on a fixed-term contract;

128. Institute of Terrestrial Ecology Natural Environment Research Council Nationwide **Vacancies** With Market Leaders Easyline ISO 9002 Scientists & Technicians from all industrial fields required

129. HPLC ANALYSTS REQUIRED FOR START NEXT WEEK Temporary and Permanent **vacancies** for Pharmaceutical Analysts in the North and South East.

130. If you have any queries regarding this **vacancy**, contact Kelly Rose, Tel:

131. These are immediate **vacancies**

133. MOLECULAR BIOLOGY COMPUTER OFFICER £14,012-£19,261 pa 3 year fixed term appointment The Museum's Department of Zoology currently has a **vacancy** for a Molecular biology Computer Officer to set up

63. in the continued expansion of the company in an exciting variety of disciplines, particularly cell culture, virology, immunology and flow cytometry.
64. NATIONAL BLOOD SERVICE GV Instruments Reflecting 25 years experience in Mass Spectrometry
GV Instruments Ltd is entering an exciting growth period
65. Equality of opportunity is College policy The University of Edinburgh THE UNIVERSITY OF EDINBURGH The University of Edinburgh is an exciting, vibrant,
66. Most of our studentships are available for students from any country of the EU. Take this exciting opportunity to be involved in an innovative and expanding Chemistry Research School.
67. "PSRES have extraordinarily exciting, cutting-edge research,
68. A challenging and exciting opportunity exists for a Leader of the Sample Environment Team.
69. which offer the opportunity to make an impact in an exciting and fast-paced new venture.
70. Ideally we are seeking a motivated and reliable Clinical Physiologist (Neurophysiology) to work on a variety of exciting clinical projects.
71. Tuesday 26 july 2005. future medicine www. futuremedicine. com SENIOR EDITOR An exciting opportunity to join a rapidly expanding publishing team has arisen at Future Medicine, a publisher of high-quality
72. and is an opportunity to be at the beginning of a very exciting project.
73. Developmental Gene Expression Analysis Centre This exciting new 3 year project brings together developmental biologists, bioinformaticians,
74. and represents an exciting opportunity to get involved with world-class research in a dynamic area of sensor development.
75. LS/077/05 Salary circa £16, 000-£18, 000 p. a. Applications are invited from enthusiastic researchers seeking to develop their career in an exciting, challenging and internationally competitive environment.
76. We are currently seeking to recruit a resourceful and motivated individual to an exciting role as a Business Development Manager at King's. As part of the Business Development Team,
77. this is an exciting opportunity to enhance your knowledge
78. and welcome applications from all sections of the community SENIOR EDITOR future medicine www. futuremedicine. com An exciting opportunity to join a rapidly expanding publishing team has arisen at Future Medicine, a publisher
79. We have exciting opportunities for life sciences graduates.
80. This is an exciting opportunity for a bright and able graduate,
81. and introduces an exciting opportunity to work within the QA Product and Systems Introduction team.
82. In order to register your interest in this exciting opportunity,
83. Join us at this exciting time
84. Thames Water is an equal opportunities employer. www. thames-water. com Thames Water RWE Group HMR Head of Statistics and Data Management An exciting opportunity
85. Campus near Potters Bar) We have an exciting position for a full-time Biochemistry or Histology Technician at our Hawkshead Campus near Potters Bar.
86. The Group offers an exciting multidisciplinary environment with research in progress applicable to energy, waste, oceanography
87. PARD0018 Senior Scientist, Solid & Parental Dosage Forms This is an exciting opportunity for an experienced pharmaceutical scientist to play a leading role in projects.
88. Further expansion in this important analytical field has resulted in exciting opportunities for bioanalysts to join the Immunoassay group
89. Exciting developments are occurring in fields of nanotechnology
90. or for applying physical technologies to textile materials, to this exciting role.
91. New Scientist Jobs www. newscientistjobs. com M THE MACAULAY INSTITUTE research today for land use tomorrow POPULATION ECOLOGIST This postdoctoral position provides an exciting opportunity to investigate the role of trophic interactions in driving the unstable
92. Each of these exciting positions offers the competitive salary
93. Milton Keynes General NHS Trust, Eaglestone, Milton Keynes MK8 5ld POSITIVE ABOUT DISABLED PEOPLE Exciting opportunities at Inveresk Inveresk, a Charles river Company, provides fully comprehensive
94. This is an exciting development
95. 800 Plus benefits+London weighting (where appropriate) As a Scientist you're probably attracted to the wealth of exciting projects on the horizon.
96. and committed to gender equality for women in SET visit our website (www.setwomenresource.org.uk) for full details of the following exciting opportunities and further information about the Project.

97. Catalyst Forming Development Scientist An exciting opportunity has arisen within Process Catalysts
98. Join us at this exciting time and experience significant visibility,
99. and could be an exciting opportunity for an experienced molecular geneticist.
100. It is an exciting opportunity to help develop
101. Proximagen provides an exciting and rewarding environment for individuals wanting a challenging career in the pharmaceutical industry.
102. This is a rare and exciting opportunity to provide strategic input
103. This is an exciting opportunity
104. WWF, the global conservation organization, has a new exciting position within its Global Species and Marine programmes as:
105. and support staff in the Epidemiology workgroup engaged in an exciting range of research
106. For more details visit www.prolysis.com Please submit your CV to enquiries@prolysis.com Application deadline 18th November 2005 future medicine www.futuremedicine.com

ASSISTANT EDITORS We have exciting opportunities
107. Cardiovascular disease and Analgesia. £competitive salary+benefits Central Scotland We have a unique and exciting opportunity for a high pedigree scientist to develop the role of Senior Director, Research Alliances at our research facility
108. which offers an exciting environment and access to state-of-the-art research facilities.
109. CHIEF CLINICAL CYTOGENETICIST NATIONAL CENTRE FOR MEDICAL GENETICS £92,373-£106,366 This is a unique and exciting opportunity to direct the cytogenetics service for the whole Republic of Ireland, a population of approximately 4 million.
110. We have a number of exciting opportunities within our Product Development
111. In these key roles, you’ll play your part in supporting the science of the future over a vast range of exciting areas.
112. and would like to work in an exciting and challenging environment,
113. innovative and have the desire to contribute to the development of Small-an exciting new micro-and nanoscience journal.
114. Now is an exciting time to join us in the School as we continue to expand our Biomedical sciences course portfolio with flexible learning initiatives and introduction of an integrated degree pathway.

2006

1. Sherwood has pioneered a broad range of exciting new coatings
2. Are you looking for an exciting career in software design and development?
3. This is an exciting opportunity for a bright and able graduate to develop rapidly in the drug analysis section of a small, busy laboratory.
4. Senior Pharmacokineticist An exciting opportunity has arisen to join a high performance team in the pharmacokinetics section of the Global Metabolism and Pharmacokinetics Department.
5. The Ventures Division works to identify exciting viable technology
6. An Exciting Opportunity
7. Centre for Zoonosis Research Lecturer/Senior Lecturer in Risk Analysis £26,401-£50,589 pa As part of an exciting new collaboration,
8. The post offers an exciting opportunity to conduct research at the interface between industry
9. 000*Career opportunities exist within the exciting global,
10. As suppliers of water and wastewater services to millions of customers we face all sorts of exciting challenges-from planning for climate change and finding more sustainable solutions to energy and water use,
11. You will focus on the areas of water recycling and water efficiency from pilot schemes to full-scale implementation on a range of exciting new sustainable water initiatives.
12. This is a rare and exciting opportunity for a veterinary virologist of vision, drive and ability to step into the international spotlight, working at one of the world’s premier veterinary institutes.
13. and yet the rich variety of tea taste properties still provides exciting opportunities to expand the market for both hot and ready to drink beverages.
It is an exciting and challenging role in

This is an exciting opportunity for a synthetic organic chemist with a desire to join a lively multidisciplinary team.

'Leading Science for Better Health' Scientist/Chemist required by Paroxite, well known supplier of Innovative and Exciting Raw materials to manufacturers of Cosmetics, Personal Care and Pharmaceuticals.

Annexe 4-4-1 Occurrences de ASSIGNMENT dans BNC

Here is a random selection of 50 solutions from the 1139 found.

A1B 1997 But Pound has not forgotten what his assignment is.

ABP 162 Again, we have the rules about the assignment of rights under contract.

ABP 254 On the other hand, the new kind of assignment resembles the equitable assignment in being subject to equities, i.e. to claims or defences which the debtor or other person might have set up against the assignor.

AJY 268 At Ayr today, Tom Troubadour, denied a run when slightly injured just before the Ritz Club Trophy Chase at the Cheltenham Festival, should be fresh and well for the William Hill Scottish National, which appears a more comfortable assignment.

AMW 329 I thought I was off on the usual, rather tedious type of assignment!

API 94 ‘This is the ideal type of assignment for me.

B2G 1546 It would, however, be totally wrong to assume that all apparitions are angels on assignment.

B3D 1042 In recent years teaching in schools has become more project and assignment oriented with less emphasis on teaching and more emphasis on independent learning in the curriculum.

BME 283 It must be remembered however that outgoing costs and a minimum level of profit should be recovered on each assignment and the practice of ‘buying work’ should be discouraged at all times.

BME 383 The way in which the time-frame is applied to each assignment is covered in the following section on Job control.

BPH 674 The new Act abolished the old method of arranging with creditors by a deed of composition, assignment or otherwise ‘which has for so long a time disgraced our law’.

C8Y 12 The thought of entering the disaster area of an elderly widow's grief and shouldering some of the responsibility for helping her to bear it, and to rebuild what is left of her life, is enough to create feelings of anxiety in anyone; and admittedly this can be a very difficult assignment, for not only will you be well aware that you are unable to give her the one thing she really wants — the return of her husband — but you will feel, as we all do when faced with the bereaved, that their personality seems suddenly to have been crushed like a flower under the heel of a vandal, showing it to be so fragile and vulnerable that almost any attempt to revive it would seem to be doomed to failure.

CA4 465 THE ASSIGNMENT PROBLEM

CBG 1652 We will be looking for another assignment for him but it looks unlikely until next winter.’

CBH 230 Anyone having responsibility for an assignment must have sufficient authority delegated to him to ensure the success of the assignment.

CCU 704 14 ASSIGNMENT AND SUBCONTRACTING

CDF 2235 There is no need to invent imaginary names: in fact, if you were doing this report as an assignment, you could put your tutor's name opposite the ‘To’.
I've just come from the Foreign Office, and you're immediately on a new assignment.

Shamlou's assignment would be coordinated from the Iranian mission to the United Nations in Geneva.

The field-mapping training officer with the Geological Survey Department completed his assignment during the year.

This lifestyle may be unsuitable for some women and boredom can lead to a couple's failure to complete an assignment, even to breakdown of their marriage.

Cadbury Schweppes and Sainsbury would not consider calling in headhunters to search for jobs paying less than £35000: Sainsbury once considered employing a search firm for a £25000 post as manager of a depot, but decided this would be a waste of money, and gave the assignment to one of Britain's largest search/selection/advertising businesses, MSL.

Like Egon Zehnder, fees are charged on the basis of time and difficulty of each assignment, and not on the successful candidate's salary; a minimum fee of £20000 is quoted.

The appointment of an executive search firm to an assignment was very largely dependent on that firm being recommended by a satisfied client within an informal corporate network; shoot-outs were rare in the 1960s and many companies were loath to give business to a firm on the basis of their literature and/or presentations by consultants; so the success of early searches was crucial.

Stork's approach, as it has evolved, is marked by a preference for more experienced consultants with line management experience rather than younger graduates who just have MBAs; and for sending two consultants on every assignment, who handle the job 70/30%.

The strategy of teamwork on each assignment of a director, consultant and a researcher has worked well in producing an impressive completion rate and concomitant large amount of repeat business.

This historic search of 1959 was an assignment to find a Chief Executive for ITT, the powerful but then rather dormant telephone equipment corporation, which had been run by a dynasty of ex-service leaders.

His most important assignment was his appointment as proctor for Edward at the court of France in 1330 and 1331 to discuss Edward's homage for Aquitaine and Ponthieu.

Tom Lawlor, another noted Irish photographer, is on record as pointing out that too many photographers assume that every assignment requires the lensperson to be enveloped in a labyrinth of cameras, telescopic lenses and what-not, whereas he invariably goes out on a shoot with very basic equipment and no accessories.

The Chinese definitions are complex: there are new entrants to the job market who are 'waiting for employment'; those who have become unemployed because of new reforms which include a bankruptcy law; those who refuse job assignment; concealed unemployment where labour has been assigned to enterprises to maintain a fiction of full employment; and surplus labour — peasants with little or nothing to do — in the rural areas.

Every student should hand in his assignment by Tuesday.

Every student should hand in his or her assignment by Tuesday.
When I asked you earlier where I fitted into the assignment you said that I'd find out soon enough.

A third party may claim that treaty rights have been assigned to it, or a party may claim that it has made an assignment and is thus discharged from that particular responsibility under the agreement.

Claims of secret assignment should be rejected as incompatible with the other parties' right to performance.

Has anybody actually started their assignment?

For the formal semanticist, these elements are required in the assignment of values to indexicals such as I, you, here and now.

I suspect, however, that the need for a task force, its assignment, its composition, and its leadership will have to be decided on case by case.

The lack of an objective set of standards or principles to govern effectiveness measurement systems creates the potential for two unique problems that may affect the conduct of a program results review assignment.

Some statuses are relatively fixed and there is little individuals can do to change their assignment to particular social positions.

They then sought to recover this sum and costs from Mr. Mahmoud under the covenant for indemnity contained in the assignment of 8 January 1986.

In the 1974 licence to assign C.T., then itself about to take an assignment of the lease, entered into a direct covenant with the landlord to pay the rent and observe and perform the covenants and conditions on the part of the lessee contained in the lease during the residue of the term.

On the same day, an assignment was entered into between C.T.

If the bank pays the assignor after receiving notice of the assignment he must pay again: Jones v. Farrell (1857) 1 De G. & J. 208 and Brice v. Bannister (1878) 3 Q.B.D. 569.

An assignment of a deposit, in whole or in part, made while a bank is trading normally was not struck down.

How section 60(2) is to be construed and applied in such a case, or in the equivalent case of an assignment, is a question that need not be decided in the instant case.

I have to look at the matter more broadly, and consider also the effect of a valid assignment made before winding up became an imminent prospect.

Refusal of an assignment does not normally result in any disadvantage to the casual worker, but frequent refusals, even with good reason, are likely to diminish his chances of having offers made since they put his availability into question.

If it were too small, the ‘single’ restriction might be removed; if the whole family also needed to be sent to Japan this would add to the assignment costs, which might be an acceptable price to pay in order to send the right person.

‘Constant changes in teaching patterns and assignment based learning means standard texts are inadequate, and it is hard to find authors who can produce appropriate material.
For more than half an hour Adam took Billie through his plan for the next stage of their self-initiated assignment.

On the other hand, when P does terminate immediately, SEQ (P, Q) behaves like Q modified to take account of any assignment by P.

a multiple (simultaneous) assignment to each free variable of x (the parameter of the form).

‘How pleasant, then, for you to relax on this assignment,’ Roman countered smoothly, a steely note beneath the surface, ‘knowing that family friendship absolves us from the need for stiff formality.’

Similarly, if debts due to the company are subject to a floating charge, the interest of the floating charge holder will be subject to any lien or set off that the company creates with respect to the charged assets prior to crystallisation, for a floating charge is not regarded for this purpose as an immediate assignment of the chose in action, it becomes such only on crystallisation.

Neither of them knew him, the assignment wasn't exactly official.

Appalled by the Flight 103 disaster, perhaps more than most as a result of his recent experiences, but still entirely unaware of any possible connection between his Cyprus assignment and the bombing, Coleman appeared with Tom Brokaw on NBC's ‘Nightly News’ without realizing that, inactive or not, he was still expected to clear such engagements first with the DIA.

In linear molecules, only $\Pi$ states give a spin-orbit splitting, and this can aid in the assignment; similarly in non-linear molecules only $E$ states (where the electron has been removed from a molecular orbital of $e$ symmetry) show the effect.

Fig. 5.24 shows how such measurements can be used in the assignment of bands to particular vibrational modes.

We have at last assembled all the information we need to allow the complete assignment of the vibrations of a moderately complicated molecule.

‘Money has been offered and a very large amount, so it seems best to accept the assignment thankfully.

SUSAN MacINNES, Administrative Officer — Curriculum, joins SCOTVEC from an assignment with the Property Services Agency Section of the Civil Service.

Reference to this assignment will be made in the course of the dictation.

The examination will consist of 6 assignments — 5 pieces of dictation and a manuscript assignment.

The assignment will involve writing in an official capacity to an organisation concerning a straightforward business transaction.

A study of the news media is not properly within the scope of this assignment, but the topic of channels is necessary to a consideration of communication and a cursory look at the nature and availability of various media seemed in order.
In addition, it can utilise the power of non-verbal signals as discussed in section 2 of this assignment.

'I work with Mr Mitchell or I refuse the assignment,' she snapped, her suspicions again aroused at this insistence on women only.

'It leaves me wondering why you should have been chosen for this very tame assignment.'

Because it suddenly occurs to me that I might have been left alone to get on with this assignment if my divisional head hadn't beamed in on my activities and seen something she didn't like in my relationship with Rainbow.

Being treed by the great wonder-rabbi Shmuel ben Issachar might be written off as an occupational hazard; being trapped — on an assignment officially aborted-by an undead amateur is unforgivable.

A structure to the assignment should be established from the outset.

prestige assignment

The scale of the assignment will also influence MAS's approach.

If the lease contains an absolute prohibition on assignment, there is no obligation on the lessor to give consent.

Assignment letters
As discussed at our initial meeting, you have asked that we do not inform your auditors of our involvement on this assignment.

We would propose to approach the assignment in the following manner.

If the vendor has the benefit of warranties given as a result of that earlier acquisition and they are assignable, then the purchaser could seek such an assignment.

Other joint agreements included the assignment of individual leaders of member countries to supervise and take responsibility for "implementing action" in six key areas identified by an independent West Indian commission.

Completeness, however, is not the only characteristic of assignment when it is combined with qualification.

With very few exceptions, in the chapters that follow, we shall need only be concerned with assignment that is combined with qualification; and, for the sake of brevity, we shall use assignment, alone, to mean assignment of qualification.

The reason for this in turn is quite straightforward: in any language which makes a distinction between nouns and adjectives, it will be natural to use an adjective when assignment of a property is required; it may sometimes be quite easy to find an adjective and a noun which express near enough — or even exactly — the same properties, and differ only in that one is an adjective and the other is a noun, but to use the latter for assignment is to risk conveying the unwanted imputation of "entity-hood" on top of the semantic value required (see Section 1.10); therefore when a noun or noun phrase is chosen it will normally presuppose that the construction is not that of assignment of a property but instead one of equation.

Certainly there are exceptions:(5) Alec's shoes are real leather Intuition leaves no room for hesitation in taking this as an example of assignment, with leather used purely descriptively, rather than of equation, but the occurrence of the adjective real indicates that leather is nonetheless a noun (this is no doubt partly possible because the adjective leathern has dropped out of use in modern English, and because leather itself is a mass noun able to occur without a preceding article).

Our proposal, then, is that postnominal position expresses the intensional pattern which contains an adjective linked to its head noun by assignment, while remaining part of the same phrase.

The syntactic relation which underlies them, assignment, is just that: a relation of assignment.

These differences of acceptability between prenominal and postnominal adjectives agree excellently with the difference between qualification and assignment.

Even if that, too, depended initially on the basic distinction of qualification and assignment, there is no reason to deny that finding each value preferentially in one of the two positions will lead to an association directly between value and position.

In fact, it seems inescapable that a special status must be allowed to the most basic layer of clause construction in any clause, joining the subject and the predicate, to use traditional terms, whether by assignment of qualification or assignment of equation.

‘Maverick limey has negotiated the hell-fire of the Brain and the almighty trail-boss Midwinter has summoned him for a special assignment.’

A5Y 974 This knowledge is also recursive, in that the competent policeman or woman needs to know which criminals have a common-sense knowledge about the activities and deployment of the police, which requires that they have the additional common sense to confound the criminal's working knowledge of the police.

A77 803 This was developed further during a deployment in the field to practise battle procedures and enable the battalion to see just how mobile Warrior is.

A9V 230 The second unit would be based around the XVIII Airborne Corps, and include a division of paratroops, an air cavalry division equipped with helicopters, light infantry divisions and a mechanised division equipped with tanks and mobile artillery, and all available for rapid deployment.

ABA 606 In Europe, NATO had accepted the deployment of US tactical nuclear weapons.

ACL 1109 The rallying point for the counter-attack against the deployment of sexuality ought not to be sex-desire but bodies and pleasures.’

ADD 683 Already after a few days it became clear that the German troops had not succeeded in repulsing the Normandy landing, and that the deployment of the V1 — rapidly dubbed ‘Versager I ’(‘Failure No.

ADD 781 Special reports from the regional Propaganda Offices on the echo of Hitler's New Year address admitted to a little disappointment about the lack of details of deployment of retaliatory weapons or the combating of the bombing, but otherwise resorted yet again to the usual empty clichés about restored morale.

ADK 1420 They are also skilful in their deployment of famous names.

ALN 744 Our data also suggest that the team model of professional/paraprofessional staff deployment has high potential for maximizing the contribution of available personnel to the helping process and, if paraprofessional social service workers are to function at their best level, not only do they require appropriate training but professional workers also need to be trained to work with them.

AM8 238 We will complete the deployment of the next generation of Britain's minimum nuclear deterrent.

ARC 1243 He made fourteen suggestions related to the recruitment and deployment of teachers.

ASB 1495 In 1984 the focus of the peace movement shifted to Cruisewatch, a ‘highly effective network of people organised to track and harass deployment exercises from the Greenham base’(Hinton, 1989: 193).

ASB 1589 The first is that the NRC co-ordinates strategy and the deployment of officers on a national basis in consultation with the Home Office, which may well have keen political interests in the matter to hand.
As ministers grappled with a quadrupling of oil prices after OPEC's deployment of the oil weapon in October 1974 and mounting industrial trouble at home, exhaustion and slipshod policy-making accumulated relentlessly, one problem compounding another.

These are the kinds of issues which an analysis of curriculum balance needs to address, and the head will need to be clear that the heart of the matter is the question of the deployment of time in ways which allow adequate attention to all parts of a curriculum.

First, the decision would strengthen the cohesion of NATO following a gap in Western defence which the Soviet Union's deployment of medium-range SS-20 missiles had exposed.

There were reasonable grounds for hoping that the Salt 11 Treaty would be ratified by the American Congress, prohibiting deployment of the cruise devices for two years.

For this reason, although it is possible for an armchair academic like me to imagine a number of very profitable working experiments taking place involving length of schooling, age of entry and patterns of teacher deployment, in fact such controlled experiments are not common.

Again, we advise un-proofed material in order to obtain fastest deployment.

In watching the Japanese build-up, a typical platoon deployment was made by a platoon of 2/4, with their forward posts having a wide view of Lete-Foho.

Management information regarding resource deployment and technical achievement against plan, cost generation against budget and programme change implications shall be provided by the Parties to the Project Manager in accordance with formats and timetables approved by the Project Committee and to meet any information requirements of IEATP in connection with the payment of Grant.

5.1 The Lead Organization shall appoint a Project Manager who shall be responsible to a Project Committee, comprising representatives of all the Parties to this Agreement, for the planning, progressing and reporting of the technical content of the project, deployment of resources and financial estimating and control within pre-determined timescales.

It is then assumed that if the child demonstrates a knowledge of the rules for producing or comprehending language in one setting, that knowledge will be transported with the child to any other setting and will be available for deployment in communicative interaction.

Following the rout of the Allied ground forces with the fall of France, it was considered vital to perfect methods to assist rapid deployment of men and equipment to the future battlefields of re-occupied Europe.

TDS.1 was responsible for the development of glider aircraft for the rapid deployment of personnel and equipment, their work resulting in the Hamilcar and Horsa designs.

An argument can certainly be made that, since it is the very characteristics of nuclear weapons which make their use illegal, any deployment of nuclear weapons which involves a threat of their use is an illegal threat of force.

However, their deployment is justified in nuclear ideology, not as a potential self-defence second-strike force, but on the basis that they will never have to be used, since their possession alone deters a potential enemy, and therefore it does not constitute a threat to use illegal weapons.

Since they accept that some types of nuclear weapons can be used in this way, the argument is designed to legitimise the development and deployment of tactical or ‘counterforce’ nuclear weapons.
and other weaponry associated with a shift away from Mutual Assured Destruction towards Nuclear Utilisation Target Selection (MAD versus NUTS: see Keeny and Panofsky, 1981).

**CHI 84** The police pursue policies of differential deployment (for example, swamping certain parts of London where the West Indian population is prominent) and ‘methodological suspicion’ (that is, routinely suspecting only a limited proportion of the population, particularly those with criminal records or known criminal associates).

**CLX 55** By the 6th, Germany had reached maximum deployment against Belgium and France, and some 550 trains carrying men and munitions were crossing the bridges of the Rhine every day.

**CLX 746** The German attack in Galicia, centred on Gorlice, began on 28 April and, by the concentrated deployment of great quantities of artillery, swept the Russians east in disarray.

**CM6 1311** Effective deployment of the larger reserves which this system made available required intricate staff work.

**CN2 1341** ‘Post accident flight tests revealed that deployment of speed brakes during the landing roll produced an horizontal stabiliser load condition spectrum which was significantly different to that used in the original design.’

**CN5 1048** Secondly, in their 9–13 middle school survey, the HMI looked at ‘associations between particular modes of staff deployment and overall standards’.

**CN5 1096** On the basis of this kind of evidence and interpretation, which recognizes the essentially social nature of teachers' developing curricular identities, commitments and pedagogical preferences, the improvement of teaching quality would seem better met by training and deployment policies which are less rather than more specialized in nature.

**CT2 145** It expected the initial ratio would be 1:1 during development, building to five clients to every server during deployment later on.

**CTR 390** Sun Microsystems Inc is spreading its favours around, and after doing a big deal with Oracle Corp on its manufacturing software, has now signed a new unlimited use licence for various database products from Sybase Inc, Emeryville, California for deployment in its operations.

**EA1 176** Nevertheless, its introduction must be accompanied by improved organisation of clinical services in the community, including better deployment of community psychiatric nurses to care for patients with severe long term psychiatric illness and the provision of essential resources.

**ECN 550** Television series such as ‘Colditz’ and ‘Planet of the Apes’, serve as a ready source of knowledge for the conventions of their games and in them we see the deployment of a rhetoric from which the pupils' associated theory of schooling can be inferred.

**EEN 81** But its full deployment demands and to some extent is now getting — a greater historical specification than many devotees of psychoanalysis would regard as altogether orthodox or proper.

**EFN 406** It was the first of many speeches in which by the measured and skilful deployment of moderate words he visibly affected the opinions of a crucial audience.

**EVY 441** Guidelines for Managers in the Deployment of Staff

**EVY 543** Does the deployment of staff reflect the skill and grade requirements of the wards/departments concerned?
Whether the unit utilises a staff deployment system which is based on internal rotation or a separate night staffing, there will be an established shift system.

For all his working of the flesh and his golden suntan and his deployment of pop philosophies and credos, Letterman is too contrived an individual to be successful with the sort of Frenchwoman — my gaze descends from the mountain to my backyard where they are pegging out a goatskin — whom he desires to play the part of Claudia.

Their deployment was accompanied by bizarre, often bloody encounters between Indonesians and Japanese garrisons.

The deployment of a relatively big budget and the use of a really big screen (Cinerama in major cities, Super Panavision 70 where projection facilities were available), together with a show of ‘serious’ ideas comparable to printed sci-fi, raised the status of the whole genre, and it has never since sunk back to the level of, say, stalk-and-slash movies in critical regard.

Throughout the social services there is a need for more and better training and better distribution and deployment of staff.

A few of the suggestions about the deployment of furniture were fairly generally rejected.

In Out Christine Brooke-Rose makes use of the schizophrenic’s unwitting deployment of figurative language as a psychological motivation for her use of it.

In August 1980 the United States assumed control of the naval facilities at Berbera for its Rapid Deployment Force.

This was indicated by the dispatch of British warships to the region, the construction of a major base on Diego Garcia, and the desire of the British cabinet ‘to set up its own rapid deployment corps, which will be used to support the convenient regimes in that region and suppress the national liberation movements there’.

Kuwait had been particularly concerned about the plans for an American Rapid Deployment Force.

Staff will probably move to different positions in the company and will ultimately leave for any of a number of reasons. Information about such movements is particularly important in the assessment of personnel policies especially those relating to recruitment, training and deployment.

SCOTVEC members described recent improvements in training and deployment of subject assessors, in opportunities for centres to enter National Certificate data via electronic media and in procedures for certificating students.

They determine the subjects for each day and the deployment of speakers.

That will be greatly for the security of western Europe and, it is to be hoped, will mean that, in time, there will be a more practical integration, exercising and deployment of our defence capability.

I can tell the House something about the right hon. Gentleman: he opposed the deployment of the cruise missile, and of Trident — something that he now says he supports.

Both the level of available resources and their deployment are constantly adjusted as necessary to counter the foreseeable threat.
The study is based on surveying the documentation of policy at all levels, the deployment of a national questionnaire and detailed investigation of practice in 10 schools.

Horticultural staff should evaluate such systems to see if they could be used to help in the efficient deployment of the Garden's workforce.

According to the report the administration was to develop two new "binary" weapons systems to augment three systems already in various stages of manufacture and deployment.

Most notably, it insisted on the Ukraine's right to have "its own armed forces, internal security troops and state security bodies", and to veto the deployment of Ukrainian citizens outside the republic for military service (a subsequent resolution, adopted on July 30, condemned the deployment of Ukrainian conscripts in peacekeeping duties in Transcaucasia and Central Asia, and called for all Ukrainian conscripts serving in other republics to be repatriated by Dec. 1).

Details of the troop deployment were formulated by the Saudis and Dick Cheney, the US Defence Secretary, on Aug. 6, and the next day Bush formally announced that King Fahd had requested that US ground forces and war-planes be dispatched to Saudi Arabia to deter Iraqi aggression; US combat aircraft and troops started to land at Dharhan in eastern Saudi Arabia that day.

GCC Defence Ministers met in Jeddah on Aug. 22 and agreed to reinforce the Peninsular Shield Force, the organization's Saudi-based rapid deployment force [see p. 34265].

On Aug. 10 it was agreed that five minesweepers would leave for the eastern Mediterranean, but their deployment in the Gulf was ruled out.

The first comprehensive attempt by the Pentagon to adapt US strategy to the changes resulting from the political reforms in Eastern Europe, and to accede to congressional pressure to reduce military expenditure, its relevance was immediately called into doubt as the USA mounted its large-scale military deployment in the Gulf crisis [see pp. 37631-41].

While both agreed on condemnation of the Iraqi invasion of Kuwait, they could not agree on any common wording regarding the deployment of Western troops in the Gulf, which Syria supported but which was strongly attacked by Iranian hardliners.

Shaikh Rashid, who was credited with transforming Dubai into one of the most prosperous trading centres in the Middle East, had in August 1990 supported the deployment of foreign and Arab forces to counter the Iraqi invasion of Kuwait [see p. 37636].

Referring to the effect of the new deployment on Saddam Hussein's policy, Bush commented that he hoped for sanctions to work within a two-month period, but that "if this movement of forces is what convinces him [of the need to comply with UN resolutions], so much the better".

Israeli response to deployment of Moslem militias in southern Lebanon

Following the Aug. 2 Iraqi invasion of Kuwait, Mubarak on Aug. 12 sent troops (estimated by Le Monde of Dec. 2 at nearly 20,000) to Saudi Arabia, after playing a key role in persuading delegates at the Aug. 10 Arab League summit in Cairo to denounce Iraqi aggression against Kuwait and to call for its immediate withdrawal and the deployment of "Arab forces" to help Saudi Arabia [see p. 37635].
The Soviet official news agency Tass reported that the committee had discussed questions connected with the exchange of information on military forces and the deployment of weapons systems belonging to member countries of the Conference on Security and Co-Operation in Europe (CSCE).

Fighting during deployment of army forces around Sidon — Subsequent deployment around Tyre

The measure, which would have involved the first overseas deployment of Japanese forces since 1945, was condemned by the opposition as unconstitutional (it was argued that Article 9 of Japan's post-war Constitution prohibited the country's participation in acts of collective defence) and by the governments of many of Japan's neighbours as an undesirable manifestation of nascent Japanese militarism.

Bosnia Hercegovina requested the deployment of UN troops, it was announced on Nov. 20.

At the Pattaya meeting the Khmers Rouges demanded the deployment of an additional 800 UN peacekeeping troops in Phnom Penh to protect their delegation.

Deployment of advance UN peacekeeping force

The Yugoslav Federal Defence Secretariat admitted responsibility for the "undesired and tragic accident", and the immediate suspension of Yugoslav air force commander Col. Zvonko Jurjevic suggested that the Yugoslav government was hoping to prevent the incident from impeding the deployment of UN troops.

Following the admission of both Azerbaijan and Armenia to the Conference on Security and Co-operation in Europe (CSCE) in January and to the UN in February [see p. 38745], leaders in Russia, Armenia and Nagorny Karabakh called for the involvement of CSCE representatives and UN forces to guarantee peace, but the Azerbaijani leadership resisted attempts to "internationalize" the conflict, and on Feb. 5 vetoed the deployment of peacekeeping forces.

Although this plan had the endorsement of Serbian leaders including Slobodan Milosevic, the President of Serbia, the troop dispatch had been delayed because Milan Babic, leader of the self-proclaimed "Serbian Republic of Krajina" within Croatian territory [see p. 38685], rejected the idea of the deployment of UN forces in ethnically mixed areas of Croatia, conceding only that they should be stationed on the front line between Serbian and Croatian forces.

The wording of the statement indicated a compromise between the US position, which had urged a stronger NATO commitment involving not only peacekeeping but also peacemaking (through, for instance, the deployment of ground troops to stop fighting in conflict areas), and on the other the French position, generally opposing an enhancement of NATO's role.
Amid allegations in early June that rebels loyal to the National Patriotic Front of Liberia (NPFL) led by Charles Taylor were obstructing the deployment of peacekeeping troops of the Economic Community of West Africa States (ECOWAS) Monitoring Group (ECOMOG), six Senegalese ECOMOG soldiers were reported to have been killed in NPFL-held territory.

According to this document, the deployment of such forces would be conditional on consensus in the Council of Heads of State and on the consent of all parties to a conflict.

Deployment of peacekeeping forces

On July 26 the government authorized the deployment of 7,000 troops on the island of Sicily, the first such deployment seen in post-war Italy.

The Abkhaz authorities called the deployment an "occupation", referring to the April 1992 agreement which permitted Georgian National Guard troops to enter Abkhazia only with permission from the Abkhaz government.

They had asked for a greater number of "peacekeeping forces" to be sent, although Sahnoun on Aug. 12 was to emphasize that the proposed deployment was not to be regarded as a peacekeeping operation, but was to protect food distribution.

16 UNPROFOR members had been killed since deployment, it was reported on Sept. 14.

On Sept. 19 Aydid called on the USA to withdraw the marines, and also ruled out the proposed deployment of a further 3,000 UN troops, saying that their presence would not solve Somalia's problems.

The Chechen President Dzhakhar Dudayev [for whose election see p. 38582] demanded that leaders of the North Caucasus republics be pressurized to resist the deployment of Russian troops.

Moves to respond to the civil war in the former Yugoslavia centred on the deployment of 5,000 troops from NATO countries in Bosnia-Hercegovina by early December, and the protection of relief convoys heading towards its embattled capital, Sarajevo.

Relief organizations were reported to have said that they would pull out of Somalia while any such deployment took place.

This was followed by the opportunistic deployment in the Shetlands following the Braer disaster.
Annexe 4-6 Occurrences de SECONDMENT dans CAEMS

1971
1. a secondment arrangement will be considered.
2. Appointments overseas of duration from short visits of 1-2 months to longer secondments up to three years.
3. Serving members of the staff of schools and colleges may be eligible either for secondment at the full rate of salary appropriate to them, or for grant.

1995
1. Applications are invited for a post in the Department with secondment to the Optoelectronics Research Centre (ORC) thereby enhancing the holder's research time.
2. The Trust employs directly or on secondment over 50 research biologists on an annual budget approaching £2 million.
3. Three posts are available: (i) a permanent lectureship; (ii) a three-year replacement lectureship while Dr N. G. Pace is on secondment as Senior Principal Scientist at the SACLANT Undersea Research Centre; (iii) a one-year replacement lectureship.
4. Persons seeking a secondment to WCMC are encouraged to apply.
5. ICRISAT has a flexible approach to international appointments and welcomes enquiries from persons interested in working at ICRISAT while on secondment.
6. Based within the Department of Applied Biology this is a fixed term post from 1 October, 1995 to 30 June, 1996 due to secondment and involves the teaching, tutorial guidance and assessment of students within a range of Honours degree programmes.
7. ICRISAT has a flexible approach to international appointments, and welcomes enquiries from persons interested in working with the Institute while on secondment.
8. ICRISAT has a flexible approach to international appointments and welcomes enquiries from persons interested in working at ICRISAT while on secondment.
9. The appointee will be on secondment to Professor C. Pillinger at the Open University.

2005
1. The position is initially offered on a one year fixed-term basis and a secondment would also be considered.
2. Appointment will be for 3 or 4 days per week on a 4 year fixed term basis. Alternatively secondment from your existing employer would be welcomed.
3. The post will initially entail a 12-18 month secondment to the Molecular Oncology group at St Barts and The London.
4. This secondment may be extended for an additional period at the University's discretion.

2006
1. Temporary secondments to Dublin may be considered.
2. ASSOCIATE PROFESSOR IN QUANTUM INFORMATION SCIENCE (Secondment Opportunity)
3. The position is available on a full-time (fixed-term) basis for a period of up to 2 years or as a shorter period (no fewer than one six month period) as secondment opportunity.

2009
1. The scheme includes in-house work placements, secondments to industry, and formal training courses, ranging from combat, weapons and explosives, to naval architecture and nuclear systems.
2. A part-time secondment and expansion of R&D related activities in the ABPI mean that a Fixed Term Appointment (12 months) is required to support the Scientific, Technical, Medical and Regulatory Team (STRM).

3. The position is offered through the EPSRC; on behalf of Research Councils UK, part-time for 3 years and could be on a secondment basis from your current employer.

4. 4 year BBSRC CASE studentship with secondments to Unilever (Colworth)

5. The successful student will be based at King’s College London but will also have the opportunity to develop new skills and techniques whilst on secondment to Unilever (Colworth).

6. secondment to world-leading centres in USA, Europe, Asia and Australia for all students

7. a secondment for a minimum of one year would be considered. The posts will all involve frequent travel throughout the UK.

Ø

2009
1. Exciting Internship Opportunities at JPM
2. We have two internship vacancies offering tremendous opportunity to learn new skills and participate in this exciting industry.

3. Excellence will be rewarded by offer of permanent roles at completion of Internship.

4. The New Phytologist Trust offers an Editorial Assistant Internship with New Phytologist, one of the world's leading plant science journals.

5. You will be based at Lancaster University and over the course of the internship gain hands-on experience and training as an Editorial Assistant involved in the publishing, promotion and development of a journal.
Placement

1971
Ø
1995

1. Up to 10 fellowships will be offered to professional scientists and engineers - in any discipline - to allow them to spend between 4 and 8 weeks working with a media organisation. It is expected that fellows will continue to be paid by their permanent employers during the placement.

2. A five-month project placement with a participating industrial enterprise is an integral part of the course.

3. The course follows a modular format and features an industrial placement in the UK or Europe.

4. Industry-based project/placement - possibly in Europe.

5. MSc in Chemistry with specialisation in MATERIALS incorporating a placement in either INDUSTRY or a CONTINENTAL UNIVERSITY

2005

1. Both courses provide a core academic grounding in the culture, practice and communication of science complemented by practical media workshops on science writing, radio and TV production and a range of communication work placements.

2. Undergraduate project placements

3. There is an individually chosen 5-month research project, with several funded placements in environmental consultancies, industry, regulatory agencies and government organisations.

4. Your chance to win a Wellcome Media Training Placement with New Scientist

5. A two-week expenses paid media placement with New Scientist, £100 spending money and your essay published in New Scientist

6. Your chance to win a Wellcome Media Training Placement with New Scientist

7. A two-week expenses paid media placement with New Scientist, £1000 spending money and your essay published in New Scientist

8. Your chance to win a Wellcome Media Training Placement with New Scientist

9. A two-week expenses paid media placement with New Scientist, £1000 spending money and your essay published in New Scientist

10. The Clinical Pharmacology (Europe) group manages early phase clinical trials with the Company’s novel compounds over a broad range of therapeutic areas. This includes all aspects of clinical development including study design, study placement, study monitoring and concern for the protection of human subjects who participate in the clinical trials.

11. Several funded project placements in environmental consultancies, industry and regulatory institutions which match the employment profile for our graduates.

12. Both courses provide a core academic grounding in the culture, practice and communication of science complemented by practical media workshops on science writing, radio and TV production and a range of communication work placements.

13. We offer excellent non-clinical courses in a 5A rated interdisciplinary Research Institute within the Medical School - high success rate in job or academic placement.

14. “If the consultancies want experienced people, they should be prepared to take on more placement students,” he argues.

15. But we have tried to find students placements with these consultancies, and the response has always been very poor.

16. Applicants should be a life sciences graduate with one or two years practical laboratory experience in a drug discovery environment which may have been obtained through industrial placements.

17. You will hold a degree or PhD in Chemistry with some relevant experience which may have been gained in an industrial placement.
2006

1. Both courses provide a core academic grounding in the culture, practice and communication of science complemented by practical media workshops on science writing radio and TV production and a range of communication work placements.

2. An associate professorship in marine mammal biology is available immediately at the Institute of Biology, University of Southern Denmark (SDU) with placement at the Institute's Marine Biological Research Centre in Kerteminde.

3. M.Res. Environment and Development (Overseas Placement)

4. Your chance to win a Wellcome Media Training Placement with New Scientist

5. A two-week expenses paid media placement with New Scientist, £1000 spending money and your essay published in New Scientist

6. The programme has been recognised and supported by both the EPSRC and BBSRC, and includes industry-based practical placements with companies such as GSK, decode and Organon.

7. If you are a recent graduate in chemistry or a related subject, ideally with some experience from an industrial placement, are enthusiastic, innovative and looking to work in a busy and challenging environment, then this might be the role for you.

8. The range of services includes one-to-one action planning, networking, mentoring, courses (T160, a free, online Open University course), training and work placement.

9. With a Degree in Pharmacy or Life Sciences and ideally industrial placement experience, you will display a flexible and self-motivated approach.

10. We provide excellent training, personal development, career opportunities, international placements and a competitive package of salary, pension, private healthcare and other benefits.

11. We provide excellent training, personal development, career opportunities, international placements and a competitive package of salary, pension, private healthcare and other benefits.

12. One Year Graduate Placement

13. The position would offer the opportunity for placements across the business, but particularly within the operational water resource areas.

2009

1. Theoretical foundations for practice are complemented by a wide-range of clinical placements.

2. The scheme includes in-house work placements, secondments to industry, and formal training courses, ranging from combat, weapons and explosives, to naval architecture and nuclear systems.

3. We are currently seeking candidates for the following positions:

   ....

   Undergraduate Placements

4. You will help manage our involvement in the long-established Biotechnology Young Entrepreneurs Scheme, and manage our Policy Placements scheme for Ph.D. students.

5. An opportunity has arisen to join our Enterprise and Commercialisation Services Team to assist with our ambitious vision to accelerate our contribution to society and the knowledge economy through sponsored research, technology transfer, consultancy services and placement schemes.
**Training period**

1971

1. You alternate study with industrial **training periods** designed to give you experience and a firm grasp of all our engineering techniques and activities. [772-046 (1971) : 57]

1995

1. Applicants should possess ONC/BTEC Science Certificate, Diploma or equivalent and have at least three years relevant experience (including any **training period**).
2. Applicants should possess BTEC/HNC or Diploma, or equivalent, and have at least 7 years relevant experience (including any **training period**).
3. Applicants should possess BTEC/HNC or Diploma, or equivalent and have at least 7 years laboratory experience (including any **training period**).
4. Ordinary or Part 1 City & Guilds. In addition you will have three years' experience (including the **training period**) relevant to the duties of the post.

2005

1. During your **training period**, you will receive the necessary tuition, experience and resources in order for you to obtain the HPC/IBMS Competency Certificate for a Biomedical Scientist. [2502-022 (2005) : 62]
2. Sigma-Aldrich also reward you with a package which includes a comprehensive induction and **training period** to cGMP standards, a final salary pension scheme including Life assurance and Long-term disability benefits.

2006

1. Applicants should possess ONC/BTEC Science Certificate, Diploma or equivalent and have at least three years relevant experience (including any **training period**).
2. The Lilly Postdoctoral Fellowship Program is a focused scientific **training period** of up to three years, enabling a PhD to gain and expand scientific expertise while working under the direct supervision of a senior Lilly scientist.

2009

1. The **training period** is 12 months, after which adoption into a permanent position may be possible.

Here is a random selection of 50 solutions from the 57 found.

A64 229 From Vitebsk it was heard that a railway-wagon workshop meeting convened on 30 March with the aim of helping in the requisition of church valuables broke up because of the ‘thunderous outcries of believers’.

A64 274 Requisition of grain at the point of a gun during War Communism had proved a novel experience for the peasantry, but by 1922 that had been replaced by slightly more civilized methods.

ABA 407 Setting up of the Atomic Energy Research Establishment at Harwell had been agreed in October 1945; approval to build the first British atomic pile for the production of plutonium had been given in December; the Chiefs of Staff had stated their requirement for a British manufactured atomic bomb in January 1946; William Penney (later Sir William) had begun to plan the Atomic Weapons Section of the Armaments Research Establishment, of which he was Director, in mid-1946; the Air Ministry placed its first requisition for an atomic bomb on the Ministry of Supply in August; and Lord Portal, the wartime Chief of Air Staff, who had become Controller of Atomic Energy in the Ministry of Supply, sought a mandate from the Prime Minister to set atomic bomb development in train during the autumn of 1946.

AC2 1935 When she objected that she shouldn't be sent back empty handed, she was shown what had been written on her requisition.

ADW 358 He was helpless; he was not convinced, but he lacked the self-assurance and moral authority to go back to his office to use his official powers to requisition the people's promade.

AP1 1116 Cheque Requisition: TESOL

B09 776 When the Second World War broke out, the twenty-four older racks were broken up, following the requisition and closure of Marton Depot, where they were based.

B09 963 There was a daily requisition to carry troops to the Rossall rifle ranges, leaving between 8–30 and 9–30 and returning at the end of the afternoon.

BM9 1182 The evacuation of many schools gave military and civil authorities the opportunity to requisition the buildings for their own use.

CCS 415 He goes on to explain that this change was fundamental to the development of Combined Operations as he was then able to order the ships and craft, and requisition bases among the other resources controlled by the Minister of Defence (Winston Churchill).

CDP 101 any consequences of war, invasion, act of foreign enemy, hostilities (whether war or not), civil war, rebellion, insurrection, military or usurped power or confiscation, requisition, or destruction of or damage to property by or under the order of any government or public or local authority;

EDF 1443 Royal officers, under the charge of admirals, were despatched to the ports with instructions to impress or requisition vessels for the king's use, whether this was to transport men, animals, or equipment across the sea.

EEH 860 Disputes between dealers and between dealers and issuing houses fall under the competence of the arbitration court, who may requisition the ordinary courts for the purpose of taking evidence or in connection with enforcing the awards made by the arbitration court.

EEY 765 The original requisition of ships was uncontested, although many towns protested that they were too poor to provide what was asked.

EFN 2248 There was a damaging row about the requisition for scrap of his wrought-iron gates.

EVS 1654 In supplies, for example you often have to undertake almost military type operations I witnessed a group of 150 women who planned and carried out an ambush of the enemy to requisition bread and flour and the only arms they were carrying consisted of sticks and cords, To be a nurse also requires a lot of mental equanimity and physical strength.

EVS 1671 Then there would be a requisition, like the time when the Supplies Team got bold of 100,000 eggs and that was great.

F82 12 Yes, if we skip all the intermediate years with, after the war I came back from the army to find we'd been bombed out and were living in requisition accommodation, after a time, the, we were moved into a new flat over some shops.

F82 43 Mm, so when you left your, when you came back you said that you went into a requisition property

FE5 261 They requisition and loot and arrest so-called Nazis and Fascists.
GUY 2923 Purchasing receives requisition from appropriate authority.
GUY 2932 Purchasing arranges for originating requisition to be met, either directly from supplier or via stores, and amends stock/delivery records as appropriate.

H81 765 James finally agreed to 70, and signed a requisition form, agreeing on behalf of the appellants to pay for the services of the men provided at certain specified rates per diem and also for their travelling expenses and to provide them with food and sleeping accommodation.

HBP 437 (b) Design a simple form to be used as a stationery requisition.

HJA 256 Maintain consumables requisition system CSO

HJA 1730 You will have noted that the Computer Support Officer has resigned, and, until a replacement is appointed, we will continue to have problems with the fault logging and consumable requisition systems.

HRJ 256 the receipt by the President of a requisition submitted by at least 75 Local Parties following the decision of a quorate general meeting; or

HX8 1226 The Executive Committee may at any time call an Extraordinary General Meeting on receipt of a requisition signed by not less than 40 members, such requisitions to state business to be transacted.

HXU 1667 He encouraged the government to requisition the workers, and signed the order himself.

J1B 355 USAAF red-tape would be insurmountable but then providence provided the solution when Tommie had the opportunity of liberating one by ‘midnight requisition’ from a damaged P-38.

J6Y 712 In Northern Regional Health Authority v Crouch [1984]1 QB 644, the Court of Appeal held that the court does not have the powers of an arbitrator under standard form construction contracts to “open up, review, and revise any certificate, opinion, decision, requisition or notice… and to determine all matters in dispute…”

J77 229 9.1 The Tenant shall assume the right of the Landlord to grant the Lease and shall not require any evidence of or raise any objection requisition or inquiry in respect of the Landlord's title to the Site [or the Premises]

J77 230 9.2 The Premises shall be demised subject to the matters set out or referred to in clause… of the draft lease annexed and the Tenant or the Tenant's solicitors having been supplied with such information as the Landlord has concerning the same the Tenant has entered into this agreement with notice of and shall raise no objection requisition or inquiry in respect of such matters

J79 511 A The property is sold subject to the [burdens and other provisions] contained in [the said conveyance], entries on the Register other than financial charges and a copy thereof having been supplied to the buyer's conveyancers the buyer shall be deemed to purchase with full knowledge of the same and shall not raise any requisition or objection relating thereto.

J79 513 A [copy][copies] thereof having been supplied to the buyer's conveyancers the buyer shall be deemed to purchase with full knowledge of the same and shall not raise any requisition or objection relating thereto.

J79 633 To protect a buyer, it is best to advise making careful enquiry at the property: and include in one's requisitions on title, specific enquiry (now a standard printed requisition) as to whether any person other than the seller has any interest in the property.

J79 1072 If only an ordinary copy (not an office copy) has been delivered to you, then the date to search from is that on which the land certificate was last checked with the entries on the Register, this being the date given in the land certificate which will be supplied by the seller on appropriate requisition— "What is the date on which the land certificate was last compared with the entries on the register?"

J79 1076 Every District Land Registry sends its replies by first-class mail, often by return of post, to all searches received by first-class post; therefore it should be your invariable practice to send your requisition by first-class mail, too; otherwise, being delivered by second delivery (and sometimes later than that), it will only be dealt with the following day.

J79 1106 Any mortgages affecting the seller's title will be revealed by the Charges Register, and will give rise to some such requisition as this: The registered charge (entries nos on the Charges Register) must be discharged on or before completion—or if the mortgagee is a building society, add: or the usual undertaking in that behalf handed over on completion.

J79 1112 Acting for a buyer in such a case the appropriate requisition is: Withdrawal of Notice of Deposit (entry no on the charges register) relating to the property must be handed over on completion.
So acting for a buyer, if no protective entries appear on the Register you need have no qualms; if they do, you will of course question them by requisition or otherwise.

If there is any discrepancy between the two, mark it (see (6)) for a requisition.

This procedure is also a help when you come to check the reply to your standard requisition: "Which of the abstracted documents will be handed over on completion?"

Remember that when a probate or letters of administration constitute one of the title documents it's unlikely in any event to be handed over, so look for a covenant for its production and if one isn't abstracted, make a requisition on the point, although you should note covenants for production are not necessary in deeds giving rise to first registration.

Look, too, for a memorandum of a subsequent conveyance, etc, endorsed on a probate or letters of administration; if there's none, but there ought to be one, make a requisition on the point, such as: The abstract does not reveal a memorandum of the conveyance of endorsed on the probate dated.

And when your client is buying from executors or administrators, remember, as you make your notes on title, to include a reminder to make a requisition asking for a memorandum of the conveyance to your client to be endorsed on the probate or letters of administration on completion, and to be furnished with a copy.

The usual reply to the requisition incorporating practical enquiries is: Confirmed, except as they may have been varied or added to by subsequent correspondence between us.

requisition, if you're in the position say then it's like it's for a common cause

Well he was as good as they come, as far as I was concerned, because if it could be had, swiped, stolen, midnight requisition or just purely ordered from some place, when we needed it we got it.

In the autumn of 1915 the Government had assumed powers to requisition at fixed prices all cereal products; in 1916 these powers were extended to sugar, milk and eggs, but only limited use was made of them.
Annexe 4-8-1 Employee Requisition Form – University of Portsmouth

Employee Requisition Form

If you have a requirement for a casual member of staff this form should be completed attaching a job description and advert and sent to HRRrecruitment@port.ac.uk. The advertisement will be used to advertise your casual role through Purple Door, if applicable.

- This completed requisition form and job description will be used to check the requirements of your vacancy against the skills and experience of any staff that may be at risk. This process is known as 'ringfencing'. If there is no one suitable on the ‘ring fence’ the information provided on the advertisement, job description and employee requisition form will be forwarded to Purple Door to advertise to current students or graduates who may be seeking temporary or casual employment. Forms received by 12pm on Wednesday will be advertised through Purple Door the following Monday.

- If no one is suitable from the ring fence and you have identified a suitable candidate for this role, who has the essential skills (e.g. requirement for research, specialist secretarial skills), you may offer the role to them without advertising the role using Purple Door.

- In order for HR to raise a casual contract of employment your identified candidate will be required to complete the employee part of the Casual Employee Form, HESA & EO Forms (HR005) and take this to the employing department including their passport for photocopying (you need to sign to confirm that you have seen the original passport on the copy) and any supporting visa information.

- Once all the completed information has been received and checked it should be scanned to HREnquiries@port.ac.uk or if no scanning facilities are available the documents should be returned to the HR Department, University House. The casual forms are available to download from:

  [http://www.port.ac.uk/departments/services/humanresources/recruitmentandselection/informationforrecruiters/essentialinformationandformsforrecruiters/](http://www.port.ac.uk/departments/services/humanresources/recruitmentandselection/informationforrecruiters/essentialinformationandformsforrecruiters/)

- No old forms will be accepted.

Annexe 4-8-2 Mail INTERNSHIP Pay and Work rights Portsmouth

RE: Directgov Enquiry <#11666-284830#> - george.somni@gmail.com - Gmail

The interaction id for the email is 2m6c3c

Dear George,

Thank you for contacting the Pay and Work Rights Helpline.
The Pay and Work Rights Helpline provides information and advice on a number of government enforced employment rights that are there to protect both employers and workers.

What is work experience?

- The term ‘work experience’ generally refers to a specified period of time that an individual spends with a business - during which they have an opportunity to learn about and develop their skills.
- An individual’s entitlement to the national minimum wage (NMW) will depend on whether the work experience offered makes the individual a worker for NMW purposes.

What counts as an internship?

- Work experience is sometimes referred to as a ‘disconnection’ or an ‘internship’. In common usage, internships are sometimes understood to be positions requiring a high level of time off from full-time work experience and are associated with gaining experience for a professional career.
- However, the term ‘intern’ has no legal status under NMW law and entitlement to the NMW does not depend on what someone is called, the type of work they do, how long they are employed or whether they work full-time.
- The reason whether the agreement or arrangement they have with the employer makes them a worker for NMW purposes.
- Some forms of work experience, including placements and internships, may be referred to as “capstone work” or “apprenticeship only”, where an individual gains their skills while they work for an organization, providing such positions should check if the individual is a worker for NMW purposes or if an exemption applies.
- If the individual is not an active volunteer and is not exempt, then they must be paid at least the NMW.

As we advise on National Minimum Wage in the UK on this helpline, this is all we can provide you with in response to your last query. In regards to your other 2 queries, this is do. We are unable to let you work to speak to us on this matter.

I hope this information is useful for you.
Occurrences de ELECT(ION) et NOMINATION dans CAEMS

ELECTION

1971

1. QUALIFICATIONS: Normally a degree, preferably with 1st or 2nd class honours, in physics, biology or chemistry; or corporate membership of an appropriate professional institution (those awaiting election will also be considered). [745-009 (1971) : 57]

2. The Committee on Turner and Newall Research Fellowships proposes to make an election in Hilary Term 1972 to a Fellowship commencing at the beginning of the academic year 1972-3 and tenable for two years in the first instance. [772-091 (1971) : 64]

3. Pembroke College proposes to elect an Official Tutorial Fellow to teach for the Honour School of Physiological Sciences. [774-015 (1971) : 189]

4. The College proposes to elect an Official Fellowship in Physiology to be held in conjunction with a University appointment. [774-045 (1971) : 191]

5. The Fellowship offered might be either an Official Fellowship or a Senior Research Fellowship, depending upon the amount of tutorial work the fellow-elect would wish to undertake. [774-054 (1971) : 192]

1995

1. In exceptional circumstances, as for example where there have been career breaks on family or other grounds, the Institute would consider electing a Fellow aged up to 40 years. [2006-074 (1995) : 81]

2. The Governing Body of Clare Hall proposes to elect one or more non-stipendiary Research Fellows in the Sciences for a period of three years starting mainly from October 1996. [1998-054 (1995) : 89]

2005

1. If the appointee is a man he will be elected a Fellow of Wadham; [2519-076 (2005) : 78]

2. The College proposes to elect, in February 2006, one or two Fellows by Examination. [2511-053 (2005) : 71]

Dear Sir,

I am doing a PhD in the special language used in job ads for 10:19 (t x 25 minutes).

New College Wardian
10.25 (t x 15 minutes)

Dear Sir,

Thank you for your email. There are many different kinds of roles at Oxford University, but most are called "tutorial fellow." These are the normal teachers or professors at other universities. Most fellows have some association with at least one of the 31 separate colleges which make up the University, and many of them are employed directly by the colleges rather than by the departments. People are appointed to the normal way by selection through a major college. Once selected, fellows are appointed and elected by their college but who has not started working under the terms of their contract. I hope this makes sense.

Best wishes,
Currie Price
Dear sir,

I am doing a PhD on the special language used in job ads from a corpus taken from New Scientist. I am currently studying the term "elect" ("fellow-elect"). Could you give me some links concerning the election process of fellows in Oxford or elsewhere? Thank you in advance for your time.

George Sasin
Université de Lorraine France.

Dear George,

The key documents which govern the election process of Fellows at St Catherine’s are our Statutes and By-Laws which can be downloaded at:

https://www.stcatz.ox.ac.uk/policies-procedures/our-policies-and-procedures

Yours sincerely,

Cressida Chapell
